**Re: United Telephone Southeast LLC d/b/a CenturyLink's Petition for  
Expedited Review of Central Office Code Denial**

Dear Chairman Kyle:

Please find enclosed an original and four (4) copies of United Telephone Southeast LLC d/b/a CenturyLink's Petition for Expedited Review of Central Office Code Denial. Also enclosed is a check in the amount of \$25.00 to cover the filing fee.

An extra copy of this letter is enclosed. Please date stamp it and return to me in the enclosed self-addressed stamped envelope. Finally, please do not hesitate to contact me at (919) 554-7621 if you have any questions concerning this petition.

Very truly yours,

Jeanne W. Stockman

Petition for Expedited Review of Growth Code	)	Docket No. _____
Denial by the Number Pooling Administrator	)	
Relating to Mountain States Health Alliance	)	

---

Petition for Expedited Review of Central Office Code Denial

---

United Telephone Southeast LLC d/b/a CenturyLink ("CenturyLink"), pursuant to rules adopted by the FCC for challenging determinations of the Number Pooling Administrator ("NeuStar"), petitions the Tennessee Regulatory Authority (the "Authority") for an expedited review of NeuStar's denial of CenturyLink's application for use of central office code numbering resources in the 423 area code.

CenturyLink respectfully shows the Authority as follows:

1. CenturyLink is a telecommunications public utility regulated by the Authority providing intraLATA, local exchange telecommunications services in the Johnson City Rate Center.
2. NeuStar is an independent non-governmental entity that is responsible for administering and managing the North American Numbering Plan ("NANP"). *See* 47 C.F.R. §§ 52.13(a), (b).
3. On March 31, 2000, the Federal Communications Commission issued a Report and Order and Further Notice of Proposed Rule Making relating to numbering resource optimization ("FCC 00-104" or the "March Order"). On December 29, 2000, the FCC issued its

Second Report and Order, Order on Reconsideration in CC Docket No. 96-98 and CC Docket No. 99-200, and Second Further Notice of Proposed Rulemaking in CC Docket No. 99-200 ("FCC 00-429" or the "December Order"). These FCC orders addressed issues and strategies relating to the efficient use of numbering resources.

4. In FCC 00-104 and FCC 00-429, the FCC announced rules and sought comments in an effort to implement uniform standards governing requests for telephone numbering resources in order to increase efficiency in the use of existing telephone numbers and to slow further exhaustion of existing numbers under the NANP.

5. Among other things, FCC 00-104 adopted a revised standard for assessing a carrier's need for numbering resources by requiring carriers to report rate center based utilization data to NeuStar. The FCC further required that to qualify for access to new numbering resources, applicants must establish that existing inventory within the applicant's rate center will be exhausted within six months of the application. Prior to this ruling, the Central Office Code Assignment Guidelines, used by the industry and NeuStar to make code assignments, required the applicant's existing number inventory within the applicant's serving switch to exhaust within six months of the code application in order for a code to be assigned.

6. This shift to a "rate center" basis for determining the need for new numbering resources was intended to "more accurately reflect how numbering resources are assigned" and to allow "carriers to obtain numbering resources in response to specific customer demands." FCC Order ¶ 105. Various interested parties sought reconsideration of the above-described MTE rule before the FCC on several different occasions. On December 28, 2001, the FCC entered an order retaining the rules requiring carriers to calculate MTE on a rate center basis rather than on a per-switch basis. *In the Matter of Numbering Resource Optimization; Implementation of the Local Competition Provisions of the Telecommunications Act of 1996; Telephone Number*

*Portability*, CC Docket Nos. 99-200, 96-98 and 95-116, *Third Report and Order* and *Second Order on Reconsideration* in CC Docket No. 99-200, FCC 01-362, Paragraph 48 (rel. Dec. 28, 2001).

7. On or about October 13, 2009, CenturyLink submitted a Central Office Code (NXX) Assignment Request - Part 1, and the CO Code Assignment - Months to Exhaust Certification Worksheet, to NeuStar to be assigned a 1K block necessary to meet the demands of its customer, Mountain States Health Alliance. The request and worksheet are attached hereto as Exhibit "A."

