UNBUNDLED PORT/LOOP COMBINATIONS - COST BASED RATES																
	Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.															
	Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.															
	End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.															
	The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections.

UNBUNDLED PORT LOOP COMBINATIONS - MARKET RATES																
	Market Rates shall apply where BellSouth is not required to provide unbundled local switching or switch ports per FCC and/or State Commission rules.															
	This includes:															
	Unbundled port/loop combinations that are Currently Combined or Not Currently Combined in Zone 1 of the Top 8 MSAS in BellSouth's region for end users with 4 or more DS0 equivalent lines.															
	The Top 8 MSAs in BellSouth's region are: FL (Orlando, Ft. Lauderdale, Miami); GA (Atlanta); LA (New Orleans); NC (Greensboro-Winston Salem-Highpoint/Charlotte-Gastonia-Rock Hill); TN (Nashville).															
	BellSouth currently is developing the billing capability to mechanically bill the recurring and non-recurring Market Rates in this section except for nonrecurring charges for not currently combined in FL and NC. In the interim where BellSouth cannot bill Market Rates, BellSouth shall bill the rates in the Cost-Based section preceding in lieu of the Market Rates and reserves the right to true-up the billing difference.															
	The Market Rate for unbundled ports includes all available features in all states.															
	End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations which have a flat rate usage charge (USOC: URECU).															
	For Not Currently Combined scenarios the Nonrecurring charges are listed in the First and Additional NRC columns for each Port USOC. For Currently Combined scenarios, the Nonrecurring charges are listed in the NRC - Currently Combined section. Additional NRCs may apply also and are categorized accordingly.

UNBUNDLED CENTREX PORT/LOOP COMBINATIONS - COST BASED RATES																
	1. Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.															
	2. Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.															
	3. End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.															
	4. The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos, the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections. Additional NRCs may apply also and are categorized accordingly.															
	5. Market Rates for Unbundled Centrex Port/Loop Combination will be negotiated on an Individual Case Basis, until further notice.

Note 1 - Required Port for Centrex Control in 1AESS, 5ESS & EWSD																
Note 2 - Requres Interoffice Channel Mileage																
Note 3 - Requires Specific Customer Premises Equipment																
UNBUNDLED CENTREX PORT/LOOP COMBINATIONS - MARKET RATES																
1. Market Rates are applied where BellSouth is not required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.																
2. Recurring Charges for all Standard Centrex and Centrex Conrol Features are Included in the Market Rate																
3. End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.																
4. The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos, the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections. Additional NRCs may apply also and are categorized accordingly.

	The "Zone" shown in the sections for stand-alone loops or loops as part of a combination refers to Geographically Deaveraged UNE Zones. To view Georgraphically Deaveraged UNE Zone Desigantions by C O, refer to Internet Website: http://www.interconnection.bellsouth.com/become_a_clec/html/interconnection.htm															
OPERATIONAL SUPPORT SYSTEMS																
	NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge.															
	NOTE: (2) Any element that can be ordered electronically will be billed according to the SOMEC rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOMEC rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLECs bill when it submits an LSR to BellSouth.															
	Electronic OSS Charge, per LSR, submitted via BST's OSS interactive interfaces (Regional)				SOMEC		3.50									
UNE SERVICE DATE ADVANCEMENT CHARGE																
	NOTE: The Expedite charge will be maintained commensurate with BellSouth's FCC No.1 Tariff, Section 5 as applicable.

UNBUNDLED PORT/LOOP COMBINATIONS - COST BASED RATES																
Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.																
Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.																
End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.																
The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections.

UNBUNDLED PORT LOOP COMBINATIONS - MARKET RATES																
	Market Rates shall apply where BellSouth is not required to provide unbundled local switching or switch ports per FCC and/or State Commission rules.															
	This includes:															
	Unbundled port/loop combinations that are Currently Combined or Not Currently Combined in Zone 1 of the Top 8 MSAS in BellSouth's region for end users with 4 or more DS0 equivalent lines.															
	The Top 8 MSAs in BellSouth's region are: FL (Orlando, Ft. Lauderdale, Miami); GA (Atlanta); LA (New Orleans); NC (Greensboro-Winston Salem-Highpoint/Charlotte-Gastonia-Rock Hill); TN (Nashville).															
	BellSouth currently is developing the billing capability to mechanically bill the recurring and non-recurring Market Rates in this section except for nonrecurring charges for not currently combined in FL and NC. In the interim where BellSouth cannot bill Market Rates, BellSouth shall bill the rates in the Cost-Based section preceding in lieu of the Market Rates and reserves the right to true-up the billing difference.															
	The Market Rate for unbundled ports includes all available features in all states.															
	End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations which have a flat rate usage charge (USOC: URECU).															
	For Not Currently Combined scenarios the Nonrecurring charges are listed in the First and Additional NRC columns for each Port USOC. For Currently Combined scenarios, the Nonrecurring charges are listed in the NRC - Currently Combined section. Additional NRCs may apply also and are categorized accordingly.

UNBUNDLED CENTREX PORT/LOOP COMBINATIONS - COST BASED RATES																
	1. Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.															
	2. Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.															
	3. End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.															
	4. The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos, the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections. Additional NRCs may apply also and are categorized accordingly.															
	5. Market Rates for Unbundled Centrex Port/Loop Combination will be negotiated on an Individual Case Basis, until further notice.

UNBUNDLED CENTREX PORT/LOOP COMBINATIONS - MARKET RATES																
	1. Market Rates are applied where BellSouth is not required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.															
	2. Recurring Charges for all Standard Centrex and Centrex Conrol Features are included in the Market Rate															
	3. End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.															
	4. The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos, the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections. Additional NRCs may apply also and are categorized accordingly.

LOCAL INTERCONNECTION

1.0 Scope

BellSouth shall provide ITC^DeltaCom interconnection with BellSouth's network for the transmission and routing of Telephone Exchange Service **(Local Traffic), ISP-bound Traffic, and Exchange Access (Switched Access Traffic),** pursuant to Section 251 (c)(2) of the Act on the terms and conditions specified in this Attachment 3. [Issue 39]

1 DEFINITIONS: (FOR THE PURPOSE OF THIS ATTACHMENT)

1.1 For purposes of this attachment only, the following terms shall have the definitions set forth below:

1.2 Call Termination has the meaning set forth for "termination" in 47 CFR § 51.701 (d) which is defined as the switching of telecommunications traffic at the terminating carrier's end office switch, or equivalent facility, and delivery of such traffic to the called party's premises.

1.3 Call Transport has the meaning set forth for "transport" in 47CFR § 51.701(c) which is defined as the transmission and any necessary tandem switching of telecommunications traffic subject to section 251(b)(5) of the Act from the interconnection point between the two carriers to the terminating carrier's end office switch that directly serves the called party, or equivalent facility provided by a carrier other than an incumbent LEC.

1.4 Call Transport and Termination is used collectively to mean the switching and transport functions from the Interconnection Point to the last point of switching.

1.5 Common (Shared) Transport is defined as the transport of the originating Party's traffic by the terminating Party over the terminating Party's common (shared) facilities between (1) the terminating Party's tandem switch and end office switch, (2) between the terminating Party's tandem switches, and/or (3) between the terminating Party's host and remote end office switches. All switches referred herein must be entered into the Local Exchange Routing Guide ("LERG").

1.6 Dedicated Interoffice Facility is defined as a switch transport facility between a Party's Serving Wire Center and the first point of switching within the LATA on the other Party's network.

1.7 End Office Switching is defined as the function that establishes a communications path between the trunk side and line side of the End Office switch.

1.8 Fiber Meet is an interconnection arrangement whereby the Parties physically interconnect their networks via an optical fiber interface at which one Party's

facilities, provisioning, and maintenance responsibility begins and the other Party's responsibility ends.

1.9 Interconnection Point ("IP") is the physical telecommunications equipment interface that interconnects the networks of BellSouth and ITC^DeltaCom.

1.10 ISP-bound Traffic is as defined in Section 8 of this Attachment.

1.11 Local Channel is defined as a switched transport facility between a Party's Interconnection Point and the IP's Serving Wire Center.

1.12 Local Traffic is as defined in Section 8 of this Attachment.

1.13 Serving Wire Center is defined as the wire center owned by one Party from which the other Party would normally obtain dial tone for its IP.

1.14 **Tandem Switching is defined as the function that establishes a communications path between two switching offices through a third switching office through the provision of trunk side to trunk side switching.** [Issue 39]

1.15 Transit Traffic is traffic originating on ITC^DeltaCom's network that is switched and/or transported by BellSouth and delivered to a third party's network, or traffic originating on a third party's network that is switched and/or transported by BellSouth and delivered to ITC^DeltaCom's network.

2 Network Interconnection

2.1 This Attachment pertains only to the provision of network interconnection where ITC^DeltaCom owns, leases from a third Party, or otherwise provides its own switch(es).

2.2 At each Party's option, network interconnection in each LATA may be provided at any technically feasible point within the Parties' network, including without limitation the trunk side of any local switch; trunk interconnection points for any tandem switch; central office cross connect points; out-of-band signal transfer points; and the points of access to unbundled elements. Requests to BellSouth for interconnection at other technically feasible points not set forth above may be made through the Bona Fide Request/New Business Request process set out in General Terms and Conditions and Attachment 9.

2.3 ITC^DeltaCom shall establish at least one Interconnection Point with BellSouth **in BellSouth's serving territory** per LATA for the delivery of ITC^DeltaCom's originated Local, **ISP-bound**, **IntraLATA toll** and Transit Traffic. ITC^DeltaCom must establish an interconnection trunk group(s) to at least one BellSouth access tandem within the LATA for the delivery of ITC^DeltaCom's originated Local, **ISP-bound, and IntraLATA toll** and Transit Traffic. ITC^DeltaCom may establish additional trunk groups in such LATA pursuant to this Agreement. If ITC^DeltaCom chooses to interconnect using a single trunk group within a LATA, the interconnection trunk group must be at a BellSouth

Access Tandem. **To the extent ITC^DeltaCom desires to deliver Local Traffic and/or Transit Traffic to BellSouth access tandems within the LATA, other than the tandems(s) to whichITC^DeltaCom has established interconnection trunk groups,ITC^DeltaComshall order Multiple Tandem Access, as described in this Attachment, to such other BellSouth access tandems.** Furthermore, ITC^DeltaCom must establish an interconnection trunk group(s) to all BellSouth access and local tandems where ITC^DeltaCom NXXs are "homed." A "Homing" arrangement is defined by a "Final" Trunk Group between the BellSouth Tandem andITC^DeltaCom End Office switch. A "Final" Trunk Group is the last choice telecommunications path between the Tandem and End Office switch. It is ITC^DeltaCom's responsibility to enter its own NPA/NXX access and/or local tandem "homing" arrangements into the national Local Exchange Routing Guide (LERG). [Issue 39 and 40]

2.4 In order for ITC^DeltaCom to home its NPA/NXX(s) on a BellSouth Tandem, ITC^DeltaCom's NPA/NXX(s) must be assigned to an Exchange Rate Center Area served by that BellSouth Tandem and as specified by BellSouth. The specified association between BellSouth Tandems and Exchange Rate Center Areas is defined in the Local Exchange Routing Guide (LERG). To the extent that as of the date hereof, existing arrangements do not comply with this section, the Parties will work cooperatively to transition existing arrangements to comply with this section.

2.5 For the purposes of this Attachment, the Interconnection Point is further defined as the physical telecommunications interface between BellSouth and ITC^DeltaCom's interconnection functions. It establishes the technical interface and point of operational responsibility. The primary function is to serve as the terminus for the interconnection service. The Interconnection Point has the following main characteristics:

1. It is a cross-connect point to allow connection, disconnection, transfer or restoration of service.
2. It is a point where BellSouth and ITC^DeltaCom can verify and maintain specific performance objectives.
3. It is specified according to the interface offered in the tariff or local interconnection agreement (for example: for DS1 service the FCC # 1 tariff specifies that the interface meets the technical specifications detailed in Generic Requirements GR-342-CORE, Issue 1, December 1995.)
4. The Parties provide their own equipment (CPE) to interface with the DS0, DS1, DS3, STS1 and/or OCn circuits on the customer premises.

2.6 The IP must be located within BellSouth's serving territory in the LATA in which traffic is originating. In the establishment of BellSouth's Interconnection Point, if BellSouth chooses to collocate with ITC^DeltaCom, BellSouth will pay ITC^DeltaCom collocation charges at rates no more than the BellSouth collocation rates that BellSouth charges ITC^DeltaCom.

2.7 **A minimum of one Interconnection Point shall be established in each LATA in which ITC^DeltaCom originates, terminates, or exchanges local traffic, or ISP-bound traffic, and intraLATA Toll Traffic and interconnects with BellSouth. The location of the initial Interconnection Point shall be established by mutual agreement of the Parties. In selecting the initial Interconnection Point, both Parties will act in good faith and select the point which is most efficient for both Parties. Each Party shall be responsible for engineering and maintaining the network on its side of the Interconnection Point. Establishment of an initial Interconnection Point will be initiated by written request and will be based on traffic volumes and patterns, facilities available, and other factors unique to the area. If the Parties are unable to agree to an initial mutual Interconnection Point, each Party will designate the initial Interconnection Point for its originated traffic. The Parties agree that they have, at the time of entering into this agreement, existing Interconnection Points in certain LATAs. As such, the Parties agree that if either Party desires to transition an existing Interconnection Point or Points, the transition of the first Interconnection Point in a LATA will be pursuant to this Section 2.7. The transition of a subsequent Interconnection Point or Points in a LATA shall be pursuant to Section 2.8 below.** [Issue 40]

2.8 **Additional Interconnection Points in a particular LATA may be established by mutual agreement of the Parties. Absent mutual agreement, in order to establish additional Interconnection Points in a LATA, the traffic between ITC^DeltaCom and BellSouth at the proposed additional Interconnection Point must exceed 8.9 million minutes of Local, IntraLATA or ISP-bound Traffic per month for three consecutive months during the busy hour. BellSouth will not designate an Interconnection Point at a Central Office where physical or virtual collocation space or BellSouth fiber connectivity is not available.** [Issue 40]

2.9 The Parties shall make available to each other one way and two way trunks for the reciprocal exchange of combined local, ISP-bound and **IntraLATA toll traffic. When the Parties agree to utilize two-way interconnection trunk groups for the exchange of Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic the Parties must agree to the location of the IP(s).** [Issue 40]

2.10 Each Party agrees to use its best efforts and act in good faith to adopt reasonable procedures to facilitate the addition of appropriate local interconnection trunks and facilities for the exchange of traffic between each Party's network.

2.11 Methods of Interconnection

Each Party at its election shall have the sole right and discretion to specify any one of the following methods for interconnection at the Interconnection Point:

a) a Fiber-Meet as set forth in Section 4 of this Attachment;

b) a collocation facility which it maintains at the other Party's Interconnection Point wire center (i.e., physical collocation as set forth in Attachment 4 of this Agreement);

c) a collocation facility maintained at the Interconnection Point wire center by a third party with whom the Party requesting interconnection has contracted for such purpose;or

d) Interconnection via purchase of leased facility(ies) as set forth in Section 3 below.

2.12 ITC^DeltaCom shall provide written notice to BellSouth to change from one of the interconnection methods specified above to another of the interconnection methods specified above. The parties shall negotiate in good faith the interval for changing the interconnection methods. A mutually acceptable third party contractor can be employed by the Party making the change.

3 Interconnection via Purchase of Facilities

3.1 **As part of Call Transport and Termination, the originating Party may obtain Local Channel facilities from the terminating Party. The percentage of Local Channel facilities utilized for Local Traffic shall be determined based upon the application of the Percent Local Facility (PLF) Factor on a statewide basis. The charges applied to the percentage of Local Channel facilities used for Local Traffic and ISP-Bound Traffic as determined by the PLF are as set forth in Exhibit A to this Attachment. The remaining percentage of Local Channel facilities shall be billed at the terminating Party's applicable access tariff rates.** [Issue 41]

3.2 **As part of Call Transport and Termination, the originating Party may obtain Dedicated Interoffice Facilities from the terminating Party. The percentage of Dedicated Interoffice Facilities utilized for Local Traffic shall be determined based upon the application of the Percent Local Facility (PLF) Factor on a statewide basis. The charges applied to the percentage of the for Dedicated Interoffice Facilities used for Local Traffic as determined by the PLF are as set forth in Exhibit A to this Attachment. The remaining percentage of the Dedicated Interoffice Facilities shall be billed at BellSouth's applicable access tariff rates.** [Issue 41]

3.3 The facilities purchased pursuant to this Section 3 shall be ordered via the Access Service Request ("ASR") process.

4 Fiber Meet

4.1 If ITC^DeltaCom elects to interconnect with BellSouth pursuant to a Fiber Meet, ITC^DeltaCom and BellSouth shall jointly engineer and operate a Synchronous Optical Network ("SONET") transmission system by which they shall interconnect their networks for the transmission and routing of Telephone Exchange Service traffic pursuant to Section 251 (c)(2) of the Act. The Parties shall work together to determine the specific SONET transmission system. However, ITC^DeltaCom's SONET transmission system must be compatible with BellSouth's equipment in the Serving Wire Center. The Parties respective equipment and software versions must be compatible with each other and the Data Communications Channel (DCC) must be turned off. BellSouth reserves the right to determine the equipment (and compatibility thereof) that it employs for service.

4.2 BellSouth shall, wholly at its own expense, procure, install and maintain the agreed upon SONET equipment in the BellSouth central office within the interconnection wire center.

4.3 ITC^DeltaCom shall, wholly at its own expense, procure, install and maintain the agreed upon SONET equipment in the ITC^DeltaCom central office within the interconnection wire center.

4.4 BellSouth shall designate an Interconnection Point outside the BellSouth central office within the interconnection wire center as a Fiber Meet point, and shall make all necessary preparations to receive, and to allow and enable ITC^DeltaCom to deliver, fiber optic facilities into the Interconnection Point with sufficient spare length to reach the fusion splice point at the Interconnection Point. BellSouth shall, wholly at its own expense, procure, install and maintain the fusion splicing point in the Interconnection Point. A Common Language Location Identification ("CLLI") code will be established for each Point of Interface. The code established must be a building type code. All orders shall originate from the Interconnection Point (i.e., Interconnection Point to ITC^DeltaCom, Interconnection Point to BellSouth).

4.5 ITC^DeltaCom shall deliver and maintain such strands wholly at its own expense. Upon verbal request by ITC^DeltaCom, BellSouth shall allow ITC^DeltaCom access to the Fiber Meet entry point for maintenance purposes as promptly as possible.

4.6 The Parties shall jointly coordinate and undertake maintenance of the SONET transmission system. Each Party shall be responsible for maintaining the components of the SONET transmission system (e.g., software upgrades).

4.7 Each Party will be responsible for (i) providing its own transport facilities to the Fiber Meet, (ii) the cost to build-out its facilities to such Fiber Meet, and (iii) ITC^DeltaCom can use BellSouth's dark fiber leases as ITC^DeltaCom's portion of the network between the ITC^DeltaCom POP and the Interconnection Point.

4.8 Neither Party shall charge the other for its portion of the Fiber Meet facility used exclusively for non-transit local traffic (i.e. the Local Channel). Charges incurred for other services including dedicated transport facilities to the Point of Interconnection if applicable will apply. **ITC^DeltaCom shall be billed for a mixed use of the Local Channel as set forth in the appropriate tariff(s) using the applicable factors supplied by ITC^DeltaCom pursuant to this Attachment.** Charges for Switched and Special Access Services shall be billed in accordance with the applicable Access Service tariff. [Issue 41]

5 Jurisdictional Reporting

5.1 Percent Local Use. Each Party will report to the other a Percentage Local Usage ("PLU"). The application of the PLU will determine the amount of local **or ISP-bound** minutes to be billed to the other party. For purposes of developing the PLU, each party shall consider every local, **and ISP-bound** call, and every long distance call. Effective on the first of January, April, July and October of each year, BellSouth and ITC^DeltaCom shall provide a positive report updating the PLU **and shall send it to the other Party to be received no later than 30 days after the first of each such month based on local usage for the past three months ending the last day of December, March, June and September, respectively.** Detailed requirements associated with PLU **calculating and** reporting shall be as set forth **in BellSouth's Standard Percent Local UseJurisdictional Factors Reporting PlatformGuide, as it is amended from time to time during this Agreement.** . [Issue 41, 58]

5.2 **Percent Local Facility. Each Party shall report to the other a Percent Local Facility ("PLF") factor. The application of the PLF will determine the portion of switched dedicated transport to be billed per the local jurisdiction rates. The PLF shall be applied to Multiplexing, Local Channel and Interoffice Channel Switched Dedicated Transport utilized in the provision of local interconnection trunks. Each Party shall update its PLF on the first of January, April, July and October of the year and shall send it to the other Party to be received no later than 30 days after the first of each such month**

to be effective the first bill period the following month, respectively. Requirements associated with PLU and PLF calculation and reporting shall be as set forth in BellSouth's Jurisdictional Factors Reporting Guide, as it is amended from time to time. [Issue 41, 58]

5.3 **Each Party shall report to the other the projected Percent Interstate Usage ("PIU") factor. All jurisdictional report requirements, rules and regulations for Interexchange Carriers specified in BellSouth's Intrastate Access Services Tariff will apply to ITC^DeltaCom. After interstate and intrastate traffic percentages have been determined by use of PIU procedures, the PLU and PLF factors will be used for application and billing of local interconnection. Each Party shall update its PIUs on the first of January, April, July and October of the year and shall send it to the other Party to be received no later than 30 days after the first of each such month, for all services showing the percentages of use for the past three months ending the last day of December, March, June and September.** [Issue 41, 58]

5.4 **Notwithstanding the provisions in Section 5.1, 5.2, and 5.3 above, where the terminating Party has message recording technology that identifies the jurisdiction of traffic terminated as defined in this Agreement, such information shall, at the terminating Party's option, be utilized to determine the appropriate jurisdictional reporting factors (PLU, PIU, and/or PLF), in lieu of those provided by the originating Party. In the event that the terminating Party opts to utilize its own data to determine jurisdictional reporting factors, such terminating Party shall notify the originating Party at least 15 days prior to the beginning of the calendar quarter in which the terminating Party will begin to utilize its own data. Such factors shall subject to the Dispute Resolution provisions in this Agreement, as well as the Audit provisions set forth in 5.7 below.** [Issue 41, 58]

5.5 CCS7 ACCESS ARRANGEMENT SPIU

5.5.1 If a carrier has access to CCS7 Signaling Services monitoring software, then that carrier may use this software to identify the appropriate jurisdictional factors (SPIU/SPLU) on its signaling with BellSouth and report these factors in the same format detailed herein.

