TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question:

6. Provide the current contracts in effect for each utility purchasing water for resale from the Company: Ft. Oglethorpe, Catoosa Utility District, Walden's Ridge Utility District, and Signal Mountain.

Response:

See the attached purchase water contracts.

WATER PURCHASE AGREEMENT

THIS AGREEMENT, made this 14th day of July 2003 by and between

Tennessee-American Water Company ("Tennessee-American"), located at 1101 Broad Street, Chattanooga, Tennessee

and

Walden's Ridge Utility District ("Walden's Ridge"), located at 3900 Taft Highway, Signal Mountain, Tennessee

WHEREAS, Tennessee-American, a Tennessee corporation, is a public utility which owns and operates a water utility system in and around the City of Chattanooga, Tennessee including the contiguous cities of Red Bank, East Ridge, Ridgeside, and Lookout Mountain, plus the cities of Rossville and Lookout Mountain, Georgia and areas in the Georgia counties of Dade, Walker and Catoosa; and

WHEREAS, Walden's Ridge wishes to purchase all of its water supply from Tennessee-American; and

WHEREAS, Tennessee-American has the capability to provide all of the water supply currently required by Walden's Ridge and is willing to construct a water supply pipeline and booster station, which will provide a sufficient volume of water in order to serve as WRUD's sole source of supply; and

WHEREAS, Walden's Ridge and Tennessee-American are desirous of establishing an Agreement for the purchase and sale of water for a fixed period of time; and

WHEREAS, the parties have reached an Agreement for the sale and purchase of water which they now desire to record in writing;

NOW THEREFORE, in consideration of the mutual covenants contained herein and other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

SECTION I
EXCLUSIVE SUPPLIER

Tennessee-American agrees to sell and Walden's Ridge agrees to buy, during the term of this Agreement and any extension hereof, all of the potable and raw water requirements of Walden's Ridge, as it now exists or may hereafter by expanded, in conformity with the provisions hereof.

SECTION II
CONSTRUCTION OF FACILITIES

(A) Tennessee-American shall construct, at an estimated cost of $2.4 million, a water supply pipeline and booster station from its existing distribution system to the Walden's Ridge water tank near Taft Highway, which will provide a sufficient volume of water in order to serve as Walden's Ridge sole source of supply. This water supply pipeline will be capable of delivering up to 2.9 million gallons of water per day at the top of the mountain. The estimated construction time, from the time of a final non-appealable order from the Tennessee Regulatory Authority ("TRA") granting approval of the project, until the connection to the system and delivery of water, is eighteen (18) months. In the event that the construction bid price exceeds $2.4 million by 5% or more, Tennessee-American shall have the right to negotiate an adjustment in the price for the sale of water as provided in Section III hereof or terminate this Agreement.

(B) If any conditions or requirements are imposed by any regulatory authority, or court, which make this project economically unfeasible, Tennessee-American has the right to withdraw and terminate the Agreement.

(C) As part of this consideration, Walden's Ridge agrees that Tennessee-American will be the sole and exclusive supplier of potable and raw water to Walden's Ridge, as it now exists or

NOW THEREFORE, in consideration of the mutual covenants contained herein and other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

SECTION I
EXCLUSIVE SUPPLIER

Tennessee-American agrees to sell and Walden's Ridge agrees to buy, during the term of this Agreement and any extension hereof, all of the potable and raw water requirements of Walden's Ridge, as it now exists or may hereafter by expanded, in conformity with the provisions hereof.

SECTION II
CONSTRUCTION OF FACILITIES

(A) Tennessee-American shall construct, at an estimated cost of $2.4 million, a water supply pipeline and booster station from its existing distribution system to the Walden's Ridge water tank near Taft Highway, which will provide a sufficient volume of water in order to serve as Walden's Ridge sole source of supply. This water supply pipeline will be capable of delivering up to 2.9 million gallons of water per day at the top of the mountain. The estimated construction time, from the time of a final non-appealable order from the Tennessee Regulatory Authority ("TRA") granting approval of the project, until the connection to the system and delivery of water, is eighteen (18) months. In the event that the construction bid price exceeds $2.4 million by 5% or more, Tennessee-American shall have the right to negotiate an adjustment in the price for the sale of water as provided in Section III hereof or terminate this Agreement.

(B) If any conditions or requirements are imposed by any regulatory authority, or court, which make this project economically unfeasible, Tennessee-American has the right to withdraw and terminate the Agreement.

(C) As part of this consideration, Walden's Ridge agrees that Tennessee-American will be the sole and exclusive supplier of potable and raw water to Walden's Ridge, as it now exists or

hereafter be changed, except as noted below in this Section, and that Walden's Ridge will not, without prior written consent of Tennessee-American, receive potable or raw water service from any person or entity (including Walden's Ridge and its own customers), for the period of time under the Agreement including any extensions or renewals. The parties agree that the approximately eighty (80) current Walden's Ridge customers in the Falling Water Community located on Levi Road, Ferry Road, Pickett Gulf Road, Levi Cemetery Road, Courtney Road and Godsey Road, will be an exception, which allows Walden's Ridge to seek an alternative source for these customers.

(D) In the event Walden's Ridge terminates the Agreement prior to the expiration of forty (40) years from the Date of Service, as defined below, or fails to renew the agreement for a period of time adequate to allow Tennessee-American an opportunity to recover its investment, or if Tennessee-American is no longer the sole and exclusive provider of potable and raw water to Walden's Ridge, or fails to pay Tennessee-American as provided herein, then Walden's Ridge, and its successors and assigns, agree to pay Tennessee-American, within thirty (30) days following such termination or event, the balance of the undepreciated costs, on a straight-line basis, of Tennessee-American's pipeline and all other facilities that are constructed to serve Walden's Ridge.

(E) Walden's Ridge will decommission and terminate its existing source of supply and treatment facilities upon completion of the Tennessee-American water supply pipeline extension and connection to the Walden's Ridge system and no later than ninety (90) days following the Date of Service, as defined below. As part of this consideration, and upon completion of the Tennessee-American water supply pipeline and booster station, Walden's Ridge agrees to exclusively lease to Tennessee-American, for a period of forty (40) years from the Date of Service as defined below, the 6" and 8" welded steel water supply lines, along with perpetual easements, from its Mountain Station at the end of Levi Cemetery Road to top of the mountain.

SECTION III
SALE OF WATER

(A) The water from the Tennessee-American pipeline shall be provided to Walden's Ridge at a rate of $1.25/1000 gallons, except for the pass-through cost as identified in Section III (B) herein, for the first three (3) years, beginning with the date that water service is first taken from these facilities ("Date of Service"). Any proposed change in the rate after this initial period will be accompanied by supporting data and computations, which will be based on industry accepted cost of service methodology. Walden's Ridge has the right to agree to this rate or to propose an alternative rate with the understanding that the TRA will be the ultimate authority in determining the rate.

(B) From the date this Agreement is executed and during the first three (3) years from the Date of Service under this Agreement, in the event that electric costs, which can be directly identified with this project, increase, Walden's Ridge agrees to meet with Tennessee-American to discuss an equitable pass-through of those cost increases if so requested by Tennessee-American.

(C) Walden's Ridge will permit Tennessee-American to use the Walden's Ridge distribution system as a conduit through which Tennessee-American may wheel water to other water utility districts and other customers as agreed to by the parties, which agreement by Walden's Ridge shall not be unreasonably withheld. The parties agree to meet within ninety (90) days after execution of this Agreement to define the territory that will be served by Walden's Ridge. The wheeling charge from Walden's Ridge to Tennessee-American shall be at a rate of $.39/1000 gallons. This rate is guaranteed for three (3) years from the Date of Service. Any proposed change in the rate after this initial period will be accompanied by supporting data and computations, which will be based on industry accepted

cost of service methodology. Tennessee-American has the right, within ninety (90) days, to agree to this rate or to propose an alternative rate. If the Parties do not agree on the rate change, then the Parties will refer the matter to a neutral mediator. If mediation does not resolve the matter, either of the Parties may take the matter to the TRA, if applicable, or Utility Management Review Board or seek Judicial Review as necessary for resolution. As part of the consideration under this agreement, Tennessee-American shall have the right, at the cost specified above or at a rate that may change from time to time as agreed by the parties, even after termination of the agreement, to transfer water through Walden's Ridge facilities.

(D) Walden's Ridge will not be charged by Tennessee-American for any water supplied through its system that is transferred to other water utility districts and/or customers outside the Walden's Ridge service area. Tennessee-American shall install a meter or meters on the Walden's Ridge distribution system where appropriate in order to measure the volume of water that is transferred. Walden's Ridge will have reasonable access to such meters at all times.

SECTION IV
FLUORIDATION OF WATER SUPPLY

Tennessee-American will fluoridate the water supply to Walden's Ridge, in accordance with the Tennessee Department of Environment and Conservation Rule 1200-5-1-17 (20), which requires the maintenance of a monthly average concentration of fluoride between 0.9 mg/l and 1.3 mg/l, unless required to do otherwise by applicable law or regulations.

SECTION V
OPERATIONAL REQUIREMENTS

(A) In order to minimize utilization of the peaking capacity of Tennessee-American, Walden's Ridge will provide, by the Date of Service, adequate storage to provide for its own

maximum hour needs. Walden's Ridge shall maintain a minimum of one-day of water supply storage on its distribution system.

(B) Walden's Ridge agrees to cooperate with Tennessee-American in making improvements as needed to its distribution system in order to efficiently facilitate the wheeling of water through its system to other water utility district customers of Tennessee-American or other customers of Tennessee-American outside the Walden's Ridge service area. Any such improvements, which are deemed necessary by Tennessee-American to adequately wheel water through the Walden's Ridge system for the benefit of Tennessee-American, shall be done at Tennessee American's expense.

(C) Tennessee-American will conduct a one-time comprehensive leak survey along Walden's Ridge transmission mains that are located in Taft Highway between Walden's Ridge twin storage tanks (located at the old Walden's Ridge office) and the end of the line near Grandview subdivision. This leak survey will be at no cost to Walden's Ridge. However, Walden's Ridge will be responsible for uncovering and repairing any identified leaks. The purpose of the survey will be to identify and locate leaks to help Walden's Ridge reduce its unaccounted for water.

SECTION VI
CUSTOMERS AT BOTTOM OF MOUNTAIN

In the event that Walden's Ridge, at any time in the future, decides to divest itself of the approximately eighty (80) customers, and as that number of customers may change from time to time, at the base of the mountain near the Soddy-Daisy system, Tennessee-American will be granted the right of first refusal to purchase from Walden's Ridge the facilities necessary to serve these customers at a price not to exceed the actual, bona fide offer made to Walden's Ridge for the facilities.

SECTION VII
METERING

Metering of the water sold under this Agreement shall be at the point where Tennessee-American's water supply pipeline is connected to the Walden's Ridge water tank near Taft Highway.

SECTION VIII
BILLING

During its normal billing cycle each month, Tennessee-American will issue an invoice to Walden's Ridge for Walden's Ridge metered usage during the prior month. Payment of such invoice will be made by Walden's Ridge on or before eighteen (18) days after receipt of the invoice. Interest and penalties shall accrue on the unpaid balance at the rate and amounts provided in Tennessee-American's filed tariff for its customers.

SECTION IX
APPROVALS BY TENNESSEE REGULATORY AUTHORITY

It is understood and agreed that this Agreement is conditioned on approval by the TRA. Promptly upon execution of this Agreement, Tennessee-American shall file an application for approval with the TRA and take such action in good faith as may be necessary to obtain the appropriate approval. Service provided hereunder will be pursuant to the rules and regulations of the TRA as may be changed from time to time during the term of this Agreement. Walden's Ridge agrees to provide all reasonable support for such regulatory approval.

SECTION X
TERM OF AGREEMENT

The term of this Agreement shall be for a period of forty (40) years, beginning on the Date of Service. In consideration of the requirement for Walden's Ridge to have a

reliable source of supply at all times, if the Company should desire to terminate this Agreement after the Date of Service and prior to the end of the term, except for breach of this Agreement by Walden's Ridge, the Company will provide Walden's Ridge with three (3) years advance written notice of such desire to terminate.

SECTION XI
FORCE MAJEURE

Neither Walden's Ridge or Tennessee-American shall be liable for damages to the other for any act, omission, or circumstance occasioned by or in consequence of strikes, lockouts, acts of the public enemy, wars, blockades, insurrections, riots, acts of terrorism, epidemics, landslides, lightning, earthquakes, fires, storms, floods, washouts, civil disturbances, explosions, breakage, or accident to machinery or lines of pipe, and any other cause, whether of the kind herein enumerated or otherwise, not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. Failure to prevent or settle any strike or strikes shall not be considered to be a matter within the control of the party claiming suspension. Such causes or contingencies affecting such performance shall not relieve Walden's Ridge from its obligation to make payment of amounts due hereunder.

SECTION XII
RENEWAL OF AGREEMENT

This agreement may be renegotiated for additional periods of time beyond the term of this Agreement. Negotiations to extend the term of this Agreement shall commence no later than six (6) months prior to the expiration date of this Agreement.

However, the rates to be charged during any renewal period shall also be subject to prior approval by the Tennessee Regulatory Authority.

SECTION XIII
MISCELLANEOUS PROVISIONS

(A) Assignment

This Agreement shall be binding on the successors and assigns of Tennessee-American. Upon obtaining written approval from Tennessee-American, which will not be unreasonably withheld, this Agreement may be assigned by Walden's Ridge to any successor in the operation of the distribution facilities currently owned by Walden's Ridge.

(B) Notices

Any notice required or permitted to be given by one of the parties to this Agreement shall be given by U.S. mail, personal delivery or by overnight carrier to the other party at the address set forth below:

Tennessee-American Water Company
1101 Broad Street
P. O. Box 6338,
Chattanooga, Tennessee 37377
Attn: President

Walden's Ridge Utility District
3900 Taft Highway
Signal Mountain, Tennessee 37377
Attn: General Manager

Any notice so given shall be deemed given upon its deposit in the U.S. mail, upon personal delivery or upon its delivery to the overnight carrier.

(C) Governing Law

This Agreement shall be governed by the laws of the State of Tennessee.

(D) Severability

In the event that any provision hereof is found to be invalid or unenforceable, such invalidity or unenforceability shall not impair or limit the validity or enforceability of any other provision hereof, each of which shall continue in full force and effect, and this Agreement shall be construed as if such invalid or unenforceable provisions were omitted from the Agreement.

(E) Entire Agreement

This Agreement constitutes the entire Agreement between Walden's Ridge and Tennessee-American with respect to the subject matter contained in the Agreement, except that Walden's Ridge is subject to the rules, regulations and other applicable conditions and provisions set forth in Tennessee-American's tariff on file with the Tennessee Regulatory and as from time to time amended. This Agreement shall not be amended without the prior written consent of both parties. No modification of this Agreement or waiver of any of its terms and conditions will be effective unless set forth in a written document signed by both parties.

RESOLUTION
of the
COMMISSIONERS
for the
WALDEN'S RIDGE UTILITY DISTRICT

A resolution ratifying Tennessee – American Water Company and
Walden's Ridge Utility District Contract for the Water Source Agreement

WHEREAS, Walden's Ridge Utility District deemed it necessary to seek a new source for water;

WHEREAS, WRUD considered all options available including drilling additional wells and plant expansion and purchase proposal from Soddy Daisy-Falling Water Utility, Hixson Utility District and Tennessee-American Water Company;

WHEREAS, after many years of researching all options available and an engineering cost analysis study, it has been decided to enter a purchase agreement with Tennessee-American Water Company;

WHEREAS, with increased demand, our Board was faced with a large expenditure to modernize and expand our production facilities to meet new and more stringent governmental regulations. After much study, we found it more economical to purchase water from Tennessee-American Water Company.

NOW THEREFORE, BE IT RESOLVED BY THE COMMISSIONERS OF THE WALDEN'S RIDGE UTILITY DISTRICT:

That contingent upon Tennessee-American Water Company signing the Water Purchase Agreement, this resolution shall take effect upon its passage, the public welfare requiring it and passage occurred this 22nd day of July 2003.

WATER PURCHASE AGREEMENT

AMENDMENT A

This is an amendment to the Water Purchase Agreement between Tennessee-American Water Company and Walden's Ridge Utility District signed the 14th day of July 2003 This Amendment (the "Amendment") to the Agreement is, made this 14th day of January, 2004, between and among WALDEN'S RIDGE UTILITY DISTRICT (hereinafter "WRUD"), and TENNESSEE-AMERICAN WATER COMPANY (hereinafter "TAWC")

Upon reviewing our records, it appears that WRUD and TAWC did not formally recognize the renegotiated purchase rate for which WRUD will charge TAWC for water purchased by TAWC from WRUD during the interim period (approximately 18 months) until TAWC has the new water transmission main installed to deliver water to WRUD.

At this time, the only detail found omitted is that WRUD will charge $2.05 per 1000 gallons for all water sold to TAWC to supply the Lone Oak and Suck Creek Utility District areas and other areas as TAWC may expand its system in the future

If for any reason TAWC exercises their option to withdraw from the planned water transmission main installation, then, WRUD reserves the right to bill at the original $2 98 per 1000 gallons retroactive to the activation of water supply to the Lone Oak and Suck Creek Utility District areas and other areas as TAWC may have expanded its system up to the time of withdrawal

IN WITNESS WHEREOF, WRUD and TAWC, have agreed to this Amendment A to be signed by the proper officers thereunto duly authorized, all as of the day and year first above written

WATER PURCHASE AGREEMENT

THIS AGREEMENT, made this 14th day of July 2003 by and between

Tennessee-American Water Company ("Tennessee-American"), located at 1101 Broad Street, Chattanooga, Tennessee

and

Walden's Ridge Utility District ("Walden's Ridge"), located at 3900 Taft Highway, Signal Mountain, Tennessee

WHEREAS, Tennessee-American, a Tennessee corporation, is a public utility which owns and operates a water utility system in and around the City of Chattanooga, Tennessee including the contiguous cities of Red Bank, East Ridge, Ridgeside, and Lookout Mountain, plus the cities of Rossville and Lookout Mountain, Georgia and areas in the Georgia counties of Dade, Walker and Catoosa; and

WHEREAS, Walden's Ridge wishes to purchase all of its water supply from Tennessee-American; and

WHEREAS, Tennessee-American has the capability to provide all of the water supply currently required by Walden's Ridge and is willing to construct a water supply pipeline and booster station, which will provide a sufficient volume of water in order to serve as WRUD's sole source of supply; and

WHEREAS, Walden's Ridge and Tennessee-American are desirous of establishing an Agreement for the purchase and sale of water for a fixed period of time; and

WHEREAS, the parties have reached an Agreement for the sale and purchase of water which they now desire to record in writing;

NOW THEREFORE, in consideration of the mutual covenants contained herein and other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

SECTION I
EXCLUSIVE SUPPLIER

Tennessee-American agrees to sell and Walden's Ridge agrees to buy, during the term of this Agreement and any extension hereof, all of the potable and raw water requirements of Walden's Ridge, as it now exists or may hereafter by expanded, in conformity with the provisions hereof.

SECTION II
CONSTRUCTION OF FACILITIES

(A) Tennessee-American shall construct, at an estimated cost of $2 4 million, a water supply pipeline and booster station from its existing distribution system to the Walden's Ridge water tank near Taft Highway, which will provide a sufficient volume of water in order to serve as Walden's Ridge sole source of supply This water supply pipeline will be capable of delivering up to 2.9 million gallons of water per day at the top of the mountain. The estimated construction time, from the time of a final non-appealable order from the Tennessee Regulatory Authority ("TRA") granting approval of the project, until the connection to the system and delivery of water, is eighteen (18) months. In the event that the construction bid price exceeds $2.4 million by 5% or more, Tennessee-American shall have the right to negotiate an adjustment in the price for the sale of water as provided in Section III hereof or terminate this Agreement.

(B) If any conditions or requirements are imposed by any regulatory authority, or court, which make this project economically unfeasible, Tennessee-American has the right to withdraw and terminate the Agreement.

(C) As part of this consideration, Walden's Ridge agrees that Tennessee-American will be the sole and exclusive supplier of potable and raw water to Walden's Ridge, as it now exists or

NOW THEREFORE, in consideration of the mutual covenants contained herein and other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

SECTION I
EXCLUSIVE SUPPLIER

Tennessee-American agrees to sell and Walden's Ridge agrees to buy, during the term of this Agreement and any extension hereof, all of the potable and raw water requirements of Walden's Ridge, as it now exists or may hereafter by expanded. in conformity with the provisions hereof

SECTION II
CONSTRUCTION OF FACILITIES

(A) Tennessee-American shall construct, at an estimated cost of $2.4 million, a water supply pipeline and booster station from its existing distribution system to the Walden's Ridge water tank near Taft Highway, which will provide a sufficient volume of water in order to serve as Walden's Ridge sole source of supply This water supply pipeline will be capable of delivering up to 2.9 million gallons of water per day at the top of the mountain The estimated construction time, from the time of a final non-appealable order from the Tennessee Regulatory Authority ("TRA") granting approval of the project, until the connection to the system and delivery of water, is eighteen (18) months In the event that the construction bid price exceeds $2.4 million by 5% or more, Tennessee-American shall have the right to negotiate an adjustment in the price for the sale of water as provided in Section III hereof or terminate this Agreement

(B) If any conditions or requirements are imposed by any regulatory authority, or court, which make this project economically unfeasible, Tennessee-American has the right to withdraw and terminate the Agreement.

(C) As part of this consideration, Walden's Ridge agrees that Tennessee-American will be the sole and exclusive supplier of potable and raw water to Walden's Ridge, as it now exists or

hereafter be changed, except as noted below in this Section, and that Walden's Ridge will not, without prior written consent of Tennessee-American, receive potable or raw water service from any person or entity (including Walden's Ridge and its own customers), for the period of time under the Agreement including any extensions or renewals. The parties agree that the approximately eighty (80) current Walden's Ridge customers in the Falling Water Community located on Levi Road, Ferry Road, Pickett Gulf Road, Levi Cemetery Road, Courtney Road and Godsey Road, will be an exception, which allows Walden's Ridge to seek an alternative source for these customers

(D) In the event Walden's Ridge terminates the Agreement prior to the expiration of forty (40) years from the Date of Service, as defined below, or fails to renew the agreement for a period of time adequate to allow Tennessee-American an opportunity to recover its investment, or if Tennessee-American is no longer the sole and exclusive provider of potable and raw water to Walden's Ridge, or fails to pay Tennessee-American as provided herein, then Walden's Ridge, and its successors and assigns, agree to pay Tennessee-American, within thirty (30) days following such termination or event, the balance of the undepreciated costs, on a straight-line basis, of Tennessee-American's pipeline and all other facilities that are constructed to serve Walden's Ridge.

(E) Walden's Ridge will decommission and terminate its existing source of supply and treatment facilities upon completion of the Tennessee-American water supply pipeline extension and connection to the Walden's Ridge system and no later than ninety (90) days following the Date of Service, as defined below. As part of this consideration, and upon completion of the Tennessee-American water supply pipeline and booster station, Walden's Ridge agrees to exclusively lease to Tennessee-American, for a period of forty (40) years from the Date of Service as defined below, the 6" and 8" welded steel water supply lines, along with perpetual easements, from its Mountain Station at the end of Levi Cemetery Road to top of the mountain.

SECTION III
SALE OF WATER

(A) The water from the Tennessee-American pipeline shall be provided to Walden's Ridge at a rate of $1.25/1000 gallons, except for the pass-through cost as identified in Section III (B) herein, for the first three (3) years, beginning with the date that water service is first taken from these facilities ("Date of Service"). Any proposed change in the rate after this initial period will be accompanied by supporting data and computations, which will be based on industry accepted cost of service methodology. Walden's Ridge has the right to agree to this rate or to propose an alternative rate with the understanding that the TRA will be the ultimate authority in determining the rate.

(B) From the date this Agreement is executed and during the first three (3) years from the Date of Service under this Agreement, in the event that electric costs, which can be directly identified with this project, increase, Walden's Ridge agrees to meet with Tennessee-American to discuss an equitable pass-through of those cost increases if so requested by Tennessee-American.

(C) Walden's Ridge will permit Tennessee-American to use the Walden's Ridge distribution system as a conduit through which Tennessee-American may wheel water to other water utility districts and other customers as agreed to by the parties, which agreement by Walden's Ridge shall not be unreasonably withheld. The parties agree to meet within ninety (90) days after execution of this Agreement to define the territory that will be served by Walden's Ridge. The wheeling charge from Walden's Ridge to Tennessee-American shall be at a rate of $.39/1000 gallons. This rate is guaranteed for three (3) years from the Date of Service. Any proposed change in the rate after this initial period will be accompanied by supporting data and computations, which will be based on industry accepted

cost of service methodology. Tennessee-American has the right, within ninety (90) days, to agree to this rate or to propose an alternative rate. If the Parties do not agree on the rate change, then the Parties will refer the matter to a neutral mediator. If mediation does not resolve the matter, either of the Parties may take the matter to the TRA, if applicable, or Utility Management Review Board or seek Judicial Review as necessary for resolution. As part of the consideration under this agreement. Tennessee-American shall have the right, at the cost specified above or at a rate that may change from time to time as agreed by the parties, even after termination of the agreement, to transfer water through Walden's Ridge facilities.

(D) Walden's Ridge will not be charged by Tennessee-American for any water supplied through its system that is transferred to other water utility districts and/or customers outside the Walden's Ridge service area. Tennessee-American shall install a meter or meters on the Walden's Ridge distribution system where appropriate in order to measure the volume of water that is transferred. Walden's Ridge will have reasonable access to such meters at all times.

SECTION IV
FLUORIDATION OF WATER SUPPLY

Tennessee-American will fluoridate the water supply to Walden's Ridge, in accordance with the Tennessee Department of Environment and Conservation Rule 1200-5-1-17 (20), which requires the maintenance of a monthly average concentration of fluoride between 0 9 mg/l and 1.3 mg/l, unless required to do otherwise by applicable law or regulations.

SECTION V
OPERATIONAL REQUIREMENTS

(A) In order to minimize utilization of the peaking capacity of Tennessee-American, Walden's Ridge will provide, by the Date of Service, adequate storage to provide for its own

maximum hour needs. Walden's Ridge shall maintain a minimum of one-day of water supply storage on its distribution system.

(B) Walden's Ridge agrees to cooperate with Tennessee-American in making improvements as needed to its distribution system in order to efficiently facilitate the wheeling of water through its system to other water utility district customers of Tennessee-American or other customers of Tennessee-American outside the Walden's Ridge service area. Any such improvements, which are deemed necessary by Tennessee-American to adequately wheel water through the Walden's Ridge system for the benefit of Tennessee-American, shall be done at Tennessee American's expense.

(C) Tennessee-American will conduct a one-time comprehensive leak survey along Walden's Ridge transmission mains that are located in Taft Highway between Walden's Ridge twin storage tanks (located at the old Walden's Ridge office) and the end of the line near Grandview subdivision. This leak survey will be at no cost to Walden's Ridge. However, Walden's Ridge will be responsible for uncovering and repairing any identified leaks. The purpose of the survey will be to identify and locate leaks to help Walden's Ridge reduce its unaccounted for water.

SECTION VI
CUSTOMERS AT BOTTOM OF MOUNTAIN

In the event that Walden's Ridge, at any time in the future, decides to divest itself of the approximately eighty (80) customers, and as that number of customers may change from time to time, at the base of the mountain near the Soddy-Daisy system, Tennessee-American will be granted the right of first refusal to purchase from Walden's Ridge the facilities necessary to serve these customers at a price not to exceed the actual, bona fide offer made to Walden's Ridge for the facilities.

SECTION VII
METERING

Metering of the water sold under this Agreement shall be at the point where Tennessee-American's water supply pipeline is connected to the Walden's Ridge water tank near Taft Highway.

SECTION VIII
BILLING

During its normal billing cycle each month, Tennessee-American will issue an invoice to Walden's Ridge for Walden's Ridge metered usage during the prior month. Payment of such invoice will be made by Walden's Ridge on or before eighteen (18) days after receipt of the invoice. Interest and penalties shall accrue on the unpaid balance at the rate and amounts provided in Tennessee-American's filed tariff for its customers.

