RE: Petition for Designation as an Eligible Telecommunications Carrier in the State of
Tennessee, Docket No 05-00228

Dear Ms Standley.

On or around September 16, 2005 Budget Phone, Inc. ("Company") received a data request from the Tennessee Regulatory Authority ("Authority") concerning the above referenced docket. The request specified a due date of October 6, 2005. However, due to unexpected delays the Company was unable to prepare a sufficient response by such date and offers our apologies for any inconvenience this may have caused.

Please find enclosed, as requested, one (1) original and thirteen (13) copies of the Company's response to the Authority's Data Request No. 1. Any correspondence may be directed to me at the below listed number.

Sincerely,

Faith M. Golding
Regulatory & Revenue Assurance

***Docket No. 05-00228 Budget Phone, Inc. request for ETC designation
Data Request
September 16, 2005***

Introduction

Consistent with Budget Phone's petition, Budget Phone is seeking "designation as an Eligible Telecommunications Carrier ("ETC") in certain BellSouth exchanges. for the purpose of receiving federal universal support." The types of support Budget Phone expects to receive, should its petition be approved, are Low-Income, more commonly known as Lifeline, and High-Cost support. Detailed below is how Budget Phone intends to use the support it will receive from each of these supported services.

Lifeline

Lifeline is a program designed to increase the availability of telecommunications service to low income subscribers by providing a credit to the monthly recurring local service to qualifying residential subscribers. Being granted ETC status will allow Budget Phone to seek reimbursement for the federal baseline support credit of \$8.25, the supplemental federal support credit of \$1.75, which is made available and based on the \$3.50 credit provided by the Company, and, where applicable, the subscriber line charge. As such, Lifeline support is not determined by exchange, but rather, by participation in one of the eligible programs. Budget Phone will apply the aforementioned discounts to all subscriber accounts, which demonstrate eligibility through participation in any of the approved programs.

High-Cost Support

As the Commission is aware, High-Cost support, for the BellSouth exchanges in the State of Tennessee, is limited to Interstate Access Support (IAS), which is disbursed according to service type (Residential & Single Line Business or Multi-line Business) and UNE Zone. In Tennessee, Budget Phone currently offers residential service and makes its unique prepaid Deluxe package, which bundles several of the most popular features and long distance service, available to subscribers in the zone 1 and zone 2 exchanges. IAS fund amounts, found in the HC-13 fourth quarter appendices, located in the USAC website, indicate the current amount of IAS support for residential service, on a per line and zone basis, to be the following;

Zone 1	\$0.00
Zone 2	\$0.0339
Zone 3	\$1.9289

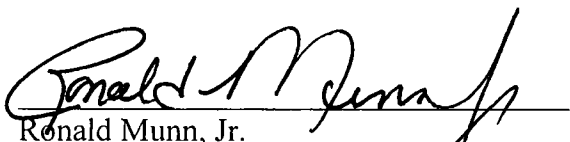

In addition, support can only be received by an ETC, such as Budget Phone, on UNEs purchased from the Incumbent and used to provide service to its end users. Further, an ETC must apply the support to the exchange or zone that was responsible for generating the support. It is Budget Phone's intention to use this support in a manner that is consistent with this direction by applying the amount of the disbursements, on a per line average, as a reduction to the line cost of these UNEs on a UNE zone by UNE zone basis.

Included with this request is Exhibit TNETC-1, which details each of the BellSouth exchanges in the State of Tennessee along with the amount of High-Cost support available for each exchange

As indicated above, the support available to UNE zone 3 exchanges is greater than the amounts available to zones 1 or 2. This is intentional and designed to allow ETCs the ability to provide service to subscribers residing in rural (zone 3) exchanges at rates that are comparable to those charged in urban (zone 1) and suburban (zone 2) exchanges. By applying these funds as a reduction to the cost it pays to the Incumbent for zone 3 UNEs Budget Phone will be able to:

1. provision service in zone 3 through the use of UNEs.
2. offer zone 3 subscribers the same service offerings currently available to zone 1 and 2 subscribers.
3. make its unique prepaid service available to zone 3 subscribers at the same rates available to zone 1 and 2 subscribers.
