III. Tele Circuit Possesses the Technical, Managerial and Financial Expertise Necessary to Provide Local Exchange Service

Tele Circuit possesses the requisite technical, financial and managerial capabilities to operate as a competitive telecommunications provider. These capabilities are explained in detail below.

1. Financial Qualifications

Tele Circuit is financially able to provide the services proposed in its tariff as evidenced by its Profit & Loss Statement for the period ending December 31, 2007 and Balance Sheet as of December 31, 2007 and Profit & Loss Statement for the period ending July 30, 2008 and Balance Sheet for the period ending July 30, 2008.

2. Managerial Qualifications

Tele Circuit's senior management team is highly skilled, and has had extensive experience in the telecommunications industry. Using this expertise, Tele Circuit's management team has developed innovative marketing and customer care programs, and provides its customers with high quality advanced services at competitive rates. Tele Circuit has extensive experience in the technical, managerial, and financial aspects of the telecommunications industry.

3. Technical Qualifications and Proposed Service Area

Applicant's key management personnel have significant business and telecommunications experience. Applicant is currently authorized to provide local exchange and interexchange services in New York, Massachusetts, Virginia, Minnesota, Florida, Alabama, Wisconsin, Colorado, New Jersey, North Carolina, Utah, California, Oklahoma, Arizona, Michigan, Texas, Missouri, Illinois and Georgia. Applicant has not been denied authority for any of the services for which it seeks authority in this Application. Applicant is currently providing interexchange service in New York, Massachusetts, Virginia, Minnesota, Alabama, Wisconsin, Colorado, New Jersey, North Carolina, Utah, California, Oklahoma, Arizona, Michigan, Texas, Missouri and Illinois. Applicant is also providing interexchange and local exchange service in Florida and Georgia. No formal complaints have been filed against Applicant or any of its affiliates by any state or federal agency.

Tele Circuit will initially resell services and provide service using unbundled network elements obtained through commercial and interconnection agreements, utilizing the facilities of the existing LECs or other competitive carriers that presently serve Tennessee. The company has no plans to install facilities in the State of Tennessee.

The Applicant proposes to offer its services throughout the State of Tennessee in non-rural areas, specifically targeting Nashville, Knoxville, Memphis and Chattanooga. These areas are currently being served by AT&T and Embarq, which are designated open to competition.

As the foregoing illustrates, Tele Circuit possesses considerable telecommunications expertise. Applicant will also rely upon the technical expertise and telecommunications experience of its underlying carriers. Thus, Tele Circuit is technically qualified to provide local exchange and interexchange telecommunications services in Tennessee. Applicant also is willing to adhere to all applicable Commission policies, rules and orders.

IV. Approval of Tele Circuit's Application is in the Public Interest

Granting Tele Circuit's Application is consistent with the public interest, and, in that regard Applicant makes the following representations to the Commission:

- a. Applicant possesses the technical, financial, and managerial resources sufficient to provide the services requested;
- b. Applicant's services will meet the service standards required by the Commission;
- c. The provision of services by Applicant will not adversely impact the availability of affordable local exchange service;
- d. Applicant, to the extent it is required to do so by the Commission, will participate in the support of universally available telephone service at affordable rates; and,
- e. The provision of local exchange and interexchange services by Applicant will not adversely impact the public interest.

The demands of a competitive market are a better means to achieve affordability and quality of service than a monopoly environment. As competitors vie for market share, they will compete based upon price, innovation and customer service.

Those providers that offer consumers the most cost effective products will gain market share. In contrast, providers whose products do not meet the needs of consumers will lose market share and may ultimately, be eliminated from the industry.

Additionally, Tele Circuit's entry into the local exchange and interexchange markets will not unreasonably prejudice or disadvantage any telephone service providers. Incumbent local exchange carriers presently serve a large majority of the local exchange customers in Tennessee. The major advantages of incumbency (i.e., ownership of the existing local network as well as access to, and long-standing relationships with, every local customer) constitute a substantial obstacle to new entrants. Moreover, exchange services competition will stimulate the demand for the services supplied by all local service carriers, including those of the incumbent LECs. Thus, in a competitive market, there will be increased potential for such LECs to generate higher revenues. Additionally, in a competitive market, incumbent providers will have market incentives to improve the efficiency of their operations, thereby reducing their costs and ultimately their profit margins.

In this regard, approval of this Application is clearly in the public interest.