5.5.2 If, however, a carrier does not have access to CCS7 Signaling Services monitoring software, then an SPIU for CCS7 Signaling Services shall be developed and reported based upon the associated billed minutes of use for SWA Usage-based services. The signals associated with billed minutes that are jurisdictionally interstate, as a percentage of the signals associated with total billed minutes shall be reported as the CCS7 Access SPIU. Where the customer is a "Third Party Provider" of CCS7 services then the SPIU will be developed based upon a weighted average of all of that provider's "Third Party Customer's"

end user traffic. Carriers developing and reporting an SPIU in this manner shall inform BellSouth of the methodology used to determine the signals associated with billed minutes that jurisdictionally interstate and the methodology used to determine the signals associated with total billed minutes.

5.6 CCS7 ACCESS ARRANGEMENT SPLU

5.6.1 If a carrier has access to CCS7 Signaling Services monitoring software, then that carrier may use this software to identify the appropriate jurisdictional factors (SPIU/SPLU) on its signaling with BellSouth and report these factors in the same format detailed herein.

5.6.2 If, however, a carrier does not have access to CCS7 Signaling Services monitoring software, then an SPLU for CCS7 Signaling Services shall be developed and reported based upon the associated billed minutes of use for SWA Usage-based services and Local Interconnection services. The signals associated with billed minutes that are jurisdictionally local, as a percentage of the signals associated with total intrastate billed minutes shall be reported as the CCS7 Access SPLU. Where the customer is a "Third Party Provider" of CCS7 services then the SPLU will be developed based upon a weighted average of all of that provider's "Third Party Customer's" end user traffic. Carriers developing and reporting an SPLU in this manner shall inform BellSouth of the methodology used to determine the signals associated with billed minutes that jurisdictionally interstate and the methodology used to determine the signals associated with total billed minutes.

5.7 Audits

5.7.1 On thirty (30) days written notice, each party must provide the other the ability and opportunity to conduct an annual audit to ensure the proper billing of traffic. BellSouth and ITC^DeltaCom shall retain records of call detail for a minimum of nine months from which a PLU**, PLF, and/or PIU** can be ascertained. The audit shall be accomplished during normal business hours at an office designated by the party being audited. Audit requests shall not be submitted more frequently than one (1) time per calendar year. Audits shall be performed by a mutually acceptable independent auditory paid for by the party requesting the audit. The PLU**, PLF, and/or PIU** shall be adjusted based upon the audit results and shall apply to the usage for the quarter the audit was completed, to the usage for the quarter prior to the completion of the audit, and to the usage for the two quarters following the completion of the audit. **If as a result of an audit, either Party is found to have overstated the PLU and/or PIU by twenty percentage points (20%) or more, that Party shall reimburse the auditing Party for the cost of the audit.** [Issue 42]

6 Interconnection Trunking and Routing

6.1 **BellSouth Access Tandem Interconnection**
BellSouth access tandem interconnection at a single access tandem provides access to those end offices subtending that access tandem ("Intratandem Access"). Access tandem interconnection is available for any of the following access tandem architectures.

6.1.1 Trunking Options. **Each of the following trunking arrangements shall be available to either Party,** unless BellSouth demonstrates, consistent with objectively verifiable engineering standards, that such arrangement is not technically feasible. **BellSouth and ITC^DeltaCom shall establish interconnecting trunk groups and trunking configurations between networks including the establishment of one-way or two-way trunks in accordance with the following conditions. For trunking purposes, traffic will be routed in accordance with the LERG. .ITC^DeltaCom may choose which of the following trunking arrangements to utilize, except for the use of the Two-Way Trunking Configuration/Architecture as set forth in Section 3.2.1.2 below, which must be mutually agreed to by the Parties.**

6.1.1.1 One-WayTrunking Configuration (Architecture) In one-way trunk group architecture, the Parties interconnect using three separate trunk groups. A one-way trunk group provides Intratandem Access for ITC^DeltaCom-originated Local Traffic destined for BellSouth end-users. A second one-way trunk group carries BellSouth-originated Local Traffic destined for ITC^DeltaCom end-users. A two-way trunk group provides Intratandem Access for ITC^DeltaCom's originating and terminating Transit Traffic. This trunk group carries Transit Traffic between ITC^DeltaCom and Independent Companies, Interexchange Carriers, other CLECs, CMRS providers that have a Meet Point Billing arrangement with BellSouth, and other network providers with which ITC^DeltaCom desires to exchange traffic. This trunk group also carries ITC^DeltaCom originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an Independent Company tandem or other CLEC tandem. BellSouth originated Local Traffic is transported on a separate single one-way trunk group terminating to ITC^DeltaCom. Both Parties will use the Trunk Group Service Request to request changes in trunking. Both Parties will use the ASR to order trunks. **Other trunk groups for operator services, directory assistance, emergency services and intercept must be established pursuant to the applicable BellSouth tariff or the Bona Fide Request/New Business Request process set out in General Terms and Conditions and Attachment 9 if service is requested.** The LERG contains current routing and tandem serving arrangements. The one-way trunk group architecture is illustrated in Exhibit D. [Issue 44]

6.1.1.2 Two-Way Trunking Configuration (Architecture). Upon mutual agreement of the Parties in a joint planning meeting, the Parties' shall exchange Local Traffic on two-way interconnection trunk group(s) with the quantity of trunks being mutually determined and the provisioning being jointly coordinated. Furthermore, the Parties shall agree upon the IP(s) for two-way interconnection

trunk groups transporting both Parties' Local Traffic. ITC^DeltaCom shall order such two-way trunks via the Access Service Request (ASR) process. BellSouth will use the Trunk Group Service Request (TGSR) to request changes in trunking. Furthermore, the Parties shall jointly review trunk performance and forecasts on a periodic basis. The Parties' use of two-way interconnection trunk groups for the transport of Local Traffic between the Parties does not preclude either Party from establishing additional one-way interconnection trunks for the delivery of its originated Local Traffic to the other Party. Upon agreement of the Parties as set forth above, the two-way trunk group Architecture establishes one two-way trunk group to provide Intratandem Access for the exchange of Local Traffic between ITC^DeltaCom and BellSouth. In addition, a separate two-way transit trunk group must be established for ITC^DeltaCom's originating and terminating Transit Traffic. This trunk group carries Transit Traffic between ITC^DeltaCom and Independent Companies, Interexchange Carriers, other CLECs, CMRS providers that have a Meet Point Billing arrangement with BellSouth, and other network providers with which ITC^DeltaCom desires to exchange traffic. This trunk group also carries ITC^DeltaCom originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an Independent Company tandem or other CLEC tandem. BellSouth originated traffic may, in order to prevent or remedy traffic blocking situations, be transported on a separate single one-way trunk group terminating to ITC^DeltaCom. However, where ITC^DeltaCom is responsive in a timely manner to BellSouth's transport needs for its originated traffic, BellSouth originating traffic will be placed on the two-way Local Traffic trunk group. **Other trunk groups for operator services, directory assistance, emergency services and intercept must be established pursuant to the applicable BellSouth tariff or the Bona Fide Request/New Business Request process set out in General Terms and Conditions and Attachment 9 if service is requested.** The LERG contains current routing and tandem serving arrangements. The two-way trunk group architecture is illustrated in Exhibit D. [Issue 44]

6.1.1.3 SuperGroup Trunking Configuration (Architecture). . In the supergroup architecture, the Parties' Local Traffic and ITC^DeltaCom's Transit Traffic are exchanged on a single two-way trunk group between ITC^DeltaCom and BellSouth to provide Intratandem Access to ITC^DeltaCom. This trunk group carries Transit Traffic between ITC^DeltaCom and Independent Companies, Interexchange Carriers, other CLECs, CMRS providers that have a Meet Point Billing arrangement with BellSouth, and other network providers with which ITC^DeltaCom desires to exchange traffic. This trunk group also carries ITC^DeltaCom originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an Independent Company tandem or other CLEC tandem. BellSouth originated traffic may, in order to prevent or remedy traffic blocking situations, be transported on a separate single one-way trunk group terminating to ITC^DeltaCom. However, where ITC^DeltaCom is responsive in a timely manner to BellSouth's transport needs for its originated traffic, BellSouth originating traffic will be placed on the Supergroup. **Other**

trunk groups for operator services, directory assistance, emergency services and intercept must be established pursuant to the applicable BellSouth tariff or the Bona Fide Request/New Business Request process set out in General Terms and Conditions and Attachment 9 if service is requested. The LERG contains current routing and tandem serving arrangements. The supergroup architecture is illustrated in Exhibit E. [Issue 44]

6.1.1.4 Basic Trunking Configuration (Architecture) In the basic architecture, ITC^DeltaCom's originating Local Traffic and originating and terminating Transit Traffic is transported on a single two-way trunk group between ITC^DeltaCom and BellSouth access tandem(s) within a LATA to provide Intratandem Access. This trunk group carries Transit Traffic between ITC^DeltaCom and Independent Companies, Interexchange Carriers, other CLECs, CMRS providers that have a Meet Point Billing arrangement with BellSouth, and other network providers with which ITC^DeltaCom desires to exchange traffic. This trunk group also carries ITC^DeltaCom originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an Independent Company tandem or other CLEC tandem. BellSouth originated Local Traffic is transported on a separate single one-way trunk group terminating to ITC^DeltaCom. **Other trunk groups for operator services, directory assistance, emergency services and intercept must be established pursuant to the applicable BellSouth tariff or the Bona Fide Request/New Business Request process set out in General Terms and Conditions and Attachment 9 if service is requested.** The LERG contains current routing and tandem serving arrangements. The basic Architecture is illustrated in Exhibit B. [Issue 44]

6.1.1.5 Any ITC^DeltaCom interconnection request that deviates from the standard trunking configurations as described in this Agreement and that affects traffic delivered to ITC^DeltaCom from a BellSouth switch that requires special BellSouth switch translations and other network modifications will require ITC^DeltaCom to submit a Bona Fide Request/New Business Request via the Bona Fide Request/New Business Request Process set forth in General Terms and Conditions and in Attachment 9.

6.1.1.6 All terms and conditions, as well as charges, both non-recurring and recurring, associated with local interconnecting trunk groups between BellSouth and ITC^DeltaCom are addressed in Exhibit B. For any charge not addressed in Exhibit B, the rates, terms, and conditions for such service shall be as set forth in the appropriate Party's Commission filed and approved interstate or intrastate tariff.

6.1.1.7 **For two-way trunk groups that carry only both Parties' Local Traffic, the Parties shall be compensated at 50% of the nonrecurring and recurring rates for dedicated trunks and DS1 facilities. ITC^DeltaCom shall be responsible for ordering and paying for any two-way trunks carrying Transit Traffic.** [Issue 52]

6.1.2 The Parties shall utilize direct end office trunking under the following conditions:

6.1.2.1 (1) Tandem Exhaust - If a tandem through which the Parties are interconnected is unable to, or is forecasted to be unable to support additional traffic loads for any period of time, the Parties will mutually agree on an end office trunking plan that will alleviate the tandem capacity shortage and ensure completion of traffic between ITC^DeltaCom and BellSouth's subscribers.

6.1.2.2 (2) Traffic Volume –To the extent either Party has the capability to measure the amount of traffic between a ITC^DeltaCom switching center and a BellSouth end office, either Party shall install and retain direct end office trunking sufficient to handle actual or reasonably forecasted traffic volumes, whichever is greater, between a ITC^DeltaCom switching center and a BellSouth end office where the traffic exceeds or is forecasted to exceed a single DS1 of local traffic per month. Either Party will install additional capacity between such points when overflow traffic between ITC^DeltaCom's switching center and BellSouth's end office exceeds or is forecasted to exceed a single DS1 of local traffic per month. In the case of one way trunking, additional trunking shall only be required by the Party whose trunking has achieved the preceding usage threshold.

6.1.2.3 (3) Mutual Agreement - The Parties may install direct end office trunking upon mutual agreement in the absence of the conditions (1) or (2) above and agreement will not unreasonably be withheld.

6.1.3 Switched Access traffic will be delivered to and by IXCs based on ITC^DeltaCom's NXX Access Tandem homing arrangement as specified by ITC^DeltaCom in the national Local Exchange Routing Guide (LERG).

6.1.4 All trunk groups will be provisioned as Signaling System 7 (SS7) capable where technically feasible. If SS7 is not technically feasible multi-frequency (MF) protocol signaling shall be used.

6.1.5 Multiple Tandem Access.

6.1.5.1 Multiple Tandem Access (MTA) provides for LATA wide transport and termination of local, **and ISP-bound**, and **intraLATA toll traffic** of a Party by establishing interconnection trunk group(s) atthe transporting and terminating Party's access tandem with routing through multiple access tandems of the transporting and terminating Party as required. However, the Party originating such traffic must establish interconnection trunk group(s) at all access tandems of the transporting and terminating Party where the originating Party's NXXs are "homed". If the originating Party does not have NXXs homed at an access tandem of the transporting and terminating Party within a LATA and elects not to establish an interconnection trunk group(s) at such access tandem, the originating Party may order MTA in each access tandem of the transporting and terminating

Party within the LATA where it does have interconnection trunk group(s) and the transporting and terminating Party will terminate traffic to end-users served through those access tandems where the originating Party does not have an Interconnection Point. MTA shall be provisioned in accordance with the transporting and terminating Party's Ordering Guidelines. [Issue 39]

6.1.5.2 ITC^DeltaCom may also utilize MTA to route its originated Transit Traffic; however, MTA does not include switched access traffic that transits the transporting and terminating Party's network to an Interexchange Carrier (IXC). Switched Access traffic will be delivered to and by IXCs based on the originating Party's NXX Access Tandem homing arrangement as specified by the originating Party in the national Local Exchange Routing Guide (LERG).

6.1.5.3 For local**, and ISP-bound**, **and intraLATA toll traffic** originated by one Party that the other Party transports but is destined for termination by a third Party network (transit traffic), MTA is required if multiple access tandems are necessary to deliver the call to the third party network. [Issue 39]

6.1.5.4 Compensation for MTA shall be at the applicable tandem switching and transport charges specified in Exhibit A to this Attachment and shall be billed in addition to any Call Transport and Termination charges.

6.1.5.5 To the extent ITC^DeltaCom does not purchase MTA in a LATA served by multiple access tandems, ITC^DeltaCom must establish an interconnection trunk group(s) to every BellSouth access tandem in the LATA to serve the entire LATA. To the extent ITC^DeltaCom routes its traffic in such a way that utilizes BellSouth's MTA service without properly ordering MTA, ITC^DeltaCom shall pay BellSouth the associated MTA charges.

6.1.6 Local Tandem Interconnection. This interconnection arrangement allows ITC^DeltaCom to establish interconnection trunk group(s) at BellSouth local tandems for: (1) the delivery of ITC^DeltaCom-originated local traffic, **ISP-bound Traffic and IntraLATA Toll Traffic** transported and terminated by BellSouth to BellSouth end offices within the local calling area as defined in BellSouth's GSST, section A3 served by those BellSouth local tandems, and (2) for local transit traffic transported by BellSouth for third party network providers who have also established interconnection trunk group(s) at those BellSouth local tandems. [Issue 39]

6.1.7 When a specified local calling area is served by more than one BellSouth local tandem, ITC^DeltaCom must designate a "home" local tandem for each of its assigned NPA/NXXs and establish trunk connections to such local tandems. Additionally, ITC^DeltaCom may choose to establish interconnection trunk group(s) at the BellSouth local tandems where it has no codes homing but is not required to do so. ITC^DeltaCom may deliver local traffic **ISP-bound Traffic and IntraLATA Toll Traffic** to a "home" BellSouth local tandem that is destined for other BellSouth or third party network provider end offices

subtending other BellSouth local tandems in the same local calling area where ITC^DeltaCom does not choose to establish a interconnection trunk group(s). It is ITC^DeltaCom's responsibility to enter its own NPA/NXX local tandem homing arrangements into the Local Exchange Routing Guide (LERG) either directly or via a vendor in order for other third party network providers to determine appropriate traffic routing to ITC^DeltaCom's codes. Likewise, ITC^DeltaCom shall obtain its routing information from the LERG. [Issue 39]

6.1.8 Notwithstanding establishing interconnection trunk group(s) to BellSouth's local tandems, ITC^DeltaCom must also establish interconnection trunk group(s) to BellSouth access tandems within the LATA on which ITC^DeltaCom has NPA/NXX's homed for the delivery of Interexchange Carrier Switched Access (SWA) and toll traffic, and traffic to Type 2A CMRS connections located at the access tandems. BellSouth cannot switch SWA traffic through more than one BellSouth access tandem. SWA, Type 2A CMRS or toll traffic routed to the local tandem in error will not be backhauled to the BellSouth access tandem for completion. (Type 2A CMRS interconnection is defined in BellSouth's A35 General Subscriber Services Tariff.)

6.1.9 BellSouth's provisioning of local tandem interconnection assumes that ITC^DeltaCom has executed the necessary local interconnection agreements with the other third party network providers subtending those local tandems as required by the Act.

6.1.10 Direct connection to an End Office shall provide the Party requesting Interconnection with access to all valid NXX codes served by that End Office. Direct end office trunking may not be unreasonably withheld. Trunking can be established to tandems or end offices or a combination as mutually agreed.

6.1.11 **ITC^DeltaCom may opt at any time to terminate to BellSouth some or all local exchange traffic and intraLATA toll traffic originating on its network, together with switched access traffic, via Feature Group B or D Switched Access services which ITC^DeltaCom may otherwise purchase from BellSouth, subject to the rates, terms and conditions specified in BellSouth's applicable switched access tariffs. At no time shall ITC^DeltaCom be required to route outbound traffic via facilities for which a full retail or end user toll charge would be assessed when parallel FG-B or FG-D routing, or routing via a different carrier exists which is capable of carrying and completing said traffic at more favorable rates. However, Switched Access Traffic will not be represented as Local Traffic.** [Issue 39]

6.1.12 Toll Free Traffic

6.1.12.1 If ITC^DeltaCom chooses BellSouth to perform the Service Switching Point ("SSP") Function (i.e., handle Toll Free database queries) from BellSouth's switches, all ITC^DeltaCom originating Toll Free traffic will be routed over the

Transit Traffic Trunk Group and shall be delivered using GR-394 format. Carrier Code "0110" and Circuit Code (to be determined for each LATA) shall be used for all such calls.

6.1.12.2 ITC^DeltaCom may choose to perform its own Toll Free database queries from its switch. In such cases, ITC^DeltaCom will determine the nature (local/intraLATA/interLATA) of the Toll Free call (local/IntraLATA/InterLATA) based on the response from the database. If the call is a BellSouth local or intraLATA Toll Free call, ITC^DeltaCom will route the post-query local or IntraLATA converted ten-digit local number to BellSouth over the local or intraLATA trunk group. If the call is a third party (ICO, IXC, CMRS or other CLEC) local or intraLATA Toll Free call, < ITC^DeltaCom will route the post-query local or intraLATA converted ten-digit local number to BellSouth over the Transit Traffic Trunk Group and ITC^DeltaCom shall provide to BellSouth a Toll Free billing record when appropriate. If the query reveals the call is an interLATA Toll Free call, ITC^DeltaCom will route the post-query interLATA Toll Free call (1) directly from its switch for carriers interconnected with its network or (2) over the Transit Traffic Trunk Group to carriers that are not directly connected to ITC^DeltaCom's network but that are connected to BellSouth's access tandem.

6.1.12.3 All post-query Toll Free calls for which ITC^DeltaCom performs the SSP function, if delivered to BellSouth, shall be delivered using GR-394 format for calls destined to IXCs, and GR-317 format for calls destined to end offices that directly subtend a BellSouth access tandem within the LATA.