8. The code assignment request was for Johnson City in the 423 NPA area code, in response to Mountain States Health Alliance's request for a block of 1000 consecutive numbers. Mountain States Health Alliance cited growth as its basis for this request. However, CenturyLink did not have sufficient number resources available within its inventory in the Johnson City Rate Center, and, accordingly, CenturyLink was unable to provide Mountain States Health Alliance with sufficient numbers to meet its needs. For this reason, CenturyLink sought the numbering resources as noted above.

9. CenturyLink completed the applications in accordance with NeuStar's Central Office Code (NXX) Assignment Guidelines and completed the necessary Months to Exhaust Certification Worksheet required by NeuStar.

10. At the time of the code request, the Johnson City rate center had an MTE of approximately 62758 months.

11. Despite the fact that CenturyLink's Johnson City rate center may not exhaust for 62758 months, CenturyLink is unable to provide the requested service through its switch that serves Mountain States Health Alliance within the Johnson City rate center. This is because the

individual switch that serves this customer within the Johnson City rate center does not have sufficient number resources to meet the customer's request.

12. On or about October 13, 2009, NeuStar's Central Office Code Administration denied the code assignment request on the grounds that CenturyLink had not met the rate center based months-to-exhaust criteria now set forth in the Central Office Code (NXX) Guidelines, notwithstanding the fact that CenturyLink does not have the numbering resources needed to satisfy its customers' demands in the switch at issue. That decision is attached hereto as Exhibit "B."

13. CenturyLink's inability to provide this large business customer with the requested numbers prevents CenturyLink from providing the quality of service this customer desires and expects.

14. Relief for the 423 NPA was implemented with the start of mandatory dialing on February 26, 1996. The Authority also ordered thousands-block pooling for the 423 NPA with a Pool Start Date of September 16, 2002. According to NeuStar, based on the 2006 and NPA Exhaust Analysis – April 30, 2006, the projected exhaust date of the 423 NPA is the third quarter of 2015. Therefore, granting CenturyLink's request for numbering resources would not materially impact exhaustion of available numbers in the 423 NPA.

15. Both FCC 00-104 and NeuStar's Central Office Code (NXX) Guidelines provide that state regulatory authorities have the power and authority to review NeuStar's decision to deny a request for numbering resources. *See* FCC 00-104, Appendix A, Final Rules, § 52.15(g) (3) (iv) ("The carrier may challenge the NeuStar's decision to the appropriate state regulatory commission"); NeuStar Central Office Code (NXX) Guidelines § 13.0 ("Appeals may include but are not limited to one or more of the following options: . . . C. The CO Code

Administrator(s) and code holders/applicants may pursue the disagreement with the appropriate governmental/regulatory body.").

16. The TRA has recognized its jurisdiction and authority to review NeuStar denials and to order the release of numbering resources to meet specific customer needs. The TRA has ordered NeuStar to provide numbering resources to meet customer service requirements.

17. In reviewing previous petitions, the TRA Staff has requested that petitioning carriers provide additional information concerning number utilization for the specific central office involved in the request. This information for the Johnson City rate center, including the Johnson City Central Office is attached hereto as Exhibit "C."

18. The Authority, and not the FCC, is the most appropriate body to address this appeal. As noted above, the Authority has been granted jurisdiction to hear appeals from NeuStar's decisions regarding numbering resources. Any jurisdiction of the FCC to do the same is merely concurrent with the jurisdiction of the Authority. CenturyLink believes that the Authority can more quickly address the numbering problem facing Mountain States Health Alliance and CenturyLink, and, because time is of the essence to the customer, CenturyLink believes it is appropriate to pursue this matter in the forum that can most quickly address the issue.

19. Under earlier months-to-exhaust procedures used by NeuStar, waivers or exceptions were granted where customer hardships could be demonstrated or where the service provider's inventory did not have a block of sequential numbers large enough to meet the customer's specific request. Under existing procedures, NeuStar looks at the number of months-to-exhaust for the entire rate center without any exceptions. The current process for review is arbitrary and results in decisions contrary to the public interest and decisions that do not necessarily preserve the efficient use of telephone numbers or postpone dates of exhaust.