V. Description of Services Offered

Tele Circuit expects to offer a full array of local exchange and interexchange services to both business and residential customers, including the following:

Interexchange (switched and dedicated services):

- A. 1+ and 101XXXX outbound dialing;
- B. 800/888 toll-free inbound dialing;
- C. Calling cards; and
- D. Data Services.

Local Exchange:

- A. Local Exchange Services for business and residence customers that will enable customers to originate and terminate local calls in the local calling area served by other LECs, including local dial tone and custom calling features.
- B. Switched local exchange services, including basic service, trunks, carrier access, and any other switched local services that currently exist or will exist in the future.
- C. Non-switched local services (e.g., private line) that currently exist or will exist in the future.
- D. Centrex and/or Centrex-like services that currently exist or will exist in the future.
- E. Digital subscriber line, ISDN, and other high capacity services.

In addition to the services listed above, Tele Circuit, through interconnection with other carriers, will offer dual-party relay services, 9-1-1 Emergency Services, directory assistance and operator assisted calls, lifeline, and toll-free calling.

The Applicant's IntraLATA Presubscription Implementation Plan is attached hereto as Exhibit F.

Applicant's proposed tariffs are attached hereto as Exhibit K.

VI. Waivers and Regulatory Compliance

Tele Circuit requests that the Commission grant it a waiver of those regulatory requirements inapplicable to competitive local service resellers such as Financial Record-Keeping System pursuant to Tennessee Rules and Regulation 1220-4-1-.11(1). Such rules are not appropriate or necessary for competitive providers and constitute an economic barrier to entry into the local exchange market.

1. Financial Record-Keeping System

a. Tele Circuit requests that it be exempt from any record-keeping rules or regulations that might require a carrier to maintain its financial records in conformance with the Uniform System of Accounts ("USOA"). The USOA was developed by the FCC as a means of regulating telecommunications companies subject to rate base regulation, and as a competitive carrier, Tele Circuit does not maintain its financial records in this manner.

b. As a competitive carrier, Tele Circuit maintains its book of accounts in accordance with Generally Accepted Accounting Principles ("GAAP"). Neither the FCC, nor the Commission, has required Tele Circuit to maintain its records under the USOA for purposes of Tele Circuit's interexchange operations. Thus, Tele Circuit does not possess the detailed cost data required by USOA, nor does it maintain detailed records on a state-specific basis. As a competitive provider, Tele Circuit's network operations are integrated to achieve maximum efficiency. Having to maintain records pertaining specifically to its Tennessee local service operations would place an extreme burden on Tele Circuit.

c. Moreover, Tele Circuit asserts that because it utilizes GAAP, the Commission will have a reliable means by which to evaluate Tele Circuit's operations. Therefore, Tele Circuit hereby respectfully requests to be exempted from the any USOA requirements of the Commission.

d. The Applicant does agree that it will provide wire line activity reports as required by Commission rules and regulations.

2. Local Exchange Directories

Tele Circuit requests that it not be required to publish local exchange directories. Tele Circuit will make arrangements with the incumbent LECs whereby the names of Tele Circuit's customers will be included in the directories published by the incumbent LECs. LEC directories will also be modified to include Tele Circuit's customer service number. These directories will be distributed to Tele Circuit's customers. This approach is entirely reasonable and will have a direct benefit to the customers of both Tele Circuit and the incumbent LEC since they need only refer to one directory for a universal listing of customer information. It would be an unnecessary burden on Tele Circuit to require that it publish and distribute its own directory to all customers located within each exchange area, particularly since nearly all of these customers will be customers of the incumbent LECs. It is more efficient for Tele Circuit to simply include its limited customer list in the existing directories of the incumbent LECs.

VII. Regulatory Obligations

Applicant shall provide, either directly or indirectly or through arrangements with other carriers or companies, to the extent required by law or regulation:

1. Provide access to 911 and E 911 emergency service;
2. Provide white page directory listings and directory assistance;
3. Provide consumer access to and support for the Tennessee Relay Center in the same manner as incumbent local exchange telephone companies;
4. Provide free blocking service for 900, 976 type services in accordance with Commission policy;
5. Provide Lifeline and Link-up services to qualifying citizens of this state;
6. Provide educational discounts in existence as of June 6, 1995

Applicant shall also:

1. Provide support for universal service in a manner determined by the Commission. This requirement shall not be construed as prohibiting the granting of a certificate before the universal service issues are determined by the Commission;
2. Provide interconnection with other certificated carriers or Commission authorized carriers on a nondiscriminatory basis under reasonable terms and conditions;
3. Comply with Commission basic service standards as defined in any applicable rules and decisions of the Commission;
4. Provide equal access to authorized inter-and intraLATA long distance providers, unless otherwise exempted by the Commission.

