T.R.A. DOCKET ROOM

May 3, 2005

VIA HAND DELIVERY

Hon. Pat Miller
Chairman
Tennessee Regulatory Authority
460 James Robertson Parkway
Nashville, Tennessee 37243-0505

Re. *Approval of the Amendment to the Interconnection Agreement Negotiated by BellSouth Telecommunications, Inc. and American Fiber Network, Inc. Pursuant to Sections 251 and 252 of the Telecommunications Act of 1996*
Docket No. 05-00127

Dear Chairman Miller:

Pursuant to Section 252(e) of the Telecommunications Act of 1996, American Fiber Network, Inc. and BellSouth Telecommunications, Inc. are hereby submitting to the Tennessee Regulatory Authority the original and fourteen copies of the attached Petition for Approval of the Amendment to the Interconnection Agreement dated February 5, 2004. The Amendment relates to the Triennial Review Remand Order (TRRO).

Thank you for your attention to this matter.

Sincerely yours,

Guy M. Hicks

cc Robert E. Heath, American Fiber Network, Inc.

BEFORE THE TENNESSEE REGULATORY AUTHORITY
Nashville, Tennessee

In re. *Approval of the Amendment to the Interconnection Agreement Negotiated by BellSouth Telecommunications, Inc. and American Fiber Network, Inc. Pursuant to Sections 251 and 252 of the Telecommunications Act of 1996*

Docket No. _____

PETITION FOR APPROVAL OF THE
AMENDMENT TO THE INTERCONNECTION AGREEMENT
NEGOTIATED BETWEEN BELL SOUTH TELECOMMUNICATIONS, INC.
AND AMERICAN FIBER NETWORK, INC.
PURSUANT TO THE TELECOMMUNICATIONS ACT OF 1996

COME NOW, American Fiber Network, Inc. ("AFN") and BellSouth Telecommunications, Inc., ("BellSouth"), and file this request for approval of the Amendment to the Interconnection Agreement dated February 5, 2004 (the "Amendment") negotiated between the two companies pursuant to Sections 251 and 252 of the Telecommunications Act of 1996, (the "Act"). In support of their request, AFN and BellSouth state the following:

1. AFN and BellSouth have successfully negotiated an agreement for interconnection of their networks, the unbundling of specific network elements offered by BellSouth and the resale of BellSouth's telecommunications services to AFN. The Interconnection Agreement was approved by the Tennessee Regulatory Authority ("TRA") on July 26, 2004.

2. The parties have recently negotiated an Amendment to the Agreement which relates to the Triennial Review Remand Order (TRRO). A copy of the Amendment is attached hereto and incorporated herein by reference.

3. Pursuant to Section 252(e) of the Telecommunications Act of 1996, AFN and BellSouth are submitting their Amendment to the TRA for its consideration and

approval. The Amendment provides that either or both of the parties is authorized to submit this Amendment to the TRA for approval.

4. In accordance with Section 252(e) of the Act, the TRA is charged with approving or rejecting the negotiated Amendment between BellSouth and AFN within 90 days of its submission. The Act provides that the TRA may only reject such an agreement if it finds that the agreement or any portion of the agreement discriminates against a telecommunications carrier not a party to the agreement or the implementation of the agreement or any portion of the agreement is not consistent with the public interest, convenience and necessity.

5. AFN and BellSouth aver that the Amendment is consistent with the standards for approval.

AFN and BellSouth respectfully request that the TRA approve the Amendment negotiated between the parties.

This 31st day of May, 2005.

Respectfully submitted,

BELLSOUTH TELECOMMUNICATIONS, INC

By: 

Guy M. Hicks

Suite 140
Overland Park, KS 66210

A handwritten signature in black ink, consisting of a stylized 'G' followed by a horizontal line and a loop.

Guy M. Hicks

**Amendment to the Agreement
Between
American Fiber Networks, Inc.
and
BellSouth Telecommunications, Inc.
Dated February 5, 2004**

Pursuant to this Amendment, (the "Amendment"), American Fiber Networks, Inc. ("AFN"), and BellSouth Telecommunications, Inc. ("BellSouth"), hereinafter referred to collectively as the "Parties," hereby agree to amend that certain Interconnection Agreement between the Parties dated February 5, 2004 ("Agreement") to be effective March 11, 2005

WHEREAS, BellSouth and AFN entered into the Agreement on February 5, 2004, and,

WHEREAS, BellSouth and AFN desire to amend the Agreement to modify provisions pursuant to the Federal Communications Commission's (FCC) Order on Remand (Triennial Review Remand Order), WC Docket No. 04-313, released February 4, 2005 and effective March 11, 2005;

WHEREAS, the Parties desire to amend the Agreement to reflect other changes as agreed upon by the parties;

NOW, THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby covenant and agree as follows:

- 1 The Parties agree to delete Attachment 2, Network Elements and Other Services, in its entirety and replace with Attachment 2 reflected as Exhibit 1, attached hereto and by reference incorporated into this Amendment.
2. The Parties agree to add Section 11 to Attachment 3 as follows:

11 SS7 Network Interconnection

11.1 SS7 Network Interconnection is the interconnection of AFN local signaling transfer point switches or AFN local or tandem switching systems with BellSouth signaling transfer point switches. This interconnection provides connectivity that enables the exchange of SS7 messages among BellSouth switching systems and databases, AFN local or tandem switching systems, and other third-party switching systems directly connected to the BellSouth SS7 network.

- 11 2 The connectivity provided by SS7 Network Interconnection shall fully support the functions of BellSouth switching systems and databases and AFN or other third-party switching systems with A-link access to the BellSouth SS7 network
- 11 3 If traffic is routed based on dialed or translated digits between a AFN Local Switching system and a BellSouth or other third-party Local Switching system, either directly or via a BellSouth tandem switching system, then it is a requirement that the BellSouth SS7 network convey via SS7 Network Interconnection the TCAP messages that are necessary to provide Call Management services (Automatic Callback, Automatic Recall, and Screening List Editing) between the AFN local signaling transfer point switches and BellSouth or other third-party local switch
- 11.4 SS7 Network Interconnection shall provide
- 11 4 1 Signaling Data Link functions, as specified in ANSI T1 111.2,
- 11 4 2 Signaling Link functions, as specified in ANSI T1 111 3, and
- 11 4 3 Signaling Network Management functions, as specified in ANSI T1 111 4
- 11 5 SS7 Network Interconnection shall provide all functions of the SCCP necessary for Class 0 (basic connectionless) service as specified in ANSI T1.112. This includes GTT and SCCP Management procedures as specified in ANSI T1.112 4. Where the destination signaling point is a BellSouth switching system or DB, or is another third-party local or tandem switching system directly connected to the BellSouth SS7 network, SS7 Network Interconnection shall include final GTT of messages to the destination and SCCP Subsystem Management of the destination. Where the destination signaling point is a AFN local or tandem switching system, SS7 Network Interconnection shall include intermediate GTT of messages to a gateway pair of AFN local STPs and shall not include SCCP Subsystem Management of the destination
- 11 6 SS7 Network Interconnection shall provide all functions of the Integrated Services Digital Network User Part as specified in ANSI T1 113.

- 11.7 SS7 Network Interconnection shall provide all functions of the TCAP as specified in ANSI T1 114
- 11.8 If Internetwork MRVT and SRVT become approved ANSI standards and available capabilities of BellSouth STPs, SS7 Network Interconnection may provide these functions of the OMAP
- 11.9 Interface Requirements. The following SS7 Network Interconnection interface options are available to connect AFN or AFN-designated local or tandem switching systems or signaling transfer point switches to the BellSouth SS7 network
- 11.9.1 A-link interface from AFN local or tandem switching systems, and
- 11.9.2 B-link interface from AFN STPs
- 11.9.3 The Signaling Point of Interconnection for each link shall be located at a cross-connect element in the central office where the BellSouth STP is located. There shall be a DS1 or higher rate transport interface at each of the Signaling Points of interconnection. Each signaling link shall appear as a DS0 channel within the DS1 or higher rate interface
- 11.9.4 BellSouth shall provide intraoffice diversity between the Signaling Points of Interconnection and the BellSouth STP, so that no single failure of intraoffice facilities or equipment shall cause the failure of both B-links in a layer connecting to a BellSouth STP
- 11.9.5 The protocol interface requirements for SS7 Network Interconnection include the MTP, ISDNUP, SCCP, and TCAP. These protocol interfaces shall conform to the applicable industry standard technical references
- 11.9.6 BellSouth shall set message screening parameters to accept messages from AFN local or tandem switching systems destined to any signaling point in the BellSouth SS7 network with which the AFN switching system has a valid signaling relationship
- 3 The Parties agree to add the rates for SS7 Interconnection to Exhibit A of Attachment 3, attached hereto as Exhibit 2 and by reference incorporated into this Amendment

- 4 The Parties agree to add Section 3.8 to Attachment 6 as follows

3.8 If AFN modifies an order (Order Modification Charge (OMC)) after being sent a Firm Order Confirmation (FOC) from BellSouth, any costs incurred by BellSouth to accommodate the modification will be paid by AFN in accordance with FCC No. 1 Tariff, Section 5.

5. All of the other provisions of the Agreement dated February 5, 2004 shall remain unchanged and in full force and effect
6. Either or both of the Parties are authorized to submit this Amendment to the respective state regulatory authorities for approval subject to Section 252(e) of the Federal Telecommunications Act of 1996.

IN WITNESS WHEREOF, the Parties have executed this Amendment the day and year written below.

BellSouth Telecommunications, Inc.

ACCESS TO NETWORK ELEMENTS AND OTHER SERVICES

1 Introduction

- 1.1 This Attachment sets forth rates, terms and conditions for unbundled network elements (Network Elements) and combinations of Network Elements (Combinations) that BellSouth offers to AFN for AFN's provision of Telecommunications Services in accordance with its obligations under Section 251(c)(3) of the Act. Additionally, this Attachment sets forth the rates, terms and conditions for other facilities and services BellSouth makes available to AFN (Other Services). Additionally, the provision of a particular Network Element or Other Service may require AFN to purchase other Network Elements or services. In the event of a conflict between this Attachment and any other section or provision of this Agreement, the provisions of this Attachment shall control.
- 1.2 The rates for each Network Element, Combinations and Other Services are set forth in Exhibits A and B. If no rate is identified in this Agreement, the rate will be as set forth in the applicable BellSouth tariff or as negotiated by the Parties upon request by either Party. If AFN purchases service(s) from a tariff, all terms and conditions and rates as set forth in such tariff shall apply. A one-month minimum billing period shall apply to all Network Elements, Combinations and Other Services.
- 1.3 AFN may purchase and use Network Elements and Other Services from BellSouth in accordance with 47 C.F.R. § 51.309.
- 1.4 The Parties shall comply with the requirements as set forth in the technical references within this Attachment 2.
- 1.5 AFN shall not obtain a Network Element for the exclusive provision of mobile wireless services or interexchange services.
- 1.6 Conversion of Wholesale Services to Network Elements or Network Elements to Wholesale Services. Upon request, BellSouth shall convert a wholesale service, or group of wholesale services, to the equivalent Network Element or Combination that is available to AFN pursuant to Section 251 of the Act and under this Agreement or convert a Network Element or Combination that is available to AFN pursuant to Section 251 of the Act and under this Agreement to an equivalent wholesale service or group of wholesale services offered by BellSouth (collectively "Conversion"). BellSouth shall charge the applicable nonrecurring switch-as-is rates for Conversions to specific Network Elements or Combinations found in Exhibit A. BellSouth shall also charge the same nonrecurring switch-as-is rates when converting from Network Elements or Combinations. Any rate change resulting from the Conversion will be effective as of the next billing cycle following BellSouth's receipt of a complete and accurate Conversion request from AFN. A

Conversion shall be considered termination for purposes of any volume and/or term commitments and/or grandfathered status between AFN and BellSouth. Any change from a wholesale service/group of wholesale services to a Network Element/Combination, or from a Network Element/Combination to a wholesale service/group of wholesale services, that requires a physical rearrangement will not be considered to be a Conversion for purposes of this Agreement. BellSouth will not require physical rearrangements if the Conversion can be completed through record changes only. Orders for Conversions will be handled in accordance with the guidelines set forth in the Ordering Guidelines and Processes and CLEC Information Packages as referenced in Sections 1.13.1 and 1.13.2 below.

- 1.7 Except to the extent expressly provided otherwise in this Attachment, AFN may not maintain unbundled network elements or combinations of unbundled network elements, that are no longer offered pursuant to this Agreement (collectively "Arrangements"). In the event BellSouth determines that AFN has in place any Arrangements after the Effective Date of this Agreement, BellSouth may disconnect such Arrangements without notice under this Agreement to AFN.
- 1.8 Prior to submitting an order pursuant to this Agreement for high capacity (DS1 or above) Dedicated Transport or high capacity Loops, AFN shall undertake a reasonably diligent inquiry to determine whether AFN is entitled to unbundled access to such Network Elements in accordance with the terms of this Agreement. By submitting any such order, AFN self-certifies that to the best of AFN's knowledge, the high capacity Dedicated Transport or high capacity Loop requested is available as a Network Element pursuant to this Agreement. Upon receiving such order, BellSouth shall process the request in reliance upon AFN's self-certification. To the extent BellSouth believes that such request does not comply with the terms of this Agreement, BellSouth shall seek dispute resolution in accordance with the General Terms and Conditions of this Agreement.
- 1.9 AFN may utilize Network Elements and Other Services to provide services in accordance with this Agreement, as long as such services are consistent with industry standards and applicable BellSouth Technical References.
- 1.10 BellSouth will perform Routine Network Modifications (RNM) in accordance with FCC 47 C.F.R. § 51.319 (a)(7) and (e)(4) for Loops and Dedicated Transport provided under this Attachment. If BellSouth has anticipated such RNM and performs them during normal operations and has recovered the costs for performing such modifications through the rates set forth in Exhibit A, then BellSouth shall perform such RNM at no additional charge. RNM shall be performed within the intervals established for the Network Element and subject to the performance measurements and associated remedies set forth in Attachment 9 of this Agreement to the extent such RNM were anticipated in the setting of such intervals. If BellSouth has not anticipated a requested network modification as being a RNM and has not recovered the costs of such RNM in the rates set forth in

Exhibit A, then such request will be handled as a project on an individual case basis. BellSouth will provide a price quote for the request and, upon receipt of payment from AFN, BellSouth shall perform the RNM

1.11 Commingling of Services

1.11.1 Commingling means the connecting, attaching, or otherwise linking of a Network Element, or a Combination, to one or more Telecommunications Services or facilities that AFN has obtained at wholesale from BellSouth, or the combining of a Network Element or Combination with one or more such wholesale Telecommunications Services or facilities. AFN must comply with all rates, terms or conditions applicable to such wholesale Telecommunications Services or facilities

1.11.2 Subject to the limitations set forth elsewhere in this Attachment, BellSouth shall not deny access to a Network Element or a Combination on the grounds that one or more of the elements 1) is connected to, attached to, linked to, or combined with such a facility or service obtained from BellSouth, or 2) shares part of BellSouth's network with access services or inputs for mobile wireless services and/or interexchange services

1.11.3 Unless otherwise agreed to by the Parties, the Network Element portion of a commingled circuit will be billed at the rates set forth in this Agreement and the remainder of the circuit or service will be billed in accordance with BellSouth's tariffed rates or rates set forth in a separate agreement between the Parties.

1.11.4 When multiplexing equipment is attached to a commingled circuit, the multiplexing equipment will be billed from the same agreement or tariff as the higher bandwidth circuit. Central Office Channel Interfaces (COCI) will be billed from the same agreement or tariff as the lower bandwidth circuit.

1.11.5 Notwithstanding any other provision of this Agreement, BellSouth shall not be obligated to commingle or combine Network Elements or Combinations with any service, network element or other offering that it is obligated to make available only pursuant to Section 271 of the Act.

