| Two Way Architecture                                                                                      | Exhibit D |
| Supergroup Architecture                                                                                   | Exhibit E |

## NETWORK INTERCONNECTION

### 1. GENERAL

- 1.1 The Parties shall provide interconnection with each other's networks for the transmission and routing of telephone exchange service (Local Traffic), ISP-bound Traffic, and exchange access (Switched Access Traffic) on the following terms:

### 2. DEFINITIONS: (FOR THE PURPOSE OF THIS ATTACHMENT)

For purposes of this attachment only, the following terms shall have the definitions set forth below:

- 2.1 **Automatic Location Identification (ALI)** is a feature by which the address associated with the calling party's telephone number (ANI) is forwarded to the PSAP for display. Access to the ALI database is described in Attachment 2 to this Agreement.
- 2.2 **Automatic Number Identification (ANI)** corresponds to the seven-digit telephone number assigned by the serving local exchange carrier.
- 2.3 **Basic 911 Service (B911)** routes a call to one centralized answering location. The attendant at the answering location obtains the pertinent information that identifies the call and the caller's needs. The attendant then determines the appropriate agency and dials a seven (7)-digit number to transfer the caller to that agency. The calling party's emergency information is verbally relayed to the responding agency and a unit is dispatched to the caller's location.
- 2.4 **Call Termination** has the meaning set forth for "termination" in 47 C.F.R. § 51.701(d).
- 2.5 **Call Transport** has the meaning set forth for "transport" in 47 C.F.R. § 51.701(c).
- 2.6 **Call Transport and Termination** is used collectively to mean the switching and transport functions from the Interconnection Point to the last point of switching.
- 2.7 **Common (Shared) Transport** is defined as the transport of the originating Party's traffic by the terminating Party over the terminating Party's common (shared) facilities between (1) the terminating Party's tandem switch and end office switch, (2) between the terminating Party's tandem switches, and/or (3) between the terminating Party's host and remote end office switches. All switches referred herein must be entered into the Local Exchange Routing Guide (LERG).
- 2.8 **Cross Connect** is as defined in Attachment 4 of the Interconnection Agreement. If a Party provisions a cross connect for the purposes of interconnection under this Attachment 3, and such cross connect is not associated with a physical or virtual

collocation arrangement, the provisioning party shall not charge for such cross connect.

- 2.9 **Dedicated Interoffice Facility** is defined as a switch transport facility between a Party's Serving Wire Center and the first point of switching within the LATA on the other Party's network.
- 2.10 **End Office Switching** is defined as the function that establishes a communications path between the trunk side and line side of the End Office switch.
- 2.11 **Enhanced 911 Service** provides features not present in B911 Service, including ANI and ALI display, Selective Routing (SR) and other standard and optional features.
- 2.12 **Fiber Meet** is an interconnection arrangement whereby the Parties physically interconnect their networks via an optical fiber interface at which one Party's facilities, provisioning, and maintenance responsibility begins and the other Party's responsibility ends.
- 2.13 **Interconnection Point (IP)** is the physical telecommunications equipment interface that interconnects the networks of BellSouth and KMC Data.
- 2.14 **IntraLATA Toll Traffic** does not exist for purposes of this Agreement, as the Parties have agreed upon a LATA-wide Local Traffic definition.
- 2.15 **ISP-bound Traffic** is defined as a call to an information service provider/enhanced service provider or Internet Service Provider (ISP) that is dialed by using a local dialing pattern (seven (7) or ten (10) digits).
- 2.16 **Local Channel** is defined as a switched transport facility between a Party's Point of Presence and its designated Serving Wire center where the POP is not located in the designated Serving Wire Center.
- 2.17 **Local Traffic** is as defined any circuit switched call that is originated by an end user of one Party and terminated to an end user of the other Party within a given LATA on that other Party's network, except for those calls that are originated or terminated through switched access arrangements as established by applicable FCC and Commissions rules and orders.
- 2.18 **Point of Presence (POP)** is the physical location at which a Party establishes itself for obtaining access to the other Party's network.
- 2.19 **Public Safety Answering Point (PSAP)** is the answering location for 911 calls.
- 2.20 **Reciprocal Trunk Group** is defined as a one-way trunk group carrying BellSouth originated traffic to be terminated by KMC Data.

- 2.21 **Serving Wire Center** is defined as the first, or only, wire center (such as a tandem or an end office) owned, or leased by one Party that is designated by that Party to serve the geographic area in which the other Party's POP is located and to which the other Party's facilities are connected (i.e., interconnected or transverses/passes through) for the purposes of interconnection.
- 2.22 **Selective Routing (SR)** is a standard feature that routes an E911 call from the tandem to the designated PSAP based upon the address of the ANI of the calling party.
- 2.23 **Tandem Switching** is defined as the function that establishes a communications path between two switching offices through a third switching office through the provision of trunk side to trunk side switching.
- 2.23.1 Consistent with FCC rules and orders, a KMC Data switch shall be considered a tandem switch if it serves a geographic area comparable, but not necessarily identical, to that served by the relevant BellSouth tandem switch. KMC Data shall provide to BellSouth supporting data to show such geographic comparability and if the Parties are unable to agree then the issue shall be resolved pursuant to the Dispute Resolution process set forth in the General Terms and Conditions of this Agreement.
- 2.24 **Transit Traffic** is traffic originating on one Party's network that is switched and/or transported by the other Party and delivered to a third party's network, or traffic originating on a third party's network that is switched and/or transported by one Party and delivered to the other Party's network.

### 3. NETWORK INTERCONNECTION

- 3.1 This Attachment pertains only to the provision of network interconnection where KMC Data owns, leases from a third party or otherwise provides its own switch(es).
- 3.2 Network interconnection may be provided by the Parties at any technically feasible point within BellSouth's network in accordance with applicable FCC and Commission Rules and Orders. In accordance with the terms of this Agreement, network interconnection may be provided via a DS0 where technically feasible and supported by applicable industry standards. Requests for interconnection via methods, such as OCn level interconnection, other than as set forth in this Attachment may be made through the Bona Fide Request (BFR) process set out in Attachment 11.
- 3.2.1 Each Party is responsible for providing, engineering and maintaining the network on its side of the IP. The IP must be located within BellSouth's serving territory in the LATA in which traffic is originating. The IP determines the point at which the

originating Party shall pay the terminating Party for the Call Transport and Termination of Local Traffic, and ISP-bound Traffic.

- 3.2.2 Pursuant to the provisions of this Attachment, the location of the initial IP in a given LATA shall be established by mutual agreement of the Parties. Subject to the requirements for installing additional IPs, as set forth below, any IPs existing prior to the Effective Date of the Agreement will be accepted as initial IPs and BellSouth will not require re-grooming, however, KMC Data may augment and re-groom such IP(s). When the Parties mutually agree to utilize two-way interconnection trunk groups for the exchange of Local Traffic, ISP-bound Traffic and between each other, the Parties shall mutually agree to the location of the IP. Notwithstanding the foregoing, if the Parties are unable to agree to a mutual initial IP, each Party, as originating Party, shall establish a single IP in the LATA for the delivery of its originated Local Traffic, ISP-bound Traffic and to the other Party for Call Transport and Termination by the terminating Party.
- 3.2.3 When first establishing the interconnection arrangement in each LATA, the location of the IP shall be established by mutual agreement of the Parties. In selecting the IP, both Parties will act in good faith and select the point that is most efficient for both Parties. If the Parties are unable to agree on the location of the IP, each Party will designate IPs for its originated traffic. Additional IP(s) in a LATA may be established by mutual agreement of the Parties. In selecting additional IP(s) both Parties will act in good faith and shall consider points that are efficient for both Parties. Notwithstanding the foregoing, and unless mutually agreed to otherwise, additional IP(s) in a particular LATA shall be established, at the request of either Party, when the following criteria are satisfied: (1) the Local Traffic and ISP-bound Traffic exceeds 8.9 million minutes per month for three (3) consecutive months at the proposed location of the additional IP; and (2) any end office to be designated as an IP must be more than twenty (20) miles from an existing IP. BellSouth will not request the establishment of an IP where physical or virtual collocation space is not available or where BellSouth fiber connectivity is not available. When the Parties agree to utilize two-way interconnection trunk groups for the exchange of Local Traffic, ISP-bound Traffic and the Parties must agree to the location of the additional IP(s).
- 3.2.4 Upon written notification from the Party requesting the establishment of an additional IP, the receiving Party has twenty (20) business days to analyze, respond to, and negotiate in good faith regarding the establishment of such IP.
- 3.3 Interconnection via Dedicated Facilities
- 3.3.1 With the exception of Transit Traffic, the Parties shall institute a “bill and keep” compensation plan under which neither Party will charge the other Party recurring and nonrecurring charges for trunks (i.e., one-way or two-way), trunk ports and associated dedicated facilities for the exchange of Local Traffic (non-transit) and ISP-bound Traffic (non-transit) and 911 traffic. The appropriate rate elements that

are subject to this “bill and keep” compensation plan are set forth in Exhibit A. Each Party has the obligation to install and maintain the appropriate trunks, trunk ports and associated facilities on its respective side of the IP and is responsible for bearing its costs for such trunks, trunk ports and associated facilities on its side of the IP. Both Parties, as appropriate, shall be compensated for the ordering of trunks, trunk ports and facilities used exclusively for transit traffic and for ancillary traffic types including, but not limited to OS/DA. The Parties agree that charges for such trunks, trunk ports and facilities are as set forth in Exhibit A or to the extent a rate associated with the interconnecting trunk group is not set forth in Exhibit A, the rate shall be as set forth in the appropriate Party’s tariff as filed and effective with the FCC or Commission, or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.

3.3.2 Local Channel Facilities. In lieu of providing facilities on its side of Interconnection Point or as part of Call Transport and Termination, either Party may purchase Local Channel facilities from the other Party pursuant to the provisions of this Attachment, where such facilities are available. The percentage of Local Channel Facilities utilized for Local Traffic and ISP-bound Traffic shall be determined based upon the application of the Percent Local Facility (PLF) Factor on a statewide basis. The charges applied to the percentage of Local Channel facilities used for Local Traffic and ISP-bound Traffic as determined by the PLF are set forth in Section 3.3.1 above. The remaining percentage of Local Channel Facilities shall be billed at the appropriate Party’s intrastate or interstate tariff rates for switched access services or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.

3.3.3 Dedicated Interoffice Facilities. In lieu of providing facilities on its side of Interconnection Point or as part of Call Transport and Termination, either Party may purchase Dedicated Interoffice facilities from the other Party pursuant to the provisions of this Attachment, where such facilities are available. The percentage of Dedicated Interoffice Facilities utilized for Local Traffic and ISP-bound Traffic shall be determined based upon the application of the PLF Factor on a statewide basis. The charges applied to the percentage of Dedicated Interoffice facilities used for Local Traffic and ISP-bound Traffic as determined by the PLF are set forth in Section 3.3.1 above. The remaining percentage of the Dedicated Interoffice Facilities shall be billed at the appropriate Party’s intrastate or interstate tariff rates for switched access services or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.

3.3.4 In the event that a Party's point of presence is located within its designated Serving Wire Center, such Party may interconnect to the other Party's switch located in the same Serving Wire Center via a cross connect as defined in this Agreement or such Party may interconnect via any other technically feasible method as described herein. If a Party provisions a cross connect for the purposes of interconnection under this Attachment 3, and such cross connect is not associated with a physical

or virtual collocation arrangement, the provisioning party shall not charge for such cross connect. When a cross connect is made in the provisioning of Local Interconnection facilities/services, the providing Party will not charge the other Party a Local Channel Facility rate for such cross connect.

- 3.3.5 The facilities and associated components as set forth in Exhibit A purchased pursuant to this Section 3 shall be ordered via the Access Service Request (ASR) process. The terms, conditions and rates for ordering charges (i.e., expedite, cancellation, and order modification charges) are as set forth in the BellSouth FCC No. 1 Tariff. To the extent that BellSouth requests that KMC Data submit an ASR for an augmentation to the facilities purchased by KMC Data from BellSouth but utilized for BellSouth's originated traffic, the Parties will work in good faith and make best efforts to ensure that the ASR submitted for such augmentations does not require expedition, cancellation or modification and in the event that KMC Data incurs ordering charges, BellSouth and KMC Data shall work cooperatively to determine which Party caused the incurrence of such charges and that Party shall be responsible for such charges.

3.4 Fiber Meet

- 3.4.1 Notwithstanding Sections 3.2.1, 3.2.2, and 3.2.3 above, if KMC Data elects to establish interconnection with BellSouth pursuant to a Fiber Meet Local Channel, KMC Data and BellSouth shall jointly engineer, operate and maintain a Synchronous Optical Network (SONET) transmission system by which they shall interconnect their transmission and routing of Local Traffic via a Local Channel at either the DS1 or DS3 level. The Parties shall work jointly to determine the specific transmission system. However, KMC Data's SONET transmission system must be compatible with BellSouth's equipment, and the Data Communications Channel (DCC) must be turned off, unless otherwise mutually agreed to by the Parties.
- 3.4.2 Each Party, at its own expense, shall procure, install and maintain the agreed upon SONET transmission system in its network.
- 3.4.3 The Parties shall agree to a Fiber Meet point between the BellSouth Serving Wire Center and the KMC Data Serving Wire Center. The Parties shall deliver their fiber optic facilities to the Fiber Meet point with sufficient spare length to reach the fusion splice point for the Fiber Meet Point. BellSouth shall, at its own expense, provide and maintain the fusion splice point for the Fiber Meet. A building type Common Language Location Identification (CLLI) code will be established for each Fiber Meet point. All orders for interconnection facilities from the Fiber Meet point shall indicate the Fiber Meet point as the originating point for the facility.
- 3.4.4 Upon verbal request by KMC Data, and within a reasonable and non-discriminatory time frame, BellSouth shall allow KMC Data access to the fusion

splice point for the Fiber Meet point for maintenance purposes on KMC Data 's side of the Fiber Meet point.

- 3.4.5 Neither Party shall charge the other for its Local Channel portion of the Fiber Meet facility used exclusively for Local Traffic and ISP-Bound Traffic. The remaining portion of the Local Channel shall be billed at the appropriate Party's intrastate or interstate tariff rates for switched access services or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.

#### **4. INTERCONNECTION TRUNK GROUP ARCHITECTURES**

- 4.1 BellSouth and KMC Data shall establish interconnecting trunk groups and trunk group configurations between networks, including the use of one (1)-way or two (2)-way trunks in accordance with the following provisions set forth in this Attachment. For trunking purposes, traffic will be routed based on the digits dialed by the originating customer and in accordance with the LERG.
- 4.2 Consistent with Sections 3.2, 3.2.1, 3.2.2, and 3.3.3. KMC Data shall establish an interconnection trunk group(s) to at least one BellSouth access tandem within the LATA for the delivery of KMC Data 's originated Local Traffic, ISP-bound Traffic and for the receipt and delivery of Transit Traffic. To the extent KMC Data desires to deliver Local Traffic, ISP-bound Traffic, and/or Transit Traffic to BellSouth access tandems within the LATA, other than the tandems(s) to which KMC Data has established interconnection trunk groups, KMC Data shall order Multiple Tandem Access, as described in this Attachment, to such other BellSouth access tandems.
- 4.2.1 Notwithstanding the forgoing, KMC Data shall establish an interconnection trunk group(s) to all BellSouth access and local tandems in the LATA where KMC Data has homed (i.e., assigned) its NPA/NXXs. KMC Data shall home its NPA/NXXs on the BellSouth tandems that serve the exchange rate center areas to which the NPA/NXXs are assigned. The specified exchange rate center assigned to each BellSouth tandem is defined in the LERG. KMC Data shall enter its NPA/NXX access and/or local tandem homing arrangements into the LERG.
- 4.3 Switched access traffic will be delivered to and from Interexchange Carriers (IXCs) based on KMC Data 's NXX access tandem homing arrangement as specified by KMC Data in the LERG.
- 4.4 Any KMC Data interconnection request that (1) deviates from the interconnection trunk group architectures as described in this Attachment, (2) affects traffic delivered to KMC Data from a BellSouth switch, and (3) requires special BellSouth switch translations and other network modifications will require KMC Data to submit a BFR/NBR via the BFR/NBR Process as set forth in Attachment 11. At such time that BellSouth submits a request for interconnection that meets

the requirements of this section, the Parties will negotiate the rates, terms, and conditions for such request.

- 4.5 All trunk groups will be provisioned as Signaling System 7 (SS7) capable where technically feasible. If SS7 is not technically feasible multi-frequency (MF) protocol signaling shall be used.
- 4.6 In cases where KMC Data is also an IXC, the IXC's Feature Group D (FG D) trunk group(s) must remain separate from the local interconnection trunk group(s).
- 4.7 Each Party shall order interconnection trunks and trunk group including trunk and trunk group augmentations via the ASR process. A Firm Order Confirmation (FOC) shall be returned to the ordering Party, after receipt of a valid, error free ASR, within the timeframes set forth in each state's applicable Performance Measures. Notwithstanding the foregoing, blocking situations and projects shall be managed through BellSouth's Carrier Interconnection Switching Center (CISC) Project Management Group and KMC Data's equivalent trunking group, and FOCs for such orders shall be returned in the timeframes negotiated by the Parties and suitable to the project. No additional charges shall be triggered due to the involvement of such project management. A project is defined as (1) a new trunk group, excluding augments to existing routes or trunk groups already provided for pursuant to the terms of this Attachment or (2) a request for more than ninety-six (96) trunks on a single or multiple group(s) in a given BellSouth local calling area.
- 4.8 Interconnection Trunk Groups for Exchange of Local Traffic, ISP-bound Traffic and Transit Traffic
- Upon mutual agreement of the Parties in a joint planning meeting, the Parties' shall exchange Local Traffic, ISP-bound Traffic and Transit Traffic, where applicable, on two (2)-way interconnection trunk group(s) with the quantity of trunks being mutually determined and the provisioning being jointly coordinated. Furthermore, the Parties shall agree upon the IP(s) for two (2)-way interconnection trunk groups transporting both Parties' Local Traffic, ISP-bound Traffic, and Transit Traffic, where applicable as set forth in Section 3 above. KMC Data shall order such two (2)-way trunks via the ASR process. BellSouth will use the Trunk Group Service Request (TGSR) to request changes in trunking. Furthermore, the Parties shall jointly review trunk performance and forecasts on a periodic basis as set forth in Section 7 below. The Parties' use of two-way interconnection trunk groups for the transport of Local Traffic, ISP-bound Traffic, and Transit Traffic between the Parties does not preclude either Party from establishing additional one-way interconnection trunks for the delivery of its originated Local Traffic, ISP-bound Traffic and Transit Traffic to the other Party.
- 4.8.1 BellSouth Access Tandem Interconnection
- BellSouth access tandem interconnection at a single access tandem provides access to those end offices subtending that access tandem (Intratandem Access). Access

tandem interconnection is available for any of the following access tandem architectures

#### 4.8.1.1 Basic Architecture

In the basic architecture, KMC Data's originating Local Traffic, ISP-bound Traffic and originating and terminating Transit Traffic is transported on a single two-way trunk group between KMC Data and BellSouth access tandem(s) within a LATA to provide Intratandem Access. This trunk group carries Transit Traffic between KMC Data and ICOs, IXC's, other CLECs, CMRS providers that have a Meet Point Billing (MPB) arrangement with BellSouth, and other network providers with which KMC Data desires to exchange traffic. This trunk group also carries KMC Data originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an ICO tandem or other CLEC tandem. BellSouth originated Local Traffic, ISP-bound Traffic and is transported on a separate single one-way trunk group terminating to KMC Data. Other trunk groups for operator services, directory assistance, emergency services and intercept may be established pursuant to the applicable BellSouth tariff if service is requested. The LERG contains current routing and tandem serving arrangements. The basic Architecture is illustrated in Exhibit B.

#### 4.8.1.2 One-Way Trunk Group Architecture

In one-way trunk group architecture, the Parties interconnect using three separate trunk groups. A one-way trunk group provides Intratandem Access for KMC Data-originated Local Traffic, ISP-bound Traffic and destined for BellSouth customers. A second one (1)-way trunk group carries BellSouth-originated Local Traffic, ISP-bound Traffic and destined for KMC Data customers. A two (2)-way trunk group provides Intratandem Access for KMC Data's originating and terminating Transit Traffic. This trunk group carries Transit Traffic between KMC Data and ICOs, IXC's, other CLECs, CMRS providers that have a MPB arrangement with BellSouth, and other network providers with which KMC Data desires to exchange traffic. This trunk group also carries KMC Data originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an ICO tandem or other CLEC tandem. BellSouth originated Local Traffic, ISP-bound Traffic and is transported on a separate single one-way trunk group terminating to KMC Data. Other trunk groups for operator services, directory assistance, emergency services and intercept may be established pursuant to the applicable BellSouth tariff if service is requested. The LERG contains current routing and tandem serving arrangements. The one (1)-way trunk group architecture is illustrated in Exhibit C.

#### 4.8.1.3 Two-Way Trunk Group Architecture

The two-way trunk group Architecture establishes one (1) two (2)-way trunk group to provide Intratandem Access for the exchange of Local Traffic, ISP-bound Traffic and between KMC Data and BellSouth. In addition, a separate two (2)-way transit trunk group must be established for KMC Data's originating and

terminating Transit Traffic. This trunk group carries Transit Traffic between KMC Data and ICOs, IXC, other CLECs, CMRS providers that have a MPB arrangement with BellSouth, and other network providers with which KMC Data desires to exchange traffic. This trunk group also carries KMC Data originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an ICO tandem or other CLEC tandem. Upon reasonable notice, either Party's originated traffic may, in order to prevent or remedy traffic blocking situations, be transported on a separate single one-way trunk group terminating to the other Party. However, where KMC Data is responsive in a timely manner to BellSouth's transport needs for its originated traffic, BellSouth originating traffic will be placed on the two-way Local Traffic trunk group carrying ISP-bound Traffic. Other trunk groups for operator services, directory assistance, emergency services and intercept may be established pursuant to the applicable BellSouth tariff if service is requested. The LERG contains current routing and tandem serving arrangements. The two (2)-way trunk group architecture is illustrated in Exhibit D.

#### 4.8.1.4 Supergroup Architecture

In the supergroup architecture, the Parties' Local Traffic, ISP-bound Traffic and KMC Data's Transit Traffic are exchanged on a single two-way trunk group between KMC Data and BellSouth to provide Intratandem Access to KMC Data. This trunk group carries Transit Traffic between KMC Data and ICOs, IXCs, other CLECs, CMRS providers that have a MPB arrangement with BellSouth, and other network providers with which KMC Data desires to exchange traffic. This trunk group also carries KMC Data originated Transit Traffic transiting a single BellSouth access tandem destined to third party tandems such as an ICO tandem or other CLEC tandem. Upon reasonable notice, either Party's originated traffic may, in order to prevent or remedy traffic blocking situations, be transported on a separate single one-way trunk group terminating to the other Party. However, where KMC Data is responsive in a timely manner to BellSouth's transport needs for its originated traffic, BellSouth originating traffic will be placed on the Supergroup. Other trunk groups for operator services, directory assistance, emergency services and intercept may be established pursuant to the applicable BellSouth tariff if service is requested. The LERG contains current routing and tandem serving arrangements. The supergroup architecture is illustrated in Exhibit E.

#### 4.8.1.5 Multiple Tandem Access Interconnection

- 4.8.1.5.1 Where KMC Data does not choose access tandem interconnection at every BellSouth access tandem within a LATA, KMC Data may utilize BellSouth's multiple tandem access interconnection (MTA). To utilize MTA KMC Data must establish an interconnection trunk group(s) at a BellSouth access tandem through multiple BellSouth access tandems within the LATA as required. BellSouth will route KMC Data's originated Local Traffic, ISP-bound Traffic and for LATA wide transport and termination. KMC Data must also establish an interconnection

trunk group(s) at all BellSouth access tandems where KMC Data NXXs are homed as described in Section 4.2.1 above. If KMC Data does not have NXXs homed at any particular BellSouth access tandem within a LATA and elects not to establish an interconnection trunk group(s) at such BellSouth access tandem, KMC Data can order MTA in each BellSouth access tandem within the LATA where it does have an interconnection trunk group(s) and BellSouth will terminate KMC Data's Local Traffic, ISP-bound Traffic and to End-Users served through those BellSouth access tandems where KMC Data does not have an interconnection trunk group(s). MTA shall be provisioned in accordance with BellSouth's Ordering Guidelines.

- 4.8.1.5.2 KMC Data may also utilize MTA to route its originated Transit Traffic; provided, however, that MTA may not be utilized to route switched access traffic that transits the BellSouth network to an IXC. Switched access traffic originated by or terminated to KMC Data will be delivered to and from IXCs based on KMC Data's NXX access tandem homing arrangement as specified by KMC Data in the LERG.
- 4.8.1.5.3 Compensation for MTA shall be at the applicable tandem switching and transport charges specified in Exhibit A and shall be billed in addition to any Call Transport and Termination charges.
- 4.8.1.5.4 To the extent KMC Data does not purchase MTA in a LATA served by multiple access tandems, KMC Data must establish an interconnection trunk group(s) to every access tandem in the LATA to serve the entire LATA. To the extent KMC Data routes its traffic in such a way that utilizes BellSouth's MTA service without properly ordering MTA, KMC Data shall pay BellSouth the associated MTA charges.

#### 4.8.2 Local Tandem Interconnection

- 4.8.2.1 Local Tandem Interconnection arrangement allows KMC Data to establish its IP, pursuant to the provisions of this Attachment, and the associated interconnection trunk group(s) at BellSouth local tandems for: (1) the delivery of KMC Data-originated Local Traffic, ISP-bound Traffic and transported and terminated by BellSouth to BellSouth end offices served by those BellSouth local tandems, and (2) for local Transit Traffic transported by BellSouth for third party network providers who have also established an interconnection trunk group(s) at those BellSouth local tandems.
- 4.8.2.2 When a specified local calling area is served by more than one BellSouth local tandem, KMC Data must designate a "home" local tandem for each of its assigned NPA/NXXs and establish trunk connections to such local tandems. Additionally, KMC Data may choose to establish an interconnection trunk group(s) at the BellSouth local tandems where it has no codes homing but is not required to do so. KMC Data may deliver Local Traffic, ISP-bound Traffic and to a "home"

BellSouth local tandem that is destined for other BellSouth or third party network provider end offices subtending other BellSouth local tandems in the same local calling area where KMC Data does not choose to establish an interconnection trunk group(s). It is KMC Data's responsibility to enter its own NPA/NXX local tandem homing arrangements into the LERG either directly or via a vendor in order for other third party network providers to determine appropriate traffic routing to KMC Data's codes. Likewise, KMC Data shall obtain its routing information from the LERG.

4.8.2.3 Notwithstanding establishing an interconnection trunk group(s) to BellSouth's local tandems, KMC Data must also establish an interconnection trunk group(s) to a BellSouth access tandem within the LATA on which KMC Data has NPA/NXXs homed for the delivery of Interexchange Carrier Switched Access (SWA) and toll traffic, and traffic to Type 2A CMRS connections located at the access tandems. BellSouth shall not switch SWA traffic through more than one BellSouth access tandem. SWA, Type 2A CMRS or toll traffic routed to the local tandem in error will not be backhauled to the BellSouth access tandem for completion. (Type 2A CMRS interconnection is defined in BellSouth's A35 General Subscriber Services Tariff (GSST)).

4.8.2.4 BellSouth's provisioning of Local Tandem Interconnection assumes that KMC Data has executed the necessary local interconnection agreements with the other third party network providers subtending those local tandems as required by the Act.

4.8.3 Direct End Office-to-End Office Interconnection

4.8.3.1 Direct End Office-to-End Office one (1)-way or two (2)-way interconnection trunk groups allow for the delivery of a Party's originating Local Traffic, ISP-bound Traffic and to the terminating Party on a direct end office-to-end office basis.

4.8.3.2 The Parties may utilize direct end office-to-end office trunk groups under any one of the following conditions:

4.8.3.2.1 Tandem Exhaust. If a tandem through which the Parties are interconnected is unable to, or is forecasted to be unable to support additional traffic loads for the Parties or any other carrier for any period of time, the Parties will endeavor to mutually agree on an end office trunking plan or an appropriate alternate routing plan that will alleviate the tandem capacity shortage and ensure completion of traffic between KMC Data and BellSouth.

4.8.3.2.2 Traffic Volume. To the extent either Party has the capability to measure the amount of traffic between KMC Data's switch and a BellSouth end office switch, and where such traffic exceeds or is forecasted to exceed a single DS3 (i.e., 8.9 million minutes) of traffic for three consecutive months, then the Parties shall

install and maintain direct end office trunking sufficient to handle such traffic volumes. Either Party will install and maintain additional capacity between such points when overflow traffic exceeds or is forecasted to exceed a single DS3 (i.e., 8.9 million minutes) of traffic for three consecutive months. In the case of one-way trunking, additional trunking shall only be required by the Party whose trunking has achieved the preceding usage threshold.

4.8.3.2.3 Mutual Agreement. The Parties may install direct end office trunking upon mutual agreement in the absence of conditions (1) or (2) above.

4.8.3.3 Overflow Routing. To the extent technically feasible and where appropriate, BellSouth will provide overflow routing consistent with how BellSouth overflows its traffic. The overflow will be based on the homing arrangements displayed in the LERG.

4.8.4 Transit Traffic Trunk Group

Transit Traffic trunks can either be two-way trunks or two (2) one (1)-way trunks ordered by KMC Data to deliver and receive Transit Traffic. Establishing Transit Traffic trunks at BellSouth access and local tandems provides intratandem access to the third parties also interconnected at those tandems.

4.8.5 Toll Free Traffic

4.8.5.1 If KMC Data chooses BellSouth to perform the Service Switching Point (SSP) Function (i.e., handle Toll Free database queries) from BellSouth's switches, all KMC Data originating Toll Free traffic will be routed over the Transit Traffic Trunk Group and shall be delivered using GR-394 format. Carrier Code "0110" and Circuit Code (to be determined for each LATA) shall be used for all such calls.

4.8.5.2 KMC Data may choose to perform its own Toll Free database queries from its switch. In such cases, KMC Data will determine the nature (local/intraLATA/interLATA) of the Toll Free call (local/IntraLATA/InterLATA) based on the response from the database. If the call is a BellSouth local or intraLATA Toll Free call, KMC Data will route the post-query local or IntraLATA converted ten-digit local number to BellSouth over the local or intraLATA trunk group. If the call is a third party (ICO, IXC, CMRS or other CLEC) local or intraLATA Toll Free call, KMC Data will route the post-query local or intraLATA converted ten (10)-digit local number to BellSouth over the Transit Traffic Trunk Group and KMC Data shall provide to BellSouth a Toll Free billing record when appropriate. If the query reveals the call is an interLATA Toll Free call, KMC Data will route the post-query interLATA Toll Free call (1) directly from its switch for carriers interconnected with its network or (2) over the Transit Traffic Trunk Group to carriers that are not directly connected to KMC Data's network but that are connected to BellSouth's access tandem.