VIII. Conclusion

This Application demonstrates that Tele Circuit Network Corporation, possesses the technical, financial and managerial resources to provide resold and facilities-based/UNE local exchange and interexchange service in the State of Tennessee. Furthermore, granting this Application will promote the public interest by increasing the level of competition in the Tennessee telecommunications market. Ultimately, competition will compel all exchange telecommunications service providers to operate more efficiently and with resulting reduced prices for consumers. In addition, as a result of competition, the overall quality of local exchange service will improve. As stated above, Applicant does not intend to provide local service, by its own facilities or otherwise, to any customer located in a rural incumbent LEC's service area, until Applicant provides such LECs notice of intent at least 30 days prior to the date of the intended service, or as otherwise required by law.

Wherefore, Tele Circuit Network Corporation, respectfully petitions this Commission for a Certificate of Public Convenience and Necessity to Provide Competing local exchange and interexchange telecommunications services in the State of Tennessee in accordance with this Application and for such other relief as it deems necessary and appropriate.

Respectfully submitted,
Tele Circuit Network Corporation

ARTICLE VI

INDEMNIFICATION

6.1 Authority to Indemnify. (a) The Corporation shall indemnify or obligate itself to indemnify an individual made a party to a proceeding because he or she is or was a director, officer, employee or agent of the Corporation, or is or was serving at the request of the Corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, for reasonable expenses, judgments, fines, penalties and amounts paid in settlement (including attorneys' fees), incurred in connection with the proceeding if the individual acted in manner he or she believed in good faith to be in or not opposed to the best interests of the Corporation and, in the case of any criminal proceeding, he or she had no reasonable cause to believe his or her conduct was unlawful. The termination of a proceeding by judgment, order, settlement or conviction, or upon a plea of *nolo contendere* or its equivalent, is not, of itself, determinative that the director, officer, employee or agent did not meet the standard of conduct set forth above. Indemnification permitted under this section in connection with a proceeding by or in the right of the Corporation is limited to reasonable expenses incurred in connection with the proceeding.

(b) Under the circumstances prescribed in Section 6.2, the Corporation shall indemnify and hold harmless any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the Corporation to procure a judgment in its favor by reason of the fact he is or was a director, officer, employee or agent of the Corporation, or is or was serving at the request of the Corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses (including attorneys' fees) actually and reasonably incurred by him in connection with the defense or settlement of such action or suit if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of the Corporation; except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable to the Corporation, unless and only to the extent that the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability, but in view of all the circumstances of the case, such person is fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper.

6.2. Mandatory Indemnification. The extent that a director, officer, employee or agent of the Corporation has been successful, on the merits or otherwise, in the defense of any proceeding to which he or she was a party, or in defense of any claim, issue or matter therein, because he or she is or was a director, officer, employee or agent of the Corporation, the Corporation shall indemnify the director, officer, employee or agent against reasonable expenses incurred by him or her in connection therewith.

6.3. Advance for Expenses. The Corporation shall pay for or reimburse the reasonable expenses incurred by a director, officer, employee or agent of the Corporation who is a party to a proceeding in advance of final disposition of the proceeding if (a) he or she furnishes the Corporation written affirmation of his or her good faith belief that he or she has met the standard of conduct set forth in Section 6.1, and (b) he or she furnishes the Corporation a written undertaking, executed personally or on his or her behalf, to repay any advances if it is ultimately determined that he or she is not entitled to indemnification. The undertaking required by this section must be an unlimited general obligation but need not be secured and may be accepted without reference to financial ability to make repayment.

6.4. Court-ordered Indemnification and Advances for Expenses. A director, officer, employee or agent of the Corporation who is a party to a proceeding may apply for indemnification or advances for expenses to the court conducting the proceeding or to another court of competent jurisdiction.

6.5. Determination of Indemnification. Except as provided in Section 6.2 and except as may be ordered by the court, the Corporation may not indemnify a director, officer, employee or agent under Section 6.1 unless authorized thereunder and a determination has been made in the specific case that indemnification of the director, officer, employee or agent is permissible under the circumstances because he or she has met the standard of conduct set forth in Section 6.1. The determination shall be made:

- (a) by the Board of Directors by majority vote of a quorum consisting of directors not at the time parties to the proceedings;

(b) if a quorum cannot be obtained, by majority vote of a committee duly designated by the Board of Directors (in which designation directors who are parties may participate), consisting solely of two or more directors not at the time parties to the proceeding;

(c) by special legal counsel

(i) selected by the Board of Directors or its committee in the manner prescribed in paragraph (a) or (b) of this section; or

(ii) if a quorum of the Board of Directors cannot be obtained and a committee cannot be designated or selected by majority vote of the full Board of Directors (in which selection directors who are parties may participate);

(d) by the shareholders, but shares owned by or voted under the control of directors, who are at the time parties to the proceeding, may not be voted on the determination.