1.12 Terms and conditions for order cancellation charges and Service Date Advancement Charges will apply in accordance with Attachment 6 and are incorporated herein by this reference. The charges shall be as set forth in Exhibit A

1.13 Ordering Guidelines and Processes

1.13.1 For information regarding Ordering Guidelines and Processes for various Network Elements, Combinations and Other Services, AFN should refer to the "Guides"

section of the BellSouth Interconnection Web site, which is incorporated herein by reference, as amended from time to time. The Web site address is:
<http://www.interconnection.bellsouth.com/>

- 1.13.2 Additional information may also be found in the individual CLEC Information Packages, which are incorporated herein by reference, as amended from time to time, located at the "CLEC UNE Products" Web site address
<http://www.interconnection.bellsouth.com/guides/html/unes.html>.
- 1.13.3 The provisioning of Network Elements, Combinations and Other Services to AFN's Collocation Space will require cross-connections within the central office to connect the Network Element, Combinations or Other Services to the demarcation point associated with AFN's Collocation Space. These cross-connections are separate components that are not considered a part of the Network Element, Combinations or Other Services and, thus, have a separate charge pursuant to this Agreement.
- 1.13.4 Testing/Trouble Reporting.
 - 1.13.4.1 AFN will be responsible for testing and isolating troubles on Network Elements. AFN must test and isolate trouble to the BellSouth network before reporting the trouble to the UNE Customer Wholesale Interconnection Network Services (CWINS) Center. Upon request from BellSouth at the time of the trouble report, AFN will be required to provide the results of the AFN test which indicate a problem on the BellSouth network.
 - 1.13.4.2 Once AFN has isolated a trouble to the BellSouth network, and has issued a trouble report to BellSouth, BellSouth will take the actions necessary to repair the Network Element when trouble is found. BellSouth will repair its network facilities to its wholesale customers in the same time frames that BellSouth repairs similar services to its retail End Users.
 - 1.13.4.3 If AFN reports a trouble on a BellSouth Network Element and no trouble is found in BellSouth's network, BellSouth will charge AFN a Maintenance of Service Charge for any dispatching and testing (both inside and outside the CO) required by BellSouth in order to confirm the Network Element's working status. BellSouth will assess the applicable Maintenance of Service rates from BellSouth's FCC No 1 Tariff, Section 13.3.1.
 - 1.13.4.4 In the event BellSouth must dispatch to the End User's location more than once due to incorrect or incomplete information provided by AFN (e.g., incomplete address, incorrect contact name/number, etc.), BellSouth will bill AFN for each additional dispatch required to repair the Network Element due to the incorrect/incomplete information provided. BellSouth will assess the applicable Maintenance of Service rates from BellSouth's FCC No 1 Tariff, Section 13.3.1.

2 **Loops**

- 2 1 General The local loop Network Element is defined as a transmission facility that BellSouth provides pursuant to this Attachment between a distribution frame (or its equivalent) in BellSouth's central office and the loop demarcation point at an End User premises (Loop). Facilities that do not terminate at a demarcation point at an End User premises, including, by way of example, but not limited to, facilities that terminate to another carrier's switch or premises, a cell site, Mobile Switching Center or base station, do not constitute local Loops. The Loop Network Element includes all features, functions, and capabilities of the transmission facilities, including the network interface device, and attached electronics (except those used for the provision of advanced services, such as Digital Subscriber Line Access Multiplexers (DSLAMs)), optronics and intermediate devices (including repeaters and load coils) used to establish the transmission path to the End User's premises, including inside wire owned or controlled by BellSouth. AFN shall purchase the entire bandwidth of the Loop and, except as required herein or as otherwise agreed to by the Parties, BellSouth shall not subdivide the frequency of the Loop.
- 2 1 1 The Loop does not include any packet switched features, functions or capabilities.
- 2 1 2 Fiber to the Home (FTTH) loops are local loops consisting entirely of fiber optic cable, whether dark or lit, serving an End User's premises or, in the case of predominantly residential multiple dwelling units (MDUs), a fiber optic cable, whether dark or lit, that extends to the MDU minimum point of entry (MPOE). Fiber to the Curb (FTTC) loops are local loops consisting of fiber optic cable connecting to a copper distribution plant that is not more than five hundred (500) feet from the End User's premises or, in the case of predominantly residential MDUs, not more than five hundred (500) feet from the MDU's MPOE. The fiber optic cable in a FTTC loop must connect to a copper distribution plant at a serving area interface from which every other copper distribution subloop also is not more than five hundred (500) feet from the respective End User's premises.
- 2 1 2 1 In new build (Greenfield) areas, where BellSouth has only deployed FTTH/FTTC facilities, BellSouth is under no obligation to provide Loops. FTTH facilities include fiber loops deployed to the MPOE of a MDU that is predominantly residential regardless of the ownership of the inside wiring from the MPOE to each End User in the MDU.
- 2 1 2 2 In FTTH/FTTC overbuild situations where BellSouth also has copper Loops, BellSouth will make those copper Loops available to AFN on an unbundled basis, until such time as BellSouth chooses to retire those copper Loops using the FCC's network disclosure requirements. In these cases, BellSouth will offer a 64 kilobits per second (kbps) second voice grade channel over its FTTH/FTTC facilities.

- 2 1 2 3 Furthermore, in FTTH/FTTC overbuild areas where BellSouth has not yet retired copper facilities, BellSouth is not obligated to ensure that such copper Loops in that area are capable of transmitting signals prior to receiving a request for access to such Loops by AFN. If a request is received by BellSouth for a copper Loop, and the copper facilities have not yet been retired, BellSouth will restore the copper Loop to serviceable condition if technically feasible. In these instances of Loop orders in an FTTH/FTTC overbuild area, BellSouth's standard Loop provisioning interval will not apply, and the order will be handled on a project basis by which the Parties will negotiate the applicable provisioning interval.
- 2 1 3 A hybrid Loop is a local Loop, composed of both fiber optic cable, usually in the feeder plant, and copper twisted wire or cable, usually in the distribution plant. BellSouth shall provide AFN with nondiscriminatory access to the time division multiplexing features, functions and capabilities of such hybrid Loop, on an unbundled basis to establish a complete transmission path between BellSouth's central office and an End User's premises.
- 2.1 4 Transition for DS1 and DS3 Loops
- 2 1 4.1 For purposes of this Section 2, the Transition Period for DS1 and DS3 Loops is the twelve (12) month period beginning March 11, 2005 and ending March 10, 2006.
- 2 1 4 2 For purposes of this Section 2, Embedded Base means DS1 and DS3 Loops that were in service for AFN as of March 10, 2005. Subsequent disconnects or loss of End Users shall be removed from the Embedded Base.
- 2 1 4 3 For purposes of this Section 2, a Business Line is defined in 47 C.F.R. § 51.5
- 2 1 4 4 BellSouth shall make available DS1 and DS3 Loops as defined in this Section 2. Notwithstanding anything to the contrary in this Agreement, BellSouth shall make available DS1 and DS3 Loops as described in this Section 2 1 4 only for AFN's Embedded Base during the Transition Period.
- 2 1 4.4.1 DS1 Loops at any location within the service area of a wire center containing 60,000 or more Business Lines and four (4) or more fiber-based collocators.
- 2 1.4 4 2 DS3 Loops at any location within the service area of a wire center containing 38,000 or more Business Lines and four (4) or more fiber-based collocators.
- 2.1.4.5 During the Transition Period, the rates for AFN's Embedded Base of DS1 and DS3 Loops described in this Section 2.1.4 shall be as set forth in Exhibit B.
- 2 1 4 6 The Transition Period shall apply only to AFN's Embedded Base and AFN shall not add new DS1 or DS3 loops as described in this Section 2 1 4 pursuant to this Agreement.

- 2.1.4.7 Once a wire center exceeds both of the thresholds set forth in Section 2.1.4.4.1, no future DS1 Loop unbundling will be required in that wire center
- 2.1.4.8 Once a wire center exceeds both of the thresholds set forth in Section 2.1.4.4.2, no future DS3 Loop unbundling will be required in that wire center
- 2.1.4.9 At the end of the Transition Period any remaining Embedded Base will be disconnected
- 2.1.5 Where facilities are available, BellSouth will install Loops in compliance with BellSouth's Products and Services Interval Guide available at BellSouth's Web site <http://www.interconnection.bellsouth.com>. For orders of fifteen (15) or more Loops, the installation and any applicable OC as described below will be handled on a project basis, and the intervals will be set by the BellSouth project manager for that order. When Loops require a Service Inquiry (SI) prior to issuing the order to determine if facilities are available, the interval for the SI process is separate from the installation interval
- 2.1.6 The Loop shall be provided to AFN in accordance with BellSouth's TR73600 Unbundled Local Loop Technical Specification and applicable industry standard technical references.
- 2.1.7 BellSouth will only provision, maintain and repair the Loops to the standards that are consistent with the type of Loop ordered.
- 2.1.7.1 When a BellSouth technician is required to be dispatched to provision the Loop, BellSouth will tag the Loop with the Circuit ID number and the name of the ordering CLEC. When a dispatch is not required to provision the Loop, BellSouth will tag the Loop on the next required visit to the End User's location. If AFN wants to ensure the Loop is tagged during the provisioning process for Loops that may not require a dispatch (e.g., UVL-SL1, UVL-SL2, and UCL-ND), AFN may order Loop Tagging. Rates for Loop Tagging are as set forth in Exhibit A
- 2.1.7.2 For voice grade Loop orders (or orders for Loops intended to provide voice grade services), AFN shall have dial-tone available for that Loop forty-eight (48) hours prior to the Loop order completion due date
- 2.1.8 Order Coordination (OC) and Order Coordination-Time Specific (OC-TS)
- 2.1.8.1 OC allows BellSouth and AFN to coordinate the installation of the SL2 Loops, Unbundled Digital Loops (UDL) and other Loops where OC may be purchased as an option, to AFN's facilities to limit End User service outage. OC is available when the Loop is provisioned over an existing circuit that is currently providing service to the End User. OC for physical conversions will be scheduled at

BellSouth's discretion during normal working hours on the committed due date OC shall be provided in accordance with the chart set forth below

- 2.1 8 2 OC-TS allows AFN to order a specific time for OC to take place. BellSouth will make commercially reasonable efforts to accommodate AFN's specific conversion time request. However, BellSouth reserves the right to negotiate with AFN a conversion time based on load and appointment control when necessary. This OC-TS is a chargeable option for all Loops except Unbundled Copper Loops (UCL) and is billed in addition to the OC charge. AFN may specify a time between 9 00 a.m. and 4 00 p.m. (location time) Monday through Friday (excluding holidays). If AFN specifies a time outside this window, or selects a time or quantity of Loops that requires BellSouth technicians to work outside normal work hours, overtime charges will apply in addition to the OC and OC-TS charges. Overtime charges will be applied based on the amount of overtime worked and in accordance with the rates established in BellSouth's Access Services Tariff, Section E13.2, for each state. The OC-TS charges for an order due on the same day at the same location will be applied on a per Local Service Request (LSR) basis.

219

	Order Coordination (OC)	Order Coordination – Time Specific (OC-TS)	Test Points	DLR	Charge for Dispatch and Testing if No Trouble Found
SL-1 (Non-Designed)	Chargeable Option	Chargeable Option	Not available	Chargeable Option – ordered as Engineering Information Document	Charged for Dispatch inside and outside Central Office
UCL-ND (Non-Designed)	Chargeable Option	Not Available	Not Available	Chargeable Option – ordered as Engineering Information Document	Charged for Dispatch inside and outside Central Office
Unbundled Voice Loops - SL-2 (including 2- and 4-wire UVL) (Designed)	Included	Chargeable Option	Included	Included	Charged for Dispatch outside Central Office
Unbundled Digital Loop (Designed)	Included	Chargeable Option	Included (where appropriate)	Included	Charged for Dispatch outside Central Office
Unbundled Copper Loop (Designed)	Chargeable in accordance with Section 2	Not available	Included	Included	Charged for Dispatch outside Central Office
For UVL-SL1 and UCLs, AFN must order and will be billed for both OC and OC-TS if requesting OC-TS					

2.1.9 CLEC to CLEC Conversions for Unbundled Loops

219.1 The CLEC to CLEC conversion process for Loops may be used by AFN when converting an existing Loop from another CLEC for the same End User. The Loop type being converted must be included in AFN's Interconnection Agreement before requesting a conversion.

- 2.1.9.2 To utilize the CLEC to CLEC conversion process, the Loop being converted must be the same Loop type with no requested changes to the Loop, must serve the same End User location from the same serving wire center, and must not require an outside dispatch to provision
- 2.1.9.3 The Loops converted to AFN pursuant to the CLEC to CLEC conversion process shall be provisioned in the same manner and with the same functionality and options as described in this Agreement for the specific Loop type
- 2.1.10 Bulk Migration
- 2.1.10.1 BellSouth will make available to AFN a Bulk Migration process pursuant to which AFN may request to migrate port/loop combinations, provisioned pursuant to a separate agreement between the parties, to Loops (UNE-L). The Bulk Migration process may be used if such loop/port combinations are (1) associated with two (2) or more Existing Account Telephone Numbers (EATNs), and (2) located in the same Central Office. The terms and conditions for use of the Bulk Migration process are described in the BellSouth CLEC Information Package, incorporated herein by reference as it may be amended from time to time. The CLEC Information Package is located at www.interconnection.bellsouth.com/guides.html#unes.html. The rates for the Bulk Migration process shall be the nonrecurring rates associated with the Loop type being requested on the Bulk Migration, as set forth in Exhibit A. Additionally, Operations Support Systems (OSS) charges will also apply. Loops connected to Integrated Digital Loop Carrier (IDLC) systems will be migrated pursuant to Section 2.6 below.
- 2.1.10.2 Should AFN request migration for two (2) or more EATNs containing fifteen (15) or more circuits, AFN must use the Bulk Migration process referenced in 2.1.11.1 above
- 2.2 Unbundled Voice Loops (UVLs)
- 2.2.1 BellSouth shall make available the following UVLs:
- 2.2.1.1 2-wire Analog Voice Grade Loop – SL1 (Non-Designed)
- 2.2.1.2 2-wire Analog Voice Grade Loop – SL2 (Designed)
- 2.2.1.3 4-wire Analog Voice Grade Loop (Designed)
- 2.2.2 UVL may be provisioned using any type of facility that will support voice grade services. This may include loaded copper, non-loaded copper, digital loop carrier systems, fiber/copper combination (hybrid loop) or a combination of any of these facilities. BellSouth, in the normal course of maintaining, repairing, and configuring its network, may also change the facilities that are used to provide any

given voice grade circuit. This change may occur at any time. In these situations, BellSouth will only ensure that the newly provided facility will support voice grade services. BellSouth will not guarantee that AFN will be able to continue to provide any advanced services over the new facility. BellSouth will offer UVL in two different service levels - Service Level One (SL1) and Service Level Two (SL2).

