Regarding question 4, DRS' methods for allocating expenses to affiliates such as Dominion Virginia Power are both reasonable and related to the causation of the allocated expenses. For each of over 290 DRS cost centers that charged Dominion Virginia Power during 2008, the services of those cost centers were found to be necessary for a utility like Dominion Virginia Power to operate. The cost allocation methods employed during 2008 are in accordance with the current DRS Services Agreement dated January 1, 2003, which has been approved by the Virginia State Corporation Commission ("Commission").

Other important factors were noted that evidence the care with which DRS expenses are assigned to affiliates such as Dominion Virginia Power. These include the following:

- Governance Practices Associated With DRS Charges – Several management practices are in place to ensure that DRS' charges to Dominion Virginia Power are appropriate. These include DRS' budgeting and variance analysis processes, and the scrutiny given to DRS' monthly bill by Dominion Virginia Power personnel.

- Cost Allocation Manual – DRS maintains an Accounting Policy and Cost Allocation Manual (CAM) that documents the process by which it assigns costs to affiliate customers. Baryenbruch & Company, LLC's review of the CAM found it to be a comprehensive reference document that provides thorough directions to DRS personnel responsible for assigning expenses to Dominion Virginia Power. DRS' cost allocation methodologies comply with governing requirements in the CAM.

Overview of Dominion Resources, Inc.

Dominion Resources, Inc. ("DRI") is one of the nation's largest producers and transporters of energy, with a portfolio of approximately 26,500 megawatts of generation; 1.2 trillion cubic feet equivalent of proved natural gas and oil reserves; 14,000 miles of natural gas transmission, gathering, and storage pipeline; and 6,000 miles of electric transmission lines. Dominion operates the nation's largest natural gas storage facility with 975 billion cubic feet of storage capacity, and serves retail energy customers in 12 states.

DRI is organized into three operating business segments and one corporate/non-operating segment, as described below.

Segment	Business Lines
Dominion Virginia Power – operates regulated electric distribution and transmission facilities in most of Virginia and northeastern North Carolina and provides electric service to nearly 2.4 million customers in the two-state area	• Electric Transmission • Electric Distribution • Energy and Related Products and Services in Competitive Retail Markets
Dominion Generation – operates DRI's fleet of regulated and merchant power plants	• Utility Power Production • Merchant Power Production
Dominion Energy – operates regulated natural gas distribution, transmission, and storage businesses, included regulated liquefied natural gas (LNG) operations; also operates DRI's Appalachian-based natural gas and oil exploration business and producer services	• Natural Gas Transmission • Natural Gas Distribution • Natural Gas Storage • Gas and Oil Exploration and Production; Production Services
Corporate – Various other businesses not related to the above three major segments

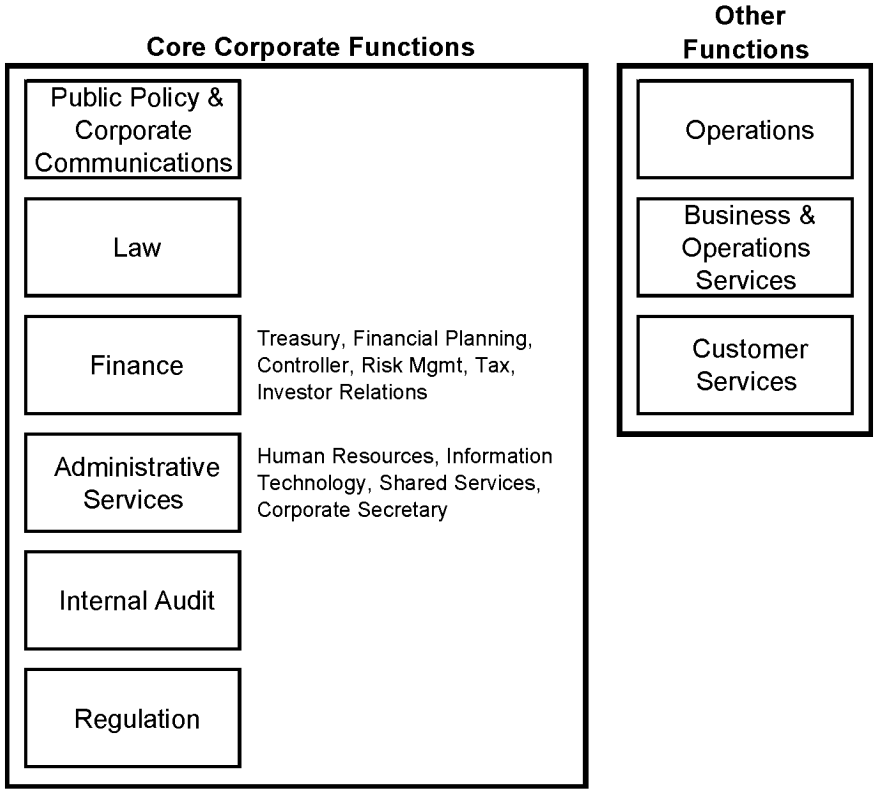
Overview of Affiliates Providing Services to Dominion Virginia Power

During 2008, Dominion Virginia Power was billed approximately $397 million for services provided by affiliates. As shown in the table below, the large majority of these services came from DRS.

Affiliate	2008 Service-Related Charges
Dominion Resources Services, Inc.	$ 350,456,982
Dominion Energy Inc.	$ 2,230,822
Dominion Energy Kewaunee Inc.	$ 76,003
Dominion Nuclear Connecticut Inc.	$ 353,077
Dominion Technical Solutions, Inc.	$ 37,220,958
Dominion Transmission Inc.	$ 737,386
VP Energy Marketing Inc.	$ 5,369,631
East Ohio Gas Company	$ 418,769
Total Affiliate Charges	**$ 396,863,627**

DRS was incorporated on October 14, 1999 to provide affiliate companies with the services described in Exhibit 1. Exhibit 2 lists the affiliate entities served by DRS. DRS is organized into the following major functional groups. As of December 31, 2008, DRS had 3,285 employees.



DRS is defined as a "centralized service company" and is regulated by FERC. The current Services Agreement between DRS and Dominion Virginia Power is dated January 1, 2003 and designates that DRS provide services at cost. The Commission approved the current Services Agreement in an order dated December 29, 1999 and required that DRS provide services to Dominion Virginia Power at the lower of cost or market. DRS has followed the Commission's lower of cost or market guideline.

Occasionally, DRS receives services from other DRI affiliates. Dominion Virginia Power has a services agreement with DRS dated January 1, 2003, that specifies it will be compensated for those services at cost. However, since the Commission's December 29, 1999 order applies to these transactions, services from other DRI affiliates are also provided at the lower of cost or market.

DRS' Cost Assignment Process

DRS utilizes a work order system (work orders are referred to internally as "projects" or "WBS Elements") by which to accumulate and distribute expenses in a fair and equitable manner to all affiliates that benefit from its services. Time records are maintained for all service company employees to support the costs that are assigned to each affiliate. DRS' costs are assigned in their entirety and no residual profit or loss remains on the books.

Virginia Electric and Power Company
Description of DRS Services

Service	Service Description
Accounting	Provide advice and assistance to Dominion Companies in accounting matters, including the development of accounting practices, procedures and controls, the maintenance of the general ledger and related subsidiary systems, the preparation and analysis of financial reports, and the processing of certain accounts such as accounts payable, accounts receivable and payroll.
Auditing	Periodically audit the accounting records and other records maintained by Dominion Companies and coordinating their examination, where applicable, with that of independent public accountants. The audit staff will report on their examination and submit recommendations, as appropriate, on improving methods of internal control and accounting procedures.
Legal and Regulatory Services	Provide advice and assistance with respect to legal and regulatory issues as well as regulatory compliance, including PUHCA 2005 authorizations and compliance and regulatory matters under other with Federal and State laws.
Information Technology	Provide the organization and resources for the operation of an information technology function including the development, implementation and operation of a centralized data processing facility and the management of a telecommunications network. This function includes the central processing of computerized applications and support of individual applications in Dominion Companies. Develop, implement, and process those computerized applications for Dominion Companies that can be economically best accomplished on a centralized basis.
Software Pooling	Accept from Dominion Companies ownership of and rights to use, assign, license or sublicense all software owned, acquired or developed by or for Dominion Companies which Dominion Companies can and do transfer or assign to it. Preserve and protect the rights to all such software to the extent reasonable and appropriate under the circumstances; license Dominion Companies, on a non-exclusive, no-charge or at-cost basis, to use all software which DRS has the right to sell, license or sub-license; and, at the relevant Dominion Companies' expense, permit Dominion Companies to enhance any such software and license others to use all such software and enhancements to the extent that DRS shall have the legal right to so permit.
Employee Benefits/ Pension Investment	Provide central accounting for employee benefit and pension plans of Dominion Companies. Advise and assist Dominion Companies in the administration of such plans and prepare and maintain records of employee and company accounts under the said plans, together with such statistical data and reports as are pertinent to the plans.
Human Resources	Advise and assist Dominion Companies in the formulation and administration of human resources policies and programs relating to the relevant Dominion Companies' labor relations, personnel administration, training, wage and salary administration and safety.
Operations	Advise and assist Dominion Companies in the study, planning, engineering and construction of energy plant facilities of each Dominion Company and of the Dominion Companies as a whole, and advise, assist and manage the planning, engineering (including maps and records) and construction operations of Dominion Companies. Develop long-range operational programs for all the Dominion Companies and advise and assist each such Dominion Company in the coordination of such programs with the programs of the other Dominion Companies.

Virginia Electric and Power Company
Description of DRS Services

Service	Service Description
Executive and Administrative	Advise and assist Dominion Companies in the solution of major problems and in the formulation and execution of the general plans and policies of Dominion Companies. Advise and assist Dominion Companies as to operations, the issuance of securities, the preparation of filings arising out of or required by the various Federal and State securities, business, public utilities and corporation laws, the selection of executive and administrative personnel, the representation of Dominion Companies before regulatory bodies, proposals for capital expenditures, budgets, financing, acquisition and disposition of properties, expansion of business, rate structures, public relationships and other related matters.
Business and Operations Services	Advise and assist Dominion Companies in all matters relating to operational capacity and the preparation and coordination of operating studies. Manage Dominion Companies' purchase, movement, transfer and accounting of fuel and gas volumes. Compile and communicate information relevant to company operation. Perform general business and operations support services, including business, plant and facilities operation, maintenance and management, travel, aviation, fleet and mail services.
Exploration and Development	Advise and assist Dominion Companies in all geological and exploration matters including the acquisition and surrender of acreage and the development of underground storage facilities. [note: Dominion Virginia Power is not charged for any of these services]
Risk Management	Advise and assist Dominion Companies in securing requisite insurance, in the purchase and administration of all property, casualty and marine insurance, in the settlement of insured claims and in providing risk prevention advice.
Marketing	Plan, formulate and implement marketing programs, as well as provide associated marketing services to assist Dominion Companies with improving customer satisfaction, load retention and shaping, growth of energy sales and deliveries, energy conservation and efficiency. Assist Dominion Companies in carrying out policies and programs for the development of plant locations and of industrial, commercial and wholesale markets and assist with community redevelopment and rehabilitation programs.
Medical	Direct and administer all medical and health activities of Dominion Companies. Provide systems of physical examination for employment and other purposes and direct and administer programs for the prevention of sickness.
Corporate Planning	Advise and assist Dominion Companies in the study and planning of operations, budgets, economic forecasts, capital expenditures and special projects.
Supply Chain	Advise and assist Dominion Companies in the procurement of real and personal property, materials, supplies and services, conduct purchase negotiations, prepare procurement agreements and administer programs of material control.
Rates	Advise and assist Dominion Companies in the analysis of their rate structure in the formulation of rate policies, and in the negotiation of large contracts. Advise and assist Dominion Companies in proceedings before regulatory bodies involving the rates and operations of Dominion Companies and of other competitors where such rates and operations directly or indirectly affect Dominion Companies.

Virginia Electric and Power Company
Description of DRS Services

Service	Service Description
Research	Investigate and conduct research into problems relating to production, utilization, testing, manufacture, transmission, storage and distribution of energy. Keep abreast of and evaluate for Dominion Companies all research developments and programs of significance affecting Dominion Companies and the energy industry, conduct research and development in promising areas and advise and assist in the solution of technical problems arising out of Dominion Companies' operations.
Tax	Advise and assist Dominion Companies in the preparation of Federal and other tax returns, and generally advise Dominion Companies as to any problems involving taxes including the provision of due diligence in connection with acquisitions.
Corporate Secretary	Provide all necessary functions required of a publicly held corporation. Coordinate information and activities among shareholders, the transfer agent, and Board of Directors. Provide direct services to security holders. Prepare and file required annual and interim reports to shareholders and the SEC. Conduct the annual meeting of shareholders and ensuring proper maintenance of corporate records.
Investor Relations	Provide fair and accurate analysis of DRI and its operating subsidiaries and its outlook within the financial community. Enhance Dominion's position in the energy industry. Balance and diversify shareholder investment in Dominion through a wide range of activities. Provide feedback to Dominion and its operating subsidiaries regarding investor concerns, trading and ownerships. Hold periodic analysts meetings, and provide various operating data as requested or required by investors.
Environmental Compliance	Provide consulting, cleanup, and other activities as required by Dominion Companies to ensure full compliance with applicable environmental statutes and regulations.
Customer Service	Provide services and systems dedicated to customer service, including billing, remittance, credit, collections, customer relations, call centers, energy conservation support and metering.
Energy Marketing	Provide services and systems dedicated to energy marketing, including marketing and trading of energy commodities, and energy price risk management and development of marketing and sales programs in physical and financial markets.
Treasury/Finance	Provide services related to managing all administrative activities associated with financing, including management of capital structure; cash, credit and risk management activities; investment and commercial banking relationships; oversight of decommissioning trust funds and general financing activities.
External Affairs	Provide services in support of corporate strategies for managing relationships with federal, state and local governments, agencies and legislative bodies. Formulate and assist with public relations, advertising, and external/internal communications programs and with the administration of corporate contribution and community affairs programs.

III - Affiliate Cost Comparison Approach

During the 12 months ended December 31, 2008, Dominion Virginia Power was billed approximately $397 million by affiliates for services provided by affiliates (Dominion Virginia Power was also charged by affiliates for various non-service expenses). These charges were evaluated in connection with this study's four questions, as shown in the table below.

		Study Question			
Affiliate	2008 Service-Related Charges	1 - Reasonableness	2 - LCM Pricing	3 - Cust Acct Svcs Benchmarking	4 - Allocation Methods
Dominion Resources Services, Inc.	$ 350,456,982	X	X	X	X
Dominion Energy Inc.	$ 2,230,822	X			
Dominion Energy Kewaunee Inc.	$ 76,003	X			
Dominion Nuclear Connecticut Inc.	$ 353,077	X			
Dominion Technical Solutions Inc.	$ 37,220,958	X	X		
Dominion Transmission Inc.	$ 737,386	X			
VP Energy Marketing Inc.	$ 5,369,631	X			
East Ohio Gas Company	$ 418,769	X		X	
Total Affiliate Charges	**$ 396,863,627**				

The first question—are affiliate charges for services reasonable—was answered by comparing Dominion Virginia Power's affiliate charges per customer to those of utility service companies that file a FERC Form 60 – Annual Report of Service Companies. This comparison was made with 2007 Form 60 data, the latest year Form 60 data is available (the filing deadline for the Form 60 is May 1st).

This study's second question—whether affiliates' services were provided to Dominion Virginia Power during 2008 at the lower of cost or market—was determined by comparing the cost per hour for managerial and professional services provided by affiliate personnel, to hourly billing rates that would be charged by outside providers of equivalent services. Affiliates' costs per hour were based on actual charges to Dominion Virginia Power during the 12 months ended December 31, 2008. Outside providers' billing rates came from surveys or other information from professionals that could perform the services now provided by DRS.

The third question—whether DRS customer services charges were comparable to other utilities—was addressed by comparing Dominion Virginia Power's customer accounts services expenses to those of neighboring electric utilities. This approach was selected because the costs of outside providers of call center services are not publicly available. However, electric utility customer account services expenses can be readily obtained from FERC Form 1 data. The availability and transparency of FERC data adds to the validity of its use in this comparison. The comparison was made using 2007 data, the latest year for which FERC Form 1 data is available (the filing deadline for FERC Form 1 is April 18th).

The fourth question—whether DRS' cost allocation methods are reasonable—was answered by evaluating the basis by which each of the 293 DRS cost centers' charges to Dominion Virginia Power during 2008 were assigned. Reasonableness was determined when the allocation methods were related to the causation of the allocated expenses by cost centers providing services to Dominion Virginia Power. The allocation methods used in 2008 were also verified to

be those specified in the current Services Agreement between DRS and Dominion Virginia Power.

Dominion Virginia Power's Service Company Cost Per Customer

During the 12 months ended December 31, 2007, Dominion Virginia Power was charged $343 million by affiliates that provided it with various services. That equates to $145 per Dominion Virginia Power customer per year, as calculated below. This is the per customer cost that will be compared to the cost of other utility service companies.

Affiliate	2007
Dominion Resources Services, Inc.	$ 311,085,408
Dominion Energy Inc.	$ 1,535,781
Dominion Energy Kewaunee Inc.	$ 102,778
Dominion Nuclear Connecticut Inc.	$ 1,394,720
Dominion Retail Inc.	$ 1,633
Dominion Technical Solutions Inc.	$ 25,792,927
Dominion Transmission Inc.	$ 3,328
VP Energy Marketing Inc.	$ 2,753,010
East Ohio Gas Company	$ 351,031
Total Charges from Affiliates	$ 343,020,616
Dominion Virginia Power Customers (A)	2,362,318
Cost Per Customer	**$ 145**

Note A: Represents the number of retail (regulated) customers. Comparison group service company per customer costs are also based on the number retail customers served.

Comparison Group Cost Per Customer

Every centralized service company in a holding company system must file a Form 60 in accordance with Section 1270 of the Public Utility Holding Company Act of 2005, Section 390 of the Federal Power Act, and 18 C.F.R. §366.23. This report is designed to collect financial information from service companies that are subject to regulation by FERC.

DRS files a Form 60. Twenty-two other utility holding companies filed a Form 60 for 2007. All but two were considered for inclusion in the comparison group. The service company for PNM Resources, Inc. was excluded because its total 2007 service company cost per regulated utility customer was a negative amount, clearly an anomaly. This result is likely due to the unique manner by which PNM's service company expenses are reported on Form 60. Duke Energy was also excluded from the comparison group because one of its two service companies was not required to provide data for its Form 60. Thus, it was not possible to develop Duke's consolidated service company cost per customer for 2007.

The remaining twenty services companies were screened to develop a comparison group that is appropriately similar to Dominion Virginia Power. Two criteria were used to narrow this group:

- Proportion of Retail Electric Service – Dominion Virginia Power provides only electric service. The majority of service companies are owned by parents of utility companies that provide a combination of retail electric and gas service. The nature of service company services can differ between electric and gas service functions. In order to have a close alignment to Dominion Virginia Power, the service companies of utility companies with 90% or more electric customers were considered for comparison group inclusion.
- Number of Customers – Total retail customers of utilities served by the 20 service companies varies significantly from 115,000 for Unitil to 6,700,000 for National Grid. In

order to ensure a similar degree of complexity and breadth to that of Dominion Virginia Power, only utility companies with more than 1 million retail customers were considered for inclusion in the comparison group.

Exhibit 3 shows how 9 service companies were ultimately selected for the comparison group. Exhibit 4 compares the categories of services provided by DRS and the comparison group service companies.

Operating and maintenance expenses charged to utility affiliates for comparison group service companies were obtained from Schedule XVII – Schedule of Expense Distribution by Department or Service Function (P. 305 to 305c) of each entity's FERC Form 60. This schedule shows charges by category of service (*e.g.*, accounting, information technology) and type of cost (*e.g.*, labor, benefits, outside services). The following were eliminated from the comparison group's total expenses because they are not in DRS' 2008 charges to Dominion Virginia Power:

- Income taxes (account 409), provision for deferred income taxes (account 410), provision for deferred income taxes – credit (account 411), and investment tax credit (account 411.5)
- Donations (account 426.1)
- Interest on long-term debt (account 427), interest on debt to associate companies (account 430), and other interest expense (account 431)

Comparison group service company 2007 expenses were also adjusted to remove charges to non-retail affiliates from the cost pool used to calculate the cost per regulated service customer. This determination was made using information from FERC Form 60's schedule Account 457 – Analysis of Billing – Associate Companies.

Shown in the table below is the calculation of each comparison group service company's cost per retail customer. 2007 affiliate service-related charges to Dominion Virginia Power were $145 per customer compared to the comparison group's average of $172. Exhibit 5 shows graphically that Dominion Virginia Power's 2007 affiliate cost per customer is almost 16% or $27 per customer lower than the comparison group average.

Utility Service Company	Retail-Related Service Company Expenses	Total Retail Customers	Cost Per Customer
Progress	$351,126,895	3,100,000	$ 113
FirstEnergy	$511,129,366	4,500,000	$ 114

IV – Question 1 – Reasonableness of Affiliate Charges

Form 60 data were further analyzed to compare the costs of categories of services. Services provided by the comparison group were assigned to 18 service categories shown in the table below.

Accounting	Finance
Auditing	Human Resources
Business Services	Information Technology
Corporate Planning	Legal
Customer Service	Operations
Energy Marketing	Regulatory Services
Environmental & Safety	Risk Management
Executive	Supply Chain
External Affairs	Treasury

Comparison group charges to regulated utility affiliates were assigned to service category cost pools, which were then divided by the number of retail customers. The resultant cost per customer for each service category is shown in Exhibit 6. This schedule, in effect, breaks down the service component of Dominion Virginia Power's and comparison group service companies' total cost per customer that was compared previously in Exhibit 5. Dominion Virginia Power's cost per customer is lower than the comparison group average for 16 of 18 service categories. Per customer cost results are also graphed in Exhibit 7, which shows Dominion Virginia Power's position within the range of comparison group per customer costs.

Further research into the two service categories in which Dominion Virginia Power is higher than average showed the following:

- Information Technology (IT) – DRI centralizes IT functions to the greatest extent possible in order to gain economies of scale. The IT functions for other utility companies typically are not centralized to the same extent. Depreciation and amortization expenses are included in the IT services charges to affiliates. IT assets in other utility companies are often owed by the regulated operating companies, thus their service companies charges would not include the associated depreciation and amortization expenses.

- External Affairs – DRS includes philanthropic-related expenses, including over $800,000 in charitable donations. As discussed earlier, donations were excluded from comparison group service companies' cost pools. Philanthropic expenses account for approximately $0.50 of DRS' $5.69 per customer. DRS' cost also includes $0.45 per customer in community affairs-related expenses. Most comparison group service companies do not include such expenses. It is possible these expenses are incurred directly by and recorded on the books of their regulated utility affiliates. These two items total $0.95 per customer for DRS. This is the approximate difference between DRS and the comparison group average.

Based on the results of this benchmarking to comparable service companies, Dominion Virginia Power's service-related charges from affiliates are reasonable.

Virginia Electric and Power Company

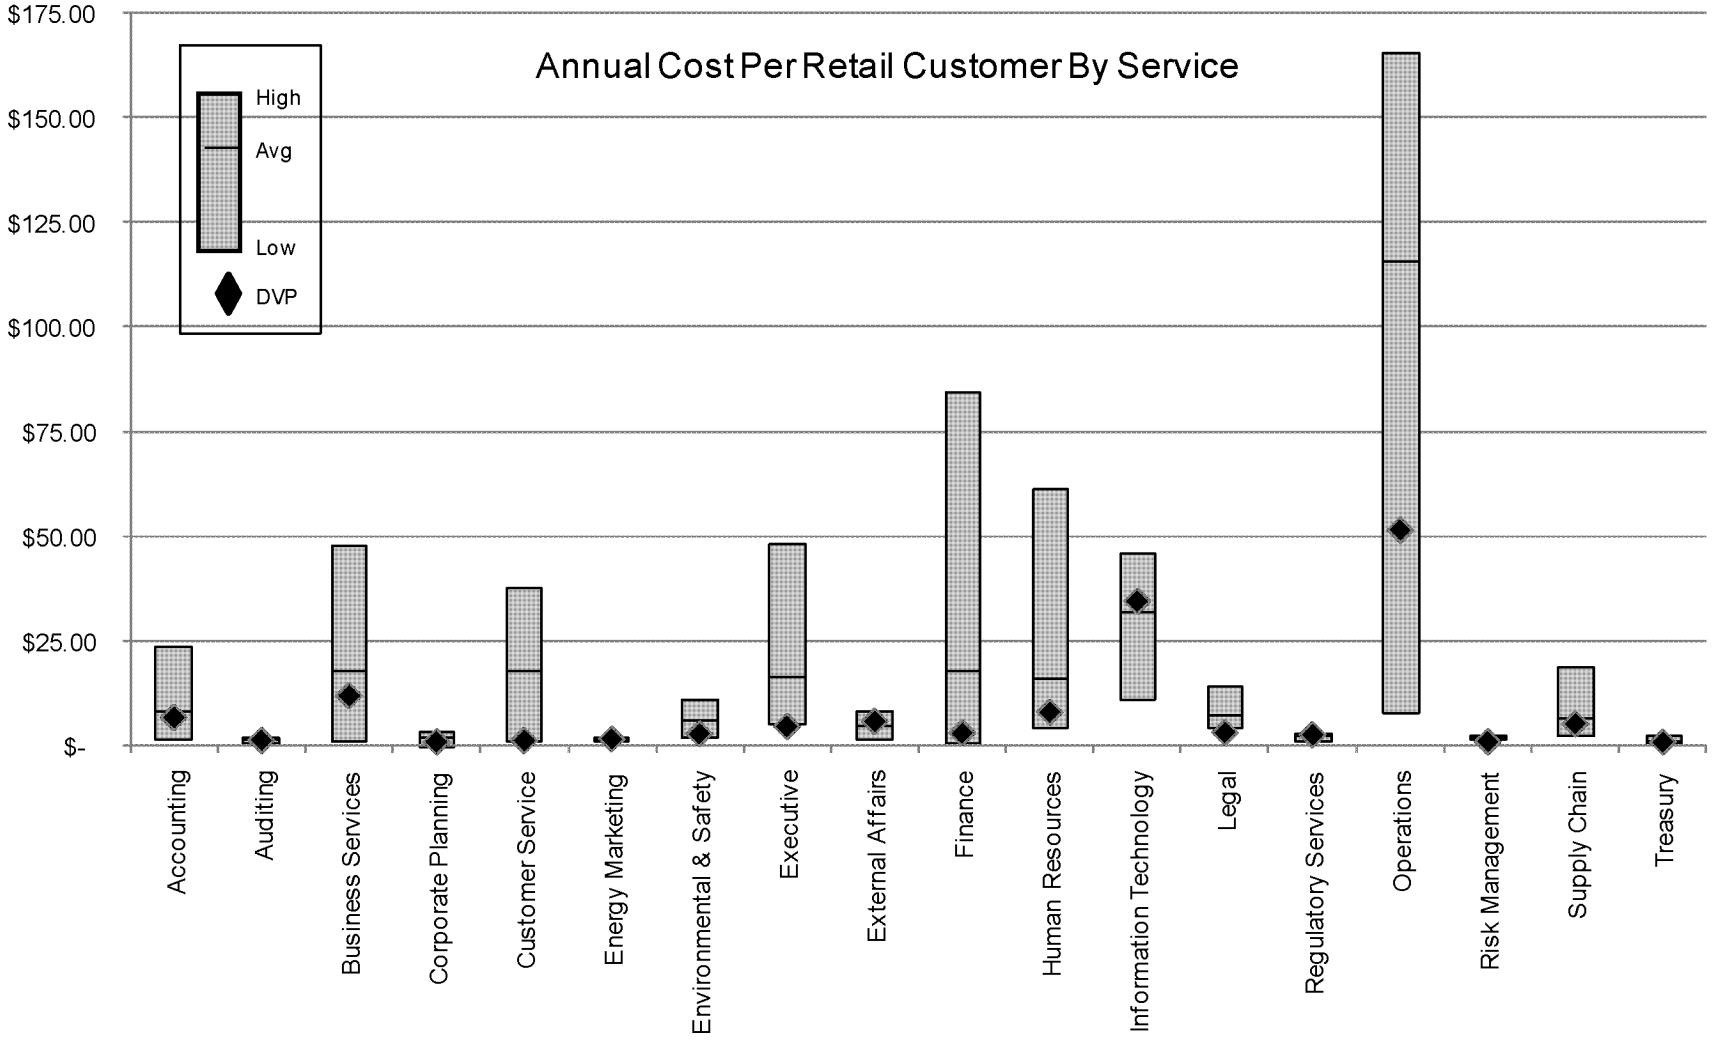
Annual Cost Per Customer by Service Category – Dominion Virginia Power's Position Relative to Comparison Group



TN-COC-01-Q36-ATTACHMENT 1
Page 1070 of 1175

V – Question 2 – Provision of Services at the Lower of Cost or Market

Comparison Methodology

During 2008, two affiliates, DRS and Dominion Technical Solutions, Inc. ("DTech") billed Dominion Virginia Power approximately $387.7 million in service-related charges. These represent 98% of affiliate's service-related charges to Dominion Virginia Power during 2008.

Dominion Virginia Power's billings from these affiliates were market-tested by comparing the cost per hour for DRS and DTech services to those of outside service providers to whom those services could be outsourced. The outside providers selected for comparison were:

- Attorneys – legal and corporate secretary services
- Management Consultants – executive management, external affairs, human resources, communications services
- Certified Public Accountants – accounting, tax, finance, treasury, internal audit, and rates and regulatory services
- Information Technology Consultants – information technology services
- Professional Engineers – engineering and operations-related services

Calculation of Affiliates' Hourly Rates

This study assigned DRS and DTech affiliate charges to one of the five outside provider categories (listed above) based on the specific nature of the service provided to Dominion Virginia Power. For instance, the charges from DRS' internal auditing cost center were assigned to the CPA cost pool.

Certain adjustments were necessary to construct the DRS/DTech-related cost pools that are reflective of how outside providers recover their costs.

- Travel Expenses – In general, client-related travel expenses are not recovered by outside service providers through their hourly billing rates. Rather, actual out-of-pocket travel expenses are billed to clients in addition to fees for professional services. Thus, it is appropriate to remove these charges from the DRS/DTech hourly rate calculation.
- Outside Services – These expenses are not associated with the cost of DRS/DTech personnel performing services for Dominion Virginia Power (outside firms perform the work under DRS and DTech direction). Charges from outside professional firms to perform certain corporate-wide services (*e.g.*, legal, financial audit, actuarial services) represent services that have, in effect, already been outsourced by DRS/DTech.
- Other Non-Service Expenses – These are various DRS/DTech-incurred fees and expenses to which Dominion Virginia Power is assigned its appropriate share. They are not related to the performance of services by DRS and DTech personnel for Dominion Virginia Power. An outside provider would not be expected to recover these costs in their hourly billing rates. Examples of these items include financing fees and material expenses.
- Enterprise Software Expenses – DRS arranges for enterprise-wide licenses for certain mainframe and server software. In doing so, DRS lowers the cost of this software through economies of scale. These savings are passed on to Dominion Virginia Power and affiliates who use the applications. Outside providers would expect to recover enterprise software expenses over and above their hourly rates. For instance, an outside provider that would take over support of the corporation's SAP applications,

would not try to recover the annual license fees paid to SAP in their hourly billing rates. Rather, a separate charge would be established for these costs.