6.6. Authorization of Indemnification. Authorization of indemnification or determination of an obligation to indemnify and evaluation as to the reasonableness of expenses shall be made in the same manner as the determination that indemnification is permissible, except that if the determination is made by special legal counsel, authorization of indemnification and evaluation as to reasonableness of expenses shall be made by those entitled under subsection (c) of Section 6.5 to select special legal counsel.

6.7. Other Rights. The indemnification and advancement of expenses provided by or granted pursuant to the Article VI shall not be deemed exclusive of any other rights, in respect of indemnification or otherwise, to which those seeking indemnification or advancement of expenses may be entitled under any resolution, agreement or contract either specifically or in general terms approved by the affirmative vote of the holders of a majority of the shares entitled to vote thereon taken at a meeting the notice of which specified that such resolution, contract or agreement would be placed before the shareholders, both as to action by a director, trustee, officer, employee or agent in his or her official capacity and as to action in another capacity while holding such office or

position; except that no such other rights, in respect to indemnification or otherwise, may be provided or granted to a director, trustee, officer, employee or agent pursuant to this Section 6.7 by the Corporation for liability for (a) any appropriation, in violation of his or her duties, of any business opportunity of the Corporation; (b) acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law; (c) the types of liability set forth in Section 14-2-832 of the Georgia Business Corporation Code dealing with illegal or unauthorized distributions of corporate assets, whether as dividends or in liquidation of the Corporation or otherwise; or (d) any transaction from which the director derived an improper material tangible personal benefit.

6.8. Insurance. The Corporation may purchase and maintain insurance on behalf of an individual who is or was a director, officer, employee or agent of the Corporation or who, while a director, officer, employee or agent of the Corporation, is or was serving at the request of the Corporation as a director, officer, partner, trustee, employee or agent of another foreign or domestic corporation, partnership, joint venture, trust, employee benefit plan or other enterprise against liability asserted against or incurred by him or her in that capacity or arising from his or her status as a director, officer, employee or agent whether or not the Corporation would have power to indemnify him or her against the same liability under this Article VI.

6.9. Continuation of Expenses. The indemnification and advancement of expenses provided by or granted pursuant to this Article VI shall continue as to a person who has ceased to be a director, trustee, officer, employee or agent and shall inure to the benefit of the heirs, executors and administrators of such a person.

ARTICLE VII

SEAL

The seal of the Corporation shall be in such form as the Board of Directors may from time to time determine. In the event it is inconvenient to use such a seal at any time, the signature of the Corporation followed by the word "Seal" enclosed in parentheses or scroll shall be deemed the seal of the Corporation. The seal shall be in the custody of the Secretary and affixed by him or by his assistants on the share certificates and other appropriate papers.

ARTICLE VIII

AMENDMENT

These bylaws may be amended only upon the favorable vote of the holders of all of the shares entitled to vote.

INTRALATA PRESUBSCRIPTION IMPLEMENTATION PLAN

TELE CIRCUIT NETWORK CORPORATION (Tele Circuit)
IntraLATA Presubscription Implementation Plan

I. Purpose

The intent of this Plan is to provide a proposal that, upon implementation, would provide customers the ability to select the telecommunications carrier of their choice for routing their intraLATA toll calls. Tele Circuit proposes to implement intraLATA toll dialing parity from the date it receives authority to provide local exchange services in Tennessee and has entered into interconnection arrangements with the ILECs. Tele Circuit proposes to provide toll dialing parity to the Chattanooga, Knoxville, Memphis and Nashville LATAs. Attached hereto are the exchange areas that Tele Circuit proposes to provide intraLATA toll dialing parity.

II. Carrier Selection Procedures

Tele Circuit will implement the full 2-PIC (Primary Interexchange Carrier) carrier selection methodology. With the full 2-PIC methodology, customers will be able to presubscribe to one telecommunications carrier for interLATA toll calls and presubscribe to the same or a different participating telecommunications carrier, including their existing local exchange company, for all intraLATA toll calls. Orders for changes will be accepted and processed beginning on the implementation date.

