Re: *Petition to Establish Generic Docket to Consider Amendments to
Interconnection Agreements Resulting from Changes of Law*
Docket No 04-00381

Dear Chairman Jones:

Enclosed are five copies and a CD Rom of Revised Exhibit PAT-3 to the Direct Testimony of Pamela A. Tipton, which was filed on July 26, 2005 on behalf of BellSouth in the above-referenced proceeding. Revised Exhibit PAT-3 remains a composite exhibit and includes new pages 59 to 65. Page 59 of Revised Exhibit PAT-3 is a copy of Carrier Notification Letter ("CNL") SN91085157, which is a cover letter advising that CNL SN91085088 was revised and reposted to BellSouth's Interconnection Services website on August 11, 2005. A copy of the reposted CNL SN 91085088 is provided as pages 60 to 65 of Revised Exhibit PAT-3.

Copies of the enclosed have been provided to counsel of record.

Very truly yours,

Guy M. Hicks

**Carrier Notification
SN91085045**

Date: February 18, 2005

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Product/Service) – Triennial Review Remand Order (TRRO) – Unbundling Rules

Consistent with Carrier Notification SN91085039, posted on February 11, 2005, attached is the list of wire centers by Common Language Location Identifier (CLLI) that satisfy the Tier 1, Tier 2, and Tier 3 criteria¹ for dedicated transport and dark fiber, as well as the CLLI codes for the BellSouth wire centers that satisfy the non-impairment thresholds for DS-1 and DS-3 loops.

Pursuant to the Federal Communications Commission's (FCC) Triennial Review Remand Order (TRRO), effective March 11, 2005, BellSouth is no longer required, and will not accept orders, to provide on an unbundled basis at Total Element Long Run Incremental Cost (TELRIC) rates: (i) DS-1 dedicated transport on routes connecting two Tier 1 wire centers; (ii) DS-3 dedicated transport and dark fiber transport on routes connecting two Tier 1 wire centers, two Tier 2 wire centers, or a Tier 1 wire center and a Tier 2 wire center; (iii) DS-1 loops at any location within the service area of a wire center containing 60,000 or more business lines and four or more fiber-based collocators; and (iv) DS-3 loops at any location within the service area of a wire center containing 38,000 or more business lines and four or more fiber-based collocators. The wire centers that meet each of these criteria are identified on the attached list.²

To obtain more information about this notification, please contact your BellSouth contract negotiator.

Sincerely,

ORIGINAL SIGNED BY JERRY HENDRIX

Jerry Hendrix – Assistant Vice President
BellSouth Interconnection Services

Attachment

¹ Tier 1, Tier 2 and Tier 3 wire centers are defined in paragraphs 112, 118, and 123, respectively, of the TRRO.

² In addition, as of March 11, 2005, BellSouth is no longer required, and will not accept orders to provide, new adds for unbundled switching at TELRIC rates or unbundled network platform (UNE-P), unbundled dark fiber loops, or entrance facilities.

BellSouth Interconnection Services

675 West Peachtree Street
Atlanta, Georgia 30375

**Carrier Notification
SN91085059**

Date: March 11, 2005

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLEC – (Product/Service) – List of Wire Centers for Tier 1, Tier 2 and Tier 3 by Common Language Location Identification (CLLI) in EXCEL Format

In Carrier Notification letter **SN91085045**, posted on February 18, 2005, BellSouth provided a list of wire centers by CLLI that satisfy the Tier 1, Tier 2 and Tier 3 criteria for dedicated transport and dark fiber as well as the CLLI codes for the BellSouth wire centers that satisfy the non-impairment thresholds for DS1 and DS3 loops.

For ease of use and at the request of several CLECs, this Carrier Notification letter is to provide the same list of Tier 1 and Tier 2 wire centers, but in an EXCEL file format that can be sorted as needed by the CLECs. The EXCEL file can be downloaded by clicking on the following:

Wire Center Listings for Non-Impairment Thresholds

**Carrier Notification
SN91085061**

Date: March 7, 2005

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Interconnection/Contractual and Product/Service) – Triennial Review Remand Order (TRRO) - Unbundling Rules

On February 4, 2005, the Federal Communications Commission (FCC) released its permanent unbundling rules in the Triennial Review Remand Order (TRRO).