- Transportation-Related Cost Centers – DRS provides aviation services to Dominion Virginia Power and its affiliates. This is a discrete service and not part of the cost of other services.
- Customer Accounts Services-Related Cost Centers – These are DRS services that would not be provided by any of the five outside professional service provider categories. Thus, these costs are tested in connection with the customer account services expense comparison in Chapter VI.

Exhibit 8 is an analysis of these adjustments from DRS/DTech 2008 service-related charges to Dominion Virginia Power. The net testable DRS charges of $301.5 million were subjected to a lower of cost or market pricing test.

Based on the nature of the services provided by each DRS cost center, testable charges were assigned to the five outside provider categories, as shown in Exhibit 9. A few cost centers provide general support for the DRS organization, and do not provide services directly to Dominion Virginia Power. For purposes of this study, these cost centers were designated as "overhead," and their expenses are later allocated to the five outside provider cost pools. Office facility cost centers are the largest and make up the majority of overhead charges. Test year DRS hours charged to Dominion Virginia Power are compiled by outside provider category in Exhibit 10. The categorization of hours was also based on the same cost center-by-cost center assignment used for DRS dollar charges.

Based on the cost and hour pools, DRS' 2008 hourly rates were developed for each of the five provider categories. Exhibit 11 shows the calculations involved in creating hourly rates that are compared to the rates of outside providers.

Outside Service Provider Hourly Rates

The next step in the cost comparison was to calculate the average billing rates for each type of outside service provider. The source of this information and the determination of the average rates are described below.

It should be noted that professionals working for three of the five outside provider categories may be licensed to practice by state regulatory bodies. However, not every professional working for these firms is licensed. For instance, among Virginia certified public accounting firms, only more experienced staff are predominantly CPAs, as shown in the table below. Some DRS employees also have professional licenses. Thus, it is valid to compare the DRS' hourly rates to those of the outside professional service providers included in this study.

Position	% In VA Who Are CPAs
Partners/Owners	98%
Directors (over 10 years experience)	86%
Managers (6-10 years experience)	88%
Sr Associates (4-5 years experience)	81%
Associates (1-3 years experience)	23%
New Professionals	0%

Source: AICPA's National PCPS/TSCPA Management of an Accounting Practice Survey (2008)

Attorneys

The Virginia State Bar does not survey its members as to their hourly billing rates. In addition, publicly available billing rate information could not be found for Virginia attorneys. Therefore, an estimate of Virginia attorney rates was developed from two surveys conducted by Lawyers Weekly in the states of Michigan and Massachusetts. As presented in Exhibit 12, the average rate for each firm was adjusted for the cost of living differential between its location and Richmond, Virginia. The Lawyers Weekly surveys included rates in effect at December 31, 2007. Thus, the 2007 average rate was escalated to June 30, 2008—the midpoint of the test year ended December 31, 2008.

Management Consultants

The cost per hour for management consultants was developed from a 2008 survey performed by the Association of Management Consulting Firms—an industry trade organization. The survey includes rates that were in effect during 2007 for firms throughout the United States. Consultants typically do not limit their practice to any one region and must travel to a client's location. Thus, the U.S. national average is appropriate for comparison.

The first step in the calculation, presented in Exhibit 13, was to determine an average rate by consultant position level. From these rates, a weighted average hourly rate was calculated based upon the percent of time that is typically applied to a consulting assignment, based on Baryenbruch & Company, LLC's experience, by each consultant position level. The 2007 average rate was escalated to June 30, 2008—the midpoint of the test year ended December 31, 2008.

Certified Public Accountants

The average hourly rate for Virginia CPAs was developed from a 2008 survey performed by the American Institute of Certified Public Accountants (AICPA). The Virginia version of this survey was used to develop hourly rates for member firms in Virginia.

As shown in Exhibit 14, a weighted average hourly rate was developed based on a set of accountant positions and a percent of time that is typically applied to an accounting assignment, based on Baryenbruch & Company, LLC's experience. This survey includes rate information in effect during 2007. Thus, the data had to be escalated to June 30, 2008—the test year's midpoint.

Information Technology Consultants

The average hourly rate for information technology consultants and contractors was developed from Baryenbruch & Company, LLC data and from information provided by DRS on hourly rates it actually paid to IT contractors during 2008. As shown in Exhibit 15, that data was compiled, and a weighted average was calculated based on a percent of time that is typically applied to an IT consulting assignment, based on Baryenbruch & Company, LLC's experience,

Professional Engineers

Hourly rate information for professional engineering firms was developed from Baryenbruch & Company, LLC data. As shown in Exhibit 16, an average rate was developed for each engineering position for 9 engineering firms. Then, using a typical percentage mix by position that is typically applied to an engineering assignment, based on Baryenbruch & Company, LLC's experience, a weighted average cost per hour was calculated.

Affiliates and Outside Providers Cost Comparison

As shown in the table below, DRS/DTech's costs per hour during 2008 are significantly lower than those of outside providers.

	Test Year Cost Per Hour Difference		
Service Provider	DRS	Outside Providers	Difference - DRS Greater(Less) Than Outside
Attorney	$ 147	$ 264	$ (116)
Management Consultant	$ 125	$ 214	$ (89)
Certified Public Accountant	$ 77	$ 122	$ (45)
IT Consultant	$ 90	$ 160	$ (70)
Professional Engineer	$ 93	$ 119	$ (26)

Based on these cost per hour differentials, and the number of hours DRS/DTech billed Dominion Virginia Power during the test year, DRS/DTech's services would have cost approximately $167 million more from outside providers, as calculated below. This is 55% more than DRS/DTech's total charges to Dominion Virginia Power during the test year ended December 31, 2008 ($167,068,813 / $301,515,727 = 55%).

	Test Year Total Cost Difference		
Service Provider	Hourly Rate Difference - DRS Greater(Less) Than Outside	DRS Hours Charged	Dollar Difference
Attorney	$ (116)	47,875	$ (5,577,233)
Management Consultant	$ (89)	650,861	$ (57,954,951)
Certified Public Accountant	$ (45)	451,339	$ (20,103,497)
IT Consultant	$ (70)	761,452	$ (53,145,057)
Professional Engineer	$ (26)	1,179,893	$ (30,288,076)
Net DRS Less Than Outside Providers			$ (167,068,813)

DRS and DTech are obligated to provide Dominion Virginia Power with services at the lower of cost or market according to the Commission's order approving the current Services Agreement. As a final step in this lower of cost or market pricing analysis, the 2008 income statements of both DRS and DTech were reviewed. Both were found to have no net income. This provides further evidence that Dominion Virginia Power received services from the two affiliates at their cost, which is below market as discussed above.

VI - Question 3 - Reasonableness of DRS' Customer Accounts Services Costs

Comparison Methodology

Customer Accounts Services covers the following utility functions:

- Customer Call Center – customer calls/contact, credit, order taking/disposition, bill collection efforts, outage calls
- Call Center IT – maintenance of phone banks, voice recognition units, call center software applications, telecommunications
- Customer billing – bill printing, stuffing, and mailing
- Remittance processing – processing customer payments received in the mail
- Bill payment centers – locations where customers can pay their bills in person

It is difficult to compare the cost of DRS' customer accounts services-related charges to Dominion Virginia Power with outside providers of the same services because survey data is proprietary and expensive to obtain. For this reason, Dominion Virginia Power's charges from DRS for customer accounts services are compared to those of neighboring electric utilities because the data necessary to make such comparison is available to the public.

Neighboring electric utility cost information comes from the FERC Form 1 that each utility must file. FERC's chart of accounts is defined in Chapter 18, Part 101 of the Code of Federal Regulations. FERC accounts that contain customer accounts services-related expenses are Account 903 Customer Accounts Expense – Records and Collection Expense and Account 905 Customer Accounts Expense – Miscellaneous Customer Accounts Expense. Exhibit 17 provides FERC's definition of the type of expenses that should be recorded in these accounts.

In addition to the charges in these FERC accounts, labor-related overheads charged to the following FERC accounts must be added to the labor components of Accounts 903 and 905:

- Account 926 Employee Pension and Benefits
- Account 408 Taxes Other Than Income (employer's portion of FICA)

Comparison Group

Neighboring electric utilities included in the comparison group are shown in the table below. These are companies whose FERC Form 1s show amounts for Accounts 903 and 905.

Virginia	• Appalachian Power	
Kentucky	• Duke Energy Kentucky • Kentucky Power	• Kentucky Utilities • Louisville Gas & Electric
West Virginia	• Appalachian Power • Monongahela Power	• Wheeling Power
North Carolina	• Duke Energy Carolinas	• Progress Energy Carolinas
Maryland	• Baltimore Gas & Electric • Delmarva Power & Light	• Potomac Electric
Tennessee	• Kingsport Power	

Virginia Electric and Power Company
FERC Account Descriptions

903 – Customer Records and Collection Expenses

This account shall include the cost of labor, materials used and expenses incurred in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints.

Labor

1. Receiving, preparing, recording and handling routine orders for service, disconnections, transfers or meter tests initiated by the customer, excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.
2. Investigations of customers' credit and keeping of records pertaining thereto, including records of uncollectible accounts written off.
3. Receiving, refunding or applying customer deposits and maintaining customer deposit, line extension, and other miscellaneous records.
4. Checking consumption shown by meter readers' reports where incidental to preparation of billing data.
5. Preparing address plates and addressing bills and delinquent notices.
6. Preparing billing data.
7. Operating billing and bookkeeping machines.
8. Verifying billing records with contracts or rate schedules.
9. Preparing bills for delivery, and mailing or delivering bills.
10. Collecting revenues, including collection from prepayment meters unless incidental to meter reading operations.
11. Balancing collections, preparing collections for deposit, and preparing cash reports.
12. Posting collections and other credits or charges to customer accounts and extending unpaid balances.
13. Balancing customer accounts and controls.
14. Preparing, mailing, or delivering delinquent notices and preparing reports of delinquent accounts.
15. Final meter reading of delinquent accounts when done by collectors incidental to regular activities.
16. Disconnecting and reconnecting services because of nonpayment of bills.
17. Receiving, recording, and handling of inquiries, complaints, and requests for investigations from customers, including preparation of necessary orders, but excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.
18. Statistical and tabulating work on customer accounts and revenues, but not including special analyses for sales department, rate department, or other general purposes, unless incidental to regular customer accounting routines.
19. Preparing and periodically rewriting meter reading sheets.
20. Determining consumption and computing estimated or average consumption when performed by employees other than those engaged in reading meters.

Materials and expenses

21. Address plates and supplies.
22. Cash overages and shortages.
23. Commissions or fees to others for collecting.
24. Payments to credit organizations for investigations and reports.
25. Postage.
26. Transportation expenses, including transportation of customer bills and meter books under centralized billing procedure.
27. Transportation, meals, and incidental expenses.
28. Bank charges, exchange, and other fees for cashing and depositing customers' checks.
29. Forms for recording orders for services, removals, etc.
30. Rent of mechanical equipment.

Virginia Electric and Power Company
FERC Account Descriptions

905 – Miscellaneous Customer Accounts Expenses
This account shall include the cost of labor, materials used and expenses incurred not provided for in other accounts.
Labor
1. General clerical and stenographic work.
2. Miscellaneous labor.

Materials and expenses
3. Communication service.
4. Miscellaneous office supplies and expenses and stationery and printing other than those specifically provided for in accounts 902 and 903.

VI - Question 3 - Reasonableness of DRS' Customer Accounts Services Costs

Dominion Virginia Power Customer Account Services Cost Per Customer

As calculated below, Dominion Virginia Power's 2007 customer account services expense per customer was $19.52. Besides charges recorded to accounts 903 and 905 on Dominion Virginia Power's books, two other cost components were added into Dominion Virginia Power's cost pool: (1) the cost of postage for Dominion Virginia Power's customer bills printed by DRS and recorded in an administrative and general FERC account by Dominion Virginia Power, and (2) charges from East Ohio Gas for the cost of handling overflow Dominion Virginia Power customer calls to DRS.

Sources of Charges		2007 Amount
Dominion Virginia Power		
Acct 903 - Customer Records & Collection	$	32,253,336
Acct 905 - Miscellaneous Customer Accounts	$	-
Account 926 - Employee Pension & Benefits	$	3,831,664
Account 408 - Taxes Other Than Income (Employer's FICA)	$	1,451,975
Dominion Resources Services, Inc.		
DRS Cost Center 703227 - Inserting (postage)	$	8,224,414
East Ohio Gas Company	$	351,031
Total Dominion Virginia Power CAS Expenses	$	46,112,420
Total Dominion Virginia Power Customers		2,362,318
Average Cost per Customer	**$**	**19.52**

Comparison Group Cost Per Customer

Exhibit 18 shows the actual 2007 customer accounts expense per customer calculation for the electric utility comparison group. All of the underlying data were taken from each utility's FERC Form 1.

Summary of Results

As shown in the table below, Dominion Virginia Power's cost per customer is considerably less than the average of the neighboring electric utility comparison group. Based upon this data, DRS' 2007 customer accounts-related expenses charged to Dominion Virginia Power are reasonable.

VI - Question 3 - Reasonableness of DRS' Customer Accounts Services Costs

Average Customer Accounts Expense Per Customer		
Louisville Gas & Electric	$	13.71
Monongahela Power	$	16.10
Dominion Virginia Power	**$**	**19.52**

VII – Question 4 - Reasonableness of DRS' Cost Allocation Methods

Where possible, DRS directly charges affiliates for the cost of its services. In those instances where direct charging is not possible or practical because more than one affiliate is the recipient of a service, DRS allocated the associated expenses to the benefiting affiliates. Exhibit 19 shows the basis for allocation for each DRS service.

Baryenbruch & Company, LLC evaluated the allocation basis for each DRS cost center by answering following questions:

- Benefit Received – Does Dominion Virginia Power benefit from the cost center's services?
- Fairness of Allocation Bases – Does the basis by which the cost center's expenses are allocated relate to the causation of those expenses?
- Allocation Methods in Accordance with Services Agreement – Where the allocation bases those called for in the current Services Agreement between Dominion Virginia Power and DRS?

Exhibit 20 presents the results of the evaluation. For each of over 290 DRS cost centers that charged Dominion Virginia Power during 2008, the services of those cost centers were found to be pertinent to Dominion Virginia Power, and the allocation methods were found to be reasonable and related to the causation of the allocated expenses. The allocation methods used were also found to be those specified in the current Services Agreement.

Virginia Electric and Power Company
Allocation Bases for DRS Services

Service	Allocation Method
Accounting	• Payroll Accounting - Number of employees on the previous December 31 • Accounts Payable Processing - Number of accounts payable documents processed during the preceding year ended December 31 • Fixed Assets Accounting - Dominion Company fixed assets added, retired or transferred during the preceding year ended December 31 • Accounts Receivable Processing - Number of payments processed during the preceding year ended December 31
Auditing	• Total operating expenses, excluding purchase gas expense, purchase power expense (including fuel expense), other purchased products and royalties, for the preceding year ended December 31
Legal and Regulatory Services	• Total operating expenses, excluding purchase gas expense, purchase power expense (including fuel expense), other purchased products and royalties, for the preceding year ended December 31
Information Technology	• LDC/EDC Computer Applications - Number of customers at the end of the preceding year ended December 31 • Other Computer Applications - Number of users or usage of specific computer systems at the end of the preceding year ended December 31 • Network Computer Applications - Number of network devices at the end of the preceding year ended December 31 • Telecommunications Applications - Number of telecommunications units at the end of the preceding year ended December 31
Software Pooling	• Number of employees as of the preceding December 31 • Number of mainframe units as of the preceding December 31
Employee Benefits/ Pension Investment	• Number of employee and annuitant accounts as of the preceding December 31

Executive/Admin (cont.)	703281 - CORP SECRETARY EXEC	$16,514	Oversees Dominion stockholder services and Corporate Secretary function	Direct Bill (No Allocation)	Yes	Yes	Yes
	703498 - CHIEF FINANCIAL OFFR	$2,837,163	Oversees the Service Company operations and is the Chief Financial Officer of Dominion	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704000 - DRS Finl Mgt Exec	$577,316	Oversees financial management for the Service company.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704001 - ELEC DISTRIB EXEC	$4,519,318	Oversees Electric Distribution - Delivery Operations	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704002 - Regulation Exec	$1,266,403	Oversees all Dominion generating assets.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704003 - Reg & Int Plang Exec	$4,336,618	Oversees Bulk Sales for Energy	Direct Bill (No Allocation)	Yes	Yes	Yes
	704004 - FIN EXEC DELIVERY	$765,142	Oversees the Finance area of the Delivery Business	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704006 - CHIEF ENVIR OFFICER	$351,754	Oversees Dominion Environmental Services to assure compliance with all applicable environmental laws and regulations.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704008 - NUCLEAR EXEC CORP	$3,338,393	Oversees the Nuclear business in Energy	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704009 - PORTFOLIO MGT EXEC	$193,598	Oversees Portfolio Management, Energy Market Services, and Field Services				
	704012 - BUS DEV & GEN CONST	$1,062,129	Executive and Administrative support for new business development & generation construction department	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704018 - FOS & HYD EXEC	$2,044,442	Oversees all F&H plants for the Energy Business	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704019 - NUCLEAR EXEC SURRY	$1,730,242	Oversees operation of Surry Nuclear Plant	Direct Bill (No Allocation)	Yes	Yes	Yes
	704020 - NUCLEAR EXEC N_ANNA	$1,265,591	Oversees operation of North Anna Nuclear Plant	Direct Bill (No Allocation)	Yes	Yes	Yes
	704021 - Regulatory Fed Exec	$254,852	Oversees operation of Dominion's regulated transmission operations	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704029 - MILLSTONE EXECUTIVE	$0	Oversees operation of Millstone Nuclear Plant				
	704062 - Gas & Elec Del Exec	$1,206,624	Delivery Executives	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704085 - Business Plang Exec	$550,352	Provide Business Planning and Market analysis for all Dominion companies	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704129 - Exec Site VP - DEK	$0	Executive & Administrative services for the Kewaunee Power Plant				
External Affairs	700237 - Legislative Outreach	$831,123	Provides operating company support - constituent complaint management; community outreach in support of local operations; management of local charitable giving activity enhancing the quality of life in the communities in which we operate; local permit and ordinance administration; political participation in local government activities and promote positive company image.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	700244 - DRS Gas Philnthrpy	$151,950	Responsible for directing and managing Dominion Foundation and Philanthropy programs for the corporation. Oversee giving programs in all regions for all companies. Provide support to Officers and senior management on various community and corporate relations activities/initiatives (primarily in PA)	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	700578 - State & Federal Affr	$133,389	Provides Gederal, State and Local advocacy support and education as well as developing and maintaining professional relationships with policy makers, elected officials, staff and opinion leaders. Also includes PAC and grassroots support and overall departmental coordination.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	700581 - COMMUNITY AFFAIRS	$1,085,480	Provide a positive public perception of the company, through (1) Philanthropic Programs (EnergyShare, Fan Care, Volunteers, (2) Information Programs (Educational Outreach, Grass roots, Speakers Forumand Tours) and (3) Constituency Programs (African American Leadership Series, Executive Roundtables, Special Events).	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	701676 - FEDERAL AFFAIRS	$1,146,228	Track and draft legislation which affects all aspects of Dominion. Lobby to pass postive legislation or kill adverse legislation. Serve as liaisons to officials who are decision makers for legislation and/or regulations which affect Dominion. Market Dominion to provide a better understanding of who Dominion is and what we do.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	701677 - DT I State & Local	$32,824	Build and maintain relationships with local and state elected officials. Provide a visible presence within Dominion's franchised service area.	Direct Bill (No Allocation)	Yes	Yes	Yes
	701678 - MA STATE & GOVT AFF	$233,122	Develop responsible public policy positions to enhance the company's competitive position, e.g. increase revenues and reduce expenses. Also provide critical policy analysis of issues and trends afecting Dominion's business strategies.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	702006 - NE State+Local Affrs	$37,303	Provides service to the organization by focusing on state legislative actions, state regulatoy rulemakings, permitting, project coordination and political action committee coordination/solicitation. Also provides extensive knowledge of the business along with proactively seeking bottom line savings to the organization, builds and maintains relationships as well as providing community involvement.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	702007 - CORP PUB POLICY	$1,041,736	Coordinator of State and Local Gov't Affrs & Corp Public Policy. Will also house the services of the Polical Affairs Mgr (CRG).	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	702014 - CORP PHILANTHROPY	$1,063,838	Provide services in support of corporation strategies for managing relations with federal, state, and local government and agencies. Responsible for administering the corporate contributions program.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	702016 - INTERNET COMM	$628,760	Creation and maintenance of www.dom.com	O&M - All VP Companies	Yes	Yes	Yes
	703287 - DRS NUC PUB AFRS	$1,965	Handle public relations, government and regulatory affairs for nuclear	Direct Bill (No Allocation)	Yes	Yes	Yes
	704068 - MW Comm Affrs StLoc	$51,402	Build and maintain relationships with local and state elected officials. Provide a visible presence within Dominion's franchised service area.	Direct Bill (No Allocation)	Yes	Yes	Yes

	704093 - DRS DEC Tred VPET	$0	Capture VPET allocated costs from the DEC cost pool				
	704094 - DRS DEC Tred CNGT	$0	Capture CNGT allocated costs from the DEC cost pool				
	704095 - DRS DEC Tred DTECH	$0	Capture DTECH allocated costs from the DEC cost pool				
	704137 - DRS Facilities-Hang	$127,665	Provide building maintenance and building-related project support for the Richmond Hanger.	Direct Bill or Allocation (O&M factor)	Yes	Yes	Yes
	704237 - DRS Facil-ProjCont	$13,204	Provide building maintenance and building-related project support for the Tredegar Street Complex.	Square Footage	Yes	Yes	Yes
Fleet Mgt	702045 - DRS FLEET S&S	$817,621	Provides management/oversight to the Fleet Management function across the entire enterprise. Includes Fleet Systems support, Management of the the acquisition/disposal function including vehicle specifications, and oversight of the maintenance function.	Number of Vehicles	Yes	Yes	Yes
	702054 - FLEET-DRS (NO LABOR)	$0	M4 ENTRY	Allocated within DRS before billing			
Generation Business Development	700011 - BUS DEVELOPMT	$2,455	Grow the Company's earnings through the development and acquisition of power generating stations.	Direct Bill (No Allocation)	Yes	Yes	Yes
	704069 - Bus Dev - Nuclear	$25,151	Nuclear project support for new business development and generation construction department	Direct Bill (No Allocation)	Yes	Yes	Yes
	704086 - Const Fin Mgmt & Con	$1,623,335	Project support for new business development & generation construction department	Direct Bill (No Allocation)	Yes	Yes	Yes
	704087 - Gen Dev - Bus Devel	$399,876	Project support for new business development & generation construction department	Direct Bill (No Allocation)	Yes	Yes	Yes
	704104 - Bus Dev- Renewables	$51,521	Renewables project support for new generation construction department	Direct Bill (No Allocation)	Yes	Yes	Yes
Generation Business Operations	700035 - DRSN - NUC OVERSIGHT	$2,388,050	Audit nuclear sites to insure compliance with procedures	Direct Bill (No Allocation)	Yes	Yes	Yes
	700920 - DRSN-RECORDS MGMT	$1,157,775	Provide records management support to nuclear and fossil & hydro	Direct Bill (No Allocation)	Yes	Yes	Yes
	701454 - DRSF - F/H(Inact)	$1,121	Perform all operations and maintenance activities for VPREG assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	701510 - DRSN-NUC LIC/OPS SUP	$2,513,983	Provide licensing and operational support to insure compliance with local, state and federal laws; interact with NRC	Direct Bill (No Allocation)	Yes	Yes	Yes
	701512 - DRSN -EMERGENCY PLAN	$929,943	Maintain the nuclear EP program, interact with local, state and federal emergency organizations to insure compliance with emergency plans, run drills, maintain EP facilities	Direct Bill (No Allocation)	Yes	Yes	Yes
	701516 - DRSN - NUC TRAINING	$2,550,359	Oversee nuclear training program (initial, requalification, and special programs), develop course work and training materials, insure compliance with nuclear training requirements	Direct Bill (No Allocation)	Yes	Yes	Yes
	701524 - DRSN - NUC FLT INTEG	$919,912	Provide licensing and operational support to insure compliance with local, state and federal laws; interact with NRC	Direct Bill (No Allocation)	Yes	Yes	Yes
	701527 - DRSN - EMP CONCERNS	$462,464	Identify and resolve safety and compliance issues a Dominion's nuclear stations.	Direct Bill (No Allocation)	Yes	Yes	Yes
	701532 - DRSN - ADMIN SVCS	$926,486	Director of nuclear security and emergency preparedness functions	Direct Bill (No Allocation)	Yes	Yes	Yes
	701534 - DRSN-ACCESS SERVICES	$1,281,463	Nuclear security, background checks, administer fitness for duty program	Direct Bill (No Allocation)	Yes	Yes	Yes
	701865 - DRSN-NUC ORG EFF	$294	Provide direction for the move of the nuclear business to a deregulated environment	Direct Bill (No Allocation)	Yes	Yes	Yes
	703038 - DRSN - NUC FUEL PROC	$1,828,865	Purchase uranium and oversee the processing of nuclear fuel	Direct Bill (No Allocation)	Yes	Yes	Yes
	703173 - DRSF - OPE(Inact)	$869	Perform all operations and maintenance activities for VPREG assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703174 - DRSF - OUTAGE PLANNG	$3,377,317	Perform all operations and maintenance activities for VPREG assets mainly based on outage schedules.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703175 - DRSF-F&H (Inact)	$58	Provide overall system asset management services for both capital & expense for VP approvals.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703178 - DRSF - EMISSIONS MON	$2,626,291	Perform all operations and maintenance activities for VPREG assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703179 - DRSF - F&H(Inact)	$1,787	Provide system ash, coal surveying, lime cost savings	Direct Bill (No Allocation)	Yes	Yes	Yes
	703184 - DRSF - Tech Svc Supp	$1,322,914	Oversee daily F&H System Operations	Direct Bill (No Allocation)	Yes	Yes	Yes
	703185 - DRSF-Tech Svc OpSupp	$1,555,396	Oversee daily F&H System Operations	Direct Bill (No Allocation)	Yes	Yes	Yes
	703186 - DRSF - Inactive	$43,275	Engineering construction to modify existing systems to utilize new synthetic fuel in place of coal	Direct Bill (No Allocation)	Yes	Yes	Yes
	703187 - DRSF-Proj Mgmt	$2,888,314	Provides process improvement, configuration management & business development support for F&H System stations	Direct Bill (No Allocation)	Yes	Yes	Yes
	704013 - DRS GEN PROJ MGT	$29	Perform all engineering services for Virginia Power & Dominion Energy Inc. assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	704050 - DRSF-CC PROJ UNREG	$0	Perform all project management & engineering services for combined cycle CT projects for VPDEI assets.				
	704052 - DRSF-F&H EXEC ADMIN	$297,603	Perform all long term planning & cost evaluations for new & replacement projects	Direct Bill (No Allocation)	Yes	Yes	Yes
	704064 - DRSN-NUC SPEC PROJ	$578,319	Oversee all regulated and unregulated nuclear six sigma projects	Direct Bill (No Allocation)	Yes	Yes	Yes
	704067 - DRSF-STA OPER MGT	$190,590	O&M Management/consulting to Merchant/System stations	Direct Bill (No Allocation)	Yes	Yes	Yes

	701832 - DRSN-Dir Nuc Eng Prg	$1,811,388	Address engineering issues that were identified during 2003 INPO evaluation.	Direct Bill (No Allocation)	Yes	Yes	Yes
	701833 - DRSN-NUCLEAR PROGMS	$791,614	Provide engineering support on valve, motor, etc programs.	Direct Bill (No Allocation)	Yes	Yes	Yes
	701850 - DRSN-NUC PROJS DEPT	$334,074	Director of nuclear projects department, oversee all large nuclear projects, project cost control and estimating	Direct Bill (No Allocation)	Yes	Yes	Yes
	701852 - DRSN-NPD CIVIL/MECH	$0	Provide engineering support for large civil and mechanical capital and O&M projects at nuclear sites				
	701853 - DRSN-NPD PROJECTS	$137,032	Manage nuclear license renewal projects - North Anna and Surry, Millstone, Surry ISFSI	Direct Bill (No Allocation)	Yes	Yes	Yes
	701854 - DRSN-NPD ELEC/I&C PR	$61,191	Provide lead engineering support on all electrical and I&C projects for nuclear	Direct Bill (No Allocation)	Yes	Yes	Yes
	701855 - DRSN-NPD CIVIL/MECH	$139,608	Provide lead engineering support on all civil/mech projects for nuclear	Direct Bill (No Allocation)	Yes	Yes	Yes
	701856 - DRSN-NPD PROJ CTLS	$864,210	Provide project cost estimating and reporting assistance to nuclear engineering groups	Direct Bill (No Allocation)	Yes	Yes	Yes
	701860 - DRSN-EARLY SITE PERM	$984,939	Evaluate sites for new nuclear construction	Direct Bill (No Allocation)	Yes	Yes	Yes
	703172 - DRSF - SYSTEM SUPP	$2,710,407	Perform all engineering services for both VPREG & VPDEI assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703175 - DRSF-F&H	$0	Provide overall system asset management services for both capital and expense for VP approvals				
	703176 - DRSF - SYSTEM ENG	$2,267,203	Perform all engineering services for both VPREG & VPDEI assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703179 - DRSF - F&H	$0	Provide system ash, coal surveying, lime cost savings				
	703180 - DRSF - ENGINEERING	$413,718	Perform all engineering services for both VPREG & VPDEI assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703181 - DRSF - ELECTR I & C	$5,381,613	Perform all engineering services for both VPREG & VPDEI assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703182 - DRSF - BOP SYSTEMS	$1,549,589	Perform all engineering services for both VPREG & VPDEI assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703183 - DRSF - ENGR ENVIRON	$1,169,420	Perform all operations and maintenance activities for VPREG assets.	Direct Bill (No Allocation)	Yes	Yes	Yes
	703186 - DRSF	$0	Engineering and construction to modify existing systems to utilize new synthetic fuel in place of coal				
	703188 - DRSF - F&H GEN PROJ	$809,226	Engineer and build new coal facility in Southwest Virginia	Direct Bill (No Allocation)	Yes	Yes	Yes
	704088 - F&H Con- Engineering	$615,609	Project support for new business development & generation construction department	Direct Bill (No Allocation)	Yes	Yes	Yes
	704089 - Comb Turb & Renew	$1,013,735	Project support for new business development & generation construction department	Direct Bill (No Allocation)	Yes	Yes	Yes
General Services	703211 - DRS Off Svc Mgt	$170,657	Provide management/oversight to various general services functions across the enterprise, including Printing Services, Mailing Services, and Records Management	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	703214 - DRS DOCUMENT SVCS	$1,151,913	Provide printing services across the entire enterprise.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	703226 - DRS MAIL	$446,116	Provide mailing services (except Inserting) across the entire enterprise -- excludes customer bills.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	703227 - INSERTING - DRS	$10,247,339	Provides inserting & mailing services for all customer bills for Virginia Power, EOG, PNG, and HGI.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704036 - DRS Records Mgt	$206,631	Provides oversight & management of the Records Management function across the entire enterprise.	O&M expenses excluding cost of sales items	Yes	Yes	Yes
	704043 - DRS FORMS & PROC	$182,669	Provides support across the entire enterprise for company forms and procedures.	O&M expenses excluding cost of sales items	Yes	Yes	Yes

Governance Practices Associated With DRS Charges

Several management practices exist to ensure that DRS charges to Dominion Virginia Power are appropriate. The most important of these approval and monitoring activities are described below.

