Docket No. 05-00240

**DIRECT TESTIMONY OF KEVIN P. COLLINS IN SUPPORT OF THE  
APPLICATION OF SPRINT NEXTEL CORPORATION FOR APPROVAL OF THE  
TRANSFER OF CONTROL**

**\*\*\* PUBLIC VERSION \*\*\***  
**("HIGHLY CONFIDENTIAL" MATERIAL REDACTED)**  
**(NO "CONFIDENTIAL" MATERIAL INCLUDED)**

PUBLIC VERSION

1   **Q.    Please state your name and business address.**

2    A.    My name is Kevin P. Collins   My business address is Houlihan, Lokey, Howard & Zukin  
3       Financial Advisors, Inc, 245 Park Avenue, 19th Floor, New York, NY 10167.

5   **Q.    By whom are you employed and in what capacity?**

6    A.    I am employed as a managing director at Houlihan, Lokey, Howard & Zukin Financial  
7       Advisors, Inc (“HL”). HL is an international investment bank established in 1970. HL  
8       provides a wide range of services, including mergers and acquisitions, financing,  
9       financial opinions and advisory services, and financial restructuring. HL has rendered in  
10       excess of one hundred opinions addressing the impact of transactions on the capital  
11       adequacy of companies. These opinions have been accepted by boards of directors, by  
12       lenders, by regulators and tested in legal proceedings. Attachment KPC-1 is a further  
13       description of HL as well as a summary of my personal experience.

15   **Q.    Please summarize your educational background and experience in corporate  
16       finance.**

17   A.    I have worked in investment banking providing financial advisory services, including  
18       capital adequacy analysis, for the past 17 years. As a Managing Director in the New  
19       York office of HL, I am the head of the financial advisory practice of that office, a  
20       position that I’ve held for over ten years. My educational background includes a  
21       Bachelor of Science degree from the State University of New York at Albany in 1979,  
22       and a Masters in Business Administration from the University of Rochester in 1982 with  
23       concentrations in Finance and Applied Economics.

1   **Q.     What is the purpose of your testimony in this proceeding?**

2   A     HL has been asked to evaluate certain aspects of the separation of Sprint's incumbent  
3         local wireline operations ("LTD Holding Company" or "Company") from its parent  
4         company (as further described in the Application of Sprint Nextel Corporation ("Sprint")  
5         for Approval of the Transfer of Control) from a financial point of view. In particular we  
6         have performed an independent valuation of LTD Holding Company and analyzed  
7         certain financial information regarding the capitalization of LTD Holding Company  
8         subsequent to the separation and its impact on the ability of the Company to pay its debts  
9         as they become due. Attached to my testimony as Attachment KPC-2 is the "Report to  
10        Sprint Nextel Corporation", which represents the complete analysis and valuation  
11        undertaken by HL on behalf of Sprint ("Sprint Report"). The purpose of my testimony is  
12        to sponsor the Sprint Report as part of the separation application to demonstrate the  
13        financial strength of LTD Holding Company as an independent stand alone entity.

14  
15   **Q.     Please summarize the development of the analysis and valuation contained in the**  
16         **report.**

17   A.     Although the separation will not take place until the receipt of all necessary approvals,  
18         for purposes of our analysis, we have assumed that the Transaction will occur on June 1,  
19         2006. To complete our valuation we have utilized projected financial statement  
20         information regarding the expected financial condition of LTD Holding Company as of  
21         June 1, 2006 supplied by LTD Holding Company management, and assumed economic,  
22         market and financing conditions are the same as of today.

PUBLIC VERSION

1 LTD Holding Company management provided financial projections for LTD Holding  
2 Company through fiscal year 2007 approved by LTD Holding Company management as  
3 part of their ongoing business operations (“Three Year Projections”) (Sprint Report,  
4 Executive Summary - Tab 1, Contents of Report and Other Matters, page 3, Transaction  
5 Overview - Tab 2, page 14 – fiscal years 2005-2007). Although we have not  
6 independently verified the accuracy and completeness of the Three Year Projections or  
7 their underlying assumptions, nothing has come to the attention of our personnel working  
8 on this engagement during the course thereof that has caused us to believe, based on our  
9 best professional judgment, that it was unreasonable for us to utilize and rely upon the  
10 projections as part of our analysis.

11  
12 In addition, HL independently undertook solely for purposes of this analysis to extend the  
13 Three Year Projections to 2010. (Id.) The extension for 2008 to 2010 was not developed  
14 by Sprint management and is not part of the projections approved by Sprint management  
15 nevertheless, Sprint does not believe that it is unreasonable for HL to utilize the extended  
16 forecasts for purposes of its evaluation. HL developed the extension by trending from the  
17 Three Year Projections utilizing publicly available information relating to  
18 telecommunication industry and forecasts for use solely in the Cashflow Test, as  
19 hereinafter defined.

20  
21 Finally, we understand that Sprint has obtained indicative ratings for LTD Holding  
22 Company from major ratings agencies.

**Q. What are the primary considerations in determining whether a company has adequate capital?**

A. The typical analysis of adequate capital examines both the value of a company's assets relative to its liabilities, and its projected cash flows relative to its operating requirements (Sprint Report, Methodology – Tab 4, Capital Tests Methodology, Reasonable Capital Test, page 47). The analysis is conducted under the assumption that the transaction has been consummated as proposed. The analysis we concluded can be summarized as follows.

- (a) The fair value of LTD Holding Company's assets in the aggregate,
- (b) Whether the fair value of LTD Holding Company's assets would exceed its stated liabilities and identified contingent liabilities (referred to as the "Balance Sheet Test");
- (c) Whether LTD Holding Company should be able to pay its debts as they become absolute and mature while (i) continuing to generate sufficient cash to re-invest in the business at a level indicated by the Company necessary to maintain the current level of service, and (ii) paying dividends in accordance with the planned dividend policy which the Company believes is commensurate with industry peers and after consideration of a commercially reasonable level of refinancing (referred to as the "Cashflow Test"); and
- (d) Whether the capital remaining in LTD Holding Company after the Transaction would be reasonable for the business in which it is engaged, as management has indicated it is proposed to be conducted following the consummation of the Transaction (referred to as the "Reasonable Capital Test").

The fair value of a company's assets is defined as "the amount that may be realized if a company's aggregate assets (including goodwill) are sold in their entirety with reasonable

PUBLIC VERSION

1 promptness in an arm's length transaction under present conditions for the sale of  
2 comparable business enterprises, as such conditions can be reasonably evaluated."

3  
4 Being "able to pay its debts as they become absolute and mature" means that, assuming  
5 the transaction has been consummated as proposed, the company's financial forecasts  
6 indicate positive cash flow for such period, including (and after giving effect to) the  
7 payment of installments due under loans made pursuant to the indebtedness incurred in  
8 the transaction, as such installments are scheduled at the close of the transaction, after  
9 consideration of a commercially reasonable level of refinancing."

