HAND DELIVERED

**Re: Direct Testimony of Lionor M. Torrez and Don J. Wood in Docket
No. 06-00093: Joint Application of AT&T Inc. and BellSouth
Corporation, Together with its Certificated Tennessee Subsidiaries
Regarding Change of Control of the Operating Authority of
BellSouth Corporations Tennessee Subsidiaries.**

Dear Chairman Jones,

Please find enclosed, originals and 14 copies of the referenced direct testimony.
Please date stamp a copy of each for my records.

Thank you for your assistance regarding this matter. If we can be of further
assistance, please do not hesitate to contact us.

Very truly yours,

FARRIS MATHEWS BRANAN
BOBANGO HELLEN & DUNLAP, PLC

Docket No. 06-00093

**DIRECT TESTIMONY OF DON J. WOOD ON BEHALF
OF TIME WARNER TELECOM OF THE MID-SOUTH, LLC**

June 2, 2006

1 **DIRECT TESTIMONY OF DON J. WOOD**

2 **ON BEHALF OF TIME WARNER TELECOM OF THE MID-SOUTH, LLC**

3 **BEFORE THE TENNESSEE REGULATORY AUTHORITY**

4 **DOCKET NO. 06-00093, JUNE 2, 2006**

5 **Background and Purpose of Testimony**

6 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

7 A. My name is Don J. Wood. I am a principal in the firm of Wood & Wood, an economic
8 and financial consulting firm. My business address is 30000 Mill Creek Avenue, Suite
9 395, Alpharetta, Georgia 30022. I provide economic and regulatory analysis of the
10 telecommunications, cable, and related convergence industries with an emphasis on
11 economic policy, competitive market development, and cost-of-service issues.

12
13 Q. PLEASE DESCRIBE YOUR BACKGROUND AND EXPERIENCE.

14 A. I received a BBA in Finance with distinction from Emory University and an MBA with
15 concentrations in Finance and Microeconomics from the College of William and Mary.
16 My telecommunications experience includes employment at both a Regional Bell
17 Operating Company ("RBOC") and an Interexchange Carrier ("IXC").

18 Specifically, I was employed in the local exchange industry by BellSouth
19 Services, Inc. in its Pricing and Economics, Service Cost Division. My responsibilities
20 included performing cost analyses of new and existing services, preparing documentation
21 for filings with state regulatory commissions and the Federal Communications

1 Commission ("FCC"), developing methodology and computer models for use by other
2 analysts, and performing special assembly cost studies.

3 I was employed in the interexchange industry by MCI Telecommunications
4 Corporation, as Manager of Regulatory Analysis for the Southern Division. In this
5 capacity I was responsible for the development and implementation of regulatory policy
6 for operations in the southern U. S. I then served as a Manager in MCI's Economic
7 Analysis and Regulatory Affairs Organization, where I participated in the development of
8 regulatory policy for national issues.

9
10 Q. HAVE YOU PREVIOUSLY PRESENTED TESTIMONY BEFORE STATE
11 REGULATORY AGENCIES?

12 A. Yes. I have testified on telecommunications issues before the regulatory commissions of
13 forty-one states, Puerto Rico, and the District of Columbia. I have also presented
14 testimony regarding telecommunications issues in state, federal, and overseas courts,
15 before alternative dispute resolution tribunals, and at the FCC. A listing of my previous
16 testimony is attached as Exhibit DJW-1.

17
18 Q. HAVE YOU PREVIOUSLY PRESENTED TESTIMONY TO THE TENNESSEE
19 REGULATORY AUTHORITY ("TRA") AND ITS PREDECESSOR, THE
20 TENNESSEE PUBLIC SERVICE COMMISSION?

1 A. Yes. I have testified before both regulatory bodies on several occasions, most recently in
2 Docket No. 03-00491.

3
4 Q. HAVE YOU REVIEWED THE JOINT APPLICATION FILED BY BELLSOUTH
5 CORPORATION ("BELLSOUTH") AND AT&T, INC. ("AT&T")?

6 A. Yes.

7
8 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

9 A. I have been asked by Time Warner Telecom of the MidSouth, LLC ("TWTC") to explain
10 why marketplace realities compel the application of certain specific conditions on the
11 proposed merger of BellSouth and AT&T. The proposed merger will lead to a significant
12 reduction in competitive alternatives, an increase in market concentration, and subsequent
13 increase in market power in the markets for certain business services, including but not
14 limited to special access services.