7 Network Design and Management for Interconnection

7.1 Network Management and Changes. BellSouth shall work cooperatively with ITC^DeltaCom to install and maintain the most effective and reliable interconnected telecommunications networks, including but not limited to, the exchange of toll-free maintenance contact numbers and escalation procedures. BellSouth agrees to provide public notice of changes in the information necessary for the transmission and routing of services using its Local Exchange facilities or networks, as well as of any other changes that would affect the interoperability of those facilities and networks.

7.2 Interconnection-Technical Standards. The interconnection of all networks will be based upon accepted industry/national guidelines for transmission standards and traffic blocking criteria. Interconnecting facilities shall conform, at a minimum, to the telecommunications industry standard of DS1 pursuant to Bellcore Standard No. TR-NWT-00499. Signal transfer point, Signaling System 7("SS7") connectivity is required at each interconnection point. BellSouth will provide out-of-band signaling using Common Channel Signaling Access Capability where technically and economically feasible, in accordance with the technical specifications set forth in the BellSouth Guidelines to Technical Publication, TR-TSV000905. Facilities of each Party shall provide the necessary on-hook,

off-hook answer and disconnect supervision and shall hand off calling number ID when technically feasible.

7.3 Network Management Controls. Both Parties shall work cooperatively with each other to apply sound network management principles by invoking appropriate network management controls, e.g., call gapping, to alleviate or prevent network congestion.

7.4 Forecasting Requirements

7.4.1 The Parties shall exchange technical descriptions and forecasts of their Interconnection and traffic requirements in sufficient detail necessary to establish the interconnections required to assure traffic completion to and from all customers in their respective designated service areas. In order for BellSouth to provide as accurate reciprocal trunking forecasts as possible to ITC^DeltaCom, ITC^DeltaCom must timely inform BellSouth of any known or anticipated events that may affect BellSouth reciprocal trunking requirements. If ITC^DeltaCom refuses to provide such information, BellSouth shall provide reciprocal trunking forecasts based only on existing trunk group growth and BellSouth's annual estimated percentage of BellSouth subscriber line growth.

7.4.2 Both Parties shall meet every six (6) months or at otherwise mutually agreeable intervals for the purpose of exchanging non-binding forecasts of their traffic and volume requirements for the Interconnection and Network Elements provided under this Agreement, in the form and in such detail as agreed by the Parties. The Parties agree that each forecast provided under this Section shall be deemed "Confidential Information" under Section 9 of the General Terms and Conditions - Part A of the Agreement.

7.4.3 The trunk forecast should include trunk requirements for all of the interconnecting trunk groups for the current year plus the next two future years. The forecast meeting between the Parties could be a face-to-face meeting, video conference or audio conference. It could be held regionally or geographically. Ideally, these forecast meetings should be held at least semi-annually, or more often if the forecast is no longer usable. Updates to a forecast or portions thereof, should be made whenever the Party providing the forecast deems that the latest trunk requirements exceed the original quantities by 48 trunks or ten percent (10%), whichever is greater. Either Party should notify the other Party if they have measurements indicating that a trunk group is exceeding its designed call carrying capacity and is impacting other trunk groups in the network. Also, either Party should notify the other Party if they know of situations where the traffic load is expected to increase significantly and thus affect the interconnecting trunk requirements as well as the trunk requirements within the other Party's network. The Parties agree that the forecast information provided under this Section shall be deemed "Confidential Information" as described in the General Terms and Conditions Part A of the Agreement.

7.5 Trunk Utilization Under a Non-Binding Forecast

7.5.1 BellSouth and ITC^DeltaCom shall monitor traffic on each interconnection trunk group that is ordered and installed. The Parties agree that within 180 days of the intial installation or subsequent installation of a trunk or trunks , the trunks will be utilized at 60 percent (60%) of the time consistent busy hour utilization level. The Parties agree that within 365 days of the installation of a trunk or trunks, the trunks will be utilized at eighty percent (80%) of the time consistent busy hour utilization level. Time consistent busy hour utilization is defined as the identical hour each day during which, over a number of days, the highest average traffic is measured. Any trunk or trunks not meeting the minimum thresholds set forth in this Section are defined as "Under-utilized" trunks. BellSouth may disconnect any Under-utilized reciprocal trunk(s) and the Party whose trunks are disconnected shall refund to the other Party associated trunk and facility charges paid by such other Party, if any.

7.5.2 BellSouth's Local Interconnection Switching Center (LISC) Project Manager or Circuit Capacity Manager will notify ITC^DeltaCom of any under-utilized reciprocal trunk groups and the number of trunks that BellSouth wishes to disconnect. BellSouth will provide supporting information either by email or facsimile to the designated ITC^DeltaCom interface. ITC^DeltaCom will provide concurrence with the disconnection in seven (7) business days or will provide specific information supporting why the trunks should not be disconnected. Such supporting information should include expected traffic volumes (including traffic volumes generated due to Local Number Portability) and the timeframes within which ITC^DeltaCom expects to need such trunks. BellSouth's LISC Project Manager and Circuit Capacity Manager will discuss the information with ITC^DeltaCom to determine if agreement can be reached on the number of trunks to be removed. If no agreement can be reached, BellSouth will issue disconnect orders to ITC^DeltaCom. The due date of these orders will be four weeks after ITC^DeltaCom was first notified in writing of the underutilization of the trunk groups.

7.5.3 To the extent that any interconnection trunk group is utilized at a time-consistent busy hour of eighty percent (80%) or greater, the Parties shall negotiate in good faith for the installation of augmented facilities. Unless in response to a blocking situation or for a project, when either Party orders interconnection trunk group augmentations, a Firm Order Confirmation (FOC) shall be returned to the ordering Party within four (4) business days from receipt of a valid error free ASR. A project is defined as a new trunk group or the request of 96 or more trunks on a single or multiple trunk group(s) in a given local calling area. Blocking situations and projects shall be managed through the BellSouth's Local Interconnection Switching Center (LISC) Project Management Group and ITC^DeltaCom's equivalent trunking group In a blocking final situation, the Party with administrative control may issue an ASR to the other Party. Additionally, the ordering Party will contact the Project Manager at the other Party to work through implementation issues.

7.6 Binding forecast:

7.6.1 In addition to, and not in lieu of, non-binding forecasts, ITC^DeltaCom may at its electionprovide to BellSouth a binding forecast of the trunks that BellSouth will need to interconnect with ITC^DeltaCom in order to terminate traffic to ITC^DeltaCom. Unless otherwise agreed, a binding forecast may not be requested for an existing trunk group that is underutilized as defined in this section or for exhausted BellSouth switch locations. ITC^DeltaCom shall provide to BellSouth sufficient justification for the quantity of trunks contained within the binding forecast. The due date contained in the binding forecast shall be no less than three months from the date of the binding forecast. Once the binding forecast is submitted to BellSouth, ITC^DeltaCom agrees to make no changes to said forecast.

7.6.2 BellSouth shall provide the total amount of requested trunks from either tandem or end offices depending on trunk and facilities availability.

7.6.3 A binding forecast shall not replace the ASR process of ordering trunks and BellSouth shall order the quantity of trunks from ITC^DeltaCom set forth in the binding forecast. BellSouth shall request due dates on the trunk orders to coincide with the due dates specified in the binding forecast, and the Parties shall provision the ordered trunks by the due date.

7.6.4 To recover the cost associated with assuring that the quantity of trunk port terminations needed to meet the binding forecast are available on the agreed upon due date, ITC^DeltaCom shall pay to BellSouth a non-recurring charge of $305.00 for the first DS1 trunk port and a non-recurring charge $152.50 for each additional DS1 trunk port forecasted in a trunk group (i.e. between an A to Z location or BellSouth switch location to an ITC^DeltaCom switch location)

7.6.5 If, within 180 days of the installation of the trunks, 60 percent of the capacity of the trunks is not being utilized, ITC^DeltaCom will pay BellSouth a percentage of the total monthly recurring trunk and facility charges as set forth in BellSouth's tariffs for the percentage of the trunks' capacity that is not being utilized.

7.6.6 If, within 360 days of the installation of the trunks, 85 percent of the capacity of the trunks is not being utilized, ITC^DeltaCom will pay BellSouth a percentage of the total monthly recurring trunk and facility charges as set forth in BellSouth's tariffs for the percentage of the trunks' capacity that is not being utilized.

7.6.7 If, within 405 days of the installation of the trunks, the trunks are not being utilized to 85 percent of the capacity of the trunks, the excess trunks may be disconnected by BellSouth.

7.6.8 Utilization on BellSouth reciprocal interconnection trunk groups associated with a binding forecast shall be measured monthly and shall be measured at the time

consistent busy hour. The charges as a result of under-utilization as described in the preceding section shall apply monthly.

7.6.9 Where BellSouth installs additional facilities on an interconnection trunk group associated with a binding forecast, ITC^DeltaCom will not be subject to underutilization penalties as set for in this Section 4.4.4.

7.7 Common Channel Signaling. Both Parties shall provide LEC-to-LEC Common Channel Signaling ("CCS") to each other, where available, in conjunction with all traffic in order to enable full interoperability of CLASS features and functions except for call return. All CCS signaling parameters will be provided, including automatic number identification ("ANI"), calling party number ("CPN"), originating line information ("OLI"), calling company category, charge number, etc. All privacy indicators will be honored, and each Party will cooperate with the other on the exchange of Transactional Capabilities Application Part ("TCAP") messages to facilitate full interoperability of CCS-based features between the respective networks. Where available, network signaling information such as Carrier Identification Parameter (CCS platform), at the standard tariff rates, and CIC/OZZ information (non-CCS environment) will be provided wherever such information is needed for call routing or billing. The Parties will follow all Ordering and Billing Forum (OBF) adopted standards pertaining to CIC/OZZ codes. Where CCS is not available, in-band multi-frequency (MF) wink start E&M channel Associated signaling will be provided. Such MF arrangements will require a separate trunk group between ITC^DeltaCom's switch and one specified BellSouth switch. ITC^DeltaCom shall establish CCS interconnection with BellSouth signal transfer points (STPs) in each LATA, either directly or via an intermediary STP provider.

7.7.1 Where the interconnection is via B-link connections, charges for the SS7 interconnection elements (including port charge, SS7 Network Usage and the SS7 link) shall be bill and keep.

7.7.2 Where the interconnection is via A-link connections, charges for the SS7 interconnection elements are as follows: 1) Port Charge- BellSouth will bill an STP port charge and does not agree to pay a termination charge at ITC^DeltaCom's end office; 2) SS7 Network Usage- BellSouth will bill for usage on its SS7 network and will not agree to pay for any usage billed by ITC^DeltaCom; 3) Link- BellSouth will bill full charges for each link in the A - link pair and will not agree to pay ITC^DeltaCom for any portion of those links

7.7.3 Call Information. BellSouth and ITC^DeltaCom will send and receive 10 digits for local traffic. BellSouth and ITC^DeltaCom shall exchange the proper call information, *i.e.*, originated call company number and destination call company number, CIC, and OZZ, including all proper translations for routing between networks and any information necessary for billing.

7.7.4 Each Party is responsible for requesting Interconnection to the other Party's CCS network, where SS7 signaling on the trunk group(s) is desired. The Parties shall establish Interconnection at the STP.

7.7.5 Where available and upon the request of the other Party, each Party shall cooperate to ensure that its trunk groups are configured utilizing the B8ZS ESF protocol for 64 kbps clear channel transmission to allow for ISDN interoperability between the Parties' respective networks.

7.7.6 All originating Toll Free Service calls for which BellSouth performs the Service Switching Point (SSP) function (e.g., performs the database query) shall be delivered by ITC^DeltaCom using GR-394 format over the transit trunk group. Carrier Code "0110" and Circuit Code of "08" shall be used for all such calls. In the event ITC^DeltaCom becomes a toll free service provider, BellSouth shall deliver traffic using the GR-394 format over a trunk group designated for Toll Free Service.

7.7.7 All originating Toll Free Service calls for which ITC^DeltaCom performs the SSP function, if delivered to BellSouth, shall be delivered by ITC^DeltaCom using GR-394 format over the transit trunk group for calls destined to IXCs, or shall be delivered by ITC^DeltaCom using GR-317 format over the Local Interconnection Trunk Group for calls destined to end offices that directly subtend BellSouth access tandems.

7.8 Parity

7.8.1 Interconnection shall be equal in quality to that provided by the Parties to themselves or to any subsidiary, affiliate, or other party. Equal in quality means that interconnection facilities shall meet the same technical criteria and service standards that are used within the Parties' own networks, such as probability of blocking in peak hours and transmission standards.

7.8.2 The Parties shall provide Interconnection (i) in accordance with the requirements of this Attachment 3, (ii) in conformance with the Performance Standards listed in Attachment 9, and (iii) as required by the applicable state Commission and the FCC.

7.9 Local Dialing Parity

7.9.1 Each Party shall provide local dialing parity, meaning that each Party's customers will not have to dial any greater number of digits than the other Party's customers to complete the same call. In addition, under equivalent interconnection arrangements, ITC^DeltaCom local service customers will experience at least the same quality as BellSouth local service customers regarding post-dial delay, call completion rate and transmission quality.

8 Interconnection Compensation

8.1 Compensation for Call Transportation and Termination for Local Traffic and Inter-Carrier Compensation for ISP-Bound Traffic, **IntraLATA Toll Traffic**

8.1.1 **For the purposes of this Attachment and for reciprocal compensation between the Parties pursuant to this Attachment, Local Traffic is defined as any telephone call that originates in one exchange and terminates in either the same exchange, or other local calling area associated with the originating exchange as defined and specified in Section A3 of BellSouth's General Subscriber Service Tariff.** [Issue 39]

8.1.1.1 **Additionally, Local Traffic includes any cross boundary, voice-to-voice intrastate, interLATA or interstate, interLATA calls established as a local call by the ruling regulatory body.** [Issue 39]

8.1.2 **ISP-bound Traffic is defined as calls to an information service provider or Internet service provider ("ISP") that are dialed by using a local dialing pattern (7 or 10 digits) by a calling party in one exchange to an ISP server or modem in either the same exchange or other local calling area associated with the originating exchange as defined and specified in Section A3 of BellSouth's General Subscriber Service Tariff. ISP-bound Traffic is not Local Traffic subject to reciprocal compensation, but instead is information access traffic subject to the FCC's jurisdiction.** [Issue 39]

8.1.3 **Notwithstanding the definitions of Local Traffic and ISP-bound traffic above and pursuant to the FCC's Order on Remand and Report and Order in CC Docket 99-68 released April 27, 2001 ("ISP Order on Remand"). BellSouth and DeltaCom agree to the rebuttable presumption that all combined circuit switched Local and ISP-bound Traffic delivered to BellSouth or DeltaCom that exceeds a 3:1 ratio of terminating to originating traffic on a statewide basis shall be considered ISP-bound traffic for compensation purposes. BellSouth and DeltaCom further agree to the rebuttable presumption that all combined circuit switched Local and ISP-bound Traffic delivered to BellSouth or DeltaCom that does not exceed a 3:1 ratio of terminating to originating traffic on a statewide basis shall be considered Local Traffic for compensation purposes.** [Issue 39]

8.1.4 **The Parties shall provide for the mutual and reciprocal recovery of the costs for the network facilities utilized in transporting and terminating Local Traffic on each other's network. The Parties agree that charges for transport and termination of Local Traffic on their respective networks are as set forth in Exhibit B to this Attachment.** [Issue 39]

8.1.5 ISP-bound Traffic that is exchanged pursuant to this Agreement shall be compensated, subject to the growth caps set forth in the FCC's ISP Order on Remand, as set forth below and in Exhibit B:

8.1.5.1 Commencing on January 1, 2003 and continuing until June 13, 2003, $.001 per minute of use

8.1.5.2 Commencing on June 14, 2003 and continuing until the expiration of this Agreement, $.0007 per minute of use

8.1.5.3 For ISP-bound Traffic exchanged during the year 2003, the Parties agree to apply the growth caps set forth in the FCC's ISP Order on Remand.

8.2 The appropriate elemental rates set forth in Exhibit B of this Attachment shall apply for Transit Traffic and to Multiple Tandem Access.

8.3 Neither Party shall represent Switched Access Traffic as Local Traffic or ISP-bound Traffic for purposes of determining compensation for the call.

8.4 **IntraLATA Toll Traffic is defined as all traffic that originates and terminates within a sigle LATA that is not treated as Local or ISP-bound traffic under this Attachment.** [Issue 39, 45]

8.4.1.1 **For terminating its intraLATA toll traffic on the other company's network, the originating Party will pay the terminating Party intrastate or interstate, whichever is appropriate, terminating switched access tafiff rates as set forth in the terminating party's Access Services Tariffs as filed and in effect with the FCC or state commission. The appropriate charges will be determined by the routing of the call. Additionally, if ITC^DeltaCom is BellSouth's end user's presubscribed interexchange carrier of if BellSouth's end user uses ITC^DeltaCom as interexchange carrier on a 101XXXX basis, BellSouth will charge ITC^DeltaCom the appropriate BellSouth originating switched access tariff rates as set forth in BellSouth's Intrastate or Interstate Access Services Tariff as filed and in effect with the FCC or appropriate state Commission.** [Issue 39, 45]

8.5 Compensation for 8XX Traffic

8.5.1 Compensation for 8XX Traffic. Each Party shall compensate the other pursuant to the appropriate switched access charges, including the database query charge, as set forth in the Party's Commission or FCC filed and approved intrastate or interstate switched access tariffs.

8.5.2 Records for 8XX Billing. Each Party will provide to the other the appropriate records necessary for billing intraLATA 8XX customers. The records provided will be in a standard EMI format.

8.5.3 8XX Access Screening. BellSouth's provision of 8XX Toll Free Database (TFD) to ITC^DeltaCom requires interconnection from ITC^DeltaCom to BellSouth 8XX Signal Channel Point ("SCP"). Such interconnections shall be established pursuant to BellSouth's Common Channel Signaling Interconnection Guidelines

and Bellcore's CCS Network Interface Specification document, TR-TSV-000905. ITC^DeltaCom shall establish CCS7 interconnection at the BellSouth Local Signal Transfer Points serving the BellSouth 8XX SCPs that ITC^DeltaCom desires to query. The terms and conditions for 8XX TFD are set out in BellSouth's Intrastate Access Services Tariff as amended.

9 Transmission and Routing of Exchange Access Traffic

The Parties shall jointly provide Tandem-transported Switched Exchange Access Services to Interexchange Carriers to enable such Interexchange Carriers to originate and terminate traffic from/to ITC^DeltaCom's End Users, and to originate and terminate traffic to/from BellSouth's End Users.

10 NXX Translations Implementation

10.1 It shall be the responsibility of each Party to program and update its switches and network systems pursuant to the local exchange routing guide (LERG) and other switched telecommunications industry guidelines to recognize and route traffic to the other Party's assigned NXX codes. Neither Party shall impose any fees or charges whatsoever on the other Party for such activities.

10.2 Testing and inputting of the translations in the BellSouth databases of ITC^DeltaCom's NXXs' should be the same as BellSouth's own.

10.3 Each Party will translate NXXs according to industry guidelines, including the terminating LATA in which the NXXs/rate center is located.

10.4 The Parties will cooperate and implement industry solutions for number conservation, e.g. number pooling.

11 Mutual Provision of Switched Access Service

11.1 **Switched Access Traffic. Switched Access Traffic is described as telephone calls requiring local transmission or switching services for the purpose of the origination or termination of Telephone Toll Service. Switched Access Traffic includes, but is not limited to, the following types of traffic: Feature Group A, Feature Group B, Feature Group C, Feature Group D, toll free access (e.g., 8XX), 900 access and their successors. Additionally, any Public Switched Telephone Network interexchange telecommunications traffic, regardless of transport protocol method, where the originating and terminating points, end-to-end points, are in different LATAs, or are in the same LATA and the Parties' Switched Access services are used for the origination or termination of the call, shall be considered Switched Access Traffic. Irrespective of transport protocol method used, a call which originates in one LATA and terminates in another LATA (i.e., the end-to-end points of the call) or in which the Parties' Switched Access Services are used**

for the origination or termination of the call, shall not be considered Local Traffic or ISP-bound Traffic. [Issue 39]

11.2 If the BellSouth end user chooses ITC^DeltaCom as their presubscribed interexchange carrier, or if the BellSouth end user uses ITC^DeltaCom as an interexchange carrier on a 101XXXX basis, BellSouth will charge ITC^DeltaCom the appropriate BellSouth tariff charges for originating switched access services. **At such time as a DeltaCom end user may choose BellSouth as their presubscribed interexchange carrier or at such time as a DeltaCom end user may choose BellSouth as an interexchange carrier on a 101XXXX basis, the Parties will negotiate in good faith the appropriate charges that DeltaCom may charge for originating switched access services**. [Issue 45]

11.3 Where the originating Party delivers a call to the terminating Party over switched access facilities, the originating Party will pay the terminating Party terminating, switched access charges as set forth in the terminating party's Intrastate or Interstate Access Services Tariff, as appropriate.

11.4 When ITC^DeltaCom's end office switch provides an access service connection to or from an interexchange carrier ("IXC") by a direct trunk group to the IXC utilizing BellSouth facilities, each Party will provide its own access services to the IXC and bill on a multi-bill, multi-tariff meet-point basis. Each Party will bill its own access services rates to the IXC with the exception of the interconnection charge. The interconnection charge will be billed by ITC^DeltaCom as the Party providing the end office function. Each party will use the Multiple Exchange Carrier Access Billing (MECAB) guidelines to establish meet point billing for all applicable traffic. The parties shall utilize a thirty (30) day billing period.