4.8.5.3 All post-query Toll Free calls for which KMC Data performs the SSP function, if delivered to BellSouth, shall be delivered using GR-394 format for calls destined to IXCs, and GR-317 format for calls destined to end offices that directly subtend a BellSouth access tandem within the LATA.

4.8.6 High Volume Calling (Mass Calling) Trunk Groups

4.8.6.1 The Parties will cooperate to establish separate trunk groups, or provide some other means of protective controls (i.e., call gapping), for the completion of calls to high volume customers, such as radio contest lines.

4.8.6.2 Both parties agree to terminate each Party's mass calling codes as Local Traffic, where appropriate. The Parties agree that each will put in place controls for NXXs that are dedicated for media stimulated mass calling.

5. **NETWORK DESIGN AND MANAGEMENT FOR INTERCONNECTION**

5.1 Network Management and Changes. The Parties will work cooperatively with each other to install and maintain the most effective and reliable interconnected telecommunications networks, including but not limited to the exchange of toll-free maintenance contact numbers and escalation procedures. The Parties will provide public notice of network changes in the information necessary for the transmission and routing of services using their local exchange facilities and networks, to the extent required by, and in accordance with applicable federal and state rules and regulations.

5.2 Interconnection Technical Standards. The interconnection of all networks will be based upon accepted industry/national guidelines for transmission standards and traffic blocking criteria. Interconnecting facilities shall conform, at a minimum, to the telecommunications industry standard of DS1 pursuant to Telcordia Standard No. TR-NWT-00499. Where KMC Data chooses to utilize Signaling System 7 signaling, also known as Common Channel Signaling (CCS), SS7 connectivity is required between the KMC Data switch and the BellSouth Signaling Transfer Point (STP). BellSouth will provide SS7 signaling using Common Channel Signaling Access Capability (CCSAC) in accordance with the technical specifications set forth in the BellSouth Guidelines to Technical Publication, TR-TSV-000905. Facilities of each Party shall provide the necessary on-hook, off-hook answer and disconnect supervision and shall provide calling number ID (Calling Party Number) when technically feasible.

5.3 Quality of Interconnection. The local interconnection for the transmission and routing of telephone exchange service and exchange access that each Party provides to each other will be at least Equal in Quality to what it provides to itself and any subsidiary or affiliate, where technically feasible, or to any other Party to which each Party provides local interconnection.

5.3.1 In the event of an outage or trouble in any arrangement, facility, or service being provided by BellSouth hereunder, BellSouth will follow procedures for isolating and clearing the outage or trouble that are no less favorable than those that apply to comparable arrangements, facilities, or services being provided by BellSouth to itself, Affiliate or any other carrier whose network is connected to that of BellSouth.

5.3.2 “Equal in Quality” shall have the meaning accorded in 47 C.F.R. § 51.305(a)(3). As soon as possible and in no case later than twenty-four (24) hours after receipt of notification of blocking of traffic originated within the other Party’s network, the Parties shall determine and begin work to implement reasonable corrective measures in a manner consistent with industry practices.

5.4 Network Management Controls. Both Parties will work cooperatively to apply sound network management principles by invoking appropriate network management controls (e.g., call gapping) to alleviate or prevent network congestion.

## **6. SIGNALING**

6.1 BellSouth shall offer access to signaling and access to BellSouth’s signaling databases subject to compatibility testing and at the rates set forth in this Attachment. BellSouth may provide mediated access to BellSouth signaling systems and databases. Available signaling elements include signaling links, signal transfer points and service control points. Signaling functionality will be available with both A-link and B-link connectivity.

6.1.1 Both Parties will utilize LEC-to-LEC SS7 Signaling, where available, in conjunction with all traffic in order to enable full interoperability of CLASS features and functions except for call return. All SS7 signaling parameters will be provided, including but not limited to automatic number identification (ANI), originating line information (OLI) calling company category and charge number.

### 6.2 Signaling Link Transport

6.2.1 Signaling Link Transport is a set of two (2) or four (4) dedicated fifty-six (56) kilobits (kbps) transmission paths between KMC Data designated Signaling Points of Interconnection that provide appropriate physical diversity.

### 6.2.2 Technical Requirements

6.2.2.1 Signaling Link Transport shall consist of full duplex mode fifty-six (56) kbps transmission paths and shall perform in the following two (2) ways:

6.2.2.2 An “A-link” Signaling Link Transport is a connection between a switch or SCP and a STP switch pair; and

- 6.2.2.3 As a “B-link” Signaling Link Transport is a connection between two (2) STP switch pairs in different company networks (e.g., between two (2) STP switch pairs for two (2) CLECs).
- 6.2.3 Signaling Link Transport shall consist of signaling link layers as follows:
- 6.2.3.1 An A-link layer shall consist of two (2) links. There shall be no more than two (2) minutes down time per year for an A-link layer.
- 6.2.3.2 A B-link layer shall consist of four (4) links. There shall be negligible (less than two (2) seconds) down time per year for a B-link layer.
- 6.2.4 A signaling link layer shall satisfy interoffice and intraoffice diversity of facilities and equipment, such that:
- 6.2.4.1 No single failure of facilities or equipment causes the failure of both links in an A-link layer (i.e., the links should be provided on a minimum of two (2) separate physical paths end-to-end); and
- 6.2.4.2 No two (2) concurrent failures of facilities or equipment shall cause the failure of all four (4) links in a B-link layer (i.e., the links should be provided on a minimum of three (3) separate physical paths end-to-end).
- 6.2.5 Interface Requirements
- 6.2.5.1 There shall be a DS1 (1.544 Mbps) interface at KMC Data’s designated SPOIs. Each 56 kbps transmission path shall appear as a DS0 channel within the DS1 interface.
- 6.3 STP
- 6.3.1 A Signaling Transfer Point is a signaling network function that includes all of the capabilities provided by the signaling transfer point switches (STPs) and their associated signaling links that enables the exchange of SS7 messages among and between switching elements, database elements and STPs.
- 6.3.2 Technical Requirements
- 6.3.2.1 STPs shall provide access to BellSouth Local Switching or Tandem Switching and to BellSouth Service Control Points/Databases connected to BellSouth SS7 network. STPs also provide access to third party local or tandem switching and third party provided STPs.

- 6.3.2.2 The connectivity provided by STPs shall fully support the functions of all other Network Elements connected to the BellSouth SS7 network. This includes the use of the BellSouth SS7 network to convey messages that neither originate nor terminate at a signaling end point directly connected to the BellSouth SS7 network (i.e., transit messages). When the BellSouth SS7 network is used to convey transit messages, there shall be no alteration of the Integrated Services Digital Network User Part (ISDNUP) or Transaction Capabilities Application Part (TCAP) user data that constitutes the content of the message.
- 6.3.2.3 STPs shall provide all functions of the SCCP necessary for Class 0 (basic connectionless) service, as defined in Telcordia ANSI Interconnection Requirements. This includes Global Title Translation (GTT) and SCCP Management procedures, as specified in ANSI T1.112.4. Where the destination signaling point is a KMC Data or third party local or tandem switching system directly connected to BellSouth SS7 network, BellSouth shall perform final GTT of messages to the destination and SCCP Subsystem Management of the destination. In all other cases, BellSouth shall perform intermediate GTT of messages to a gateway pair of STPs in an SS7 network connected with the BellSouth SS7 network, and shall not perform SCCP Subsystem Management of the destination. If BellSouth performs final GTT to a KMC Data database, then KMC Data agrees to provide BellSouth with the Destination Point Code for KMC Data database.
- 6.3.2.4 STPs shall provide all functions of the Operations, Maintenance and Administration Part (OMAP) as specified in applicable industry standard technical references, which may include, where available in BellSouth's network, MTP Routing Verification Test (MRVT); and SCCP Routing Verification Test (SRVT).
- 6.3.2.5 Where the destination signaling point is a BellSouth local or tandem switching system or database, or is a KMC Data or third party local or tandem switching system directly connected to the BellSouth SS7 network, STPs shall perform MRVT and SRVT to the destination signaling point. In all other cases, STPs shall perform MRVT and SRVT to a gateway pair of STPs in an SS7 network connected with the BellSouth SS7 network. This requirement may be superseded by the specifications for Internetwork MRVT and SRVT when these become approved ANSI standards and available capabilities of BellSouth STPs.
- 6.4 SS7 Advanced Intelligent Network (AIN) Access
- 6.4.1 Interface Requirements
- 6.4.1.1 BellSouth shall provide the following STP options to connect KMC Data or KMC Data-designated local switching systems to the BellSouth SS7 network:
- 6.4.1.1.1 An A-link interface from KMC Data local switching systems; and,

- 6.4.1.1.2 A B-link interface from KMC Data local STPs.
- 6.4.1.2 Each type of interface shall be provided by one (1) or more layers of signaling links.
- 6.4.1.3 The SPOI for each link shall be located at a cross connect element in the central office where the BellSouth STP is located.
- 6.4.1.4 BellSouth shall provide intraoffice diversity between the SPOI and BellSouth STPs, so that no single failure of intraoffice facilities or equipment shall cause the failure of both B-links in a layer connecting to a BellSouth STP.
- 6.4.1.5 STPs shall provide all functions of the MTP as defined in the applicable industry standard technical references.
- 6.4.2 Message Screening
  - 6.4.2.1 BellSouth shall set message screening parameters so as to accept/send valid messages from KMC Data local or tandem switching systems destined to/from any signaling point within BellSouth's SS7 network where the KMC Data switching system has a valid signaling relationship.
  - 6.4.2.2 BellSouth shall set message screening parameters so as to accept/send valid messages from KMC Data local or tandem switching systems destined to/from any signaling point or network accessed through BellSouth's SS7 network where the KMC Data switching system has a valid signaling relationship.
- 6.4.3 SCPs/Databases
  - 6.4.3.1 Call Related Databases provide the storage of, access to, and manipulation of information required to offer a particular service and/or capability. BellSouth shall provide access to the following Databases: Local Number Portability (LNP), Line Information Database (LIDB), Toll Free Number Database, Automatic Location Identification/Data Management System (ALI/DMS), and Calling Name Database (CNAM). BellSouth also provides access to Service Creation Environment and Service Management System (SCE/SMS) application databases and Directory Assistance.
  - 6.4.3.2 An SCP is deployed in a SS7 network that executes service application logic in response to SS7 queries sent to it by a switching system also connected to the SS7 network. Service Management Systems provide operational interfaces to allow for provisioning, administration and maintenance of subscriber data and service application data stored in SCPs.

#### 6.4.4 Technical Requirements for SCPs/Databases

- 6.4.4.1 BellSouth shall provide physical access to SCPs through the SS7 network and protocols with TCAP as the application layer protocol.
- 6.4.4.2 BellSouth shall provide physical interconnection to databases via industry standard interfaces and protocols (e.g., SS7, ISDN and X.25).
- 6.4.4.3 The reliability of interconnection options shall be consistent with requirements for diversity and survivability.

#### 6.5 LNP Database

- 6.5.1 The Permanent Number Portability (PNP) database supplies routing numbers for calls involving numbers that have been ported from one local service provider to another. BellSouth agrees to provide access to the PNP database at rates, terms and conditions as set forth by BellSouth and in accordance with an effective FCC or Commission directive.

#### 6.6 SS7 Network Interconnection

- 6.6.1 SS7 Network Interconnection is the interconnection of KMC Data local STPs or KMC Data local or tandem switching systems with BellSouth STPs. This interconnection provides connectivity that enables the exchange of SS7 messages among BellSouth switching systems and databases, KMC Data local or tandem switching systems, and other third party switching systems directly connected to the BellSouth SS7 network.
- 6.6.2 The connectivity provided by SS7 Network Interconnection shall fully support the functions of BellSouth switching systems and databases and KMC Data or other third party switching systems with A-link access to the BellSouth SS7 network.
- 6.6.3 If traffic is routed based on dialed or translated digits between a KMC Data local switching system and a BellSouth or other third-party local switching system, either directly or via a BellSouth tandem switching system, then it is a requirement that the BellSouth SS7 network convey via SS7 Network Interconnection the TCAP messages that are necessary to provide Call Management services (e.g., Automatic Callback, Automatic Recall, and Screening List Editing) between the KMC Data local STPs and BellSouth or other third-party local switch.
- 6.6.4 SS7 Network Interconnection shall provide:
  - 6.6.4.1 Signaling Data Link functions, as specified in ANSI T1.111.2;
  - 6.6.4.2 Signaling Link functions, as specified in ANSI T1.111.3; and

- 6.6.4.3      Signaling Network Management functions, as specified in ANSI T1.111.4.
- 6.6.5      SS7 Network Interconnection shall provide all functions of the SCCP necessary for Class 0 (basic connectionless) service, as specified in ANSI T1.112. This includes GTT and SCCP Management procedures, as specified in ANSI T1.112.4. Where the destination signaling point is a BellSouth switching system or database, or is another third party local or tandem switching system directly connected to the BellSouth SS7 network, SS7 Network Interconnection shall include final GTT of messages to the destination and SCCP Subsystem Management of the destination. Where the destination signaling point is a KMC Data local or tandem switching system, SS7 Network Interconnection shall include intermediate GTT of messages to a gateway pair of KMC Data local STPs, and shall not include SCCP Subsystem Management of the destination.
- 6.6.6      SS7 Network Interconnection shall provide all functions of the ISDNUP, as specified in ANSI T1.113.
- 6.6.7      SS7 Network Interconnection shall provide all functions of the TCAP, as specified in ANSI T1.114.
- 6.6.8      If Internetwork MRVT and SRVT become approved ANSI standards and available capabilities of BellSouth STPs, SS7 Network Interconnection may provide these functions of the OMAP.
- 6.6.9      Interface Requirements
- 6.6.9.1      The following SS7 Network Interconnection interface options are available to connect KMC Data or KMC Data-designated local or tandem switching systems or STPs to the BellSouth SS7 network:
- 6.6.9.1.1      A-link interface from KMC Data local or tandem switching systems; and
- 6.6.9.1.2      B-link interface from KMC Data STPs.
- 6.6.9.2      The SPOI for each link shall be located at a cross-connect element in the central office where the BellSouth STP is located. There shall be a DS1 or higher rate transport interface at each of the SPOIs. Each signaling link shall appear as a DS0 channel within the DS1 or higher rate interface.
- 6.6.9.3      BellSouth shall provide intraoffice diversity between the SPOIs and the BellSouth STP, so that no single failure of intraoffice facilities or equipment shall cause the failure of both B-links in a layer connecting to a BellSouth STP.

- 6.6.9.4 The protocol interface requirements for SS7 Network Interconnection include the MTP, ISDNUP, SCCP, and TCAP. These protocol interfaces shall conform to the applicable industry standard technical references. BellSouth does not have the capability to support any of the VoIP interfaces at the present time but is willing to negotiate new protocol interfaces IAW 7.7.8.
- 6.6.9.5 BellSouth shall set message screening parameters to accept messages from KMC Data local or tandem switching systems destined to any signaling point in the BellSouth SS7 network with which the KMC Data switching system has a valid signaling relationship.
- 6.7 Rate Categories And Applications
- 6.7.1 Message Charges
- 6.7.1.1 Message charges, as set forth in Section 6.7.1.3 below, are assessed based on the type of message protocol, ISUP or TCAP. ISUP messages are associated with call set-up, while TCAP messages are used to query call related databases. ISUP message charges are assessed per terminating and originating call set-up request and TCAP message charges are assessed per data request.
- 6.7.1.2 Message charges do not apply for TCAP messages switched by the regional STPs to the BellSouth provided 800 Data Base, LIDB or LNP Database. Query charges are assessed in lieu of message charges. Query charges for 800 Data Base are described in Section 6.8.5 below. When TCAP messages are destined for a foreign database, including a non-company provided LNP Database, message charges are assessed in lieu of query charges.
- 6.7.1.3 Message charges are assessed in the following manner:
- 6.7.1.3.1 Signal Formulation
- 6.7.1.3.1.1 An ISUP Signal Formulation charge is assessed, per call set-up request, for terminating and originating formulating signaling messages in association with call set-up.
- 6.7.1.3.2 Signal Transport
- 6.7.1.3.2.1 An ISUP Signal Transport charge is assessed, per call set-up request, for signaling messages transported to and from the Company STP in association with call set-up.
- 6.7.1.3.2.2 A TCAP Signal Transport charge is assessed per data request transported to a BellSouth STP and destined for a foreign database.

6.7.1.3.3 Signal Switching

6.7.1.3.3.1 An ISUP Signal Switching charge is assessed per call set-up request that is switched at the Company STP for terminating and originating messages.

6.7.1.3.3.2 A TCAP Signal Switching charge is assessed for each data request that is switched by the Company STP and destined for a foreign network or database.

6.7.1.3.4 Query Charges

6.7.1.3.4.1 Query charges apply for queries to the Company LIDB and the LNP Database. When query charges apply for access to a Company provided database, message charges are not assessed. LIDB Query Charges are described in 6.8.3, following and the LNP Database Query Charge is described in Section 6.8.4 following.

6.7.1.4 TCAP Bill and Keep

6.7.1.4.1 The Parties agree to treat signaling messages, signaling ports, and signaling links associated with local calls on a bill and keep basis.

6.7.1.4.2 KMC Data and BellSouth agree that BellSouth will bill KMC Data for signaling links, signaling ports, and signaling messages associated with interstate calls and with intrastate non-local calls in accordance with BellSouth's interstate and intrastate tariffs.

6.7.1.4.3 Beginning on the Effective Date of this Agreement and continuing until KMC Data implements a system that is capable of counting the total number of signaling messages that traveled over facilities connecting KMC Data's CCS7 network and BellSouth's CCS7 network, BellSouth agrees that for the purposes of billing BellSouth for signaling messages for any given month, KMC Data may use the total number of signaling messages that BellSouth's signaling bill to KMC Data indicates have traveled over facilities connecting KMC Data's CCS7 network and BellSouth's CCS7 network for that same month. When KMC Data implements a system that is capable of counting the total number of signaling messages that travel over facilities connecting KMC Data's CCS7 network and BellSouth's CCS7 network, KMC Data will use the number of signaling messages counted by such system for the purposes of billing BellSouth for signaling messages, subject to BellSouth's right to contest the accuracy of the number of signaling messages counted by such system.

6.7.1.4.4 For the purposes of billing BellSouth for signaling messages, KMC Data will apply the Signaling Percent Interstate Usage/Signaling Percent Local Usage (SPIU/SPLU) provided by BellSouth (which can, at BellSouth's option, be the same as the Percent Interstate Usage/Percent Local Usage (PIU/PLU) that

BellSouth provides for minutes of use) to the number of messages calculated pursuant to Paragraph 6.8.1.4.3 above.

## 6.8 RATES AND CHARGES ASSOCIATED WITH SS7

### 6.8.1 Message Charge for ISUP Messages RATE

Per signaling message Bill & Keep

### 6.8.2 Message Charge for TCAP Messages RATE

Per signaling message Bill& Keep

### 6.8.3 LIDB Service

#### RATE PER QUERY

Per Access Transport Query Exhibit A of Attachment 2 for UNE-P Only, Tariff Rate for All Others

Per Validation Service Query Exhibit A of Attachment 2 for UNE-P Only, Tariff Rate for All Others

Per OLNS Service Query Tariff Rate

### 6.8.4 LNP Database Service

Per LNP Query Exhibit A of Attachment 2 for UNE-P Only

Negotiated Rates Pursuant to a Separate Agreement for All Others

### 6.8.5 800 Database Service

Per 800 Query Exhibit A of Attachment 2 for UNE-P Only, Tariff Rate for All Others

## 7. **FORECASTING FOR TRUNK PROVISIONING**

7.1 Within six (6) months after execution of this Agreement, KMC Data shall provide an initial interconnection trunk group forecast for each LATA in which it plans to provide service within BellSouth's region. BellSouth shall then provide to KMC Data reciprocal trunking forecasts. BellSouth's reciprocal trunking forecasts will be based upon information provided by KMC Data in the initial forecast. If KMC

Data refuses to provide such information, BellSouth shall provide reciprocal trunking forecasts based only on existing trunk group growth and BellSouth's annual estimated percentage of BellSouth subscriber line growth. After the exchange of each Party's forecast, the Parties shall conduct a joint planning meeting to develop a joint interconnection trunk group forecast. Each forecast provided under this Section shall be deemed "Confidential Information" under the General Terms and Conditions of this Agreement.

- 7.2 The Parties shall use best efforts to make the initial and annual subsequent forecasts as accurate as possible based on reasonable engineering criteria. In addition, the Parties agree to proactively manage their interconnection trunking arrangements and use best efforts to timely notify each other if forecasted need quantities change or if a known or anticipated network event that may create a blocking situation is likely to occur during the time period between joint planning meetings. Joint planning meetings shall be conducted via conference call, unless mutual agreement is reached otherwise.
- 7.3 At a minimum, the joint forecast shall include the projected quantity of Transit Trunks, KMC Data-to-BellSouth one-way trunks (KMC Data Trunks), BellSouth-to-KMC Data one-way trunks (Reciprocal Trunk Groups) and/or two-way interconnection trunks, if the Parties have agreed to interconnect using two-way trunking to transport the Parties' Local Traffic, ISP-bound Traffic. The quantities shall be projected for a minimum of six (6) months and shall include an estimate of the current year plus the next two (2) years total forecasted quantities. The Parties shall mutually develop Reciprocal Trunk Groups and/or two-way interconnection trunk forecast quantities
- 7.4 All forecasts shall include, at a minimum, Access Carrier Terminal Location (ACTL), trunk group type (local/intraLATA toll, Transit, Operator Services, 911, etc.), A location/Z location (CLLI codes for KMC Data location and BellSouth location where the trunks shall terminate), interface type (e.g., DS1), Direction of Signaling, Trunk Group Number, if known, (commonly referred to as the two-six (2-6) code and forecasted trunks in service each year (cumulative).
- 7.5 Once initial interconnection trunk forecasts have been developed, KMC Data shall continue to provide interconnection trunk forecasts on an annual basis or at otherwise mutually agreeable intervals. KMC Data shall use its best efforts to make the forecasts as accurate as possible based on reasonable engineering criteria. The Parties shall continue to exchange Reciprocal Trunk Group and/or two-way interconnection trunk forecasts as described in Section 7.1 above.
- 7.6 The submitting and development of interconnection trunk forecasts shall not replace the ordering process for local interconnection trunks. Each Party shall exercise its best efforts to provide the quantity of interconnection trunks mutually forecasted. However, the provision of the forecasted quantity of interconnection trunks is subject to trunk terminations and facility capacity existing at the time the

trunk order is submitted and the provisioning Party shall not be responsible for a lack of interconnection trunks provided that the provisioning Party can establish that best efforts and good faith have been exercised. Furthermore, the receipt and development of trunk forecasts does not imply any liability for failure to perform if capacity (trunk terminations or facilities) is not available for use at the forecasted time.

## 8. **TRUNK UTILIZATION**

8.1 For the Reciprocal Trunk Groups that cannot overflow traffic to another trunk group (Reciprocal Final Trunk Groups), BellSouth and KMC Data shall monitor traffic on each interconnection Reciprocal Final Trunk Group that is ordered and installed. The Parties agree that the Reciprocal Final Trunk Groups will be utilized at 60 percent (60%) of the time consistent busy hour utilization level within one hundred twenty (120) days of installation. The Parties agree that the Reciprocal Final Trunk Groups will be utilized at eighty percent (80%) of the time consistent busy hour utilization level within one hundred eighty (180) days of installation. Any Reciprocal Final Trunk Group not meeting the minimum thresholds set forth in this Section are defined as “Under-utilized” trunks. BellSouth may disconnect any Under-utilized Reciprocal Final Trunk Groups and, for trunks not in excess of KMC Data’s forecast, KMC Data shall refund to BellSouth the associated nonrecurring and recurring trunk and facility charges paid by BellSouth, if any.

8.1.1 Any Reciprocal Final Trunk Group not meeting the minimum thresholds set forth in this Section are defined as “Under-Utilized” trunks. BellSouth’s CISC will notify KMC Data of any under-utilized Reciprocal Trunk Groups and the number of such trunk groups that BellSouth wishes to disconnect. BellSouth will provide supporting information either by email or facsimile to the designated KMC Data interface. KMC Data will provide concurrence with the disconnection in ten (10) business days or will provide specific information supporting why the trunks should not be disconnected. Such supporting information should include expected traffic volumes (including traffic volumes generated due to Local Number Portability) and the timeframes within which KMC Data expects to need such trunks. BellSouth’s CISC Project Manager and Circuit Capacity Manager will discuss the information with KMC Data to determine if agreement can be reached on the number of Reciprocal Final Trunk Groups to be removed. If no agreement can be reached, BellSouth will issue disconnect orders to KMC Data. The due date of these orders will be thirty (30) calendar days after KMC Data was first notified in writing of the underutilization of the trunk groups, unless otherwise agreed to by the Parties. When BellSouth issues disconnect orders to KMC Data for any Under-utilized Reciprocal Final Trunk Groups, KMC Data shall refund to BellSouth the associated nonrecurring and recurring trunk and facility charges paid by BellSouth to KMC Data, if any.

- 8.1.2 To the extent that any interconnection trunk group is utilized at a time-consistent busy hour of eighty percent (80%) or greater, the Parties may review the trunk groups and, if necessary, shall negotiate in good faith for the installation of augmented facilities.
- 8.2 For the two-way trunk groups that cannot overflow traffic to another trunk group and other than alternate final trunk groups, BellSouth and KMC Data shall monitor traffic on each interconnection trunk group that is ordered and installed. The Parties agree that within one hundred twenty (120) days of the installation of the BellSouth two (2)-way trunk or trunks, the trunks will be utilized at 60 percent (60%) of the time consistent busy hour utilization level. The Parties agree that within one hundred eighty (180) days of the installation of a trunk or trunks, the trunks will be utilized at eighty percent (80%) of the time consistent busy hour utilization level. Any trunk or trunks not meeting the minimum thresholds set forth in this Section are defined as “Under-utilized” trunks. BellSouth will request the disconnection of any Under-utilized two-way trunk(s) and, for trunks not in excess of KMC Data’s forecast, KMC Data shall refund to BellSouth the associated nonrecurring and recurring trunk and facility charges paid by BellSouth, if any.
- 8.2.1 BellSouth’s LISC will notify KMC Data of any under-utilized two-way trunk groups and the number of trunks that BellSouth wishes to disconnect. BellSouth will provide supporting information either by email or facsimile to the designated KMC Data interface. KMC Data will provide concurrence with the disconnection in ten (10) business days or will provide specific information supporting why the two-way trunks should not be disconnected. Such supporting information should include expected traffic volumes (including traffic volumes generated due to Local Number Portability) and the timeframes within which KMC Data expects to need such trunks. BellSouth’s CISC Project Manager and Circuit Capacity Manager will discuss the information with KMC Data to determine if agreement can be reached on the number of trunks to be removed. If no agreement can be reached, KMC Data will issue disconnect orders to BellSouth. The due date of these orders will be thirty (30) calendar days after KMC Data was first notified in writing of the underutilization of the trunk groups, unless otherwise agreed to by the Parties.
- 8.2.2 To the extent that any interconnection trunk group is utilized at a time-consistent busy hour of eighty percent (80%) or greater, the Parties shall review the trunk groups and, if necessary, shall negotiate in good faith for the installation of augmented facilities.

## **9. INTERFERENCE OR IMPAIRMENT**

- 9.1 As soon as possible and in no case later than twenty-four (24) hours after receipt of notification of blocking of traffic originated within the other Party’s network, the Parties shall determine and begin work to implement reasonable corrective measures in a manner consistent with industry practices.

- 9.2 In the event of an outage or trouble in any arrangement, facility, or service being provided by BellSouth hereunder, BellSouth will follow procedures for isolating and clearing the outage or trouble that are no less favorable than those that apply to comparable arrangements, facilities, or services being provided by BellSouth to itself, Affiliate or any other carrier whose network is connected to that of BellSouth.
- 9.3 BellSouth will use best efforts to provide KMC Data with at least thirty (30) days advance notification of scheduled maintenance activity. Upon such notice, KMC Data may submit a reasonable request for additional information relevant to the scheduled maintenance activity and BellSouth shall provide such information to the extent the scheduled maintenance activity may impact KMC Data and such information is reasonably necessary for KMC Data to identify and analyze potential risks associated with such maintenance. BellSouth may expedite or delay scheduled maintenance as a result of unscheduled maintenance or other unforeseen events. In those instances where BellSouth will not perform scheduled maintenance at the announced times, BellSouth will make best efforts to provide KMC Data with as much notice as is reasonably possible concerning the changed schedule.
- 9.4 For switch software/processor updates, software upgrades/new releases to the SONET transport network elements, or other major scheduled events which might impact KMC Data, BellSouth shall use best efforts to provide KMC Data with at least thirty (30) days advance notification of scheduled maintenance activity. Upon such notice, KMC Data may submit a reasonable request for additional information relevant to the scheduled maintenance activity and BellSouth shall provide such information to the extent the scheduled maintenance activity may impact KMC Data and such information is reasonably necessary for KMC Data to identify and analyze potential risks associated with such maintenance.
- 9.5 BellSouth will provide KMC Data's Network Operations Center with written notice when translations are scheduled to be modified on KMC Data's trunk groups. BellSouth shall use best efforts to provide such notice thirty (30) days in advance of such scheduled activity, or as close thereto as possible.
- 9.6 Once KMC Data determines that there is an outage that encompasses either a particular section of the network or the whole network, then KMC Data shall generate a trouble ticket to the CISC. After issuing the trouble ticket, KMC Data will notify the appropriate BellSouth representative in the CISC via telephone. KMC Data may then send an email confirmation to such BellSouth representative. BellSouth will work cooperatively with KMC Data to determine the appropriate steps to resolve such outage. Additionally, KMC Data will provide BellSouth with any applicable information that is necessary to resolve such outage and the Parties will work cooperatively to take all steps necessary to resolve the outage.

9.7 A “Global Outage” is an outage as defined as set forth in 47 C.F.R. § 63.100, including but not limited to trunk group outages. BellSouth will provide initial notification to KMC Data of a Global Outage in accordance with BellSouth’s Operational Understanding Guide. Subsequent to the initial notification of a Global Outage, KMC Data may contact the CISC via normal procedures (e.g., electronic mail, phone, etc.) to request further information, including but not limited to the method used to restore service and steps taken to prevent the recurrence of the incident. BellSouth will provide such information in a written report to KMC Data as soon as such information is available to BellSouth and no later than thirty (30) days following the Global Outage. The aforementioned written report shall include the following information where available:

- Reporting Carrier
- Date Of Incident
- Time Of Incident
- Geographic Area Affected
- Types Of Services Affected
- Outage Duration
- Background Of The Incident
- Direct Cause
- Root Cause
- Methods Used To Restore Service
- Steps Taken To Prevent Recurrence Of The Incident

## **10. COMPENSATION FOR CALL TRANSPORTATION AND TERMINATION FOR LOCAL TRAFFIC AND ISP-BOUND TRAFFIC**

10.1 For the purposes of this Attachment and for reciprocal compensation between the Parties pursuant to this Attachment, Local Traffic is defined as any circuit switched call that is originated by an end user of one Party and terminated to an end user of the other Party within a given LATA on that other Party’s network, except for those calls that are originated or terminated through switched access arrangements as established by applicable FCC or Commissions rules and orders. Additionally, Local Traffic includes any cross boundary, intrastate, interLATA or interstate interLATA calls established as a local call by the ruling regulatory body.

