RE: TENNESSEE WASTEWATER SYSTEMS, INC./UTILITY CAPACITY
CORPORATION, INC. - TENNESSEE REGULATORY AUTHORITY
DOCKET NO. 06-259

Dear Smoky Cove Homeowner:

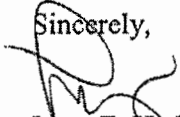

As you are aware, Tennessee Wastewater Systems, Inc./Utility Capacity Corporation, Inc. has petitioned the Tennessee Regulatory Authority (TRA) for approval to change the classification for sewer service provided to Smoky Cove from residential to commercial. This change in classification may result in a substantial increase in rates paid by homeowners.

I have filed a petition with the TRA to intervene in this matter. As a result of this petition, we are now required to provide certain documents to the attorney representing Tennessee Wastewater Systems, Inc.

We should be able to provide most of the requested information from our files or from documents obtained, with your permission, from your rental management company. However, it is necessary that we ask you to provide copies of your Sevier County Electric System bills for August, October, and December 2006, and March 2007. We realize that you may not have owned this property for all the months mentioned above, but we need to submit as much of the requested material as possible.

I have enclosed an Information Release Form authorizing your rental management company to provide rental income history and other rental statistics on your Smoky Cove property. Please sign this release and fax or mail copies of this completed form and your Sevier County Electric System bills to this office as soon as possible. We are required to respond to this Discovery Request within 10 days. I will keep you informed as we proceed through this legal process.

Sincerely,

Lynn E. Hedrick
Chief Manager

**Direct Testimony of Lynn Hedrick**

**Q: Please state your full name.**

A: Lynn Edward Hedrick

**Q: Where are you employed?**

A: Smoky Cove Construction, LLC

**Q: What is your position with that company?**

A: I am the Chief Manager of Smoky Cove Construction, LLC

**Q: For how many years have you developed properties?**

A: I have been developing properties for over 20 years.

**Q: During your time as a developer, have you built primarily commercial or residential units?**

A: Residential.

**Q: What is your involvement with Smoky Cove Subdivision?**

A: I am responsible for the development of and sale of property.

**Q: What was your role in the planning and developing of the wastewater system that services the property?**

A: I developed criteria to determine the type of system to be used and paid for the complete system to be constructed and installed.

**Q: What type of development is Smoky Cove Subdivision?**

A: Smoky Cove subdivision is a residential log home community consisting of private residences.

**Q: Are there any commercial buildings on the property?**

A: No

**Q: Is the construction for each unit typical of that of a residential dwelling?**

A: Yes, based on my knowledge and experience, the dwellings are typical of residences built in this area.

**Q: Are there any construction or design features which would make any of these units more typical of a commercial structure than a residence?**

A: No. The units built are standard residential units.

**Q: Based upon the construction, is there any reason that these units should be classified as anything other than residential?**

A: No. These units are constructed in the same manner that any single-family dwelling would be constructed, and there is nothing about this construction that would justify that these properties be reclassified as commercial.

**Q: Did HP Development, LLC construct the entirety of Smoky Cove Subdivision?**

A: Yes. They also paid for all development and construction costs.

**Q: How many units are currently in Smoky Cove Subdivision?**

A: There are currently forty-one (41) units.

**Q: Are the units in Smoky Cove Subdivision residential or commercial?**

A: All units are residential. Several owners have listed their cabins with rental agencies and those cabins produce some rental income.

**Q: Approximately how many of the units comprising Smoky Cove subdivision are used for rental purposes?**

A: There are currently thirty-one (31) units used for rental purposes.

**Q: To the best of your knowledge, what is the average occupancy for those units which are used for rental purposes?**

A: To the best of my knowledge, in one calendar year, I would estimate the rental cabins are occupied under 50% of the time.

**Q: With whom did you contract to develop the wastewater system?**

A: Michael Hines and his company, Utility Capacity Corporation (UCC).

**Q: Will you please describe the manner in which you came into contact with the developer of the wastewater system?**

A: I was referred by Richard Frazier of Hidden Springs Resort.

**Q: What were the terms of the agreement that you had with the developer of the wastewater system?**

A: As the contracts speak for themselves, please see attached copy of the Construction and Expansion Contract.

