Enclosure
Cc: Edward H. Griffin

BEFORE THE TENNESSEE REGULATORY AUTHORITY

In re: Petition of US LEC of Tennessee :
Inc. d/b/a PAETEC Business Company : Docket No. _____
for Expedited Review of Growth Code :
Denial by the Number Pooling :
Administrator

PETITION OF US LEC OF TENNESSEE INC. d/b/a PAETEC BUSINESS SERVICES
FOR
EXPEDITED REVIEW OF CENTRAL OFFICE CODE DENIAL

US LEC of Tennessee Inc. d/b/a PAETEC Business Services (“Company”), pursuant to Federal Communication Commission (“FCC”) Rule Section 52.9(b)¹, petitions the Tennessee Regulatory Authority (“TRA”) for an expedited review of the Number Pooling Administrator’s (“NeuStar”) denial of Company’s request for use of central office code numbering resources in the 615 and 865 area code serving areas. The Company is submitting the safety valve request to the NCUC because it requires the grant of three (3) 1,000 blocks with the NXX not ending in 0, 1, or 9 so that it has the appropriate numbering resources to assign numbers to meet the specific requirements of a large Company business customer. NeuStar has determined that the Company had not met the utilization threshold required to obtain the additional central office code (NXX) 1,000 blocks in the Clinton, Lebanon, and Springfield Rate Centers (“Rate Center”). Because of changes to its business plan, the customer’s needs result in the Company’s request for three NXX 1,000 number blocks in the Clinton, Lebanon, and Springfield Rate Centers. In support of this Petition, the Company states:

1. The Company is a competitive local exchange carrier (“CLEC”) providing telecommunications services in Tennessee under the jurisdiction of the TRA.

¹ 47 C.F.R. §52.9(b)

2. NeuStar is an independent, non-governmental entity that is responsible for administering and managing numbering resources in pooling areas. *See* 47 C.F.R. §§52.13(a) and (b).

3. US LEC of Tennessee Inc. d/b/a PAETEC Business Services whose principal place of business is Morrocroft III, 6801 Morrison Boulevard, Charlotte, NC 28211. Pleadings, orders, notices and other papers filed in this matter should be served upon:

Edward H. Griffin
Senior Manager, Regulatory Affairs
PAETEC

(615) 726-1776 (Telecopier)

4. Pursuant to a claim of confidentiality that runs until the beginning of the TRA Director's meeting, the Company is submitting a detailed justification from the customer's contractor (Exhibit E to this Petition) that is the basis for this request. Such detailed justification contains proprietary information that the Company does not disclose publicly and customarily guards from its competitors. The Company respectfully requests that the TRA consider the information in Exhibit(s) E to this Petition a part of this Petition, but in doing so treat Exhibit(s) E as confidential prior to the beginning of the TRA Director's meeting.

5. On March 31, 2000, the Federal Communications Commission ("FCC") issued a Report and Order and Further Notice of Proposed Rule Making relating to numbering resource optimization ("FCC 00-104" or the "March Order"). On December 29, 2000, the FCC issued its Second Report and Order, Order on Reconsideration in CC Docket No. 96-98 and CC Docket No. 99-200, and Second Further Notice of Proposed Rulemaking in CC Docket No. 99-200

("FCC 00-249" or the "December Order"). These FCC orders addressed issues and strategies relating to the efficient use of numbering resources.

6. In FCC 00-104 and FCC 00-249, the FCC announced rules and sought comments in an effort to implement uniform standards governing requests for telephone numbering resources in order to increase efficiency in the use of existing telephone numbers and to slow further exhaustion of existing numbers under the North American Numbering Plan.

7. Among other things, FCC 00-104 adopted a revised standard for assessing a carrier's need for numbering resources by requiring carriers to report rate center based utilization data to NeuStar. The FCC further required that to qualify for access to new numbering resources, applicants must establish that existing inventory within the applicant's rate center will be exhausted within six months of the application.