On February 11, 2005, BellSouth released Carrier Notification letter SN91085039, in which BellSouth set forth its understanding of the TRRO, particularly as it affected BellSouth's obligations to provide a number of former Unbundled Network Elements ("UNEs") after March 11, 2005. Specifically, BellSouth acknowledged that there would be a transition period for the embedded base of these former UNEs, but concluded that the FCC had intended to stop all "new adds" of these former UNEs effective March 11, 2005.

BellSouth posted this Carrier Notification letter on February 11, 2005, in order to provide the CLECs with as much lead time as possible in order to allow the CLECs to take whatever steps were necessary to adjust to the new situation created by the TRRO. Unfortunately, the step chosen by a number of CLECs in response to the clear language of the FCC dealing with "new adds" has been to ask various state commissions to order BellSouth to continue to accept such "new adds." Indeed, this approach has, to date, been successful in at least one jurisdiction, Georgia.

Furthermore, notwithstanding the fact that BellSouth's Carrier Notification SN91085039 was posted on February 11, 2005, various CLECs continue, as recently as March 3, 2005, to file requests with state commissions that have not addressed this question. These requests remain pending before state commissions and it is not clear, because of the delay in filing of these requests by the CLECs, that all state commissions will have a full and adequate opportunity to consider the important issue of whether the FCC actually meant what it said in its order when it indicated that there would be no "new adds." Indeed, at the present time there are at least two commissions in BellSouth's region that have scheduled consideration of the CLECs' requests at a date beyond March 11, 2005, the effective date of the TRRO, and the date that BellSouth had established to prevent unlawful "new adds."

Because of these events, BellSouth herewith revises the implementation date contained in Carrier Notification SN91085039 in the following respects. BellSouth will continue to receive, and will not reject, CLEC orders for "new adds" as they relate to the former UNEs as identified by the FCC for a short period of time. BellSouth will continue to accept CLEC orders for these "new adds" until the earlier of (1) an order from an appropriate body, either a commission or a court, allowing BellSouth to reject these orders; or (2) April 17, 2005. By doing this, BellSouth intends to allow those commissions who have not had the opportunity to fully and carefully consider the requests of the CLECs and the responses of BellSouth, to do so in a measured way, rather than via various "emergency" proceedings created by the dilatory tactics of a number of CLECs.

By extending the time during which BellSouth will accept these orders, BellSouth does not abandon its legal position that the clear words of the FCC mean exactly what they say. BellSouth will continue to pursue that position before the state commissions, and to the extent that a commission has ruled adversely to BellSouth's position, in the courts. Specifically, BellSouth will be asking the appropriate courts to stay any such adverse order we receive.

In addition, BellSouth hereby puts the CLECs on notice that it intends to pursue the various CLECs who place orders for "new adds" after March 10, 2005 to the greatest extent of the law, in an effort to recover the revenue that BellSouth loses as a result of the placement of these unlawful orders. Should any state commission be inclined to ignore the plain language of the FCC's TRRO, and to order BellSouth to continue accepting "new adds" until the issue is fully resolved, BellSouth will ask that commission to require CLECs to compensate BellSouth, in the event BellSouth ultimately prevails in its legal claim, for any former UNE added after March 10, 2005, in an amount equal to the difference in the rate paid by the CLEC and the appropriate rate BellSouth should have collected (either commercial or resale, depending on which service option the CLEC ultimately elects).

As noted in Carrier Notification SN91085039, CLECs will continue to have several options involving switching, loops and transport available to serve their new customers. To this end, with regard to the combinations of switching and loops that constituted UNE-Platform (UNE-P), BellSouth is offering CLECs these options:

- Short Term (3-6 month) Commercial Agreement to provide a bridge between the effective date of the Order and the negotiation of a longer term commercial agreement,
- Long Term Commercial Agreement (3 years, effective January 1, 2005, with transitional discounts available under those agreements executed by March 10, 2005)

In addition, most CLECs, if not all, already have the option of ordering these former UNEs, and particularly the combination of loops and switching, as resale, pursuant to existing interconnection agreements. With regard to the former high capacity loops and transport UNEs, BellSouth has two options for CLECs to consider. Specifically, CLECs may either elect to order resale of BellSouth's Private Line Services or alternatively, may request Special Access service.

