LINE SHARING AND LINE SPLITTING																	
NOTE 1: The Line Sharing monthly recurring rates for all installations completed from October 02, 2003 through midnight October 01, 2004 shall be billed as follows:																	
NOTE 1: 10/02/2003 – 10/01/2004: 25% of the rate for an unbundled copper loop non-designed ("UCLND")																	
NOTE 1: 10/02/2004 – 10/01/2005: 50% of the rate for UCLND																	
NOTE 1: 10/02/2005 – 10/01/2006: 75% of the rate for UCLND																	
NOTE 1: Above will apply to USOCs: ULSDT and UL SCT																	
**NOTE 2: The Line Sharing monthly recurring rates with USOCs ULSDC and ULSCC applies only to circuits installed and inservice on or before October 1, 2003

UNBUNDLED PORT/LOOP COMBINATIONS - COST BASED RATES																
Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.																
Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.																
End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.																
The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections.

UNBUNDLED CENTREX PORT/LOOP COMBINATIONS - COST BASED RATES																
	1. Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.															
	2. Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.															
	3. End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.															
	4. The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos, the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections. Additional NRCs may apply also and are categorized accordingly.															
	5. Market Rates for Unbundled Centrex Port/Loop Combination will be negotiated on an Individual Case Basis, until further notice.

The "Zone" shown in the sections for stand-alone loops or loops as part of a combination refers to Geographically Deaveraged UNE Zones. To view Geographically Deaveraged UNE Zone Designations by Central Office, refer to internet Website: http://www.interconnection.bellsouth.com/become_a_clec/html/interconnection.htm																
OPERATIONAL SUPPORT SYSTEMS (OSS) - "REGIONAL RATES"																
NOTE: (1) CLEC should contact its contract negotiator if it prefers the "state specific" OSS charges as ordered by the State Commissions. The OSS charges currently contained in this rate exhibit are the BellSouth "regional" service ordering charges. CLEC may elect either the state specific Commission ordered rates for the service ordering charges, or CLEC may elect the regional service ordering charge, however, CLEC can not obtain a mixture of the two regardless if CLEC has a interconnection contract established in each of the 9 states.																
NOTE: (2) Any element that can be ordered electronically will be billed according to the SOMEc rate listed in this category. Please refer to BellSouth's Local Ordering Handbook (LOH) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the LOH, the listed SOMEc rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLECs bill when it submits an LSR to BellSouth.																
	OSS - Electronic Service Order Charge, Per Local Service Request (LSR) - UNE Only				SOMEc		3.50	0.00	3.50	0.00						
	OSS - Manual Service Order Charge, Per Local Service Request (LSR) - UNE Only				SOMAN		15.69	0.00	1.97	0.00						
UNE SERVICE DATE ADVANCEMENT CHARGE																
NOTE: The Expedite charge will be maintained commensurate with BellSouth's FCC No.1 Tariff, Section 5 as applicable.																
	UNE Expedite Charge per Circuit or Line Assignable USOC, per Day			UAL, UEANL, UCL, UEF, UDF, UEQ, UDL, UENTW, UDN, UEA, UHL, ULC, USL, U1T12, U1T48, U1TD1, U1TD3, U1TDX, U1TO3, U1TS1, U1TVX, UC1BC, UC1BL, UC1CC, UC1CL, UC1DC, UC1DL, UC1EC, UC1EL, UC1FC, UC1FL, UC1GC, UC1GL, UC1HC, UC1HL, UDL12, UDL48, UDL03, UDLSX, UE3, ULD12, ULD48, ULDD1, ULDD3, ULDDX, ULDO3, ULDS1, ULDVX, UNC1X, UNC3X, UNCDX, UNCNX, UNCSX, UNCVX, UNLD1, UNLD3, UXTD1, UXTD3, UXTS1, U1TUC, U1TUD, U1TUB, U1TUA	SDASP		200.00

LINE SHARING AND LINE SPLITTING																	
NOTE 1: The Line Sharing monthly recurring rates for all installations completed from October 02, 2003 through midnight October 01, 2004 shall be billed as follows:																	
NOTE 1: 10/02/2003 – 10/01/2004: 25% of the rate for an unbundled copper loop non-designed ("UCLND")																	
NOTE 1: 10/02/2004 – 10/01/2005: 50% of the rate for UCLND																	
NOTE 1: 10/02/2005 – 10/01/2006: 75% of the rate for UCLND																	
NOTE 1: Above will apply to USOCs: ULSDT and ULSCT																	
**NOTE 2: The Line Sharing monthly recurring rates with USOCs ULSDC and ULSCC applies only to circuits installed and inservice on or before October 1, 2003

EXCHANGE PORT RATES															
The DS1 Port rates below for 4-Wire DDITS Trunk Port and 4-Wire ISDN Port in this rate exhibit apply to the embedded base in place as of 10/2/03 until 4/1/04. After 4/1/04 these rates shall revert to tariff rates or a separate agreement.															
Requests for 4-Wire DDITS Trunk Ports with 4-Wire ISDN DS1 Ports after the effective date of this amendment shall be provided pursuant to a separate agreement or tariff at BellSouth's discretion.															
	Exchange Ports - 2-Wire DID Port			UEPEX	UEPP2	8.86	119.57	18.78	60.03	3.77

UNBUNDLED PORT/LOOP COMBINATIONS - COST BASED RATES																	
Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.																	
Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.																	
End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.																	
The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections.

UNBUNDLED CENTREX PORT/LOOP COMBINATIONS - COST BASED RATES																		
	1. Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.																	
	2. Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.																	
	3. End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.																	
	4. The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos, the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections. Additional NRCs may apply also and are categorized accordingly.																	
	5. Market Rates for Unbundled Centrex Port/Loop Combination will be negotiated on an Individual Case Basis, until further notice.

The "Zone" shown in the sections for stand-alone loops or loops as part of a combination refers to Geographically Deaveraged UNE Zones. To view Geographically Deaveraged UNE Zone Designations by Central Office, refer to internet Website: http://www.interconnection.bellsouth.com/become_a_clec/html/interconnection.htm																			
OPERATIONAL SUPPORT SYSTEMS (OSS) - "REGIONAL RATES"																			
NOTE: (1) CLEC should contact its contract negotiator if it prefers the "state specific" OSS charges as ordered by the State Commissions. The OSS charges currently contained in this rate exhibit are the BellSouth "regional" service ordering charges. CLEC may elect either the state specific Commission ordered rates for the service ordering charges, or CLEC may elect the regional service ordering charge, however, CLEC can not obtain a mixture of the two regardless if CLEC has a interconnection contract established in each of the 9 states.																			
NOTE: (2) Any element that can be ordered electronically will be billed according to the SOME C rate listed in this category. Please refer to BellSouth's Local Ordering Handbook (LOH) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the LOH, the listed SOME C rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLECs bill when it submits an LSR to BellSouth.																			
NOTE: (3) OSS - Manual Service Order Charge, Per Element - UNE Only **Please see applicable rate element for SOMAN charge**																			
		OSS - Electronic Service Order Charge, Per Local Service Request (LSR) - UNE Only						SOME C		3.50	0.00	3.50	0.00						
UNE SERVICE DATE ADVANCEMENT CHARGE																			
NOTE: The Expedite charge will be maintained commensurate with BellSouth's FCC No.1 Tariff, Section 5 as applicable.

LINE SHARING AND LINE SPLITTING																	
NOTE 1: The Line Sharing monthly recurring rates for all installations completed from October 02, 2003 through midnight October 01, 2004 shall be billed as follows:																	
NOTE 1: 10/02/2003 - 10/01/2004: 25% of the rate for an unbundled copper loop non-designed ("UCLND")																	
NOTE 1: 10/02/2004 - 10/01/2005: 50% of the rate for UCLND																	
NOTE 1: 10/02/2005 - 10/01/2006: 75% of the rate for UCLND																	
NOTE 1: Above will apply to USOCs: ULSDT and ULSCT																	
**NOTE 2: The Line Sharing monthly recurring rates with USOCs ULSDC and ULSCC applies only to circuits installed and inservice on or before October 1, 2003

UNBUNDLED PORT/LOOP COMBINATIONS - COST BASED RATES																
Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.																
Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.																
End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.																
The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections.

UNBUNDLED CENTREX PORT/LOOP COMBINATIONS - COST BASED RATES																		
1. Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.																		
2. Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.																		
3. End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.																		
4. The first and additional Port nonrecurring charges apply to Not Currently Combined Combos. For Currently Combined Combos, the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections. Additional NRCs may apply also and are categorized accordingly.																		
5. Market Rates for Unbundled Centrex Port/Loop Combination will be negotiated on an Individual Case Basis, until further notice.

NETWORK INTERCONNECTION

1. GENERAL

- 1.1 The Parties shall provide interconnection with each other's networks for the transmission and routing of telephone exchange service and exchange access on the following terms:

2. DEFINITIONS: (FOR THE PURPOSE OF THIS ATTACHMENT)

- 2.1 For purposes of this attachment only, the following terms shall have the definitions set forth below:
- 2.1.1 **Call Termination** has the meaning set forth for "termination" in 47 CFR § 51.701(d).
- 2.1.2 **Call Transport** has the meaning set forth for "transport" in 47 CFR § 51.701(c).
- 2.1.3 **Call Transport and Termination** is used collectively to mean the switching and transport functions from the Interconnection Point to the last point of switching.
- 2.1.4 **Common (Shared) Transport** is defined as the transport of the originating Party's traffic by the terminating Party over the terminating Party's common (shared) facilities between (1) the terminating Party's tandem switch and end office switch, (2) between the terminating Party's tandem switches, and/or (3) between the terminating Party's host and remote end office switches. All switches referred to herein must be registered in the Local Exchange Routing Guide (LERG).
- 2.1.5 **Cross Connect** is as defined in Attachment 4 of the Interconnection Agreement. If a Party provisions a cross connect for the purposes of interconnection under this Attachment 3, and such cross connect is not associated with a physical or virtual collocation arrangement, the provisioning party shall not charge for such cross connect.
- 2.1.6 **Dedicated Interoffice Facility** is defined as a switch transport facility between a Party's Serving Wire Center and the first point of switching within the LATA on the other Party's network.
- 2.1.7 **End Office Switching** is defined as the function that establishes a communications path between the trunk side and line side of the End Office switch.
- 2.1.8 **Fiber Meet** is an interconnection arrangement whereby the Parties physically interconnect their networks via an optical fiber interface at which one Party's facilities, provisioning, and maintenance responsibility begins and the other Party's responsibility ends.

2/10/04

- 2.1.9 **Interconnection Point (IP)** is a physical telecommunications equipment interface that interconnects the networks of BellSouth and <customer_short_name>.
- 2.1.10 **ISP-Bound Traffic** is calls to an information service provider/enhanced service provider or Internet service provider (ISP) that are dialed by using a local dialing pattern (7 or 10 digits).
- 2.1.11 **Local Channel** is defined as a switched transport facility between a Party's Point of Presence and its designated Serving Wire Center where the Point of Presence is not located within the designated Serving Wire Center
- 2.1.12 **Local Traffic** is defined as any traffic that is originated by an end user of one Party and is terminated to an end user of the other Party within a given LATA on that other Party's network, except for those calls that are originated or terminated through switched access arrangements. Additionally, Local Traffic includes any cross boundary, intrastate, interLATA or interstate interLATA calls established as a local call by the ruling regulatory body.
- 2.1.13 A **Point of Presence** is the physical location at which a Party establishes itself for obtaining access to the other Party's network.
- 2.1.14 **Reciprocal Trunk Group** is defined as a one-way trunk group carrying BellSouth originated traffic to be terminated by <customer_short_name>.
- 2.1.15 **Serving Wire Center** is defined as the wire center owned or leased by one Party that is designated by that Party to serve the geographic area in which the other Party's POP is located.
- 2.1.6 **Tandem Switching** is defined as the function that establishes a communications path between two switching offices through a third switching office through the provision of trunk side to trunk side switching.
- 2.1.7 **Transit Traffic** is traffic originating on one Party's network that is switched and/or transported by the other Party and delivered to a third party's network, or traffic originating on a third party's network that is switched and/or transported by one Party and delivered to the other Party's network.

3. NETWORK INTERCONNECTION

- 3.1 This Attachment pertains only to the provision of network interconnection where <customer_short_name> owns, leases from a third party or otherwise provides its own switch(es).
- 3.2 Network interconnection may be provided by the Parties via any technically feasible method and at any technically feasible point or points in accordance with applicable FCC and Commission rules and orders. In accordance with the terms of

this Agreement, network interconnection may be provided via a DS0 where technically feasible and supported by applicable industry standards. Requests for interconnection via methods, such as OCn level interconnection, other than as set forth in this Attachment may be made through the Bona Fide Request (BFR) process set out in Attachment 11 to this Agreement.

- 3.2.1 Requests for interconnection at a point or points other than as set forth in this Attachment may be made through the Bona Fide Request (BFR) process set out in Attachment 11 to this Agreement. At such time that BellSouth submits a request for interconnection that meets the requirements of this section, the Parties will negotiate the rates, terms, and conditions for such request.
- 3.2.2 Each Party is responsible for providing, engineering and maintaining the network on its side of the IP. The IP must be located within BellSouth's serving territory on BellSouth's network, or as otherwise mutually agreed by the Parties, in the LATA in which traffic is originating. The IP determines the point at which the originating Party shall pay the terminating Party for the Call Transport and Termination of Local Traffic and ISP-Bound Traffic.
- 3.2.3 Pursuant to the provisions of this Attachment, the Parties will endeavor in good faith to mutually agree on the location of the initial IP(s) in a given LATA. Both Parties will act in good faith and shall consider points that are efficient for both Parties. If the Parties are unable to agree on the location of the initial IP, in accordance with the terms and conditions set forth in this Attachment each Party may designate a single IP in the LATA for the delivery of Transit Traffic, Local Traffic originated by the other Party and ISP-bound Traffic originated by the other Party. BellSouth will not request the establishment of an IP where physical or virtual collocation space is not available or where BellSouth fiber connectivity is not available.
- 3.2.4 Additional IP(s) in a LATA may be established by mutual agreement of the Parties. Unless mutually agreed otherwise, an additional IP must be established if the following criteria are satisfied: (1) the traffic between <customer_short_name> and BellSouth at the proposed additional IP must exceed 8.9 million minutes of Local Traffic and ISP-Bound Traffic per month for three consecutive months; and (2) any end office to be designated as an additional IP must be more than 20 miles from an existing IP. BellSouth will not request the establishment of an IP where physical or virtual collocation space is not available or where BellSouth fiber connectivity is not available.
 - 3.2.4.1 Upon written notification from the Party requesting the establishment of an additional IP, the receiving Party has twenty (20) business days to analyze, respond to, and negotiate in good faith regarding the establishment of such IP. Should the Parties disagree on how to proceed, the requesting Party may resort to the Dispute Resolution process set forth in the General Terms and Conditions.

- 3.2.5 When the Parties agree to utilize two-way interconnection trunk groups for the exchange of Local Traffic and ISP-bound Traffic the Parties must agree to the location of the IP(s).
- 3.2.6 Notwithstanding any other provision of this Attachment and subject to the requirements for installing additional IPs, as set forth above, any IPs existing prior to the Effective Date of the Agreement will be accepted as initial IPs. BellSouth will not require re-grooming however, <customer_short_name> may regroom and augment such IPs.

3.3 **Interconnection via Dedicated Facilities**

- 3.3.1 With the exception of Transit Traffic, the Parties shall institute a “bill and keep” compensation plan under which neither Party will charge the other Party recurring and nonrecurring charges for trunks (one-way or two-way), trunk ports and associated dedicated facilities for the exchange of Local Traffic (non-transit) and ISP-bound Traffic (non-transit), and 911 traffic. The appropriate rate elements that are subject to this “bill and keep” compensation plan are set forth in Exhibit A to this Attachment. Each Party has the obligation to install and maintain the appropriate trunks, trunk ports and associated facilities on its respective side of the IP and is responsible for bearing its costs for such trunks, trunk ports and associated facilities on its side of the IP. Both Parties, as appropriate, shall be compensated for the ordering of trunks, trunk ports and facilities used exclusively for Transit Traffic and for ancillary traffic types including, but not limited to, OS/DA. The Parties agree that charges for such trunks, trunk ports and facilities are as set forth in Exhibit A to this Attachment or to the extent a rate associated with the interconnecting trunk group is not set forth in Exhibit A, the rate shall be as set forth in the appropriate Party’s tariff as filed and effective with the FCC or Commission, or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.
- 3.3.2 **Local Channel Facilities.** In lieu of providing facilities on its side of Interconnection Point or as part of Call Transport and Termination, either Party may purchase Local Channel facilities from the other Party, pursuant to the provisions of this Attachment, where such facilities are available. The percentage of Local Channel Facilities utilized for Local Traffic and ISP-bound Traffic shall be determined based upon the application of the Percent Local Facility (PLF) Factor on a statewide basis. The charges applied to the percentage of Local Channel facilities used for Local Traffic and ISP-bound Traffic as determined by the PLF are set forth in Section 3.3.1 above. The remaining percentage of Local Channel Facilities shall be billed at the appropriate Party’s intrastate or interstate tariff rates for switched access services or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.

3.3.3 **Dedicated Interoffice Facilities.** In lieu of providing facilities on its side of Interconnection Point or as part of Call Transport and Termination, either Party may purchase Dedicated Interoffice facilities from the other Party, pursuant to the provisions of this Attachment, where such facilities are available. The percentage of Dedicated Interoffice Facilities utilized for Local Traffic and ISP-bound Traffic shall be determined based upon the application of the Percent Local Facility (PLF) Factor on a statewide basis. The charges applied to the percentage of Dedicated Interoffice facilities used for Local Traffic and ISP-bound Traffic as determined by the PLF are set forth in Section 3.3.1 above. The remaining percentage of the Dedicated Interoffice Facilities shall be billed at the appropriate Party's intrastate or interstate tariff rates for switched access services or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.

3.3.4 [Parties Disagree]

[NewSouth Version] In the event that a Party's Point of Presence is located within any serving wire center (i.e., switch location), such Party may interconnect to the other Party's switch via a Cross Connect or any other technically feasible means of interconnection.

[BellSouth Version] If a Party provisions a cross connect for the purposes of interconnection under this Attachment 3, and such cross connect is not associated with a physical or virtual collocation arrangement, the provisioning party shall not charge for such cross connect.

3.3.5 The facilities and associated components as set forth in Exhibit A of this Attachment purchased pursuant to this Section 3 shall be ordered via the Access Service Request (ASR) process. The terms, conditions and rates for ordering charges (i.e., expedite, cancellation, and order modification charges) are as set forth in the BellSouth FCC Tariff No. 1. To the extent that BellSouth requests that <customer_short_name> submit an ASR for an augmentation to the facilities purchased by <customer_short_name> from BellSouth but utilized for BellSouth's originated traffic, the Parties will work in good faith and make best efforts to ensure that the ASR submitted for such augmentations does not require expedition, cancellation or modification and in the event that <customer_short_name> incurs ordering charges, BellSouth and <customer_short_name> shall work cooperatively to determine which Party caused the incurrence of such charges and that Party shall be responsible for such charges.

3.4 **Fiber Meet**

- 3.4.1 If <customer_short_name> elects to establish interconnection with BellSouth pursuant to a Fiber Meet Local Channel, <customer_short_name> and BellSouth shall jointly engineer, operate and maintain a Synchronous Optical Network (SONET) transmission system by which they shall interconnect their transmission and routing of Local Traffic via a Local Channel at either the, DS10, DS1, or DS3 level. The Parties shall work jointly to determine the specific transmission system. However, <customer_short_name>'s SONET transmission system must be compatible with BellSouth's equipment, and the Data Communications Channel (DCC) must be turned off, unless otherwise mutually agreed to by the Parties.
- 3.4.2 Each Party, at its own expense, shall procure, install and maintain the agreed upon SONET transmission system in its network.
- 3.4.3 The Parties shall agree to a Fiber Meet point between the BellSouth Serving Wire Center and the <customer_short_name> Serving Wire Center. The Parties shall deliver their fiber optic facilities to the Fiber Meet point with sufficient spare length to reach the fusion splice point for the Fiber Meet Point. BellSouth shall, at its own expense, provide and maintain the fusion splice point for the Fiber Meet. A building type Common Language Location Identification (CLLI) code will be established for each Fiber Meet point. All orders for interconnection facilities from the Fiber Meet point shall indicate the Fiber Meet point as the originating point for the facility.
- 3.4.4 Upon verbal request by <customer_short_name> and within a reasonable and non-discriminatory timeframe, BellSouth shall allow <customer_short_name> access to the fusion splice point for the Fiber Meet point for maintenance purposes on <customer_short_name>'s side of the Fiber Meet point.
- 3.4.5 Neither Party shall charge the other for its Local Channel portion of the Fiber Meet facility used for Local Traffic and ISP-bound Traffic. The remaining portion of the Local Channel shall be billed at the appropriate Party's intrastate or interstate tariff rates for switched access services or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.

4. INTERCONNECTION TRUNK GROUP ARCHITECTURES

- 4.1 BellSouth and <customer_short_name> shall establish interconnecting trunk groups and trunk group configurations between networks, including the use of one-way or two-way trunks in accordance with the following provisions set forth in this Attachment. For trunking purposes, traffic will be routed based on the digits dialed by the originating End User and in accordance with the LERG.
- 4.2 <customer_short_name> shall establish an interconnection trunk group(s) to at least one BellSouth access tandem within the LATA for the delivery of <customer_short_name>'s originated Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic and for the receipt and delivery of Transit Traffic. To the

extent <customer_short_name> desires to deliver Local Traffic, ISP-bound Traffic, IntraLATA Toll Traffic and/or Transit Traffic to BellSouth access tandems within the LATA, other than the tandems(s) to which <customer_short_name> has established interconnection trunk groups, <customer_short_name> shall order Multiple Tandem Access, as described in this Attachment, to such other BellSouth access tandems.

- 4.2.1 Notwithstanding the forgoing, <customer_short_name> shall establish an interconnection trunk group(s) to all BellSouth access and local tandems in the LATA where <customer_short_name> has homed (i.e., assigned) its NPA/NXXs. <customer_short_name> shall home its NPA/NXXs on the BellSouth tandems that serve the exchange rate center areas to which the NPA/NXXs are assigned. The specified exchange rate center assigned to each BellSouth tandem is defined in the LERG. <customer_short_name> shall enter its NPA/NXX access and/or local tandem homing arrangements into the LERG.
- 4.3 Switched access traffic will be delivered to and from Interexchange Carriers (IXCs) based on <customer_short_name>'s NXX access tandem homing arrangement as specified by <customer_short_name> in the LERG.
- 4.4 Any <customer_short_name> interconnection request that (1) deviates from the interconnection trunk group architectures as described in this Agreement, (2) affects traffic delivered to <customer_short_name> from a BellSouth switch and (3) requires special BellSouth-switch translations and other network modifications will require <customer_short_name> to follow the procedures set forth in Attachment 11 to this Agreement. At such time that BellSouth submits a request for interconnection that meets the requirements of this section, the Parties will negotiate the rates, terms, and conditions for such request.
- 4.5 Unless the Parties mutually agree otherwise, <customer_short_name> shall be responsible for ordering and paying for any two way trunks carrying Transit Traffic. At such time as <customer_short_name> is providing the transit function for 15% or more of all Transit Traffic, <customer_short_name> will provide BellSouth with notification and supporting documentation that such threshold has been met. Within fifteen days following BellSouth's receipt of such notification and documentation, the Parties will begin negotiations for an alternative compensation arrangement for such two-way trunks carrying Transit Traffic. If the Parties are unable to agree to an alternative compensation arrangement within forty-five days of BellSouth's receipt of notification, then the Parties shall mutually agree to extend the negotiations or, absent mutual agreement, the Parties shall refer to the Dispute Resolution procedure set forth in this Agreement. Upon agreement of such alternative compensation arrangement, the Parties shall execute an amendment implementing such alternative compensation for two way trunks carrying Transit Traffic and the Parties shall "true-up" such arrangement to the date BellSouth received notification.

