III. TCI Possesses the Technical, Managerial and Financial Expertise Necessary to Provide Local Exchange Service

TCI possesses the requisite technical, financial and managerial capabilities to operate as a competitive telecommunications provider. These capabilities are explained in detail below.

1. Financial Qualifications

TCI is financially able to provide the services proposed in its tariff as evidenced by its Income Statement and Statement of Assets, Liabilities and Equity for the year ended December 31, 2006.

2. Managerial Qualifications

TCI's senior management team is highly skilled, and has had extensive experience in the telecommunications industry. Using this expertise, TCI's management team has developed innovative marketing and customer care programs, and provides its customers with high quality advanced services at competitive rates. TCI has extensive experience in the technical, managerial, and financial aspects of the telecommunications industry.

3. Technical Qualifications

Applicant's key management personnel have significant business and telecommunications experience. Applicant is authorized to provide local exchange services in Maine, Missouri, New Jersey and New York. Applicant is in the process of applying for authorization to provide competitive local exchange services throughout the United States. Applicant has not been denied authority for any of the services for which it seeks authority in this Application. No formal complaints have been filed against Applicant or any of its affiliates by any state or federal agency.

TCI will initially resell services and provide service using unbundled network elements utilizing the facilities of the existing LECs or underlying carriers that presently serve Tennessee. The company has no plans to install facilities in the State of Tennessee.

The Applicant proposes to offer its services throughout the State of Tennessee in non-rural areas, specifically targeting Nashville, Knoxville, Memphis and Chattanooga. These areas are currently being served by Bellsouth/AT&T and Sprint/United, which are designated open to competition.

As the foregoing illustrates, TCI possesses considerable telecommunications expertise. . Applicant will also rely upon the technical expertise and telecommunications experience of its underlying carriers. Thus, TCI is technically qualified to provide local exchange and interexchange telecommunications services in Tennessee. Applicant also is willing to adhere to all applicable Commission policies, rules and orders.

IV. Approval of TCI's Application is in the Public Interest

Granting TCI's Application is consistent with the public interest, and, in that regard Applicant makes the following representations to the Commission:

- a. Applicant possesses the technical, financial, and managerial resources sufficient to provide the services requested;
- b. Applicant's services will meet the service standards required by the Commission;
- c. The provision services by Applicant will not adversely impact the availability of affordable local exchange service;
- d. Applicant, to the extent it is required to do so by the Commission, will participate in the support of universally available telephone service at affordable rates; and,
- e. The provision of local exchange services by Applicant will not adversely impact the public interest.

The demands of a competitive market are a better means to achieve affordability and quality of service than a monopoly environment. As competitors vie for market share, they will compete based upon price, innovation and customer service.

Those providers that offer consumers the most cost effective products will gain market share. In contrast, providers whose products do not meet the needs of consumers will lose market share and may ultimately, be eliminated from the industry.

Additionally, TCI's entry into the local exchange markets will not unreasonably prejudice or disadvantage any telephone service providers. Incumbent local exchange carriers presently serve a large majority of the local exchange customers in Tennessee. The major advantages of incumbency (i.e., ownership of the existing local network as well as access to, and long-standing relationships with, every local customer) constitute a substantial obstacle to new entrants. Moreover, exchange services competition will stimulate the demand for the services supplied by all local service carriers, including those of the incumbent LECs. Thus, in a competitive market, there will be increased potential for such LECs to generate higher revenues. Additionally, in a competitive market, incumbent providers will have market incentives to improve the efficiency of their operations, thereby reducing their costs and ultimately their profit margins.

In this regard, approval of this Application is clearly in the public interest.

V. Description of Services Offered and Service Territory

TCI expects to offer a full array of local exchange services, including the following:

Local Exchange:

- A. Local Exchange Services for business and residence customers that will enable customers to originate and terminate local calls in the local calling area served by other LECs, including custom calling features.
- B. Switched local exchange services, including basic service, trunks, carrier access, and any other switched local services that currently exist or will exist in the future.
- C. Non-switched local services (e.g., private line) that currently exist or will exist in the future.
- D. Centrex and/or Centrex-like services that currently exist or will exist in the future.
- E. Digital subscriber line, ISDN, and other high capacity services.

In addition to the services listed above, TCI, through interconnection with other carriers, will offer dual-party relay services, 9-1-1 Emergency Services, directory assistance and operator assisted calls, lifeline, and toll-free calling.