Budget Process

Every year, DRS prepares a 5-year spending plan, the first two years of which show spending by month for each DRS cost center. The budgeting process begins in mid-July with each DRS cost center manager developing his/her unit's budget. A significant factor in each cost center's budget is the discussions that occur between DRS cost center managers and their affiliate operating unit (*e.g.*, Dominion Virginia Power) customers regarding the level and nature of future services they will require. After cost center budgets have been prepared, they are subjected to DRS management review and approval through September. During September, affiliate operating units are formally presented with their portion of DRS' proposed budget. Affiliates review and approve their DRS budget after considering the levels of services they require from DRS.

Variance Analysis Process

On a monthly basis, DRS Financial & Business Services and DRS Accounting analyze and explain material variances from budget. This variance analysis is applied as follows:

- DRS' income statement line item
- Billings by each of DRS' 26 service categories
- Billings by affiliate (*e.g.*, Dominion Virginia Power)

Dominion Virginia Power's own variance analysis process requires material variances between budget and actual DRS charges be researched and explained.

Affiliate Review of DRS Monthly Bills

Every month, a bill is rendered by DRS to each affiliate customer. An email is sent to Dominion Virginia Power segment controllers notifying them the DRS bill is available for review on the third business day of the month following the applicable billing month. According to corporate policy, inter-company invoices will not be paid until they have been reviewed and approved by the affiliate being billed.

The bill provides sufficient detail for Dominion Virginia Power to use in its variance analysis process. Dominion Virginia Power personnel also have the ability to drill down into SAP's transaction detail to identify and scrutinize the source of charges from DRS cost centers.

After Dominion Virginia Power controllers review their portion of the Dominion Virginia Power bill, they notify DRS Accounting of their approval or any disputes. If the bill is not disputed by the 25th day of the month, the invoice is released for payment.

Cost Allocation Manual

DRS maintains an Accounting Policy and Cost Allocation Manual (CAM) that documents the process by which it assigns costs to affiliate customers. Baryenbruch & Company, LLC's review of the CAM found it to be a comprehensive reference document that provides thorough directions

to DRS personnel responsible for assigning expenses to Dominion Virginia Power. DRS' cost allocation methodologies comply with governing requirements in the CAM.

DIRECT TESTIMONY
OF
PATRICK L. BARYENBRUCH
ON BEHALF OF
VIRGINIA ELECTRIC AND POWER COMPANY
BEFORE THE
STATE CORPORATION COMMISSION OF VIRGINIA
CASE NO. PUE-2009-_____

Q. Please state your name and business address.

A. Patrick L. Baryenbruch, 2832 Claremont Road, Raleigh, North Carolina 27608.

Q. Please describe your educational and professional background.

A. During my consulting career, I have performed consulting assignments for approximately 50 utilities and 10 public service commissions. I have participated as project manager, lead consultant, or staff consultant for 24 commission-ordered management and prudence audits of public utilities. Among other duties, I have been responsible for evaluating the areas of affiliate charges and allocation of corporate expenses in the commission-ordered audits of Connecticut Light and Power, Connecticut Natural Gas, General Water Corporation (Pennsylvania Operations), Philadelphia Suburban Water Company (now Aqua America), and Pacific Gas & Electric Company. I received a Bachelor of Business Administration degree in Accounting from the University of Wisconsin-Oshkosh, and a Master of Business Administration degree from the University of Michigan. A statement of my background and qualifications is attached as Appendix A.

Q. What is your current title and what are your duties and responsibilities in your current position?

A. I am the President of my own consulting practice, Baryenbruch & Company, LLC, which was established in 1985. In that capacity, I provide financial and management and consulting services to utilities and their regulators.

Q. Please describe the reason for your testimony in this case.

A. I am presenting the results of my study which evaluated the reasonableness of services provided by Dominion Resources Services, Inc. ("DRS") and other affiliates during the 12 months ended December 31, 2008 to Virginia Electric and Power Company ("Dominion Virginia Power" or the "Company"). This study was performed in conjunction with Dominion Virginia Power's 2009 Base Rate Filing. The study is attached as Company Exhibit No. ___, PLB, consisting of Schedule 1, which was prepared under my supervision and is correct to the best of my knowledge and belief.

Q. What were the objectives of your study?

A. My study determined the reasonableness of Dominion Virginia Power's charges from DRS and other affiliates for services provided during 2008. Reasonableness was evaluated by answering the following four questions:

(1) Are service-related affiliate charges to Dominion Virginia Power reasonable compared to other utility service companies?

(2) Did affiliates provide services to Dominion Virginia Power at the lower of cost or market during 2008?

(3) Is the cost of DRS' customer accounts services comparable to those of other utilities?

(4) Are DRS' cost allocation methods reasonable?

Q. What conclusions did you reach concerning Question No. 1 – whether service-related affiliate charges to Dominion Virginia Power are reasonable compared to other utility service companies?

A. I concluded that the service-related affiliate charges incurred by Dominion Virginia Power were reasonable as to both cost and scope. Specifically, I determined that:

(1) DRS and other affiliates provide Dominion Virginia Power with services similar to those provided by other utility service companies.

(2) DRS' cost per Dominion Virginia Power customer is reasonable and favorable as compared to the cost per customer for similar utility service companies. Dominion Virginia Power was charged an average of $145 per customer by DRS, approximately 16% lower than an average of $172 per customer for comparison group service companies. This determination was based on service company information included in Form 60, which must be annually filed with the Federal Energy Regulatory Commission ("FERC") by electric and combination electric/gas utility holding companies. The comparison is based on data

from 2007, the latest year for which Form 60 information is currently available.

Q. What conclusions did you reach concerning Question No. 2 – whether affiliates provided services to Dominion Virginia Power at the lower of cost or market during 2008?

A. I made the following determinations:

(1) Affiliate services were provided to Dominion Virginia Power during 2008 at the lower of cost or market.

(2) On average, the hourly rates for outside service providers are 55% higher than comparable hourly rates charged by Dominion Virginia Power's affiliates.

(3) If all of the managerial and professional services now provided by its affiliates had been outsourced in 2008, Dominion Virginia Power and its customers would have incurred $167 million in additional expenses.

(4) Affiliates' charges do not include any profit markup. Only the actual cost of the service provided is being charged and proposed for recovery from Dominion Virginia Power customers.

Q. What did you determine concerning Question No. 3 – whether the cost of DRS' customer accounts services is comparable to that of other utilities?

A. I determined that the cost of DRS' customer accounts services is well below the average of the neighboring electric utility comparison group. During 2007, Dominion Virginia Power's customer accounts cost per customers was $19.52, or

more than 32% below the comparison group's 2007 average of $28.93. The comparison is based on data from 2007, the latest year for which FERC Form 1 information is available.

Q. What conclusions did you reach concerning Question No. 4 – whether DRS' cost allocation methods are reasonable?

A. DRS' methods for allocating expenses to affiliates such as Dominion Virginia Power are both reasonable and related to the causation of the allocated expenses. For each of over 290 DRS cost centers that charged Dominion Virginia Power during 2008, the services of those cost centers were found to be necessary for a utility like Dominion Virginia Power to operate. The cost allocation methods employed during 2008 are in accordance with the current DRS Services Agreement dated January 1, 2003, which has been approved by the Virginia State Corporation Commission.

Q. What other support did you find evidencing the reasonableness of DRS' charges to Dominion Virginia Power?

A. The following factors, among others, stood out as being particularly instructive of the care with which DRS' costs are allocated to Dominion Virginia Power:

(1) Governance Practices Associated with DRS Charges – Several management practices are in place to ensure that DRS' charges to Dominion Virginia Power are appropriate. These include DRS' budgeting and variance analysis processes, and the scrutiny given to DRS' monthly bill by Dominion Virginia Power personnel.

(2) Cost Allocation Manual – DRS maintains an Accounting Policy and Cost Allocation Manual ("CAM") that documents the process by which it assigns costs to affiliate customers. Baryenbruch & Company, LLC's review of the CAM found it to be a comprehensive reference document that provides thorough directions to DRS personnel responsible for assigning expenses to Dominion Virginia Power. DRS' cost allocation methodologies comply with governing requirements in the CAM.

Q. Does this complete your testimony?

A. Yes, it does.

EXHIBIT PLB-1

Market Cost Comparison of Affiliate Company Charges To Massanutten Public Service Corporation

I - Introduction

Purpose Of This Study

This study was undertaken to determine if Massanutten Public Service Corporation (Massanutten) was charged the lower of cost or market for services provided by its affiliate, Water Service Corporation (WSC) during the 12 months ended June 30, 2006.

Study Results

The following conclusions can be drawn from this study:

- Massanutten was charged the lower of cost or market for managerial and professional services during the 12 months ended June 30, 2006.
- On average, the hourly rates for outside service providers are almost **74% higher** than the WSC's hourly rates.
- If all the managerial and professional services now provided by WSC had been out-sourced during the 12 months ended June 30, 2006, Massanutten and its ratepayers would have incurred an **additional $403,000** in expenses.

II - Background

Overview of Massanutten and Its Principal Affiliate Entities

Massanutten is a wholly-owned subsidiary of Utilities, Inc., which is one of the largest privately-owned water and wastewater companies in the US. Utilities, Inc. holds around 90 subsidiaries that operate more than 800 systems in 17 states, mainly in the eastern US and it serves more than 300,000 customers. About half of Utilities, Inc.'s revenue comes from water services and the other half from wastewater services; residential customers account for approximately 90% of sales. Utilities, Inc. also provides reuse water for irrigation purposes and for golf courses and car washes.

Massanutten has no employees of its own. All personnel serving Massanutten are WSC employees. Employees located in Virginia are involved in operating and maintaining the water and waste water utility facilities and equipment. Other WSC employees serving Massanutten are located in two regional offices and in the corporate headquarters in Northbrook, Illinois. Regional offices provide operations, engineering and call center services. Headquarters personnel provide the following services to operating utilities:

- Executive Management
- Engineering
- Operations
- Accounting
- Legal
- Billing and Customer Relations
- Construction
- Regulatory
- Information Technology
- Human Resources

Exhibit 1 shows which WSC office performs water utility services for Massanutten.

Note A: Legal services were provided entirely by outside attorneys during the June 30, 2006 test year. Since then, in-house legal counsel has been hired by WSC.

Test Year Affiliate Charges To Massanutten

During the 12 months ended June 30, 2006, WSC charged Massanutten $546,010 for services. These transactions are covered by a service agreement between WSC and Massanutten dated July 20, 2005. The agreement describes the allocation methods for those expenses/costs that cannot be charged directly to Massanutten. It specifies that services are to be rendered at cost and without profit to the Service Company.

III – Service Company Market Cost Comparison

Cost Comparison Methodology

WSC's charges to Massanutten were tested to determine if they were priced at the lower of cost or market. This was accomplished by comparing the cost per hour for WSC managerial and professional services to those of outside service providers to whom this work could be outsourced. Based on the nature of the WSC services, it was determined that the following outside providers could perform the categories of services indicated below:

- Management Consultants – executive and administrative management and human resources services
- Certified Public Accountants – accounting, information technology and rates/regulatory services
- Professional Engineers – operations, engineering, construction management

WSC's hourly rates were calculated for each service provider category, based on the dollars and hours charged to Massanutten during the 12 months ended June 30, 2006. Hourly billing rates for outside service providers were developed using third party surveys or directly from information furnished by outside providers themselves.

The last step in the market cost comparison was to compare WSC's average hourly costs to the average cost per hour for outside providers.

WSC Hourly Rates

WSC's hourly rates for management and professional services were calculated for charges during the 6 months ended June 30, 2006, a sample of the test year. As shown below, WSC salaries charged to Massanutten during that period totaled approximately $196,000 or 54% of total salaries charged.

		Quarter Ended				
Account	Item	9/30/05	12/31/05	3/31/06	6/30/06	Total
6019040	Salaries - Operations	$ 66,981	$ 67,177	$ 77,968	$ 72,768	$ 284,894
6019050	Salaries - Office	$ 14,969	$ 17,361	$ 20,147	$ 25,227	$ 77,704
	Total	$ 81,950	$ 84,538	$ 98,115	$ 97,995	$ 362,598
				$196,110		
				selected for review		

The sample period salaries were analyzed to determine which outside provider Massanutten would turn to provide the related services and, thus, market testable. In Schedule 2 (page 8), management and professional salaries were assigned to one of three outside service providers and separated from administrative and craft salaries. This was done because management and

professional services are testable while administrative staff expenses are considered an overhead that are "loaded" onto management and professional hourly rates and craft services are not market testable due to the lack of publicly available hourly rate survey data. Administrative staff salaries were determined to be 3.1% of management and professional expenses during the sample period, as calculated below.

Administrative Support Salaries (Sch 2)	$ 2,750
Management & Professional Salaries (Sch 2)	$ 89,599
Administrative Support as Percent of Management & Professional	**3.1%**

Schedule 2 lists salary-related charges by WSC position for the one or more employees occupying that position who charged Massanutten during the test year.

Schedule 3 (page 9) assigns the employee hours associated with the management and professional salaries from Schedule 2 to the three outside provider categories.

Schedule 4 (pages 10-11) shows an analysis by account of WSC charges to Massanutten during the 12-months ended June 30, 2006. The purpose of this schedule is to calculate the percent of non-labor to salaries so it can be used as an overhead in calculating the WSC hourly rate cost pools.

Based on the assignment of expenses and hours from Schedules 2 and 3, and applicable overheads, WSC's hourly rates are calculated below for the sample period of the 6 months ended June 30, 2006.

	Management Consultant	Certified Public Accountant	Professional Engineer	Total
Management/Professional Salaries (Sch 2)	$ 16,356	$ 24,637	$ 48,606	$ 89,599
Overhead Items:				
Administrative Staff Salaries (3.1%) (Sch 2)	$ 502	$ 756	$ 1,492	$ 2,750
Non-Salaries-Related Expenses (30.7%) (Sch 4)	$ 5,021	$ 7,563	$ 14,922	$ 27,507
Total Cost Pool	$ 21,879	$ 32,956	$ 65,020	$ 119,855
Management and Professional Hours (Sch 3)	130	894	1,898	2,922
Average Hourly Rate	**$ 169**	**$ 37**	**$ 34**

Outside Service Provider Hourly Rates

The next step in the cost comparison was to obtain the average billing rates for each outside service provider. The source of this information and the determination of the average rates are described in the paragraphs that follow.

Management Consultants

The cost per hour for management consultants was developed from the 2006 annual survey performed by the Association of Management Consulting Firms—an industry trade organization. The first step in the calculation, presented in Schedule 5, was to determine an average rate by consultant position level. From these rates, a single weighted average hourly rate was calculated based upon the percent of time that is typically applied to a consulting assignment by each consultant position level. This survey includes rates that were in effect during 2005 for firms in the United States. Consultants typically do not limit their practice to any one region and must travel to a client's location. Thus, the U.S. national average is appropriate for comparison. This survey covered hourly rates in effect during 2005 and are assumed to be the average as of the midpoint of 12 months ended June 30, 2006.

Certified Public Accountants

The average hourly rate for Virginia certified public accountants was developed from a 2006 survey conducted by the American Institute of Certified Public Accountants (AICPA) every two years. Hourly rates in the AICPA survey are the average of firms in Virginia. The average hourly rate was calculated for a set of typical accountant positions, as shown in Schedule 6. Based on a typical staff assignment by each accountant position, a weighted average hourly rate was calculated. This survey covered hourly rates in effect during 2005 and are assumed to be the average as of the midpoint of 12 months ended June 30, 2006.

Professional Engineer

The association for professional civil engineers, the American Society of Civil Engineers, does not survey its members' billing rates. Neither does the National Society of Professional Engineers, the association for the entire engineering profession. Thus, professional engineer hourly rates were provided by WSC for two firms that are periodically used in Virginia when outside engineering services are required. As shown in Exhibit 7, an average rate was developed for each engineering position. Then, using a typical percentage mix by position for a typical engineering project, a weighted average cost per hour was calculated.

WSC – Outside Provider Cost Comparison

As shown in the table below, WSC costs per hour are considerably lower than those of outside providers during the sample 6 month period ended June 30, 2006.

Service Provider	WSC	Outside Provider	Difference-- WSC Greater(Less) Than Outside
Management Consultant	$ 169	$ 212	$ (43)
Certified Public Accountant	$ 37	$ 104	$ (67)
Professional Engineer	$ 34	$ 106	$ (72)

Based on these cost per hour differentials and the number of hours billed to Massanutten, outside service providers would have cost $201,800 more than WSC during the sample 6 month period months ended June 30, 2006 (see table below). On an annualized basis, that amounts to $403,600, which is nearly 74% more than WSC's actual charges to Massanutten during the 12 months ended June 30, 2006. ($403,633 / $546,010).

Service Provider	Hourly Rate Difference-- WSC Greater(Less) Than Outside	WSC Hours Charged	Dollar Difference
Management Consultant	$ (43)	130	$ (5,629)
Certified Public Accountant	$ (67)	894	$ (59,974)
Professional Engineer	$ (72)	1,898	$ (136,214)
WSC Less Than Outside Providers - 6 month sample period			$ (201,817)
WSC Less Than Outside Providers - annualized			$ (403,633)

I - Introduction

Purpose Of This Study

This study was undertaken to determine if Massanutten Public Service Corporation (Massanutten) was charged the lower of cost or market for services provided by its affiliate, Water Service Corporation (WSC) during the 12 months ended June 30, 2006.

Study Results

The following conclusions can be drawn from this study:

- Massanutten was charged the lower of cost or market for managerial and professional services during the 12 months ended June 30, 2006.
- On average, the hourly rates for outside service providers are almost **74% higher** than the WSC's hourly rates.
- If all the managerial and professional services now provided by WSC had been out-sourced during the 12 months ended June 30, 2006, Massanutten and its ratepayers would have incurred an **additional $403,000** in expenses.

II - Background

Overview of Massanutten and Its Principal Affiliate Entities

Massanutten is a wholly-owned subsidiary of Utilities, Inc., which is one of the largest privately-owned water and wastewater companies in the US. Utilities, Inc. holds around 90 subsidiaries that operate more than 800 systems in 17 states, mainly in the eastern US and it serves more than 300,000 customers. About half of Utilities, Inc.'s revenue comes from water services and the other half from wastewater services; residential customers account for approximately 90% of sales. Utilities, Inc. also provides reuse water for irrigation purposes and for golf courses and car washes.

Massanutten has no employees of its own. All personnel serving Massanutten are WSC employees. Employees located in Virginia are involved in operating and maintaining the water and waste water utility facilities and equipment. Other WSC employees serving Massanutten are located in two regional offices and in the corporate headquarters in Northbrook, Illinois. Regional offices provide operations, engineering and call center services. Headquarters personnel provide the following services to operating utilities:

- Executive Management
- Engineering
- Operations
- Accounting
- Legal
- Billing and Customer Relations
- Construction
- Regulatory
- Information Technology
- Human Resources

Note A: Legal services were provided entirely by outside attorneys during the June 30, 2006 test year. Since then, in-house legal counsel has been hired by WSC.

Test Year Affiliate Charges To Massanutten

During the 12 months ended June 30, 2006, WSC charged Massanutten $546,010 for services. These transactions are covered by a service agreement between WSC and Massanutten dated July 20, 2005. The agreement describes the allocation methods for those expenses/costs that cannot be charged directly to Massanutten. It specifies that services are to be rendered at cost and without profit to the Service Company.

III – Service Company Market Cost Comparison

Cost Comparison Methodology

WSC's charges to Massanutten were tested to determine if they were priced at the lower of cost or market. This was accomplished by comparing the cost per hour for WSC managerial and professional services to those of outside service providers to whom this work could be outsourced. Based on the nature of the WSC services, it was determined that the following outside providers could perform the categories of services indicated below:

- Management Consultants – executive and administrative management and human resources services
- Certified Public Accountants – accounting, information technology and rates/regulatory services
- Professional Engineers – operations, engineering, construction management

WSC's hourly rates were calculated for each service provider category, based on the dollars and hours charged to Massanutten during the 12 months ended June 30, 2006. Hourly billing rates for outside service providers were developed using third party surveys or directly from information furnished by outside providers themselves.

The last step in the market cost comparison was to compare WSC's average hourly costs to the average cost per hour for outside providers.

WSC Hourly Rates

WSC's hourly rates for management and professional services were calculated for charges during the 6 months ended June 30, 2006, a sample of the test year. As shown below, WSC salaries charged to Massanutten during that period totaled approximately $196,000 or 54% of total salaries charged.

		Quarter Ended				
Account	Item	9/30/05	12/31/05	3/31/06	6/30/06	Total

The sample period salaries were analyzed to determine which outside provider Massanutten would turn to provide the related services and, thus, market testable. In Schedule 2 (page 8), management and professional salaries were assigned to one of three outside service providers and separated from administrative and craft salaries. This was done because management and

professional services are testable while administrative staff expenses are considered an overhead that are "loaded" onto management and professional hourly rates and craft services are not market testable due to the lack of publicly available hourly rate survey data. Administrative staff salaries were determined to be 3.1% of management and professional expenses during the sample period, as calculated below.

Administrative Support Salaries (Sch 2)	$ 2,750
Management & Professional Salaries (Sch 2)	$ 89,599
Administrative Support as Percent of Management & Professional	**3.1%**

Schedule 2 lists salary-related charges by WSC position for the one or more employees occupying that position who charged Massanutten during the test year.

Schedule 3 (page 9) assigns the employee hours associated with the management and professional salaries from Schedule 2 to the three outside provider categories.

Schedule 4 (pages 10-11) shows an analysis by account of WSC charges to Massanutten during the 12-months ended June 30, 2006. The purpose of this schedule is to calculate the percent of non-labor to salaries so it can be used as an overhead in calculating the WSC hourly rate cost pools.

Based on the assignment of expenses and hours from Schedules 2 and 3, and applicable overheads, WSC's hourly rates are calculated below for the sample period of the 6 months ended June 30, 2006.

	Management Consultant	Certified Public Accountant	Professional Engineer	Total
Management/Professional Salaries (Sch 2)	$ 16,356	$ 24,637	$ 48,606	$ 89,599
Overhead Items:				
Administrative Staff Salaries (3.1%) (Sch 2)	$ 502	$ 756	$ 1,492	$ 2,750
Non-Salaries-Related Expenses (30.7%) (Sch 4)	$ 5,021	$ 7,563	$ 14,922	$ 27,507
Total Cost Pool	$ 21,879	$ 32,956	$ 65,020	$ 119,855
Management and Professional Hours (Sch 3)	130	894	1,898	2,922
Average Hourly Rate	**$ 169**	**$ 37**	**$ 34**

Outside Service Provider Hourly Rates

The next step in the cost comparison was to obtain the average billing rates for each outside service provider. The source of this information and the determination of the average rates are described in the paragraphs that follow.

Management Consultants

The cost per hour for management consultants was developed from the 2006 annual survey performed by the Association of Management Consulting Firms—an industry trade organization. The first step in the calculation, presented in Schedule 5, was to determine an average rate by consultant position level. From these rates, a single weighted average hourly rate was calculated based upon the percent of time that is typically applied to a consulting assignment by each consultant position level. This survey includes rates that were in effect during 2005 for firms in the United States. Consultants typically do not limit their practice to any one region and must travel to a client's location. Thus, the U.S. national average is appropriate for comparison. This survey covered hourly rates in effect during 2005 and are assumed to be the average as of the midpoint of 12 months ended June 30, 2006.

Certified Public Accountants

The average hourly rate for Virginia certified public accountants was developed from a 2006 survey conducted by the American Institute of Certified Public Accountants (AICPA) every two years. Hourly rates in the AICPA survey are the average of firms in Virginia. The average hourly rate was calculated for a set of typical accountant positions, as shown in Schedule 6. Based on a typical staff assignment by each accountant position, a weighted average hourly rate was calculated. This survey covered hourly rates in effect during 2005 and are assumed to be the average as of the midpoint of 12 months ended June 30, 2006.

Professional Engineer

The association for professional civil engineers, the American Society of Civil Engineers, does not survey its members' billing rates. Neither does the National Society of Professional Engineers, the association for the entire engineering profession. Thus, professional engineer hourly rates were provided by WSC for two firms that are periodically used in Virginia when outside engineering services are required. As shown in Exhibit 7, an average rate was developed for each engineering position. Then, using a typical percentage mix by position for a typical engineering project, a weighted average cost per hour was calculated.

WSC – Outside Provider Cost Comparison

As shown in the table below, WSC costs per hour are considerably lower than those of outside providers during the sample 6 month period ended June 30, 2006.

Service Provider	WSC	Outside Provider	Difference-- WSC Greater(Less) Than Outside
Management Consultant	$ 169	$ 212	$ (43)
Certified Public Accountant	$ 37	$ 104	$ (67)
Professional Engineer	$ 34	$ 106	$ (72)

Based on these cost per hour differentials and the number of hours billed to Massanutten, outside service providers would have cost $201,800 more than WSC during the sample 6 month period months ended June 30, 2006 (see table below). On an annualized basis, that amounts to $403,600, which is nearly 74% more than WSC's actual charges to Massanutten during the 12 months ended June 30, 2006. ($403,633 / $546,010).

Service Provider	Hourly Rate Difference-- WSC Greater(Less) Than Outside	WSC Hours Charged	Dollar Difference
Management Consultant	$ (43)	130	$ (5,629)
Certified Public Accountant	$ (67)	894	$ (59,974)
Professional Engineer	$ (72)	1,898	$ (136,214)
WSC Less Than Outside Providers - 6 month sample period			$ (201,817)
WSC Less Than Outside Providers - annualized			$ (403,633)

SUPPLEMENTAL TESTIMONY
OF
PATRICK L. BARYENBRUCH
ON BEHALF OF
MASSANUTTEN PUBLIC SERVICE CORPORATION

CASE NO. PUE-2006-00126

Q. Please state your name and business address.

A. Patrick L. Baryenbruch, 302 East Park Drive, Raleigh, North Carolina 27605.

Q. Please describe your educational and professional background.

A. I received a Bachelors degree in accounting from the University of Wisconsin-Oshkosh in 1974 and a Masters in Business Administration degree from the University of Michigan in 1979.

I am a certified public accountant and am a member of the American Institute of Certified Public Accountants and the North Carolina Association of Certified Public Accountants.

I began my career as a staff accountant with Arthur Andersen & Company where I performed financial audits of utilities, banks and finance companies. After three years I left to pursue an M.B.A. degree. Upon graduation from business school, I worked with the consulting firms of Theodore Barry & Associates and Scott, Madden & Associates.

During my consulting career, I have performed consulting assignments for approximately 50 utilities and 10 public service commissions. I have participated as project manager, lead or staff consultant for 24 commission-ordered management and prudence audits of public utilities. Of these, I have been responsible for evaluating the area of affiliate

charges and allocation of corporate expenses in the Commission-ordered audits of Connecticut Light and Power, Connecticut Natural Gas, General Waterworks Corporation (Pennsylvania Operations), Philadelphia Suburban Water Company, Pacific Gas & Electric Company and Southern California Edison.

This year, my firm performed the commission-ordered audit of Southern California Edison's 2002 transactions with its non-regulated affiliate companies. That audit was successfully completed in May 2003 and I have again been selected to perform the 2003 transactions audit.

Q. What are your duties and responsibilities in your current position?

A. I am the President of my own consulting practice, Baryenbruch & Company, which was established in 1985. In that capacity, I provide consulting services to utilities and their regulators.

Q. Please describe the reason for your testimony in this case.

A. I am presenting the results of my study which evaluated the services provided by Water Service Corporation (WSC) to Massanutten Public Service Corporation (Massanutten). This study was undertaken in conjunction with Massanutten's rate case for the test year ending June 30, 2006 and is true to the best of my knowledge and belief. The study is attached as Exhibit PLB-1.

Q. What were the objectives of your study?

A. This study was undertaken to determine if the services provided by WSC to Massanutten during the test year were priced at the lower of cost or market.

Q. What conclusions were you able to draw from your study?

A. I was able to draw the following conclusions:

(1) Massanutten was charged the lower of cost or market for managerial and professional services provided by WSC during the 12 months ended June 30, 2006.

(2) On average, the hourly rates for outside service providers are approximately **74% higher** than the WSC's hourly rates.

(3) If all the managerial and professional services now provided by WSC had been out-sourced during the 12 months ended June 30, 2006, Massanutten and its ratepayers would have incurred an **additional $403,000** in expenses.

Q. Does this complete your testimony?

A. Yes.

I - Introduction

Purpose of This Study

This study was undertaken to determine if Massanutten Public Service Corporation (Massanutten PSC) was charged the lower of cost or market for services provided by its affiliate, Water Service Corporation (WSC) during 2008. The results of this study will be used in Massanutten PSC's 2009 rate case before the Virginia State Corporation Commission.

Study Results

The following conclusions can be drawn from this study:

- WSC provided Massanutten PSC with managerial and professional services during 2008 at the lower of cost or market.
- On average, 2008 hourly rates for outside service providers were 140% higher than the WSC's hourly rates.
- If all the managerial and professional services provided by WSC had been out-sourced during 2008, Massanutten PSC and its ratepayers would have incurred an additional $406,700 in expenses.

II - Background

Overview of Massanutten PSC and Its Principal Affiliate Entities

Massanutten PSC is a wholly-owned subsidiary of Utilities, Inc., which is one of the largest privately-owned water and wastewater companies in the US. Utilities, Inc. holds around 85 subsidiaries that operate around 800 systems in 15 states, mainly in the eastern US and it serves approximately 290,000 customers. About half of Utilities, Inc.'s revenue comes from water services and the other half from wastewater services; residential customers account for approximately 90% of sales. Utilities, Inc. also provides reuse water for irrigation purposes and for golf courses and car washes.

Massanutten PSC has no employees of its own. All personnel serving Massanutten PSC are WSC employees. Employees located in Virginia are involved in operating and maintaining the water and waste water utility facilities and equipment. Other WSC employees serving Massanutten PSC are located in two regional offices and in the corporate headquarters in Northbrook, Illinois. Regional offices provide operations, engineering and customer services. Headquarters personnel provide the following services to the operating utilities:

- Executive Management
- Engineering
- Operations
- Accounting
- Legal
- Billing and Customer Relations
- Construction
- Regulatory
- Information Technology
- Human Resources

2008 Affiliate Charges to Massanutten PSC

During 2008, WSC per books O&M expenses charged to Massanutten PSC were approximately $1,383,000. These transactions are covered by a service agreement between WSC and Massanutten PSC dated December 19, 2007. The agreement describes the allocation methods for those expenses/costs that cannot be charged directly to Massanutten PSC. It specifies that services are to be rendered at cost and without profit to WSC.