11.5 When ITC^DeltaCom's end office subtends the BellSouth Access Tandem switch for receipt or delivery of switched access traffic and provides an access service connection to or from an IXC via BellSouth's Access Tandem switch, BellSouth, as the tandem company agrees to provide to ITC^DeltaCom, as the End Office Company, as defined in MECAB, at no charge, all the switched access detail usage data, recorded at the access tandem, within no more than sixty (60) days after the recording date. Each Party will notify the other when it is not feasible to meet these requirements. As business requirements change, data reporting requirements may be modified as necessary.

11.5.1 BellSouth, as the tandem provider company, will retain for a minimum period of sixty (60) days, access message detail sufficient to recreate any data that is lost or damaged by the tandem provider company or any third party involved in processing or transporting data.

11.5.2 BellSouth, as the tandem provider company, agrees to recreate the lost or damaged data within forty-eight (48) hours of notification by the other or by an authorized third party handling the data.

11.5.3 Any claims against BellSouth, as the tandem provider company, for unbillable or uncollectible revenue should be filed with the tandem provider company within 120 days of the usage date.

11.5.4 BellSouth, as the tandem provider company shall keep records of its billing activities relating to jointly-provided Intrastate and Interstate access services in sufficient detail to permit the Subsequent Billing Party to, by formal or informal review or audit, to verify the accuracy and reasonableness of the jointly-provided access billing data provided by the Initial Billing Party. Each Party agrees to cooperate in such formal or informal reviews or audits and further agrees to jointly review the findings of such reviews or audits in order to resolve any differences concerning the findings thereof.

11.6 ITC^DeltaCom agrees not to deliver switched access traffic to BellSouth for termination except over ITC^DeltaCom ordered switched access trunks and facilities.

12 Transit Traffic Service

12.1 BellSouth shall provide tandem switching and transport services for ITC^DeltaCom's Transit Traffic. Rates for local Transit Traffic and ISP-bound Transit Traffic shall be the applicable Call Transport and Termination charges as set forth in Exhibit A to this Attachment. Rates for Switched Access Transit Traffic shall be the applicable charges as set forth in BellSouth Interstate or Intrastate Switched Access tariffs. Billing associated with all Transit Traffic shall be pursuant to MECAB guidelines. Traffic between ITC^DeltaCom and Wireless Type 1 third parties shall not be treated as Transit Traffic from a routing or billing perspective. Traffic between ITC^DeltaCom and Wireless Type 2A or a third party CLEC utilizing BellSouth switching shall not be treated as Transit Traffic from a routing or billing perspective until BellSouth and the Wireless carrier or a third party CLEC utilizing BellSouth switching have the capability to properly meet-point-bill in accordance with MECAB guidelines. BellSouth will post notification of meet-point-billing arrangements via web posting.

12.2 The delivery of traffic that transits the BellSouth network and is transported to another carrier's network is excluded from any BellSouth billing guarantees. BellSouth agrees to deliver Transit Traffic to the terminating carrier; provided, however, that ITC^DeltaCom is solely responsible for negotiating and executing any appropriate contractual agreements with the terminating carrier for the exchange of Transit Traffic through the BellSouth network. BellSouth will not be liable for any compensation to the terminating carrier or to ITC^DeltaCom. In the event that the terminating third party carrier imposes on BellSouth any charges or costs for the delivery of Transit Traffic,ITC^DeltaCom shall reimburse BellSouth for such costs. Additionally, the Parties agree that any billing to a third party or

other telecommunications carrier under this section shall be pursuant to MECAB procedures.

12.3 **Packet Switched Network Interconnection/Frame Relay**
The Parties agree to interconnect their local data services networks for the exchange of Frame Relay Services ("FRS") traffic.

12.3.1 The following provisions will apply only to Frame Relay Service and Exchange Access Frame Relay Service in those states where traffic is being exchanged between ITC^DeltaCom and BellSouth Frame Relay Switches in the same LATA.

12.3.2 The Parties agree to establish two-way Frame Relay facilities between their respective Frame Relay Switches to the mutually-agreed upon Frame Relay Service point(s) of interconnection ("POIs") within the LATA. All POIs shall be within the same Frame Relay Network Serving Area as defined in Section A40 of BellSouth's General Subscriber Services Tariff.

12.3.3 Upon the request of either Party, such interconnection will be established where BellSouth and ITC^DeltaCom have Frame Relay Switches in the same LATA. Where there are multiple Frame Relay switches in the central office of a Party, an interconnection with any one of the switches will be considered an interconnection with all of the switches at that central office for purposes of routing packet traffic.

12.3.4 The Parties agree to provision local and IntraLATA Frame Relay Service and Exchange Access Frame Relay Service (both intrastate and interstate) over Frame Relay Trunks between the respective Frame Relay switches and the POIs.

12.3.5 The Parties agree to assess each other reciprocal charges for the facilities that each provides to the other according to the Percent Local Circuit Use ("PLCU") factor PLCU, determined as follows:

(i) Frame Relay framed packet data is transported within Virtual Circuits ("VC"). For the purposes of calculating the PLCU, if all the data packets transported within a VC remain within the LATA, then consistent with the local definitions in this Agreement, the traffic on that VC is local ("Local VC").

(ii) If the originating and terminating locations of the two way packet data traffic are not in the same LATA, the traffic on that VC is interLATA.

(iii) The PLCU shall be determined by dividing the total number of Local VCs, by the total number of VCs on each Frame Relay facility at the end of the reporting period. The Parties agree to renegotiate the method for determining PLCU, at either Parties'

request, and within 90 days, if either Party notifies the other that it has found that this method does not adequately represent the PLCU.
(iv) If there are no VCs on a facility when it is billed, the PLCU will be zero.

12.3.6 BellSouth will provide the Frame Relay Trunk(s) between the Parties' respective Frame Relay Switches. The Parties will be compensated as follows- BellSouth will invoice, and ITC^DeltaCom will pay, the total non-recurring and recurring charges for the trunk facility. ITC^DeltaCom will then invoice, and BellSouth will pay, an amount calculated by multiplying the BellSouth billed charges for the trunk facility by one-half of ITC^DeltaCom's PLCU.

12.3.7 Each Party will provide a Frame Relay network-to-network interface ("NNI") port to the other Party for each trunk facility provided pursuant to 11.1.5 above. Compensation for NNI ports shall be based upon the NNI rates set forth in the BellSouth F.C.C Tariff No. 1. Pursuant to that tariff, ITC^DeltaCom may select a month-to-month or term rate structure for the NNI ports BellSouth provides to ITC^DeltaCom. Whatever rate structure ITC^DeltaCom selects shall be deemed to be the same rate structure that applies to the NNI port ITC^DeltaCom provides to BellSouth. There shall be no termination liability to either party for the local portion of the NNI port as determined by the ITC^DeltaCom PLCU at the time of termination.

12.3.8 Compensation for the NNI ports shall be calculated as follows:

12.3.8.1 For NNI ports provided by BellSouth to ITC^DeltaCom, BellSouth will invoice, and ITC^DeltaCom will pay, the total nonrecurring and recurring charges for the NNI port. ITC^DeltaCom will then invoice, and BellSouth will pay, an amount calculated by multiplying the BellSouth billed non-recurring and recurring charges for the NNI port by one-half of ITC^DeltaCom's PLCU.

12.3.8.2 For NNI ports provided by ITC^DeltaCom to BellSouth, ITC^DeltaCom will invoice, and BellSouth will pay, the total non-recurring and recurring charges for the NNI port. BellSouth will then invoice, and ITC^DeltaCom will pay, an amount determined as follows: ITC^DeltaCom's combined interLATA and local usage will be calculated by subtracting one-half of ITC^DeltaCom's PLCU factor from one hundred percent. The difference will then be multiplied by the total charges initially billed by ITC^DeltaCom for the NNI port. BellSouth will then invoice, and ITC^DeltaCom will pay, this amount to BellSouth.

12.3.8.3 A Permanent Virtual Circuit ("PVC") is a logical channel from a frame relay network interface (e.g., NNI or User Network Interface) to another frame relay network interface. A PVC is created when a Data Link Channel Identifier ("DLCI") is mapped together with another DLCI. Neither Party will charge the other Party any DLCI or Committed Information Rate ("CIR") charges for the PVC from its Frame Relay switch to its own subscriber's premises.

12.3.8.4 For the PVC between the ITC^DeltaCom and BellSouth Frame Relay switches, compensation for the DLCI and CIR charges are based upon the rates in the BellSouth FCC Tariff No. 1. Compensation for PVC and CIR rate elements shall be calculated as follows:

12.3.8.5 For PVCs between the BellSouth Frame Relay switch and the ITC^DeltaCom Frame Relay switch, BellSouth will invoice, and ITC^DeltaCom will pay, the total nonrecurring and recurring DLCI and CIR charges. If the VC is a Local VC, ITC^DeltaCom will invoice and BellSouth will pay, 100% of the DLCI and CIR charges initially billed by BellSouth for that PVC. If the VC is not local, no compensation will be paid to ITC^DeltaCom for the PVC.

12.3.8.6 Each Party will compensate the other Party for any applicable Feature Change or Transfer of Service Charges as set forth in BellSouth's Tariff F.C.C. No. 1. The Parties agree to limit the sum of the CIR for the VCs on a given NNI port to not more than two times the port speed.

12.3.8.7 Except as expressly provided herein, this Agreement does not address or alter in any way either Party's provision of Exchange Access Frame Relay Service or interLATA Frame Relay Service. All charges by each Party to the other for carriage of Exchange Access Frame Relay Service or interLATA Frame Relay Service are included in the BellSouth access tariffs.

12.3.8.8 Until such time as BellSouth obtains authority to provide in-region, interLATA service, ITC^DeltaCom will identify and report its PLCU to BellSouth on a quarterly basis.

12.3.8.9 Either Party may request a review or audit of the various service components, including but not limited to a Party's determination of its PLCU, consistent with the provisions of section E2 of the BellSouth State Access Services tariffs or Section 2 of the BellSouth FCC No. 1 Tariff.

12.3.8.10 If during the term of this Agreement, BellSouth obtains authority to provide in-region, interLATA service, the Parties shall renegotiate the provisions of Section 12.3.6, 12.3.7, 12.3.8.3-12.3.8.5, and 12.3.8.8 to account for BellSouth's PLCU. In the event the parties are unable to reach agreement within one hundred eighty (180) days of the date BellSouth receives interLATA authority, the matter shall be resolved pursuant to the dispute resolution provisions set forth in this agreement.

12.3.8.11 If during the term of this Agreement, BellSouth makes available, to an affiliate or any other telecommunications carrier, Frame Relay interconnection on rates, terms and conditions different than those provided for in this Section 12, then ITC^DeltaCom shall be entitled, at its option, to replace any part of this Section 12 with such rates, terms, and conditions.

Attachment 4

Physical Collocation

BELLSOUTH

PHYSICAL COLLOCATION

1. **Scope of Attachment**

1.1 **The rates, terms, and conditions contained within this Attachment shall only apply when ITC^DeltaCom is physically collocated as a sole occupant or as a Host within a Premises location pursuant to this Attachment. BellSouth Premises include BellSouth Central Offices and Serving Wire Centers (hereinafter "Premises"). This Attachment is applicable to Premises owned or leased by BellSouth. However, if the Premises occupied by BellSouth is leased by BellSouth from a third party, special considerations and intervals may apply in addition to the terms and conditions of this Attachment.**

1.2 Right to Occupy. BellSouth shall offer to ITC^DeltaCom collocation on rates, terms, and conditions that are just, reasonable, non-discriminatory and consistent with the rules of the Federal Communications Commission ("FCC"). Subject to the rates, terms and conditions of this Attachment where space is available and it is technically feasible, BellSouth will allow ITC^DeltaCom to occupy that certain area designated by BellSouth within a BellSouth Premises, or on BellSouth property upon which the BellSouth Premises is located, of a size which is specified by ITC^DeltaCom and agreed to by BellSouth (hereinafter "Collocation Space"). The necessary rates, terms and conditions for BellSouth locations other than BellSouth Premises shall be negotiated upon request for collocation at such location(s).

1.2.1 Neither BellSouth nor any of BellSouth's affiliates may reserve space for future use on more preferential terms than those set forth below.

1.2.1.1 In all states other than Florida, the size specified by ITC^DeltaCom may contemplate a request for space sufficient to accommodate ITC^DeltaCom's growth within a two-year period.

1.2.1.2 In the state of Florida, the size specified by ITC^DeltaCom may contemplate a request for space sufficient to accommodate ITC^DeltaCom's growth within an eighteen (18) month period.

1.3 Space Allocation. BellSouth shall attempt to accommodate ITC^DeltaCom 's requested preferences if any. In allocating Collocation Space, BellSouth shall not materially increase ITC^DeltaCom's cost or materially delay ITC^DeltaCom's occupation and use of the Collocation Space, shall not assign Collocation Space that will impair the quality of service or otherwise limit the service ITC^DeltaCom wishes to offer, and shall not reduce unreasonably the total space available for physical collocation or preclude unreasonably physical collocation within the Premises. Space shall not be available for collocation if it is: (a) physically occupied by non-obsolete

equipment; (b) assigned to another collocator; (c) used to provide physical access to occupied space; (d) used to enable technicians to work on equipment located within occupied space; (e) properly reserved for future use, either by BellSouth or by another carrier; or (f) essential for the administration and proper functioning of BellSouth's Premises. BellSouth may segregate Collocation Space and require separate entrances in accordance with FCC rules.

1.4 Space Reclamation. In the event of space exhaust within a Central Office Premises, BellSouth may include in its documentation for the Petition for Waiver filing any unutilized space in the Central Office Premises. ITC^DeltaCom will be responsible for any justification of unutilized space within its space, if the appropriate state commission requires such justification.

1.5 Use of Space. ITC^DeltaCom shall use the Collocation Space for the purposes of installing, maintaining and operating ITC^DeltaCom's equipment (to include testing and monitoring equipment) necessary for interconnection with BellSouth services and facilities or for accessing BellSouth unbundled network elements for the provision of telecommunications services, as specifically set forth in this Attachment. The Collocation Space may be used for no other purposes except as specifically described herein or in any amendment hereto.

1.6 Rates and Charges. ITC^DeltaCom agrees to pay the rates and charges identified in Exhibit C attached hereto.

1.7 Due Dates. If any due date contained in this Attachment falls on a weekend or National holiday, then the due date will be the next business day thereafter. For intervals of ten (10) days or less National holidays will be excluded.

1.8 The parties agree to comply with all applicable federal, state, county, local and administrative laws, rules, ordinances, regulations and codes in the performance of their obligations hereunder.

2. Space Availability Report

2.1 Space Availability Report. Upon request from ITC^DeltaCom, BellSouth will provide a written report ("Space Availability Report") describing in detail the space that is available for collocation and specifying the amount of Collocation Space available at the Premises requested, the number of collocators present at the Premises, any modifications in the use of the space since the last report on the Premises requested and the measures BellSouth is taking to make additional space available for collocation arrangements. A Space Availability Report does not reserve space at the Premises.

2.1.1 The request from ITC^DeltaCom for a Space Availability Report must be written and must include the Premises street address, identified in the Local Exchange Routing Guide ("LERG"), and Common Language Location Identification ("CLLI") code of

the Premises. CLLI code information is located in the National Exchange Carriers Association ("NECA") Tariff FCC No. 4.

2.1.2 BellSouth will respond to a request for a Space Availability Report for a particular Premises within ten (10) calendar days of receipt of such request. BellSouth will make best efforts to respond in ten (10) calendar days to such a request when the request includes from two (2) to five (5) Premises within the same state. The response time for requests of more than five (5) Premises shall be negotiated between the Parties. If BellSouth cannot meet the ten (10)calendar day response time, BellSouth shall notify ITC^DeltaCom and inform ITC^DeltaCom of the time frame under which it can respond.

3. Collocation Options

3.1 Cageless. BellSouth shall allow ITC^DeltaCom to collocate ITC^DeltaCom's equipment and facilities without requiring the construction of a cage or similar structure. BellSouth shall allow ITC^DeltaCom to have direct access to ITC^DeltaCom's equipment and facilities. BellSouth shall make cageless collocation available in single bay increments. Except where ITC^DeltaCom's equipment requires special technical considerations (e.g., special cable racking, isolated ground plane, etc.), BellSouth shall assign cageless Collocation Space in conventional equipment rack lineups where feasible. For equipment requiring special technical considerations, ITC^DeltaCom must provide the equipment layout, including spatial dimensions for such equipment pursuant to generic requirements contained in Telcordia GR-63-Core, and shall be responsible for compliance with all special technical requirements associated with such equipment.

3.2 Caged. At ITC^DeltaCom's expense, ITC^DeltaCom may arrange with a Supplier certified by BellSouth ("BellSouth Certified Supplier") to construct a collocation arrangement enclosure in accordance with BellSouth's Technical References (TR) ("Specifications") prior to starting equipment installation. BellSouth will provide Specifications upon request. Where local building codes require enclosure specifications more stringent than BellSouth's standard enclosure specification, ITC^DeltaCom, if certified as a BellSouth Certified Supplier, and ITC^DeltaCom's BellSouth Certified Supplier must comply with the more stringent local building code requirements. ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier shall be responsible for filing and receiving any and all necessary permits and/or licenses for such construction. BellSouth shall cooperate with ITC^DeltaCom and provide, at ITC^DeltaCom's expense, the documentation, including existing building architectural drawings, enclosure drawings, and Specifications required and necessary for ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier to obtain the zoning, permits and/or other licenses. ITC^DeltaCom's BellSouth Certified Supplier shall bill ITC^DeltaCom directly for all work performed

for ITC^DeltaCom pursuant to this Attachment and BellSouth shall have no liability for nor responsibility to pay such charges imposed by ITC^DeltaCom's BellSouth Certified Supplier. ITC^DeltaCom must provide the local BellSouth building contact with two Access Keys used to enter the locked enclosure. Except in case of emergency, BellSouth will not access ITC^DeltaCom's locked enclosure prior to notifying ITC^DeltaCom. Upon request, BellSouth shall construct the enclosure for ITC^DeltaCom.

3.2.1 BellSouth may elect to review ITC^DeltaCom's plans and specifications prior to allowing construction to start to ensure compliance with BellSouth's Specifications. Notification to ITC^DeltaCom indicating BellSouth's desire to execute this review will be provided in BellSouth's response to the Initial Application, if ITC^DeltaCom has indicated its desire to construct its own enclosure. If ITC^DeltaCom's Initial Application does not indicate its desire to construct its own enclosure, but its subsequent firm order does indicate its desire to construct its own enclosure, then notification to review will be given within ten (10) calendar days after the Firm Order date. BellSouth shall complete its review within fifteen (15) calendar days after the receipt of the plans and specifications. Regardless of whether or not BellSouth elects to review ITC^DeltaCom's plans and specifications, BellSouth reserves the right to inspect the enclosure during and after construction to make sure it is constructed according to the submitted plans and specifications and BellSouth's Specifications, as applicable. If BellSouth decides to inspect, BellSouth will complete its inspection within fifteen (15) calendar days after receipt of written notification of completion of the enclosure from ITC^DeltaCom. BellSouth shall require ITC^DeltaCom to remove or correct within fifteen (15) calendar days at ITC^DeltaCom's expense any structure that does not meet these plans and specifications or, where applicable, BellSouth's Specifications.

3.3 Shared Caged Collocation. ITC^DeltaCom may allow other telecommunications carriers to share ITC^DeltaCom's caged collocation arrangement pursuant to terms and conditions agreed to by ITC^DeltaCom ("Host") and other telecommunications carriers ("Guests") and pursuant to this Section, except where the BellSouth Premises is located within a leased space and BellSouth is prohibited by said lease from offering such an option. ITC^DeltaCom shall notify BellSouth in writing upon execution of any agreement between the Host and its Guest within ten (10) calendar days of its execution and prior to any Firm Order. Further, such notice shall include the name of the Guest(s) and the term of the agreement, and shall contain a certification by ITC^DeltaCom that said agreement imposes upon the Guest(s) the same terms and conditions for Collocation Space as set forth in this Attachment between BellSouth and ITC^DeltaCom.

3.3.1 ITC^DeltaCom, as the Host, shall be the sole interface and responsible Party to BellSouth for the assessment and billing of rates and charges contained within this Attachment and for the purposes of ensuring that the safety and security requirements of this Attachment are fully complied with by the Guest(s), its employees and agents.

BellSouth shall provide ITC^DeltaCom with a proration of the costs of the Collocation Space based on the number of collocators and the space used by each with a minimum charge of one (1) bay/rack per Host/Guest. In all states other than Florida, and in addition to the foregoing, ITC^DeltaCom shall be the responsible party to BellSouth for the purpose of submitting applications for initial and additional equipment placement of Guest. In Florida the Guest may directly submit initial and additional equipment placement applications using the Host's access carrier name abbreviation (ACNA). A separate Guest application shall require the assessment of an Initial or Subsequent Application Fee, as set forth in Attachment 11. Notwithstanding the foregoing, Guest may arrange directly with BellSouth for the provision of the interconnecting facilities between BellSouth and Guest and for the provision of the services and access to unbundled network elements.