8. In addition to the months-to-exhaust ("MTE") requirement described above, the FCC's rules also require carriers to meet a rate center utilization threshold of 75 percent to receive additional numbering resources in a given rate center. FCC 00-249 at ¶22; FCC 01-362 ¶¶50-52. Based on the FCC's orders, carriers must meet both the six-month MTE requirement and the utilization threshold on a rate center basis to obtain additional number resources. *Id.* ¶29.

9. On August 2, 2007, Company submitted Central Office Code (NXX) Assignment Requests to NeuStar for the assignment of the 1,000 number blocks of NXX resources in the Rate Centers necessary to meet the telephone number needs of one of the Company's large business customers. A copy of this application is attached hereto as Exhibit(s) A (3 pages).

10. The request, made on behalf of the Company customer, was collectively for three groups of 1,000 telephone numbers in the Clinton, Lebanon, and Springfield Rate Centers. The Company does not presently have blocks of numbers not containing a 0, 1, or 9 as the third digit

of the NXX in the Rate Centers as requested by, and required by, the Company's customer. This customer requires the NPA-NXX resources to support its network of telephone numbers and requires the use of certain NXX ranges.

11. Based on the individual Rate Center data that NeuStar used to calculate the Company's Utilization Certification Worksheet, the Company's numbering resources utilization is 1.680 to 18.480 percent. Copies of the application are attached hereto as Exhibit(s) B, (Page 2 of 2).

12. Despite the current levels of utilization, the Company is unable to provide the requested 1,000 number blocks in an existing NXX in the switch that serves the Company's customer within listed Rate Centers.

13. NeuStar denied the Company's requests on the grounds that the Company did not meet utilization according to the Central Office Code (NXX) Guidelines. A copy of the decision is attached hereto as Exhibit(s) C, (Page 1 of 2).

14. As a result of the denial of the Company's requests for additional numbering resources, the Company is unable to provide the telecommunications services requested by its customer in the state of Tennessee.

15. The FCC delegated authority to state commissions to address safety valve claims when NeuStar denies a specific request for numbering resources.

16. Under previous procedures used by the North American Numbering Plan Administration ("NANPA"), waivers or exceptions were typically granted in any case where customer hardships could be demonstrated or where the service provider's inventory did not have a block of numbers large enough to meet the customer's specific request. Under existing procedures, however, NeuStar looks at the MTE criteria and utilization threshold for the entire

rate center and allows no exceptions. By refusing to consider the circumstances of each case, NeuStar's procedure may result in decisions contrary to the public interest and decisions that do not necessarily preserve the efficient use of telephone numbers or postpone dates of exhaust.

17. The Company's inability to provide this large business customer with the requested numbers prevents the Company from providing the quality of service this customer desires and expects. A copy of the relevant correspondence from the customer has previously been introduced as Exhibit(s) E (confidentiality requested).

18. Both the FCC Order and NeuStar's Central Office Code (NXX) Guidelines provide that state regulatory authorities have the power and authority to review NeuStar's decision to deny a request for numbering resources. *See* FCC 01-362, Appendix A, Final Rules, 47 C.F.R. § 15.15 (g)(4).

19. In reviewing previous petitions of this type, many PSC staffs have requested that Petitioners provide additional information concerning the Petitioners' number utilization for the specific central office involved in the request. The current Company number utilization calculation information for the Rate Centers is attached hereto as Exhibit(s) D. Such detailed justification contains proprietary information that the Company does not disclose publicly and customarily guards from its competitors. The Company respectfully requests that the TRA consider the information in Exhibit(s) D to this Petition a part of this Petition, but in doing so treat Exhibit(s) D as confidential.