- 10.2 ISP-bound Traffic is defined as a call to an information service provider/enhanced service provider or Internet Service Provider (ISP) that is dialed by using a local dialing pattern (seven (7) or ten (10) digits).
- 10.3 For the per minute of use rate elements associated with Call Transport and Termination, the Parties shall compensate each other at the composite rate of \$0.0007 for Local Traffic and ISP-bound Traffic subject to the ceiling on minutes of use as set forth below.
- 10.3.1 For ISP-bound Traffic exchanged from February 1, 2004 through the Expiration Date of this Agreement, compensation as set forth above shall be billed by the terminating Party to the originating Party on the ISP-bound minutes up to a ceiling of ISP-bound minutes, which shall be calculated as set forth in the ISP Order on Remand. The Parties shall exchange data to determine the appropriate volume of minutes to be utilized.
- 10.3.2 In the event that the Parties disagree as to the amount of minutes utilized to calculate the ceiling on minutes of use as described herein, the Parties will assign representatives to identify the cause of such discrepancy and determine if the parties can mutually agree as to the appropriate ceiling on minutes of use. In the event that the Parties are unable to reach agreement, either Party may pursue resolution through the Dispute Resolution process set forth in this Agreement.
- 10.3.3 Any ISP-bound Traffic that exceeds the minute of use ceiling set forth above shall be exchanged on a bill and keep basis.
- 10.4 Notwithstanding the definitions of Local Traffic and ISP-bound Traffic in this Attachment, and pursuant to the FCC's Order on Remand and Report and Order in CC Docket 99- 68 released April 27, 2001 (ISP Order on Remand), BellSouth and KMC Data agree to the rebuttable presumption that all combined Local and ISP-bound Traffic delivered to BellSouth or KMC Data that exceeds a 3:1 ratio of terminating to originating traffic on a statewide basis shall be considered ISP-bound Traffic for compensation purposes. BellSouth and KMC Data further agree to the rebuttable presumption that all combined Local and ISP-bound Traffic delivered to BellSouth or KMC Data that does not exceed a 3:1 ratio of terminating to originating traffic on a statewide basis shall be considered Local Traffic for compensation purposes.
- 10.5 The appropriate composite rates set forth in Exhibit A shall apply for Transit Traffic as described in this Attachment and the appropriate elemental rates for Multiple Tandem Access shall apply as described in this Attachment.
- 10.6 Neither Party shall represent Switched Access Traffic as Local Traffic or ISP-bound Traffic for purposes of determining compensation for the call.

- 10.7 The Parties have been unable to agree as to whether non-ISP bound Virtual NXX Traffic constitutes Switched Access Traffic. Notwithstanding the foregoing, and without waiving any rights with respect to either Party's position as to the jurisdictional nature of non-ISP-bound Virtual NXX Traffic, the Parties agree to amend this Agreement in accordance with the General Terms and Conditions to this Agreement to abide by any effective and applicable FCC and Commission rules and orders regarding the nature of such traffic and the compensation payable by the Parties for such traffic, if any.
- 10.7.1 The Parties have been unable to agree on the treatment of calls where KMC Data assigns NPA/NXXs to specific BellSouth rate centers within the LATA and assigns numbers from those NPA/NXXs to KMC Data customers physically located outside of that LATA and such customers are Internet Service Providers (ISPs). Notwithstanding the foregoing, and without waiving any rights with respect to either Party's position as to the treatment of such calls, the Parties agree that, for purposes of this Agreement, traffic delivered to a customer that is an ISP physically located outside of such LATA shall be considered ISP-bound Traffic as defined in this Attachment.
- 10.8 Jurisdictional Reporting
- 10.8.1 PLU. Each Party shall report to the other a Percent Local Usage (PLU) factor. The application of the PLU will determine the amount of local or ISP-bound minutes to be billed to the other Party. Local Traffic and ISP-bound Traffic shall be treated as Local for purposes of calculating the PLU. Requirements associated with PLU calculation and reporting shall be as set forth in BellSouth's Jurisdictional Factors Reporting Guide, as it is amended from time to time.
- 10.8.2 Percent Local Facility (PLF). Each Party shall report to the other a PLF factor. The application of the PLF will determine the portion of switched dedicated transport to be billed per the local jurisdiction rates. The PLF shall be applied to Multiplexing, Local Channel and Interoffice Channel Switched Dedicated Transport utilized in the provision of local interconnection trunks. Local Traffic and ISP-bound Traffic shall be treated Local for the purposes of calculating the PLF. Requirements associated with PLF calculation and reporting shall be as set forth in BellSouth's Jurisdictional Factors Reporting Guide.
- 10.8.3 PIU. Each Party shall report to the other the projected PIU factor. After interstate and intrastate traffic percentages have been determined by use of PIU procedures, the PLU and PLF factors will be used for application and billing of local interconnection. Requirements associated with PIU calculation and reporting shall be as set forth in BellSouth Jurisdictional Factors Reporting Guide.
- 10.8.4 In Lieu of Jurisdictional Factors Reported. Notwithstanding the provisions in Sections 10.3.1, 10.3.2, and 10.3.3 above, where the terminating Party has message recording technology that identifies the jurisdiction of traffic terminated

as defined in this Agreement, such information may, at the terminating Party's option, be utilized to determine the appropriate jurisdictional reporting factors, in lieu of those provided by the originating Party. In the event that the terminating Party opts to utilize its own data to determine jurisdictional reporting factors, such terminating Party shall notify the originating Party at least thirty (30) days prior to the beginning of the calendar quarter in which the terminating Party will begin to utilize its own data.

10.8.4.1 Upon the request of the originating Party, the terminating Party shall provide supporting data for the jurisdictional factors proposed by the terminating Party to be used in lieu of those reported by the originating Party. The originating Party shall have thirty (30) days to consent or object to the proposed replacement of reported factors. If the originating Party consents or fails to respond within thirty (30) days, the terminating Party may proceed with the replacement of factors effective at the beginning of the calendar quarter. If the originating Party objects to the proposed replacement of reported factors, the Parties shall proceed as set forth below.

10.8.4.2 Upon either Party's request, the Parties will work in good faith to resolve the discrepancy between the factors submitted by the originating party and those proposed by the terminating party pursuant to Section 10.8.4 above. In the event that the Parties are unable to mutually agree as to the appropriate resolution, the Parties may negotiate a mutually agreeable resolution based on the data specific to the traffic patterns of the originating party or either Party may request an audit of the factors in accordance with Section 10.8.5 below. In the event that negotiations and audits fail to resolve disputes between the parties, either Party may seek Dispute Resolution as set forth in the General Terms and Conditions. While such a dispute is pending, factors reported by the originating Party shall remain in place, unless the Parties mutually agree otherwise.

10.8.5 Audits. On thirty (30) days written notice, each Party must provide the other the ability and opportunity to conduct an annual audit of the jurisdictional reporting factors as reported or utilized pursuant to this Attachment 3 to ensure the proper billing of traffic. BellSouth and KMC Data shall retain records of call detail for a minimum of nine months from which the jurisdictional reporting factors can be ascertained. The audit shall be conducted during normal business hours at an office designated by the Party being audited. Audit requests shall not be submitted more frequently than one (1) time per calendar year. The Parties shall use commercially reasonable efforts to complete audits in as timely a manner as possible. Audits shall be performed by a mutually acceptable independent auditor paid for by the Party requesting the audit. The jurisdictional reporting factors shall be adjusted based upon the audit results and shall apply for the quarter the audit was completed, for the quarter prior to the completion of the audit, and for the two quarters following the completion of the audit. If, as a result of an audit, either Party is found to have overstated jurisdictional reporting factors by twenty

percentage points (20%) or more, that Party shall reimburse the auditing Party for the cost of the audit.

10.9 Compensation for 8XX Traffic

10.9.1 Each Party shall pay the other the appropriate switched access charges set forth in the BellSouth intrastate Access Services Tariff or BellSouth FCC No. 1 Tariff. KMC Data will pay BellSouth the database query charge as set forth in the BellSouth intrastate Access Services Tariff or BellSouth FCC No. 1 Tariff as applicable.

10.9.2 Records for 8XX Billing. Each Party will provide to the other the appropriate records necessary for billing intraLATA 8XX end users. The records provided will be in a standard EMI format.

10.9.3 8XX Access Screening. BellSouth's provision of 8XX Toll Free Dialing (TFD) to KMC Data requires interconnection from KMC Data to BellSouth's 8XX SCP. Such interconnections shall be established pursuant to BellSouth's CCS Interconnection Guidelines and Telcordia's CCS Network Interface Specification document, TR-TSV-000905. KMC Data shall establish SS7 interconnection at the BellSouth Local Signal Transfer Points serving the BellSouth 8XX SCPs that KMC Data desires to query. The terms and conditions for 8XX TFD are set out in BellSouth's intrastate Access Services Tariff.

10.10 Mutual Provision of Switched Access Service

10.10.1 Switched Access Traffic. Switched Access Traffic is described as telephone calls requiring local transmission or switching services for the purpose of the origination or termination of Telephone Toll Service. Switched Access Traffic includes, but is not limited to, the following types of traffic: Feature Group A, Feature Group B, Feature Group C, Feature Group D, toll free access (e.g., 8XX), and 900 access. Switched Access Traffic does not include Local Traffic and ISP-bound Traffic originated by one Party and terminated by the other.

10.10.2 Voice-Over-Internet-Protocol (VoIP) Transmissions. The Parties have been unable to agree as to whether "Voice-Over-Internet-Protocol" transmissions, which cross LATA boundaries constitute Switched Access Service Traffic. Notwithstanding the foregoing, and without waiving any rights with respect to either Party's position as to the jurisdictional nature of VoIP, the Parties agree to amend this Agreement in accordance with the General Terms and Conditions to this Agreement to abide by any effective and applicable FCC rules and orders regarding the nature of such traffic and the compensation payable by the Parties for such traffic, if any.

10.10.3 If the BellSouth customer chooses KMC Data as their presubscribed interexchange carrier, or if the BellSouth customer uses KMC Data as an interexchange carrier

on a 101XXXX basis, BellSouth will charge KMC Data the appropriate BellSouth tariff charges for originating switched access services.

- 10.10.4 When one (1) Party's end office switch, subtending the other Party's Access Tandem switch for receipt or delivery of switched access traffic, provides an access service connection to or from an IXC by either a direct trunk group to the IXC utilizing the other Party's facilities, or via the other Party's tandem switch, each Party will provide its own access services to the IXC and bill on a multi-bill, multi-tariff meet-point basis. Each Party will bill its own access services rates to the IXC with the exception of the interconnection charge. The interconnection charge will be billed by the Party providing the end office function. The Parties will use the Multiple Exchange Carrier Access Billing (MECAB) guidelines to establish meet point billing for all applicable traffic. Thirty (30)-day billing periods will be employed for these arrangements. To the extent either party is providing the tandem function, that party (i.e., Initial Billing Company) agrees to provide to the other company (i.e., Subsequent Billing Company), as defined in MECAB, at no charge, the switched access detailed usage data within no more than sixty (60) days after the recording date where technically feasible. Each company will notify the other when it determines that it is not feasible to meet these requirements so that the customers may be notified for any necessary revenue accrual associated with the significantly delayed recording or billing. As business requirements change, data reporting requirements may be modified as necessary, by mutual agreement of the Parties or per a change in industry standards.
- 10.10.5 In the event that the Initial Billing Party, as defined herein, was provided the accurate switched access detailed usage data in a manner that allowed the Initial Billing Party to generate and provide such data to the Subsequent Billing Party within ninety (90) days after the recording date and where the Initial Billing Party failed to provide notice to the Subsequent Billing Party of any inability to provide such data within a reasonable and nondiscriminatory timeframe and the Subsequent Billing Party is unable to bill and/or collect access revenues due to the Initial Billing Party's failure to provide such data within said time period, then the Initial Billing Party shall be liable to the other Party in an amount equal to the unbillable or uncollectible revenues. Each company will provide complete documentation to the other to substantiate any claim of such unbillable or uncollectible revenues. In the event that the Parties disagree as to the liability of the Initial Billing Party for such unbillable or uncollectible revenues, then either Party may invoke the Dispute Resolution process set forth in General Terms and Conditions.
- 10.10.6 The Initial Billing Company will retain for a minimum period of sixty (60) days, access message detail sufficient to recreate any data that is lost or damaged by the tandem provider company or any third party involved in processing or transporting data. Initial Billing Company agrees to recreate the lost or damaged data within forty-eight (48) hours of notification by the other or by an authorized third party handling the data.

- 10.10.7 Initial Billing Company also agrees to process the recreated data within forty-eight (48) hours of receipt at its data processing center.
- 10.10.8 All claims for unbillable or uncollectible revenue should be filed with the Initial Billing Company within one hundred twenty (120) days of the date the receipt of the usage record.
- 10.10.9 The Initial Billing Party shall keep records of its billing activities relating to jointly-provided Intrastate and Interstate Switched Access Traffic Services in sufficient detail to permit the Subsequent Billing Party to, by formal or informal review or audit, to verify the accuracy and reasonableness of the jointly-provided access billing data provided by the Initial Billing Party. Each Party agrees to cooperate in such formal or informal reviews or audits and further agrees to jointly review the findings of such reviews or audits in order to resolve any differences concerning the findings thereof. In the absence of mutual agreement otherwise, the Audit provisions set forth in Section 10.8.5 above shall govern.
- 10.11 Transit Traffic
- 10.11.1 Each Party shall provide tandem switching and transport services for the other Party's Transit Traffic. Rates for Local Transit Traffic and ISP-bound Transit Traffic shall be as set forth below:
- 10.11.1.1 The composite rate of \$0.0025 per minute of use will apply from the Effective Date of the Agreement through March 31, 2006.
- 10.11.1.2 Beginning April 1, 2006 the composite rate of \$0.0030 per minute of use will apply.
- 10.11.1.3 Neither party may invoke Section 17.4 of the Modification of Agreement in General Terms and Conditions until January 1, 2007, after which either Party may pursue the Modification of Agreement process to prospectively incorporate the applicable rate for a state ordered by that Commission.
- 10.11.2 Rates for Switched Access Transit Traffic shall be the applicable charges as set forth in the applicable Party's Commission approved Interstate or Intrastate Switched Access tariffs as filed and effective with the FCC or Commission, or reasonable and non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff. Billing associated with all Transit Traffic shall be pursuant to MECAB guidelines.
- 10.11.3 Traffic between KMC Data and Wireless Type 1 third parties or a third party CLEC utilizing BellSouth switching (including resellers and UNE-P providers) shall not be treated as Transit Traffic from a routing or billing perspective. Traffic originated by a Wireless Type 1 third party or a third party CLEC utilizing BellSouth switching (including resellers and UNE-P providers) shall be treated as

BellSouth-originated traffic and BellSouth shall compensate KMC Data for transport and termination of such traffic based on the classification of such traffic as Local Traffic, ISP-bound Traffic, or Switched Access Traffic in accordance with the terms of this Attachment, until such time as BellSouth can provide the records necessary to identify the Wireless Type 1 third party or the third party CLEC utilizing BellSouth switching.

- 10.11.4 Traffic between KMC Data and Wireless Type 2A third parties shall not be treated as Transit Traffic from a routing or billing perspective until BellSouth and the Wireless Type 2A carrier have the capability to properly meet-point-bill in accordance with MECAB guidelines. Until such time, such traffic originated by Wireless Type 2A third parties shall be treated as BellSouth-originated traffic and BellSouth shall compensate KMC Data for transport and termination of such traffic based on the classification of such traffic as Local Traffic, ISP-bound Traffic, or Switched Access Traffic in accordance with the terms of this Attachment.
- 10.11.5 Traffic between BellSouth and Wireless Type 1 third parties or a third party CLEC utilizing KMC Data switching shall not be treated as Transit Traffic from a routing or billing perspective. Such traffic originated by a Wireless Type 1 third party or a third party CLEC utilizing KMC Data switching shall be treated as KMC Data-originated traffic and KMC Data shall compensate BellSouth for transport and termination of such traffic based on the classification of such traffic as Local Traffic, ISP-Bound Traffic or Switched Access Traffic in accordance with the terms of this Attachment.
- 10.11.6 Traffic between BellSouth and Wireless Type 2A third parties shall not be treated as Transit Traffic from a routing or billing perspective until KMC Data and the Wireless Type 2A carrier have the capability to properly meet-point-bill in accordance with MECAB guidelines. Until such time, such traffic originated by Wireless Type 2A third parties shall be treated as KMC Data-originated traffic and KMC Data shall compensate BellSouth for transport and termination of such traffic based on the classification of such traffic as Local Traffic, ISP-bound Traffic, or Switched Access Traffic in accordance with the terms of this Attachment.
- 10.11.7 BellSouth agrees to deliver Transit Traffic originated by KMC Data to the terminating carrier; provided, however, that KMC Data is solely responsible for negotiating and executing any appropriate contractual agreements with the terminating carrier for the exchange of Transit Traffic through the BellSouth network. BellSouth will not be liable for any compensation to the terminating carrier or to KMC Data for transiting KMC Data-originated or terminated Transit Traffic. In the event that the terminating third party carrier imposes on BellSouth any charges or costs for the delivery of Transit Traffic originated by KMC Data, KMC Data shall reimburse BellSouth for all charges paid by BellSouth, provided

that BellSouth notifies KMC Data and, upon request, provides KMC Data with a copy of such an invoice, if available, or other equivalent supporting documentation (if an invoice is not available), and proof of payment and other applicable supporting documentation. BellSouth will use commercially reasonable efforts to provide such notice and information in a timely, reasonable and nondiscriminatory manner. BellSouth shall diligently review, dispute and pay such third party invoices (or equivalent) in a manner that is at parity with its own practices for reviewing, disputing and paying such invoices (or equivalent) when no similar reimbursement provision applies. Once KMC Data reimburses BellSouth for any such payments, any disputes with respect to such charges shall be between KMC Data and the terminating third party carrier. Additionally, the Parties agree that any billing to a third party or other telecommunications carrier under this section shall be pursuant to MECAB procedures.

10.11.8 Except for as provided otherwise in this Attachment, transit charges as described in this Attachment shall only be assessed on the carrier originating Transit Traffic and shall not be assessed on the terminating carrier.

10.11.9 Transit charges associated with the provisioning of toll free services (e.g., 800/888/877) shall be assessed upon the terminating carrier and shall not be imposed on the originating carrier.

10.12 Exchange of Traffic Subject to Primary Toll Provider Arrangements

10.12.1 Where BellSouth is the primary intraLATA toll provider for an ICO's customers (i.e., BellSouth receives from the ICO the intraLATA toll revenue paid by the customers) and where such ICO originates an intraLATA toll call that transits BellSouth's network and is terminated by KMC Data, BellSouth and KMC Data will work cooperatively together to determine the appropriate amount of usage to be paid by BellSouth for such traffic. BellSouth shall route such traffic over transit traffic trunk groups, where technically feasible, and will pass appropriate OLI associated with these calls, where technically feasible. KMC Data will bill BellSouth at KMC Data's intrastate switched access rate as set forth in KMC Data's access tariff as filed and effective with the Commission or non-discriminatory web-posted listing if the FCC or Commission does not require filing of a tariff.

10.12.2 Where KMC Data originates traffic that transits BellSouth's network and it is terminated by an ICO and where the ICO asserts that it has a legal right to charge BellSouth switched access for the termination of such traffic and charges BellSouth switched access for such traffic, which BellSouth pays to the ICO, KMC Data agrees to reimburse BellSouth for the actual charges assessed by the ICO to BellSouth (and paid by BellSouth) for the KMC Data originated calls. All reimbursement billing by BellSouth to KMC Data shall be covered by the Billing Dispute provisions of this Agreement. This provision does not apply when KMC

Data has a direct relationship with the ICOs and has notified BellSouth of said relationship.

- 10.12.3 KMC Data and BellSouth agree to conduct a semi-annual true-up in order to adjust for the appropriate ICO transit usage to be billed to or paid by each party.

10.13 Misrouting of Traffic.

- 10.13.1 The Parties shall route traffic to each other in a manner consistent with the Trunk Group Architectures selected by the Parties and as set forth in Section 4 above, except as otherwise set forth in this Agreement (e.g., overflow) or in instances where a third party causes either Party to route traffic in a manner that is inconsistent with this Attachment.

- 10.13.2 In instances of misrouting, either Party may request that the Parties investigate, identify the cause of, and correct misrouting to the extent technically and economically feasible.

- 10.13.3 In the event that misrouting results in either Party's inability to bill or collect revenues from a third party and the Parties disagree as to the liability of the other Party for such revenues, then either Party may pursue the Dispute Resolution procedures set forth in this Agreement.

10.14 Records Exchange

- 10.14.1 Where feasible and appropriate, the Parties will generate and exchange all available messages for the purpose of billing third parties, including but not limited to CMRS providers and other LECs.

**11. FRAME RELAY SERVICE INTERCONNECTION**

- 11.1 In addition to the Local Interconnection services set forth above, BellSouth will offer a network-to-network Interconnection arrangement between BellSouth's and KMC Data's frame relay switches as set forth below. The following provisions will apply only to Frame Relay Service and Exchange Access Frame Relay Service and Managed Shared Frame Relay Service in those states in which KMC Data is certified and providing Frame Relay Service as a Local Exchange Carrier and where traffic is being exchanged between KMC Data and BellSouth Frame Relay Switches in the same LATA.

- 11.2 The Parties agree to establish two-way Frame Relay facilities between their respective Frame Relay Switches to the mutually agreed upon Frame Relay Service point(s) of interconnection (IP(s)) within the LATA. All IPs shall be within the same Frame Relay Network Serving Areas as defined in Section A40 of BellSouth's GSST except as set forth in this Attachment.

- 11.3 Upon the request of either Party, such interconnection will be established where BellSouth and KMC Data have Frame Relay Switches in the same LATA. Where there are multiple Frame Relay switches in one central office, an interconnection with any one of the switches will be considered an interconnection with all of the switches at that central office for purposes of routing packet traffic.
- 11.4 The Parties agree to provision local and intraLATA Frame Relay Service and Exchange Access Frame Relay Service and Managed Shared Frame Relay Service (both intrastate and interstate) over Frame Relay interconnection facilities between the respective Frame Relay switches and the IPs.
- 11.5 The Parties agree to assess each other reciprocal charges for the facilities that each provides to the other according to the Percent Local Circuit Use Factor (PLCU), determined as follows:
- 11.5.1 If the data packets originate and terminate in locations in the same LATA, and are consistent with the local definitions of the Agreement, the traffic is considered local. Frame Relay framed packet data is transported within Virtual Circuits (VC). For the purposes of this Agreement, if all the data packets transported within a VC remain within the LATA, then consistent with the local definitions in this Agreement, the traffic on that VC is local (Local VC).
- 11.5.2 If the originating and terminating locations of the two-way packet data traffic are not in the same LATA, the traffic on that VC is interLATA (InterLATA VC).
- 11.5.3 The PLCU is determined by dividing the total number of Local VCs, by the total number of VCs on each Frame Relay facility. To facilitate implementation, KMC Data may determine its PLCU in aggregate, by dividing the total number of Local VCs in a given LATA by the total number VCs in that LATA. The Parties agree to renegotiate the method for determining PLCU, at BellSouth's request, and within 90 days, if BellSouth notifies KMC Data that it has found that this method does not adequately represent the PLCU.
- 11.5.4 If there are no VCs on a facility when it is billed, the PLCU will be zero (0).
- 11.5.5 BellSouth will provide the circuit between the Parties' respective Frame Relay Switches. The Parties will be compensated as follows: BellSouth will invoice, and KMC Data will pay, the total nonrecurring and recurring charges for the circuit based upon the rates set forth in BellSouth's FCC No. 1 Tariff. KMC Data will then invoice, and BellSouth will pay, an amount calculated by multiplying the BellSouth billed charges for the circuit by one-half of KMC Data's PLCU.
- 11.6 The Parties agree to compensate each other for Frame Relay network-to-network interface (NNI) ports based upon the NNI rates set forth in BellSouth's FCC No. 1 Tariff. Compensation for each pair of NNI ports will be calculated as follows: BellSouth will invoice, and KMC Data will pay, the total nonrecurring and

recurring charges for the NNI port. KMC Data will then invoice, and BellSouth will pay, an amount calculated by multiplying the BellSouth billed nonrecurring and recurring charges for the NNI port by KMC Data's PLCU.

- 11.7 Each Party agrees that there will be no charges to the other Party for its own subscriber's Permanent Virtual Circuit (PVC) rate elements for the local PVC segment from its Frame Relay switch to its own subscriber's premises. PVC rate elements include the Data Link Connection Identifier (DLCI) and Committed Information Rate (CIR).
- 11.8 For the PVC segment between the KMC Data and BellSouth Frame Relay switches, compensation for the PVC charges is based upon the rates in BellSouth's FCC No. 1 Tariff.
- 11.9 Compensation for PVC rate elements will be calculated as follows:
  - 11.9.1 If KMC Data orders a VC connection between a BellSouth subscriber's PVC segment and a PVC segment from the BellSouth Frame Relay switch to the KMC Data Frame Relay switch, BellSouth will invoice, and KMC Data will pay, the total nonrecurring and recurring PVC charges for the PVC segment between the BellSouth and KMC Data Frame Relay switches. If the VC is a Local VC, KMC Data will then invoice and BellSouth will pay, the total nonrecurring and recurring PVC charges billed for that segment. If the VC is not local, no compensation will be paid to KMC Data for the PVC segment.
  - 11.9.2 If BellSouth orders a Local VC connection between a KMC Data subscriber's PVC segment and a PVC segment from the KMC Data Frame Relay switch to the BellSouth Frame Relay switch, BellSouth will invoice, and KMC Data will pay, the total nonrecurring and recurring PVC and CIR charges for the PVC segment between the BellSouth and KMC Data Frame Relay switches. If the VC is a Local VC, KMC Data will then invoice and BellSouth will pay the total nonrecurring and recurring PVC and CIR charges billed for that segment. If the VC is not local, no compensation will be paid to KMC Data for the PVC segment.
  - 11.9.3 The Parties agree to compensate each other for requests to change a PVC segment or PVC service order record, according to the Feature Change charge as set forth in the BellSouth access tariff BellSouth FCC No. 1 Tariff.
  - 11.9.4 If KMC Data requests a change, BellSouth will invoice and KMC Data will pay a Feature Change charge for each affected PVC segment.
    - 11.9.4.1 If BellSouth requests a change to a Local VC, KMC Data will invoice and BellSouth will pay a Feature Change charge for each affected PVC segment.

- 11.9.5 The Parties agree to limit the sum of the CIR for the VCs on a DS1 NNI port to not more than three (3) times the port speed, or not more than six (6) times the port speed on a DS3 NNI port.
- 11.9.6 Except as expressly provided herein, this Agreement does not address or alter in any way either Party's provision of Exchange Access Frame Relay Service, Managed Shared Frame Relay Service or interLATA Frame Relay Service. All charges by each Party to the other for carriage of Exchange Access Frame Relay Service or interLATA Frame Relay Service are included in the BellSouth access tariff BellSouth FCC No. 1 Tariff.
- 11.10 KMC Data will identify and report quarterly to BellSouth the PLCU of the Frame Relay facilities it uses, per Section 11.5.3 above.
- 11.11 Either Party may request a review or audit of the various service components, consistent with the provisions of section E2 of the BellSouth intrastate Access Services tariffs or Section 2 of BellSouth's FCC No.1 Tariff.

## **12. BASIC 911 AND E911 INTERCONNECTION**

- 12.1 Basic 911 and E911 provides a caller access to the applicable emergency service bureau by dialing 911.
- 12.2 Basic 911 Interconnection. BellSouth will provide to KMC Data a list consisting of each municipality that subscribes to 911 service. The list will also provide, if known, the E911 conversion date for each municipality and, for network routing purposes, a ten (10)-digit directory number representing the appropriate emergency answering position for each municipality subscribing to 911. KMC Data will be required to arrange to accept 911 calls from its end users in municipalities that subscribe to Basic 911 service and translate the 911 call to the appropriate 10-digit directory number as stated on the list provided by BellSouth. KMC Data will be required to route the call to the appropriate PSAP. When a municipality converts to E911 service, KMC Data will be required to begin using E911 procedures.
- 12.3 E911 Interconnection. KMC Data shall install a minimum of two (2) dedicated trunks originating from its Serving Wire Center and terminating to the appropriate E911 tandem. The Serving Wire Center must be in the same LATA as the E911 tandem. The dedicated trunks shall be, at a minimum, DS0 level trunks configured as part of a digital (1.544 Megabits (Mbps)) interface (DS1 facility). The configuration shall use CAMA-type signaling with MF pulsing that will deliver ANI with the voice portion of the call. If the user interface is digital, MF pulses as well as other AC signals shall be encoded per the u-255 Law convention. KMC Data will be required to provide BellSouth daily updates to the E911 database. KMC Data will be required to forward 911 calls to the appropriate E911 tandem

along with ANI based upon the current E911 end office to tandem homing arrangement as provided by BellSouth. If the E911 tandem trunks are not available, KMC Data will be required to route the call to a designated seven (7)-digit or ten (10)-digit local number residing in the appropriate PSAP. This call will be transported over BellSouth's interoffice network and will not carry the ANI of the calling party. KMC Data shall be responsible for providing BellSouth with complete and accurate data for submission to the 911/E911 database for the purpose of providing 911/E911 to its end users.

- 12.4 Rates. Recurring and nonrecurring rates associated with trunk groups for 911 service are as set forth in Section 3.3.1above.
- 12.5 The detailed practices and procedures for 911/E911 interconnection are contained in the E911 Local Exchange Carrier Guide For Facility-Based Providers, found at BellSouth's Interconnection Services Web site:  
<http://www.interconnection.bellsouth.com/guides/e911/html/gcuge001/index.htm>.

## **Revisions**

### **Issue 1.0**

The initial version of the *BellSouth Jurisdictional Factors Reporting Guide* was issued on August 15, 2001.

### **Issue 2.0**

Incorporated references to *RF-3995 Jurisdictional Factor Report Form* – issued on December 21, 2001.

### **Issue 3.0**

Added minor clarification concerning value to be used if PLF or PLU factors are not reported – issued on August 2, 2002.

### **Issue 4.0**

Added Clarification concerning reporting of SPIU Factor and added language describing SPLU Factor and calculation of intrastate of non-local traffic – issued on October 17, 2002.

### **Issue 5.0**

Revised the e-mail address that is utilized to report jurisdictional factors by electronic mail – issued on December 3, 2003.