3.3.2 ITC^DeltaCom shall indemnify and hold harmless BellSouth from any and all claims, actions, causes of action, of whatever kind or nature arising out of the presence of ITC^DeltaCom's Guests in the Collocation Space except to the extent caused by BellSouth's sole negligence, gross negligence, or willful misconduct.

3.4 Adjacent Collocation. Subject to technical feasibility and space availability, BellSouth will permit adjacent collocation arrangements ("Adjacent Arrangement") on the Premises' property, where the Adjacent Arrangement does not interfere with access to existing or planned structures or facilities on the Premises property. The Adjacent Arrangement shall be constructed or procured by ITC^DeltaCom and in conformance with BellSouth's design and construction Specifications. Further, ITC^DeltaCom shall construct, procure, maintain and operate said Adjacent Arrangement(s) pursuant to all of the rates, terms and conditions set forth in this Attachment.

3.4.1 Should ITC^DeltaCom elect Adjacent Collocation, ITC^DeltaCom must arrange with a BellSouth Certified Supplier to construct an Adjacent Arrangement structure in accordance with BellSouth's Specifications. BellSouth will provide Specifications upon request. Where local building codes require enclosure specifications more stringent than BellSouth's standard specification, ITC^DeltaCom and ITC^DeltaCom's BellSouth Certified Supplier must comply with the more stringent local building code requirements. ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier shall be responsible for filing and receiving any and all necessary zoning, permits and/or licenses for such construction. ITC^DeltaCom's BellSouth Certified Supplier shall bill ITC^DeltaCom directly for all work performed for ITC^DeltaCom pursuant to this Attachment and BellSouth shall have no liability for nor responsibility to pay such charges imposed by ITC^DeltaCom's BellSouth Certified Supplier. ITC^DeltaCom must provide the local BellSouth building contact with two cards, keys or other access device used to enter the locked enclosure. Except in cases of emergency, BellSouth shall not access ITC^DeltaCom's locked enclosure prior to notifying ITC^DeltaCom.

3.4.2 ITC^DeltaCom must submit its plans and specifications to BellSouth with its Firm Order. BellSouth shall review ITC^DeltaCom's plans and specifications prior to

construction of an Adjacent Arrangement(s) to ensure compliance with BellSouth's Specifications. BellSouth shall complete its review within fifteen (15) calendar days after receipt of plans and specifications. BellSouth reserves the right to inspect the Adjacent Arrangement during and after construction to confirm it is constructed according to the submitted plans and specifications. If BellSouth decides to inspect, BellSouth will complete its inspection within fifteen (15) calendar days after receipt of written notification of completion of the enclosure from ITC^DeltaCom. BellSouth shall require ITC^DeltaCom to remove or correct within fifteen (15) calendar days at ITC^DeltaCom's expense any structure that does not meet these plans and specifications or, where applicable, BellSouth's Specifications.

3.4.3 ITC^DeltaCom shall provide a concrete pad, the structure housing the arrangement, heating/ventilation/air conditioning ("HVAC"), lighting, and all facilities that connect the structure (i.e. racking, conduits, etc.) to the BellSouth point of demarcation. At ITC^DeltaCom's option, and where the local authority having jurisdiction permits, BellSouth shall provide an AC power source and access to physical collocation services and facilities subject to the same nondiscriminatory requirements as applicable to any other physical collocation arrangement. In Alabama and Louisiana, BellSouth will provide DC power to Adjacent Collocation sites where technically feasible, as that term has been defined by the FCC, and subject to individual case basis pricing. ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier shall be responsible, at ITC^DeltaCom's expense, for filing and receiving any and all necessary zoning, permits and/or licenses for such arrangement. BellSouth shall allow Shared Caged Collocation within an Adjacent Arrangement pursuant to the terms and conditions set forth herein.

3.5 Co-Carrier Cross Connect (CCXC). The primary purpose of collocation is for a collocated telecommunications carrier to interconnect with BellSouth's network or to access BellSouth's unbundled network elements for the provision of telecommunications services within a BellSouth Premises. BellSouth will permit ITC^DeltaCom to interconnect between its virtual or physical collocation arrangements and those of another collocated telecommunications carrier within the same central office. Both ITC^DeltaCom's agreement and the other collocated telecommunications carrier's agreement must contain rates, terms and conditions for CCXC language. At no point in time shall ITC^DeltaCom use the Collocation Space for the sole or primary purpose of cross connecting to other collocated telecommunications carriers. ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or its BellSouth Certified Supplier must place the CCXC. The CCXC shall be provisioned through facilities owned by ITC^DeltaCom.

3.5.1 Such connections to other carriers may be made using either optical or electrical facilities. ITC^DeltaCom may deploy such optical or electrical connections directly between its own facilities and the facilities of other collocated telecommunications carriers without being routed through BellSouth equipment. ITC^DeltaCom may not self-provision CCXC on any BellSouth distribution frame, POT (Point of Termination)

Bay, DSX (Digital System Cross-connect) or LGX (Light Guide Cross-connect). ITC^DeltaCom is responsible for ensuring the integrity of the signal.

ITC^DeltaCom shall be responsible for providing written authorization to BellSouth from the other collocated telecommunications carrier prior to installing the CCXC. ITC^DeltaCom -provisioned CCXC shall utilize common cable support structure. There will be a recurring charge per linear foot, per cable, of common cable support structure used. In cases where ITC^DeltaCom's equipment and the equipment of the other interconnector are located in contiguous caged Collocation Spaces, ITC^DeltaCom will have the option of using ITC^DeltaCom's own technicians to deploy co-carrier cross connects using copper (or ABAM or coaxial as appropriate) or optical facilities between the sets of equipment and construct its own dedicated cable support structure. If BellSouth cable support structure is used cable support charges shall be assessed per linear foot, per cable, of support structure used.

3.5.2 To order CCXCs ITC^DeltaCom must submit an Initial Application or Subsequent Application. If no modification to the Collocation Space is requested other than the placement of CCXCs, the Subsequent Application Fee for CCXC, as defined in Exhibit C, will apply. If modifications in addition to the placement of CCXCs are requested, the Initial Application or Subsequent Application Fee will apply. This non-recurring fee will be billed by BellSouth on the date that BellSouth provides an Application Response.

3.5.2.1 In Florida, when ITC^DeltaCom submits an application to cross-connect with another collocated carrier in a contiguous collocation space, no Application Fee will apply.

4. Occupancy

4.1 Occupancy. BellSouth will notify ITC^DeltaCom in writing that the Collocation Space is ready for occupancy ("Space Ready Date"). ITC^DeltaCom will schedule and complete an acceptance walkthrough of each Collocation Space with BellSouth within fifteen (15) calendar days of BellSouth's notifying ITC^DeltaCom that the Collocation Space is ready for occupancy. BellSouth will correct any deviations to ITC^DeltaCom's original or jointly amended requirements within seven (7) calendar days after the walkthrough, unless the Parties jointly agree upon a different time frame, and BellSouth shall establish a new Space Ready Date. Another acceptance walkthrough will then be scheduled and conducted within fifteen (15) calendar days of the new Space Ready Date. This follow-up acceptance walkthrough will be limited to those items identified in the initial walkthrough. If ITC^DeltaCom has met the fifteen (15) calendar day interval(s), billing will begin upon the date of ITC^DeltaCom's acceptance of the Collocation Space ("Space Acceptance Date"). In the event that ITC^DeltaCom fails to complete an acceptance walkthrough within the applicable fifteen (15) day interval, the Collocation Space shall be deemed accepted by ITC^DeltaCom. Billing will commence on the Space Ready Date or on the Space Acceptance Date, whichever is sooner. ITC^DeltaCom must notify BellSouth in writing that collocation equipment installation is complete and is operational with

BellSouth's network. BellSouth may, at its option, not accept orders for cross connects until receipt of such notice. For purposes of this paragraph, ITC^DeltaCom's telecommunications equipment will be deemed operational when cross-connected to BellSouth's network for the purpose of service provisioning.

4.2 Termination of Occupancy. In addition to any other provisions addressing termination of occupancy in this Agreement, ITC^DeltaCom may terminate occupancy in a particular Collocation Space by submitting a Subsequent Application requesting termination of occupancy. A Subsequent Application Fee will not apply for termination of occupancy. Either Party may terminate ITC^DeltaCom's right to occupy the Collocation Space in the event either Party fails to comply with any provision of this Agreement. The Parties agree to resolve any disputes regarding either Party's noncompliance through the Dispute Resolution procedures as outlined in Section 11 of the General Terms and Conditions of this Agreement.

4.2.1 Upon termination of occupancy, ITC^DeltaCom at its expense shall remove its equipment and other property from the Collocation Space. ITC^DeltaCom shall have thirty (30) calendar days from the termination date to complete such removal, including the removal of all equipment and facilities of ITC^DeltaCom's Guest(s), unless ITC^DeltaCom's Guest(s) has assumed responsibility for the collocation space housing the Guest(s)'s equipment and executed the documentation required by BellSouth prior to such removal date. ITC^DeltaCom shall continue payment of monthly fees to BellSouth until such date as ITC^DeltaCom, and if applicable ITC^DeltaCom's Guest(s), has fully vacated the Collocation Space and the Space Relinquish Form has been accepted by BellSouth. Should ITC^DeltaCom or ITC^DeltaCom's Guest(s) fail to vacate the Collocation Space within thirty (30) calendar days from the termination date, BellSouth shall have the right to remove the equipment and other property of ITC^DeltaCom or ITC^DeltaCom's Guest(s) at ITC^DeltaCom's expense and with no liability for damage or injury to ITC^DeltaCom or ITC^DeltaCom's Guest(s)'s property unless caused by the gross negligence or intentional misconduct of BellSouth. Upon termination of ITC^DeltaCom's right to occupy Collocation Space, the Collocation Space will revert back to BellSouth, and ITC^DeltaCom shall surrender such Collocation Space to BellSouth in the same condition as when first occupied by ITC^DeltaCom except for ordinary wear and tear, unless otherwise agreed to by the Parties. ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier shall be responsible for updating and making any necessary changes to BellSouth's records as required by BellSouth's Specifications including but not limited to Central Office Record Drawings and ERMA Records. ITC^DeltaCom shall be responsible for the cost of removing any ITC^DeltaCom constructed enclosure, together with all support structures (e.g., racking, conduits, power cables, etc.), at the termination of occupancy and restoring the grounds to their original condition minus any normal wear and tear.

5. Use of Collocation Space

5.1 Equipment Type. BellSouth permits the collocation of any type of equipment necessary for interconnection to BellSouth's network or for access to BellSouth's unbundled network elements in the provision of telecommunications services, as the term "necessary" is defined by FCC 47 C.F.R. Section 51.323 (b). In addition, ITC^DeltaCom may deploy DLC equipment (TR303 compliant) in ITC^DeltaCom's collocation space or in ITC^DeltaCom's network. The primary purpose and function of any equipment collocated in a Premises must be for interconnection to BellSouth's network or for access to BellSouth's unbundled network elements in the provision of telecommunications services.

5.1.1 Examples of equipment that would not be considered necessary include but are not limited to: Traditional circuit switching equipment, equipment used exclusively for call-related databases, computer servers used exclusively for providing information services, operations support system (OSS) equipment used to support collocated telecommunications carrier network operations, equipment that generates customer orders, manages trouble tickets or inventory, or stores customer records in centralized databases, etc. BellSouth will determine upon receipt of an application if the requested equipment is necessary based on the criteria established by the FCC. Multifunctional equipment placed on BellSouth's Premises must not place any greater relative burden on BellSouth's property than comparable single-function equipment. BellSouth reserves the right to permit collocation of any equipment on a nondiscriminatory basis.

5.1.2 Whenever BellSouth objects to collocation of equipment by ITC^DeltaCom for the purposes within the scope of Section 251(c)(6) of the Act, BellSouth shall prove to the Commission that the equipment is not necessary for the purpose of obtaining interconnection or access to unbundled network elements pursuant to FCC 47 C.F.R. 51.323 (b). BellSouth may not object to the collocation of equipment on the grounds that the equipment does not comply with safety or engineering standards that are more stringent than the safety or engineering standards that BellSouth applies to its own equipment. The applicable standards are set forth in Section 5.1.3. BellSouth may not object to the collocation of equipment on the ground that the equipment fails to comply with National Equipment and Building Specifications performance standards. Except where otherwise required by state Commission order, if BellSouth denies collocation of ITC^DeltaCom's equipment, citing safety standards, BellSouth must provide to ITC^DeltaCom within five (5) business days of the denial a list of all equipment that BellSouth locates within the Premises in question, together with an affidavit attesting that all of that equipment meets or exceeds the safety standard that BellSouth contends ITC^DeltaCom's equipment fails to meet.

5.1.3 Such equipment must at a minimum meet the following Telcordia Network Equipment Building Systems (NEBS) General Equipment Requirements: Criteria Level 1 requirements as outlined in the Telcordia Special Report SR-3580, Issue 1; equipment design spatial requirements per GR-63-CORE, Section 2; thermal heat dissipation per

GR-063-CORE, Section 4, Criteria 77-79; acoustic noise per GR-063-CORE, Section 4, Criterion 128, and National Electric Code standards.

5.1.4 **ITC^DeltaCom shall not request more DS0, DS1, DS3 and optical terminations for a collocation arrangement than the total port or termination capacity of the transmission equipment physically installed in the arrangement. The total capacity of the transmission equipment collocated in the arrangement will include transmission equipment contained in the application in question as well as the transmission equipment already placed in the arrangement. If full network termination capacity of the transmission equipment being installed is not requested in the application, additional network terminations for the installed equipment will require the submission of another application. In the event that ITC^DeltaCom submits an application for terminations that exceed the total capacity of the transmission equipment, ITC^DeltaCom will be informed of the discrepancy and will be required to submit a revision to the application.**

5.1.4.1 **If ITC^DeltaCom submits an application for terminations that do not require transmission equipment, ITC^DeltaCom must indicate in the Comments Section of the BSTEI-1-P (Physical) or BSTEI-1-V (Virtual) application form input into the e.App system that the terminations are for use with a BellSouth product/service, such as UNE DS3, and ITC^DeltaCom must provide a forecast that outlines the implementation of these terminations. If ITC^DeltaCom submits an application for terminations that do not require transmission equipment and available terminations already exist for this type of installation, BellSouth will notify ITC^DeltaCom of the available terminations that do not require transmission equipment and require ITC^DeltaCom utilize all of these terminations, prior to submitting a request for additional terminations. Should a dispute arise as to whether this is an efficient use of those terminations already installed, then the Parties agree to use the dispute resolution process to settle this issue.**

5.2 **Except where prohibited by contract, ITC^DeltaCom shall identify to BellSouth whenever ITC^DeltaCom submits a Method of Procedure ("MOP") adding equipment to ITC^DeltaCom's Collocation Space all entities that have a financial interest, secured and otherwise, in the equipment in ITC^DeltaCom's Collocation Space. A copy of this list will be forwarded by ITC^DeltaCom to ITC^DeltaCom's ATCC Representative for retention. This information shall be expressly covered by the confidentiality provisions contained in Section 9 of the General Terms and Conditions of this Agreement. In the event that ITC^DeltaCom abandons the Collocation Space or ITC^DeltaCom's collocation arrangement or this Agreement is terminated due to a failure by ITC^DeltaCom to meet its financial obligations to BellSouth, BellSouth may use the list of entities with interest in equipment in ITC^DeltaCom's Collocation Space for marketing the equipment and/or the Collocation Space. Furthermore, BellSouth**

shall send notice to ITC^DeltaCom contact's for notices set forth in Section 20 of the General Terms and Conditions of this Agreement or to such other individual as ITC^DeltaCom has designated as its representative for purposes of collocation, in accordance with Section 20 of the General Terms and Conditions of this Agreement, prior to contacting any such entity that has a financial interest, secured or otherwise, in the equipment in ITC^DeltaCom's collocation space.

5.3 ITC^DeltaCom shall not use the Collocation Space for marketing purposes nor shall it place any identifying signs or markings outside the Collocation Space or on the grounds of the Premises.

5.4 ITC^DeltaCom shall place a plaque or other identification affixed to ITC^DeltaCom's equipment necessary to identify ITC^DeltaCom's equipment, including a list of emergency contacts with telephone numbers.

5.5 Entrance Facilities. ITC^DeltaCom may elect to place ITC^DeltaCom-owned or ITC^DeltaCom-leased fiber entrance facilities into the Collocation Space. BellSouth will designate the point of interconnection in close proximity to the Premises building housing the Collocation Space, such as an entrance manhole or a cable vault, which are physically accessible by both Parties. ITC^DeltaCom will provide and place fiber cable at the point of entrance of sufficient length to be pulled through conduit and into the splice location. ITC^DeltaCom will provide and install a sufficient length of fire retardant riser cable, to which the entrance cable will be spliced by BellSouth, which will extend from the splice location to ITC^DeltaCom's equipment in the Collocation Space. In the event ITC^DeltaCom utilizes a non-metallic, riser-type entrance facility, a splice will not be required. ITC^DeltaCom must contact BellSouth for instructions prior to placing the entrance facility cable in the manhole. ITC^DeltaCom is responsible for maintenance of the entrance facilities. At ITC^DeltaCom's option BellSouth will accommodate where technically feasible a microwave entrance facility pursuant to separately negotiated terms and conditions. In the case of adjacent collocation, unless BellSouth determines that limited space is available for the entrance facilities, copper facilities may be used between the adjacent collocation arrangement and the central office demarcation point.

5.5.1 Dual Entrance. BellSouth will provide at least two interconnection points at each Premise where there are at least two such interconnection points available and where capacity exists. Upon receipt of a request for physical collocation under this Attachment, BellSouth shall provide ITC^DeltaCom with information regarding BellSouth's capacity to accommodate dual entrance facilities. If conduit in the serving manhole(s) is available and is not reserved for another purpose for utilization within 12 months of the receipt of an application for collocation, BellSouth will make the requested conduit space available for installing a second entrance facility to ITC^DeltaCom's arrangement. The location of the serving manhole(s) will be

determined at the sole discretion of BellSouth. Where dual entrance is not available due to lack of capacity, BellSouth will so state in the Application Response.

5.5.2 Shared Use. ITC^DeltaCom may utilize spare capacity on an existing interconnector entrance facility for the purpose of providing an entrance facility to ITC^DeltaCom's collocation arrangement within the same BellSouth Premises. BellSouth shall allow the splice, provided that the fiber is non-working fiber. ITC^DeltaCom must arrange with BellSouth for BellSouth to splice the ITC^DeltaCom provided riser cable to the spare capacity on the entrance facility. The rates set forth in Exhibit C will apply. If ITC^DeltaCom desires to allow another telecommunications carrier to use its entrance facilities, additional rates, terms and conditions will apply and shall be negotiated between the parties.

5.6 Demarcation Point. BellSouth will designate the point(s) of demarcation between ITC^DeltaCom's equipment and/or network and BellSouth's network. Each Party will be responsible for maintenance and operation of all equipment/facilities on its side of the demarcation point. For 2-wire and 4-wire connections to BellSouth's network, the demarcation point shall be a common block on the BellSouth designated conventional distributing frame (CDF). ITC^DeltaCom shall be responsible for providing, and ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier shall be responsible for installing and properly labeling/stenciling, the common block, and necessary cabling pursuant to Section 6. For all other terminations BellSouth shall designate a demarcation point on a per arrangement basis. ITC^DeltaCom or its agent must perform all required maintenance to equipment/facilities on its side of the demarcation point, pursuant to Section 5.6, following, and may self-provision cross-connects that may be required within the Collocation Space to activate service requests.

5.6.1 In Tennessee, BellSouth will designate the point(s) of demarcation between ITC^DeltaCom's equipment and/or network and BellSouth's network. Each Party will be responsible for maintenance and operation of all equipment/facilities on its side of the demarcation point. For connections to BellSouth's network, the demarcation point shall be an ITC^DeltaCom provided Point of Termination Bay (POT Bay) in a common area within the Premises. ITC^DeltaCom shall be responsible for providing, and ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier shall be responsible for installing and properly labeling/stenciling, the POT Bay as well as the necessary cabling between ITC^DeltaCom's Collocation Space and the demarcation point. ITC^DeltaCom or its agent must perform all required maintenance to equipment/facilities on its side of the demarcation point, pursuant to Section 5.6, following, and may self-provision cross-connects that may be required within the Collocation Space to activate service requests. BellSouth will negotiate alternative rates, terms and conditions related to the demarcation point in Tennessee in the event that ITC^DeltaCom desires to avoid the use of an intermediary device as contemplated by the Tennessee Regulatory Authority.

5.7 ITC^DeltaCom's Equipment and Facilities. ITC^DeltaCom, or if required by this Attachment, ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier, is solely responsible for the design, engineering, installation, testing, provisioning, performance, monitoring, maintenance and repair of the equipment and facilities used by ITC^DeltaCom which must be performed in compliance with all applicable BellSouth policies and guidelines. Such equipment and facilities may include but are not limited to cable(s), equipment, and point of termination connections. ITC^DeltaCom and its selected BellSouth Certified Supplier must follow and comply with all BellSouth requirements outlined in BellSouth's TR 73503, TR 73519, TR 73572, and TR 73564.

