Tennessee Regulatory Authority
460 James Robertson Parkway
Nashville, Tennessee 37243-0505

To Whom It May Concern:

Recently we received word (re: Docket No. 06-00259) that the Tennessee Regulatory Authority has petitioned to reclassify specific resort areas in Sevier County from residential to commercial, specifically Smokey Cove. We would like to express our disagreement in this matter. The letter refers to a minimum of a \$55.00 per month charge for up to the first 300 gallons per day of average daily flow, the unit we own does not consume near that volume. As well as there are residents that reside in this community that do not use that much water while living there. In our opinion to convert this property over to commercial property does not meet the standard of volume a "true" commercial property would consume. We do agree with this proposal and would like our disagreement to be noted as such.

Thank you,
