

**Date:** January 17, 2006

**From:** Carsie Mundy 

**RE:** Docket No. 05-00162

**Subject:** Meeting with Mr. Charles Pickney

On January 17, 2006, Mr. Charles Pickney requested a meeting to discuss the type of map Staff needs to continue the processing of the Petition for the Fentress Service Area, Docket No. 05-00162. After two different Data Requests from Staff, Mr. Pickney has not provided an acceptable map. He indicated that he had a map and wanted me to look at it to determine if it would be sufficient.

I met with Mr. Pickney at 2:30 today and I discussed with Mr. Pickney the need for a map of sufficient detail to allow the Authority to determine the exact location of the treatment plants for the Clarkrange and Highlands Systems as well as the initial service area for each. I asked him to draw the location of each plant on a 1:24,000 scale map and also draw in the boundary of the service area that he proposed to serve by each. Mr. Pickney indicated that he understood the information that was needed and indicated that he would furnish same within a few days.