SECTION IX
APPROVALS BY TENNESSEE REGULATORY AUTHORITY

It is understood and agreed that this Agreement is conditioned on approval by the TRA. Promptly upon execution of this Agreement, Tennessee-American shall file an application for approval with the TRA and take such action in good faith as may be necessary to obtain the appropriate approval. Service provided hereunder will be pursuant to the rules and regulations of the TRA as may be changed from time to time during the term of this Agreement. Walden's Ridge agrees to provide all reasonable support for such regulatory approval.

SECTION X
TERM OF AGREEMENT

The term of this Agreement shall be for a period of forty (40) years, beginning on the Date of Service. In consideration of the requirement for Walden's Ridge to have a

reliable source of supply at all times, if the Company should desire to terminate this Agreement after the Date of Service and prior to the end of the term, except for breach of this Agreement by Walden's Ridge, the Company will provide Walden's Ridge with three (3) years advance written notice of such desire to terminate.

SECTION XI
FORCE MAJEURE

Neither Walden's Ridge or Tennessee-American shall be liable for damages to the other for any act, omission, or circumstance occasioned by or in consequence of strikes, lockouts, acts of the public enemy, wars, blockades, insurrections, riots, acts of terrorism, epidemics, landslides, lightning, earthquakes, fires, storms, floods, washouts, civil disturbances, explosions, breakage, or accident to machinery or lines of pipe, and any other cause, whether of the kind herein enumerated or otherwise, not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. Failure to prevent or settle any strike or strikes shall not be considered to be a matter within the control of the party claiming suspension. Such causes or contingencies affecting such performance shall not relieve Walden's Ridge from its obligation to make payment of amounts due hereunder.

SECTION XII
RENEWAL OF AGREEMENT

This agreement may be renegotiated for additional periods of time beyond the term of this Agreement. Negotiations to extend the term of this Agreement shall commence no later than six (6) months prior to the expiration date of this Agreement.

However, the rates to be charged during any renewal period shall also be subject to prior approval by the Tennessee Regulatory Authority.

SECTION XIII
MISCELLANEOUS PROVISIONS

(A) Assignment

This Agreement shall be binding on the successors and assigns of Tennessee-American. Upon obtaining written approval from Tennessee-American, which will not be unreasonably withheld, this Agreement may be assigned by Walden's Ridge to any successor in the operation of the distribution facilities currently owned by Walden's Ridge.

(B) Notices

Any notice required or permitted to be given by one of the parties to this Agreement shall be given by U.S. mail, personal delivery or by overnight carrier to the other party at the address set forth below:

Tennessee-American Water Company
1101 Broad Street
P. O. Box 6338,
Chattanooga, Tennessee 37377
Attn: President

Walden's Ridge Utility District
3900 Taft Highway
Signal Mountain, Tennessee 37377
Attn: General Manager

Any notice so given shall be deemed given upon its deposit in the U S. mail, upon personal delivery or upon its delivery to the overnight carrier.

(C) Governing Law

This Agreement shall be governed by the laws of the State of Tennessee.

(D) Severability

In the event that any provision hereof is found to be invalid or unenforceable, such invalidity or unenforceability shall not impair or limit the validity or enforceability of any other provision hereof, each of which shall continue in full force and effect, and this Agreement shall be construed as if such invalid or unenforceable provisions were omitted from the Agreement.

(E) Entire Agreement

This Agreement constitutes the entire Agreement between Walden's Ridge and Tennessee-American with respect to the subject matter contained in the Agreement, except that Walden's Ridge is subject to the rules, regulations and other applicable conditions and provisions set forth in Tennessee-American's tariff on file with the Tennessee Regulatory and as from time to time amended. This Agreement shall not be amended without the prior written consent of both parties. No modification of this Agreement or waiver of any of its terms and conditions will be effective unless set forth in a written document signed by both parties.

RESOLUTION
of the
COMMISSIONERS
for the
WALDEN'S RIDGE UTILITY DISTRICT

A resolution ratifying Tennessee – American Water Company and
Walden's Ridge Utility District Contract for the Water Source Agreement

WHEREAS, Walden's Ridge Utility District deemed it necessary to seek a new source for water;

WHEREAS, WRUD considered all options available including drilling additional wells and plant expansion and purchase proposal from Soddy Daisy-Falling Water Utility, Hixson Utility District and Tennessee-American Water Company;

WHEREAS, after many years of researching all options available and an engineering cost analysis study, it has been decided to enter a purchase agreement with Tennessee-American Water Company;

WHEREAS, with increased demand, our Board was faced with a large expenditure to modernize and expand our production facilities to meet new and more stringent governmental regulations. After much study, we found it more economical to purchase water from Tennessee-American Water Company

NOW THEREFORE, BE IT RESOLVED BY THE COMMISSIONERS OF THE WALDEN'S RIDGE UTILITY DISTRICT:

That contingent upon Tennessee-American Water Company signing the Water Purchase Agreement, this resolution shall take effect upon its passage, the public welfare requiring it and passage occurred this 22nd day of July 2003.

BEFORE THE TENNESSEE REGULATORY AUTHORITY

NASHVILLE, TENNESSEE

March 16, 2004

IN RE:	)	
	)	
TENNESSEE-AMERICAN WATER COMPANY - APPROVAL OF SPECIAL CONTRACT WITH WALDEN'S RIDGE UTILITY DISTRICT	)	DOCKET NO. 03-00452

ORDER APPROVING SPECIAL CONTRACT

This matter came before Chairman Deborah Taylor Tate, Director Sara Kyle and Director Ron Jones of the Tennessee Regulatory Authority ("TRA" or "Authority"), the voting panel assigned to this docket, at a regularly scheduled Authority Conference held on October 21, 2003, for consideration of a petition filed by Tennessee-American Water Company ("Tennessee-American") seeking approval of an agreement for Tennessee-American to provide water for resale to Walden's Ridge Utility District ("Walden's Ridge").

Background

On July 24, 2003, Tennessee-American petitioned the Authority for approval of a Water Purchase Agreement ("Special Contract") with Walden's Ridge. This Special Contract was negotiated by the parties and submitted to the Authority for approval pursuant to Tenn. Comp. R. & Regs. 1220-4-1-.07, which states:

> Special contracts between public utilities and certain customers prescribing and providing rates, services and practices not covered by or permitted in the general tariffs, schedules or rules filed by such utilities are subject to supervision, regulation and control by the Authority. A copy of such special agreements shall be filed, subject to review and approval.

No other interested party requested intervention in this matter.

Terms of the Special Contract

The term of the Special Contract is for forty (40) years from the "date of service," defined as the date that water is first taken from the Tennessee-American pipeline. As part of the agreement, Tennessee-American will construct a water supply pipeline and booster station from its existing distribution system to the Walden's Ridge water tank at an estimated cost of $2.4 million. If the construction bid price exceeds $2.4 million by five percent (5%) or more, Tennessee-American has the right under the Special Contract to negotiate an adjustment in the price for the sale of water or terminate the contract.[1] In return, Tennessee-American will be the sole and exclusive provider of potable and raw water to Walden's Ridge, and Walden's Ridge will decommission and terminate its water supply and treatment facilities within ninety (90) days following the date of service.

The agreement provides for the sale of water by Tennessee-American to Walden's Ridge at a rate of one dollar and twenty-five cents ($1.25) per one thousand (1,000) gallons for the first three (3) years of the contract, plus a negotiable pass-through of any increased electric costs identified with the project. After the initial three-year period, if Tennessee-American proposes a rate change, Walden's Ridge can agree to the new rate or propose an alternative rate with the understanding that the TRA will be the ultimate authority in determining the rate.

The agreement also stipulates that Tennessee-American can use Walden Ridge's distribution system to resell (or "wheel") water to other neighboring utilities. The resale (or "wheeling") rate under the terms of the agreement will be thirty-nine cents ($.39) per one thousand (1,000) gallons and will be fixed for the first three (3) years of the agreement. If any proposed change to the wheeling rate after the initial three-year period cannot be agreed upon by the parties, the contract

[1] At the Authority Conference on October 21, 2003, Mr. Coleman Bush of Tennessee-American committed to the panel that if Tennessee-American petitions the TRA in future rate cases for a rate adjustment to permit full recovery of the $2.4 million construction costs, the rate adjustment will apply only to Tennessee-American's Walden's Ridge customers and not to other customers of Tennessee-American. *See Transcript of Authority Conference*, pp. 44-45 (October 21, 2003).

requires mediation. If mediation is unsuccessful, pursuant to the contract either of the parties may take the matter to the TRA, the Utility Management Review Board or the courts.[2]

Findings and Conclusions

Based upon the terms of the Water Purchase Agreement previously set forth, the Authority finds the agreement justifies a departure from Tennessee-American's tariff through a special contract. The Special Contract will enable Tennessee-American to generate additional revenues that will help offset future rate increases for existing customers and benefit its ratepayers.

October 21, 2003 Authority Conference

The Directors of this voting panel considered Tennessee-American's petition for approval of the Special Contract at the regularly scheduled Authority Conference held on October 21, 2003. During the Conference, the panel found that the Special Contract was in the public interest and after careful consideration voted unanimously to approve the petition.

IT IS THEREFORE ORDERED THAT:

The Special Contract by and between Tennessee-American Water Company and Walden's Ridge Utility District is hereby approved.

Deborah Taylor Tate, Chairman

Sara Kyle, Director

Ron Jones, Director

[2] This particular provision of the contract was discussed at the Authority Conference on October 21, 2003 by Mr. George Masterson of Tennessee-American Water, who told the voting panel the contract states that if the parties "can't agree after mediation, that either party can bring the matter to the TRA on the wheeling charge." *Transcript of Authority Conference*, p. 44 (October 21, 2003).

Mr. William O. Leonard III, Mayor
Town of Signal Mountain
1100 Ridgeway Avenue
Signal Mountain, TN 37377

Dear Mayor Leonard:

Enclosed for your review is a proposed agreement in which we are requesting a third extension to the water purchase agreement dated July 1, 1997 between the Town of Signal Mountain and Tennessee-American Water. The extension agreement will be effective July 1, 2006 and will extend for an additional three years the same terms and conditions as the original contract, and the proposed rate will increase to $1.061 per 1000 gallons, or $.796 per CCF.

If the agreement meets with your approval, please sign on behalf of the Town of Signal Mountain and return to my attention so that I may submit it for approval by the Tennessee Regulatory Authority. We appreciate the opportunity to continue to work with you in providing water service to the residents of Signal Mountain.

Sincerely,

John S. Watson
Vice-President and
General Network Manager

EXTENSION OF WATER PURCHASE AGREEMENT

THIS EXTENSION OF WATER PURCHASE AGREEMENT, made effective as of July 1, 2006, by and between Tennessee American Water ("Tennessee American"), located at 1101 Broad Street, Chattanooga, Tennessee, and Town of Signal Mountain ("Signal Mountain"), whose address is 1111 Ridgeway Avenue, Signal Mountain, Tennessee,

WHEREAS, the parties hereto have agreed to extend the term of their Water Purchase Agreement dated July 1, 1997 ("Original Agreement") as amended and extended by agreement dated as being effective July 1, 2000 ("First Extension Agreement"), and agreement dated as being effective July 1, 2003 ("Second Extension Agreement"), copies of which are attached hereto and incorporated herein by reference, for an additional term of three years as provided herein,

NOW THEREFORE, in consideration of the mutual convenants and promises herein and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

1. Except as specifically provided herein, all of the terms, conditions, privileges and obligations in the Original Agreement, as amended and extended by the First and Second Extension Agreements are hereby extended for a term of three (3) years (or thirty-six (36) monthly billing periods), beginning July 1, 2006 and ending July 1, 2009.

2. Effective July 1, 2006 and continuing through the end of the term hereof, Section 1 of the Original Agreement, as amended and extended by the First and Second Extension Agreements, is hereby amended to state that Signal Mountain will purchase water at the rate of exactly $0.796 per hundred cubic feet (CCF), which is approximately $1.061 per 1,000 gallons.

3. This Extension of Water Purchase Agreement is subject to the approval by the Board of Tennessee American Water and the Tennessee Regulatory Authority ("TRA"). Signal Mountain agrees to take such action reasonably necessary to support Tennessee American's application for approval from the TRA.

IN WITNESS WHEREOF, the parties have set forth their hands.

EXTENSION OF WATER PURCHASE AGREEMENT

THIS EXENSION OF WATER PURCHASE AGEEMENT, made effective as of July 1, 2003, by and between Tennessee-American Water Company (Tennessee-American"), located at 1101 Broad Street, Chattanooga, Tennessee, and Town of Signal Mountain ("Signal Mountain"), whose address is 1101 Ridgeway Avenue, Signal Mountain, Tennessee.

WHEREAS, the parties hereto have agreed to extend the term of their Water Purchase Agreement dated July 1, 1997 ("Original Agreement"), as amended and extended by agreement dated as being effective July 1, 2000 ("First Extension Agreement"), copies of both are attached hereto and incorporated herein by reference, for an additional term of three years as provided herein,

NOW, THEREFORE, in consideration of the mutual covenants and promises herein and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. Except as specifically provided herein, all of the terms, conditions, privileges and obligations in the Original Agreement, as amended and extended by the First Extension Agreement, are hereby extended for a term of three (3) years (or thirty-six (36) monthly billing periods), beginning July 1, 2003 and ending July 1, 2006.

2. Effective August 7, 2003, and continuing through the end of the term hereof, Section 1 of the Original Agreement, as amended and extended by the First Extension Agreement, is hereby amended to state that Signal Mountain will purchase water at the rate of $1.02 per 1,000 gallons.

3. This Extension of Water Purchase Agreement is subject to the approval by the Board of the Tennessee-American Water Company and the Tennessee Regulatory Authority ("TRA"). Signal Mountain agrees to take such action reasonably necessary to support Tennessee-American's application for approval from the TRA.

IN WITNESS WHEREOF, the parties have set forth their hands.

EXTENSION OF WATER PURCHASE AGREEMENT

THIS EXTENSION OF WATER PURCHASE AGREEMENT, made effective as of July 1, 2000, by and between:

Tennessee-American Water Company ("Tennessee-American"), located at 1101 Broad Street, Post Office Box 6338, Chattanooga, Tennessee

And

Town of Signal Mountain ("Signal Mountain"), located at 1101 Ridgeway Avenue, Signal Mountain, Tennessee

WHEREAS, Signal Mountain and Tennessee-American have mutually agreed to extend the term of their Water Purchase Agreement dated July 1, 1997 ("Original Agreement") for an additional period of time under the same terms and conditions, except as herein specified.

NOW THEREFORE, in consideration of the mutual covenants and promises herein and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

1. All of the terms, conditions, privileges and obligations in the Original Agreement, except as specifically otherwise stated herein, are hereby extended for a term of three (3) years (or thirty-six [36] monthly billing periods) beginning September 1, 2000.
2. A copy of the Original Agreement is attached hereto and incorporated herein by reference.
3. Section X (2) of the Original Agreement is amended to provide that any notice to Tennessee-American be sent to the attention of the President of Tennessee-American.

4. This Extension of Water Purchase Agreement is subject to the approval by the Board of Directors of Tennessee-American and by the Tennessee Regulatory Authority ("TRA"). Signal Mountain agrees to take such action reasonably necessary to support Tennessee-American's application for approval from the TRA.

IN WITNESS WHEREOF, the parties have set forth their hands.

WATER PURCHASE AGREEMENT

THIS AGREEMENT, made this 1st day of July, 1997 by and between

Tennessee-American Water Company ("Tennessee-American"), located at 1101 Broad Street, Post Office Box 6338, Chattanooga, Tennessee

and

Town of Signal Mountain ("Signal Mountain"), located at 1100 Ridgeway Avenue, Signal Mountain, Tennessee

WHEREAS, Tennessee-American, a Tennessee corporation, is a public utility which owns and operates a water utility system in and around the City of Chattanooga, Tennessee including the contiguous Tennessee cities of Red Bank, East Ridge, Ridgeside, and Lookout Mountain, plus the cities of Rossville and Lookout Mountain, Georgia and areas in the Georgia counties of Dade, Walker and Catoosa; and

WHEREAS, Signal Mountain wishes to purchase all or substantially all of its water supply from Tennessee-American; and

WHEREAS, Tennessee-American currently supplies water to Signal Mountain and has the capability and facilities in place to provide all or substantially all of the water supply currently required by Signal Mountain; and

WHEREAS, Signal Mountain and Tennessee-American are desirous of establishing an Agreement for the purchase of water for a fixed period of time; and,

WHEREAS, the parties have reached an Agreement for the sale and purchase of water which they now desire to record in writing;

NOW, THEREFORE, in consideration of the mutual covenants contained herein and other

good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

SECTION I
SALE OF WATER

Signal Mountain agrees to purchase a minimum of 273,750,000 gallons per year at $.95 per 1,000 gallons.

On or before the tenth day after the end of each twelve months of this Agreement, Tennessee-American will review the usage of Signal Mountain during the prior twelve month period year. If Signal Mountain's usage during the prior twelve month period was 273,750,000 gallons or more, no additional charge will be made. Should Signal Mountain's usage be less than 273,750,000 gallons, that month's invoice will include a charge for the difference between the actual usage and 273,750,000 gallons priced at $.95 per 1,000 gallons.

SECTION II
FLUORIDATION OF WATER SUPPLY

The Company will fluoridate the water supplied to the Town of Signal Mountain, in accordance with the Tennessee Department of Environment and Conservation Rule 1200-5-1-.17 (20), which requires the maintenance of a monthly average concentration of fluoride between 0.9 mg/l and 1.3 mg/l, unless required to do otherwise by applicable state law or regulations.

SECTION III
OPERATIONAL REQUIREMENTS

In order to minimize utilization of the peaking capacity of Tennessee-American, Signal Mountain will provide adequate storage to provide for its own maximum hour needs. Signal Mountain shall maintain a minimum of one day of water supply storage on their distribution system.

Tennessee-American will supply up to 2,500 gallons per minute to the existing metering location as described in Section IV hereof, at a pressure sufficient to fill the existing Signal Mountain Receiving tanks at the base of Signal Mountain. If Signal Mountain requests flow rates in excess of 2,500 g.p.m. at any time during the term of this Agreement, it will be required either to pay for the additional system improvements that are needed to meet such additional flow or to contract for water at a higher rate per 1,000 gallons of water to be determined by the Company.

SECTION IV
METERING

Metering of the water sold under this Agreement shall be at the existing meter setting located at the Town of Signal Mountain's existing storage tanks at the base of Signal Mountain, just off of Signal Mountain Road and Suck Creek Road.

SECTION V
BILLING

On or before the tenth day of each month, Tennessee-American will issue an invoice to Signal Mountain for Signal Mountain's metered usage during the prior month. Payment of such invoice will be made by Signal Mountain on or before eighteen days after receipt of the invoice.

SECTION VI
APPROVALS BY TENNESSEE REGULATORY AUTHORITY

It is understood and agreed that this Agreement is conditioned on approval by the Tennessee Regulatory Authority ("TRA"). Promptly upon execution of this Agreement, Tennessee-American shall file an application for approval with the TRA and take such action in good faith as may be necessary to obtain the appropriate approval.

SECTION VII
TERM OF AGREEMENT

The term of this Agreement shall be for a period of three (3) years or thirty-six (36) monthly billing periods. The three (3) year period shall commence with the effective date of the purchase of water under this Agreement. The effective date of the commencement of sales under the terms of this Agreement shall be the beginning of the next regular monthly billing period following approval of this Agreement by the TRA.

SECTION VIII
FORCE MAJEURE

Neither Signal Mountain or Tennessee-American shall be liable for damages to the other for any act, omission, or circumstance occasioned by or in consequence of any strikes, lockouts, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides, lightning, earthquakes, fires, storms, floods, washouts, civil disturbances, explosions, breakage, or accident to machinery or lines of pipe, and any other cause, whether of the kind herein enumerated or otherwise, not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. Failure to prevent or settle any strike or strikes shall not be considered to be a matter within the control of the party claiming suspension. Such causes or contingencies affecting such performance shall not relieve Signal Mountain from its obligations to make payment of amounts due hereunder. During the period of force majeure, the minimum annual charge shall be reduced by a ratio equal to the number of days of interruption divided by 365 days. If, during the period of force majeure some water can be delivered, then the ratio shall be multiplied by the percentage reduction in usage.

SECTION IX
RENEWAL OF AGREEMENT

This Agreement may be renegotiated for additional periods of time beyond the term of this Agreement. Negotiations to extend the term of this Agreement shall commence no later than six (6) months prior to the expiration date of this Agreement. However, the rates to be charged during any renewal period shall also be subject to prior approval by TRA.

SECTION X
MISCELLANEOUS PROVISIONS

(1) **Assignment**

Upon obtaining written approval from Tennessee-American which will not be unreasonably withheld, this Agreement may be assigned by Signal Mountain to any successor in the operation of the facilities currently owned by Signal Mountain.

(2) **Notices**

Any notice required or permitted to be given by one of the parties to this Agreement shall be given by U.S. mail, personal delivery or by overnight carrier to the other party at the address set forth below:

Town of Signal Mountain
1100 Ridgeway Avenue
Signal Mountain, TN 37377
Attn: Town Manager

Tennessee-American Water Company
1101 Broad Street
P. O. Box 6338
Chattanooga, Tennessee 37401
Attn: Vice-President and Manager

Any notice so given shall be deemed given upon its deposit in the U.S. mail, upon personal delivery or upon its delivery to the overnight carrier.

(3) **Governing Law**

This Agreement shall be governed by the laws of the State of Tennessee.

(4) **Enforceability**

In the event that any provision hereof is found to be invalid or unenforceable, such invalidity or unenforceability shall not impair or limit the validity or enforceability of any other provision hereof, each of which shall continue in full force and effect, and this Agreement shall be construed as if such invalid or unenforceable provisions were omitted from this Agreement.

(5) **Entire Agreement**

This Agreement constitutes the entire Agreement between Signal Mountain and Tennessee-American with respect to the subject matter contained in the Agreement, except that Signal Mountain is subject to the rules, regulations and other applicable conditions and provisions set forth in Tennessee-American's tariff on file with the TRA and as from time to time amended. This Agreement shall not be amended without the prior written consent of both parties. No modification of this Agreement or waiver of any of its terms and conditions will be effective unless set forth in a written document signed by both parties.

Mr. Rick Sonnenburg
Town of Signal Mountain
1100 Ridgeway Avenue
Signal Mountain, TN 37377

Dear Mr. Sonnenburg:

This is to advise that the Tennessee Regulatory Authority unanimously approved the special Water Purchase Agreement between Tennessee-American Water Company and the Town of Signal Mountain at their regular conference yesterday, July 29, 1997. Therefore, I am enclosing a copy of the fully executed agreement for your files. As soon as I receive a copy of the official order of the Tennessee Regulatory Authority, which should follow in about two weeks, I will send you a copy. The next billing to the town will reflect the new rate of $.95 per 1,000 gallons.

We are pleased that we are able to offer the Town of Signal Mountain this special sale for resale rate, and look forward to continuing our long-standing relationship with the Town, and providing excellent water service to your fine community.

Sincerely,

R. T. Sullivan
Vice-President and Manager

BEFORE THE TENNESSEE REGULATORY AUTHORITY

August 18, 1997 NASHVILLE, TENNESSEE

In Re:	**Application for Approval of Special Contract Between Tennessee American Water Company and the Town of Signal Mountain**	))))	**Docket No. 97-01305**

ORDER APPROVING WATER PURCHASE AGREEMENT

This matter is before the Tennessee Regulatory Authority ("Authority") upon the application of Tennessee American Water Company ("Tenn. American") for approval of a Water Purchase Agreement ("Special Contract") entered into between Tenn. American and the Town of Signal Mountain, Tennessee ("Signal Mountain"). The Directors of the Authority considered approval of this Special Contract at a regularly scheduled conference held on July 29, 1997. Upon consideration of this matter, the Authority finds the following:

1. The Authority has jurisdiction over this matter pursuant to Tenn. Code Ann. § 65-4-101 et. seq. and Authority Rules 1220-4-1-.07, (Special Contracts), and 1220-4-1-.08, (Resale of Water).

2. On July 2, 1997, Tenn. American filed its application for approval of the Special Contract with the Authority's Executive Secretary.

3. The Town Council of Signal Mountain unanimously approved this Special Contract at a special meeting of the Council held on June 2, 1997. However, Section VI of the Special Contract is conditioned upon subsequent approval of the contract by the Authority.

However, Section VI of the Special Contract is conditioned upon subsequent approval of the contract by the Authority.

4. The Town of Signal Mountain has been a purchaser of water for resale from Tenn. American since the town was incorporated more than 50 years ago. Tenn. American's only other customer of water for resale is the City of Fort Oglethorpe, Georgia.[1]

5. This Special Contract contains identical financial terms to those that were approved by the Authority for the City of Fort Oglethrope. That is to say that Signal Mountain will be required to purchase 273,750,000 gallons of water per year at a cost of ninety-five cents ($0.95) per thousand gallons ("pmg") for three (3) years. Further, the contract price of ninety-five cents ($0.95) pmg is a nine cent ($0.09) rate reduction from current rates.

6. No party has petitioned for intervention in this matter or has raised objection to the Authority's approval of the terms of this Special Contract.

7. After careful review of this contract, the Directors of the Authority find that this contract would permit the company to furnish water for resale to its only two resale customers at the same non-discriminatory price and under the same conditions. Further, the Authority finds that this contract is in the public interest as it enures to the benefit of Signal Mountain and its residents by providing a dependable supply of water at fair and affordable prices.

IT IS THEREFORE ORDERED THAT:

1. The application for approval of the Special Contract entered into

[1] A Water Purchase Agreement was entered into by the company and the City of Fort Oglethorpe as of March 1, 1997 and was approved by the Authority on March 4, 1997, Docket No. 97-00223.

between Tennessee American Water Company and the Town of Signal Mountain, Tennessee is hereby approved;

2. That any party aggrieved by the Authority's decision in this matter may file a Petition for Reconsideration with the Authority within ten (10) days from and after the date of this Order; and

3. That any party aggrieved by the Authority's decision in this matter has the right of judicial review by filing a Petition for Review in the Tennessee Court of Appeals, Middle Division, within sixty (60) days from and after the date of this Order.

CHAIRMAN

DIRECTOR

DIRECTOR

ATTEST:

EXECUTIVE SECRETARY

WATER PURCHASE AGREEMENT

THIS AGREEMENT, made this 1st day of July, 1997 by and between

Tennessee-American Water Company ("Tennessee-American"), located at 1101 Broad Street, Post Office Box 6338, Chattanooga, Tennessee

and

Town of Signal Mountain ("Signal Mountain"), located at 1100 Ridgeway Avenue, Signal Mountain, Tennessee

WHEREAS, Tennessee-American, a Tennessee corporation, is a public utility which owns and operates a water utility system in and around the City of Chattanooga, Tennessee including the contiguous Tennessee cities of Red Bank, East Ridge, Ridgeside, and Lookout Mountain, plus the cities of Rossville and Lookout Mountain, Georgia and areas in the Georgia counties of Dade, Walker and Catoosa; and

WHEREAS, Signal Mountain wishes to purchase all or substantially all of its water supply from Tennessee-American; and

WHEREAS, Tennessee-American currently supplies water to Signal Mountain and has the capability and facilities in place to provide all or substantially all of the water supply currently required by Signal Mountain; and

WHEREAS, Signal Mountain and Tennessee-American are desirous of establishing an Agreement for the purchase of water for a fixed period of time; and,

WHEREAS, the parties have reached an Agreement for the sale and purchase of water which they now desire to record in writing;

NOW, THEREFORE, in consideration of the mutual covenants contained herein and other

good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

SECTION I
SALE OF WATER

Signal Mountain agrees to purchase a minimum of 273,750,000 gallons per year at $.95 per 1,000 gallons.

On or before the tenth day after the end of each twelve months of this Agreement, Tennessee-American will review the usage of Signal Mountain during the prior twelve month period year. If Signal Mountain's usage during the prior twelve month period was 273,750,000 gallons or more, no additional charge will be made. Should Signal Mountain's usage be less than 273,750,000 gallons, that month's invoice will include a charge for the difference between the actual usage and 273,750,000 gallons priced at $.95 per 1,000 gallons.

