RE: Docket No. 07-00020– Atmos Energy Corporation, Tariff Filing to Modify and Add Language Regarding Transportation Service. (Tariff No. 2007-0021)

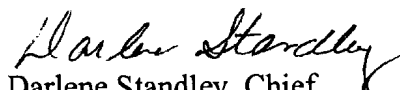

Dear Ms. Childers:

Staff is in the process of reviewing the tariff referenced above, which was filed by Atmos on January 10, 2007. To clarify the filing, please provide responses to the following data questions. In accordance with Authority rules, please furnish an original and thirteen (13) copies of your response. We would ask that the responses be provided no later than Friday, February 2, 2007.

1. Does the expanded language found in the Imbalance provision section of the tariff on 2<sup>nd</sup> Revised Sheets No. 22 and 23 result in increased rates to customers over the applicable rates in the current tariff? If so, please estimate the additional annual revenue generated by the provisions of the proposed tariff.
2. Under the provisions of the Operational Flow Order, customers will be charged a penalty of \$25.00 per Dth for unauthorized overruns or unauthorized deliveries to the Company in violation of the Company's order. Does Atmos incur any costs in connection with these violations of its Operational Flow Order? If so, please estimate the annual cost to the Company.
3. Please estimate the annual revenue generated from assessed penalties relating to Operational Flow Orders.

Thank you for your cooperation in this matter. If you have any questions regarding this request please contact Pat Murphy at extension 178 or Mike Warner at extension 183.

Sincerely,

  
Darlene Standley, Chief  
Utilities Division