- 2.2.3 Unbundled Voice Loop - SL1 (UVL-SL1) Loops are 2-wire Loop start circuits, will be non-designed, and will not have remote access test points. OC will be offered as a chargeable option on SL1 Loops when reuse of existing facilities has been requested by AFN, however, OC is always required on UCLs that involve the reuse of facilities that are currently providing service. AFN may also order OC-TS when a specified conversion time is requested. OC-TS is a chargeable option for any coordinated order and is billed in addition to the OC charge. An Engineering Information (EI) document can be ordered as a chargeable option. The EI document provides Loop Make-Up information which is similar to the information normally provided in a Design Layout Record (DLR). Upon issuance of a non-coordinated order in the service order system, SL1 Loops will be activated on the due date in the same manner and time frames that BellSouth normally activates POTS-type Loops for its End Users.
- 2.2.4 For an additional charge BellSouth will make available Loop Testing so that AFN may request further testing on new UVL-SL1 Loops. Rates for Loop Testing are as set forth in Exhibit A.
- 2.2.5 Unbundled Voice Loop - SL2 (UVL-SL2) Loops may be 2-wire or 4-wire circuits, shall have remote access test points, and will be designed with a DLR provided to AFN. SL2 circuits can be provisioned with loop start, ground start or reverse battery signaling. OC is provided as a standard feature on SL2 Loops. The OC feature will allow AFN to coordinate the installation of the Loop with the disconnect of an existing customer's service and/or number portability service. In these cases, BellSouth will perform the order conversion with standard order coordination at its discretion during normal work hours.
- 2.3 Unbundled Digital Loops
- 2.3.1 BellSouth will offer UDLs. UDLs are service specific, will be designed, will be provisioned with test points (where appropriate), and will come standard with OC and a DLR. The various UDLs are intended to support a specific digital transmission scheme or service.
- 2.3.2 BellSouth shall make available the following UDLs, subject to restrictions set forth herein:
- 2.3.2.1 2-wire Unbundled ISDN Digital Loop

- 2.3 2 2 2-wire Unbundled ADSL Compatible Loop
- 2.3 2 3 2-wire Unbundled HDSL Compatible Loop
- 2.3 2 4 4-wire Unbundled HDSL Compatible Loop
- 2 3 2 5 4-wire Unbundled DS1 Digital Loop
- 2 3 2 6 4-wire Unbundled Digital Loop/DS0 – 64 kbps, 56 kbps and below
- 2 3 2.7 DS3 Loop
- 2.3.2.8 STS-1 Loop
- 2 3 3 2-wire Unbundled ISDN Digital Loops. These will be provisioned according to industry standards for 2-Wire Basic Rate ISDN services and will come standard with a test point, OC, and a DLR. AFN will be responsible for providing BellSouth with a Service Profile Identifier (SPID) associated with a particular ISDN-capable Loop and End User. With the SPID, BellSouth will be able to adequately test the circuit and ensure that it properly supports ISDN service
- 2.3 4 2-wire ADSL-Compatible Loop This is a designed Loop that is provisioned according to Revised Resistance Design (RRD) criteria and may be up to 18,000 feet long and may have up to 6,000 feet of bridged tap (inclusive of Loop length). The Loop is a 2-wire circuit and will come standard with a test point, OC, and a DLR
- 2.3 5 2-wire or 4-wire HDSL-Compatible Loop This is a designed Loop that meets Carrier Serving Area (CSA) specifications, may be up to 12,000 feet long and may have up to 2,500 feet of bridged tap (inclusive of Loop length). It may be a 2-wire or 4-wire circuit and will come standard with a test point, OC, and a DLR
- 2.3 6 4-wire Unbundled DS1 Digital Loop
- 2.3 6 1 This is a designed 4-wire Loop that is provisioned according to industry standards for DS1 or Primary Rate ISDN services and will come standard with a test point, OC, and a DLR. A DS1 Loop may be provisioned over a variety of loop transmission technologies including copper, HDSL-based technology or fiber optic transport systems. It will include a 4-wire DS1 Network Interface at the End User's location. For purposes of this Agreement, including the transition of DS1 and DS3 Loops described in Section 2 1 4 above, DS1 Loops include 2-wire and 4-wire copper Loops capable of providing high-bit rate digital subscriber line services, such as 2-wire and 4-wire HDSL Compatible Loops
- 2.3 6 2 BellSouth shall not provide more than ten (10) unbundled DS1 Loops to AFN at any single building in which DS1 Loops are available as unbundled Loops

- 2.3.7 4-wire Unbundled Digital/DS0 Loop These are designed 4-wire Loops that may be configured as 64kbps, 56kbps, 19kbps, and other sub-rate speeds associated with digital data services and will come standard with a test point, OC, and a DLR
- 2.3.8 DS3 Loop DS3 Loop is a two-point digital transmission path which provides for simultaneous two-way transmission of serial, bipolar, return-to-zero isochronous digital electrical signals at a transmission rate of 44 736 megabits per second (Mbps) that is dedicated to the use of the ordering CLEC in its provisioning of local exchange and associated exchange access services. It may provide transport for twenty-eight (28) DS1 channels, each of which provides the digital equivalent of twenty-four (24) analog voice grade channels. The interface to unbundled dedicated DS3 transport is a metallic-based electrical interface
- 2.3.9 STS-1 Loop STS-1 Loop is a high-capacity digital transmission path with SONET VT1.5 mapping that is dedicated for the use of the ordering customer for the purpose of provisioning local exchange and associated exchange access services. It is a two-point digital transmission path which provides for simultaneous two-way transmission of serial bipolar return-to-zero synchronous digital electrical signals at a transmission rate of 51.84 Mbps. It may provide transport for twenty-eight (28) DS1 channels, each of which provides the digital equivalent of twenty-four (24) analog voice grade channels. The interface to unbundled dedicated STS-1 transport is a metallic-based electrical interface.
- 2.3.10 Both DS3 Loop and STS-1 Loop require a SI in order to ascertain availability.
- 2.3.11 DS3 services come with a test point and a DLR. Mileage is airline miles, rounded up and a minimum of one mile applies. BellSouth's TR73501 LightGate® Service Interface and Performance Specifications, Issue D, June 1995 applies to DS3 services.
- 2.3.12 AFN may obtain a maximum of a single Unbundled DS3 Loop to any single building in which DS3 Loops are available as Unbundled Loops
- 2.4 Unbundled Copper Loops (UCL)
- 2.4.1 BellSouth shall make available UCLs. The UCL is a copper twisted pair Loop that is unencumbered by any intervening equipment (e.g., filters, load coils, range extenders, digital loop carrier, or repeaters) and is not intended to support any particular telecommunications service. The UCL will be offered in two types – Designed and Non-Designed.
- 2.4.2 Unbundled Copper Loop – Designed (UCL-D)

- 2.4.2.1 The UCL-D will be provisioned as a dry copper twisted pair (2-wire or 4-wire) Loop that is unencumbered by any intervening equipment (e.g., filters, load coils, range extenders, digital loop carrier, or repeaters).
- 2.4.2.2 A UCL-D will be 18,000 feet or less in length and is provisioned according to Resistance Design parameters, may have up to 6,000 feet of bridged tap and will have up to 1300 Ohms of resistance
- 2.4.2.3 The UCL-D is a designed circuit, is provisioned with a test point, and comes standard with a DLR. OC is a chargeable option for a UCL-D; however, OC is always required on UCLs where a reuse of existing facilities has been requested by AFN
- 2.4.2.4 These Loops are not intended to support any particular services and may be utilized by AFN to provide a wide-range of telecommunications services as long as those services do not adversely affect BellSouth's network. This facility will include a Network Interface Device (NID) at the customer's location for the purpose of connecting the Loop to the customer's inside wire
- 2.4.3 Unbundled Copper Loop – Non-Designed (UCL-ND)
- 2.4.3.1 The UCL-ND is provisioned as a dedicated 2-wire metallic transmission facility from BellSouth's Main Distribution Frame (MDF) to a customer's premises (including the NID). The UCL-ND will be a "dry copper" facility in that it will not have any intervening equipment such as load coils, repeaters, or digital access main lines (DAMLs), and may have up to 6,000 feet of bridged tap between the End User's premises and the serving wire center. The UCL-ND typically will be 1300 Ohms resistance and in most cases will not exceed 18,000 feet in length, although the UCL-ND will not have a specific length limitation. For Loops less than 18,000 feet and with less than 1300 Ohms resistance, the Loop will provide a voice grade transmission channel suitable for loop start signaling and the transport of analog voice grade signals. The UCL-ND will not be designed and will not be provisioned with either a DLR or a test point
- 2.4.3.2 The UCL-ND facilities may be mechanically assigned using BellSouth's assignment systems. Therefore, the Loop Makeup (LMU) process is not required to order and provision the UCL-ND. However, AFN can request LMU for which additional charges would apply.
- 2.4.3.3 For an additional charge, BellSouth also will make available Loop Testing so that AFN may request further testing on the UCL-ND. Rates for Loop Testing are as set forth in Exhibit A.
- 2.4.3.4 UCL-ND Loops are not intended to support any particular service and may be utilized by AFN to provide a wide-range of telecommunications services as long as

those services do not adversely affect BellSouth's network. The UCL-ND will include a NID at the customer's location for the purpose of connecting the Loop to the customer's inside wire.

2.4.3.5 OC will be provided as a chargeable option and may be utilized when the UCL-ND provisioning is associated with the reuse of BellSouth facilities. OC-TS does not apply to this product.

2.4.3.6 AFN may use BellSouth's Unbundled Loop Modification (ULM) offering to remove excessive bridged taps and/or load coils from any copper Loop within the BellSouth network. Therefore, some Loops that would not qualify as UCL-ND could be transformed into Loops that do qualify, using the ULM process.

2.5 Unbundled Loop Modifications (Line Conditioning)

2.5.1 Line Conditioning is defined as routine network modification that BellSouth regularly undertakes to provide xDSL services to its own customers. This may include the removal of any device, from a copper Loop or copper Subloop that may diminish the capability of the Loop or Subloop to deliver high-speed switched wireline telecommunications capability, including xDSL service. Such devices include, load coils, excessive bridged taps, low pass filters, and range extenders. Excessive bridged taps are bridged taps that serve no network design purpose and that are beyond the limits set according to industry standards and/or the BellSouth's TR73600 Unbundled Local Loop Technical Specification.

2.5.2 BellSouth will remove load coils only on copper Loops and Subloops that are less than 18,000 feet in length.

2.5.3 For any copper loop being ordered by AFN which has over six thousand (6,000) feet of combined bridged tap will be modified, upon request from AFN, so that the loop will have a maximum of six thousand (6,000) feet of bridged tap. This modification will be performed at no additional charge to AFN. Loop conditioning orders that require the removal of bridged tap that serves no network design purpose on a copper Loop that will result in a combined total of bridged tap between two thousand five hundred (2,500) and six thousand (6,000) feet will be performed at the rates set forth in Exhibit A.

2.5.4 AFN may request removal of any unnecessary and non-excessive bridged tap (bridged tap between zero (0) and two thousand five hundred (2,500) feet which serves no network design purpose), at rates pursuant to BellSouth's SC Process as mutually agreed to by the Parties.

2.5.5 Rates for ULM are as set forth in Exhibit A.

- 2 5 6 BellSouth will not modify a Loop in such a way that it no longer meets the technical parameters of the original Loop type (e g , voice grade, ADSL, etc) being ordered
- 2 5 7 If AFN requests ULM on a reserved facility for a new Loop order, BellSouth may perform a pair change and provision a different Loop facility in lieu of the reserved facility with ULM if feasible The Loop provisioned will meet or exceed specifications of the requested Loop facility as modified AFN will not be charged for ULM if a different Loop is provisioned For Loops that require a DLR or its equivalent, BellSouth will provide LMU detail of the Loop provisioned.
- 2.5 8 AFN shall request Loop make up information pursuant to this Attachment prior to submitting a service inquiry and/or a LSR for the Loop type that AFN desires BellSouth to condition.
- 2.5.9 When requesting ULM for a Loop that BellSouth has previously provisioned for AFN, AFN will submit a SI to BellSouth. If a spare Loop facility that meets the Loop modification specifications requested by AFN is available at the location for which the ULM was requested, AFN will have the option to change the Loop facility to the qualifying spare facility rather than to provide ULM. In the event that BellSouth changes the Loop facility in lieu of providing ULM, AFN will not be charged for ULM but will only be charged the service order charges for submitting an order
- 2 6 Loop Provisioning Involving IDLC
- 2.6.1 Where AFN has requested an Unbundled Loop and BellSouth uses IDLC systems to provide the local service to the End User and BellSouth has a suitable alternate facility available, BellSouth will make such alternative facilities available to AFN. If a suitable alternative facility is not available, then to the extent it is technically feasible, BellSouth will implement one of the following alternative arrangements for AFN (e g., hairpinning).
- 1 Roll the circuit(s) from the IDLC to any spare copper that exists to the customer premises
 - 2 Roll the circuit(s) from the IDLC to an existing DLC that is not integrated
 - 3 If capacity exists, provide "side-door" porting through the switch
 4. If capacity exists, provide "Digital Access Cross-Connect System (DACS)-door" porting (if the IDLC routes through a DACS prior to integration into the switch)
- 2 6 2 Arrangements 3 and 4 above require the use of a designed circuit Therefore, non-designed Loops such as the SL1 voice grade and UCL-ND may not be ordered in these cases.

- 2.6 3 If no alternate facility is available, and upon request from AFN, and if agreed to by both Parties, BellSouth may utilize its SC process to determine the additional costs required to provision facilities. AFN will then have the option of paying the one-time SC rates to place the Loop.
- 2.7 Network Interface Device
- 2.7.1 The NID is defined as any means of interconnection of the End User's customer premises wiring to BellSouth's distribution plant, such as a cross-connect device used for that purpose. The NID is a single line termination device or that portion of a multiple line termination device required to terminate a single line or circuit at the premises. The NID features two independent chambers or divisions that separate the service provider's network from the End User's premises wiring. Each chamber or division contains the appropriate connection points or posts to which the service provider and the End User each make their connections. The NID provides a protective ground connection and is capable of terminating cables such as twisted pair cable.
- 2.7.2 BellSouth shall permit AFN to connect AFN's Loop facilities to the End User's customer premises wiring through the BellSouth NID or at any other technically feasible point.
- 2.7.3 Access to NID
- 2.7.3.1 AFN may access the End User's premises wiring by any of the following means and AFN shall not disturb the existing form of electrical protection and shall maintain the physical integrity of the NID.
- 2.7.3.1.1 BellSouth shall allow AFN to connect its Loops directly to BellSouth's multi-line residential NID enclosures that have additional space and are not used by BellSouth or any other telecommunications carriers to provide service to the premises,
- 2.7.3.1.2 Where an adequate length of the End User's customer premises wiring is present and environmental conditions permit, either Party may remove the End User premises wiring from the other Party's NID and connect such wiring to that Party's own NID;
- 2.7.3.1.3 Either Party may enter the subscriber access chamber or dual chamber NID enclosures for the purpose of extending a cross-connect or spliced jumper wire from the customer premises wiring through a suitable "punch-out" hole of such NID enclosures; or

- 2.7.3.1.4 AFN may request BellSouth to make other rearrangements to the End User premises wiring terminations or terminal enclosure on a time and materials cost basis
- 2.7.3.2 In no case shall either Party remove or disconnect the other Party's loop facilities from either Party's NIDs, enclosures, or protectors unless the applicable Commission has expressly permitted the same and the disconnecting Party provides prior notice to the other Party. In such cases, it shall be the responsibility of the Party disconnecting loop facilities to leave undisturbed the existing form of electrical protection and to maintain the physical integrity of the NID. It will be AFN's responsibility to ensure there is no safety hazard, and AFN will hold BellSouth harmless for any liability associated with the removal of the BellSouth Loop from the BellSouth NID. Furthermore, it shall be the responsibility of the disconnecting Party, once the other Party's loop has been disconnected from the NID, to reconnect the disconnected loop to a nationally recognized testing laboratory listed station protector, which has been grounded as per Article 800 of the National Electrical Code. If no spare station protector exists in the NID, the disconnected loop must be appropriately cleared, capped and stored.
- 2.7.3.3 AFN shall not remove or disconnect ground wires from BellSouth's NIDs, enclosures, or protectors
- 2.7.3.4 AFN shall not remove or disconnect NID modules, protectors, or terminals from BellSouth's NID enclosures
- 2.7.3.5 Due to the wide variety of NID enclosures and outside plant environments, BellSouth will work with AFN to develop specific procedures to establish the most effective means of implementing this section if the procedures set forth herein do not apply to the NID in question.
- 2.7.4 Technical Requirements
- 2.7.4.1 The NID shall provide an accessible point of interconnection and shall maintain a connection to ground
- 2.7.4.2 If an existing NID is accessed, it shall be capable of transferring electrical analog or digital signals between the End User's customer premises and the distribution media and/or cross-connect to AFN's NID
- 2.7.4.3 Existing BellSouth NIDs will be operational and provided in "as is" condition. AFN may request BellSouth to do additional work to the NID on a time and material basis. When AFN deploys its own local loops in a multiple-line termination device, AFN shall specify the quantity of NID connections that it requires within such device

2.8 Subloop Elements.

2.8.1 Where facilities permit, BellSouth shall offer access to its Unbundled Subloop (USL) elements as specified herein

2.8.2 Unbundled Subloop Distribution (USLD)

2.8.2.1 The USLD facility is a dedicated transmission facility that BellSouth provides from an End User's point of demarcation to a BellSouth cross-connect device. The BellSouth cross-connect device may be located within a remote terminal (RT) or a stand-alone cross-box in the field or in the equipment room of a building. The USLD media is a copper twisted pair that can be provisioned as a 2-wire or 4-wire facility. BellSouth will make available the following subloop distribution offerings where facilities exist:

USLD – Voice Grade (USLD-VG)

Unbundled Copper Subloop (UCSL)

USLD – Intrabuilding Network Cable (USLD-INC (aka riser cable))

2.8.2.2 USLD-VG is a copper subloop facility from the cross-box in the field up to and including the point of demarcation at the End User's premises and may have load coils.

2.8.2.3 UCSL is a copper facility eighteen thousand (18,000) feet or less in length provided from the cross-box in the field up to and including the End User's point of demarcation. If available, this facility will not have any intervening equipment such as load coils between the End User and the cross-box.

2.8.2.3.1 If AFN requests a UCSL and it is not available, AFN may request the copper Subloop facility be modified pursuant to the ULM process to remove load coils and/or excessive bridged taps. If load coils and/or excessive bridged taps are removed, the facility will be classified as a UCSL.

2.8.2.4 USLD-INC is the distribution facility owned or controlled by BellSouth inside a building or between buildings on the same property that is not separated by a public street or road. USLD-INC includes the facility from the cross-connect device in the building equipment room up to and including the point of demarcation at the End User's premises.