- 4.6 All trunk groups will be provisioned as Signaling System 7 (SS7) capable where technically feasible. If SS7 is not technically feasible, multi-frequency (MF) protocol signaling shall be used.
- 4.7 In cases where <customer_short_name> is also an IXC, the IXC's Feature Group D (FG D) trunk group(s) must remain separate from the local interconnection trunk group(s).
- 4.8 **One-Way Interconnection Trunks and Trunk Groups.** Each Party shall order one-way interconnection trunks and trunk groups, including trunk and trunk group augmentations, via the ASR process. A Firm Order Confirmation (FOC) shall be returned to the ordering Party, after receipt of a valid, error free ASR, within the timeframes set forth in Attachment 6, if applicable. Notwithstanding the foregoing, blocking situations and projects shall be project managed through BellSouth's Carrier Interconnection Switching Center (CISC) Project Management Group and <customer_short_name>'s equivalent trunking group and FOCs for such orders shall be returned in the timeframes negotiated by the Parties and suitable to the project. No additional charges shall be triggered due to the involvement of such project management. A project is defined as (1) a new trunk group (excluding augments to existing routes) or (2) a request for more than 96 trunks on a single or multiple group(s) in a given BellSouth local calling area.
- 4.9 **Two-Way Interconnection Trunks and Trunk Groups.** Upon mutual agreement of the Parties, the Parties' shall exchange Local Traffic and ISP-Bound Traffic, and Transit Traffic, where applicable, on two-way interconnection trunk group(s) with the quantity of trunks being mutually determined and the provisioning being jointly coordinated. Furthermore, the Parties shall agree upon the IP(s) for two-way interconnection trunk groups transporting both Parties' Local Traffic, ISP-Bound Traffic and Transit Traffic, where applicable, consistent with Section 3 above. Upon determination by the Parties in a joint planning meeting that such trunk groups shall be utilized, <customer_short_name> shall order such two-way trunks, and any subsequent trunk and trunk group augmentations, via the Access Service Request (ASR) process. BellSouth will use the Trunk Group Service Request (TGSR) and/or submit a request to <customer_short_name> via email or phone (with e-mail confirmation) to request changes in trunking to <customer_short_name>'s two-way trunk groups carrying BellSouth originated traffic. A Firm Order Confirmation (FOC) shall be returned to the ordering Party, after receipt of a valid, error free ASR, within the applicable timeframes as set forth in Attachment 6, if applicable. Notwithstanding the foregoing, blocking situations and projects shall be project managed through BellSouth's Carrier Interconnection Switching Center (CISC) Project Management Group and <customer_short_name>'s equivalent trunking group and FOCs for such orders shall be returned in the timeframes negotiated by the Parties and suitable to the project. No additional charges shall be triggered due to the involvement of such project management. A project is defined as (1) a new trunk

group (excluding augments to existing routes) or (2) a request for more than 96 trunks on a single or multiple group(s) in a given BellSouth local calling area. Furthermore, the Parties shall jointly review trunk performance and forecasts on a periodic basis, as set forth in Section 5.7 of this Attachment. The Parties' use of two-way interconnection trunk groups for the transport of Local Traffic, ISP-Bound Traffic and Transit Traffic, where applicable, between the Parties does not preclude the Parties from mutually agreeing to establish additional one-way interconnection trunks for the delivery of either Party's originated Local Traffic, ISP-Bound Traffic, and Transit Traffic to the other Party where necessary, however, the proposal to establish such one-ways will be discussed by the parties prior to the submission of an ASR.

4.9.1 **BellSouth Access Tandem Interconnection**

Interconnection at a single access tandem provides access to those end offices subtending that access tandem (Intratandem Access). Access tandem interconnection is available for any of the following access tandem architectures.

4.9.1.1 **Basic Architecture**

In the Basic Architecture, <customer_short_name>'s originating Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic and originating and terminating Transit Traffic is transported on a single two-way trunk group between <customer_short_name> and BellSouth access tandem(s) within a LATA to provide Intratandem Access. This trunk group carries Transit Traffic between <customer_short_name> and Independent Companies, Interexchange Carriers, other CLECs, and CMRS providers that have a Meet Point Billing arrangement with BellSouth, and other network providers with which <customer_short_name> desires to exchange traffic. This trunk group also carries <customer_short_name> originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an Independent Company tandem or other CLEC tandem. BellSouth originated Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic is transported on a separate single one-way trunk group terminating to <customer_short_name>. Other trunk groups for operator services, directory assistance, and intercept may be established pursuant to the applicable BellSouth tariff if service is requested. The LERG shall be referenced for current routing and tandem serving arrangements. The Basic Architecture is illustrated in Exhibit B.

4.9.1.2 **One-Way Trunk Group Architecture**

In One-Way Trunk Group architecture, the Parties interconnect using three separate trunk groups. A one-way trunk group provides Intratandem Access for <customer_short_name>-originated Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic destined for BellSouth End Users. A second one-way trunk group carries BellSouth-originated Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic destined for <customer_short_name> End-Users. A two-way trunk group provides Intratandem Access for <customer_short_name>'s originating and terminating Transit Traffic. This trunk group carries Transit

Traffic between <customer_short_name> and Independent Companies, Interexchange Carriers, other CLECs, CMRS providers that have a Meet Point Billing arrangement with BellSouth, and other network providers with which <customer_short_name> desires to exchange traffic. This trunk group also carries <customer_short_name> originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an Independent Company tandem or other CLEC tandem. BellSouth originated Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic is transported on a separate single one-way trunk group terminating to <customer_short_name>. Other trunk groups for operator services, directory assistance, and intercept may be established pursuant to the applicable BellSouth tariff if service is requested. The LERG contains current routing and tandem serving arrangements. The one-way trunk group architecture is illustrated in Exhibit C.

4.9.1.3 **Two-Way Trunk Group Architecture**

The Two-Way Trunk Group Architecture establishes one two-way trunk group to provide Intratandem Access for the exchange of Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic between <customer_short_name> and BellSouth. In addition, a separate two-way transit trunk group must be established for <customer_short_name>'s originating and terminating Transit Traffic. This trunk group carries Transit Traffic between <customer_short_name> and Independent Companies, Interexchange Carriers, other CLECs, CMRS providers that have a Meet Point Billing arrangement with BellSouth, and other network providers with which <customer_short_name> desires to exchange traffic. This trunk group also carries <customer_short_name> originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an Independent Company tandem or other CLEC tandem. Either Party's originated traffic, may, in order to prevent or remedy a traffic blocking situations, be transported on a separate single one-way trunk group terminating to the other Party. However, where <customer_short_name> is responsive in a timely manner to BellSouth's transport needs for its originated traffic, BellSouth originating traffic will be placed on the two-way Local Traffic trunk group carrying ISP-bound Traffic and IntraLATA Toll Traffic. -Other trunk groups for operator services, directory assistance, and intercept may be established pursuant to the applicable BellSouth tariff if service is requested. The LERG contains current routing and tandem serving arrangements. The two-way trunk group architecture is illustrated in Exhibit D.

4.9.1.4 **Supergroup Architecture**

In the Supergroup Architecture, the Parties' Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic and <customer_short_name>'s Transit Traffic are exchanged on a single two-way trunk group between <customer_short_name> and BellSouth to provide Intratandem Access to <customer_short_name>. This trunk group carries Transit Traffic between <customer_short_name> and Independent

Companies, Interexchange Carriers, other CLECs, CMRS providers that have a Meet Point Billing arrangement with BellSouth, and other network providers with which <customer_short_name> desires to exchange traffic. This trunk group also carries <customer_short_name> originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an Independent Company tandem or other CLEC tandem. Either Party's originated traffic, may, in order to prevent or remedy a traffic blocking situations, be transported on a separate single one-way trunk group terminating to the other Party. However, where <customer_short_name> is responsive in a timely manner to BellSouth's transport needs for its originated traffic, BellSouth originating traffic will be placed on the Supergroup. Other trunk groups for operator services, directory assistance, and intercept may be established pursuant to the applicable BellSouth tariff if service is requested. The LERG shall be referenced for current routing and tandem serving arrangements. The Supergroup architecture is illustrated in Exhibit E.

4.9.1.5 **Multiple Tandem Access Interconnection**

4.9.1.5.1 BellSouth Multiple Tandem Access ("MTA") provides for LATA wide BellSouth transport and termination of <customer_short_name>'s-originated Local Traffic and ISP-bound Traffic transported by BellSouth by establishing an interconnection trunk group at a BellSouth access tandem with routing through multiple BellSouth access tandems as required. <customer_short_name> must also establish an interconnection trunk group(s) at all BellSouth access tandems where <customer_short_name> NXXs are homed as described in Section 4.2.1 above. If <customer_short_name> does not have NXXs homed at any particular BellSouth access tandem within a LATA and elects not to establish an interconnection trunk group(s) at such BellSouth access tandem, <customer_short_name> can order MTA in each BellSouth access tandem within the LATA where it does have an interconnection trunk group(s) and BellSouth will terminate <customer_short_name>'s Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic to End-Users served through those BellSouth access tandems where <customer_short_name> does not have an interconnection trunk group(s).

4.9.1.5.2 <customer_short_name> may also utilize MTA to route its originated Transit Traffic; provided, however, that MTA may not be utilized to route switched access traffic that transits the BellSouth network to an Interexchange Carrier (IXC). Switched access traffic originated by or terminated to <customer_short_name> will be delivered to and from IXCs based on <customer_short_name>'s NXX access tandem homing arrangement as specified by <customer_short_name> in the LERG.

4.9.1.5.3 Compensation for MTA shall be at the applicable tandem switching and transport charges specified in Exhibit A to this Attachment and shall be billed in addition to any other applicable Call Transport and Termination charges. The Multiple

Tandem Access rate element set forth in Exhibit A applies to the initial tandem only.

- 4.9.1.5.4 To the extent <customer_short_name> does not purchase MTA in a LATA served by multiple access tandems, <customer_short_name> must establish an interconnection trunk group(s) to every access tandem in the LATA to serve the entire LATA. To the extent <customer_short_name> routes its traffic in such a way that utilizes BellSouth's MTA service without properly ordering MTA, <customer_short_name> shall pay BellSouth the associated MTA charges. In a situation of tandem exhaust at any particular tandem, where the Parties choose MTA as an alternative routing plan, the Parties will negotiate appropriate rates, terms and conditions for MTA.

4.9.2 **Local Tandem Interconnection**

- 4.9.2.1 Local Tandem Interconnection arrangement allows <customer_short_name> to establish an interconnection trunk group(s) at BellSouth local tandems for: (1) the delivery of <customer_short_name>-originated Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic transported and terminated by BellSouth to BellSouth end offices served by those BellSouth local tandems, and (2) for local Transit Traffic transported by BellSouth for third party network providers who have also established an interconnection trunk group(s) at those BellSouth local tandems.
- 4.9.2.2 When a specified local calling area is served by more than one BellSouth local tandem, <customer_short_name> must designate a "home" local tandem for each of its assigned NPA/NXXs and establish trunk connections to such local tandems. Additionally, <customer_short_name> may choose to establish an interconnection trunk group(s) at the BellSouth local tandems where it has no codes homing but is not required to do so. <customer_short_name> may deliver Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic to a "home" BellSouth local tandem that is destined for other BellSouth or third party network provider end offices subtending other BellSouth local tandems in the same local calling area where <customer_short_name> does not choose to establish an interconnection trunk group(s). It is <customer_short_name>'s responsibility to enter its own NPA/NXX local tandem homing arrangements into the LERG either directly or via a vendor in order for other third party network providers to determine appropriate traffic routing to <customer_short_name>'s codes. Likewise, <customer_short_name> shall obtain its routing information from the LERG.
- 4.9.2.3 Notwithstanding establishing an interconnection trunk group(s) to BellSouth's local tandems, <customer_short_name> must also establish an interconnection trunk group(s) to BellSouth access tandems within the LATA on which <customer_short_name> has NPA/NXXs homed for the delivery of Interexchange Carrier Switched Access (SWA) and toll and traffic to Type 2A CMRS connections located at the access tandems. BellSouth shall not switch SWA traffic through more than one BellSouth access tandem. SWA, Type 2A CMRS or toll

traffic routed to the local tandem in error will not be backhauled to the BellSouth access tandem for completion. A Type 2A CMRS interconnection is a connection between a BellSouth access tandem or local tandem office to an Mobile Service Provider's point of termination.

4.9.3 **Direct End Office-to-End Office Interconnection**

4.9.3.1 Direct End Office-to-End Office one-way or two-way interconnection trunk groups allow for the delivery of a Party's originating Local Traffic, ISP-bound Traffic and IntraLATA Toll Traffic to the terminating Party on a direct end office-to-end office basis.

4.9.3.2 To the extent technically feasible and where appropriate, BellSouth will provide overflow routing consistent with how BellSouth overflows its traffic. The overflow will be based on the homing arrangements displayed in the LERG.

4.9.3.3 The Parties may utilize direct end office-to-end office trunk groups under any one of the following conditions:

4.9.3.3.1 Tandem Exhaust - If a tandem through which the Parties are interconnected is unable to, or is forecasted to be unable to support additional traffic loads for the Parties or any other carrier for any period of time, the Parties will attempt to mutually agree on an end office trunking plan or an appropriate alternative routing plan that will alleviate the tandem capacity shortage and ensure completion of traffic between <customer_short_name> and BellSouth.

4.9.3.4 Mutual Agreement - The Parties may install and maintain direct end office trunking upon mutual agreement in the absence of conditions (1) or (2) above.

4.9.4 **Transit Traffic Trunk Group**

Transit Traffic trunks can either be two-way trunks or two one-way trunks ordered by <customer_short_name> to deliver and receive Transit Traffic. Establishing Transit Traffic trunks at BellSouth access and local tandems provides intratandem access to the third parties also interconnected at those tandems.

4.9.5 **Toll Free Traffic**

4.9.5.1 If <customer_short_name> chooses BellSouth to perform the Service Switching Point (SSP) Function (i.e., handle Toll Free database queries) from BellSouth's switches, all <customer_short_name> originating Toll Free traffic will be routed over the Transit Traffic Trunk Group and shall be delivered using GR-394 format. Carrier Code "0110" and Circuit Code (to be determined for each LATA) shall be used for all such calls.

4.9.5.2 <customer_short_name> may choose to perform its own Toll Free database queries from its switch. In such cases, <customer_short_name> will determine the

nature (local/intraLATA/interLATA) of the Toll Free call (local/IntraLATA/InterLATA) based on the response from the database. If the response from the database determines that the call is a BellSouth local or intraLATA Toll Free call, <customer_short_name> will route the post-query local or IntraLATA converted ten-digit local number to BellSouth over the local or intraLATA trunk group. If the response from the database determines that the is a third party (ICO, IXC, CMRS or other CLEC) local or intraLATA Toll Free call, <customer_short_name> will route the post-query local or intraLATA converted ten-digit local number to BellSouth over the Transit Traffic Trunk Group and <customer_short_name> shall provide to BellSouth a Toll Free billing record when appropriate. If the query reveals the call is an interLATA Toll Free call, <customer_short_name> will route the post-query interLATA Toll Free call (1) directly from its switch for carriers interconnected with its network or (2) over the Transit Traffic Trunk Group to carriers that are not directly connected to <customer_short_name>'s network but that are connected to BellSouth's access tandem.

- 4.9.5.3 All post-query Toll Free calls for which <customer_short_name> performs the SSP function, if delivered to BellSouth, shall be delivered using GR-394 format for calls destined to IXCs, and GR-317 format for calls destined to end offices that directly subtend a BellSouth access tandem within the LATA.

5. NETWORK DESIGN AND MANAGEMENT FOR INTERCONNECTION

- 5.1 Network Management and Changes. Both Parties will work cooperatively with each other to install and maintain the most effective and reliable interconnected telecommunications networks, including but not limited to, the exchange of toll-free maintenance contact numbers and escalation procedures. Both Parties agree to provide public notice of changes in the information necessary for the transmission and routing of services using their local exchange facilities or networks, as well as of any other changes that would affect the interoperability of those facilities and networks, to the extent required by, and in accordance with, applicable federal and state rules and regulations and as otherwise provided in this Agreement.

- 5.2 Interconnection Technical Standards. The interconnection of all networks will be based upon accepted industry/national guidelines for transmission standards and traffic blocking criteria. Interconnecting facilities shall conform, at a minimum, to the telecommunications industry standard of DS-1 pursuant to Telcordia Standard No. TR-NWT-00499. Where <customer_short_name> chooses to utilize Signaling System 7 signaling, also known as Common Channel Signaling (SS7), SS7 connectivity is required between the <customer_short_name> switch and the BellSouth Signaling Transfer Point (STP). BellSouth will provide SS7 signaling using Common Channel Signaling Access Capability in accordance with the

technical specifications set forth in the BellSouth Guidelines to Technical Publication, TR-TSV-000905. Facilities of each Party shall provide the necessary on-hook, off-hook answer and disconnect supervision and shall provide calling number ID (Calling Party Number) when technically feasible.

5.3 Quality of Interconnection. The local interconnection for the transmission and routing of telephone exchange service and exchange access that each Party provides to each other will be at least Equal in Quality to what it provides to itself and any subsidiary or affiliate, where technically feasible, or to any other Party to which each Party provides local interconnection “Equal in Quality” shall have the meaning accorded in Section 51.305(a)(3) of the FCC’s Rules, 47 C.F.R. § 51.305(a)(3).

5.4 Network Management Controls. Both Parties will work cooperatively to apply sound network management principles by invoking appropriate network management controls (e.g., call gapping) to alleviate or prevent network congestion.

6 Signaling

6.1 BellSouth shall offer access to signaling and access to BellSouth’s signaling databases subject to compatibility testing and at the rates set forth in this Attachment. BellSouth may provide mediated access to BellSouth signaling systems and databases. Available signaling elements include signaling links, signal transfer points and service control points. Signaling functionality will be available with both A-link and B-link connectivity.

6.2 Signaling Link Transport

6.2.1 Signaling Link Transport is a set of two (2) or four (4) dedicated 56 kbps transmission paths between <customer_short_name> designated Signaling Points of Interconnection that provide appropriate physical diversity.

6.2.2 Technical Requirements

6.2.3 Signaling Link Transport shall consist of full duplex mode 56 kbps transmission paths and shall perform in the following two ways:

6.2.3.1 An “A-link” Signaling Link Transport is a connection between a switch or SCP and a Signaling Transfer Point switch pair; and

6.2.3.2 As a “B-link” Signaling Link Transport is a connection between two Signaling Transfer Point switch pairs in different company networks (e.g., between two Signaling Transfer Point switch pairs for two CLECs).

6.2.4 Signaling Link Transport shall consist of signaling link layers as follows:

2/10/04

- 6.2.4.1 An A-link layer shall consist of two (2) links. There shall be no more than two (2) minutes down time per year for an A-link layer.
- 6.2.4.2 A B-link layer shall consist of four (4) links. There shall be negligible (less than two (2) seconds) down time per year for a B-link layer.
- 6.2.5 A signaling link layer shall satisfy interoffice and intraoffice diversity of facilities and equipment, such that:
 - 6.2.5.1 No single failure of facilities or equipment causes the failure of both links in an A-link layer (i.e., the links should be provided on a minimum of two (2) separate physical paths end-to-end); and
 - 6.2.5.2 No two (2) concurrent failures of facilities or equipment shall cause the failure of all four (4) links in a B-link layer (i.e., the links should be provided on a minimum of three (3) separate physical paths end-to-end).
- 6.2.6 Interface Requirements
 - 6.2.6.1 There shall be a DS1 (1.544 Mbps) interface at <customer_short_name>'s designated SPOIs. Each 56 kbps transmission path shall appear as a DS0 channel within the DS1 interface.
- 6.3 Signaling Transfer Points (STPs)
 - 6.3.1 A Signaling Transfer Point is a signaling network function that includes all of the capabilities provided by the signaling transfer point switches (STPs) and their associated signaling links that enables the exchange of SS7 messages among and between switching elements, database elements and STPs.
 - 6.3.2 Technical Requirements
 - 6.3.2.1 STPs shall provide access to BellSouth Local Switching or Tandem Switching and to BellSouth Service Control Points/Databases connected to BellSouth SS7 network. STPs also provide access to third-party local or tandem switching and third-party-provided STPs.
 - 6.3.2.2 The connectivity provided by STPs shall fully support the functions of all other Network Elements connected to the BellSouth SS7 network. This includes the use of the BellSouth SS7 network to convey messages that neither originate nor terminate at a signaling end point directly connected to the BellSouth SS7 network (i.e., transit messages). When the BellSouth SS7 network is used to convey transit messages, there shall be no alteration of the Integrated Services Digital Network

User Part or Transaction Capabilities Application Part (TCAP) user data that constitutes the content of the message.

- 6.3.2.3 STPs shall provide all functions of the SCCP necessary for Class 0 (basic connectionless) service, as defined in Telcordia ANSI Interconnection Requirements. This includes Global Title Translation (GTT) and SCCP Management procedures, as specified in ANSI T1.112.4. Where the destination signaling point is a <customer_short_name> or third party local or tandem switching system directly connected to BellSouth SS7 network, BellSouth shall perform final GTT of messages to the destination and SCCP Subsystem Management of the destination. In all other cases, BellSouth shall perform intermediate GTT of messages to a gateway pair of STPs in an SS7 network connected with the BellSouth SS7 network, and shall not perform SCCP Subsystem Management of the destination. If BellSouth performs final GTT to a <customer_short_name> database, then <customer_short_name> agrees to provide BellSouth with the Destination Point Code for <customer_short_name> database.
- 6.3.2.4 STPs shall provide all functions of the Operations, Maintenance and Administration Part (OMAP) as specified in applicable industry standard technical references, which may include, where available in BellSouth's network, MTP Routing Verification Test (MRVT); and SCCP Routing Verification Test (SRVT).
- 6.3.2.5 Where the destination signaling point is a BellSouth local or tandem switching system or database, or is a <customer_short_name> or third party local or tandem switching system directly connected to the BellSouth SS7 network, STPs shall perform MRVT and SRVT to the destination signaling point. In all other cases, STPs shall perform MRVT and SRVT to a gateway pair of STPs in an SS7 network connected with the BellSouth SS7 network. This requirement may be superseded by the specifications for Internetwork MRVT and SRVT when these become approved ANSI standards and available capabilities of BellSouth STPs.
- 6.4 SS7 Advanced Intelligent Network (AIN) Access
 - 6.4.1 Interface Requirements
 - 6.4.1.1 BellSouth shall provide the following STP options to connect <customer_short_name> or <customer_short_name>-designated local switching systems to the BellSouth SS7 network:
 - 6.4.1.1.1 An A-link interface from <customer_short_name> local switching systems; and,
 - 6.4.1.1.2 A B-link interface from <customer_short_name> local STPs.
 - 6.4.1.2 Each type of interface shall be provided by one or more layers of signaling links.