5.8 BellSouth's Access to Collocation Space. From time to time BellSouth may require access to the Collocation Space. BellSouth retains the right to access such space for the purpose of making BellSouth equipment and building modifications (e.g., running, altering or removing racking, ducts, electrical wiring, HVAC, and cables). BellSouth will give notice to ITC^DeltaCom at least forty-eight (48) hours before access to the Collocation Space is required. ITC^DeltaCom may elect to be present whenever BellSouth performs work in the Collocation Space. The Parties agree that ITC^DeltaCom will not bear any of the expense associated with this work.

5.9 Access. Pursuant to Section 11, ITC^DeltaCom shall have access to the Collocation Space twenty-four (24) hours a day, seven (7) days a week. ITC^DeltaCom agrees to provide the name and social security number or date of birth or driver's license number of each employee, supplier, or agent of ITC^DeltaCom or ITC^DeltaCom's Guest(s) provided with access keys or devices ("Access Keys") prior to the issuance of said Access Keys. Key acknowledgement forms must be signed by ITC^DeltaCom and returned to BellSouth Access Management within 15 calendar days of ITC^DeltaCom's receipt. Failure to return properly acknowledged forms will result in the holding of subsequent requests until acknowledgements are current. Access Keys shall not be duplicated under any circumstances. ITC^DeltaCom agrees to be responsible for all Access Keys and for the return of all said Access Keys in the possession of ITC^DeltaCom employees, suppliers, Guests, or agents after termination of the employment relationship, contractual obligation with ITC^DeltaCom or upon the termination of this Attachment or the termination of occupancy of an individual collocation arrangement.

5.9.1 BellSouth will permit one accompanied site visit to ITC^DeltaCom's designated collocation arrangement location after receipt of the Bona Fide Firm Order without charge to ITC^DeltaCom. ITC^DeltaCom must submit to BellSouth the completed Access Control Request Form for all employees or agents requiring access to the BellSouth Premises a minimum of thirty (30) calendar days prior to the date ITC^DeltaCom desires access to the Collocation Space. In order to permit reasonable access during construction of the Collocation Space, ITC^DeltaCom may submit such a request at any time subsequent to BellSouth's receipt of the BFFO. In the event ITC^DeltaCom desires access to the Collocation Space after submitting such a request but prior to access being approved, in addition to the first accompanied free visit,

BellSouth shall permit ITC^DeltaCom to access the Collocation Space accompanied by a security escort at ITC^DeltaCom's expense. ITC^DeltaCom must request escorted access at least three (3) business days prior to the date such access is desired.

5.10 Lost or Stolen Access Keys. ITC^DeltaCom shall notify BellSouth in writing immediately in the case of lost or stolen Access Keys. Should it become necessary for BellSouth to re-key buildings or deactivate a card as a result of a lost Access Key(s) or for failure to return an Access Key(s), ITC^DeltaCom shall pay for all reasonable costs associated with the re-keying or deactivating the card.

5.11 Interference or Impairment. Notwithstanding any other provisions of this Attachment, ITC^DeltaCom shall not use any product or service provided under this Agreement, any other service related thereto or used in combination therewith, or place or use any equipment or facilities in any manner that 1) significantly degrades, interferes with or impairs service provided by BellSouth or by any other entity or any person's use of its telecommunications service; 2) endangers or damages the equipment, facilities or other property of BellSouth or of any other entity or person; 3) compromises the privacy of any communications; or 4) creates an unreasonable risk of injury or death to any individual or to the public. If BellSouth reasonably determines that any equipment or facilities of ITC^DeltaCom violates the provisions of this paragraph, BellSouth shall give written notice to ITC^DeltaCom, which notice shall direct ITC^DeltaCom to cure the violation within forty-eight (48) hours of ITC^DeltaCom's actual receipt of written notice or, at a minimum, to commence curative measures within twenty-four (24) hours and to exercise reasonable diligence to complete such measures as soon as possible thereafter. After receipt of the notice, the Parties agree to consult immediately and, if necessary, to inspect the arrangement.

5.11.1 Except in the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services, if ITC^DeltaCom fails to take curative action within forty-eight (48) hours or if the violation is of a character which poses an immediate and substantial threat of damage to property, injury or death to any person, or any other significant degradation, interference or impairment of BellSouth's or another entity's service, then and only in that event BellSouth may take such action as it deems appropriate to correct the violation, including without limitation the interruption of electrical power to ITC^DeltaCom's equipment. BellSouth will endeavor, but is not required, to provide notice to ITC^DeltaCom prior to taking such action and shall have no liability to ITC^DeltaCom for any damages arising from such action, except to the extent that such action by BellSouth constitutes willful misconduct.

5.11.2 For purposes of this Section, the term significantly degrade shall mean an action that noticeably impairs a service from a user's perspective. In the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services and ITC^DeltaCom fails to take curative action within forty-eight (48) hours then BellSouth will establish before the relevant Commission that the technology deployment is causing the significant

degradation. Any claims of network harm presented to ITC^DeltaCom or, if subsequently necessary, the relevant Commission must be supported with specific and verifiable information. Where BellSouth demonstrates that a deployed technology is significantly degrading the performance of other advanced services or traditional voice band services, ITC^DeltaCom shall discontinue deployment of that technology and migrate its customers to technologies that will not significantly degrade the performance of other such services. Where the only degraded service itself is a known disturber, and the newly deployed technology satisfies at least one of the criteria for a presumption that is acceptable for deployment under section 47 C.F.R. 51.230, the degraded service shall not prevail against the newly-deployed technology.

5.12 **Personalty and its Removal. Facilities and equipment placed by ITC^DeltaCom in the Collocation Space shall not become a part of the Collocation Space, even if nailed, screwed or otherwise fastened to the Collocation Space, but shall retain their status as personal property and may be removed by ITC^DeltaCom at any time. Any damage caused to the Collocation Space by ITC^DeltaCom's employees, agents or representatives during the removal of such property shall be promptly repaired by ITC^DeltaCom at its expense except for normal wear and tear. If ITC^DeltaCom decides to remove equipment from its Collocation Space and the removal requires no physical change, BellSouth will bill ITC^DeltaCom a Supplemental Application Fee (Administrative Only Application Fee) as set forth in Exhibit C. This non-recurring fee will be billed on the date that BellSouth provides an Application Response.**

5.13 Alterations. In no case shall ITC^DeltaCom or any person acting on behalf of ITC^DeltaCom make any rearrangement, modification, improvement, addition, or other alteration which could affect in any way space, power, HVAC, and/or safety considerations to the Collocation Space or the BellSouth Premises without the written consent of BellSouth, which consent shall not be unreasonably withheld. The cost of any such specialized alterations shall be paid by ITC^DeltaCom. Any such material rearrangement, modification, improvement, addition, or other alteration shall require a Subsequent Application and Subsequent Application Fee which will be billed by BellSouth on the date that BellSouth makes an Application Response.

5.14 Janitorial Service. ITC^DeltaCom shall be responsible for the general upkeep of the Collocation Space. ITC^DeltaCom shall arrange directly with a BellSouth Certified Supplier for janitorial services applicable to Caged Collocation Space. BellSouth shall provide a list of such suppliers on a site-specific basis upon request.

6. Ordering and Preparation of Collocation Space

6.1 Should any state or federal regulatory agency impose procedures or intervals applicable to ITC^DeltaCom and BellSouth that are different from procedures or intervals set forth in this section, whether now in effect or that become effective after execution of this Agreement, those procedures or intervals shall supersede the

requirements set forth herein for that jurisdiction for all applications submitted for the first time after the effective date thereof.

6.2 Initial Application. For ITC^DeltaCom or ITC^DeltaCom's Guest(s) initial equipment placement, ITC^DeltaCom shall submit to BellSouth a Physical Expanded Interconnection Application Document ("Initial Application"). The Initial Application is Bona Fide when it is complete and accurate, meaning that all required fields on the application are completed with the appropriate type of information. An application fee will apply which will be billed by BellSouth on the date that BellSouth makes an Application Response.

6.3 Subsequent Application. In the event ITC^DeltaCom or ITC^DeltaCom's Guest(s) desires to modify the use of the Collocation Space after a BFFO, ITC^DeltaCom shall complete an Application detailing all information regarding the modification to the Collocation Space ("Subsequent Application"). The Subsequent Application is Bona Fide when it is complete and accurate, meaning that all required fields on the Subsequent Application are completed with the appropriate type of information. BellSouth shall determine what modifications, if any, to the Premises are required to accommodate the change requested by ITC^DeltaCom in the Application. Such necessary modifications to the Premises may include, but are not limited to, floor loading changes, changes necessary to meet HVAC requirements, changes to power plant requirements, equipment additions, etc.

6.3.1 **Subsequent Application Fee. The application fee paid by ITC^DeltaCom for its request to modify the use of the Collocation Space shall be dependent upon the level of assessment needed for the modification requested. Where the Subsequent Application does not require assessment for provisioning or construction work but requires administrative costs by BellSouth, a Subsequent Application Fee (Administrative Only Application Fee) will be required as set forth in exhibit C. This Administrative Only Application Fee will be applicable in instances such as Transfer of Ownership of the Collocation Space, Removal of Equipment from the Collocation Space and V-to-P Conversion (In Place). The fee for a Subsequent Application where the modification requested has limited effect (e.g., requires limited assessment and no capital expenditure by BellSouth as sufficient cable support structure, HVAC, power and terminations are available) shall be the Subsequent Application Fee as set forth in Exhibit C. If the modification requires capital expenditure, an Initial Application Fee shall apply. This non-recurring fee will be billed on the date that BellSouth makes an Application Response.**

6.4 Space Preferences. If ITC^DeltaCom has previously requested and received a Space Availability Report for the Premises, ITC^DeltaCom may submit up to three (3) space preferences on their application identifying specific space identification numbers as referenced on the Space Availability Report. In the event that BellSouth cannot accommodate the ITC^DeltaCom's preference(s), ITC^DeltaCom may elect to accept

the space allocated by BellSouth or may cancel its application and submit another application requesting additional preferences, which will be treated as a new application and an application fee will apply which will be billed by BellSouth on the date that BellSouth makes an Application Response.

6.5 Space Availability Notification.

6.5.1 Unless otherwise specified, BellSouth will respond to an application within ten (10) calendar days as to whether space is available or not available within a BellSouth Premises. BellSouth will also respond as to whether the Application is Bona Fide and if it is not Bona Fide the items necessary to cause the Application to become Bona Fide. If the amount of space requested is not available, BellSouth will notify ITC^DeltaCom of the amount of space that is available and no Application Fee shall apply. When BellSouth's response includes an amount of space less than that requested by ITC^DeltaCom, or differently configured, ITC^DeltaCom must resubmit its Application to reflect the actual space available.

6.5.2 BellSouth will respond to a Florida Application within fifteen (15) calendar days as to whether space is available or not available within a BellSouth Premises. BellSouth will also respond as to whether the Application is Bona Fide and if it is not Bona Fide the items necessary to cause the application to become Bona Fide. If a lesser amount of space than requested is available, BellSouth will provide an Application Response for the amount of space that is available and an application Fee will be billed by BellSouth on the date that BellSouth makes an Application Response. When BellSouth's Application Response includes an amount of space less than that requested by ITC^DeltaCom or differently configured, ITC^DeltaCom must amend its Application to reflect the actual space available prior to submitting BFFO.

6.5.3 BellSouth will respond to a Louisiana application within ten (10) calendar days for space availability for one (1) to ten (10) applications; fifteen (15) calendar days for eleven (11) to twenty (20) applications; and for more than twenty (20) applications, it is increased by five (5) calendar days for every five additional applications received within five (5) business days. If the amount of space requested is not available, BellSouth will notify ITC^DeltaCom of the amount of space that is available and no application fee shall apply. When BellSouth's response includes an amount of space less than that requested by ITC^DeltaCom or differently configured, ITC^DeltaCom must resubmit its application to reflect the actual space available. BellSouth will also respond as to whether the application is Bona Fide and if it is not Bona Fide the items necessary to cause the application to become Bona Fide.

6.6 Denial of Application. If BellSouth notifies ITC^DeltaCom that no space is available ("Denial of Application"), BellSouth will not assess an Application Fee. After notifying ITC^DeltaCom that BellSouth has no available space in the requested Premises, BellSouth will allow ITC^DeltaCom, upon request, to tour the entire Premises within ten (10) calendar days of such Denial of Application. In order to schedule said tour within ten (10) calendar days, the request for a tour of the Premises

must be received by BellSouth within five (5) calendar days of the Denial of Application.

6.7 Filing of Petition for Waiver. Upon Denial of Application, BellSouth will timely file a petition with the Commission pursuant to 47 U.S.C. § 251(c)(6). BellSouth shall provide to the Commission any information requested by that Commission. Such information shall include which space, if any, BellSouth or any of BellSouth's affiliates have reserved for future use and a detailed description of the specific future uses for which the space has been reserved. Subject to an appropriate nondisclosure agreement or provision, BellSouth shall permit ITC^DeltaCom to inspect any floor plans or diagrams that BellSouth provides to the Commission.

6.8 Waiting List. On a first-come, first-served basis governed by the date of receipt of an Application or Letter of Intent, BellSouth will maintain a waiting list of requesting carriers who have either received a Denial of Application or, where it is publicly known that the Premises is out of space, have submitted a Letter of Intent to collocate. BellSouth will notify the telecommunications carriers on the waiting list that can be accommodated by the amount of space that becomes available according to the position of the telecommunications carriers on said waiting list.

6.8.1 In Florida, on a first-come, first-served basis governed by the date of receipt of an Application or Letter of Intent, BellSouth will maintain a waiting list of requesting carriers who have either received a Denial of Application or, where it is publicly known that the Premises is out of space, have submitted a Letter of Intent to collocate. Sixty (60) days prior to space becoming available, if known, BellSouth will notify the Florida PSC and the telecommunications carriers on the waiting list by mail when space becomes available according to the position of telecommunications carrier on said waiting list. If not known sixty (60) days in advance, BellSouth shall notify the Florida PSC and the telecommunications carriers on the waiting list within two days of the determination that space is available. A CLEC that, upon denial of physical collocation, requests virtual collocation shall be automatically placed on the waiting list.

6.8.2 When space becomes available, ITC^DeltaCom must submit an updated, complete, and correct Application to BellSouth within 30 calendar days of such notification. If ITC^DeltaCom has originally requested caged collocation space and cageless collocation space becomes available, ITC^DeltaCom may refuse such space and notify BellSouth in writing within that time that ITC^DeltaCom wants to maintain its place on the waiting list without accepting such space. ITC^DeltaCom may accept an amount of space less than its original request by submitting an Application as set forth above, and upon request, may maintain its position on the waiting list for the remaining space that was initially requested. If ITC^DeltaCom does not submit such an Application or notify BellSouth in writing as described above, BellSouth will offer such space to the next CLEC on the waiting list and remove ITC^DeltaCom from the waiting list. Upon request, BellSouth will advise ITC^DeltaCom as to its position on the list.

6.9 Public Notification. BellSouth will maintain on its Interconnection Services website a notification document that will indicate all Central Offices that are without available space. BellSouth shall update such document within ten (10) calendar days of the date BellSouth becomes aware that there is insufficient space to accommodate physical collocation. BellSouth will also post a document on its Interconnection Services website that contains a general notice where space has become available in a Central Office previously on the space exhaust list.

6.10 Application Response.

6.10.1 In Alabama, when space has been determined to be available, BellSouth will provide an Application Response within fifteen (15) calendar days of the receipt of a Bona Fide Application, which will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8.

6.10.2 In North Carolina, when space has been determined to be available, BellSouth will provide an Application Response within fifteen (15) calendar days of the receipt of a Bona Fide application, which will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and any other applicable space preparation fees, described in Section 8.

6.10.3 In Tennessee, BellSouth will provide an Application Response within fifteen (15) calendar days of receipt of a Bona Fide Application. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee (Cageless and Virtual), and a firm price quote, based upon standardized pricing provided that ITC^DeltaCom has given BellSouth a forecast of ITC^DeltaCom's collocation needs at least ten (10) calendar days prior to submitting an application. If no forecast is provided by ITC^DeltaCom, the interval for an Application Response will be thirty (30) calendar days.

6.10.4 In Florida, within fifteen (15) calendar days of receipt of a Bona Fide Application, when space has been determined to be available or when a lesser amount of space than that requested is available, then with respect to the space available, BellSouth will provide an Application Response including sufficient information to enable ITC^DeltaCom to place a Firm Order. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8. When ITC^DeltaCom submits ten (10) or more Applications within ten (10) calendar days, the initial fifteen (15) day response period will increase by ten (10) days for every additional ten (10) Applications or fraction thereof.

6.10.5 In Georgia, Kentucky, Mississippi, North Carolina and South Carolina, when space has been determined to be available for caged or cageless arrangements, BellSouth will provide an Application Response within twenty (20) calendar days of receipt of a Bona Fide Application. The Application Response will include, at a minimum, the

configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8.

6.10.6 In Louisiana, when space has been determined to be available, BellSouth will provide an Application Response within thirty (30) calendar days for one (1) to ten (10) applications; thirty-five (35) calendar days for eleven (11) to twenty (20) applications; and for requests of more than twenty (20) applications it is increased by five (5) calendar days for every five (5) applications received within five (5) business days. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8.

6.11 Application Modifications.

6.11.1 If a modification or revision is made to any information in the Bona Fide application prior to a BFFO, with the exception of modifications to Customer Information, Contact Information or Billing Contact Information, either at the request of ITC^DeltaCom or necessitated by technical considerations, said application shall be considered a new application and shall be handled as a new application with respect to response and provisioning intervals and BellSouth will charge ITC^DeltaCom an additional application fee. The fee for an application modification where the modification requested has limited effect (e.g., requires labor expenditure but no capital expenditure by BellSouth and where sufficient cable support structure, HVAC, power and terminations are available) shall be the Subsequent Application Fee as set forth in Exhibit B. A modification involving a capital expenditure by BellSouth shall require ITC^DeltaCom to submit the application with an Initial Application Fee. This nonrecurring fee will be billed by BellSouth on the date that BellSouth provides an Application Response.

6.12 Bona Fide Firm Order.

6.12.1 ITC^DeltaCom shall indicate its intent to proceed with equipment installation in a BellSouth Premises by submitting a Physical Expanded Interconnection Firm Order document ("Firm Order") to BellSouth. A Firm Order shall be considered Bona Fide when ITC^DeltaCom has completed the Application/Inquiry process described in Section 6, preceding, and has submitted the Firm Order document indicating acceptance of the Application Response provided by BellSouth. The BFFO must be received by BellSouth no later than thirty (30) calendar days after BellSouth's Application Response to ITC^DeltaCom's Bona Fide application or the application will expire.

6.12.2 BellSouth will establish a firm order date based upon the date BellSouth is in receipt of a BFFO. BellSouth will acknowledge the receipt of ITC^DeltaCom's BFFO within seven (7) calendar days of receipt indicating that the BFFO has been received. A

BellSouth response to a BFFO will include a Firm Order Confirmation containing the firm order date. No revisions will be made to a BFFO.

7. Construction and Provisioning

7.1 Construction and Provisioning Intervals

7.1.1 In Alabama, BellSouth will complete construction for caged collocation arrangements under ordinary conditions as soon as possible within a maximum of ninety (90) calendar days from receipt of a BFFO or as agreed to by the Parties. BellSouth will complete construction for cageless collocation arrangements when preconditioned (a record change only is required to show that the space has been assigned to ITC^DeltaCom) space is available within thirty (30) calendar days from receipt of a BFFO or as agreed to by the Parties. Under extraordinary conditions, BellSouth will complete construction for cageless collocation arrangements as soon as possible within a maximum of ninety (90) calendar days from receipt of a BFFO or as agreed to by the Parties. Ordinary conditions are defined as space available with only minor changes to support systems required, such as but not limited to, HVAC, cabling and the power plant(s). Extraordinary conditions are defined to include but are not limited to major BellSouth equipment rearrangement or addition; power plant addition or upgrade; major mechanical addition or upgrade; major upgrade for ADA compliance; environmental hazard or hazardous materials abatement; and arrangements for which equipment shipping intervals are extraordinary in length. The Parties may mutually agree to renegotiate an alternative provisioning interval or BellSouth may seek a waiver from this interval from the Commission.

7.1.2 In Florida, BellSouth will complete construction for physical collocation (caged or cageless) arrangements as soon as possible and within a maximum of ninety (90) calendar days from receipt of a BFFO or as agreed to by the Parties. For changes to Collocation Space after initial space completion ("Augmentation"), BellSouth will complete construction for collocation arrangements as soon as possible and within a maximum of forty-five (45) calendar days from receipt of a BFFO or as agreed to by the Parties. If BellSouth does not believe that construction will be completed within the relevant time frame and BellSouth and ITC^DeltaCom cannot agree upon a completion date, within forty-five (45) calendar days of receipt of the BFFO for an initial request, and within thirty (30) calendar days for Augmentations, BellSouth may seek an extension from the Florida Commission.