2.8.2.4.1 Upon request for USLD-INC from AFN, BellSouth will install a cross-connect panel in the building equipment room for the purpose of accessing USLD-INC pairs from a building equipment room. The cross-connect panel will function as a single point of interconnection (SPOI) for USLD-INC and will be accessible by multiple carriers as space permits. BellSouth will place cross-connect blocks in twenty five (25) pair increments for AFN's use on this cross-connect panel. AFN

will be responsible for connecting its facilities to the twenty five (25) pair cross-connect block(s)

- 2.8.2.5 For access to Voice Grade USLD and UCSL, AFN shall install a cable to the BellSouth cross-box pursuant to the terms and conditions for physical collocation for remote sites set forth in Attachment 4. This cable would be connected by a BellSouth technician within the BellSouth cross-box during the set-up process. AFN's cable pairs can then be connected to BellSouth's USL within the BellSouth cross-box by the BellSouth technician.
- 2.8.2.6 Through the SI process, BellSouth will determine whether access to USLs at the location requested by AFN is technically feasible and whether sufficient capacity exists in the cross-box. If existing capacity is sufficient to meet AFN's request, then BellSouth will perform the site set-up as described in the CLEC Information Package, located at BellSouth's Interconnection Web site address: <http://www.interconnection.bellsouth.com/products/html/unes.html>
- 2.8.2.7 The site set-up must be completed before AFN can order Subloop pairs. For the site set-up in a BellSouth cross-connect box in the field, BellSouth will perform the necessary work to splice AFN's cable into the cross-connect box. For the site set-up inside a building equipment room, BellSouth will perform the necessary work to install the cross-connect panel and the connecting block(s) that will be used to provide access to the requested USLs.
- 2.8.2.8 Once the site set-up is complete, AFN will request Subloop pairs through submission of a LSR form to the Local Carrier Service Center (LCSC). OC is required with USL pair provisioning when AFN requests reuse of an existing facility, and the OC charge shall be billed in addition to the USL pair rate. For expedite requests by AFN for Subloop pairs, expedite charges will apply for intervals less than five (5) days.
- 2.8.2.9 USLs will be provided in accordance with BellSouth's TR73600 Unbundled Local Loop Technical Specifications.
- 2.8.3 Unbundled Network Terminating Wire (UNTW)
- 2.8.3.1 UNTW is unshielded twisted copper wiring that is used to extend circuits from an intra-building network cable terminal or from a building entrance terminal to an individual End User's point of demarcation. It is the final portion of the Loop that in multi-subscriber configurations represents the point at which the network branches out to serve individual subscribers.
- 2.8.3.2 This element will be provided in MDUs and/or Multi-Tenants Units (MTUs) where either Party owns wiring all the way to the End User's premises. Neither Party will provide this element in locations where the property owner provides its own

wiring to the End User's premises, where a third party owns the wiring to the End User's premises.

2 8 3 3 Requirements

- 2.8.3.3 1 On a multi-unit premises, upon request of the other Party (Requesting Party), the Party owning the network terminating wire (Provisioning Party) will provide access to UNTW pairs on an Access Terminal that is suitable for use by multiple carriers at each Garden Terminal or Wiring Closet
- 2.8.3.3 2 The Provisioning Party shall not be required to install new or additional NTW beyond existing NTW to provision the services of the Requesting Party
- 2.8.3 3 3 In existing MDUs and/or MTUs in which BellSouth does not own or control wiring (INC/NTW) to the End Users premises, and AFN does own or control such wiring, AFN will install UNTW Access Terminals for BellSouth under the same terms and conditions as BellSouth provides UNTW Access Terminals to AFN
- 2 8 3 3.4 In situations in which BellSouth activates a UNTW pair, BellSouth will compensate AFN for each pair activated commensurate to the price specified in AFN's Agreement
- 2 8.3 3 5 Upon receipt of the UNTW SI requesting access to the Provisioning Party's UNTW pairs at a multi-unit premises, representatives of both Parties will participate in a meeting at the site of the requested access. The purpose of the site visit will include discussion of the procedures for installation and location of the Access Terminals. By request of the Requesting Party, an Access Terminal will be installed either adjacent to each of the Provisioning Party's Garden Terminal or inside each Wiring Closet. The Requesting Party will deliver and connect its central office facilities to the UNTW pairs within the Access Terminal. The Requesting Party may access any available pair on an Access Terminal. A pair is available when a pair is not being utilized to provide service or where the End User has requested a change in its local service provider to the Requesting Party. Prior to connecting the Requesting Party's service on a pair previously used by the Provisioning Party, the Requesting Party is responsible for ensuring the End User is no longer using the Provisioning Party's service or another CLEC's service before accessing UNTW pairs
- 2.8 3 3 6 Access Terminal installation intervals will be established on an individual case basis
- 2.8 3 3.7 The Requesting Party is responsible for obtaining the property owner's permission for the Provisioning Party to install an Access Terminal(s) on behalf of the Requesting Party. The submission of the SI by the Requesting Party will serve as certification by the Requesting Party that such permission has been obtained. If

the property owner objects to Access Terminal installations that are in progress or within thirty (30) days after completion and demands removal of Access Terminals, the Requesting Party will be responsible for costs associated with removing Access Terminals and restoring the property to its original state prior to Access Terminals being installed

- 2 8 3 3 8 The Requesting Party shall indemnify and hold harmless the Provisioning Party against any claims of any kind that may arise out of the Requesting Party's failure to obtain the property owner's permission. The Requesting Party will be billed for nonrecurring and recurring charges for accessing UNTW pairs at the time the Requesting Party activates the pair(s). The Requesting Party will notify the Provisioning Party within five (5) business days of activating UNTW pairs using the LSR form
- 2.8.3.3 9 If a trouble exists on a UNTW pair, the Requesting Party may use an alternate spare pair that serves that End User if a spare pair is available. In such cases, the Requesting Party will re-terminate its existing jumper from the defective pair to the spare pair. Alternatively, the Requesting Party will isolate and report troubles in the manner specified by the Provisioning Party. The Requesting Party must tag the UNTW pair that requires repair. If the Provisioning Party dispatches a technician on a reported trouble call and no UNTW trouble is found, the Provisioning Party will charge Requesting Party for time spent on the dispatch and testing the UNTW pair(s)
- 2.8.3.3 10 If the Requesting Party initiates the Access Terminal installation and the Requesting Party has not activated at least ten percent (10%) of the capacity of the Access Terminal installed pursuant to the Requesting Party's request for an Access Terminal within six (6) months of installation of the Access Terminal, the Provisioning Party will bill the Requesting Party a nonrecurring charge (NRC) equal to the actual cost of provisioning the Access Terminal.
- 2 8 3 3 11 If the Provisioning Party determines that the Requesting Party is using the UNTW pairs without reporting the activation of the pairs, the Requesting Party will be billed for the use of that pair back to the date the End User began receiving service from the Requesting Party at that location. Upon request, the Requesting Party will provide copies of its billing record to substantiate such date. If the Requesting Party fails to provide such records, then the Provisioning Party will bill the Requesting Party back to the date of the Access Terminal installation
- 2 8 4 Dark Fiber Loop.
- 2.8.4 1 Dark Fiber Loop is an unused optical transmission facility, without attached signal regeneration, multiplexing, aggregation or other electronics, from the demarcation point at an End User's premises to the End User's serving wire center. Dark Fiber Loops may be strands of optical fiber existing in aerial or underground structure.

BellSouth will not provide line terminating elements, regeneration or other electronics necessary for AFN to utilize Dark Fiber Loops

2 8 4 2 Transition for Dark Fiber Loop

2 8 4 2 1 For purposes of this Section 2 8.4, the Transition Period for Dark Fiber Loops is the eighteen (18) month period beginning March 11, 2005 and ending September 10, 2006

2 8 4 2.2 For purposes of this Section 2 8.4, Embedded Base means Dark Fiber Loops that were in service for AFN as of March 10, 2005. Subsequent disconnects or loss of End Users shall be removed from the Embedded Base

2.8 4 3 During the Transition Period only, BellSouth shall make available for the Embedded Base Dark Fiber Loops for AFN at the terms and conditions set forth in this Attachment

2.8.4 4 The rates for AFN's Embedded Base of Dark Fiber Loops during the Transition Period shall be as set forth in Exhibit A

2.8 4 5 The Transition Period shall apply only to AFN's Embedded Base and AFN shall not add new Dark Fiber Loops pursuant to this Agreement

2.8.4.6 Effective September 11, 2006, Dark Fiber Loops will no longer be made available pursuant to this Agreement and any remaining Embedded Base will be disconnected

2 9 Loop Makeup

2 9 1 Description of Service

2.9 1 1 BellSouth shall make available to AFN LMU information with respect to Loops that are required to be unbundled under this Agreement so that AFN can make an independent judgment about whether the Loop is capable of supporting the advanced services equipment AFN intends to install and the services AFN wishes to provide. LMU is a preordering transaction, distinct from AFN ordering any other service(s). Loop Makeup Service Inquiries (LMUSI) and mechanized LMU queries for preordering LMU are likewise unique from other preordering functions with associated SIs as described in this Agreement.

2.9 1.2 BellSouth will provide AFN LMU information consisting of the composition of the Loop material (copper/fiber), the existence, location and type of equipment on the Loop, including but not limited to digital loop carrier or other remote concentration devices, feeder/distribution interfaces, bridged taps, load coils, pair-gain devices, the Loop length, the wire gauge and electrical parameters

- 2 9 1 3 BellSouth's LMU information is provided to AFN as it exists either in BellSouth's databases or in its hard copy facility records. BellSouth does not guarantee accuracy or reliability of the LMU information provided.
- 2 9 1 4 BellSouth's provisioning of LMU information to the requesting CLEC for facilities is contingent upon either BellSouth or the requesting CLEC controlling the Loop(s) that serve the service location for which LMU information has been requested by the CLEC. The requesting CLEC is not authorized to receive LMU information on a facility used or controlled by another CLEC unless BellSouth receives a LOA from the voice CLEC (owner) or its authorized agent on the LMUSI submitted by the requesting CLEC.
- 2 9.1 5 AFN may choose to use equipment that it deems will enable it to provide a certain type and level of service over a particular BellSouth Loop as long as that equipment does not disrupt other services on the BellSouth network. The determination shall be made solely by AFN and BellSouth shall not be liable in any way for the performance of the advanced data services provisioned over said Loop. The specific Loop type (e.g., ADSL, HDSL, or otherwise) ordered on the LSR must match the LMU of the Loop reserved taking into consideration any requisite line conditioning. The LMU data is provided for informational purposes only and does not guarantee AFN's ability to provide advanced data services over the ordered Loop type. Furthermore, the LMU information for Loops other than copper-only Loops (e.g., ADSL, UCL-ND, etc.) that support xDSL services, is subject to change at any time due to modifications and/or upgrades to BellSouth's network. Except as set forth in Section 2 9 1 6, copper-only Loops will not be subject to change due to modification and/or upgrades to BellSouth's network and will remain on copper facilities until the Loop is disconnected by AFN or the End User, or until BellSouth retires the copper facilities via the FCC's and any applicable Commission's requirements. AFN is fully responsible for any of its service configurations that may differ from BellSouth's technical standard for the Loop type ordered.
- 2.9.1 6 If BellSouth retires its copper facilities using 47 C F R § 52.325(a) requirements, or is required by a governmental agency or regulatory body to move or replace copper facilities as a maintenance procedure, BellSouth will notify AFN, according to the applicable network disclosure requirements. It will be AFN's responsibility to move any service it may provide over such facilities to alternative facilities. If AFN fails to move the service to alternative facilities by the date in the network disclosure notice, BellSouth may terminate the service to complete the network change.
- 2 9 2 Submitting LMUSI
- 2.9.2 1 AFN may obtain LMU information and reserve facilities by submitting a mechanized LMU query or a manual LMUSI according to the terms and

conditions as described in the LMU CLEC Information Package, incorporated herein by reference as it may be amended from time to time. The CLEC Information Package is located at the "CLEC UNE Product" Web site address www.interconnection.bellsouth.com/guides/html/unes.html. After obtaining the Loop information from the mechanized LMU process, if AFN needs further Loop information in order to determine Loop service capability, AFN may initiate a separate Manual SI for a separate NRC as set forth in Exhibit A.

- 2.9.2.2 All LSRs issued for reserved facilities shall reference the facility reservation number as provided by BellSouth. AFN will not be billed any additional LMU charges for the Loop ordered on such LSR. If, however, AFN does not reserve facilities upon an initial LMUSI, AFN's placement of an order for an advanced data service type facility will incur the appropriate billing charges to include SI and reservation per Exhibit A.
- 2.9.2.3 Where AFN has reserved multiple Loop facilities on a single reservation, AFN may not specify which facility shall be provisioned when submitting the LSR. For those occasions, BellSouth will assign to AFN, subject to availability, a facility that meets the BellSouth technical standards of the BellSouth type Loop as ordered by AFN.
- 2.9.2.4 Charges for preordering manual LMUSI or mechanized LMU are separate from any charges associated with ordering other services from BellSouth.
- 3 Line Splitting**
- 3.1 Line splitting shall mean that a provider of data services (a Data LEC) and a provider of voice services (a Voice CLEC) to deliver voice and data service to End Users over the same Loop. The Voice CLEC and Data LEC may be the same or different carriers.
- 3.2 Line Splitting – UNE-L In the event AFN provides its own switching or obtains switching from a third party, AFN may engage in line splitting arrangements with another CLEC using a splitter, provided by AFN, in a Collocation Space at the central office where the loop terminates into a distribution frame or its equivalent.
- 3.3 Line Splitting – Loop and UNE Port (UNE-P)
- 3.3.1 To the extent AFN is purchasing UNE-P pursuant to this Agreement, BellSouth will permit AFN to replace UNE-P with Line Splitting. The UNE-P arrangement will be converted to a stand-alone Loop, a Network Element switch port, two collocation cross-connects and the high frequency spectrum line activation. The resulting arrangement shall continue to be included in AFN's Embedded Base as described in Section 5.4.3.2.

- 3.3.2 AFN shall provide BellSouth with a signed LOA between it and the Data LEC or Voice CLEC with which it desires to provision Line Splitting services, if AFN will not provide voice and data services
- 3.3.3 Line Splitting arrangements in service pursuant to this Section 3.3 must be disconnected or provisioned pursuant to Section 3.2 on or before March 10, 2006
- 3.4 Provisioning Line Splitting and Splitter Space
- 3.4.1 The Data LEC, Voice CLEC or BellSouth may provide the splitter. When AFN or its authorized agent owns the splitter, Line Splitting requires the following: a non-designed analog Loop from the serving wire center to the NID at the End User's location, a collocation cross-connection connecting the Loop to the collocation space, a second collocation cross-connection from the collocation space connected to a voice port, the high frequency spectrum line activation, and a splitter. When BellSouth owns the splitter, Line Splitting requires the following: a non-designed analog Loop from the serving wire center to the NID at the End User's location with CFA and splitter port assignments, and a collocation cross-connection from the collocation space connected to a voice port
- 3.4.2 An unloaded 2-wire copper Loop must serve the End User. The meet point for the Voice CLEC and the Data LEC is the point of termination on the MDF for the Data LEC's cable and pairs
- 3.4.3 The foregoing procedures are applicable to migration from a UNE-P arrangement to Line Splitting Service
- 3.5 CLEC Provided Splitter – Line Splitting
- 3.5.1 To order High Frequency Spectrum on a particular Loop, AFN must have a DSLAM collocated in the central office that serves the End User of such Loop
- 3.5.2 AFN must provide its own splitters in a central office and have installed its DSLAM in that central office
- 3.5.3 AFN may purchase, install and maintain central office POTS splitters in its collocation arrangements. AFN may use such splitters for access to its customers and to provide digital line subscriber services to its customers using the High Frequency Spectrum. Existing Collocation rules and procedures and the terms and conditions relating to Collocation set forth in Attachment 4-Central Office shall apply
- 3.5.4 Any splitters installed by AFN in its collocation arrangement shall comply with ANSI T1.413, Annex E, or any future ANSI splitter Standards. AFN may install any splitters that BellSouth deploys or permits to be deployed for itself or any BellSouth affiliate

3 6 Maintenance – Line Splitting

3 6 1 BellSouth will be responsible for repairing voice troubles and the troubles with the physical loop between the NID at the End User's premises and the termination point

3 6 2 AFN shall indemnify, defend and hold harmless BellSouth from and against any claims, losses, actions, causes of action, suits, demands, damages, injury, and costs including reasonable attorney fees, which arise out of actions related to the other service provider, except to the extent caused by BellSouth's gross negligence or willful misconduct.

