RE: Petition for Expedited Review of Growth Code Denial by the Number Pooling Administrator
Relating to Regional Medical Center at Memphis.
Docket No. 04-00232

Dear Chairman Miller:

Please find enclosed for filing, an original and 14 copies of Time Warner Telecom of the Mid-South, LLC's Petition for Expedited Review of Central Office Code Denial accompanied by the \$25.00 filing fee. Please date stamp one copy for my records.

Thank you for your assistance regarding this matter. If you have any questions, or if I may be of further assistance, please do not hesitate to contact me.

Very truly yours,

FARRIS MATHEWS BRANAN

**BEFORE THE TENNESSEE REGULATORY AUTHORITY
NASHVILLE, TENNESSEE**

**IN RE: PETITION FOR EXPEDITED)
REVIEW OF GROWTH CODE DENIAL))
BY THE NUMBER POOLING)
ADMINISTRATOR RELATING TO)
WILLIAMSON MEDICAL CENTER)**

Docket No. _____

**PETITION OF TIME WARNER TELECOM OF THE MIDSOUTH, LLC
FOR EXPETED REVIEW OF CENTRAL OFFICE CODE DENIAL**

Time Warner Telecom of the Mid-South, LLC ("TWTC"), pursuant to rules adopted by the Federal Communications Commission for challenging determinations of the Number Pooling Administrator ("NeuStar"), petitions the Tennessee Regulatory Authority (the "Authority") for an expedited review of NeuStar's denial of TWTC's application for use of central office code numbering resources in the 901 area code. In support of its petition, TWTC states as follows:

1. TWTC is a competitive, local exchange carrier providing telecommunications services in Tennessee under the jurisdiction of the Authority.
2. NeuStar is an independent, non-governmental entity that is responsible for administering and managing the North American Numbering Plan ("NANP"). See C.F.R. § 52.13(a) and (b).
3. On March 31, 2000, the Federal Communications Commission issued a Report and Order and Further Notice of Proposed Rule Making relating to numbering resource optimization ("FCC 00-104" or the "March Order"). On December 29, 2000,

the FCC issued its Second Report and Order, Order on Reconsideration in CC Docket No. 96-98 and CC Docket No. 99-200, and Second Further Notice of Proposed Rulemaking in CC Docket No. 99-200 ("FCC 00-249" or the "December Order"). These FCC orders addressed issues and strategies relating to the efficient use of numbering resources.

4. In FCC 00-104 and FCC 00-429, the FCC announced rules and sought comments in an effort to implement uniform standards governing requests for telephone numbering resources in order to increase efficiency in the use of existing numbers under the NANP.

5. Among other things, FCC 00-104 adopted a revised standard for assessing a carrier's need for numbering resources by requiring carriers to report rate center based utilization data to NeuStar. The FCC further required that to qualify for access to new numbering resources, applicants must establish that existing inventory within the applicant's rate center will be exhausted within six months of the application.

6. In addition to the months-to-exhaust ("MTE") requirement described above, the FCC's rules also require carriers to meet a rate center utilization threshold of 60 percent to receive additional numbering resources in a given rate center. FCC 00-249 at ¶22; FCC 01-362 ¶¶50-52. The utilization threshold increases by five percent per year until it reaches a maximum 75 percent. Based on the FCC's orders, carriers must meet both the six-month MTE requirement and the utilization threshold on a rate center basis to obtain additional number resources. *Id.* ¶29.

7. On or about July 28, 2004, TWTC submitted a Central Office Code (NXX) Assignment Request for the assignment of NXX resources necessary to meet the

needs of its customer, the Regional Medical Center at Memphis. This application is attached hereto as Exhibit A.

8. The assignment request made on behalf of the Regional Medical Center at Memphis was for 3,000 sequential telephone numbers in the 901 area code. TWTC does not presently have a block of 3,000 sequential numbers as requested by the customer, Regional Medical Center at Memphis has an immediate need for 3,000 consecutive numbers, preferably the 901- 515-0, 1 & 3 blocks, with the NXX ending in "5". The Regional Medical Center cited growth and expansion as its basis for this request.

9. TWTC completed the applications in accordance with NeuStar's Central Office Code (NXX) Assignment Guidelines and completed the necessary Months to Exhaust Certification Worksheet required by NeuStar. Based on the Memphis Rate Center data that was used to calculate TWTC's MTE, TWTC's numbering resources would exhaust in approximately 67.5 months.

10. TWTC is currently operating at a 68.161% utilization rate. Despite this current level of utilization, TWTC is unable to provide the requested 3,000 sequential numbers through the switch that serves the Regional Medical Center within the Memphis Rate Center.