SECTION II
FLUORIDATION OF WATER SUPPLY

The Company will fluoridate the water supplied to the Town of Signal Mountain, in accordance with the Tennessee Department of Environment and Conservation Rule 1200-5-1-.17 (20), which requires the maintenance of a monthly average concentration of fluoride between 0.9 mg/l and 1.3 mg/l, unless required to do otherwise by applicable state law or regulations.

SECTION III
OPERATIONAL REQUIREMENTS

In order to minimize utilization of the peaking capacity of Tennessee-American, Signal Mountain will provide adequate storage to provide for its own maximum hour needs. Signal Mountain shall maintain a minimum of one day of water supply storage on their distribution system.

Tennessee-American will supply up to 2,500 gallons per minute to the existing metering location as described in Section IV hereof, at a pressure sufficient to fill the existing Signal Mountain Receiving tanks at the base of Signal Mountain. If Signal Mountain requests flow rates in excess of 2,500 g.p.m. at any time during the term of this Agreement, it will be required either to pay for the additional system improvements that are needed to meet such additional flow or to contract for water at a higher rate per 1,000 gallons of water to be determined by the Company.

SECTION IV
METERING

Metering of the water sold under this Agreement shall be at the existing meter setting located at the Town of Signal Mountain's existing storage tanks at the base of Signal Mountain, just off of Signal Mountain Road and Suck Creek Road.

SECTION V
BILLING

On or before the tenth day of each month, Tennessee-American will issue an invoice to Signal Mountain for Signal Mountain's metered usage during the prior month. Payment of such invoice will be made by Signal Mountain on or before eighteen days after receipt of the invoice.

SECTION VI
APPROVALS BY TENNESSEE REGULATORY AUTHORITY

It is understood and agreed that this Agreement is conditioned on approval by the Tennessee Regulatory Authority ("TRA"). Promptly upon execution of this Agreement, Tennessee-American shall file an application for approval with the TRA and take such action in good faith as may be necessary to obtain the appropriate approval.

SECTION VII
TERM OF AGREEMENT

The term of this Agreement shall be for a period of three (3) years or thirty-six (36) monthly billing periods. The three (3) year period shall commence with the effective date of the purchase of water under this Agreement. The effective date of the commencement of sales under the terms of this Agreement shall be the beginning of the next regular monthly billing period following approval of this Agreement by the TRA.

SECTION VIII
FORCE MAJEURE

Neither Signal Mountain or Tennessee-American shall be liable for damages to the other for any act, omission, or circumstance occasioned by or in consequence of any strikes, lockouts, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides, lightning, earthquakes, fires, storms, floods, washouts, civil disturbances, explosions, breakage, or accident to machinery or lines of pipe, and any other cause, whether of the kind herein enumerated or otherwise, not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. Failure to prevent or settle any strike or strikes shall not be considered to be a matter within the control of the party claiming suspension. Such causes or contingencies affecting such performance shall not relieve Signal Mountain from its obligations to make payment of amounts due hereunder. During the period of force majeure, the minimum annual charge shall be reduced by a ratio equal to the number of days of interruption divided by 365 days. If, during the period of force majeure some water can be delivered, then the ratio shall be multiplied by the percentage reduction in usage.

SECTION IX
RENEWAL OF AGREEMENT

This Agreement may be renegotiated for additional periods of time beyond the term of this Agreement. Negotiations to extend the term of this Agreement shall commence no later than six (6) months prior to the expiration date of this Agreement. However, the rates to be charged during any renewal period shall also be subject to prior approval by TRA.

SECTION X
MISCELLANEOUS PROVISIONS

(1) **Assignment**

Upon obtaining written approval from Tennessee-American which will not be unreasonably withheld, this Agreement may be assigned by Signal Mountain to any successor in the operation of the facilities currently owned by Signal Mountain.

(2) **Notices**

Any notice required or permitted to be given by one of the parties to this Agreement shall be given by U.S. mail, personal delivery or by overnight carrier to the other party at the address set forth below:

Town of Signal Mountain
1100 Ridgeway Avenue
Signal Mountain, TN 37377
Attn: Town Manager

Tennessee-American Water Company
1101 Broad Street
P. O. Box 6338
Chattanooga, Tennessee 37401
Attn: Vice-President and Manager

Any notice so given shall be deemed given upon its deposit in the U.S. mail, upon personal delivery or upon its delivery to the overnight carrier.

(3) **Governing Law**

This Agreement shall be governed by the laws of the State of Tennessee.

(4) **Enforceability**

In the event that any provision hereof is found to be invalid or unenforceable, such invalidity or unenforceability shall not impair or limit the validity or enforceability of any other provision hereof, each of which shall continue in full force and effect, and this Agreement shall be construed as if such invalid or unenforceable provisions were omitted from this Agreement.

(5) **Entire Agreement**

This Agreement constitutes the entire Agreement between Signal Mountain and Tennessee-American with respect to the subject matter contained in the Agreement, except that Signal Mountain is subject to the rules, regulations and other applicable conditions and provisions set forth in Tennessee-American's tariff on file with the TRA and as from time to time amended. This Agreement shall not be amended without the prior written consent of both parties. No modification of this Agreement or waiver of any of its terms and conditions will be effective unless set forth in a written document signed by both parties.

BEFORE THE TENNESSEE REGULATORY AUTHORITY

NASHVILLE, TENNESSEE

June 27, 2005

IN RE:	)	
	)	
PETITION FOR APPROVAL OF THE EXTENSION OF WATER PURCHASE AGREEMENT BETWEEN TENNESSEE AMERICAN WATER COMPANY AND THE TOWN OF SIGNAL MOUNTAIN, TENNESSEE	)	**DOCKET NO. 04-00088**

ORDER APPROVING EXTENSION OF WATER PURCHASE AGREEMENT

This matter came before Director Pat Miller, Director Sara Kyle, and Director Ron Jones of the Tennessee Regulatory Authority ("Authority" or "TRA"), the voting panel assigned to this docket, at the regularly scheduled Authority Conference held on April 26, 2004 for consideration of the *Extension of Water Purchase Agreement* ("*Special Contract*") between Tennessee American Water Company ("TAWC" or "Company") and the Town of Signal Mountain, Tennessee ("Town")

The Authority approved the original water purchase agreement ("Agreement") between the Company and the Town by Order dated August 18, 1997 in TRA Docket No. 97-01305. The Agreement is a sale-for-resale agreement. As stated in the Authority's Order of August 18, 1997, under the terms of the Agreement, the Town agreed to purchase a minimum of 273,750,000 gallons per year for three (3) years at a cost of ninety-five cents ($0.95) per 1,000 gallons and to pay an additional charge if the Town's usage is below that amount The Authority also approved a three year extension of this Agreement lasting until July 1, 2003 in Docket No. 00-00745, under the same terms and conditions.

The Authority has jurisdiction over this matter pursuant to Tenn. Code Ann. § 65-5-101 *et seq* and Authority Rule 1220-4-1- 07, which states.

> SPECIAL CONTRACTS. Special contracts between public utilities and certain customers prescribing and providing rates, services and practices not covered by or permitted in the general tariffs, schedules or rules filed by such utilities are subject to supervision, regulation and control by the Authority. A copy of such special agreements shall be filed, subject to review and approval.

The *Special Contract* was filed with the Authority on March 15, 2004. The *Special Contract* seeks to extend the Agreement an additional three (3) years beginning July 1, 2003 and ending July 1, 2006. The rate charged for water service will increase from ninety-five cents ($0.95) per 1000 gallons to one dollar and two cents ($1.02) per 1000 gallons The new rate represents a price increase of approximately seven percent (7%) and is approximately the same increase established for the Company's other customers in TAWC's most recent rate case before the Authority which was considered in TRA Docket No. 03-00118.[1] All other terms, conditions, privileges, and obligations set forth in the Agreement remain unchanged.

The Company's estimated annual revenues under the *Special Contract* will be three hundred thirty thousand dollars ($330,000) as compared with approximately three hundred seven thousand dollars ($307,000) under the existing contract. In addition, the estimated annual revenue of three hundred thirty thousand dollars ($330,000) represents a discount of ten thousand dollars ($10,000) from the Company's regular tariff rates.

The terms of the Agreement and of the *Special Contract*, which distinguish the Town from the Company's tariff customers, justify a departure from the Company's tariff through a special contract. The Agreement is a sale-for-resale agreement, a category that does not exist

[1] *See In re Petition of Tennessee American Water Company to Change and Increase Certain Rates and Charges so as to Permit It to Earn a Fair and Adequate Rate of Return on Its Property Used and Useful in Furnishing Water Service to Its Customers*, Docket No 03-00118, *Final Order Approving Rate Increase and Rate Design and Approving Rates Filed by Tennessee American Water Company* (June 25, 2004) and *Concurrence and Dissent of Director Pat Miller* (June 25, 2004).

under TAWC's current tariff.[2] The inclusion of a three (3) year term of service and a minimum usage requirement further distinguishes the Town from the Company's tariff customers. The Agreement also requires the Town to maintain storage capacity equal to one (1) day's water supply, which allows the Company to provide water to the Town during non-peak periods, thereby avoiding higher on-peak operating costs.

The use of a special contract in dealing with large-usage customers such as the Town serves the public interest because it provides greater flexibility to the Company than is available under its tariff. The unique terms and conditions of the Agreement and the *Special Contract* benefit the Company and its ratepayers by providing the Company a long-term source of revenue and by helping control the Company's production costs during peak usage periods. Through the use of a special contract, the Company can attract the Town and other large-use customers and collect additional revenues to the benefit of the Company and ratepayers without the burden of undergoing a full-scale rate review in order to revise its tariff. In addition, the Agreement provides the Town and its residents with a dependable supply of water at fair and affordable prices.

No party has intervened in this docket or otherwise objected to the Authority's approval of the *Special Contract*. After careful review of the *Special Contract* and of the entire record in this matter and based on the foregoing findings and conclusions, the panel voted unanimously at the April 26, 2004 Authority Conference to approve the *Special Contract* extending the water purchase agreement.

---

[2] The Company is provided the opportunity, through special contracts, to secure new business and pursue new prospects in instances where an approved, tariffed rate does not currently exist. Absent the flexibility to negotiate special contracts and submit such contracts to the Authority for approval, the Company would be faced with potential forfeiture of its ability to generate additional revenues that inure to the benefit of its ratepayers. Each special contract is evaluated on its own merits given the circumstances existing at the time of consideration. Notwithstanding the entry of this Order, the Company has the continuing responsibility to acknowledge new customer classes and amend its existing tariff accordingly.

IT IS THEREFORE ORDERED THAT:

The *Extension of Water Purchase Agreement* between Tennessee American Water Company and the Town of Signal Mountain, Tennessee, is approved.

The Honorable Ron Jones,
Chairman
Tennessee Regulatory Authority
460 James Robertson Parkway
Nashville, Tennessee 37243-0505

Dear Chairman Jones:

06-00154

On behalf of our client, Tennessee-American Water Company, enclosed are an original and thirteen copies of an Extension of Water Purchase Agreement (the "Special Contract") between Tennessee-American and the Town of Signal Mountain, Tennessee, which we are submitting for approval by the Tennessee Regulatory Authority pursuant to Rule 1220-4-1-.07 relating to special contracts.

As you will notice, the enclosed agreement extends an agreement previously approved by the TRA (Order dated August 18, 1997, Docket No. 97-01305), which has been heretofore extended twice, with TRA approval (Order dated June 21, 2001, Docket No. 00-00745; Order dated June 27, 2005, Docket No. 04-00088). A copy of the original agreement and the previous extensions are also enclosed. As you can see, the terms of the agreement, as heretofore extended and approved by the TRA, will not be materially modified by the proposed extension.

The approval of the extension to the Special Contract would allow Tennessee-American to continue furnishing water to the Town of Signal Mountain for resale to its customers at the non-discriminatory tariff price of 0.796 per hundred cubic feet and under the same conditions as it has in the past and would benefit the Town of Signal Mountain and its residents by providing a good, clean, dependable water supply at fair and affordable prices.

If you have any questions concerning this matter, please call John Watson, General Manager of Tennessee-American (423-755-9307), or me.

Very truly yours,

George H. Masterson

EXTENSION OF WATER PURCHASE AGREEMENT

THIS EXTENSION OF WATER PURCHASE AGREEMENT, made effective as of July 1, 2006, by and between Tennessee American Water ("Tennessee American"), located at 1101 Broad Street, Chattanooga, Tennessee, and Town of Signal Mountain ("Signal Mountain"), whose address is 1111 Ridgeway Avenue, Signal Mountain, Tennessee,

WHEREAS, the parties hereto have agreed to extend the term of their Water Purchase Agreement dated July 1, 1997 ("Original Agreement") as amended and extended by agreement dated as being effective July 1, 2000 ("First Extension Agreement"), and agreement dated as being effective July 1, 2003 ("Second Extension Agreement"), copies of which are attached hereto and incorporated herein by reference, for an additional term of three years as provided herein,

NOW THEREFORE, in consideration of the mutual convenants and promises herein and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

1. Except as specifically provided herein, all of the terms, conditions, privileges and obligations in the Original Agreement, as amended and extended by the First and Second Extension Agreements are hereby extended for a term of three (3) years (or thirty-six (36) monthly billing periods), beginning July 1, 2006 and ending July 1, 2009.

2. Effective July 1, 2006 and continuing through the end of the term hereof, Section 1 of the Original Agreement, as amended and extended by the First and Second Extension Agreements, is hereby amended to state that Signal Mountain will purchase water at the rate of exactly $0.796 per hundred cubic feet (CCF), which is approximately $1.061 per 1,000 gallons.

3. This Extension of Water Purchase Agreement is subject to the approval by the Board of Tennessee American Water and the Tennessee Regulatory Authority ("TRA"). Signal Mountain agrees to take such action reasonably necessary to support Tennessee American's application for approval from the TRA.

IN WITNESS WHEREOF, the parties have set forth their hands.

WATER PURCHASE AGREEMENT

THIS AGREEMENT, made this 1st day of July, 1997 by and between

Tennessee-American Water Company ("Tennessee-American"), located at 1101 Broad Street, Post Office Box 6338, Chattanooga, Tennessee

and

Town of Signal Mountain ("Signal Mountain"), located at 1100 Ridgeway Avenue, Signal Mountain, Tennessee

WHEREAS, Tennessee-American, a Tennessee corporation, is a public utility which owns and operates a water utility system in and around the City of Chattanooga, Tennessee including the contiguous Tennessee cities of Red Bank, East Ridge, Ridgeside, and Lookout Mountain, plus the cities of Rossville and Lookout Mountain, Georgia and areas in the Georgia counties of Dade, Walker and Catoosa; and

WHEREAS, Signal Mountain wishes to purchase all or substantially all of its water supply from Tennessee-American; and

WHEREAS, Tennessee-American currently supplies water to Signal Mountain and has the capability and facilities in place to provide all or substantially all of the water supply currently required by Signal Mountain; and

WHEREAS, Signal Mountain and Tennessee-American are desirous of establishing an Agreement for the purchase of water for a fixed period of time; and,

WHEREAS, the parties have reached an Agreement for the sale and purchase of water which they now desire to record in writing;

NOW, THEREFORE, in consideration of the mutual covenants contained herein and other

good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

SECTION I
SALE OF WATER

Signal Mountain agrees to purchase a minimum of 273,750,000 gallons per year at $.95 per 1,000 gallons.

On or before the tenth day after the end of each twelve months of this Agreement, Tennessee-American will review the usage of Signal Mountain during the prior twelve month period year. If Signal Mountain's usage during the prior twelve month period was 273,750,000 gallons or more, no additional charge will be made. Should Signal Mountain's usage be less than 273,750,000 gallons, that month's invoice will include a charge for the difference between the actual usage and 273,750,000 gallons priced at $.95 per 1,000 gallons.

SECTION II
FLUORIDATION OF WATER SUPPLY

The Company will fluoridate the water supplied to the Town of Signal Mountain, in accordance with the Tennessee Department of Environment and Conservation Rule 1200-5-1-.17 (20), which requires the maintenance of a monthly average concentration of fluoride between 0.9 mg/l and 1.3 mg/l, unless required to do otherwise by applicable state law or regulations.

SECTION III
OPERATIONAL REQUIREMENTS

In order to minimize utilization of the peaking capacity of Tennessee-American, Signal Mountain will provide adequate storage to provide for its own maximum hour needs. Signal Mountain shall maintain a minimum of one day of water supply storage on their distribution system.

Tennessee-American will supply up to 2,500 gallons per minute to the existing metering location as described in Section IV hereof, at a pressure sufficient to fill the existing Signal Mountain Receiving tanks at the base of Signal Mountain. If Signal Mountain requests flow rates in excess of 2,500 g.p.m. at any time during the term of this Agreement, it will be required either to pay for the additional system improvements that are needed to meet such additional flow or to contract for water at a higher rate per 1,000 gallons of water to be determined by the Company.

SECTION IV
METERING

Metering of the water sold under this Agreement shall be at the existing meter setting located at the Town of Signal Mountain's existing storage tanks at the base of Signal Mountain, just off of Signal Mountain Road and Suck Creek Road.

SECTION V
BILLING

On or before the tenth day of each month, Tennessee-American will issue an invoice to Signal Mountain for Signal Mountain's metered usage during the prior month. Payment of such invoice will be made by Signal Mountain on or before eighteen days after receipt of the invoice.

SECTION VI
APPROVALS BY TENNESSEE REGULATORY AUTHORITY

It is understood and agreed that this Agreement is conditioned on approval by the Tennessee Regulatory Authority ("TRA"). Promptly upon execution of this Agreement, Tennessee-American shall file an application for approval with the TRA and take such action in good faith as may be necessary to obtain the appropriate approval.

SECTION VII
TERM OF AGREEMENT

The term of this Agreement shall be for a period of three (3) years or thirty-six (36) monthly billing periods. The three (3) year period shall commence with the effective date of the purchase of water under this Agreement. The effective date of the commencement of sales under the terms of this Agreement shall be the beginning of the next regular monthly billing period following approval of this Agreement by the TRA.

SECTION VIII
FORCE MAJEURE

Neither Signal Mountain or Tennessee-American shall be liable for damages to the other for any act, omission, or circumstance occasioned by or in consequence of any strikes, lockouts, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides, lightning, earthquakes, fires, storms, floods, washouts, civil disturbances, explosions, breakage, or accident to machinery or lines of pipe, and any other cause, whether of the kind herein enumerated or otherwise, not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. Failure to prevent or settle any strike or strikes shall not be considered to be a matter within the control of the party claiming suspension. Such causes or contingencies affecting such performance shall not relieve Signal Mountain from its obligations to make payment of amounts due hereunder. During the period of force majeure, the minimum annual charge shall be reduced by a ratio equal to the number of days of interruption divided by 365 days. If, during the period of force majeure some water can be delivered, then the ratio shall be multiplied by the percentage reduction in usage.

SECTION IX
RENEWAL OF AGREEMENT

This Agreement may be renegotiated for additional periods of time beyond the term of this Agreement. Negotiations to extend the term of this Agreement shall commence no later than six (6) months prior to the expiration date of this Agreement. However, the rates to be charged during any renewal period shall also be subject to prior approval by TRA.

SECTION X
MISCELLANEOUS PROVISIONS

(1) **Assignment**

Upon obtaining written approval from Tennessee-American which will not be unreasonably withheld, this Agreement may be assigned by Signal Mountain to any successor in the operation of the facilities currently owned by Signal Mountain.

(2) **Notices**

Any notice required or permitted to be given by one of the parties to this Agreement shall be given by U.S. mail, personal delivery or by overnight carrier to the other party at the address set forth below:

Town of Signal Mountain
1100 Ridgeway Avenue
Signal Mountain, TN 37377
Attn: Town Manager

Tennessee-American Water Company
1101 Broad Street
P. O. Box 6338
Chattanooga, Tennessee 37401
Attn: Vice-President and Manager

Any notice so given shall be deemed given upon its deposit in the U.S. mail, upon personal delivery or upon its delivery to the overnight carrier.

(3) **Governing Law**

This Agreement shall be governed by the laws of the State of Tennessee.

(4) **Enforceability**

In the event that any provision hereof is found to be invalid or unenforceable, such invalidity or unenforceability shall not impair or limit the validity or enforceability of any other provision hereof, each of which shall continue in full force and effect, and this Agreement shall be construed as if such invalid or unenforceable provisions were omitted from this Agreement.

(5) **Entire Agreement**

This Agreement constitutes the entire Agreement between Signal Mountain and Tennessee-American with respect to the subject matter contained in the Agreement, except that Signal Mountain is subject to the rules, regulations and other applicable conditions and provisions set forth in Tennessee-American's tariff on file with the TRA and as from time to time amended. This Agreement shall not be amended without the prior written consent of both parties. No modification of this Agreement or waiver of any of its terms and conditions will be effective unless set forth in a written document signed by both parties.

EXTENSION OF WATER PURCHASE AGREEMENT

REC'D TN
REGULATORY AUTH.
'00 AUG 22 PM 3 5
OFFICE OF THE
EXECUTIVE SECRETA

THIS EXTENSION OF WATER PURCHASE AGREEMENT, made effective as of July 1, 2000, by and between:

Tennessee-American Water Company ("Tennessee-American"), located at 1101 Broad Street, Post Office Box 6338, Chattanooga, Tennessee

And

Town of Signal Mountain ("Signal Mountain"), located at 1101 Ridgeway Avenue, Signal Mountain, Tennessee

WHEREAS, Signal Mountain and Tennessee-American have mutually agreed to extend the term of their Water Purchase Agreement dated July 1, 1997 ("Original Agreement") for an additional period of time under the same terms and conditions, except as herein specified.

NOW THEREFORE, in consideration of the mutual covenants and promises herein and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

1. All of the terms, conditions, privileges and obligations in the Original Agreement, except as specifically otherwise stated herein, are hereby extended for a term of three (3) years (or thirty-six [36] monthly billing periods) beginning September 1, 2000.
2. A copy of the Original Agreement is attached hereto and incorporated herein by reference.
3. Section X (2) of the Original Agreement is amended to provide that any notice to Tennessee-American be sent to the attention of the President of Tennessee-American.

4. This Extension of Water Purchase Agreement is subject to the approval by the Board of Directors of Tennessee-American and by the Tennessee Regulatory Authority ("TRA"). Signal Mountain agrees to take such action reasonably necessary to support Tennessee-American's application for approval from the TRA.

IN WITNESS WHEREOF, the parties have set forth their hands.

Tennessee American Water

John S. Watson
Vice-President &
General Network Manager

May 30, 2007

The Honorable Judd Burkhart
Mayor, City of Fort Oglethorpe
Post Office Drawer 5509
Fort Oglethorpe, GA 30742

Dear Mayor Burkhart:

It is the goal of Tennessee American Water to provide the highest quality of water service at the lowest possible price. We have worked diligently to control operational expenses and have succeeded in keeping them at one-half of the annual rate of inflation. While doing so, the company has continued to make the necessary investments to maintain the quality of the water system.

To continue to provide the best product possible, it has become necessary for Tennessee American to increase water rates to the customers in our general service area. That rate increase was granted by the Tennessee Regulatory Authority and became effective May 22, 2007.

As a result of that increase, we have reviewed the Water Purchase Agreement that we currently have with your organization. It stipulates that we must provide a written notice twelve months prior to any such increase. The purpose of this letter is to serve as that notice. The rate that Tennessee American Water will place in effect on May 30, 2008 will be $0.8961 per CCF (hundred cubic feet). Your current rate is $0.796 per CCF.

Tennessee American appreciates the partnership we share with your organization. Please call me personally should you have any questions or want to discuss this matter. You may reach me at 755-7607.

Sincerely,

John S. Watson
Vice President & General
Network Manager

RE: Special Contract Water Purchase Agreement Between Tennessee American Water Company and the City of Fort Oglethorpe, Georgia

Dear Mr. Waddell:

Enclosed please find original and 13 copies of a Water Purchase Agreement dated October 23, 2000 by and between Tennessee American Water Company and the City of Fort Oglethorpe, Georgia for approval of the Directors of the Tennessee Regulatory Authority pursuant to Rules 1220-4-1-07 Special Contracts and 1220-4-1-08 Resale of Water of the Rules of the Authority.

As you will notice this is an extension of a previous agreement between the parties that was approved by the Authority in Docket No. 97-00223 by Order dated March 10, 1997. The terms and conditions as to the water are practically the same, but there is a Schedule A attached to the contract and made a part thereof, which is a description of certain non-regulated services which the City may purchase and the terms and conditions and hourly rates of those services.

We are also attaching a copy of Page 5 of the October 23, 2000 minutes of the City Counsel of Fort Oglethorpe. Item 4 recites that the City Counsel is approving this contract unanimously. Also I am enclosing a copy of a unanimous Consent by the Board of Directors of Tennessee American Water Company, without a meeting, dated as of November 1, 2000 approving the Contract.

The approval of this Extension Agreement and Service Agreement would allow the Company to continue furnishing water to the City of Oglethorpe, Georgia for resale to its customers at the same and non-discriminatory price and under the same conditions as it has in the past and it would benefit the town of Fort Oglethorpe, Georgia and its residents by providing a good, clean, dependable water

supply at fair and affordable prices. If you have any questions concerning this contract, do not hesitate to call me or Mr. Bill L'Ecuyer at (423) 755-9307.

With kindest regards, I remain,

Very truly yours,

T.G. Pappas

WATER PURCHASE AGREEMENT

THIS WATER PURCHASE AGREEMENT ("Agreement"), made this 23RD day of _____ OCT., 2000 by and between

Tennessee-American Water Company ("Tennessee-American"), located at 1101 Broad Street, P.O. Box 6338, Chattanooga, Tennessee

and

City of Fort Oglethorpe, Georgia ("Ft. Oglethorpe"), located at 500 City Hall Drive, Fort Oglethorpe, Georgia

WHEREAS, Tennessee-American, a Tennessee corporation is a public utility which owns and operates a water utility system in and around the City of Chattanooga, Tennessee including the contiguous Tennessee cities of Red Bank, East Ridge, Ridgeside, and Lookout Mountain, plus the cities of Rossville and Lookout Mountain, Georgia and areas in the Georgia counties of Dade, Walker and Catoosa; and

WHEREAS, Ft. Oglethorpe wishes to continue to purchase all or substantially all of its water supply from Tennessee-American; and

WHEREAS, Tennessee-American currently supplies substantially all of the water to Ft. Oglethorpe and has the capability and facilities in place to provide all or substantially all of the water supply currently required by Ft. Oglethorpe; and

WHEREAS, Ft. Oglethorpe and Tennessee-American are desirous of extending its existing agreement for the purchase of water for a fixed period of time and amending said agreement for the purchase of certain services from Tennessee-American; and,

WHEREAS, the parties have reached an Agreement for the sale and purchase of water and services which they now desire to record in writing;

NOW, THEREFORE, in consideration of the mutual covenants contained herein and other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

SECTION I

SALE OF WATER

Ft. Oglethorpe agrees to purchase from Tennessee-American, a minimum of 273,750,000 gallons per year. Ft. Oglethorpe agrees to pay $.95 per one-thousand gallons (the "$.95 Rate") for the first 35,000,000 gallons each month. Water purchased in excess of 35,000,000 gallons per month shall be paid at the rate of $0.74 per one-thousand gallons. Such rates shall not be increased during the initial term of the Agreement.

On or before the tenth day after the end of each twelve months of this Agreement, Tennessee-American will review the usage of Ft. Oglethorpe during the prior twelve-month period year. Should Ft. Oglethorpe's usage be less than 273,750,000 gallons, that month's invoice will include a charge for the difference between the actual usage and 273,750,000 gallons priced at the $.95 Rate.