10  
11 To assess whether the capital remaining in a company is not unreasonably small requires  
12 a subjective analysis of the results of the Balance Sheet Test and the Cashflow Test. The  
13 analysis includes consideration of various factors including: (i) the degree of sensitivity  
14 to revenue growth or decline and margin assumptions demonstrated in the Cashflow Test;  
15 (ii) the historical and expected volatility of asset values; (iii) the maturity structure of the  
16 company's fixed obligations; (iv) the magnitude, timing, and nature of contingent  
17 liabilities; (v) the prevalent capital structures within the industry; and (vi) the amount of  
18 flexibility allowed by the financial covenants in the credit agreements. The size of LTD  
19 Holding Company and the diversity of its wireline assets across eighteen states are  
20 important factors in performing the Reasonable Capital test.

21  
22 **Q. What methods are employed to estimate the fair value of assets of a company?**

1 A We employed three approaches that are commonly used by investors and analysts in the  
2 valuation of companies (Sprint Report, Methodology – Tab 4, Valuation Methodology,  
3 pages 38-43).

4  
5 First, in the Market Multiple Approach we derive valuation multiples from a group of  
6 comparable publicly traded companies. Upon a comparison of the subject company to  
7 the comparable companies across a number of qualitative and quantitative factors, we  
8 select multiples to apply in the valuation of the subject company.

9  
10 Second, in the Comparable Transaction Approach we derive valuation multiples from  
11 precedent transactions within the industry representing the sale of comparable companies  
12 or assets. Similarly, based upon a comparison of the subject company to those companies  
13 involved in industry transactions, we select multiples to apply in the valuation of the  
14 subject company

15  
16 Finally, in the Discounted Cash Flow Approach, utilizing the financial projections  
17 prepared by management of the Company, we calculate the net present value of all future  
18 expected cash flows. Cash flows are discounted to the present at a risk-adjusted discount  
19 rate, which is measured as the industry weighted average cost of capital. At the final year  
20 of the projections, we estimate a terminal value using a valuation multiple in a similar  
21 fashion to the first two approaches. This terminal value is also discounted to the present.

1 The conclusion of the fair value of the Company (or its assets in the aggregate) is  
2 determined by taking into consideration the indicated values from the above three  
3 approaches.

4  
5 **Q. Is book value of equity a relevant indicator of fair value for the company's assets?**

6 A. In this case, no. In certain situations, for example with financial institutions, book value  
7 (or a multiple thereof) is often utilized in valuation analyses. However, for operating  
8 companies, including telecommunication companies, book value of equity is often a  
9 function of accounting conventions and historical accounting treatment and is not a  
10 directly applicable figure for valuation purposes. Book value results from the myriad  
11 accounting rules and often has no direct correlation to fair value. This can be observed in  
12 the marketplace where companies with negative book equity values have positive and  
13 substantial market equity values

14  
15 **Q. Based on the current intentions of Sprint Corporation regarding the separation of**  
16 **the local telecommunications division, including the anticipated debt and dividend**  
17 **levels of LTD Holding Company, what are your summary conclusions?**

18 A. Based on our valuation analysis, the fair value of the assets of LTD Holding Company is  
19 reasonably stated in the range of **[BEGIN HIGHLY CONFIDENTIAL]**

20 **[END HIGHLY CONFIDENTIAL]** (Sprint Report, Valuation Analysis -  
21 Tab 5, Valuation Summary, page 50). Further, it is our conclusion that LTD Holding  
22 Company, assuming that the transaction is consummated as proposed, passes the  
23 previously described tests relating to adequate capital. The estimated fair value of the

1 assets exceeds the pro forma debt [BEGIN HIGHLY CONFIDENTIAL]

2 [END HIGHLY CONFIDENTIAL] of \$7.3 billion LTD Holding

3 Company should be able to pay its debts as they become absolute and mature, after

4 consideration of a commercially reasonable level of refinancing, while (i) continuing to

5 generate sufficient cash to re-invest in the business at a level indicated by the Company

6 necessary to maintain the current level of service, and (ii) paying dividends in accordance

7 with the planned dividend policy which the Company believes is commensurate with

8 industry peers. Finally, after review of the previously cited factors we concluded the

9 capital remaining in LTD Holding Company is not unreasonably small for the business in

10 which it is engaged (Sprint Report, Capital Tests – Tab 6, pages 65-68)

11  
12 **Q. Is the anticipated level of debt of LTD Holding Company after the separation within**  
13 **the levels that can be observed for similar industry participants?**

14 **A.** Yes. Investors, analysts and rating agencies examine a number of leverage ratios when  
15 assessing the creditworthiness of a company. These ratios often include (i) total debt to  
16 EBITDA (earnings before interest, taxes, depreciation and amortization), (ii) fixed charge  
17 coverage defined as (EBITDA-capital expenditures)/annual interest payments, and (iii)  
18 total debt to enterprise value (defined as market value of equity, plus debt and preferred  
19 stock, less cash). LTD Holding Company is expected to have a debt to EBITDA ratio of  
20 approximately [BEGIN HIGHLY CONFIDENTIAL] [END HIGHLY  
21 CONFIDENTIAL] at the time of the separation. This is a [BEGIN HIGHLY  
22 CONFIDENTIAL] [END HIGHLY CONFIDENTIAL] of leverage as  
23 compared to the selected comparable companies, which have an average debt to EBITDA

ratio of 3.7x. (Sprint Report, Executive Summary – Tab 1, Summary of Findings, page 8) Based on the forecasts for LTD Holding Company, EBITDA is expected to cover fixed charges in 2006 by approximately [BEGIN HIGHLY CONFIDENTIAL] [END HIGHLY CONFIDENTIAL], (Sprint Report, Capital Tests – Tab 6, Summary of Analyses, page 73) which is [BEGIN HIGHLY CONFIDENTIAL] [END HIGHLY CONFIDENTIAL] the average 3.2x fixed charge coverage ratio for the comparable companies (Sprint Report, Telecommunications Industry Analysis - Tab 3, Comparable Companies Analysis, page 26). Based upon the midpoint of our valuation range for LTD Holding Company, we estimate that at the time of the separation the Company's debt will account for approximately [BEGIN HIGHLY CONFIDENTIAL] [END HIGHLY CONFIDENTIAL] of its capital. (Sprint Report, Telecommunications Industry Analysis - Tab 3, Comparable Companies Analysis, page 26). This is [BEGIN HIGHLY CONFIDENTIAL] [END HIGHLY CONFIDENTIAL] the average debt to capital ratios for the comparable companies of 46.1 percent. (Sprint Report, Telecommunications Industry Analysis - Tab 3, Comparable Companies Analysis, page 26).