Finally, as stated in Carrier Notification letter SN91085032 concerning the availability of a long term commercial agreement, through March 10, 2005, BellSouth will continue to offer its current DS0 Wholesale Local Voice Platform Services Commercial Agreement ("DS0 Agreement") with transitional discounts off of BellSouth's market rate for mass market platform services. Beginning March 11, 2005, BellSouth will offer a DS0 Agreement, but the existing transitional discounts will not be available.

To obtain more information about this notification, please contact your BellSouth contract negotiator.

Sincerely,

Carrier Notification**SN 91085065**

Date: March 11, 2005

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Product/Service) – Triennial Review Remand Order (TRRO) – Unbundling Rules – Wire Centers by Common Language Local Identifier (CLLI)

In **Carrier Notification Letter SN91085045**, posted on February 18, 2005, BellSouth provided the list of wire centers by Common Language Location Identifier (CLLI) that satisfy the Tier 1 and Tier 2 criteria for dedicated transport and dark fiber unbundling relief as well as the CLLI codes for the BellSouth wire centers that satisfy the non-impairment thresholds for DS1 and DS3 loops. Since this posting, BellSouth has received questions from various CLECs about the methodology used to identify these wire centers. The purpose of this Carrier Notification Letter is to provide answers to such questions and to make available the actual business line and fiber-based collocater counts for each of the wire centers in question that several CLECs have also requested.

In determining the number of business lines in each wire center, BellSouth started with its ARMIS 43-08 report, as contemplated by the Triennial Review Remand Order (TRRO).¹ Because the Federal Communications Commission's (FCC) rules define a business line to include only incumbent switched access lines,² BellSouth considered only the switched business lines from Table III of its ARMIS 43-08 report, which breaks out switched access lines by business and residential on a state-by-state basis. In determining whether a line is a business line or whether the line is switched, BellSouth relies upon Universal Service Order Codes (USOCs) that identify the type of service by business or residence and switched or non-switched. The switched business lines were sorted by wire center, and each Integrated Services Digital Network (ISDN) and other digital access line was counted on a per 64 kbps-equivalent basis consistent with the FCC's rules.³ Unbundled loops, whether provisioned on a stand-alone basis or in combination with other unbundled network elements, are not included in BellSouth's switched access line counts in ARMIS. As a result, to comply with the FCC's definition of a business line,⁴ all UNE loops connected to that wire center, including UNE loops provisioned in combination with other unbundled elements, as well as all UNE-P arrangements for which a business class of service USOC has been assigned, were included in BellSouth's business line counts. To the extent the UNE loop or UNE combination was an ISDN or other digital circuit, it was counted on a 64 kbps-equivalent basis as required by the FCC's rules.

¹ TRRO ¶ 105.

² 47 C.F.R. § 51.5 (definition of business line).

³ For ARMIS reporting purposes, the FCC requires an adjustment factor be applied to Basic Rate and Primary Rate ISDN lines. However, no similar adjustment factor is applied to other digital switched access lines for purposes of ARMIS reporting and only activated capacity for such digital lines is reported in ARMIS.

⁴ 47 C.F.R. § 51.5 (defining business line to include "all UNE loops connected to that wire center, including UNE loops provisioned in combination with other unbundled elements").