SECTION II

FLUORIDATION AND TREATMENT OF WATER SUPPLY

The Company will fluoridate the water supplied to the City of Fort Oglethorpe, in accordance with the Tennessee Department of Environment and Conservation Rule 1200-5-1-17(20), which requires the maintenance of a monthly average concentration of fluoride at the Point of Delivery between 0.9 mg/l and 1.3 mg/l, unless required to do otherwise by applicable Tennessee state law or regulations. Any treatment of the water after the Point of Delivery shall

be the responsibility of Ft. Oglethorpe, unless otherwise agreed to in writing between the parties. Upon request, the Company will provide documentation as to water quality.

SECTION III

METERING

Metering of the water sold under this Agreement shall be at the Point of Delivery. Meters shall be installed by Tennessee-American that will allow for the flow of water into Ft. Oglethorpe's water distribution system for ease of controlling/operating the pumping facilities providing water to Ft. Oglethorpe.

SECTION IV

BILLING

On or before the tenth day of each month, Tennessee-American will issue an invoice to Ft. Oglethorpe for Ft. Oglethorpe's metered usage during the prior month. Payment of such invoice must be made by Ft. Oglethorpe within eighteen days after receipt of the invoice. Late fees shall be imposed pursuant to the tariff filed with the Tennessee Regulatory Authority, as amended from time to time.

SECTION V

APPROVALS

It is understood and agreed that this Agreement is conditioned on approval by the Tennessee Regulatory Authority ("TRA") and the Tennessee-American Board of Directors. Promptly upon execution of this Agreement, Tennessee-American shall file an application for approval with the TRA and take such action in good faith as may be necessary to obtain the appropriate approval.

SECTION VI

INITIAL TERM OF AGREEMENT AND RENEWAL PERIODS

The initial term of this Agreement shall be for a period of three (3) years or thirty-six (36) monthly billing periods with three (3) optional three (3) year renewal periods. This Agreement will automatically renew on the same terms and conditions unless Ft. Oglethorpe notifies Tennessee American in writing that it affirmatively elects to not renew the Agreement no later than six (6) months prior to the termination date of the initial terms or any renewal term thereafter.

The water rates set forth in Section I are subject to increase during any renewal period as may be approved by the TRA. Tennessee-American will give Ft. Oglethorpe twelve (12) months prior written notice of any such rate increase and said rates are only subject to increase once per each renewal period.

The initial term shall commence with the effective date of the purchase of water under this Agreement. The effective date of the commencement of sales under the terms of this Agreement shall be the beginning of the next regular monthly billing period following approval of this Agreement by the TRA. Tennessee American shall notify Ft. Oglethorpe in writing of the date constituting the effective date of the purchase of water under this Agreement, once said date is established. No later than nine (9) months prior to the termination date of the initial terms or any renewal term thereafter, Tennessee-American shall notify Fort Oglethorpe in writing of the upcoming termination date.

SECTION VII

FORCE MAJEURE

Neither Ft. Oglethorpe or Tennessee-American shall be liable for damages to the other for any act, omission, or circumstance occasioned by or in consequence of any strikes, lockouts, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides, lightning, earthquakes, fires, storms, floods, droughts, washouts, civil disturbances, explosions, defects, leakage, breakage, or accident to machinery or lines of pipe, and any other cause, whether of the kind herein enumerated or otherwise, not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. Failure to prevent or settle any strike or strikes shall not be considered to be a matter within the control of the party claiming suspension. Such causes or contingencies affecting such performance shall not relieve Ft. Oglethorpe from its obligations to make payment of amounts due hereunder. During the period of force majeure, the minimum annual charge shall be reduced by a ratio equal to the number of days of complete interruption divided by 365 days. If, during the period of force majeure some water can be delivered, then the ratio shall be multiplied by the percentage reduction in usage.

In the event of any type of water curtailment or interruption event, or any procedure, regulation or law for curtailment or interruption is utilized by, or imposed upon, Tennessee-American, then Ft. Oglethorpe shall abide by such curtailment or interruption procedures so as to restrict its customers in a fashion similar to affected customers of Tennessee-American.

SECTION VIII

EXTENSION OF AGREEMENT

This Agreement may be renegotiated for additional periods of time beyond the initial term of this Agreement and the renewal periods set forth in Section VI. Negotiations to extend the term of this Agreement beyond the last renewal period shall commence no later than six (6) months prior to the expiration date. However, the rates to be charged during any extension period and any renegotiated conditions shall be subject to prior approval by TRA.

SECTION IX

REPRESENTATIONS, COVENANTS AND INDEMNITY

(1) **Authority**

Ft. Oglethorpe represents and covenants that, at all times, it has the authority to enter into this Agreement, that no other requirements exist for this Agreement to be enforceable and that nothing in this Agreement is in violation, or will cause a violation, of any other contract, obligation or law to which Ft. Oglethorpe is subject.

(2) **Resale**

Ft. Oglethorpe may resell to another water re-seller any water purchased from Tennessee-American, provided Ft. Oglethorpe gives Tennessee-American ninety (90) days prior written notice. If Fort Oglethorpe enters an agreement to resell water purchased from Tennessee-American to another water re-seller, Fort Oglethorpe remains responsible for compliance with Section IX(3).

(3) Inter-basin Transfer

Ft. Oglethorpe acknowledges that none of the water it receives from Tennessee-American may be transferred, either directly or indirectly, outside the Lower Tennessee-Hiwassee River Basin, as that basin is defined by the Tennessee Department of Environment and Conservation ("TDEC"), unless Tennessee-American first obtains a permit for such transfer from TDEC.

Ft. Oglethorpe certifies and agrees that none of the water it receives from Tennessee-American will be transferred, either directly or indirectly, outside the Lower Tennessee-Hiwassee River Basin, as that basin is defined by TDEC, unless: (1) Ft. Oglethorpe provides Tennessee-American with 90-days prior notice of its intent to transfer such water outside the above-named basin, and (2) Ft. Oglethorpe receives notification from Tennessee-American that the proposed transfer has been approved by TDEC through the requisite permitting process.

Ft. Oglethorpe agrees to cooperate fully with Tennessee-American and TDEC and provide any documentation, records, or other assistance requested by Tennessee-American or TDEC throughout any required permitting process.

Ft. Oglethorpe agrees to indemnify Tennessee-American for the amount of any permit application fee Tennessee-American is assessed as a result of Ft. Oglethorpe's intent to transfer any water it received from Tennessee-American outside the Lower Tennessee-Hiwassee River Basin, as that basin is defined by TDEC.

Ft. Oglethorpe agrees to indemnify Tennessee-American for any fines, fees, or penalties Tennessee-American is assessed, or any costs Tennessee-American incurs due to any action on the part of Ft. Oglethorpe that results in a violation of any permitting requirement.

On September 1 of each year, Ft. Oglethorpe agrees to provide Tennessee-American with a statement, signed under oath, certifying that during the previous calendar year, Ft. Oglethorpe

has not directly or indirectly transferred any of the water it receives from Tennessee-American outside the Lower Tennessee-Hiwassee River basin, as that basin is defined by TDEC.

(4) **Indemnification**

Ft. Oglethorpe hereby indemnifies and holds Tennessee-American harmless from and against any claim, demands, penalties, actions, judgments, and losses or liabilities whatsoever, arising from or in connection with its breach or violation of this Agreement.

SECTION X

AFFIDAVITS

Prior to the effective date of this Agreement, and at any time during this Agreement upon reasonable notice, Ft. Oglethorpe agrees to provide an affidavit (or certificate, at the discretion of Tennessee-American) which represents and covenants that it is not in breach or any violation of this Agreement, nor has it any knowledge of any fact which, by the passage of time, will cause it to be in breach or violation of this Agreement.

SECTION XI

SERVICES

During the term of this Agreement, Tennessee-American may provide to Ft. Oglethorpe, certain non-regulated services ("Services") which are set forth in Schedule A, which is attached hereto and incorporated herein by reference. In the event such Services are provided, Ft. Oglethorpe agrees to pay Tennessee-American for such Services at the rates and charges set forth in Schedule A, as such may be amended from time to time by Tennessee-American upon giving Ft. Oglethorpe sixty (60) days advance notice.

Tennessee-American may add or discontinue Services to be offered under this Agreement upon written notice to Ft. Oglethorpe.

Tennessee-American reserves the right to enter into such separate agreements, contracts, work orders or other arrangement with Ft. Oglethorpe in order to adequately address the scope and performance of the specific Services to be provided to Ft. Oglethorpe.

Charges and rates for the Services shall be billed and paid, at the determination of Tennessee-American, either monthly along with Ft. Oglethorpe's metered usage according to Section V above, or on such other terms and conditions as directed by Tennessee-American.

SECTION XII

MISCELLANEOUS PROVISIONS

(1) **Assignment**

Upon obtaining written approval from Tennessee-American which will not be unreasonably withheld, this Agreement may be assigned by Ft. Oglethorpe to any successor in the operation of the facilities currently owned by Ft. Oglethorpe.

(2) **Notices**

Any notice required or permitted to be given by one of the parties to this Agreement shall be given by U.S. mail, personal delivery or by overnight carrier to the other party at the address set forth below:

City of Ft. Oglethorpe, Georgia
500 City Hall Drive
Ft. Oglethorpe, Georgia 30742
Attn: City Manager

Tennessee-American Water Company
1101 Broad Street
P.O. Box 6338
Chattanooga, Tennessee 37401
Attn: President

Any notice so given shall be deemed given upon its deposit in the U.S. mail, upon personal delivery or upon its delivery to the overnight carrier.

(3) **Governing Law And Venue**

This Agreement shall be governed by the laws of the State of Tennessee, which state shall also be the venue for any actions arising under this Agreement.

(4) **Enforceability**

In the event that any provision hereof is found to be invalid or unenforceable, such invalidity or unenforceability shall not impair or limit the validity or enforceability of any other provision hereof, each of which shall continue in full force and effect, and this Agreement shall be construed as if such invalid or unenforceable provisions were omitted from this Agreement. Titles to any section or subsection in this Agreement are for assistance in identification only and shall not be used to determine the enforceability of any provision of this Agreement.

(5) **Entire Agreement**

This Agreement constitutes the entire Agreement between Ft. Oglethorpe and Tennessee-American with respect to the subject matter contained in the Agreement, except that Ft. Oglethorpe is subject to the rules, regulations and other applicable conditions and provisions set forth in Tennessee-American's tariff on file with the TRA and as from time to time amended. This Agreement shall not be amended without the prior written consent of both parties. No

modification of this Agreement or waiver of any of its terms and conditions will be effective unless set forth in a written document signed by both parties.

WATER PURCHASE AGREEMENT

THIS AGREEMENT, made this 24th day of November, 1998 by and between

Tennessee-American Water Company ("Tennessee-American"), located at 1101 Broad Street, P. O. Box 6338, Chattanooga, Tennessee

and

Catoosa Utility District, located at ~~Highway 41 North,~~ 1058 OLD HILLRD P.O. Box 750 Ringgold, Georgia

WHEREAS, Tennessee-American, a Tennessee corporation, is a public utility which owns and operates a water utility system in and around the City of Chattanooga, Tennessee including the contiguous Tennessee cities of Red Bank, East Ridge, Ridgeside, and Lookout Mountain, plus the cities of Rossville and Lookout Mountain, Georgia and areas in the Georgia counties of Dade, Walker and Catoosa; and

WHEREAS, Catoosa Utility District wishes to purchase a portion of its water supply from Tennessee-American; and

WHEREAS, Tennessee-American currently supplies a minimal amount of water to Catoosa Utility District and has the capability and facilities in place to provide all or substantially all of the water supply currently required by Catoosa Utility District; and

WHEREAS, Catoosa Utility District and Tennessee-American are desirous of establishing an Agreement for the purchase of water for a fixed period of time; and

WHEREAS, the parties have reached an Agreement for the sale and purchase of water which they now desire to record in writing;

NOW, THEREFORE, in consideration of the mutual covenants contained herein and other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties hereto agree as follows:

SECTION I

SALE OF WATER

During a ten (10) year period, Catoosa Utility District agrees to purchase a minimum of water from Tennessee-American Water Company as follows:

Year 1:	First six (6) months (January 1, 1999 through June 30, 1999) No minimum requirement to allow for the District to complete the necessary improvements to their system.
Year 1:	Second six (6) months (July 1, 1999 through December 31, 1999) 45,625,000 gallons (250,000 gallons per day average)
Year 2 - 5:	182,500,000 gallons per year (500,000 gallons per day average)
Year 6 - 10:	273,750,000 gallons per year (750,000 gallons per day average)

During the first three (3) years of this agreement, all water sold to the Catoosa Utility District will be at the rate of $.95 per 1,000 gallons for the first 35 million gallons per month. All water purchased over 35 million gallons per month will be at the rate of $.74 per 1,000 gallons. Any increase in rates approved by the Tennessee Regulatory Authority for Tennessee-American Water Company during the remaining seven (7) years of this agreement will be applied to the rates charged to the Catoosa Utility District.

JAN 27 '03 05:44PM P.5/8

SECTION II

FLUORIDATION OF WATER SUPPLY

The Company will fluoridate the water supplied to the Catoosa Utility District, in accordance with the Tennessee Department of Environment and Conservation Rule 1200-5-1-.17 (20), which requires the maintenance of a monthly average concentration of fluoride between 0.9 mg/l and 1.3 mg/l, unless required to do otherwise by applicable state law or regulations.

SECTION III

OPERATIONAL REQUIREMENTS

In order to minimize utilization of the peaking capacity of Tennessee-American, Catoosa Utility District will provide adequate storage to provide for its own maximum hour needs. Catoosa Utility District shall maintain a minimum of one day of water supply storage on their distribution system.

SECTION IV

METERING

Metering of the water sold under this Agreement shall be at the existing meter settings located at Highway 27 at Cloud Springs Road and along Scruggs Road.

SECTION V

BILLING

On or before the tenth day of each month, Tennessee-American will issue an invoice to Catoosa Utility District for Catoosa Utility District's metered usage during the prior month.

P.6/8 JAN 27 '03 05:45PM

Payment of such invoice will be made by Catoosa Utility District eighteen days after receipt of the invoice.

SECTION VI

APPROVALS BY TENNESSEE REGULATORY AUTHORITY

It is understood and agreed that this Agreement is conditioned on approval by the Tennessee Regulatory Authority ("TRA"). Promptly upon execution of this Agreement, Tennessee-American shall file an application for approval with the TRA and take such action in good faith as may be necessary to obtain the appropriate approval.

SECTION VII

TERM OF AGREEMENT

The term of this Agreement shall be for a period of ten (10) years. The ten (10) year period shall commence on the first day of the month following approval of the agreement by the Tennessee Regulatory Authority.

SECTION VIII

FORCE MAJEURE

Neither Catoosa Utility District nor Tennessee-American shall be liable for damages to the other for any act, omission, or circumstance occasioned by or in consequence of any strikes, lockouts, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides,

JAN 27 '03 05:46PM P.7/8

lightning, earthquakes, fires, storms, floods, washouts, civil disturbances, explosions, breakage, or accident to machinery or lines of pipe, and any other cause, whether of the kind herein enumerated or otherwise, not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. Failure to prevent or settle any strike or strikes shall not be considered to be a matter within the control of the party claiming suspension. Such causes or contingencies affecting such performance shall not relieve Catoosa Utility District from its obligations to make payment of amounts due hereunder.

SECTION IX

RENEWAL OF AGREEMENT

This Agreement may be renegotiated for additional periods of time beyond the term of this Agreement. Negotiations to extend the term of this Agreement shall commence no later than sixty (60) days prior to the expiration date of this Agreement. However, the rates to be charged during any renewal period shall also be subject to prior approval by TRA.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question:

8. Provide a forecast of billing determinants for the Walden's Ridge Utility District for the attrition period ending August 2009. Include all work papers and documentation supporting the forecast.

Response:

The attrition year includes no billing determinants for Walden's Ridge. Walden's Ridge revenues were eliminated from the rate filing. Please refer to working papers provided to the first TRA data request labeled as TN-TRA-01-Q013-Revenues page 12 of 99, which shows the elimination from the bill analysis and TN-TRA-01-Q013-Revenues page 47 of 99 that details the billing determinants that were eliminated.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question:

9. Provide a reconciliation of the attrition year billing determinates and revenues at present rates by class from Exhibit 4, Schedule 1 to the attrition year billing determinates and revenues at present rates by class by location from Exhibit 4, Schedule 2. Include in your reconciliation an explanation of which Schedule reflects the correct forecasted amounts and why.

Response:

See the attached reconciliation. The bill analysis utilizes billing determinants at present rates to verify per books revenues within one-half of one percent (Exhibit No. 4, Schedule 2). The amount under each customer classification on the total line labeled "Net Amount" is the amount generated by the bill analysis calculation. The next line "Net Amt Per Revenue Summary" is the per books amount for the 12 months ending November 2007. The difference is a tolerance factor that is within the acceptable limits of one-half of one percent. This tolerance factor is carried over as adjustments are made to the normalized and forecasted test periods. The correct amount is the total shown on Exhibit No. 4, Schedule 1 and ties to Exhibit No. 4, Schedule 2 referenced on the line labeled as "Net Amt Per Revenue Summary" under each customer classification.

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Paul R. Herbert

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question:

10. Provide the business reasons for the proposed reduction in residential rates for Lone Oak and Suck Creek and the percent variance from 13.60% to 28.26% in proposed residential rate increases for Chattanooga, Lookout Mountain, and Lakeview per TN-TRA-01-Q013-REVENUES, Page 15 of 99.

Response:

The Company's goal is to establish two separate tariffs from the five existing rate schedules. There will be one tariff for the Chattanooga Service Area and one tariff for the repumped service areas which include Lookout Mountain, Lakeview, Suck Creek and Lone Oak. The repumped service areas reflect the added cost of pumping water to these higher elevations.

The decreases to the average residential bills in Lone Oak and Suck Creek reflect movement toward the average bill for Lookout Mountain and Lakeview. Although the average bill decreases for Lone Oak and Suck Creek, the total proposed revenue for these service areas is approximately revenue neutral.

The varying percentage increases for Lookout Mountain and Lakeview reflect combining the rates from these two service areas into one rate schedule. Since the existing rates for Lakeview are lower than the rates for Lookout Mountain, the increase to Lakeview must be higher than Lookout Mountain in order to establish a single rate schedule.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

14. Provide a payroll distribution by NARUC account for the 12 months ended March 2008.

Response:

TAWC objects to this request because it calls upon TAWC to create, categorize, manipulate, customize or otherwise organize data regarding timeframes outside of TAWC's historical test-year. TAWC objects to such a request because it is unduly burdensome, seeks to have TAWC create work product, and seeks information that is not relevant to this rate case.

Subject to and without waiving these objections, below is the payroll distribution by NARUC account for the 12 months ended March 2008.

NARUC	NARUC Description	Amount
105	CWIP	629,862
184	Clearing Accounts	379,233
186.2	Other Deferred Debits	124,304
416	M&J Expenses	12,647
601.1	Salaries-Empl Oper SS	1,313,361
601.3	Salaries-Empl Oper WT	196
601.5	Salaries-Empl Oper TD	551,683
601.6	Salaries-Empl Maint TD	1,132,985
601.7	Salaries-Empl CA	413,306
601.8	Salaries-Empl AG	1,340,857
	Total Payroll Distribution	5,898,435

				Total			$3,244.28		$3,254.17

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller/Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

18. Provide the total salaries and wages, exclusive of AIP compensation, by employee for the 12 months ended February 2008 and March 2008 in the format of TN-TRA-01-Q013-LABOR, pages 25 and 26 of 102.

Response:

The Company objects to this request on the grounds that it is unduly burdensome, in particular because the information requested is not readily available in the requested format and is very costly to gather and produce. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits, and workpapers fully supporting its case based on a test year ending on November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing. This request seeks the compilation of data for the 12 months ended March 31, 2008, a test year that the CAPD has stated it intends to propose. It is burdensome and fundamentally unfair to require the Company to respond to a data request that, in essence, requires the Company to completely redo the data collection and analysis required to file its petition based

on a test year, or multiple test years, proposed by an Intervenor, particularly when that test year includes dates after the petition was filed. The re-creation of every aspect of its case for multiple historical test years is not required by TRA rules and is not necessary for the CAPD to assess the Company's petition.

Notwithstanding the objection, attached to this response is the payroll data in the format readily available to the Company.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

19. Provide a mapping of all amounts Per Books 12 Months ended 11/30/2007, Company's Accounting Exhibit No. 2, Schedule 3, Lines 1 through 35 by line totaling $20,820,445 to the November 30, 2007 TRA 3.06 Surveillance Report 12 months to date for this year lines 6 through 11 by line by NARUC account.

Response:

See attached reconciliation. Also attached are corrected copies of the TRA 3.06 reports for July 2007 and November 2007. In July the segregation of expenses by function was incorrect. Also, the detail of the November report had incorrect amounts for the AG expenses from January 2007 thru April 1007 which resulted in an incorrect year to date amount for the administrative and general expense.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John Watson/Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

20. Provide the total salaries and wages by employee, total overtime hours by employee, and total capitalized salaries and wages for the twelve months ended February 2008.

Response:

TAWC objects to this request because it calls upon TAWC to create, categorize, manipulate, customize or otherwise organize data regarding timeframes outside of TAWC's historical test-year. TAWC objects to such a request because it is unduly burdensome, seeks to have TAWC create work product, and seeks information that is not relevant to this rate case.

Subject to and without waiving these objections, please see attached schedules.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

21. Provide the Fuel and Power Expense for the **test year ended March 2008** in the format of TN-TRA-Q013-FUEL & POWER, pages 10-11 of 49.

Response:

The Company objects to this request on the grounds that it is unduly burdensome, in particular because the information requested is not readily available in the requested format and is very costly to gather and produce. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits, and workpapers fully supporting its case based on a test year ending on November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing. This request seeks the compilation of data for the 12 months ended March 31, 2008, a test year that the CAPD has stated it intends to propose. It is burdensome and fundamentally unfair to require the Company to respond to a data request that, in essence, requires the Company to completely redo the data collection and analysis required to file its petition based on a test year, or multiple test years, proposed by an Intervenor, particularly

when that test year includes dates after the petition was filed. The re-creation of every aspect of its case for multiple historical test years is not required by TRA rules and is not necessary for the CAPD to assess the Company's petition.

Notwithstanding these objections, please see the attached schedule which provides the fuel and power expense for the twelve months ended March 2008. The Company has not recapped the hundreds of monthly power bills for December 2007 through March 2008 required to create the information in the requested format.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

22. Provide the Fuel and Power Expense for the attrition year ended August 2009 in the format of TN-TRA-Q013-FUEL & POWER, pages 10-11 of 49 for only water sales volumes.

Response:

The Company objects to this question on the grounds that the requested information is not relevant to this proceeding, is not readily available in the format requested, and is not in compliance with the factor that is historically and customarily used to calculate fuel and power expense.

The Company's attrition year fuel and power expense on TN-TRA-Q013-FUEL & POWER is based on the gallons pumped (system delivery). The gallons pumped to and in the distribution system has always been the factor used by the Company (and, to the Company's knowledge, all other regulated water utilities) on which to base fuel and power costs. The calculations of fuel and power expense based on **water sales** as requested in this question, are not relevant to this case

TENNESSEE AMERICAN WATER COMPANY

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

23. Provide the Chemicals Expense for the **test year ended March 2008** in the format of TN-TRA-Q013-CHEMICALS, page 3 of 7.

Response:

The Company objects to this request on the grounds that it is unduly burdensome, in particular because the information requested is not readily available in the requested format and is very costly to gather and produce. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits, and workpapers fully supporting its case based on a test year ending on November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing. This request specifically seeks the compilation of data for the 12 months ending March 31, 2008, clearly demonstrating that the CAPD intends to propose a separate test year. It is burdensome and fundamentally unfair to require the Company to respond to a data request that, in essence, requires the Company to completely redo the data collection and analysis required to file its petition based on a test year, or multiple test years, proposed by an Intervenor, particularly when that test year includes dates after

the petition was filed. The re-creation of every aspect of its case for multiple historical test years is not required by TRA rules and is not necessary for the CAPD to assess the Company's petition.

With respect to this specific request, please see the attached schedule which includes the requested information for actual chemical expense and usage for the year and through March 2008.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

24. Provide the Chemicals Expense for the attrition year ended August 2009 in the format of TN-TRA-Q013-CHEMICALS, page 6 of 7 for only water sales volumes.

Response:

The Company objects to this question on the grounds that the requested information is not relevant to this proceeding, is not readily available in the format requested, and is not in compliance with the factor that is historically and customarily used to calculate chemical expense.

The Company's attrition year chemical expense on TN-TRA-Q013-CHEMICALS is based on gallons pumped (system delivery). The gallons pumped to the distribution system has always been the factor used by the Company (and, to the Company's knowledge, all other regulated water utilities) on which to base chemical costs. The calculations of chemical expense based on **water sales** as requested in this question, are not relevant to this case

TENNESSEE AMERICAN WATER COMPANY

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller/John Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

25. Provide all Walden's Ridge operating expenses such as fuel and power expense, chemicals, etc. reported on the TRA 3.06 Surveillance Reports by month for the 17 months ended March 31, 2008 by NARUC account.

Response:

TAWC objects to this request because it calls upon TAWC to create, categorize, manipulate, customize or otherwise organize data regarding timeframes outside of TAWC's historical test-year. TAWC objects to such a request because it is unduly burdensome, seeks to have TAWC create work product, and seeks information that is not relevant to this rate case.

Subject to and without waiving these objections, please see attached schedules.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

26. Provide the Chemicals Expense for Walden's Ridge for the attrition year ended August 2009 in the format of TN-TRA-Q013-CHEMICALS, page 6 of 7.

Response:

The Company eliminated any expenses for Walden's Ridge from the rate filing. Therefore, there is no chemical expense included in the attrition year ended August 2009 related to Walden's Ridge.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

27. Provide the Fuel and Power Expense for Walden's Ridge for the attrition year ended August 2009 in the format of TN-TRA-Q013-FUEL & POWER, pages 10-11 of 49.

Response:

The Company did not include fuel and power expense for Walden's Ridge in this rate filing. Therefore there is no fuel and power expense included in the attrition year ended August 2009 related to Walden's Ridge.

DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

28. Provide the estimated amount by payee for the $550,000 cost of preparing and presenting the current rate filing.

Response:

Service Company – SSC Rate Department assistance	$61,129
Dr. Spitznagel – Weather Normalization	20,475
Paul Herbert – Cost of Service Study	21,841
Michael Vilbert – Cost of Capital	65,000
John Spanos – Depreciation Study	30,000
Bass, Berry, & Sims – Legal Expense	350,285
Miscellaneous expenses	1,270

These are the estimates that the Company utilized in the filing and are based on the assumption that the present case will proceed as a normal rate case. Based on the number of discovery requests submitted by the interveners to date, this estimate may significantly increase. The Intervenors' conduct directly affects the Company's costs to prepare and present the present rate case.

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

29. Provide the amounts for the STEP Project, the STAR project, the Business Change project, the Divestiture, and the implementation costs related to Sarbanes Oxley compliance by NARUC account, by month, by project for the seventeen months ended March 31, 2008. See M. Miller's direct testimony, page 11, lines 7-9.

Response:

The Company objects to this request on the grounds that it is unduly burdensome, in particular because the information requested is not readily available in the requested format and is very costly to gather and produce. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits and workpapers fully supporting its case based on a test year ending November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing. This request seeks the compilation of data for the 12 months ended March 31, 2008, a test year that the CAPD has stated it intends to propose. It is burdensome and fundamentally unfair to require the Company to

respond to a data request that, in essence, requires the Company to completely redo the data collection and analysis required to file its petition based on a test year, or multiple test years, proposed by an Intervenor, particularly when that test year includes dates after the petition was filed. The re-creation of every aspect of its case for multiple historical test years is not required by TRA rules and is not necessary for the CAPD to assess the Company's petition.

Notwithstanding these objections, the Company notes that it eliminated all expenses related the STEP Project, STAR Project, Business Change Project, Divestiture and implementation costs related to Sarbanes Oxley compliance from the historical test year ended November 30, 2007. Please refer to the working papers attached to the response to first TRA data request, Question 13, to find those working papers at TN-TRA-01-Q013-MANAGEMENT FEES Page 2 of 4. Therefore, the attrition year does not include any of those expenses.