4 **Local Switching**

4 1 Notwithstanding anything to the contrary in this Agreement, the services offered pursuant to this Section 4 are limited to DS0 level Local Switching and BellSouth is not required to provide Local Switching pursuant to this Agreement except as set forth in Section 4 2

4 2 Transition for Local Switching

4 2.1 For purposes of this Section 4, the Transition Period for Local Switching is the twelve (12) month period beginning March 11, 2005 and ending March 10, 2006.

4 2 2 For the purposes of this Section 4, Embedded Base shall mean Local Switching and any additional elements that are required to be provided in conjunction therewith that were in service for AFN as of March 10, 2005. Subsequent disconnects or loss of End Users shall be removed from the Embedded Base.

4 2 3 During the Transition Period only, BellSouth shall make Local Switching available for the Embedded Base, in addition to all elements that are required to be provided in conjunction with Local Switching, at the rates, terms and conditions set forth in this Attachment. The Transition Period shall apply only to AFN's Embedded Base and AFN shall not place new orders for Local Switching pursuant to this Agreement.

4.2.4 The rates for AFN's Embedded Base of Local Switching during the Transition Period shall be as set forth in Exhibit A

4.2.5 Effective March 11, 2006, Local Switching will no longer be made available pursuant to this Agreement and any remaining Embedded Base will be disconnected

4 3 Local Switching Capability, including Tandem Switching Capability

- 4.3.1 Local Switching capability is defined as all line-side and trunk-side facilities, plus the features, functions, and capabilities of the switch. The features, functions, and capabilities of the switch shall include the basic switching function of connecting lines to lines, lines to trunks, trunks to lines, and trunks to trunks. Local Switching includes all vertical features that the switch is capable of providing, including custom calling, custom local area signaling service features, and Centrex, as well as any technically feasible customized routing functions.
- 4.3.2 Unbundled local switching consists of three separate components: Unbundled Ports, End Office Switching Functionality, and End Office Interoffice Trunk Ports.
- 4.3.3 Unbundled Local Switching combined with Common Transport and, if necessary, Tandem Switching provides to AFN's End User local calling and the ability to presubscribe to a primary carrier for intraLATA and/or to presubscribe to a primary carrier for interLATA toll service.
- 4.3.4 Provided that AFN has unbundled Local Switching from BellSouth and uses the BellSouth Carrier Identification Code (CIC) for its End Users' Local Preferred Interexchange Carrier (LPIC) or if a BellSouth local End User selects BellSouth as its LPIC, then the Parties will consider as local any calls originated by a AFN local End User, or originated by a BellSouth local End User and terminated to a AFN local End User, where such calls originate and terminate in the same LATA, except for those calls originated and terminated through switched access arrangements (i.e., calls that are transported by a Party other than BellSouth). For such calls, BellSouth will charge AFN the Network Elements for the BellSouth facilities utilized. Neither Party shall bill the other originating or terminating switched access charges for such calls. Intercarrier compensation for local calls between BellSouth and AFN shall be as described in BellSouth's UNE Local Call Flows set forth on BellSouth's Web site <http://interconnection.bellsouth.com/products/docs/FLOWSPPT.pdf>.
- 4.3.5 Where AFN has unbundled Local Switching from BellSouth but does not use the BellSouth CIC for its End Users' LPIC, BellSouth will consider as local those direct dialed telephone calls that originate from a AFN End User and terminate within the basic local calling area or within the extended local calling areas and that are dialed using seven (7) or ten (10) digits as defined and specified in Section A3 of BellSouth's General Subscriber Services Tariffs (GSST). For such local calls, BellSouth will charge AFN the Network Elements for the BellSouth facilities utilized. Intercarrier compensation for local calls between BellSouth and AFN shall be as described in BellSouth's UNE Local Call Flows set forth on BellSouth's website.
- 4.3.6 For any calls that originate and terminate through switched access arrangements (i.e., calls that are transported by a party other than BellSouth), BellSouth shall bill AFN the Network Elements for the BellSouth facilities utilized. Each Party may

bill the toll provider originating or terminating switched access charges as appropriate

- 4.3.7 Unbundled Ports may or may not include individual features. Where applicable and available, non-switch-based services may be ordered with the Unbundled Port at BellSouth's retail rates.
- 4.3.8 Any features that are not currently available but are technically feasible through the switch can be requested through the BFR/NBR Process as set forth in Attachment 11.
- 4.3.9 BellSouth will provide to AFN selective routing of calls to a requested Operator System platform pursuant to this Agreement. Any other routing requests by AFN will be made pursuant to the BFR/NBR Process as set forth in Attachment 11.
- 4.3.10 BellSouth shall perform routine testing (e.g., Mechanized Loop Tests (MLT) and test calls such as 105, 107 and 108 type calls) and fault isolation on a mutually agreed upon schedule.
- 4.3.11 BellSouth shall control congestion points such as those caused by radio station call-ins and network routing abnormalities. All traffic shall be restricted in a non-discriminatory manner.
- 4.3.12 BellSouth shall perform manual call trace and permit customer originated call trace. BellSouth shall provide Switching Service Point (SSP) capabilities and signaling software to interconnect the signaling links destined to the Signaling Transfer Point Switch (STPS). These capabilities shall adhere to the technical specifications set forth in the applicable industry standard technical references.
- 4.3.13 BellSouth shall provide interfaces to adjuncts through Telcordia standard interfaces. These adjuncts can include, but are not limited to, the Service Circuit Node and Automatic Call Distributors. BellSouth shall offer to AFN all Advanced Intelligent Network (AIN) triggers in connection with its Service Creation Environment and Service Management System (SCE/SMS) offering.
- 4.3.14 BellSouth shall provide access to SS7 Signaling Network or Multi-Frequency trunking if requested by AFN.
- 4.3.15 BellSouth shall provide the following Local Switching interfaces.
 - 4.3.15.1 Standard Tip/Ring interface including loopstart or groundstart, on-hook signaling (e.g., for calling number, calling name and message waiting lamp),
 - 4.3.15.2 Coin phone signaling;

- 4 3 15 3 Basic Rate Interface ISDN adhering to appropriate Telcordia Technical Requirements,
- 4 3.15 4 2-wire analog interface to PBX,
- 4 3 15.5 4-wire analog interface to PBX, and
- 4.3 15 6 Loops adhering to Telcordia TR-NWT-08 and TR-NWT-303 specifications to interconnect Digital Loop Carriers.
- 4 3.16 AFN shall maintain the individual telephone number and the correct corresponding address/location data, including maintaining the End User listed address as the actual physical End User location in the E911 ALI Database.
- 4 3.17 AFN will be responsible and liable for any errors resulting from the submission of invalid telephone number and address/location data for the AFN's End Users
- 4.4 Common (Shared) Transport
- 4.4.1 Common (Shared) Transport, defined as transmission facilities shared by more than one carrier, including BellSouth, between end office switches, between end office switches and tandem switches, and between tandem switches, in BellSouth's network Where BellSouth Network Elements are connected by intraoffice wiring, such wiring is provided as part of the Network Element and is not Common (Shared) Transport.
- 4.4.2 Notwithstanding any other provision of this Agreement, BellSouth will only provide unbundled access to Common (Shared) Transport to the extent BellSouth is required to provide and is providing Local Switching to AFN.
- 4.4.3 Technical Requirements of Common (Shared) Transport
- 4 4.3 1 Common (Shared) Transport provided on DS1, DS3, and STS-1 circuits shall at a minimum meet the performance, availability, jitter, and delay requirements specified for Central Office to Central Office (CO to CO) connections in the applicable industry standards
- 4.4.3.2 BellSouth shall be responsible for the engineering, provisioning, and maintenance of the underlying equipment and facilities that are used to provide Common (Shared) Transport
- 4.4 3.3 At a minimum, Common (Shared) Transport shall meet all of the requirements set forth in the applicable industry standards.
- 4 5 Tandem Switching

- 4 5 1 The Tandem Switching capability Network Element is defined as
(i) trunk-connect facilities, which include, but are not limited to, the connection between trunk termination at a cross-connect panel and switch trunk card, (ii) the basic switch trunk function of connecting trunks to trunks, and (iii) the functions that are centralized in the Tandem Switches (as distinguished from separate end office switches), including but not limited to call recording, the routing of calls to operator services and signaling conversion features
- 4.5 2 Where AFN utilizes portions of the BellSouth network in originating or terminating traffic, the Tandem Switching rates are applied in call scenarios where the Tandem Switching Network Element has been utilized. Because switch recordings cannot accurately indicate on a per call basis when the Tandem Switching Network Element has been utilized for an interoffice call originating from a UNE port and terminating to a BellSouth, Independent Company or Facility-Based CLEC office, BellSouth has developed, based upon call studies, a melded rate that takes into account the average percentage of calls that utilize Tandem Switching in these scenarios. BellSouth shall apply the melded Tandem Switching rate for every call in these scenarios. BellSouth shall utilize the melded Tandem Switching Rate until BellSouth has the capability to measure actual Tandem Switch usage in each call scenario specifically mentioned above, at which point the rate for the actual Tandem Switch usage shall apply. The UNE Local Call Flows set forth on BellSouth's website, as amended from time to time and incorporated herein by this reference, illustrate when the full or melded Tandem Switching rates apply for specific scenarios.
- 4.5 3 Technical Requirements
- 4.5 3 1 Tandem Switching shall have the same capabilities or equivalent capabilities as those described in Telcordia TR-TSY-000540 Issue 2R2, Tandem Supplement, June 1, 1990. The requirements for Tandem Switching include but are not limited to the following.
- 4.5.3.1.1 Tandem Switching shall provide signaling to establish a tandem connection,
- 4 5.3 1.2 Tandem Switching will provide screening as jointly agreed to by AFN and BellSouth;
- 4 5.3.1 3 Where applicable, Tandem Switching shall provide AIN triggers supporting AIN features where such routing is not available from the originating end office switch, to the extent such Tandem switch has such capability;
- 4.5 3 1 4 Where applicable, Tandem Switching shall provide access to Toll Free number database,

- 4 5 3 1 5 Tandem Switching shall provide connectivity to Public Safety Answering Point (PSAP)s where 911 solutions are deployed and the tandem is used for 911, and
- 4 5 3 1 6 Where appropriate, Tandem Switching shall provide connectivity for the purpose of routing transit traffic to and from other carriers.
- 4 5 3 2 BellSouth may perform testing and fault isolation on the underlying switch that is providing Tandem Switching. Such testing shall be testing routinely performed by BellSouth. The results and reports of the testing shall be made available to AFN.
- 4.5.3.3 BellSouth shall control congestion points and network abnormalities. All traffic will be restricted in a non-discriminatory manner.
- 4.5 3 4 Tandem Switching shall process originating toll free traffic received from AFN's local switch.
- 4 5.3.5 In support of AIN triggers and features, Tandem Switching shall provide SSP capabilities when these capabilities are not available from the Local Switching Network Element to the extent such Tandem Switch has such capability.
- 4 5 4 Upon AFN's purchase of overflow trunk groups, Tandem Switching shall provide an alternate routing pattern for AFN's traffic overflowing from direct end office high usage trunk groups.
- 4.6 Remote Call Forwarding (URCF)
- 4.6.1 As an option, BellSouth shall make available to AFN an unbundled port with Remote Call Forwarding capability. URCF service combines the functionality of unbundled Local Switching, Tandem Switching and common transport to forward calls from the URCF service telephone number (the number dialed by the calling party) to another telephone number selected by the URCF service subscriber. AFN must ensure that the following conditions are satisfied:
 - 4 6 1 1 the End User of the forward-to number (service) agrees to receive calls forwarded using the URCF service (if such End User is different from the URCF service End User),
 - 4 6.1 2 the forward-to number (service) is equipped with sufficient capacity to receive the volume of calls that will be generated from the URCF service;
 - 4 6.1 3 the URCF service will not be utilized to forward calls to another URCF or similar service, and
 - 4 6.1 4 the forward-to number (service) is not a public safety number (e.g., 911, fire or police number)

- 4.6.2 In addition to the charge for the URCF service port, BellSouth shall charge AFN the rates set forth in Exhibit A for unbundled Local Switching, Tandem Switching, and Common Transport, including all associated usage incurred for calls from the URCF service telephone number (the number dialed by the calling party) to the forward-to number (service)
- 4.7 AIN Selective Carrier Routing for Operator Services, Directory Assistance and Repair Centers
- 4.7.1 Where BellSouth provides Local Switching to AFN, BellSouth will provide AIN Selective Carrier Routing (AIN SCR) at the request of AFN. AIN SCR will provide AFN with the capability of routing operator calls, 0+ and 0- and 0+ NPA Local Numbering Plan Area (LNPA), 555-1212 directory assistance, 1+411 directory assistance and 611 repair center calls to pre-selected destinations
- 4.7.2 AFN shall order AIN SCR through its Account Team and/or Local Contract Manager. AIN SCR must first be established regionally and then on a per central office per state basis
- 4.7.3 AIN SCR is not available in DMS 10 switches
- 4.7.4 Where AIN SCR is utilized by AFN, the routing of AFN's End User calls shall be pursuant to information provided by AFN and stored in BellSouth's AIN SCR Service Control Point database. AIN SCR shall utilize a set of Line Class Codes (LCCs) unique to a basic class of service assigned on an "as needed" basis. The same LCCs will be assigned in each central office where AIN SCR is established.
- 4.7.5 Upon ordering AIN SCR Regional Service, AFN shall remit to BellSouth the nonrecurring Regional Service Order charge set forth in Exhibit A. There shall be a nonrecurring End Office Establishment Charge as set forth in Exhibit A, per office, due at the addition of each central office where AIN SCR will be utilized. For each AFN End User activated, there shall be a nonrecurring End User Establishment charge as set forth in Exhibit A. AFN shall pay the AIN SCR Per Query Charge set forth in Exhibit A.
- 4.7.6 This nonrecurring Regional Service Order charge will be non-refundable and will be paid with one half due up-front with the submission of all fully completed required forms including Regional SCR Order Request-Form A, Central Office AIN SCR Order Request - Form B, AIN SCR Central Office Identification Form - Form C, AIN SCR Routing Options Selection Form - Form D, and Routing Combinations Table - Form E. BellSouth has thirty (30) days to respond to AFN's fully completed firm order as a Regional Service Order. With the delivery of this firm order response to AFN, BellSouth considers that the delivery schedule of this service commences. The remaining half of the nonrecurring Regional Service

Order payment must be paid when at least ninety percent (90%) of the Central Offices listed on the original order have been turned up for the service

- 4.7.7 The nonrecurring End Office Establishment charge will be billed to AFN following BellSouth's normal monthly billing cycle for this type of order
- 4.7.8 End-User Establishment Orders will not be turned-up until the second payment is received for the Regional Service Order. The nonrecurring End Office Establishment charges will be billed to AFN following BellSouth's normal monthly billing cycle for this type of order
- 4.7.9 Additionally, the AIN SCR Per Query Charge will be billed to AFN following the normal billing cycle for per query charges
- 4.7.10 All other network components needed, (i.e., unbundled switching, unbundled local transport, etc.) will be billed per contracted rates
- 4.8 Selective Call Routing Using Line Class Codes (SCR-LCC)
- 4.8.1 Where AFN has purchased unbundled Local Switching from BellSouth and utilizes an operator services provider other than BellSouth, BellSouth will route AFN's End User calls to that provider through Selective Call Routing.
- 4.8.2 SCR-LCC provides the capability for AFN to have its Operator Call Processing/Directory Assistance (OCP/DA) calls routed to BellSouth's OCP/DA platform for BellSouth provided Custom Branded or Unbranded OCP/DA or to its own or an alternate OCP/DA platform for Self-Branded OCP/DA. SCR-LCC is only available if capacity is available in the requested BellSouth end office switches
- 4.8.3 Custom Branding for Directory Assistance (DA) is not available for certain classes of service, including but not limited to Hotel/Motel services, WATS service, and certain PBX services
- 4.8.4 Where available, AFN specific and unique LCCs are programmed in each BellSouth end office switch where AFN intends to serve End Users with customized OCP/DA branding. The LCCs specifically identify AFN's End Users so OCP/DA calls can be routed over the appropriate trunk group to the requested OCP/DA platform. Additional LCCs are required in each end office if the end office serves multiple NPAs (i.e., a unique LCC is required per NPA), and/or if the end office switch serves multiple rate areas and AFN intends to provide AFN - branded OCP/DA to its End Users in these multiple rate areas.
- 4.8.5 SCR-LCC supporting Custom Branding and Self Branding require AFN to order dedicated trunking from each BellSouth end office identified by AFN, either to the BellSouth Traffic Operator Position System (TOPS) for Custom Branding or to

the AFN Operator Service Provider for Self Branding. Separate trunk groups are required for Operator Services and for DA. Rates for trunks are set forth in applicable BellSouth's FCC No. 1 Tariff.