Prior to providing local exchange services to the public in Tennessee, TCI will file a complete Final Tariff and/or Price List with the Commission, which will contain a description of services to be provided, all rules and regulations applicable to such services, and proposed rates for such services. The Applicant's IntraLATA Presubscription Implementation Plan is attached hereto as Exhibit F. Applicant's proposed tariff is attached hereto as Exhibit K.

VI. Waivers and Regulatory Compliance

TCI requests that the Commission grant it a waiver of those regulatory requirements inapplicable to competitive local service resellers such as Financial Record-Keeping System and Local Exchange Directory pursuant to Tennessee Rules and Regulation 1220-4-1-.11(1). Such rules are not appropriate or necessary for competitive providers and constitute an economic barrier to entry into the local exchange market.

1. Financial Record-Keeping System

a. TCI requests that it be exempt from any record-keeping rules or regulations that might require a carrier to maintain its financial records in conformance with the Uniform System of Accounts ("USOA"). The USOA was developed by the FCC as a means of regulating telecommunications companies subject to rate base regulation, and as a competitive carrier, TCI does not maintain its financial records in this manner.

b. As a competitive carrier, TCI maintains its book of accounts in accordance with Generally Accepted Accounting Principles ("GAAP"). Neither the FCC, nor the Commission, has required TCI to maintain its records under the USOA for purposes of TCI's local exchange operations. Thus, TCI does not possess the detailed cost data required by USOA, nor does it maintain detailed records on a state-specific basis. As a competitive provider, TCI's network operations are integrated to achieve maximum efficiency. Having to maintain records pertaining specifically to its Tennessee local service operations would place an extreme burden on TCI.

c. Moreover, TCI asserts that because it utilizes GAAP, the Commission will have a reliable means by which to evaluate TCI's operations. Therefore, TCI hereby respectfully requests to be exempted from the any USOA requirements of the Commission.

d. The Applicant does agree that it will provide wire line activity reports as required by Commission rules and regulations.

2. Local Exchange Directories

TCI requests that it not be required to publish local exchange directories. TCI will make arrangements with the incumbent LECs whereby the names of TCI's customers will be included in the directories published by the incumbent LECs. LEC directories will also be modified to include TCI's customer service number. These directories will be distributed to TCI's customers. This approach is entirely reasonable and will have a direct benefit to the customers of both TCI and the incumbent LEC since they need only refer to one directory for a universal listing of customer information. It would be an unnecessary burden on TCI to require that it publish and distribute its own directory to all customers located within each exchange area, particularly since nearly all of these customers will be customers of the incumbent LECs. It is more efficient for TCI to simply include its limited customer list in the existing directories of the incumbent LECs.

VII. Regulatory Obligations

Applicant shall provide, either directly or indirectly or through arrangements with other carriers or companies, to the extent required by law or regulation:

1. Provide access to 911 and E 911 emergency service;
2. Provide white page directory listings and directory assistance;
3. Provide consumer access to and support for the Tennessee Relay Center in the same manner as incumbent local exchange telephone companies;
4. Provide free blocking service for 900, 976 type services in accordance with Commission policy;
5. Provide Lifeline and Link-up services to qualifying citizens of this state;
6. Provide educational discounts in existence as of June 6, 1995

Applicant shall also:

1. Provide support for universal service in a manner determined by the Commission. This requirement shall not be construed as prohibiting the granting of a certificate before the universal service issues are determined by the Commission;
2. Provide interconnection with other certificated carriers or Commission authorized carriers on a nondiscriminatory basis under reasonable terms and conditions;
3. Comply with Commission basic service standards as defined in any applicable rules and decisions of the Commission;
4. Provide equal access to authorized inter-and intraLATA long distance providers, unless otherwise exempted by the Commission.

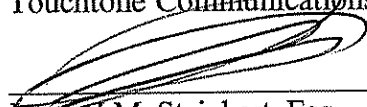

VIII. Conclusion

This Application demonstrates that Touchtone Communications Inc., possesses the technical, financial and managerial resources to provide resold and facilities-based/UNE local exchange service in the State of Tennessee. Furthermore, granting this Application will promote the public interest by increasing the level of competition in the Tennessee telecommunications market. Ultimately, competition will compel all exchange telecommunications service providers to operate more efficiently and with resulting reduced prices for consumers. In addition, as a result of competition, the overall quality of local exchange service will improve. As stated above, Applicant does not intend to provide local service, by its own facilities or otherwise, to any customer located in a rural incumbent LEC's service area, until Applicant provides such LECs notice of intent at least 30 days prior to the date of the intended service, or as otherwise required by law.