Please see the attached schedule for the requested information.

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/Robert A. Shiltz

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

30. Provide the amounts, payees, and business reasons for penalties and lobbying expense by NARUC account, by month for the 17 months ended March 31, 2008. See R. Shiltz's direct testimony, page 5, lines 21-22.

Response:

The Company objects to this request on the grounds that it is unduly burdensome, in particular because the information requested is not readily available in the requested format and is very costly to gather and produce. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits and workpapers fully supporting its case based on a test year ending November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing. This request seeks the compilation of data for the 12 months ended March 31, 2008, a test year that the CAPD has stated it intends to propose. It is burdensome and fundamentally unfair to require the Company to respond to a data request that, in essence, requires the Company to completely redo the data collection and analysis required to file its petition based on a test year, or multiple test years, proposed by an Intervenor, particularly when that test year includes dates after the petition was filed. The re-creation of every aspect

of its case for multiple historical test years is not required by TRA rules and is not necessary for the CAPD to assess the Company's petition.

With respect to this specific request, the Company eliminated all expenses related the penalties and lobbying from the historical test year ended November 30, 2007. Please refer to the working papers attached to the response to first TRA data request, Question 13, Page 7 of 15, to find those working papers at Tn_TRA-01-Q013-MISC EXPENSES.

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

31. Provide the amount for net negative salvage expense by JDE account, by month for the 17 months ended March 31, 2008. See R. Shiltz's direct testimony, page 6, lines 1-2.

Response:

The Company objects to this request on the grounds that it is unduly burdensome, in particular because the information requested is not readily available in the requested format and is very costly to gather and produce. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits and workpapers fully supporting its case based on a test year ending November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing. This request seeks the compilation of data for the 12 months ended March 31, 2008, a test year that the CAPD has stated it intends to propose. It is burdensome and fundamentally unfair to require the Company to respond to a data request that, in essence, requires the Company to completely redo the data collection and analysis required to file its petition based on a test

year, or multiple test years, proposed by an Intervenor, particularly when that test year includes dates after the petition was filed. The re-creation of every aspect of its case for multiple historical test years is not required by TRA rules and is not necessary for the CAPD to assess the Company's petition.

With respect to this specific request, as described in Mr. Shiltz's testimony, for financial statement presentation the Company reclassifies to maintenance expense a portion of the depreciation expense related to rate recovery of NNS included in the Company's depreciation rates approved by the TRA to comply with SFAS143. Mr. Shiltz appropriately eliminated this reclassification from maintenance expense in the Company's historical test-year filing. The Company then calculates the depreciation expense for the filing using the approved depreciation rates, which includes the NNS component reclassified for SFAS143 presentation. The impact on the Company's historical test-year expenses is **zero**. In addition, please refer the responses to Part II, Question 34, Part II, Question 35, and Part II, Question 63.

Please see the table below which shows the amount of NNS reclassified from depreciation expense to maintenance expense for financial reporting purposes only.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

32. Provide the "total amount of charges subject to allocation to all affiliates "from the Company's Corporate Office, Shared Services Center ("SSC"), Southeast Region, and other affiliated utility service companies by month for the 15 months ended March 2008 by month, by affiliated entity, by NARUC account.

Response:

TAWC objects to this request because it calls upon TAWC to create, categorize, manipulate, customize or otherwise organize data regarding timeframes outside of TAWC's historical test-year. TAWC objects to such a request because it is unduly burdensome, seeks to have TAWC create work product, and seeks information that is not relevant to this rate case.

Subject to and without waiving these objections, please see attached schedules.

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

36. Provide the "total operating expenses charged to Tennessee American for all Call Centers, Alton/Pensacola" for the year ended December 2007 and the test year ended March 2008 by NARUC account, by month, by Call Center.

Response:

TAWC objects to this question in that it calls for information for the **test year** ended March 2008. March 2008 is neither the historical test-year nor the attrition year in this case. TAWC objects to this request because it calls upon TAWC to create, categorize, manipulate, customize or otherwise organize data regarding timeframes outside of TAWC's historical test-year. Accordingly, TAWC objects to such requests because it is unduly burdensome, seeks to have TAWC create work product, and seeks information that is not relevant to this rate case.

Subject to and without waiving these objections, please refer to the response to Question 33 for Total operating expenses charged to Tennessee American for the Alton and Pensacola Call centers from December 2007 through March 2008.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

37. Provide the "total amount of charges subject to allocation to all affiliates from the Call Centers, Alton/Pensacola" for the year ended December 2007 and the test year ended March 2008 by NARUC account, by month, by call center.

Response:

TAWC objects to this request to the extent that it calls for information for the **test year** ended March 2008. March 2008 is neither the historical test-year nor the attrition year in this case. TAWC objects to this request because it calls upon TAWC to create, categorize, manipulate, customize or otherwise organize data regarding timeframes outside of TAWC's historical test-year. Accordingly, such a request is unduly burdensome, seeks to have TAWC create work product, and seeks information that is not relevant to this rate case.

Subject to and without waiving these objections, please refer to the response to Question 32 for Total operating expenses charged to TAWC for the Alton and Pensacola Call centers from December 2007 thru March 2008. Also please refer to the attachment detailing the Alton and Pensacola Call Center costs allocated to all affiliates for 15 months ended March 2008.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

38. Provide the actual FAS 87 pension expense amount for the seventeen months ended March 2008 by month, by NARUC account. Also, provide the forecasted FAS 87 pension expense amount included in the Company's filing for the twelve months ended August 31, 2009.

Response:

Please see the table below for the pension expense under FAS 87 for TAWC for the period November 2006 - March 2008. Please note that the TRA has historically regulated TAWC using the ERISA contributions (cash basis contributions). Consequently, on its income statement, TAWC records pension expense under ERISA to recognize that expense in accordance with the approved regulatory recovery. Additionally, on TAWC's balance sheet, there is a Regulatory Liability/Asset to disclose the timing difference between the ERISA contributions recovered in rates and the FAS 87 (accrual basis) expense in order to comply with U.S. GAAP.

Please note that the attrition year has no FAS 87 expense, but instead the attrition year reflects the federally mandated minimum ERISA pension expense based on the latest actuarial report from TowersPerin. Please see the testimony of Mr. Miller, including Exhibit MAM-6.

Also please note that TAWC would be willing to discuss adopting FAS 87 for pension expense recovery in rates. That discussion would have to include an appropriate amortization of the pension regulatory liability currently on the books of TAWC, similar to the requirements dictated by the adoption of FAS 106 related to OPEB expense.

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

40. Provide a schedule of OPEB expenses charged to or paid by TAWC by calendar year for the years 2003 through 2007.

Response:

2003	$663,919.64
2004	713,084.45
2005	849,386.25
2006	715,170.31
2007	696,868.11

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

41. Provide all NARUC accounts 601-through 675 by month, by account and show the actual or forecasted gross amount and net expense after deducting salaries and wages for the 34 months ended August 2009.

Response:

Please see the attached schedule. The Company did not calculate each attrition year adjustment by month. Therefore, the monthly attrition year amounts are not available in the format requested. For the attrition year, please refer to the response provided to TN-TRA-01-Q028.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

42. Provide a voucher summary for any expense amount paid by TAWC or charged to TAWC by Corporate Office, Shared Services Center ("SSC"), Southeast Region, and other affiliated utility service companies exceeding $1,000 for the period from January 1, 2006 through March 31, 2008 in the following format:

(1)	(2)	(3)	(4)	(5)	(6)
Month	**Year**	**Payee**	**Amount**	**USOA Account**	**Business Reason**

Response:

The Company objects to this request on the grounds that it is over broad, unduly burdensome, requests information that is neither readily available nor exists in the format requested, and, in part, is not relevant to the current proceeding.

Subject to and without waiving its objections, please see the attached document that recaps AWWSC vouchers on which TAWC was charged amounts exceeding $1,000. The file containing the TAWC voucher summary is included on the enclosed CD and labeled as TN-CAPD-01-Part IV-Q042 attachment.xls. Also, please note that the attached list of vouchers includes costs associated with non-recurring items, which are explained in the Company's response to TN-CAPD-01- Part IV-Q029.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

43. Provide all employee expense reports with invoices and receipts for the 27 months ended March 31, 2008 for the Corporate Office, Shared Services Center ("SSC"), Southeast Region, and other affiliated utility service companies by month.

Response:

The Company objects to this request on the grounds that it is over broad, unduly burdensome and seeks information that is not readily available to TAWC.

Subject to and without waiving these objections, TAWC provides the following response. TAWC and AWWSC no longer use paper expense reports. Rather, reimbursable expenses are tracked using purchase cards ("p-card") that are issued by the TAWC. Each p-card user has usage limits and provides receipts for purchases that are reviewed and electronically approved by the employee's supervisor. The volume of the information to comply with this request is voluminous and would require a very significant amount of time and expense to compile as requested. TAWC is willing to provide the CAPD with a sample of such documents.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

44. Provide the amounts on the TRA 3.06 Surveillance Reports for December 2007, January 2008, February 2008, and March 2008 for Operations and Maintenance Expense by NARUC account, which are out of period, non-recurring, or should be normalized.

Response:

The following amounts are non-recurring and should be eliminated:

NARUC Account 6758 (575560.16 lobbying)	$300,00	(March 2008)
NARUC Account 6758 (575640.16 Penalties)	($18,244.00)	(December 2007)
NARUC Account 6758 (575640.16 Penalties)	15,460.93	(February 2008)
NARUC Account 6348 (534000.16 Mgmt Fees)	34,985.00	(December 2007)
NARUC Account 6348 (534000.16 Mgmt Fees)	64,292.00	(January 2008)
NARUC Account 6348 (534000.16 Mgmt Fees)	45,618.00	(February 2008)
NARUC Account 6348 (534000.16 Mgmt Fees)	43,654.00	(March 2008)

Responsible Witness: Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

45. Provide the TAWC Uncollectible Expense amounts in the following format from January 2007 through March 2008 by month:

(1)	(2)	(3)
Total Write Offs	**Cust. Payments**	**Net Write Offs**

Response:

Please refer to the Company's workpapers titled "TN-TRA-DR1-Q013-Uncollectibles page 1 and 2.pdf." filed in response to TRA DR 1 Question 13 for the uncollectible expense amounts through the historical test year ending November 2007. Below are the uncollectible expense amounts through March 2008.

	Total Write Offs	Cust. Payments	Net Write Offs
December 2007	$57,629.99	$3,924.51	$53,705.48
January 2008	$75,234.05	$6,852.65	$68,381.40
February 2008	$49,632.55	$9,534.14	$40,098.41
March 2008	$45,796.46	$5,729.84	$40,066.62
Total	$769,714.91	$86,219.59	$683,495.32

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

47. Provide all amounts for Incentive Payroll ("AIP") by AIP component: Financial, Operational, and Individual allocated and or directly charged to TAWC since its inception through March 2008 by month for expense amounts in the following format:

Capitalized Amounts:

(1)	(2)	(3)	(4)	(5)	(6)	(7)
Year	**JDE Acct #**	**Account Description**	**Plant in Service Balance**	**Depreciation Rate**	**Accumulated Depreciation**	**Net Book Value**

Expense Amounts:

(1)	(2)	(3)	(4)	(5)
Year	**Month**	**NARUC Acct #**	**Account Description**	**Amount**

Response:

The Company objects to this question on the grounds that it is overbroad, unduly burdensome and requests information not readily available to TAWC. In order to comply with this request the Company would have to generate and compile information on over 1,300 employees of TAWC and AWWSC to determine the percentage breakdown of those AIP payments and then determine the allocation of those charges for each of the over 1,200 AWWSC employees who are subject

to charging a portion of there time to TAWC. The data is simply not available to TAWC in this format and to produce it would be unduly burdensome.

Subject to and without waiving these objections, TAWC provides the following response. The Company does not record the AIP with a breakdown between the three components of the AIP on its books and records.
However, please see the attached document that provides the requested information in the manner in which TAWC maintains it.

Responsible Witness: Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

49. Provide all work papers, supporting documentation, and calculations used in the Company's calculation of Depreciation and Amortization Expenses per the books 12 Months ended 11/30/2007; Normalized Test Year; and Attrition Year per the Company's Accounting Exhibit No.2, Schedule 4, Lines 1 through 9, Page 1 of 2 in the format of the Company's Accounting Exhibit No.2, Schedule 4, Lines 1 through 65, Page 2 of 2.

Response:

See the attached depreciation calculation. The workpapers for the utility plant 13 month average balance are included in the Company's response to TRA DR 1 Question 13 and labeled as TN-TRA-01-Q013-RATE BASE BACK-UP pages 39 thru 46 of 52. The calculation of the amortization of CIAC is included in the workpapers labeled as TN-TRA-01-Q01-RATE BASE BACK-UP pages 14 thru 16 of 52.

Page 1 of 1

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

50. Provide all work papers, supporting documentation, and calculations used in the Company's calculation of Depreciation and Amortization Expenses for the twelve months ended March 2004, December 2005, and February 2008 in the format of the Company's Accounting Exhibit No.2, Schedule 4, Lines 1 through 65, Page 2 of 2. The total amount should reconcile to the TRA Surveillance 3.06 report amounts, line 12, column (f).

Response:

The Company objects to this request on the grounds that it calls upon it to create or otherwise organize data regarding time periods outside of the Company's historical test year, seeks to have the Company create work product and seeks information that is not relevant to this rate case. The Company further objects to this request on the grounds that it is over broad and unduly burdensome, in particular, because the information requested is not readily available in the requested format and is extremely costly to gather and produce. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits and workpapers fully supporting its case based on a test year ending November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing. This request seeks the compilation of data for the 12 months ended February 28, 2008, a test year (or twelve month period) after the Company's filing. It is unduly burdensome and fundamentally unfair to require the Company to respond to a data request that, in essence, requires the Company to completely redo the data collection and analysis required to file its petition based on a test year, or multiple test years, proposed by an Intervener, particularly when that test year includes dates after the petition was filed. The re-creation of every aspect of its case for multiple historical test years is not required by TRA rules and is not necessary for the CAPD to assess the Company's petition.

Subject to and without waiving these objections, the Company provides the following response. The Company does not have the data for the February 2008 period in the format requested (which would require the Company to produce an entirely different test-year for this data, including compiling it on the required filing exhibits of the TRA). The Company does not believe the requested December 2005 information requested is relevant to this case and does not have that data in the requested format. Please see the attached data for the period ended March 2004, which is the test year for TAWC's rate case number 04-00288 and the data provided as of June 2006, the test year for TAWC's rate case number 06-00290. The Company reconciliation of the 2004 and 2006 schedules to the TRA Surveillance Report is not readily available and not relevant to this proceeding.

Attrition Year Provision for Depreciation Expense

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

51. Provide the amount of net negative salvage for the twelve months ended March 2004, December 2005, and February 2008 in the format of the Company's Accounting Exhibit No.2, Schedule 4, Lines 1 through 65, Page 2 of 2.

Response:

The Company objects to this request on the grounds that it calls upon it to create or otherwise organize data regarding time periods outside of the Company's historical test year, seeks to have the Company create work product and seeks information that is not relevant to this rate case. The Company further objects to this request on the grounds that it is unduly burdensome, in particular, because the information requested is not readily available in the requested format and is extremely costly to gather and produce. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits and workpapers fully supporting its case based on a test year ending November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing. This request seeks the compilation of data for the 12

months ended February 28, 2008, a test year (or twelve month period) after the Company's filing. It is burdensome and fundamentally unfair to require the Company to respond to a data request that, in essence, requires the Company to completely redo the data collection and analysis required to file its petition based on a test year, or multiple test years, proposed by an Intervener, particularly when that test year includes dates after the petition was filed. The re-creation of every aspect of its case for multiple historical test years is not required by TRA rules and is not necessary for the CAPD to assess the Company's petition.

Subject to and without waiving these objections, the Company provides the following response. See the Company's responses to TN-CAPD-01-Part II-Q34 and TN-CAPD-01-Part IV-Q31.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/Others

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

52. Provide the following American Water Works Company, Inc. Pension Plan amounts by calendar or fiscal year solely for TAWC operations from December 1998 through December 2008:

Accumulated benefit obligation

Change in projected benefit obligation:
Benefit obligation at beginning of year
Service cost
Interest cost
Actuarial loss (gain)
Benefits paid
Benefit obligations at end of year

Change in plan assets:
Fair value of plan assets at beginning of year
Actual return on plan assets
Employer contributions
Benefits paid
Fair Value of plan assets at end of year

Reconciliation:
Funded status
Unrecognized prior service cost
Unrecognized net loss
Net amount recognized

Response:

The Company objects to this request on the grounds that it is over broad, unduly burdensome and the information is not readily available to in the requested format.

Subject to and without waiving these objections, AWW provides pension benefits to eligible employees on a system-wide basis. The AWW Pension Plan Actuary does not prepare separate reporting for the elements of the pension plan on a subsidiary by subsidiary basis. To produce this data in the requested format would be a monumentally burdensome and costly task. Please see the attached schedule for the requested information for the AWW pension plan.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

53. Provide the contract documents and paid invoices for the Management Audit amount of $285,000 described in TN-TRA-Q013-WORKING CAPITAL, on page 11 of 30. Include in your response the month and year starting date for the amortization of the Management Audit and the NARUC expense account charged for the monthly amortization.

Response:

Please see the attached documents. Please note the third invoice includes fees of $20,000 for the direct testimony of Mr. Van den Berg, which was not part of the fixed fee cost of preparing the study.

May 21, 2008

Mr. Michael Miller
Manager of Rates, Southeast Region
Tennessee American Water Company
P.O. Box 1906
Charleston, WV 25327

Dear Mr. Miller:

Thank you for the opportunity to submit our proposal for performing a management audit for the Tennessee American Water Company ("TAWC"), in response to an order from the Tennessee Regulatory Authority ("TRA"). Our proposal is comprised of five sections as outlined below which address the areas of focus defined in your request for proposal:

I. Our Understanding of the Situation

II. Approach and Deliverables

III. Resources, Timing, and Fees

IV. Additional Information

I. OUR UNDERSTANDING OF THE SITUATION

As part of its rate case completed on May 22, 2007, TAWC was ordered by the Tennessee Regulatory Authority ("TRA") to have a management audit performed in compliance with Sarbanes-Oxley requirements and to submit the audit results concurrent with any future rate case filing. This management audit, which will focus on 2005 and 2006 costs, is expected to be submitted with a TAWC rate case in March or April of 2008.

The scope of the management audit is limited to the charges billed by the American Water Works Service Company ("AWWSC") to TAWC, as management fees under the affiliated company contract of 1989 between AWWSC and TAWC. The audit should also address the need for AWWSC's Customer Call, Billing Center, and its

Transactional Accounting functions, as well as any duplication of these functions with TAWC provided functions.

II. APPROACH AND DELIVERABLES

Booz Allen Hamilton ("Booz Allen") is particularly well suited to address the requirements for TAWC's management audit. Booz Allen has performed work as recently as early 2007, supporting the analysis of the allocation of AWWSC's call center and billing costs to American Water affiliates. In this capacity, Booz Allen has developed an understanding of TAWC and its relationship with AWWSC as well as working relationships with both AWWSC and TAWC personnel. As such, we are well prepared to respond quickly and efficiently to the needs of TAWC.

Based on your Request for Proposal ("RFP"), we have identified the following five objectives of the management audit:

1. Determine whether the costs billed to TAWC resulted from prudent or imprudent AWWSC management and/or Board of Directors decisions
2. Demonstrate the reasonableness of the AWWSC to TAWC cost allocation methodology
3. Address the necessity of functions provided by AWWSC on behalf of TAWC
4. Determine the extent to which AWWSC provided functions overlap with TAWC provided functions
5. Provide an overall reasonableness assessment for the charges billed to TAWC by AWWSC

We have structured our work to directly address the objectives of the management audit and suggest providing an independent review of the following areas:

Analysis	Activities	Deliverables
Allocation Methodology	▸ Examine existing allocation methodology for regulated versus unregulated costs ▸ Define relationship between allocation factor(s) and underlying cost drivers ▸ Compare allocation methodology to other companies	▸ Evaluation of the reasonableness of the methodology for assigning AWWSC costs to TAWC
Activity Necessity and Benefits	▸ Develop comprehensive list of activities that comprise relevant AWWSC costs billed to TAWC ▸ Assess of the necessity of those	▸ Assessment of the reasonableness of the activities performed by AWWSC on behalf of TAWC

	activities against pre-defined attributes ▸ Assess the benefits for TAWC and its customers derived from the performance of those activities against pre-defined attributes	
Activity Duplication	▸ Compare activities performed by TAWC against activities performed by AWWSC to identify areas of potential duplication ▸ Evaluate whether activities are duplicative	▸ Assessment of potential activity duplication
Cost Management	▸ Map budgeting and cost control processes ay AWWSC ▸ Evaluate reasonableness of cost management processes	▸ Assessment of effectiveness of current cost management practices at AWWSC
Cost Trends	▸ Collect relevant AWWSC and TAWC cost data ▸ Collect key operational data (e.g., volumes, number and type of customers) ▸ Assess cost trends and cost levels	▸ Evaluation of cost trends to determine reasonableness

III. RESOURCES, TIMING, AND FEES

Mr. Joe Van den Berg, a Vice President in the Energy & Utilities (E&U) practice, will have overall responsibility for this engagement. He will be assisted by a Principal who has directly managed similar analyses for utilities over the last two years (Marco Bruzzano or Earl Simpkins). They will be supported by a full-time project manager and 2 consultants. Billings will indicate the number of hours worked and associated fees for the individuals assigned to this project, subject to the cap set forth below.

We will conduct the assessment over a six to eight week period, depending on availability of data. Given the desire to finalize the management audit by February 15, we propose starting as soon as the appropriate Booz Allen staff become available, with a target date of November 19, 2007.

We propose a fixed price contract for our professional fees of $285,000 based on the expected scope of work outlined above. Expenses (travel, lodging, transport, per diems, research, and report production) will be invoiced at actual cost, and are estimated at 15% of professional fees.

It is our practice to submit an invoice at the end of each month for our estimated fees and expenses for that month. We will reconcile estimated fees and expenses against those actually incurred following the completion of the assignment. Invoices are

payable upon receipt. Any out-of-pocket expenses to be incurred outside the normal expenses associated with business travel will be discussed with the Company prior to incurrence.

IV. Additional Information (as requested in Section C of the RFP)

Request	Response
Total estimated cost "not to exceed"	$285,000 (excluding expenses)
Qualification of professional employees	Resumes attached for • Joseph Van den Berg • Marco Bruzzano • Earl Simpkins • Sebastian Domenech • Eric Dowley
Listing of employees who may be able to provide expert testimony	• Joe Van den Berg
Hourly rates or fixed price contract	$285,000 fixed priced contract for professional fees (excluding expenses)
Estimate of hours of effort for each employee	Joe Van den Berg – 72 to 96 Marco Bruzzano – 96 to 128 Eric Dowley – 360 to 480 Associate – 360 to 480 Consultant – 360 to 480
Listing of potential changes of scope	Expanding dates for cost analysis to 2003 or 2004 to gain additional insights on cost trends

****

We appreciate being given the opportunity to respond to your request for proposal for this important assignment and believe we are well qualified to provide the expertise this engagement deserves. Should you have any questions, please call me at 703-902-3828.

Yours sincerely,

Booz Allen Hamilton Inc.

A. Joseph Van den Berg

A. Joseph Van den Berg

ACCEPTED AND AGREED TO THIS ____ DAY OF _____

Tennessee American Water Company

By: _____

Title:_____

JOE VAN DEN BERG

Summary

Mr. Van den Berg is a Vice President with Booz Allen at the McLean office. He has over 24 years of energy and consulting experience, with a focus on the strategic opportunities available to companies in uncertain regulatory climates. Additionally, he has strategy and operations experience in generation technology development, legislative and regulatory advocacy, marketing, economic regulation, customer operations, and market research.

Example Projects

- Regulatory Support for shared service Investments: Provided testimony in support of transition costs and ongoing O&M costs for investor-owned multi-national water company for its investments in customer care systems and infrastructure and financial systems.
- Business Unit Strategy: Led several engagements focused on developing retail strategies to serve the competitive states or provinces in which it operates. Analysis has included development of customer profitability models segmented by usage and buying characteristics, development of back office processes and systems and their related costs to serve models, matching of customer load profiles with supply availability, and customer segmentation models.
- Merger and Acquisitions: Directed merger and acquisition engagements focused on post merger integration planning including strategic framework development, synergy identification, and program management assistance. Scope also included providing expert witness testimony in state jurisdiction relating to the quantified benefits from the proposed transaction.
- Customer Operations: Directed several engagements focused on developing a customer care and operations strategy resulting in improving cost performance from bottom 25% to top 25%. Strategies implemented including standardizing business processes, simplifying governance and work activities, and implementing technology enablers. Additional scope has included leading strategy development for the potential outsourcing of the customer care functions. Roles have included scope definition, negotiation preparation and strategy, contract structuring, value proposition determination and business requirements creation.
- Business Unit Operations: Directed engagements relating to the organization and processes required to be successful in both the retail and delivery segments. Activities include management of marketing, sales and service technology integration platforms with the appropriate design of business intelligence transfer protocols, cost allocation requirements, process handoffs and interfaces, roles and responsibilities of marketing and sales functions.
- Business Transformation: Led business process redesign engagement focused on aligning business process with an integrated technology platform. Activities

included blueprinting and standardizing business processes to enable benefits from common processes, design and reporting, and functional alignment. Coordinated change management activities on enterprise level to facilitate training and knowledge transfer.

- Corporate Strategy: Developed growth strategies for integrated utilities including market entry strategies, acquisition target and screening and integration planning. Developed product and customer profitability models and pricing models to implement the strategies.
- Developed generation strategy for suppliers to the energy industry.
- Developed a market entry strategy for new generation technology.

Experience Prior to Booz Allen

Prior to joining Booz Allen, Mr. Van den Berg was a partner with Deloitte Consulting, with an emphasis in utility strategy and operations consulting. Prior to Deloitte, he was the Director of Electrotechnology Policy and Planning for the Edison Electric Institute (EEI) after starting his career with Potomac Electric Power Company.

Education

Joe Van den Berg received his MBA in Finance and Investments from George Washington University. He also holds a BS in Mechanical Engineering from Virginia Polytechnic Institute and State.

MARCO A. BRUZZANO

Summary

Mr. Bruzzano is a Principal with Booz Allen Hamilton, Inc. and has more than 15 years of experience in the energy industry. He has served utilities and petroleum clients globally on a broad range of topics, including corporate and business unit strategy, operations performance improvement, capital project optimization, and supply chain optimization.

Example Projects

- Supported the benchmarking and evaluation of processes for the Service Company of a large multi-state utility. Assesses cost trends and cost management practices. Defined activity necessity and benefits and assessed degree of overall between the Service Company and the Operating Companies. Evaluated cost allocation mechanism. Supported testimony development.
- Assessed cost trends and benchmarked costs for the Service Company of a different multi-state utility. Assessed budgeting and cost control process (including use of benchmarking). Supported testimony development.
- Led multiple engagements across an IPP's coal, gas, and oil-fired generation plants to significantly improve performance through cost reduction, capital investments, and improved operations / maintenance practices.
- Led an engagement to develop a commercialization strategy for a proprietary coal gasification technology.
- Led an engagement to identify operations performance improvement opportunities for the gas-fired generation portfolio of an IPP.
- Led multiple engagements to reduce contract service and material spend for generation plants across multiple categories (e.g, boilermaker services, scaffolding, waterblasting, piping, chemicals) for different utilities.
- Worked with utilities and petroleum companies to redesign capital project development and approval processes.

Experience Prior to Booz Allen

Prior to re-joining Booz Allen, Mr. Bruzzano was an Engagement Manager with McKinsey & Company, serving utility and petroleum clients globally. Mr. Bruzzano also worked for several years for Chevron USA, first as a design engineer and then as a long-range planner in the Richmond, Ca. refinery.

Education

Mr. Bruzzano received an MBA, with distinction, from Duke University, where he was a Fuqua Scholar, a Rollins Scholar, and the recipient of the General Motors Graduate Fellowship. He holds MS and BS degrees, with honors, in mechanical engineering from the Georgia Institute of Technology.