- 6.4.1.3 The Signaling Point of Interconnection for each link shall be located at a cross connect element in the central office where the BellSouth STP is located.
- 6.4.1.4 BellSouth shall provide intraoffice diversity between the SPOI and BellSouth STPs, so that no single failure of intraoffice facilities or equipment shall cause the failure of both B-links in a layer connecting to a BellSouth STP.
- 6.4.1.5 STPs shall provide all functions of the MTP as defined in the applicable industry standard technical references.
- 6.4.2 Message Screening
 - 6.4.2.1 BellSouth shall set message screening parameters so as to accept/send valid messages from <customer_short_name> local or tandem switching systems destined to/from any signaling point within BellSouth's SS7 network where the <customer_short_name> switching system has a valid signaling relationship.
- 6.4.3 BellSouth shall set message screening parameters so as to accept/send valid messages from <customer_short_name> local or tandem switching systems destined to/from any signalling point or network accessed through BellSouth's SS7 network where the <customer_short_name> switching system has a valid signalling relationship.
- 6.5 Service Control Points/Databases
 - 6.5.1 Call Related Databases provide the storage of, access to, and manipulation of information required to offer a particular service and/or capability. BellSouth shall provide access to the following Databases: Local Number Portability, LIDB, Toll Free Number Database, Automatic Location Identification/Data Management System, and Calling Name Database. BellSouth also provides access to Service Creation Environment and Service Management System (SCE/SMS) application databases and Directory Assistance.
 - 6.5.2 A Service Control Point (SCP) is deployed in a SS7 network that executes service application logic in response to SS7 queries sent to it by a switching system also connected to the SS7 network. Service Management Systems provide operational interfaces to allow for provisioning, administration and maintenance of subscriber data and service application data stored in SCPs.
 - 6.5.3 Technical Requirements for SCPs/Databases
 - 6.5.3.1 BellSouth shall provide physical access to SCPs through the SS7 network and protocols with TCAP as the application layer protocol.

2/10/04

- 6.5.3.2 BellSouth shall provide physical interconnection to databases via industry standard interfaces and protocols (e.g. SS7, ISDN and X.25).
- 6.5.3.3 The reliability of interconnection options shall be consistent with requirements for diversity and survivability.
- 6.6 Local Number Portability Database
 - 6.6.1 The Permanent Number Portability (PNP) database supplies routing numbers for calls involving numbers that have been ported from one local service provider to another. BellSouth agrees to provide access to the PNP database at rates, terms and conditions as set forth by BellSouth and in accordance with an effective FCC or Commission directive.
- 6.7 SS7 Network Interconnection
 - 6.7.1 SS7 Network Interconnection is the interconnection of <customer_short_name> local STPs or <customer_short_name> local or tandem switching systems with BellSouth STPs. This interconnection provides connectivity that enables the exchange of SS7 messages among BellSouth switching systems and databases, <customer_short_name> local or tandem switching systems, and other third-party switching systems directly connected to the BellSouth SS7 network.
 - 6.7.2 The connectivity provided by SS7 Network Interconnection shall fully support the functions of BellSouth switching systems and databases and <customer_short_name> or other third-party switching systems with A-link access to the BellSouth SS7 network.
 - 6.7.3 If traffic is routed based on dialed or translated digits between a <customer_short_name> local switching system and a BellSouth or other third-party local switching system, either directly or via a BellSouth tandem switching system, then it is a requirement that the BellSouth SS7 network convey via SS7 Network Interconnection the TCAP messages that are necessary to provide Call Management services (Automatic Callback, Automatic Recall, and Screening List Editing) between the <customer_short_name> local STPs and BellSouth or other third-party local switch.
 - 6.7.4 SS7 Network Interconnection shall provide:
 - 6.7.4.1 Signaling Data Link functions, as specified in ANSI T1.111.2;
 - 6.7.4.2 Signaling Link functions, as specified in ANSI T1.111.3; and
 - 6.7.4.3 Signaling Network Management functions, as specified in ANSI T1.111.4.

2/10/04

- 6.7.5 SS7 Network Interconnection shall provide all functions of the SCCP necessary for Class 0 (basic connectionless) service, as specified in ANSI T1.112. This includes GTT and SCCP Management procedures, as specified in ANSI T1.112.4. Where the destination signaling point is a BellSouth switching system or database, or is another third-party local or tandem switching system directly connected to the BellSouth SS7 network, SS7 Network Interconnection shall include final GTT of messages to the destination and SCCP Subsystem Management of the destination. Where the destination signaling point is a <customer_short_name> local or tandem switching system, SS7 Network Interconnection shall include intermediate GTT of messages to a gateway pair of <customer_short_name> local STPs, and shall not include SCCP Subsystem Management of the destination.
- 6.7.6 SS7 Network Interconnection shall provide all functions of the Integrated Services Digital Network User Part, as specified in ANSI T1.113.
- 6.7.7 SS7 Network Interconnection shall provide all functions of the TCAP, as specified in ANSI T1.114.
- 6.7.8 If Internetwork MRVT and SRVT become approved ANSI standards and available capabilities of BellSouth STPs, SS7 Network Interconnection may provide these functions of the OMAP.
- 6.7.9 Interface Requirements
- 6.7.9.1 The following SS7 Network Interconnection interface options are available to connect <customer_short_name> or <customer_short_name>-designated local or tandem switching systems or STPs to the BellSouth SS7 network:
- 6.7.9.1.1 A-link interface from <customer_short_name> local or tandem switching systems; and
- 6.7.9.1.2 B-link interface from <customer_short_name> STPs.
- 6.7.9.2 The SPOI for each link shall be located at a cross-connect element in the central office where the BellSouth STP is located. There shall be a DS1 or higher rate transport interface at each of the SPOIs. Each signaling link shall appear as a DS0 channel within the DS1 or higher rate interface.
- 6.7.9.3 BellSouth shall provide intraoffice diversity between the SPOIs and the BellSouth STP, so that no single failure of intraoffice facilities or equipment shall cause the failure of both B-links in a layer connecting to a BellSouth STP.
- 6.7.9.4 The protocol interface requirements for SS7 Network Interconnection include the MTP, ISDNUP, SCCP, and TCAP. These protocol interfaces shall conform to the applicable industry standard technical references. BellSouth does not have the

2/10/04

capability to support any of the VoIP interfaces at the present time but is willing to negotiate new protocol interfaces.

- 6.7.9.5 BellSouth shall set message screening parameters to accept messages from <customer_short_name> local or tandem switching systems destined to any signaling point in the BellSouth SS7 network with which the <customer_short_name> switching system has a valid signaling relationship.
- 6.8 Rate Categories And Applications
 - 6.8.1 Message Charges
 - 6.8.1.1 Message charges, as set forth in 6.8.1.3, following, are assessed based on the type of message protocol, ISUP or TCAP. ISUP messages are associated with call set-up, while TCAP messages are used to query call related databases. ISUP message charges are assessed per terminating and originating call set-up request and TCAP message charges are assessed per data request.
 - 6.8.1.2 Message charges do not apply for TCAP messages switched by the regional STPs to the BellSouth provided 800 Data Base, LIDB or LNP Data Base. Query charges are assessed in lieu of message charges. Query charges for 800 Data Base are described in 6.9.5, following. When TCAP messages are destined for a foreign database, including a non-company provided LNP Data Base, message charges are assessed in lieu of query charges.
 - 6.8.1.3 Message charges are assessed in the following manner:
 - 6.8.1.3.1 Signal Formulation
 - 6.8.1.3.1.1 An ISUP Signal Formulation charge is assessed, per call set-up request, for terminating and originating formulating signaling messages in association with call set-up.
 - 6.8.1.3.2 Signal Transport
 - 6.8.1.3.2.1 An ISUP Signal Transport charge is assessed, per call set-up request, for signaling messages transported to and from the Company STP in association with call set-up.
 - 6.8.1.3.2.2 A TCAP Signal Transport charge is assessed per data request transported to a BellSouth STP and destined for a foreign database.
 - 6.8.1.3.3 Signal Switching

2/10/04

- 6.8.1.3.3.1 An ISUP Signal Switching charge is assessed per call set-up request that is switched at the Company STP for terminating and originating messages .
- 6.8.1.3.3.2 A TCAP Signal Switching charge is assessed for each data request that is switched by the Company STP and destined for a foreign network or database.
- 6.8.1.3.4 Query Charges
 - 6.8.1.3.4.1 Query charges apply for queries to the Company LIDB and the LNP Data Base. When query charges apply for access to a Company provided database, message charges are not assessed. LIDB Query Charges are described in 6.9.3, following and the LNP Data Base Query Charge is described in 6.9.4, following.
- 6.8.1.4 TCAP Bill and Keep
 - 6.8.1.4.1 The Parties agree to treat signaling messages, signaling ports, and signaling links associated with local calls on a bill and keep basis.
 - 6.8.1.4.2 <customer_short_name> and BellSouth agree that BellSouth will bill <customer_short_name> for signaling links, signaling ports, and signaling messages associated with interstate calls and with intrastate non-local calls in accordance with BellSouth's federal and state tariffs.
 - 6.8.1.4.3 Beginning on the Effective Date of this Agreement and continuing until <customer_short_name> implements a system that is capable of counting the total number of signaling messages that traveled over facilities connecting <customer_short_name>'s CCS7 network and BellSouth's CCS7 network, BellSouth agrees that for the purposes of billing BellSouth for signaling messages for any given month, <customer_short_name> may use the total number of signaling messages that BellSouth's signaling bill to <customer_short_name> indicates have traveled over facilities connecting <customer_short_name>'s CCS7 network and BellSouth's CCS7 network for that same month. When <customer_short_name> implements a system that is capable of counting the total number of signaling messages that travel over facilities connecting <customer_short_name>'s CCS7 network and BellSouth's CCS7 network, <customer_short_name> will use the number of signaling messages counted by such system for the purposes of billing BellSouth for signaling messages, subject to BellSouth's right to contest the accuracy of the number of signaling messages counted by such system.
 - 6.8.1.4.4 For the purposes of billing BellSouth for signaling messages, <customer_short_name> will apply the SPIU/SPLU provided by BellSouth (which can, at BellSouth's option, be the same as the PIU/PLU that BellSouth provides for minutes of use) to the number of messages calculated pursuant to Paragraph 6.8.1.4.3 above.

2/10/04

6.9 RATES AND CHARGES ASSOCIATED WITH SS7

6.9.1 Message Charge for ISUP Messages RATE

Per signaling message Bill & Keep

6.9.2 Message Charge for TCAP Messages RATE

Per signaling message Bill& Keep

6.9.3 LINE INFORMATION DATA BASE SERVICE

RATE PER QUERY

Per Access Transport Query Exhibit A of Attachment 2 for UNE-P Only, Tariff Rate for All Others

Per Validation Service Query Exhibit A of Attachment 2 for UNE-P Only, Tariff Rate for All Others

Per OLNS Service Query Tariff Rate

6.9.4 LOCAL NUMBER PORTABILITY DATA BASE SERVICE

Per LNP Query Exhibit A of Attachment 2 for UNE-P Only

Negotiated Rates Pursuant to a Separate Agreement for All Others

6.9.5 800 DATA BASE SERVICE

Per 800 Query Exhibit A of Attachment 2 for UNE-P Only, Tariff Rate for All Others

7. **FORECASTING FOR TRUNK PROVISIONING**

7.1 Within six (6) months after execution of this Agreement, <customer_short_name> shall provide an initial interconnection trunk group forecast for each LATA in which it plans to provide service within BellSouth's region. BellSouth's reciprocal trunking forecasts will be based upon information provided by <customer_short_name> in the initial forecast. If <customer_short_name> refuses

2/10/04

to provide such information, BellSouth shall provide reciprocal trunking forecasts based only on existing trunk group growth and BellSouth's annual estimated percentage of BellSouth subscriber line growth. After the exchange of each Party's forecast information, the Parties shall conduct a joint planning meeting to develop a joint interconnection trunk group forecast. Each forecast provided under this Section shall be deemed "Confidential Information" under the General Terms and Conditions of this Agreement.

- 7.2 The Parties shall use best efforts to make the initial and semi-annual subsequent forecasts as accurate as possible based on reasonable engineering criteria. In addition, the Parties agree to proactively manage their interconnection trunking arrangements and use best efforts to timely notify each other if forecasted need quantities change or if a known or anticipated network event that may create a blocking situation is likely to occur during the time period between joint planning meetings. Joint planning meetings shall be conducted via conference call, unless mutual agreement is reached otherwise.
- 7.3 At a minimum, the joint forecast shall include the projected quantity of Transit Trunks, <customer_short_name>-to-BellSouth one-way trunks (<customer_short_name> Trunks), BellSouth-to-<customer_short_name> one-way trunks (Reciprocal Trunks) and/or two-way interconnection trunks, if the Parties have agreed to interconnect using two-way trunking to transport the Parties' Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic. The quantities shall be projected for a minimum of six months and shall include an estimate of the current year plus the next two years total forecasted quantities. The Parties shall mutually develop Reciprocal Trunk Groups and/or two-way interconnection trunk forecast quantities.
- 7.4 All forecasts shall include, at a minimum, Access Carrier Terminal Location (ACTL), trunk group type (local/intraLATA toll, Transit, Operator Services, 911, etc.), A location/Z location (CLLI codes for <customer_short_name> location and BellSouth location where the trunks shall terminate), interface type (e.g., DS1), Direction of Signaling, Trunk Group Number, if known, (commonly referred to as the 2-6 code) and forecasted trunks in service each year (cumulative).
- 7.5 The submitting and development of interconnection trunk forecasts shall not replace the ordering process for local interconnection trunks. Each Party shall exercise its best efforts and act in good faith to plan for and provide the quantity of interconnection trunks mutually forecasted. However, the provision of the forecasted quantity of interconnection trunks is subject to trunk terminations and facility capacity existing at the time the trunk order is submitted and BellSouth shall not be responsible for a lack of interconnection trunks provided that best efforts and good faith have been exercised.

8. TRUNK UTILIZATION

- 8.1** For the Reciprocal Trunk Groups that cannot overflow traffic to another trunk group (Reciprocal Final Trunk Groups), BellSouth and <customer_short_name> shall monitor traffic on each interconnection Reciprocal Final Trunk Group that is ordered and installed. The Parties agree that the Reciprocal Final Trunk Groups will be utilized at 60 percent (60%) of the time consistent busy hour utilization level within 180 days of installation. The Parties agree that the Reciprocal Final Trunk Groups will be utilized at eighty percent (80%) of the time consistent busy hour utilization level within 365 days of installation. Any Reciprocal Final Trunk Group not meeting the minimum thresholds set forth in this Section are defined as “Under-utilized” trunks. BellSouth may disconnect any Under-utilized Reciprocal Final Trunk Groups and, for trunks not in excess of <customer_short_name>’s forecast, <customer_short_name> shall refund to BellSouth the associated nonrecurring and recurring trunk and facility charges paid by BellSouth, if any.
- 8.1.1** BellSouth’s CISC will notify <customer_short_name> of any under-utilized Reciprocal Trunk Groups and the number of such trunk groups that BellSouth wishes to disconnect. BellSouth will provide supporting information either by email or facsimile to the designated <customer_short_name> interface. <customer_short_name> will provide concurrence with the disconnection in seven (7) business days or will provide specific information supporting why the trunks should not be disconnected. Such supporting information should include expected traffic volumes (including traffic volumes generated due to Local Number Portability) and the timeframes within which <customer_short_name> expects to need such trunks. BellSouth’s CISC Project Manager and Circuit Capacity Manager will discuss the information with <customer_short_name> to determine if agreement can be reached on the number of Reciprocal Final Trunk Groups to be removed. If no agreement can be reached, BellSouth will issue disconnect orders to <customer_short_name>. Notwithstanding any other provision to this Agreement, the Parties will disconnect the underutilized trunks no sooner than two weeks after <customer_short_name> receives such disconnect orders, unless the parties mutually agree to do so sooner.
- 8.1.2** To the extent that any interconnection trunk group is utilized at a time-consistent busy hour of eighty percent (80%) or greater, the Parties may review the trunk groups and, if necessary, shall negotiate in good faith for the installation of augmented facilities.
- 8.2** For the two-way trunk groups that cannot overflow traffic to another trunk group and other than alternate final trunk groups, BellSouth and <customer_short_name> shall monitor traffic on each interconnection trunk group that is ordered and installed. The Parties agree that within 180 days of the installation of the BellSouth two-way trunk or trunks, the trunks will be utilized at 60 percent (60%) of the time consistent busy hour utilization level. The Parties agree that within 365 days of the installation of a trunk or trunks, the trunks will be utilized at eighty percent (80%) of the time consistent busy hour utilization level.

Any trunk or trunks not meeting the minimum thresholds set forth in this Section are defined as "Under-utilized" trunks. BellSouth will request the disconnection of any Under-utilized two-way trunk(s) and, for trunks not in excess of <customer_short_name>'s forecast, <customer_short_name> shall refund to BellSouth the associated nonrecurring and recurring trunk and facility charges paid by BellSouth, if any.

- 8.2.1 BellSouth's LISC will notify <customer_short_name> of any under-utilized two-way trunk groups and the number of trunks that BellSouth wishes to disconnect. BellSouth will provide supporting information either by email or facsimile to the designated <customer_short_name> interface. <customer_short_name> will provide concurrence with the disconnection in seven (7) business days or will provide specific information supporting why the two-way trunks should not be disconnected. Such supporting information should include expected traffic volumes (including traffic volumes generated due to Local Number Portability) and the timeframes within which <customer_short_name> expects to need such trunks. BellSouth's CISC Project Manager and Circuit Capacity Manager will discuss the information with <customer_short_name> to determine if agreement can be reached on the number of trunks to be removed. If no agreement can be reached, <customer_short_name> will issue disconnect orders to BellSouth. Notwithstanding any other provision to this Agreement, the Parties will disconnect the underutilized trunks no sooner than two weeks after <customer_short_name> receives such disconnect orders, unless the parties mutually agree to do so sooner.
- 8.2.2 To the extent that any interconnection trunk group is utilized at a time-consistent busy hour of eighty percent (80%) or greater, the Parties shall review the trunk groups and, if necessary, shall negotiate in good faith for the installation of augmented facilities.

9. INTERFERENCE OR IMPAIRMENT

- 9.1 As soon as possible and in no case later than twenty-four (24) hours after receipt of notification of blocking of traffic originated within the other Party's network, the Parties shall determine and begin work to implement reasonable corrective measures in a manner consistent with industry practices.
- 9.2 In the event of an outage or trouble in any arrangement, facility, or service being provided by BellSouth hereunder, BellSouth will follow procedures for isolating and clearing the outage or trouble that are no less favorable than those that apply to comparable arrangements, facilities, or services being provided by BellSouth to itself, Affiliate or any other carrier whose network is connected to that of BellSouth.
- 9.3 BellSouth will use best efforts to provide <customer_short_name> with at least thirty (30) days advance notification of scheduled maintenance activity. Upon such notice, <customer_short_name> may submit a reasonable request for additional

information relevant to the scheduled maintenance activity and BellSouth shall provide such information to the extent the scheduled maintenance activity may impact NewSouth and such information is reasonably necessary for <customer_short_name> to identify and analyze potential risks associated with such maintenance. BellSouth may expedite or delay scheduled maintenance as a result of unscheduled maintenance or other unforeseen events. In those instances where BellSouth will not perform scheduled maintenance at the announced times, BellSouth will make best efforts to provide <customer_short_name> with as much notice as is reasonably possible concerning the changed schedule.

9.4 For switch software/processor updates, software upgrades/new releases to the SONET transport network elements, or other major scheduled events which might impact <customer_short_name>, BellSouth shall use best efforts to provide <customer_short_name> with at least thirty (30) days advance notification of scheduled maintenance activity. Upon such notice, <customer_short_name> may submit a reasonable request for additional information relevant to the scheduled maintenance activity and BellSouth shall provide such information to the extent the scheduled maintenance activity may impact NewSouth and such information is reasonably necessary for <customer_short_name> to identify and analyze potential risks associated with such maintenance.

9.5 BellSouth will use best efforts to provide <customer_short_name>'s Network Operations Center with at least thirty (30) days advance, written notice when translations are scheduled to be modified on <customer_short_name>'s trunk groups.

9.6 [Parties Disagree]

[NewSouth Version] Once <customer_short_name> determines that there is an outage that encompasses either a particular section of the network or the whole network, then <customer_short_name> shall generate a trouble ticket to the CISC. After issuing the trouble ticket, <customer_short_name> will notify the appropriate BellSouth representative in the CISC via telephone. <customer_short_name> may then send an email confirmation to such BellSouth representative. BellSouth will work cooperatively with <customer_short_name> to determine the appropriate steps to resolve such outage. Additionally, <customer_short_name> will provide BellSouth with any applicable information that is necessary to resolve such outage and the Parties will work cooperatively to take all steps necessary to resolve the outage. **Upon request, BellSouth will provide a written root cause analysis report for all global outages, and for any trunk group outage that has occurred 3 or more times in a 60 day period. BellSouth shall use best efforts to provide such report within five (5) business days after the request for it is made.**

[BellSouth Version] Once <customer_short_name> determines that there is an outage that encompasses either a particular section of the network or the whole network, then <customer_short_name> shall generate a trouble ticket to the CISC. After issuing the trouble ticket, <customer_short_name> will notify the appropriate BellSouth representative in the CISC via telephone. <customer_short_name> may then send an email confirmation to such BellSouth representative. BellSouth will work cooperatively with <customer_short_name> to determine the appropriate steps to resolve such outage. Additionally, <customer_short_name> will provide BellSouth with any applicable information that is necessary to resolve such outage and the Parties will work cooperatively to take all steps necessary to resolve the outage. **<customer_short_name> may submit a reasonable request to BellSouth for a written analysis of the cause of any global outage affecting <customer_short_name>'s network. BellSouth shall use best efforts to provide such report within thirty (30) days of such request.**

10. COMPENSATION FOR CALL TRANSPORT AND TERMINATION FOR LOCAL TRAFFIC AND ISP-BOUND TRAFFIC.

10.1 Neither Party shall pay compensation to the other Party for per minute of use rate elements associated with the Call Transport and Termination of Local Traffic or ISP-bound Traffic.

10.2 The appropriate elemental rates set forth in Exhibit A of this Attachment shall apply for Transit Traffic as described in this Attachment and to Multiple Tandem Access as described in this Attachment.

10.3 Neither Party shall represent Switched Access Traffic, as defined in this Attachment, as Local Traffic or ISP-bound Traffic for purposes of determining compensation for the call.

10.4 If <customer_short_name> assigns NPA/NXXs to specific BellSouth rate centers within the LATA and assigns numbers from those NPA/NXXs to <customer_short_name> End Users physically located outside of that LATA, BellSouth originated traffic that is not bound for an Internet Service Provider ("ISP") and originates from within the LATA where the NPA/NXXs are assigned and is delivered to a <customer_short_name> End User physically located outside of such LATA shall not be deemed Local Traffic. Further, <customer_short_name> agrees to identify such traffic to BellSouth, to the extent technically feasible, and to compensate BellSouth for originating and transporting such non-local traffic to <customer_short_name> at BellSouth's switched access tariff rates.

10.4.1 The Parties have been unable to agree on the treatment of calls where <customer_short_name> assigns NPA/NXXs to specific BellSouth rate centers within the LATA and assigns numbers from those NPA/NXXs to

<customer_short_name> End Users physically located outside of that LATA and such End Users are Internet Service Providers ("ISPs"). Notwithstanding the foregoing, and without waiving any rights with respect to either Party's position as to the treatment of such calls, the Parties agree that, for purposes of this Agreement, traffic delivered to an End User that is an ISP physically located outside of such LATA shall be considered ISP-bound Traffic as defined in this Attachment.

10.5 Jurisdictional Reporting

- 10.5.1 **Percent Local Usage.** Each Party shall report to the other a Percent Local Usage (PLU) factor. The application of the PLU will determine the amount of Local/ISP-Bound minutes to be billed to the other Party. Local and ISP-bound Traffic shall be treated as Local for purposes of calculating the PLU. Requirements associated with PLU calculation and reporting shall be as set forth in BellSouth's Jurisdictional Factors Reporting Guide, attached hereto as Exhibit F.
- 10.5.2 **Percent Local Facility.** Each Party shall report to the other a Percent Local Facility (PLF) factor. The application of the PLF will determine the portion of switched dedicated transport to be billed per the local jurisdiction rates. The PLF shall be applied to Multiplexing, Local Channel and Interoffice Channel Switched Dedicated Transport utilized in the provision of local interconnection trunks. Requirements associated with PLF calculation and reporting shall be as set forth in BellSouth's Jurisdictional Factors Reporting Guide, attached hereto as Exhibit F.
- 10.5.3 **Percent Interstate Usage.** Each Party shall report to the other a Percent Interstate Usage (PIU) factor. Requirements associated with PIU calculation and reporting shall be as set forth in BellSouth's Jurisdictional Factors Reporting Guide, attached hereto as Exhibit F.
- 10.5.4 **Application of Factors.** After interstate and intrastate traffic percentages have been determined by use of PIU procedures, the PLU factor will be used for application and billing of Call Transport and Termination consistent with Section 7.1 of this Attachment.
- 10.5.5 **In Lieu of Jurisdictional Factors Reported.** Notwithstanding the provisions in Section 10.5.1, 10.5.2, and 10.5.3 above, where the terminating Party has message recording technology that identifies the jurisdiction of traffic terminated as defined in this Agreement, such information may, at the terminating Party's option, be utilized to determine the appropriate jurisdictional reporting factors, in lieu of those provided by the originating Party. In the event that the terminating Party opts to utilize its own data to determine jurisdictional reporting factors, such terminating Party shall notify the originating Party at least 30 days prior to the beginning of the calendar quarter in which the terminating Party will begin to utilize its own data.