15
16 **Analysis of the Impact of the Proposed Merger**

17 Q. WHAT IS THE UNDERLYING BASIS FOR YOUR ANALYSIS OF THE IMPACT OF
18 THE PROPOSED MERGER?

19 A. The Department of Justice – Federal Trade Commission *Horizontal Merger Guidelines*

1 ("Merger Guidelines" or "Guidelines," 1992, and amended 1997)¹ provide the primary
2 mechanism that should be used to evaluate how the proposed merger will affect
3 customers within the different markets for telecommunications services in Tennessee.
4

5 Q. WHAT IS THE FIRST STEP IN SUCH AN ANALYSIS?

6 A. According to the Merger Guidelines, the essential first step of any meaningful merger
7 analysis is the definition of the relevant markets. These markets have both a product and
8 geographic definition.

9 In my testimony I have focused on the effects of the proposed merger on a
10 specific product market: Type I special access services. As I will explain below, the
11 relevant geographic market definition has two components: the first focuses on the
12 facilities being provided (a building-by building analysis) and the second focuses on the
13 geographic area over which BellSouth prices the service (an MSA-wide analysis).
14

15 Q. WHAT ARE TYPE I SPECIAL ACCESS SERVICES?

16 A. The FCC has defined the special access market on several occasions, most recently in the
17 merger of SBC and the legacy AT&T.² According to the FCC, special access consists of

¹ http://www.usdoj.gov/atr/public/guidelines/horiz_book/hmg1.html.

² *SBC Communications Inc. and AT&T Corp. Applications for Approval of Transfer of Control*, Memorandum Opinion & Order, 20 FCC Rcd 18290, ¶¶ 25-27 (2005) ("*SBC-AT&T Order*"). I am using the term "legacy AT&T" to refer to the entity that existed after divestiture but before the merger with SBC. I will refer to the entity that exists

1 a dedicated transmission link between two locations within the same local exchange,
2 most often provisioned via high-capacity (DS-1 or above) circuits. Special access
3 services are used to directly connect tenants of commercial building to a competing
4 carrier's network or to connect different locations of the same business customer. Both
5 voice and data may be carried using special access services.

6 The facilities used to provide special access service typically consist of three
7 different segments: (1) an entrance facility, which connects the purchasing carrier's point
8 of presence ("POP") to the nearest wire center, carrier hotel, or similar location
9 ("entrance facility"); (2) local transport; and (3) a "last mile" connection or local loop,
10 which runs from the transport facility to the end-user customer.

11 As the FCC has correctly pointed out, there are at least two separate product
12 markets for special access services. "Type I" special access services are offered wholly
13 over a carrier's own facilities, and "Type II" special access services are offered using a
14 combination of the carrier's own facilities and the special access services of another
15 carrier. Type I and Type II services are not substitutes, because a carrier providing
16 services solely over its own facilities can deliver higher quality service than is the case
17 with a carrier that must rely on a combination of its own facilities and those of another
18 carrier *See generally SBC/AT&T Order.*

19 Q. WHY IS THE PRODUCT MARKET FOR TYPE I SPECIAL ACCESS SERVICES

after the merger of SBC and AT&T as SBC/AT&T.

1 IMPORTANT TO TWTC?

2 A. When purchasing special access from other carriers, TWTC purchases almost exclusively
3 Type I service (that is, transmission services provided to TWTC by another carrier
4 exclusively over that wholesale carrier's own facilities).

5
6 Q. WHAT IS THE RELEVANT GEOGRAPHIC MARKET DEFINITION FOR SPECIAL
7 ACCESS SERVICES?

8 A. The geographic market must be defined in terms of both the nature of the facilities being
9 provided and in terms of the area over which BellSouth prices the service.

10 According to the Merger Guidelines, the relevant geographic market is the
11 smallest area in which a hypothetical monopolist may profitably impose a small but
12 significant non-transitory increase in the price of a product.³

13 When the facilities used to provide special access services are considered, it is
14 clear that each customer location constitutes a discrete relevant geographic market. A
15 business located in a certain building that wishes to purchase telecommunications
16 services cannot substitute special access that is being provided to a different building (or
17 in many cases a different floor of the same building) in response to an increase in the
18 price of special access services to its existing location. When viewed from a supply
19 perspective, the customer location-specific approach accurately captures the fact that the

³ Merger Guidelines § 1.2.

1 entry barriers and revenue opportunities associated with deploying transmission facilities
2 vary substantially from customer location to customer location. The FCC and the
3 Department of Justice have used buildings as a proxy for business customer locations in
4 defining geographic markets for special access services. For this reason, a building-by-
5 building analysis is a necessary component of any examination of the competitiveness of
6 the special access markets in the BellSouth territory.

