RE: Docket 06-00079 : Petition of Antioch Water Company for Authority to Transfer Control

I have been requested to give a description of my managerial experience, technical capabilities, and financial means to operate Antioch Water Company.

I have been the business manager for Antioch Water since we purchased the business on April 1, 1993. My duties include the billing of the customers and keeping the records for the accounts receivable. I keep up with and pay all accounts for material and supplies needed for the maintenance and operation of the company. The monthly sales tax and records needed for filing the federal taxes as well as the annual report for the Tennessee Regulatory Authority.

I am presently keeping all of the records for the technical aspects of the business due to my partners health problems. The monthly water testing that the Department of Environment and Conservation requires, along with the monthly operating reports, to be filed in Nashville and Jackson, Tennessee. All of the required water testing- monthly, quarterly, and annually by the Department of Environment and Conservation. I have learned over the past twelve years how to work on the well equipment, pumps, motors, chlorination, and supply lines to help better serve the customers.

I will be personally be borrowing the money to buy Mr. Allen's share of the business and assume the debt that the water system has incurred in the past for the installation of the new meter boxes, meters, hardware, and labor for the water customers. I will assume a personal bank note to pay for any existing debt as well as Mr. Allen's share of the business.

Respectfully,

Ted R. Fields
Antioch Water Co.