The scope of this study is services provided by WSC management and professional personnel. WSC hourly workers are excluded because market information is not available for local contractors.

III – Service Company Market Cost Comparison

Cost Comparison Methodology

WSC's charges assigned to Massanutten PSC were tested to determine if they were priced at the lower of cost or market. This was accomplished by comparing the cost per hour for WSC managerial and professional services to those of outside service providers to whom this work could be outsourced. Based on the nature of the WSC services, it was determined that the following outside providers could perform the categories of services indicated below:

- Management Consultants – executive and administrative management and human resources services
- Certified Public Accountants – accounting, information technology and rates/regulatory services
- Professional Engineers – operations, engineering, construction management
- Attorneys – legal

WSC's hourly rates were calculated for each service provider category, based on the dollars and hours charged to Massanutten PSC during 2008. Hourly billing rates for outside service providers were developed using third party surveys or directly from information furnished by outside providers themselves.

WSC Hourly Rates

WSC's expenses assigned to Massanutten PSC were first analyzed to determine which are associated with the provision of management and professional services. This process is directed at creating a cost pool that contains the same type of expenses outside providers recover in the hourly billing rates. Exhibit 2 shows the results of this analysis. As summarized below, $290,258 of WSC expenses are associated with the provision of management and professional services to Massanutten PSC and subject to a lower of cost or market comparison.

2008 Market Testable WSC Expenses
Charged to Massanutten

	Amount	
Salaries	$	202,676
Benefits	$	56,099
Other Expenses	$	31,482
Testable Total	$	290,258

7691	Sale of Equipment	$ (9)			$ (9)					
7750	S/T Int Exp Charges	$ (316)					$ (316)			
	Total Allocated WSC Expenses	$ 514,620	$ 102,558	$ 56,099	$ 31,482	$ 103,792	$ (24,760)	$ 14,246	$ 4,130	$ 252,099
	Direct Charge WSC Salaries	$ 415,352	$ 100,119			$ 315,233				
Total Alloc and Dir Chg WSC Expenses		**$ 929,971**	**$ 202,676**	**$ 56,099**	**$ 31,482**	**$ 419,025**	**$ (24,760)**	**$ 14,246**	**$ 4,130**	**$ 252,099**

The following WSC expenses were excluded from the market cost comparison because they are not related to services provided by Northbrook and regional office personnel:

- Salaries, Benefits and Payroll Taxes of Hourly Employees – Represent personnel costs associated with local Massanutten PSC operations and maintenance staff and customer service representatives in the Middlesboro, Kentucky regional office.
- Capital Costs – Are not related to the provision of services to Massanutten PSC.
- Outside Services – These expenses are not associated with the cost of WSC personnel performing services for Massanutten PSC. Charges from outside professional firms to perform certain corporate-wide services (*e.g.*, legal, financial audit, tax return review) represent services that have, in effect, already been outsourced by WSC.
- Travel Expenses - In general, client-related travel expenses are not recovered by outside service providers through their hourly billing rates. Rather, actual out-of-pocket travel expenses are billed to clients in addition to fees for professional services. Thus, it is appropriate to remove these charges from the WSC hourly rate calculation.
- Operating and Other Non Management/Professional Services Expenses – The remaining excluded expenses are associated with: (1) materials and postage associated with printing and mailing of customer bills, (2) insurance for the Massanutten PSC operation (3) general ledger hardware and software expenses and (4) vehicle expenses for the Massanutten PSC operation.

Each WSC position was next assigned to the outside service provider to whom their work could be outsourced. Exhibit 3 shows the results of this analysis. This designation was used to assign each position's salary and hours to the four outside provider cost pools.

Exhibit 3 shows four WSC positions designated as administrative support personnel. Outside service providers typically recover the cost of these personnel through the hourly rates of professional staff. For purposes of the WSC hourly rate calculation, administrative staff salaries are considered an overhead that are "loaded" onto management and professional hourly rates.

Assignment of WSC Positions To Outside Provider Categories

Shown below is the calculation of the overheads that are applied to management and professional salaries for purposes of calculating WSC's hourly rates.

	Amount	% of Mgmt & Prof Salaries
Salaries		
Management & Professional	$ 199,061	
Administrative Support	$ 3,615	1.8%
Total Salaries	$ 202,676	
Benefits	$ 56,099	28.2%
Other Expenses	$ 31,482	15.8%
Total Testable Expenses	$ 290,258	

Based on the assignment of market testable WSC expenses and hours to the four outside provider categories, WSC's 2008 hourly rates are calculated below.

	Management Consultant	Certified Public Accountant	Professional Engineer	Attorney	Total
Management/Professional Salaries	$ 33,346	$ 86,253	$ 75,726	$ 3,736	$ 199,061
Overhead Items:					
Benefits (28.s%)	$ 9,398	$ 24,308	$ 21,341	$ 1,053	$ 56,099
Other Expenses (15.8%)	$ 5,274	$ 13,641	$ 11,976	$ 591	$ 31,482
Administrative Staff Salaries (1.8%)	$ 606	$ 1,567	$ 1,375	$ 68	$ 3,615
Total Cost Pool	$ 48,623	$ 125,769	$ 110,419	$ 5,447	$ 290,258
Management and Professional Hours	508	2,590	2,322	33	5,453
Average Hourly Rate	**$ 96**	**$ 49**	**$ 48**	**$ 163**	

Outside Service Provider Hourly Rates

The next step in the cost comparison was to obtain the average billing rates for each outside service provider. The source of this information and the determination of the average rates are described in the paragraphs that follow.

Management Consultants

The cost per hour for management consultants was developed from the 2008 annual survey performed by the Association of Management Consulting Firms—an industry trade organization. The first step in the calculation, presented in Exhibit 4, was to determine an average rate by consultant position. From these rates, a single weighted average hourly rate was calculated based upon the percent of time that is typically applied to a consulting assignment by each consultant position. Consultants typically do not limit their practice to any one region and must travel to a client's location. Thus, the U.S. national average is appropriate for comparison. This survey includes rates that were in effect at December 31, 2007 for firms in the United States. This 2007 average rate was escalated to June 30, 2008—the midpoint of 2008.

Certified Public Accountants

The average hourly rate for Virginia certified public accountants was developed from a 2008 survey conducted by the American Institute of Certified Public Accountants (AICPA) every two years. Hourly rates in the AICPA survey are the average of firms in Virginia. The average hourly rate was calculated for a range of accountant positions, as shown in Exhibit 5. Based on a typical staff assignment by each accountant position, a weighted average hourly rate was calculated. This survey covered hourly rates in effect during 2007. Thus, the 2007 average rate was escalated to June 30, 2008—the midpoint of 2008.

Professional Engineer

The association for professional civil engineers, the American Society of Civil Engineers, does not survey its members' billing rates. Neither does the National Society of Professional Engineers, the association for the entire engineering profession. Thus, 2008 professional engineer hourly rates were provided by WSC for two firms that are periodically used in Virginia when outside engineering services are required. As shown in Exhibit 6, an average rate was developed for each engineering position. Then, using a typical percentage mix by position for a typical engineering project, a weighted average cost per hour was calculated.

Attorneys

The Virginia Bar Association does not survey its members as to their hourly billing rates. In addition, publicly available billing rate information could not be found for Virginia attorneys (Virginia Lawyers Weekly previously asked for hourly rates in its annual survey but eliminated that question a few years ago). Therefore, an estimate of Virginia attorney rates was developed from surveys of Michigan and Massachusetts lawyers conducted annually by the publications, Michigan Lawyers Weekly and Massachusetts Lawyers Weekly. As presented in Exhibit 7, the average rate for each Michigan and Massachusetts firm respondent was adjusted for the cost of living differential between their location and McGaheysville, Virginia. The survey includes hourly rates that were in effect at December 31, 2007. Thus, the 2007 average rate was escalated to June 30, 2008—the midpoint of 2008.

A. Calculation of Average Hourly Billing Rate by Consultant Position
Survey billing rates were those in effect in 2007 (Note A)

	Average Hourly Rates (Note A)				
	Entry-Level Consultant	Associate Consultant	Senior Consultant	Junior Partner	Senior Partner
Average	$ 142	$ 181	$ 236	$ 286	$ 333

Cain Hibbard Myers & Cook	Pittsfield, Ma	19	$ 150	$ 200	$ 210	$ 235	$ 199	107%	$ 185
							Overall Average 2007 Billing Rate		$ 274

Escalation to Test Year's Mid-Point - June 30, 2008 (Note B)	
CPI at December 31, 2007	210.0
CPI at June 30, 2008	218.8
Inflation/Escalation	4.2%
Average Billing Rate At June 30, 2008	**$ 286**

Note A: Source is Michigan Lawyers Weekly (April 2008) and Massachusetts Lawyers Weekly (April 2008)

Note B: Source is U.S. Bureau of Labor Statistics (ftp://ftp.bls.gov/pub/special.requests/cpi/cpiai.txt)

Note C: Source is Sperling's Best Places (http://www.bestplaces.net/col/col.aspx). This percentage represents the cost of living difference between the Michigan and Massachusetts cities and McGaheysville, Virginia. A number over 100% indicates the Michigan or Massachusetts city's cost of living is higher than McGaheysville. A number less than 100 % indicates McGaheysville's cost of living is higher.

WSC – Outside Provider Cost Comparison

As shown in the table below, WSC costs per hour are significantly lower than those of outside providers during 2008.

Service Provider	WSC	Outside Provider	Difference--WSC Greater(Less) Than Outside
Management Consultant	$ 96	$ 214	$ (119)
Certified Public Accountant	$ 49	$ 122	$ (73)
Professional Engineer	$ 48	$ 114	$ (66)
Attorney	$ 163	$ 286	$ (123)

Based on these cost per hour differentials and the number of hours billed to Massanutten PSC, outside service providers would have cost Massanutten PSC and its rate payers $406,705 or 140% ($406,705 / $290,258) more than the cost of WSC's services during 2008.

Service Provider	Hourly Rate Difference--WSC Greater(Less) Than Outside	WSC Hours Charged	Dollar Difference
Management Consultant	$ (119)	508	$ (60,217)
Certified Public Accountant	$ (73)	2,590	$ (189,116)
Professional Engineer	$ (66)	2,322	$ (153,246)
Attorney	$ (123)	33	$ (4,125)
		WSC Less Than Outside Providers	$ (406,705)

SUPPLEMENTAL TESTIMONY
OF
PATRICK L. BARYENBRUCH
ON BEHALF OF
MASSANUTTEN PUBLIC SERVICE CORPORATION

CASE NO. PUE-_____

Q. Please state your name and business address.

A. Patrick L. Baryenbruch, 2832 Claremont Road, Raleigh, North Carolina 27608.

Q. Please describe your educational and professional background.

A. I received a Bachelors degree in accounting from the University of Wisconsin-Oshkosh in 1974 and a Masters in Business Administration degree from the University of Michigan in 1979.

I am a certified public accountant and am a member of the American Institute of Certified Public Accountants and the North Carolina Association of Certified Public Accountants.

I began my career as a staff accountant with Arthur Andersen & Company where I performed financial audits of utilities, banks and finance companies. After three years I left to pursue an M.B.A. degree. Upon graduation from business school, I worked with the consulting firms of Theodore Barry & Associates and Scott, Madden & Associates. During my consulting career, I have performed consulting assignments for approximately 50 utilities and 10 public service commissions. I have participated as project manager, lead or staff consultant for 24 commission-ordered management and prudence audits of public utilities. Of these, I have been responsible for evaluating the area of affiliate charges and allocation of corporate expenses in the Commission-ordered audits of Connecticut Light and Power, Connecticut Natural Gas, General Waterworks

Corporation (Pennsylvania Operations), Philadelphia Suburban Water Company, Pacific Gas & Electric Company and Southern California Edison.

My firm performed the commission-ordered audits of Southern California Edison's transactions with its non-regulated affiliate companies for the years 2002 through 2005.

Q. What are your duties and responsibilities in your current position?

A. I am the President of my own consulting practice, Baryenbruch & Company, LLC, which was established in 1985. In that capacity, I provide financial and management and consulting services to utilities and their regulators.

Q. Please describe the reason for your testimony in this case.

A. I am presenting the results of my study which evaluated the services provided by Water Service Corporation (WSC) to Massanutten Public Service Corporation (Massanutten PSC). This study was undertaken in conjunction with Massanutten PSC's rate case for the test year ending December 31, 2008 and is true to the best of my knowledge and belief. The study is attached as Exhibit PLB-1.

Q. What were the objectives of your study?

A. This study was undertaken to determine if WSC provided services to Massanutten PSC during 2008 at the lower of cost or market.

Q. What conclusions were you able to draw from your study?

A. I was able to draw the following conclusions:

(1) WSC provided Massanutten PSC with managerial and professional services during 2008 at the lower of cost or market.

(2) On average, 2008 hourly rates for outside service providers were 140% higher than the WSC's hourly rates.

(3) If all the managerial and professional services provided by WSC had been out-sourced during 2008, Massanutten PSC and its ratepayers would have incurred an additional $406,700 in expenses.

Q. Does this complete your testimony?

A. Yes.

Deloitte.

I. INTRODUCTION

Deloitte & Touche LLP ("Deloitte & Touche") was engaged by Illinois-American Water Company ("IAWC") to conduct a Service Company Cost Study ("Study") comparing the cost of certain services expected to be obtained by IAWC from American Water Works Service Company, Inc. ("AWWSC" or "Service Company") to the costs that would be incurred if such services were obtained in the open market. This Study is prepared in response to the Illinois Commerce Commission's ("Commission") Order of July 30, 2008 in Docket 07-0507 that IAWC

> "...conduct a study comparing the cost of each service obtained from the Service Company to the costs of such services had they been obtained through competitive bidding on the open market. As part of the study, IAWC must also provide an analysis of the services provided by the Service Company to all of IAWC's affiliates. The analysis must provide details on the specific services provided to IAWC and how costs are allocated among affiliates of IAWC. IAWC shall include the study in its next rate filing."[1]

As the testimony of IAWC's President, Ms. Teasley, discusses, in response to this requirement, IAWC has presented the testimony of five witnesses, including the testimony of Messrs. Mark Young of Deloitte & Touche and Bernard L. Uffelman of Uffelman Advisory Services, LLC, who sponsor this Study. As Ms. Teasley explains, Mr. John Young, President of AWWSC discusses each service that AWWSC performs. Mr. Edward Grubb addresses the cost assignment and allocation process, and other matters related to AWWSC services.

As Ms. Teasley explains, in procuring services, IAWC's practice is to provide support for utility operations based on considerations of cost-effectiveness, timeliness, reliability and adequacy. For certain services, IAWC is able to maintain adequate service quality and achieve efficiencies through the use of qualified third-party providers (i.e., AWWSC or a non-affiliate provider). As Ms. Teasley indicates, for certain services that can be outsourced, IAWC has determined that use of a non-affiliate provider is not feasible. For the reasons Ms. Teasley discusses, the services in this category include corporate governance, the customer service center and the employee benefits service center. For the reasons given by Ms. Teasley, IAWC believes that these services should be performed only by employees of IAWC or those of an affiliated company. Ms. Teasley sponsors a study that compares the cost incurred by IAWC in obtaining these, and other services, from AWWSC to the market cost that IAWC would incur if it were to itself retain the personnel needed to provide these services on a stand-alone basis ("Self Provision Study"). Thus the Self Provision Study provides the applicable market comparison for services that cannot be

[1] Illinois Commerce Commission Docket 07-0507, Section IV. B. 6. d

outsourced to non-affiliates. The required market comparison for services that IAWC can effectively outsource to an affiliate or non-affiliate provider are the subject of this Study. This Study also provides an analysis of IAWC's customer service center costs which supports the Self Provision Study sponsored by Ms. Teasley.

The remainder of this Study is comprised of the following seven sections:

- Overview of AWWSC
- Study Methodology
- Market Cost Comparison Survey Information
- Market Analysis
- Customer Accounts Analysis
- Study Conclusions
- Professional Standards

The Service Company provided Deloitte & Touche with information pertaining to AWWSC and IAWC to perform the Study, including but not limited to information related to the projected level of service costs for the fully forecasted 2010 test year. The analysis also relied on market information obtained directly by Deloitte & Touche. The sources of information used in developing the analysis are noted throughout this Study and supporting schedules.

The methodology used by Deloitte & Touche for comparing the cost of each service expected to be obtained from the Service Company that can be performed by a non-affiliate to the costs of such services that would be incurred if such services were obtained through competitive bidding on the open market is described in greater detail in the following sections of this Study. The methodology incorporates a comparison of the forecasted cost of certain services expected to be obtained by IAWC from the Service Company during the forecast period to the expected cost or market price for the services in the future period if such services were obtained on the open market. The results of the analysis show either the cost savings expected to be realized (i.e., Service Company costs lower than market) or the excess costs expected to be incurred (i.e., Service Company costs higher than market) by IAWC from obtaining professional and managerial services through the Service Company when compared to the costs of acquiring such services in the open market from third-party service providers.

As discussed above, the Self Provision Study provides the applicable market comparison for IAWC's customer service related cost (comparing the cost incurred by IAWC to obtain this service from AWWSC to the cost to self provision, i.e., the cost to IAWC of retaining the needed personnel in the market to provide this service on a stand-alone basis). As Ms. Teasley discusses, the Self Provision Study demonstrates that the cost incurred by IAWC to obtain this service through AWWSC is significantly below the cost that would be incurred to self-provide the services.

This Study provides an additional analysis of customer service costs that supports the Self Provision Study sponsored by Ms. Teasley. The analysis performed by Deloitte & Touche includes a comparison of IAWC's customer service cost to the customer service costs reported by other utilities in narrowly defined customer accounts for providing comparable services. Although not a market cost comparison for this type of service, the additional analysis demonstrates that IAWC's customer service cost to obtain this service through AWWSC is below the average level of cost incurred by other utilities for this function.

II. OVERVIEW OF AWWSC

AWWSC is a subsidiary of American Water Works Company, Inc. ("AWWC" or "American Water") and is organized as a services organization to provide governance and support services to AWWC affiliates, including IAWC. Service companies are common in the utility industry and provide support services to affiliates in a centralized manner resulting in cost efficiencies to affiliates by eliminating the need for affiliates to perform support services on a stand-alone basis.

A. AWWSC Locations

AWWSC is a collection of organizations (i.e., functions) that provide managerial and professional support services to AWWC affiliates including IAWC from a number of locations. The AWWSC locations are described below.

Belleville Lab – personnel at this location perform water quality testing for all AWWC operating water utility affiliates. The Belleville Lab is located in Belleville, Illinois.

National Call Centers – AWWSC personnel perform the following customer service activities: customer call processing, service order processing, customer payment processing, credit and collection, customer billing and other customer related activities. AWWSC operates two call centers located in Alton, Illinois and Pensacola, Florida. AWWSC's call centers respond to customer inquiries nationwide from AWWC's regulated operations, including customers in Illinois served by IAWC.

Corporate – personnel located in Voorhees, New Jersey include AWWC's executive management group as well as AWWSC functional leadership who provide corporate oversight and support services to AWWC affiliates. Corporate operations personnel are also located in Mt. Laurel, New Jersey.

Information Technology Service Centers ("ITS") – this function consists of a principal data center located in Hershey, Pennsylvania to support AWWC's information technology infrastructure required to operate AWWSC and operating company business applications and computer systems. A second data center is

located in Haddon Heights, New Jersey. ITS administrative personnel are located in Voorhees, New Jersey.

Shared Service Center ("SSC") – personnel at this location in Cherry Hill, New Jersey provide financial, accounting and treasury services to AWWC's operating companies.

B. **AWWSC Business Functions**

As discussed in Mr. John Young's testimony, AWWSC services are provided to American Water affiliates by AWWSC personnel in the following functions:

- **Communications and External Affairs**
- **Corporate Finance**
  - Treasury
  - Controller
  - Planning & Reporting
- **Customer Service Center**
- **Human Resources**
- **Information Technology Services**
- **Legal**
- **Operations Services**
  - Engineering
  - Maintenance & SCADA
  - Innovation & Environmental Stewardship
  - Central Laboratory Services
  - Supply Chain
  - Best Operating Practices
  - Operations Risk Management
- **Divisional Operations Support and Regulated Operations**
- **Shared Services Center**
- **Other**
  - Business Development
  - Internal Audit
  - Investor Relations
  - Regulatory Programs

C. **AWWSC Costs**

The types of costs incurred by AWWSC in providing service to affiliates including IAWC include the following:

- **Compensation costs** – this cost category includes the salaries and wages of AWWSC professional and managerial and administrative personnel who provide services to AWWC affiliates, and

- **Overhead costs** – this cost category includes labor-related overhead costs, building/office costs, and other overhead costs. Labor-related overhead costs include but are not limited to: employee benefits, pensions and payroll taxes. Building/office and other overhead costs include but are not limited to: depreciation expense, property and equipment rental, transportation lease and maintenance costs, property and liability insurance, utility and miscellaneous general office costs.

Labor loading rates are developed by AWWSC and applied to AWWSC employee compensation costs to recover the overhead costs referenced above. The "fully-loaded" AWWSC costs are billed to affiliates for services provided. Charges for services provided by AWWSC to affiliates are therefore billed "at cost" and do not include a profit or mark-up.

III. STUDY METHODOLOGY

This section of the Study provides an overview of the methodology used by Deloitte & Touche for comparing the cost of certain services expected to be obtained by IAWC from the Service Company to the costs of such services that would be incurred if the services were obtained through competitive bidding on the open market. This section of the Study also provides an overview of the methodology used by Deloitte & Touche for comparing IAWC's customer service related costs to those of other utilities. Sections V and VI of the Study provide additional detailed information including schedules summarizing the results of the market and customer accounts analyses discussed below.

A. Market Analysis

1. Primary Analysis

This section describes the primary analysis used by Deloitte & Touche to compare the cost of each service expected to be obtained from the Service Company that can be effectively outsourced to an affiliate or non-affiliate provider to the cost that would be incurred for the service if it were obtained on the open market ("Market Analysis"). To develop the analysis, the Service Company provided Deloitte & Touche with test year forecast information regarding IAWC's fully forecasted test year including the services expected to be utilized by IAWC during the forecast period and the costs expected to be incurred in the provision of such services. Information provided by the Service Company related to the test year included, but was not limited to, the business units and locations providing the services (e.g., Belleville Lab, Corporate, SSC); the functions providing the services (e.g., accounting, audit, finance, treasury); the categories

of services to be provided within each function (e.g., accounting, engineering, legal); the job titles of the personnel expected to provide the services and the number of positions in each job title; the number of hours expected to be worked in providing the services; and the costs expected to be incurred in providing the services (e.g., labor, labor overheads, building and office costs, and other overheads). This information provided Deloitte & Touche with an understanding of the services and costs expected to be incurred by the Service Company at the service level (i.e., business unit and function) in providing services to IAWC during the test year for comparison to an expected market price if such services were obtained from third-party providers through a competitive bidding process.

In providing professional and managerial services to affiliates, including IAWC, the Service Company incurs similar types of costs as shown in Section II above as do third-party providers. However, unlike charges or billing rates established by third-party vendors to bill for services provided that include a profit component, services provided by AWWSC to affiliates are billed at cost. Services provided by the Service Company and their related fully-loaded costs can be grouped or categorized for an "apples-to-apples" comparison to the services and costs that would result from obtaining such services from outside service providers in the open market.

To develop the market service categories and cost information to compare to the IAWC test year services and costs, Deloitte & Touche obtained and used market survey cost information as described in Section IV of this Study for the following professional and managerial service categories:

- Accounting Services,
- Engineering Services,
- Information Technology Services,
- Legal Services, and
- Management Consulting Services.

The market surveys corresponding to the above five service categories contain external market survey hourly billing rate ("Market Rate") information or, in the case of information technology services, compensation information for computing a Market Rate for the professional service classifications listed in the market surveys. For example, as explained in greater detail in Section IV of this Study, the Market Rate information for accounting services was reported by accounting firms for the following professional service classifications:

- Partner,
- Director,
- Manager,
- Senior Associate, and
- Associate.

To assist Deloitte & Touche with the comparison of the 2010 forecasted cost for each type of service expected to be obtained by IAWC from the Service Company to an expected market price for the service in the future period (for those services that can be effectively outsourced to a non-affiliate provider), the Service Company provided Deloitte & Touche with a summary by business unit location and function of the test year costs and hours expected to be incurred during the test year. The summary also included the Service Company's expected unitized cost per hour ("Service Company Rate") for providing each service. The Service Company Rate was calculated by dividing the expected test year costs to provide the service by the projected number of hours required to provide the service. This information was mapped to the professional and managerial personnel classifications contained in the market surveys as provided to the Service Company by Deloitte & Touche for each of the five service categories listed above and resulted in comparative data for comparing the fully-loaded cost of certain services expected to be obtained from the Service Company to the cost of such services if they were obtained through competitive bidding on the open market.

Since professional services firms typically recover the cost of administrative personnel and executive assistants through the hourly billing rates they charge for their professional personnel, the Service Company's cost of its administrative personnel and executive assistants were included in the calculation of the Service Company Rates for its professional and managerial personnel. This adjustment resulted in the recognition of the Service Company's costs for administrative personnel and executive assistants in the fully-loaded cost of each service expected to be provided by the Service Company to IAWC for comparison to the market survey costs charged by outside providers.

To compare IAWC's costs for the services expected to be provided by the Service Company during the forecasted 2010 test year to the costs for such services had they been provided by outside third-party service providers, it was necessary to exclude employee meals and travel expenses. This adjustment was necessary since professional services firms typically charge clients directly for meals and travel expenses and therefore, travel-related costs are not recovered through the firms' hourly billing rates. In addition, an adjustment was made by IAWC to exclude certain software and hardware related costs (e.g., computer software applications and maintenance, computer hardware costs, depreciation and amortization, license fees and annual updates) from Service Company costs. To the extent a professional services firm incurs costs related to specialized hardware and software applications required to perform services on behalf of a specific client, such as American Water, such costs would typically be charged directly to the client as an expense and therefore would not be included in the firm's hourly billing rates.

Based on the professional service classifications defined by Deloitte & Touche, Deloitte & Touche and the Service Company developed for each of the five service categories a time distribution of the expected test year Service Company

hours for each professional service classification within each of the service categories. The time distributions were used by Deloitte & Touche to apply to the Market Rate for each professional classification to compute a weighted average Market Rate for each service category and professional classification. Because the market surveys contained 2007 or, in the case of information technology services, 2008 price information, the Market Rates for each service category were escalated using the consumer price index – all urban consumers ("CPI") to 2010 expected cost levels.[2]

The weighted average Market Rate for each service category and professional classification was compared to the Service Company Rate for each service category and professional classification as computed by the Service Company for IAWC's test year. The differences between the Service Company Rates and the Market Rates were then multiplied by the number of budgeted hours contained in IAWC's forecast period to calculate either the cost savings expected to be realized (i.e., Service Company costs lower than market) or the excess costs expected to be incurred (i.e., Service Company costs higher than market) by IAWC from obtaining professional and managerial services through the Service Company when compared to the costs of such professional services if they were acquired in the open market from third-party service providers.

To supplement the Market Rates used in the analyses, and to verify that the Market Rates are an appropriate measure for comparing to the Service Company Rates, Deloitte & Touche requested information from American Water regarding rates quoted or charged by third-party vendors ("Supplemental Rates") to American Water for services provided. American Water provided information relating to the Supplemental Rates charged for services provided to it or subsidiaries by third-party vendors in relevant markets. Section V of this Study contains the analysis and discussion of the comparison of the Service Company's fully-loaded Service Company Rates to the Market Rates and the Supplemental Rates.

2. Secondary Analysis

In addition to the primary Market Analysis described above which included analysis of the Service Company Rates for Belleville Lab employees, IAWC witness Edward Grubb performed an analysis of the Belleville Lab costs. As described in Mr. Grubb's testimony, the Service Company performed a cost study comparing the Belleville Lab's cost to perform certain tests on a "per test" basis to the cost for use of outside commercial testing labs to perform the same tests. The analysis recognizes that laboratory services of the type utilized by IAWC are available in the market on a "per test" basis (while the primary Market

[2] United States Department Of Labor, Bureau Of Labor Statistics for changes in CPI-U through 2008. Congressional Budget Office *The Budget and Economic Outlook: Fiscal Years 2009 to 2019*, January 8, 2009, economic projection of percentage changes in CPI-U for calendar years 2009 and 2010.

Analysis recognizes that personnel qualified to perform the tests can be retained in the market on an hourly basis).

B. **Customer Accounts Analysis**

This section describes the Customer Accounts Analysis performed by Deloitte & Touche which supports the market comparison for customer service related costs contained in the Self Provision Study sponsored by Ms. Teasley. AWWSC's National Call Centers and IAWC perform numerous customer-related activities, the costs of which are charged or allocated to IAWC. Customer-related activities performed and costs incurred by AWWSC and IAWC include but are not limited to:

- Customer billing inquiries,
- Customer order processing,
- Billing information processing,
- Customer payment processing,
- Correspondence processing,
- Bank service charges,
- Postage, and
- Bill forms.

In most circumstances, the reasonableness of costs incurred by a specific utility cannot properly be assessed based solely on a comparison of the utility's costs with those incurred by other entities. This is because the needs, activities and cost structures of the entities involved may differ with the result that a cost comparison is meaningless. Where, however, a comparison is narrowly focused on a process reasonably expected to involve similar activities, and there is an applicable standardized accounting process, a cost comparison may provide an indication of reasonableness.

In the case of customer service, such activities among utilities are sufficiently similar to allow cost comparisons among regulated utilities that apply an established regulatory accounting framework. In these circumstances, there is some basis to expect reasonable accuracy and consistency of approach among the entities involved. United States electric utilities perform similar customer-related activities and incur similar types of customer-related costs in providing services to customers as does IAWC, therefore a Customer Accounts Analysis using information from regulatory filings was performed. Deloitte & Touche selected 13 electric utilities, 7 of which are combination electric and gas utilities, operating in the central region of the United States (i.e., Illinois, Indiana, Iowa, Missouri, and Ohio) for purposes of the Customer Accounts Analysis. Of the 13 utilities, 11 receive support services from a centralized service company affiliate.[3]

[3] *FERC Financial Report FERC Form No. 60: Annual Report of Centralized Service Companies.* Form No. 60 is an annual regulatory support filing under 18 CFR 366.23

The number of customers served by the electric utilities ranges from approximately 166 thousand to over 3.8 million.

The results of Deloitte & Touche's Customer Accounts Analysis are discussed in greater detail in Section VI of this Study.

IV. MARKET COST COMPARISON SURVEY INFORMATION

This section of the Study provides a discussion of the market surveys from which Deloitte & Touche obtained the service classifications and Market Rates used to calculate the weighted average hourly billing rates for each of the five service categories used in the Market Analysis. The market surveys contain information relating to the compensation, fee and billing practices for the five categories of professional services firms. The market surveys were identified by Deloitte & Touche through research based on selection criteria, which included the following: availability of survey information to member firms or through purchase; reliability of survey information for use in determining the price of services in relevant markets; reputation of the organization that conducted the survey and published the survey data; if the organization conducting the survey was a trade organization, the number and types of member firms; the purpose of the survey; the number of information requests sent and responses received; number and frequency of presentations of the survey by the organization in past years; type of categorization in the survey of the market information; and the amount of information provided regarding educational and experience requirements for identified market categories. The selection criteria are discussed as applicable below in connection with each survey selected. Based on the research conducted, Deloitte & Touche concluded that the surveys selected each provide a reliable indication of a market price for services covered by the survey.