- 4.8.6 Unbranding - Unbranded DA and/or OCP calls ride common trunk groups provisioned by BellSouth from those end offices identified by AFN to the BellSouth TOPS.
- 4.8.7 The Rates for SCR-LCC are as set forth in Exhibit A. There is a NRC for the establishment of each LCC in each BellSouth central office. Furthermore, for Unbranded and Custom Branded OCP/DA provided by BellSouth Operator Services with unbundled ports and unbundled port/loop switch combinations, monthly recurring usage charges shall apply for the UNEs necessary to provide the service, such as end office and tandem switching and common transport. A flat rated end office switching charge shall apply to Self-Branded OCP/DA when used in conjunction with unbundled ports and unbundled port/loop switch combinations.

5 Unbundled Network Element Combinations

- 5.1 For purposes of this Section, references to "Currently Combined" Network Elements shall mean that the particular Network Elements requested by AFN are in fact already combined by BellSouth in the BellSouth network. References to "Ordinarily Combined" Network Elements shall mean that the particular Network Elements requested by AFN are not already combined by BellSouth in the location requested by AFN but are elements that are typically combined in BellSouth's network. References to "Not Typically Combined" Network Elements shall mean that the particular Network Elements requested by AFN are not elements that BellSouth combines for its use in its network.
- 5.1.1 Except as otherwise set forth in this Agreement, upon request, BellSouth shall perform the functions necessary to combine Network Elements that BellSouth is required to provide under this Agreement in any manner, even if those elements are not ordinarily combined in BellSouth's network, provided that such Combination is technically feasible and will not undermine the ability of other carriers to obtain access to Network Elements or to interconnect with BellSouth's network.
- 5.1.2 To the extent AFN requests a Combination for which BellSouth does not have methods and procedures in place to provide such Combination, rates and/or methods or procedures for such Combination will be developed pursuant to the BFR process.
- 5.2 Rates

- 5 2 1 The rates for the Currently Combined Network Elements specifically set forth in Exhibit A shall be the rates associated with such Combinations. Where a Currently Combined Combination is not specifically set forth in Exhibit A, the rate for such Currently Combined Combination shall be the sum of the recurring rates for those individual Network Elements as set forth in Exhibit A and/or Exhibit B in addition to the applicable nonrecurring switch-as-is charge set forth in Exhibit A.
- 5 2 2 The rates for the Ordinarily Combined Network Elements specifically set forth in Exhibit A shall be the nonrecurring and recurring charges for those Combinations. Where an Ordinarily Combined Combination is not specifically set forth in Exhibit A, the rate for such Ordinarily Combined Combination shall be the sum of the recurring rates for those individual Network Elements as set forth in Exhibit A and/or Exhibit B and nonrecurring rates for those individual Network Elements as set forth in Exhibit A.
- 5 2.3 The rates for Not Typically Combined Combinations shall be developed pursuant to the BFR process upon request of AFN.
- 5.3 Enhanced Extended Links (EELs)
- 5 3 1 EELs are combinations of Loops and Dedicated Transport as defined in this Attachment, together with any facilities, equipment, or functions necessary to combine those Network Elements. BellSouth shall provide AFN with EELs where the underlying Network Element are available and are required to be provided pursuant to this Agreement and in all instances where the requesting carrier meets the eligibility requirements, if applicable.
- 5 3 2 High-capacity EELs are (1) combinations of Loop and Dedicated Transport, (2) Dedicated Transport commingled with a wholesale loop, or (3) a loop commingled with wholesale transport at the DS1 and/or DS3 level as described in 47 C F R § 51.318(b).
- 5 3 3 By placing an order for a high-capacity EEL, AFN thereby certifies that the service eligibility criteria set forth herein are met for access to a converted high-capacity EEL, a new high-capacity EEL, or part of a high-capacity commingled EEL as a UNE. BellSouth shall have the right to audit AFN's high-capacity EELs as specified below.
- 5 3.4 Service Eligibility Criteria
- 5 3 4 1 High capacity EELs must comply with the following service eligibility requirements. AFN must certify for each high-capacity EEL that all of the following service eligibility criteria are met:

- 5 3 4 1 1 AFN has received state certification to provide local voice service in the area being served,
- 5 3 4.2 For each combined circuit, including each DS1 circuit, each DS1 EEL, and each DS1-equivalent circuit on a DS3 EEL:
- 5 3 4 2 1 1) Each circuit to be provided to each End User will be assigned a local number prior to the provision of service over that circuit,
- 5.3 4.2 2 2) Each DS1-equivalent circuit on a DS3 EEL must have its own local number assignment so that each DS3 must have at least twenty-eight (28) local voice numbers assigned to it,
- 5.3.4 2 3 3) Each circuit to be provided to each End User will have 911 or E911 capability prior to provision of service over that circuit;
- 5.3 4 2 4 4) Each circuit to be provided to each End User will terminate in a collocation arrangement that meets the requirements of 47 C.F.R. § 51.318(c);
- 5 3 4 2.5 5) Each circuit to be provided to each End User will be served by an interconnection trunk over which AFN will transmit the calling party's number in connection with calls exchanged over the trunk,
- 5.3 4 2 6 6) For each twenty-four (24) DS1 EELs or other facilities having equivalent capacity, AFN will have at least one (1) active DS1 local service interconnection trunk over which AFN will transmit the calling party's number in connection with calls exchanged over the trunk; and
- 5 3 4 2 7 7) Each circuit to be provided to each End User will be served by a switch capable of switching local voice traffic
- 5 3 4 3 BellSouth may, on an annual basis, audit AFN's records in order to verify compliance with the qualifying service eligibility criteria. The audit shall be conducted by a third party independent auditor, and the audit must be performed in accordance with the standards established by the American Institute for Certified Public Accountants (AICPA). To the extent the independent auditor's report concludes that AFN failed to comply with the service eligibility criteria, AFN must true-up any difference in payments, convert all noncompliant circuits to the appropriate service, and make the correct payments on a going-forward basis. In the event the auditor's report concludes that AFN did not comply in any material respect with the service eligibility criteria, AFN shall reimburse BellSouth for the cost of the independent auditor. To the extent the auditor's report concludes that AFN did comply in all material respects with the service eligibility criteria, BellSouth will reimburse AFN for its reasonable and demonstrable costs associated

with the audit. AFN will maintain appropriate documentation to support its certifications

5 3 4 4 In the event AFN converts special access services to UNEs, AFN shall be subject to the termination liability provisions in the applicable special access tariffs, if any

5 4 UNE-P

5 4 1 DS0 Local Switching, as defined in Section 4, in combination with a Loop and Common (Shared) Transport as defined in Section 4 4 (UNE-P) provides local exchange service for the origination or termination of calls. UNE-P supports the same local calling and feature requirements as described in the Local Switching section of this Attachment and the ability to presubscribe to a primary carrier for intraLATA toll service and/or to presubscribe to a primary carrier for interLATA toll service.

5.4 2 Notwithstanding anything to the contrary in this Agreement, BellSouth is not required to provide UNE-P pursuant to this Agreement except as set forth in this Section 5 4

5 4 3 Transition Period for UNE-P

5.4.3 1 For purposes of this Section 5.4, the Transition Period for UNE-P is the twelve (12) month period beginning March 11, 2005 and ending March 10, 2006.

5 4.3 2 For the purposes of this Section 5.4, Embedded Base shall mean UNE-P and any additional elements that are required to be provided in conjunction therewith that were in service for AFN as of March 10, 2005. Subsequent disconnects or loss of End Users shall be removed from the Embedded Base.

5 4 3 3 During the Transition Period only, BellSouth shall make UNE-P available for the Embedded Base, in addition to all elements that are required to be provided in conjunction with UNE-P, at the rates, terms and conditions set forth in this Attachment. The Transition Period shall apply only to AFN's Embedded Base and AFN shall not place new orders for UNE-P pursuant to this Agreement

5.4.3.4 The rates for AFN's Embedded Base of UNE-P during the Transition Period shall be as set forth in Exhibit A.

5.4.3 5 Effective March 11, 2006, UNE-P will no longer be made available pursuant to this Agreement and any remaining Embedded Base will be disconnected

5.4 4 BellSouth shall make 911 updates in the BellSouth 911 database for AFN's UNE-P. BellSouth will not bill AFN for 911 surcharges. AFN is responsible for paying all 911 surcharges to the applicable governmental agency.

5.5 Intercarrier Compensation

- 5 5 1 Intercarrier compensation for seven (7) or ten (10) digit dialed calls originated by AFN utilizing Local Switching shall apply as follows
- 5 5 2 For calls terminating to a BellSouth End User or to an End User served by BellSouth resold services, BellSouth shall charge AFN for End Office Switching as set forth in Exhibit A at the terminating end office
- 5.5.3 For calls terminating to a CLEC where such CLEC is utilizing a BellSouth switch port or port/loop combination to provide service to its End User, BellSouth shall charge AFN for End Office Switching as set forth in Exhibit A at the terminating end office BellSouth will not charge the terminating CLEC for End Office Switching as set forth in Exhibit A at the terminating end office
- 5.5.3.1 For calls terminating to third party carriers, such as CLECs, wireless carriers and independent companies, utilizing their own switches to serve their End Users, AFN is required to enter into interconnection or traffic exchange agreements with such third parties for the exchange of traffic through BellSouth's network If AFN does not have such an agreement with a third party carrier and BellSouth is charged termination charges by a third party terminating a call originated by AFN, or if such third party carrier bills BellSouth for terminating such calls, despite the existence of such an agreement, then BellSouth may, at its option
- 5 5.3 1 1 pay such charges as billed by the third party carrier and charge End Office Switching as set forth in Exhibit A to AFN for each such call, or
- 5 5.3.1 2 pay such charges as billed by the third party carrier and AFN will reimburse the full amount of such charges within thirty (30) days of BellSouth's request for reimbursement.
- 5 5 3.2 Intercarrier compensation for seven (7) or ten (10) digit dialed calls terminating to AFN utilizing Local Switching shall apply as follows
- 5 5.3.2 1 For calls originated by a BellSouth End User or by an End User served by resold BellSouth services, BellSouth shall not charge AFN for End Office Switching at the terminating end office for use of the network component, therefore, AFN shall not charge BellSouth intercarrier compensation or any other charges for termination of such calls
- 5.5.3.2.2 For calls originated by a CLEC where such CLEC is utilizing a BellSouth switch port or port/loop combination to provide service to its End User, BellSouth shall not charge AFN for End Office Switching at the terminating end office for use of the network component, therefore, AFN shall not charge the originating CLEC or BellSouth intercarrier compensation or any other charges for termination of such calls.

- 5.5.3.2.3 For calls originated by third party carriers, such as CLECs, wireless carriers and independent companies,utilizing their own switches to serve their End Users, AFN is required to enter into interconnection or traffic exchange agreements with such third parties for the exchange of traffic through BellSouth's network AFN may bill the third parties according to such agreements and shall not bill BellSouth for the exchange of traffic through BellSouth's network
- 5.5.3.3 Intercarrier compensation shall apply as follows for intralata 1+ dialed calls originated by AFN utilizing Local Switching where AFN uses BellSouth's CIC for its End User's LPIC
- 5.5.3.3.1 For calls terminating to a BellSouth End User or to an End User served by BellSouth resold services, BellSouth shall charge AFN for End Office Switching as set forth in Exhibit A at the terminating end office
- 5.5.3.3.2 For calls terminating to a CLEC where such CLEC is utilizing a BellSouth switch port or port/loop combination to provide service to its End User, BellSouth shall charge AFN for End Office Switching as set forth in Exhibit A at the terminating end office BellSouth will not charge the terminating CLEC for End Office Switching at the terminating end office In the event that BellSouth is charged termination charges by the CLEC, BellSouth may pay such charges and AFN will reimburse BellSouth the full amount of such charges within thirty (30) days following BellSouth's request for reimbursement
- 5.5.3.3.3 For calls terminating to third party carriers, such as CLECs, wireless carriers and independent companies, utilizing their own switches to serve their End Users, AFN is required to enter into interconnection or traffic exchange agreements with such third parties for the exchange of traffic through BellSouth's network If AFN does not have such an agreement with a third party carrier and BellSouth is charged termination charges by a third party terminating a call originated by AFN, or if such third party carrier bills BellSouth for terminating such calls, despite the existence of such an agreement, then BellSouth may, at its option.
- 5.5.3.3.3.1 pay such charges as billed by the third party carrier and charge End Office Switching as set forth in Exhibit A to AFN for each such call; or
- 5.5.3.3.3.2 pay such charges as billed by the third party carrier and AFN will reimburse BellSouth the full amount of such charges within thirty (30) days following BellSouth's request for reimbursement
- 5.5.3.4 Intercarrier compensation shall apply as follows for intralata 1+ dialed calls terminating to AFN utilizing Local Switching where the originating carrier uses BellSouth's CIC for its End User's LPIC

5 5 3 4 1 For calls originated by a BellSouth End User or by an End User served by BellSouth resold service, BellSouth shall charge AFN for End Office Switching as set forth in Exhibit A at the terminating end office for use of the End Office Switching network component in terminating such calls. AFN may charge BellSouth for intercarrier compensation at the End Office Switching as set forth in Exhibit A in this Agreement for such calls. AFN shall not charge originating or terminating switched access rates to BellSouth for termination of such calls.

5 5 3.5 For calls originated by or terminating to interexchange carriers through a switched access arrangement, AFN may bill the interexchange carrier in accordance with AFN's tariff and will not bill BellSouth any charges for such call. AFN shall pay BellSouth applicable charges for the use of BellSouth's network in accordance with the rates set forth in Exhibit A for originating and terminating such calls.

6 Dedicated Transport and Dark Fiber Transport

6 1 Dedicated Transport Dedicated Transport is defined as BellSouth's transmission facilities between wire centers or switches owned by BellSouth, or between wire centers or switches owned by BellSouth and switches owned by AFN. Including but not limited to DS1, DS3 and OCn level services, as well as dark fiber, dedicated to AFN. BellSouth shall not be required to provide access to OCn level Dedicated Transport under any circumstances pursuant to this Agreement. In addition, except as set forth in Section 6 2 below, BellSouth shall not be required to provide to AFN unbundled access to Dedicated Transport that does not connect a pair of wire centers or switches owned by BellSouth ("Entrance Facilities").

6 2 Transition for DS1 and DS3 Dedicated Transport Including DS1 and DS3 Entrance Facilities

6 2.1 For purposes of this Section 6 2, the Transition Period for DS1 and DS3 Dedicated Transport including all DS1 and DS3 Entrance Facilities is the twelve (12) month period beginning March 11, 2005 and ending March 10, 2006.

6.2 2 For purposes of this Section 6 2, Embedded Base means DS1 and DS3 Dedicated Transport including DS1 and DS3 Entrance Facilities that were in service for AFN as of March 10, 2005. Subsequent disconnects or loss of End Users shall be removed from the Embedded Base.

6.2.3 For purposes of this Section 6 2, a Business Line is as defined in 47 C.F.R. § 51.5.

6 2.4 BellSouth shall make available Dedicated Transport as defined in this Section 6. Notwithstanding anything to the contrary in this Agreement, BellSouth shall make available Dedicated Transport as described in this Section 6 2 only for AFN's Embedded Base during the Transition Period.