EARL SIMPKINS

Summary

Mr. Simpkins is a Principal with Booz Allen Hamilton. He is an experienced consultant who specializes in management, organizational, operational and financial issues. His areas of expertise include electric and gas utilities, mergers and acquisitions, business transformation and shared services.

Example Projects

- Earl led an effort to assess the reasonableness of utility service company costs to an affiliate. The assessment involved assessing the reasonableness of A&G costs across nine dimensions. The study concluded with a 10 section report supporting the A&G costs in such areas as necessity and benefit, duplication and overlap, cost comparability (benchmarking and self-performance), budget and control, cost trends and other elements to develop opinions as to the reasonableness of A&G costs. The final deliverables included developing cover testimony (to the report), the report and a set of backup books supporting the testimony and report.
- Earl led an effort to assess the necessity and benefit and outsourcing framework of A&G costs provided by a utility's service company. The effort involved understanding the nature of the activities performed by the services company and understanding the approach. The final deliverable included testimony describing the nature, necessity and benefits of service company activities (and associated costs).
- Earl led an effort to identify process improvements and establish a shared services organization for the Information Technology group of a major utility. From a performance improvement standpoint, the assessment included evaluating current operations, identifying end-state goals, documenting process gaps and developing the new process design. Once processes were optimized, the analysis turned towards the establishment of the shared services organization, creation of service-level agreements and establishing product and service costs. The ultimate result was $5 million in savings and signed service-level agreements / contracts.
- Earl has experience with multiple merger integrations, working with various functional teams to identify best practices, document / map current processes and process gaps, develop process improvements and supporting organization structure and quantify process improvement savings. This work also involves the development of merger savings tracking tools and associated implementation milestone tracking. The conclusion of the work is the development of a functional or process business case that is integrated with the larger merger integration business plan and merger progress reporting capabilities through the tracking tools.
- Earl led several assignments concerning the assessment of synergies for two (or more) utilities considering a merger or acquisition. The impact of the

combination was evaluated across labor, non-labor / corporate programs, energy supply and procurement opportunity areas. The conclusion is a board-level report summarizing savings associated with the transactions with comparisons to previous transactions and summary descriptions of the nature of savings by area.

- Earl led efforts to identify both Finance and Transmission Business Unit process improvement. These improvements resulted in increased process execution efficiency as well as organizational structure changes which Earl advised. The conclusion of the effort resulted in reduced expenses and improvements in process execution.

Experience Prior to Booz Allen

Prior to joining the firm, Mr. Simpkins was with Deloitte Consulting. He was in the Utilities practice, focusing on mergers and acquisitions, merger integration, business transformation/performance improvement, shared services and strategy.

Education

Mr. Simpkins received an MBA degree from Harvard University. He also holds a BS degree in Accounting from Florida A&M University.

SEBASTIAN DOMENECH

Mr. Domenech is Senior Associate with Booz Allen Hamilton, based in the Dallas office. He is a member of the Strategy Team. Mr. Domenech's background has helped him develop expertise in Energy, Telecom and Not-For-Profit sectors. His functional expertise includes Growth Strategy, Competitive Analysis, Synergies Assessment, Organization & Operational Model Design, and Systems Implementation. Previous assignments with Booz Allen Hamilton include:

Example Projects

- Assessment of cost reasonableness for cost recovery rate case for two large electric utilities. Mr. Domenech's work included performing due diligence to evaluate the necessity and reasonableness of service company charges billed to the utilities operating companies. Analyses included evaluation of budgeting and control processes, and evaluation of cost reasonableness through benchmarking and trending analyses
- Growth strategy and competitive analysis for a major electric utility. Performed research on new business opportunities, evaluated the attractiveness of creating a technology consortium, and performed high level competitive analysis to predict strategic moves of potential competitors
- Evaluation of contracting strategy for the construction of new nuclear power plant in U.S. Mr. Domenech participated in the design and execution of broad study of the marketplace for Mega-projects in the U.S. Study involved comprehensive desk research, and over 40 interviews with key participants of the Mega-projects marketplace, with the objective of understanding latest trends and current state of supply-demand balance of EPC services and the most prevailing terms and conditions being negotiated
- Synergy assessment for a large electric utilities merger. Mr. Domenech calculated the potential savings in materials & supplies purchasing, contracted services and professional services. Mr. Domenech also evaluated potential operational improvements through an industry wide benchmarking study
- Redesign and pilot implementation of operational model for global NGO dedicated to tackling the causes of poverty. Mr. Domenech participated in the design of new strategy development framework and the pilot implementation of the new process in the Latin America and Caribbean region. His work included developing a resource allocation model, designing economic models to evaluate operational costs, and structuring the work of two teams that participated in the pilot implementation of new operational model
- Competitive analysis of spend level and organizational practices of Government and Public Affairs (GPA) functions for oil & gas major. Mr. Domenech participated in the design and execution of benchmarking study, which involved intensive research to understand comparative levels of spend in corporate contributions, corporate advertising and GPA staffing. Study also required

interviews with GPA specialists of key peer companies, in order to identify best practices in GPA activities

- Growth strategy for the private equity arm of a large industrial conglomerate. Mr. Domenech's work included performing research and analysis to identify growth platforms across the entire energy value chain, on a global scale. His work focused mainly in evaluating opportunities in upstream and midstream Oil & Gas space, as well as biofuels production in *U.S. and Europe*
- Synergy assessment to evaluate the potential purchase of gas assets for a fast growing utility. Mr. Domenech refined a model to calculate potential savings through the acquisition of two gas distribution assets and created a model to analyze potential staff reductions. His work also included writing a Memorandum of Information required for the sale of a business division

Experience Prior to Booz Allen

Prior to joining Booz Allen Hamilton, Mr. Domenech spent four years with ExxonMobil. Mr. Domenech was a member of a team that streamlined HR processes and implemented a new HR system for *24 countries in Latin America.* During his expatriate assignment in *Rio de Janeiro, Brazil,* Mr. Domenech led the implementation of the HR Compensation and Organizational Management modules of the new HR system and played a key role in the implementation of the business workflows for the Finance & Accounting system.

Prior to that, Mr. Domenech was the specialist in HR Compensation & Benefits for *Argentina, Uruguay and Paraguay.* While holding this position, Mr. Domenech played a key roll in supporting the *European and Asian* HR teams during their transition to their newly implemented systems.

Mr. Domenech's earlier work experience includes performing financial modeling for business prospects for the largest steel group in Argentina, and working with the operations management group at Pirelli tires of Argentina.

Education

Mr. Domenech earned an MBA with high distinction from the Stephen M. Ross School of Business, at the University of Michigan. As a student, Mr. Domenech worked on an engagement in *Lisbon, Portugal* with Portugal Telecom SGPS, where he evaluated the U.S. venture capital market and telecom environment as avenues for revenue growth and partnerships. Mr. Domenech's undergraduate studies were in Industrial Engineering from the University of Buenos Aires (UBA), where he graduated within the top 5% of his class.

ERIC P. DOWLEY

Summary

Mr. Dowley is a Senior Associate with Booz Allen Hamilton, Inc. and has more than 5 years of consulting experience in the energy industry. He has served utility clients across the U.S. on a broad range of topics, including business unit strategy, operational performance improvement, and organization and process design and change.

Example Projects

- Led the analysis of costs incurred through a shared services organization on behalf of one of its regulated utility affiliates. Utilized a framework to analyze and assess the performance of the organization. Developed materials and testimony to explain and support the increasing cost trend due to factors that had not previously been considered.
- For a major US utility holding company, led the analysis and visioning stages of an organizational transformation program. Managed the analysis of historical performance, future capital challenges and changes in the employee base to demonstrate the need for an organizational change. Also developed a decision framework for planning the scope, structure, execution and staffing of a transformation program. Additionally, the team helped define the end state goals for the effort.
- Assisted in the cost reasonableness assessment of a major US utility shared services organization to support a rate case filing. This involved modeling cost trends within each service area over time and developing a view to explain why costs are reasonable. The team developed an understanding of each activity performed by the services company on behalf of the operating companies to show the value to the utility. The team also developed a model to estimate the value of providing these services through a shared services organization rather than independently.
- Developed a wholesale portfolio strategy for a major US IPP, guided by the efficient frontier concept. This involved modeling asset-level performance under various scenarios. Additionally, the team assessed the benefits of scale and scope and the trade-offs between them in wholesale portfolio design. The team recommendations focused on regional opportunities to create portfolio value.
- Created a cost structure model for a coal supplier to a major US utility.
- Managed an engagement to identify and quantify risks facing a major electric and gas utility, helping to focus human and capital resources.
- Evaluated the financial and operational performance of a comprehensive outsourcing arrangement for a major US utility to re-align roles and responsibilities.
- Participated in the offering and eventual sale of power plants, supply services and tolling agreements for several US and foreign utilities. On these projects, Mr.

Dowley focused on developing valuation models and managing due diligence procedures.

Experience Prior to Booz Allen

Prior to joining Booz Allen, Mr. Dowley was a Manager in the Advisory Services practice at KPMG, LLP, serving global utility clients. He has had significant experience in the identification, quantification and mitigation of risk across utility operations. In the utility industry, he led engagements focused on the improvement of capital budgeting processes, finance and accounting processes and meter to cash processes. Mr. Dowley has also led, or been involved with, several initiatives to identify and implement cost reduction measures. Mr. Dowley also has experience working for Navigant Consulting and TD Securities.

Education

Mr. Dowley received an MBA from Georgetown University's McDonough School of Business. He holds a BA degree, with honors, in economics from Hobart College.

Non-Disclosure Agreement

During the course of discussions between American Water Works Service Company, Inc. (AW) and Booz - Allen - Hamilton ("Supplier") relating to and for the purpose of proposing and evaluating potential supply agreements, each company may disclose to the other information it considers proprietary and confidential ("Confidential Information"). Confidential Information includes (a) all information provided by AW relating to contract terms and the identity, kind, quality and quantity of materials for which bids are sought, (b) the price submitted by each Supplier when taken together with the identity of that Supplier, and (c) all other information in tangible form marked by the disclosing party as confidential or which the disclosing party orally indicates is confidential if such information is provided orally. The company providing the Confidential Information is the "Provider" and the company receiving it is the "Recipient". We each agree, as a Recipient, as follows:

Recipient will use the Confidential Information of the Provider only in the furtherance of the purpose described above and will protect the confidentiality of Provider's Confidential Information in the same manner it protects the confidentiality of its own proprietary and confidential information.

Recipient will restrict disclosure or availability of the Confidential Information to only those subsidiaries, and employees (and, in AW's case, consultants contracted to assist in the overall evaluation and selection of qualified suppliers) who (a) have a need to know based on participation in and contribution to the project with Provider and who (b) have been informed by Recipient of Provider's proprietary interest and of Recipient's obligations of confidentiality.

Recipient is not prohibited or limited in the use of information (included but not limited to ideas, concepts, know-how, techniques, and methodologies) (I) previously known to it, (II) independently developed by it, (III) acquired by it from a third party which was not, to the best of the Recipient's knowledge, under an obligation to Provider not to disclose such information, or (IV) which is or becomes publicly available through no breach by Recipient.

Recipient shall be responsible and liable to Provider for any breach of this agreement by Recipient, including without limitation any of its affiliates, subsidiaries, directors, officers, or employees. We both recognize and acknowledge that any breach or threatened breach may result in irreparable injury to Provider for which monetary damages may be an adequate remedy, and Provider shall be entitled (without proving monetary damages) to temporary and/or permanent injunctions from a court restraining such breach or threatened breach. Injunctive relief shall not be deemed to be the exclusive remedy for any such breach or threatened breach of this Agreement, but shall be in addition to all other remedies available to Provider at law or in equity. The rights and obligations provided in this Agreement shall continue whether or not the parties enter into a supply agreement.

*Mandatory Information

Finance Review Form

The objective of the Finance Department review of contracts is to ensure the accounting and financial statement disclosures are correct. The contract review will be the responsibility of one defined person in each Business Unit (Region, AWE and Service Company/Corporate). This identified reviewer will be the primary contact for contract review and will review each contract as necessary or assign the review to someone else in the Finance Department / SSC Accounting as appropriate. For example, the contract reviewer may assign the review of a contract to a State Financial Analyst or the Director of Accounting for the Business Unit.

The identified reviewer will review the monthly index of contracts and perform a risk assessment based on the type of contract and value. Contract types which are generally identified as high risk require finance review prior to contract execution. The following provides examples of potential areas of exposure or situations in which additional review may be needed.

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/Joe Van den Berg

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

54. Provide the contract documents and paid invoices for the Preliminary Survey - Customer Service amount of $555,966 described in TN-TRA-Q013-WORKING CAPITAL, on page 11 of 30. Include in your response the month and year starting date for the amortization of the Preliminary Survey - Customer Service and the NARUC expense account charged for the monthly amortization.

Response:

The Company objects to this request on the grounds that it is over broad, unduly burdensome, not relevant to this proceeding, and not readily available to TAWC in the format requested.

Subject to and without waiving these objections, the Company provides the following response. The Company first asked for recovery of the deferred cost for the transition to the Call Center in case number 03-00118. In that case, the Company demonstrated to the satisfaction of the CAPD and the TRA that the transition to the national call center and the national shared services center were prudent, resulted in increased service, and increased efficiency and cost savings. The amortization of those costs has been recognized in TAWC's cost of service approved by the TRA in all subsequent rate cases. (*See* case numbers 04-00288 and 06-00290). The Company believes it unreasonable and irrelevant for the Company to produce a **massive** amount of data that is now 5-8 years old, and has been subjected to the Company's three past rate cases.

Please note that the same request of the Company was made in case number 06-00290. As such, please see the Company's responses to the City of Chattanooga requests in that matter, which sought this same information.

In addition, please note that the Company began amortization of the call center transition costs in August 2003, and that amortization was started based on the result in the TAWC case number 03-00118. The amortization is charged to account 675.8

Please see the attached documents which comprise the testimony, exhibits and working papers used in case number 03-00118.

In addition, please refer to the testimony and exhibits of Mr. Van den Berg which includes his study of AWWSC charges including the National Call Center as ordered by the TRA in case number 06-00290.

Docket No. 06-00290
City of Chattanooga Discovery Request No. 1, 2, 13

SECOND SUPPLEMENTAL RESPONSE

Responsible Witness: Michael Miller

Supplemental Response to COC Questions 1, 2, and 13:

Attached are schedules used in case number 03-00118 in support of the savings generated from the call center, the employees impacted by the transition at TAWC, and the customer service employees embedded in the historical test-year for that case, along with their salaries or hourly rates of pay. The attached schedules filed in that case were either exhibits to the testimony of Michael Miller, or in the workpapers filed with the case, and are a part of the public record in that case.

The Call Center Costs for 2004-2006 are as follows:
2004 - $782,034
2005 - $773,218
2006 - $866,606

Supplemental Response 2 to COC Questions 1, 2, and 13:

Attached are additional workpapers and the testimony of Michael A. Miller regarding the customer call center which were filed in case number 03-0118.

10.90% - 13.29% based on a number of indices and methods, and indicates that the 11.00% return on equity requested by the Company in this case is justified and reasonable for the Company on a stand alone basis, based on the data he has examined.

31. Q. DO YOU CONCUR WITH MR. MOUL'S CONCLUSIONS?

A. Yes I do. The Company elected to use an 11.00% ROE, which is in Mr. Moul's range as a justified and reasonable request for ROE for the rates to be established in this case.

32. Q. THE COMPANY'S CALL CENTER AND BILLING FUNCTIONS WILL BE MOVED TO ALTON, ILLINOIS AS PART OF AWW'S CONSOLIDATED CALL CENTER. PLEASE DESCRIBE THIS MOVE AND ITS PURPOSE.

A. The Company and the other American Water System operating companies are striving to provide customer service that will be more responsive, provide increased customer service options, improve customer satisfaction, and effect cost savings wherever possible. As with many other utility systems, we are moving to a consolidated call center ("Call Center"). Beginning in July 2003, the customer inquiry and billing functions for the Company will be performed at the Call Center in Alton, Illinois. The first companies to move to this shared services format were New Jersey-American and Long Island Water Company in April, 2001,

West Virginia-American in May, 2001, Pennsylvania-American in July, 2001, and Missouri-American in November, 2001, and Illinois-American in June 2002.

The American System has as one of its primary goals to provide customer service unsurpassed in the water industry. At the same time, we hope to provide that service at the lowest reasonable cost. The Call Center will help us meet both of these important goals.

33. Q. HOW DOES THE COMPANY AND THE OTHER AMERICAN SUBSIDIARIES CURRENTLY OPERATE THE CUSTOMER SERVICE AND BILLING FUNCTIONS?

A. The Company and the other subsidiaries not yet a part of the Call Center currently operate independent call centers and billing functions in their respective service territories.

34. Q. WHY IS THIS A PROBLEM AND HOW WILL THE CONSOLIDATION IMPROVE SERVICE?

A. Although the Company currently provides acceptable customer service, there are limitations on that service because of the size of the Company. The current customer service function is operated five days a week from 8:00 a.m. to 4:30 p.m. The Company provides only emergency coverage after normal working hours and on weekends. In today's business environment, customers

demand more in the way of service availability and increased functionality. The American System has historically maintained a common customer service and billing software platform; however, programming has been handled either locally or regionally. This has led to numerous versions of the common software platform, and has been a problem when multi-state acquisitions or software upgrades have been required. In essence, multiple conversions have been required to facilitate the various software versions. This has cost time and money for the subsidiaries. In short, it has limited our ability to take full advantage of the economies of scale available to the American System.

The Call Center will be operated on the ORCOM customer service and billing software. The software program will be uniform for all subsidiaries, and this will make future software migrations and acquisition integration projects easier to accomplish and less costly.

In addition to the software improvements, the Call Center will provide full customer service on a twenty-four hour, seven day a week basis. There will also be enhancements for automated call answering, automated payment options, communications with field operations, and bill editing processes through significant improvements in the various technologies employed. The individual operating companies could not provide this enhanced

service on a cost-effective basis. The Call Center will increase the availability of full service to the customers on an around-the-clock basis, and provide the additional services that our customers demand in today's environment.

35. Q. DOES THIS MEAN THAT THE COMPANY WILL HAVE NO LOCAL PRESENCE FOR CUSTOMER SERVICE?

A. No. The Company will still have its Corporate Office in Chattanooga. There will still be a clerical staff to coordinate billing and collections for the entities for which we perform this function. We will still provide customer contact as required, resolve customer issues relayed from Alton, and respond to Commission inquires. In addition, the field personnel will continue to be available to address the needs of our customers. The local payment locations will remain unchanged. This transition should be transparent to the customers.

36. Q. DOES THE CASE AS FILED INCLUDE THE COST PROJECTIONS FOR THE CALL CENTER, AND ADJUSTMENTS TO THE TEST YEAR EXPENSES?

A. Yes. The attrition year includes the cost of the National Call Center since the Company will make that transition in the second quarter of 2003.

37. Q. WOULD YOU PLEASE DESCRIBE THE IMPACT OF THE MOVE TO THE NATIONAL CALL CENTER?

A. Yes. Attached to this testimony is Exhibit MAM-4 which provides the detail of the cost to make the transition and its impact. The schedule indicates a reduction in expense of $748,642 from the elimination of 11 employees' salaries and payroll related overhead, elimination of temporary positions, and reduction in various miscellaneous expenses. The Company's forecasted cost for the service provided by the Call Center is $616,858. This cost is allocated to the Company based on its number of customers to the total customer base served by the Center. These business case estimates have been very close to the actual cost for the companies already served by the Center.

38. Q. YOU ALSO INCLUDE TRANSITION COSTS FOR THE MOVE TO THE CALL CENTER. PLEASE DESCRIBE WHAT MAKES UP THESE COSTS AND THE RATE TREATMENT THE COMPANY IS REQUESTING IN THIS CASE.

A. As with any project of this type, there are costs required to make the transition possible and to make it go smoothly. The Company's allocated portion of these one-time costs is $872,617. Those costs are made up of severance costs, moving costs for those associates electing to relocate to Alton, consulting costs to set up the processes and training, and in-house costs charged for setup

and training.

The Company requests that the Commission recognize the $872,617 as a necessary cost of making the transition and afford regulatory asset status for those costs. The Company requests also that those costs be amortized over a ten-year period starting with July 2003, and be included in the new rates recognized in this case, with the unamortized amount included as rate base.

39. Q. ARE THERE ADDITIONAL SAVINGS THAT WERE PART OF THE AWW BUSINESS CASE FOR THE CALL CENTER ALREADY BUILT INTO THE TEST YEAR EXPENSES?

A. Yes. AWW bid its lockbox service on a national basis in late 2000. The low bidder for all Southeast Region Companies was BB&T. The move to BB&T has resulted in a net savings of approximately $89,000 annually that has already been reflected in the test year expenses.

40. Q. WHY SHOULD THE COMMISSION APPROVE THE RATE MAKING TREATMENT REQUESTED FOR THE CALL CENTER?

A. Tennessee-American is a relatively small company and simply does not have the customer base to provide the level of service that will be provided by the Consolidated Call Center on a stand-

alone basis. The level of service provided to the customers will be increased and this will be accomplished at a savings to the ratepayers. The availability of full customer service functions on a 24/7 basis and technological enhancements to benefit customer contact, payment options, and other customer contact functions are what the Company believes the customers demand and expect.

41. Q. THE COMPANY MOVED ITS TRANSACTIONAL ACCOUNTING FUNCTIONS TO THE NATIONAL SHARED SERVICES CENTER LOCATED IN MARLTON, NEW JERSEY EFFECTIVE NOVEMBER, 2001. PLEASE DESCRIBE THIS MOVE AND ITS PURPOSE?

A. In 1999 and 2000 AWW undertook a review of its accounting functions to determine how it could improve its transactional accounting functions, take advantage of economies of scale where possible, and improve the uniformity of its software applications at the various operating subsidiaries. The Company had previously installed JD Edwards accounting software, but like its customer accounting and billing functions, local and regional MIS and programming had, in essence, created several different versions of the software. This created difficulties with consolidated accounting and multi-jurisdictional acquisition integrations. AWW determined that there were economies of scale savings, and operational efficiencies to be derived from

TENNESSEE AMERICAN WATER COMPANY
Docket No. 06-00290
City of Chattanooga Discovery Request No. 1, 2, 13

SUPPLEMENTAL RESPONSE

Responsible Witness: **Michael Miller**

Supplemental Response to COC Questions 1, 2, and 13:

Attached are schedules used in case number 03-00118 in support of the savings generated from the call center, the employees impacted by the transition at TAWC, and the customer service employees embedded in the historical test-year for that case, along with their salaries or hourly rates of pay. The attached schedules filed in that case were either exhibits to the testimony of Michael Miller, or in the workpapers filed with the case, and are a part of the public record in that case.

The Call Center Costs for 2004-2006 are as follows:

2004 - $782,034

2005 - $773,218

2006 - $866,606

TENNESSEE-AMERICAN WATER COMPANY
COMPARISON OF ANNUAL COST FOR THE CONVERSION
TO A CONSOLIDATED CALL CENTER AND "SHARED SERVICES" CENTER

CONSOLIDATED TELEPHONE CALL CENTER ("CTC")

Forecasted annual cost for operating the CTC		$616,858	
Plus Amortization of the transition cost	$872,617 / 10 years =	87,262	
Total Cost for CTC			$704,120
To reflect the elimination of 12 positions Plus overhead at TAWC		(662,609)	
To eliminate temporary positions		(51,057)	
To eliminate various O & M expenses-base year 12 months ended July 31, 2002		(34,976)	
Total Cost eliminated			(748,642)
Annual cost (savings) due to conversion to consolidated call center			($44,522)

SHARED SERVICES CENTER ("SS")

Forecasted TAWC annual cost from the SS		$338,526	
Plus Amortization of the transition cost	$359,480 / 10 years =	35,948	
Forecasted TAWC annual finance department cost from the Southeast Region		111,359	
Total cost for SS and finance function			485,833
To reflect the elimination of 4 positions Plus overhead at TAWC		(264,057)	
To eliminate regional accounting functions - Marlton office		(372,246)	
Total Cost eliminated			(636,303)
Annual cost (savings) due to conversion to consolidated shared services center			($150,470)

TENNESSEE AMERICAN WATER COMPANY
Docket No. 06-00290
City of Chattanooga Discovery Request No. 1

Responsible Witness: **Michael Miller**

Question:

1. For each month from January 1, 2000, until all customer service functions were transferred to the National Call Center, ***identify*** all ***TAWC*** personnel involved in functions transferred to the National Call Center, the hours each devoted to such activities, and the base hourly rate of wages or salaries (without overhead) paid to each such employee.

Response:

TAWC objects to this question on the grounds that the requested information is overly burdensome, and not relevant to the current proceeding. Notwithstanding the objection, TAWC provides the following response. TAWC has included in the historical test-year filing in the case the actual cost of its local operations and the National Call Center. TAWC is fully prepared to address those costs in this case, but believes the requested information from January 1, 2000 to August 2003 would be burdensome to produce, has been fully addressed in two previous general rate cases, and is not relevant to the current proceeding. TAWC moved to the National Call Center in August 2003, and fully addressed that transition in its 2003 rate case, docket number 03-00118. In addition, the Call Center costs were fully embedded in the 2004 rate case, docket number 04-00288.

TENNESSEE AMERICAN WATER COMPANY
Docket No. 06-00290
City of Chattanooga Discovery Request No. 1

Responsible Witness: **Michael Miller**

Question:

2. Provide all ***Documents*** reflecting, recording, referring to, reporting, or relating to change in the level of expense to ***TAWC*** from the shift to the National Call Center of ***TAWC*** customer services functions.

Response:

TAWC objects to this question on the grounds that the requested information is ambiguous, overly broad, overly burdensome and not relevant to the current proceeding. This request is overly burdensome and overly broad in that it would involve a document search involving hundreds of employees at TAWC and AWWSC for information related the Call Center that is not readily available to TAWC, regarding a subject that has been fully addressed in two prior rate cases of TAWC. Notwithstanding the objection, please see the response to question 1.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/Others

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: EXPENSES

55. Provide the contract documents and paid invoices for the Preliminary Survey - Financial Service amounts of $208,308 described in TN-TRA-Q013-WORKING CAPITAL, on page 11 of 30. Include in your response the month and year starting date for the amortization of the Preliminary Survey - Financial Service and the NARUC expense account charged for the monthly amortization.

Response:

The Company objects to this request on the grounds that it is over broad, unduly burdensome, not relevant to this proceeding, and because the information is not readily available to TAWC in the format requested.

Subject to and without waiving these objections, the Company provides the following response. The Company first asked for recovery of the deferred cost for the transition to the Shared Services Center in case number 03-00118. In that case the Company demonstrated to the satisfaction of the CAPD and the TRA that the transition to the national call center and the national shared services center were prudent, and resulted in increased service, increased efficiencies and cost savings. The amortization of those costs has been recognized in TAWC's cost of service approved by the TRA in all subsequent rate cases. (*See* case numbers 04-00288 and 06-00290). The Company believes it unreasonable and irrelevant for the Company to produce a **massive**

amount of data that is now 5-8 years old, and has been subjected to three past rate cases of the Company.

Please see the attached documents that include the testimony and exhibits demonstrating the prudence, improved efficiencies and cost savings associated with the move to a national shared services center for AWW and TAWC. These documents include the testimony, exhibits and working papers presented by TAWC and Mr. Miller in case number 03-00118.

In addition, please note that the Company began amortization of the shared services center transition costs in August 2003, and that amortization was started based on the result in the TAWC case number 03-00118. The amortization is charged to account 675.8

Please see the attached documents which comprise the testimony, exhibits and working papers used in case number 03-00118.

In addition, please refer to the testimony and exhibits of Mr. Van den Berg, which includes his study of AWWSC charges including the National Shared Services Center as ordered by the TRA in case number 06-00290.

alone basis. The level of service provided to the customers will be increased and this will be accomplished at a savings to the ratepayers. The availability of full customer service functions on a 24/7 basis and technological enhancements to benefit customer contact, payment options, and other customer contact functions are what the Company believes the customers demand and expect.