## ***BellSouth Jurisdictional Factors Reporting Guide***

### **1.0 Introduction**

Jurisdictional factors are utilized to apportion the billing of BellSouth Access and Local Interconnections Services between the interstate, intrastate and local jurisdictions. The rates, terms and conditions applicable to the provision of services are determined based upon the jurisdictional use of the service. Where sufficient data is available BellSouth will determine the percentage of use by jurisdiction for billing applications in accordance with BellSouth tariffs and contractual agreements. Absent sufficient data it is incumbent upon BellSouth customers to accurately report jurisdictional factors in order for BellSouth to bill the associated services per contractual and regulatory requirements. This document serves as a supplemental guide to the BellSouth tariffs and contracts for the preparation and reporting of the following jurisdictional factors related to Access and Local Interconnection Services

PIU - Percent Interstate Usage

PLU - Percent Local Usage

PLF - Percent Local Facility

These factors are reported by service at a state level as required. Unique service requirements are identified later in this Guide. In general, the PIU factors are required for Access Services and Local Interconnection Services to apportion the billing between the state and interstate jurisdictions. Competitive Local Exchange Carriers (CLECs) are also required to report PLU and PLF factors in addition to PIU factors to further apportion their intrastate use of Local Interconnection services between the state and local jurisdiction. Failure to report values for PLU and/or PLF shall result in the default value of zero percent being applied for these factors. The local jurisdiction is considered a subset of the intrastate jurisdiction in the determination and application of the PLU and PLF factors. The following sections provide information concerning the determination of factors, the application of factors, reporting procedures and customer records requirements. This information is provided as an aide in reporting jurisdictional factors and shall be used as a supplement to BellSouth Tariffs and/or contractual agreements with BellSouth.

### **2.0 Jurisdictions**

There are three basic jurisdictions related to BellSouth Access and Local Interconnections Services. These are the Interstate, Intrastate and the Local jurisdiction. The jurisdiction is determined based upon the physical locations of the

origination and termination points of the communication. An ordinary voice communications telephone call that originates from a location that is in the same state

as the terminating number or called party shall be designated as an intrastate call and the minutes of use for that call shall be billed per the intrastate jurisdictional requirements. Conversely, a call that originates in a different state than the terminating location or called number shall be designated as interstate traffic. A call that originates and terminates within a local calling area as specified in the applicable contract or tariff is designated as local traffic.

The Jurisdiction of a call is determined solely by the location of the party initiating the call and the location of the called party. The origination and termination points are not necessarily determined based upon the carrier's network entry and exit points but rather on the origination and termination locations of the end users or the entities that are involved in the communications or information exchange. When multiple networks or carriers are involved, a particular carrier's transport of the service may be totally within a state boundary, however, the ultimate end points of the call or information exchange may be in different states. In this situation, the traffic shall be designated as interstate for all carriers even though a particular carrier's transport service begins and ends within a state boundary. In other words, jurisdiction of a call is determined solely by the locations of the originating and terminating parties and is not affected by the manner in which the call is routed through the telecommunications network.

The location of the origination or termination end points is determined based upon the location of the serving central offices. If a call terminates to an office that is associated with a LATA in an adjoining state (cross boundary) the call is considered to complete in the state where the central office is located.

## **3.0 Factors**

### **3.1. General**

BellSouth Jurisdictional factors are jurisdictional projections of the percentages of use of access and interconnection services for billing purposes. Factors shall be provided with the first request for each service in each state and are updated quarterly based upon the most recent three months of data. Factors for the initial request shall be reported via *RF-3995 Jurisdictional Factor Report* that is located at <http://www.interconnection.bellsouth.com/forms/index.html>, CLEC Forms Online or Interexchange Carrier Webforms. If factors are not updated then BellSouth will

assume that the percentages are the same as previously provided. If a valid quarterly report has never been received then BellSouth may utilize the factor(s) provided with the initial order for service, the most recent audit results if an audit has been performed or the default value for the particular factor. In cases where sufficient data is available then BellSouth will determine the factors to be utilized for billing.

### 3.2. **PIU - Percent Interstate Usage**

This factor is the percentage of use that is interstate. For services that are billed on a per minute of use (MOU) basis the PIU is based upon the traffic to and from the BellSouth Network. Further, depending upon the type of usage based service, the PIU may represent the percentage of both originating and terminating usage or may only represent the percentage of terminating usage that is jurisdictionally interstate. Any traffic that originates/terminates in the reporting carrier's network that ultimately originates/terminates to the BellSouth Network through another carrier's network shall be included in the reported PIU factor(s) by the intermediate carrier that accepts billing for the usage. This relationship is usually established per an agency authorization. In these situations, the carrier that accepts billing from BellSouth for the usage to and from BellSouth shall include such usage in their factor calculations that are reported to BellSouth. Any usage that transits a reporting carrier's network shall be included in the jurisdictional factor reporting by the billed carrier to the originating/terminating carrier regardless of the number of carriers involved in the transport of the traffic. It is incumbent upon the carrier that is billed for originating/terminating traffic to the BellSouth Network to report PIU factors to BellSouth that are representative of the actual jurisdiction of traffic delivered to BellSouth.

For services that are not billed on a usage sensitive basis (e.g. Switched Transport Local Channel, Interoffice Channels & Multiplexing Equipment) the total use of the service shall be considered in determining the PIU factors including originating and terminating usage to the BellSouth Network.

The PIU factor is calculated as follows where MOUs are billed minutes of use:

$$\frac{\text{Total Interstate MOUs}}{\text{Total Usage MOUs}}$$

*Total Usage* includes interstate, intrastate and local usage. This percentage is calculated on a statewide basis. Both Interexchange Carriers and Facility Based Competitive Local Exchange Carriers (CLECs) are required to report PIU factors per their Access Carrier Name Abbreviation (ACNA).

### 3.3. PLU – Percent Local Usage

This factor is the percentage of intrastate terminating usage that is categorized as Local Jurisdiction. For purposes of this guide the total intrastate usage includes intrastate local usage and intrastate non-local usage. The local jurisdiction is applicable to Competitive Local Exchange Carriers (CLECs) that are terminating local traffic from their network to the BellSouth network. CLECs that totally utilize resale or unbundled network elements to provision local services are not required to report PLU factors. Interexchange Carriers that do not terminate local traffic as a CLEC are not required to report PLU factors. Terminating party pays usage shall be excluded from the PLU calculations (same as TPIU, Section 4.3). The local jurisdiction is normally defined per Local Interconnection contractual agreements and is calculated as follows where MOUs are billed minutes of use:

$$\frac{\text{Total Local Terminating MOUs}}{\text{Total Intrastate Terminating MOUs}}$$

The total intrastate terminating minutes can be determined by multiplying the total terminating minutes by (1- TPIU). Therefore the PLU may also be calculated as follows:

$$\frac{\text{Total Local Terminating MOUs}}{(\text{Total Terminating MOUs}) \times (1-\text{TPIU})}$$

This factor is calculated on a statewide basis by Access Carrier Name Abbreviation (ACNA).

### 3.4. PLF – Percent Local Facility

The PLF is the percentage of the intrastate use of Switched Dedicated Transport and/or Local Interconnection Transport that is jurisdictionally local. This factor is similar to PLU except that it applies to dedicated transport services that are billed on a non-usage sensitive basis. Reporting of this factor is required by Facility Based CLECs utilizing BellSouth Local Interconnection transport services. Factors for the initial request shall be reported via *RF-3995 Jurisdictional Factor Report* (see <http://www.interconnection.bellsouth.com/forms/index.html>, CLEC Forms Online or Interexchange Carrier Webforms). In addition, IXCs that also function as a CLEC and utilize Switched Dedicated Transport and/or Local

Interconnection transport to interconnect with the BellSouth Network for the exchange of local traffic are required to report a PLF. As with PIU factors for non-usage sensitive billed services, the total use of these services are considered in determining the factor (i.e. all originating and terminating usage). The PLF represents the percentage of use of all the Switched Dedicated Transport and Local Interconnection Transport provisioned by BellSouth that is jurisdictionally local as defined per contract or tariff. The PLF for these services is based upon the usage that is transported by these services as follows:

$$\frac{\text{Total Local MOUs}}{\text{Total Intrastate MOUs}}$$

The total intrastate minutes can be determined by multiplying the total minutes by (1- PIUE) where PIUE is the factor applicable to Switched Dedicated Transports and Local Interconnection Transport. Therefore the PLF may also be calculated as follows:

$$\frac{\text{Total Local Minutes}}{(\text{Total Minutes}) \times (1-\text{PIUE})}$$

This factor may is calculated on a statewide basis and reported per Access Carrier Name Abbreviation (ACNA).

## 4.0 Service Reporting Requirements

Jurisdictional factors shall be developed and reported for particular services as specified in the BellSouth Tariffs and as specified in applicable contracts that are provisioned for a carrier. Factor reporting requirements for these services are discussed in the following subsections.

### 4.1. BellSouth Switched Access (SWA) Feature Group A (FGA) PIU (PIUA)

Usage based rate elements are billed for FGA in both the originating and terminating directions. This usage shall be apportioned to the intrastate and interstate jurisdictions. A single PIU factor shall be reported at the state level to apportion all the applicable usage (both originating, terminating and transit) between the state and interstate jurisdictions. All usage received from or delivered to the BellSouth network and through the BellSouth Network to

connecting local exchange carriers shall be considered in the determination of the PIU for FGA.

#### **4.2. BellSouth SWA FGB PIU (PIUB)**

Usage based rate elements are billed for FGB in both the originating and terminating directions. This usage shall be apportioned to the state and interstate jurisdictions. A single PIU factor shall be reported at the state level to apportion all the applicable usage (both originating and terminating) based elements between the intrastate and interstate jurisdictions.

#### **4.3. BellSouth SWA FGD & Local Terminating PIU (TPIU)**

Usage based rate elements are billed for FGD in both the originating and terminating directions. BellSouth is able to determine the jurisdiction of originating FGD traffic per the billing records generated with each call. Therefore a factor to apportion usage for originating FGD traffic is not required from the reporting carrier. Originating traffic consists of calls where the location of the calling number is served from a BellSouth end office that is connecting to a carrier for completion to the called number location. The terminating usage shall be apportioned to the state and interstate jurisdictions per a TPIU factor. A single TPIU factor for terminating FGD traffic shall be reported at the state level to apportion the applicable usage based elements between the intrastate and interstate jurisdictions. Terminating party pays usage (e.g. 800 terminating traffic) shall be excluded from the TPIU calculations.

Local traffic shall also be included when determining the TPIU. If the reporting carrier functions as an Interexchange and Local carrier then all of the terminating usage sent to BellSouth will be apportioned between the state and interstate jurisdictions per a single TPIU. This factor shall be reported at the state level per Access Carrier Name Abbreviation (ACNA). A TPIU shall be reported by CLECs even if it does not terminate any interstate traffic to the BellSouth network. In this situation, the CLEC should report a TPIU equal to zero (0.00) to indicate that all of its traffic is Intrastate and Local.

#### **4.4. BellSouth Local Interconnection PLU**

The percent of usage to be billed per the Local Interconnection contracts is determined by the PLU factor. This factor shall be developed in conjunction with the TPIU factor discussed in the previous subsection. After the TPIU is

determined then the percentage of the intrastate usage that is local shall be determined. By definition, the percentage of intrastate traffic of the total terminating traffic is equal to  $1 - \text{TPIU}$ . The total terminating traffic to be considered is discussed in the TPIU subsection. The PLU represents the percentage of intrastate terminating usage that is jurisdictionally local. This factor is reported at the state level by ACNA.

#### **4.5. BellSouth SWA 500 PIU (ZP15)**

The SWA 500 PIU factor will be applied to the carrier's originating 500 service MOUS and to the calls to apportion the usage and calls between state and interstate jurisdiction. This factor represents the percentage of originating 500 minutes and calls that are interstate jurisdiction.

#### **4.6. BellSouth SWA 700 Access Service (ZP17)**

The SWA 700 PIU factor will be applied to the carrier's originating 700 service MOUS to apportion the usage between state and interstate jurisdiction. This factor represents the percentage of originating 700 minutes that are interstate jurisdiction.

#### **4.7. BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening (ZP18)**

The SWA 8XX PIU factor will be applied to the carrier's originating 8XX service MOUS and queries to apportion the usage and queries between the intrastate and interstate jurisdiction. This factor represents the percentage of originating 8XX minutes and queries that are interstate jurisdiction.

#### **4.8. BellSouth SWA 900 Service (ZP19)**

The SWA 900 PIU factor will be applied to the carrier's originating 900 service MOUS to apportion the usage between the intrastate and interstate jurisdiction. This factor represents the percentage of originating 900 minutes that are interstate jurisdiction.

#### **4.9. BellSouth SWA Transport PIUE**

BellSouth SWA Transport PIUE is applicable to the following SWA Transport Services:

SWA Local Channel  
SWA Dedicated Interoffice Channels  
SWA Channelization Equipment  
Local Interconnection Dedicated Transport  
Dedicated End Office Trunk Port Service  
Dedicated Tandem End Office Trunk Port Service  
SWA Expanded Interconnection Cross-Connects

The PIUE may also be applied to other flat rated charges not specifically covered by other PIU categories.

The utilization of these transport services is considered in combination to determine the PIUE factors. The PIUE will be applied to the recurring billing elements for these services to apportion billing between the intrastate and interstate jurisdictions. The total jurisdictional use of these services shall be considered when determining PIUE factors including all originating and terminating usage. The PIUE represents the percentage that these services are utilized for interstate jurisdiction applications.

#### **4.10. BellSouth Local Interconnection Transport PLF**

This factor is utilized to apportion the use of SWA Local Channel, SWA Dedicated Interoffice Channels, SWA Channelization Equipment, Local Interconnection Dedicated Transport, Tandem/End Office Ports and various other flat rated services to the Local Jurisdiction for billing purposes (per tariff and contractual agreements). This factor is developed in conjunction with the PIUE. The PLF represents the percentage of the Intrastate use of these services that is jurisdictionally Local whereby the Intrastate percentage is defined as 1-PIUE. The total jurisdictional use of these services shall be considered when determining PLF and should include originating and terminating traffic. This factor is reported at the state level by ACNA.

#### **4.11.a. BellSouth CCS7 Access Arrangement SPIU**

If a carrier has access to CCS7 Signaling Services monitoring software, then that carrier may use this software to identify the appropriate jurisdictional factors (SPIU/SPLU) on its signaling with BellSouth and report these factors in the same format detailed herein.

If, however, a carrier does not have access to CCS7 Signaling Services monitoring software, then as APIU for CCS7 Signaling Services shall be developed and reported based upon the associated billed minutes of use for SWA

Usage- based services. The billed minutes that are jurisdictionally **interstate** as a percentage of the total billed minutes shall be reported as the CCS7 Access SPIU.

#### 4.11.a. **BellSouth CCS7 Access Arrangement SPLU**

If a carrier has access to CCS7 Signaling Services monitoring software, then that carrier may use this software to identify the appropriate jurisdictional factors (SPIU/SPLU) on its signaling with BellSouth and report these factors in the same format detailed herein.

If, however, a carrier does not have access to CCS7 Signaling Services monitoring software, then an SPLU for CCS7 Signaling Services shall be developed and reported based upon the associated billed minutes of use for SWA Usage based services and Local Interconnection services. The billed minutes that are jurisdictionally **local** as a percentage of the total *intrastate* billed minutes shall be reported as the CCS7 Access SPLU. Where the customer is a “Third Party Provider” of CCS7 Access services then the SPLU will be developed based upon a weighted average of all of that provider’s “Third Party Customer’s” end user traffic.

#### 4.11.c. **BellSouth CCS7 Access Arrangement: Special Note**

In determining a factor for intrastate, **non-local traffic**, consider the following example:

Based on evaluating SWA usage-based services and local interconnection services, a BellSouth carrier customer has determined that its signaling traffic merits an SPIU of 80 and an SPLU of 60. As such, the following will then be true:

**80%** of the carrier’s signaling messages will be billed as **interstate**.  
Of the remaining **20%**, 60% of the 20% ( $.60 \times .20 = .12$ ), **12%** will be billed as **local**.

And, the final **8%** will be billed as **intrastate, non-local**.

### 5. **BellSouth Line Information Data Base Service LIDB**

There are two factors reported for LIDB service, a PIU factor and a PCLU (Percent CLEC LIDB Usage). These factors are utilized to apportion the queries

to the LIDB Data Base between the interstate, intrastate and local jurisdiction. First, the total number of queries in the study period is determined and then the PCLU shall be calculated. The PCLU represents the percentage of LIDB queries that are jurisdictionally Local as a percentage of the total number of queries. The basic formula for the PCLU calculation is as follows:

$$\frac{\text{Number of Local Queries}}{\text{Total Number of Queries}}$$

After the PCLU is determined, the LIDB PIU shall be determined. The LIDB PIU represents the percentage of queries that are jurisdictionally interstate of the total number of queries minus the number of queries that are jurisdictionally local. The formula for the LIDB PIU is as follows:

$$\frac{\text{Number of Interstate Queries}}{(\text{Total Number of Queries}) - (\text{Number of Local Queries})}$$

## 5.0 Report Process

The following summarizes the major steps to develop and report jurisdictional factors:

- Install/modify systems to capture usage data with sufficient detail to accurately determine and aggregate the usage to the appropriate jurisdiction, by ACNA
- Create/Modify call detail records for traffic segregation to the appropriate service and jurisdiction
- Record and accumulate usage data
- Analyze usage data
- Calculate the factors
- Report the factors
- Maintain sufficient records of the data resources utilized to determine jurisdictional factors to comply with audit verification requirements as specified in the BellSouth Tariffs and applicable contractual agreements.

## 6.0 Frequency of Reporting

Jurisdictional factors shall be updated on a quarterly basis during the months of January, April, July and October. These updates shall be received no later than 30

days after the first day in each of these months. These factors shall represent the actual use for the three previous ending on the last day of December, March, June and September respectively. These updates shall be provided in writing by letter or electronic mail and sent to the following address:

US Mail

BellSouth Telecommunications, Inc  
2300 Northlake Centre Drive  
Suite 415  
Tucker, GA 30084

OR

Electronic Mail

piu.reports@bellsouth.com

An e-mail will be returned indicating receipt of reports submitted by electronic mail. The recommended format for updates is via the online form *RF-3995 Jurisdictional Factor Report* (see <http://www.interconnection.bellsouth.com/forms/index.html>, CLEC Forms Online or Interexchange Carrier Webforms).

In those instances where BellSouth has sufficient information to calculate jurisdictional factors for itself, BellSouth will notify the carrier, by letter or email, of the factors that will be used in billing, as well as the effective date. Unless otherwise notified, BellSouth will continue to update the specific identified factor(s) for subsequent quarters per the above schedule and the carrier will be exempt from further responsibility to report those specific factors.

In the event the customer does not provide a projected jurisdictional factor(s) and BellSouth does not have sufficient information to develop the jurisdictional factor(s) then BellSouth may utilize the most recent audit results if an audit has been performed, the jurisdictional factor(s) provided with the initial order for service or a default value.

## **7.0 Audits**

### **7.1. Audit Request**

If BellSouth disputes a PIU factor provided by a carrier and BellSouth does not have sufficient information to calculate a PIU, BellSouth may initiate negotiations with the carrier in order to reconcile the factor differences and attempt to determine the correct PIU factor.

If negotiations are attempted and are not successful in producing an agreed PIU factor, BellSouth has the option per its access tariffs to initiate an independent, third party audit of the carrier's PIU factors and the process utilized in the development of PIU factors.

Upon 30 days written notice, BellSouth may initiate an audit to ensure proper billing of traffic. The audit will be performed by:

- An independent auditor under contract to BellSouth
- A mutually acceptable independent auditor paid for by BellSouth
- Or an independent auditor selected and paid for by the carrier

Call detail records from which the PIU can be ascertained shall be retained for a minimum of 6 months. The call detail records will be made available for inspection at an agreed upon location during normal business hours. If requested data is not provided within 30 days of the notice, the carrier shall be in violation of the Tariff. BellSouth will not submit more than one audit request per calendar year.

## **7.2. Audit Compliance**

The factor shall be adjusted based upon the audit results. The audited factor shall be applied to the usage for the quarter the audit was completed, the quarter prior to the audit, and the two quarters following the completion of the audit. If the audited factor has a variance of 20% or more from the factor reported factor, the carrier shall reimburse BellSouth for the cost of the audit if the audit was paid for by BellSouth.

Two quarters after the quarter in which the audit was completed, the carrier may report a revised factor. If the revised factor denotes a deviation of 5% or more from the audited factor and the carrier is not able to justify this deviation to BellSouth's satisfaction, BellSouth has the option of requesting another audit.

The carrier may contest the audit within 30 days from the date the audit report has been furnished to the carrier.

## 8.0 Ordering

As stated in 3.1 preceding, BellSouth jurisdictional shall be provided with the initial request for each service in each state and quarterly thereafter. Factors for the initial request shall be reported via *RF-3995 Jurisdictional Factor Report* which is located at <http://www.interconnection.bellsouth.com/forms/index.html>, CLEC Forms Online or Interexchange Carrier Webforms. Failure to provide the appropriate factors with the initial request may result in delay of service. In the event that service is provided and the appropriate factors have not been received, a default factor may be used.

## **Attachment 4**

### **Collocation**

## COLLOCATION

### 1. Scope of Attachment

- 1.1 The rates, terms, and conditions contained within this Attachment shall only apply when KMC Data is collocated as a sole occupant or as a Host within a BellSouth premises location pursuant to this Attachment. BellSouth premises include BellSouth Central Offices and Serving Wire Centers; all buildings or similar structures owned, leased, or otherwise controlled by BellSouth that house its network facilities; all structures that house BellSouth facilities on public rights-of-ways, including but not limited to vaults containing loop concentrators or similar structures; and all land owned, leased, or otherwise controlled by BellSouth that is adjacent to BellSouth's Central Offices, Serving Wire Centers, buildings and structures (hereinafter "Premises"). BellSouth Remote Site Locations (Remote Site Locations) include cabinets, huts and controlled environmental vaults owned or leased by BellSouth that house BellSouth Network Facilities. If the Premises occupied by BellSouth is leased by BellSouth from a third party or otherwise controlled by a third party, special considerations and/or intervals may apply in addition to the terms and conditions contained in this Attachment. BellSouth will inform KMC Data if a Premises is leased when special considerations and/or intervals may be applicable.
- 1.2 If BellSouth provides collocation to other telecommunications carriers, or to a BellSouth Affiliate, BellSouth will provide the same collocation to KMC Data at rates, terms and conditions no less favorable to KMC Data than those provided by BellSouth to other telecommunications carriers, or to a BellSouth Affiliate.
- 1.3 Right to Occupy. BellSouth shall offer to KMC Data collocation on rates, terms, and conditions that are just, reasonable, non-discriminatory and in full compliance with the rules and orders of the FCC and the Commission. Subject to the rates, terms and conditions of this Attachment, where space is available and it is technically feasible, BellSouth will allow KMC Data to occupy a certain area designated by BellSouth within a Premises or on BellSouth property upon which the Premises is located of a size which is specified by KMC Data and agreed to by BellSouth (hereinafter "Collocation Space", or "Remote Site Collocation Space"). To the extent not contained herein, the necessary rates, terms and conditions for collocation at Premises, as defined by the FCC above, shall be negotiated upon reasonable request for collocation at such Premises.
- 1.4 Space Reservation.
- 1.4.1 Neither BellSouth nor any of BellSouth's Affiliates may reserve space for future use on more preferential terms than those set forth in Sections 1.4.2 and 1.4.3 below.
- 1.4.2 In all states other than Florida, the size, or rack/bay(s) in a Remote Site Location, specified by KMC Data may contemplate a request for space sufficient to accommodate KMC Data's growth within a twenty-four (24) month period.

- 1.4.3 In the state of Florida, the size, or rack/bay(s) in a Remote Site Location, specified by KMC Data may contemplate a request for space sufficient to accommodate KMC Data's growth within an eighteen (18) month period.
- 1.5 Space Allocation. BellSouth shall use best efforts to accommodate KMC Data's requested preferences, if any, including the provision of contiguous space for any subsequent request for collocation. In allocating Collocation Space, BellSouth shall not (a) materially increase KMC Data's cost or materially delay KMC Data's occupation and use of the Collocation Space, (b) assign Collocation Space that will impair the quality of service or otherwise limit the service KMC Data wishes to offer, (c) reduce unreasonably the total space available for physical collocation at a Premise, or preclude unreasonably physical collocation within the Premises. Consistent with the foregoing, BellSouth shall assign KMC Data collocation space within Premises that utilizes existing infrastructure (e.g., HVAC, lighting and available power), if such space is available for collocation. Space shall not be available for collocation if it is: (a) physically occupied by non-obsolete equipment; (b) assigned to another collocated telecommunications carrier; (c) used to provide physical access to occupied space; (d) used to enable technicians to work on equipment located within occupied space; (e) properly reserved for future use, either by BellSouth or another collocated telecommunications carrier; or (f) essential for the administration and proper functioning of Premises. BellSouth may segregate Collocation Space and require separate entrances for collocated telecommunications carriers to access their Collocation Space, pursuant to FCC Rules.
- 1.6 Space Reclamation. In the event of space exhaust within a Premises, BellSouth may include in its documentation for the Petition for Waiver filed with the Commission, any unutilized space in the Premises. KMC Data will be responsible for the justification of unutilized space within its Collocation Space, if the Commission requires such justification.
- 1.7 Virtual Collocation Space Reservation. BellSouth shall relinquish any space held for future use before denying a request for virtual collocation on the grounds of space limitations, unless BellSouth proves to the Commission that virtual collocation at that point is not technically feasible.
- 1.8 Use of Space. KMC Data shall use the Collocation Space for the purposes of installing, maintaining and operating KMC Data's equipment (to include testing and monitoring equipment) necessary for interconnection or for accessing unbundled network elements in accordance with the Act and FCC and Commission rules.
- 1.9 The Parties agree to comply with all applicable federal, state, county, local and administrative laws, rules, ordinances, regulations and codes in the performance of their obligations.

- 1.10 Service Coordination. The Parties shall coordinate, where necessary, to ensure that the Collocation Space is provisioned in accordance with the specifications submitted by KMC Data in its Application, as affirmed by the Bona Fide Firm Order (BFFO) or as jointly amended thereafter. BellSouth will provide the necessary infrastructure to support KMC Data's request(s) pursuant to this Agreement.

## **2. Space Availability Report**

- 2.1 Upon request from KMC Data and at the KMC Data's expense, BellSouth will provide a written report (Space Availability Report) describing in detail the space that is available for collocation at a particular Premises. This report will include the amount of Collocation Space available at the Premises requested, the number of collocators present at the Premises, any modifications in the use of the space since the last report on the Premises requested and the measures BellSouth is taking to make additional space available for collocation arrangements. A Space Availability Report does not reserve space at the Premises for which the Space Availability Report was requested by KMC Data.
- 2.1.1 The request from KMC Data for a Space Availability Report must be in writing and include the Premises street address, as identified in the Local Exchange Routing Guide (LERG) and Common Language Location Identification (CLLI) code of the Premises. CLLI code information is located in the National Exchange Carrier Association (NECA) Tariff FCC No. 4.
- 2.1.1.1 If KMC Data is unable to obtain the CLLI code for the Remote Site Location from, for example, a site visit to the remote site, KMC Data may request the CLLI code from BellSouth. To obtain a CLLI code for a Remote Site Location directly from BellSouth, KMC Data should submit to BellSouth a Remote Site Interconnection Request (the Request) for the Serving Wire Center CLLI code prior to submitting its request for a Space Availability Report. KMC Data should complete all the requested information and submit the Request to BellSouth. BellSouth will bill the applicable fee as set forth in Exhibit B.
- 2.1.2 BellSouth will respond to a request for a Space Availability Report for a particular Premises within ten (10) days of the receipt of such a request. If BellSouth cannot meet the ten (10) day response time, BellSouth shall notify KMC Data and inform KMC Data of the timeframe under which it can respond.
- 2.2 Remote Site Information. Upon written request, BellSouth will provide KMC Data with the following information concerning BellSouth's remote sites: (i) the address of the remote site; (ii) the CLLI code of the remote site; (iii) the carrier serving area of the remote site; (iv) the designation of which remote sites subtend a particular central office; and (v) the number and address of customers that are served by a particular remote site.

- 2.3 BellSouth will provide this information on a first come, first served basis within thirty (30) days of KMC Data's request subject to the following conditions: (i) the information will only be provided on a CD in the same format in which it appears in BellSouth's systems; (ii) the information will only be provided for each serving wire center designated by KMC Data, up to a maximum of thirty (30) wire centers per KMC Data request per month per state, and up to a maximum of one hundred twenty (120) wire centers total per month per state for all CLECs; and (iii) KMC Data agrees to pay the cost as set forth in Exhibit B.

### **3. Collocation Options**

- 3.1 Cageless. BellSouth shall allow KMC Data to collocate KMC Data's equipment and facilities without requiring the construction of a cage or similar structure. BellSouth shall allow KMC Data to have direct access to KMC Data's equipment and facilities in accordance with Section 5.19 below. BellSouth shall make cageless collocation available in single rack/ bay increments. Except where KMC Data's equipment requires special technical considerations (e.g., special cable racking or isolated ground plane), BellSouth shall assign cageless Collocation Space in conventional equipment rack lineups where feasible. For equipment requiring special technical considerations, KMC Data must provide the equipment layout, including spatial dimensions for such equipment pursuant to generic requirements contained in Telcordia GR-63-Core, and shall be responsible for compliance with all special technical requirements associated with such equipment.
- 3.2 Caged. BellSouth will make caged collocation available in fifty (50) square foot increments, which should be sufficient enough, to collocate a single rack/bay of equipment. At KMC Data's expense, KMC Data will arrange with a Supplier certified by BellSouth (BellSouth Certified Supplier) to construct a collocation arrangement enclosure in accordance with BellSouth's reasonable and nondiscriminatory Technical References (TRs) (Specifications), where technically feasible as that term has been defined by the FCC, prior to starting equipment installation. BellSouth will provide Specifications to its BellSouth Certified Suppliers. Where local building codes require enclosure specifications more stringent than BellSouth's enclosure Specifications, KMC Data and KMC Data's BellSouth Certified Supplier must comply with the more stringent local building code requirements. KMC Data's BellSouth Certified Supplier shall be responsible for filing and receiving any and all necessary permits and/or licenses for such construction. BellSouth shall cooperate with KMC Data and provide, at KMC Data's expense, the documentation, including existing building architectural drawings, enclosure drawings, and Specifications required and necessary for KMC Data's BellSouth Certified Supplier to obtain the zoning, permits and/or other licenses. KMC Data's BellSouth Certified Supplier shall bill KMC Data directly for all work performed for KMC Data pursuant to this Attachment. BellSouth shall have no liability for, nor responsibility to pay, such charges imposed by KMC Data's BellSouth Certified Supplier. Upon request, BellSouth shall construct the enclosure for KMC Data.