**Q. How does LTD Holding Company's anticipated dividend policy factor into the analysis?**

**A.** LTD Holding Company currently anticipates paying approximately \$300 million per year in dividends on its common stock (Sprint Report, Transaction Overview – Tab 2, page 13). Dividends are an important aspect of equity securities and LTD Holding Company's dividend yield is expected to attract investors who are interested in current yield thereby

1 providing support for the stock price. Based on the forecasts for LTD Holding Company,  
2 the Company is expected to have sufficient cash flows from operations to reinvest in its  
3 business through capital expenditures, pay the dividend and make principal payments on  
4 its debt. In fact, its dividend payout ratio (defined as the dividend payment as a  
5 percentage of free cash flows after payment of interest, taxes and capital expenditures) is  
6 projected to be in the range of [BEGIN HIGHLY CONFIDENTIAL]  
7 [END HIGHLY CONFIDENTIAL] over the projection period (Sprint Report,  
8 Capital Tests – Tab 6, Summary of Analyses, page 73), which is [BEGIN HIGHLY  
9 CONFIDENTIAL] [END HIGHLY CONFIDENTIAL] than the  
10 median expected 2005 payout ratio for the comparable companies of 70 percent (Sprint  
11 Report, Executive Summary - Tab 1, Summary of Findings, page 7) Additionally,  
12 notwithstanding that equity investors will view the dividend payment favorably, the  
13 dividend payment will be at the discretion of LTD Holding Company's board of directors  
14 and the payment can be modified at any time.

15  
16 **Q. Do you expect that the anticipated capital structure will limit LTD Holding**  
17 **Company's ability to reinvest in its business?**

18 **A.** No. The management of LTD Holding Company has projected future capital expenditure  
19 requirements. The aggregate capital expenditures in each of the next several years is  
20 expected to be approximately [BEGIN HIGHLY CONFIDENTIAL] [END  
21 HIGHLY CONFIDENTIAL] of revenues, which is [BEGIN HIGHLY  
22 CONFIDENTIAL] [END HIGHLY CONFIDENTIAL] than the  
23 average projected for 2005 for the comparable companies of approximately 13 percent of

1 revenues (Sprint Report, Executive Summary - Tab 3, Comparable Companies Analysis,  
2 page 35). As discussed above, LTD Holding Company should have excess cash flows  
3 beyond those needed for dividend payments should capital expenditure requirements be  
4 higher than anticipated or if the Company has investment opportunities with favorable  
5 economics.

6  
7 **Q. With the proposed capital structure, will LTD Holding Company be in a position to**  
8 **obtain future financing?**

9 A. The ability of a company to raise financing is a function of a number of factors,  
10 including, but not limited to attractiveness of its business, leverage and capital market  
11 conditions. Based on the Company's forecasts and assuming market conditions are  
12 reasonably similar to those existing today, LTD Holding Company's leverage should  
13 decline and it should maintain a substantial equity value. As an independent company  
14 with a size that places it well within the Fortune 500, LTD Holding Company should  
15 have numerous alternatives for accessing capital in the future.

16  
17 **Q. How has current and future competition been factored into the analysis?**

18 A. The Company recognizes that its business has been and will continue to be subject to  
19 competition from a number of competitive communication providers including wireless  
20 voice and data providers, cable companies offering voice services and potentially other  
21 competitors in the future. The expectation for future competition is factored into the  
22 Company forecasts in which it has assumed access line [BEGIN HIGHLY  
23 CONFIDENTIAL] [END HIGHLY CONFIDENTIAL] from [BEGIN HIGHLY

1       **CONFIDENTIAL]**                   **[END HIGHLY CONFIDENTIAL]** (Sprint Report,  
2       Telecommunications Industry Analysis - Tab 3, Comparable Companies Analysis, page  
3       28) to **[BEGIN HIGHLY CONFIDENTIAL]**                   **[END HIGHLY**  
4       **CONFIDENTIAL]** per year (Sprint Report, Capital Tests – Tab 6, Summary of  
5       Analysis, page 72) over the 2005 to 2007 period, **[BEGIN HIGHLY**  
6       **CONFIDENTIAL]**                   **[END HIGHLY CONFIDENTIAL]** certain of  
7       its product offerings and **[BEGIN HIGHLY CONFIDENTIAL]**  
8       **[END HIGHLY CONFIDENTIAL]** its **[BEGIN HIGHLY CONFIDENTIAL]**  
9               **[END HIGHLY CONFIDENTIAL]** DSL business. While the Company plans  
10       to respond to these competitive threats to minimize the impact to its business, the  
11       assumptions regarding competition in the Company's forecasts are inherently embedded  
12       in our analysis. Further, to test less favorable potential outcomes for the Company, we  
13       have tested cases with **[BEGIN HIGHLY CONFIDENTIAL]**                   **[END**  
14       **HIGHLY CONFIDENTIAL]** to competition and have determined that the Company  
15       has reasonable cushion to underperform its forecasts yet maintain a positive operating cash  
16       flow.

17  
18   **Q.     In summary, what is your view regarding the currently anticipated capital structure**  
19       **of LTD Holding Company?**

20   **A.     In summary, based on an extensive review of the operations and financial condition of**  
21       **LTD Holding Company, my knowledge and experience in both telecommunications and**  
22       **corporate finance, and my valuation and financial analysis, and assuming that the**  
23       **transaction is consummated as proposed, LTD Holding Company passes the three tests**

PUBLIC VERSION

1 relating to adequate capital as previously discussed. Further, neither the level of debt nor  
2 the anticipated dividend policy should limit the Company's ability to reinvest at the  
3 levels that the Company forecasts will be required to maintain its current or an improved  
4 level of quality of service.

5

6 **Q. Does this conclude your testimony?**

7 A. Yes, it does.

## Executive Summary

# Executive Summary

## SUMMARY DESCRIPTION OF TRANSACTION

We understand that Sprint Nextel Corporation ("Sprint"), intends to separate its local telephone division ("LTD Holding Company" or the "Company") to the shareholders of the combined entity. We further understand that it is currently contemplated that LTD Holding Company will retain a debt leverage position that is consistent with the characteristics of companies rated "investment grade" by recognized rating agencies and that it is expected that LTD Holding Company will pay dividends commensurate with industry peers. Prior to the separation, Sprint must obtain regulatory approval for the separation from the various states in which it operates. The separation and other similar or related transactions disclosed to Houlihan Lokey are referred to collectively herein as the "Transaction."

LTD Holding Company will consist of a local telecommunications business operating in eighteen (18) states and Sprint North Supply, an organization principally engaged in the procurement and distribution of equipment and supplies used in the telecommunications industry. LTD Holding Company currently has 7.5 million access lines and over 590,000 DSL subscribers.

