**CHATTANOOGA MANUFACTURERS ASSOCIATION'S
SECOND SUPPLEMENTAL RESPONSES TO
TENNESSEE AMERICAN WATER COMPANY'S DISCOVERY REQUESTS**

The Chattanooga Manufacturers Association ("CMA"), by and through its attorneys, submits the following second supplemental responses and objections to the Tennessee American Water Company's (the "Company" or "TAWC") Discovery Requests propounded upon CMA. CMA reincorporates by reference herein all of its prior objections and responses (generally and specifically applicable) to the Company's requests and, subject to and without waiving the above and pursuant to the "Meet & Confer" process, further states:

PART I: GENERAL OBJECTIONS

1. CMA objects to the definitions and instructions contained in the discovery requests for production to the extent that the definitions and instructions attempt to impose on CMA a burden or obligation greater than that required by the *Tennessee Rules of Civil Procedure* and applicable statutes and regulations governing contested case hearings.

2. CMA objects to the discovery requests to the extent they call for information and the production of documents which are protected from disclosure by the attorney-client privilege, the attorney work product doctrine or any other applicable privilege or protection. CMA objects

to the Company's discovery requests to the extent that the Company is attempting to impose on CMA obligations with regard to identification of privileged documents beyond those required by the *Tennessee Rules of Civil Procedure* and applicable statutes and regulations governing contested case hearings.

3. CMA objects to the Company's discovery requests to the extent that they seek information to matters not at issue in this litigation or to the extent they are not reasonably calculated to lead to the discovery of admissible evidence. By providing information in response to these requests, CMA does not concede that such information is relevant, material or admissible in evidence. CMA reserves all rights to object to the use of such information as evidence.

4. CMA objects to the Company's discovery requests to the extent that the Company is attempting to impose on CMA obligations to supplement its responses beyond those required by the *Tennessee Rules of Civil Procedure* and applicable statutes and regulations governing contested case hearings.

5. CMA objects to the Company's discovery requests to the extent that the Company is attempting to require CMA to provide information and produce documents beyond those in its possession, custody or control as that phrase is used in the *Tennessee Rules of Civil Procedure* and applicable statutes and regulations governing contested case hearings.

6. CMA objects to the Company's discovery requests to the extent that they seek information and documents that are readily available through public source or are in the Company's own possession, custody or control. It is unduly burdensome and oppressive to require CMA to respond or produce documents that are equally or more available to the Company.

7. CMA objects to the production of any documents prepared by it subsequent to the filing of this litigation or contested case.

8. CMA's objections and responses to these requests are based on information now known to it. CMA reserves the right to amend, modify or supplement its objections and responses if it learns of new information.

9. CMA also supports, adopts, and incorporates herein the relevant objections made by the Consumer Advocate Division and the City of Chattanooga.

Subject to and without waiving the foregoing, CMA responds as follows:

DISCOVERY REQUEST NO. 1:

Identify each material fact and every document that you rely on to support your contention(s), position(s) or belief(s) that any of the request(s) for relief, including any increase in rates, made by TAWC in TRA Docket No. 08-00039 should not be approved by the Tennessee Regulatory Authority ("TRA").

SECOND SUPPLEMENTAL RESPONSE TO DISCOVERY REQUEST NO. 1.

Subject to the above, and the responses and objections previously made, in further response CMA anticipates relying upon information related to or disclosed by TAWC and/or its affiliates in response to data requests by intervenors, the Authority, Staff, or others, in dockets involving or relating to TAWC; filings made to the Authority by TAWC or its affiliates; jurisdictional decisions; and data, materials, information, statements, or documents related to, relied upon, reviewed by, made by, considered or referred to by TAWC, its affiliates, their witnesses, agents, representatives, employees and attorneys. CMA further anticipates that it may use generally recognized manuals, reports and/or surveys commonly referred to in water rate cases, including, but not limited to, those prepared by or for the American Water Works Association. CMA reserves the right to supplement its responses.

DISCOVERY REQUEST NO. 2:

Identify all persons known to you, your attorney, or other agent(s) who have knowledge, information or possess any document(s) or claim to have knowledge, information or possess any document(s) which support your answer to Discovery Request No. 1 above.

SECOND SUPPLEMENTAL RESPONSE TO DISCOVERY REQUEST NO. 2.

Subject to the above, and the responses and objections previously made, in further response CMA anticipates those with knowledge, information, or documents supporting CMA's answer to Discovery Request No. 1 include any witness(es) for CMA who file testimony in this case, in addition to all of the parties, their employees, representatives, witnesses and staff, the Authority and its Staff, ratepayers and TAWC customers and any others who have filed or will file testimony or authored reports relative to TAWC or its affiliates. CMA reserves the right to supplement its responses.

DISCOVERY REQUEST NO. 3:

Produce each document, photograph, or any other article or thing whatsoever, which refers or relates to any part of your contention(s), position(s) or belief(s) that any of the request(s) for relief, including any increase in rates, made by TAWC in TRA Docket No. 08-00039 should not be approved, whether as to the issues of credibility or any other issue.

SECOND SUPPLEMENTAL RESPONSE TO DISCOVERY REQUEST NO. 3.

At this time, subject to the above, and the responses and objections previously made, CMA anticipates relying upon information related to or disclosed by TAWC and/or its affiliates in response to data requests by intervenors, the Authority, Staff, or others, in dockets involving or relating to TAWC; filings made to the Authority by TAWC or its affiliates; and data, materials, information, statements, or documents related to, relied upon, reviewed by, made by, considered or referred to by TAWC, its affiliates, their witnesses, agents, representatives, employees and attorneys. CMA anticipates that it will use generally recognized manuals, reports or surveys commonly referred to in water rate cases, including but not limited to those prepared by or for the AWWA, which for the most part are referred to in the workpapers.

