Tennessee Regulatory Authority
Data Requests for Docket No. 10-00147

1. dPi Teleconnect, LLC (“dPi”) has an approved interconnection agreement with AT&T Tennessee (Docket No. 10-0002, Order dated March 1, 2010) pursuant to which dPi utilizes unbundled network elements or their functional equivalent (“UNEs”) from AT&T Tennessee. dPi will offer services via combination of resold services and its own facilities (obtained as UNEs) pursuant to the interconnection agreement with AT&T Tennessee. Please see the attached schedule of current active customers and rate centers in Tennessee serviced under agreements with Sprint and AT&T. dPi anticipates activating additional UNE lines in these rate centers upon being designated as an ETC in Tennessee.
2. To be supplied upon being designated as an ETC in Tennessee.
3. dPi does offer services to customers other than Lifeline customers. Please see the attached exhibit showing the current tariffed pricing in Tennessee.
4. Please see the attached exhibit for a list of states where dPi Teleconnect is providing, or has requested authority to provide, local exchange service and whether dPi has applied for or has been designated as an ETC. dPi Teleconnect is currently providing local exchange service in a number of states in which it has not received ETC designation.
5. Upon being designated an ETC, dPi will provide low-income customers in Tennessee another alternative for affordable wireline telecommunications services, thereby increasing low-income consumers’ competitive choice in Tennessee. dPi’s Lifeline and Link-Up programs will enable thousands of residents to obtain service which may otherwise be unavailable to them. The dire economic circumstances indicate that low-income individuals, now more than ever, can greatly benefit from the advantages offered by dPi’s Lifeline and Link-Up service thus allowing those adversely impacted by the failing economy or job loss to have access to a free or low cost service to assist in emergency situations, facilitate job search efforts, and to maintain contact with family members. In addition, through mandated advertising of its Lifeline and Link-Up plans, Tennessee residents will immediately experience broader availability and knowledge of the low-income service offering.
6. Prior to filing for any credits with the Universal Service Administrative Company dPi Teleconnect employs a third party service provider to validate that none of the credits being applied for also have a corresponding federal universal Lifeline credit with the underlying carrier. This is accomplished by analyzing carrier invoices for specific customer and Lifeline credit information.
7. Currently dPi Teleconnect has no immediate plans to transition to facilities-based switching for the provision of wireline services in the State of Tennessee. However, dPi is in the process of

exploring various facilities-based solutions which may be utilized in its headquarter State of Texas and possibly other States. Should these plans materialize, dPi commits to update the TRA with respect to any facilities-based switching to be provisioned in the State of Tennessee.

8. Please see the attached exhibit of the exact Lifeline application used in the state of Tennessee. Please also see the attached exhibit containing the procedures used to complete the annual re-verification process for Lifeline customers.
9. In the event that AT&T relinquishes carrier of last resort status in a defined service area, dPi will undertake to provide affordable basic residential local exchange service, upon reasonable request, to residential and single-line business customers within the defined service area.
10. dPi Teleconnect has noted the requirements for the filing of monthly Wireline Activity Reports. Attached please find a copy of the August 2010 report.