The Market Rates and professional service classifications for each of the five service categories are provided in schedules of the Study, which will be discussed below. The discussion below highlights certain information relative to the Study.

A. Accounting Services

Deloitte & Touche used the results of the AICPA's *2008 PCPS/TSCPA National Management of an Accounting Practice Survey ("MAP Survey")*[4] for the accounting services classifications. The 2008 MAP Survey was conducted by Intelli-Service, an independent market research company.

The AICPA has approximately 339,000 members ranging from sole practitioners to the largest U.S. accounting firms. Surveys were sent to 80,000 members and

[4] AICPA refers to the American Institute of Certified Public Accountants, PCPS refers to the Private Companies Practice Section of the AICPA, and TSCPA refers to the Texas Society of Certified Public Accountants

responses were received from 2,808 firms who provided information regarding their last fiscal year, which for most respondents was December, 2007. Average billing rate information was provided on both a regional and national basis. The survey respondents represented firms comprised of sole practitioners, single-office firms or regional firms. The MAP Survey has been conducted on an annual basis for 5 years and addresses key metrics that firms rely on to gauge their performance and profitability. For purposes of the analysis, Deloitte & Touche used the average billing rates reported by accounting firms in the Midwest Region having net client fees of two million dollars or more per year. Such firms typically have lower billing rates than national or "Big 4" firms (i.e., Deloitte, PricewaterhouseCoopers, KPMG or Ernst & Young). Therefore the accounting services Market Rates used in the Study are lower than those of the larger firms (as confirmed by Supplemental Rates that will be discussed) and are therefore conservative for purposes of the Study.

According to the MAP Survey, average billing rates for accounting services range from 1.84 times for partners to 4.43 times for associates of the professional's hourly compensation. For example, using a 4.43 times multiplier, an associate making $20 per hour would have a billing rate of approximately $89 per hour. Professional services firms that establish hourly billing rates based on a multiple of employees' salaries, use a multiplier, which, when applied to the employee's hourly compensation, is intended to cover the employee's salary and benefits, a portion of overhead costs, and a profit for the owners of the firm.

The MAP Survey also identifies the types of accounting firm costs and overheads (e.g., salaries, employee benefits, professional dues and licenses, library costs, continuing education, insurance, rent and other company costs, interest, computer and technology, promotion and marketing, payroll taxes, phone and web connectivity, and depreciation) incurred in providing service to clients. In general, the hourly billing rates of professional services providers are set at a level to recover all expenses (i.e., fully-loaded) and earn a profit for the owners.

B. **Engineering Services**

Deloitte & Touche used the results of the ZweigWhite Information Services, LLC *2008 Fee & Billing Survey of Architecture, Engineering, Planning & Environmental Consulting Firms* ("ZweigWhite Survey") for developing the engineering services classifications. The purpose of the eleventh annual ZweigWhite Survey is to gather, analyze, and publish information on the fee and billing practices of engineering, architecture, planning and environmental consulting firms. Survey responses to an 83-item questionnaire were received from 102 firms regarding their 2007 operations and represents a diverse cross-section of the design and consulting industry. Of the respondents, 85% have standard billing rates for each position or status level. Firms that use a multiple of employees' salaries to determine billing rates use a median of 3.0 times the employee's hourly wage rate.

The majority of firms (67%) mark up reimbursable expenses using a standard median markup of 10%, although a quarter of the firms mark up reimbursables by 15%. Average billing rate information was provided on both a national and regional basis. For analysis purposes, Deloitte & Touche used the average billing rates reported in the ZweigWhite Survey by firms for the North Central region including Illinois, Ohio, Indiana, Iowa and Missouri).

C. **Information Technology Services**

Deloitte & Touche used the *2008 IT Salary Report* published by Computer Economics, Inc. ("Computer Economics Report") and the *2008 IT Market Compensation Study* published by Gartner, Inc. ("Gartner Study") for developing information applicable to technology services classifications. The Computer Economics Report draws on a survey of information technology managers based on actual salaries paid to their employees in 2007 as well as their estimates of projected pay raises for 2008. The Computer Economics Report provides base salary projections for 78 specific job titles in 78 metropolitan areas of the United States. Computer Economics has been publishing salary data since 1990. The Gartner Study, which has been conducted annually for the past ten years, provided compensation data based on survey responses from 283 enterprises effective as of March 1, 2008. The Gartner Study data was utilized for six AWWSC positions for which no corresponding market compensation information was provided by the Computer Economics Report.

Unlike the other market survey data obtained by Deloitte & Touche, the Computer Economics Report and the Gartner Study provide average salary information, rather than average billing rate information, by position or service classification. For this reason, Deloitte & Touche calculated an hourly compensation rate and applied a billing rate multiplier of 3.0 times to develop a Market Rate for the job titles listed in the Computer Economics Report and the Gartner Study. Use of a billing rate multiplier of 3.0 times to develop a Market Rate for the job titles listed in the Computer Economics Report and the Gartner Study is both appropriate and conservative, as the 3.0 times multiplier is within the range of the other multipliers listed in the market rate surveys (i.e., 1.84 times to 4.43 times for accountants and 3.0 times for engineers as previously discussed in the Accounting Services and Engineering Services sections above, and 5.0 times for management consultants as discussed in the Management Consulting Services section below).

For developing the calculated Market Rates for each job title, Deloitte & Touche used the Middle Atlantic (i.e., Philadelphia, Pennsylvania / Atlantic City, New Jersey Metropolitan Area) median salary information for large companies (i.e., annual revenues greater than $750 million) listed in the Computer Economics Report. For developing the calculated Market Rates for the six job titles matched to the Gartner Study, Deloitte & Touche used the Northeast Region salary information listed in the Gartner Study.

D. **Legal Services**

Deloitte & Touche used the results of the Incisive Legal Intelligence *2008 NLJ Billing Survey* ("NLJ Survey") of the 250 largest law firms in the United States based on number of lawyers for developing the legal services classifications. The National Law Journal ("NLJ") surveyed approximately 300 law firms to determine the largest firms. The NLJ's thirty-first annual survey contains billing information for 216 large law firms regarding their 2007 billing practices. The NLJ is a subsidiary of Incisive Legal Intelligence, an Incisive Media US Properties, LLC company. Of the 216 firms, 127 firms provided specific hourly billing rate information for partners and associates. Some of the 127 firms provided their average partner and associate billing rates. For those firms that did not provide an average hourly billing rate, but did report high and low hourly billing rates, Deloitte & Touche used the reported partner and associate high and low hourly billing rates to develop an average partner and associate billing rate for the market comparison.

The NLJ Survey provides partner and associate billing rate information for the law firms listed by name and location. Deloitte & Touche used the NLJ Survey Midwest firm information (i.e., law firms operating in the states of Illinois, Missouri, Michigan, and Ohio) for developing the Market Rates for comparison to the Service Company Rates.

E. **Management Consulting Services**

Deloitte & Touche used the results of the Association of Management Consulting Firms' ("AMCF") 2008 Edition of the *Operating Ratios for Management Consulting Firms: A Resource for Benchmarking* ("AMCF Survey") for the management consulting services classifications.

The twenty-second annual AMCF Survey is based on 2007 consulting industry results including industry billing rates and procedures and was compiled by Industry Insights, Inc. AMCF distributed questionnaires to all 31 AMCF members as well as to other U.S. management consulting firms. Requests to participate in the AMCF Survey were primarily targeted to larger volume consulting businesses rather than single practitioners. In all, 49 responses were received and included in the AMCF Survey data.

Among survey respondents, billing rates on an overall staff basis for 2007 were set at a multiplier of approximately 5.0 times employee earnings. In other words, if an employee effectively earns $50 per hour, a 5.0 times earnings multiplier for billing rate determination would translate into a billing rate of $250 per hour.

V. MARKET ANALYSIS

This section of the Study provides the results of the Deloitte & Touche Market Analysis comparing the cost of each service expected to be obtained from the Service Company during the test year that can be performed by an affiliate or

non-affiliate provider to the cost that would be incurred for the service if it were obtained from a non-affiliate provider through competitive bidding in the open market. The Market Analysis provides a reasonable estimate of the cost savings realized, or the excess costs incurred by IAWC from obtaining professional and managerial services through AWWSC as compared to the cost of obtaining the services from non-affiliate providers. As shown on Schedule 8, the expected test year net cost savings realized by IAWC from obtaining each category of service from the Service Company rather than through outside third-party service providers totals $7.692 million.

The test year savings expected to be realized by IAWC, as shown on Schedule 8, are effectively understated due to the fact that Service Company managerial and professional personnel are "exempt employees" and, as such, only report a maximum time worked of eight hours per day even though they may actually work more than an eight-hour day. Since outside third-party vendors typically charge for all time incurred associated with the services provided, had the market analysis comparison recognized the additional time worked by Service Company employees, the Service Company Rates used in the market analysis would have been lower and the expected test year savings to IAWC would be greater than $7.692 million.

A. **Accounting Services**

Schedules 1 through 1.2 show the Market Analysis of accounting services. Schedule 1 Column A shows the accounting professional classifications contained in the MAP Survey as used in the analysis. Columns B and C show respectively the Market Rates from the MAP Survey for all participant firms and for Midwest Region firms having net client fees of $2 million or more per year. The adjusted 2010 Market Rates resulting from application of the cost escalator, as shown on Schedule 6 to adjust the Market Rates from the MAP Survey to a 2010 level, are shown in Column D. Column E shows the time distribution for each professional classification as provided by the Service Company on Schedule 1.1. Column F of Schedule 1 shows the weighted average Market Rate by professional classification resulting from applying the time distributions to the adjusted 2010 MAP Survey Market Rates. The weighted average Market Rate from Schedule 1 is used on Schedule 8 for comparison to the AWWSC average internal rate per hour for accounting services as provided by the Service Company on Schedule 1.1.

The table at the bottom of Schedule 1 provides a comparison of the Service Company Rates by professional classification as provided by the Service Company on Schedule 1.1 to the MAP Survey adjusted 2010 Market Rates for accounting services as shown at the top of Schedule 1. Schedule 1 also quantifies the hourly rate difference between the Service Company Rate and the MAP Survey Market Rate for each professional classification and whether the Service Company Rate is above or below the Market Rate. As shown on

Schedule 8, the cost savings realized by IAWC for accounting-related services obtained through the Service Company is projected to be $1.773 million.

Schedule 1.2 contains Supplemental Rate information regarding hourly billing rates for a "Big 4" accounting firm from information provided by American Water. As shown on Schedule 1.2, the Supplemental Rates, as adjusted to 2010 test year levels, range from a low of $254 per hour for staff accountants to a high of $489 per hour for partners. The Supplemental Rates shown on Schedule 1.2 are substantially higher than the MAP Survey Market Rates shown at the bottom of Schedule 1. As previously stated in the Study, this is to be expected as the larger accounting firms typically have higher billing rates than smaller firms. Since the Study compares the Service Company Rates to the average MAP Survey Market Rates of smaller accounting firms, the projected level of cost savings realized by IAWC for accounting related services obtained through the Service Company of $1.773 million is a conservative estimate.

B. **Engineering Services**

Schedules 2 through 2.2 show the Market Analysis of engineering services. Schedule 2 Column A shows the engineering professional classifications contained in the ZweigWhite Survey. Columns B and C show respectively the Market Rates from the ZweigWhite Survey for all firms and for North Central Region firms. The adjusted 2010 Market Rates from application of the cost escalator, as shown on Schedule 6 to adjust the ZweigWhite Survey Market Rates to a 2010 level, are shown in Column D. Column E of Schedule 2 shows the time distribution for each professional classification as provided by the Service Company on Schedule 2.1. Column F of Schedule 2 shows the weighted average Market Rate by professional classification resulting from applying the time distributions to the adjusted 2010 ZweigWhite Survey Market Rates. The weighted average Market Rate from Schedule 2 is used on Schedule 8 for comparison to the AWWSC average internal rate per hour for engineering services as provided by the Service Company on Schedule 2.1.

The table at the bottom of Schedule 2 provides a comparison of the Service Company Rates by professional classification as provided by the Service Company on Schedule 2.1 to the ZweigWhite Survey adjusted 2010 Market Rates for engineering services as shown at the top of Schedule 2. Schedule 2 also quantifies the hourly rate difference between the Service Company Rate and the ZweigWhite Survey Market Rate for each professional classification and whether the Service Company Rate is above or below the Market Rate. As shown on Schedule 8 the cost savings realized by IAWC for engineering-related services obtained through the Service Company is projected to be $1.167 million.

Schedule 2.2 contains Supplemental Rate information regarding hourly billing rates for engineering firms that provide service to American Water. Schedule 2.2 was prepared from information provided by the Service Company for contracted services with eight outside engineering firms. As shown on Schedule 2.2, the

Supplemental Rates, as adjusted to 2010 test year levels, range from a low of $66 per hour for technicians to a high of $211 per hour for principals. The Market Rates adjusted to 2010 test year levels, as shown in Column D of Schedule 2, range from a low of $70 per hour for drafters to a high of $142 for department heads. The Supplemental Rate information supports the reasonableness of the Market Rates as a comparative measure for use in the Market Analysis.

C. **Information Technology Services**

Schedules 3 through 3.3 show the Market Analysis for information technology services. Schedule 3 Column A shows the information technology services professional classifications contained in the Computer Economics Report or the Gartner Study. Columns B and C show, respectively, the national and Middle Atlantic information technology services Market Rates as calculated from the Computer Economics Report, or the national and Northeast Region Market Rates as calculated from the Gartner Study, as shown on Schedule 3.2. The adjusted 2010 Market Rates from application of the cost escalator, as shown on Schedule 6 to adjust the Market Rates to a 2010 level, are shown in Column D. Column E of Schedule 3 shows the time distribution for each professional classification as provided by the Service Company on Schedule 3.1. Column F of Schedule 3 shows the weighted average Market Rate by professional classification resulting from applying the time distributions to the adjusted 2010 Computer Economics Report or the Gartner Study Market Rates. The weighted average Market Rate from Schedule 3 is used on Schedule 8 for comparison to the AWWSC average internal rate per hour for information technology services as provided by the Service Company on Schedule 3.1.

The table at the bottom of Schedule 3 provides a comparison of the Service Company Rates by professional classification as provided by the Service Company on Schedule 3.1 to the Market Rates from the Computer Economics Report or the Gartner Study as adjusted to reflect 2010 Market Rates for information technology services. Schedule 3 also quantifies the hourly rate difference between the Service Company Rate and the calculated Computer Economics Report or the Gartner Study Market Rate for each professional classification and whether the Service Company Rate is above or below the Market Rate. As shown on Schedule 8, the cost savings realized by IAWC for information technology services obtained through the Service Company is projected to be $1.468 million.

Schedule 3.3 contains Supplemental Rate information regarding hourly billing rates for information technology firms that provide service to American Water. Schedule 3.3 was prepared from information provided by the Service Company for contracted services with outside information technology services vendors. As shown on Schedule 3.3 the Supplemental Rates, as adjusted to 2010 test year levels, range from a low of $87 per hour for analysts to a high of $741 per hour for business sponsors. The Market Rates adjusted to 2010 test year levels as shown in Column C of Schedule 3 range from a low of $57 for a computer

operator to a high of $223 for a director of client services. The Supplemental Rate information supports the reasonableness of the Market Rates as a measure for use in the Market Analysis.

D. **Legal Services**

Schedules 4 through 4.4 show the Market Analysis of legal services. Schedule 4 Column A shows the legal professional classifications used in the Market Analysis. The partner and associate professional classifications are from the NLJ Survey. The paralegal classification was included for the analysis although paralegal information is not contained in the NLJ Survey. Including the paralegal classification was necessary since the Service Company employs several paralegals. Schedules 4.2 and 4.3 show the Midwest Region law firms from the NLJ Survey and the average Market Rates for the partner and associate professional classifications respectively. The billing rate for the paralegal classification is shown on Schedule 4.4 and is discussed below. The adjusted 2010 Market Rates resulting from application of the cost escalator, as shown on Schedule 6 to adjust the NLJ Survey partner and associate Market Rates as well as the paralegal billing rate are shown in Column C of Schedule 4. Column D shows the time distribution for each professional classification as provided by the Service Company on Schedule 4.1. Column E of Schedule 4 shows the weighted average Market Rate by professional classification resulting from applying the time distributions to the adjusted Market Rates shown in Column C. The weighted average Market Rate from Schedule 4 is used on Schedule 8 for comparison to the AWWSC average internal rate per hour for legal services as provided by the Service Company on Schedule 4.1.

The table at the bottom of Schedule 4 provides a comparison of the Service Company Rates by professional classification as provided by the Service Company on Schedule 4.1 to the adjusted 2010 Market Rates for legal services as shown at the top of Schedule 4. Schedule 4 also quantifies the hourly rate difference between the Service Company Rate and the Market Rate for each professional classification and whether the Service Company Rate is above or below the Market Rate. As shown on Schedule 8 the cost savings realized by IAWC for legal services obtained through the Service Company is projected to be $0.668 million.

Schedule 4.4 contains Supplemental Rate information for law firms that provide service to American Water. Schedule 4.4 was prepared from information provided by the Service Company for contracted services with eleven outside law firms. As shown on Schedule 4.4, the Supplemental Rates, as adjusted to 2010 test year levels, range from a low of $143 per hour for paralegals to a high of $534 per hour for partners. As shown on Schedule 4.4, paralegal billing rates range from $143 per hour to $193 per hour. Deloitte & Touche used the $143 per hour paralegal billing rate as the Market Rate to compare to the Service Company Rate for the paralegal classification. The Market Rates adjusted to 2010 test year levels as shown in Column C of Schedule 4 range from a low of

$143 for paralegals to a high of $435 for partners. The reasonableness of the Market Rates for use in the Market Analysis is supported by the Supplemental Rate information.

E. **Management Consulting Services**

Schedules 5 through 5.2 show the Market Analysis of management consulting services. Schedule 5 Column A shows the management consulting professional classifications contained in the AMCF Survey as used in the analysis. Column B shows the Market Rates from the AMCF Survey. The adjusted 2010 Market Rates resulting from application of the cost escalator, as shown on Schedule 6 to adjust the AMCF Survey Market Rates to a 2010 level, are shown in Column C. Column D shows the time distribution for each professional classification as provided by the Service Company on Schedule 5.1. Column E of Schedule 5 shows the weighted average Market rate by professional classification resulting from applying the time distributions to the adjusted 2010 AMCF Survey Market Rates. The weighted average Market Rate from Schedule 5 is used on Schedule 8 for comparison to the AWWSC average internal rate per hour for management consulting services as provided by the Service Company on Schedule 5.1.

The table at the bottom of Schedule 5 provides a comparison of the Service Company Rates by professional classification as provided by the Service Company on Schedule 5.1 to the AMCF Survey adjusted 2010 Market Rates for management consulting services as shown at the top of Schedule 5. Schedule 5 also quantifies the hourly rate difference between the Service Company Rate and the AMCF Survey Market Rate for each professional classification and whether the Service Company Rate is above or below the Market Rate. As shown on Schedule 8 the cost savings realized by IAWC for management consulting services obtained through the Service Company is projected to be $2.616 million.

Schedule 5.2 contains Supplemental Rate information regarding hourly billing rates for management consulting firms that provide service to American Water. Schedule 5.2 was prepared from information provided by the Service Company for contracted services with outside consulting firms. As shown on Schedule 5.2, the Supplemental Rates, as adjusted to 2010 test year levels, range from a low of $81 per hour for technicians to a high of $763 per hour for principals. The Market Rates adjusted to 2010 test year levels as shown in Column C of Schedule 5 range from a low of $137 for research associates to a high of $301 for junior partners. The Supplemental Rate information supports the reasonableness of the Market Rates for use in the Market Analysis.

VI. CUSTOMER ACCOUNTS ANALYSIS

As discussed in Section IV of the Study, Deloitte & Touche performed a Customer Accounts Analysis of the 2007 customer accounts expenses of 13 electric utilities operating in the states of Illinois, Indiana, Iowa, Missouri, and Ohio. For electric and combination utilities, customer accounts expenses are

recorded to specific accounts as defined in the Federal Energy Regulatory Commission ("FERC") Uniform System of Accounts.[5] The utilities file annual financial reports with the FERC[6] which contain customer accounts information which can be used to compare to IAWC's customer service related costs.

The Customer Accounts Analysis is based on 2007 FERC Form 1 amounts reported for Accounts 901, 903 and 905, as well as computations of employee benefits and payroll taxes associated with customer accounts activities recorded to FERC Accounts 926 and 402, respectively. The Customer Accounts Analysis computes a 2007 customer accounts "expense per customer" for the 13 utilities which was escalated to a 2010 level for comparison to IAWC's 2010 test year customer service expense per customer.

The 13 utilities included in the Customer Accounts Analysis as shown on Schedule 7 include:

Iowa:
- Interstate Power and Light Company
- MidAmerican Energy Company

Illinois:
- Central Illinois Light Company (Ameren-CILCO)
- Central Illinois Public Service Company (Ameren-CIPS)
- Commonwealth Edison
- Illinois Power Company (Ameren-IP)

Indiana:
- Duke Energy Indiana
- Indiana Michigan Power Company

Missouri:
- The Empire District Electric Company
- Kansas City Power & Light Company
- Union Electric Company (Ameren UE)

Ohio:
- Duke Energy Ohio
- Ohio Power Company

The following provides a brief discussion of the FERC accounts for reporting costs associated with customer accounts activities. The complete account

[5] 18 CFR Part 101

[6] *FERC Financial Report FERC Form No. 1: Annual Report of Major Electric Utilities, Licensees and Others and Supplemental Form 3-Q: Quarterly Financial Report*

descriptions and types of expenses recorded to FERC accounts 901, 903 and 905 are provided in Appendix 1 of the Study.

Account 901 – Supervision – this account shall include the cost of labor and expenses incurred in the general direction and supervision of customer accounting and collecting activities. Direct supervision of a specific activity shall be charged to Account 902, Meter Reading Expenses, or Account 903, Customer Records and Collection Expenses.

Because the general supervision expenses recorded to Account 901 relate to both Accounts 902 and 903, a portion of the total Account 901 expense amount related to Account 903 was included in the Customer Accounts Analysis.

Account 903 – Customer Records and Collection Expenses – this account shall include the cost of labor, materials used and expenses incurred in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints.

Account 905 – Miscellaneous Customer Accounts Expenses – this account shall include the cost of labor, materials used and expenses incurred not provided for in other accounts.

The types of electric utility customer accounts activities whose costs are recorded to Accounts 903 and 905 include but are not limited to:

- Customer account inquiries,
- Customer order processing,
- Verifying billing with contracts or rate schedules,
- Customer bill preparation and mailing,
- Collections,
- Payment processing,
- Receiving, refunding, or applying customer deposits, and
- Correspondence processing.

Utility employee labor is charged to Accounts 901, 903, or 905, however, employee pension and benefit expenses as well as payroll tax expenses are recorded to Account 926 – Employee Pensions and Benefits and Account 408 – Taxes Other Than Income Taxes, Other Income and Deductions respectively. To properly compare the customer accounts expenses incurred by the utilities to those incurred by IAWC, calculated amounts of pension and benefits and payroll tax expense were included in the Customer Accounts Analysis as shown on Schedule 7.

The 2007 customer accounts expense per customer for the utilities shown on Schedule 7 were escalated to a 2010 level using the CPI cost escalator as previously discussed in the Study for comparison to IAWC's 2010 test year

forecasted customer service cost per customer. IAWC's 2010 test year forecasted customer service costs were prepared by IAWC and are shown on Schedule 7.1.

The IAWC forecasted 2010 test year customer service expense expected to be incurred for customer service activities performed by AWWSC, Regional Offices, and IAWC is $7.286 million as shown on Schedule 7.1. IAWC's forecasted 2010 test year customer services expense per customer is $23.33 as shown on Schedule 7.1.

The results of the Deloitte & Touche Customer Accounts Analysis are summarized on Schedule 7.2. As shown on Schedule 7.2, the customer accounts expense per customer for the 13 utilities range from $16.75 to $41.38 with a group average cost per customer of $33.98. IAWC's forecasted test year 2010 customer service expense per customer is $23.33 per customer as shown on Schedule 7.1. IAWC's customer service expense per customer is below the average expense per customer of the utility group included in the analysis.

VII. STUDY CONCLUSIONS

The provision of services to IAWC through the Service Company results in significant cost benefits to IAWC. Based on the Market Analysis, and as shown on Schedule 8, the cost savings expected to be realized by IAWC from obtaining services through the Service Company during the forecast period when compared to the costs of acquiring such services in the open market from third-party service providers amount to $ 7.692 million. The net savings expected to be realized by IAWC results from the Service Company's ability to provide services at a cost which is lower than the market cost of such services. As mentioned previously in the Study, had the Market Analysis recognized the fact that Service Company managerial and professional employees actually work more time than the maximum reportable time of eight hours per day, the expected net savings of $7.692 million would be larger.

The results of the Customer Accounts Analysis show that IAWC's forecasted 2010 test year customer service expense compares favorably with the customer accounts expenses reported by the group of utilities. The customer accounts expense per customer for the utilities ranges from $16.75 to $41.38. IAWC's test year customer service expense per customer of $23.33 is below the $33.98 average expense per customer of the other utilities included in the comparison.

VIII. PROFESSIONAL STANDARDS

The services provided by Deloitte & Touche for this Study were performed under the Standards for Consulting Services of the American Institute of Certified Public Accountants ("AICPA"). Consulting services differ fundamentally from attestation services provided in an attestation engagement. Consulting services may include consultations, advisory services such as this Study, implementation services, transaction services, staff and other support services, and product services. However, consulting services exclude services subject to other AICPA Technical Standards, such as Statements on Auditing Standards, Statements on Standards for Attestation Engagements, or Statements on Standards for Accounting and Review Services.

Illinois-American Water Company
FERC Account Descriptions

901 – Supervision (Major only).
This account shall include the cost of labor and expenses incurred in the general direction and supervision of customer accounting and collecting activities. Direct supervision of a specific activity shall be charged to account 902, Meter Reading Expenses, or account 903, Customer Records and Collection Expenses, as appropriate. (See operating expense instruction 1.)

903 – Customer Records and Collection Expenses.
This account shall include the cost of labor, materials used and expenses incurred in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints.
Labor
1. Receiving, preparing, recording and handling routine orders for service, disconnections, transfers or meter tests initiated by the customer, excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.
2. Investigations of customers' credit and keeping of records pertaining thereto, including records of uncollectible accounts written off.
3. Receiving, refunding or applying customer deposits and maintaining customer deposit, line extension, and other miscellaneous records.
4. Checking consumption shown by meter readers' reports where incidental to preparation of billing data.
5. Preparing address plates and addressing bills and delinquent notices.
6. Preparing billing data.
7. Operating billing and bookkeeping machines.
8. Verifying billing records with contracts or rate schedules.
9. Preparing bills for delivery, and mailing or delivering bills.
10. Collecting revenues, including collection from prepayment meters unless incidental to meter-reading operations.
11. Balancing collections, preparing collections for deposit, and preparing cash reports.
12. Posting collections and other credits or charges to customer accounts and extending unpaid balances.
13. Balancing customer accounts and controls.
14. Preparing, mailing, or delivering delinquent notices and preparing reports of delinquent accounts.
15. Final meter reading of delinquent accounts when done by collectors incidental to regular activities.
16. Disconnecting and reconnecting service because of nonpayment of bills.
17. Receiving, recording, and handling of inquiries, complaints, and requests for investigations from customers, including preparation of necessary orders, but

Illinois-American Water Company
FERC Account Descriptions

excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.

18. Statistical and tabulating work on customer accounts and revenues, but not including special analyses for sales department, rate department, or other general purposes, unless incidental to regular customer accounting routines.
19. Preparing and periodically rewriting meter reading sheets.
20. Determining consumption and computing estimated or average consumption when performed by employees other than those engaged in reading meters.

Materials and Expenses

21. Address plates and supplies.
22. Cash overages and shortages.
23. Commissions or fees to others for collecting.
24. Payments to credit organizations for investigations and reports.
25. Postage.
26. Transportation expenses (Major only), including transportation of customer bills and meter books under centralized billing procedure.
27. Transportation, meals, and incidental expenses.
28. Bank charges, exchange, and other fees for cashing and depositing customers' checks.
29. Forms for recording orders for services removals, etc.
30. Rent of mechanical equipment.
31. Communication service (Nonmajor only).

905 – Miscellaneous Customer Accounts Expenses (Major only).

This account shall include the cost of labor, materials used and expenses incurred not provided for in other accounts.

Labor

1. General clerical and stenographic work.
2. Miscellaneous labor.

Materials and Expenses

3. Communication service.
4. Miscellaneous office supplies and expenses and stationery and printing other than those specifically provided for in accounts 902 and 903.

DIRECT TESTIMONY OF
MARK R. YOUNG

ILLINOIS-AMERICAN WATER COMPANY

TABLE OF CONTENTS

Page

I. WITNESS INTRODUCTION 1
II. PURPOSE OF DIRECT TESTIMONY 2

DIRECT TESTIMONY OF MARK R. YOUNG **IAWC EXHIBIT 11.00**

I. WITNESS INTRODUCTION

Q1. Please state your name and business address.

A. My name is Mark R. Young. My business address is 400 W.15th Street, Suite 1700, Austin, Texas 78701.

Q2. By whom and in what capacity are you employed?

A. I am a Director in the Energy & Resources Practice of the Regulatory & Capital Markets Consulting Practice of Deloitte & Touche LLP ("Deloitte & Touche").

Q3. Please describe your educational background and professional affiliations.

A. I received a Bachelor of Business Administration degree in accounting from Texas State University. I am a certified public accountant licensed in the state of Texas and a member of the American Institute of Certified Public Accountants and the Texas Society of Certified Public Accountants.

Q4. Please summarize your professional work experience.

A. I have been associated with the regulated utilities industry for over 25 years. For the past 17 years, I have provided regulatory consulting services to electric, gas, telecommunications, and cable television industry clients. My consulting responsibilities include regulatory accounting, revenue requirements development, and rate case and litigation support. I have completed numerous regulatory engagements related to shared service organizations, affiliate transactions, cost allocations, codes of conduct and transfer pricing.

I served as the Utilities Accounting Manager of a municipality and was responsible for the accounting and financial reporting of the municipally-owned electric and water/wastewater utilities. In addition, I served as the Manager of Electric Accounting of the Public Utility Commission of Texas ("PUCT") where I managed the PUCT Electric Division accounting Staff and was responsible for Staff's revenue requirements recommendations and testimony. Prior to my employment with the PUCT, I served as an internal auditor for a public power entity.

I serve as a contributing author of Accounting for Public Utilities (LexisNexis) and have served as a member of the Natural Gas, Telecommunications and Electric Industries Committee of the Texas Society of Certified Public Accountants. I have conducted several ratemaking training seminars for energy industry clients.