10.5.5.1 Upon the request of the originating Party, the terminating Party shall provide supporting data for the jurisdictional factors proposed by the terminating Party to be used in lieu of those reported by the originating Party. The originating Party shall have 30 days to consent or object to the proposed replacement of reported factors. If the originating Party consents or fails to respond within 30 days, the terminating Party may proceed with the replacement of factors effective at the beginning of the calendar quarter. If the originating Party objects to the proposed replacement of reported factors, the Parties shall proceed as set forth below.

10.5.5.2 [Parties Disagree]

[NewSouth Version] Upon either Party's request, the Parties will work in good faith to resolve the discrepancy between the factors submitted by the originating party and those proposed by the terminating party pursuant to Section 7.2.5 above. In the event that the Parties are unable to mutually agree as to the appropriate resolution, the Parties may negotiate a mutually agreeable resolution based on the data specific to the traffic patterns of the originating party or either Party may request an audit of the factors in accordance with Section 7.2.9 below. In the event that negotiations and audits fail to resolve disputes between the parties, either Party may seek Dispute Resolution as set forth in the General Terms and Conditions. **While such a dispute is pending, factors reported by the originating Party shall remain in place, unless the Parties mutually agree otherwise.**

[BellSouth Version] Upon either Party's request, the Parties will work in good faith to resolve the discrepancy between the factors submitted by the originating party and those proposed by the terminating party pursuant to Section 7.2.5 above. In the event that the Parties are unable to mutually agree as to the appropriate resolution, the Parties may negotiate a mutually agreeable resolution based on the data specific to the traffic patterns of the originating party or either Party may request an audit of the factors in accordance with Section 7.2.9 below. In the event that negotiations and audits fail to resolve disputes between the parties, either Party may seek Dispute Resolution as set forth in the General Terms and Conditions. **While such a dispute is pending, the factors proposed by the terminating Party pursuant to Section 7.2.5 above shall be utilized, unless the Parties mutually agree otherwise.**

10.5.5.3 Audits. On thirty (30) days written notice, each Party must provide the other the ability and opportunity to conduct an annual audit of the jurisdictional reporting factors as reported or utilized pursuant to this Attachment 3 to ensure the proper billing of traffic. BellSouth and <customer_short_name> shall retain records of call detail for a minimum of nine months from which the jurisdictional reporting factors can be ascertained. The audit shall be conducted during normal business hours at an office designated by the Party being audited. Audit requests shall not

be submitted more frequently than one (1) time per calendar year. The Parties shall use commercially reasonable efforts to complete audits in as timely a manner as possible. Audits shall be performed by a mutually acceptable independent auditor paid for by the Party requesting the audit. The jurisdictional reporting factors shall be adjusted based upon the audit results and shall apply for the quarter the audit was completed, for the quarter prior to the completion of the audit, and for the two quarters following the completion of the audit. If, as a result of an audit, either Party is found to have overstated jurisdictional reporting factors by twenty percentage points (20%) or more, that Party shall reimburse the auditing Party for the cost of the audit

10.6 Compensation for 8XX Traffic

10.6.1 Compensation for 8XX Traffic. Each Party shall compensate the other pursuant to the appropriate Switched Access charges, including the database query charge as applicable, as set forth in the providing Party's tariff, as filed and effective with the FCC or Commission, or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.

10.6.2 Records for 8XX Billing. Each Party will provide to the other the appropriate records necessary for billing intraLATA 8XX customers. The records provided will be in a standard EMI format.

10.6.3 8XX Access Toll Free Dialing Ten Digit Screening ("TFD"). BellSouth's provision of TFD to <customer_short_name> requires interconnection from <customer_short_name> to BellSouth's 8XX Signal Channel Point (SCP). Such interconnections shall be established pursuant to BellSouth's Common Channel Signaling Interconnection Guidelines and Telcordia's CCS Network Interface Specification document, TR-TSV-000905. <customer_short_name> shall establish SS7 interconnection at the BellSouth Local Signal Transfer Points serving the BellSouth 8XX SCPs that <customer_short_name> desires to query. The terms and conditions for 8XX TFD are set out in BellSouth's Intrastate Access Services Tariff.

10.7 Switched Access Traffic is defined as telephone calls requiring local transmission or switching services for the purpose of the origination or termination of Telephone Toll Service. Switched Access Traffic includes the following types of traffic: Feature Group A, Feature Group B, Feature Group C, Feature Group D, toll free access (e.g., 800/877/888), and 900 access services. Switched Access Traffic does not include Local Traffic and ISP-Bound Traffic originated by one Party and terminated by the other. The Parties have been unable to agree as to whether "Voice-Over-Internet Protocol" transmissions ("VOIP") which cross LATA boundaries constitute Switched Access Traffic. Notwithstanding the foregoing, and without waiving any rights with respect to either Party's position as to the jurisdictional nature of VOIP, the Parties agree to amend this Agreement in

accordance with the General Terms and Conditions of this Agreement to abide by any effective and applicable FCC rules and orders regarding the nature of such traffic and the compensation payable by the Parties for such traffic, if any.

- 10.7.1 If the BellSouth End User chooses <customer_short_name> as their presubscribed interexchange carrier, or if the BellSouth End User uses <customer_short_name> as an interexchange carrier on a 101XXXX basis, BellSouth will charge <customer_short_name> the appropriate BellSouth tariff charges for originating switched access services.
- 10.7.2 Where the originating Party delivers Switched Access Traffic to the terminating Party, the originating Party will pay the terminating Party terminating switched access charges as set forth in the providing Party's tariff, as filed and effective with the FCC or Commission, or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.
- 10.7.3 When one Party's end office switch, subtending the other Party's Access Tandem switch for receipt or delivery of switched access traffic, provides an access service connection to or from an interexchange carrier ("IXC") by either a direct trunk group to the IXC utilizing the other Party's facilities, or via the other Party's tandem switch, each Party will provide its own access services to the IXC and bill on a multi-bill, multi-tariff meet-point basis. Each Party will bill its own access services rates to the IXC with the exception of the interconnection charge. The interconnection charge will be billed by the Party providing the end office function. The Parties will use the Multiple Exchange Carrier Access Billing (MECAB) guidelines to establish meet point billing for all applicable traffic. . Thirty (30)-day billing periods will be employed for these arrangements. To the extent either party is providing the tandem function, that party (i.e., Initial Billing Company) agrees to provide to the other company (i.e., Subsequent Billing Company), as defined in MECAB, at no charge, the switched access detailed usage data within no more than sixty (60) days after the recording date where technically feasible. Each company will notify the other when it determines that it is not feasible to meet these requirements so that the customers may be notified for any necessary revenue accrual associated with the significantly delayed recording or billing. As business requirements change, data reporting requirements may be modified as necessary, by mutual agreement of the Parties or per a change in industry standards.
- 10.7.4 [Parties Disagree]
- [NewSouth Version] **In the event that either Party fails to provide accurate switched access detailed usage data to the other Party within 90 days after the recording date and the receiving Party is unable to bill and/or collect access revenues due to the sending Party's failure to provide such data within said time period, then the Party failing to send the data as specified herein shall be liable to the other Party in an amount equal to the unbillable or**

uncollectible revenues. Each company will provide complete documentation to the other to substantiate any claim of such unbillable or uncollectible access revenues. In the event that the Parties disagree as to the liability of the Initial Billing Party for such unbillable or uncollectible revenues, then either Party may invoke the Dispute Resolution process set forth in this Agreement.

[BellSouth Version] **In the event that the Initial Billing Party, as defined in Section 7.4.4 herein, was provided the accurate switched access detailed usage data in a manner that allowed the Initial Billing Party to generate and provide such data to the Subsequent Billing Party in a reasonable timeframe and where the Initial Billing Party failed to provide notice to the Subsequent Billing Party of any inability to provide such data within a reasonable and nondiscriminatory timeframe and the Subsequent Billing Party is unable to bill and/or collect access revenues due to the Initial Billing Party's failure to provide such data within said time period, then the Initial Billing Party shall be liable to the other Party in an amount equal to the unbillable or uncollectible revenues.** Each company will provide complete documentation to the other to substantiate any claim of such unbillable or uncollectible revenues. In the event that the Parties disagree as to the liability of the Initial Billing Party for such unbillable or uncollectible revenues, then either Party may invoke the Dispute Resolution process set forth in this Agreement.

- 10.7.5 The Initial Billing Company will retain for a minimum period of sixty (60) days, access message detail sufficient to recreate any data that is lost or damaged by the tandem provider company or any third party involved in processing or transporting data. Initial Billing Company agrees to recreate the lost or damaged data within forty-eight (48) hours of notification by the other or by an authorized third party handling the data.
- 10.7.6 Initial Billing Company also agrees to process the recreated data within forty-eight (48) hours of receipt at its data processing center.
- 10.7.7 All claims for unbillable or uncollectible revenue should be filed with the Initial Billing Company within 120 days of the date the receipt of the usage record.
- 10.7.8 The Initial Billing Party shall keep records of its billing activities relating to jointly-provided Intrastate and Interstate Switched Access Traffic Services in sufficient detail to permit the Subsequent Billing Party to, by formal or informal review or audit, to verify the accuracy and reasonableness of the jointly-provided access billing data provided by the Initial Billing Party. Each Party agrees to cooperate in such formal or informal reviews or audits and further agrees to jointly review the findings of such reviews or audits in order to resolve any differences concerning the findings thereof. In the absence of mutual agreement otherwise, the Audit provisions set forth in Section 10.5.6.3 of this Attachment shall govern.

10.8 Transit Traffic

2/10/04

10.8.1

[NewSouth Version]

Each Party shall provide tandem switching and transport services for the other Party's Transit Traffic. Rates for Local Transit Traffic and ISP-Bound Transit Traffic shall be the applicable Call Transport and Termination charges (i.e., common transport and tandem switching charge; end office switching charge is not applicable) as set forth in Exhibit A to this Attachment. Rates for Switched Access Transit Traffic shall be the applicable charges as set forth in the applicable Party's Commission approved Interstate or Intrastate Switched Access tariffs as filed and effective with the FCC or Commission, or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff. Billing associated with all Transit Traffic shall be pursuant to MECAB guidelines.

[BellSouth Version]

Each Party shall provide tandem switching and transport services for the other Party's Transit Traffic. Rates for Local Transit Traffic and ISP-Bound Transit Traffic shall be the applicable Call Transport and Termination charges (i.e., common transport and tandem switching charges and **tandem intermediary charge**; end office switching charge is not applicable) as set forth in Exhibit A to this Attachment. Rates for Switched Access Transit Traffic shall be the applicable charges as set forth in the applicable Party's Commission approved Interstate or Intrastate Switched Access tariffs as filed and effective with the FCC or Commission, or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff. Billing associated with all Transit Traffic shall be pursuant to MECAB guidelines.

10.8.2

Traffic between <customer_short_name> and Wireless Type 1 third parties or a third party CLEC utilizing BellSouth switching (including resellers and UNE-P providers) shall not be treated as Transit Traffic from a routing or billing perspective. Traffic originated by a Wireless Type 1 third party or a third party CLEC utilizing BellSouth switching (including resellers and UNE-P providers) shall be treated as BellSouth-originated traffic and BellSouth shall compensate <customer_short_name> for transport and termination of such traffic based on the classification of such traffic as Local Traffic, ISP-Bound Traffic, IntraLATA Toll or Switched Access Traffic in accordance with the terms of this Attachment.

10.8.3

Traffic between <customer_short_name> and Wireless Type 2A third parties shall not be treated as Transit Traffic from a routing or billing perspective until BellSouth and the Wireless Type 2A carrier have the capability to properly meet-point-bill in accordance with MECAB guidelines. Until such time, such traffic originated by Wireless Type 2A third parties shall be treated as BellSouth-originated traffic and BellSouth shall compensate <customer_short_name> for transport and termination of such traffic based on the classification of such traffic as Local Traffic, ISP-Bound Traffic, IntraLATA Toll or Switched Access Traffic in accordance with the terms of this Attachment.

- 10.8.4 Traffic between BellSouth and Wireless Type 1 third parties or a third party CLEC utilizing <customer_short_name> switching shall not be treated as Transit Traffic from a routing or billing perspective. Such traffic originated by a Wireless Type 1 third party or a third party CLEC utilizing <customer_short_name> switching shall be treated as <customer_short_name>-originated traffic and <customer_short_name> shall compensate BellSouth for transport and termination of such traffic based on the classification of such traffic as Local Traffic, ISP-Bound Traffic, IntraLATA Toll or Switched Access Traffic in accordance with the terms of this Attachment.
- 10.8.5 Traffic between BellSouth and Wireless Type 2A third parties shall not be treated as Transit Traffic from a routing or billing perspective until <customer_short_name> and the Wireless Type 2A carrier have the capability to properly meet-point-bill in accordance with MECAB guidelines. Until such time, such traffic originated by Wireless Type 2A third parties shall be treated as <customer_short_name> -originated traffic and <customer_short_name> shall compensate BellSouth for transport and termination of such traffic based on the classification of such traffic as Local Traffic, ISP-Bound Traffic, IntraLATA Toll or Switched Access Traffic in accordance with the terms of this Attachment.
- 10.8.6 [Parties Disagree]
- [NewSouth Version] BellSouth agrees to deliver Transit Traffic originated by <customer_short_name> to the terminating carrier; provided, however, that <customer_short_name> is solely responsible for negotiating and executing any appropriate contractual agreements with the terminating carrier for the exchange of Transit Traffic through the BellSouth network. BellSouth will not be liable for any compensation to the terminating carrier or to <customer_short_name> for transiting <customer_short_name>-originated or terminated Transit Traffic. **Notwithstanding any other provision of this Attachment**, in the event that the terminating third party carrier imposes on BellSouth any charges or costs for the delivery of Transit Traffic originated by <customer_short_name>, <customer_short_name> shall reimburse BellSouth for all charges paid by BellSouth, **which BellSouth is contractually obligated to pay**, provided that BellSouth notifies and, upon request, provides <customer_short_name> with a copy of such an invoice, if available, or other equivalent supporting documentation (if an invoice is not available), and proof of payment and other applicable supporting documentation. BellSouth will provide such notice and information in a timely, reasonable and nondiscriminatory manner. BellSouth shall diligently review, dispute and pay such third party invoices (or equivalent) in a manner that is at parity with its own practices for reviewing, disputing and paying such invoices (or equivalent) **when no similar reimbursement provision applies**. Additionally, the Parties agree that any billing to a third party or other telecommunications carrier under this section shall be pursuant to MECAB procedures.

[BellSouth Version] BellSouth agrees to deliver Transit Traffic originated by <customer_short_name> to the terminating carrier; provided, however, that <customer_short_name> is solely responsible for negotiating and executing any appropriate contractual agreements with the terminating carrier for the exchange of Transit Traffic through the BellSouth network. BellSouth will not be liable for any compensation to the terminating carrier or to <customer_short_name> for transiting <customer_short_name>-originated or terminated Transit Traffic. In the event that the terminating third party carrier imposes on BellSouth any charges or costs for the delivery of Transit Traffic originated by <customer_short_name>, <customer_short_name> shall reimburse BellSouth for all charges paid by BellSouth, provided that BellSouth notifies <customer_short_name> and, upon request, provides <customer_short_name> with a copy of such an invoice, if available, or other equivalent supporting documentation (if an invoice is not available), and proof of payment and other applicable supporting documentation. BellSouth will **use commercially reasonable efforts to** provide such notice and information in a timely, reasonable and nondiscriminatory manner. BellSouth shall diligently review, dispute and pay such third party invoices (or equivalent) in a manner that is at parity with its own practices for reviewing, disputing and paying such invoices (or equivalent) **under the same circumstances. Once <customer_short_name> reimburses BellSouth for any such payments, any disputes with respect to such charges shall be between <customer_short_name> and the terminating third party carrier.** Additionally, the Parties agree that any billing to a third party or other telecommunications carrier under this section shall be pursuant to MECAB procedures.

- 10.8.7 Except for as provided in 7.6.3 and 7.6.4, transit charges as described in this Attachment shall only be assessed on the carrier originating Transit Traffic and shall not be assessed on the terminating carrier.
- 10.8.8 Transit charges associated with the provisioning of toll free services (e.g., 800/888/877) shall be assessed upon the terminating carrier and shall not be imposed on the originating carrier.
- 10.9** Records Exchange and Misrouting of Traffic.
 - 10.9.1 Misrouted Traffic.
 - 10.9.1.1 The Parties shall route traffic to each other in a manner consistent with the Trunk Group Architectures selected by the Parties and as set forth in Section 4 of this Attachment 3, except as otherwise set forth in this Agreement (e.g., overflow) or in instances where a third party causes either Party to route traffic in a manner that is inconsistent with this Attachment.

- 10.9.1.2 In instances of misrouting, either Party may request that the Parties investigate, identify the cause of, and correct misrouting to the extent technically and economically feasible.
- 10.9.1.3 In the event that misrouting results in either Party's inability to bill or collect revenues from a third party and the Parties disagree as to the liability of the other Party for such revenues, then either Party may pursue the Dispute Resolution procedures set forth in this Agreement.
- 10.9.2 Records Exchange
- 10.9.2.1 Where feasible and appropriate, the Parties will generate and exchange all available messages for the purpose of billing third parties, including but not limited to CMRS providers and other LECs.

11. BASIC 911 AND E911 INTERCONNECTION

- 11.1 Basic 911 and E911 provides a caller access to the applicable emergency service bureau by dialing 911.
- 11.2 Basic 911 Interconnection. BellSouth will provide to <customer_short_name> a list consisting of each municipality that subscribes to Basic 911 service. The list will also provide, if known, the E911 conversion date for each municipality and, for network routing purposes, a ten-digit directory number representing the appropriate emergency answering position for each municipality subscribing to 911. <customer_short_name> will be required to arrange to accept 911 calls from its end users in municipalities that subscribe to Basic 911 service and translate the 911 call to the appropriate 10-digit directory number as stated on the list provided by BellSouth. <customer_short_name> will be required to route the call to the appropriate PSAP. When a municipality converts to E911 service, <customer_short_name> will be required to begin using E911 procedures.
- 11.3 E911 Interconnection. <customer_short_name> shall install a minimum of two (2) dedicated trunks originating from its Serving Wire Center and terminating to the appropriate E911 tandem. The Serving Wire Center must be in the same LATA as the E911 tandem. The dedicated trunks shall be, at a minimum, DS0 level trunks configured as part of a digital (1.544 Mb/s) interface (DS1 facility). The configuration shall use CAMA-type signaling with multifrequency (MF) pulsing that will deliver ANI with the voice portion of the call. If the user interface is digital, MF pulses as well as other AC signals shall be encoded per the u-255 Law convention. <customer_short_name> will be required to provide BellSouth daily updates to the E911 database. <customer_short_name> will be required to forward 911 calls to the appropriate E911 tandem along with ANI based upon the current E911 end office to tandem homing arrangement as provided by BellSouth. If the E911 tandem trunks are not available, <customer_short_name> will be required to route the call to a designated seven (7)-digit or ten (10)-digit local

number residing in the appropriate PSAP. This call will be transported over BellSouth's interoffice network and will not carry the ANI of the calling party. <customer_short_name> shall be responsible for providing BellSouth with complete and accurate data for submission to the 911/E911 database for the purpose of providing 911/E911 to its End Users.

- 11.4** Rates. Recurring and nonrecurring rates associated with trunk groups for 911 service are as set forth in Section 3.3.1 of this Attachment.
- 11.5** The detailed practices and procedures for 911/E911 interconnection are contained in the E911 Local Exchange Carrier Guide For Facility-Based Providers, which can be found at <http://www.interconnection.bellsouth.com/guides/e911/html/gcuge001/index.htm>.

12. FRAME RELAY SERVICE INTERCONNECTION

- 12.1** In addition to the Local Interconnection services set forth above, BellSouth will offer a network to network Interconnection arrangement between BellSouth's and <customer_short_name>'s frame relay switches as set forth below. The following provisions will apply only to Frame Relay Service and Exchange Access Frame Relay Service and Managed Shared Frame Relay Service in those states in which <customer_short_name> is certified and providing Frame Relay Service as a Local Exchange Carrier and where traffic is being exchanged between <customer_short_name> and BellSouth Frame Relay Switches in the same LATA.
- 12.2** At <customer_short_name> 's request, the Parties agree to will establish two-way Frame Relay facilities between their respective Frame Relay Switches to the mutually agreed upon Frame Relay Service point(s) of interconnection (IP(s)) within the LATA. All IPs shall be within the same Frame Relay Network Serving Areas as defined in Section A40 of BellSouth's General Subscriber Service Tariff except as set forth in this Attachment.
- 12.3** Such interconnection will be established where BellSouth and <customer_short_name> have Frame Relay Switches in the same LATA. Where there are multiple Frame Relay switches in one central office, an interconnection with any one of the switches will be considered an interconnection with all of the switches at that central office for purposes of routing packet traffic.
- 12.4** The Parties agree to provision local and intraLATA Frame Relay Service and Exchange Access Frame Relay Service and Managed Shared Frame Relay Service (both intrastate and interstate) over Frame Relay interconnection facilities between the respective Frame Relay switches and the IPs.

- 12.5** The Parties agree to assess each other reciprocal charges for the facilities that each provides to the other according to the Percent Local Circuit Use Factor (PLCU), determined as follows:
- 12.5.1** If the data packets originate and terminate in locations in the same LATA, and are consistent with the local definitions of the Agreement, the traffic is considered local. Frame Relay framed packet data is transported within Virtual Circuits (VC). For the purposes of this Agreement, if all the data packets transported within a VC remain within the LATA, then consistent with the local definitions in this Agreement, the traffic on that VC is local (Local VC).
- 12.5.2** If the originating and terminating locations of the two-way packet data traffic are not in the same LATA, the traffic on that VC is interLATA (InterLATA VC).
- 12.5.3** The PLCU is determined by dividing the total number of Local VCs, by the total number of VCs on each Frame Relay facility. To facilitate implementation, <customer_short_name> may determine its PLCU in aggregate, by dividing the total number of Local VCs in a given LATA by the total number VCs in that LATA. The Parties agree to renegotiate the method for determining PLCU, at BellSouth's request, and within 90 days, if BellSouth notifies <customer_short_name> that it has found that this method does not adequately represent the PLCU.
- 12.5.4** If there are no VCs on a facility when it is billed, the PLCU will be zero.
- 12.5.5** BellSouth will provide the circuit between the Parties' respective Frame Relay Switches. The Parties will be compensated as follows: BellSouth will invoice, and <customer_short_name> will pay, the total nonrecurring and recurring charges for the circuit based upon the rates set forth in BellSouth's Interstate Access Tariff, FCC No. 1. <customer_short_name> will then invoice, and BellSouth will pay, an amount calculated by multiplying the BellSouth billed charges for the circuit by one-half of <customer_short_name>'s PLCU.
- 12.6** The Parties agree to compensate each other for Frame Relay network-to-network interface (NNI) ports based upon the NNI rates set forth in BellSouth's Interstate Access Tariff, FCC No. 1.. Compensation for each pair of NNI ports will be calculated as follows: BellSouth will invoice, and <customer_short_name> will pay, the total nonrecurring and recurring charges for the NNI port. <customer_short_name> will then invoice, and BellSouth will pay, an amount calculated by multiplying the BellSouth billed nonrecurring and recurring charges for the NNI port by <customer_short_name>'s PLCU.
- 12.7** Each Party agrees that there will be no charges to the other Party for its own subscriber's Permanent Virtual Circuit (PVC) rate elements for the local PVC segment from its Frame Relay switch to its own subscriber's premises. PVC rate

elements include the Data Link Connection Identifier (DLCI) and Committed Information Rate (CIR).