7 In addition to this customer location-specific analysis, it is also necessary to
8 consider the effects of the merger across larger geographic areas (such as an MSA).
9 Prices for special access are more likely to increase on a regional level than on a
10 building-by-building level. ILECs such as BellSouth price their generally-available
11 special access offerings on such a broader geographic basis. The ILECs usually only
12 offer discounts off of high monthly rates to purchasers that agree to enter into volume-
13 term agreements that cover one or more MSAs. Once an ILEC has been granted pricing
14 flexibility on an MSA or similarly-sized geographic area, it is free to implement region-
15 wide term and volume commitments for special access services across an MSA (or all
16 MSAs in which it has received pricing flexibility in its region in exchange for discounts
17 off of the monthly rates). It is safe to assume that BellSouth's special access facilities
18 reach virtually every building in every MSA in which it has received pricing flexibility.
19 As a result, BellSouth can set a profit-maximizing price across an entire MSA or group of
20 MSAs, including both locations in which it faces competition and locations in which it
21 has market power. Elimination of SBC/AT&T as a significant actual and potential

competitor from building-specific locations in a BellSouth region MSA will almost certainly have an impact on the MSA-wide prices that BellSouth charges.

Q. WHAT IS THE LIKELY IMPACT ON COMPETITORS SUCH AS TWTC WHO MUST USE TYPE I SPECIAL ACCESS SERVICES IN ORDER TO SERVE BUSINESS CUSTOMERS?

A. The markets for Type I special access services remain highly concentrated and subject to high entry barriers, and BellSouth's service territory in Tennessee is no exception. The use of Type I services remains the only economically viable option for several reasons, particularly the difficulty of duplicating the "last mile" connection or local loop.

The proposed merger would eliminate AT&T as a significant actual and potential competitor in the BellSouth region for special access services. Given the high entry barriers in this market and SBC/AT&T's advantaged position as a potential competitor in locations not currently served by its network, the elimination of SBC/AT&T from the special access market in the BellSouth region would result in substantial harm to consumer welfare.

Q. DOES SBC/AT&T CURRENTLY COMPETE IN THE MARKETS FOR SPECIAL ACCESS SERVICES IN BELL SOUTH TERRITORY?

A. Yes. SBC/AT&T has local fiber networks in 11 BellSouth metropolitan statistical areas ("MSAs"). The loss of SBC/AT&T as a potential competitor in the special access market

1 in the BellSouth territory is also an important aspect of the proposed merger's impact.

2 The legacy of AT&T's aggressive competitive posture prior to the SBC merger included
3 its expansion into new geographic markets. After its merger with SBC, AT&T began to
4 pose an even greater threat to BellSouth as a potential competitor.⁴

5 As the largest telecommunications company in the nation with resources in
6 territories adjacent to BellSouth, SBC/AT&T is the competitor that is best-positioned to
7 overcome the substantial entry barriers associated with deploying local transmission
8 facilities in the BellSouth region. SBC/AT&T can take advantage of its significant scale
9 and scope economies to extend its existing local transmission facilities in the BellSouth
10 region. SBC/AT&T also is almost uniquely positioned to win business customers in the
11 BellSouth territory because of the combination of its (1) existing network assets in the
12 territory, (2) position as an ILEC in a contiguous region, (3) the community of interest
13 among businesses with multiple locations throughout the BellSouth and the SBC/AT&T
14 regions, and (4) SBC/AT&T's well-established brand name. The FCC has also held that
15 ILECs possess special advantages in entering out-of-region markets because of, among
16 other things, "their intimate knowledge of local telephone operations."⁵

17
18 Q. IS YOUR CONCLUSION THAT THE PROPOSED MERGER WILL HARM

⁴ Stated more precisely, if the statements of SBC and the legacy AT&T in support of their proposed merger were honest and accurate, the combined SBC/AT&T now poses a much greater threat to BellSouth as a potential competitor.

⁵ *SBC-Ameritech Order* ¶ 84.