41. Q. THE COMPANY MOVED ITS TRANSACTIONAL ACCOUNTING FUNCTIONS TO THE NATIONAL SHARED SERVICES CENTER LOCATED IN MARLTON, NEW JERSEY EFFECTIVE NOVEMBER, 2001. PLEASE DESCRIBE THIS MOVE AND ITS PURPOSE?

A. In 1999 and 2000 AWW undertook a review of its accounting functions to determine how it could improve its transactional accounting functions, take advantage of economies of scale where possible, and improve the uniformity of its software applications at the various operating subsidiaries. The Company had previously installed JD Edwards accounting software, but like its customer accounting and billing functions, local and regional MIS and programming had, in essence, created several different versions of the software. This created difficulties with consolidated accounting and multi-jurisdictional acquisition integrations. AWW determined that there were economies of scale savings, and operational efficiencies to be derived from

providing transactional accounting functions on a national level and decided to move these functions to a Shared Services Center. Prior to this transition, the accounting, budgets, and finance functions were being performed by the Tennessee-American employees and the Region Service Companies in Marlton, NJ, and Charleston, WV.

42. Q. HOW WILL THESE AREAS FUNCTION GOING FORWARD?

A. Transactional accounting (general accounting, payroll, AP, inventory, purchasing, AR, etc.), and actual historical information for budgets and rate cases will be provided by the Shared Services Center utilizing a uniform JD Edwards software platform. Review and approval of the financial statements, rate case adjustments and budget forecasting, and Board Meeting information and presentations will be the responsibility of the Vice-President and Treasurer/Comptroller and a minimal staff located at the Southeast Service Company office, and two employees at Tennessee-American

43. Q. DOES THE CASE AS FILED INCLUDE THE COST PROJECTIONS FOR THE SHARED SERVICES CENTER, AND ADJUSTMENTS TO THE ATTRITION YEAR EXPENSES?

A. Yes. Attached to this testimony is Exhibit MAM-4 that indicates

the annual impact of the transition to the Shared Service Center.

44. Q. WOULD YOU PLEASE DESCRIBE THE INFORMATION CONTAINED IN EXHIBIT MAM-4?

A. This exhibit indicates a reduction in expenses of $636,303 comprised of the elimination of 4 employees, and the Marlton, NJ, Regional Service Company charges for accounting. The exhibit also indicates the forecasted expenses from the Shared Services Center of $338,526, and the accounting cost from the Southeast Region of $111,349. This calculation produces an annual savings of $150,470.

45. Q. YOU ALSO INCLUDE TRANSITION COSTS FOR THE MOVE TO THE SHARED SERVICES CENTER. PLEASE DESCRIBE WHAT MAKES UP THESE COSTS AND THE RATE TREATMENT THE COMPANY IS REQUESTING IN THIS CASE?

A. There are costs required to make the transition go smoothly. The Company's allocated portion of these one-time costs is $359,480. These costs are made up of severance costs, moving costs for those associates electing to move to the Shared Services Center, consulting costs to set-up the processes and training, and in-house costs charged to set-up and training.

The Company is requesting that the Commission recognize the $359,480 as a necessary cost of making the transition and afford regulatory asset status for these costs. The Company is requesting that these costs be amortized over a ten-year period starting when the new rates become effective, with the unamortized amounts included in rate base.

46. Q. WHY SHOULD THE COMMISSION APPROVE THE RATE MAKING TREATMENT REQUESTED FOR THE SHARED SERVICE CENTER?

A. The transition to the Shared Service Center provides increased functionality and economies of scale of the accounting functions of the Company. Moving the accounting software to a uniform platform will save the Company money on future software migrations, rate case and budget preparation, and acquisition integrations. The Company will receive these benefits at a reduced cost to the ratepayers.

47. Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes.

TENNESSEE REGULATORY AUTHORITY

STATE OF TENNESSEE

COUNTY OF HAMILTON

BEFORE ME, the undersigned authority, duly commissioned and qualified in and for the State and County aforesaid, personally came and appeared Michael A. Miller who, being by me first duly sworn deposed and said that:

He is appearing as a witness on behalf of Tennessee-American Water Company before the Tennessee Regulatory Authority, and if present before the Authority and duly sworn, his testimony would set forth in the annexed transcript consisting of twenty-nine pages.

Michael A. Miller

Sworn to and subscribed before me
this 3rd day of February 2003.

Virginia L. Scealf
Notary Public

My commission expires April 7, 2004.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: TAXES OTHER THAN INCOME

57. Provide a schedule of all Ad Valorem property tax bills by jurisdiction by tax year of 2006 and 2007.

Response:

See attached schedule. Due to the 4-4-5 accounting calendar in 2005, Catoosa County, City of Rossville, Walker County, and Lookout Mountain have two payments in 2006, at which time the Company converted back to the fiscal year-end accounting close. The Company's 2006 accounting year started on December 10, 2005 and ended on December 31, 2006.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: INCOME TAXES

58. Reconcile the income tax amounts of TN-TRA-Q013-INCOME TAXES, on pages 9-10 of 20 to the income tax amounts on the Company's Exhibit No. 2, Schedule 6, page 2 of 2 for the test year ended November 30, 2007.

Response:

See attached Updated Exhibit No. 2 Schedule 6, Page 2 of 2. Lines 83, 85 and 87 have been added to Exhibit No. 2 to reflect the actual calculation of federal and state income tax shown on Line 83. Line 85 is the income taxes per books. The reason for the variance of $68,778 for Federal Income Taxes shown on Line 87 is because the month of November 2007 Schedule M items are estimated in order for the Company to close its books each month on a timely basis. A true-up to actual occurs the following month. The State Income Taxes are developed each month as are the Federal Income Taxes.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: INCOME TAXES

59. Provide the basis and supporting documentation for the AMT amount of $958,182 included in TN-TRA-Q013-INCOME TAXES, on page 10 of 20.

Response:

AMT Calculation:

Annualized Taxable Income at November 30, 2007	4,053,500
Adjustments and Preferences	
Accel. Deprec Post 86 Property	*1,040,831
Basis Adjustment	*160,312
Annualized Alternative Minimum Taxable Income	5,254,643
Ace Preference	(28,200)
Annualized Alternative Minimum Taxable Income	5,226,443
Alternative Minimum Tax Rate	20%
Alternative Minimum Tax Before Allocation	1,045,289
Allocated Alternative Minimum Tax	373,975
AMT Before Allocation Eleven Mo Ending 11/30/07	958,182
Allocated AMT Eleven Mo Ending 11/30/07	342,810

*Amounts from 2006 separate company tax return Form 4626, line 2a and 2e.

The AMT amount was included in current FIT by error. There was an offsetting adjustment to deferred FIT that washed this out for total Federal Tax expense. The Company discovered this error while preparing the case and eliminated the AMT amounts from both the current and deferred FIT provisions for the historical

test-year. This correction also avoided this error from being carried into the attrition year FIT calculations.

TENNESSEE AMERICAN WATER COMPANY

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: INCOME TAXES

60. Provide a detailed reconciliation of the effective tax rate for the attrition year at present rates to the federal statutory tax rate of 35%.

Response:

Pretax Income	3,610,924
Total Temporary Differences	(499,595)
Taxable Income	3,111,329
Total Federal Income Tax-per Exhibit 2 Sch 6 pg 2	1,497,910
Effective Tax Rate 1,497,910/3,111329	48.14%
Total Federal Income Tax	1,497,910
Amortization of ITC	76,368
Federal benefit on state tax:	
State Def Tax Expense 375,565 x 35%	131,447
Def FIT on Additional Temporary Differences	
(Def FIT additional forecasted UPIS)	146,915
FAS 109 Amortizations-per books	(589,020)
Fed Income Taxes on Pre Tax Income	1,263,620
ETR 1,263,620/3,610,924	34.99%
Actual calculated tax 3,610,924 x 35%	1,263,823
Variance	(203)

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: INCOME TAXES

61. Provide the detailed calculations of the Deferred Federal Income Tax amount and the Deferred State Income Tax amount for the attrition year at present rates as shown on the Company's Exhibit No.2, Schedule 6, page 2 of 2. Include in your response any allocated Deferred Federal Income Tax included in the company's exhibits and the basis for the allocated amounts.

Response:

The Deferred Federal adjustment for the attrition year is included in the working papers TN-TRA-01-Q013-INCOME TAXES, Page 15 of 20. The adjustment shown on the above referenced work papers determined the additional deferred FIT related to the attrition year plant additions (tax depreciation less book depreciation X 35%). The adjustment was then added to the normalized test-year deferred income tax expense of $409,148 as shown on Exhibit 2, Schedule 6, page 2 of 2. The Deferred State Income Tax for the attrition year is the same as the historical test-year per books adjusted for any prior year adjustments. The deferred SIT is also shown on Exhibit 2, Schedule 6, page 2 of 2.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller/Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

62. Provide the information for Plant in Service and Accumulated Depreciation by JDE account in the following format as of July 2002, March 2004, June 30, 2006:

(1)	(2)	(3)	(4)	(5)	(6)
JDE Acct #	**Account Description**	**Plant in Service Balance**	**Acc. Deprec. Balance**	**Current Deprec. Rate**	**Net Book Value**

The response should incorporate the format and subsidiary accounts of the Company's Accounting Exhibit No. 2, Schedule 4.

Response:

The Company objects to this request on the grounds that it is over broad, unduly burdensome and seeks information that is not readily available to the Company in the requested format. Furthermore, the Company objects to this request to the extent that it seeks information that is not relevant to this proceeding. The Company also objects to this request on the grounds that it calls upon the Company to create or otherwise organize data regarding time periods outside of the Company's historical test year.

Subject to and without waiving its objections, TAWC provides the following response. The requested information relates to the attrition years in the last three Company rate cases and is not relevant to this proceeding.

Please see the response the Company previously provided to request TN-CAPD-01-Part II-Q20, which provides the accumulated depreciation by plant account from the TRA Annual Report for the last 10 years. Also, please refer to the response previous supplied by the Company to request TN-TRA-01-Q13-rate base back-up, pages 47 -52 of 52. This information provides the utility plant balances and accumulated depreciation balances at the end of the historical test-year and monthly through August 2009, the end of the attrition year in this case. In past TAWC rate cases, the Company had filed its rate base components as of the mid-point of the attrition year. In case number 06-00290, the CAPD proposed a thirteen month average of rate base for the attrition year. Director Miller's motion in case number 06-00290 indicates that the CAPD's thirteen month average rate base approach was accepted, and that motion was approved by the TRA. The Company filed this case consistent with the thirteen month average attrition year rate base approved by the TRA in case number 06-00290. Also, see the attached schedules, which are the depreciation calculations filed in the Company's past three rate cases and apply to the three periods requested by the CAPD.

Attrition Year Provision for Depreciation Expense
For Utility Plant in Service

CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller/Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

63. Provide the Plant in Service and Accumulated Depreciation by JDE account in the following format as of November 2007, December 2007, January 2008, February 2008, and March 2008:

(1) JDE Acct #	(2) Account Description	(3) Plant in Service Balance	(4) Acc. Deprec. Balance	(5) Current Deprec. Rate	(6) Net Book Value

The response should incorporate the format and subsidiary accounts of the Company's Accounting Exhibit No. 2, Schedule 4.

Response:

The Company objects to this request on the grounds that it is unduly burdensome, in particular, because the information requested is not readily available to the Company in the requested format and would be extremely costly to gather and produce. Furthermore, the Company objects to this request on the grounds that it calls upon the Company to create or otherwise organize data regarding time periods outside of the Company's historical test year, seeks to have the Company create work product and seeks information that is not relevant to this rate case. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits and workpapers fully supporting its case based on a test year ending November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing. This request seeks the compilation of data in a format not readily available to the Company for each of the four months past the end of the historical test-year. It is burdensome and fundamentally unfair to require the Company to respond to a data request that, in essence, requires the Company to completely redo the data collection and analysis required to file its petition based on a test year, or multiple test years, proposed by an Intervener, particularly when that test year includes dates after the petition was filed. The re-creation of every aspect of its case for multiple historical test years is not required by TRA rules and is not necessary for the CAPD to assess the Company's petition.

Subject to and without waiving its objections, the Company provides the following response. The Company only compiles the accumulated deprecation by JDE account in reports specific to rate case filings, the periods for which the CAPD requests this information is not readily available to TAWC and can not be produced without considerable time and cost to TAWC. In addition, the information for December 2007 will be provided in the response to TN-CAPD-01-part IV-Q71. The attrition year calculations for the requested information can be found in the response to TN-TRA-01-Q013-Rate Base Back-Up, pages 47-52 of 52. The information for total utility plant and accumulated depreciation for December 2007 and January through March 2008 can be found in the monthly reports filed with the TRA (report PSC-3.06).

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

64. Provide the forecasted and/or actual, plant additions, plant retirements, salvage, costs of removal by JDE account, by month from January 2007 through August 2009.

Response:

The Company objects to this request on the grounds that it is unduly burdensome and is not readily available in the requested format. Subject to and without waiving these objections, please see the following response.

The actual plant additions and retirements for January 2007 through December 2007 are included in the response to TN-TRA-01-Q051. The forecasted plant additions and retirements are included in the working papers filed in response to TN-TRA-01-Q013 and referenced as TN-TRA-01-Q013-RATE BASE BACKUP, Pages 31 to 45 of 52. Please refer to the response previously supplied to TN-CAPD-01-Part II-Q34-Attachment. The recap of cost of removal is supplied. Also, please refer to pages 79 and 80 of 80, which provide the cost of removal by JDE account for 2007. The only cost of removal net of salvage included in the Company's filing for the period December 2007-August 2008 is the NNS amount included in the current depreciation rates. For the attrition year the only cost of removal net of salvage included in the Company's filing is the NNS amount included in the revised depreciation rates proposed by Mr. Spanos. The result of the impact of NNS included in the depreciation rates credits accumulated

depreciation for the attrition year thereby reducing rate base. The Company did not adjust accumulated depreciation for the impact of actual cost of removal net of salvage for the period December 2007 through August 2009. Because cost of removal has historically exceeded salvage by a large amount and because that trend is expected to continue through the attrition year as plant is retired with extremely low original cost, the Company has understated its rate base for the attrition year in this case.

Responsible Witness: John Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

65. Provide a summary of "TDOT Reimbursable Projects" from November 2006 through August 2009 detailing the total cost of each project, the reimbursable cost by the TDOT by project, amount reimbursed by JDE account and reimbursement amounts due, and the net amount due by the ratepayers. See J. Watson's direct testimony, pages 10-11.

Response:

The TDOT reimbursements below were all embedded as credits to the contributions-mains, account 271 in arriving at the attrition year rate base.

TDOT Reimbursable Projects

Name	Total Cost	Reimbursable Cost	Amount Reimbursed
Cummings Highway	$826,967	$826,967	$0
Lee Highway	$407,091	$407,091	$0
E Brainerd Road	$1,627,000	$1,627,000	$0
St. Elmo Avenue	$25,000	$25,000	$0

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

66. The Direct Testimony of John Watson at page 13, lines 15-19, states in pertinent part that "The Company has excluded the rate base assets associated directly with service to the Walden's Ridge Utility District." Provide the Plant in Service and Accumulated Depreciation rate base amounts by subsidiary JDE account as of March 31, 2008 that are directly attributable to providing water services to Walden's Ridge.

Response:

The Company objects to this question on the grounds that it is not relevant to this proceeding. Attached is a schedule of the Walden's Ridge plant in service and accumulated depreciation by JDE account as of November 30, 2007. This amount was eliminated from the rate filing and is not part of the rate base requested by the Company for the attrition year in this case.

DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

69. Reconcile the net additions of TN-TRA-Q013-RATE BASE BACK-UP, on page 40 of 52 for December 2007 by JDE Account to the net additions on page 31 of 52 for December 2007 by JDE Account. Provide a detailed written explanation in your reconciliation.

Response:

The net additions detailed on pages 31 of 52 in the working papers TN-TRA-Q013-RATE BASE BACK-UP was the original file that contained an estimated amount of net additions for December 2007. The net additions detailed on page 40 of 52 in working papers TN-TRA-Q013-RATE BASE BACK-UP are the actual December 2007 net additions. In preparing the rate base for this filing, the Company used the actual December 2007 net additions due to the large amount of retirements recorded in that month. The difference between the estimated net additions and actual net additions for December was $27,005.90. Therefore, these pages will not coincide by account.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/John Spanos

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

70. Provide the basis for continuing depreciation expense in the Company's attrition year forecast on JDE Account 339200, JDE Account 340210, JDE Account 340310, JDE Account 340320, JDE Account 340330, and JDE Account 342000 when the net book value is zero and there are no forecasted plant additions to the account during the attrition year.

Response:

In Mr. Spanos' depreciation study, he combined the 340200 (computer equipment) series accounts into one depreciation rate determination, and the 340300 (software) series accounts into one depreciation rate determination. The Company applied Mr. Spanos's depreciation rates per his study for his account series 340200 and 340300 depreciation rates to the decimalization of those accounts that appear on the Company's books.

By combining the 340200 and 340300 series accounts into one depreciation rate Mr. Spanos' has taken into account any depreciation reserve adjustments and service life adjustments required for those accounts. This in fact resulted in a reduction in depreciation rates for the 340200 and 340300 series accounts from the current depreciation rate of 15.90% to depreciation rates in series 340200 accounts of 2.19% and the series 340300 accounts of 1.83%. The changes in computer equipment and software depreciation rates proposed by Mr. Spanos in

this case are a primary driver of the lower depreciation expense requested in this case.

If the Company would have combined the various decimalizations of the 340200 and 340300 accounts as Mr. Spanos did, its calculation of depreciation expense for the attrition year would have resulted in the exact same depreciation expense as the Company has included in its attrition year filing. The Company used a 0.00% depreciation rate for its attrition year depreciation expense for accounts 339200 and 342000 which is in compliance with Mr. Spanos' recommendations.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller/Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

71. Reconcile the Accumulated Depreciation balances by JDE Account of TN-TRA-Q013-RATE BASE BACK-UP, on pages 47-48 of 52 for December 2007 with the Alloc. Book Reserve amounts in the Company's Depreciation Study, Pages III-144 through III-198. Include in your response a detailed explanation for each reconciliation amount.

Response:

The Company objects to this request on the grounds that it is over broad and unduly burdensome and that the information is not readily available in the format that is requested. Subject to and without waiving these objections, Mr. Spanos' 2007 balances reflect the numbers through the historical test-year ended November 2007. The balances referenced to the Company's filing are for the year ended December 2007. The differences between the balances relates to December 2007 activity related to December depreciation expense, retirements, cost of removal and salvage. See the attached reconciliation.

The total variance of $187,011 in the column labeled 'Variance Rate Base to 12.31.07 Reserve Balance" is the Walden's Ridge amounts that were eliminated from the rate filing. The Depreciation Study balances were updated with the December 2007 reserve activity in the column labeled 'Depr Study plus 12.31.07 Reserve'. The last column depicts the variances with the rate base schedule referenced above, TN-TRA-Q013-RATE BASE BACK-UP, on pages 47-48 of 52

and the updated Depreciation Study amounts. Variances are due to multiple accounts being rolled into one in the Depreciation Study (i.e. mains, computer equipment, computer software), or due to the elimination of Walden's Ridge accumulated depreciation from the rate base in the Company's filing. The overall difference is $1,213, account 339500, which was not included in the Depreciation Study, but has a beginning reserve balance.

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John Watson/Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

72. Provide all cost documentation supporting the Citico Water Treatment Improvements for 2008 and 2009 by month. Include a detailed narrative of the Phase II construction start date, completion date, contractor name, and contract documents with supporting documentation.

Response:

Below are the cash flow projections for both the Phase I and Phase II projects related to the Citico Treatment Plant Improvement Projects. In the Company's attrition year, the Company included $1,850,000 of plant for Phase I of the project. Please refer to the Company's response to TN-TRA-01-Q13-Rate Case Back-up, Page 37 of 52, which shows the additions for Phase I. Phase I of the project is currently under construction. The plant additions of $1.850 million for Phase I work included in the attrition year relates to work on settling basins, which will be in service prior to the end of the attrition year.

In addition, the Company included in the attrition year an additional $7,837,500 of CWIP as of August 2009 related to Phase I. The attrition year also includes an additional $300,000 for CWIP for Phase II. There was a corresponding reduction to O&M expense related to AFUDC on CWIP included in the rate base.

No engineering work has begun for Phase II work. Therefore, at this time, no construction start date, completion date, contractor name, and contract documents has been developed for this work.

Please see the Company's response to TN-TRA-01-Q53 for details concerning the Citico Plant Improvement Project.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

73. Provide all work papers and documentation to calculate a 13 month average for CWIP for the attrition year i.e. end of month CWIP balances for the months July 2008 through August 2009.

Response:

Attached is the calculation of the 13 month average CWIP for the attrition year. Please see the capital spending plan (budget) attached to the response to TN-TRA-01-Q018-attachment, page 4 of 12 and 8 of 12, which are the basis for the capital spending column and the contribution/advances column. The Plant additions were taken from TN-TRA-01-Q013-Rate Base Back-up, pages 31-38 of 52.

Please note that the Company had included a CWIP 13-month average balance for the attrition year of $9,083,000. The Company recognizes that it made an error in this calculation in the Company's rate base request.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

75. Provide the basis for all allocated Accumulated Deferred Tax liabilities and assets to TAWC at March 31, 2008 and for the attrition year ended August 31, 2009.

Response:

The Company objects to this question related to the information at March 31, 2008 on the grounds that it is unduly burdensome. The information is not readily available to the Company without extremely time-consuming and costly efforts to create that data. In addition, the requested information as of March 31, 2008 is not relevant to the TRA's processing of this rate case regarding the use of an appropriate historical test-year adjusted for known and measurable or reasonable adjustments in arriving at the attrition year for this case. The otherwise requested information for the historical test-year and adjustments used in arriving at the attrition year level requested in this case can be found in the Company's workpapers filed in response to TN-TRA-01-Q013-Income Taxes, page 14-20 of 20.

Responsible Witness: John Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

76. The Direct Testimony of John Watson at page 14 indicates that certain capital projects are needed to meet current water quality regulations and address future water quality regulations of the Tennessee Department of Environment and Conservation and the United States Environment Protection Agency. Please identify each capital project for 2008-2009 that is needed to meet such current and future regulations, including but not confined to, a description of the capital project, a description of the plant additions or improvements involved, identification of the particular current of future Tennessee or federal regulation associated with the project, and the amount of capital expenditure by JDE account number.

Response:

At Citico Station, the installation of jet mixers in the Raw Water Control Building for rapid mixing, the replacement of flocculators in Basins No. 1 and No. 2, and the replacement of Basin No. 3 with flocculation, plate settlers, and continuous sludge removal equipment in Basin 3a and 3b, and supporting electrical improvements are needed for continued compliance with filtered water turbidity regulations identified in the TENNESSEE DEPARTMENT OF ENVIRONMENT AND CONSERVATION BUREAU OF ENVIRONMENT DIVISION OF WATER SUPPLY CHAPTER 1200-5-1-.31 Filtration and Disinfection. The USEPA Rule involved is the Interim Enhanced Surface Water Treatment Rule (IEWTR). The estimated value for the above work is $13,190,094.

The installation of a liquid chemical unloading facility at Citico Water Treatment Station that provides secondary containment of the unloading process is needed for compliance with TENNESSEE DEPARTMENT OF ENVIRONMENT AND CONSERVATION requirements as identified by the Sanitary Survey Manual for Community and Non-Community Non-Transit Water Supplies and Tennessee Department of Environment and Conservation Rule 1200-5-1, .17(3), (17) and (19). The estimated value for the above work is $190,124.

The installation of chlorination improvements at Citico Station allow for delayed application of chlorine prior to filtration for Basins No. 1, No. 2 and No. 3. This improvement is a method to reduce disinfection byproducts in the plant effluent and in the distribution system, and will be used to comply with the Stage 2 Disinfection Byproduct Rule as identified in TENNESSEE DEPARTMENT OF ENVIRONMENT AND CONSERVATION BUREAU OF ENVIRONMENT DIVISION OF WATER SUPPLY CHAPTER 1200-5-1-.38 Stage 2 Disinfection Byproducts Requirement (LRAA). The USEPA equivalent regulation is the Stage 2 Disinfection/Disinfection By-Product Rule. The estimated value for the above work is $79,131.

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

78. The Direct Testimony of John Watson at page 11, lines 23-27 and page 12, lines 1-14, lists five major capital investment projects completed during 2007. State the capital expenditure for each project and a breakdown of each projects' capital expenditures by month by JDE account number.

Response:

Please see the attached schedule. Please see the response to TN-CAPD-01-Part IV-Q77 for the recap of total 2007 meter and main replacement capital expenditures.

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

79. Four of the five major capital investment projects completed during 2007 as identified in the Direct Testimony of John Watson at pages 11-12 involve water mains (projects nos. 2-5) and one of the capital expenditures listed in the Direct Testimony of John Watson at pages 12-13 during 2007 involves the replacement of 27,200 feet of water mains (project no. 6) at an amount of $2.529 million. Does the $2.529 million in capital expenditures for water mains include any expenditures for any portion of the major capital investment projects completed during 2007 involving water mains? If so, please identify the amount of capital expenditure and the capital project involved.

Response:

At the top of page 12 of Mr. Watson's testimony, item 2, he generically describes the main, meter, services and equipment replacement programs. On pages 12-13, items 1 and 6, Mr. Watson quantifies the capital spending for the meter and main replacement programs generically described in item 2 at the top of page 12. In items 3-5 at the top of page 12, Mr. Watson lists three major main replacement projects that are not duplicative of the main replacement capital spending quantified on page 13, item 6.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John S. Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

80. The Direct Testimony of John Watson at pages 4-5 states: "Capital expenditures of the Company are planned and scrutinized to assure that needed facilities are identified, that facilities are scheduled for construction....The primary planning vehicle of this Company in this area is our least/cost comprehensive planning study." Please produce all documents, including but not confined to, capital budgets, analyses, and planning studies associated with the $21.687 million in major capital investment projects planned for 2008-2009 discussed in the Direct Testimony of John Watson at pages 13-14.

Response:

The response was previously provided in answer to TN-TRA-01-Q052 and TN-TRA-01-Q053. The 2000 Comprehensive Planning Study was provided in response to TN-COC-01-Q10 in a prior case (docket number 06-00290).

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John S. Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: RATE BASE

81. The Direct Testimony of John Watson at page 22, lines 19-24 states: "A review has been made by the Company regarding the meters and pumping units that it has in service at its' [sic] pumping stations. As a result of that review, the Company has determined that it needs to increase the expense for the programmed preventative maintenance on these pumps and motors if it is to maintain them properly." Please provide all documents related to this review.

Response:

Attached is a listing of the maintenance activities, pumping units and locations, as well as the preventative maintenance activities and testing the Company is performing to determine the necessary monitoring and maintenance repairs for its pump and motors.

Maintenance Services

(Types of Services Provided)

- Reliability & Conditioned Based Maintenance
- Equipment and Control System Repair
- SCADA System Integration
- Design Review, Inspection & Commissioning
- Technical Training & Development

Maintenance Service Function

Statement of Purpose

The Maintenance Service function is responsible for providing and promoting mechanical, electrical, instrumentation, and process control maintenance employed in a strategy of predictive (conditioned based), preventive (time based), and corrective (repair) maintenance in a combination that yields optimum equipment/process reliability and maximum economic performance, thereby contributing to the company's goal of providing our customers the highest quality water & service at excellent value.

Goals & Objectives

- Direct or perform preventive/predictive/conditioned based maintenance on electrical, mechanical or instrumentation equipment as set forth by industrial standards and the policies and procedures .

- Direct or perform repair maintenance on electrical, mechanical or instrumentation equipment or systems as required in order to maintain the integrity of the water purification and delivery systems.

- Participate in the design, programming, installation and start up of selected distributed process control (SCADA) systems.

- Assist in construction projects: may include planning, reviewing, inspection, installation, start up and information gathering as required.

- Participate in the technical training & development of self and others.

- Stimulate, support and strengthen collaboration and interpersonal communications.