# Executive Summary

## CONTENTS OF REPORT

Sprint Nextel Corporation has requested that Houlihan Lokey provide a written report regarding

- (a) the fair value of LTD Holding Company's assets in the aggregate (the "Valuation Analysis"),
- (b) assuming the Transaction has been consummated as proposed, immediately after and giving effect to the Transaction, as to the following (collectively the "Capital Tests")
  - (i) whether the fair value of LTD Holding Company's assets would exceed its stated liabilities and identified contingent liabilities (the "Balance Sheet Test"),
  - (ii) whether LTD Holding Company should be able to pay its debts as they become absolute and mature while (i) continuing to generate sufficient cash to re-invest in the business at a level indicated by the Company necessary to maintain the current level of service, and (ii) paying dividends in accordance with the planned dividend policy which the Company believes is commensurate with industry peers and after consideration of a commercially reasonable level of refinancing (the "Cash Flow Test"), and
  - (iii) whether the capital remaining in LTD Holding Company after the Transaction would be reasonable for the business in which it is engaged, as management has indicated it is proposed to be conducted following the consummation of the Transaction (the "Reasonable Capital Test")

# Executive Summary

## CONTENTS OF REPORT AND OTHER MATTERS

For purposes of the Report, LTD Holding Company is valued on a going-concern (including goodwill) basis and on a pro forma basis, immediately after and giving effect to the Transaction and the associated indebtedness. "Fair value" shall be defined as the amount that may be realized if LTD Holding Company's aggregate assets (including goodwill) are sold in their entirety with reasonable promptness in an arm's length transaction under present conditions for the sale of comparable business enterprises, as such conditions can be reasonably evaluated by Houlihan Lokey. We have used the same valuation methodologies in determining the value of each of LTD Holding Company and the assets of LTD Holding Company, for purposes of the Report.

The term "identified contingent liabilities" shall mean the stated amount of contingent liabilities identified to us and valued by responsible officers of the Company, upon whom we will rely without independent verification, no other contingent liabilities were considered.

Being "able to pay its debts as they become absolute and mature" shall mean that, assuming the Transaction has been consummated as proposed, the Company's financial forecasts for the fiscal periods ending December 31, 2005 to 2007, in the form provided to Houlihan Lokey in writing (the "Projections") indicate positive cash flow for such period, including (and after giving effect to) (i) the payment of installments due under loans made pursuant to the indebtedness incurred in the Transaction, as such installments are scheduled at the close of the Transaction, after consideration of a commercially reasonable level of refinancing, and (ii) the anticipated dividend policy. Sprint provided Houlihan Lokey certain financial projections through December 31, 2007. The extension for 2008 to 2010 was not developed by Sprint management and is not part of the projections approved by Sprint management. Nevertheless, Sprint does not believe that it is unreasonable for HL to utilize the extended forecasts for purposes of its evaluation.

The professional fee for this engagement is not contingent upon the conclusions set forth in the Report.

# Executive Summary

## DUE DILIGENCE PERFORMED

Among other things, we

- 1 visited certain business offices of the Company and held meetings and discussions with certain members of the senior management of the Company to discuss the operations, financial condition, future prospects and projected operations and performance of the Company and the Transaction,
- 2 reviewed Sprint's Form 10-K for the fiscal years ending December 31 2003 and 2004,
- 3 reviewed the Local Telecommunications Division Closing & Scorecard Review of April 22, 2005 containing certain financial and operating data for the quarter ending March 31, 2005,
- 4 reviewed certain financial forecasts and budgets prepared by Sprint (collectively "the Projections"), including
  - a the Local Telecommunications Division 2005-2007 Business and Financial Plan
  - b the Local Telecommunications Division Financial Reports – 2004 Actuals and 2005 Budget
  - c LTD Financial Projections – Consultant Package of May 12, 2005
  - d LTD Capital Expenditures – Consumer, Business & Wholesale of May 17, 2005,
- 5 reviewed the Separation of Local Division – Rating Agency Overview and Rating Agency Financial Schedules of May 5, 2005,
- 6 reviewed certain data regarding historic access line counts for the quarters ending March 2000 through March 2005,
- 7 reviewed certain reports prepared by Sprint regarding competition in the Company's markets,
- 8 reviewed publicly available financial data for the Company and certain companies that we deem comparable to the Company,
- 9 reviewed Sprint's certificate regarding projections addressed to Houlihan Lokey, dated August 15, 2005, and
- 10 conducted other such studies, analyses and investigations as we have deemed appropriate

# Executive Summary

## LIMITING CONDITIONS

We have relied upon and assumed, without independent verification, that the Projections have been reasonably prepared and reflect the best currently available estimates of the future financial results and condition of the Company, and that there has been no material adverse change in the assets, financial condition, business or prospects of the Company since the date of the most recent financial statements made available to us. Although we have not independently verified the accuracy and completeness of the projections or their underlying assumptions, nothing has come to the attention of our personnel working on this engagement during the course thereof that has caused us to believe, based on our best professional judgment, that it was unreasonable for us to utilize and rely upon the projections as part of our analysis.

We have not independently verified the accuracy and completeness of the information supplied to us with respect to the Company and do not assume any responsibility with respect to it. We have not made any physical inspection or independent appraisal of any of the properties or assets of the Company. All valuation methodologies that estimate the worth of an enterprise as a going-concern are predicated on numerous assumptions pertaining to prospective economic and operating conditions. Our analysis is necessarily based on business, economic, market and other conditions as they exist and can be evaluated by us at the date of this Report. Unanticipated events and circumstances may occur and actual results may vary from those assumed. The variations may be material

Notwithstanding the use of the defined term "fair value", we have not been engaged to identify prospective purchasers or to ascertain the actual prices at which and terms on which the Company or the Company's assets can currently be sold. Because the sale of any business enterprise involves numerous assumptions and uncertainties, not all of which can be quantified or ascertained prior to engaging in an actual selling effort, we express no opinion as to whether the Company would actually be sold for the amount we believe to be its fair value.

This Report is furnished solely for the benefit of Sprint Nextel Corporation and does not constitute advice to any other person without our express, prior written consent. This Report is delivered to each recipient subject to the conditions, scope of engagement, limitations and understandings set forth in this Report and our engagement letter with Sprint Corporation, and subject to the understanding that the obligations of Houlihan Lokey in the Transaction are solely corporate obligations, and no officer, director, employee, agent, shareholder or controlling person of Houlihan Lokey shall be subjected to any personal liability whatsoever to any person, nor will any such claim be asserted by or on behalf of you or your affiliates.