1 COMPETITION AND CUSTOMERS CONSISTENT WITH PREVIOUS DECISIONS
2 OF THE FCC?

3 A. Yes. In the most recent (SBC/AT&T and Verizon/MCI) mergers, the FCC found the
4 elimination of a large, well-financed contiguous ILEC as an actual and potential
5 competitor in the local market (a market, like the special access market characterized by
6 high entry barriers and high concentration) results in substantial harms to consumer
7 welfare. The proposed merger poses the same threat of harm. It is inescapable that the
8 market concentration levels for special access will increase in all of the buildings and
9 along all of the transport routes in which SBC/AT&T has deployed facilities in the
10 BellSouth territory. In addition, the threat of SBC/AT&T's network expansion will be
11 eliminated in areas that are near its existing network assets in the BellSouth territory.
12 Eliminating SBC/AT&T will enhance the merged firm's ability to increase prices across
13 entire MSAs without losing market share, and it will deprive business customers and
14 potential wholesale customers of SBC/AT&T the benefits of its future investment and
15 innovation.

16 Q. YOU STATED THAT THE ELIMINATION OF SBC/AT&T AS AN EXISTING AND
17 POTENTIAL COMPETITOR WILL INCREASE BELL SOUTH'S MARKET POWER.
18 WHAT ARE THE LIKELY CONSEQUENCES OF SUCH AN INCREASE IN
19 MARKET POWER?

20 A. Perhaps the most serious harm caused by the proposed merger is that combining the local
21 operations of SBC/AT&T and BellSouth would give the merged entity a greater incentive

1 to overprice, deny, delay or degrade competitors' access to needed inputs to their own
2 retail telecommunications services. The proposed merger will potentially result in even
3 greater harms than was the case in previous mergers since the combination of BellSouth
4 and SBC/AT&T would result in a combined ILEC footprint that is far larger than the
5 footprint created by these previous mergers.

6 The unprecedented size of the proposed merged entity is hardly trivial. Based on
7 the most recent FCC wireline statistical reports, a combined SBC/AT&T/BellSouth will
8 have 40.29 percent of the nation's access lines, Verizon will have only 28.45 percent,
9 while Qwest will have a paltry 8.47 percent. In terms of revenue, the combined
10 SBC/AT&T/BellSouth would have \$98.84 billion, Verizon have \$75.11 billion,⁶ while
11 Qwest will only have \$13.9 billion.

12
13 Q. WILL THE PROPOSED MERGER REDUCE THE ABILITY OF REGULATORS TO
14 DETECT AND RESPOND TO ANTICOMPETITIVE CONDUCT BY THE
15 COMBINED ENTITY?

16 A. Yes. Competition in the provision of retail services is only possible if regulators have the
17 ability to detect and limit the opportunity of SBC/AT&T/BellSouth to overprice, deny,
18 delay and degrade competitors' access to necessary inputs (such as special access). One
19 important means of regulating ILEC conduct is to "benchmark" the behavior of one ILEC

⁶ The \$23 billion revenue gap between first and second is not insignificant. A billion here and billion there, and pretty soon you're talking real money.

1 against another. As the FCC has previously concluded

2 Given [their] incentives to resist competitive entry, independent
3 LECs, absent collusion, are likely to adopt different defensive
4 strategies to forestall competitive entry, and each particular
5 strategy will reveal information to regulators and competitors. One
6 incumbent LEC may claim, for example, that a particular form of
7 interconnection is infeasible, while a second may resist the
8 unbundling of a particular network element, and a third may
9 oppose collocation of specific types of equipment in central
10 offices. In such situations, the behavior of other major incumbent
11 LECs can be used as benchmarks to evaluate the outlying
12 incumbent's claims.⁷

13
14 The loss of one of the few remaining RBOCs to a merger impairs the ability of
15 regulators to perform benchmarking analysis among the remaining RBOCs, resulting in
16 substantial public interest harms. These harms stem from three main sources: (1) fewer
17 RBOCs provide fewer "data-points" for a regulator to analyze in its benchmarking
18 analysis, increasing the likelihood of errors; (2) fewer RBOCs make it less likely that
19 there is a "model" RBOC against which a "best-practice" can be established for all
20 RBOCs; and (3) fewer RBOCs increase the likelihood that those remaining will collude
21 explicitly or tacitly to limit the information available to regulators to conduct their
22 analysis.

23 The loss of data points also impacts the incentives of a price cap firm. In markets
24 with few firms to benchmark, the high performing firm is "taxed" out of the benefits of

⁷ *SBC/Ameritech Merger Order* ¶ 108.