Maintenance Services

- **Multi-skilled technical maintenance group shared by operations:**
- **Types of services provided:**

➢**Reliability & Conditioned Based Maintenance**

Periodic health based diagnostic assessments (e.g.thermography, vibraton, ultrasound, etc.)
Goals: Prevent functional failure where the consequences of failure are severe
Prioritize maintenance efforts based on the consequences of functional failure

➢**Equipment and Control System Repair**

Direct, perform, or assist in repairs

➢**SCADA System Integration**

Perform all SCADA system programming and start-up
May install SCADA equipment or systems

➢**Design Review, Inspection & Commissioning/start-up**

Review all project specifications and drawings (that includes electrical and instrumentation)
Provide inspection and start–up services of electrical and instrumentation equipment
May include some installation of equipment (e.g. chemical analyzer, motor starter, etc.)

➢**Technical Training & Development**

Coordinate and/or provide technical maintenance training (e.g. pump, electrical, and instrumentation maintenance, maintenance management, etc.)

rjd 3/2003

MAINTENANCE PROGRAMS
PREDICTIVE/PREVENTIVE
Conditioned Based Maintenance Programs

- Instrument calibration
- Thermographic (infrared) inspections
- Ultrasonic leak detection
- Vibration analysis
- Motor testing and inspection
- Wire-to-water efficiencies
- Motor starter and switchgear inspections
- Protective relay testing
- Transformer inspection
- Insulating oil testing
- Lubricating oil testing
- Stationary battery testing
- Precision alignment
- Earth ground testing – as required
- Power and harmonic surveys – as required

CENTRIFUGAL PUMPS AND DRIVES - INSPECTION, MAINTENANCE AND EFFICIENCY TESTING

Pumps are the largest power consumers in water treatment plants and pump stations and need to be monitored and properly maintained to ensure their efficiency and reliability. The life and satisfactory service of any mechanical equipment are enhanced and extended by periodic inspection and maintenance. The scope of programs extends from the daily looking, listening and feeling to a complete teardown and rebuilding of the unit.

The following tasks will normally be accomplished by the Water Company plant operators or plant maintenance personnel:

1. Daily or weekly monitoring and recordkeeping
2. Normal lubrication and cleaning
3. Periodic efficiency testing
4. Packing stuffing boxes
5. Pump exercising
6. Inspection of coupling guards

Operating and inspection history, running time, loss of efficiency, vibration etc., are to be utilized when determining the frequency of the pump inspections and the extent and timing of associated maintenance (the attached Trouble Check List and Pump Inspection Report will assist in making this determination).

Major inspections outlined at the end of this report will be made by trained and/or qualified Company personnel or a prequalified outside pump inspection and repair contractor. Pump repairs will be initiated by actual machine condition as determined by the inspections. Before disassembling the pump, it should be determined whether suction or discharge conditions are the cause of any problems.

Weekly Monitoring

The Water Company will be equipped with accurate portable vibration analysis equipment and electrical equipment necessary to measure power factor (PF), amps, volts, calibrated flow and pressure measurement equipment.

Weekly monitoring will include listening for unusual noises, checking the pump and motor for hot bearings or excessive vibration, inspecting stuffing boxes for excessive or inadequate leakage, and verification of operation of fresh water lubrication systems. A check of pressure, flow, input power (volts and amps), and power factor will be made to determine that the pump is operating normally where facilities and equipment permit. If pump operation is critical to the overall operation of the system, then consideration is to be given to carrying out daily monitoring. In case of smaller pumps, where the capital cost of the pumps does not justify the additional cost of conducting the weekly monitoring, the water company will establish the appropriate monitoring requirement. If problems or abnormalities are observed, the employee monitoring the pump(s) will notify the supervisor. The Water Company will maintain adequate records of the weekly inspections.

Several vibration analyzers can be used to monitor vibration in mils displacement or in velocity such as in/sec. Recommended vibration limits for different types of pumps, as recommended by the Hydraulic Institute, are attached.

Lubrication and Cleaning

There are three basic types of bearing lubrication - water, oil, or grease. On vertical pumps, water is usually used to lubricate the submerged bearings, and oil or grease lubricates the motor bearings. In rare cases, oil may be used to lubricate the column bearings on vertical pumps, but this is not recommended. Oil lubrication systems must be monitored closely or if possible replaced by fresh water lubrication.

Bearing lubricants and frequency of application usually are recommended by the pump manufacturer. If the recommendation is not included with the instruction book, then the manufacturer will be contacted for a specific recommendation.

A maintenance record will be prepared for each pumping unit, will include type of lubricant to be used and will be made available to all personnel responsible for operation of the equipment.

Oil levels will be checked at least weekly unless the pump is critical to the operation or experience dictates otherwise. Oil levels will be maintained within the recommended operating range. Oil will be changed and bearings cleaned at operating periods recommended by the pump manufacturer unless operating experience indicates otherwise.

Grease bearings will be checked for heating, and will be regreased, as recommended by the manufacturer. When regreasing or adding grease to a bearing, the drain plug will be opened and grease added until new grease starts to flow through the opening. The machine will be allowed to operate at least 20 minutes before replacing the drain plug so that excess lubricant can escape. Bearing operating complaints are best handled by the maintenance personnel or a manufacturer's representative.

Some flexible couplings will require lubrication. These will be lubricated in accordance with the manufacturer's instructions.

Pumps, motors, and the areas around them need to be properly maintained. In particular, any oil or grease on the floor may be an indication of a maintenance problem and must be cleaned up immediately to prevent slipping or falling into the equipment. Prompt follow-up to determine the cause of leakage or spillage will then be performed.

If enclosed tubing is used for a vertical turbine pump, weekly inspection of the water lubrication system will be conducted. Availability and/or operation of the water lubrication system during power failure is also very important and will be evaluated. If pump operation is critical, automatic shut down of the pump upon lubrication loss is recommended. Ambient temperatures within pump rooms and booster stations should be regulated. High temperatures can lead to rapid insulation breakdown. Airflow through motors should be checked. Periodic cleaning of air inlet and outlet screens is necessary to insure proper cooling.

Periodic Efficiency Tests

Wire to water efficiency will be checked at periods not to exceed one (1) year. Pumps performance testing will include bowl, pump, and wire to water efficiencies for a minimum of three (3) performance points on the pump curve with at least two points located to the left of the Best Efficiency Point (BEP) and/or certified design point. A verification of the power factor input power (volts and amps) will be conducted with any performance or efficiency test. Accurate measurement of power input factors (volts, amps, and power factor) is needed to ensure that pump drives are not being overloaded or operated within the service factor range. More frequent checks will be performed where considered necessary. Reviewing previous readings will indicate if the efficiency of a unit is dropping and maintenance is required.

The attached form, Wire to Water Efficiency Calculation, is self-explanatory. A periodic pump and power survey (form also attached) will permit an overview of pumping operations and assist in ensuring operation of a plant at maximum efficiency. Pump testing on vertical turbine pumps will also include the verification of the impeller lift setting to determine if any changes from the previous test have occurred. Changes in impeller lift settings are indications of premature wear on the impeller or wear rings which increase the hydraulic losses in the bowl, thus reducing the pump performance and efficiency.

Packing Stuffing Boxes

Each pump manufacturer lists in his instruction book a method of packing or repacking stuffing boxes. Procedures may vary, but they usually are similar. Stuffing boxes will be repacked when excessive leakage cannot be controlled by regulating and reasonably tightening the packing glands or when the packing has hardened from a lack of moisture, caused by a pump sitting idle for too long. A small amount of leakage is necessary for seal lubrication.

The attached method for packing a pump is for reference only and the method recommended by the manufacturer must be used to prevent voiding a warranty.

Pump Exercising

Pumps and their prime movers are to be exercised on a regular basis to ensure correct operation on demand. They will be operated under load for thirty (30) minutes at least once every two (2) months which will ensure that normal operating temperatures, particularly those for internal combustion engines, are attained. All associated valves required to operate the pump normally will also be operated. Factors which may affect exercising of pumps include water demand patterns, electric power utility rate schedules, and whether off line due to seasonal use. Periods of operation will be selected to minimize the effects of these factors. For example, it may be necessary to run a pump for three (3) separate ten (10) minute periods suitably spaced to avoid increased electricity maximum demand charges and unfavorable impact on the electric motor and its control equipment. Consideration should be given to combining pump exercising with exercising of emergency/stand-by electrical generators. The impact on the distribution system e.g. increased pressure, surges, water hammer, etc. is also to be considered. Consideration should be given to monthly rotation of pumps which are not operated on a regular basis.

Coupling Guards

The security and adequacy of coupling guards is to be checked weekly.

PACKING A PUMP

The importance of packing the pump correctly cannot be overemphasized. Many packing failures are due to incorrect installation of the packing. The following steps have been devised to ensure effective installation of approved and correct type of packings on pumps:

A. REMOVE ALL THE OLD PACKING FROM THE STUFFING BOX.

Clean box and shaft thoroughly and examine shaft or sleeve for wear or scoring. Replace shaft or sleeve if wear is excessive. Metallizing sleeves with a hard chrome surface is also acceptable.

B. USE THE CORRECT CROSS-SECTION OF PACKING OR DIE-FORMED RINGS

To determine the correct packing size, measure the diameter of the shaft (inside the stuffing box area if possible) and then measure the diameter of the stuffing box (to give the O.D. of the ring). Subtract the I.D. measurement from the O.D. measurement and divide by two. The result is the required size.

C. WHEN USING COIL OR SPIRAL PACKING, ALWAYS CUT THE PACKING INTO SEPARATE RINGS. INSTALL SO THAT ENDS OF ADJACENT RINGS DO NOT LINE UP.

Never wind a coil of packing into a stuffing box. Rings can be cut with butt (square), bias or diagonal joints, depending on the method used for cutting. The best way to cut packing rings is to cut them on a mandrel with the same diameter as the shaft in the stuffing box area. If there is no shaft wear, rings can be cut on the shaft outside the stuffing box.

Hold the packing tightly on the mandrel, but do not stretch excessively. Cut the ring and insert it into the stuffing box, making certain it fits the packing space properly. Each additional ring can be cut in the same manner, or the first ring can be used as a master from which the balance of the rings are cut.

If the butt cut rings are cut on a flat surface, be certain that the side of the master rings, and not the O.D. or I.D. surface, is laid on the rings to be cut. This is necessary so that the end of the rings can be reproduced.

When cutting diagonal joints, use a maple mitre board so that each successive ring can be cut at the correct angle.

It is necessary that the rings be cut to the correct size. Otherwise, service life is reduced. This is where die-cut rings are of great advantage, as they give you the exact size ring for the O.D. of the shaft and the I.D. of the stuffing box. There is no waste due to incorrectly cut rings.

D. INSTALL ONE RING AT A TIME.

Make sure it is clean, and has not picked up any dirt in handling. If desired, lubricate the shaft and the inside of the stuffing box.

Seat rings firmly (except PTFE filament and graphite yarn packings, which should be snugged up very gently, then tightened gradually after the pump is in service). Joints of successive rings should be staggered and kept at least 90 degrees apart. Each individual ring should be firmly seated with a tamping tool. When enough rings have been individually seated so that the nose of the gland will reach them, individual tamping should be supplemented by the gland.

E. AFTER THE LAST RING IS INSTALLED

Take up bolts finger tight or very slightly snugged up. Do not jam the packing into place by excessive gland loading. Start pump, and take up bolts until leakage is decreased to a tolerable minimum. Make sure gland bolts are taken up evenly. STOPPING LEAKAGE ENTIRELY AT THIS POINT WILL CAUSE THE PACKING TO BURN UP.

F. ALLOW PACKING TO LEAK FREELY WHEN STARTING UP A NEWLY PACKED PUMP

Excessive leakage during the first hour of operation will result in a better packing job over a longer period of time. Take up gradually on the gland as the packing seats, until leakage is reduced to a tolerable level. In the absence of specific manufacturer's instructions, generally acceptable leakage would be 1 - 2 drops per second.

G. WHEN SPECIFIED BY THE PUMP MANUFACTURER, PROVIDE MEANS OF LUBRICATING THE SHAFT AND PACKING THROUGH THE LANTERN RING BY SUPPLYING WATER, OIL GREASE OR LIQUID HANDLED IN THE PUMP.

Fittings for this purpose are standard on many pumps.

H. IF THE STUFFING BOX HAS A LANTERN RING

Make sure that the lantern ring is slightly behind the fluid inlet so that it will move under the inlet as follower pressure is applied.

I. REPLACE PACKING WHEN LEAKAGE CANNOT BE CONTROLLED BY FURTHER TAKEUP ON THE FOLLOWER GLAND USING MINIMAL FORCE.

J. MECHANICAL SEALS

Mechanical seals are used in many pumps as an alternative to packing. Unlike packing, which requires some leakage, leakage in a mechanical seal should be negligible. Normal leakage in a mechanical seal should not exceed a drop per minute. Mechanical seals have a limited life and tend to fail suddenly, with no prior warning.

Those responsible for the maintenance of pumps employing mechanical seals must be familiar with the manufacturers' instructions for seal replacement and maintenance. An adequate supply of spare parts must be on hand so that mechanical seals on essential pumps can be quickly repaired if they fail.

TROUBLE CHECKLIST

A. NO LIQUID DELIVERY

Shut pump off immediately!

1. Loss of prime.
   - Blockage or closed valve on pump suction side
   - Air leak in suction line
   - Insufficient submergence of inlet pipe
   - Stuffing box packing worn or dry, allowing air leakage into pump (suction lift)
   - Problem with pump priming system during start-up
   - Foot valve leaking
   - Suction lift too high
   - Total system head is higher than pump design head

2. Pump not developing sufficient head. (Check discharge pressure.)
   - Debris or air blockage in pump
   * - Motor speed too low
   * - Wrong direction of rotation
   - Mechanical damage
     - Impeller damage
     - Damaged wear ring
   - Impeller loose on shaft
   - Parallel operation of pumps unsuitable for such operation

* When connected to electric motors, check whether motor wiring is correct and receives full voltage. When connected to steam turbines, make sure that turbine receives full steam pressure.

B. NOT ENOUGH LIQUID DELIVERED

Pump operating near shut-off. Compare total operating head and flow with nameplate data.

1. If flow is less than nameplate and head is higher:
   - Open discharge valve, if possible, or operate a smaller pump
   - Pump impeller may be too large if frequent operation is required at reduced flow
   - Use lower speed if possible

2. If both head and flow are lower than nameplate.
   - Inspect wear rings and replace, if necessary
   - Inspect impeller
   - Check for air leakage through stuffing box
   * - Motor speed too low
   * - Wrong direction of rotation
   - Pump or suction pipe not completely filled with liquid
   - Inadequate suction conditions
   - Air in suction line
   - Check priming system
   - Parallel operation of pumps unsuitable for such operation
   - Casing gasket defective, permitting internal leakage

* When connected to electric motors, check whether motor wiring is correct and receives full voltage. When connected to steam turbines, make sure that turbine receives full steam pressure.

C. NOT ENOUGH PRESSURE

Pump not producing sufficient head.

1. Mechanical damage:
   - Worn wear rings
   - Damaged impeller
   - Shaft bent
2. Impeller blockage
*3. Speed too low
4. Wrong direction of rotation
5. Discharge line break
6. Excessive amount of air

* When connected to electric motors, check whether motor wiring is correct and receives full voltage. When connected to steam turbines, make sure that turbine receives full steam pressure.

D. PUMP WORKS AWHILE, THEN QUITS

Usually due to air leakage during operation.

1. Loss of seal water to packing, or worn packing.
2. Insufficient submergence of inlet pipe.

3. Dissolved air in liquid.
4. Mechanical seal leaks. (on suction lift)
5. Inadequate suction conditions

E. PUMP TAKES TOO MUCH POWER

1. Speed too high.
2. Head lower than rating; pumps too much liquid.
3. Liquid heavier than anticipated. Check viscosity and specific gravity.
4. Mechanical defects:
   - Shaft bent
   - Rotating element binds
   - Stuffing box too tight
   - Pump and driving unit misaligned
   - Packing improperly installed
   - Type of packing incorrect for operating conditions
   - Wearing rings worn
5. Pump operating near shut-off point.

F. PUMP LEAKS EXCESSIVELY AT STUFFING BOX

1. Packing or mechanical seal is worn or not properly lubricated
2. Packing or mechanical seal is incorrectly inserted
3. Packing or mechanical seal is not right type for liquid handled
4. Sleeve scored
5. Packing not properly run in

6. Misalignment
7. Worn bearings
8. Cooling liquid not provided to water cooled stuffing boxes
9. Excessive clearance at bottom of stuffing boxes between shaft and casing, causing shaft to be forced into pump interior
10. Packing gland loose
11. Dirt or grit in sealing liquid, leading to scoring of shaft or shaft sleeve

G. PUMP IS NOISY

1. Hydraulic noise - cavitation, suction lift too high. Check with vacuum or compound gauge.

   Hydraulic recirculation - pump operating out of normal range. Check rate of delivery against nameplate rating. Pump should not operate frequently at less than 70% or more than 130% of rated capacity. Switch to a different pump, if possible.

2. Mechanical defects:

   Shaft bent

   Rotating parts bind, are loose or broken

   Bearings worn out

   Pump and driving unit misaligned

   Improper lubrication

   Foundation not rigid/misaligned

   Impeller damaged

H. Pump Overheats and Seizes

1. Inadequate priming
2. Inadequate suction conditions
3. Inadequate pump capacity
4. Misalignment
5. Bearings damaged

I. Bearings Have Short Life

1. Misalignment
2. Shaft bent
3. Driver misaligned
4. Inadequate lubrication

WIRE TO WATER EFFICIENCY CALCULATION

(WATER COMPANY)
PLANT IDENTIFICATION

Pump No. _____ Service: (Low) (Main) (High) (Booster)

Location: _____ Rating: _____ GPM _____ THD

Field Data:

Volts _____ GPM _____

PF _____ Discharge Pressure(D) _____

Amps _____ Suction Pressure(S) _____
(Pumping water level for vertical pumps)

$$\text{Water HP} = \frac{\text{GPM} \times \text{*PSI}}{1714} \text{ (D-S)} = _____$$

$$\text{Wire HP} = \frac{\text{Volts} \times \text{Amps} \times \text{PF}}{431} = _____$$

$$\text{Wire/Water Effy.} = \frac{\text{Water HP}}{\text{Wire HP}} \times 100 = _____$$

Test Point #2 GPM = _____ PSI (D-S) = _____

Test Point #3 GPM = _____ PSI (D-S) = _____

*For vertical pumps, add the distance between the discharge gauge and the water pumping level (converted to psi), to the discharge pressure.

-Elevation difference between suction and discharge gauge should be considered.
-Use recently calibrated gauges.
-Operate pump at three points on its curve to see if pump is maintaining its original curve characteristics and efficiencies. Use the same operating points on repeated tests to obtain repetitive data.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: OTHER

82. Provide a historical and a forecast summary of Total Gallons of Water Treated; Total Gallons of Water Billed; and Total Gallons of Water Unaccounted For, by month for the period February 2007 through August 2009. Identify in your response the actual month amounts and the forecasted month amounts.

Response:

The requested information for the historical test-year and adjustments used in arriving at the attrition year level requested in this case can be found in the Company's workpapers filed in response to TN-TRA-01-Q013-Fuel & Power, page 13 of 49.

Please see the attached schedule which includes updated actual information through April 2008.

Tennessee American Water Company
Gallons of water treated, gallons of water billed, and gallons of unaccounted for water

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: OTHER

83. Provide the actual volume and percentage of unaccounted for water for TAWC for the year 2007 and forecasted percentage of unaccounted for water for TAWC for 2008 and 2009.

Response:

See table below. Actual unaccounted for water and authorized unbilled consumption are tracked separately for actual results reported monthly. Forecasts/budgets are not prepared with the breakdown between unaccounted for water and authorized unbilled usage.

Date	Water Treated	Water Billed	Unaccounted for Water	Auth unbilled consumption	
2007 Total	14,731,718	11,554,259	2,939,380	238,079	21.6%
2008 Total	14,287,450	11,309,882	2,905,853		20.3%
2009 Total	14,407,907	11,393,851	3,014,056		20.9%

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Sheila Miller/Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: OTHER

86. Provide a detailed explanation of why the Company budgeted Operating Revenues of $36,800,173 for the calendar year 2008 (TN-TRA-01-Q018-ATTACHMENT Page 1 of 12) are less than the normalized test year ended November 30, 2007 amount of $36,910,843 per Company Exhibit No. 2, Schedule 2, Page 1 of 1.

Response:

The Company objects to this question on grounds that the requested data is not readily available in the format requested and is not relevant to this proceeding. The Company prepared its case using a test-year ended November 2007 adjusted for test-year normalizations, including Dr. Spitznagel's weather normalization adjustments, and adjusted for customer growth and other factors expected to occur in the attrition year all in compliance with the TRA rules in preparing and filing rate cases. The Company's attrition year going-level revenues with adjustments are reflected in the above mentioned Schedule 2, and supported by the working papers provided in response to TRA DR 1 Question 13, TN-TRA-01-Q013-Revenues pages 1-99.

Notwithstanding the objection, the Company provides the following response. The 2008 budget referenced in the question was prepared in July 2007 using 2006 as a base period on which to project 2008 revenues. The rate case was prepared using an entirely different base period, the twelve months ended

November 2007, with the additional benefit of having weather normalization factors prepared by a highly qualified expert, Dr. Spitznagel. Slightly different results would be expected given the differences in the base periods, and the small difference in this case speaks well to the effectiveness of TAWC's budgeting process.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/John Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question:

87. Provide documentation of management approval of the Company's budget for the years 2008, 2009 and 2010 as provided (TN-TRA-01-Q018-ATTACHMENT Pages 1 - 12). Include in your response omitted budget Schedules 1 through 5 for each year.

Response:

The Company will produce copies of the minutes of its Board of Directors meetings in response to Part IV, Question 93 pursuant to the entry of an appropriate Protective Order. pursuant to the Protective Order. In response to this question, the Company directs the CAPD to the minutes dated February 4, 2008, which on page 2 (last Resolution on that Page) indicate the Board of Directors of TAWC approved the 2008 Annual Business Plan. Also, please see attached the budget Schedules 1 through 5 for each year.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 08-00039
FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: Michael Miller/Sheila Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

88. Provide an explanation and detailed reconciliation of the Operating Revenues for 2007 of $37,503,400 (TN-TRA-01-Q012-ATTACHMENT Page 2 of 10) to the $37,142,460 for the attrition year at present rates as found on Company Exhibit No. 2, Schedule 1, Page 1 of 1.

Response:

The Company objects to this request on the grounds that it is unduly burdensome, in particular because the information requested is not readily available in the requested format and is very costly to gather and produce. The Company also objects to this request on the grounds that it detracts from the Company's ability to address and support its historical test-year data and the adjustments developed to arrive at a reasonable attrition year and is not required by the TRA's recognized rate case procedures.

The Company filed its petition, testimony, exhibits and workpapers fully supporting its case based on a test year ending November 30, 2007. Test year data and schedules were prepared specifically for the historical test year utilized in the Company's filing.

With respect to this specific request, the CAPD seeks to have the Company to start with the year ended December 2007, a period different than the historical test-year used by the Company in this case. In order to create this analysis the Company would have to create a bill analysis for the year ended December

2007, expend significant effort to determine the different normalized historical test-year adjustments, including the creation of a different weather normalization adjustment by Dr. Spitznagel for the December 2007 period. Not only does the requested information not exist, it would be extremely burdensome and costly to the Company to create it. It is of note that all of this work and expense would move the historical test-year forward **one** month from the historical test-year used by the Company in this case.

The Company fully complied with TRA rate filing requirements in using the November 2007 period as its historical test-year and the historical test-year revenues, historical test-year normalizing adjustments, and attrition year adjustments are clearly outlined in the Company's Exhibit reference in this question and supported by the working papers filed in response to TRA DR 1 Question 13. Also please see the response to TRA DR 2 Question 2 for further explanations and reconciliations from the Company's historical test-year revenues to the attrition year revenues at present rates.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: OTHER

89. Provide the details of each customer service request received for the years 2005 through 2007, including but not confined to, the class of customer and the reason for the request, the resolution of the request, whether the request was for termination of service and whether the request was for establishment of a new service.

Response:

The Company objects to this request on the grounds that it is over broad, unduly burdensome, and not readily available in the requested format.

Subject to and without waiving its objections, please see the response to TN-COC-01-Q09. The Company does not maintain a record of its service orders by customer class.

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John S. Watson/Michael Miller

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: OTHER

90. Provide a detailed explanation for the average monthly number of service requests increasing from 5,097 in 2005 to 7,417 in 2007 (a two year increase of 45.5%) when customers increased only 2.53% over the same period according to TAWC's work papers TN-TRA-01-Q013-REVENUES, pages 78-79 of 99.

Response:

The Company objects to this request on the grounds that it is vague and ambiguous, over broad, unduly burdensome, and because the information is not readily available in the requested format.

Subject to and without waiving its objections, please see the Company's response to TN-COC-01-Q09 that provides detail of the types of service orders issued by the call center and worked in the field for TAWC customers.

It appears that the CAPD has arrived at its average monthly numbers above by dividing the total number of service orders worked as reported on TAWC's service metrics report submitted to the TRA and CAPD for the years 2005 and 2007. The CAPD has incorrectly assumed that the service orders worked by TAWC for the years 2005 and 2007 were all for service requests. In fact, the response to TN-COC-01-09 details the many different types of service orders that the Company tracks in its ORCOM software and that are included in the service orders worked on the Service Metrics Report submitted to the TRA. In

addition, the response to TN-COC-01-09 describes the reasons for the increase in service orders between the years requested in this case. The Company would also add that it does not believe that one can estimate the customer growth by looking at service initiation orders, because during any year the majority of service turn-ons relate to a customer moving out of a residence and a new customer moving into the same residence. While this does result in a turn-on of service, it does not increase the customer count.

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: OTHER

91. In its March 14, 2008 letter to County Mayor Ramsey and Representative McCormick, TAWC stated: "Since 1995, Tennessee American Water has invested $106.222 million to improve and enhance water service for our customers." Provide a schedule showing the $106.222 million invested by TAWC since 1995 by year by JDE account.

Response:

The Company objects to this request on the grounds that it is unduly burdensome, in particular because the information requested is not readily available in the requested format and is very costly to gather and produce.

It is burdensome and fundamentally unfair to require the Company to respond to a data request that, in essence, requires the Company to compile expansive information from the tens of thousands utility plant records in order to create the information in the format requested.

With respect to this specific request, it would be extremely burdensome to go this far into history to create a schedule of this nature by each individual JDE account, resulting in countless hours and money to create information which compiles the utility plant balances used for the historical test year in this case.

Notwithstanding the objection the Company provides the following response. The information used to develop the capital investment of TAWC since 1995 was developed by using total year numbers for capital investment spending by TAWC. The results of those tabulations are shown in the following table.

Capital Investment (in 1,000)	
1995	**4,626**
1996	**8,003**
1997	**4,684**
1998	**6,760**
1999	**8,172**
2000	**5,844**
2001	**5,617**
2002	**5,505**
2003	**6,666**
2004	**8,072**
2005	**14,806**
2006	**16,035**
2007	**11,432**
	106,222

FIRST DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John S. Watson

PART IV: QUESTIONS & REQUESTS REGARDING REVENUES, EXPENSES, TAXES, RATE BASE & MISCELLANEOUS

Question: OTHER

96. Provide all documents related to the review and analysis of electric and other utility service billings to analyze power usage at TAWC's treatment plant booster stations and office facilities, including but not confined to, trends in energy consumption, demand charges, unit costs, and how demand for water use at each location affects TAWC's expense. See Direct Testimony of John Watson at page 6, lines 9-16.

Response:

A web-based program obtained through Itron and licensed to American Water is utilized to review electric, gas and other utility bills and charges, which will provide the actual billing and will breakdown the billings into their individual charges, such as energy charges, demand charges, sales taxes, and will chart trends in these charges by location or by type of charge. Since this is web-based, it will require that the CAPD view the information at the Company's offices in Chattanooga at a mutually agreeable time.