Moreover, the denial of sufficient numbering resources to CenturyLink to meet Mountain States Health Alliance's request is inconsistent with the FCC's position that "[u]nder no circumstances should consumers be precluded from receiving telecommunications services of their choice from providers of their choice for want of numbering resources." FCC 00-429 at ¶ 61. By refusing to grant numbering resources sufficient to meet Mountain States Health Alliance's needs, NeuStar is preventing Mountain States Health Alliance from obtaining the service of its choice from its carrier of choice, CenturyLink.

20. Notwithstanding customer need for a specific numbering arrangement, CenturyLink's analysis indicates that CenturyLink will be unable to meet the six-months-to-exhaust threshold at the rate center level in time to obtain adequate numbering resources to serve this customer absent relief from the Authority. This situation will result in CenturyLink's inability to respond to its customer's needs for specific numbering resources.

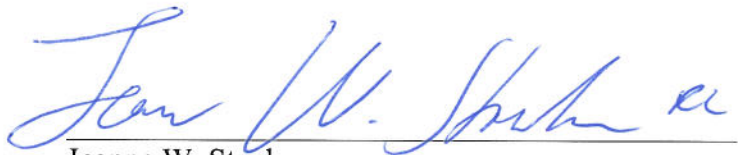

### **CONCLUSION**

For the reasons articulated above, CenturyLink respectfully urges the Authority to direct the NeuStar to provide the requested numbers to CenturyLink to enable CenturyLink to meet the specific requirements of Mountain States Health Alliance in order that Mountain States Health Alliance may receive the service of its choice from the provider of its choice to meet its telecommunications needs.

WHEREFORE, CenturyLink requests:

1. The Authority review the decision of the NeuStar to deny CenturyLink's request for additional numbering resources; and
2. The Authority direct the NeuStar to provide numbers to CenturyLink to meet the specific requirements of Mountain States Health Alliance in the Johnson City rate center within the 423 NPA.

Respectfully submitted,

Jeanne W. Stockman

Remarks: Mountain States Health Alliance requests 1000 consecutive numbers.

I hereby certify that the above information requesting an NXX-X block is true and accurate to the best of my knowledge and that this application has been prepared in accordance with the Thousands-Block (NXX-X) Pooling Administration Guidelines (ATIS-0300096) available on the ATIS web site (<http://www.atis.org/nc>) or by contacting [inc@atis.org](mailto:inc@atis.org) as of the date of this application.

**Instructions for filling out each Section of the Part 1A form:**

**Section 1.1** Contact information requires that Service Providers supply under "Block Applicant" the company name, company headquarters address, a contact within the company, an address where the contact person may be reached, in addition to the correct phone, fax, and e-mail address. The Pooling Administrator section also requires the Service Provider to fill in the Pooling Administrator's name, address, phone, fax and e-mail.

**Section 1.2** Service Providers who need a thousands-block assignment or for an Location Routing Number (LRN) are required to fill in this section. If needed for an LRN, a CO Code Application needs to also be submitted to the PA. The Service Provider should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the Telcordia<sup>TM</sup> LERG<sup>TM</sup> Routing Guide. The Operating Company Number (OCN) assigned to the service provider and the OCN its parent company. An OCN is a four-character alphanumeric assigned by Telcordia<sup>TM</sup> Routing Administration (TRA). In addition, the number of thousands-blocks requested should be supplied. The Switch Identification as well as the city or wire center name, rate center, rate center sub zone, homing tandem and CLLI<sup>TM</sup> tandem of the facilities based provider<sup>16</sup>. Explanations of these terms may be found in the footnotes.

**Section 1.3** The date the Service Provider completes the application should be entered in this section, as well as the Effective Date of the requested thousands-block.

**Section 1.4** Service Providers should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS. They also indicate the primary type of business in which the numbering resource is to be used. Service Providers also may indicate their preference for a particular thousands-block, e.g., 321-9XXX, or indicate any thousands-blocks that may be undesirable, e.g., 321-5XXX.

**Section 1.5** Service Providers indicate the type of request. Initial requests are for first applications for thousands-blocks in a rate center, growth for additional thousands-blocks in a rate center in which the applicant already has numbering resources, and provide the required evidence as ordered by the FCC.