**Q: Please describe in as much detail as possible any communications, either oral or otherwise, that you may have had with any representative of TWSI?**

A: On more than one occasion, I expressed my apprehension to Mr. Hines that his proposed contract allowed for UCC and/or Tennessee Wastewater System, Inc. (TWSI) to maintain exclusive rights to the development. My concern was that this arrangement did not promote fair competition and, thus, was not sound business practice. Mr. Hines stated that his company was regulated by the Tennessee Regulatory Authority (TRA). Therefore, rates could never be increased dramatically because such increases would not be approved by TRA.

**Q: With whom did you have conversations regarding the scheduling rate that would be applied to the units?**

A: Michael Hines

**Q: What factors led to your decision to use TWSI?**

A: As there were no other options for service providers at that time due to Pigeon Forge Regional Planning Commission's refusal to allow multiple services providers, TWSI was the only option which I had at the time. Therefore, the factors that led me to contract with TWSI were that they were the only service provider and I felt that their residential rates would be fair to the purchasers of property from me. Had I known that there was an option to raise the rates to a commercial level, I may have strongly considered other options such as septic fields for each lot.

**Q: Who actually designed the wastewater system?**

A: To the best of my knowledge, Michael Hines designed the wastewater system.

**Q: Did you provide any plans, schematics, and/or blueprints of the proposed subdivision development to Tennessee Wastewater Systems or their affiliates?**

A: Yes, documents were provided showing the proposed subdivision layout and the number of units to be constructed thereon.

**Q: So based upon these plans, TWSI was fully aware of the nature of the residences that were to be built on the property?**

A: Yes.

**Q: Did TWSI or UCC make a recommendation as to the size of the system that should be implemented based upon these plans?**

A: Yes.

**Q: How many units were anticipated to be built in the subdivision?**

A: One hundred sixty (160) units were anticipated to be built in the development.

**Q: How many units were developed?**

A: There are currently forty-one (41) units developed.

**Q: Since the design and implementation of the wastewater system, have there been any modifications or alterations to any of the units which would increase the burden on the waste water system?**

A: No, there have been no modification or alterations to any of the units since the design and implementation of the wastewater system.

**Q: Has Tennessee Wastewater Systems Inc. provided any documentation to you regarding the usage of these units?**

A: I have only been provided documentation as to one unit which shows that Smoky Bear had calculated gallons pumped of 16.8 gpd. Other than the aforementioned usage, I have not been provided any documentation from TWSI showing the usage of the units.

**Q: Has Tennessee Wastewater Systems Inc. provided any documentation which tends to show that the usage exceeds the capacity of the wastewater system?**

A: No, I have not been provided any documentation from TWSI showing that the usage exceeds capacity of the wastewater system.

**Q: Has Tennessee Wastewater Systems Inc. provided any documentation of any nature which shows the usage for the subdivision as a whole?**

A: No, I have not been provided any documentation showing the usage of the subdivision as a whole from TWSI.

**Q: What would the effect be if the proposal of Tennessee Wastewater Systems Inc. is approved by the Tennessee Regulatory Authority?**

A: The rates paid by current homeowners whose cabins are on an overnight rental program would at least double and, in some instances, more than quadruple to close to \$300 per month. This increase would mean the net income produced by these cabins

would be significantly less, thus making these homes much less desirable as investment property. A rate increase such as that proposed by TWSI would certainly discourage potential buyers.

**Q: Why are you opposing the Petition of Tennessee Wastewater Systems Inc.?**

A: At no time during the planning or the construction phases of the wastewater treatment system, did representatives of UCC or TWSI indicate that there might, at any time, be the possibility that the service provided to Smoky Cove homeowners would be reclassified from residential to commercial. There is no indication that the wastewater produced by any home in Smoky Cove exceeds normal or reasonable residential usage.

**Q: Would you consider the dwellings which you have developed residential or commercial?**

A: The dwellings are undoubtedly residential in nature. To the best of my knowledge, every property owner in Smoky Cove Subdivision uses their property either as their primary residence or as a second residence that qualifies as such under the regulations set forth by the Internal Revenue Service. No owner of property within Smoky Cove Subdivision uses their property in any manner that would prevent it from qualifying as a second residence.