Q5. Have you previously testified before a regulatory body?

A. Yes, I have testified in various types of rate proceedings before the Public Utility Commission of Texas. A listing of the regulatory proceedings in which I have testified are shown in attached Appendix A which includes a complete copy of my resume.

II. PURPOSE OF TESTIMONY

Q6. What is the purpose of your testimony?

A. Deloitte & Touche was engaged by Illinois-American Water Company ("IAWC") to conduct a Service Company Cost Study ("Study") comparing the cost of certain services expected to be obtained by IAWC from

American Water Works Service Company, Inc. ("AWWSC" or "Service Company") to the cost that would be incurred if such services were obtained in the open market.

The purpose of my Direct Testimony is to discuss the Study performed by Deloitte & Touche, which is marked as IAWC Exhibit 11.01, and which I am sponsoring jointly with Mr. Bernard L. Uffelman. I directed the work of Deloitte & Touche, which engaged Mr. Uffelman to assist in the preparation of the Study.

Q7. Please discuss the Study.

A. As discussed in the Direct Testimony of Mr. Uffelman, the Study was prepared in connection with IAWC's response to the Illinois Commerce Commission's Order of July 30, 2008 in Docket 07-0507. As explained in the Study and by Mr. Uffelman, the Study provides the required market comparisons for services that IAWC can effectively outsource to either an affiliate or non-affiliate provider. The Study shows that in procuring services through the Service Company, IAWC realizes a significant level of projected savings. For 2010, the projected savings are $7.692 million. As Mr. Uffelman explains, the Study also provides an analysis of IAWC's customer service-related costs ("Customer Accounts Analysis") which supports the Self Provision Analysis sponsored by IAWC Witness Ms. Karla O. Teasley.

Q.8 Does this conclude your Direct Testimony?

A. Yes, it does.

Appendix A

Director
Regulatory & Capital Markets Consulting
Energy & Resources
Deloitte & Touche LLP
Austin, Texas
(512) 691-2303
myoung@deloitte.com

Professional Experience

Mr. Young is a Director in the Regulatory & Capital Markets Consulting Practice of Deloitte & Touche LLP. Mr. Young has over twenty-five years of experience in the regulated utilities industry having served as both an employee of a public power electric utility as well as a state public utility commission staff member. Mark served as the Electric Accounting Manager for the Public Utility Commission of Texas (PUCT) and was responsible for the Electric Division staffs revenue requirement recommendations and testimony. Mr. Young's utility consulting responsibilities include regulatory accounting, revenue requirements development, rate case/litigation support, financial/business planning, and regulatory services.

Major Projects

- Performed regulatory due diligence on potential water utility acquisition targets on behalf of a potential foreign water utility acquirer.

- Performed multiple analyses of service company and nuclear service company affiliate costs charged to regulated and non-regulated subsidiaries in three contested state regulatory proceedings. These engagements involved:
  - Independent analysis of the internal controls, procedures and accounting process used to bill service company and nuclear service company (shared services) costs to regulated and non-regulated subsidiaries
  - Detailed affiliate transaction testing and analysis service company and nuclear service company costs accumulated and billed to its regulated and non-regulated subsidiaries through its work order system

  - Detailed review of all service company agreements between the service companies and regulated and non-regulated subsidiaries
  - Detailed review of transfer pricing methodologies and issues in relation to Securities and Exchange Commission (SEC), Federal Energy Regulatory Commission (FERC), and Public Utility Commission of Texas (PUCT) cost allocation and affiliate transaction rules and regulations

- Performed a class cost of service study for a large U.S. gas distribution utility

- Managed multiple engagement teams performing Sarbanes-Oxley Section 404 compliance testing related to the internal controls of a large global advertising and marketing conglomerate

- Managed multiple engagement teams performing financial restatement validation procedures for a large global advertising and marketing conglomerate

- Engaged by a large western U.S. investor-owned energy utility to perform a analysis of shared service activities and costs charged to regulated and non-regulated subsidiaries and to determine whether such activities and costs comply with the California Public Utilities Commission (CPUC) affiliate cost rules referenced in R.97-04-011 and I.97-04-012. This project involved:
  - Analysis of shared service activities and documenting how such activities were initiated
  - Evaluation of internal controls related to authorization of charges for shared services and cost accumulation
  - Analysis of transfer pricing policies and procedures and whether such policies and procedures were in compliance with the CPUC affiliate transaction regulations
  - Analysis of the costing methodologies (transfer pricing) used to charge regulated and non-regulated subsidiaries for shared service activities

- Participated in a multi-functional risk control infrastructure assessment of an energy trading and marketing affiliate of a U.S. investor-owned utility

- Managed a review of the wholesale fuel and purchased power adjustment clause protocols for a U.S. investor-owned utility

- Assisted a major investor-owned electric utility and a public power utility in unbundling balance sheets as part of information systems implementation and restructuring of the electric utility industry

- Assisted a large Regional Bell Operating Company (RBOC) in responding to a California Public Utilities Commission (CPUC) mandated regulatory audit. Regulatory assistance included preparation of direct testimony sponsored by the RBOC regarding certain regulatory audit findings and recommendations related to the RBOC's affiliate transactions, shared service organizations and other affiliate transaction issues.

- Conducted a cost allocation study and report for a large multi-state gas transmission and distribution utility. The cost allocation study focused on shared service cost allocations from parent company to regulated and non-regulated affiliates.

- Prepared lead-lag studies and testimony to support the cash working capital requirements for several U.S. investor-owned electric and gas utilities

- Managed a review and assessment of accounting processes and information technology systems related to electric industry restructuring for a municipally-owned utility

- Managed the development of cost of service models for two Federal Energy Regulatory Commission §35.13 regulatory filings for California reliability must-run (RMR) units for a major investor-owned electric utility

- Managed the review of internal controls to prevent customer "slamming" for a large long-distance reseller and assisted company in obtaining operating license to provide local service in the state of Texas

- Managed a review of cost allocations and research and development charges by a regional Bell operating company from its corporate headquarters function and subsidiaries to state telephone operations

- Managed and completed customer late fee analyses and reports for large cable system operators. Such analyses comprise approximately 26 separate cable systems

- Performed independent reviews of cable television operators' Federal Communications Commission (FCC) Form 393 filings under the Cable Television Consumer Protection and Competition Act of 1992. Such filings included FCC Forms 393, 1200, 1205, 1210, 1220, and 1235 and 1240.

- Prepared and defended cable television benchmark and equipment regulatory filings before the FCC and local municipalities

- Developed cost of service computer model for cable television operators to evaluate the effects of regulation under the Cable Television Consumer Protection and Competition Act of 1992

- Prepared and defended cable television cost of service filings before the FCC

- Conducted survey of federal income tax practices in regulation on behalf of large investor-owned electric utility

- Participated in the independent review of the outside collection function of a multi-state gas distribution company

- Managed the accounting staff of the Electric Division of the Public Utility Commission of Texas. Directed the commission staff's review of electric rate filing packages. Managed preparation of electric accounting staff's recommendations and testimony in the areas of accounting, federal income tax, deferred accounting, and other regulatory issues.

- Presented testimony as a commission staff witness in numerous electric, telecommunication, and water utility rate proceedings and other dockets

- Testified to deferred accounting treatment for utility plant costs until such time as the generating units are recognized and included in rates

- Analyzed and testified to the cost of service and rate base components for a fuel affiliate of a major electric utility

- Managed the utilities accounting staff of the Controllers' office in a municipality. Prepared and presented financial statements for a municipally owned electric and water, and wastewater utilities to city management and council

- Managed the accounting implementation of Statement of Financial Accounting Standards No. 71 "Accounting for the Effects of Certain Types of Regulation" for electric, water, and wastewater utilities owned by a municipality

- Prepared and presented official statements related to municipal utility revenue bond debt issuances

- Conducted internal audit of construction costs related to a coal fired generating station for a public power utility

Mr. Young has completed regulatory consulting engagements to a number of regulated entities including but not limited to:

- American Water Works Company
- Cablevision Systems Corporation
- Entergy Corporation
- Interpublic Group of Companies, Inc.
- PG&E Corporation
- Sierra Pacific Resources
- TXU Corporation
- Xcel Energy, Inc.

Certifications & Memberships

- Certified Public Accountant and a member of the American Institute of Certified Public Accountants and the Texas Society of Certified Public Accountants.

- Prior member of the Texas Society of Certified Public Accountants Natural Gas, Telecommunications, and Electric Industries Conference Committee.

- Completed the Advanced Regulatory Studies Program sponsored by Michigan State University and the National Association of Regulatory Utility Commissioners.

Education

- Bachelor of Business Administration in Accounting - Texas State University

Deloitte & Touche Market Analysis
Professional Classification Descriptions

Accounting Services

Partner
Audit Partners are equity owners of the firm. Partners are responsible for developing client relationships that result in sales; managing multiple client service teams; working with other partners to market non-audit services to existing clients and develop new business with top executives. Partners are trusted advisors to industry clients and actively participate in industry events, and serve as spokespersons within industry segments. Partners play an active role in staff development and mentoring of staff and participate in firm recruiting efforts. Partners have 11 or more years of audit experience and are licensed CPAs.

Director
Audit Directors are non-equity partners of the firm. Directors are responsible for developing client relationships that result in sales; managing multiple client service teams; working with other partners to market non-audit services to existing clients and develop new business with top executives. Directors are trusted advisors to audit partners and clients in specific industries, and actively participate in industry events, and serve as trusted spokespersons within industry segments. Directors play an active role in staff development and mentoring of staff and participate in firm recruiting efforts. Directors have 11 or more years of audit experience and are licensed CPAs.

Manager
Managers oversee multiple engagements and are responsible for resolving all legal, regulatory, and accounting issues that arise during the audit engagement. Managers have responsibility for the supervision and management of services to clients, which include preparation of audit strategy and business plans, setting budgets, scheduling audits, selecting staff and assigning workloads, and financial reporting. Managers develop and motivate all engagement staff and provide counseling and career guidance. Managers have control over, and exercise wide latitude and discretionary decision-making in establishing the most advantageous course of action for the successful management of audit engagements. Managers draft and assist in the delivery of proposals for engagements and know the range of firm services. Managers have proven deep technical expertise and have developed their reputation in a given industry/service line. Managers provide leadership in the timely delivery of quality services to clients. Managers have 5-10 years of public accounting experience and are CPAs. Managers often have advanced degrees.

WP Ex10.00-2
WP EX11.00-2
WP Ex11.01-2

Senior Associates
Senior associates supervise field audit engagements, assist in designing the approach to audits, supervise staff, perform accounting of complex areas of a clients' balance sheet and income statements, oversee the completion of clients' annual reports and interact with clients to discuss field audit issues. Senior associates have 3+ years of Public Accounting experience and are CPAs. Some senior associates have advanced degrees.

Associates
Audit associates develop an understanding of the audit approach, methodology and tools and establish working relationships with client personnel. Associates perform analytical review of audit documents, review client accounting and operating procedures and systems of internal control, identify accounting and auditing issues; perform research to solve issues that arise, prepare financial statement reports and documentation supporting audit opinions, apply concepts of risk assessment, design and perform tests of internal controls and provide recommendations for improved controls and enhanced business efficiency. Associates have ability to prioritize work tasks and work on multiple assignments. Associates work on audit teams under supervised direction of senior associates, managers, directors, and partners. Associates have undergraduate and graduate degrees who may have CPA certification or working toward such certification. Associates have problem solving abilities and strong verbal and written communications skills.

Engineering Services

Drafters
Plans and arranges details on assigned work that is simple to somewhat complex, preparing drawings with views of isometric projections under general supervision; Consolidates details from a variety of sketches, prints, and assembly drawings; and makes necessary calculations following established standards and instructions.

Designers
Carry out design assignments of a routine to moderately complex nature with limited latitude in the use of initiative and independent judgment with immediate supervision; investigate and procure all data required to develop designs and prepare preliminary sketches and/or schematic diagrams; apply all preliminary information and contributing data to develop final design and prepare layout, detail and assembly drawings.

CADD technicians
Carry out drafting assignments of a routine to moderately complex nature with limited latitude in the use of initiative and independent judgment; prepare layouts, drawings, and designs according to engineering specifications using CAD software and review engineering drawings and supporting documentation to verify adherence to standard practices; analyze designs and confer to resolve details not completely defined; retrieve

WP Ex10.00-2
WP EX11.00-2
WP Ex11.01-2

information from file and displays on computer using required computer language and type commands to rotate or zoom-in on display to redesign, modify, or otherwise edit existing design; display final drawings to verify completeness, clarity and accuracy; and execute command to transfer drawing dimensions from computer onto hardcopy using peripheral equipment.

Civil engineer
Plans, designs, and supervises construction, maintenance and alteration of structures and facilities such as railroads, roads, airports, bridges, harbors, channels, dams, irrigation projects, pipelines, tunnels, power plants, water and sewerage systems, waste disposal units and similar facilities; Estimates personnel needs and schedules work to meet completion dates and technical specifications; Works out proposals and cost estimates; Evaluates progress and results; Recommends major changes in procedures or objectives; and 1 to 5 years of experience.

Senior civil engineers
Same qualifications as civil engineers and have more than five years of experience.

Electrical engineers
Perform a variety of engineering work in designing, planning and overseeing construction, installation, operation, and maintenance of electric or electronic components, equipment, systems, facilities, and machinery used in generation, transmission, distribution, and utilization of electric energy for domestic, commercial, and industrial consumption.

Planners
Non-engineering professional classification responsible for performance of planning activities including:

- Performing planning research, developing and documenting planning decisions and formulating recommendations regarding projects;
- Presenting planning decisions and recommendations before elected/appointed officials including city councils, private sector, or others regarding public decisions addressing social, economic, or physical change resulting from proposed projects;
- Knowledge and experience with land use policies;
- Completing and filing of required planning reports; and
- Participation in public hearing process.

Planners have reporting responsibility to project manager and possess 1 to 5 years of planning experience. Experience may be in related field of engineering, environmental science, urban planning, or landscape architecture. Planners may not be professionally certified but possess college degrees.

Senior planners
Same qualifications as planners with more than five years of experience.

WP Ex10.00-2
WP EX11.00-2
WP Ex11.01-2

Scientists
Have reporting responsibilities to project manager/Department Head/Associate classifications and are responsible for performance of day-to-day chemical, biological, scientific, and environmental activities on projects, as required. Scientists have up to 5 years experience in relevant discipline field (i.e., environmental science, biology, chemical, etc.); are professional certified and hold college degrees.

Senior scientists
Same qualifications as scientist with more than five years of experience.

Project managers
Direct reporting responsibility to Departmental Head classification with responsibility for day-to-day supervision/management of specific project related activities and firm professional and administrative personnel assigned to project. Managers have more limited sales responsibilities than principal/associate/department head classifications and are responsible for day-to-day client service/satisfaction activities. Company equivalent position is a Manager. Project managers have 10-15 years of experience in relevant discipline, are professionally certified and hold college degrees.

Department heads
Lower position level than principal or associate professional classification with direct reporting responsibility to Associate/Principal classification. Department heads are responsible for day-to-day supervision/management of specific departmental/function professional and administrative personnel group and activities and have sales and client service/satisfaction responsibilities. Company equivalent position is Director. Department heads possess 15-20 years of experience in relevant discipline field, are professionally certified and hold college degrees.

Senior Associates
Lower position level than principal in firm and non-equity-owner and have reporting responsibility to Principal classification. Senior associates are responsible for day-to-day management of multiple departmental/functional professional and administrative personnel groups and activities and have sales and client service/satisfaction responsibilities; Company equivalent position would be Director. Senior associates possess 20+ years of experience in relevant discipline, are professionally certified, and hold college degrees.

WP Ex10.00-2
WP EX11.00-2
WP Ex11.01-2

Principal
Equity-owner in firm responsible for executive management of all professional and administrative personnel. Principals establish company governance, quality control and operating policies and have significant sales and client service/satisfaction responsibilities. Company equivalent position is Vice President. Principals have in excess of 20 years of experience in relevant discipline, are generally professionally certified, and hold college degrees.

Information Technology Services

Director, IT Process and Change Management
Responsible for the delivery of the IT organization's process improvement and strategic change initiatives. Works with cross-functional IT teams to design, develop, and integrate IT processes and procedures utilizing best practices and industry standard frameworks (e.g., ITIL, COBIT, PMBOK, CMMI). Provides insight and advice on emerging process and control frameworks. Ensures seamless execution of all process improvement and change management related activities across the IT organization by applying process improvement, change management methodologies, communication planning, organizational readiness assessment and stakeholder analyses. Leads the design of the IT organization's overall process structure, including creating a process hierarchy that streamlines IT processes and eliminates redundancy. Provides coaching and guidance to the IT leadership and management team on their roles in each process improvement and change initiative. Acts as a change agent to implement and manage best practices across the IT organization.
Education:
Bachelor's or Master's Degree in Computer Science, Information Systems, Business Administration or other related field. Or equivalent work experience.
Experience:
Typically has 10 to 15 years of IT and business/industry work experience, with at least 3 years of experience in managing multiple, medium to large, cross-functional teams or projects, and influencing senior level management and key stakeholders. Experience in areas such as process design, re-engineering, organizational transformation, Six Sigma and Lean, CMMI, or ITIL.

Configuration Management Analyst
Provides Configuration Management (CM) support for the customer's software baseline control efforts. Maintains the baseline using automated CM tools. Responsible for maintaining project software and documentation inventory and configuration baselines. Establishes and maintains the CM processes and procedures. Defines and implements procedures for releasing products throughout the whole product life cycle. Serves on the Configuration Control Board (CCB). Produces builds of products for use in testing and in production; identifies and implements processes to strengthen, streamline and automate build processes; serves as an advocate for best practices; drives the development and maintenance of build automation tools; maintains the source code change control; performs distribution partner and corporate client set-ups.

WP Ex10.00-2
WP EX11.00-2
WP Ex11.01-2

Performs software deficiency and change request updates and reporting. Maintains the project notebook library and software development folders. Tracks and maintains the project change requests, impact assessments, incident reports, and software change notices on a continuous basis. Measures and reports on success metrics benchmarking performance against world class measures. Supports management with technical performance data from the CM process.

Education:

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

Experience:

Typically has 3 to 5 years of IT work experience in systems/application development functions.

Project Manager

Responsible for overall coordination, status reporting and stability of project oriented work efforts. Establishes and implements project management processes and methodologies for the IT community to ensure projects are delivered on time, within budget, adhere to high quality standards and meet customer expectations. Responsible for assembling project plans and teamwork assignments, directing and monitoring work efforts on a daily basis, identifying resource needs, performing quality review; and escalating functional, quality, timeline issues appropriately. Responsible for tracking key project milestones and adjusting project plans and/or resources to meet the needs of customers. Coordinates communication with all areas of the enterprise that impacts the scope, budget, risk and resources of the work effort being managed. Assists Program Manager(s) in partnering with senior management of the business community to identify and prioritize opportunities for utilizing IT to achieve the goals of the enterprise. Must possess extensive knowledge and expertise in the use of project management methodologies and tools, resource management practices and change management techniques. This is a management role with human resource management responsibilities (e.g., hiring, performance management). Manages one or more cross-functional projects of medium to high complexity. More senior role has responsibility for multiple large, complex projects with greater impact to the enterprise.

Education:

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience. Project Management certification or successful completion of a recognized project management curriculum is required.

Experience:

Typically has 7 to 10 years of IT work experience, including 4 or more years managing projects. Experience with projects in multiple technologies and functions.

Director, Program Management

Responsible for building and managing the project/program management office/function for IT. Defines and develops enterprise-wide IT project/program management practices, governance standards, processes and metrics. Ensures projects/programs are defined, tracked and communicated in a consistent and effective manner. Incorporates effective

WP Ex10.00-2
WP EX11.00-2
WP Ex11.01-2

change and risk management controls. Partners with IT and business leadership and other key stakeholders to define opportunities, to identify and prioritize projects based on predefined criteria (return on investment, productivity, compliance). Directs project/program managers with business case development. Responsible for ensuring all projects within IT portfolios/programs are delivered on time, within budget and to an agreed quality level. Must possess extensive knowledge and expertise in project/program management, portfolio management methodologies and tools. This is a single incumbent position that typically exists in a large enterprise with multiple program managers and/or project managers as direct reports.

Education:
Bachelor's or Master's Degree in Computer Science, Business Administration, or other related field. Or equivalent work experience. Project Management certification is required.

Experience:
Typically has 10 to 15 years of IT and business/industry work experience, with at least 3 years of leadership experience and 5 years managing projects and/or project portfolios.

Project Leader

Responsible for overall coordination, status reporting and stability of project oriented work efforts. Establishes and implements project management processes and methodologies for the IT community to ensure projects are delivered on time, within budget, adhere to high quality standards and meet customer expectations. Responsible for assembling project plans and teamwork assignments, directing and monitoring work efforts on a daily basis, identifying resource needs, performing quality review; and escalating functional, quality, timeline issues appropriately. Responsible for tracking key project milestones and adjusting project plans and/or resources to meet the needs of customers. Coordinates communication with all areas of the enterprise that impacts the scope, budget, risk, and resources of the work effort being managed. Assists Project Manager(s) and/or Program Manager(s) in identifying and prioritizing opportunities for utilizing IT to achieve the goals of the enterprise. Must possess advanced knowledge and proficiency in the use of project management methodologies and tools, resource management practices and change management techniques. This is an individual contributor role without human resource management responsibilities (e.g., hiring, performance management). Manages one or more projects of medium to high complexity. More senior role has responsibility for large, complex, cross-functional or multiple projects with greater impact to the enterprise.

Education:
Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

Experience: Typically has 3 to 5 years of IT work experience, including 2 or more years managing projects.

Release/Build Engineer

WP Ex10.00-2
WP EX11.00-2
WP Ex11.01-2

Develops and maintains the build environment, the source code control system and the issue tracking systems. Creates and tests builds, resolves issues, applies labels to file and communicates build status. Responsible for building scripts and installation procedures. Proactively identifies and implements procedures to streamline the build process which may drive the development and maintenance of an automated build process with automatic notification of build and unit test failure problems to responsible engineers. May assist engineering management in making choices for source code management systems, and other development and testing tools. Knowledge of quality methods and procedures as well as PC, PVCS, UNIX and scripting languages is required for successful performance in this role.

Education:
Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

Experience:
Typically has 3 to 5 years of IT work experience with at least 2 years related to release management. Proficient in the use of project management, spreadsheet and database query tools. Has subject matter expertise in release management process.

Legal Services

Partner
A licensed attorney with 10 or more years of experience involving broad based legal knowledge and expertise in one or more specialized areas of practice. A partner's experience includes supervisory responsibility for cases or matters and for advising senior levels of management in connection with such matters.

Associate
A licensed attorney other than a partner, normally with fewer than 10 years of experience.

Paralegal
A non-attorney, who, under supervision of assigned attorneys, provides general assistance to a project team of attorneys, including performance of litigation support, case management, billing support, and documents and records managements.

Management Consulting Services

Junior Partners
Typically individuals occupying key positions in the business development, practice development, client relations and/or management of engagements.

Senior Management Consultants
Typically individuals who are senior members of the firm who are not yet considered part of the ownership structure, but who play a significant role in the day-to-day management of engagements, have continuing contact with clients, and are expected to participate in

WP Ex10.00-2
WP EX11.00-2
WP Ex11.01-2

developing solutions to client problems, writing final reports, and making client presentations.

Management Consultants
Typically individuals who have served as consultants beyond an entry-level apprenticeship. While not yet in a position for taking on significant project management or client relations responsibilities, such persons have learned the fundamental disciplines of consulting and are able to work on important tasks with little direction supervision.

Entry Level Consultants
Typically individuals in the first or second year of consulting; usually require close direction and supervision and may be recipients of a graduate degree, with or without prior business experience.

Research Associates
Typically full-time members of the consulting staff whose primary functions involve secondary source research and statistical analysis; have limited or no client exposure, and typically hold a college degree.

Deloitte Service Company Cost Study

Market Analysis AWWSC

Mapping Process Document

WP Ex10.00-3; WP Ex11.00-3
WP Ex11.01-3; WP Ex12.00-2

Assignment of market based titles to AW positions:

American Water Works Service Company, Inc. ("Service Company") position titles were mapped to market positions defined by Deloitte & Touche[1] based on market research described in the Service Company Cost Study prepared for Illinois American Water Company. The mapping into the market categories was accomplished in cooperation with Deloitte & Touche based on consideration of responsibilities and the required education, training and experience levels for Service Company positions as compared to those applicable to the respective market categories.

The mapping process was carried out in several steps: Stratification of the Service Company positions was performed to develop an initial hierarchy of positions from the highest levels to the lowest. This was done based on the hierarchy of Service Company position titles (Senior Vice President, Vice President, Director, Manager, Team Lead, Senior Professional, Intermediate Professional, Professional) in the various functions. The Service Company's pay scales are separated into a number of salary bands[2], which are related to the level of responsibility, complexity, training and experience necessary to fulfill a given position. One of these salary bands is utilized as a basis for the cash compensation for any given position within the company. Thus the salary band which is assigned to that position is one meaningful indicator of the relative level at which it would be placed when mapped to a survey. American Water has salary ranges ML3 to ML5 and L06 to L16. The lower number corresponds to higher salaries and higher positions within the company. Levels ML3 to ML5 represent executive positions. The salary band information was used to more precisely map service company titles which were not easily assignable to market titles. Examples of such titles are "Superintendent", "Supervisor", "Trainer" or "Coordinator. In such cases the salary band information provides another indicator of the level of responsibility involved in a position, which assisted in proper mapping.

Position titles in salary bands above L11 do not have corresponding market titles. One primary working assumption for this issue is that the salary bands L12 and above primarily represent support positions for professionals. Therefore the mapping was done for AW positions in salary bands ML3 to ML5 and L06 to L11. The lone exception to this working assumption occurred in regard to the Belleville Lab analysis. At the lab, a number of clerical positions exist that have responsibility for sample management and do not operate as direct administrative support for the Lab Director nor for the laboratory analysts. For market comparison purposes, these were not

[1] Deloitte & Touche is the lead consultant engaged by Illinois American Water Company to perform the market comparison analysis.
[2] The Human Resources function performs ongoing studies of position levels, responsibilities and salary information to provide a framework for assigning positions to salary levels on a fair and consistent basis and establish and maintain salary ranges that are competitive in the marketplace.

included in lab overheads and added to the hourly rates of the professional positions at the lab. The title used was "Research Associate".

The market positions were matched to relevant Service Company positions using the available information. The initial mapping was reviewed by functional leads within the various types of functions.

Service Company Salary Bands:

Band No.	Type
ML3	Senior Executive
ML4	Vice Presidents
ML5	Directors
L06	Managers
L07	Team Leads
LO8	Senior
L09	Intermediate
L10	Entry
LO11	Entry

WP Ex10.00-3; WP Ex11.00-3
WP Ex11.01-3; WP Ex12.00-2

Comparisons to Service Company Positions:

There were 5 different market areas identified by Deloitte & Touche:
1) Engineering and Scientific
2) Finance and Accounting
3) Information Technology
4) Legal
5) Management Consulting

Engineering and Scientific Area data:

Deloitte & Touche defined the following market categories which had comparable positions within Service Company:

Market Title
Drafter
Designer
CADD Technician
Civil Engineer
Senior Civil Engineer
Electrical Engineer
Planner
Senior Planner
Scientist
Senior Scientist
Project manager
Department Head
Associate
Senior Associate
Principal

Mapping was performed for this area based on titles and comparable job duties within the Service Company. For instance, Service Company positions described as "Engineer" in a functional department related to design or construction of facilities would be classified as a "Civil Engineer" to match the market data. The same considerations would be given to a Service Company "Senior Engineer" position, by classifying it as a "Senior Civil Engineer" in most cases. Titles beginning with "Manager", of Engineering, Operations, Maintenance, or Water Quality, were classified as "Senior Engineers", or Senior Scientists, depending on the appropriate discipline. Managers with higher salary bands, L06 were classified as "Senior Associates – E". Directors of Engineering, Operations, Maintenance, etc were classified as "Senior Associates – E", or "Department Heads – E".

WP Ex10.00-3; WP Ex11.00-3
WP Ex11.01-3; WP Ex12.00-2

Finance and Accounting Area

Market Titles in the Finance and Accounting Area hav e the following categories which had comparable positions within Service Company:

Market Title	Yrs Exp
Associate - F	1-3
Senior Associate - F	4-5
Manager - F	6-10
Director - F	11+
Partner - F	

Position titles for these positions were matched up based on education and experience required for the position. An "Associate" (entry level) position would match up with Service Company positions in salary bands L10 and L11. Service Company position titles of Financial Analyst, Accountant, or Analyst were considered comparable, as these are entry level professional positions, requiring primarily a college degree. .

A "Senior Associate - F" financial position would match up with Service Company positions in salary band L09. Such positions would be mid-level professional positions in finance or an accounting related function, with more than several years of experience. Service Company titles in this category would be Intermediate Financial Analyst, Intermediate Accountant.

A "Manager - F" position would match up with Service Company positions in salary bands L07 and L08. Such positions would be high level professional positions in finance or an accounting related function, with many years of experience and with supervisory responsibilities over several or more professionals in various lower levels. Service Company titles in this category would be Senior Financial Analyst, Senior Accountant or Team Lead.

A "Director - F" position would match up with Service Company positions in salary bands L05, L06 and L07. Such positions would be high level professional leaders in a finance or accounting related function, with many years of experience and in a highly responsible position, including supervisory responsibilities over several or more professionals in various lower levels. Service Company titles in this category would be Manager or Director of a function, reporting directly to a functional leader. There are a number of Service Company "Manager" titles in this market position category because they include higher levels of expertise and reporting at a higher level within the company..

A "Partner - F" position would match up with Service Company positions in salary band ML4. Such positions would be high level professional leaders in finance or an accounting related function, with many years of experience. Typical titles would be Vice President of a significant

element of the Accounting or Finance function. Also these would be functional leadership positions and with some executive and supervisory responsibilities over several or more professionals at a "Director" and/or "Manager" level. Service Company titles in this category would be "Vice President" of a function, reporting directly to corporate executive officers.

Legal Area
Market categories in the Legal area which had comparable positions within Service Company are as follows:

Market Title

Paralegal - L
Associate - L
Partner - L

Based on the market category definitions provided by Deloitte & Touche, seven attorneys in the Service Company were categorized as being at a "Partner" level. This implies highly responsible involvement at the most senior levels of management within Service Company, and significant policy decision making authority. The balance of Service Company attorney positions have been classified as "Associates L". Paralegals are all in the one "Paralegal" category.

Management Consulting Area
Titles in the Management Consulting area have the following categories which had comparable positions within Service Company:

Market Title

Research Associate
Jr Consultant - MC
Consultant - MC
Sr Consultant - MC
Jr Partner - MC
Sr Partner - MC

These were applied to non-financial and primarily non-technical positions across the company, although some junior employees in the laboratory (as noted above), engineering and operations functions were assigned as "Research Associates". Functional categories of Administration, Business Development, Communications, Customer Service, Human Resources all have positions that have been aligned with Management Consultant titles. Position titles for these positions were mapped based on function type and Service Company position title comparison.