# Executive Summary

## SUMMARY OF FINDINGS

The following findings are based upon the investigation, premises, provisos, and analyses outlined above, and more fully described in this Report

- (A) The fair value of LTD Holding Company's assets, in the aggregate are reasonably stated in the range of [REDACTED] to [REDACTED],
- (B) Assuming the Transaction will be consummated as proposed, immediately after and giving effect to the Transaction
  - (i) the fair value of LTD Holding Company's assets would exceed its stated liabilities and identified contingent liabilities,
  - (ii) LTD Holding Company should be able to pay its debts as they become absolute and mature, while (a) continuing to generate sufficient cash to re-invest in the business at a level indicated by the Company necessary to maintain the current level of service, and (b) paying dividends in accordance with the planned dividend policy which the Company believes is commensurate with industry peers and after consideration of a commercially reasonable level of refinancing, and
  - (iii) the capital remaining in LTD Holding Company after the Transaction would be reasonable for the business in which it is engaged, as management has indicated it is proposed to be conducted following the consummation of the Transaction

# Executive Summary

## SUMMARY OF FINDINGS (CONTINUED)

The following table summarizes certain operating, valuation, and credit statistics of LTD Holding Company (giving effect to the Transaction where applicable) and of the selected comparable companies

Interest Coverage EBITDA divided by interest expense

# Executive Summary

## SUMMARY OF FINDINGS (CONTINUED)

Based upon our analysis of LTD Holding Company and the selected comparable companies, as summarized above and further detailed later in this report, we make the following observations

- ❖ LTD Holding Company has experienced access line declines that are at approximately the median of the comparable companies
- ❖ LTD Holding Company's capital expenditures, measured as a percentage of revenues, have been above the median level of the comparable companies
- ❖ Pro forma for the Transaction, LTD Holding Company will have consolidated leverage of approximately [REDACTED]<sup>x</sup> total debt/EBITDA<sup>(1)</sup>, [REDACTED]
- ❖ Owing to LTD Holding Company's size (approximately 3 times that of the largest comparable company) and diversity of wireline assets across 18 states, the company should enjoy enhanced access to capital as compared to the selected comparable companies
- ❖ Pro forma for the Transaction, LTD Holding Company is expected to have an interest coverage ratio (EBITDA/Interest Expense) of [REDACTED]<sup>x</sup> for the 7 months ended 12/31/06 on an annualized basis, which is [REDACTED] than the current median interest coverage ratios for the comparable companies of 2.8<sup>x</sup>
- ❖ Pro forma for the Transaction, and based upon the anticipated dividend policy, LTD Holding Company would be expected to pay out approximately [REDACTED]% - [REDACTED]% of its free cash flows in dividends over the projection period, which is [REDACTED] the median of 70% estimated for the comparable companies

---

<sup>(1)</sup> Based on pro forma total debt of \$7.25 billion as of 6/1/06 and 2006 EBITDA of \$[REDACTED]

## COMPARABLE COMPANY SELECTION

- ❖ As an incumbent local exchange carrier, LTD Holding Company has the following universe of potential comparable companies that are publicly traded

| Rural Local Exchange Carriers (RLECs) |                               | Regional Bell Operating Carriers (RBOCs) |
|---------------------------------------|-------------------------------|------------------------------------------|
| Alaska Communications                 | Hickory Technology            | BellSouth                                |
| ALLTEL                                | Iowa Telecom                  | Qwest Communications                     |
| Atlantic Tele-Network                 | Lynch Interactive             | SBC                                      |
| CenturyTel                            | New Ulm Telecom               | Verizon                                  |
| Cincinnati Bell Telephone Co          | North Pittsburgh Systems      |                                          |
| Citizens Communications               | Otelco                        |                                          |
| Commonwealth Telephone Enter          | Shenandoah Telecommunications |                                          |
| CT Communications                     | Surewest Communications       |                                          |
| D&E Communications                    | Telephone and Data Systems    |                                          |
| Fairpoint Communications              | Valor Communications Group    |                                          |
| Hector Communications                 | Warwick Valley Telephone Co   |                                          |

# Comparable Companies Analysis

## COMPARABLE COMPANY SELECTION (CONTINUED)

- ❖ Our analysis to identify the most relevant comparable companies to LTD Holding Company is primarily based on the following criteria
  - (1) Size – We believe that Large Cap service providers have a different risk profile than Small to Mid Cap service providers
    - Liquidity – Trading volume is more limited for Small to Mid Cap
    - Business Risk – The advantages/disadvantages of Economies of Scale
    - Investor Base – Different profiles for Large Cap funds versus Small-Mid Cap funds
  - (2) Rural Market Exposure – Rural market differ from Urban markets due to the following
    - Lower level of competition/ Higher barriers to enter
    - Regulatory framework
  - (3) Non-Core Assets – The existence of significant non-core (non-ILEC) assets affects valuation statistics
    - Verizon owns 55% of Verizon Wireless and recently announced the acquisition of MCI
    - SBC owns 60% of Cingular Wireless and recently announced the acquisition of AT&T
    - BellSouth owns 40% of Cingular Wireless
    - Qwest owns a nationwide long haul network
    - Various RLECs own various wireless assets/ partnerships

Source: Company filings and press releases

Note: Enterprise values are as of 7/1/2005. Lines ownership as of 3/31/03

(1) Non-core assets based on book value unless stated otherwise

(2) Non-core assets as a percent of EV plus non-core assets

(3) Primarily the 18% minority interest in US Cellular, which is not owned by TDS

- Given their significant wireless assets, Alltel, TDS, and Cincinnati Bell will be excluded from our selected comparable companies

Source: Company filings and press releases

Note: Enterprise values are as of 7/1/2005. Lines ownership as of 3/31/05

(1) Non-core assets based on book value unless stated otherwise

(2) Non-core assets as a percent of EV plus non-core assets

❖ Size is the primary reason for excluding the above companies from selected comparable companies

- ♦ Alaska Communications with an EV of \$807 million is closest in size to our size threshold. However, given its wireless ownership and unique region, it would not be a good comparable company
- ♦ All other public RLECs trade at an EV that is lower than \$500 million

# Comparable Companies Analysis

## COMPARABLE COMPANY SELECTION – RBOCs

❖ The following table summarizes wireline/wireless mix and non-core assets for RBOCs

**RBOCs Wireless Mix and Non-Core Assets**  
(\$ in millions)

| Company Name | EV       | EV Comments                       | Lines Ownership |                           | % of Total Lines |          | \$       | %   | Non-Core Assets <sup>(1)</sup>                                   |                       | Minority Interests |
|--------------|----------|-----------------------------------|-----------------|---------------------------|------------------|----------|----------|-----|------------------------------------------------------------------|-----------------------|--------------------|

| SBC          | 70,886   | Excludes Cingular Wireless        | 27,440,000      | 30,240,000 <sup>(3)</sup> | 48%              | 52%      | 34,816   | 33% | Investment in and advances to Cingular                           | 0                     |                    |
| Verizon      | 145,261  | Includes 100% of Verizon Wireless | 33,644,000      | 24,998,600 <sup>(4)</sup> | 57%              | 43%      | 5,817    | 4%  | Value of ownership of Verizon Wireless and marketable securities | 24,754 <sup>(5)</sup> |                    |

Source: Company filings and press releases

Note: Enterprise values are as of 7/1/2005. Lines ownership as of 3/31/05

(1) Non-core assets based on book value unless stated otherwise

(2) Non-core assets as a percent of EV, plus non-core assets

(3) Represents proportionate Cingular subscribers based on 60% and 40% ownership in SBC and BellSouth, respectively

(4) Represents proportionate Verizon Wireless subscribers based on 55% ownership

(5) Represents Lufthansa's 45% ownership in Verizon Wireless

❖ BellSouth, SBC, and Verizon all have significant wireless assets

- Both Cingular and Verizon Wireless are private companies, which makes it difficult to extract public market value for ILEC assets
- In addition, pending SBC/ AT&T and Verizon/ MCI combinations will further differentiate these companies from LTD Holding Company