With respect to fiber-based collocators, BellSouth only considered collocators that are not affiliated with BellSouth and counted each unaffiliated collocator's arrangement, regardless of whether physical collocation or virtual collocation, consistent with the FCC's rules.⁵ In applying the FCC's requirement that the collocation arrangement must have an "active electrical power supply," BellSouth reviewed its most current records to verify those arrangements for which electrical power is actually being supplied and billed by BellSouth. To the extent a collocation arrangement was provisioned but is not being billed for more than the minimum amount of electrical power, BellSouth excluded the arrangement from its count of fiber-based collocators. In determining whether a fiber-based collocator "operates a fiber-optic cable or comparable transmission facility," BellSouth reviewed its collocation application records to determine those collocation arrangements to which a carrier had requested a non-BellSouth provided fiber entrance facility. BellSouth also reviewed its billing records to determine arrangements for which the collocator had been billed cable installation and support structure charges, which are associated with carriers that bring in their own entrance facilities or carrier-leased facilities.

Attachment 1 contains the total number of business lines and fiber-based collocators by CLLI for each BellSouth wire center that satisfies the Tier 1 and Tier 2 criteria for dedicated transport and dark fiber unbundling relief and for those BellSouth wire centers that satisfy the non-impairment thresholds for DS1 and DS3 loops.

Several CLECs have asked BellSouth to provide this data disaggregated by retail business lines, unbundled network element-loop (UNE-L) and business UNE-P lines, which BellSouth is willing to do. However, because such disaggregated data is highly confidential business information, BellSouth will only make such information available for inspection pursuant to the FCC's Protective Order issued on September 20, 2004, in Docket 04-313. This disaggregated data, which is being designated as "Copying Prohibited" pursuant to the Protective Order, will be made available to counsel for any requesting carrier pursuant to the terms of that order at the following locations:

BellSouth
Suite 900
1133 21st Street, N.W.
Washington, D.C. 20036-3351

BellSouth
Suite 4300
675 West Peachtree Street
Atlanta, Georgia 30375

Counsel for CLECs who wish to schedule an appointment to review this disaggregated data should call Anthony Jones at (202) 463-4133.

Several CLECs have also questioned the number of wire centers that satisfy the FCC's non-impairment thresholds for DS1 and DS3 loops and transport, apparently relying upon data that BellSouth provided to the FCC in December 2004. However, when BellSouth submitted this data at the FCC's request, the FCC did not specify any particular methodology, nor did BellSouth have the benefit of the new unbundling rules, specifically the definitions of a "business line" and "fiber-based collocator." Consequently, in three important respects, the wire center data furnished in December 2004 does not accurately reflect the FCC's requirements for determining whether its non-impairment thresholds have been satisfied.

First, the December 2004 wire center data did not include "all UNE loops connected to that wire center, including UNE loops provisioned in combination with other unbundled network elements," as the FCC rules require. In particular, BellSouth's December 2004 wire center data did not capture DS1 loops provisioned as part of a so-called Enhanced Extended Loop (EEL), nor were DS3 loops included in the data. Both of these loop types are reflected in the business line counts set forth in Attachment 1.

⁵ 47 C.F.R. § 51.5 (definition of fiber-based collocator).

©2005 BellSouth Interconnection Services

BellSouth marks contained herein are owned by BellSouth Intellectual Property Corporation.

Second, with the exception of Basic Rate and Primary Rate ISDN retail lines, the December 2004 wire center data did not count retail or wholesale digital access lines on a per 64 kbps-equivalent basis, as the FCC rules require. For example, a UNE DS1 loop was counted in the December 2004 data as one line when it should be counted as 24 lines under the FCC's rules. The business line counts set forth in Attachment 1 have been adjusted to reflect the 64 kbps-equivalent basis requirement. In making this adjustment, BellSouth: (i) removed all digital access lines from its original counts (with the exception of Basic Rate and Primary Rate ISDN retail lines); (ii) determined the 64 kbps-equivalent capacity for each of these retail and wholesale digital access lines; and (iii) added these amounts to the business access lines in each wire center.

Third, in compiling the December 2004 wire center data, BellSouth did not make any effort to verify whether a particular collocation arrangement had an "active electrical power supply," as the FCC rules require. The fiber-based collocators counts set forth in Attachment 1 reflect only those collocators that are being billed for more than the minimum amount of electrical power.