- 12.8** For the PVC segment between the <customer_short_name> and BellSouth Frame Relay switches, compensation for the PVC charges is based upon the rates in BellSouth's Interstate Access Tariff, FCC No. 1.
- 12.9** Compensation for PVC rate elements will be calculated as follows:
- 12.9.1** If <customer_short_name> orders a VC connection between a BellSouth subscriber's PVC segment and a PVC segment from the BellSouth Frame Relay switch to the <customer_short_name> Frame Relay switch, BellSouth will invoice, and <customer_short_name> will pay, the total nonrecurring and recurring PVC charges for the PVC segment between the BellSouth and <customer_short_name> Frame Relay switches. If the VC is a Local VC, <customer_short_name> will then invoice and BellSouth will pay, the total nonrecurring and recurring PVC charges billed for that segment. If the VC is not local, no compensation will be paid to <customer_short_name> for the PVC segment.
- 12.9.2** If BellSouth orders a Local VC connection between a <customer_short_name> subscriber's PVC segment and a PVC segment from the <customer_short_name> Frame Relay switch to the BellSouth Frame Relay switch, BellSouth will invoice, and <customer_short_name> will pay, the total nonrecurring and recurring PVC and CIR charges for the PVC segment between the BellSouth and <customer_short_name> Frame Relay switches. If the VC is a Local VC, <customer_short_name> will then invoice and BellSouth will pay the total nonrecurring and recurring PVC and CIR charges billed for that segment. If the VC is not local, no compensation will be paid to <customer_short_name> for the PVC segment.
- 12.9.3** The Parties agree to compensate each other for requests to change a PVC segment or PVC service order record, according to the Feature Change charge as set forth in the BellSouth access tariff BellSouth Tariff FCC No. 1.
- 12.9.4** If <customer_short_name> requests a change, BellSouth will invoice and <customer_short_name> will pay a Feature Change charge for each affected PVC segment.
- 12.9.4.1** If BellSouth requests a change to a Local VC, <customer_short_name> will invoice and BellSouth will pay a Feature Change charge for each affected PVC segment.
- 12.9.5** The Parties agree to limit the sum of the CIR for the VCs on a DS1 NNI port to not more than three times the port speed, or not more than six times the port speed on a DS3 NNI port.

- 12.9.6 Except as expressly provided herein, this Agreement does not address or alter in any way either Party's provision of Exchange Access Frame Relay Service, Managed Shared Frame Relay Service or interLATA Frame Relay Service. All charges by each Party to the other for carriage of Exchange Access Frame Relay Service or interLATA Frame Relay Service are included in the BellSouth access tariff BellSouth Tariff FCC No. 1.
- 12.10 <customer_short_name> will identify and report quarterly to BellSouth the PLCU of the Frame Relay facilities it uses, per Section 11.5.3 above.
- 12.11 Either Party may request a review or audit of the various service components, consistent with the provisions of section E2 of the BellSouth State Access Services tariffs or Section 2 of the BellSouth FCC No.1 Tariff.

Attachment 4

Collocation

BELLSOUTH COLLOCATION

1. Scope of Attachment

- 1.1 The rates, terms, and conditions contained within this Attachment shall only apply when <customer_short_name> is collocated as a sole occupant or as a Host within a BellSouth premises location pursuant to this Attachment. BellSouth premises include BellSouth Central Offices and Serving Wire Centers; all buildings or similar structures owned, leased, or otherwise controlled by BellSouth that house its network facilities; all structures that house BellSouth facilities on public rights-of-ways, including but not limited to vaults containing loop concentrators or similar structures; and all land owned, leased, or otherwise controlled by BellSouth that is adjacent to BellSouth's Central Offices, Serving Wire Centers, buildings and structures (hereinafter "Premises"). BellSouth Remote Site Locations ("Remote Site Locations") include cabinets, huts and controlled environmental vaults owned or leased by BellSouth that house BellSouth Network Facilities. If the Premises occupied by BellSouth is leased by BellSouth from a third party or otherwise controlled by a third party, special considerations and/or intervals may apply in addition to the terms and conditions contained in this Attachment. BellSouth will inform <customer_short_name> if a Premises is leased when special considerations and/or intervals may be applicable.
- 1.2 If BellSouth provides collocation to other telecommunications carriers, or to a BellSouth Affiliate, BellSouth will provide the same collocation to <customer_short_name> at rates, terms and conditions no less favorable to <customer_short_name> than those provided by BellSouth to other telecommunications carriers, or to a BellSouth Affiliate.
- 1.3 Right to Occupy. BellSouth shall offer to <customer_short_name> collocation on rates, terms, and conditions that are just, reasonable, non-discriminatory and in full compliance with the rules and orders of the FCC and the Commission. Subject to the rates, terms and conditions of this Attachment, where space is available and it is technically feasible, BellSouth will allow <customer_short_name> to occupy a certain area designated by BellSouth within a Premises or on BellSouth property upon which the Premises is located of a size which is specified by <customer_short_name> and agreed to by BellSouth (hereinafter "Collocation Space", or "Remote Site Collocation Space"). To the extent not contained herein, the necessary rates, terms and conditions for collocation at Premises, as defined by the FCC above, shall be negotiated upon reasonable request for collocation at such Premises.
- 1.4 Space Reservation.
- 1.4.1 Neither BellSouth nor any of BellSouth's Affiliates may reserve space for future use on more preferential terms than those set forth in Sections 1.4.2 and 1.4.3 of this Attachment.

- 1.4.2 In all states other than Florida, the size, or rack/bay(s) in a Remote Site Location, specified by <customer_short_name> may contemplate a request for space sufficient to accommodate <customer_short_name>'s growth within a twenty-four (24) month period.
- 1.4.3 In the state of Florida, the size, or rack/bay(s) in a Remote Site Location, specified by <customer_short_name> may contemplate a request for space sufficient to accommodate <customer_short_name>'s growth within an eighteen (18) month period.
- 1.5 Space Allocation. BellSouth shall use best efforts to accommodate <customer_short_name>'s requested preferences, if any, including the provision of contiguous space for any subsequent request for collocation. In allocating Collocation Space, BellSouth shall not (a) materially increase <customer_short_name>'s cost or materially delay <customer_short_name>'s occupation and use of the Collocation Space, (b) assign Collocation Space that will impair the quality of service or otherwise limit the service <customer_short_name> wishes to offer, (c) reduce unreasonably the total space available for physical collocation at a Premise, or preclude unreasonably physical collocation within the Premises. Consistent with the foregoing, BellSouth shall assign <customer_short_name> collocation space within Premises that utilizes existing infrastructure (e.g., HVAC, lighting and available power), if such space is available for collocation. Space shall not be available for collocation if it is: (a) physically occupied by non-obsolete equipment; (b) assigned to another collocated telecommunications carrier; (c) used to provide physical access to occupied space; (d) used to enable technicians to work on equipment located within occupied space; (e) properly reserved for future use, either by BellSouth or another collocated telecommunications carrier; or (f) essential for the administration and proper functioning of Premises. BellSouth may segregate Collocation Space and require separate entrances for collocated telecommunications carriers to access their Collocation Space, pursuant to FCC Rules.
- 1.6 Space Reclamation. In the event of space exhaust within a Premises, BellSouth may include in its documentation for the Petition for Waiver filed with the Commission, any unutilized space in the Premises. <customer_short_name> will be responsible for the justification of unutilized space within its Collocation Space, if the Commission requires such justification.
- 1.7 Virtual Collocation Space Reservation. BellSouth shall relinquish any space held for future use before denying a request for virtual collocation on the grounds of space limitations, unless BellSouth proves to the Commission that virtual collocation at that point is not technically feasible.
- 1.8 Use of Space. <customer_short_name> shall use the Collocation Space for the purposes of installing, maintaining and operating <customer_short_name>'s equipment (to include testing and monitoring equipment) necessary for interconnection or for

- accessing unbundled network elements in accordance with the Act and FCC and Commission rules.
- 1.9 The Parties agree to comply with all applicable federal, state, county, local and administrative laws, rules, ordinances, regulations and codes in the performance of their obligations.
- 1.10 Service Coordination. The Parties shall coordinate, where necessary, to ensure that the Collocation Space is provisioned in accordance with the specifications submitted by <customer_short_name> in its Application, as affirmed by the Bona Fide Firm Order (“BFFO”) or as jointly amended thereafter. BellSouth will provide the necessary infrastructure to support <customer_short_name>’s request(s) pursuant to this Agreement.
2. **Space Availability Report**
- 2.1 Upon request from <customer_short_name> and at the <customer_short_name>’s expense, BellSouth will provide a written report (Space Availability Report) describing in detail the space that is available for collocation at a particular Premises. This report will include the amount of Collocation Space available at the Premises requested, the number of collocators present at the Premises, any modifications in the use of the space since the last report on the Premises requested and the measures BellSouth is taking to make additional space available for collocation arrangements. A Space Availability Report does not reserve space at the Premises for which the Space Availability Report was requested by <customer_short_name>.
- 2.1.1 The request from <customer_short_name> for a Space Availability Report must be in writing and include the Premises street address, as identified in the Local Exchange Routing Guide (LERG) and Common Language Location Identification (CLLI) code of the Premises. CLLI code information is located in the National Exchange Carrier Association (NECA) Tariff FCC No. 4.
- 2.1.1.1 If <customer_short_name> is unable to obtain the CLLI code for the Remote Site Location from, for example, a site visit to the remote site, <customer_short_name> may request the CLLI code from BellSouth. To obtain a CLLI code for a Remote Site Location directly from BellSouth, <customer_short_name> should submit to BellSouth a Remote Site Interconnection Request (the Request) for the Serving Wire Center CLLI code prior to submitting its request for a Space Availability Report. <customer_short_name> should complete all the requested information and submit the Request to BellSouth. BellSouth will bill the applicable fee as set forth in Exhibit B of this Attachment.
- 2.1.2 BellSouth will respond to a request for a Space Availability Report for a particular Premises within ten (10) calendar days of the receipt of such a request. If BellSouth cannot meet the ten (10) calendar day response time, BellSouth shall notify

<customer_short_name> and inform <customer_short_name> of the timeframe under which it can respond.

- 2.2 Remote Site Information. Upon written request, BellSouth will provide <customer_short_name> with the following information concerning BellSouth's remote sites: (i) the address of the remote site; (ii) the CLLI code of the remote site; (iii) the carrier serving area of the remote site; (iv) the designation of which remote sites subtend a particular central office; and (v) the number and address of customers that are served by a particular remote site.
- 2.3 BellSouth will provide this information on a first come, first served basis within thirty (30) calendar days of <customer_short_name>'s request subject to the following conditions: (i) the information will only be provided on a CD in the same format in which it appears in BellSouth's systems; (ii) the information will only be provided for each serving wire center designated by <customer_short_name>, up to a maximum of thirty (30) wire centers per <customer_short_name> request per month per state, and up to a maximum of one hundred twenty (120) wire centers total per month per state for all CLECs; and (iii) <customer_short_name> agrees to pay the cost as set forth in Exhibit B.

3. Collocation Options

- 3.1 Cageless. BellSouth shall allow <customer_short_name> to collocate <customer_short_name>'s equipment and facilities without requiring the construction of a cage or similar structure. BellSouth shall allow <customer_short_name> to have direct access to <customer_short_name>'s equipment and facilities in accordance with Section 5.19 below. BellSouth shall make cageless collocation available in single rack/bay increments. Except where <customer_short_name>'s equipment requires special technical considerations (e.g., special cable racking or isolated ground plane), BellSouth shall assign cageless Collocation Space in conventional equipment rack lineups where feasible. For equipment requiring special technical considerations, <customer_short_name> must provide the equipment layout, including spatial dimensions for such equipment pursuant to generic requirements contained in Telcordia GR-63-Core, and shall be responsible for compliance with all special technical requirements associated with such equipment.
- 3.2 Caged. BellSouth will make caged collocation available in fifty (50) square foot increments, which should be sufficient enough, to collocate a single rack/bay of equipment. At <customer_short_name>'s expense, <customer_short_name> will arrange with a Supplier certified by BellSouth (BellSouth Certified Supplier) to construct a collocation arrangement enclosure in accordance with BellSouth's reasonable and nondiscriminatory Technical References (TRs) (Specifications), where technically feasible as that term has been defined by the FCC, prior to starting equipment installation. BellSouth will provide Specifications to its BellSouth Certified Suppliers. Where local building codes require enclosure specifications more stringent than BellSouth's enclosure Specifications, <customer_short_name> and

<customer_short_name>'s BellSouth Certified Supplier must comply with the more stringent local building code requirements. <customer_short_name>'s BellSouth Certified Supplier shall be responsible for filing and receiving any and all necessary permits and/or licenses for such construction. BellSouth shall cooperate with <customer_short_name> and provide, at <customer_short_name>'s expense, the documentation, including existing building architectural drawings, enclosure drawings, and Specifications required and necessary for <customer_short_name>'s BellSouth Certified Supplier to obtain the zoning, permits and/or other licenses. <customer_short_name>'s BellSouth Certified Supplier shall bill <customer_short_name> directly for all work performed for <customer_short_name> pursuant to this Attachment. BellSouth shall have no liability for, nor responsibility to pay, such charges imposed by <customer_short_name>'s BellSouth Certified Supplier. Upon request, BellSouth shall construct the enclosure for <<customer_short_name.

- 3.2.1 BellSouth may elect to review <customer_short_name>'s plans and specifications prior to allowing construction to start, to ensure compliance with BellSouth's Specifications. BellSouth will notify <customer_short_name> of its desire to execute this review in BellSouth's response to the Initial Application, if <customer_short_name> has indicated its desire to construct its own enclosure. If <customer_short_name>'s Initial Application does not indicate its desire to construct its own enclosure, but its subsequent firm order does indicate its desire to construct its own enclosure, then notification to review will be given within ten (10) calendar days after the Firm Order date. BellSouth shall complete its review within fifteen (15) calendar days after the receipt of <customer_short_name>'s plans and specifications. Regardless of whether or not BellSouth elects to review <customer_short_name>'s plans and specifications, BellSouth reserves the right to inspect the enclosure after construction has been completed to ensure that it is constructed according to <customer_short_name>'s submitted plans and specifications and/or BellSouth's Specifications, as applicable. If BellSouth decides to inspect the constructed Collocation Space, BellSouth will complete its inspection within fifteen (15) calendar days after receipt of written notification of completion of the enclosure from <customer_short_name>. BellSouth may require <customer_short_name> to remove or correct within seven (7) calendar days, at <customer_short_name>'s expense, any structure that materially deviates from <customer_short_name>'s plans and specifications or BellSouth's Specifications, if applicable. If <customer_short_name> requests BellSouth to construct the enclosure or do any other work, <customer_short_name> reserves the right to inspect the enclosure or work performed by BellSouth and review any plans or specifications related to the same.

- 3.3 Shared Caged Collocation. <customer_short_name> may allow other telecommunications carriers to share <customer_short_name>'s caged collocation arrangement, where technically feasible as that term has been defined by the FCC, pursuant to the terms and conditions agreed to by <customer_short_name> (Host) and the other telecommunications carriers (Guests) pursuant to this Section, except where the Premises is located within a leased space and BellSouth is prohibited by said lease from offering such an option to <customer_short_name> or is located on property for

- which BellSouth holds an easement and such easement does not permit such an option for a Remote Site Location. BellSouth shall be notified in writing by <customer_short_name> upon the execution of any agreement between the Host and its Guest(s) prior to the submission of any application. Further, such notification shall include the name of the Guest(s), the term of the agreement, and a certification by <customer_short_name> that said agreement imposes upon the Guest(s) the same terms and conditions for Collocation Space as set forth in this Attachment between BellSouth and <customer_short_name>.
- 3.3.1 <customer_short_name>, as the Host, shall be the sole interface and responsible Party to BellSouth for the assessment and billing of rates and charges contained within this Attachment and for the purposes of ensuring that the safety and security requirements of this Attachment are fully complied with by the Guest(s), its employees and agents. BellSouth shall provide <customer_short_name> with a proration of the costs of the Collocation Space based on the number of collocators and the space used by each. BellSouth will not allocate less than one (1) rack/bay per Host/Guest. In those instances where the Host permits a Guest to use a shelf within the Host's bay within a Remote Site Location, BellSouth will not prorate the cost of the bay. In all other states than Florida, and in addition to the above, <customer_short_name> shall be the responsible party to BellSouth for the purpose of submitting applications for initial and additional equipment placement for the Guest(s). In Florida, the Guest(s) may submit its own initial and additional equipment placement applications using the Host's Access Carrier Name Abbreviation (ACNA), provided that Guest secures permission from <customer_short_name> to use <customer_short_name>'s ACNA and password. A separate Guest application shall result in the assessment of a Remote Site Application Fee, an Initial Application Fee or a Subsequent Application Fee, as set forth in Exhibit B, which will be billed to the Host on the date that BellSouth provides its written response to the Guest(s) Bona Fide Application (Application Response).
- 3.3.2 Notwithstanding the foregoing, the Guest(s) may submit service orders directly to BellSouth to request the provisioning of interconnecting facilities between BellSouth and the Guest(s), the provisioning of services, and access to unbundled network elements. The bill for these interconnecting facilities, services and access to UNEs will be charged to the Guest(s) pursuant to the applicable Tariff or the Guest's Interconnection Agreement with BellSouth.
- 3.3.3 <customer_short_name> shall indemnify and hold harmless BellSouth from any and all claims, actions, causes of action, of whatever kind or nature arising out of the presence of <customer_short_name>'s Guest(s) in the Collocation Space, except to the extent caused by BellSouth's, its employees' or agents' negligence, gross negligence, or willful misconduct.
- 3.3.4 In making shared caged arrangements available, whether or not <customer_short_name> serves as Host, BellSouth may not increase the cost of site preparation or nonrecurring charges above the cost of provisioning such a shared arrangement of similar dimensions and material to a single collocating party.

- 3.4 Shared Remote Site Cageless Collocation. Subject to the requirements set forth in Section 3.3 above, to the extent BellSouth is permitted to offer shared collocation at Remote Site locations by property or easement owners, BellSouth will permit shared cageless collocation at such locations, where technically feasible, and space is available.
- 3.5 Adjacent Collocation. Subject to technical feasibility and space availability, BellSouth will permit an adjacent collocation arrangement (Adjacent Arrangement) on Premises' property only when space within the Premises is legitimately exhausted and where the Adjacent Arrangement does not interfere with access to existing or planned structures or facilities on the Premises' property. An Adjacent Arrangement shall be constructed or procured by <customer_short_name> and must be in conformance with reasonable and nondiscriminatory provisions of BellSouth's design and construction Specifications. Further, <customer_short_name> shall construct, procure, maintain and operate said Adjacent Arrangement(s) pursuant to all of the applicable rates, terms and conditions set forth in this Attachment. Additional rates, where applicable, shall be negotiated at the time of the application for the Remote Site Adjacent Arrangement.
- 3.5.1 If <customer_short_name> requests Adjacent Collocation, pursuant to the conditions stated in Section 3.5 above, <customer_short_name> must arrange with a BellSouth Certified Supplier to construct the Adjacent Arrangement structure in accordance with BellSouth's Specifications. BellSouth will provide Specifications upon request. Where local building codes require enclosure specifications more stringent than BellSouth's Specifications, <customer_short_name> and <customer_short_name>'s BellSouth Certified Supplier must comply with the more stringent local building code requirements. <customer_short_name>'s BellSouth Certified Supplier shall be responsible for filing and receiving any and all necessary zoning, permits and/or licenses for such construction. <customer_short_name>'s BellSouth Certified Supplier shall bill <customer_short_name> directly for all work performed for <customer_short_name> pursuant to this Attachment. BellSouth shall have no liability for, nor responsibility to pay, such charges imposed by <customer_short_name>'s BellSouth Certified Supplier.
- 3.5.2 <customer_short_name> must submit its Adjacent Arrangement construction plans and specifications to BellSouth when it places its Firm Order. BellSouth shall review <customer_short_name>'s plans and specifications prior to construction of an Adjacent Arrangement(s) to ensure <customer_short_name>'s compliance with BellSouth's Specifications. BellSouth shall complete its review within fifteen (15) calendar days after receipt of the plans and specifications from <customer_short_name> for the Adjacent Arrangement. BellSouth may inspect the Adjacent Arrangement during and after construction is completed to ensure that it is constructed according to <customer_short_name>'s submitted plans and specifications. If BellSouth decides to inspect the completed Adjacent Arrangement, BellSouth will complete its inspection within fifteen (15) calendar days after receipt of

- written notification of completion of the enclosure from <customer_short_name>. BellSouth may require <customer_short_name> to remove or correct within seven (7) calendar days at <customer_short_name>'s expense, any structure that materially deviates from its submitted plans and specifications or BellSouth's Specifications, if applicable.
- 3.5.3 <customer_short_name> shall provide a concrete pad, the structure housing the arrangement, heating/ventilation/air conditioning (HVAC), lighting, and all of the facilities that are required to connect the structure (i.e., racking, conduits, etc.) to the BellSouth point of demarcation. At <customer_short_name>'s option, and where the local authority having jurisdiction permits, BellSouth shall provide an AC power source and access to physical collocation services and facilities, subject to the same nondiscriminatory requirements as those applicable to any other physical collocation arrangement. In Alabama and Louisiana, BellSouth will provide DC power, to Adjacent Collocation sites where technically feasible, as that term has been defined by the FCC subject to individual case basis pricing that complies with the pricing standards of Sections 251 and 252 of the Act. <customer_short_name>'s BellSouth Certified Supplier shall be responsible, at <customer_short_name>'s sole expense, for filing and receiving any and all necessary zoning, permits and/or licenses for an Adjacent Arrangement. BellSouth shall allow shared use of the Adjacent Arrangement pursuant to the terms and conditions set forth in Section 3.4 above.
- 3.5.4 In the event that interior space in a BellSouth Premises becomes available, and subject to the provisions of Section 6.6 of this Attachment, <customer_short_name> may, at its option, relocate its equipment from an adjacent facility into the interior space subject to the rates, terms and conditions of this Attachment 4.
- 3.6 Other Physical Collocation Arrangements. BellSouth will provide other collocation arrangements that have been demonstrated to be technically feasible. A previously successful method of obtaining interconnection or access to unbundled network elements at a particular premises or point on any incumbent LEC's network is substantial evidence that such method is technically feasible in the case of substantially similar network premises or points. In seeking a particular collocation arrangement, either physical or virtual, <customer_short_name>, is entitled to a presumption that such arrangement is technically feasible if any LEC has deployed such collocation arrangement in any incumbent LEC premises.
- 3.7 Virtual Collocation. Virtual Collocation will be made available according to the terms and conditions described in BellSouth's FCC Tariff No. 1 for all states except Florida, which will be made available pursuant to the terms and conditions contained in the Florida Access Tariff. BellSouth shall provide Virtual Collocation at the rates set forth in Exhibit B of this Attachment. If there are any inconsistencies between BellSouth's FCC Tariff No. 1 or the Florida Access Tariff, and this Agreement, the rates, terms, and conditions of this Agreement shall control.

