Note: Page 19, point 5 of the Jackson Energy Authority Cost Allocation Manual calls for JEA to report "total costs allocated or charged back to each division." This schedule includes both direct and allocated costs. JEA splits costs by transaction at the time the transaction occurs. In addition, both direct and allocated costs are posted to the same accounts in the general ledger. JEA does not record transactions in a "clearing" type account for allocation at a later date. Hence, it is not practical to separate direct costs and allocated costs.