Tele Circuit employees who communicate with the public, accept customer orders, and serve in customer service capacities will be trained to explain the process to customers for making PIC changes for intraLATA toll calls. Business Office personnel will be prepared to make changes in customer records based upon requests from customers or carriers and direct customers to their chosen intraLATA carriers. Processes will be in place to provide new customers with an opportunity to choose their intraLATA toll carrier from a list of available carriers. Tele Circuit will implement a PIC change charge waiver period of 90 days.

New Customers

Customers who contact Tele Circuit requesting new telephone exchange service will be provided a list of telecommunications carriers available to provide interLATA toll service. Upon implementation of intraLATA toll presubscription, the customer will be provided a second list of carriers, including Tele Circuit, that provides intraLATA toll service in their exchange. The list of intraLATA toll carriers will be presented in a competitively neutral manner. Customers who do not make a positive choice for an intraLATA toll carrier will be identified within Tele Circuit's system as a "no-PIC" and will not be automatically defaulted to a carrier. Customers identified as "no-PIC" within Tele Circuit's systems will be required

to dial 101XXXX to place intraLATA toll calls until they make an affirmative choice for an intraLATA toll carrier.

III. Customer Education/Notification

Customers will receive information explaining their opportunity to select an intraLATA carrier a minimum of 30 days in advance of the offering of intraLATA toll dialing parity via a bill message. In addition, during the 30 days following implementation of intraLATA Dialing Parity, customers will receive a bill insert also explaining their opportunity to select an intraLATA carrier. Tele Circuit anticipates that promotional strategies by carriers will contribute to customer awareness of intraLATA toll dialing parity. Customer telephone directories will be updated as new editions are published to reflect the opportunity for customers to choose an intraLATA toll carrier.

IV. Carrier Notification

Current interexchange carriers will be notified of Tele Circuit's intraLATA toll dialing parity implementation via letter approximately 90 days in advance of the proposed implementation date. Carriers should provide a list of exchanges in which they plan to offer intraLATA toll service at least 60 days in advance of Tele Circuit's implementation date. Tele Circuit needs notification in advance to include the carrier on the list of participating carriers in each Tele Circuit exchange. Certified carriers who enter the market after implementation will be added to the list of participating carriers within 30 days of notifying Tele Circuit.

Tele Circuit will provide subscriber listing information to carriers in "readily accessible" tape or electronic formats in a timely manner as requested through the processes that currently exist for the interLATA market. The process includes subscriber listing updates to carriers for new customers who choose that carrier or of existing customers of a carrier who revise their subscriber listing information. In addition, carriers can obtain complete subscriber listings in several formats. The provision of this information is in compliance with FCC Order No. 96-333, Paragraph 389.

Tele Circuit will comply with Part 51, Sections, 305, 307, 325, 327, 329, 331, 333 and 335 of the FCC Order in providing the required information and notice to the public of network changes. Tele Circuit plans to file a public notice with the FCC, with possible migration of the notice to the Internet process as described in Section 329. The notice will include network information as outlined in Section 327. The notice will be provided within the timeframes described in Sections 331-333. Tele Circuit will comply with all rules of the FCC and the TRA.

V. Non-Discriminatory Access

Tele Circuit will provide:

- non-discriminatory access to emergency services and services for the hearing and speech impaired;
- non-discriminatory access to local and long distance directory assistance and provision of local telephone directories to end users;
- non-discriminatory access to operator services;
- non-discriminatory access using standard dialing patterns to all interLATA and intraLATA long distance carriers, including 1+ and 0+ access to the customer's carrier of choice for interLATA calls; and
- non-discriminatory access to telephone numbers and number portability where technically and economically feasible.

VI. Slamming Policy

Verification of orders

Tele Circuit will not submit a change order for local exchange or intrastate toll service until the change order is confirmed in accordance with one of the following procedures:

(a) Tele Circuit has obtained the customer's written authorization to submit the order which includes the following information from the customer:

- (1) The customer billing name, billing telephone number and billing address and each telephone number to be covered by the change order;
- (2) The decision to change; and
- (3) The customer's understanding of the change fee.

(b) Tele Circuit has obtained the customer's authorization, as described in (a) of this subsection, electronically.

Calls to the number(s) shall connect a customer to a voice response unit, or similar, that records the required information regarding the change, including automatically recording the originating automatic number identification (ANI).