- 3.7.1 Virtual Collocation would occur when <customer_short_name> provides and leases to BellSouth its transmission and other collocation equipment dedicated to <customer_short_name>'s use. <customer_short_name> will be responsible for monitoring and controlling <customer_short_name>'s circuits terminating at BellSouth's Premises. Once space preparation is complete, and upon <customer_short_name>'s request, <customer_short_name> shall contract with a BellSouth Certified Supplier to install all equipment and facilities in accordance with BellSouth's guidelines and Specifications. <customer_short_name> shall be responsible for all costs of the BellSouth Certified Supplier's installation of <customer_short_name>'s virtual collocation arrangement. <customer_short_name> shall be responsible for all engineering associated with the installation and the provision of the equipment, necessary supplies and related documentation related to provisioning <customer_short_name>'s virtual collocation space. BellSouth will maintain and repair such equipment under the same intervals and with the same or better failure rates for performance of similar functions for comparable BellSouth equipment. Maintenance may include the change out of electronic cards provided by <customer_short_name>.
- 3.7.2 <customer_short_name> may purchase the equipment from a third party, and is not required to purchase the equipment from BellSouth.
- 3.7.3 BellSouth will make available digital, analog and fiber cross connects for Virtual Collocation at the rates contained in Exhibit B of this Attachment.
- 3.8 Remote Site Collocation. Remote Site Collocation is the placement of <customer_short_name> owned facilities and equipment in BellSouth remote sites. Equipment ownership, maintenance and insurance are the responsibility of the <customer_short_name> or their approved agent. The minimum amount of a Remote Site Collocation arrangement is one bay/rack.
- 3.8.1 For equipment requiring special technical considerations, <customer_short_name> must provide the equipment layout, including spatial dimensions for such equipment pursuant to the generic requirements contained in Telcordia GR-63-Core, and shall be responsible for compliance with all special technical requirements associated with such equipment pursuant to Sections 3.8.2 and 3.8.3 following.
- 3.8.2 <customer_short_name> may elect to connect to a feeder line by submitting a service inquiry for that UNE to the Complex Resale Support Group, as follows:
- 3.8.2.1 connection to a BellSouth feeder line (when technically feasible) is achieved via cross connects located near the BellSouth equipment inside the Remote Site Location. In this case, the point of demarcation is the DSX, feeder distribution interface, or LGX panel in the Remote Site Location.
- 3.8.2.2 connection of the <customer_short_name> owned or leased entrance facilities into the Remote Site Collocation Space from <customer_short_name>'s own point of presence

is permitted. However, BellSouth will designate the point of entrance at the Remote Site location housing the collocation space, so that it is physically accessible to both Parties.

3.8.3 Distribution lines will be accessed through <customer_short_name>'s provision of a copper cable through a conduit from the Remote Site collocation space to the feeder distribution interface of sufficient length for splicing. BellSouth will splice this cable to the distribution cable at the feeder distribution interface in 8-pair increments.

3.8.4 Virtual Collocation in the Remote Site. Virtual Collocation provides for the placement of <customer_short_name> owned equipment and facilities in a BellSouth Remote Site. The minimum amount of space offered for a virtual collocation arrangement is one rack/bay. BellSouth will lease <customer_short_name>'s entrance fiber or cable (to include copper) cabling and equipment for the nominal fee of one dollar. <customer_short_name>'s certified supplier will install the equipment in the rack/bay. BellSouth will then be responsible for performing all installation, maintenance and repair of the Virtual in the Remote Site plug-ins, when <customer_short_name> requests such work via a Service Order or Maintenance ticket.

3.9 [Parties Disagree]

[<customer_short_name> Version] Cross Connect. **A cross-connection (cross-connect) is a cabling scheme between cabling runs subsystems, and equipment using patch cords or jumper wires that attach to connection hardware on each end, as defined and described by the FCC in its applicable rules and orders. A cross connect may consist of a jumper on a frame (Main Distribution or Intermediate Distribution) or panel (DSX or LGX) that is used to connect equipment and/or facility terminations together. For collocation arrangements, the definition of cross connect will also include the tie cable connecting the frame/panel with the collocation demarc if the demarc is located at a point other than the frame/panel (POT Bay). A cross connect involved in connecting equipment/facility terminations with equipment/facility terminations associated with a collocation arrangement, either physical or virtual, is ordered separately and is charged at the rates found in Attachment 2 or Attachment 4. A cross connect involved in the provision of services not associated with a collocation arrangement is not ordered but is a part of the provisioning of the service.**

[BellSouth Version] Cross Connect. A cross connect is a jumper on a frame (Main Distribution or Intermediate Distribution) or panel (DSX or LGX) that is used to connect equipment and/or facility terminations together. For collocation arrangements, the definition of cross connect will also include the tie cable connecting the frame/panel with the collocation demarc if the demarc is located at a point other than the frame/panel (POT Bay). A cross connect involved in connecting equipment/facility terminations with equipment/facility terminations associated with a collocation arrangement, either physical or virtual, is ordered separately and is charged at the rates found in Attachment 2 or Attachment 4.

- 3.10 Co-Carrier Cross Connect (CCXC). CCXCs are cross connects between <customer_short_name> and another collocated telecommunications carrier other than BellSouth in the same Premises. Where technically feasible, BellSouth will permit <customer_short_name> to interconnect directly between its virtual or physical collocation arrangements and those of another collocated telecommunications carrier within the same Premises via CCXCs and the associated cabling necessary to complete the interconnection consistent with FCC Rule 51.323. Both <customer_short_name>'s agreement and the other collocated telecommunications carrier's agreement must contain rates, terms and conditions for CCXCs. BellSouth applicable charges will be imposed on the requesting telecommunications carrier. <<customer-short_name>> is prohibited from using the Collocation Space for the sole or primary purpose of cross connecting to other collocated telecommunications carriers.
- 3.10.1 <customer_short_name> may provision the CCXC using its own technicians, if certified as a BellSouth Certified Supplier, or contract with a BellSouth Certified Supplier to place the CCXC. The CCXC shall be provisioned through facilities owned or leased by <customer_short_name>. Such connections to other collocated telecommunications carriers may be made using either optical or electrical facilities (lit or dark). In cases where <customer_short_name>'s equipment and the equipment of the other collocated telecommunications carrier are located in contiguous caged Collocation Spaces, <customer_short_name> may use its own technicians to install CCXCs using either electrical or optical facilities (and associated patch cords, jumper cables, tie-pairs, etc.) between the equipment of both collocated telecommunication carriers and construct a dedicated cable support structure, if needed, between the two contiguous cages. <customer_short_name> shall deploy such optical or electrical connections directly between its own facilities and the facilities of another collocated telecommunications carrier without being routed through BellSouth's equipment. <customer_short_name> shall not provision CCXC on any BellSouth distribution frame, POT (Point of Termination) Bay, DSX (Digital System Cross Connect), or LGX (Light Guide Cross Connect). <customer_short_name>> is responsible for ensuring the integrity of the signal.
- 3.10.2 The CCXC fees provided for in this Agreement shall not apply when BellSouth has installed fiber or copper/coax cable support structure, pursuant to the terms and conditions of previous interconnection agreements between the Parties, that has been paid in full by <customer_short_name> via nonrecurring CCXC charges. If <customer_short_name> has ordered a service that originates from its collocation space and terminates to another collocater's space in the same BellSouth Premises, which caused a BellSouth technician to jumper the two collocation spaces together using <customer_short_name> specific connecting facility assignments (CFAs) provided by <customer_short_name> and the other collocater at a BellSouth frame, panel or existing POT bay (wherever the point of demarcation resides), then BellSouth will permit these cross connections to remain in-service as provisioned and at the rates at which they were provisioned ("grandfathered").

- 3.10.3 <customer_short_name> shall be responsible for providing a letter of authorization (LOA), with the application, to BellSouth from the other collocated telecommunications carrier to which it will be cross-connecting <customer_short_name> provisioned CCXC shall utilize common cable support structure. There will be a recurring charge per linear foot, per cable, of common cable support structure used. In the case of two contiguous caged collocation arrangements, <customer_short_name> may use its own technicians to construct the dedicated support structure between the two collocation arrangements.
- 3.10.4 To request or self-provision CCXCs, <customer_short_name> must submit a Remote Site Application, an Initial Application or Subsequent Application to BellSouth. If no modification to the Collocation Space is requested other than the placement of CCXCs, the Co-Carrier Cross Connect/Direct Connect Only Application Fee for CCXCs, as set forth in Exhibit B, will apply. If modifications, in addition to the placement of CCXCs, are requested, the Initial Application or Subsequent Application Fee will apply as appropriate. BellSouth will bill this nonrecurring fee on the date that it provides an Application Response to <customer_short_name>. If the CCXC is requested as part of an Initial Application, only the Initial Application Fee shall apply, plus any other applicable charges.
- 3.10.5 If requested by <customer_short_name>, BellSouth will provision additional cable racking, if insufficient capacity is available to support <customer_short_name>'s request to provision a CCXC itself.
- 3.11 Direct Connect (DC). BellSouth will permit <customer_short_name> to interconnect directly between <customer_short_name>'s virtual and/or physical collocation arrangements within the same Premises by utilizing a DC. <customer_short_name> must use a BellSouth Certified Supplier to place the DC. The DC shall be provisioned through facilities owned by <customer_short_name>. In those cases where <customer_short_name>'s virtual and/or physical collocation space is contiguous in the central office, <customer_short_name> will have the option of using <customer_short_name>'s own technicians to deploy DC's using either electrical or optical facilities between the collocation spaces and constructing its own dedicated cable support structure. <customer_short_name> will deploy such optical or electrical connections directly between its own facilities without being routed through BellSouth equipment. <customer_short_name> may not self-provision DC's on any BellSouth distribution frame, POT, DSX (Digital System Cross-connect) or LGX (Light Guide Cross-connect).
- 3.11.1 <customer_short_name> is responsible for ensuring the integrity of the signal. <customer_short_name>-provisioned DC's shall utilize common cable support structure. There will be a recurring charge per linear foot, and a nonrecurring charge per cable, of the actual common cable support structure used. In the case of two contiguous collocation arrangements, <customer_short_name> will have the option of using <customer_short_name>'s own technicians to construct its own dedicated support structure.

- 3.11.2 To request or self-provision DCs, <customer_short_name> must submit an Initial Application or Subsequent Application. If no modification to the Collocation Space is requested other than the placement of DC's, the Co-Carrier Cross Connect/Direct Connect Only Application Fee for DC, as defined in Exhibit B, will apply. If modifications in addition to the placement of DC's are requested, the Initial Application or Subsequent Application Fee will apply. This nonrecurring fee will be billed by BellSouth on the date that BellSouth provides an Application Response.

4. **Occupancy**

- 4.1 Space Ready Date. BellSouth will notify <customer_short_name> in writing when the Collocation Space is ready for occupancy ("Space Ready Date").
- 4.2 Acceptance Walkthrough. <customer_short_name> will schedule and complete an acceptance walkthrough of the Collocation Space with BellSouth within fifteen (15) calendar days of the Space Ready Date. BellSouth will correct any deviations from <customer_short_name>'s original or jointly amended application requirements within seven (7) calendar days after the walkthrough, unless the Parties jointly agree upon a different time frame or mutually agree to accept the deviations. BellSouth will notify <customer_short_name> of a new Space Ready Date upon resolution of any deviations that require correction. Another acceptance walkthrough will then be scheduled and conducted within fifteen (15) calendar days of the new Space Ready Date. This follow-up acceptance walkthrough will be limited to only those items identified in the initial walkthrough. This process will continue until the Space Acceptance Date as defined below in Section 4.3 following. <customer_short_name> must notify BellSouth in writing that collocation equipment installation is complete and operational with BellSouth's network.
- 4.3 Space Acceptance Date. If <customer_short_name> completes its acceptance walkthrough within the fifteen (15) calendar day interval, the date of <customer_short_name>'s acceptance of the Collocation Space, as indicated by <customer_short_name>'s execution of a Space Acceptance Form, will be the Space Acceptance Date ("Space Acceptance Date").
- 4.3.1 In the event that <customer_short_name> fails to complete an acceptance walkthrough within this fifteen (15) calendar day interval, the Collocation Space shall be deemed accepted by <customer_short_name> on the Space Ready Date and the Space Acceptance Date will be established as the same date, provided that BellSouth has complied with all space preparation, provisions of <customer_short_name>'s BFFO, and that all required of BellSouth is complete.
- 4.3.2 If <customer_short_name> decides to occupy the space prior to the Space Ready Date, the date <customer_short_name> occupies the space will be deemed the Space Acceptance Date.

- 4.4 Termination of Occupancy. In addition to any other provisions addressing termination of occupancy in this Agreement <customer_short_name> may terminate occupancy in a particular Collocation Space by submitting a Subsequent Application, or a Remote Site Application requesting termination of occupancy. Such termination shall be effective upon BellSouth's execution of the Space Relinquishment Form for the collocation space(s) for which <customer_short_name> seeks to terminate occupancy, which termination date shall be the same date as <customer_short_name>'s date of the Space Relinquishment Form, provided <customer_short_name> has complied with all provisions of the Space Relinquishment Form. BellSouth may terminate<<customer_short_name>.'s right to occupy the Collocation Space in the event <customer_short_name> fails to comply with any material provision directly related to Collocation in this Agreement provided BellSouth gives <customer_short_name> thirty (30) calendar days' prior written notice of the failure to comply and gives <customer_short_name> an opportunity to cure during such period. Notwithstanding the above, any termination for non-payment of applicable fees, shall be in accordance with Attachment 7, Billing.
- 4.4.1 Upon termination of occupancy, <customer_short_name>, at its sole expense, shall remove its equipment and any other property from the Collocation Space. <customer_short_name> shall have thirty (30) calendar days (Removal Date) from the Subsequent Application BFFO Date to complete such removal, including the removal of all equipment and facilities of <customer_short_name>'s Guest(s), unless <customer_short_name>'s Guest(s) has assumed responsibility for the Collocation Space housing the Guest(s)'s equipment, pursuant to the Commissions' space exhaust requirementsand executed the appropriate documentation required by BellSouth prior to the <customer_short_name> Removal Date.
- 4.4.2 Should <customer_short_name> or <customer_short_name>'s Guest(s) fail to vacate the Collocation Space by the Removal Date, BellSouth shall have the right to remove the equipment and dispose of the equipment and other property of <customer_short_name> or <customer_short_name>'s Guest(s), in any commercially reasonable manner that BellSouth deems fit, at <customer_short_name>'s expense and with no liability whatsoever for <customer_short_name>'s property or <customer_short_name>'s Guest(s)'s property, provided that BellSouth has not granted <customer_short_name>'s request for an extension of the Removal Date, and such request shall not unreasonably be denied.
- 4.4.3 Upon termination of <customer_short_name>'s right to occupy specific Collocation Space, the Collocation Space will revert back to BellSouth's space inventory, and <customer_short_name> shall surrender the Collocation Space to BellSouth in the same condition as when it was first occupied by <customer_short_name>, with the exception of ordinary wear and tear, unless otherwise agreed to by the Parties. <customer_short_name>'s BellSouth Certified Supplier shall be responsible for updating and making any necessary changes to BellSouth's records as required by BellSouth's Specifications including, but not limited to, Central Office Record Drawings and ERMA Records. <<customer-short_name>> shall be responsible for the

cost of removing any <customer_short_name> constructed enclosure, together with any supporting structures (e.g., racking, conduits or power cables), at the termination of occupancy and restoring grounds to their original condition

5. **Use of Collocation Space**

- 5.1 **Equipment Type.** BellSouth shall permit the collocation and use of any equipment necessary for interconnection or access to unbundled network elements, in accordance with the applicable FCC and Commission rules and orders. Equipment is necessary for interconnection if an inability to deploy that equipment would, as practical, economic, or operational matter, preclude the requesting carrier from obtaining interconnection with BellSouth at a level equal in quality to that which BellSouth obtains within its own network or what BellSouth provides to any Affiliate, subsidiary, or other party.
- 5.2 Equipment is necessary for access to an unbundled network element if an inability to deploy that equipment would, as a practical, economic, or operational matter, preclude the requesting carrier from obtaining nondiscriminatory access to that unbundled network element, including any of its features, functions, or capabilities.
- 5.3 Multi-functional equipment shall be deemed necessary for interconnection or access to an unbundled network element if and only if the primary purpose and function of the equipment, as the requesting carrier seeks to deploy it, meets either or both of the standards set forth above in Sections 5.1 and 5.2 above. For a piece of equipment to be utilized primarily to obtain equal in quality interconnection or nondiscriminatory access to one or more unbundled network elements, there also must be a logical nexus between the additional functions the equipment would perform and the telecommunication services <customer_short_name> seeks to provide to its customers by means of the interconnection or unbundled network element. The collocation of those functions of the equipment that, as stand-alone functions, do not meet either of the standards set forth above in Sections 5.1 and 5.2 above must not cause the equipment to significantly increase the burden on BellSouth's property. Such equipment necessary for interconnection or access to unbundled network elements shall include, but is not limited to transmission equipment, equipment to light dark fiber, optical terminating equipment and multiplexers, digital subscriber line access multiplexers, routers, asynchronous transfer mode multiplexers, multifunction equipment, remote switching modules, fiber distribution frames, splitters, concentrators, cross connect systems, switching equipment other than traditional circuit switches, and ancillary equipment that enables a requesting carrier to assure proper provisioning and functioning of other collocated equipment. Subject to the provisions of this Section, <customer_short_name> may order BellSouth tariffed services that connect to such equipment in its Collocation Space.
- 5.3.1 Examples of equipment that would not be considered necessary include, but are not limited to: traditional circuit switching equipment, equipment used exclusively for call related databases, computer servers used exclusively for providing information services, operations support system (OSS) equipment used to support collocated

- telecommunications carrier network operations, equipment that generates customer orders, manages trouble tickets or inventory, or stores customer records in centralized databases, etc. BellSouth will determine upon receipt of an application if the requested equipment is necessary based on the criteria established by the FCC. Multifunctional equipment placed on Premises must not place any greater relative burden on BellSouth's property than comparable single function equipment. BellSouth may object to the collocation of equipment based on criteria and in accordance with procedures and limitations established by applicable FCC and Commission rules and orders. With the exception of the equipment set forth in this Section 5.3.1, BellSouth may not block collocation and use of equipment while a proceeding to determine whether BellSouth may block such placement is pending. If BellSouth prevails in such a proceeding, <customer_short_name> will remove such equipment from the collocation, within thirty (30) days of receipt of a written request to do so from BellSouth, or as otherwise set forth in the relevant Commission order.
- 5.4 Whenever BellSouth objects to collocation of equipment by <customer_short_name> for purposes within the scope of Section 251 (c) (6) of the Act, BellSouth shall prove to the state commission that the equipment is not necessary for interconnection or access to unbundled network elements under the standards set forth above in this Section. BellSouth may not object to the collocation of equipment on the grounds that the equipment does not comply with safety or engineering standards that are more stringent than the safety or engineering standards that BellSouth applies to its own equipment. BellSouth may not object to the collocation of equipment on the ground that the equipment fails to comply with Network Equipment and Building Specifications performance standards or any other performance standards. Collocated equipment must comply with the following Telcordia Network Equipment Building Systems (NEBS) General Equipment Requirements: Criteria Level 1 requirements as outlined in Telcordia Special Report SR-3580, Issue 1. If BellSouth denies collocation of <<customer-short_name>>'s equipment, citing safety standards, BellSouth must provide to <customer_short_name> within five (5) business days of the denial a list of all equipment that BellSouth locates at the Premises in question, together with an affidavit attesting that all of the equipment meets or exceeds the safety standard that BellSouth contends the competitor's equipment fails to meet. This affidavit must set forth in detail: the exact safety requirement that <customer_short_name>'s equipment does not satisfy; BellSouth's basis for concluding that <customer_short_name>'s equipment does not meet this safety requirement; and BellSouth's basis for concluding why collocation of equipment not meeting this safety requirement would compromise network safety. BellSouth reserves the right to permit on a nondiscriminatory basis collocation of equipment that does not necessarily comport with the requirements of applicable FCC and Commission rules and orders.
- 5.5 All <customer_short_name> Remote Site equipment installation shall comply with BellSouth TR 73503-11h, "Grounding – Engineering Procedures". Metallic cable sheaths and metallic strength members of optical fiber cables as well as the metallic cable sheaths of all copper conductor cables shall be bonded to the designated grounding bus for the Remote Site Location. All copper conducted pairs, working and

- non-working, shall be equipped with a solid-state protector unit (over-voltage protection only), which has been listed by a nationally recognized testing laboratory and located within <customer_short_name>'s Remote Site Collocation Space.
- 5.6 Terminations. <customer_short_name> shall not request more DS0, DS1, DS3 and optical terminations for a collocation arrangement than the total port or termination capacity of the equipment (including, but not limited to, transmission equipment, multiplexers, DSLAMS, DLC's, signal regenerators, cross connect panels) physically installed in the arrangement. The total capacity of the equipment collocated in the arrangement will include equipment contained in the application in question as well as the transmission equipment already placed in an arrangement. If full network termination capacity of the equipment being installed is not requested in the application, additional network terminations for the installed equipment will require the submission of another application. In the event that <customer_short_name> submits an application for terminations that exceed the total capacity of the collocated equipment, <customer_short_name> will be informed of the discrepancy and will be required to submit a revision to the application. Billing for terminations begin when services are ordered to those terminations via an ASR or a LSR.
- 5.7 <customer_short_name> will provide a list of those entities with a security interest in collocation equipment in <customer_short_name>'s collocation sites to BellSouth. This list will be updated by <customer_short_name> once annually. This information shall be expressly covered by the confidentiality provisions contained in Section 12 of the General Terms and Conditions of this Agreement. In no event shall BellSouth use the list of entities for any purpose other than contacting equipment owners or lien holders subsequent to abandonment of such equipment by <customer_short_name>.
- 5.8 No Marketing. <customer_short_name> shall not use the Collocation Space for marketing purposes, nor shall it place any marketing materials outside the Collocation Space or on the grounds of the Premises.
- 5.9 Collocation Space/Equipment Identification. <customer_short_name> shall place a plaque on or affix other identification (e.g., stenciling) to <customer_short_name>'s equipment, in order for BellSouth to identify <customer_short_name>'s equipment, including a list of emergency contacts with telephone numbers. For caged collocation the identification may be placed on a plaque affixed outside of the caged enclosure. All equipment must be identified for cageless collocation.
- 5.10 Entrance Facilities. <customer_short_name> may elect to place <customer_short_name>-owned or <customer_short_name>-leased (from BellSouth or a third party provider) fiber entrance facilities into its Collocation Space. BellSouth will designate the point of interconnection as close as reasonably possible to the Premises building housing the Collocation Space, such as at an entrance manhole or a cable vault, which are physically accessible by both Parties. <customer_short_name> will provide and place fiber cable at the point of entrance (in the entrance manhole) of sufficient length to be pulled through conduit and into the splice location.