Wherefore, Touchtone Communications Inc., respectfully petitions this Commission for a Certificate of Public Convenience and Necessity to Provide Competing local exchange telecommunications services in the State of Tennessee in accordance with this Application and for such other relief as it deems necessary and appropriate.

Respectfully submitted,

Touchtone Communications Inc.

INTRALATA PRESUBSCRIPTION IMPLEMENTATION PLAN

TOUCHTONE COMMUNICATIONS INC. (TCI)
IntraLATA Presubscription Implementation Plan

I. Purpose

The intent of this Plan is to provide a proposal that, upon implementation, would provide customers the ability to select the telecommunications carrier of their choice for routing their intraLATA toll calls. TCI proposes to implement intraLATA toll dialing parity from the date it receives authority to provide local exchange services in Tennessee and has entered into interconnection arrangements with the ILECs. TCI proposes to provide toll dialing parity to the Chattanooga, Knoxville, Memphis and Nashville LATAs. Attached hereto are the exchange areas that TCI proposes to provide intraLATA toll dialing parity.

II. Carrier Selection Procedures

TCI will implement the full 2-PIC (Primary Local Exchange Carrier) carrier selection methodology. With the full 2-PIC methodology, customers will be able to presubscribe to one telecommunications carrier for interLATA toll calls and presubscribe to the same or a different participating telecommunications carrier, including their existing local exchange company, for all intraLATA toll calls. Orders for changes will be accepted and processed beginning on the implementation date.

TCI employees who communicate with the public, accept customer orders, and serve in customer service capacities will be trained to explain the process to customers for making PIC changes for intraLATA toll calls. Business Office personnel will be prepared to make changes in customer records based upon requests from customers or carriers and direct customers to their chosen intraLATA carriers. Processes will be in place to provide new customers with an opportunity to choose their intraLATA toll carrier from a list of available carriers. TCI will implement a PIC change charge waiver period of 90 days.

New Customers

Customers who contact TCI requesting new telephone exchange service will be provided a list of telecommunications carriers available to provide interLATA toll service. Upon implementation of intraLATA toll presubscription, the customer will be provided a second list of carriers, including TCI, that provides intraLATA toll service in their exchange. The list of intraLATA toll carriers will be presented in a competitively neutral manner. Customers who do not make a positive choice for an intraLATA toll carrier will be identified within TCI's system as a "no-PIC" and will not be automatically defaulted to a carrier. Customers identified as "no-PIC" within TCI's systems will be required to dial 101XXXX to place intraLATA toll calls until they make an affirmative choice for an intraLATA toll carrier.

III. Customer Education/Notification

Customers will receive information explaining their opportunity to select an intraLATA carrier a minimum of 30 days in advance of the offering of intraLATA toll dialing parity via a bill message. In addition, during the 30 days following implementation of intraLATA Dialing Party, customers will receive a bill insert also explaining their opportunity to select an intraLATA carrier. TCI anticipates that promotional strategies by carriers will contribute to customer awareness of intraLATA toll dialing parity. Customer telephone directories will be updated as new editions are published to reflect the opportunity for customers to choose an intraLATA toll carrier.

IV. Carrier Notification

Current interexchange carriers will be notified of TCI's intraLATA toll dialing parity implementation via letter approximately 90 days in advance of the proposed implementation date. Carriers should provide a list of exchanges in which they plan to offer intraLATA toll service at least 60 days in advance of TCI's implementation date. TCI needs notification in advance to include the carrier on the list of participating carriers in each TCI exchange. Certified carriers who enter the market after implementation will be added to the list of participating carriers within 30 days of notifying TCI.

TCI will provide subscriber listing information to carriers in "readily accessible" tape or electronic formats in a timely manner as requested through the processes that currently exist for the interLATA market. The process includes subscriber listing updates to carriers for new customers who choose that carrier or of existing customers of a carrier who revise their subscriber listing information. In addition, carriers can obtain complete subscriber listings in several formats. The provision of this information is in compliance with FCC Order No. 96-333, Paragraph 389.

TCI will comply with Part 51, Sections, 305, 307, 325, 327, 329, 331, 333 and 335 of the FCC Order in providing the required information and notice to the public of network changes. TCI plans to file a public notice with the FCC, with possible migration of the notice to the Internet process as described in Section 329. The notice will include network information as outlined in Section 327. The notice will be provided within the timeframes described in Sections 331-333. TCI will comply with all rules of the FCC and the TRA.