- 3.2.1 BellSouth may elect to review KMC Data's plans and specifications prior to allowing construction to start, to ensure compliance with BellSouth's Specifications. BellSouth will notify KMC Data of its desire to execute this review in BellSouth's response to the Initial Application, if KMC Data has indicated its desire to construct its own enclosure. If KMC Data's Initial Application does not indicate its desire to construct its own enclosure, but its subsequent firm order does indicate its desire to construct its own enclosure, then notification to review will be given within ten (10) days after the Firm Order date. BellSouth shall complete its review within fifteen (15) days after the receipt of KMC Data's plans and specifications. Regardless of whether or not BellSouth elects to review KMC Data's plans and specifications, BellSouth reserves the right to inspect the enclosure after construction has been completed to ensure that it is constructed according to KMC Data's submitted plans and specifications and/or BellSouth's Specifications, as applicable. If BellSouth decides to inspect the constructed Collocation Space, BellSouth will complete its inspection within fifteen (15) days after receipt of written notification of completion of the enclosure from KMC Data. BellSouth may require KMC Data to remove or correct within seven (7) days, at KMC Data's expense, any structure that materially deviates from KMC Data's plans and specifications or BellSouth's Specifications, if applicable. If KMC Data requests BellSouth to construct the enclosure or do any other work, KMC Data reserves the right to inspect the enclosure or work performed by BellSouth and review any plans or specifications related to the same.
- 3.3 Shared Caged Collocation. KMC Data may allow other telecommunications carriers to share KMC Data's caged collocation arrangement, where technically feasible as that term has been defined by the FCC, pursuant to the terms and conditions agreed to by KMC Data (Host) and the other telecommunications carriers (Guests) pursuant to this Section, except where the Premises is located within a leased space and BellSouth is prohibited by said lease from offering such an option to KMC Data or is located on property for which BellSouth holds an easement and such easement does not permit such an option for a Remote Site Location. BellSouth shall be notified in writing by KMC Data upon the execution of any agreement between the Host and its Guest(s) prior to the submission of any application. Further, such notification shall include the name of the Guest(s), the term of the agreement, and a certification by KMC Data that said agreement imposes upon the Guest(s) the same terms and conditions for Collocation Space as set forth in this Attachment between BellSouth and KMC Data.
- 3.3.1 KMC Data, as the Host, shall be the sole interface and responsible Party to BellSouth for the assessment and billing of rates and charges contained within this Attachment and for the purposes of ensuring that the safety and security requirements of this Attachment are fully complied with by the Guest(s), its employees and agents. BellSouth shall provide KMC Data with a pro-ration of the costs of the Collocation Space based on the number of collocators and the space used by each. BellSouth will not allocate less than one (1) rack/bay per Host/Guest. In those instances where the Host permits a Guest to use a shelf within the Host's bay within a Remote Site Location, BellSouth will not prorate the cost of the bay. In all other states than Florida, and in addition to the above, KMC Data shall be the responsible party to

- BellSouth for the purpose of submitting applications for initial and additional equipment placement for the Guest(s). In Florida, the Guest(s) may submit its own initial and additional equipment placement applications using the Host's Access Carrier Name Abbreviation (ACNA), provided that Guest secures permission from KMC Data to use KMC Data's ACNA and password. A separate Guest application shall result in the assessment of a Remote Site Application Fee, an Initial Application Fee or a Subsequent Application Fee, as set forth in Exhibit B, which will be billed to the Host on the date that BellSouth provides its written response to the Guest(s) Bona Fide Application (Application Response).
- 3.3.2 Notwithstanding the foregoing, the Guest(s) may submit service orders directly to BellSouth to request the provisioning of interconnecting facilities between BellSouth and the Guest(s), the provisioning of services, and access to unbundled network elements. The bill for these interconnecting facilities, services and access to UNEs will be charged to the Guest(s) pursuant to the applicable Tariff or the Guest's Interconnection Agreement with BellSouth.
- 3.3.3 KMC Data shall indemnify and hold harmless BellSouth from any and all claims, actions, causes of action, of whatever kind or nature arising out of the presence of KMC Data's Guest(s) in the Collocation Space, except to the extent caused by BellSouth's, its employees' or agents' negligence, gross negligence, or willful misconduct.
- 3.3.4 In making shared caged arrangements available, whether or not KMC Data serves as Host, BellSouth may not increase the cost of site preparation or nonrecurring charges above the cost of provisioning such a shared arrangement of similar dimensions and material to a single collocating party.
- 3.4 Shared Remote Site Cageless Collocation. Subject to the requirements set forth in Section 3.3 above, to the extent BellSouth is permitted to offer shared collocation at Remote Site locations by property or easement owners, BellSouth will permit shared cageless collocation at such locations, where technically feasible, and space is available.
- 3.5 Adjacent Collocation. Subject to technical feasibility and space availability, BellSouth will permit an adjacent collocation arrangement (Adjacent Arrangement) on Premises' property only when space within the Premises is legitimately exhausted and where the Adjacent Arrangement does not interfere with access to existing or planned structures or facilities on the Premises' property. An Adjacent Arrangement shall be constructed or procured by KMC Data and must be in conformance with reasonable and nondiscriminatory provisions of BellSouth's design and construction Specifications. Further, KMC Data shall construct, procure, maintain and operate said Adjacent Arrangement(s) pursuant to all of the applicable rates, terms and conditions set forth in this Attachment. Additional rates, where applicable, shall be negotiated at the time of the application for the Remote Site Adjacent Arrangement.

- 3.5.1 If KMC Data requests Adjacent Collocation, pursuant to the conditions stated in Section 3.5 above, KMC Data must arrange with a BellSouth Certified Supplier to construct the Adjacent Arrangement structure in accordance with BellSouth's Specifications. BellSouth will provide Specifications upon request. Where local building codes require enclosure specifications more stringent than BellSouth's Specifications, KMC Data and KMC Data's BellSouth Certified Supplier must comply with the more stringent local building code requirements. KMC Data's BellSouth Certified Supplier shall be responsible for filing and receiving any and all necessary zoning, permits and/or licenses for such construction. KMC Data's BellSouth Certified Supplier shall bill KMC Data directly for all work performed for KMC Data pursuant to this Attachment. BellSouth shall have no liability for, nor responsibility to pay, such charges imposed by KMC Data's BellSouth Certified Supplier.
- 3.5.2 KMC Data must submit its Adjacent Arrangement construction plans and specifications to BellSouth when it places its Firm Order. BellSouth shall review KMC Data's plans and specifications prior to construction of an Adjacent Arrangement(s) to ensure KMC Data's compliance with BellSouth's Specifications. BellSouth shall complete its review within fifteen (15) days after receipt of the plans and specifications from KMC Data for the Adjacent Arrangement. BellSouth may inspect the Adjacent Arrangement during and after construction is completed to ensure that it is constructed according to KMC Data's submitted plans and specifications. If BellSouth decides to inspect the completed Adjacent Arrangement, BellSouth will complete its inspection within fifteen (15) days after receipt of written notification of completion of the enclosure from KMC Data. BellSouth may require KMC Data to remove or correct within seven (7) days at KMC Data's expense, any structure that materially deviates from its submitted plans and specifications or BellSouth's Specifications, if applicable.
- 3.5.3 KMC Data shall provide a concrete pad, the structure housing the arrangement, heating/ventilation/air conditioning (HVAC), lighting, and all of the facilities that are required to connect the structure (i.e., racking, conduits, etc.) to the BellSouth point of demarcation. At KMC Data's option, and where the local authority having jurisdiction permits, BellSouth shall provide an AC power source and access to physical collocation services and facilities, subject to the same nondiscriminatory requirements as those applicable to any other physical collocation arrangement. In Alabama and Louisiana, BellSouth will provide DC power, to Adjacent Collocation sites where technically feasible, as that term has been defined by the FCC subject to individual case basis pricing that complies with the pricing standards of Sections 251 and 252 of the Act. KMC Data's BellSouth Certified Supplier shall be responsible, at KMC Data's sole expense, for filing and receiving any and all necessary zoning, permits and/or licenses for an Adjacent Arrangement. BellSouth shall allow shared use of the Adjacent Arrangement pursuant to the terms and conditions set forth in Section 3.4 above.
- 3.5.4 In the event that interior space in a BellSouth Premises becomes available, and subject to the provisions of Section 6.6 below, KMC Data may, at its option, relocate its

- equipment from an adjacent facility into the interior space subject to the rates, terms and conditions of this Attachment 4.
- 3.6 Other Physical Collocation Arrangements. BellSouth will provide other collocation arrangements that have been demonstrated to be technically feasible. A previously successful method of obtaining interconnection or access to unbundled network elements at a particular premises or point on any incumbent LEC's network is substantial evidence that such method is technically feasible in the case of substantially similar network premises or points. In seeking a particular collocation arrangement, either physical or virtual, KMC Data, is entitled to a presumption that such arrangement is technically feasible if any LEC has deployed such collocation arrangement in any incumbent LEC premises.
- 3.7 Virtual Collocation. Virtual Collocation will be made available according to the terms and conditions described in BellSouth's FCC Tariff No. 1 for all states except Florida, which will be made available pursuant to the terms and conditions contained in the Florida Access Services Tariff. BellSouth shall provide Virtual Collocation at the rates set forth in Exhibit B. If there are any inconsistencies between BellSouth's FCC Tariff No. 1 or the Florida Access Services Tariff, and this Agreement, the rates, terms, and conditions of this Agreement shall control.
- 3.7.1 Virtual Collocation would occur when KMC Data provides and leases to BellSouth its transmission and other collocation equipment dedicated to KMC Data's use. KMC Data will be responsible for monitoring and controlling KMC Data's circuits terminating at BellSouth's Premises. Once space preparation is complete, and upon KMC Data's request, KMC Data shall contract with a BellSouth Certified Supplier to install all equipment and facilities in accordance with BellSouth's guidelines and Specifications. KMC Data shall be responsible for all costs of the BellSouth Certified Supplier's installation of KMC Data's virtual collocation arrangement. KMC Data shall be responsible for all engineering associated with the installation and the provision of the equipment, necessary supplies and related documentation related to provisioning KMC Data's virtual collocation space. BellSouth will maintain and repair such equipment under the same intervals and with the same or better failure rates for performance of similar functions for comparable BellSouth equipment. Maintenance may include the change out of electronic cards provided by KMC Data.
- 3.7.2 KMC Data may purchase the equipment from a third party, and is not required to purchase the equipment from BellSouth.
- 3.7.3 BellSouth will make available digital, analog and fiber cross connects for Virtual Collocation at the rates contained in Exhibit B.
- 3.8 Remote Site Collocation. Remote Site Collocation is the placement of KMC Data owned facilities and equipment in BellSouth remote sites. Equipment ownership, maintenance and insurance are the responsibility of the KMC Data or their approved

- agent. The minimum amount of a Remote Site Collocation arrangement is one (1) bay/rack.
- 3.8.1 For equipment requiring special technical considerations, KMC Data must provide the equipment layout, including spatial dimensions for such equipment pursuant to the generic requirements contained in Telcordia GR-63-Core, and shall be responsible for compliance with all special technical requirements associated with such equipment pursuant to Sections 3.8.2 and 3.8.3 below.
- 3.8.2 KMC Data may elect to connect to a feeder line by submitting a service inquiry for that UNE to the Complex Resale Support Group (CRSG), as follows:
- 3.8.2.1 Connection to a BellSouth feeder line (when technically feasible) is achieved via cross connects located near the BellSouth equipment inside the Remote Site Location. In this case, the point of demarcation is the DSX (Digital System Cross Connect), feeder distribution interface, or LGX (Light Guide Cross Connect ) panel in the Remote Site Location.
- 3.8.2.2 Connection of the KMC Data owned or leased entrance facilities into the Remote Site Collocation Space from KMC Data's own point of presence is permitted. However, BellSouth will designate the point of entrance at the Remote Site location housing the collocation space, so that it is physically accessible to both Parties.
- 3.8.3 Distribution lines will be accessed through KMC Data's provision of a copper cable through a conduit from the Remote Site collocation space to the feeder distribution interface of sufficient length for splicing. BellSouth will splice this cable to the distribution cable at the feeder distribution interface in eight (8) pair increments.
- 3.8.4 Virtual Collocation in the Remote Site. Virtual Collocation provides for the placement of KMC Data owned equipment and facilities in a BellSouth Remote Site. The minimum amount of space offered for a virtual collocation arrangement is one (1) rack/bay. BellSouth will lease KMC Data's entrance fiber or cable (to include copper) cabling and equipment for the nominal fee of one dollar. KMC Data's certified supplier will install the equipment in the rack/bay. BellSouth will then be responsible for performing all installation, maintenance and repair of the Virtual in the Remote Site plug-ins, when KMC Data requests such work via a Service Order or Maintenance ticket.
- 3.9 Cross Connect. A cross-connect purchased pursuant to this Attachment shall connect the demarcation point associated with KMC Data's collocation arrangement to the UNEs purchased by KMC Data pursuant to Attachment 2 of this Agreement hereof or the interconnection facilities purchased by KMC Data pursuant to Attachment 3 of this Agreement hereof.
- 3.10 Co-Carrier Cross Connect (CCXC). CCXCs are cross-connects between KMC Data and another collocated telecommunications carrier other than BellSouth in the same

- Premises. Where technically feasible, BellSouth will permit KMC Data to interconnect directly between its virtual or physical collocation arrangements and those of another collocated telecommunications carrier within the same Premises via CCXCs and the associated cabling necessary to complete the interconnection consistent with 47 C.F.R. § 51.323. Both KMC Data's agreement and the other collocated telecommunications carrier's agreement must contain rates, terms and conditions for CCXCs. BellSouth applicable charges will be imposed on the requesting telecommunications carrier. KMC Data is prohibited from using the Collocation Space for the sole or primary purpose of cross connecting to other collocated telecommunications carriers.
- 3.10.1 KMC Data may provision the CCXC using its own technicians, if certified as a BellSouth Certified Supplier, or contract with a BellSouth Certified Supplier to place the CCXC. The CCXC shall be provisioned through facilities owned or leased by KMC Data. Such connections to other collocated telecommunications carriers may be made using either optical or electrical facilities (lit or dark). In cases where KMC Data's equipment and the equipment of the other collocated telecommunications carrier are located in contiguous caged Collocation Spaces, KMC Data may use its own technicians to install CCXCs using either electrical or optical facilities (and associated patch cords, jumper cables, tie-pairs, etc.) between the equipment of both collocated telecommunication carriers and construct a dedicated cable support structure, if needed, between the two (2) contiguous cages. KMC Data shall deploy such optical or electrical connections directly between its own facilities and the facilities of another collocated telecommunications carrier without being routed through BellSouth's equipment. KMC Data shall not provision CCXC on any BellSouth distribution frame, POT (Point of Termination) Bay, DSX, or LGX. KMC Data is responsible for ensuring the integrity of the signal.
- 3.10.2 The CCXC fees provided for in this Agreement shall not apply when BellSouth has installed fiber or copper/coax cable support structure, pursuant to the terms and conditions of previous interconnection agreements between the Parties, that has been paid in full by KMC Data via nonrecurring CCXC charges. If KMC Data has ordered a service that originates from its collocation space and terminates to another collocater's space in the same BellSouth Premises, which caused a BellSouth technician to jumper the two (2) collocation spaces together using KMC Data specific connecting facility assignments (CFAs) provided by KMC Data and the other collocater at a BellSouth frame, panel or existing POT bay (wherever the point of demarcation resides), then BellSouth will permit these cross-connections to remain in service as provisioned and at the rates at which they were provisioned (grandfathered).
- 3.10.3 KMC Data shall be responsible for providing a letter of authorization (LOA), with the application, to BellSouth from the other collocated telecommunications carrier to which it will be cross-connecting. KMC Data provisioned CCXC shall utilize common cable support structure. There will be a recurring charge per linear foot, per cable, of common cable support structure used. In the case of two (2) contiguous caged collocation arrangements, KMC Data may use its own technicians to construct the dedicated support structure between the two (2) collocation arrangements.

- 3.10.4 To request or self-provision CCXCs, KMC Data must submit a Remote Site Application, an Initial Application or Subsequent Application to BellSouth. If no modification to the Collocation Space is requested other than the placement of CCXCs, the Co-Carrier Cross Connect/Direct Connect Only Application Fee for CCXCs, as set forth in Exhibit B, will apply. If modifications, in addition to the placement of CCXCs, are requested, the Initial Application or Subsequent Application Fee will apply as appropriate. BellSouth will bill this nonrecurring fee on the date that it provides an Application Response to KMC Data. If the CCXC is requested as part of an Initial Application, only the Initial Application Fee shall apply, plus any other applicable charges.
- 3.10.5 If requested by KMC Data, BellSouth will provision additional cable racking, if insufficient capacity is available to support KMC Data's request to provision a CCXC itself.
- 3.11 Direct Connect (DC). BellSouth will permit KMC Data to interconnect directly between KMC Data's virtual and/or physical collocation arrangements within the same Premises by utilizing a DC. KMC Data must use a BellSouth Certified Supplier to place the DC. The DC shall be provisioned through facilities owned by KMC Data. In those cases where KMC Data's virtual and/or physical collocation space is contiguous in the central office, KMC Data will have the option of using KMC Data's own technicians to deploy DC's using either electrical or optical facilities between the collocation spaces and constructing its own dedicated cable support structure. KMC Data will deploy such optical or electrical connections directly between its own facilities without being routed through BellSouth equipment. KMC Data may not self-provision DC's on any BellSouth distribution frame, POT, DSX or LGX.
- 3.11.1 KMC Data is responsible for ensuring the integrity of the signal. KMC Data-provisioned DC's shall utilize common cable support structure. There will be a recurring charge per linear foot, and a nonrecurring charge per cable, of the actual common cable support structure used. In the case of two (2) contiguous collocation arrangements, KMC Data will have the option of using KMC Data's own technicians to construct its own dedicated support structure.
- 3.11.2 To request or self-provision DCs, KMC Data must submit an Initial Application or Subsequent Application. If no modification to the Collocation Space is requested other than the placement of DC's, the Co-Carrier Cross Connect/Direct Connect Only Application Fee for DC, as defined in Exhibit B, will apply. If modifications in addition to the placement of DC's are requested, the Initial Application or Subsequent Application Fee will apply. This nonrecurring fee will be billed by BellSouth on the date that BellSouth provides an Application Response.

#### **4. Occupancy**

- 4.1 Space Ready Date. BellSouth will notify KMC Data in writing when the Collocation Space is ready for occupancy (Space Ready Date).
- 4.2 Acceptance Walkthrough. KMC Data will schedule and complete an acceptance walkthrough of the Collocation Space with BellSouth within fifteen (15) days of the Space Ready Date. BellSouth will correct any deviations from KMC Data's original or jointly amended application requirements within seven (7) days after the walkthrough, unless the Parties jointly agree upon a different time frame or mutually agree to accept the deviations. BellSouth will notify KMC Data of a new Space Ready Date upon resolution of any deviations that require correction. Another acceptance walkthrough will then be scheduled and conducted within fifteen (15) days of the new Space Ready Date. This follow-up acceptance walkthrough will be limited to only those items identified in the initial walkthrough. This process will continue until the Space Acceptance Date as defined below in Section 4.3 following. KMC Data must notify BellSouth in writing that collocation equipment installation is complete and operational with BellSouth's network.
- 4.3 Space Acceptance Date. If KMC Data completes its acceptance walkthrough within the fifteen (15) day interval, the date of KMC Data's acceptance of the Collocation Space, as indicated by KMC Data's execution of a Space Acceptance Form, will be the Space Acceptance Date (Space Acceptance Date).
- 4.3.1 In the event that KMC Data fails to complete an acceptance walkthrough within this fifteen (15) day interval, the Collocation Space shall be deemed accepted by KMC Data on the Space Ready Date and the Space Acceptance Date will be established as the same date, provided that BellSouth has complied with all space preparation, provisions of KMC Data's BFFO, and that all required of BellSouth is complete.
- 4.3.2 If KMC Data decides to occupy the space prior to the Space Ready Date, the date KMC Data occupies the space will be deemed the Space Acceptance Date.
- 4.4 Termination of Occupancy. In addition to any other provisions addressing termination of occupancy in this Agreement KMC Data may terminate occupancy in a particular Collocation Space by submitting a Subsequent Application, or a Remote Site Application requesting termination of occupancy. Such termination shall be effective upon BellSouth's execution of the Space Relinquishment Form for the collocation space(s) for which KMC Data seeks to terminate occupancy, which termination date shall be the same date as KMC Data's date of the Space Relinquishment Form, provided KMC Data has complied with all provisions of the Space Relinquishment Form. BellSouth may terminate KMC Data's right to occupy the Collocation Space in the event KMC Data fails to comply with any material provision directly related to Collocation in this Agreement provided BellSouth gives KMC Data thirty (30) days' prior written notice of the failure to comply and gives KMC Data an opportunity to cure during such period. Notwithstanding the above, any termination for non-payment of applicable fees, shall be in accordance with Attachment 7, Billing of this Agreement.

- 4.4.1 Upon termination of occupancy, KMC Data, at its sole expense, shall remove its equipment and any other property from the Collocation Space. KMC Data shall have thirty (30) days (Removal Date) from the Subsequent Application BFFO Date to complete such removal, including the removal of all equipment and facilities of KMC Data's Guest(s), unless KMC Data's Guest(s) has assumed responsibility for the Collocation Space housing the Guest(s)'s equipment, pursuant to the Commissions' space exhaust requirements and executed the appropriate documentation required by BellSouth prior to the KMC Data Removal Date.
- 4.4.2 Should KMC Data or KMC Data's Guest(s) fail to vacate the Collocation Space by the Removal Date, BellSouth shall have the right to remove the equipment and dispose of the equipment and other property of KMC Data or KMC Data's Guest(s), in any commercially reasonable manner that BellSouth deems fit, at KMC Data's expense and with no liability whatsoever for KMC Data's property or KMC Data's Guest(s)'s property, provided that BellSouth has not granted KMC Data's request for an extension of the Removal Date, and such request shall not unreasonably be denied.
- 4.4.3 Upon termination of KMC Data's right to occupy specific Collocation Space, the Collocation Space will revert back to BellSouth's space inventory, and KMC Data shall surrender the Collocation Space to BellSouth in the same condition as when it was first occupied by KMC Data, with the exception of ordinary wear and tear, unless otherwise agreed to by the Parties. KMC Data's BellSouth Certified Supplier shall be responsible for updating and making any necessary changes to BellSouth's records as required by BellSouth's Specifications including, but not limited to, Central Office Record Drawings and ERMA Records. KMC Data shall be responsible for the cost of removing any KMC Data constructed enclosure, together with any supporting structures (e.g., racking, conduits or power cables), at the termination of occupancy and restoring grounds to their original condition.

## **5. Use of Collocation Space**

- 5.1 Equipment Type. BellSouth shall permit the collocation and use of any equipment necessary for interconnection or access to unbundled network elements, in accordance with the applicable FCC and Commission rules and orders. Equipment is necessary for interconnection if an inability to deploy that equipment would, as practical, economic, or operational matter, preclude the requesting carrier from obtaining interconnection with BellSouth at a level equal in quality to that which BellSouth obtains within its own network or what BellSouth provides to any Affiliate, subsidiary, or other party.
- 5.2 Equipment is necessary for access to an unbundled network element if an inability to deploy that equipment would, as a practical, economic, or operational matter, preclude the requesting carrier from obtaining nondiscriminatory access to that unbundled network element, including any of its features, functions, or capabilities.
- 5.3 Multi-functional equipment shall be deemed necessary for interconnection or access to an unbundled network element if and only if the primary purpose and function of the

equipment, as the requesting carrier seeks to deploy it, meets either or both of the standards set forth above in Sections 5.1 and 5.2 above. For a piece of equipment to be utilized primarily to obtain equal in quality interconnection or nondiscriminatory access to one or more unbundled network elements, there also must be a logical nexus between the additional functions the equipment would perform and the telecommunication services KMC Data seeks to provide to its customers by means of the interconnection or unbundled network element. The collocation of those functions of the equipment that, as stand-alone functions, do not meet either of the standards set forth above in Sections 5.1 and 5.2 above must not cause the equipment to significantly increase the burden on BellSouth's property. Such equipment necessary for interconnection or access to unbundled network elements shall include, but is not limited to transmission equipment, equipment to light dark fiber, optical terminating equipment and multiplexers, digital subscriber line access multiplexers, routers, asynchronous transfer mode multiplexers, multifunction equipment, remote switching modules, fiber distribution frames, splitters, concentrators, cross-connect systems, switching equipment other than traditional circuit switches, and ancillary equipment that enables a requesting carrier to assure proper provisioning and functioning of other collocated equipment. Subject to the provisions of this Section, KMC Data may order BellSouth tariffed services that connect to such equipment in its Collocation Space.

- 5.3.1 Examples of equipment that would not be considered necessary include, but are not limited to: traditional circuit switching equipment, equipment used exclusively for call related databases, computer servers used exclusively for providing information services, operations support system (OSS) equipment used to support collocated telecommunications carrier network operations, equipment that generates customer orders, manages trouble tickets or inventory, or stores customer records in centralized databases, etc. BellSouth will determine upon receipt of an application if the requested equipment is necessary based on the criteria established by the FCC. Multifunctional equipment placed on Premises must not place any greater relative burden on BellSouth's property than comparable single function equipment. BellSouth may object to the collocation of equipment based on criteria and in accordance with procedures and limitations established by applicable FCC and Commission rules and orders. With the exception of the equipment set forth in this Section 5.3.1, BellSouth may not block collocation and use of equipment while a proceeding to determine whether BellSouth may block such placement is pending. If BellSouth prevails in such a proceeding, KMC Data will remove such equipment from the collocation, within thirty (30) days of receipt of a written request to do so from BellSouth, or as otherwise set forth in the relevant Commission order.

- 5.4 Whenever BellSouth objects to collocation of equipment by KMC Data for purposes within the scope of Section 251(c)(6) of the Act, BellSouth shall prove to the state commission that the equipment is not necessary for interconnection or access to unbundled network elements under the standards set forth above in this Section. BellSouth may not object to the collocation of equipment on the grounds that the equipment does not comply with safety or engineering standards that are more stringent than the safety or engineering standards that BellSouth applies to its own

- equipment. BellSouth may not object to the collocation of equipment on the ground that the equipment fails to comply with Network Equipment and Building Specifications performance standards or any other performance standards. Collocated equipment must comply with the following Telcordia Network Equipment Building Systems (NEBS) General Equipment Requirements: Criteria Level 1 requirements as outlined in Telcordia Special Report SR-3580, Issue 1. If BellSouth denies collocation of KMC Data's equipment, citing safety standards, BellSouth must provide to KMC Data within five (5) business days of the denial a list of all equipment that BellSouth locates at the Premises in question, together with an affidavit attesting that all of the equipment meets or exceeds the safety standard that BellSouth contends the competitor's equipment fails to meet. This affidavit must set forth in detail: the exact safety requirement that KMC Data's equipment does not satisfy; BellSouth's basis for concluding that KMC Data's equipment does not meet this safety requirement; and BellSouth's basis for concluding why collocation of equipment not meeting this safety requirement would compromise network safety. BellSouth reserves the right to permit on a nondiscriminatory basis collocation of equipment that does not necessarily comport with the requirements of applicable FCC and Commission rules and orders.
- 5.5 All KMC Data Remote Site equipment installation shall comply with BellSouth TR 73503-11h, "Grounding – Engineering Procedures". Metallic cable sheaths and metallic strength members of optical fiber cables as well as the metallic cable sheaths of all copper conductor cables shall be bonded to the designated grounding bus for the Remote Site Location. All copper conducted pairs, working and non-working, shall be equipped with a solid-state protector unit (over-voltage protection only), which has been listed by a nationally recognized testing laboratory and located within KMC Data's Remote Site Collocation Space.
- 5.6 Terminations. KMC Data shall not request more DS0, DS1, DS3 and optical terminations for a collocation arrangement than the total port or termination capacity of the equipment (including, but not limited to, transmission equipment, multiplexers, DSLAMS, DLC's, signal regenerators, cross connect panels) physically installed in the arrangement. The total capacity of the equipment collocated in the arrangement will include equipment contained in the application in question as well as the transmission equipment already placed in an arrangement. If full network termination capacity of the equipment being installed is not requested in the application, additional network terminations for the installed equipment will require the submission of another application. In the event that KMC Data submits an application for terminations that exceed the total capacity of the collocated equipment, KMC Data will be informed of the discrepancy and will be required to submit a revision to the application. Billing for terminations begin when services are ordered to those terminations via an ASR or a LSR.
- 5.7 KMC Data will provide a list of those entities with a security interest in collocation equipment in KMC Data's collocation sites to BellSouth. This list will be updated by KMC Data once annually. This information shall be expressly covered by the confidentiality provisions contained in Section 12 of the General Terms and Conditions

- of this Agreement. In no event shall BellSouth use the list of entities for any purpose other than contacting equipment owners or lien holders subsequent to abandonment of such equipment by KMC Data.
- 5.8 No Marketing. KMC Data shall not use the Collocation Space for marketing purposes, nor shall it place any marketing materials outside the Collocation Space or on the grounds of the Premises.
- 5.9 Collocation Space/Equipment Identification. KMC Data shall place a plaque on or affix other identification (e.g., stenciling) to KMC Data's equipment, in order for BellSouth to identify KMC Data's equipment, including a list of emergency contacts with telephone numbers. For caged collocation the identification may be placed on a plaque affixed outside of the caged enclosure. All equipment must be identified for cageless collocation.
- 5.10 Entrance Facilities. KMC Data may elect to place KMC Data-owned or KMC Data-leased (from BellSouth or a third party provider) fiber entrance facilities into its Collocation Space. BellSouth will designate the point of interconnection as close as reasonably possible to the Premises building housing the Collocation Space, such as at an entrance manhole or a cable vault, which are physically accessible by both Parties. KMC Data will provide and place fiber cable at the point of entrance (in the entrance manhole) of sufficient length to be pulled through conduit and into the splice location. KMC Data will provide and place copper or fiber cable through conduit from the Remote Site Collocation Space to the feeder distribution interface to the splice location of sufficient length for splicing by BellSouth. In Central Offices, KMC Data will provide and install a sufficient length of fire retardant riser cable, to which the entrance cable will be spliced by BellSouth. The fire retardant riser cable will extend from the splice location to KMC Data's equipment in the Collocation Space. In the event KMC Data utilizes a non-metallic, riser-type entrance facility, a splice will not be required. KMC Data must contact BellSouth for instructions prior to placing any entrance facility cable in the manhole. KMC Data is responsible for maintenance of the entrance facilities.
- 5.10.1 Central Office - Microwave Entrance Facilities. At KMC Data's option, BellSouth will accommodate, where technically feasible, a microwave entrance facility, pursuant to separately negotiated terms and conditions.
- 5.10.2 Central Office -Copper and Coaxial Cable Entrance Facilities. BellSouth shall permit KMC Data to use copper or coaxial cable entrance facilities, if approved by the Commission. Notwithstanding the foregoing, in the case of adjacent collocation, copper facilities may be used between the adjacent collocation arrangement and the central office demarcation point unless BellSouth determines that limited space is available for the placement of entrance facilities.
- 5.11 Dual Entrance Facilities. BellSouth will provide at least two (2) interconnection points at each Premise where at least two such interconnection points are available and