A "Research Associate" position would align with Service Company positions in salary bands L09 through L11. These positions are primarily entry level jobs which have Service Company titles such as HR Generalist, HR Trainer, Research Analyst, Support Services Analyst and Senior Benefits Specialists.

A "Junior Consultant - MC" position would align with Service Company positions in salary bands L09 and L10. Such positions would be similar to the Research Associate, but with several more years experience. The title would now be a "Senior" HR Generalist, HR Trainer, Research Analyst, or Support Services Analyst.

A "Consultant - MC" position would match up with Service Company positions in salary bands L07 and L08. Such positions would be high level professional positions in Administration, Business Development, Communications, Customer Service, Human Resources, with many years of experience and with supervisory responsibilities over several or more professionals in various lower levels. Service Company titles in this category would be Manager of a specialty within a function, such as Manager of Internal Communications, Manager of Building Services for a location, or Manager of Training and Development.

A "Senior Consultant - MC" position would align with Service Company positions in salary bands L05 and L06. Such positions would be high level professional leaders in a general business related function, with many years of experience and in highly responsible position and with supervisory responsibilities over several or more professionals in various lower levels. Service Company titles in this category would be Senior Manager or Director of a function such as Administration, Business Development, Communications, Customer Service or Human Resources, reporting directly to a functional leader.

A "Junior Partner - MC" position would align with Service Company positions in salary band ML4. Such positions would be high level professional leaders in a general business related function, with many years of experience and functional leadership positions and with supervisory responsibilities over several or more professionals in various lower levels. Service Company titles in this category would be Vice President of a function, or a Corporate Director, reporting directly to corporate officers.

A "Senior Partner - MC" position would match up with Service Company positions in salary band ML3. Such positions would be executives in Administration, Business Development, Communications, Customer Service or Human Resources, with Regional Oversight or Corporate Departmental responsibilities reporting to the CEO or COO. Service Company titles in this category would be Executive or Senior Vice President of a function.

WP Ex10.00-3; WP Ex11.00-3
WP Ex11.01-3; WP Ex12.00-2

IT Market Area

All Service Company IT positions were mapped to market positions defined by Deloitte & Touche. The mapping was accomplished based on consideration of position responsibilities, educational requirements and certification requirements, as well as required experience, knowledge and skills. The Service Company IT organization provided guidance and validation of the accuracy of the mapping.

Additional information regarding the mapping process is provided below.

There are several levels of responsibility within the organization. There are 4 Senior Vice Presidents, a President of Regulated Operations, and two Divisional Executive Vice Presidents of Regulated Operations, with overall responsibility for the major functions within the Service Company. Such individuals work with the Service Company President (and Board of Directors) in setting and managing the overall strategic direction of the Service Company. Each of these individuals may have organizational responsibility for anywhere from 50 to 700 or more or more employees performing the function under their direction. Such individuals are highly qualified, accomplished leaders in the industry, with many years experience in their field of expertise. These would correspond with an Owner/Partner/Principal/Senior Partner for a firm in the market surveys which would provide similar services.

Next there are 15 Service Company Vice Presidents and 22 Directors, which are responsible for the significant elements of the major functions. These individuals report directly to the President, or a Senior Vice President of the Service Company or the parent company, or the President of Regulated Operations. Examples would be the Vice President of Finance and Treasurer, who oversees a subset of Financial services, and reports to the Chief Financial Officer of American Water Works Company, Inc., or the Corporate Director of External Affairs, who reports to the Senior Vice President of External Affairs. Such positions are responsible for a significant element of a larger function. They are highly responsible positions, and may include oversight of a large number of employees performing services under their direction. Individuals in such positions would also have many years of successful experience in their field of expertise. These positions would correspond to a Senior Associate or Department Head within an engineering consulting firm, or a Director within an Accounting or Financial services firm, or a Junior Partner in a Management Consulting firm.

Third, there are Directors and Managers of other functions, who report to a Service Company Vice President, and have correspondingly less responsibility than the levels of management above them, both in terms of breadth of functional responsibility, and numbers of employees under their direction. These would correspond to a Senior Engineer, Project Manager or

Associate within an engineering consulting firm, or a Director/Manager within an Accounting or Financial services firm, or a Senior Consultant in a Management Consulting firm.

Fourth, there are Managers and Team Leads who coordinate the work of several professionals under the general direction of a Director or Vice President level employee. These individuals would have at least several years experience, or many years experience, and appropriate licensure in their field. These would correspond to an Engineer or Designer within an engineering consulting firm, or a Manager/Senior Associate within an Accounting or Financial services firm, or a Management Consultant in a Management Consulting firm.

Finally, there are professionals with at least an undergraduate degree performing services that hold the titles of Engineer, Accountant or Financial analyst, or Analyst of a function such as External Affairs, who correspond with entry level titles from the market surveys, such as Technician, Associate, Junior Consultant or Research Associate.

As noted earlier, using the organizational level of a given position enabled the placement of all titles in a fairly narrow category of comparable titles. Then, all relevant information available was used to refine position mapping by comparing the market position information with Service Company position information such as required education, experience and position responsibilities. Functional leaders reviewed the mapped titles.

NLJ 250 Methodology

11-10-2008

This is *The National Law Journal*'s 31st annual survey of the nation's 250 largest law firms, covering the period of Oct. 1, 2007, to Sept. 30, 2008. While most of the charts in the NLJ 250 are self-explanatory, here is some information about the process, the criteria and the definitions.

The *NLJ* sent surveys to approximately 300 law firms and solicited survey submissions to determine the 250 largest.

Eligibility for the NLJ 250 is based on a firm's total number of attorneys, not including contract or temporary attorneys. The cutoff point this year is 174. Also, a firm must have more lawyers based in the United States than in any other single country to qualify.

Firms are ranked by the total number of full-time equivalent (FTE) attorneys, rather than just full-time attorneys. In some cases, due to rounding, this calculation resulted in slightly higher or lower numbers than the figures submitted by the law firms.

In case of a tie, we rank firms by the actual number of attorneys, before rounding. If a tie still exists, we rank firms by the total number of partners and then by the number of equity partners. The city listed under the firm name is the firm's principal or largest office.

"Number of attorneys" reflects permanent, FTE attorneys. The first column in the "Partners" category is the total number of partners, including the nonequity partners (NE) listed in the adjacent column. The same is true for the chart reflecting overall partner and nonequity partner growth.

The "Other" category includes the total number of nonpartner, nonassociate lawyers at the firm. Generally, this includes counsel, of counsel, senior counsel and staff attorneys.

WP Ex10.00-4
WP Ex11.00-4
WP Ex11.01-4

In some instances, NLJ 250 firms merged. In those cases, the 2007 data are taken from the firm that was larger.

"Starting salary" lists the base salary for a first-year associate. Some firms vary depending on branch office.

A "WND" or "N/A" in any column indicates that the firm would not disclose the data or it was not available. The "Branch Offices" section lists the total number of attorneys in each city where the firm has offices. A zero indicates that less than one full-time attorney works in that city.

Minor discrepancies between the total number of attorneys at a firm and the total number of attorneys reported in branch offices are due to rounding FTE figures.

Firms marked with an asterisk have data obtained from the National Association for Law Placement online 2008/2009 Directory of Legal Employers as of October 2008. Firms marked with a plus sign have data obtained from the firm's Web site as of October 2008.

Incisive Media Research Editor Rosemarie Clancy oversaw the NLJ 250 survey project. Data analyst John O'Connor conducted the research with research assistant Jeuneille Chand.

The HAY GROUP one of the world's largest human resources consulting firms, is well suited for the challenge of putting people before strategy. For almost 60 years we have helped organizations around the globe achieve their goals by addressing critical people issues.

Our understanding of these important issues is built on years of research into motivation and performance, design of jobs and work, and rewards.

Organizations, of course, have changed. Global competition, technology, customer focus, and the need for speed and flexibility have transformed the success equation.

To get the results you want you still must depend on your people to carry the day. You must select talented individuals; develop, motivate, and reward them; and provide them with organizational cultures and work processes that will allow them to succeed.

Which is why organizations continue to turn to the Hay Group. Whatever your people issue, we can provide expert assistance that truly adds value.

United Kingdom
Tel: +44 20 7710 5000
Fax: +44 20 7710 5001

Management Consulting Group comprises a group of specialist consultancies that are managed separately and

go to market with their distinct brands. It continually invests in its consultancies to ensure they deliver profitable, sustainable revenue growth.

MCG seeks to acquire consultancies that either diversify the range of consulting offerings available to clients or deepen the coverage of existing Group offerings. By working as part of the MCG Group the consultancies are able to benefit from cross referrals, economies of scale, collaboration and the global reach and scale of the Group.

The Management Consulting Group PLC currently consists of seven consulting firms:

- CBH Consulting
- Ineum Consulting
- KSA Consulting
- Proudfoot Consulting
- Parson Consulting
- Salzer Consulting
- Viaduct Consulting

Clients can purchase services either via MCG as a whole or directly from group consultancies.

www.mcgplc.com

CBH Consulting specialises in delivering industry specific performance management and business intelligence solutions for large and medium sized enterprises.

www.cbhinc.com

Ineum Consulting is an industry-specialist consulting firm, split into seven discrete industry groupings. The groupings serve enterprises in the financial, manufacturing, consumer products, utilities, public, transportation, telecoms and media sectors. Additionally there is a specialist middle market group to meet the needs of dynamic and growing businesses

www.ineumconsulting.com

Kurt Salmon Associates is the premier global management consulting firm focused on the retail and consumer products industries; and the healthcare industries.

They work closely with clients to create accelerated value, through tailored solutions for business growth, margin management, inventory efficiency, productivity improvement, and technology effectiveness.

KSA helps clients around the world achieve significant gains in strategic position, growth, profits, and overall financial performance.

www.kurtsalmon.com

Parson Consulting specialises in financial management consultancy. It is free of auditing conflicts of interest and provides Sarbanes-Oxley compliant services. It has four service lines: governance and risk management,

WP Ex10.00-4
WP Ex11.00-4
WP Ex11 01-4

operational financial management; strategic financial management and transaction support. Parson Consulting's primary appeal is to chief financial officers whose intent is achieving the highest standards of financial management.

www.parsonconsulting.com

Proudfoot Consulting helps clients to achieve significantly increased profitability through the implementation of operational improvements leading to increased sales, lower operating and overhead costs, greater output and lower capital expenditure. Proudfoot Consulting's appeal is to operationally focused senior managers intent on achieving stretching operational goals and sustainable business improvement.

www.proudfootconsulting.com

Salzer Consulting offers a broad range of HR orientated services to multinationals entering and operating in Greater China and Asia. Services include accelerating start-ups, acquisition support, restructuring and revitalisation, executive search and project management.

www.salzer-consulting.com

Viaduct Consulting are strategy consultants who specialise in commercial due diligence across Europe. Typical clients might be looking to acquire a company, launch a new product, enter a new market or they may be seeking to respond to changing market or competitive conditions.

http://www.princeton.com/

Princeton Consultants Inc. has built a 22 year old reputation for growth and excellence by helping leading executives successfully transform their organizations.

We do this by combining the right and left sides of the brain, "Information Technology and Management Consulting," into a comprehensive structured methodology we call Rapid Action Delivery or RAD.

Our four key services are:
- Business Strategy
- Process Engineering
- Software Development
- Project Management

Since our founding, we have established long-term relationships with our clients built on our ability to help them in the full project lifecycle, from vision through implementation.

At Princeton Consultants, we believe in the power of combining the two into a stronger whole. We drive our projects from a strategic, best practices viewpoint, and power them with the latest in IT.

WP Ex10.00-4
WP Ex11.00-4
WP Ex11 01-4

We believe that many great strategies die in the execution phase. Princeton Consultants is therefore uniquely committed to partnering with our clients to not only identify the best strategies, but to work through implementation to ensure that the full results are realized.

Hingham, MA 02043
Tel: 781 749-7090
Fax: 781 749-7916
www.tscg.biz

Regional offices: Chicago, Honolulu, Los Angeles, Nashville New York, San Francisco, Philadelphia, Sacramento, Saint Louis, Seattle, Tampa, Washington, D.C.
International offices: Toronto, London

Saint Consulting specializes in winning zoning and land use battles for global and national companies.

Founded in 1983, the firm is the world leader in the new management consulting discipline of land use politics — solving difficult political problems surrounding the permitting of controversial real estate projects.

In an era of 'smart growth,' anti-sprawl, NIMBYism (Not In My Back Yard) and grassroots movements to block new real estate projects because of environmental, historic preservation or 'community character' concerns, companies find it increasingly difficult to gain local approval and acceptance of their mission-critical projects. At the same time, to protect their own market share, they must stop competitive entry into their markets.

Saint Consulting specializes in analyzing the local political climate, creating innovative political campaign strategies and implementing those strategies on behalf of clients. We have been actively engaged on more than 950 projects worldwide, servicing clients from 13 offices in the US, and offices in London and Toronto.

Our clients are primarily drawn from real estate development organizations (commercial, retail, residential) national and regional retailers and commercial enterprises that need local permission to build or operate. Our project experiences ranges from large mixed-use developments to regional malls, shopping centers, strip malls, multi-family housing, office buildings, large chain 'big box' retailers, landfills, hospitals, quarries and mining, oil refineries, resorts, country clubs and utilities.

Engineers

Issues

What are firms' billing rates for civil, structural, mechanical, and electrical engineers?

Survey Findings

- Civil engineers with one to five years of experience charge a median of $90 an hour for their time.
- Senior civil engineers have a median billing rate of $125 an hour, and half of senior engineers have billing rates between $105 and $138.
- The median billing rate for structural engineers with one to five years of experience is $100.
- Senior structural engineers charge a median of $125 an hour.
- The median billing rate for mechanical engineers with one to five years of experience is $90 an hour.
- Senior mechanical engineers have a median billing rate of $127 an hour, although a quarter charge $116 or less.
- Electrical engineers with one to five years of experience charge a median of $90 an hour, and half have billing rates between $85 and $102.
- Senior electrical engineers have a median billing rate of $120 per hour. A quarter of senior electrical engineers charge $138 or more per hour.

S2.9

Project managers and department heads

Issues

What are firms' billing rates for project managers?

What are firms' billing rates for department heads?

Survey Findings

- Project managers charge a median of $125 per hour. A quarter charge at least $148 per hour.
- The median hourly billing rate for department heads is $150 per hour.
- Billing rates for department heads and project managers have increased steadily over the past ten years.

Director of Client Services

The Director of Client Services is responsible for developing and maintaining close relationships with end user organizations. This individual typically directs the efforts of customer relationship managers and business analysts responsible for overseeing changes to existing applications, and coordinating new development projects with business unit personnel. The Director of Client Services may be responsible for establishing, auditing, and reporting on service level agreements between the information systems organizations and each business unit. This individual is also responsible for acting as the chief advocate for each business unit on technology issues. The Director of Client Services must have a strong understanding of programming techniques and must stay abreast of emerging technologies and application systems. Formal project management training is required. This position requires a bachelor's degree in a related area and 10 years experience in the IT field, with at least 6 years in a senior business analyst or relationship management role. The Director of Client Services typically reports to the CIO.

Manager of Information Security

The Manager of Information Security is responsible for ensuring that all corporate data and systems are protected from unauthorized access or use—from both internal and external threats. This individual monitors, investigates, and reports security violations to senior management on a regular basis. The Manager of Information Security assists in the establishment of the corporate IT security policy, and applies continuous improvement techniques to maintain the highest level of security required. This individual must be an expert in IT security tools and techniques. The Manager of Information Security directs the efforts of IT security personnel and provides guidance on security issues to personnel across the corporation. This position typically requires a bachelor's degree in a related area and eight years experience in the IT field, with four years in a senior security analyst role. The Manager of Information Security usually reports to a senior director or the CIO.

Manager of Systems Development

The Manager of Systems Development is responsible for directing system analysis and development activities for one or more business units. This individual must have significant knowledge and experience in project management, and the design, coding, testing, debugging, and implementation phases of the application systems development process. The Manager of Systems Development must have formal training in software development languages and a thorough understanding of application programming tools. This position requires a bachelor's degree in a related area and eight years experience in the IT field, with at least six years in a systems analyst and/or programming capacity. The Manager of Systems Development usually reports to the Director of Systems Development, and in some organizations, may report directly to the CIO.

Senior IT Trainer

The Senior IT Trainer develops and conducts technical training programs for IT staff members. This individual is responsible for the accurate and timely content of training curriculums and for establishing training objectives and certification requirements. Duties may include writing course outlines, text, and test materials. This individual may also be responsible for coordinating external training programs with vendors for IT and other departmental staff members. The Senior IT Trainer must have a well-rounded background in the IT field, and stay abreast of new technologies—including new training techniques and tools. This position typically requires a bachelor's degree and at least 4 to 6 years experience in a large, multi-platform IT environment. Additionally, a background in a training or teaching capacity is a plus. The Senior IT Trainer will usually report to a senior manager or director within the IT organization.

Application Programmer II

The Application Programmer II is responsible for the customization and development of application systems designed for midrange and mainframe environments under general guidance from a senior programmer or manager. This individual must be proficient in the design, coding, testing, debugging, and implementation phases of the application systems development process. This position requires formal training in software development languages and techniques, and a strong understanding of tools used in a legacy programming environment. This position usually requires a bachelor's degree in computer science or related area and four to seven years experience in the IT field, with at least three years in a mainframe or midrange programming capacity. The Application Programmer II typically reports to a lead programmer or manager in the systems development group within the information systems department.

Senior Database Administrator

The Senior Database Administrator is responsible for the design, implementation, and ongoing management of corporate database systems. This individual must have expert knowledge and experience in all aspects of database management, including advanced software design and management tools. This position typically requires a bachelor's degree in a related area and six to eight years in the IT field, with three years in a technical database role. The Senior Database Administrator typically reports to a manager or director in the systems development group.

Senior Technical Architect

The Senior Technical Architect is responsible for ensuring that consistent and cost-effective technology and technical processes are developed and followed throughout the IT organization. This individual often participates in the design of new systems and may be required to approve new development projects from a technical standards perspective. This position requires a broad background in technology including hardware, software, networking, security, and planning. The Senior Technical Architect will often have responsibility for training and supervision. This position typically requires a bachelor's degree in a related area and a minimum of eight years experience in the IT field, with four years in a technical architecture position or similar technical job. The Senior Technical Architect usually reports to a senior director and may report directly to the CIO in smaller organizations.

Senior Customer Relationship Manager

The Senior Customer Relationship Manager serves as a liaison and an advocate for line of business organizations in the ongoing development and management of information systems. This role can also serve as the contact point for information systems and services outsourced to a third-party organization. Extensive understanding of major IT systems such as CRM, SCM, and ERP are often required. Additionally, this individual must possess excellent written and oral communication skills and the ability to work directly with all levels of management and technical personnel. This position requires a bachelor's degree in a related area and at least eight years experience in the IT field, with at least four years as a programmer or business analyst. The Senior Customer Relationship Manager will typically report to a senior director in the IT organization.

Web Applications Developer III

The Web Applications Developer III is responsible for designing, developing, and supporting web-based applications with minimal guidance and direction. These applications include systems developed solely for the web environment as well as development efforts designed to "webify" end-user applications. This senior web applications developer may also play a key role in the creation of corporate web sites and intranet communities. The Web Applications Developer III will have expert level understanding of programming techniques and tools such as .Net, Visual Basic, SQL, C++, Java, and other proprietary or open source programming, web development, and system management tools. This position requires a bachelor's degree in computer science or a related field and five to seven years experience in programming, with at least five years in web design/development. The Web Applications Developer III may be called upon to function as a team lead and may have ongoing supervisory responsibilities. This position typically reports to a manager in the systems development department within the IT organization.

Production Control Analyst II

The Production Control Analyst II assists in developing and maintaining data center production schedules. This includes ensuring that all required data, parameters, and other inputs are collected, and entered into schedules and job streams prior to execution. This individual must have strong working knowledge in scheduling software and JCL. The Production Control Analyst II is also responsible for assisting computer operations personnel with production aborts and escalation of problems to technical support personnel. This position may require an associate's degree in a related field and four plus years experience in the IT field. The Production Control Analyst II usually reports to a senior analyst or data center supervisor.

Shift Supervisor, Data Center Operations

The Shift Supervisor, Data Center Operations is responsible for the ongoing supervision of the corporate data center environment. This individual oversees the execution of schedules on a specific shift and ensures the successful completion of all production related tasks. The Shift Supervisor supports and coordinates data retention, system, and application recovery efforts, and administers computer operations policies and procedures. This individual must be adept in a variety of data center operating systems and utilities and be capable of coordinating recovery efforts with personnel from various internal and external organizations. This position typically requires an associate's degree in a related area and at least six to eight years experience in the IT field, with at least three years in a senior operator or technical support role. The Shift Supervisor, Data Center Operations usually reports to the Data Center Manager.

Test Engineer II

The Test Engineer II is responsible for the accurate testing, evaluation, and approval of new and modified hardware and software systems maintained by the IT organization. This requires the creation and use of test scripts and advanced automated testing tools. This individual may participate in the design of new systems and provide input on adherence to IT standards. This position typically requires a bachelor's degree in a related area and three to four years experience in the field, with two years in a testing capacity. The Test Engineer II usually reports to a lead test engineer or the Data Center Manager.

Unix Systems Administrator III

The Unix Systems Administrator III is responsible for maintaining Unix systems environments. This individual installs and configures new Unix operating systems environments and implements system upgrades and patches as required. The Unix Systems Administrator III participates in system recovery efforts and performs system backups and restorations. This individual must be an expert in all aspects of managing Unix server and O/S environments and may have training and supervisory responsibilities. This position typically requires a bachelor's degree in a related area and eight years experience in the IT field, with at least four to six years in systems administration. The Unix Systems Administrator III usually reports to the Manager of Systems Programming or the Data Center Manager.

Webmaster

The Webmaster is responsible for the development and ongoing management of corporate web portals. This individual performs web-related maintenance and backups and participates in recovery efforts during outages. The Webmaster also monitors web traffic patterns and takes necessary actions to ensure high system availability. This individual must be an expert in all aspects of managing complex web environments and may have training and supervisory responsibilities. This position typically requires a bachelor's degree in a related area and six years experience in the IT field, with at least three years in network and web technologies. The Webmaster usually reports to a senior manager in the IT organization.

PERSONNEL PRODUCTIVITY

In addition to staff leverage, another key component of profitability is **personnel productivity** or "employee utilization." The "Profit Model for Consulting Firms," (refer to the section of this report titled "Using Financial Ratios to Measure Performance") suggests that the ratio of "consulting fees per consultant" is one of the three "profit pathways." To the extent a firm experiences high "consulting fees per consultant" (with other factors being equal), higher profitability will result.

Essentially, personnel productivity is a function of three factors: 1) Number of billable hours worked per week; 2) Realization rate (i.e., the percentage of reported billable hours that are actually billed to clients and collected); and 3) Billing rate per hour. For each of these, on an **overall staff basis** during 2007, the "typical" consulting firm reported:

- Between 15.0 and 30.0 billable hours worked per week, depending significantly on employee position. As shown in the accompanying "employee utilization" chart, the number of billable hours tends to decline as the professional consultants' position in the company rises. This is due largely to other commitments such as business development and administrative/financial management.
- Of the total 2007 consulting staff billable hours worked, 95.0% were actually billed to clients and collected, which is down from the 97.0% that was reported in 2006.
- An average hourly standard billing rate of $303 for Senior Partners, $285 for Junior Partners, $233 for Senior Consultants, $199 for Management Consultants, $154 for Entry Level Consultants, and $130 for Research Associates.

Detailed results for each of these three personnel productivity factors is provided in this report **by staff position.**

Employee Utilization*
Average Number of Billable Hours Worked per Week

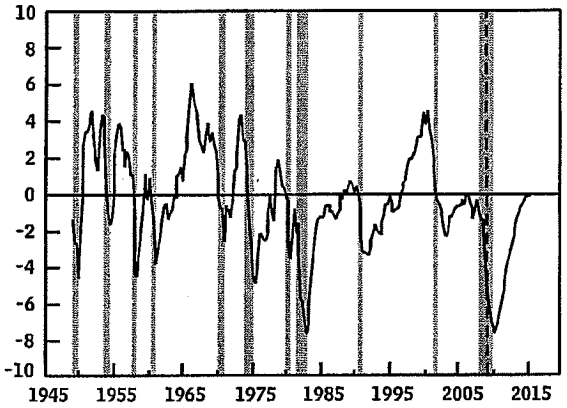
Figure 1.

The GDP Gap, 1949 to 2019

(Percentage of potential gross domestic product)



Sources: Congressional Budget Office; Department of Commerce, Bureau of Economic Analysis.

Notes: The GDP gap is the difference between real (inflation-adjusted) gross domestic product and its estimated potential level (which corresponds to a high level of resource—labor and capital—use).

Data are quarterly and are plotted through the fourth quarter of 2019.

- According to CBO's estimates, outlays this year will include more than $180 billion to reflect the present value of the net cost of transactions under the Troubled Asset Relief Program (TARP), which was created in the fall of 2008. (Broadly speaking, that cost is the purchase price minus the present value, adjusted for market risk, of any estimated future earnings from holding purchased assets and the proceeds from the eventual sale of them.) The TARP has the authority to enter into agreements to purchase assets totaling up to $700 billion outstanding at any one time, but the net cost over time will be much less than that amount.

- The deficit for 2009 also incorporates CBO's estimate of the cost to the federal government of the recent takeover of Fannie Mae and Freddie Mac. Because those entities were created and chartered by the government, are responsible for implementing certain government policies, and are currently under the direct control of the federal government, CBO has concluded that their operations should be reflected in the federal budget. Recognizing that cost in 2009 adds about $240 billion (in discounted present-value terms) to the deficit this year.

- Economic factors have also boosted spending on programs such as those providing unemployment compensation and nutrition assistance as well as those with cost-of-living adjustments. (Such adjustments for 2009 are large because most of them are based on the growth in the consumer price index over the four quarters ending in the third quarter of 2008.)

The Economic Outlook

CBO anticipates that the current recession, which started in December 2007, will last until the second half of 2009, making it the longest recession since World War II. (The longest such recessions otherwise, the 1973–1974 and 1981–1982 recessions, both lasted 16 months. If the current recession were to continue beyond midyear, it would last at least 19 months.) It could also be the deepest recession during the postwar period: By CBO's estimates, economic output over the next two years will average 6.8 percent below its potential—that is, the level of output that would be produced if the economy's resources were fully employed (see Figure 1). This recession, however, may not result in the highest unemployment rate. That rate, in CBO's forecast, rises to 9.2 percent by early 2010 (up from a low of 4.4 percent at the end of 2006) but is still below the 10.8 percent rate seen near the end of the 1981–1982 recession.

The Near-Term Outlook

In preparing its economic forecast, CBO assumes that current laws and policies governing federal spending and taxes do not change. This forecast, therefore, does not include the effects of a possible fiscal stimulus package. On that basis, CBO anticipates that real GDP will drop by 2.2 percent in calendar year 2009, a steep decline. CBO expects the economy to begin a slow recovery in the second half of 2009 and to grow by a modest 1.5 percent in 2010 (see Table 1).

CBO expects inflation to continue to decline, both because energy prices have been falling and because inflation excluding energy and food prices—the core rate—tends to ease during and immediately after a recession. For 2009, CBO anticipates that the increase in the CPI-U will be only 0.1 percent. For 2010, CBO forecasts the CPI-U to be higher—at 1.7 percent—because energy prices are not expected to lessen inflation that year.

CONSUMER PRICE INDEX: MARCH 2009

CPI for All Urban Consumers (CPI-U)

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.2 percent in March, before seasonal adjustment, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. The index has decreased 0.4 percent over the last year, the first 12 month decline since August 1955.

On a seasonally adjusted basis, the CPI-U decreased 0.1 percent in March after rising 0.4 percent in February. The decrease was due to a downturn in the energy index, which declined 3.0 percent in March after rising 3.3 percent the previous month. All the energy indexes decreased, particularly the indexes for fuel oil, natural gas, and motor fuel. The food index declined 0.1 percent for the second straight month to virtually the same level as October 2008. The food at home index declined 0.4 percent, the second straight such decrease, as the index for dairy and related products continued to decline.

The index for all items less food and energy increased 0.2 percent for the third month in a row. An 11.0 percent increase in the index for tobacco and smoking products accounted for over sixty percent of the March rise, with a 0.6 percent increase in the new vehicles index also contributing. In contrast, the indexes for lodging away from home, used cars and trucks, and airline fares continued to decline. The index for all items less food and energy has risen 1.8 percent over the past year.

WP Ex11.01-S7

Social Security and Medicare Taxes

The Federal Insurance Contributions Act (FICA) provides for a federal system of old-age, survivors, disability, and hospital insurance. The old-age, survivors, and disability insurance part is financed by the social security tax. The hospital insurance part is financed by the Medicare tax. Each of these taxes is reported separately.

Generally, you are required to withhold social security and Medicare taxes from your employees' wages and you must also pay a matching amount of these taxes. Certain types of wages and compensation are not subject to social security and Medicare taxes. See sections 5 and 15 for details. Generally, employee wages are subject to social security and Medicare taxes regardless of the employee's age or whether he or she is receiving social security benefits. If the employee reported tips, see section 6.

Tax rates and the social security wage base limit. Social security and Medicare taxes have different rates and only the social security tax has a wage base limit. The wage base limit is the maximum wage that is subject to the tax for the year. Determine the amount of withholding for social security and Medicare taxes by multiplying each payment by the employee tax rate. There are no withholding allowances for social security and Medicare taxes.

The employee tax rate for social security is 6.2% (amount withheld). The employer tax rate for social security is also 6.2% (12.4% total). The 2008 wage base limit was $102,000. For 2009, the wage base limit is $106,800.

The employee tax rate for Medicare is 1.45% (amount withheld). The employer tax rate for Medicare tax is also 1.45% (2.9% total). There is no wage base limit for Medicare tax; all covered wages are subject to Medicare tax.

Successor employer. If you received all or most of the property used in the trade or business of another employer, or a unit of that employer's trade or business, you may include the wages that the other employer paid to your acquired employees before the transfer of property when you figure the annual wage base limit for social security. You should determine whether or not you should file Schedule D (Form 941), Report of Discrepancies Caused by Acquisitions, Statutory Mergers, or Consolidations, by reviewing the Instructions for Schedule D (Form 941). See Regulations section 31.3121(a)(1)-1(b) for more information. Also see Rev. Proc. 2004-53 for more information. You can find Rev. Proc. 2004-53 on page 320 of Internal Revenue Bulletin 2004-34 at www.irs.gov/pub/irs-irbs/irb04-34.pdf.