❖ Qwest owns a nationwide long haul network as part of its core assets that is not comparable with LTD Holding Company

❖ We have excluded the RBOCs from selected comparable companies due to

- (1) Lack of market value for pure wireline ILEC assets, and
- (2) RBOCs operate in highly competitive environment as a result of their high metro/urban exposure

❖ Approximately a third of LTD Holding Company lines are in metro/urban areas (primarily in Las Vegas and Orlando)

# Comparable Companies Analysis

## COMPARABLE COMPANY CREDIT RATIOS AND RATINGS

- ❖ The following table illustrates credit ratios based on Moody's Rating Methodology for Comparable Public RLECs with their respective credit ratings
- ❖ Owing to LTD Holding Company's size (approximately 3 times that of the largest comparable company) and diversity of wireline assets across 18 states, the company should enjoy enhanced access to capital as compared to the selected comparable companies
- ❖ We understand that Sprint has obtained indicative ratings for LTD Holding Company from major ratings agencies

*The following credit ratios are based on specific Moody's methodologies and will differ from other figures in the presentation. In particular, financial metrics were adjusted for operating lease commitments*

Memo: Nasdaq

Source: Compustat/IBIS

Note: Financial results presented are as of March 31, 2005

(1) Free Cash Flow before Dividends is defined as FBIT(1) less CapEx less cash interest expense less taxes

(2) Based on Wall Street research

(3) Excludes initial dividend of payments of \$2.00 per share

(4) Actual 1st quarter dividend declared was pro-rata for period between IPO date (2/9/2003) and end of the first quarter ending 3/31/2005, totaling \$0.18 per share, versus the indicated quarterly dividend of \$0.36 per share

(5) Figure shown is pro-forma for first full quarter dividend payment annualized

(6) Actual 1st quarter dividend distribution was pro-rata for period between IPO date (2/4/2005) and end of first quarter ending 3/31/2005, totaling \$0.23 per share versus the indicated quarterly dividend of \$0.457 per share

(7) Figure shown is pro-forma for first full quarter dividend payment annualized, actual cash payment of dividends for 1Q05 was \$7.5 million

(8) Total dividend distributions of \$12.5 million were declared on March 15, 2005 and paid on April 15, 2005

(9) Common stock declared an initial dividend of \$13.00 and stated a \$2.00 recurring annual dividend in quarterly payments. Figure shown is pro-forma for first full quarter dividend payment annualized, exclusive of initial dividend

## COMPARABLE COMPANY LINE LOSSES ANALYSIS

- ❖ LTD Holding Company's access line loss in 2003 and 2004 are at approximately the median level for the comparable companies
- ❖ LTD Holding Company's forecast for 2005 and 2006 assumes access line losses [REDACTED] of the median of the estimate by research analysts for the comparable companies

## RLECs Access Line Analysis

# Comparable Companies Analysis

## EXPOSURE TO CABLE VOICE COMPETITION

- ❖ Recent trends suggest an accelerated roll-out of cable telephony over the next 3 years
- ❖ It is estimated that cable operators added almost 400k telephony customers during 1Q05 versus approximately 100k during 1Q04
- ❖ By 2010, Cable operators are expected to gain approximately 18% of consumer access lines

# Comparable Companies Analysis

## EXPOSURE TO CABLE VOICE COMPETITION (CONTINUED)

- ❖ As a result of the recent launch of VoIP services by cable providers, current consumers will benefit from
  - (1) Increase of alternative service providers
  - (2) Lower pricing due to increased competition
- ❖ As of year-end 2004, cable providers were offering voice services in areas covering 15% of LTD Holding Company's residential lines
- ❖ The following chart illustrates potential exposure to cable voice services by tier-1 cable MSOs<sup>(1)</sup>

<sup>(1)</sup> Tier-1 cable MSO's includes Comcast, Time Warner, Cox, Charter, Adelphia, Cablevision, Insight, and Mediacom

# Comparable Companies Analysis

## EXPOSURE TO WIRELESS SUBSTITUTION

- ❖ Recent trends suggest that wireless substitution, as a replacement to landline, is the driver for the majority of primary residential access line losses
- ♦ It is currently estimated that 6-7% of households have already “cut the cord”
- ♦ Given that ILECs are still reporting significant line losses although they are (1) winning back UNE-P lines, (2) adding coverage due to new housing starts, and (3) cable telephony is still in its infancy, wireless substitution can be the only explanation for most of the primary residential access line losses

### Wireless Substitution of Primary Consumer Access Lines

(Access Lines in thousands)

|                                                                              | 1Q04       | 2Q04         | 3Q04       | 4Q04         | 1Q05         |

Source Deutsche Bank report dated 5/19/2005

- ❖ In urban markets, RBOCs are expected to lose 20-25% of primary residential lines to wireless substitution by 2010
- ❖ In rural areas that are less exposed to wireless substitution because of partial and inconsistent wireless coverage, RLECs are expected to lose 15-20% of primary residential lines to wireless substitution by 2010
- ❖ As approximately a third of its lines are in urban areas, LTD Holding Company is more exposed to wireless substitution than its RLEC peers

# Comparable Companies Analysis

## EXPOSURE TO FEDERAL USF

- ❖ Federal USF system is currently under pressure due to the imbalance between sources of funding and funding requirements
- ❖ Federal USF contributes approximately [REDACTED]% of LTD Holding Company's revenue, compared with a peer mean of 4.6%
- ❖ As such, LTD Holding Company is [REDACTED] exposed to Federal subsidies and should be [REDACTED] impacted by the overhang from regulatory risk
- ❖ The following table illustrates exposure to Federal USF revenue

# Comparable Companies Analysis

## EXPOSURE TO ACCESS REVENUES

- ❖ Access revenues are exposed to regulatory risk as access regime reform proposals are being considered by the FCC
- ❖ Access revenue contributes approximately [REDACTED]% of LTD Holding Company's revenue, compared with a peer mean of 35.7%, making LTD Holding Company [REDACTED] exposed to regulatory risk due to access revenue

**Exposure to Access Revenues<sup>(1)</sup>**  
(as a % of 2004 Revenue)

# Valuation Methodology

## VALUATION METHODOLOGY

Houlihan Lokey's analysis included an independent analysis of the fair value of the aggregate assets of the Company using three widely accepted methodologies. The three methodologies included an income approach and two market approaches. The methodologies employed are outlined in further detail on the following pages:

- 1 Market Multiple Methodology
- 2 Comparable Transaction Methodology
- 3 Discounted Cash Flow Methodology

The valuation methodologies described in this section provide a calculation of the enterprise value from operations of the Company. This resulting value is the fair value of the assets for purposes of the Capital Tests. The Capital Tests are described after the Valuation Methodology discussion in this chapter.

