In re: *Approval of the Amendments to the Interconnection Agreement Negotiated by BellSouth Telecommunications, Inc. and Momentum Business Solutions, Inc. Pursuant to Sections 251 and 252 of the Telecommunications Act of 1996*

Docket No. 01-00694

02-01019

PETITION FOR APPROVAL OF THE
AMENDMENTS TO THE INTERCONNECTION AGREEMENT
NEGOTIATED BETWEEN BELL SOUTH TELECOMMUNICATIONS, INC.
AND MOMENTUM BUSINESS SOLUTIONS, INC.
PURSUANT TO THE TELECOMMUNICATIONS ACT OF 1996

COME NOW, Momentum Business Solutions, Inc. ("Momentum") and BellSouth Telecommunications, Inc., ("BellSouth"), and file this request for approval of the Amendments to the Interconnection Agreement dated May 5, 2000 (the "Amendments") negotiated between the two companies pursuant to Sections 251 and 252 of the Telecommunications Act of 1996, (the "Act"). In support of their request, Momentum and BellSouth state the following:

1. Momentum and BellSouth have successfully negotiated an agreement for interconnection of their networks, the unbundling of specific network elements offered by BellSouth and the resale of BellSouth's telecommunications services to Momentum. The Interconnection Agreement was approved by the Tennessee Regulatory Authority ("TRA") on October 9, 2001.
2. The parties have recently negotiated four Amendments to the Agreement. The first Amendment adds market rates for certain UNE Combinations. The second Amendment adds rates for UNE coin and centrex. The third Amendment adds provisions and rates for UNE Remote Call Forwarding. The fourth Amendment adds the Alabama

ordered rates and revises the language for not Currently Combined combinations. Copies of the Amendments are attached hereto and incorporated herein by reference.

3. Pursuant to Section 252(e) of the Telecommunications Act of 1996, Momentum and BellSouth are submitting their Amendments to the TRA for its consideration and approval. The Amendments provide that either or both of the parties are authorized to submit these Amendments to the TRA for approval.

4. In accordance with Section 252(e) of the Act, the TRA is charged with approving or rejecting the negotiated Amendments between BellSouth and Momentum within 90 days of its submission. The Act provides that the TRA may only reject such an agreement if it finds that the agreement or any portion of the agreement discriminates against a telecommunications carrier not a party to the agreement or the implementation of the agreement or any portion of the agreement is not consistent with the public interest, convenience and necessity.

5. Momentum and BellSouth aver that the Amendments are consistent with the standards for approval.

6. Pursuant to Section 252(i) of the Act, BellSouth shall make the Agreement available upon the same terms and conditions contained therein.

Momentum and BellSouth respectfully request that the TRA approve the Amendments negotiated between the parties.

This 12th day of Sept., 2002.

Respectfully submitted,

BELLSOUTH TELECOMMUNICATIONS, INC.

NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge.													
NOTE: (2) Any element that can be ordered electronically will be billed according to the SOMECH rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOMECH rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLEC's bill when it submits an LSR to BellSouth.

4.2.11.5 Remote Call Forwarding

- 4.2.11.5.1 As an option, BellSouth shall make available to Momentum an unbundled port with Remote Call Forwarding capability ("URCF service"). URCF service combines the functionality of unbundled local switching, tandem switching and common transport to forward calls from the URCF service telephone number (the number dialed by the calling party) to another telephone number selected by the URCF service subscriber. When ordering URCF service, Momentum will ensure that the following conditions are satisfied:
- 4.2.11.5.2 That the end user of the forward-to number (service) agrees to receive calls forwarded using the URCF service (if such end user is different from the URCF service end user);
- 4.2.11.5.3 That the forward-to number (service) is equipped with sufficient capacity to receive the volume of calls that will be generated from the URCF service;
- 4.2.11.5.4 That the URCF service will not be utilized to forward calls to another URCF or similar service; and
- 4.2.11.5.5 That the forward-to number (service) is not a public safety number (e.g. 911, fire or police number).
- 4.2.11.5.6 In addition to the charge for the URCF service port, BellSouth shall charge Momentum the rates set forth in Exhibit B for unbundled local switching, tandem switching, and common transport, including all associated usage, incurred for calls from the URCF service telephone number (the number dialed by the calling party) to the forward- to number (service).

NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the Bellsouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge. (2) Any element that can be ordered electronically will be billed according to the SOMECS rate listed in this category. Please refer to Bellsouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOMECS rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLEC's bill when it submits an LSR to Bellsouth.

	OPERATIONAL SUPPORT SYSTEMS												
	NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge. NOTE: (2) Any element that can be ordered electronically will be billed according to the SOMECC rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOMECC rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLEC's bill when it submits an LSR to BellSouth. Electronic OSS Charge, per LSR, submitted via BSI's OSS Interactive Interfaces (Regional)

	NOTE: Transmission/usage charges associated with PORTS circuit switched usage will also apply to circuit switched voice and/or circuit switched data transmission by B-Channels associated with 2-wire ISDN ports.												
	NOTE: Access to B Channel or D Channel Packet capabilities will be available only through BBR-New Business Request Process. Rates for the packet capabilities will be determined via the Bona Fide Request/New Business Request Process.												
	UNBUNDLED PORT/LOOP COMBINATIONS - COST BASED RATES												
	Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.												
	Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.

		These scenarios include:											
		1. Unbundled port/loop combinations that are Not Currently Combined in Alabama, Florida and North Carolina.											
		2. Unbundled port/loop combinations that are Currently Combined or Not Currently Combined in Zone 1 of the Top 8 MSAs in BellSouth's region for end users with 4 or more DSO equivalent lines.											
		The Top 8 MSAs in BellSouth's region are: FL (Orlando, Ft. Lauderdale, Miami); GA (Atlanta); LA (New Orleans); NC (Greensboro-Winston Salem-Highpoint/Charlotte-Gastonia-Rock Hill); TN (Nashville).											
		BellSouth currently is developing the billing capability to mechanically bill the recurring and non-recurring Market Rates in this section except for nonrecurring charges for not currently combined in AL, FL and NC. In the interim where BellSouth cannot bill Market Rates, BellSouth shall bill the rates in the Cost-Based section preceding in lieu of the Market Rates and reserves the right to true-up the billing difference.											
		The Market Rate for unbundled ports includes all available features in all states.											
		End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations which have a flat rate usage charge (USOC).											
		For Not Currently Combined scenarios where Market Rates apply, the Nonrecurring charges are listed in the First and Additional NRC columns for each Port USOC. For Currently Combined scenarios, the Nonrecurring charges are listed in the NRC - Currently Combined section. Additional NRCs may apply also and are categorized accordingly.

OPERATIONAL SUPPORT SYSTEMS													
NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge. NOTE: (2) Any element that can be ordered electronically will be billed according to the SOMECSOMAN rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOMECSOMAN rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMECSOMAN, will be applied to a CLEC's bill when it submits an LSR to BellSouth. Electronic OSS Charge, per LSR, submitted via BST's OSS Interactive Interfaces (Regional)