(c) An appropriately qualified and independent third party operating in a location physically separate from the telemarketing representative has obtained the customer's oral authorization to submit the change order that confirms and includes appropriate verification data in (a) of this subsection.

Implementing order changes

(a) Telemarketing orders. Within three business days of any telemarketing order for a change, Tele Circuit will send each new customer an information package by first class mail containing at least the following information concerning the requested change:

- (1) The information is being sent to confirm a telemarketing order placed by the customer.
- (2) The name of the customer's current telecommunications company.

- (4) The name of the newly requested telecommunications company.
- (5) The name of the person ordering the change.
- (6) The name, address and telephone number of both the customer and Tele Circuit.
- (7) A postpaid postcard which the customer can use to deny, cancel or confirm a service order.
- (8) A clear statement that if the customer does not return the postcard, the customer's service will be switched fourteen days after the date the information package was mailed. If customers have cancelled their orders during the waiting period, Tele Circuit cannot submit the customer's order.
- (9) The name, address and telephone number of a contact point for consumer complaints.
- (b) The documentation of the order shall be retained by Tele Circuit, at a minimum, for twelve months to serve as verification of the customer's authorization to change its telecommunications company. The documentation will be made available to the customer upon request.
- (c) Customer initiated orders. Tele Circuit when receiving the customer initiated request for a change of local exchange and/or intrastate toll shall keep an internal memorandum or record generated at the time of the request. Such internal record shall be maintained by Tele Circuit for a minimum of twelve months to serve as verification of the customer's authorization to change telecommunications companies. The internal record will be made available to the customer upon request. Within three business days of the order, Tele Circuit will send each new customer an information package by first class mail containing at least the following information concerning the request to change.

NUMBERING ISSUES & TENNESSEE SPECIFIC OPERATION ISSUES

Numbering Issues

1. Applicant's expected demand for NXXs within a year of approval of our application is 60 to 80 NXXs per NPA.
2. Applicant estimates it will request 60 NXXs from NANPA when we establish our service footprint.
3. We expect to establish our initial service footprint in the 615 and 931 NPAs within 6 months of certification.
4. The company will sequentially assign numbers within NXXs if it is required by Commission rules and regulations. In other jurisdictions customer requirements have dictated the non-sequential assignment of telephone numbers.
5. The company will follow NANPA guidelines and Commission regulations and assign numbers accordingly.
6. When ordering NXXs for growth, we follow the forecasting guidelines set by NANPA and the state regulatory body. In the California jurisdiction we currently apply a 6 or 12 month forecast, depending on the jeopardy situation in a given NXX.

Tennessee Specific Operation Issues

1. Our current billing system will allow us to bill the calling plan in compliance with TCA Section 65-21-114.
2. At this time, the company is not aware of the Tennessee County Wide Calling database maintained by BellSouth and the procedures to enter your telephone numbers on the database. The company intends to address all interconnection requirements and procedures with Bell South during the negotiation process and prior to the provision of local exchange service.
3. The company initially intends to provide service in Nashville, Memphis, Knoxville and Chattanooga.. It is the Company's usual practice to mirror the calling pattern on the incumbent LEC, therefore this is how the company will provide metro area toll-free calling around Memphis, Nashville, Knoxville & Chattanooga.

4. At this time, the company is not aware of the MAC database maintained by BellSouth and the procedures to enter your telephone number on the database. The company intends to address all interconnection requirements and procedures with Bell South during the negotiation process and prior to the provision of local exchange service.

5. Employee responsible to work with the TRA on resolving customer complaints:

Regulatory contact: Ashar Syed
(877) 835-3247

Customer Service contact: Jo-Ann Marie Sanchez-Cotto
(877) 835-3247

6. The company intends to use telesales by its own employees. The company is aware of the telemarketing statutes and limitations found in TCA Section 65-4-401 and Chapter 1220-4-11 and will make every effort to comply with these regulations.

TARIFF FORMAT

A. Sheet Numbering: Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between pages 11 and 12 would be page 11.1.

B. Sheet Revision Numbers: Revision numbers also appear in the upper right corner of each sheet where applicable. These numbers are used to indicate the most current page version on file with the Commission. For example, 4th Revised Sheet 13 cancels 3rd Revised Sheet 13. Consult the Check Sheet for the sheets currently in effect.

C. Paragraph Numbering Sequence: There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.
2.1
2.1.1
2.1.1.A
2.1.1.A.1
2.1.1.A.1.(a)
2.1.1.A.1.(a).I
2.1.1.A.1.(a).I.(i)
2.1.1.A.1.(a).I.(i).(1)

D. Check Sheets: When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current Revision Number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on Commission file.