- <customer_short_name> will provide and place copper or fiber cable through conduit from the Remote Site Collocation Space to the feeder distribution interface to the splice location of sufficient length for splicing by BellSouth. In Central Offices, <customer_short_name> will provide and install a sufficient length of fire retardant riser cable, to which the entrance cable will be spliced by BellSouth. The fire retardant riser cable will extend from the splice location to <customer_short_name>'s equipment in the Collocation Space. In the event <customer_short_name> utilizes a non-metallic, riser-type entrance facility, a splice will not be required. <customer_short_name> must contact BellSouth for instructions prior to placing any entrance facility cable in the manhole. <customer_short_name> is responsible for maintenance of the entrance facilities.
- 5.10.1 Central Office - Microwave Entrance Facilities. At <customer_short_name>'s option, BellSouth will accommodate, where technically feasible, a microwave entrance facility, pursuant to separately negotiated terms and conditions.
- 5.10.2 Central Office -Copper and Coaxial Cable Entrance Facilities. BellSouth shall permit <customer_short_name> to use copper or coaxial cable entrance facilities, if approved by the Commission. Notwithstanding the foregoing, in the case of adjacent collocation, copper facilities may be used between the adjacent collocation arrangement and the central office demarcation point unless BellSouth determines that limited space is available for the placement of entrance facilities.
- 5.11 Dual Entrance Facilities. BellSouth will provide at least two (2) interconnection points at each Premise where at least two such interconnection points are available and capacity exists. Upon receipt of a request by <customer_short_name> for dual entrance facilities to its physical Collocation Space, BellSouth shall provide <customer_short_name> with information regarding BellSouth's capacity to accommodate the requested dual entrance facilities. If conduit in the serving manhole(s) is available and is not reserved for another purpose or for utilization within twelve (12) months of the receipt of an application for collocation, BellSouth will make the requested conduit space available for installing a second entrance facility to <customer_short_name>'s arrangement. The location of the serving manhole(s) will be as close as reasonably possible to the Premises housing the Collocation Space, but determined by BellSouth on a reasonable and nondiscriminatory basis. Where dual entrance facilities are not available due to lack of capacity, BellSouth will provide this information to <customer_short_name> in the Application Response. BellSouth shall not deny an Application for the sole reason that dual entrance facilities are not available.
- 5.12 Shared Use. <customer_short_name> may utilize spare capacity on an existing interconnector's entrance facility for the purpose of providing an entrance facility to <customer_short_name>'s collocation arrangement within the same Premises.
- 5.12.1 In a Central Office, BellSouth shall allow the splice, as long as the fiber is non-working dark fiber. <customer_short_name> must arrange with BellSouth in accordance with

- all reasonable and nondiscriminatory requirements set forth in BellSouth's Special Construction Procedures, RL93-11-030BT, and provide a LOA from the other telecommunications carrier for BellSouth to perform the splice of the <customer_short_name> provided riser cable to the spare capacity on the entrance facility. If <customer_short_name> desires to allow another telecommunications carrier to use its entrance facilities, that telecommunications carrier must arrange with BellSouth in accordance with all reasonable and nondiscriminatory requirements set forth in BellSouth's Special Construction Procedures, RL93-11-030BT, and provide a LOA from <customer_short_name> for BellSouth to perform the splice of that telecommunications carrier's provided riser cable to the spare capacity on <customer_short_name>'s entrance facility.
- 5.12.2 For a Remote Site, the Parties will negotiate the rates, terms and conditions based upon the technical feasibility and physical capacity at the time of a request from <customer_short_name>.
- 5.13 Central Office Demarcation Point. BellSouth, in a reasonable and nondiscriminatory manner and in accordance with any and all applicable FCC and Commission rules and orders, will designate the point(s) of demarcation between <customer_short_name>'s equipment and/or network and BellSouth's network. Each Party will be responsible for the installation, maintenance and operation of all equipment/facilities on its side of the demarcation point and may make any terminations that may be required on their side of the demarcation point and may self-provision cross connects within the Collocation Space that may be required to activate service requests. <customer_short_name> shall have access to the demarcation point and all equipment and facilities on its side of the demarcation point. <customer_short_name> shall not have access to BellSouth's side of the demarcation point. When troubles cannot be clearly isolated to BellSouth's facilities and equipment, BellSouth will agree to test cooperatively with <customer_short_name> to assist in trouble isolation to a specific Party's facilities and equipment as set forth in Section 2.3.13 of BellSouth's FCC Tariff No. 1. If <customer_short_name> performs testing of its facilities and submits a trouble ticket to BellSouth indicating a trouble exists on BellSouth's side of the demarcation, then BellSouth will perform the required testing on its side of the demarcation point to isolate the trouble reported by <customer_short_name>. If BellSouth does find that a trouble exists on its side of the demarcation point after it has performed the required testing of its facilities, then BellSouth will take the necessary action to repair its facilities to eliminate the trouble and <customer_short_name> will not be charged for submission of the trouble ticket. If BellSouth cannot locate any trouble on its side of the demarcation point, then BellSouth will assess <customer_short_name> the applicable Maintenance of Services charge as set forth in Section 13.3.1 of BellSouth's FCC Tariff No. 1, based on the amount of time, in half-hour increments, it takes a BellSouth technician to complete the appropriate testing. If, within thirty (30) calendar days of BellSouth's billing of the Maintenance of Services charge, <customer_short_name> performs its testing of the same facilities and finds that the trouble has not been eliminated and does not reside on <customer_short_name>'s side of the demarcation point, then the

- <customer_short_name> shall submit a second trouble ticket to BellSouth. If, after testing has been performed by BellSouth, the trouble is actually determined to be on BellSouth's side of the demarcation point, BellSouth will not charge <customer_short_name> for the submission of the trouble ticket. BellSouth shall also credit <customer_short_name>'s account for the amount of the original Maintenance of Service charge on this same facility, within the next billing cycle. For 2-wire and 4-wire connections to BellSouth's network, the demarcation point shall be a common block on the BellSouth designated conventional distributing frame (CDF). <customer_short_name> shall be responsible for providing, and <customer_short_name>'s BellSouth Certified Supplier shall be responsible for installing and properly labeling/stenciling, the common, and necessary cabling pursuant to Section 7 below. For DS1 and DS3 connections, the demarcation point shall be a BellSouth provided DSX panel, or elsewhere if mutually agreed. For fiber connections, the demarcation point shall be a BellSouth provided LGX panel, or elsewhere if mutually agreed. For DS0 connections, the demarcation point shall be a BellSouth designated distributing frame. BellSouth shall not require <customer_short_name> to use an intermediate interconnection arrangement in lieu of a direct connection to BellSouth's network if technically feasible.
- 5.13.1 Existing point(s) of demarcation – <customer_short_name> provided POT Bay. BellSouth will grandfather existing point(s) of demarcation established at a <customer_short_name> provided POT Bay. <customer_short_name> shall order services using the existing remaining terminations in the POT bay.
- 5.13.2 Existing point(s) of demarcation – BellSouth provided POT Bay. BellSouth will grandfather existing point(s) of demarcation established at a BellSouth provided POT Bay. <customer_short_name> shall order services using the existing remaining cabling and terminations in the POT Bay.
- 5.13.3 Irrespective of where the demarcation point in a central office is located, BellSouth shall provide <customer_short_name> with access to the <customer_short_name>'s side of the demarcation point pursuant to this Section.
- 5.14 Remote Site Point of Demarcation. The point of demarcation will be as follows for each service level: DS-0 services will be the feeder distribution interface. DS-1 services will be at the designated BellSouth DS-1 cross connect panel. DS-3 services will be at the designated BellSouth DS-3 cross connect panel. Dark fiber services will be at the designated BellSouth LGX panel.
- 5.15 <customer_short_name>'s Equipment and Facilities. <customer_short_name>, or if required by this Attachment, <customer_short_name>'s BellSouth Certified Supplier, is solely responsible for the design, engineering, installation, testing, provisioning, performance, monitoring, maintenance and repair of the equipment and facilities used by <customer_short_name> and collocated in the Collocation Space or elsewhere in the Premises. Such equipment and facilities may include, but are not limited to, cable(s), equipment, and point of termination connections. <customer_short_name>

- need not use a BellSouth Certified Supplier to monitor, maintain or repair its own equipment and facilities.
- 5.16 BellSouth's Access to Enclosed Collocation Space. Except in the case of an emergency, BellSouth will not access <customer_short_name>'s locked enclosure prior to notifying <customer_short_name> at least seventy-two (72) hours or three (3) business days, whichever is greater, before access to the Collocation Space is required. BellSouth retains the right to access <customer_short_name>'s space for the purpose of making BellSouth equipment or cabling and building modifications (e.g., altering or removing racking, ducts, electrical wiring, HVAC, and cabling). <customer_short_name> may elect to be present whenever BellSouth performs work in the Collocation Space. The Parties agree that <customer_short_name> will not bear any of the expense associated with this type of work. BellSouth, its employees, vendors and agents, will comply at all times with its own security and safety procedures and requirements, while in <customer_short_name>'s space.
- 5.16.1 In cases of emergency, BellSouth will provide oral notice of entry as soon as possible (such oral notice most likely will be after entry) and, upon request, will provide subsequent written notice containing the time of entry, cause for emergency, and a listing of personnel allowed to enter the space during said emergency.
- 5.17 <customer_short_name> must provide the local BellSouth Central Office building contact with two Access Keys that will allow BellSouth entry into enclosed and locked Collocation Space, including but not limited to, Adjacent Arrangements, pursuant to this Section. Access Keys may not be duplicated under any circumstances. BellSouth agrees to be responsible for all Access Keys and for the return of all Access Keys after the contractual obligation with <customer_short_name> ends, upon the termination of this Attachment, or upon the termination of occupancy of an individual collocation arrangement.
- 5.18 Subject to the Limitation of Liability Section in the General Terms and Conditions of this Agreement, BellSouth shall be liable for the negligent actions of its employees or agents and for any damage caused to <customer_short_name>'s equipment, facilities or Collocation Space while in <customer_short_name>'s Collocation Space and shall indemnify and hold harmless <customer_short_name> from any claim, liability or damages that may result from such entry into <customer_short_name>'s Collocation Space by BellSouth, its agents, contractors or employees.
- 5.19 <customer_short_name>'s Access. <customer_short_name> shall have access to its Collocation Space or Remote Site Collocation Space twenty-four (24) hours a day, seven (7) days a week. Such access will be unescorted, provided <customer_short_name> complies with the requirements set forth in Section 13 of this Attachment. <customer_short_name> agrees to provide the name and social security number, date of birth, or driver's license number of each employee, supplier, or agent of <customer_short_name> or <customer_short_name>'s Guests that will be provided with access keys or cards (Access Keys) prior to the issuance of said Access Keys, using form RF-2906-C, the "CLEC and CLEC Certified Supplier Access Request and

Acknowledgement” form. When distributing access keys or cards, BellSouth shall provide receipt acknowledgement forms, the “Collocation Acknowledgement Sheet” for access cards and the “Key Acknowledgement Form” for keys to <customer_short_name>. These receipt acknowledgement forms must be signed by <customer_short_name> and returned to BellSouth Access Management within fifteen (15) calendar days of <customer_short_name>’s receipt of keys or cards. Failure to return these properly acknowledged forms will result in the holding of subsequent access key or card requests until the proper acknowledgement documents have been received by BellSouth. Access Keys may not be duplicated under any circumstances. <customer_short_name> agrees to be responsible for all Access Keys and for the return of all Access Keys in the possession of <customer_short_name>’s employees, suppliers, Guests, or agents after termination of the employment relationship, the contractual obligation with <customer_short_name> ends, upon the termination of this Attachment, or upon the termination of occupancy of an individual collocation arrangement. The BellSouth Access Customer Advocacy Center (ACAC) emergency access contact numbers will be provided to <customer_short_name> for access related issues.

- 5.19.1 BellSouth will permit one accompanied site visit to <customer_short_name>’s designated collocation arrangement location, after receipt of the BFFO without charge to <customer_short_name>. <customer_short_name> must submit to BellSouth the completed Access Control Request Form for all employees or agents requiring access to the Premises within a minimum of thirty (30) calendar days prior to the date <customer_short_name> desires access to the Collocation Space or Remote Collocation Space. <customer_short_name> may submit a request for its one accompanied site visit to its designated collocation arrangement location at any time subsequent to BellSouth’s receipt of the BFFO. BellSouth shall respond to such request within five (5) business days, and shall use best efforts to facilitate the visit on the date requested by <customer_short_name>. In the event <customer_short_name> desires access to the Collocation Space or Remote Collocation Space after submitting such a request, but prior to the approval of its access request, in addition to the first accompanied free visit, BellSouth shall permit <customer_short_name> to access the Collocation Space or Remote Collocation Space, prior to completing BellSouth’s Training requirements (as set forth in Section 13 of this Attachment), accompanied by a security escort, at <customer_short_name>’s expense. <customer_short_name> must request escorted access to its designated collocation arrangement location at least three (3) business days prior to the date such access is desired. A security escort will be required whenever <customer_short_name> or its approved agent desires access to the entrance manhole.
- 5.19.2 Lost or Stolen Access Keys. The Parties shall immediately notify each other in writing in the case of lost or stolen Access Keys. If it becomes necessary for BellSouth to re-key buildings or enclosures or deactivate a card as a result of a lost Access Key(s) or for failure to return an Access Key(s), <customer_short_name> shall pay for the costs of re-keying or deactivating the card as set forth in the rates in Exhibit B of this Attachment. If it becomes necessary for <<customer-short_name>> to rekey an

enclosure due to BellSouth losing a key or if a key becomes stolen while in the possession of BellSouth, BellSouth will pay <customer_short_name> the applicable costs, as supported by documentation, to rekey an enclosure or replace lost or stolen keys that <customer_short_name> has previously provided to BellSouth.

5.20 Health Related Facilities and Parking. <customer_short_name> authorized personnel will have reasonable access to health related facilities (e.g., bathrooms, eyewash stations, shower stations, drinking water, etc. within the Premises), as well as to available parking.

5.21 Interference or Impairment. For purposes of this Section, the term “significantly degrades” shall be defined as an action that noticeably impairs a service from a user’s perspective.

5.21.1 [Parties Disagree]

[<customer_short_name> Version] Notwithstanding any other provisions of this Attachment, <customer_short_name> shall not use any product or service provided under this Agreement, any other service related thereto or used in combination therewith, or place or use any equipment or facilities in any manner that 1) significantly degrades service provided by BellSouth; 2) endangers or damages the equipment or facilities of BellSouth **or any other telecommunications carrier collocated in the Premises;** 3) **knowingly and unlawfully** compromises the privacy of communications routed through the Premises; or 4) creates an unreasonable risk of injury or death to any individual or to the public. If BellSouth reasonably determines that any equipment or facilities of <customer_short_name> violates the provisions of this paragraph, BellSouth shall provide written notice to <customer_short_name>, which shall direct <customer_short_name> to cure the violation within forty-eight (48) hours of <customer_short_name>’s actual receipt of written notice or, if such cure is not feasible, at a minimum, to commence curative measures within twenty-four (24) hours and to exercise reasonable diligence to complete such measures as soon as possible thereafter. After receipt of the notice, the Parties agree to consult immediately and, if necessary, to conduct an inspection of the arrangement. The Parties will act in good faith and in a cooperative manner to determine or isolate the source of significant degradation. **Any dispute regarding the source of the risk, impairment, interference, or degradation may be resolved pursuant to the dispute resolution provisions set forth I the General Terms and Conditions of this Agreement.**

[BellSouth’s Version] Interference or Impairment. Notwithstanding any other provisions of this Attachment, <customer_short_name> shall not use any product or service provided under this Agreement, any other service related thereto or used in combination therewith, or place or use any equipment or facilities in any manner that 1) significantly degrades, **interferes with or impairs** service provided by BellSouth, **or by any other entity or any person’s use of its telecommunications services;** 2) endangers or damages the equipment, **facilities or any other property of BellSouth or of any other entity or person;** 3) **compromises the privacy of any**

communications routed through the Premises or 4) creates an unreasonable risk of injury or death to any individual or to the public. If BellSouth reasonably determines that any equipment or facilities of <customer_short_name> violates the provisions of this paragraph, BellSouth shall provide written notice to <customer_short_name>, which shall direct <customer_short_name> to cure the violation within forty-eight (48) hours of <customer_short_name>'s actual receipt of written notice or, if such cure is not feasible, at a minimum, to commence curative measures within twenty-four (24) hours and to exercise reasonable diligence to complete such measures as soon as possible thereafter. After receipt of the notice, the Parties agree to consult immediately and, if necessary, to conduct an inspection of the arrangement. The Parties will act in good faith and in a cooperative manner to determine or isolate the source of significant degradation. **Either Party may submit any dispute regarding the source of the risk, impairment, interference, or degradation to the Commission.**

5.21.2 [Parties Disagree]

[<customer_short_name> Version] Except in the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services, if the violation is of a character that poses an immediate and substantial threat of **physical** damage to property or injury or death to any person, then and only in that event, BellSouth may take such action as it deems necessary to eliminate such threat, including, without limitation, the interruption of electrical power to <customer_short_name>'s equipment which BellSouth has determined beyond a reasonable doubt is the cause of such threat. BellSouth must provide notice to <customer_short_name> prior to, or, if made impossible due to the nature of the threat imposed, as soon as possible after the taking of such action and provided that BellSouth, its agents, contractors or employees conduct themselves in strict compliance with this Section and except to the extent that such action by BellSouth fails to comport with the requirements of this paragraph or otherwise constitutes negligence, gross negligence or willful misconduct, BellSouth shall have no liability to <customer_short_name> for any damages arising from such action.

[BellSouth Version] Except in the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services, **if <customer_short_name> fails to commence curative action within twenty-four (24) hours and exercise reasonable diligence to complete such action as soon as possible or** if the violation is of a character that poses an immediate and substantial threat of damage to property or injury or death to any person, **or any other significant degradation, interference or impairment of BellSouth's or another entity's service,** then and only in that event, BellSouth may take such action as it deems necessary to eliminate such threat, including, without limitation, the interruption of electrical power to <customer_short_name>'s equipment which BellSouth has determined beyond a reasonable doubt is the cause of such threat. BellSouth will provide notice to <customer_short_name> prior to, or, if made

- impossible due to the nature of the threat imposed, as soon as possible after the taking of such action and provided that BellSouth, its agents, contractors or employees conduct themselves in strict compliance with this Section and except to the extent that such action by BellSouth fails to comport with the requirements of this paragraph or otherwise constitutes negligence, gross negligence or willful misconduct, BellSouth shall have no liability to <customer_short_name> for any damages arising from such action.
- 5.21.3 In the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services and <customer_short_name> fails to take curative action within forty-eight (48) hours, then BellSouth will establish before the Commission that the technology deployment is causing the significant degradation. Any claims of network harm presented to <customer_short_name> or, if subsequently necessary, the Commission must be supported by BellSouth with specific and verifiable information. When BellSouth demonstrates that a certain technology deployed by <customer_short_name> is significantly degrading the performance of other advanced services or traditional voice band services, <customer_short_name> shall discontinue deployment of that technology and migrate its customers to technologies that will not significantly degrade the performance of other such services. Where the only degraded service itself is a known disturber, and the newly deployed technology satisfies at least one of the criteria for a presumption that it is acceptable for deployment under applicable FCC and Commission rules and orders, the degraded service shall not prevail against the newly deployed technology.
- 5.22 Central Office Personalty and its Removal. Subject to requirements of this Attachment, <customer_short_name> may place or install in or on the Central Office Collocation Space such facilities and equipment, including storage for and spare equipment, as it deems desirable for the conduct of business, provided that such equipment is telecommunications equipment, or is desirable for the maintenance and operation of the collocated telecommunications equipment, and does not violate floor loading requirements, imposes or could impose or contains or could contain environmental conditions or hazards. Personal property, facilities and equipment placed by <customer_short_name> in the Collocation Space shall not become a part of the Collocation Space, even if nailed, screwed or otherwise fastened to the Collocation Space, but shall retain its status as personalty and may be removed by <customer_short_name> at any time. Any damage caused to the Collocation Space by <customer_short_name>'s employees, suppliers, agents or representatives during the removal of such property shall be promptly repaired by <customer_short_name>'s expense.
- 5.23 Alterations. Under no condition shall <customer_short_name> or any person acting on behalf of <customer_short_name> make any rearrangement, modification, augment, improvement, addition, and/or other alteration which could affect in any way space, power, HVAC, and/or safety considerations to the Collocation Space or the Premises, hereinafter referred to individually or collectively as "Alterations", without the express

|

- written consent of BellSouth, which shall not be unreasonably withheld. The cost of any such Alteration shall be paid by <customer_short_name>. Any such Alteration shall require a Subsequent Application and will result in the assessment of a Remote Site Application Fee, a Subsequent Application Fee, an Administrative Only Application Fee or an Initial Application Fee as set forth in Section 6.2.1 below, and, which will be billed by BellSouth on the date that BellSouth provides <customer_short_name> with an Application Response.
- 5.24 Janitorial Service. <customer_short_name> shall be responsible for the general upkeep of its Collocation Space. <customer_short_name> shall arrange directly with a BellSouth Certified Supplier for janitorial services applicable to Caged Collocation Space. BellSouth shall provide a list of such suppliers on a site-specific basis, upon request.
6. **Ordering and Preparation of Central Office and Remote Site Collocation Space**
- 6.1 Initial Application. For <customer_short_name> or <customer_short_name>'s Guest(s) initial equipment placement, <customer_short_name> shall submit to BellSouth a Physical Expanded Interconnection Application Document (Initial Application). The Initial Application is considered Bona Fide when it is complete and accurate, meaning that all of the required fields on the application are completed with the appropriate type of information
- 6.1.1 Initial Application Fee. An Application Fee, as set forth in Exhibit B, will apply to each Initial Application submitted by <customer_short_name>, and will be billed by BellSouth on the date that BellSouth provides <customer_short_name> with an Application Response.
- 6.2 Subsequent Application. In the event <customer_short_name> or <customer_short_name>'s Guest(s) desires to modify the Collocation Space after a BFFO, <customer_short_name> shall complete an application that contains all of the detailed information associated with an Alteration to the Collocation Space, as defined in Section 5.23 of this Attachment ("Subsequent Application"). The Subsequent Application is considered Bona Fide when it is complete and accurate, meaning that all of the required fields on the Subsequent Application are completed with the appropriate type of information associated with the Alteration. BellSouth shall determine what modifications, if any, to the Premises are necessary to accommodate the change requested by <customer_short_name> in the application. Such modifications to the Premises may include, but are not limited to: floor loading changes, changes necessary to meet HVAC requirements, changes to power plant requirements, equipment additions, etc.
- 6.2.1 Subsequent Application Fee. The application fee paid by <customer_short_name> for its request for an Alteration shall be dependent upon the level of assessment needed for the Alteration requested. Where the Subsequent Application does not require assessment for provisioning or construction work but requires administrative costs by

- BellSouth, an Administrative Only Application Fee will be required as set forth in Exhibit B. This Administrative Only Application Fee will be applicable in instances such as Transfer of Ownership of the Collocation Space, Removal of Equipment from the Collocation Space, where the removal requires no physical work to be done by BellSouth, modification to an application prior to BFFO and V-to-P Conversion (In Place). The fee for a Subsequent Application where the Alteration requested has limited effect (e.g., requires limited assessment but no capital expenditure by BellSouth as sufficient cable support structure, HVAC, power and terminations are available) shall be the Subsequent Application Fee as set forth in Exhibit B. If the modification requires capital expenditure, an Initial Application Fee shall apply. This nonrecurring fee will be billed on the date that BellSouth provides <customer_short_name> with an Application Response.
- 6.3 Remote Site Application. When <customer_short_name> or <customer_short_name>'s Guest(s) desires to install a bay/rack in a Remote Site Location, <<customer-short_name>> shall submit to BellSouth a Physical Expanded Interconnection Application Document (Remote Site Application). The Remote Site Application is Bona Fide when it is completed and accurate, meaning that all required fields on the Remote Site Application are completed with the appropriate type of information. An application fee, as set forth in Exhibit B, will apply which will be billed on the date that BellSouth provides an Application Response. The placement of an additional bay/rack at a later date will be treated in the same fashion and a Remote Site Application will be required. The installation of additional shelves/ equipment, subject to the restrictions contained in Section 3.8 above, within an existing bay or rack does not require a Remote Site Application.
- 6.3.1 Availability of Space. Upon submission of an application, BellSouth will permit <customer_short_name> to physically collocate in any available full bay/rack of space, pursuant to the terms of this Attachment, at any BellSouth Remote Site Location, unless BellSouth has determined that there is no full bay/rack of space available due to space limitations after BellSouth has conducted a review of all space within the Remote Site Location or that collocation at the Remote Site Location is not practical for technical reasons. In the event space is not immediately available at a Remote Site Location, BellSouth reserves the right to make additional space available, in which case the conditions in Section 7 below shall apply, or BellSouth may elect to deny space in accordance with this Section in which case virtual or adjacent collocation options may be available. If the amount of space requested is not available, BellSouth will notify <customer_short_name> of the amount that is available.
- 6.4 Space Preferences. If <customer_short_name> has previously requested and received a Space Availability Report for the Premises, <customer_short_name> may submit up to three (3) space preferences on its application by identifying the specific space identification numbers referenced on the Space Availability Report for the space it is requesting. In the event BellSouth cannot accommodate the <customer_short_name>'s preference(s), <customer_short_name> may accept the space allocated by BellSouth or cancel its application, (without incurring an

application fee), and submit another application requesting additional space preferences for the same central office. This application will be treated as a new application and an application fee will be billed by BellSouth on the date that BellSouth provides <customer_short_name> with an Application Response.

