Dart,

I am so glad we could get everyone to come to the table and that things are moving in a positive direction. I appreciate the update and look forward to getting an email from you that says the issues have been resolved.

Thanks,
Robert Tucker
County Commissioner
8th District

Thanks,

Robert S. Tucker
President

Michel Sorrells and Stonebridge homeowners

Just as a form of update I would like to bring you up to speed on Stonebridge. As you know we met on January 4 to finalize our soils map. I don't have a final map yet, I understand S&ME wants to look at the site again and the weather is not cooperating. Once I get the map I can meet with Bob O'Dette from TDEC. We believe that we can engineer a solution to his concerns based on the finalized soil map, our talks with him have been promising so far. I will let you know when I get the finalized map.

Dart Kendall

Michael and homeowners

To respond to your request for information. I still don't have a signed map from S&ME. I understand the pump and haul system is expensive on you guys, so I have a proposal that will allow us to get a small system up and running in as little as 1 week. This would only be a temporary treatment unit, but it could easily handle the houses there now. As you know with the weather it might take a lot more time to pour the cement tanks we need for the main plant. I will give you a update next Friday. Dart