SECTION 3 - DESCRIPTION OF SERVICE**3.1 Computation of Charges**

- 3.1.1 The total charge for each completed call may be a variable measured charge dependent on the duration, distance and time of day of the call. The total charge for each completed call may also be dependent only on the duration of the call, i.e. a statewide flat rate per minute charge. The variable measured charge is specified as a rate per minute that is applied to each minute. All calls are measured in increments as set forth in the Rates Section of this tariff. Fractions of a billing increment are rounded up to a full billing increment on a per call basis. Fractions of a cent per minute are rounded up to a full cent on a per call basis.
- 3.1.2 Where mileage bands appear in a rate table, rates for all calls are based upon the airline distance between the originating and terminating points of the call, as determined by the vertical and horizontal coordinates associated with the exchange (the area code and three digit central office code) associated with the originating and terminating telephone numbers. If the Customer obtains access to the Company's network by a dedicated access circuit, that circuit will be assigned an exchange for rating purposes based upon the Customer's main telephone number at the location where the dedicated access circuit terminates. The vertical and horizontal (V & H) coordinates for each exchange and the airline distance between them will be determined according to industry standards.

- 3.1.3 Timing begins when the called station is answered and two way communication is possible, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. Recognition of answer supervision is the responsibility of the Underlying Carrier. Timing for each call ends when either party hangs up. The Company will not bill for uncompleted calls.

3.2 Customer Complaints and/or Billing Disputes

Customer inquiries or complaints regarding service or accounting may be made in writing or by telephone to the Company at:

3050 Royal Blvd. South, Suite 145
Alpharetta, Georgia 30022
(877) 835-3247

Any objection to billed charges should be reported promptly to the Company. Adjustments to Customers' bills shall be made to the extent that records are available and/or circumstances exist which reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate. Where overbilling of a subscriber occurs, due either to Company or subscriber error, no liability exists which will require the Company to pay any interest, dividend or other compensation on the amount overbilled.

3.5.2 Travel Cards

The Customer utilizes an 11 digit "toll-free" access number established by the Company to access a terminal. Upon receiving a voice prompt, the Customer uses push button dialing to enter an identification code assigned by the Company, and the ten digit number of the called party.

3.5.4 Company Prepaid Calling Cards

This service permits use of Prepaid Calling Cards for placing long distance calls. Customers may purchase Company Prepaid Calling Cards at a variety of retail outlets or through other distribution channels. Company Prepaid Calling Cards are available at a variety of face values ranging from five dollars (\$5.00), in one dollar (\$1.00) increments. Company Prepaid Calling Card service is accessed using the Company toll-free number printed on the card. The caller is prompted by an automated voice response system to enter his/her Authorization Code, and then to enter the terminating telephone number. The Company's processor tracks the call duration on a real time basis to determine the number of Telecom Units consumed. The total consumed Telecom Units and applicable taxes for each call are deducted from the remaining Telecom Unit balance on the Customer's Company Prepaid Calling Card.

All calls must be charged against Prepaid Calling Card that has a sufficient Telecom Unit balance. A Customer's call will be interrupted with an announcement when the balance is about to be depleted.

When the balance is depleted, the Customer can either call the toll-free number on the back of the Company Prepaid Calling Card and "recharge" the balance on the card using a nationally recognized credit card, or the Customer can throw the card away and purchase a new one. Calls in progress will be terminated by the Company if the balance on the Company Prepaid Calling Card is insufficient to continue the call.

A card will expire on the date indicated on the card, or if no date is specified, 6 months from the date of purchase, or the date of last recharge, whichever is later. The Company will not refund unused balances.

A credit allowance for Company Prepaid Calling Card Service is applicable to calls that are interrupted due to poor transmission, one-way transmission, or involuntary disconnection of a call. To receive the proper credit, the Customer must notify the Company at the designated toll-free customer service number printed on the Company Prepaid Calling Card and furnish the called number, the trouble experienced (e.g. cut-off, noisy circuit, etc.), and the approximate time that the call was placed.

When a call charged to a Company Prepaid Calling Card is interrupted due to cut-off, one-way transmission, or poor transmission conditions, the Customer will receive a credit equivalent of one Telecom Unit.

Credit allowances for calls pursuant to the Company Prepaid Card Service do not apply for interruptions not reported promptly to the Company or interruptions that are due to the failure of power, equipment or systems not provided by the Company.