6.5 Space Availability Notification.

6.5.1 Unless otherwise specified, BellSouth will respond to an application within ten (10) calendar days as to whether space is available or not available within a requested Premises. BellSouth's electronic application system will indicate when the application is Bona Fide. If the application cannot be Bona Fide, BellSouth will describe the items necessary to cause the application to become Bona Fide. If the amount of space requested is not available, BellSouth will notify <customer_short_name> of the amount of space that is available and no application fee will apply. When BellSouth's response includes an amount of space less than that requested by <customer_short_name> or space that is configured differently, no application fee will apply. If <customer_short_name> decides to accept the available space, <customer_short_name> must resubmit its application to reflect the actual space available, including the configuration of the space. When <customer_short_name> resubmits its application, BellSouth will bill <customer_short_name> the appropriate application fee.

6.5.2 BellSouth will respond to a Florida and Tennessee application within fifteen (15) calendar days as to whether space is available or not available within a Premises. BellSouth's electronic application system will indicate when the application is Bona Fide. If the application cannot be Bona Fide, BellSouth will describe the items necessary to cause the application to become Bona Fide. If the amount of space requested is not available, BellSouth will notify <customer_short_name> of the amount of space that is available or space that may be configured differently and no application fee will apply. If <customer_short_name> decides to accept the available space, <customer_short_name> must amend its application to reflect the actual space available, including the configuration of the space, prior to submitting a BFFO.

6.5.3 Denial of Application. If BellSouth notifies <customer_short_name> that no space is available ("Denial of Application"), BellSouth will not assess an application fee to <customer_short_name>. After providing written notice to <customer_short_name> that BellSouth has no available space in the requested Premises, BellSouth will allow <customer_short_name>, upon request, to tour the entire Premises within ten (10) calendar days of such Denial of Application, or as otherwise agreed to by the Parties. In order to schedule this tour, the request for the tour of the Premises must be received by BellSouth at least five (5) calendar days prior to the tour date.

6.5.4 BellSouth's written notice of denial shall provide <customer_short_name> with information relevant to the denial of its request for collocation space, and give some detail as to why the space was denied.

- 6.5.5 Expedited Removal of Equipment in a Space Exhaust Scenario. BellSouth shall remove obsolete unused equipment from its Premises prior to denying a request for collocation on the grounds of space limitations, unless BellSouth proves to the Commission that collocation at the point is not technically feasible.
- 6.5.6 BellSouth will provide virtual collocation in accordance with applicable FCC and Commission rules and orders.
- 6.5.7 Filing of Petition for Waiver. Upon Denial of Application, BellSouth will timely file a petition with the Commission pursuant to 47 U.S.C. § 251(c)(6). BellSouth shall provide to the Commission any information required or requested by that Commission. Such information shall include which space, if any BellSouth or any of BellSouth's affiliates have reserved for future use and a detailed description of the specific future uses for which the space has been reserved. Subject to an appropriate nondisclosure agreement or provision, BellSouth shall permit <customer_short_name> to inspect any floor plans or diagrams that BellSouth provides to the Commission.
- 6.6 Waiting List. On a first-come, first-served basis, governed by the date of receipt of an application or Letter of Intent, BellSouth will maintain a waiting list of requesting carriers who have either received a Denial of Application or, where it is publicly known that the Premises is out of space, have submitted a Letter of Intent to collocate in that Premises. BellSouth will notify the requesting carriers on the waiting list by mail when space becomes available, according to the position of each requesting carrier on said waiting list.
- 6.6.1 In Florida, on a first come, first served basis, governed by the date of the receipt of an application or Letter of Intent, BellSouth will maintain a waiting list of requesting carriers who have either received a Denial of Application or, where it is publicly known that the Premises is out of space, have submitted a Letter of Intent to collocate in that Premises. Sixty (60) calendar days prior to space becoming available, if known, BellSouth will notify the Commission and the telecommunications carriers on the waiting list by mail when space becomes available according to the position of each telecommunications carrier on said waiting list. If BellSouth does not know sixty (60) calendar days in advance of when space will become available, BellSouth will notify the Commission and the telecommunications carriers on the waiting list within two (2) business days of the determination that space is available. A telecommunications carrier that, upon denial of physical collocation, requests virtual collocation shall be automatically placed on the waiting list.
- 6.7 When space becomes available, <customer_short_name> must submit an updated, complete, and correct application to BellSouth within thirty (30) calendar days of notification by BellSouth that space will be available in the Premises previously out of space. If <customer_short_name> has originally requested caged Collocation Space and cageless Collocation Space becomes available, <customer_short_name> may refuse such space and notify BellSouth in writing within the thirty (30) calendar day timeframe that <customer_short_name> wants to maintain its place on the waiting list, without accepting the available cageless Collocation Space. <customer_short_name>

- may accept an amount of space less than its originally requested space by submitting an application as set forth above, and upon request, may maintain its position on the waiting list for the remaining space that was initially requested. If <customer_short_name> does not submit an application or notify BellSouth in writing as described above, BellSouth will offer the space to the next telecommunications carrier on the waiting list and remove <customer_short_name> from the waiting list. Upon request, BellSouth will advise <customer_short_name> as to its position on the waiting list.
- 6.8 Public Notification. BellSouth will maintain on its Interconnection Services website a notification document that will indicate all Premises that are without available space. BellSouth shall update such document within ten (10) calendar days of the date that BellSouth becomes aware that insufficient space is available to accommodate physical collocation. BellSouth will also post a document on its Interconnection Services website that contains a general notice when space has become available in a Premises previously on the space exhaust list.
- 6.9 Application Response.
- 6.9.1 In Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, and South Carolina, when space has been determined to be available for caged or cageless arrangements, BellSouth will provide an Application Response within twenty (20) calendar days of receipt of a Bona Fide application for physical collocation and ten (10) calendar days for virtual collocation. The Central Office Application Response will include sufficient information to enable <customer_short_name> to place a Firm Order, which, at a minimum, will consist of the configuration of the space, the Cable Installation Fee, Cable Records Fee, and any other applicable space preparation fees, as described in Section 8 below.
- 6.9.1.1 BellSouth will provide the Remote Site Application Response in Alabama, Georgia, Kentucky, Mississippi, North Carolina, and South Carolina, when space has been determined to be available, within twenty (20) calendar days of receipt of a Bona Fide application. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below.
- 6.9.1.2 BellSouth will provide the Remote Site Application Response in Louisiana, when space has been determined to be available, within thirty (30) calendar days for one (1) to ten (10) applications; thirty-five (35) calendar days for eleven (11) to twenty (20) applications; and for requests of more than twenty (20) applications, the Application Response interval will be increased by five (5) calendar days for every five (5) applications received within five (5) business days. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below.

- 6.9.2 In Florida and Tennessee, within fifteen (15) calendar days of receipt of a Bona Fide application, when space has been determined to be available or when a lesser amount of space than that requested is available, then with respect to the space available, BellSouth will provide an Application Response including sufficient information to enable <customer_short_name> to place a Firm Order. The Central Office Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below. When <customer_short_name> submits ten (10) or more applications within ten (10) calendar days, the initial fifteen (15) calendar day response interval will increase by ten (10) calendar days for every additional ten (10) applications or fraction thereof.
- 6.9.2.1 BellSouth will provide the Remote Site Application Response in Florida, within fifteen (15) calendar days of receipt of a Bona Fide application, when space has been determined to be available or when a lesser amount of space than that requested is available, then with respect to the space available, BellSouth will provide an Application Response including sufficient information to enable <customer_short_name> to place a Firm Order. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below. When <customer_short_name> submits ten (10) or more applications within ten (10) calendar days, the initial fifteen (15) calendar day response period will increase by ten (10) calendar days for every additional ten (10) applications or fraction thereof.
- 6.9.2.2 BellSouth will provide the Remote Site Application Response in Tennessee, when space has been determined to be available, within twenty (20) calendar days of receipt of a Bona Fide application. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below.
- 6.10 Application Modifications.
- 6.10.1 If a modification or revision is made to any information in the Bona Fide Application prior to a BFFO, with the exception of modifications to Customer Information, Contact Information or Billing Contact Information, at the request of <customer_short_name>, or necessitated by technical considerations agreed to by both Parties, the application shall be considered a new application and handled as a new application with respect to the response and provisioning intervals. BellSouth will charge <customer_short_name> the appropriate application fee associated with the level of assessment performed by BellSouth. If the modification requires no labor or capital expenditure by BellSouth, but BellSouth must perform an assessment of the application to evaluate whether or not BellSouth would be required to perform necessary infrastructure or provisioning activities, then an Administrative Only Application Fee shall apply. The fee for an application modification where the modification requested has limited effect (e.g., requires labor expenditure but no capital expenditure by BellSouth and where sufficient cable support structure, HVAC,

power and terminations are available) shall be the Subsequent Application Fee as set forth in Exhibit B. A modification involving a capital expenditure by BellSouth shall require <customer_short_name> to submit the application with an Initial Application Fee. This nonrecurring fee will be billed by BellSouth on the date that BellSouth provides <customer_short_name> with an Application Response.

6.11 Bona Fide Firm Order.

6.11.1 <customer_short_name>> shall indicate its intent to proceed with its request for collocation space in a BellSouth Premises by submitting a Bona Fide Firm Order to BellSouth. The BFFO must be received by BellSouth no later than thirty (30) calendar days after receipt of BellSouth's Application Response to <customer_short_name>'s Bona Fide Application or <customer_short_name>'s application will expire.

6.11.2 BellSouth will establish a firm order date based upon the date BellSouth is in receipt of <customer_short_name>'s BFFO. BellSouth will acknowledge the receipt of <customer_short_name>'s BFFO within seven (7) calendar days of receipt, so that <customer_short_name> will have positive confirmation that its BFFO has been received. BellSouth's response to a BFFO will include a Firm Order Confirmation, which contains the firm order date. No revisions can be made to a BFFO.

7. Construction and Provisioning

7.1 Construction and Provisioning Intervals.

7.1.1 In Florida and Tennessee, BellSouth will complete construction for physical and Remote Site collocation arrangements as soon as possible within a maximum of ninety (90) calendar days from receipt of a BFFO or as agreed to by the Parties. For Alterations requested to the Collocation Space after initial space completion, BellSouth will complete construction for physical and remote site collocation arrangements as soon as possible within a maximum of forty-five (45) calendar days from receipt of a BFFO or as agreed to by the Parties if no additional space requested. If BellSouth does not believe that construction for physical and remote site collocation will be completed within the relevant timeframe and BellSouth and <customer_short_name> cannot agree upon a completion date, within forty-five (45) calendar days of receipt of the BFFO for an initial request, and within thirty (30) calendar days of receipt of the BFFO for an Alteration, BellSouth may seek an extension from the Commission. For virtual collocation arrangements in Florida and Tennessee, BellSouth will complete construction for initial and Alterations requested to the virtual Collocation Space after initial space completion as soon as possible within a maximum of sixty (60) calendar days.

7.1.2 In Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, and South Carolina, BellSouth will complete construction for caged collocation arrangements

under ordinary conditions as soon as possible within a maximum of ninety (90) calendar days from receipt of a BFFO or as agreed to by the Parties. BellSouth will complete construction for cageless and Remote Site collocation arrangements under ordinary conditions as soon as possible within a maximum of sixty (60) calendar days from receipt of a BFFO and ninety (90) calendar days from receipt of a BFFO for extraordinary conditions, or as agreed to by the Parties. BellSouth will complete construction for virtual collocation arrangements under ordinary conditions as soon as possible within a maximum of fifty (50) calendar days under ordinary conditions from receipt of a BFFO and seventy five (75) calendar days from receipt of a BFFO for extraordinary conditions, or as agreed to by the Parties. Ordinary conditions are defined as space available with only minor changes to support systems required such as, but not limited to, HVAC, cabling and the power plant. Extraordinary conditions shall include, but not be limited to, major BellSouth equipment rearrangements or additions; power plant additions or upgrades; major mechanical additions or upgrades; a major upgrade for ADA compliance; environmental hazard or hazardous materials abatement; and arrangements for which equipment shipping intervals are extraordinary in length. The Parties may mutually agree to renegotiate an alternative provisioning interval or BellSouth may seek a waiver from this interval from the Commission.

- 7.1.3 Records Only Change. When <customer_short_name> adds equipment within initial demand parameters that requires no additional space preparation work on the part of BellSouth, then no additional charges or additional intervals will be imposed by BellSouth.
- 7.1.4 Central Office Augments. In the states of Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, and South Carolina, BellSouth will provide the reduced intervals outlined below to <customer_short_name>, when <customer_short_name> requests a Central Office augment that is identified in Sections 7.1.4.1, 7.1.4.2, 7.1.4.3, 7.1.4.4 and 7.1.4.5 (“Augment”) after the Space Ready Date for existing physical collocation space. The cost of any such Augment shall be paid by <customer_short_name>. Unless otherwise set forth in Section 7.1.4.10 below, any such Augment application will require a Subsequent Application.
- 7.1.4.1 Simple Augments will be completed within twenty (20) calendar days after receipt of the BFFO for an:
- Extension of Existing AC Circuit Capacity within Arrangement Where Sufficient Circuit Capacity is Available
 - Fuse Change and/or Increase or Decrease -48V DC Power from Existing ILEC BDFB
- 7.1.4.2 Minor Augments will be completed within forty-five (45) calendar days after receipt of the BFFO for:
- 168 DS1s Terminations at the ILEC Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)

- 96 DS3s Terminations at the ILEC Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)
- 99 Fiber Terminations at the ILEC Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)
- Maximum of 2000 Service Ready DS0 Terminations at the ILEC Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)

7.1.4.3 Intermediate Augments will be completed within sixty (60) calendar days after receipt of the BFFO for:

- 168 DS1s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure as Required)
- 96 DS3s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure as Required)
- 99 Fiber Terminations (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure as Required)
- 2000 DS0s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure as Required)
- Install Cable Racking or Other Support Structures as Required to Support Co-Carrier Cross Connects (Adequate Floor or Ceiling Structural Capacity Exists and Support/Protection Structure for Fiber Patch Cord is Excluded)

7.1.4.4 Major Augments –Physical Collocation will be completed within ninety (90) calendar days after BFFO and includes all requests for additional physical collocation space (caged or cageless).

7.1.4.5 Major Augments – Virtual Collocation will be completed within seventy-five (75) calendar days after BFFO and includes all requests for additional virtual collocation space

7.1.4.6 If <customer_short_name> submits an Augment application request that includes two Augment items from the same category in Sections 7.1.4.1, 7.1.4.2, and 7.1.4.3 above, the Augment interval associated with the next highest augment category will apply (e.g., if two items from the minor Augment category are requested on the same request, then an interval of sixty (60) calendar days from the receipt of the BFFO would apply, which is the interval associated with the intermediate category).

7.1.4.7 If <customer_short_name> submits an Augment application request that includes three Augment items from the same category in Sections 7.1.4.1, 7.1.4.2, and 7.1.4.3 above, the major Augment interval of ninety (90) calendar days from the receipt of the BFFO would apply (e.g., if three items from the simple augment category are requested on the same request for a physical collocation arrangement, then an interval of ninety (90) calendar days from the receipt of the BFFO would apply, which is the major physical augment interval; likewise if three items from the simple Augment category are requested on the same request for a virtual collocation arrangement, then an interval of seventy-five (75) calendar days from the receipt of the BFFO would apply, which is the major virtual Augment interval).

- 7.1.4.8 If <customer_short_name> submits an Augment application request that includes one Augment item from two separate categories in Sections 7.1.4.1, 7.1.4.2 and 7.1.4.3 above, the Augment interval associated with the higher augment category will apply (e.g., if an item from the minor augment category and an item from the intermediate Augment category are requested on the same request, then an interval of sixty (60) calendar days from the receipt of the BFFO would apply, which is the interval associated with the intermediate Augment category).
- 7.1.4.9 All Augments not expressly included in the Simple, Minor, Intermediate or Major categories as outlined above will be placed into the appropriate category as negotiated by <customer_short_name> and BellSouth. If <customer_short_name> and BellSouth are unable to determine the appropriate category through negotiation, then the appropriate major augment category identified in Sections 7.1.4.4 and 7.1.4.5 above would apply based on whether the Augment request is for <customer_short_name>'s physical or virtual collocation arrangement.
- 7.1.4.10 Individual application fees associated with simple, minor and intermediate Augment applications are contained in Exhibit B. The appropriate application fee will be assessed to <customer_short_name> at the time BellSouth provides <customer_short_name> with the Application Response. If <customer_short_name> requests multiple items from different Augment categories BellSouth will bill <customer_short_name> the Augment Application Cost, as identified in Exhibit B of this Attachment, associated with the higher Augment category only. <customer_short_name> will be assessed a Subsequent Application Fee for all Major Augment applications (Major Augments are defined above in Sections 7.1.4.4 and 7.1.4.5 above). The Subsequent Application Fee is also reflected in Exhibit B of this Attachment.
- 7.2 Joint Planning. Unless otherwise agreed to by the Parties, a joint planning meeting or other method of joint planning between BellSouth and <customer_short_name> will commence within a maximum of twenty (20) calendar days from BellSouth's receipt of a BFFO. At such meeting, the Parties will agree to the preliminary design of the Collocation Space and the equipment configuration requirements as reflected in the Application and affirmed in the BFFO. <customer_short_name> Upon mutual agreement and within a mutually agreed upon time frame, the Parties will exchange any additional information requested (including, but not limited to cable type and cable termination specifications, naming convention and requirements, diagrams or drawings depicting the exact path of entrance facilities from the interconnection point to the Collocation Space, power cabling connectivity, feeder and fuse specifications and requirements, BellSouth contacts and escalation procedures, and identification of demarcation points) at the Joint Planning Meeting.
- 7.3 Permits. Each Party or its agent(s) will diligently pursue filing for the permits required for the scope of work to be performed by that Party or its agent(s) within ten (10) calendar days of the completion of the finalized construction design and specifications.

- 7.4 Acceptance Walkthrough. <customer_short_name> will schedule and complete an acceptance walkthrough of each Collocation Space with BellSouth within fifteen (15) calendar days of BellSouth's notification to <customer_short_name> that the Collocation Space is ready for occupancy. In the event <customer_short_name> fails to complete an acceptance walkthrough within this fifteen (15) day interval, the Collocation Space shall be deemed accepted by <customer_short_name> provided that BellSouth has complied with all space preparation, provisions of <customer_short_name>'s BFFO, and that all required of BellSouth is completed on the Space Ready Date. BellSouth will correct any deviations to <customer_short_name>'s original or jointly amended design and/or specification requirements within seven (7) calendar days after the walkthrough, unless the Parties jointly agree upon a different timeframe. At the end of the acceptance walkthrough or after any deviations are corrected, <customer_short_name> will execute a Space Acceptance Form indicating its acceptance of the Collocation Space.
- 7.5 Central Office Circuit Facility Assignments (CFAs). BellSouth will provide CFAs to <customer_short_name> as soon as possible and no later than thirty (30) calendar days after BellSouth's receipt of a Bona Fide Firm Order, except as set forth in Section 7.5.1 following. The ACTL will be provided to <customer_short_name> no later than with the issuance of the CFA.
- 7.5.1 To provide CFAs to <customer_short_name> prior to the Provisioning Interval for those Premises in which <customer_short_name> has a physical collocation arrangement with a POT bay provided by <customer_short_name> or a virtual collocation arrangement, <customer_short_name> must provide BellSouth with the following information:
- 7.5.1.1 for a physical collocation arrangement with a <customer_short_name>-provided POT bay - a complete layout of the POT panels (equipment inventory update (EIU) form) showing locations, speeds, etc.
- 7.5.1.2 for a virtual collocation arrangement - a complete layout of <customer_short_name>'s equipment (equipment inventory update (EIU) form), including the locations of the low speed ports and the specific frame terminations to which the equipment will be wired by <customer_short_name>'s BellSouth Certified Supplier.
- 7.5.1.3 <customer_short_name> may submit an EIU form at any time after the twentieth (20th) calendar day after the BFFO. CFAs will be provided within ten (10) calendar days of receipt of the EIU form.
- 7.5.2 BellSouth will bill <customer_short_name> a nonrecurring charge, as set forth in Exhibit B, each time <customer_short_name> requests a resend of its CFAs for any reason other than a BellSouth error in the CFAs initially provided to <customer_short_name>.
- 7.5.3 For a Remote Site CFAs are not used. Distribution lines will be accessed by <customer_short_name> provisioning a copper cable through a conduit from the

Remote Site collocation space to the feeder distribution interface (FDI) of sufficient length for splicing. BellSouth personnel will splice <customer_short_name>'s cable to a group/bundle of the distribution cable at the FDI. Groups/Bundles will be provided in 8-pair increments. In order to establish the cable/pair range <customer_short_name> must submit a Remote Site Splitter Ordering Document (RSOD) which can be found in the Remote Site High Frequency Spectrum (RS HFS) CLEC Information Package located on BellSouth's web site at http://interconnection.bellsouth.com/guides/unedocs/rs_hfs.pdf. Once the cable/pair range is established <customer_short_name> can then submit LSRs for individual line activations.

- 7.6 Use of BellSouth Certified Supplier. <customer_short_name> shall select a supplier which has been approved as a BellSouth Certified Supplier to perform all construction, engineering as specified in TR 73503, installation and removal work. <customer_short_name>, if a BellSouth Certified Supplier, or <customer_short_name>'s BellSouth Certified Supplier must follow and comply with all of the reasonable and nondiscriminatory requirements, outlined in BellSouth TR 73503, TR 73519, TR 73572, and TR 73564. In some cases, <customer_short_name> must use a separate BellSouth Certified Supplier for those work activities associated with transmission equipment, switching equipment and power equipment, unless the BellSouth Certified Supplier has met the requirements for all of the required work activities. BellSouth shall provide <customer_short_name> with a list of BellSouth Certified Suppliers, upon request. <customer_short_name>, if a BellSouth Certified Supplier, or its BellSouth Certified Supplier(s) shall be responsible for installing <customer_short_name>'s equipment and associated components, extending power cabling to the BellSouth power distribution frame, performing operational tests after installation is complete, and notifying BellSouth's equipment engineers and <customer_short_name> upon successful completion of installation and all associated work.. In cases where a BellSouth Certified Supplier is used, the BellSouth Certified Supplier shall bill <customer_short_name> directly for all work performed for <customer_short_name> pursuant to this Attachment. BellSouth shall have no liability for, nor responsibility to pay, such charges imposed by <customer_short_name>'s BellSouth Certified Supplier. BellSouth shall make available its supplier certification program to <customer_short_name> or any supplier proposed by <customer_short_name> and will not unreasonably withhold certification.
- 7.7 Alarm and Monitoring. BellSouth shall place environmental alarms in the Premises for the protection of BellSouth equipment and facilities. <customer_short_name> shall be responsible for placement, monitoring and removal of environmental and equipment alarms used to service <customer_short_name>'s Collocation Space. Upon request, BellSouth will provide <customer_short_name> with an applicable tariffed service(s) to facilitate remote monitoring of collocated equipment by <customer_short_name>. Both Parties shall use best efforts to notify the other of any verified environmental condition (e.g., temperature extremes or excess humidity) known to that Party.
- 7.8 Virtual to Physical Collocation Relocation. <customer_short_name> may relocate its existing virtual collocation arrangement(s), according to the standard intervals