V. Non-Discriminatory Access

TCI will provide:

- non-discriminatory access to emergency services and services for the hearing and speech impaired;
- non-discriminatory access to local and long distance directory assistance and provision of local telephone directories to end users;
- non-discriminatory access to operator services;
- non-discriminatory access using standard dialing patterns to all interLATA and intraLATA long distance carriers, including 1+ and 0+ access to the customer's carrier of choice for interLATA calls; and
- non-discriminatory access to telephone numbers and number portability where technically and economically feasible.

VI. Slamming Policy

- (8) A clear statement that if the customer does not return the postcard, the customer's service will be switched fourteen days after the date the information package was mailed. If customers have cancelled their orders during the waiting period, TCI cannot submit the customer's order.
- (9) The name, address and telephone number of a contact point for consumer complaints.
- (b) The documentation of the order shall be retained by TCI, at a minimum, for twelve months to serve as verification of the customer's authorization to change its telecommunications company. The documentation will be made available to the customer upon request.
- (c) Customer initiated orders. TCI when receiving the customer initiated request for a change of local exchange and/or intrastate toll shall keep an internal memorandum or record generated at the time of the request. Such internal record shall be maintained by TCI for a minimum of twelve months to serve as verification of the customer's authorization to change telecommunications companies. The internal record will be made available to the customer upon request. NUMBERING ISSUES & TENNESSEE SPECIFIC OPERATION ISSUES

Numbering Issues

1. Applicant's expected demand for NXXs within a year of approval of our application is 60 to 80 NXXs per NPA.
2. Applicant estimates it will request 60 NXXs from NANPA when we establish our service footprint.
3. We expect to establish our initial service footprint in the 615 and 931 NPAs within 6 months of certification.
4. The company will sequentially assign numbers within NXXs if it is required by Commission rules and regulations. In other jurisdictions customer requirements have dictated the non-sequential assignment of telephone numbers.
5. The company will follow NANPA guidelines and Commission regulations and assign numbers accordingly.
6. When ordering NXXs for growth, we follow the forecasting guidelines set by NANPA and the state regulatory body. We intend to apply a 6 or 12 month forecast, depending on the jeopardy situation in a given NXX.

Tennessee Specific Operation Issues

1. Our current billing system will allow us to bill the calling plan in compliance with TCA Section 65-21-114.
2. At this time, the company is not aware of the Tennessee County Wide Calling database maintained by BellSouth and the procedures to enter your telephone numbers on the database. The company intends to address all interconnection requirements and procedures with Bell South during the negotiation process and prior to the provision of local exchange service.
3. The company initially intends to provide service in Chattanooga, Knoxville, Memphis, and Nashville. It is the Company's usual practice to mirror the calling pattern on the incumbent LEC, therefore this is how the company will provide metro area toll-free calling around Memphis, Nashville, Knoxville & Chattanooga.

4. At this time, the company is not aware of the MAC database maintained by BellSouth and the procedures to enter your telephone number on the database. The company intends to address all interconnection requirements and procedures with Bell South during the negotiation process and prior to the provision of local exchange service.

Regulatory contact: Gary Glodek
(973) 739-9300

Customer Service contact: Neil DeRiggi
(800) 266-4006
6. The company intends to use telesales by its own employees. The company is aware of the telemarketing statutes and limitations found in TCA Section 65-4-401 and Chapter 1220-4-11 and will make every effort to comply with these regulations.

5.2 Call Timing for Usage Sensitive Services

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 5.2.1** Calls are measured in durational increments identified for each service. All calls, which are fractions of a measurement increment, are rounded-up to the next whole unit.

- 5.2.3** Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- 5.2.4** Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- 5.2.5** All times refer to local time.

SECTION 5.0 – NETWORK SERVICES DESCRIPTIONS (CONTINUED)

5.3 Distance Calculations

Where charges for a service are specified based upon distance, the following rules apply:

5.3.1 Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is not telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

5.3.2 The airline distance between any two rate centers is determined as follows:

Step 1: Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.

Step 2: Computer the difference between the "V" coordinate of the two rate centers; and the difference between the two "H" coordinates.

Step 3: Square each difference obtained in step (b) above.

Step 4: Add the square of the "V" difference and the square of the "H" difference obtained in step C) above.

Step 5: Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.

Step 6: Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

5.3.3 The formula for distance calculations is:

$$(V_1 - V_2)^2 + (H_1 - H_2)^2 \qquad 10$$

8.1 Directory Listings, (Continued)

8.1.2 Composition of Listings, (Continued)

(B) Designation

The purpose of a business designation is to identify the listed party and not to advertise the business. No designation of the nature of the business is included if this is sufficiently indicated by the name. Where a listed party is engaged in more than one general line of business, one additional business designation may be included in the listing when necessary to identify the listed party. When a listed party has two or more listed telephone number or two or more business addresses, designations indicating the branches of the organization may be included where necessary to assist the public in calling.