7.1.3 In Georgia, Kentucky, Mississippi, North Carolina and South Carolina, BellSouth will complete construction for caged collocation arrangements under ordinary conditions as soon as possible and within a maximum of ninety (90) calendar days from receipt of a BFFO or as agreed to by the Parties. BellSouth will complete construction for cageless collocation arrangements under ordinary conditions as soon as possible and within a maximum of sixty (60) calendar days from receipt of a BFFO and ninety (90) calendar days for extraordinary conditions or as agreed to by the Parties. Ordinary

conditions are defined as space available with only minor changes to support systems required, such as but not limited to, HVAC, cabling and the power plant(s). Extraordinary conditions are defined to include but are not limited to major BellSouth equipment rearrangement or addition; power plant addition or upgrade; major mechanical addition or upgrade; major upgrade for ADA compliance; environmental hazard or hazardous materials abatement; and arrangements for which equipment shipping intervals are extraordinary in length. The Parties may mutually agree to renegotiate an alternative provisioning interval or BellSouth may seek a waiver from this interval from the Commission.

7.1.4 In Louisiana, BellSouth will complete construction for collocation arrangements under ordinary conditions as soon as possible and within a maximum of ninety (90) calendar days for caged and sixty (60) calendar days for cageless from receipt of a BFFO for an initial request, and within sixty (60) calendar days for an Augmentation, or as agreed to by the Parties. Ordinary conditions are defined as space available with only minor changes to support systems required, such as but not limited to, HVAC, cabling and the power plant(s). BellSouth will complete construction of all other Collocation Space ("extraordinary conditions") within one hundred twenty (120) calendar days for caged and ninety (90) calendar days for cageless from the receipt of a BFFO. Examples of extraordinary conditions include but are not limited to, extended license or permitting intervals; major BellSouth equipment rearrangement or addition; power plant addition or upgrade; major mechanical addition or upgrade; major upgrade for ADA compliance; environmental hazard or hazardous materials abatement; and arrangements for which equipment shipping intervals are extraordinary in length. The Parties may mutually agree to renegotiate an alternative provisioning interval or BellSouth may seek a waiver from this interval from the Commission.

7.1.5 In Tennessee, BellSouth will complete construction for collocation arrangements under Ordinary Conditions as follows: (i) for caged collocation arrangements, within a maximum of ninety (90) calendar days from receipt of an Bona Fide Firm Order, or as agreed to by the Parties; (ii) for cageless collocation arrangements, within thirty (30) calendar days from receipt of a Bona Fide Firm Order when there is conditioned space and ITC^DeltaCom installs the bays/racks. In no event shall the provisioning interval for cageless collocation exceed ninety (90) calendar days from the receipt of a Bona Fide Firm Order, or as agreed to by the parties. Under extraordinary conditions, BellSouth may elect to renegotiate an alternative provisioning interval with ITC^DeltaCom or seek a waiver from this interval from the Commission. For the purpose of defining conditioned space as referenced in the TRA order setting intervals for cageless collocation in Tennessee, conditioned space is defined as follows: i) floor space must be available; ii) floor space must be equipped with adequate air conditioning to accommodate equipment listed on application; iii) Cable racking, any fiber duct, riser cable support structure and power cable support structure must be in place to support equipment listed on the application; and iv) power plant capacity at BDFB or main power board must be available. If LGX or DGX equipment is requested on the application and adequate existing capacity is not available then

conditioned is considered unavailable. If BellSouth is required by the application to place power cabling, conditioned space is considered unavailable.

7.2 Joint Planning. Joint planning between BellSouth and ITC^DeltaCom will commence within a maximum of twenty (20) calendar days from BellSouth's receipt of a BFFO. BellSouth will provide the preliminary design of the Collocation Space and the equipment configuration requirements as reflected in the Bona Fide Application and affirmed in the BFFO. The Collocation Space completion time period will be provided to ITC^DeltaCom during joint planning.

7.3 Permits. Each Party or its agents will diligently pursue filing for the permits required for the scope of work to be performed by that Party or its agents within ten (10) calendar days of the completion of finalized construction designs and specifications.

7.4 Acceptance Walkthrough. ITC^DeltaCom will schedule and complete an acceptance walkthrough of each Collocation Space with BellSouth within fifteen (15) calendar days of BellSouth's notifying ITC^DeltaCom that the collocation space is ready for occupancy (Space Ready Date). In the event that ITC^DeltaCom fails to complete an acceptance walkthrough within this fifteen (15) day interval, the Collocation Space shall be deemed accepted by ITC^DeltaCom. BellSouth will correct any deviations to ITC^DeltaCom's original or jointly amended requirements within seven (7) calendar days after the walkthrough, unless the Parties jointly agree upon a different time frame.

7.5 Circuit Facility Assignments (CFAs). Unless otherwise specified, BellSouth will provide CFAs to ITC^DeltaCom prior to the applicable provisioning interval set forth herein ("Provisioning Interval") for those Premises in which ITC^DeltaCom has a physical collocation arrangement with no POT bay or with a POT bay provided by BellSouth prior to 6/1/99. BellSouth cannot provide CFAs to ITC^DeltaCom prior to the Provisioning Interval for those Premises in which ITC^DeltaCom has a physical collocation arrangement with a POT bay provided by ITC^DeltaCom prior to 6/1/99 or a virtual collocation arrangement until ITC^DeltaCom provides BellSouth with the following information:

For ITC^DeltaCom -provided POT bay - a complete layout of the POT panels (equipment inventory update (EIU) form) showing locations, speeds, etc.

For virtual - a complete layout of ITC^DeltaCom's equipment (equipment inventory update (EIU) form), including the locations of the low speed ports and the specific frame terminations to which the equipment will be wired by ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier

BellSouth cannot begin work on the CFAs until the complete and accurate EIU form is received from ITC^DeltaCom. If this EIU is provided ten (10) calendar days prior to the Provisioning Interval, then CFAs will be made

available by the Provisioning Interval. If this EIU is not received ten (10) calendar days prior to the Provisioning Interval, then the CFAs will be provided within ten (10) calendar days of receipt of the EIU.

7.5.1 **BellSouth will bill ITC^DeltaCom a nonrecurring charge, as set forth in Exhibit C, each time ITC^DeltaCom requests a resend of its CFAs for any reason other than a BellSouth error in the CFAs.**

7.6 Use of BellSouth Certified Supplier. ITC^DeltaCom shall select a supplier which has been approved as a BellSouth Certified Supplier to perform all engineering and installation work. ITC^DeltaCom and ITC^DeltaCom's BellSouth Certified Supplier must follow and comply with all BellSouth requirements outlined in BellSouth's TR 73503, TR 73519, TR 73572, and TR 73564. In some cases, ITC^DeltaCom must select separate BellSouth Certified Suppliers for transmission equipment, switching equipment and power equipment. BellSouth shall provide ITC^DeltaCom with a list of BellSouth Certified Suppliers upon request. The BellSouth Certified Supplier(s) shall be responsible for installing ITC^DeltaCom's equipment and components, extending power cabling to the BellSouth power distribution frame, performing operational tests after installation is complete, and notifying BellSouth's equipment engineers and ITC^DeltaCom upon successful completion of installation, etc. The BellSouth Certified Supplier shall bill ITC^DeltaCom directly for all work performed for ITC^DeltaCom pursuant to this Attachment and BellSouth shall have no liability for nor responsibility to pay such charges imposed by the BellSouth Certified Supplier. BellSouth shall consider certifying ITC^DeltaCom or any supplier proposed by ITC^DeltaCom. All work performed by or for ITC^DeltaCom shall conform to generally accepted industry guidelines and standards.

7.7 Alarm and Monitoring. BellSouth shall place environmental alarms in the Premises for the protection of BellSouth equipment and facilities. ITC^DeltaCom shall be responsible for placement, monitoring and removal of environmental and equipment alarms used to service ITC^DeltaCom's Collocation Space. Upon request, BellSouth will provide ITC^DeltaCom with applicable tariffed service(s) to facilitate remote monitoring of collocated equipment by ITC^DeltaCom. Both Parties shall use best efforts to notify the other of any verified environmental condition known to that Party.

7.8 Virtual to Physical Collocation Relocation. In the event physical collocation space was previously denied at a location due to technical reasons or space limitations, and physical collocation space has subsequently become available, ITC^DeltaCom may relocate its virtual collocation arrangements to physical collocation arrangements and pay the appropriate fees for physical collocation and for the rearrangement or reconfiguration of services terminated in the virtual collocation arrangement, as outlined in the appropriate BellSouth tariffs. In the event that BellSouth knows when additional space for physical collocation may become available at the location requested by ITC^DeltaCom, such information will be provided to ITC^DeltaCom in BellSouth's written denial of physical collocation. To the extent that (i) physical Collocation Space becomes available to ITC^DeltaCom within 180 calendar days of

BellSouth's written denial of ITC^DeltaCom's request for physical collocation, (ii) BellSouth had knowledge that the space was going to become available, and (iii) ITC^DeltaCom was not informed in the written denial that physical Collocation Space would become available within such 180 calendar days, then ITC^DeltaCom may relocate its virtual collocation arrangement to a physical collocation arrangement and will receive a credit for any nonrecurring charges previously paid for such virtual collocation. ITC^DeltaCom must arrange with a BellSouth Certified Supplier for the relocation of equipment from its virtual Collocation Space to its physical Collocation Space and will bear the cost of such relocation.

7.8.1 In Alabama, BellSouth will complete a relocation from virtual collocation to cageless physical collocation within sixty (60) calendar days and from virtual collocation to caged physical collocation within ninety (90) calendar days.

7.9 Virtual to Physical Conversion (In Place). Virtual collocation arrangements may be converted to "in-place" physical arrangements if the potential conversion meets the following four criteria: 1) there is no change in the amount of equipment or the configuration of the equipment that was in the virtual collocation arrangement; 2) the conversion of the virtual collocation arrangement will not cause the equipment or the results of that conversion to be located in a space that BellSouth has reserved for its own future needs; 3) the converted arrangement does not limit BellSouth's ability to secure its own equipment and facilities due to the location of the virtual collocation arrangement; and 4) any changes to the arrangement can be accommodated by existing power, HVAC, and other requirements. The application fee for the conversion from virtual to in-place, physical collocation is as set forth in Attachment 11. Unless otherwise specified, BellSouth will complete virtual to in-place physical collocation conversions within sixty (60) calendar days. BellSouth will bill ITC^DeltaCom an Administrative Only Application Fee as set forth in Exhibit C for these charges on the date that BellSouth provides an Application Response.

7.9.1 In Alabama and Tennessee, BellSouth will complete Virtual to Physical Conversions (In Place) within thirty (30) calendar days.

7.10 Cancellation. If, at anytime prior to space acceptance, ITC^DeltaCom cancels its order for the Collocation Space(s) ("Cancellation"), BellSouth will bill the applicable nonrecurring rate for any and all work processes for which work has begun.

7.11 Licenses. ITC^DeltaCom, at its own expense, will be solely responsible for obtaining from governmental authorities, and any other appropriate agency, entity, or person, all rights, privileges, and licenses necessary or required to operate as a provider of telecommunications services to the public or to occupy the Collocation Space.

7.12 Environmental Compliance. The Parties agree to utilize and adhere to the Environmental Hazard Guidelines identified as Exhibit A attached hereto.

8. Rates and Charges

8.1 Recurring Charges. If ITC^DeltaCom has met the applicable fifteen (15) calendar day walkthrough interval(s) specified in Section 4, billing for recurring charges will begin upon the Space Acceptance Date. In the event that ITC^DeltaCom fails to complete an acceptance walkthrough within the applicable fifteen (15) day interval, billing for recurring charges will commence on the Space Ready Date or on the Space Acceptance Date, whichever is sooner.

8.2 Application Fee. BellSouth shall assess an Application Fee via a service order, which shall be issued at the time BellSouth responds that space is available pursuant to Section 6 (Application Response). Payment of said Application Fee will be due as dictated by ITC^DeltaCom's current billing cycle and is non-refundable.

8.2.1 In Tennessee the applicable Application Fee is the Planning Fee for both Initial Applications and Subsequent Applications placed by ITC^DeltaCom. This fee will be billed by Bellsouth on the date that BellSouth provides an Application Response.

8.3 Space Preparation. Space preparation fees consist of a nonrecurring charge for firm order processing and monthly recurring charges for central office modifications, assessed per arrangement, per square foot, and common systems modifications, assessed per arrangement, per square foot for cageless collocation and per cage for caged collocation. ITC^DeltaCom shall remit payment of the nonrecurring firm order-processing fee coincident with submission of a BFFO. The charges recover the costs associated with preparing the Collocation Space, which includes survey, engineering of the Collocation Space, which includes survey, engineering of the Collocation Space, design and modification costs for network, building and support systems. In the event ITC^DeltaCom opts for cageless space, the space preparation fees will be assessed based on the total floor space dedicated to ITC^DeltaCom as prescribed in this Section.

8.4 Cable Installation. Cable Installation Fee(s) are assessed per entrance cable placed. This non-recurring fee will be billed by BellSouth upon receipt of the ITC^DeltaCom's BFFO.

8.5 Floor Space. The Floor Space Charge includes reasonable charges for lighting, HVAC, and other allocated expenses associated with maintenance of the Premises but does not recover any power-related costs incurred by BellSouth. When the Collocation Space is enclosed, ITC^DeltaCom shall pay floor space charges based upon the number of square feet so enclosed. When the Collocation Space is not enclosed, ITC^DeltaCom shall pay floor space charges based upon the following floor space calculation: [(depth of the equipment lineup in which the rack is placed) + (0.5 x maintenance aisle depth) + (0.5 x wiring aisle depth)] X (width of rack and spacers). For purposes of this calculation, the depth of the equipment lineup shall consider the footprint of equipment racks plus any equipment overhang. BellSouth will assign

unenclosed Collocation Space in conventional equipment rack lineups where feasible. In the event ITC^DeltaCom's collocated equipment requires special cable racking, isolated grounding or other treatment which prevents placement within conventional equipment rack lineups, ITC^DeltaCom shall be required to request an amount of floor space sufficient to accommodate the total equipment arrangement.

8.6 Power. BellSouth shall make available –48 Volt (-48V) DC power for ITC^DeltaCom's Collocation Space at a BellSouth Power Board or BellSouth Battery Distribution Fuse Bay (BDFB) at ITC^DeltaCom's option within the Premises.

8.6.1 When obtaining power from a BDFB, fuses and power cables (A&B) must be engineered (sized), and installed by ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier. When obtaining power from a BellSouth power board, power cables (A&B) must be engineered (sized), and installed by ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier. ITC^DeltaCom is responsible for contracting with a BellSouth Certified Supplier for power distribution feeder cable runs from a BellSouth BDFB or power board to ITC^DeltaCom's equipment. The determination of the BellSouth BDFB or BellSouth power board as the power source will be made at BellSouth's sole, but reasonable, discretion. The BellSouth Certified Supplier contracted by ITC^DeltaCom must provide BellSouth a copy of the engineering power specification prior to the day on which ITC^DeltaCom's equipment becomes operational. BellSouth will provide the common power feeder cable support structure between the BellSouth BDFB or power board and ITC^DeltaCom's arrangement area. ITC^DeltaCom shall contract with a BellSouth Certified Supplier who will be responsible for the following: dedicated power cable support structure within ITC^DeltaCom's arrangement, power cable feeds, and terminations of cable. Any terminations at a BellSouth power board must be performed by a BellSouth Certified power Supplier. ITC^DeltaCom shall comply with all applicable National Electric Code (NEC), BellSouth TR73503, Telcordia and ANSI Standards regarding power cabling.

8.6.2 If ITC^DeltaCom elects to install its own DC Power Plant, BellSouth shall provide AC power to feed ITC^DeltaCom's DC Power Plant. Charges for AC power will be assessed per breaker ampere per month. Rates include the provision of commercial and standby AC power. When obtaining power from a BellSouth service panel, protection devices and power cables must be engineered (sized), and installed by ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier except that BellSouth shall engineer and install protection devices and power cables for Adjacent Collocation. ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier must also provide a copy of the engineering power specification prior to the equipment becoming operational. Charges for AC power shall be assessed pursuant to the rates specified in Exhibit C. AC power voltage and phase ratings shall be determined on a per location basis. At ITC^DeltaCom's option, ITC^DeltaCom may arrange for AC

power in an Adjacent Collocation arrangement from a retail provider of electrical power.

8.6.3 In Tennessee, Recurring charges for -48V DC power consumption will be assessed per ampere per month based upon the engineered and installed power feed fused ampere capacity. Rates include redundant feeder fuse positions (A&B) and common cable rack to ITC^DeltaCom's equipment or space enclosure. ITC^DeltaCom shall contract with a BellSouth Certified Supplier who will be responsible for the following: dedicated power cable support structure within ITC^DeltaCom's arrangement and terminations of cable within the Collocation Space.

8.6.3.1 In Tennessee, Non recurring charges for –48V DC power distribution will be based on the common power feeder cable support structure between the BellSouth BDFB and ITC^DeltaCom's arrangement area.

8.6.4 In Alabama, Louisiana and South Carolina, ITC^DeltaCom has the option to purchase power directly from an electric utility company. Under such an option, ITC^DeltaCom is responsible for contracting with the electric utility company for their own power feed and meter, and is financially responsible for purchasing all equipment necessary to accomplish the arrangement, including inverters, batteries, power boards, bus bars, BDFBs, backup power supplies and cabling. The actual work to install this arrangement must be performed by ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or a BellSouth Certified Supplier hired by ITC^DeltaCom. ITC^DeltaCom, if certified as a BellSouth Certified Supplier, or ITC^DeltaCom's BellSouth Certified Supplier must comply with all applicable safety codes, including the National Electric Safety Codes, in installing this power arrangement. Any floor space, cable racking, etc utilized by ITC^DeltaCom in provisioning said power will be billed on an ICB basis. BellSouth shall waive any application fee or charges that would otherwise be due if ITC^DeltaCom decides to reconfigure any existing collocation power arrangement so as to purchase power directly from an electric utility.

8.6.5 If ITC^DeltaCom requests a reduction in the amount of power that BellSouth is currently providing ITC^DeltaCom must submit a Subsequent Application. If no modification to the Collocation Space is requested other than the reduction in power, the Subsequent Application Fee for Power Reduction as set forth in Exhibit C will apply. If modifications are requested in addition to the reduction of power the Subsequent Application Fee will apply. This non-recurring fee will be billed by BellSouth on the date that BellSouth provides an Application Response.

8.6.6 In Alabama or Louisiana, if ITC^DeltaCom is currently served from the BellSouth power board and requests that its power be reconfigured to connect to a BellSouth BDFB, in a specific central office, ITC^DeltaCom must submit a Subsequent Application. BellSouth will respond to such application within seven (7) calendar days and no application fee will apply.

8.7 Security Escort. A security escort will be required whenever ITC^DeltaCom or its approved agent desires access to the entrance manhole or must have access to the Premises after the one accompanied site visit allowed pursuant to Section 5 prior to completing BellSouth's Security Training requirements. Rates for a security escort are as set forth in Exhibit C beginning with the scheduled escort time. BellSouth will wait for one-half (1/2) hour after the scheduled time for such an escort and ITC^DeltaCom shall pay for such half-hour charges in the event ITC^DeltaCom fails to show up.

8.8 Cable Record charges. These charges apply for work required to build cable records in BellSouth systems. The VG/DS0 per cable record charge is for a maximum of 3600 records. The Fiber cable record charge is for a maximum of 99 records. These non-recurring fees will be billed upon receipt of ITC^DeltaCom's BFFO.

8.9 Other. If no rate is identified in the contract, the rate for the specific service or function will be negotiated by the Parties upon request by either Party.

9. Insurance

9.1 ITC^DeltaCom shall, at its sole cost and expense, procure, maintain, and keep in force insurance as specified in this Section 9 and underwritten by insurance companies licensed to do business in the states applicable under this Attachment and having a Best's Insurance Rating of A-.

9.2 ITC^DeltaCom shall maintain the following specific coverage:

9.2.1 Commercial General Liability coverage in the amount of ten million dollars ($10,000,000.00) or a combination of Commercial General Liability and Excess/Umbrella coverage totaling not less than ten million dollars ($10,000,000.00). BellSouth shall be named as an Additional Insured on the Commercial General Liability policy as specified herein.

9.2.2 Statutory Workers Compensation coverage and Employers Liability coverage in the amount of one hundred thousand dollars ($100,000.00) each accident, one hundred thousand dollars ($100,000.00) each employee by disease, and five hundred thousand dollars ($500,000.00) policy limit by disease.

9.2.3 All Risk Property coverage on a full replacement cost basis insuring all of ITC^DeltaCom's real and personal property situated on or within BellSouth's Central Office location(s).

9.2.4 ITC^DeltaCom may elect to purchase business interruption and contingent business interruption insurance, having been advised that BellSouth assumes no liability for loss of profit or revenues should an interruption of service occur.

9.3 The limits set forth in Section 9.2 above may be increased by BellSouth from time to time during the term of this Attachment upon thirty (30) days notice to ITC^DeltaCom

to at least such minimum limits as shall then be customary with respect to comparable occupancy of BellSouth structures.

