Re: TRA Hearing on August 22, 2011 for Stonebridge subdivision, Jefferson Co., Tennessee

Commissioner Kyle:

I am writing to you (as a property owner) to request your support in favor of permitting a sewer treatment facility for the Stonebridge subdivision in Jefferson Co. Tennessee.

Briefly, the subdivision developer failed to complete this facility citing TDEC permitting problems. As I understand it, a completion bond filed with Jefferson County (by developer) was allowed to lapse before county officials realized that our subdivision treatment facility was not built. This treatment facility was supposed to be in place before lots were sold to public. We seem to be caught in crossfire among developer, Jefferson County and TDEC.

If the TRA issues a CCN# (following hearing on August 22), my understanding is the utility contractor and developer can proceed with construction of this sewer treatment system. I realize TRA has many regulatory proposals to deal with. Any assistance you can provide in opening this impasse is greatly appreciated.
