DOCKET NO. 07-00179

2007 AUG 7 AM 11 36
TN REGULATORY AUTHORITY
DOCKET ROOM

RESPONSE TO TENNESSEE REGULATORY AUTHORITY DATA REQUEST

To: Darlene Standley, Chief
Utilities Division
Tennessee Regulatory Authority
460 James Robertson Parkway
Nashville, TN 37243-0505

The following is the Response to the Data Request from Tennessee Regulatory Authority
(TRA) Advisory Staff:

INFORMATION REQUEST

1. Please complete the following table for the composite collection and treatment
systems owned by your Company.¹

Average Service Life – Expected service life in years that the Company uses to calculate
depreciation for each category of plant in service as reflected in the annual report filed with the
Authority.

¹ Information regarding service life and original total booked cost should be provided only for those systems that are completed and currently serving customers. Information requested is for total company, not by separate wastewater system territories.

Remaining Service Life – The weighted average remaining service life of the collection system plant and the treatment system plant whose individual components may have a different remaining service life based on the year the component was placed into service.

Original Cost – The total booked cost of all components associated with the system.

Other Systems – Other plant accounts maintained by the Company that are not part of either the Collection System or Treatment System.

RESPONSE: The Company will be required to review records back to the original construction of the sewer treatment plant in the 1970s to provide this information. It will take the Company some time to locate such records. The Company will provide the information requested by this response by August 31, 2007 by a Supplemental Response.

2. Please complete the table below showing the total² number of residential wastewater customers at the points in time as indicated.

RESPONSE:

	Total Currently Served	Total Projected 12/31/07	Total Projected 12/31/08	Total Projected 12/31/09	Maximum Projected To Serve With Existing Systems
Number of Residential Customers	794	800	806	812	1,600*

* Based upon the Company's current permit to treat a maximum of 400,000 gallons per day at its existing treatment plant and average usage per customer being the same as today.

² Number of customers is for the total company, not each separate wastewater system territory.

3. If the Company's tariff contains a commercial rate, does that commercial rate include an escrow amount for capital plant replacement?

RESPONSE: No. The Company's tariff contains a non-residential rate and a rate for Walnut Grove Elementary School. The Company's non-residential rate does not include an escrow amount for capital plant replacement.

4. If the answer above is yes:

- a. What is the monthly escrow amount?
- b. How was this amount determined?
- c. For what purpose can the escrow funds be used?
- d. Are the escrow funds segregated into a separate account for reporting purposes?

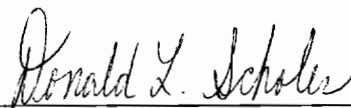

RESPONSE: Not applicable.

5. How many total commercial customers does the Company have?

RESPONSE: None. The Company has one non-residential customer, a school.

Dated August 7, 2007.

Respectfully submitted,

DONALD L. SCHOLES BPR #10102