A designation may include a title to indicate a listed party's official position, but not the name of the firm or corporation with which the individual is connected. Individual names or titles are not shown following the name of a firm or corporation. A term such as "renting agent" may be included in a listing indented under the name of a building, provided the agent maintains a renting office in such a building.

A designation is not ordinarily provided in a residence type listing except for residential service as permitted under the terms of this tariff. A professional designation is permitted on residence service in the case of a physician, surgeon, dentist, osteopath, chiropodist, podiatrist, optometrist, chiropractor, physiotherapist, Christian Science practitioner, veterinary surgeon, registered nurse or licensed practical nurse, provided that the same name and designation is also listed on business service of that subscriber or another subscriber in the same or different directory.

The listing of service in the residence of a clergyman may include the designation "parsonage," "rectory," "parish house," or "manse," and any such listing may be indented under a listing in the name of the church. Where residence service is furnished in a church study, the listing may include the designation "study."

(C) Address

Each residence or non-profit listing may, but does not have to, include the house number and street name of the residence where the telephone service is provided. Other information, such as a building name or a locality designation, may be included to help identify the Customer.

(D) Telephone Number

Each listing may include only one telephone number, except in an alternate telephone number listing where each number listed is considered a line for rate purposes.

A listing may include only the telephone number of the first line of a PBX system or incoming service group, except that a trunk not included in the incoming service group of a PBX system, or the first trunk of a separate incoming service group of a PBX system may be listed to meet special conditions where a corporation and its subsidiaries use the same PBX system.

8.1.3 Types of Listings

(A) Standard Listing

A standard listing includes a name, designation, address and telephone number of the Customer. It appears in the White Pages of the telephone directory and in the Company's Directory Assistance records. The designation in the listing will be provided according to the rules in paragraph 5.13.2.2 above.

(B) Indented Listing

An indented listing appears under a standard listing and may include only a designation, address and telephone number. An indented listing is allowed only when a Customer is entitled to two or more listings of the same name with different addresses or different telephone numbers. For example:

Smith, John MD
Office 125 Portland 555-4180
Residence 9 Glenway 555-8345

Such listing may be furnished as an indented listing or as a sub-caption. The telephone number in such a listing may be that of another service furnished the same subscriber or one of the subscriber's PBX trunks not included in the incoming service group, or the service furnished a different subscriber.

SECTION 8.0 - DIRECTORY ASSISTANCE AND LISTING SERVICES

8.1 Directory Listings, (Continued)

8.1.3 Types of Listings, (Continued)

(C) Alternate Telephone Number Listing and Night Listing

Night calls (telephone number)
Night calls after ___PM (telephone number)
Nights, Sundays and holidays (telephone number)

Such listing may be furnished as an indented listing or as a sub-caption. The telephone number in such a listing may be that of another service furnished the same subscriber or one of the subscriber's PBX trunks not included in the incoming service group, or the service furnished a different subscriber.

(D) Duplicate Listing

Any listing may be duplicated in a different directory or under a separate geographical heading in the same directory. Such listing may be duplicated in indented form.

(E) Reference Listing

A subscriber having exchange services listed under different geographical headings may have an indented listing in reference form in lieu of a duplicate listing.

(F) Cross Reference Listing

A cross reference listing may be furnished in the same alphabetical group with the related listing when required for identification of the listed party and not designated for advertising purposes.

Non-published service means that the Customer's telephone number is not listed in the directory, nor does it appear in the Company's Directory Assistance Records.

8.2.2 Regulations

SECTION 11.0 - MISCELLANEOUS SERVICES

11.1 Carrier Presubscription

11.1.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

11.1.2 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

- Option A:** Customer select the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.
- Option B:** Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.
- Option C:** Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.
- Option D:** Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription.
- Option E:** Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.
- Option F:** Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

SECTION 11.0 - MISCELLANEOUS SERVICES (CONTINUED)

11.1 Carrier Presubscription, (Continued)

11.1.3 Rules and Regulations

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription.

Customers may change their selected Option and/or presubscribed toll carrier at any time subject to charges specified in 11.4.5 below:

11.1.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90-day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate an intraLATA or interLATA presubscription change at any time, subject to the charges specified in 11.4.5 below. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.