The thousands-block applicant certifies veracity of this form by signing their name, and providing their title and date.

**Section 1.6** Service Providers must indicate the updated/current information in regards to contaminated TNs on the block they are returning to the pool. Blocks with over 10% contamination (101 TNs or more) shall not be returned to the pool unless they meet criteria outlined in section 9.1.2 of these Guidelines. If the block being returned is over 10% contaminated the PA shall seek a new block holder. If question c and/or d have a response of No, the request for return shall be denied.

**Foot Notes:**

<sup>1</sup> Identify type of change(s) in Section 1.5.

<sup>11</sup> The Pool Administrator is available to assist in completing these forms.

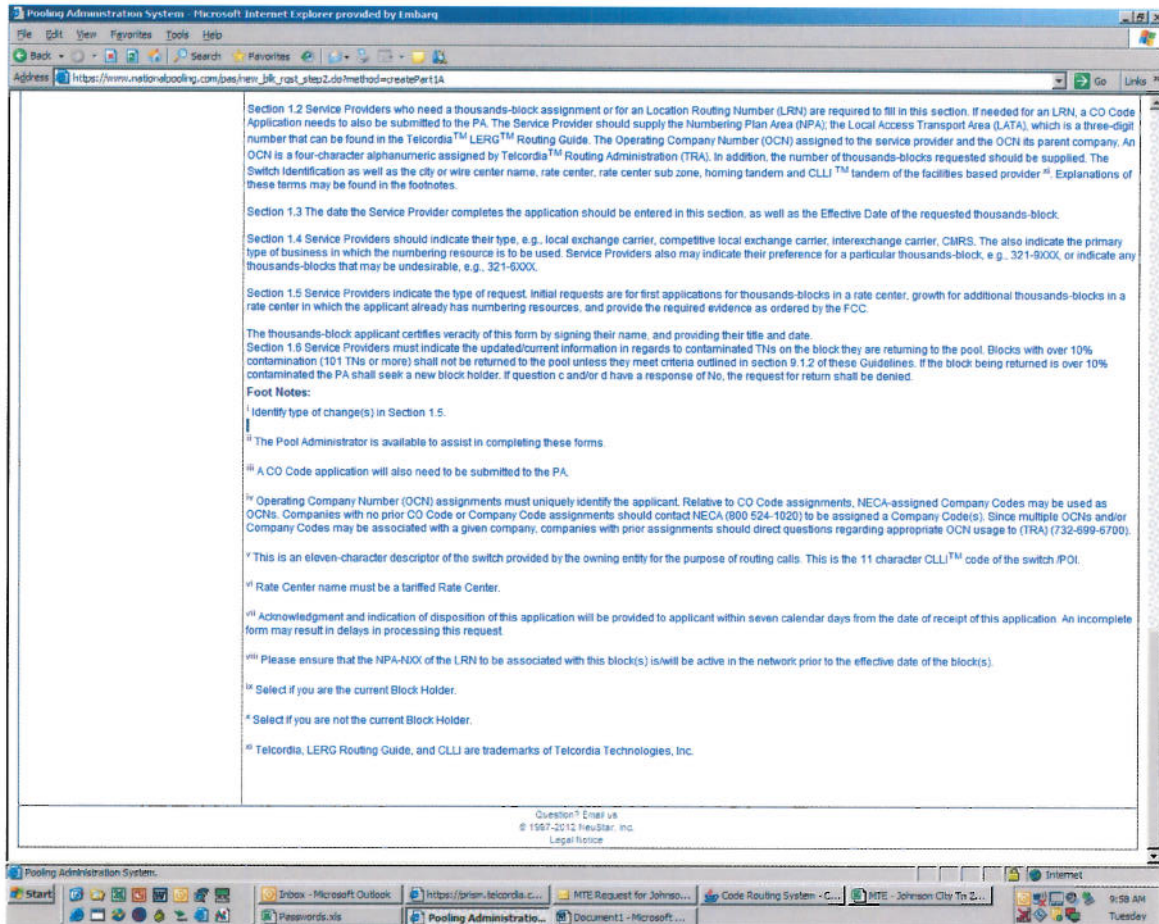

<sup>16</sup> A CO Code application will also need to be submitted to the PA.