20. The Company seeks the TRA's review of NeuStar's decision to withhold numbering resources from it on the grounds that the Central Office Code Administration decision (1) violates the rules and orders of the FCC which grant carriers access to numbering resources to meet specific customer demands upon a sufficient showing of need and (2) interferes with the

Company's ability to serve its customers within the state of Tennessee. As the FCC has stated, "Under no circumstances should consumers be precluded from receiving telecommunications services of their choice from providers of their choice for want of numbering resources." FCC 00-429 at ¶ 61. By refusing to grant numbering resources sufficient to meet the new large customer's needs, NeuStar's decision is preventing the customer from obtaining the service of its choice from its carrier of choice, Company.

For these reasons, the Company requests that the TRA review the decision of NeuStar to deny the Company's request for additional numbering resources and direct NeuStar to provide numbers to meet the specific requirements of the Company's business customer in the exchanges of Clinton, Lebanon, and Springfield, Tennessee.

Respectfully submitted,

A handwritten signature in black ink that reads "Charles B. Welch, Jr." followed by a stylized "by JRR".

[Continue](#)[Cancel](#)**Instructions for filling out each Section of the Part 1A form:**

Section 1.1 Contact information requires that Service Providers supply under "Block Applicant" the company name, company headquarters address, a contact within the company, an address where the contact person may be reached, in addition to the correct phone, fax, and e-mail address. The Pooling Administrator section also requires the Service Provider to fill in the Pooling Administrator's name, address, phone, fax and e-mail.

Section 1.2 Service Providers who need a thousands-block assignment or for an Location Routing Number (LRN) are required to fill in this section. If needed for an LRN, a CO Code Application needs to also be submitted to the PA. The Service Provider should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the TelcordiaTM LERGTM Routing Guide. The Operating Company Number (OCN) assigned to the service provider and the OCN its parent company. An OCN is a four-character alphanumeric assigned by TelcordiaTM Routing Administration (TRA). In addition, the number of thousands-blocks requested should be supplied. The Switch Identification as well as the city or wire center name, rate center, rate center sub zone, homing tandem and CLLITM tandem of the facilities based provider^{ix}. Explanations of these terms may be found in the footnotes.

Section 1.3 The date the Service Provider completes the application should be entered in this section, as well as the Effective Date of the requested thousands-block.

Section 1.4 Service Providers should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS. They also indicate the primary type of business in which the numbering resource is to be used. Service Providers also may indicate their preference for a particular thousands-block, e.g., 321-9XXX, or indicate any thousands-blocks that may be undesirable, e.g., 321-6XXX.

Section 1.5 Service Providers indicate the type of request. Initial requests are for first applications for thousands-blocks in a rate center, growth for additional thousands-blocks in a rate center in which the applicant already has numbering resources, and provide the required evidence as ordered by the FCC.

The thousands-block applicant certifies veracity of this form by signing their name, and providing their title and date.

Foot Notes:

ⁱ Identify type of and reason for change(s) in Section 1.5.

ⁱⁱ The Pool Administrator is available to assist in completing these forms.

ⁱⁱⁱ A CO Code application will also need to be submitted to the PA.

^{iv} Operating Company Number (OCN) assignments must uniquely identify the applicant. Relative to CO Code assignments, NECA-assigned Company Codes may be used as OCNs. Companies with no prior CO Code or Company Code assignments should contact NECA (800 524-1020) to be assigned a Company Code(s). Since multiple OCNs and/or Company Codes may be associated with a given company, companies with prior assignments should direct questions regarding appropriate OCN usage to (TRA) (732-699-6700).

^v This is an eleven-character descriptor of the switch provided by the owning entity for the purpose of routing calls. This is the 11 character CLLITM code of the switch /POI.

^{vi} Rate Center name must be a tariffed Rate Center.

^{vii} Acknowledgment and indication of disposition of this application will be provided to applicant within seven calendar days from the date of receipt of this application. An incomplete form may result in delays in processing this request.

^{viii} Please ensure that the NPA-NXX of the LRN to be associated with this block(s) is/will be active in the network prior to the effective date of the block(s).

^{ix} Telcordia, LERG Routing Guide, and CLLI are trademarks of Telcordia Technologies, Inc.