- capacity exists. Upon receipt of a request by KMC Data for dual entrance facilities to its physical Collocation Space, BellSouth shall provide KMC Data with information regarding BellSouth's capacity to accommodate the requested dual entrance facilities. If conduit in the serving manhole(s) is available and is not reserved for another purpose or for utilization within twelve (12) months of the receipt of an application for collocation, BellSouth will make the requested conduit space available for installing a second entrance facility to KMC Data's arrangement. The location of the serving manhole(s) will be as close as reasonably possible to the Premises housing the Collocation Space, but determined by BellSouth on a reasonable and nondiscriminatory basis. Where dual entrance facilities are not available due to lack of capacity, BellSouth will provide this information to KMC Data in the Application Response. BellSouth shall not deny an Application for the sole reason that dual entrance facilities are not available.
- 5.12 Shared Use. KMC Data may utilize spare capacity on an existing interconnector's entrance facility for the purpose of providing an entrance facility to KMC Data's collocation arrangement within the same Premises.
- 5.12.1 In a Central Office, BellSouth shall allow the splice, as long as the fiber is non-working dark fiber. KMC Data must arrange with BellSouth in accordance with all reasonable and nondiscriminatory requirements set forth in BellSouth's Special Construction Procedures, RL93-11-030BT, and provide a LOA from the other telecommunications carrier for BellSouth to perform the splice of the KMC Data provided riser cable to the spare capacity on the entrance facility. If KMC Data desires to allow another telecommunications carrier to use its entrance facilities, that telecommunications carrier must arrange with BellSouth in accordance with all reasonable and nondiscriminatory requirements set forth in BellSouth's Special Construction Procedures, RL93-11-030BT, and provide a LOA from KMC Data for BellSouth to perform the splice of that telecommunications carrier's provided riser cable to the spare capacity on KMC Data's entrance facility.
- 5.12.2 For a Remote Site, the Parties will negotiate the rates, terms and conditions based upon the technical feasibility and physical capacity at the time of a request from KMC Data.
- 5.13 Central Office Demarcation Point. BellSouth, in a reasonable and nondiscriminatory manner and in accordance with any and all applicable FCC and Commission rules and orders, will designate the point(s) of demarcation between KMC Data's equipment and/or network and BellSouth's network. Each Party will be responsible for the installation, maintenance and operation of all equipment/facilities on its side of the demarcation point and may make any terminations that may be required on their side of the demarcation point and may self-provision cross connects within the Collocation Space that may be required to activate service requests. KMC Data shall have access to the demarcation point and all equipment and facilities on its side of the demarcation point. KMC Data shall not have access to BellSouth's side of the demarcation point. When troubles cannot be clearly isolated to BellSouth's facilities and equipment,

BellSouth will agree to test cooperatively with KMC Data to assist in trouble isolation to a specific Party's facilities and equipment as set forth in Section 2.3.13 of BellSouth's FCC Tariff No. 1. If KMC Data performs testing of its facilities and submits a trouble ticket to BellSouth indicating a trouble exists on BellSouth's side of the demarcation, then BellSouth will perform the required testing on its side of the demarcation point to isolate the trouble reported by KMC Data. If BellSouth does find that a trouble exists on its side of the demarcation point after it has performed the required testing of its facilities, then BellSouth will take the necessary action to repair its facilities to eliminate the trouble and KMC Data will not be charged for submission of the trouble ticket. If BellSouth cannot locate any trouble on its side of the demarcation point, then BellSouth will assess KMC Data the applicable Maintenance of Services charge as set forth in Section 13.3.1 of BellSouth's FCC Tariff No. 1, based on the amount of time, in half-hour increments, it takes a BellSouth technician to complete the appropriate testing. If, within thirty (30) days of BellSouth's billing of the Maintenance of Services charge, KMC Data performs its testing of the same facilities and finds that the trouble has not been eliminated and does not reside on KMC Data's side of the demarcation point, then the KMC Data shall submit a second trouble ticket to BellSouth. If, after testing has been performed by BellSouth, the trouble is actually determined to be on BellSouth's side of the demarcation point, BellSouth will not charge KMC Data for the submission of the trouble ticket. BellSouth shall also credit KMC Data's account for the amount of the original Maintenance of Service charge on this same facility, within the next billing cycle. For 2-wire and 4-wire connections to BellSouth's network, the demarcation point shall be a common block on the BellSouth designated conventional distributing frame (CDF). KMC Data shall be responsible for providing, and KMC's BellSouth Certified Supplier shall be responsible for installing and properly labeling/stenciling, the common, and necessary cabling pursuant to Section 7 below. For DS1 and DS3 connections, the demarcation point shall be a BellSouth provided DSX panel, or elsewhere if mutually agreed. For fiber connections, the demarcation point shall be a BellSouth provided LGX panel, or elsewhere if mutually agreed. For DS0 connections, the demarcation point shall be a BellSouth designated distributing frame. BellSouth shall not require KMC to use an intermediate interconnection arrangement in lieu of a direct connection to BellSouth's network if technically feasible.

- 5.13.1 Existing point(s) of demarcation – KMC Data provided POT Bay. BellSouth will grandfather existing point(s) of demarcation established at a KMC Data provided POT Bay. KMC Data shall order services using the existing remaining terminations in the POT bay.
- 5.13.2 Existing point(s) of demarcation – BellSouth provided POT Bay. BellSouth will grandfather existing point(s) of demarcation established at a BellSouth provided POT Bay. KMC Data shall order services using the existing remaining cabling and terminations in the POT Bay.

- 5.13.3 Irrespective of where the demarcation point in a central office is located, BellSouth shall provide KMC Data with access to the KMC Data's side of the demarcation point pursuant to this Section.
- 5.14 Remote Site Point of Demarcation. The point of demarcation will be as follows for each service level: DS-0 services will be the feeder distribution interface. DS1 services will be at the designated BellSouth DS1 cross-connect panel. DS3 services will be at the designated BellSouth DS3 cross-connect panel. Dark fiber services will be at the designated BellSouth LGX panel.
- 5.15 KMC Data's Equipment and Facilities. KMC Data, or if required by this Attachment, KMC Data's BellSouth Certified Supplier, is solely responsible for the design, engineering, installation, testing, provisioning, performance, monitoring, maintenance and repair of the equipment and facilities used by KMC Data and collocated in the Collocation Space or elsewhere in the Premises. Such equipment and facilities may include, but are not limited to, cable(s), equipment, and point of termination connections. KMC Data need not use a BellSouth Certified Supplier to monitor, maintain or repair its own equipment and facilities.
- 5.16 BellSouth's Access to Enclosed Collocation Space. Except in the case of an emergency, BellSouth will not access KMC Data's locked enclosure prior to notifying KMC Data at least seventy-two (72) hours or three (3) business days, whichever is greater, before access to the Collocation Space is required. BellSouth retains the right to access KMC Data's space for the purpose of making BellSouth equipment or cabling and building modifications (e.g., altering or removing racking, ducts, electrical wiring, HVAC, and cabling). KMC Data may elect to be present whenever BellSouth performs work in the Collocation Space. The Parties agree that KMC Data will not bear any of the expense associated with this type of work. BellSouth, its employees, vendors and agents, will comply at all times with its own security and safety procedures and requirements, while in KMC Data's space.
- 5.16.1 In cases of emergency, BellSouth will provide oral notice of entry as soon as possible (such oral notice most likely will be after entry) and, upon request, will provide subsequent written notice containing the time of entry, cause for emergency, and a listing of personnel allowed to enter the space during said emergency.
- 5.17 KMC Data must provide the local BellSouth Central Office building contact with two Access Keys that will allow BellSouth entry into enclosed and locked Collocation Space, including but not limited to, Adjacent Arrangements, pursuant to this Section. Access Keys may not be duplicated under any circumstances. BellSouth agrees to be responsible for all Access Keys and for the return of all Access Keys after the contractual obligation with KMC Data ends, upon the termination of this Attachment, or upon the termination of occupancy of an individual collocation arrangement.
- 5.18 Subject to the Limitation of Liability Section in the General Terms and Conditions of this Agreement, BellSouth shall be liable for the negligent actions of its employees or agents and for any damage caused to KMC Data's equipment, facilities or Collocation

- Space while in KMC Data's Collocation Space and shall indemnify and hold harmless KMC Data from any claim, liability or damages that may result from such entry into KMC Data's Collocation Space by BellSouth, its agents, contractors or employees.
- 5.19 KMC Data's Access. KMC Data shall have access to its Collocation Space or Remote Site Collocation Space twenty-four (24) hours a day, seven (7) days a week. Such access will be unescorted, provided KMC Data complies with the requirements set forth in Section 13 below. KMC Data agrees to provide the name and social security number, date of birth, or driver's license number of each employee, supplier, or agent of KMC Data or KMC Data's Guests that will be provided with access keys or cards (Access Keys) prior to the issuance of said Access Keys, using form RF-2906-C, the "CLEC and CLEC Certified Supplier Access Request and Acknowledgement" form. When distributing access keys or cards, BellSouth shall provide receipt acknowledgement forms, the "Collocation Acknowledgement Sheet" for access cards and the "Key Acknowledgement Form" for keys to KMC Data. These receipt acknowledgement forms must be signed by KMC Data and returned to BellSouth Access Management within fifteen (15) days of KMC Data's receipt of keys or cards. Failure to return these properly acknowledged forms will result in the holding of subsequent access key or card requests until the proper acknowledgement documents have been received by BellSouth. Access Keys may not be duplicated under any circumstances. KMC Data agrees to be responsible for all Access Keys and for the return of all Access Keys in the possession of KMC Data's employees, suppliers, Guests, or agents after termination of the employment relationship, the contractual obligation with KMC Data ends, upon the termination of this Attachment, or upon the termination of occupancy of an individual collocation arrangement. The BellSouth Access Customer Advocacy Center (ACAC) emergency access contact numbers will be provided to KMC Data for access related issues.
- 5.19.1 BellSouth will permit one accompanied site visit to KMC Data's designated collocation arrangement location, after receipt of the BFFO without charge to KMC Data. KMC Data must submit to BellSouth the completed Access Control Request Form for all employees or agents requiring access to the Premises within a minimum of thirty (30) days prior to the date KMC Data desires access to the Collocation Space or Remote Collocation Space. KMC Data may submit a request for its one accompanied site visit to its designated collocation arrangement location at any time subsequent to BellSouth's receipt of the BFFO. BellSouth shall respond to such request within five (5) business days, and shall use best efforts to facilitate the visit on the date requested by KMC Data. In the event KMC Data desires access to the Collocation Space or Remote Collocation Space after submitting such a request, but prior to the approval of its access request, in addition to the first accompanied free visit, BellSouth shall permit KMC Data to access the Collocation Space or Remote Collocation Space, prior to completing BellSouth's Training requirements (as set forth in Section 13 below), accompanied by a security escort, at KMC Data's expense. KMC Data must request escorted access to its designated collocation arrangement location at least three (3) business days prior to the date such access is desired. A security escort will be

- required whenever KMC Data or its approved agent desires access to the entrance manhole.
- 5.19.2 Lost or Stolen Access Keys. The Parties shall immediately notify each other in writing in the case of lost or stolen Access Keys. If it becomes necessary for BellSouth to re-key buildings or enclosures or deactivate a card as a result of a lost Access Key(s) or for failure to return an Access Key(s), KMC Data shall pay for the costs of re-keying or deactivating the card as set forth in the rates in Exhibit B. If it becomes necessary for KMC Data to re-key an enclosure due to BellSouth losing a key or if a key becomes stolen while in the possession of BellSouth, BellSouth will pay KMC Data the applicable costs, as supported by documentation, to re-key an enclosure or replace lost or stolen keys that KMC Data has previously provided to BellSouth.
- 5.20 Health Related Facilities and Parking. KMC Data authorized personnel will have reasonable access to health related facilities (e.g., bathrooms, eyewash stations, shower stations, drinking water, etc. within the Premises), as well as to available parking.
- 5.21 Interference or Impairment. For purposes of this Section, the term “significantly degrades” shall be defined as an action that noticeably impairs a service from a user’s perspective.
- 5.21.1 Interference or Impairment. Notwithstanding any other provisions of this Attachment, KMC Data shall not use any product or service provided under this Agreement, any other service related thereto or used in combination therewith, or place or use any equipment or facilities in any manner that 1) significantly degrades, or significantly impairs from the service provider’s perspective, a traditional voice band service or advanced service provided by BellSouth, or by any other entity whose service enters, is routed through or exits that Central Office; 2) endangers or damages the equipment, facilities or any other property of BellSouth or of any other entity located in the central office or on the Premises in which the Central Office is located; 3) knowingly or unlawfully compromises the privacy of any communications routed through the Premises; or 4) creates an unreasonable risk of injury or death to any individual or to the public. If BellSouth reasonably determines that any equipment or facilities of KMC Data violates the provisions of this paragraph, BellSouth shall provide written notice to KMC Data, which shall direct KMC Data to cure the violation within forty-eight (48) hours of KMC Data’s actual receipt of written notice or, if such cure is not feasible, at a minimum, to commence curative measures within twenty-four (24) hours and to exercise reasonable diligence to complete such measures as soon as possible thereafter. After receipt of the notice, the Parties agree to consult immediately and, if necessary, to conduct an inspection of the arrangement. The Parties will act in good faith and in a cooperative manner to determine or isolate the source of significant degradation. Any dispute regarding the source of the risk, impairment, interference, or degradation may be resolved pursuant to the dispute resolution provisions set forth in the General Terms and Conditions of this Agreement.

- 5.21.2 Except in the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services, if KMC Data fails to commence curative action within twenty-four (24) hours and exercise commercially reasonable efforts to complete such action as soon as possible or if the violation is of a character that poses an immediate and substantial threat of physical damage to property or injury or death to any person, then and only in that event, BellSouth may take such action as it deems necessary to eliminate such threat, including, without limitation, the interruption of electrical power to KMC Data's equipment which BellSouth has determined beyond a reasonable doubt is the cause of such threat. In the case of KMC Data not taking action within twenty-four (24) hours and exercising commercially reasonable efforts to complete such action as soon as possible, BellSouth will provide notice to KMC Data prior to, or, if made impossible due to the nature of the threat imposed, as soon as possible after the taking of such action and provided that BellSouth, its agents, contractors or employees conduct themselves in strict compliance with this Section and except to the extent that such action by BellSouth fails to comport with the requirements of this paragraph or otherwise constitutes negligence, gross negligence or willful misconduct, BellSouth shall have no liability to KMC Data for any damages arising from such action. If BellSouth's right to take action pursuant to this Section results solely from KMC Data's failure to take curative action or to exercise commercially reasonable efforts to complete such action as soon as possible, BellSouth shall provide notice prior to taking action under this Section. Any disputes with respect to BellSouth's right to take such action under this Section 5.21.2 shall be resolved pursuant to the dispute resolution provisions set forth in the General Terms and Conditions of this Agreement.
- 5.21.3 In the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services and KMC Data fails to take curative action within forty-eight (48) hours, then BellSouth will establish before the Commission that the technology deployment is causing the significant degradation. Any claims of network harm presented to KMC Data or, if subsequently necessary, the Commission must be supported by BellSouth with specific and verifiable information. When BellSouth demonstrates that a certain technology deployed by KMC Data is significantly degrading the performance of other advanced services or traditional voice band services, KMC Data shall discontinue deployment of that technology and migrate its customers to technologies that will not significantly degrade the performance of other such services. Where the only degraded service itself is a known disturber, and the newly deployed technology satisfies at least one of the criteria for a presumption that it is acceptable for deployment under applicable FCC and Commission rules and orders, the degraded service shall not prevail against the newly deployed technology.
- 5.22 Central Office Personalty and its Removal. Subject to requirements of this Attachment, KMC Data may place or install in or on the Central Office Collocation Space such facilities and equipment, including storage for and spare equipment, as it deems desirable for the conduct of business, provided that such equipment is telecommunications equipment, or is desirable for the maintenance and operation of

- the collocated telecommunications equipment, and does not violate floor loading requirements, imposes or could impose or contains or could contain environmental conditions or hazards. Personal property, facilities and equipment placed by KMC Data in the Collocation Space shall not become a part of the Collocation Space, even if nailed, screwed or otherwise fastened to the Collocation Space, but shall retain its status as personalty and may be removed by KMC Data at any time. Any damage caused to the Collocation Space by KMC Data's employees, suppliers, agents or representatives during the removal of such property shall be promptly repaired by KMC Data's expense.
- 5.23 Alterations. Under no condition shall KMC Data or any person acting on behalf of KMC Data make any rearrangement, modification, augment, improvement, addition, and/or other alteration which could affect in any way space, power, HVAC, and/or safety considerations to the Collocation Space or the Premises, hereinafter referred to individually or collectively as "Alterations", without the express written consent of BellSouth, which shall not be unreasonably withheld. The cost of any such Alteration shall be paid by KMC Data. Any such Alteration shall require a Subsequent Application and will result in the assessment of a Remote Site Application Fee, a Subsequent Application Fee, an Administrative Only Application Fee or an Initial Application Fee as set forth in Section 6.2.1 below, and, which will be billed by BellSouth on the date that BellSouth provides KMC Data with an Application Response.
- 5.24 Janitorial Service. KMC Data shall be responsible for the general upkeep of its Collocation Space. KMC Data shall arrange directly with a BellSouth Certified Supplier for janitorial services applicable to Caged Collocation Space. BellSouth shall provide a list of such suppliers on a site-specific basis, upon request.
- 6. Ordering and Preparation of Central Office and Remote Site Collocation Space**
- 6.1 Initial Application. For KMC Data or KMC Data's Guest(s) initial equipment placement, KMC Data shall submit to BellSouth a Physical Expanded Interconnection Application Document (Initial Application). The Initial Application is considered Bona Fide when it is complete and accurate, meaning that all of the required fields on the application are completed with the appropriate type of information
- 6.1.1 Initial Application Fee. An Application Fee, as set forth in Exhibit B, will apply to each Initial Application submitted by KMC Data, and will be billed by BellSouth on the date that BellSouth provides KMC Data with an Application Response.
- 6.2 Subsequent Application. In the event KMC Data or KMC Data's Guest(s) desires to modify the Collocation Space after a BFFO, KMC Data shall complete an application that contains all of the detailed information associated with an Alteration to the Collocation Space, as defined in Section 5.23 above ("Subsequent Application"). The Subsequent Application is considered Bona Fide when it is complete and accurate, meaning that all of the required fields on the Subsequent Application are completed

- with the appropriate type of information associated with the Alteration. BellSouth shall determine what modifications, if any, to the Premises are necessary to accommodate the change requested by KMC Data in the application. Such modifications to the Premises may include, but are not limited to: floor loading changes, changes necessary to meet HVAC requirements, changes to power plant requirements, equipment additions, etc.
- 6.2.1 Subsequent Application Fee. The application fee paid by KMC Data for its request for an Alteration shall be dependent upon the level of assessment needed for the Alteration requested. Where the Subsequent Application does not require assessment for provisioning or construction work but requires administrative costs by BellSouth, an Administrative Only Application Fee will be required as set forth in Exhibit B. This Administrative Only Application Fee will be applicable in instances such as Transfer of Ownership of the Collocation Space, Removal of Equipment from the Collocation Space, where the removal requires no physical work to be done by BellSouth, modification to an application prior to BFFO and V-to-P Conversion (In Place). The fee for a Subsequent Application where the Alteration requested has limited effect (e.g., requires limited assessment but no capital expenditure by BellSouth as sufficient cable support structure, HVAC, power and terminations are available) shall be the Subsequent Application Fee as set forth in Exhibit B. If the modification requires capital expenditure, an Initial Application Fee shall apply. This nonrecurring fee will be billed on the date that BellSouth provides KMC Data with an Application Response.
- 6.3 Remote Site Application. When KMC Data or KMC Data's Guest(s) desires to install a bay/rack in a Remote Site Location, KMC Data shall submit to BellSouth a Physical Expanded Interconnection Application Document (Remote Site Application). The Remote Site Application is Bona Fide when it is completed and accurate, meaning that all required fields on the Remote Site Application are completed with the appropriate type of information. An application fee, as set forth in Exhibit B, will apply which will be billed on the date that BellSouth provides an Application Response. The placement of an additional bay/rack at a later date will be treated in the same fashion and a Remote Site Application will be required. The installation of additional shelves/equipment, subject to the restrictions contained in Section 3.8 above, within an existing bay or rack does not require a Remote Site Application.
- 6.3.1 Availability of Space. Upon submission of an application, BellSouth will permit KMC Data to physically collocate in any available full bay/rack of space, pursuant to the terms of this Attachment, at any BellSouth Remote Site Location, unless BellSouth has determined that there is no full bay/rack of space available due to space limitations after BellSouth has conducted a review of all space within the Remote Site Location or that collocation at the Remote Site Location is not practical for technical reasons. In the event space is not immediately available at a Remote Site Location, BellSouth reserves the right to make additional space available, in which case the conditions in Section 7 below shall apply, or BellSouth may elect to deny space in accordance with this Section in which case virtual or adjacent collocation options may be available. If

- the amount of space requested is not available, BellSouth will notify KMC Data of the amount that is available.
- 6.4 Space Preferences. If KMC Data has previously requested and received a Space Availability Report for the Premises, KMC Data may submit up to three (3) space preferences on its application by identifying the specific space identification numbers referenced on the Space Availability Report for the space it is requesting. In the event BellSouth cannot accommodate the KMC Data's preference(s), KMC Data may accept the space allocated by BellSouth or cancel its application, (without incurring an application fee), and submit another application requesting additional space preferences for the same central office. This application will be treated as a new application and an application fee will be billed by BellSouth on the date that BellSouth provides KMC Data with an Application Response.
- 6.5 Space Availability Notification.
- 6.5.1 Unless otherwise specified, BellSouth will respond to an application within ten (10) days as to whether space is available or not available within a requested Premises. BellSouth's electronic application system will indicate when the application is Bona Fide. If the application cannot be Bona Fide, BellSouth will describe the items necessary to cause the application to become Bona Fide. If the amount of space requested is not available, BellSouth will notify KMC Data of the amount of space that is available and no application fee will apply. When BellSouth's response includes an amount of space less than that requested by KMC Data or space that is configured differently, no application fee will apply. If KMC Data decides to accept the available space, KMC Data must resubmit its application to reflect the actual space available, including the configuration of the space. When KMC Data resubmits its application, BellSouth will bill KMC Data the appropriate application fee.
- 6.5.2 BellSouth will respond to a Florida and Tennessee application within fifteen (15) days as to whether space is available or not available within a Premises. BellSouth's electronic application system will indicate when the application is Bona Fide. If the application cannot be Bona Fide, BellSouth will describe the items necessary to cause the application to become Bona Fide. If the amount of space requested is not available, BellSouth will notify KMC Data of the amount of space that is available or space that may be configured differently and no application fee will apply. If KMC Data decides to accept the available space, KMC Data must amend its application to reflect the actual space available, including the configuration of the space, prior to submitting a BFFO.
- 6.5.3 Denial of Application. If BellSouth notifies KMC Data that no space is available ("Denial of Application"), BellSouth will not assess an application fee to KMC Data. After providing written notice to KMC Data that BellSouth has no available space in the requested Premises, BellSouth will allow KMC Data, upon request, to tour the entire Premises within ten (10) days of such Denial of Application, or as otherwise

- agreed to by the Parties. In order to schedule this tour, the request for the tour of the Premises must be received by BellSouth at least five (5) days prior to the tour date.
- 6.5.4 BellSouth's written notice of denial shall provide KMC Data with information relevant to the denial of its request for collocation space, and give some detail as to why the space was denied.
- 6.5.5 Expedited Removal of Equipment in a Space Exhaust Scenario. BellSouth shall remove obsolete unused equipment from its Premises prior to denying a request for collocation on the grounds of space limitations, unless BellSouth proves to the Commission that collocation at the point is not technically feasible.
- 6.5.6 BellSouth will provide virtual collocation in accordance with applicable FCC and Commission rules and orders.
- 6.5.7 Filing of Petition for Waiver. Upon Denial of Application, BellSouth will timely file a petition with the Commission pursuant to 47 U.S.C. § 251(c)(6). BellSouth shall provide to the Commission any information required or requested by that Commission. Such information shall include which space, if any BellSouth or any of BellSouth's affiliates have reserved for future use and a detailed description of the specific future uses for which the space has been reserved. Subject to an appropriate nondisclosure agreement or provision, BellSouth shall permit KMC Data to inspect any floor plans or diagrams that BellSouth provides to the Commission.
- 6.6 Waiting List. On a first-come, first-served basis, governed by the date of receipt of an application or Letter of Intent, BellSouth will maintain a waiting list of requesting carriers who have either received a Denial of Application or, where it is publicly known that the Premises is out of space, have submitted a Letter of Intent to collocate in that Premises. BellSouth will notify the requesting carriers on the waiting list by mail when space becomes available, according to the position of each requesting carrier on said waiting list.
- 6.6.1 In Florida, on a first come, first served basis, governed by the date of the receipt of an application or Letter of Intent, BellSouth will maintain a waiting list of requesting carriers who have either received a Denial of Application or, where it is publicly known that the Premises is out of space, have submitted a Letter of Intent to collocate in that Premises. Sixty (60) days prior to space becoming available, if known, BellSouth will notify the Commission and the telecommunications carriers on the waiting list by mail when space becomes available according to the position of each telecommunications carrier on said waiting list. If BellSouth does not know sixty (60) days in advance of when space will become available, BellSouth will notify the Commission and the telecommunications carriers on the waiting list within two (2) business days of the determination that space is available. A telecommunications carrier that, upon denial of physical collocation, requests virtual collocation shall be automatically placed on the waiting list.

- 6.7 When space becomes available, KMC Data must submit an updated, complete, and correct application to BellSouth within thirty (30) days of notification by BellSouth that space will be available in the Premises previously out of space. If KMC Data has originally requested caged Collocation Space and cageless Collocation Space becomes available, KMC Data may refuse such space and notify BellSouth in writing within the thirty (30) day timeframe that KMC Data wants to maintain its place on the waiting list, without accepting the available cageless Collocation Space. KMC Data may accept an amount of space less than its originally requested space by submitting an application as set forth above, and upon request, may maintain its position on the waiting list for the remaining space that was initially requested. If KMC Data does not submit an application or notify BellSouth in writing as described above, BellSouth will offer the space to the next telecommunications carrier on the waiting list and remove KMC Data from the waiting list. Upon request, BellSouth will advise KMC Data as to its position on the waiting list.
- 6.8 Public Notification. BellSouth will maintain on its Interconnection Services website a notification document that will indicate all Premises that are without available space. BellSouth shall update such document within ten (10) days of the date that BellSouth becomes aware that insufficient space is available to accommodate physical collocation. BellSouth will also post a document on its Interconnection Services website that contains a general notice when space has become available in a Premises previously on the space exhaust list.
- 6.9 Application Response.
- 6.9.1 In Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, and South Carolina, when space has been determined to be available for caged or cageless arrangements, BellSouth will provide an Application Response within twenty (20) days of receipt of a Bona Fide application for physical collocation and ten (10) days for virtual collocation. The Central Office Application Response will include sufficient information to enable KMC Data to place a Firm Order, which, at a minimum, will consist of the configuration of the space, the Cable Installation Fee, Cable Records Fee, and any other applicable space preparation fees, as described in Section 8 below.
- 6.9.1.1 BellSouth will provide the Remote Site Application Response in Alabama, Georgia, Kentucky, Mississippi, North Carolina, and South Carolina, when space has been determined to be available, within twenty (20) days of receipt of a Bona Fide application. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below.
- 6.9.1.2 BellSouth will provide the Remote Site Application Response in Louisiana, when space has been determined to be available, within thirty (30) days for one (1) to ten (10) applications; thirty-five (35) days for eleven (11) to twenty (20) applications; and for requests of more than twenty (20) applications, the Application Response interval will be increased by five (5) days for every five (5) applications received within five (5)

- business days. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below.
- 6.9.2 In Florida and Tennessee, within fifteen (15) days of receipt of a Bona Fide application, when space has been determined to be available or when a lesser amount of space than that requested is available, then with respect to the space available, BellSouth will provide an Application Response including sufficient information to enable KMC Data to place a Firm Order. The Central Office Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below. When KMC Data submits ten (10) or more applications within ten (10) days, the initial fifteen (15) day response interval will increase by ten (10) days for every additional ten (10) applications or fraction thereof.
- 6.9.2.1 BellSouth will provide the Remote Site Application Response in Florida, within fifteen (15) days of receipt of a Bona Fide application, when space has been determined to be available or when a lesser amount of space than that requested is available, then with respect to the space available, BellSouth will provide an Application Response including sufficient information to enable KMC Data to place a Firm Order. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below. When KMC Data submits ten (10) or more applications within ten (10) days, the initial fifteen (15) day response period will increase by ten (10) days for every additional ten (10) applications or fraction thereof.
- 6.9.2.2 BellSouth will provide the Remote Site Application Response in Tennessee, when space has been determined to be available, within twenty (20) days of receipt of a Bona Fide application. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, Cable Records Fee, and the space preparation fees, as described in Section 8 below.
- 6.10 Application Modifications.
- 6.10.1 If a modification or revision is made to any information in the Bona Fide Application prior to a BFFO, with the exception of modifications to Customer Information, Contact Information or Billing Contact Information, at the request of KMC Data, or necessitated by technical considerations agreed to by both Parties, the application shall be considered a new application and handled as a new application with respect to the response and provisioning intervals. BellSouth will charge KMC Data the appropriate application fee associated with the level of assessment performed by BellSouth. If the modification requires no labor or capital expenditure by BellSouth, but BellSouth must perform an assessment of the application to evaluate whether or not BellSouth would be required to perform necessary infrastructure or provisioning activities, then an Administrative Only Application Fee shall apply. The fee for an application modification where the modification requested has limited effect (e.g., requires labor

expenditure but no capital expenditure by BellSouth and where sufficient cable support structure, HVAC, power and terminations are available) shall be the Subsequent Application Fee as set forth in Exhibit B. A modification involving a capital expenditure by BellSouth shall require KMC Data to submit the application with an Initial Application Fee. This nonrecurring fee will be billed by BellSouth on the date that BellSouth provides KMC Data with an Application Response.

6.11 Bona Fide Firm Order.

6.11.1 KMC Data shall indicate its intent to proceed with its request for collocation space in a BellSouth Premises by submitting a Bona Fide Firm Order to BellSouth. The BFFO must be received by BellSouth no later than thirty (30) days after receipt of BellSouth's Application Response to KMC Data's Bona Fide Application or KMC Data's application will expire.