Credit for failure of service shall be allowed only when such failure is caused by or occurs due to causes within the control of the Company.

The Company will block all calls beginning with the NPA "900" and NXX "976" calls, therefore such calls can not be completed.

2.1.2 Shortage of Equipment or Facilities

5.2 Call Timing for Usage Sensitive Services

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 5.2.1 Calls are measured in durational increments identified for each service. All calls, which are fractions of a measurement increment, are rounded-up to the next whole unit.
- 5.2.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 5.2.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.

- 5.2.5 All times refer to local time.

SECTION 5.0 - NETWORK SERVICES DESCRIPTIONS (CONTINUED)

5.3 Distance Calculations

Where charges for a service are specified based upon distance, the following rules apply:

5.3.1 Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is not telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

5.3.2 The airline distance between any two rate centers is determined as follows:

- Step 1: Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.
- Step 2: Computer the difference between he "V" coordinate of the two rate centers; and the difference between the two "H" coordinates.
- Step 3: Square each difference obtained in step (b) above.
- Step 4: Add the square of the "V" difference and the square of the "H" difference obtained in step C) above.
- Step 5: Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- Step 6: Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

5.3.3 The formula for distance calculations is:

$$(V_1 - V_2)^2 + (H_1 - H_2)^2 \qquad 10$$

Callers whose numbers have been blocked will hear a recorded message stating that their call has been blocked. The end-user controls when the feature is active, and can add or remove calling numbers from the feature's screening list.
- (S) **Call Return:** Allows the Customer to return a call to the last incoming call whether answered or not. Upon activation, it will redial the number automatically and continue to check the number every 45 seconds for up to 30 minutes if the number is busy. The Customer is alerted with a distinctive ringing pattern when the busy number is free. When the Customer answers the ring, the call is then completed. The calling party's number will not be delivered or announced to the call recipient under any circumstances.

5.11 Optional Calling Features, (continued)

5.11.1 Feature Descriptions, (continued)

- (T) **Call Selector:** Allows a Customer to assign a maximum of 15 telephone numbers to a special list. The Customer will hear a distinctive ring when calls are received from telephone numbers on that list.
- (U) **Call Tracing:** Allows the tracing of nuisance calls to a specified telephone number suspected of originating from a given local office. The tracing is activated upon entering the specified dial code. The originating telephone number, outgoing trunk number or terminating number, and the time and date are generated for every call to the specified telephone number can then be identified.
- (V) **Calling Number Delivery Blocking:** Prevents the delivery, display and announcement of the end-user's Directory Number and Directory Name on all calls dialed from an exchange service equipped with this option. With per call Calling Number Delivery Blocking, it is necessary for the end-user to dial an activation code prior to placing the call. - (W) **Message Waiting Indication:** Provides the end-user with an audible (stutter dial tone) or visual (lamp or other CPE display) indication that messages are waiting to be retrieved. Message Waiting Indication can only be activated/deactivated by a voice mailbox or other voice messaging service provided by the Company or third party. It is the responsibility of the Customer to subscribe to a compatible voice messaging service. Visual Message Waiting Indication requires specialized CPE not provided by the Company. It is the responsibility of the Customer to provide the necessary CPE.

The end user may have up to two additional numbers assigned to a single line (i.e. Distinctive Ringing – First Number and Distinctive Ringing – Second Number). The designated primary number will receive a normal ringing pattern; other numbers will receive distinctive ringing patterns. The pattern is based on the telephone number that the calling party dials.
- (Y) **Preferred Call Forwarding:** Permits the end-user to automatically forward to another number calls received from up to six end-user pre-selected telephone numbers programmed into the features screening list. The end-user controls when the feature is active, the forward-to-number and can add or remove calling numbers from the feature's screening list.

The Customer has the ability to add or remove telephone numbers and codes to/from the speed calling list without assistance from the Company.

SECTION 11.0 - MISCELLANEOUS SERVICES

11.1 Carrier Presubscription

11.1.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls, Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

11.1.2 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

- Option A:** Customer select the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.
- Option B:** Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.
- Option C:** Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.
- Option D:** Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription.
- Option E:** Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.
- Option F:** Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

SECTION 11.0 – MISCELLANEOUS SERVICES (CONTINUED)

11.1 Carrier Presubscription, (Continued)

11.1.3 Rules and Regulations

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription.

Customers may change their selected Option and/or presubscribed toll carrier at any time subject to charges specified in 11.4.5 below:

11.1.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90-day period will not be assessed a service charge for the initial Customer request.

If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.