Application of the FCC's requirements for determining whether its non-impairment thresholds have been satisfied is the explanation for the differences in the number of wire centers identified in **Carrier Notification Letter SN91085045**, posted on February 18, 2005, and the wire center data BellSouth filed with the FCC in December 2004. Not surprisingly, including all UNE loops connected to a particular wire center and calculating each digital access line on a 64 kbps-equivalent basis caused the total number of business access lines to increase, while verifying the presence of an active electrical power supply caused the number of fiber-based collocators to decrease. Attachment 2 quantifies these differences for each of the wire centers in which the FCC's non-impairment thresholds have been met.

To obtain more information about this notification, please contact your BellSouth contract negotiator.

Sincerely,

BellSouth Interconnection Services

675 West Peachtree Street
Atlanta, Georgia 30375

**Carrier Notification
SN91085073**

Date: March 24, 2005

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Product/Service) – Triennial Review Remand Order (TRRO) – Unbundling Rules - Wire Centers that Satisfy Non-impairment Thresholds

On February 18, 2005, at the request of the Federal Communications Commission ("Commission"), BellSouth filed with the Commission, a list by Common Language Location Identification ("CLLI") codes of those wire centers that satisfied the non-impairment thresholds for high-capacity loops, transport and dark fiber as adopted by the Commission in its *Triennial Review Remand Order* ("TRRO").¹ Additionally, in Carrier Notification letters: **SN91085045**, posted on February 18, 2005, **SN91085059** and **SN91085065**, posted on March 11, 2005, BellSouth provided similar information and supporting data as well as responded to numerous questions from CLECs about the methodology BellSouth used to identify these wire centers.

This is to advise that BellSouth recently discovered an error in the mathematical formula that was used to count retail digital access lines on a per 64 kbps-equivalent basis, as required by the Commission's rules. This error impacted only retail business line counts and did not affect the quantity of Unbundled Network Element (UNE) loops, the quantity of which were correctly stated on a per 64 kbps-equivalent basis. However, as a result of this error, retail business lines were overstated, and thus, the wire centers meeting the Commission's non-impairment thresholds were not correctly identified in either BellSouth's February 18, 2005 filing or its Carrier Notification letters: **SN91085045**, **SN91085059** and **SN91085065**.

BellSouth understands the necessity of correctly implementing the Commission's non-impairment thresholds and recognizes that it is only entitled to unbundling relief in or between those wire centers where the Commission has determined CLECs are not impaired without unbundled access to high-capacity loops, transport and dark fiber. Because of the importance of the Commission's unbundling determinations and because both the Commission and the industry must know with certainty where those wire centers are located, BellSouth has retained an independent third-party to review the methodology BellSouth utilized in implementing the non-impairment thresholds set forth in the TRRO and to identify the specific wire centers where those thresholds have been met. Once this independent third-party review is complete, BellSouth will provide the Commission and the industry with the results.

This independent third-party review should not delay implementation of the TRRO in BellSouth's region. Before the Commission's unbundling rules took effect on March 11, 2005, state commissions in

¹ *Unbundled Access to Network Elements, Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers*, WC Docket No. 04-313, CC Docket No. 01-338, Order on Remand (Feb. 4, 2005) ("Triennial Review Remand Order").

Alabama, Georgia and Kentucky had ordered BellSouth to continue accepting new orders for unbundled switching and high-capacity facilities until BellSouth's Interconnection Agreements have been amended. In order to allow its other state commissions to act, BellSouth advised CLECs and state regulators that it would not reject orders for unbundled switching and high-capacity loops, transport and dark fiber until the earlier of: (1) issuance of an order from an appropriate body, either a commission or a court, allowing BellSouth to reject these orders; or (2) April 17, 2005. This independent, third-party review will be completed and the results disseminated before BellSouth rejects, or challenges through dispute resolution, any orders for new unbundled high-capacity loops, transport and dark fiber pursuant to the TRRO.

BellSouth sincerely regrets this error and apologizes for any inconvenience that it has caused. Please contact your BellSouth contract negotiator with any questions.