6.11.2 BellSouth will establish a firm order date based upon the date BellSouth is in receipt of KMC Data's BFFO. BellSouth will acknowledge the receipt of KMC Data's BFFO within seven (7) days of receipt, so that KMC Data will have positive confirmation that its BFFO has been received. BellSouth's response to a BFFO will include a Firm Order Confirmation, which contains the firm order date. No revisions can be made to a BFFO.

7. **Construction and Provisioning**

7.1 Construction and Provisioning Intervals.

7.1.1 In Florida and Tennessee, BellSouth will complete construction for physical and Remote Site collocation arrangements as soon as possible within a maximum of ninety (90) days from receipt of a BFFO or as agreed to by the Parties. For Alterations requested to the Collocation Space after initial space completion, BellSouth will complete construction for physical and remote site collocation arrangements as soon as possible within a maximum of forty-five (45) days from receipt of a BFFO or as agreed to by the Parties if no additional space requested. If BellSouth does not believe that construction for physical and remote site collocation will be completed within the relevant timeframe and BellSouth and KMC Data cannot agree upon a completion date, within forty-five (45) days of receipt of the BFFO for an initial request, and within thirty (30) days of receipt of the BFFO for an Alteration, BellSouth may seek an extension from the Commission. For virtual collocation arrangements in Florida and Tennessee, BellSouth will complete construction for initial and Alterations requested to the virtual Collocation Space after initial space completion as soon as possible within a maximum of sixty (60) days.

7.1.2 In Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, and South Carolina, BellSouth will complete construction for caged collocation arrangements

under ordinary conditions as soon as possible within a maximum of ninety (90) days from receipt of a BFFO or as agreed to by the Parties. BellSouth will complete construction for cageless and Remote Site collocation arrangements under ordinary conditions as soon as possible within a maximum of sixty (60) days from receipt of a BFFO and ninety (90) days from receipt of a BFFO for extraordinary conditions, or as agreed to by the Parties. BellSouth will complete construction for virtual collocation arrangements under ordinary conditions as soon as possible within a maximum of fifty (50) days under ordinary conditions from receipt of a BFFO and seventy five (75) days from receipt of a BFFO for extraordinary conditions, or as agreed to by the Parties. Ordinary conditions are defined as space available with only minor changes to support systems required such as, but not limited to, HVAC, cabling and the power plant. Extraordinary conditions shall include, but not be limited to, major BellSouth equipment rearrangements or additions; power plant additions or upgrades; major mechanical additions or upgrades; a major upgrade for ADA compliance; environmental hazard or hazardous materials abatement; and arrangements for which equipment shipping intervals are extraordinary in length. The Parties may mutually agree to renegotiate an alternative provisioning interval or BellSouth may seek a waiver from this interval from the Commission.

- 7.1.3 Records Only Change. When KMC Data adds equipment within initial demand parameters that requires no additional space preparation work on the part of BellSouth, then no additional charges or additional intervals will be imposed by BellSouth.
- 7.1.4 Central Office Augments. In the states of Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, and South Carolina, BellSouth will provide the reduced intervals outlined below to KMC Data, when KMC Data requests a Central Office augment that is identified in Sections 7.1.4.1, 7.1.4.2, 7.1.4.3, 7.1.4.4 and 7.1.4.5 (“Augment”) after the Space Ready Date for existing physical collocation space. The cost of any such Augment shall be paid by KMC Data. Unless otherwise set forth in Section 7.1.4.10 below, any such Augment application will require a Subsequent Application.
- 7.1.4.1 Simple Augments will be completed within twenty (20) days after receipt of the BFFO for an:
- Extension of Existing AC Circuit Capacity within Arrangement Where Sufficient Circuit Capacity is Available
  - Fuse Change and/or Increase or Decrease -48V DC Power from Existing ILEC BDFB
- 7.1.4.2 Minor Augments will be completed within forty-five (45) days after receipt of the BFFO for:
- 168 DS1s Terminations at the ILEC Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)

- 96 DS3s Terminations at the ILEC Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)
- 99 Fiber Terminations at the ILEC Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)
- Maximum of 2000 Service Ready DS0 Terminations at the ILEC Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)

7.1.4.3 Intermediate Augments will be completed within sixty (60) days after receipt of the BFFO for:

- 168 DS1s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure as Required)
- 96 DS3s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure as Required)
- 99 Fiber Terminations (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure as Required)
- 2000 DS0s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure as Required)
- Install Cable Racking or Other Support Structures as Required to Support Co-Carrier Cross Connects (Adequate Floor or Ceiling Structural Capacity Exists and Support/Protection Structure for Fiber Patch Cord is Excluded)

7.1.4.4 Major Augments –Physical Collocation will be completed within ninety (90) days after BFFO and includes all requests for additional physical collocation space (caged or cageless).

7.1.4.5 Major Augments – Virtual Collocation will be completed within seventy-five (75) days after BFFO and includes all requests for additional virtual collocation space

7.1.4.6 If KMC Data submits an Augment application request that includes two Augment items from the same category in Sections 7.1.4.1, 7.1.4.2, and 7.1.4.3 above, the Augment interval associated with the next highest augment category will apply (e.g., if two items from the minor Augment category are requested on the same request, then an interval of sixty (60) days from the receipt of the BFFO would apply, which is the interval associated with the intermediate category).

7.1.4.7 If KMC Data submits an Augment application request that includes three Augment items from the same category in Sections 7.1.4.1, 7.1.4.2, and 7.1.4.3 above, the major Augment interval of ninety (90) days from the receipt of the BFFO would apply (e.g., if three items from the simple augment category are requested on the same request for a physical collocation arrangement, then an interval of ninety (90) days from the receipt of the BFFO would apply, which is the major physical augment interval; likewise if three items from the simple Augment category are requested on the same request for a virtual collocation arrangement, then an interval of seventy-five (75) days from the receipt of the BFFO would apply, which is the major virtual Augment interval.

- 7.1.4.8 If KMC Data submits an Augment application request that includes one Augment item from two separate categories in Sections 7.1.4.1, 7.1.4.2 and 7.1.4.3 above, the Augment interval associated with the higher augment category will apply (e.g., if an item from the minor augment category and an item from the intermediate Augment category are requested on the same request, then an interval of sixty (60) days from the receipt of the BFFO would apply, which is the interval associated with the intermediate Augment category).
- 7.1.4.9 All Augments not expressly included in the Simple, Minor, Intermediate or Major categories as outlined above will be placed into the appropriate category as negotiated by KMC Data and BellSouth. If KMC Data and BellSouth are unable to determine the appropriate category through negotiation, then the appropriate major augment category identified in Sections 7.1.4.4 and 7.1.4.5 above would apply based on whether the Augment request is for KMC Data's physical or virtual collocation arrangement.
- 7.1.4.10 Individual application fees associated with simple, minor and intermediate Augment applications are contained in Exhibit B. The appropriate application fee will be assessed to KMC Data at the time BellSouth provides KMC Data with the Application Response. If KMC Data requests multiple items from different Augment categories BellSouth will bill KMC Data the Augment Application Cost, as identified in Exhibit B, associated with the higher Augment category only. KMC Data will be assessed a Subsequent Application Fee for all Major Augment applications (Major Augments are defined above in Sections 7.1.4.4 and 7.1.4.5 above). The Subsequent Application Fee is also reflected in Exhibit B.
- 7.2 Joint Planning. Unless otherwise agreed to by the Parties, a joint planning meeting or other method of joint planning between BellSouth and KMC Data will commence within a maximum of twenty (20) days from BellSouth's receipt of a BFFO. At such meeting, the Parties will agree to the preliminary design of the Collocation Space and the equipment configuration requirements as reflected in the Application and affirmed in the BFFO. KMC Data Upon mutual agreement and within a mutually agreed upon time frame, the Parties will exchange any additional information requested (including, but not limited to cable type and cable termination specifications, naming convention and requirements, diagrams or drawings depicting the exact path of entrance facilities from the interconnection point to the Collocation Space, power cabling connectivity, feeder and fuse specifications and requirements, BellSouth contacts and escalation procedures, and identification of demarcation points) at the Joint Planning Meeting.
- 7.3 Permits. Each Party or its agent(s) will diligently pursue filing for the permits required for the scope of work to be performed by that Party or its agent(s) within ten (10) days of the completion of the finalized construction design and specifications.
- 7.4 Acceptance Walkthrough. KMC Data will schedule and complete an acceptance walkthrough of each Collocation Space with BellSouth within fifteen (15) days of BellSouth's notification to KMC Data that the Collocation Space is ready for occupancy. In the event KMC Data fails to complete an acceptance walkthrough

- within this fifteen (15) day interval, the Collocation Space shall be deemed accepted by KMC Data provided that BellSouth has complied with all space preparation, provisions of KMC Data's BFFO, and that all required of BellSouth is completed on the Space Ready Date. BellSouth will correct any deviations to KMC Data's original or jointly amended design and/or specification requirements within seven (7) days after the walkthrough, unless the Parties jointly agree upon a different timeframe. At the end of the acceptance walkthrough or after any deviations are corrected, KMC Data will execute a Space Acceptance Form indicating its acceptance of the Collocation Space.
- 7.5 Central Office Circuit Facility Assignments (CFAs). BellSouth will provide CFAs to KMC Data as soon as possible and no later than thirty (30) days after BellSouth's receipt of a Bona Fide Firm Order, except as set forth in Section 7.5.1 below. The ACTL will be provided to KMC Data no later than with the issuance of the CFA.
- 7.5.1 To provide CFAs to KMC Data prior to the Provisioning Interval for those Premises in which KMC Data has a physical collocation arrangement with a POT bay provided by KMC Data or a virtual collocation arrangement, KMC Data must provide BellSouth with the following information:
- 7.5.1.1 For a physical collocation arrangement with a KMC Data-provided POT bay - a complete layout of the POT panels (equipment inventory update (EIU) form) showing locations, speeds, etc.
- 7.5.1.2 For a virtual collocation arrangement - a complete layout of KMC Data's equipment (equipment inventory update (EIU) form), including the locations of the low speed ports and the specific frame terminations to which the equipment will be wired by KMC Data's BellSouth Certified Supplier.
- 7.5.1.3 KMC Data may submit an EIU form at any time after the twentieth (20<sup>th</sup>) day after the BFFO. CFAs will be provided within ten (10) days of receipt of the EIU form.
- 7.5.2 BellSouth will bill KMC Data a nonrecurring charge, as set forth in Exhibit B, each time KMC Data requests a resend of its CFAs for any reason other than a BellSouth error in the CFAs initially provided to KMC Data.
- 7.5.3 For a Remote Site CFAs are not used. Distribution lines will be accessed by KMC Data provisioning a copper cable through a conduit from the Remote Site collocation space to the feeder distribution interface (FDI) of sufficient length for splicing. BellSouth personnel will splice KMC Data's cable to a group/bundle of the distribution cable at the FDI. Groups/Bundles will be provided in 8-pair increments. In order to establish the cable/pair range KMC Data must submit a Remote Site Splitter Ordering Document (RSOD) which can be found in the Remote Site High Frequency Spectrum (RS HFS) CLEC Information Package located on BellSouth's web site at [http://interconnection.bellsouth.com/guides/unedocs/rs\\_hfs.pdf](http://interconnection.bellsouth.com/guides/unedocs/rs_hfs.pdf). Once the cable/pair range is established KMC Data can then submit LSRs for individual line activations.

- 7.6 Use of BellSouth Certified Supplier. KMC Data shall select a supplier which has been approved as a BellSouth Certified Supplier to perform all construction, engineering as specified in TR 73503, installation and removal work. KMC Data, if a BellSouth Certified Supplier, or KMC Data's BellSouth Certified Supplier must follow and comply with all of the reasonable and nondiscriminatory requirements, outlined in BellSouth TR 73503, TR 73519, TR 73572, and TR 73564. In some cases, KMC Data must use a separate BellSouth Certified Supplier for those work activities associated with transmission equipment, switching equipment and power equipment, unless the BellSouth Certified Supplier has met the requirements for all of the required work activities. BellSouth shall provide KMC Data with a list of BellSouth Certified Suppliers, upon request. KMC Data, if a BellSouth Certified Supplier, or its BellSouth Certified Supplier(s) shall be responsible for installing KMC Data's equipment and associated components, extending power cabling to the BellSouth power distribution frame, performing operational tests after installation is complete, and notifying BellSouth's equipment engineers and KMC Data upon successful completion of installation and all associated work.. In cases where a BellSouth Certified Supplier is used, the BellSouth Certified Supplier shall bill KMC Data directly for all work performed for KMC Data pursuant to this Attachment. BellSouth shall have no liability for, nor responsibility to pay, such charges imposed by KMC Data's BellSouth Certified Supplier. BellSouth shall make available its supplier certification program to KMC Data or any supplier proposed by KMC Data and will not unreasonably withhold certification.
- 7.7 Alarm and Monitoring. BellSouth shall place environmental alarms in the Premises for the protection of BellSouth equipment and facilities. KMC Data shall be responsible for placement, monitoring and removal of environmental and equipment alarms used to service KMC Data's Collocation Space. Upon request, BellSouth will provide KMC Data with an applicable tariffed service(s) to facilitate remote monitoring of collocated equipment by KMC Data. Both Parties shall use best efforts to notify the other of any verified environmental condition (e.g., temperature extremes or excess humidity) known to that Party.
- 7.8 Virtual to Physical Collocation Relocation. KMC Data may relocate its existing virtual collocation arrangement(s), according to the standard intervals identified in Sections 7.1.1 and 7.1.2 above, to a physical collocation arrangement(s) and pay the appropriate fees associated with physical collocation and the rearrangement or reconfiguration of services terminated in the virtual collocation arrangement, as set forth in Exhibit B to this Attachment 4. In the event BellSouth knows when additional space for physical collocation may become available at the location requested by KMC Data, such information will be provided to KMC Data in BellSouth's written denial of physical collocation space. To the extent that (i) physical Collocation Space becomes available to KMC Data within one hundred eighty (180) days of BellSouth's written denial of KMC Data's request for physical collocation, (ii) BellSouth had knowledge that the space was going to become available, and (iii) KMC Data was not informed in the written denial that physical Collocation Space would become available within such one hundred eighty (180) days, then KMC Data may relocate its virtual collocation

- arrangement to a physical collocation arrangement and will receive a credit for any nonrecurring charges previously paid for such virtual collocation. KMC Data must arrange with a BellSouth Certified Supplier for the relocation of equipment from its virtual Collocation Space to its physical Collocation Space and will bear the cost of such relocation.
- 7.9 Virtual to Physical Conversion (In-Place). Virtual collocation arrangements may be converted to “in-place” physical arrangements if the potential conversion meets the following four criteria: 1) there is no change in the amount of equipment or the configuration of the equipment that was in the virtual collocation arrangement; 2) the conversion of the virtual collocation arrangement will not cause the equipment or the results of that conversion to be located in a space that BellSouth has reserved for its own future needs; 3) the converted arrangement does not limit BellSouth’s ability to secure its own equipment and facilities due to the location of the virtual collocation arrangement; and 4) any changes to the arrangement can be accommodated by existing power, HVAC, and other requirements. BellSouth will complete virtual to in-place physical collocation conversions within forty-five (45) days from receipt of the BFFO. BellSouth will bill KMC Data an Administrative Only Application Fee as set forth in Exhibit B on the date that BellSouth provides an Application Response to KMC Data.
- 7.10 Cancellation. If at any time prior to space acceptance, KMC Data cancels its order for Collocation Space(s) (Cancellation), BellSouth will bill the applicable nonrecurring rate(s) as set forth in Exhibit B for any and all work processes for which work has begun or been completed.
- 7.11 Licenses. KMC Data, at its own expense, will be solely responsible for obtaining from governmental authorities, and any other appropriate agency, entity, or person, all rights, privileges, and licenses necessary or required, if any, to operate as a provider of telecommunications services to the public or to build-out, equip and/or occupy the Collocation Space.
- 7.12 Environmental Compliance. The Parties agree to utilize and adhere to the Environmental Hazard Guidelines identified in Exhibit A attached hereto.
- 8. Rates and Charges**
- 8.1 KMC Data agrees to pay the rates and charges identified in Exhibit B attached hereto.
- 8.2 Application Fee. BellSouth shall assess an application fee by generating a service order, which shall be issued at the time BellSouth responds that space is available pursuant to Section 6.9 above. BellSouth will bill this nonrecurring fee on the date that BellSouth provides an Application Response to KMC Data.
- 8.2.1 In Tennessee, the applicable application fee for caged physical collocation is the planning fee for both Initial Applications and Subsequent Applications placed by KMC

- Data. BellSouth will bill this nonrecurring fee on the date that BellSouth provides an Application Response to KMC Data.
- 8.3 Rack/Bay Space. The rack/bay space charge includes reasonable charges for air conditioning, ventilation and other allocated expenses associated with maintenance of the Remote Site Location, and includes amperage necessary to power KMC Data's equipment. KMC Data shall pay rack/bay space charges based upon the number of racks/bays requested. BellSouth will assign Remote Collocation Space in conventional remote site rack/bay lineups where technically feasible.
- 8.4 Recurring Charges. If KMC Data has met the applicable fifteen (15th) day walkthrough interval specified in Section 4.3 above, billing for recurring charges will begin upon the Space Acceptance Date. In the event that KMC Data fails to complete an acceptance walkthrough within the applicable fifteen (15th) day interval, billing for recurring charges will commence on the Space Ready Date. If KMC Data occupies the space prior to the Space Ready Date, the date KMC Data occupies the space is deemed the new Space Acceptance Date and billing for recurring charges will begin on that date.
- 8.5 KMC Data shall continue the payment of all monthly fees to BellSouth until the date that KMC Data, and if applicable KMC Data's Guest(s), has fully vacated the Collocation Space and the Space Relinquishment Form has been accepted by BellSouth. Billing for monthly recurring charges will cease on the date that KMC Data and BellSouth conduct an inspection of the terminated space and jointly sign off on the Space Relinquishment Form or on the date that KMC Data signs off on the Space Relinquishment Form and sends this form to BellSouth, if a subsequent inspection of the terminated space by BellSouth reveals no discrepancies. In the latter case, if subsequent inspection by BellSouth within fifteen (15th) days of its receipt of the Space Relinquishment Form, does reveal discrepancies, billing for monthly recurring charges will cease on the date that BellSouth and KMC Data jointly conduct an inspection, which confirms that KMC Data has corrected all of the noted discrepancies. A Subsequent Application Fee will not apply for the termination of occupancy.
- 8.6 Space Preparation. Space preparation fees consist of a nonrecurring charge for firm order processing and monthly recurring charges for central office modifications assessed per arrangement, per square foot and common systems modifications assessed per arrangement, per square foot for cageless collocation and per cage for caged collocation. KMC Data shall remit payment of the nonrecurring firm order processing fee coincident with submission of a BFFO. The charges recover the costs associated with preparing the Collocation Space, which includes survey, engineering of the Collocation Space, design and modification costs for network, building and support systems. In the event KMC Data opts for cageless space, the space preparation fees will be assessed based on the total floor space dedicated to KMC Data as prescribed in this Section. If KMC Data was previously billed ICB or nonrecurring space preparation charges by BellSouth, but has not paid such charges in full, BellSouth will determine any outstanding amounts due from KMC Data, and the

- Parties will agree on such outstanding amounts that are due and owing to BellSouth. If KMC Data pays such outstanding amounts to BellSouth, no additional space preparation charges will be applicable or billed going forward for those collocation arrangements, for which space preparation charges have been paid in full through previously billed ICB or nonrecurring space preparation charges. However, any new requests for collocation space or augmentations requesting additional space for an existing collocation arrangement will be billed pursuant to the current monthly recurring space preparation rates set forth in Exhibit B.
- 8.7 Floor Space. Billing for floor space, if applicable, will begin on the Space Acceptance Date. The Floor Space Charge includes reasonable charges for lighting, HVAC, and other allocated expenses associated with maintenance of the Premises but does not include any expenses for power supplied to KMC Data for its equipment. When the Collocation Space is enclosed, KMC Data shall pay floor space charges based upon the number of square feet so enclosed. When the Collocation Space is not enclosed, KMC Data shall pay floor space charges based upon the following floor space calculation: [(depth of the equipment lineup in which the rack is placed) + (0.5 x maintenance aisle depth) + (0.5 x wiring aisle depth)] X (width of rack and spacers). For purposes of this calculation, the depth of the equipment lineup shall consider the footprint of equipment racks plus any equipment overhang. BellSouth will assign unenclosed Collocation Space in conventional equipment rack lineups where feasible. In the event KMC Data's equipment requires special cable racking, isolated grounding or other treatment which prevents placement within conventional equipment rack lineups, KMC Data shall be required to request an amount of floor space sufficient to accommodate the total equipment arrangement.
- 8.8 Cable Installation. Cable Installation Fee(s) are assessed per entrance cable placed. This nonrecurring fee will be billed by BellSouth upon receipt of KMC Data's BFFO.
- 8.9 Security Escort. Rates for a security escort are assessed according to the schedule appended hereto as Exhibit B beginning with the scheduled escort time. BellSouth will wait for one half (1/2) hour after the scheduled time for such an escort and KMC Data shall pay for such half hour charges in the event KMC Data fails to show up.
- 8.10 Cable Record Charges. These charges apply for work required to build cable records in BellSouth systems. The VG/DS0 cable record charge is for a maximum of thirty six hundred (3600) records. The Fiber cable record charge is for a maximum of ninety-nine (99) records. These nonrecurring fees will be billed upon receipt of KMC Data's BFFO.
- 8.11 Power Rates. Rates for power are as set forth in Exhibit B. Applicable rates shall vary depending on whether KMC Data elects to be billed on a fused basis, by electing to remain (or install new collocations or augments) under the traditional collocation power billing method, or on a usage basis, by electing to convert collocations to (or install new collocations or augments under) the power usage metering option set forth in Section 9 below.

8.11.1 Under the fused amp billing option, KMC Data shall be billed at the Commission's most recently approved fused amp recurring rate for DC power. However, if the Parties either previously agreed to "grandfather" such arrangements or such arrangements are grandfathered as a result of KMC Data having provided documentation to BellSouth demonstrating that KMC Data paid installation costs under an ICB or nonrecurring rate schedule for the collocation arrangement power installation, KMC Data will be billed the grandfathered recurring rate for the DC power set forth in Exhibit B.

8.11.2 Other. If no rate is identified in the contract, the rate for the specific service or function will be negotiated by the Parties upon request by either Party.

8.12 Grandfathered Rates.

8.12.1 The rates for the recurring charges for grandfathered CCXC will be the rates in effect before the Effective Date of this Agreement, if any, and such rates shall be set forth in Exhibit B.

8.12.2 The grandfathered POT Bay rates are pursuant to state ordered rates for particular POT Bay elements.

**9. Central Office Power**

9.1 BellSouth shall make available -48 Volt (-48V) Direct Current (DC) power for KMC Data's Collocation Space at a BellSouth Battery Distribution Fuse Bay (BDFB). If KMC Data was previously served off BellSouth's main power board pursuant to KMC Data's previous Interconnection Agreement, that arrangement shall be grandfathered. Recurring charges for -48V DC power will be assessed as set forth in Section 8.11 above.

9.1.1 Fused Amp Billing Option. Monthly recurring charges for -48V DC power will be assessed per fused amp per month using the following formula:

For power provisioned from a BDFB – The number of fused amps requested by KMC Data on its collocation application for power that is being provisioned from a BellSouth BDFB should reflect a multiplier of one point five (1.5) to convert the requested amperage to fused amps, with a minimum of ten (10) fused amps required. The number of fused amps requested by KMC Data on its collocation application will be multiplied by the DC power fused amp rate set forth in Exhibit B, which rate has already been adjusted through the application of the point sixty-seven (.67) multiplier.

For power provisioned from the main power board – The number of fused amps made available at the main power board, in increments of two hundred twenty-five (225) amps/main power board circuit, multiplied by the DC power

fused amp rate set forth in Exhibit B, which rate has already been adjusted through the application of the point sixty-seven (.67) multiplier.

9.1.2 Central Office Physical Collocation Regional Power Usage Measurement Option.

The Central Office Regional Power Usage Measurement Option provided in this Section 9 shall be applicable for all nine (9) states in the BellSouth region (Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee) as a package. This option shall be provided in all nine (9) states in lieu of other metered options that exist or may subsequently arise (by order or contract) in any of these nine (9) states for the duration of this Agreement. If any metered rates or terms of this power usage provision are modified pursuant to the change in law provision as set forth in the General Terms and Conditions of this Agreement then, for each state hereunder, all of the ordered rates and associated terms and conditions shall apply thereafter and to each physical collocation arrangement to which the power usage measurement option applied and, to the extent that there are no such ordered rates in a state, the rates of the then current BellSouth standard interconnection agreement shall apply in such state subject to the modification of Agreement provisions in the General Terms and Conditions. If any metered rates or terms of this power usage provision are modified by KMC Data's adoption of the rates, terms and conditions of another CLEC's interconnection agreement pursuant to Section 252 (i) of the Act in any of the states covered by this Agreement, such adopted rates, terms and conditions shall apply thereafter and to each physical collocation arrangement to which the power usage measurement option applied and, in any states not covered by such adoption, the rates, terms and conditions for power usage measurement, if any, of the then current BellSouth standard interconnection agreement shall apply, provided that such language fully effectuates and is consistent with applicable state commission orders.

9.1.3 AC Usage Component of DC Power Charges. BellSouth, or its BellSouth Certified Supplier, will perform all metering activities, which will include providing the necessary ammeter or other measurement device, to measure the actual power usage being drawn by KMC Data's physical collocation equipment on both the A and B power feeds. The AC Usage Component of the DC Power charge will be based upon the sum of either the instantaneous or busy hour average electrical current readings, depending on the capabilities of the ammeter or other measurement device. KMC Data may, at its sole cost and expense, install or maintain its own meters on those BDFBs located in its own physical Collocation Space(s) and may notify BellSouth if it would like to offer BellSouth the option of using such meters for the purpose of establishing measurements. In such case, BellSouth, or its BellSouth Certified Supplier, will have the option of reading and recording the actual power usage from either the meter installed or maintained by KMC Data on KMC Data's own BDFB(s) or via a BellSouth provided measurement device. The usage reading for the option elected by BellSouth shall be used for purposes of calculating the billing, provided that BellSouth elects one method and continues to use that method unless BellSouth provides reasonable notice to KMC Data to change the method.

- 9.1.3.1 If BellSouth, or its BellSouth Certified Supplier, requires access to KMC Data's physical Collocation Space for purposes of measuring the power usage, BellSouth or its BellSouth Certified Supplier shall provide KMC Data with a minimum of forty-eight (48) hours notice that access is required. KMC Data shall respond to such request for access within twenty-four (24) hours for the purpose of establishing the date and time of access to KMC Data's physical Collocation Space. Once the date and time of access to KMC Data's physical Collocation Space has been agreed upon, KMC Data and BellSouth or its BellSouth Certified Supplier shall adhere to the agreed upon date and time, or provide a minimum of three (3) hours notice to the other Party if the original appointment will be missed or must be cancelled and rescheduled. If KMC Data fails to provide access to its physical Collocation Space or fails to provide BellSouth/BellSouth Certified Supplier with a minimum of three (3) hours notice of the necessity to cancel and/or reschedule the appointment, then KMC Data shall pay, for the missed meter reading a nonrecurring charge, as set forth in Exhibit B, and shall pay a nonrecurring charge as set forth in Exhibit B for each additional meter reading trip required to measure KMC Data's power usage. If BellSouth/BellSouth Certified Supplier fails to provide KMC Data with a minimum of three (3) hours notice of the necessity to cancel and/or reschedule the appointment, BellSouth shall not bill KMC Data a nonrecurring charge, as set forth in Exhibit B for such missed appointment, and shall waive the charge for the next additional meter reading trip required to measure KMC Data's power usage.
- 9.1.3.2 For each new physical collocation arrangement for which KMC Data desires the metered power usage measurement option, KMC Data shall indicate on its Initial Application that the metered power usage measurement option is being elected. For each location that KMC Data wants to convert to the metered power usage measurement option, KMC Data will submit a Subsequent Application and agrees to include in the Comments section of the Subsequent Application the following comment:
- This Subsequent Application is KMC Data's certification that KMC Data is opting to convert this physical collocation arrangement to the power usage measurement option and will permit BellSouth and/or the BellSouth Certified Supplier to use an ammeter or other measurement device to measure its actual power usage or, at BellSouth's election, provide BellSouth and/or the BellSouth Certified Supplier with access to KMC Data's meter on KMC Data's own BDFB(s) (if KMC Data chooses to offer BellSouth that option), located in KMC Data's physical Collocation Space, to measure actual power usage on all power feeds.
- 9.1.3.3 BellSouth will bill KMC Data a Power Reconfiguration Application Fee, as set forth in Exhibit B, on the date that BellSouth provides an Application Response to each Subsequent Application requesting to convert a physical collocation arrangement to the metered power usage measurement option. BellSouth shall then arrange for the measurement of KMC Data's actual power usage on each power feed (each A and B feed) once per quarter at each of KMC Data's physical collocation arrangements for

which KMC Data has submitted an Initial or Subsequent Application electing the metered power usage option. Based upon the actual power usage measurement taken by BellSouth or the BellSouth Certified Supplier, BellSouth shall assess KMC Data charges for AC power usage for the following quarter based upon KMC Data's actual metered usage for each power feed (both the A and B feeds) or a minimum of ten (10) amps of -48V DC power usage for the sum of the A and B feeds for each power cable, whichever is greater. Such usage shall then be multiplied by the applicable AC power rate, set forth in Exhibit B, to determine the appropriate monthly recurring AC Usage charge that will be billed to KMC Data for the following three (3) calendar months or until the next AC power usage measurement is taken, whichever is later.