Information relative to the discovery disputes continues to be received and analyzed in connection with the development of expert testimony and, accordingly, CMA anticipates it may continue to develop facts or documents upon which it may rely to support its positions that the Authority should find TAWC's rate request (or other requests for relief) to be not just and not reasonable. CMA reserves the right to supplement its responses.

DISCOVERY REQUEST NO. 4:

Identify any person you intend to call as a fact or expert witness (including, but not limited to, the persons referred to in paragraph 4 of your “Joint Objection of the Intervenors To Discovery Question Limits for the Initial Round of Discovery,” in which you state, “Chattanooga and the CMA have also retained consultants who will likely offer testimony on issues materially affecting the amount and application of the Company’s proposed rate increase, such as issues concerning the I.C.A.R. and rate design”), the subject matter of the witness’ testimony, the substance of the facts and opinions to be expressed and the basis and reasons therefor, the data, documents, materials or other information shown to, relied upon, created by or considered by the witness as part of this case and/or as a basis in forming his or her opinions, any exhibits to be used as a summary of or support for each such opinion, the qualifications of the witness, including a full resume, a list of all publications authored by the witness, the compensation to be paid for the study and testimony, and a listing of any other cases in which the witness has testified at trial or by deposition.

SECOND SUPPLEMENTAL RESPONSE TO DISCOVERY REQUESTS NO. 4.

At this time, subject to the above, and the responses and objections previously made, in further response and considering that a hearing date has not yet been set for this matter, CMA continues to reasonably anticipate for the purpose of providing expert testimony that it will use Brubaker & Associates, Inc. (BAI/Mike Gorman). Mr. Gorman’s testimony history for the past five (5) years is attached hereto. As CMA awaits TAWC’s further responses to CMA and other’s data requests, CMA cannot precisely identify all the topics for which it will file expert testimony; however, CMA continues to anticipate filing testimony that addresses items regarding or involving TAWC’s rate base, expenses and revenues, the Company’s allowed rate of return,

rate base, operating expenses, class cost allocation and rate design. More specifically and in further response, CMA anticipates filing Mr. Gorman's testimony as to at least the following:

- (1) TAWC's requested rate of return, including but not limited to return on equity, should not be considered just and reasonable;
- (2) TAWC's working capital structure and construction work in progress requests are too high and should not be considered just and reasonable;
- (3) Certain revenue factors and adjustments, including but not limited to TAWC's lost water factor, are too high or too low and should not be considered just and reasonable;
- (4) Certain expense factors, including but not limited to rate case expense, are overstated or too high and should not be considered just and reasonable;
- (5) Certain revenues, including but not limited to conservation adjustments to sales understated sales and should not be considered just and reasonable;
- (6) Rate Design and/or Cost of Service and other allocations are improper or not supportable as being just and reasonable.

These areas are tentative, however, and may change as information relative to the discovery disputes continues to be received and analyzed in connection with the development of expert testimony and, accordingly, CMA anticipates it may continue to develop facts or documents upon which it may rely to support its positions that the Authority should find TAWC's rate request (or other requests for relief) to be not just and not reasonable. At this time CMA does not anticipate submitting direct expert testimony regarding TAWC's depreciation study and the management audit study, and may or may not submit testimony relative to weather normalization; however, CMA acknowledges that some testimony it does offer might be

construed by others as directly or indirectly relating to those issues. CMA reserves the right to supplement its responses.

DISCOVERY REQUEST NO. 11:

The Joint Objection of the Intervenors to Discovery Question Limits for the Initial Round of Discovery, which was filed in this docket, states: “the Company has filed a depreciation study in this docket, the conclusions of which will likely be contested.” Specifically identify each conclusion or aspect of the depreciation study the CMA intends to contest, if any, and the CMA’s grounds and/or bases therfor (sic), including any facts and/or documents the CMA contends support those grounds.

SECOND SUPPLEMENTAL RESPONSE TO DISCOVERY REQUEST NO. 11.

Subject to the objections and responses previously made, CMA does not at this time expect to offer direct expert testimony on this issue.

DISCOVERY REQUEST NO. 12:

The Joint Objection of the Intervenors to Discovery Question Limits for the Initial Round of Discovery, which was filed in this docket, states: “TAWC has also filed an independent cost assessment report (“I.C.A.R.”) in relation to management fees, the conclusions of which will likely be contested.” Specifically identify each conclusion or aspect of the I.C.A.R. the CMA intends to contest, if any, and the CMA’s grounds and/or bases therfor (sic), including any facts and/or documents the CMA contends support those grounds.

SECOND SUPPLEMENTAL RESPONSE TO DISCOVERY REQUEST NO. 12.

Subject to the objections and responses previously made, CMA does not at this time expect to offer direct expert testimony on this issue.

DISCOVERY REQUEST NO. 13:

The Joint Objection of the Intervenors to Discovery Question Limits for the Initial Round of Discovery, which was filed in this docket, states: "the Company has proposed a significant adjustment to its weatherization figures which calls for \$1.3 million in new rates." Specifically identify each conclusion or aspect of the weatherization figures the CMA intends to contest, if any, and the CMA's grounds and/or bases therfor (sic), including any facts and/or documents the CMA contends support those grounds.

SECOND SUPPLEMENTAL RESPONSE TO DISCOVERY REQUEST NO. 13.

Subject to the objections and responses previously made, CMA has not completed its evaluation of this issue at this time and may or may not offer direct expert testimony on this issue.

Respectfully submitted,

GRANT KONVALINKA & HARRISON, P.C.