Sincerely,

**Carrier Notification
SN91085088**

Date: April 15, 2005

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Product/Service) – Triennial Review Remand Order (TRRO) – Unbundling Rules - Wire Centers that Satisfy Non-impairment Thresholds

As explained in BellSouth's Carrier Notification letter **SN91085073**, posted March 24, 2005, because BellSouth identified an error in the mathematical formula that was used to count retail digital access lines on a per 64 kbps-equivalent basis, BellSouth retained an independent third-party, Deloitte and Touche USA LLP (Deloitte), to review the application of the methodology BellSouth used to count business lines. The following definition of business lines is taken from Section 51.1 of the Federal Communication Commission's (FCC) Triennial Review Remand Order's (TRRO) Appendix B:

Business Line: A business line is an incumbent LEC-owned switched access line used to serve a business customer, whether by the incumbent LEC itself or by a competitive LEC that leases the line from the incumbent LEC. The number of business lines in a wire center shall equal the sum of all incumbent LEC business switched access lines, plus the sum of all UNE loops connected to that wire center, including UNE loops provisioned in combination with other unbundled elements. Among these requirements, business line tallies (1) shall include only those access lines connecting end-user customers with incumbent LEC end-offices for switched services, (2) shall not include non-switched special access lines, (3) shall account for ISDN and other digital access lines by counting each 64 kbps-equivalent as one line. For example, a DS1 line corresponds to 24 64 kbps-equivalents, and therefore to 24 "business lines."

Deloitte reviewed the application of the methodology that BellSouth used to identify all business lines as defined by the FCC, including the methodology used to account for digital access lines on a per 64 kbps-equivalent basis. In addition, BellSouth conducted site visits to its central offices to review its counts of CLEC-provided, powered-up, fiber-based collocators in order to confirm the presence of the requisite number of fiber-based collocators needed to meet the FCC's various thresholds. In accordance with the information reviewed by Deloitte and obtained through BellSouth's central office site visits, attached is BellSouth's corrected list of wire centers where the FCC's non-impairment thresholds, as set forth in the TRRO, have been met and, thus, where high capacity loops, transport and dark fiber ("high capacity elements") are no longer required to be unbundled pursuant to Section 251 of the Telecommunications Act of 1996 (Act). Upon request, BellSouth will make available to CLECs for review Deloitte's report and supporting data, together with data compiled by BellSouth in determining the presence of fiber-based collocators subject to the protective agreement established in the TRRO proceeding and any limitations imposed by Section 222 of the Act.

Unless otherwise ordered by a particular state public service commission, effective April 17, 2005, should a CLEC place an order for a high capacity element as an Unbundled Network Element (UNE) in a wire center where that high capacity element is not available on an unbundled basis, as identified on BellSouth's wire center list, BellSouth will accept such order as self-certification from that CLEC and its

officers that the CLEC: (i) has undertaken a reasonably diligent inquiry as to whether the element in question is available on an unbundled basis in such wire center, and (ii) has determined that its request is consistent with the FCC's requirements for obtaining unbundled access to such high capacity element. Thus, BellSouth will accept and process such order for the subject high capacity element on an unbundled basis in that wire center, and will thereafter, where appropriate, pursue a claim against the CLEC ordering such element in that wire center, in accordance with the dispute resolution provisions of the interconnection agreement.

BellSouth expects that any CLEC that self-certifies availability of high capacity elements as UNEs by placing orders for those elements will do so in good faith in accordance with the requirements of the TRRO.

Please contact your BellSouth contract negotiator with any questions.

Sincerely,

ORIGINAL SIGNED BY JERRY HENDRIX

Jerry Hendrix – Assistant Vice President

Atlanta, Georgia 30375

**Carrier Notification
SN91085157**

Date August 11, 2005

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs - (Products/Services) – **REVISION to SN91085088** – Triennial Review Remand Order (TRRO) – Unbundling Rules – Wire Centers that Satisfy Non-impairment Thresholds

This is to advise that **Carrier Notification letter SN91085088**, originally posted on April 15, 2005, has been revised to correct the fiber-based collocater counts for the DNWDGAMA, SMYRGAMA and CHRLNCUN wire centers, as shown in the attachment column labeled "# of Fiber-Based collos after On-site Reviews." These corrections have no impact on BellSouth's wire center designations.