11. On or about July 28 , 2004, TWTC's request was denied on the grounds that TWTC had not met the utilization threshold required in the Central Office (NXX) Guidelines. This decision is attached hereto as Exhibit B.

12. As a result of the denial of TWTC's request for additional numbering resources, TWTC is unable to provide the telecommunications services requested by its customer in Tennessee.

13. Under previous procedures used by the North American Numbering Plan Administration ("NANPA"), waivers or exceptions were typically granted in any case where customer hardships could be demonstrated or where the service provider's inventory did not have a block of sequential numbers large enough to meet the customer's specific request. Under existing procedures, however, NeuStar looks at the MTE criteria and utilization threshold for the rate center and allows no exceptions. By refusing to consider the circumstances of each case, TWTC procedure may result in decisions contrary to the public interest and decisions that do not necessarily preserve the efficient use of telephone numbers or postpone dates of exhaust.

14. TWTC's inability to provide this large business customer with the requested numbers within the same NXX prevents TWTC from providing the quality of service this customer desires and expects. (Correspondence from the Regional Medical Center at Memphis is attached as Exhibit "C").

15. Both the FCC Order and NeuStar's Central Office Code (NXX) Guidelines provide that state regulatory authorities have the power and authority to review NeuStar's decision to deny a request for numbering resources. See FCC 01-362, Appendix A, Final Rules, § 15.15 (g)(4).

16. This Authority has previously received similar requests from BellSouth Telecommunications, Inc. in which BellSouth asked the Authority to overrule a decision of NANPA and NeuStar. See Docket 03-00482, Docket 03-00591 and Docket 04-00160. In those cases, the Authority granted BellSouth's request. State commissioners in North Carolina, Florida, and Louisiana have also granted such requests from BellSouth and from USLEC.

17. In reviewing previous petitions of this type, the Authority's staff has requested that Petitioner provide additional information concerning the Petitioner's number utilization for the specific central office involved in the request. This information for the Memphis Central Office is attached hereto as Exhibit D.

18. TWTC seeks the Authority's review of NeuStar's decision to withhold numbering resources from it on the grounds that the CO Code Administration decision (1) violates the rules and orders of the FCC which grant carriers access to numbering resources to meet specific customer demands upon a sufficient showing of need and (2) interferes with TWTC's ability to serve its customers within Tennessee. As the FCC has stated, "Under no circumstances should consumers be precluded from receiving telecommunications services of their choice from providers of their choice for want of numbering resources" FCC 00-429 at ¶ 61. By refusing to grant numbering resources sufficient to meet the Regional Medical Center's needs, the decision is preventing the customer from obtaining the service of its choice from its carrier of choice, TWTC.

CONCLUSION

For the reasons above, TWTC respectfully requests that the Authority to direct the NeuStar to provide the requested numbers to TWTC to enable TWTC to meet the specific requirements of the Regional Medical Center at Memphis in order that the Regional Medical Center may receive the service of its choice from the provider of its choice to meet its telecommunications needs.

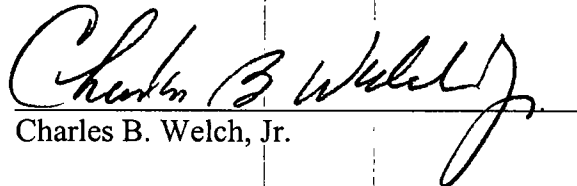

WHEREFORE, BellSouth requests:

1. The Authority review the decision of the NeuStar to deny TWTC's request for additional numbering resources; and

2. The Authority direct the NeuStar to provide numbers to TWTC to meet the specific requirements of Regional Medical Center at Memphis in the Memphis rate center within the 901 NPA.

Respectfully submitted,

FARRIS MATHEWS BRANAN

To Whom It May Concern:

On behalf of the Regional Medical Center in Memphis, TN, this letter is to request specific DID number ranges to accommodate the telephone numbering plan for the hospital. The initial phase of expansion begins almost immediately.

This dialing plan is critical to our immediate plans and will be immediately used. We are requesting 3000 numbers now (in 1000 blocks – noncontaminated). Assignment and use of these numbers will begin as soon as you can provide them. Our hospital personnel need to know the numbers we will be assigning ASAP because we are launching an IP telephony platform to 12 Memphis clinics almost immediately.

Please let me know ASAP the numbers that Time Warner can assign to Regional Medical Center. Let me know if you have questions or need further information.

Sincerely,
Matt Elkins
Regional Medical Center at Memphis