- 6.2.4.1 DS1 Dedicated Transport where both wire centers at the end points of the route contain 38,000 Business Lines or four (4) or more fiber-based collocators
- 6.2.4.2 DS3 Dedicated Transport where both wire centers at the end points of the route contain 24,000 or more Business Lines or three (3) or more fiber-based collocators.
- 6.2.4.3 During the Transition Period, the rates for AFN's Embedded Base of DS1 and DS3 Dedicated Transport as described in this Section 6.2 shall be as set forth in Exhibit B and the rates for AFN's Embedded Base of DS1 and DS3 Entrance Facilities as described in this Section 6.2 shall be as set forth in Exhibit A
- 6.2.4.4 The Transition Period shall apply only to AFN's Embedded Base and AFN shall not add new DS1 or DS3 Dedicated Transport as described in this Section 6.2, or DS1 or DS3 Entrance Facilities, pursuant to this Agreement
- 6.2.4.5 Once a wire center exceeds either of the thresholds set forth in this Section 6.2.4.1, no future DS1 Dedicated Transport unbundling will be required in that wire center.
- 6.2.4.6 Once a wire center exceeds either of the thresholds set forth in Section 6.2.4.2, no future DS3 Dedicated Transport will be required in that wire center.
- 6.2.4.7 At the end of the Transition Period any remaining Embedded Base will be disconnected
- 6.3 BellSouth shall.
 - 6.3.1 Provide AFN exclusive use of Dedicated Transport to a particular customer or carrier,
 - 6.3.2 Provide all technically feasible features, functions, and capabilities of Dedicated Transport as outlined within the technical requirements of this section,
 - 6.3.3 Permit, to the extent technically feasible, AFN to connect Dedicated Transport to equipment designated by AFN, including but not limited to, AFN's collocated facilities, and
 - 6.3.4 Permit, to the extent technically feasible, AFN to obtain the functionality provided by BellSouth's digital cross-connect systems
- 6.4 BellSouth shall offer Dedicated Transport:
 - 6.4.1 As capacity on a shared facility; and
 - 6.4.2 As a circuit (i.e., DS0, DS1, DS3, STS-1) dedicated to AFN

- 6.5 Dedicated Transport may be provided over facilities such as optical fiber, copper twisted pair, and coaxial cable, and shall include transmission equipment such as line terminating equipment, amplifiers, and regenerators.
- 6.6 AFN may obtain a maximum of ten (10) unbundled DS1 Dedicated Transport circuits or twelve (12) unbundled DS3 Dedicated Transport circuits, or their equivalent, on each route where the respective Dedicated Transport is available as a Network Element. A route is defined as a transmission path between one of BellSouth's wire centers or switches and another of BellSouth's wire centers or switches. A route between two (2) points may pass through one or more intermediate wire centers or switches. Transmission paths between identical end points are the same "route", irrespective of whether they pass through the same intermediate wire centers or switches, if any.
- 6.7 Technical Requirements
- 6.7.1 BellSouth shall offer DS0 equivalent interface transmission rates for DS0 or voice grade Dedicated Transport. For DS1 or DS3 circuits, Dedicated Transport shall at a minimum meet the performance, availability, jitter, and delay requirements specified for Customer Interface to Central Office (CI to CO) connections in the applicable industry standards.
- 6.7.2 BellSouth shall offer the following interface transmission rates for Dedicated Transport
- 6.7.2.1 DS0 Equivalent;
- 6.7.2.2 DS1;
- 6.7.2.3 DS3, and
- 6.7.2.4 SDH (Synchronous Digital Hierarchy) Standard interface rates are in accordance with International Telecommunications Union (ITU) Recommendation G.707 and Plesiochronous Digital Hierarchy (PDH) rates per ITU Recommendation G.704.
- 6.7.3 BellSouth shall design Dedicated Transport according to its network infrastructure. AFN shall specify the termination points for Dedicated Transport.
- 6.7.4 At a minimum, Dedicated Transport shall meet each of the requirements set forth in the applicable industry technical references and BellSouth Technical References,
- 6.7.4.1 Telcordia TR-TSY-000191 Alarm Indication Signals Requirements and Objectives, Issue 1, May 1986.
- 6.7.4.2 BellSouth's TR73501 LightGate® Service Interface and Performance Specifications, Issue D, June 1995.

- 6.7.4.3 BellSouth's TR73525 MegaLink®Service, MegaLink Channel Service and MegaLink Plus Service Interface and Performance Specifications, Issue C, May 1996
- 6.8 Unbundled Channelization (Multiplexing)
- 6.8.1 To the extent AFN is purchasing DS1 or DS3 or STS-1 Dedicated Transport pursuant to this Agreement, Unbundled Channelization (UC) provides the optional multiplexing capability that will allow a DS1 (1.544 Mbps) or DS3 (44.736 Mbps) or STS-1 (51.84 Mbps) Network Elements to be multiplexed or channelized at a BellSouth central office. Channelization can be accomplished through the use of a multiplexer or a digital cross-connect system at the discretion of BellSouth. Once UC has been installed, AFN may request channel activation on a channelized facility and BellSouth shall connect the requested facilities via COCIs. The COCI must be compatible with the lower capacity facility and ordered with the lower capacity facility. This service is available as defined in NECA 4.
- 6.8.2 BellSouth shall make available the following channelization systems and interfaces:
- 6.8.2.1 DS1 Channelization System channelizes a DS1 signal into a maximum of twenty-four (24) DS0s. The following COCI are available: Voice Grade, Digital Data and ISDN.
- 6.8.2.2 DS3 Channelization System channelizes a DS3 signal into a maximum of twenty-eight (28) DS1s. A DS1 COCI is available with this system.
- 6.8.2.3 STS-1 Channelization System channelizes a STS-1 signal into a maximum of twenty-eight (28) DS1s. A DS1 COCI is available with this system.
- 6.8.3 Technical Requirements. In order to assure proper operation with BellSouth provided central office multiplexing functionality, AFN's channelization equipment must adhere strictly to form and protocol standards. AFN must also adhere to such applicable industry standards for the multiplex channel bank, for voice frequency encoding, for various signaling schemes, and for sub rate digital access.
- 6.9 Dark Fiber Transport. Dark Fiber Transport is defined as Dedicated Transport that consists of unactivated optical interoffice transmission facilities without attached signal regeneration, multiplexing, aggregation or other electronics. Except as set forth in Section 6.9.1 below, BellSouth shall not be required to provide access to Dark Fiber Transport Entrance Facilities pursuant to this Agreement.
- 6.9.1 Transition for Dark Fiber Transport and Dark Fiber Transport Entrance Facilities

- 6 9 1 1 For purposes of this Section 6 9, the Transition Period for Dark Fiber Transport is the eighteen (18) month period beginning March 11, 2005 and ending September 10, 2006
- 6 9 1 2 For purposes of this Section 6 9, Embedded Base means Dark Fiber Transport that was in service for AFN as of March 10, 2005. Subsequent disconnects or loss of End Users shall be removed from the Embedded Base.
- 6.9.1.3 For purposes of this Section 6 9, a Business Line is as defined in 47 C.F.R. § 51.5
- 6.9.1.4 BellSouth shall make available Dark Fiber Transport as defined in this Section 6 9 1. Notwithstanding anything to the contrary in this Agreement, BellSouth shall make available Dark Fiber Transport as described in this Section 6.9 only for AFN's Embedded Base during the Transition Period.
- 6 9.1.4.1 Dark Fiber Transport where both wire centers at the end points of the route contain 24,000 or more Business Lines or three (3) or more fiber-based collocators.
- 6 9 1 5 During the Transition Period, the rates for AFN's Embedded Base of Dark Fiber Transport as described in Section 6 9 1 1 shall be as set forth in Exhibit B and the rates for AFN's Embedded Base of Dark Fiber Transport Entrance Facilities as described in Section 6 9.1 shall be as set forth in Exhibit A.
- 6 9 1 6 The Transition Period shall apply only to AFN's Embedded Base and AFN shall not add new Dark Fiber Transport as described in this Section 6.9 pursuant to this Agreement.
- 6 9 1 7 Once a wire center exceeds either of the thresholds set forth in this Section 6 9 1.4 1, no future Dark Fiber Transport unbundling will be required in that wire center.
- 6.9.1.8 At the end of the Transition Period any remaining Embedded Base will be disconnected.
- 6 10 Rearrangements
- 6 10 1 A request to move a working AFN CFA to another AFN CFA, where both CFAs terminate in the same BellSouth Central Office ("Change in CFA"), shall not constitute the establishment of new service. The applicable rates set forth in Exhibit A.
- 6 10 2 Requests to re-terminate one end of a facility that is not a Change in CFA constitute the establishment of new service and require disconnection of existing service and the applicable rates set forth in Exhibit A shall apply.

6 10 3 Upon request of AFN, BellSouth shall project manage the Change in CFA or re-termination of a facility as described in Sections 6.10.1 and 6 10 2 above and AFN may request OC-TS for such orders

6.10 4 BellSouth shall accept a Letter of Authorization (LOA) between AFN and another carrier that will allow AFN to connect a facility, or Combination that includes Dedicated Transport to the other carrier's collocation space or to another carrier's CFA associated with higher bandwidth transport

7 Call Related Databases and Signaling

7 1 Call Related Databases are the databases other than OSS, that are used in signaling networks, for billing and collection, or the transmission, routing or other provision of a Telecommunications Service Notwithstanding anything to the contrary herein, BellSouth shall only provide unbundled access to call related databases and signaling including but not limited to, BellSouth Switched Access (SWA) 8XX Toll Free Dialing Ten Digit Screening Service, Line Information Database (LIDB), Signaling, Signaling Link Transport, STP, SS7 AIN Access, Service Control Point(SCP\Databases, Local Number Portability (LNP) Databases and Calling Name (CNAM) Database Service pursuant to this Agreement where BellSouth is required to provide and is providing Local Switching or UNE-P to AFN pursuant to this Agreement

7 2 BellSouth Switched Access (SWA) 8XX Toll Free Dialing Ten Digit Screening Service

7 2.1 The BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening Service database (8XX SCP Database) is a SCP that contains customer record information and the functionality to provide call-handling instructions for 8XX calls. The 8XX SCP IN software stores data downloaded from the national SMS/8XX database and provides the routing instructions in response to queries from the SSP or tandem. The BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening Service (8XX TFD Service) utilizes the 8XX SCP Database to provide identification and routing of the 8XX calls, based on the ten digits dialed. At AFN's option, 8XX TFD Service is provided with or without POTS number delivery, dialing number delivery, and other optional complex features as selected by AFN.

7.2.2 The 8XX SCP Database is designated to receive and respond to queries using the ANSI Specification of Signaling System Seven (SS7) protocol

7 3 LIDB

7.3.1 LIDB is a transaction-oriented database accessible through Common Channel Signaling (CCS) networks For access to LIDB, AFN must purchase appropriate signaling links pursuant to Section 7 3 of this Attachment. LIDB contains records

associated with End User Line Numbers and Special Billing Numbers. LIDB accepts queries from other Network Elements and provides appropriate responses. The query originator need not be the owner of LIDB data. LIDB queries include functions such as screening billed numbers that provides the ability to accept Collect or Third Number Billing calls and validation of Telephone Line Number based non-proprietary calling cards. The interface for the LIDB functionality is the interface between BellSouth's CCS network and other CCS networks. LIDB also interfaces to administrative systems.

7.3.2 Technical Requirements

- 7.3.2.1 BellSouth will offer to AFN any additional capabilities that are developed for LIDB during the life of this Agreement.
- 7.3.2.2 BellSouth shall process AFN's customer records in LIDB at least at parity with BellSouth customer records, with respect to other LIDB functions. BellSouth shall indicate to AFN what additional functions (if any) are performed by LIDB in the BellSouth network.
- 7.3.2.3 Within two (2) weeks after a request by AFN, BellSouth shall provide AFN with a list of the customer data items, which AFN would have to provide in order to support each required LIDB function. The list shall indicate which data items are essential to LIDB function and which are required only to support certain services. For each data item, the list shall show the data formats, the acceptable values of the data item and the meaning of those values.
- 7.3.2.4 BellSouth shall provide LIDB systems for which operating deficiencies that would result in calls being blocked shall not exceed thirty (30) minutes per year.
- 7.3.2.5 BellSouth shall provide LIDB systems for which operating deficiencies that would not result in calls being blocked shall not exceed twelve (12) hours per year.
- 7.3.2.6 BellSouth shall provide LIDB systems for which the LIDB function shall be in overload no more than twelve (12) hours per year.
- 7.3.2.7 All additions, updates and deletions of AFN data to the LIDB shall be solely at the direction of AFN. Such direction from AFN will not be required where the addition, update or deletion is necessary to perform standard fraud control measures (e.g., calling card auto-deactivation).
- 7.3.2.8 BellSouth shall provide priority updates to LIDB for AFN data upon AFN's request (e.g., to support fraud detection), via password-protected telephone card, facsimile, or electronic mail within one hour of notice from the established BellSouth contact.

- 7.3.2.9 BellSouth shall provide LIDB systems such that no more than 0.01% of AFN customer records will be missing from LIDB, as measured by AFN audits. BellSouth will audit AFN records in LIDB against Data Base Administration System (DBAS) to identify record mismatches and provide this data to a designated AFN contact person to resolve the status of the records and BellSouth will update system appropriately. BellSouth will refer record of mismatches to AFN within one (1) business day of audit. Once reconciled records are received back from AFN, BellSouth will update LIDB the same business day if less than 500 records are received before 1:00 p.m. Central Time. If more than 500 records are received, BellSouth will contact AFN to negotiate a time frame for the updates, not to exceed three (3) business days.
- 7.3.2.10 BellSouth shall perform backup and recovery of all of AFN's data in LIDB including sending to LIDB all changes made since the date of the most recent backup copy, in at least the same time frame BellSouth performs backup and recovery of BellSouth data in LIDB for itself. Currently, BellSouth performs backups of the LIDB for itself on a weekly basis; and when a new software release is scheduled, a backup is performed prior to loading the new release.
- 7.3.2.11 BellSouth shall provide AFN with LIDB reports of data which are missing or contain errors, as well as any misrouted errors, within a reasonable time period as negotiated between AFN and BellSouth.
- 7.3.2.12 BellSouth shall prevent any access to or use of AFN data in LIDB by BellSouth personnel that are outside of established administrative and fraud control personnel, or by any other Party that is not authorized by AFN in writing.
- 7.3.2.13 BellSouth shall provide AFN performance of the LIDB Data Screening function, which allows a LIDB to completely or partially deny specific query originators access to LIDB data owned by specific data owners, for Customer Data that is part of an NPA-NXX or RAO-0/1XX wholly or partially owned by AFN at least at parity with BellSouth Customer Data. BellSouth shall obtain from AFN the screening information associated with LIDB Data Screening of AFN data in accordance with this requirement. BellSouth currently does not have LIDB Data Screening capabilities. When such capability is available, BellSouth shall offer it to AFN under the BFR/NBR Process as set forth in Attachment 11.
- 7.3.2.14 BellSouth shall accept queries to LIDB associated with AFN customer records and shall return responses in accordance with industry standards.
- 7.3.2.15 BellSouth shall provide mean processing time at the LIDB within 0.50 seconds under normal conditions as defined in industry standards.