Please refer to the attachment for complete details.

Sincerely,

ORIGINAL SIGNED BY KRISTEN ROWE

**Carrier Notification
SN91085088**

Date: August 11, 2005

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Product/Service) – **REVISED** - Triennial Review Remand Order (TRRO) – Unbundling Rules - Wire Centers that Satisfy Non-impairment Thresholds (Originally posted on April 15, 2005)

As explained in BellSouth's Carrier Notification letter **SN91085073**, posted March 24, 2005, because BellSouth identified an error in the mathematical formula that was used to count retail digital access lines on a per 64 kbps-equivalent basis, BellSouth retained an independent third-party, Deloitte and Touche USA LLP (Deloitte), to review the application of the methodology BellSouth used to count business lines. The following definition of business lines is taken from Section 51.1 of the Federal Communication Commission's (FCC) Triennial Review Remand Order's (TRRO) Appendix B:

Business Line: A business line is an incumbent LEC-owned switched access line used to serve a business customer, whether by the incumbent LEC itself or by a competitive LEC that leases the line from the incumbent LEC. The number of business lines in a wire center shall equal the sum of all incumbent LEC business switched access lines, plus the sum of all UNE loops connected to that wire center, including UNE loops provisioned in combination with other unbundled elements. Among these requirements, business line tallies (1) shall include only those access lines connecting end-user customers with incumbent LEC end-offices for switched services, (2) shall not include non-switched special access lines, (3) shall account for ISDN and other digital access lines by counting each 64 kbps-equivalent as one line. For example, a DS1 line corresponds to 24 64 kbps-equivalents, and therefore to 24 "business lines."

Deloitte reviewed the application of the methodology that BellSouth used to identify all business lines as defined by the FCC, including the methodology used to account for digital access lines on a per 64 kbps-equivalent basis. In addition, BellSouth conducted site visits to its central offices to review its counts of CLEC-provided, powered-up, fiber-based collocators in order to confirm the presence of the requisite number of fiber-based collocators needed to meet the FCC's various thresholds. In accordance with the information reviewed by Deloitte and obtained through BellSouth's central office site visits, attached is BellSouth's corrected list of wire centers where the FCC's non-impairment thresholds, as set forth in the TRRO, have been met and, thus, where high capacity loops, transport and dark fiber ("high capacity elements") are no longer required to be unbundled pursuant to Section 251 of the Telecommunications Act of 1996 (Act). Upon request, BellSouth will make available to CLECs for review Deloitte's report and supporting data, together with data compiled by BellSouth in determining the presence of fiber-based collocators subject to the protective agreement established in the TRRO proceeding and any limitations imposed by Section 222 of the Act.

Unless otherwise ordered by a particular state public service commission, effective April 17, 2005, should a CLEC place an order for a high capacity element as an Unbundled Network Element (UNE) in a wire center where that high capacity element is not available on an unbundled basis, as identified on BellSouth's wire center list, BellSouth will accept such order as self-certification from that CLEC and its

officers that the CLEC: (i) has undertaken a reasonably diligent inquiry as to whether the element in question is available on an unbundled basis in such wire center, and (ii) has determined that its request is consistent with the FCC's requirements for obtaining unbundled access to such high capacity element. Thus, BellSouth will accept and process such order for the subject high capacity element on an unbundled basis in that wire center, and will thereafter, where appropriate, pursue a claim against the CLEC ordering such element in that wire center, in accordance with the dispute resolution provisions of the interconnection agreement.

BellSouth expects that any CLEC that self-certifies availability of high capacity elements as UNEs by placing orders for those elements will do so in good faith in accordance with the requirements of the TRRO.

Please contact your BellSouth contract negotiator with any questions.

Sincerely,

ORIGINAL SIGNED BY KRISTEN ROWE

FBC Counts for DNWDGAMA,
SMYRGAMA AND CHRLNCUN

NOTE: N/A in Column D means that BellSouth is not relying on the existence of powered-up FBCs to meet the FCC's threshold impairment test.