# Valuation Methodology

## VALUATION METHODOLOGY (CONTINUED)

### MARKET MULTIPLE METHODOLOGY

The market multiple methodology involved the multiplication of earnings before interest, taxes, depreciation and amortization (EBITDA) and access lines by appropriate risk-adjusted multiples

- ❖ Multiples were determined through an analysis of certain publicly traded companies, which were selected on the basis of operational and economic similarity with the principal business operations of the Company
- ❖ EBITDA and per Access Line multiples were calculated for the comparable companies based upon daily trading prices
- A comparative risk analysis between the Company and the public companies formed the basis for the selection of appropriate risk adjusted multiples for the Company. The risk analysis incorporates both quantitative and qualitative risk factors which relate to, among other things, the nature of the industry in which the Company and other comparable companies are engaged
- ❖ Multiples were calculated for the comparative companies based upon trading prices as of July 1, 2005

# Valuation Methodology

## VALUATION METHODOLOGY (CONTINUED)

### MARKET MULTIPLE METHODOLOGY (CONTINUED)

- ❖ The risk analysis incorporates both quantitative and qualitative risk factors, which relate to, among other things, the nature of the industry in which LTD Holding Company and the other comparative companies are engaged, relative size, profitability and growth rates
- ❖ For purposes of this analysis, we selected six (6) companies as comparable to LTD Holding Company, including
  - ♦ Citizens Communications
  - ♦ CenturyTel
  - ♦ Valor Communications Group
  - ♦ Fairpoint Communications
  - ♦ Iowa Telecommunications
  - ♦ Commonwealth Telephone Enterprises
- ❖ Further discussion of our comparable company selection can be found in the Telecommunications Industry Overview section

# Valuation Methodology

## VALUATION METHODOLOGY (CONTINUED)

### COMPARABLE TRANSACTION METHODOLOGY

The comparable transaction methodology also involved multiples of access lines. Multiples used in this approach were determined through an analysis of transactions involving controlling interests in companies with operations similar to the Company's principal business operations.

Description of these transactions and multiples selected can be found in our Valuation Analysis section.

# Valuation Methodology

## VALUATION METHODOLOGY (CONTINUED)

### DISCOUNTED CASH FLOW METHODOLOGY

The Discounted Cash Flow Methodology (“DCF”) involved estimating the present value of the projected cash flows to be generated from the business and theoretically available to the capital providers of the Company. A discount rate was applied to the projected future cash flows to reflect all risks of ownership and the associated risks of realizing the stream of projected cash flows. Since the cash flows are projected over a limited number of years, a terminal value was computed as of the end of the last period of projected cash flows. We estimated the Company’s terminal value by using a multiple of EBITDA in the final year of the projections. The terminal value is an estimate of the value of the enterprise on a going concern basis as of that future point in time. Discounting each of the projected future cash flows and the terminal value back to the present and summing the results yields an indication of value for the enterprise.

- ❖ The Company’s financial projections as extended by Houlihan Lokey were utilized in employing the Discounted Cash Flow Approach
- ❖ In the DCF Approach, a discount rate is applied to the projected future cash flows to arrive at the present value
  - ♦ The discount rate is intended to reflect all risks of ownership and the associated risks of realizing the stream of projected future cash flows

# Valuation Methodology

## VALUATION METHODOLOGY (CONTINUED)

### DISCOUNTED CASH FLOW METHODOLOGY (CONTINUED)

- ❖ In contrast to the “cash flow” figures used in the Market Multiple Approach, the figure used in the DCF Approach more accurately represents the true cash flow being generated by the operations of the business
  - ♦ The cash flows are typically projected over a limited number of years, and as a result, it is necessary to compute a terminal value as of the end of the last period for which cash flows are projected
  - ♦ This terminal value is essentially an estimate of value of the enterprise as of that future point in time, and it incorporates the assumptions of perpetual operations and implicit growth found in the Market Multiple Approach
- ❖ Discounting each of the projected future cash flows and the terminal value back to the present, and summing the results, yields an indication of value for the enterprise as a whole

**Capital Tests Methodology**

# Capital Tests Methodology

## CAPITAL TESTS METHODOLOGY (CONTINUED)

### BALANCE SHEET TEST

The Balance Sheet Test determines whether or not the *fair value* of the company's assets exceeds its stated liabilities and identified contingent liabilities after giving effect to the transaction. This test requires an analysis of the fair market value of the company as a *going concern*. As part of this analysis, we would consider, among other things, these factors

- ❖ Historical and projected financial performance of the Company,
- ❖ The business environment in which the Company competes.
- ❖ Performance of certain publicly traded companies deemed by Houlihan Lokey to be comparable to the company, in terms of, among other things, size, profitability, financial leverage and growth,
- ❖ Capitalization rates ("multiples") for certain publicly traded companies deemed by Houlihan Lokey to be comparable to the Company, such as
  - ♦ EV / EBITDA,
  - ♦ EV / Access Lines
- ❖ Multiples derived from acquisitions of companies deemed by Houlihan Lokey to be comparable to the Company,
- ❖ Discounted cash flow ("DCF") approach,
- ❖ The capital structure and debt obligations of the company, and
- ❖ Non-operating assets and identified contingent liabilities of the Company

# Capital Tests Methodology

## CASH FLOW TEST

The Cash Flow Test focuses on whether or not the company *should be able to repay its debts as they become absolute and mature* (including the debts incurred in the transaction) This test involves a two-step analysis of the company's financial projections

- ❖ Examine the consistency of the projections with historical performance, current marketing strategies and operating cost structure, and
- ❖ Test the sensitivity of the projections to changes in key variables including revenue drivers, operating margins and capital expenditures

In testing cash flows, we perform sensitivity analyses to determine the "safety margin" available to deal with reasonable downturns in the company's ability to generate operating cash flow

# Capital Tests Methodology

## REASONABLE CAPITAL TEST

The Reasonable Capital Test follows from the Balance Sheet and Cash Flow Tests. The company may have assets that exceed liabilities, but if the amount is too small to provide some downside protection, the capital amount may not be deemed to be adequate and, in such a situation, the company would fail the Reasonable Capital Test. The determination as to whether *the net assets remaining with the company constitute unreasonably small capital* involves an analysis of various factors, including

- ❖ The degree of sensitivity demonstrated in the cash flow test,
- ❖ Historical and expected volatility in revenues, cash flow and capital expenditures,
- ❖ The adequacy of working capital,
- ❖ The maturity structure and the ability to refinance the company's obligations,
- ❖ The magnitude, timing and nature of identified contingent liabilities, and
- ❖ The nature of the business and the impact of financial leverage on its operations

# Valuation Summary

## VALUATION SUMMARY (CONTINUED)

### COMPARABLE COMPANY SELECTION

The broadest comparable company segmentation includes all incumbent local voice telecommunications service providers, consisting principally of RLECs (Rural Local Exchange Carriers) and RBOCs (Regional Bell Operating Companies). As a result of different competitive dynamics in urban versus rural areas (over two-thirds of LTD Holding Company lines are outside the top 100 MSAs), the RBOCs' significant non-local voice assets (principally wireless or Qwest's IXC asset), and a significant directly comparable data set (i.e. RLECs), the RBOCs were excluded for valuation purposes. The RLEC universe was further refined to Large Cap service providers having an Enterprise Value ("EV") in excess of \$1 billion and not owning significant wireless assets.