9.4 All policies purchased by ITC^DeltaCom shall be deemed to be primary and not contributing to or in excess of any similar coverage purchased by BellSouth. All insurance must be in effect on or before the date equipment is delivered to BellSouth's Premises and shall remain in effect for the term of this Attachment or until all ITC^DeltaCom's property has been removed from BellSouth's Premises, whichever period is longer. If ITC^DeltaCom fails to maintain required coverage, BellSouth may pay the premiums thereon and seek reimbursement of same from ITC^DeltaCom.

9.5 ITC^DeltaCom shall submit certificates of insurance reflecting the coverage required pursuant to this Section a minimum of ten (10) business days prior to the commencement of any work in the Collocation Space. Failure to meet this interval may result in construction and equipment installation delays. ITC^DeltaCom shall arrange for BellSouth to receive thirty (30) business days' advance notice of cancellation from ITC^DeltaCom's insurance company. ITC^DeltaCom shall forward a certificate of insurance and notice of cancellation/non-renewal to BellSouth at the following address:

BellSouth Telecommunications, Inc.
Attn.: Risk Management Coordinator
17H53 BellSouth Center
675 W. Peachtree Street
Atlanta, Georgia 30375

9.6 ITC^DeltaCom must conform to recommendations made by BellSouth's fire insurance company to the extent BellSouth has agreed to, or shall hereafter agree to, such recommendations.

9.7 Self-Insurance. If ITC^DeltaCom's net worth exceeds five hundred million dollars ($500,000,000), ITC^DeltaCom may elect to request self-insurance status in lieu of obtaining any of the insurance required in Sections 9.2.1 and 9.2.2. ITC^DeltaCom shall provide audited financial statements to BellSouth thirty (30) calendar days prior to the commencement of any work in the Collocation Space. BellSouth shall then review such audited financial statements and respond in writing to ITC^DeltaCom in the event that self-insurance status is not granted to ITC^DeltaCom. If BellSouth approves ITC^DeltaCom for self-insurance, ITC^DeltaCom shall annually furnish to BellSouth, and keep current, evidence of such net worth that is attested to by one of ITC^DeltaCom's corporate officers. The ability to self-insure shall continue so long as the ITC^DeltaCom meets all of the requirements of this Section. If the ITC^DeltaCom subsequently no longer satisfies this Section, ITC^DeltaCom is required to purchase insurance as indicated by Sections 9.2.1 and 9.2.2.

9.8 The net worth requirements set forth in Section 9.7 may be increased by BellSouth from time to time during the term of this Attachment upon thirty (30) calendar days'

notice to ITC^DeltaCom to at least such minimum limits as shall then be customary with respect to comparable occupancy of BellSouth structures.

9.9 Failure to comply with the provisions of this Section will be deemed a material breach of this Attachment.

10. Mechanics Liens

10.1 If any mechanics lien or other liens shall be filed against property of either Party (BellSouth or ITC^DeltaCom), or any improvement thereon by reason of or arising out of any labor or materials furnished or alleged to have been furnished or to be furnished to or for the other Party or by reason of any changes, or additions to said property made at the request or under the direction of the other Party, the other Party directing or requesting those changes shall, within thirty (30) business days after receipt of written notice from the Party against whose property said lien has been filed, either pay such lien or cause the same to be bonded off the affected property in the manner provided by law. The Party causing said lien to be placed against the property of the other shall also defend, at its sole cost and expense, on behalf of the other, any action, suit or proceeding which may be brought for the enforcement of such liens and shall pay any damage and discharge any judgment entered thereon.

11. Inspections

11.1 BellSouth may conduct an inspection of ITC^DeltaCom's equipment and facilities in the Collocation Space(s) prior to the activation of facilities between ITC^DeltaCom's equipment and equipment of BellSouth. BellSouth may conduct an inspection if ITC^DeltaCom adds equipment and may otherwise conduct routine inspections at reasonable intervals mutually agreed upon by the Parties. BellSouth shall provide ITC^DeltaCom with a minimum of forty-eight (48) hours or two (2) business days, whichever is greater, advance notice of all such inspections. All costs of such inspection shall be borne by BellSouth.

12. Security and Safety Requirements

12.1 Unless otherwise specified, ITC^DeltaCom will be required, at its own expense, to conduct a statewide investigation of criminal history records for each ITC^DeltaCom employee hired in the past five (5) years being considered for work on the BellSouth Premises, for the states/counties where the ITC^DeltaCom employee has worked and lived for the past five (5) years. Where state law does not permit statewide collection or reporting, an investigation of the applicable counties is acceptable. ITC^DeltaCom shall not be required to perform this investigation if an affiliated company of ITC^DeltaCom has performed an investigation of the ITC^DeltaCom employee seeking access, if such investigation meets the criteria set forth above. This requirement will not apply if ITC^DeltaCom has performed a pre-employment

statewide investigation of criminal history records of the ITC^DeltaCom employee for the states/counties where the ITC^DeltaCom employee has worked and lived for the past five (5) years or, where state law does not permit a statewide investigation, an investigation of the applicable counties.

12.2 ITC^DeltaCom will be required to administer to their personnel assigned to the BellSouth Premises security training either provided by BellSouth, or meeting criteria defined by BellSouth.

12.3 ITC^DeltaCom shall provide its employees and agents with picture identification, which must be worn, and visible at all times while in the Collocation Space or other areas in or around the Premises. The photo identification card shall bear, at a minimum, the employee's name and photo, and ITC^DeltaCom's name. BellSouth reserves the right to remove from its premises any employee of ITC^DeltaCom not possessing identification issued by ITC^DeltaCom or who has violated any of BellSouth's policies as outlined in the CLEC Security Training documents. ITC^DeltaCom shall hold BellSouth harmless for any damages resulting from such removal of its personnel from BellSouth premises. ITC^DeltaCom shall be solely responsible for ensuring that any Guest of ITC^DeltaCom is in compliance with all subsections of this Section.

12.4 ITC^DeltaCom shall not assign to the BellSouth Premises any personnel with records of felony criminal convictions. ITC^DeltaCom shall not assign to the BellSouth Premises any personnel with records of misdemeanor convictions, except for misdemeanor traffic violations, without advising BellSouth of the nature and gravity of the offense(s). BellSouth reserves the right to refuse building access to any ITC^DeltaCom personnel who have been identified to have misdemeanor criminal convictions. Notwithstanding the foregoing, in the event that ITC^DeltaCom chooses not to advise BellSouth of the nature and gravity of any misdemeanor conviction, ITC^DeltaCom may, in the alternative, certify to BellSouth that it shall not assign to the BellSouth Premises any personnel with records of misdemeanor convictions (other than misdemeanor traffic violations).

12.4.1 ITC^DeltaCom shall not knowingly assign to the BellSouth Premises any individual who was a former employee of BellSouth and whose employment with BellSouth was terminated for a criminal offense whether or not BellSouth sought prosecution of the individual for the criminal offense.

12.4.2 ITC^DeltaCom shall not knowingly assign to the BellSouth Premises any individual who was a former supplier of BellSouth and whose access to a BellSouth Premises was revoked due to commission of a criminal offense whether or not BellSouth sought prosecution of the individual for the criminal offense.

12.5 For each ITC^DeltaCom employee or agent hired by ITC^DeltaCom within five (5) years of being considered for work on the BellSouth Premises, who requires access to a BellSouth Premises pursuant to this agreement, ITC^DeltaCom shall furnish

BellSouth, prior to an employee or agent gaining such access, a certification that the aforementioned background check and security training were completed. The certification will contain a statement that no felony convictions were found and certifying that the security training was completed by the employee. If the employee's criminal history includes misdemeanor convictions, ITC^DeltaCom will disclose the nature of the convictions to BellSouth at that time. In the alternative, ITC^DeltaCom may certify to BellSouth that it shall not assign to the BellSouth Premises any personnel with records of misdemeanor convictions other than misdemeanor traffic violations.

12.5.1 For all other ITC^DeltaCom employees requiring access to a BellSouth Premises pursuant to this Attachment, ITC^DeltaCom shall furnish BellSouth, prior to an employee gaining such access, a certification that the employee is not subject to the requirements of Section 12.5 above and that security training was completed by the employee.

12.6 At BellSouth's request, ITC^DeltaCom shall promptly remove from BellSouth's Premises any employee of ITC^DeltaCom BellSouth does not wish to grant access to its premises 1) pursuant to any investigation conducted by BellSouth or 2) prior to the initiation of an investigation if an employee of ITC^DeltaCom is found interfering with the property or personnel of BellSouth or another collocated telecommunications carrier, provided that an investigation shall promptly be commenced by BellSouth.

12.7 Security Violations. BellSouth reserves the right to interview ITC^DeltaCom's employees, agents or suppliers in the event of wrongdoing in or around BellSouth's property or involving BellSouth's or another telecommunications carrier's property or personnel, provided that BellSouth shall provide 24 hours notice (or such shorter notice as may be agreed to by the Parties as reasonable under the circumstances) to ITC^DeltaCom's Security representative of such interview. ITC^DeltaCom reserves the right to have its Security representative present during the interview. ITC^DeltaCom and its suppliers shall reasonably cooperate with BellSouth's investigation into allegations of wrongdoing or criminal conduct committed by, witnessed by or involving ITC^DeltaCom's employees, agents, or suppliers. Additionally, BellSouth reserves the right to bill ITC^DeltaCom for all reasonable costs associated with investigations involving its employees, agents, or suppliers if it is established and mutually agreed in good faith that ITC^DeltaCom's employees, agents, or suppliers are responsible for the alleged act. BellSouth shall bill ITC^DeltaCom for BellSouth property which is stolen or damaged where an investigation determines the culpability of ITC^DeltaCom's employees, agents, or suppliers and where ITC^DeltaCom agree, in good faith, with the results of such investigation. ITC^DeltaCom shall notify BellSouth in writing immediately in the event that ITC^DeltaCom discovers one of its employees already working on the BellSouthPremises is a possible security risk. Upon request of the other Party, the Party who is the employer shall discipline consistent with its employment practices, up to and including removal from the BellSouth Premises, any employee found to have violated the security and safety requirements of this Section. ITC^DeltaCom shall

hold BellSouth harmless for any damages resulting from such removal of its personnel from BellSouth's Premises.

12.7.1 ITC^DeltaCom reserves the right to interview BellSouth's employees, agents, or suppliers in the event of wrongdoing in or around ITC^DeltaCom's property or involving ITC^DeltaCom's personnel, provided that ITC^DeltaCom shall provide 24 hours notice (or such shorter notice as may be agreed to by the Parties as reasonable under the circumstances) to BellSouth's Security representative of such interview. BellSouth reserves the right to have its Security representative present during the interview. BellSouth and its suppliers shall reasonably cooperate with ITC^DeltaCom's investigation into allegations of wrongdoing or criminal conduct committed by, witnessed by, or involving BellSouth's employees, agents, or suppliers. Additionally, ITC^DeltaCom reserves the right to bill BellSouth for all reasonable costs associated with investigations involving its employees, agents, or suppliers if it is established and mutually agreed in good faith that BellSouth's employees, agents, or suppliers are responsible for the alleged act. ITC^DeltaCom shall bill BellSouth for ITC^DeltaCom property which is stolen or damaged where an investigation determines the culpability of BellSouth's employees, agents, or suppliers and where BellSouth agrees, in good faith, with the results of such investigation. BellSouth shall notify ITC^DeltaCom in writing immediately in the event that BellSouth discovers one of its employees is a possible security risk to ITC^DeltaCom property. Upon request of the other Party, the Party who is the employer shall discipline consistent with its employment practices, up to and including removal from access to ITC^DeltaCom's collocation space and/or equipment, any employee found to have violated the security and safety requirements of this Section. BellSouth shall hold ITC^DeltaCom harmless for any damages resulting from such removal of its personnel from ITC^DeltaCom's collocation space and/or access to ITC^DeltaCom's equipment.

12.8 Use of Supplies. Unauthorized use of equipment, supplies, or other property by either Party, whether or not used routinely to provide telephone service will be strictly prohibited and handled appropriately. Costs associated with such unauthorized use may be charged to the offending Party, as may be all associated investigative costs.

12.9 Use of Official Lines. Except for non-toll calls necessary in the performance of their work, neither Party shall use the telephones of the other Party on the BellSouth Premises. Charges for unauthorized telephone calls may be charged to the offending Party, as may be all associated investigative costs.

12.10 Accountability. Full compliance with the Security requirements of this section shall in no way limit the accountability of either Party to the other for the improper actions of its employees.

13. Destruction of Collocation Space

13.1 In the event a Collocation Space is wholly or partially damaged by fire, windstorm, tornado, flood or by similar causes to such an extent as to be rendered wholly unsuitable for ITC^DeltaCom's permitted use hereunder, then either Party may elect within ten (10) business days after such damage, to terminate occupancy of the damaged Collocation Space, and if either Party shall so elect, by giving the other written notice of termination, both Parties shall stand released of and from further liability under the terms hereof. If the Collocation Space shall suffer only minor damage and shall not be rendered wholly unsuitable for ITC^DeltaCom's permitted use, or is damaged and the option to terminate is not exercised by either Party, BellSouth covenants and agrees to proceed promptly without expense to ITC^DeltaCom, except for improvements not the property of BellSouth, to repair the damage. BellSouth shall, at parity with repairs made to their own space, have a reasonable time within which to rebuild or make any repairs, and such rebuilding and repairing shall be subject to delays caused by storms, shortages of labor and materials, government regulations, strikes, walkouts, and causes beyond the control of BellSouth, which causes shall not be construed as limiting factors, but as exemplary only. ITC^DeltaCom may, at its own expense, accelerate the rebuild of its collocated space and equipment provided however that a BellSouth Certified Supplier is used and the necessary space preparation has been completed. If ITC^DeltaCom's acceleration of the project increases the cost of the project, then those additional charges will be incurred by ITC^DeltaCom. Where allowed and where practical, ITC^DeltaCom may erect a temporary facility while BellSouth rebuilds or makes repairs. In all cases where the Collocation Space shall be rebuilt or repaired, ITC^DeltaCom shall be entitled to an equitable abatement of rent and other charges, depending upon the unsuitability of the Collocation Space for ITC^DeltaCom's permitted use, until such Collocation Space is fully repaired and restored and ITC^DeltaCom's equipment installed therein (but in no event later than thirty (30) business days after the Collocation Space is fully repaired and restored). Where ITC^DeltaCom has placed an Adjacent Arrangement pursuant to Section 3, ITC^DeltaCom shall have the sole responsibility to repair or replace said Adjacent Arrangement provided herein. Pursuant to this section, BellSouth will restore the associated services to the Adjacent Arrangement.

14. Eminent Domain

14.1 If the whole of a Collocation Space or Adjacent Arrangement shall be taken by any public authority under the power of eminent domain, then this Attachment shall terminate with respect to such Collocation Space or Adjacent Arrangement as of the day possession shall be taken by such public authority and rent and other charges for the Collocation Space or Adjacent Arrangement shall be paid up to that day with proportionate refund by BellSouth of such rent and charges as may have been paid in advance for a period subsequent to the date of the taking. If any part of the Collocation Space or Adjacent Arrangement shall be taken under eminent domain, BellSouth and ITC^DeltaCom shall each have the right to terminate this Attachment

with respect to such Collocation Space or Adjacent Arrangement and declare the same null and void, by written notice of such intention to the other Party within ten (10) business days after such taking.

15. Nonexclusivity

15.1 ITC^DeltaCom understands that this Attachment is not exclusive and that BellSouth may enter into similar agreements with other Parties. Assignment of space pursuant to all such agreements shall be determined by space availability and made on a first come, first served basis.

ENVIRONMENTAL AND SAFETY PRINCIPLES

The following principles provide basic guidance on environmental and safety issues when applying for and establishing Physical Collocation arrangements.

1. GENERAL PRINCIPLES

1.1 Compliance with Applicable Law. BellSouth and ITC^DeltaCom agree to comply with applicable federal, state, and local environmental and safety laws and regulations including U.S. Environmental Protection Agency (USEPA) regulations issued under the Clean Air Act (CAA), Clean Water Act (CWA), Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act (SARA), the Toxic Substances Control Act (TSCA), and OSHA regulations issued under the Occupational Safety and Health Act of 1970, as amended and NFPA and National Electrical Codes (NEC) and the NESC ("Applicable Laws"). Each Party shall notify the other if compliance inspections are conducted by regulatory agencies and/or citations are issued that relate to any aspect of this Attachment.

1.2 Notice. BellSouth and ITC^DeltaCom shall provide notice to the other, including Material Safety Data Sheets (MSDSs), of known and recognized physical hazards or Hazardous Chemicals existing on site or brought on site. Each Party is required to provide specific notice for known potential Imminent Danger conditions. ITC^DeltaCom should contact 1-800-743-6737 for BellSouth MSDS sheets.

1.3 Practices/Procedures. BellSouth may make available additional environmental control procedures for ITC^DeltaCom to follow when working at a BellSouth Premises (See Section 2, below). These practices/procedures will represent the regular work practices required to be followed by the employees and contractors of BellSouth for environmental protection. ITC^DeltaCom will require its contractors, agents and others accessing the BellSouth Premises to comply with these practices. Section 2 lists the Environmental categories where BST practices should be followed by ITC^DeltaCom when operating in the BellSouth Premises.

1.4 Environmental and Safety Inspections. BellSouth reserves the right to inspect the ITC^DeltaCom space with proper notification. BellSouth reserves the right to stop any ITC^DeltaCom work operation that imposes Imminent Danger to the environment, employees or other persons in the area or Facility.

1.5 Hazardous Materials Brought On Site. Any hazardous materials brought into, used, stored or abandoned at the BellSouth Premises by ITC^DeltaCom are owned by ITC^DeltaCom. ITC^DeltaCom will indemnify BellSouth for claims, lawsuits or damages to persons or property caused by these materials. Without prior written

BellSouth approval, no substantial new safety or environmental hazards can be created by ITC^DeltaCom or different hazardous materials used by ITC^DeltaCom at BellSouth Facility. ITC^DeltaCom must demonstrate adequate emergency response capabilities for its materials used or remaining at the BellSouth Facility.

1.6 Spills and Releases. When contamination is discovered at a BellSouth Premises, the Party discovering the condition must notify BellSouth. All Spills or Releases of regulated materials will immediately be reported by ITC^DeltaCom to BellSouth.

1.7 Coordinated Environmental Plans and Permits. BellSouth and ITC^DeltaCom will coordinate plans, permits or information required to be submitted to government agencies, such as emergency response plans, spill prevention control and countermeasures (SPCC) plans and community reporting. If fees are associated with filing, BellSouth and ITC^DeltaCom will develop a cost sharing procedure. If BellSouth's permit or EPA identification number must be used, ITC^DeltaCom must comply with all of BellSouth's permit conditions and environmental processes, including environmental "best management practices (BMP)" (see Section 2, below) and/or selection of BST disposition vendors and disposal sites.

1.8 Environmental and Safety Indemnification. BellSouth and ITC^DeltaCom shall indemnify, defend and hold harmless the other Party from and against any claims (including, without limitation, third-party claims for personal injury or death or real or personal property damage), judgments, damages, (including direct and indirect damages, and punitive damages), penalties, fines, forfeitures, costs, liabilities, interest and losses arising in connection with the violation or alleged violation of any Applicable Law or contractual obligation or the presence or alleged presence of contamination arising out of the acts or omissions of the indemnifying Party, its agents, contractors, or employees concerning its operations at the Facility.

2. CATEGORIES FOR CONSIDERATION OF ENVIRONMENTAL ISSUES

2.1 When performing functions that fall under the following Environmental categories on BellSouth's Premises, ITC^DeltaCom agrees to comply with the applicable sections of the current issue of BellSouth's Environmental and Safety Methods and Procedures (M&Ps), incorporated herein by this reference. ITC^DeltaCom further agrees to cooperate with BellSouth to ensure that ITC^DeltaCom's employees, agents, and/or subcontractors are knowledgeable of and satisfy those provisions of BellSouth's Environmental M&Ps which apply to the specific Environmental function being performed by ITC^DeltaCom, its employees, agents and/or subcontractors.

2.2 The most current version of reference documentation must be requested from BellSouth.

ENVIRONMENTAL CATEGORIES	ENVIRONMENTAL ISSUES	ADDRESSED BY THE FOLLOWING DOCUMENTATION
Disposal of hazardous material or other regulated material (e.g., batteries, fluorescent tubes, solvents & cleaning materials)	Compliance with all applicable local, state, & federal laws and regulations Pollution liability insurance EVET approval of contractor	Std T&C 450 Fact Sheet Series 17000 Std T&C 660-3 Approved Environmental Vendor List (Contact ATCC Representative)

3. DEFINITIONS

Generator. Under RCRA, the person whose act produces a Hazardous Waste, as defined in 40 CFR 261, or whose act first causes a Hazardous Waste to become subject to regulation. The Generator is legally responsible for the proper management and disposal of Hazardous Wastes in accordance with regulations.

Hazardous Chemical. As defined in the U.S. Occupational Safety and Health (OSHA) hazard communication standard (29 CFR 1910.1200), any chemical which is a health hazard or physical

hazard.

Hazardous Waste. As defined in section 1004 of RCRA.

Imminent Danger. Any conditions or practices at a facility which are such that a danger exists which could reasonably be expected to cause immediate death or serious harm to people or immediate significant damage to the environment or natural resources.

Spill or Release. As defined in Section 101 of CERCLA.