- 9.1.3.4 Either Party, within fifteen (15) days of notice of the usage measurement established by the scheduled meter reading, may challenge the accuracy of that reading by requesting a new reading. If KMC Data requests that an unscheduled (prior to the next scheduled quarterly power reading date) power usage reading be taken, then KMC Data will be responsible for paying the "Additional Meter Reading Trip Charge" contained in Exhibit B. If BellSouth requests a power usage reading be taken in this instance, then KMC Data will not be charged the "Additional Meter Reading Trip Charge" for the unscheduled meter reading. If the readings vary by more than ten (10) % or five (5) Amps, whichever is greater, the Parties shall work cooperatively to reconcile such discrepancies and establish the appropriate usage figure in a reasonable and expeditious manner. If there is no discrepancy between the readings of ten percent (10%) or five (5) Amps, whichever is greater, then the Party disputing the original meter reading shall pay the Additional Meter Reading Trip Charge contained in Exhibit B. If the readings do not vary outside these ranges, the initial reading will be used to calculate KMC Data's AC Usage charge until the next scheduled power reading.
- 9.1.3.5 When KMC Data submits the appropriate Initial or Subsequent Application indicating its desire to elect the power measurement usage option for a particular physical collocation arrangement in a specific Central Office, BellSouth will provide the associated Application Response pursuant to Section 6 above. It will then be the responsibility of KMC Data to submit a BFFO, indicating its desire to proceed with its request. After BellSouth receives the BFFO from KMC Data, the Initial or Subsequent Application will be completed by BellSouth within the provisioning intervals contained in Section 7 above and KMC Data will be notified of the Space Ready Date or when the appropriate record and database changes have been made by BellSouth to reflect KMC Data's election of the power measurement usage option (which will be considered the "Space Ready Date" for purposes of a Subsequent Application submitted to convert a particular physical collocation arrangement in a specific Central Office to the power measurement usage option). BellSouth will not permit KMC Data to elect an earlier Space Acceptance Date than the Space Ready Date for any request submitted via a Subsequent Application for an existing physical collocation arrangement. When a Subsequent Application is used to elect the power measurement usage option and there are no other changes requested, billing for the recurring charges associated with the AC Usage and DC Power Infrastructure will

begin upon the Space Ready Date. If KMC Data occupies the space prior to the Space Ready Date, for Initial Application requests only, the date KMC Data occupies the space will be deemed the new Space Acceptance Date and the billing for the AC Usage and DC Power Infrastructure will begin on that date. When KMC Data elects to move to the power measurement usage option, the number of fused amps of DC Power infrastructure capacity requested by KMC Data on its Initial or Subsequent Application will be used for calculating the number of amps to be billed for AC Usage until such time as BellSouth or its BellSouth Certified Supplier can perform, under the currently existing quarterly meter reading schedule, a reading of KMC Data's power usage for the requested physical Collocation Space. As soon as this reading has been taken, BellSouth will adjust KMC Data's billing accordingly to reflect the actual metered usage back to the Space Acceptance Date. BellSouth will also use this reading for billing purposes until the next quarterly meter reading is performed by BellSouth or its BellSouth Certified Supplier.

- 9.1.4 Current DC Power Plant Infrastructure Component of DC Power Charges. BellSouth shall assess KMC Data a monthly recurring charge as set forth in Exhibit B for BellSouth's power plant infrastructure component of the DC power charges based upon KMC Data's fused DC power amperage capacity, as reflected by KMC Data on its Initial Application, as well as any Subsequent Applications (i.e., augment applications), for the particular physical collocation arrangement(s) being converted to or electing the power usage metering option for those Central Offices specified by KMC Data.
- 9.1.5 Grandfathered DC Power Plant Infrastructure Component of DC Power Charges. For those physical collocation arrangements that were provisioned to KMC Data under an individual case basis pricing structure, where KMC Data has already paid all nonrecurring charges associated with the DC infrastructure capital costs associated with such physical collocation arrangement, and for which KMC Data has submitted a Subsequent Application to convert such physical collocation arrangements to the metered power usage measurement option, BellSouth shall assess KMC Data a monthly recurring charge as set forth in Exhibit B for BellSouth's power plant infrastructure expense component of the DC power charges, based upon KMC Data's fused DC power amperage capacity, as reflected by KMC Data on its Initial Application, as well as any Subsequent Applications (i.e., augment applications), for the particular physical collocation arrangement(s) being converted to the power usage metering option for those Central Offices specified by KMC Data.
- 9.1.6 Other DC Power Metering Charges. KMC Data agrees to notify BellSouth when KMC Data has removed or installed telecommunications equipment in KMC Data's physical Collocation Space and to ensure that the existing fused DC power capacity is sufficiently engineered to accommodate the power requirements associated with the installation of additional equipment in KMC Data's physical Collocation Space. An associated change in power usage will be reflected in the next quarterly power measurement billing cycle.

- 9.1.6.1 BellSouth will bill KMC Data a monthly recurring charge per physical Collocation Space for KMC Data's physical collocation arrangements in each state, which reflects: 1) BellSouth's expenses to program the applicable billing systems to accept and process the power usage measurement option, 2) BellSouth's expenses associated with its workforce loading the measured power usage data into BellSouth's OSS and billing systems, and 3) the costs for BellSouth/BellSouth Certified Supplier to supply the clamp-on ammeter or other measurement device and perform the task of reading and recording KMC Data's actual power usage at each requested physical collocation site. This "Meter Reading" monthly recurring rate element will be assessed to KMC Data for the first twelve (12) power circuits (each A and B feed pair counts as two circuits), and then for each additional two (2) circuits, read by BellSouth or its BellSouth Certified Supplier, at the rates set forth in Exhibit B and based on whether the power meter is provided by BellSouth or its BellSouth Certified Supplier or KMC Data.
- 9.2 When obtaining power from the BDFB, fuses and power cables (A&B) must be engineered (sized) and installed by KMC Data's BellSouth Certified Supplier. KMC Data is responsible for contracting with a BellSouth Certified Supplier for power distribution feeder cable runs from a BellSouth BDFB to KMC Data's equipment. The BellSouth Certified Supplier contracted by KMC Data must provide BellSouth with a copy of the engineering power specifications prior to the day on which KMC Data's equipment becomes operational. BellSouth will provide the common power feeder cable support structure between the BellSouth BDFB and KMC Data's Collocation Space. KMC Data shall contract with a BellSouth Certified Supplier who will be responsible for the following: dedicated power cable support structure within KMC Data's Collocation Space, power cable feeds, and terminations of cable.
- 9.3 If KMC Data elects to install its own DC Power Plant, BellSouth shall provide Alternating Current (AC) power to feed KMC Data's DC Power Plant. Charges for AC power will be assessed per breaker ampere. When obtaining power from a BellSouth service panel, protection devices and power cables must be engineered (sized) and installed by KMC Data's BellSouth Certified Supplier, with the exception that BellSouth shall engineer and install protection devices and power cables for Adjacent Collocation. KMC Data's BellSouth Certified Supplier must also provide a copy of the engineering power specifications prior to the day on which KMC Data's equipment becomes operational. Charges for AC power shall be assessed pursuant to the rates specified in Exhibit B. AC power voltage and phase ratings shall be determined on a per location basis. At KMC Data's option, KMC Data may arrange for AC power in an Adjacent Collocation arrangement from a retail provider of electrical power.
- 9.4 KMC Data has the option to purchase power directly from an electric utility company where technically feasible and where space is available in a requested BellSouth Premises. Under such an option, KMC Data is responsible for contracting with the electric utility company for its own power feed and meter, and is financially responsible for purchasing all equipment necessary to accomplish the conversion of the commercial AC power to DC power, including inverters, batteries, power boards, bus

- bars, BDFBs, backup power supplies and power cabling. The actual work to install this arrangement must be performed by a BellSouth Certified Supplier hired by KMC Data. KMC Data's BellSouth Certified Supplier must comply with all applicable national, regional, state and local safety, electrical, fire and building codes, including the National Electric Safety Code standards, in installing this power arrangement, just as BellSouth is required to comply with these codes. KMC Data must submit an application to BellSouth for the appropriate amount of collocation space that KMC Data requires to install this type of power arrangement. BellSouth will evaluate the request and determine if the appropriate amount of space is available within the office for the installation of KMC Data's power equipment and facilities. This type of power arrangement must be located in an appropriate area in the central office that has been properly conditioned for the installation of power equipment and conforms to the applicable national, regional, state and local safety, electrical, fire and building codes. BellSouth shall waive the application fee or any other nonrecurring charge that would otherwise be due from a CLEC that decides to reconfigure an existing collocation power arrangement so as to purchase power directly from an electric utility company as provided herein. KMC Data shall be responsible for the recurring charges associated with the central office space needed for collocation of this type of power arrangement, including space required to place associated power-related equipment and facilities (i.e., batteries, generator, power meter, etc.). If there is no space available for this type of power arrangement in the requested central office, BellSouth may seek a waiver of these requirements from the state Commission for the central office requested. KMC Data would still have the option to order its power needs directly from BellSouth.
- 9.5 BellSouth will revise monthly recurring power charges to reflect a power upgrade upon notification of the completion of the upgrade by KMC Data's BellSouth Certified Supplier. BellSouth will revise recurring power charges to reflect a power reduction upon BellSouth's receipt of the Power Reduction Form from KMC Data certifying the completion of the power reduction. Notwithstanding the foregoing, if KMC Data's BellSouth Certified Supplier has not removed or, at BellSouth's discretion, cut the power cabling within thirty (30) days, the power reduction will not become effective until the cabling is removed by KMC Data's BellSouth Certified Supplier and KMC Data shall pay the power rate applicable prior to the power reduction request for the period between the receipt of the Power Reduction Form and the date the power cabling is actually removed.
- 9.6 If KMC Data requests a reduction in the amount of power that BellSouth is currently providing, KMC Data must submit a Subsequent Application. If no modification to the Collocation Space is requested other than the reduction in power, the Power Reconfiguration Application Fee as set forth in Exhibit B will apply. If modifications are requested in addition to the reduction of power, the Subsequent Application Fee will apply. BellSouth will bill this nonrecurring fee on the date that BellSouth provides an Application Response.

- 9.7 If KMC Data has grand-fathered power configurations currently served from the BellSouth main power board and requests that its power be reconfigured to connect to a BellSouth BDFB, in a specific central office, KMC Data must submit a Subsequent Application. BellSouth will respond to such application within seven (7) days and a Subsequent Application fee will apply for this reconfiguration to a BellSouth BDFB.
- 9.7.1 In Alabama and Louisiana, if KMC Data has grandfathered power configurations currently served from the BellSouth main power board and requests that its power be reconfigured to connect to a BellSouth BDFB, in a specific central office, KMC Data must submit a Subsequent Application. BellSouth will respond to such application within seven (7) days and no application fee will apply [BST clarification] for this one time only power reconfiguration to a BellSouth BDFB. For any power reconfigurations thereafter, KMC Data will submit a Subsequent Application and the appropriate application fee will apply.
- 9.8 Remote Site Power. BellSouth shall make available –48 Volt (-48V) DC power for KMC Data’s Remote Collocation Space at a BellSouth Battery Distribution Fuse Bay (BDFB) within the Remote Site Location. The charge for power shall be assessed as part of the recurring charge for rack/bay space. If the power requirements for KMC Data’s equipment exceeds the capacity available, then such power requirements shall be assessed on an individual case basis (ICB). BellSouth will revise recurring power charges to reflect a power upgrade upon notification of the completion of the upgrade by KMC Data’s BellSouth Certified Supplier. BellSouth will revise recurring power charges to reflect a power reduction upon BellSouth’s receipt of the Power Reduction Form from KMC Data certifying the completion of the power reduction, including the removal of the power cabling by KMC Data’s BellSouth Certified Supplier.
- 9.9 Remote Site Adjacent Collocation Power. Charges for AC power will be assessed per breaker ampere per month. Rates include the provision of commercial and standby AC power, where available. When obtaining power from a BellSouth service panel, protection devices and power cables must be engineered (sized) and installed by KMC Data’s BellSouth Certified Supplier, with the exception that BellSouth shall engineer and install protection devices and power cables for Adjacent Collocation. KMC Data’s BellSouth Certified Supplier must also provide a copy of the engineering power specification prior to the equipment becoming operational. Charges for AC power shall be assessed pursuant to the rates specified in Exhibit B. AC power voltage and phase ratings shall be determined on a per location basis. At KMC Data’s option, KMC Data may arrange for AC power in an Adjacent Collocation arrangement from a retail provider of electrical power.
- 10. Insurance**
- 10.1 KMC Data shall, at its sole cost and expense, procure, maintain, and keep in force insurance as specified in this Section and underwritten by insurance companies licensed to do business in the states applicable under this Agreement and having a Best’s Insurance Rating of A-.

- 10.2 KMC Data shall maintain the following specific coverage:
- 10.2.1 Commercial General Liability coverage in the amount of ten million dollars (\$10,000,000.00) or a combination of Commercial General Liability and Excess/Umbrella coverage totaling not less than ten million dollars (\$10,000,000.00). BellSouth shall be named as an Additional Insured on the Commercial General Liability policy as specified herein.
- 10.2.2 Statutory Workers Compensation coverage and Employers Liability coverage in the amount of one hundred thousand dollars (\$100,000.00) each accident, one hundred thousand dollars (\$100,000.00) each employee by disease, and five hundred thousand dollars (\$500,000.00) policy limit by disease.
- 10.3 All policies purchased by KMC Data shall be deemed to be primary and not contributing to or in excess of any similar coverage purchased by BellSouth. All insurance must be in effect on or before the date equipment is delivered to Premises and shall remain in effect for the term of this Attachment or until all KMC Data's property has been removed from BellSouth's Premises, whichever period is longer. If KMC Data fails to maintain required coverage, BellSouth may pay the premiums thereon and seek reimbursement of same from KMC Data.
- 10.4 KMC Data shall submit certificates of insurance reflecting the coverage required pursuant to this Section a minimum of ten (10) business days prior to the commencement of any work in the Collocation Space. Failure to meet this interval may result in construction and equipment installation delays. KMC Data shall arrange for BellSouth to receive thirty (30) days' advance notice of cancellation from KMC Data's insurance company. KMC Data shall forward a certificate of insurance and notice of cancellation/non-renewal to BellSouth at the following address:
- BellSouth Telecommunications, Inc.  
Attn.: Risk Management Office - Finance  
17F54 BellSouth Center  
675 W. Peachtree Street  
Atlanta, Georgia 30375
- 10.5 KMC Data must conform to recommendations made by BellSouth's fire insurance company to the extent BellSouth has agreed to, or shall hereafter agree to, such recommendations.
- 10.6 Self-Insurance. If KMC Data's net worth exceeds five hundred million dollars (\$500,000,000.00), KMC Data may elect to request self-insurance status in lieu of obtaining any of the insurance required in Sections 9.2.1 and 9.2.2 above. KMC Data shall provide audited financial statements to BellSouth thirty (30) days prior to the commencement of any work in the Collocation Space. BellSouth shall then review such audited financial statements and respond in writing to KMC Data in the event that self-insurance status is not granted to KMC Data. If BellSouth approves KMC Data for self-insurance, KMC Data shall annually furnish to BellSouth, and keep

current, evidence of such net worth that is attested to by one of KMC Data's corporate officers. The ability to self-insure shall continue so long as the KMC Data meets all of the requirements of this Section. If KMC Data subsequently no longer satisfies this Section, KMC Data is required to purchase insurance as indicated by Sections 10.2.1 and 10.2.2 above.

## **11. Mechanics Liens**

- 11.1 If any mechanics lien or other liens shall be filed against property of either Party (BellSouth or KMC Data), or any improvement thereon by reason of or arising out of any labor or materials furnished or alleged to have been furnished or to be furnished to or for the other Party or by reason of any changes, or additions to said property made at the request or under the direction of the other Party, the other Party directing or requesting those changes shall, within thirty (30) business days after receipt of written notice from the Party against whose property said lien has been filed, either pay such lien or cause the same to be bonded off the affected property in the manner provided by law. The Party causing said lien to be placed against the property of the other shall also defend, at its sole cost and expense, on behalf of the other, any action, suit or proceeding which may be brought for the enforcement of such liens and shall pay any damage and discharge any judgment entered thereon.

## **12. Inspections**

- 12.1 BellSouth may conduct an inspection of KMC Data's equipment and facilities in the Collocation Space(s) prior to the activation of facilities between KMC Data's equipment and equipment of BellSouth. BellSouth may conduct an inspection if KMC Data adds equipment and may otherwise conduct routine inspections at reasonable intervals mutually agreed upon by the Parties. BellSouth shall provide KMC Data with a minimum of seventy-two (72) hours or three (3) business days, whichever is greater, advance notice of all such inspections. All costs of such inspection shall be borne by BellSouth.

## **13. Security and Safety Requirements**

- 13.1 Unless otherwise specified, KMC Data will be required, at its own expense, to conduct a statewide investigation of criminal history records for each KMC Data employee hired in the past five years being considered for work on the Premises, for the states/counties where the KMC Data employee has worked and lived for the past five (5) years. Where state law does not permit statewide collection or reporting, an investigation of the applicable counties is acceptable. KMC Data shall not be required to perform this investigation if an affiliated company of KMC Data has performed an investigation of the KMC Data employee seeking access, if such investigation meets the criteria set forth above. This requirement will not apply if KMC Data has performed a pre-employment statewide investigation of criminal history records of the KMC Data employee for the states/counties where the KMC Data employee has

- worked and lived for the past five years or, where state law does not permit a statewide investigation, an investigation of the applicable counties.
- 13.2 KMC Data will be required to administer to its personnel assigned to the Premises security training either provided by BellSouth, or meeting reasonable and nondiscriminatory criteria defined by BellSouth.
- 13.3 KMC Data shall provide its employees and agents with picture identification, which must be worn and visible at all times while in the Collocation Space or other areas in or around the Premises. The photo identification card shall bear, at a minimum, the employee's name and photo and KMC Data's name. BellSouth reserves the right to remove from its Premises any employee of KMC Data not possessing identification issued by KMC Data or who has violated any of the reasonable and nondiscriminatory criteria outlined in BellSouth's CLEC Security Training documents. KMC Data shall hold BellSouth harmless for any damages resulting from such removal of its personnel from BellSouth Premises.
- 13.4 KMC Data shall not assign to the Premises any personnel with records of felony criminal convictions. KMC Data shall not assign to the Premises any personnel with records of misdemeanor convictions, except for misdemeanor traffic violations, without advising BellSouth of the nature and gravity of the offense(s). BellSouth reserves the right to refuse building access to any KMC Data personnel who have been identified to have misdemeanor criminal convictions. Notwithstanding the foregoing, in the event that KMC Data chooses not to advise BellSouth of the nature and gravity of any misdemeanor conviction, KMC Data may, in the alternative, certify to BellSouth that it shall not assign to the Premises any personnel with records of misdemeanor convictions (other than misdemeanor traffic violations).
- 13.4.1 KMC Data shall not knowingly assign to the Premises any individual who was a former employee and whose employment with BellSouth was terminated for a felony for which they were convicted.
- 13.4.2 KMC Data shall not knowingly assign to the Premises any individual who was a former supplier of BellSouth and whose access to a Premises was revoked due to a felony for which they were convicted.
- 13.5 For each KMC Data employee or agent hired by KMC Data within five (5) years of being considered for work on the Premises, who requires access to a Premises pursuant to this Attachment, KMC Data shall furnish BellSouth, prior to an employee or agent gaining such access, a certification that the aforementioned background check and security training were completed. The certification will contain a statement that no felony convictions were found and certify that the employee completed the security training. If the employee's criminal history includes misdemeanor convictions, KMC Data will disclose the nature of the convictions to BellSouth at that time. In the alternative, KMC Data may certify to BellSouth that it shall not assign to the Premises any personnel with records of misdemeanor convictions other than misdemeanor traffic violations.

- 13.5.1 For all other KMC Data employees requiring access to a Premises pursuant to this Attachment, KMC Data shall furnish BellSouth, prior to an employee gaining such access, a certification that the employee is not subject to the requirements of Section 13.5 above and that security training was completed by the employee.
- 13.6 At BellSouth's request, KMC Data shall promptly remove from BellSouth's Premises any employee of KMC Data that BellSouth does not wish to grant access to its BellSouth Premises pursuant to any investigation conducted by BellSouth or prior to the initiation of an investigation if an employee of KMC Data is found interfering with the property or personnel of BellSouth or another collocated telecommunications carrier in a material way. For purposes of this provision, material shall mean some action that could have a substantial impact on the operations, equipment or personnel of BellSouth or another collocated telecommunications carrier. Such investigation shall be commenced and completed by BellSouth as promptly and expeditiously as possible. The Parties shall cooperate and communicate, to the extent circumstances permit, to ensure that the Parties may take appropriate remedial measures.
- 13.7 Security Violations. Each Party reserves the right to interview the other Party's employees, agents, or suppliers in the event of wrongdoing in or on BellSouth's property, or KMC Data's Collocation Space, or involving BellSouth's, KMC Data's, or another collocated telecommunications carrier's property or personnel, provided that the Party shall provide reasonable notice to the other Party's designated security representative of such interview. Each Party and its suppliers shall reasonably cooperate with the other Party's investigation into allegations of wrongdoing or criminal conduct committed by, witnessed by, or involving such Parties' employees, agents, or suppliers. Additionally, each Party reserves the right to bill the other Party for all reasonable costs associated with investigations involving its employees, agents, or suppliers if it is established and mutually agreed in good faith that such Parties' employees, agents, or suppliers are responsible for the alleged act. Each Party shall bill the other Party for the replacement or repair of property, as appropriate, which is stolen or damaged where an investigation determines the culpability of the other Party's employees, agents, or suppliers and where the other Party agrees, in good faith, with the results of such investigation. Each Party agrees that it shall notify the other Party in writing immediately in the event that it discovers one of its employees working on the Premises is a possible security risk. Upon request of the other Party, the Party who is the employer shall discipline consistent with its employment practices, up to and including removal from BellSouth's Premises, any employee found to have violated the security and safety requirements of this Section.
- 13.8 Use of Supplies. Unauthorized use of equipment, supplies or other property by either Party, whether or not used routinely to provide telephone service will be strictly prohibited and handled appropriately. Costs associated with such unauthorized use may be charged to the offending Party, as may be all associated investigative costs.
- 13.9 Use of Official Lines. Except for non-toll calls necessary in the performance of their work, neither Party shall use the telephones of the other Party on the Premises.

Charges for unauthorized telephone calls may be charged to the offending Party, as may be all associated investigative costs.

- 13.10 Accountability. Full compliance with the Security requirements of this Section shall in no way limit the accountability of either Party to the other for the improper actions of its employees.
- 13.11 BellSouth will use its best efforts to adequately secure the area which houses KMC Data's equipment to prevent unauthorized entry. BellSouth will immediately notify KMC Data's emergency contact of any actual or attempted security breaches to the KMC Data's collocation space to the extent BellSouth becomes aware of such breaches.

#### **14. Destruction of Collocation Space**

- 14.1 In the event a Collocation Space is wholly or partially damaged by fire, windstorm, tornado, flood or by similar Acts of God or force majeure circumstances beyond a Party's reasonable control to such an extent as to be rendered wholly unsuitable for KMC Data's permitted use hereunder, then either Party may elect within ten (10) days after such damage, to terminate occupancy of the damaged Collocation Space, and if either Party shall so elect, by giving the other written notice of termination, both Parties shall stand released of and from further liability under the terms hereof. If the Collocation Space shall suffer only minor damage and shall not be rendered wholly unsuitable for KMC Data's permitted use, or is damaged and the option to terminate is not exercised by either Party, BellSouth covenants and agrees to proceed promptly without expense to KMC Data, except for improvements not to the property of BellSouth, to repair the damage. BellSouth shall have a reasonable time within which to rebuild or make any repairs, and such rebuilding and repairing shall be subject to delays caused by storms, shortages of labor and materials, government regulations, strikes, walkouts, and causes beyond the control of BellSouth, which causes shall not be construed as limiting factors, but as exemplary only. KMC Data may, at its own expense, accelerate the rebuild of its collocated space and equipment provided however that a BellSouth Certified Supplier is used and the necessary space preparation has been completed. If KMC Data's acceleration of the project increases the cost of the project, then those additional charges will be incurred by KMC Data. Where allowed and where practical, KMC Data may erect a temporary facility while BellSouth rebuilds or makes repairs. In all cases where the Collocation Space shall be rebuilt or repaired, KMC Data shall be entitled to an equitable abatement of rent and other charges, depending upon the unsuitability of the Collocation Space for KMC Data's permitted use, until such Collocation Space and access to necessary power is fully repaired and restored and KMC Data's equipment installed therein (but in no event later than thirty (30) days after the Collocation Space is fully repaired and restored). Where KMC Data has placed an Adjacent Arrangement pursuant to Section 3.4 above, KMC Data shall have the sole responsibility to repair or replace said Adjacent Arrangement provided herein. Pursuant to this Section, BellSouth will restore the associated services to the Adjacent Arrangement.

**15. Eminent Domain**

- 15.1 If the whole of a Collocation Space or Adjacent Arrangement shall be taken by any public authority under the power of eminent domain, then this Attachment shall terminate with respect to such Collocation Space or Adjacent Arrangement as of the day possession shall be taken by such public authority and rent and other charges for the Collocation Space or Adjacent Arrangement shall be paid up to that day, or the day upon which the Collocation Space can no longer be used for interconnection and access to unbundled network elements, whichever is earlier, with proportionate refund by BellSouth of such rent and charges as may have been paid in advance for a period subsequent to the date of the taking. If any part of the Collocation Space or Adjacent Arrangement shall be taken under eminent domain, BellSouth and KMC Data shall each have the right to terminate this Attachment with respect to such Collocation Space or Adjacent Arrangement and declare the same null and void, by written notice of such intention to the other Party within ten (10) days after such taking.

**16. Nonexclusivity**

- 16.1 KMC Data understands that this Attachment is not exclusive and that BellSouth may enter into similar agreements with other Parties. Assignment of space pursuant to all such agreements shall be determined by space availability and made on a first come, first served basis.

**17. Notice of Non-Emergency Work**

- 17.1 BellSouth shall provide KMC Data with written notice three (3) business days prior to those instances where BellSouth or its subcontractors may be performing non-emergency work that has a substantial likelihood of directly affecting the Collocation Space occupied by KMC Data, or that is directly related to circuits that support KMC Data equipment. BellSouth will inform KMC Data by telephone of emergency related activity that BellSouth or its subcontractors may be performing that has a substantial likelihood of directly affecting the Collocation Space occupied by KMC Data, or is directly related to circuits that support KMC Data equipment. Notification of any emergency related activity shall be made as soon as practicable after BellSouth learns that such emergency activity is necessary so that KMC Data can take any action required to monitor or protect its service.

## ENVIRONMENTAL AND SAFETY PRINCIPLES

The following principles provide basic guidance on environmental and safety issues when applying for and establishing Collocation arrangements.

### 1. GENERAL PRINCIPLES

- 1.1 Compliance with Applicable Law. BellSouth and KMC Data agree to comply with applicable federal, state, and local environmental and safety laws and regulations including U.S. Environmental Protection Agency (USEPA) regulations issued under the Clean Air Act (CAA), Clean Water Act (CWA), Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act (SARA), the Toxic Substances Control Act (TSCA), and OSHA regulations issued under the Occupational Safety and Health Act of 1970, as amended and NFPA and National Electrical Codes (NEC) and the NESC (Applicable Laws). Each Party shall notify the other if compliance inspections are conducted by regulatory agencies and/or citations are issued that relate to any aspect of this Attachment.
- 1.2 Notice. BellSouth and KMC Data shall provide notice to the other, including Material Safety Data Sheets (MSDSs), of known and recognized physical hazards or Hazardous Chemicals existing on site or brought on site. A Hazardous Chemical inventory list is posted on an OSHA Poster and updated annually at each Central Office. This Poster is normally located near the front entrance of the building or in the lounge area. Each Party is required to provide specific notice for known potential Imminent Danger conditions. KMC Data should contact 1-800-743-6737 for any BellSouth MSDS required.
- 1.3 Practices/Procedures. BellSouth may make available additional environmental control procedures for KMC Data to follow when working at a Premises (See Section 2, below). These practices/procedures will represent the regular work practices required to be followed by the employees and suppliers of BellSouth for environmental protection. KMC Data will require its suppliers, agents and others accessing the Premises to comply with these practices. Section 2 lists the Environmental categories where BST practices should be followed by KMC Data when operating in the Premises.
- 1.4 Environmental and Safety Inspections. BellSouth reserves the right to inspect the KMC Data space with proper notification. BellSouth reserves the right to stop any KMC Data work operation that imposes Imminent Danger to the environment, employees or other persons in the area or Premises.
- 1.5 Hazardous Materials Brought On Site. Any hazardous materials brought into, used, stored or abandoned at the Premises by KMC Data are owned by KMC Data. KMC Data will indemnify BellSouth for claims, lawsuits or damages to persons or property

- caused by these materials. Without prior written BellSouth approval, no substantial new safety or environmental hazards can be created by KMC Data or different hazardous materials used by KMC Data at Premises. KMC Data must demonstrate adequate emergency response capabilities for its materials used or remaining at the Premises.
- 1.6 Spills and Releases. When contamination is discovered at a Premises, either Party discovering the condition must notify the other Party. All Spills or Releases of regulated materials will immediately be reported by KMC Data to BellSouth.
- 1.7 Coordinated Environmental Plans and Permits. BellSouth and KMC Data will coordinate plans, permits or information required to be submitted to government agencies, such as emergency response plans, spill prevention control and countermeasures (SPCC) plans and community reporting. If fees are associated with filing, BellSouth and KMC Data will develop a cost sharing procedure. If BellSouth's permit or EPA identification number must be used, KMC Data must comply with all of BellSouth's permit conditions and environmental processes, including environmental "best management practices (BMP)" (see Section 2, below) and/or selection of BST disposition vendors and disposal sites.
- 1.8 Environmental and Safety Indemnification. BellSouth and KMC Data shall indemnify, defend and hold harmless the other Party from and against any claims (including, without limitation, third-party claims for personal injury or death or real or personal property damage), judgments, damages (including direct and indirect damages and punitive damages), penalties, fines, forfeitures, costs, liabilities, interest and losses arising in connection with the violation or alleged violation of any Applicable Law or contractual obligation or the presence or alleged presence of contamination arising out of the acts or omissions of the indemnifying Party, its agents, suppliers, or employees concerning its operations at the Premises.
- 2. CATEGORIES FOR CONSIDERATION OF ENVIRONMENTAL ISSUES**
- 2.1 When performing functions that fall under the following Environmental categories on BellSouth's Premises, KMC Data agrees to comply with the applicable sections of the current issue of BellSouth's Environmental and Safety Methods and Procedures (M&Ps), incorporated herein by this reference. KMC Data further agrees to cooperate with BellSouth to ensure that KMC Data's employees, agents, and/or suppliers are knowledgeable of and satisfy those provisions of BellSouth's Environmental M&Ps which apply to the specific Environmental function being performed by KMC Data, its employees, agents and/or suppliers.
- 2.2 The most current version of the reference documentation must be requested from KMC Data's BellSouth Regional Contract Manager (RCM) (f/k/a Account Team Collocation Coordinator – ATCC).

| <b>ENVIRONMENTAL CATEGORIES</b>                                                                                                                                                                | <b>ENVIRONMENTAL ISSUES</b>                                                                                                                                             | <b>ADDRESSED BY THE FOLLOWING DOCUMENTATION</b>                                                                                    |

### 3. DEFINITIONS

Generator. Under RCRA, the person whose act produces a Hazardous Waste, as defined in 40 C.F.R. § 261, or whose act first causes a Hazardous Waste to become subject to regulation. The Generator is legally responsible for the proper management and disposal of Hazardous Wastes in accordance with regulations.

Hazardous Chemical. As defined in the U.S. Occupational Safety and Health (OSHA) hazard communication standard (29 C.F.R. § 1910.1200), any chemical which is a health hazard or physical hazard.

Hazardous Waste. As defined in Section 1004 of RCRA.

Imminent Danger. Any conditions or practices at a Premises which are such that a danger exists which could reasonably be expected to cause immediate death or serious harm to people or immediate significant damage to the environment or natural resources.

Spill or Release. As defined in Section 101 of CERCLA.