### COMPARABLE COMPANY ANALYSIS

The comparable trading company valuation is based on the 6 public RLECs exceeding \$1 billion in EV. These comparable trading companies have a general valuation between 6.0x to 8.5x 2005E EBITDA and \$2,500 to \$4,500/access line. While we have reviewed various risk ranking metrics to further narrow the multiple ranges, we have focused our relative analysis on key metrics, including average revenue per line (ARPL), EBITDA margins, expected revenue growth and expected recurring dividend yield. LTD Holding Company's ARPL for 1Q05 of \$59 is ranked 6th out of 7 companies (CenturyTel is ranked 1st with \$77 and Commonwealth has the lowest ARPL of \$53). For 2004, LTD Holding Company had the lowest EBITDA margin of 48%, while its comparable trading companies operated at EBITDA margins of 52% to 58%. LTD Holding Company has the [REDACTED] expected revenue growth, a projected [REDACTED] between 2004 and 2005E, [REDACTED] of Citizens, which has a 2.3% expected decline. In addition, expected dividend yield for LTD Holding Company of approximately [REDACTED]% is [REDACTED] the 7% mean for its peer group. LTD Holding Company is also significantly larger than the comparable companies and generally has a more geographically diverse set of assets.

## CAPITAL TESTS

### BALANCE SHEET TEST

- ❖ The balance sheet test examines whether the fair market value of the Company's assets exceeds the Company's liabilities. For this test, the Enterprise Value from Operations as calculated previously in the Valuation Analysis section is compared to the full amount of debt plus contingent liabilities that the Company is expected to have immediately after and giving effect to the Transaction.
- ❖ The value of the Company's assets exceeds the Company's projected debt by approximately \$[REDACTED] to [REDACTED] based on these calculations.

| Balance Sheet Test                                                                    |                 |

### CASH FLOW TEST

- ❖ To perform the Cash Flow test, we examine the cash available to the Company at the end of each year of the projection period. We calculated the net availability under the bank debt plus the cash on hand at the end of each year to determine the cash cushion that the Company has available in that year.
- ❖ We calculated the Company's cash cushion to be greater than zero in all years of the projection period, ranging from \$[REDACTED] to \$[REDACTED]. Additionally, total debt as well as leverage is projected to [REDACTED] over the projection period.

## CAPITAL TESTS (CONTINUED)

### REASONABLE CAPITAL TEST

- ❖ The reasonable capital test evaluates whether the Company's equity as a percent of its value of assets is adequate. We calculate the Company's equity as a percent of the value of its assets and then compare this to comparable companies.
- ❖ For this test, we use the equity and value of assets amounts calculated in the balance sheet test. The equity value is calculated to be \$[REDACTED] to \$[REDACTED], divided by the value of assets of \$[REDACTED] yields an equity [REDACTED].

| Reasonable Capital Test |            |      |
|-------------------------|------------|------|
| (\$ in millions)        |            |      |
| Reasonable Capital Test | Low        | High |
| Equity                  | [REDACTED] |      |
| Value of Assets         |            |      |
| Equity Cushion          |            |      |

- ❖ The table on the following page compares this equity cushion to that of the Company's peer group, which indicates that LTD Holding Company's equity cushion is [REDACTED] that of the comparable companies.
- ❖ We also observed the following, which are indications of reasonable capital,
  - even in a downside scenario, the Company would still have adequate cash cushion,
  - the Company's historical and expected volatility in revenues, cash flow and capital expenditures has been low,
  - the Company has adequate working capital,
  - the Company's debt maturities are [REDACTED] and the indicated debt rating suggests that the Company will have the ability to refinance the company's obligations, and
  - [REDACTED]

- ❖ This analysis indicates that over the range of the respective adjustments, the various measures of the Company's cash flows and credit ratios remain in reasonable ranges as compared to the unadjusted case

# Capital Tests

## SENSITIVITY ANALYSIS (CONTINUED)

- ❖ In addition to testing the sensitivity of individual projection assumptions, we have tested the impact of a simultaneous change to multiple projection assumptions (the "downside case") All of the adjustments shown on the prior page were used for the downside case The downside case presented herein is not intended to be either a likely or a worst case but is intended to be illustrative of the impact of simultaneous changes to the projection assumptions
- ❖ We examined the financial metrics resulting from the downside case analysis over the projection period including, among other things
  - ♦ Revenues and EBITDA
  - ♦ Debt payoff and debt levels
  - ♦ Credit statistics
  - ♦ Dividend payout ratio
- ❖ Our findings from the downside case analysis include
  - ❖ This downside case results in EBITDA which is \$[REDACTED] in 2010 than the base case
  - ♦ The resulting debt level of \$[REDACTED] in 2010 is lower than at the transaction date
  - ♦ The resulting leverage (Total debt / EBITDA) in 2010 would be [REDACTED]x
  - ♦ The above figures assume that the Company had continued to pay dividends at the anticipated rates However, had the Company chosen to modify dividend payments, the leverage statistics would be more favorable
- ❖ The tables on the following pages detail certain financial statistics and credit ratios that result from the downside case

## CASE STUDY: VERIZON HAWAII

- ❖ On May 21, 2004, The Carlyle Group announced the acquisition of Verizon Hawaii for \$1.65 billion, including \$1.35 billion in cash and \$300 million in assumed debt. Upon closing, May 3, 2005, the purchase price was reduced to \$1.6 billion.

### Transaction Description

Private equity firm, The Carlyle Group purchased Verizon Hawaii from Verizon Communications for \$1.6 billion. The transaction includes Verizon's Hawaii-based local telephone operations, print directory, long distance, and Internet service provider operations. The purchase includes 707,000 switched wireline access lines and The Carlyle Group expects to retain the, approximately, 1,700 Verizon Hawaii company employees. The new entity was renamed to Hawaiian Telecom and began operations on May 3, 2005.

### Summary Financials (\$ in millions)

Comparable Company Descriptions

## Comparable Company Descriptions

### CENTURYTEL INC.

CenturyTel, Inc. is an integrated communications company engaged primarily in providing local exchange, long distance, Internet access and broadband services. The company strives to maintain its customer relationships by, among other things, bundling its service offerings to provide its customers with a complete offering of integrated communications services. All of the company's operations are conducted within the continental U.S. At Dec 31, 2004, the company's local exchange telephone subsidiaries operated approximately 2.3 million telephone access lines, primarily in rural areas and small to mid-size cities in 22 states, with over 70% of these lines located in Wisconsin, Missouri, Alabama, Arkansas and Washington. According to published sources, the company is the eighth largest local exchange telephone company in the U.S. based on the number of access lines served.