- 7.3.2.16 BellSouth shall provide processing time at the LIDB within 1 second for ninety-nine percent (99%) of all messages under normal conditions as defined in industry standards
- 7.3.3 Interface Requirements
- 7.3.3.1 BellSouth shall offer LIDB in accordance with the requirements of this subsection.
- 7.3.3.2 The interface to LIDB shall be in accordance with the technical references contained within
- 7.3.3.3 The CCS interface to LIDB shall be the standard interface described herein
- 7.3.3.4 The LIDB Data Base interpretation of the ANSI-TCAP messages shall comply with the technical reference herein Global Title Translation (GTT) shall be maintained in the signaling network in order to support signaling network routing to the LIDB.
- 7.3.3.5 The application of the LIDB rates contained in Exhibit A will be based on a Percent CLEC LIDB Usage (PCLU) factor AFN shall provide BellSouth a PCLU The PCLU will be applied to determine the percentage of total LIDB usage to be billed to the other Party at local rates AFN shall update its PCLU on the first of January, April, July and October and shall send it to BellSouth to be received no later than thirty (30) calendar days after the first of each such month based on local usage for the past three months ending the last day of December, March, June and September, respectively Requirements associated with PCLU calculation and reporting shall be as set forth in BellSouth's Jurisdictional Factors Reporting Guide, as it is amended from time to time
- 7.4 Signaling BellSouth shall offer access to signaling and access to BellSouth's signaling databases subject to compatibility testing and at the rates set forth in this Attachment. BellSouth may provide mediated access to BellSouth signaling systems and databases Available signaling elements include signaling links, STPs and SCPs. Signaling functionality will be available with both A-link and B-link connectivity.
- 7.4.1 Signaling Link Transport Signaling Link Transport is a set of two (2) or four (4) dedicated 56 kbps transmission paths between AFN designated SPOI that provide appropriate physical diversity
- 7.4.1.1 Technical Requirements
- 7.4.1.1.1 Signaling Link Transport shall consist of full duplex mode 56 kbps transmission paths and shall perform in the following two ways

- 7.4.1.1.1.1 As an “A-link” Signaling Link Transport is a connection between a switch or SCP and a home STP switch pair, and
- 7.4.1.1.1.2 As a “B-link” Signaling Link Transport is a connection between two (2) STP switch pairs in different company networks (e.g., between two (2) STP switch pairs for two (2) CLECs)
- 7.4.1.2 Signaling Link Transport shall consist of two (2) or more signaling link layers as follows:
 - 7.4.1.2.1 An A-link layer shall consist of two (2) links, and
 - 7.4.1.2.2 A B-link layer shall consist of four (4) links.
- 7.4.1.3 A signaling link layer shall satisfy interoffice and intraoffice diversity of facilities and equipment, such that:
 - 7.4.1.3.1 No single failure of facilities or equipment causes the failure of both links in an A-link layer (i.e., the links should be provided on a minimum of two (2) separate physical paths end-to-end), and
 - 7.4.1.3.2 No two (2) concurrent failures of facilities or equipment shall cause the failure of all four (4) links in a B-link layer (i.e., the links should be provided on a minimum of three (3) separate physical paths end-to-end)
- 7.4.2 Interface Requirements There shall be a DS1 (1.544 Mbps) interface at AFN’s designated SPOIs. Each 56 kbps transmission path shall appear as a DS0 channel within the DS1 interface.
- 7.4.3 STP An STP is a signaling network function that includes all of the capabilities provided by the signaling transfer point switches and their associated signaling links that enables the exchange of SS7 messages among and between switching elements, database elements and signaling transfer point switches.
 - 7.4.3.1 Technical Requirements
 - 7.4.3.1.1 STPs shall provide access to BellSouth Local Switching or Tandem Switching and to BellSouth SCPs/Databases connected to BellSouth SS7 network. STPs also provide access to third party local or tandem switching and third party provided STPs
 - 7.4.3.1.2 The connectivity provided by STPs shall fully support the functions of all other Network Elements connected to the BellSouth SS7 network. This includes the use of the BellSouth SS7 network to convey messages that neither originate nor terminate at a signaling end point directly connected to the BellSouth SS7 network (i.e., transit messages). When the BellSouth SS7 network is used to convey transit

messages, there shall be no alteration of the Integrated Services Digital Network User Part (ISDNUP) or Transaction Capabilities Application Part (TCAP) user data that constitutes the content of the message. Rates for ISDNUP and TCAP are as set forth in Exhibit A

- 7 4 3 1 3 If a BellSouth tandem switch routes traffic, based on dialed or translated digits, on SS7 trunks between a AFN local switch and third party local switch, the BellSouth SS7 network shall convey the TCAP messages that are necessary to provide Call Management features (Automatic Callback, Automatic Recall, and Screening List Editing) between AFN local STPs and the STPs that provide connectivity with the third party local switch, even if the third party local switch is not directly connected to BellSouth STPs
- 7 4.3.1 4 STPs shall provide all functions of the SCCP necessary for Class 0 (basic connectionless) service as defined in Telcordia ANSI Interconnection Requirements. This includes GTT and SCCP Management procedures, as specified in ANSI T1.112.4. Where the destination signaling point is a AFN or third party local or tandem switching system directly connected to BellSouth SS7 network, BellSouth shall perform final GTT of messages to the destination and SCCP Subsystem Management of the destination. In all other cases, BellSouth shall perform intermediate GTT of messages to a gateway pair of STPs in an SS7 network connected with BellSouth SS7 network and shall not perform SCCP Subsystem Management of the destination. If BellSouth performs final GTT to a AFN database, then AFN agrees to provide BellSouth with the Destination Point Code for AFN database.
- 7 4 3 1 5 STPs shall provide all functions of the Operations, Maintenance and Administration Part (OMAP) as specified in applicable industry standard technical references, which may include, where available in BellSouth's network, MTP Routing Verification Test (MRVT) and SCCP Routing Verification Test (SRVT).
- 7 4 3 1 6 Where the destination signaling point is a BellSouth local or tandem switching system or database, or is a AFN or third party local or tandem switching system directly connected to the BellSouth SS7 network, STPs shall perform MRVT and SRVT to the destination signaling point. In all other cases, STPs shall perform MRVT and SRVT to a gateway pair of STPs in an SS7 network connected with the BellSouth SS7 network. This requirement may be superseded by the specifications for Internetwork MRVT and SRVT when these become approved ANSI standards and available capabilities of BellSouth STPs
- 7 4 4 SS7
- 7 4 4 1 When technically feasible and upon request by AFN, SS7 AIN Access shall be made available in association with switching. SS7 AIN Access is the provisioning of AIN 0 1 triggers in an equipped BellSouth local switch and interconnection of

the BellSouth SS7 network with AFN's SS7 network to exchange TCAP queries and responses with a AFN SCP

- 7.4.4.2 SS7 AIN Access shall provide AFN SCP access to an equipped BellSouth local switch via interconnection of BellSouth's SS7 and AFN SS7 Networks. BellSouth shall offer SS7 AIN Access through its STPs. If BellSouth requires a mediation device on any part of its network specific to this form of access, BellSouth must route its messages in the same manner. The interconnection arrangement shall result in the BellSouth local switch recognizing the AFN SCP as at least at parity with BellSouth's SCPs in terms of interfaces, performance and capabilities
- 7.4.4.3 Interface Requirements
 - 7.4.4.3.1 BellSouth shall provide the following STP options to connect AFN or AFN-designated Local Switching systems to the BellSouth SS7 network.
 - 7.4.4.3.1.1 An A-link interface from AFN Local Switching systems; and
 - 7.4.4.3.1.2 A B-link interface from AFN local STPs
 - 7.4.4.3.2 Each type of interface shall be provided by one or more layers of signaling links
 - 7.4.4.3.3 The SPOI for each link shall be located at a cross-connect element in the CO where the BellSouth STP is located. There shall be a DS1 or higher rate transport interface at each of the SPOIs. Each signaling link shall appear as a DS0 channel within the DS1 or higher rate interface.
 - 7.4.4.3.4 BellSouth shall provide intraoffice diversity between the SPOI and BellSouth STPs so that no single failure of intraoffice facilities or equipment shall cause the failure of both B-links in a layer connecting to a BellSouth STP
 - 7.4.4.3.5 STPs shall provide all functions of the MTP as defined in the applicable industry standard technical references.
- 7.4.4.4 Message Screening
 - 7.4.4.4.1 BellSouth shall set message screening parameters so as to accept valid messages from AFN local or tandem switching systems destined to any signaling point within BellSouth's SS7 network where the AFN switching system has a valid signaling relationship.
 - 7.4.4.4.2 BellSouth shall set message screening parameters so as to pass valid messages from AFN local or tandem switching systems destined to any signaling point or network accessed through BellSouth's SS7 network where the AFN switching system has a valid signaling relationship

7 7 SCE/SMS AIN Access

7 7 1 BellSouth's SCE/SMS AIN Access shall provide AFN the capability to create service applications in a BellSouth SCE and deploy those applications in a BellSouth SMS to a BellSouth SCP

7 7 2 BellSouth's SCE/SMS AIN Access shall provide access to SCE hardware, software, testing and technical support (e g , help desk, system administrator) resources available to AFN Training, documentation, and technical support will address use of SCE and SMS access and administrative functions but will not include support for the creation of a specific service application

7 7 3 BellSouth SCP shall partition and protect AFN service logic and data from unauthorized access

7 7 4 When AFN selects SCE/SMS AIN Access, BellSouth shall provide training, documentation, and technical support to enable AFN to use BellSouth's SCE/SMS AIN Access to create and administer applications

7 7 5 AFN access will be provided via remote data connection (e g , dial-in, ISDN)

7 7 6 BellSouth shall allow AFN to download data forms and/or tables to BellSouth SCP via BellSouth SMS without intervention from BellSouth

8 Automatic Location Identification/Data Management System (ALI/DMS)

8 1 911 and E911 Databases

8 1 1 BellSouth shall provide AFN with nondiscriminatory access to 911 and E911 databases on an unbundled basis, in accordance with 47 C F R § 51.319 (f)

8 1 2 The ALI/DMS database contains End User information (including name, address, telephone information, and sometimes special information from the local service provider or End User) used to determine to which PSAP to route the call The ALI/DMS database is used to provide enhanced routing flexibility for E911 AFN will be required to provide the BellSouth 911 database vendor daily service order updates to E911 database in accordance with Section 8.2.1

8 2 Technical Requirements

8 2 1 BellSouth's 911 database vendor shall provide AFN the capability of providing updates to the ALI/DMS database through a specified electronic interface AFN shall contact BellSouth's 911 database vendor directly to request interface AFN shall provide updates directly to BellSouth's 911 database vendor on a daily basis Updates shall be the responsibility of AFN and BellSouth shall not be liable for the transactions between AFN and BellSouth's 911 database vendor

- 8 2 2 It is AFN's responsibility to retrieve and confirm statistical data and to correct errors obtained from BellSouth's 911 database vendor on a daily basis. All errors will be assigned a unique error code and the description of the error and the corrective action is described in the CLEC Users Guide for Facility Based Providers that is found on the BellSouth Interconnection Web site.
- 8 2 3 AFN shall conform to the BellSouth standards as described in the CLEC Users Guide to E911 for Facilities Based Providers that is located on the BellSouth Interconnection Web site at <http://www.interconnection-bellsouth.com/guides>.
- 8 2 4 Stranded Unlocks are defined as End User records in BellSouth's ALI/DMS database that have not been migrated for over ninety (90) days to AFN, as a new provider of local service to the End User. Stranded Unlocks are those End User records that have been "unlocked" by the previous local exchange carrier that provided service to the End User and are open for AFN to assume responsibility for such records.
- 8 2 4 1 Based upon End User record ownership information available in the NPAC database, BellSouth shall provide a Stranded Unlock annual report to AFN that reflects all Stranded Unlocks that remain in the ALI/DMS database for over ninety (90) days. AFN shall review the Stranded Unlock report, identify its End User records and request to either delete such records or migrate the records to AFN within two (2) months following the date of the Stranded Unlock report provided by BellSouth. AFN shall reimburse BellSouth for any charges BellSouth's database vendor imposes on BellSouth for the deletion of AFN's records.
- 9 OSS**
- 9 1 BellSouth has developed and made available electronic interfaces by which AFN may submit LSRs electronically.
- 9 2 LSRs submitted by means of one of these electronic interfaces will incur an electronic service order charge. LSRs submitted by means other than one of these interactive interfaces (e.g., mail, fax, courier, etc.) will incur a manual order service charge. An individual LSR will be identified for billing purposes by its Purchase Order Number (PON). Electronic and manual service order charges are specified in Exhibit A.
- 9 3 BellSouth will bill the electronic or manual service order charge for Network Elements as applicable, for an LSR, regardless of whether that LSR is later supplemented, clarified or cancelled.
- 9 4 Notwithstanding the foregoing, BellSouth will not bill an additional electronic or manual service order charge for supplements to any LSR submitted to clarify, correct, change or cancel a previously submitted LSR.

- 9.5 Denial/Restoral OSS Charge BellSouth reserves the right to bill electronic or manual service order charges for each account as applicable. In the event AFN provides a list of customers to be denied and restored, rather than an LSR, each location on the list will require a separate PON and therefore will be billed as one LSR per location.
- 9.6 Network Elements and Other Services Manual Additive The Commissions in some states have ordered per element manual additive NRC for Network Elements and Other Services ordered by means other than one of the interactive interfaces. These ordered Network Elements and Other Services manual additive NRCs will apply in these states, rather than the charge per LSR. The per element charges are listed in Exhibit A.

The 'Zone' shown in the sections for stand alone loops or loops as part of a combination refers to Geographically Deaveraged UNE Zones To view Geographically Deaveraged UNE Zones refer to internet Website http://www.interconnection.bellsouth.com/become_a_clec/htmlinterconnection.htm														
OPERATIONAL SUPPORT SYSTEMS (OSS) REGIONAL RATES														
NOTE (1) CLEC should contact its contract negotiator if it prefers the state specific OSS charges as ordered by the State Commissions The OSS charges currently contained in this rate exhibit are the BellSouth regional service ordering charges CLEC may elect either the state specific Commission ordered rates for the service ordering charges or CLEC may elect the regional service ordering charge however CLEC can not obtain a mixture of the two regardless if CLEC has a interconnection contract established in each of the 9 states.														
NOTE (2) Any element that can be ordered electronically will be billed according to the SOMEc rate listed in this category Please refer to BellSouth's Local Ordering Handbook (LOH) to determine if a product can be ordered electronically For those elements that cannot be ordered electronically at present per the LOH the listed SOMEc rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on line for that element Otherwise the manual ordering charge SOMEc cannot be applied to a CLECs bill when it submits an LSR to BellSouth

	The "Zone" shown in the sections for stand-alone loops or loops as part of a combination refers to Geographically Deaveraged UNE Zones To view Geographically Deaveraged UNE Zones refer to internet Website http://www.interconnection.bellsouth.com/become_a_clec/htmlinterconnection.htm OPERATIONAL SUPPORT SYSTEMS(OSS) REGIONAL RATES													
	NOTE: (1) CLEC should contact its contract negotiator if it prefers the state specific OSS charges as ordered by the State Commissions The OSS charges currently contained in this rate exhibit are the BellSouth regional service ordering charges CLEC may elect either the state specific Commission ordered rates for the service ordering charges, or CLEC may elect the regional service ordering charge however CLEC can not obtain a mixture of the two regardless if CLEC has a interconnection contract established in each of the 9 states													
	NOTE: (2) Any element that can be ordered electronically will be billed according to the SOMECH rate listed in this category Please refer to BellSouth's Local Ordering Handbook (LOH) to determine if a product can be ordered electronically For those elements that cannot be ordered electronically at present per the LOH the listed SOMECH rate In this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element Otherwise the manual ordering charge SOMAN will be applied to a CLECs bill when it submits an LSR to BellSouth													
	OSS Electronic Service Order Charge Per Local Service Request (LSR) UNE Only				SOMECH		3.50	0.00						
	OSS Manual Service Order Charge Per Local Service Request (LSR) UNE Only				SOMAN		11.90	0.00						
	UNE SERVICE DATE ADVANCEMENT CHARGE													
	NOTE: The Expedite charge will be maintained commensurate with BellSouth's FCC No 1 Tariff Section 5 as applicable

The Zone shown in the sections for stand alone loops or loops as part of a combination refers to Geographically Deaveraged UNE Zones To view Geographically Deaveraged UNE Zones refer to internet Website http://www.interconnection.bellsouth.com/become_a_clec/interconnection.htm NOTE (1) CLEC should contact its contract negotiator if it prefers the state specific OSS charges as ordered by the State Commissions. The OSS charges currently contained in this rate exhibit are the BellSouth regional service ordering charges. CLEC may elect either the state specific Commission ordered rates for the service ordering charges, or CLEC may elect the regional service ordering charge, however CLEC can not obtain a mixture of the two regardless if CLEC has a interconnection contract established in each of the 9 states NOTE (2) Any element that can be ordered electronically will be billed according to the SOMECH rate listed in this category. Please refer to BellSouth's Local Ordering Handbook (LOH) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the LOH, the listed SOMECH rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on line for that element. Otherwise the manual ordering charge SOMAN will be applied to a CLECs bill when it submits an LSR to BellSouth													
	OSS Electronic Service Order Charge Per Local Service Request (LSR) UNE Only				SOMECH	3.50	0.00	3.50	0.00			SOMAN	SOMAN

The Zone shown in the sections for stand alone loops or loops as part of a combination refers to Geographically Deaveraged UNE Zones To View Geographically Deaveraged UNE Zone Designations by Central Office refer to internet Website http://www.interconnection.bellsouth.com/become_a_clec/html/interconnection.htm													
OPERATIONAL SUPPORT SYSTEMS (OSS) REGIONAL RATES													
NOTE (1) CLEC should contact its contract negotiator if it prefers the state specific OSS charges as ordered by the State Commissions. The OSS charges currently contained in this rate exhibit are the BellSouth regional service ordering charges. CLEC may elect either the state specific Commission ordered rates for the service ordering charges or CLEC may elect the regional service ordering charge however CLEC can not obtain a mixture of the two regardless if CLEC has a interconnection contract established in each of the 9 states													
NOTE (2) Any element that can be ordered electronically will be billed according to the SOMECH rate listed in this category. Please refer to BellSouth's Local Ordering Handbook (LOH) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the LOH, the listed SOMECH rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on line for that element. Otherwise the manual ordering charge SOMAN will be applied to a CLEC's bill when it submits an LSR to BellSouth													
	OSS - Electronic Service Order Charge Per Local Service Request (LSR) - UNE Only				SOMECH	3.50	0.00	3.50	0.00				
	OSS - Manual Service Order Charge Per Local Service Request (LSR) - UNE Only				SOMAN	7.86	0.00	0.99	0.00				
UNE SERVICE DATE ADVANCEMENT CHARGE													
NOTE: The Expedite charge will be maintained commensurate with BellSouth's FCC No 1 Tariff. Section 5 as applicable
