Re: Petition for Expedited Review of Growth Code Denial by the Number Pooling Administrator, Docket No. 06-00160

Dear Ms. Standley :

This letter is to respond to the questions you sent on June 29, 2006.

1. Provide NuVox Communications' switch identification, CLLI, serving customers from the Nashville rate center.

NuVox's CLLI serving customers from the Nashville rate center is NSVLTN02DS0 .

2. Provide a complete explanation for the differences in the MTEs between page 4 of the petition referenced above and the Pooling Administration Part 1, Block Application Form in Exhibit A.

The correct MTE is as set forth in the Pooling Administration Form. The MTE on page 4 is incorrect and the result of a clerical error.

3. Provide the percentage of utilization as reported at the time of NuVox Communications' submission of the Pooling Administration Part 1s in the aggregate, as if submitting one Part 1 for one NXX growth code instead of 10 Part 1s.

The utilization at that time was 43% at the code level.

4. Provide a complete list, by NXX-X, showing the percentage of utilization for each thousand-block assigned to the Nashville rate center for use in the NuVox switch identified in 1 above.

Please see the attachment showing the utilization percentage in each block in the Nashville Rate Center.

Very truly yours,

BOULT, CUMMINGS, CONNERS & BERRY, PLC