1 its high performance because the high performing firm will have a disproportionate effect
2 on establishing a new x-factor. This recognized “ratchet effect” decreases the incentive
3 for firms to increase their performance. Because of its size and the operation of this
4 “ratchet effect,” a combined SBC/AT&T/BellSouth would likely have an incentive to
5 reduce its performance to a lower level. The loss of BellSouth as an independent
6 company will be especially harmful because there are indications that it has operated – at
7 least in some markets for some services – as a so-called “maverick” firm. That is, a firm
8 which, for whatever reason, has “a greater economic incentive to deviate from the terms
9 of coordination than do most of their rivals. The utility of best practice benchmarking
10 greatly increases with the presence of a “maverick” firm. The loss of a maverick firm
11 would harm the ability of the regulator to benchmark more than the loss of Verizon or
12 AT&T.

13 BellSouth’s history of cooperation with many of TWTC’s requests, such as access
14 to Ethernet local transmission facilities and performance measures and penalties for
15 special access services (as described in the testimony of Lionor M. Torrez), are examples
16 of BellSouth’s role as such a maverick. If the proposed merger is approved, it is virtually
17 certain that BellSouth will not show such a willingness to cooperate with a competitor.
18

19 **Recommendations**

20 Q. SHOULD THE TRA ACT NOW TO MITIGATE THE CONSUMER IMPACT OF THE
21 SUBSTANTIAL INCREASE IN MARKET POWER THAT WOULD RESULT FROM

1 THE PROPOSED MERGER?

2 A. Yes. The TRA should create two conditions if the proposed merger is approved.

3 First, the merged SBC/AT&T/BellSouth entity should be subject to an accelerated
4 dispute resolution process for all inter-carrier disputes including anti-competitive pricing
5 complaints. This dispute resolution could occur through expedited contested cases or
6 through arbitration. All disputes between carriers should be included in this process
7 (anti-competitive pricing; interconnection/peering; billing; service quality; etc.).

8 In those instances in which retail prices are deregulated and/or pricing flexibility
9 has been implemented, a finding that anti-competitive pricing or unlawful price
10 discrimination has occurred should be made considering all relevant factors (including
11 but not limited to) (1) whether customers have been or will be injured as a result of the
12 alleged price differences; (2) whether there is a legitimate business reason to distinguish
13 between the customers who are being treated differently; (3) whether the customers who
14 are being treated differently are similarly situated; and (4) whether customers may choose
15 a functionally equivalent service from an alternative service provider at substantially the
16 same price and terms.

17 Second, the TRA should impose an obligation on the surviving entity to continue
18 to offer access to underlying facilities for at least ten years – namely, special access and
19 Ethernet - at just and reasonable rates. As TWTC witness Nora Torrez addresses in her
20 direct testimony, the TRA also needs to order performance measures with penalties for
21 special access and Ethernet products. These conditions will help to curb the potential

1 competitive harms described above.

2

3 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

4 A. Yes.

EXHIBIT DJW-1

Vita of Don J. Wood

30000 Mill Creek Avenue, Suite 395, Alpharetta, Georgia 30022

Voice 770.475.9971, Facsimile 770.475.9972

CURRENT EMPLOYMENT

Don J. Wood is a principal in the firm of Wood & Wood. He provides economic, financial, and regulatory analysis services in telecommunications and related convergence industries, specializing in economic policy related to the development of competitive markets, inter-carrier compensation, and cost of service issues. In addition, Mr. Wood advises industry associations on regulatory and economic policy and assists investors in their evaluation of investment opportunities in the telecommunications industry. The scope of his work has included wireline and wireless communications, data services, and emerging technologies.

As a consultant, Mr. Wood has assisted his clients in responding to the challenges and business opportunities of the industry both before and subsequent to the Telecommunications Act of 1996. Prior to his work as a consultant, Mr. Wood was employed in a management capacity at a major Local Exchange Company and an Interexchange Carrier. He has been directly involved in both the development and implementation of regulatory policy and business strategy.

In the area of administrative law, Mr. Wood has presented testimony before the regulatory bodies of forty-one states, the District of Columbia, and Puerto Rico, and has prepared comments and testimony for filing with the Federal Communications Commission. The subject matter of his testimony has ranged from broad policy issues to detailed cost and rate analysis.

Mr. Wood has also presented testimony in state, federal, and overseas courts regarding business plans and strategies, competition policy, inter-carrier compensation, and cost of service issues. He has presented studies of the damages incurred by plaintiffs and has provided rebuttal testimony to damage calculations performed by others. Mr. Wood has also testified in alternative dispute resolution proceedings conducted pursuant to both AAA and CPR rules.

Mr. Wood is an experienced commercial mediator and is registered as a neutral with the Georgia Office of Dispute Resolution.