GENERAL INFORMATION

. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Martin J. Lyons, Jr.
Senior Vice President and Chief Accounting Officer of Ameren Corporation, the parent company of Central Illinois Public Service Company
1901 Chouteau Avenue, St. Louis, MO 63103

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Illinois - May 26, 1902

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

The respondent, operating in the state of Illinois, furnishes electric and gas service.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Thomas B. Specketer, Vice President and Controller
666 Grand Avenue, Suite 500, P.O. Box 657
Des Moines, Iowa 50306-0657

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Iowa - July 18, 1994

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

None

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Iowa - Electric and Gas
Illinois - Electric and Gas
South Dakota - Electric and Gas
Nebraska - Gas

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. rovide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page -301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production	38,509,630

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Martin J. Lyons, Jr.
Vice President and Principal Accounting Officer
1901 Chouteau Avenue
St. Louis, MO 63103

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Illinois - April 11, 1913

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

None

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

The Respondent, operating in the State of Illinois, furnishes electric and gas service.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

Central Illinois Public Service Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2007/Q4

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Martin J. Lyons, Jr.
Senior Vice President and Chief Accounting Officer of Ameren Corporation, the parent company of Central Illinois Public Service Company
1901 Chouteau Avenue, St. Louis, MO 63103

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Illinois - May 26, 1902

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

The respondent, operating in the state of Illinois, furnishes electric and gas service.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. rovide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

Name of Respondent WP Ex11 01-S7 Commonwealth Edison Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2007/Q4

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Matthew R. Galvanoni
Vice President and Controller
Three Lincoln Centre
Oakbrook Terrace, Illinois 60181-4260

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

State of Illinois - organized on October 17, 1913 as a result of the merger of Cosmopolitan Electric Company into the original corporation named Commonwealth Edison Company. The latter had been incorporated on September 17, 1907.

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not applicable.

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Electric Utility services in the State of Illinois.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

5/3

Name of Respondent WP Ex11.01-S7 Commonwealth Edison Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2007/Q4

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production

ANNUAL CORPORATE OFFICER CERTIFICATION

The undersigned officer certifies that:

I have examined this report and to the best of my knowledge, information, and belief all statements of fact contained in this report are correct statements of the business affairs of the respondent and the financial statements, and other financial information contained in this report, conform in all material respects to the Uniform System of Accounts.

01 Name Martin J. Lyons, Jr.	03 Signature	04 Date Signed *(Mo, Da, Yr)*
02 Title Vice President and Controller	Martin J. Lyons, Jr.	04/10/2007

Title 18, U.S.C. 1001 makes it a crime for any person to knowingly and willingly to make to any Agency or Department of the United States any false, fictitious or fraudulent statements as to any matter within its jurisdiction.

Name of Respondent Illinois Power Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2006/Q4

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Martin J. Lyons, Jr.
Vice President and Controller
1901 Chouteau Avenue
St. Louis, Mo. 63103

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Illinois - May 25, 1923

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Electric and gas utility services in Illinois

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

4/3

Name of Respondent WP Ex11.01-S7 Illinois Power Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Rer (Mo, Da, Y / /	Year/Period of Report End of 2006/Q4

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Corporate Books:
Steven K. Young, Senior Vice President & Controller
526 South Church Street
Charlotte, NC 28202

Other Corporate Books of Account:
139 East Fourth Street, Rm 202
Cincinnati, OH 45202

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

State of Indiana
Date of Incorporation - September 6, 1941 (Incorporation date of predecessor company PSI energy, Inc.)

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

State of Indiana

The Company supplies processed steam to one customer in Indiana.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) ☐ Yes...Enter the date when such independent accountant was initially engaged:
(2) ☒ No

Name of Respondent WP EXT1.01-S7 Duke Energy Indiana, Inc	This Report Is: (1) ☐ An Original (2) ☒ A Resubmission	Date of Rer (Mo, Da, Y 05/23/2008	Year/Period of Report End of 2007/Q4

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Joseph M. Buonaiuto, Controller
1 Riverside Plaza
Columbus, OH 43215

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Indiana - February 21, 1925

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

None

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Electric - Indiana
Electric - Michigan

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. ...rovide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page ...-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns ded. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. rovide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Lori Wright, Controller
1201 Walnut
Kansas City, Missouri 64106-2124

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Incorporated - State of Missouri, July 29, 1922.

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

None

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Missouri- Electric
Kansas - Electric

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

Name of Respondent WP EXT.01-S7 Kansas City Power & Light Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Rer (Mo, Da, Y 04/01/2008	Year/Period of Report End of 2007/Q4

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

St. Louis, MO 63103

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Incorporated in Missouri as Missouri Electric Light and Power Co. 11/21/22, name changed to Union Electric Light and Power Company 12/15/22, to Union Electric Co. of Missouri 5/29/37, and to present name 4/23/56.

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Electric and gas utility services in Missouri.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) ☐ Yes...Enter the date when such independent accountant was initially engaged:
(2) ☒ No

Name of Respondent UNION ELECTRIC COMPANY	This Report Is: (1) ☐ An Original (2) ☒ A Resubmission	Date of Report (Mo, Da, Yr) 10/06/2008	Year/Period of Report End of 2007/Q4

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

Name of Respondent WP Ex11.01-S7 Duke Energy Ohio, Inc.	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2007/Q4

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Corporate Books:
Steven K. Young, Senior Vice President & Controller
526 South Church Street
Charlotte, NC 28202

Other Corporate Books of Account:
139 East Fourht Street, Rm 202
Cincinnati, OH 45202

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Ohio
April 3, 1837

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

State of Ohio - Gas and Electric

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

Name of Respondent Duke Energy Ohio, Inc.	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2007/Q4

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Joseph M. Buonaiuto, Controller
1 Riverside Plaza
Columbus, Ohio 43215

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Ohio - May 8, 1907
Reorganized - December 18, 1924

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

None

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Electric - Ohio

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

Name of Respondent WP EX11.01-S7 Ohio Power Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Y / /	Year/Period of Report End of 2007/Q4

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

DIRECT TESTIMONY OF EDWARD J. GRUBB **IAWC EX. 5.00**

I. WITNESS INTRODUCTION

Q1. Please state your name.

A. My name is Edward J. Grubb.

Q2. Please state your business address.

A. My business address is 727 Craig Road, St. Louis, Missouri 63141.

Q3. By whom are you employed and in what capacity?

A. I am employed by American Water Works Service Company, Inc. ("Service Company") as a Director, Rates and Regulation. In this capacity I serve as Director, Rates and Regulation, for Illinois-American Water Company ("Company" or "IAWC") and other midwest operating subsidiaries of American Water Works Company, Inc. ("American Water"). I am also the Assistant Treasurer for IAWC.

Q4. Please summarize your education, background, employment experience, and your responsibilities as the Director Rates and Regulation.

A. My background, qualifications and responsibilities are summarized in Attachment A to this testimony.

II. PURPOSE OF TESTIMONY

Q5. What is the purpose of your Direct Testimony?

A. The purpose of my Direct Testimony is to discuss certain aspects of the costs associated with support services received by IAWC the Service Company, including allocation of Service Company costs and an analysis of Belleville Laboratory test costs that supplements the Service Company Cost Study

sponsored by IAWC witnesses Mark Young and Bernard L. Uffelman. I will also address rate design and other issues.

III. SERVICE COMPANY COST

Q6. Please describe the Services that the Company receives from the Service Company.

A. IAWC receives services from the Service Company to support the provision of utility service to the customers of the Company, under the terms of a Service Company Agreement ("Agreement") dated January 1, 1989 and approved by the Commission, most recently in Docket 04-0595. A copy of the Agreement is attached as IAWC Exhibit 5.01. The Service Company maintains an organization whose officers and employees are familiar with all facets of the water utility business and are knowledgeable and experienced in the efficient management, financing, accounting and operation of water utility assets and the business. The primary areas of service provided to IAWC by the Service Company are: Communications and External Affairs, Corporate Finance, Customer Service, Divisional Operations Support and Regulated Operations, Human Resources, Information Technology Services, Legal, Operations Services, and Shared Services. IAWC witness Mr. John Young discusses the services provided.

Q7. Did the Commission's order in IAWC's last rate case, Docket 07-0507, include requirements with respect to the Service Company's provision of services to IAWC?

A. Yes. In the Commission's Order in IAWC's last rate case, Docket 07-0507 ("Docket 07-0507 Order"), the Commission directed IAWC to, in its next rate filing:

> conduct a study comparing the cost of each service obtained from the Service Company to the costs of such services had they been obtained through competitive bidding on the open market. As part of the study, IAWC must also provide an analysis of the services provided by the Service Company to all of IAWC's affiliates. The analysis must provide details on the specific services provided to IAWC and how costs are allocated among affiliates of IAWC.

As Ms. Teasley explains in her testimony, IAWC has addressed this requirement through evidence sponsored by five witnesses, including portions of my testimony and exhibits. The other witnesses addressing this topic are: Ms. Teasley, who discusses IAWC's approach with regard to service procurement and sponsors a study that compares the cost that IAWC would incur to provide all services through its own employees on a stand alone basis to the cost that IAWC incurs to procure service from an outside provider; Mr. John Young, who describes the services provided to IAWC and other American Water affiliates; and Mr. Bernard L. Uffelman of Uffelman Advisory Services ("UAS") and Mr. Mark Young of Deloitte & Touche LLP ("Deloitte"), who sponsor a "Service Company Cost Study", which, for those services that could be obtained by IAWC from non-affiliate providers, provides a comparison of the cost that IAWC expects to incur for the 2010 test year in procuring services from the Service Company to the cost that IAWC would incur to procure the services from a non-affiliate provider at market price levels. I will discuss the allocation of Service Company costs to regulated and non-regulated affiliates of American Water, and the

development of a cost study for American Water's Belleville Water Quality Testing Lab ("Belleville Lab"), referred to as the "Belleville Lab Cost Study," which supplements the Service Company Cost Study analysis performed by Deloitte and UAS. As Ms. Teasley discusses, IAWC's analysis of Service Company costs, including the Service Company Cost Study and Belleville Lab Cost Study, demonstrate that, for all services provided, the projected Service Company cost is significantly below the market price that would be incurred.

Allocation of Service Company Costs to American Water Affiliates

Q8. Does the Service Company provide services to both regulated and non-regulated affiliates of IAWC?

A. Yes. The Service Company provides services to both regulated and non-regulated affiliates of American Water, including IAWC. Some services may be provided for a specific affiliate. Other services benefit all or a group of affiliates in common.

Q9. How does the Service Company track the time spent by employees in performing services for affiliates?

A. Each Service Company employee completes a weekly electronic time sheet that shows the time spent by the employee. The time sheet also identifies the operating company for which the service/activity was performed where work is performed for a single regulated or non-regulated affiliate or the applicable allocation formula where work is performed for more than one affiliate. The allocation formulas utilized by the Service Company are discussed in further detail below.

Q10. How does the Service Company assign the costs of services provided?

A. As noted above, where possible, the Service Company employee identifies the specific affiliate that a service benefits, so that the cost of that service may be charged to that specific affiliate directly ("Direct Charge"). Direct Charge is the preferred method for assignment of the cost of services performed. For regulated affiliates, this preference for Direct Charge assignment of costs is in accord with the Agreement. Where a service benefits both regulated and non-regulated affiliates, the Service Company allocates the cost to the affiliates benefited using the Tier 1 allocation methodology discussed below. Where a service benefits more than one regulated affiliate, the Tier 2 allocation methodology, also discussed below, is used. Service Company overhead costs are assigned in a manner also discussed below. IAWC Exhibit 5.02, Page 1, shows for 2010 the total Service Company projected cost for all functions, the amount of cost assigned to non-regulated affiliates, the amount of cost assigned to regulated affiliates and the amount of cost assigned to IAWC.

Q11. Please explain the Tier 1 allocation methodology used for the separation of costs applicable to regulated and non-regulated affiliates.

A. Once all Direct Charges have been assigned, the Service Company allocates between regulated and non-regulated affiliates the cost of each service that has been performed to benefit both regulated and non-regulated affiliates. Costs which cannot be identified and related exclusively to services provided to a particular affiliate are allocated among all affiliates so served (or, in the case of costs incurred with respect to services rendered to a particular group of affiliates,

among the members of such group). Where applicable, these costs are allocated to regulated and non-regulated affiliates using what is known as the Tier 1 allocation formulas.

Q12. What are the Tier 1 allocation formulas?

A. The Tier 1 formulas are used to divide the cost for a specific service into a set of charges, applied to each non-regulated affiliate that benefits from that service, with the balance allocated to the benefited regulated affiliates as a group. The amount of cost assigned to regulated affiliates as a group is allocated among the regulated affiliates using the Tier 2 allocation formula discussed below. There are nine different Tier 1 formulas currently in use, each with a distinct weighting of one or more factors (called "metrics") that are designed to allocate costs between non-regulated affiliates accurately, with the balance remaining to be allocated among the regulated affiliates. The Tier 1 formulas are set forth in IAWC Exhibit 5.03.

Q13. Why does the Service Company use this factor-based Tier 1 allocation method for non-regulated affiliates?

A. The formulas that form the Tier 1 methodology reflect the portion of Service Company services taken, and attendant costs incurred, by the non-regulated affiliates relative to the regulated affiliates as a group. Non-regulated subsidiaries use several Service Company services at a different level than do the regulated entities.

Q14. Have you prepared information regarding the amount of 2010 cost assigned to non-regulated affiliates?

A. Yes. As indicated above, the amount of projected 2010 cost assigned (through direct charges and the Tier 1 allocation) to non-regulated affiliates is shown on IAWC Exhibit 5.02, page 1. Page 2 of IAWC Exhibit 5.02 shows the amount of 2010 cost assigned to each affiliate.

Q15. Please explain the Tier 2 allocation methodology for regulated affiliates.

A. Common costs that benefit regulated affiliates are allocated under the Tier 2 allocation methodology in direct proportion to each affiliate's customer count. This allocation for the regulated affiliates is in accord with the Agreement.

Q16. Have you prepared information regarding the amount of 2010 projected cost assigned to regulated affiliates?

A. Yes. As indicated above, IAWC Exhibit 5.02, page 1 shows the amount of projected 2010 cost assigned (through direct charges and the Tier 2 allocation) to regulated affiliates, and to IAWC. Page 2 of IAWC Exhibit 5.02 shows the amount of cost assigned to each affiliate.

Q17. Please explain the allocation of Service Company overheads.

A. The Service Company allocates two categories of overheads: labor benefits (i.e., employee benefits costs such as payroll taxes, medical coverage, pensions, and disability insurance) and general building overhead (i.e., office rent, equipment leases, telephone expenses, electricity charges, office supply costs, property taxes, and office maintenance costs). These costs are allocated to both non-regulated and regulated affiliates. These costs are allocated in proportion to the labor costs assessed each affiliate in the three previous steps. For the regulated affiliates, this allocation methodology is in accord with the Agreement.

Service Company Cost Study – Belleville Lab Analysis

Q18. Please discuss the supplemental analysis of the costs related to the Belleville Lab.

A. Yes. As noted earlier, the Service Company Cost Study concludes that, for services that can be obtained from an affiliated or non-affiliated provider, the cost of the Service Company services provided to IAWC is below the cost that would be incurred to obtain the services from non-affiliated providers. The Service Company Cost Study evaluated hourly costs related to the Belleville Lab (which performs laboratory tests for entities in the American Water system ("AW System")) in reaching this conclusion. The Service Company Cost Study shows that, for laboratory service personnel, the cost that IAWC expects to incur through the Service Company is below the cost that IAWC would incur to procure the services of laboratory personnel from a non-affiliate provider. For lab services, however, there are outside firms that offer testing services on a per-test basis. Accordingly, the Company is supplementing the Service Company Cost Study with the Belleville Lab Cost Study, which reviews the per test costs of testing performed by the Belleville Lab. The Belleville Lab Cost Study provides additional analysis to compare the fully-allocated test cost per test (including variable and fixed costs) to per test prices from independent labs. The Belleville Lab Cost Study compares the cost of performing over 55,000 water quality tests for the AW System to the cost of obtaining the same tests from three separate independent labs. This study was prepared by me or under my direct supervision.

Q19. What were the results of the Belleville Lab Cost Study?

A summary of the results of the study are shown on Exhibit 5.04, page 2 of 3, column E. The Company has determined that the AW System would realize a total savings of $2,305,374 in water quality testing costs in 2010 by performing the tests at the Service Company's Belleville Lab, as compared to having an outside water quality testing lab perform the tests. Of this savings, IAWC would realize $207,253 in 2010, as shown on Exhibit 5.04, page 1 of 3.

Q20. Would you please discuss how the Belleville Lab Cost Study was prepared?

The first step in the study was to request proposals from outside water quality testing labs. The Company received proposals, stated in terms of a per test price, from three outside water quality testing labs for twenty-eight different water quality tests currently being performed by the Belleville Lab. The per test prices of the outside vendors were adjusted for turnaround surcharges, the electronic data requirements of the tests, the need for limited receipt days for microbial analyses, the need for multiple microbial slides and for sample disposal containers. The adjustments were made because the outside vendors quoted additional prices for these services. An escalation adjustment of 2.50% was applied to adjust the 2009 vendor prices to a level applicable for the 2010 test year. The adjusted outside vendor costs per test are shown in columns H, J and L of Exhibit 5.04, page 2 of 3. The per test costs were then applied to the total number of each test projected to be performed for the AW System in 2010 to

calculate a total cost. The total costs for each test for the outside vendors is shown in columns I, K and M of Exhibit 5.04, page 2 of 3.

The next step was to calculate the cost for the Belleville Lab to perform the necessary tests for the projected test year 2010. The Belleville Lab has 21 employees dedicated to performing the water quality testing for the AW System. Using the Service Company Cost Study information, hourly wage rates, including employee benefits were used to calculate an average hourly rate of $44.16. The hourly wage rate plus benefits was multiplied by the number of tests and the time required for performing the test. Adding the labor cost to an allocated amount of fixed overheads (depreciation, maintenance, leases, software, office supplies, etc) produces a total cost for each test performed by the Belleville Lab, as shown in Column F of Exhibit 5.04, page 2 of 3.

Q21. Is it appropriate to include fixed overhead in the per test cost?

A. Yes. The Belleville Lab's fixed overhead represents essential components, such as its building and lab equipment, that enable the Belleville Lab to provide the significant overall savings calculated on Exhibit 5.04 and discussed below. Without the building, lab equipment and other overhead components, the significant overall savings would not be possible. Thus, inclusion of the overhead in the cost per test is appropriate.

Q22. What savings are realized by utilization of the Belleville Lab?

A. As discussed above, the AW System realizes a total savings of $2,305,374 by performing the tests at the Belleville Lab, of which IAWC realizes savings of $207,253. Also shown at the bottom of Exhibit 5.04, page 2 of 3 under Columns

I, K and M is the savings realized by the Belleville Lab when compared to each individual outside vendor. For example, the savings is $3,848,439 when comparing AW to Vendor 1 ("V1"), $3,376,786 when comparing AW to Vendor 2 ("V2") and $2,685,233 when comparing AW to Vendor 3 ("V3"). Thus, the savings realized are significant.

Q23. Are the prices of certain of the individual tests available through a non-affiliated vendor lower than the AW cost?

Yes. As shown on Exhibit 5.04, page 3 of 3, there are five tests for which the outside vendor price is lower than the Belleville Lab cost. The total difference is $64,701.

Q24. Would it be cost effective to out source the five tests to one of the independent vendors?

No. The Belleville Lab has fixed costs associated with performing the required water quality tests. A small reduction in the number of tests performed for IAWC would not reduce or eliminate the fixed cost incurred by the Belleville Lab to produce the significant savings of approximately $2.3 million referenced above. Outsourcing the five tests (totaling 3,629 individual tests out of 55,522 projected for the test year) would not cause any savings in fixed costs, and so the Lab would still incur the $224,260 of fixed costs. Accordingly, in assessing whether it is cost effective for IAWC to outsource a small number of tests to a non-affiliate laboratory, the Belleville Lab cost should be compared to the combined amount of (1) the price paid to the non-affiliate laboratory for the test involved; and (2) the associated fixed overhead cost that must still be incurred. When this comparison

is made, it shows that the outsourcing of the 5 tests to a non-affiliate laboratory would increase the overall cost incurred by IAWC for laboratory testing. As shown on Exhibit 5.04, page 3 of 3, the total cost to outsource the five tests would increase costs by $160,548.

Q25. What do you conclude about the Belleville Lab Cost Study?

A. Both the Service Company Cost Study and the Belleville Lab Cost Study demonstrate that obtaining services from the Service Company is the least cost option for IAWC.

IV. RATE DESIGN

Q26. Is the Company making proposals with respect to rate design in this case?

A. Yes. The Company is making certain proposals regarding rate design that represent updates of rate design proposals the Company made in the Commission-ordered rate design investigation in Docket 08-0463 ("Docket 08-0463"). As discussed below, and by IAWC's rate design consultant Mr. Paul Herbert (IAWC Ex. 9.00), the Company is proposing to implement a rate design proposal referred to as Alternative 3A, which updates the Company's Alternative 3 rate design proposal from Docket 08-0463. The Company's rate design proposals include a proposal to move the Champaign District into Zone 1 and certain rate impact mitigation measures.

Q27. Please provide the background of Docket 08-0463.

A. On July 30, 2008, the Commission entered an Initiating Order in Docket 08-0463 (the "Initiating Order"): (i) requiring IAWC to provide updated demand factors for each rate area in which a rate increase was proposed in Docket 07-0507 and to

provide a cost of service study ("COSS"), and (ii) initiating an investigation into all aspects of the rate design of for all service areas of IAWC (water and sewer).

Following the entry of the Initiating Order, the parties to Docket 08-0463 (the Company, the People of the State of Illinois by the Illinois Attorney General, the Illinois Industrial Water Consumers, the Cities of Champaign and Urbana and the Villages of St. Joseph and Savoy, and the Staff of the Illinois Commerce Commission (together, the "Parties")), on September 23, 2008, convened a workshop ("Workshop") to discuss the approach to the Demand Study and the COSS. At the Workshop, IAWC presented a proposed methodology for a multi-year demand study ("Multi-Year Study"). IAWC also presented a proposed methodology for the COSS ("COSS Methodology"). At the Workshop and during subsequent discussions, the Parties discussed the Multi-Year Study and the COSS Methodology. With respect to the Multi-Year Study, the Parties indicated that they did not object to the methodology proposed by the Company, provided that the Commission deemed it consistent with the directives in the Initiating Order. As a result, the Parties determined that it would be appropriate to seek guidance from the Commission. The Parties therefore filed a Joint Motion for Clarification ("Joint Motion") on October 3, 2008, requesting that the Commission authorize IAWC's completion of the Demand Study required by the Initiating Order through the Multi-Year Study methodology and approve the COSS Methodology. The Commission, on October 15, 2008, issued a ruling (the "Joint Motion Ruling") granting the Joint Motion for Clarification, and determining "that it is permissible for [IAWC] to complete the demand factor study through the use of

the Multi-Year Study methodology" described in the Joint Motion, and "that it is permissible for IAWC to complete the [COSS] through the use of COSS Methodology" described in the Joint Motion.

Q28. Did IAWC complete the Demand Study and COSS in Docket 08-0463?

A. Yes. As discussed below, and in accordance with the methodologies approved by the Commission in the Joint Motion Ruling, IAWC completed a Demand Study and COSS and filed them with its direct evidence in Docket 08-0463 on January 30, 2009.

Q29. Did IAWC make rate design proposals in Docket 08-0463?

A. Yes. In its direct evidence in Docket 08-0463, the Company, in consultation with its rate design consultant, Mr. Herbert, proposed rates based on the revenue requirements authorized by the Commission in its Docket 07-0507 order ("Docket 07-0507 Order"). The Company also addressed certain rate design issues raised by the Commission in the Docket 07-0507 Order and made related rate design proposals. I will refer to the Company's rate design proposals in Docket 08-0463 as the "Docket 08-0463 Proposals".

Q30. Please describe the relationship between the Company's rate design proposals in this case and the Docket 08-0463 Proposals.

A. In this case, IAWC has updated the COSS used in Docket 08-0463 (which was based on the revenue requirements approved in Docket 07-0507) to reflect the revenue requirements proposed in this case ("Proposed Revenue Requirement"). I refer to this updated COSS as the "Updated COSS." As discussed below, IAWC is maintaining the Docket 08-0463 Proposals in this case, but has updated them

to reflect the Updated COSS (as a result of this update, IAWC is proposing to move the Champaign District to Zone 1, and is also proposing certain rate impact mitigation measures). As also discussed below, IAWC's rate design proposals in this case address the Commission's requirements regarding rate design set forth in the Docket 07-0507 Order and the Initiating Order. As discussed in Docket 08-0463, IAWC intends to move to consolidate this case with Docket 08-0463.

Q31. Has the Company prepared a demand study to provide updated demand factors for each rate area in which a rate increase is proposed in this case?

A. Yes. The Company retained Black & Veatch Corporation ("B&V"), a consultant, to prepare a demand study. The demand study was performed in accordance with the methodology approved in the Joint Motion Ruling, and provides updated demand factors for each of IAWC's rate areas. The demand study, which was also filed as part of IAWC's direct evidence in Docket 08-0463, is discussed further in the testimony of Mr. J. Rowe McKinley of B&V (IAWC Ex. 13.00), and is provided as IAWC Exhibit 13.01, attached to Mr. McKinley's testimony in this proceeding.

Q32. Did the Company prepare a COSS for this case?

A. Yes. The Company retained Mr. Paul Herbert, of Gannet Fleming, to prepare the Updated COSS. As discussed above, the Updated COSS updates the COSS provided in Docket 08-0463 based on the Proposed Revenue Requirement. The Updated COSS is discussed further in the testimony of Mr. Herbert in this case, and is provided as IAWC Exhibit 9.01, attached to Mr. Herbert's testimony in this proceeding.

Q33. Did the Company develop its rate design proposals for this case based on the Updated COSS?

A. Yes. As discussed above, the Company's proposals in this case update the Docket 08-0463 Proposals to reflect the Proposed Revenue Requirement. These proposals are discussed in detail in the Updated COSS and direct testimony of Mr. Herbert.

Q34. Describe the objectives of IAWC's rate design analysis in this proceeding.

A. The Company's rate design analysis in this case complies with the requirements regarding rate design set forth in Docket 07-0507. The Company's rate design analysis in this case also addresses the requirements of the Initiating Order in Docket 08-0463, which required IAWC to review all aspects of rate design.

Q35. What is your understanding of the Commission's concerns regarding rate design as expressed in the Docket 07-0507 Order?

A. The Docket 07-0507 Order discussed at length general considerations regarding movement towards single tariff pricing ("STP"), as well as a number of specific rate design issues, such as inclining block structures, the movement of fixed charges into the customer charge, and the implementation of demand charges for non-residential customers.

With respect to STP, the Commission, in the Docket 07-0507 Order (see pages 94-98), discussed various approaches to STP. As discussed by the Commission, one approach is to combine individual rate areas with other rate areas and develop common rates for customers in the combined group based on the group revenue requirements. Another approach is to develop uniform rates

and charges for customers, where appropriate, across rate areas, without inclusion in a combined revenue requirement. This can be accomplished by establishing, over time, (1) a common customer charge, (2) a common usage block structure, and (3) common usage rates. Other approaches include gradual steps toward STP, such as adoption of uniform miscellaneous charges for all IAWC districts and development and use of uniform and consistent tariff language and tariff books. In Docket 07-0507, IAWC agreed that it was appropriate for it to conduct an analysis of moving its downstate districts (Southern, Peoria, Streator and Pontiac) towards a uniform rate structure. The Commission therefore ordered IAWC to study certain aspects of STP, including: (i) review and analyze the usage patterns of the customer classes in each of its downstate districts and to propose a uniform block structure if appropriate, (ii) analyze common usage rates for the SPSPSB District (which presently consistent of the downstate districts and South Beloit); and (iii) analyze whether the Sterling District should be included in a STP group with the SPSPSB Districts. The Commission's Docket 07-0507 Order also approved the application of a number of uniform fees and charges, and required IAWC to revise its tariffs to make them more uniform and consistent. Taken as a whole, I understand the Commission's attention towards and requirements related to STP in the Docket 07-0507 Order to signal the Commission's interest in further consideration of the potential for movement towards STP. IAWC agrees that movement should be made towards STP where appropriate.

Q36. What are IAWC's specific proposals to address movement towards STP in this case?

A. In this proceeding, IAWC has examined both the consolidation of rate areas and the movement towards uniform customer charges, block structures and usage charges. This examination is primarily directed to the so-called "downstate" districts: Southern, Peoria, Streator, and Pontiac, which together form one of IAWC's STP areas. In Docket 07-0507, these districts were combined in a rate area with South Beloit and referred to as the SPSPSB District. For ease of reference going forward, I will refer to the downstate districts, plus South Beloit, as a single rate zone, "Zone 1." (The Company is also proposing to include Sterling and Champaign in Zone 1, as discussed below.) IAWC, however, also reviewed whether the approaches to STP discussed above could be applied to other rate areas outside Zone 1. IAWC has also addressed the other specific rate design matters discussed in the Docket 07-0507 Order.

Q37. Can you summarize the rate design areas IAWC has reviewed for this proceeding?

A. Yes. IAWC's review focused on the following rate design matters:

1. Movement of the SPSPSB District and other rate areas towards STP.

2. Study of customer charges to assess the recovery of a greater portion of fixed costs for each rate area through the customer charge.

3. Design of alternative inclining-block rate structures for each rate area.

4. Analysis of potential rate structures for non-residential customers that would include the use of demand charges in addition to customer charges and volumetric charges.

5. Study of the cost to provide public fire service for each municipality or fire district based on the cost of service allocation studies within each rate area.

6. For the Chicago Metro District – Sewer - determination of the appropriate unit rate for collection and treatment customers and collection-only customers using less than 1,000 gallons per month.

Q38. Please summarize IAWC's proposals as a result of its review of these areas.

A. As discussed in detail by Mr. Herbert, IAWC is proposing several steps towards STP, including moving Sterling and Champaign into Zone 1 and implementing uniform customer charges, block structures and usage charges in Zone 1 (with the exception of the 5/8 inch meter customer charge). The Company is also proposing to include additional fixed costs in its customer charge for all rate areas through a phase in process. For all rate areas, IAWC is proposing a one-block structure for the residential class, which would replace the present declining block structure for that class. IAWC is also proposing to set cost-based public fire charges for all rate areas except Chicago Metro – Water, and is proposing new sewer rates. IAWC is not proposing the expanded use of non-residential demand charges at this time, and intends to collect demand billing data that would allow implementation of non-residential demand charges, if appropriate, in the future.

Single Tariff Pricing

Q39. As a step towards adoption of STP, did the Company consider consolidation of rate areas?

A. Yes. As required by the Docket 07-0507 Order, IAWC considered moving Sterling into Zone 1. IAWC also re-evaluated the inclusion of South Beloit in Zone 1 and considered moving other rate areas, including Champaign, into Zone

1. As discussed by Mr. Herbert, IAWC believes, based on cost of service, that Sterling, Champaign and South Beloit should be included in Zone 1.

Q40. As a step towards adoption of STP, did the Company conduct an evaluation of the appropriateness of a single set of uniform customer charges in Zone 1?

A. Yes. As discussed by Mr. Herbert, the Company is proposing a uniform customer charge of $17.75 for Zone 1, except for Champaign and South Beloit. For South Beloit, the Company is proposing a customer of charge of $13.78, which includes a fixed purchased water charge of $0.83 per month for a 5/8 inch meter. For Champaign, the Company is proposing a 5/8-inch meter customer charge of $15.75. As discussed below, the Company is proposing inclusion of certain fixed "minimum system costs" in the customer charge. For the reasons discussed by Mr. Herbert, the Company believes that the addition of "minimum system costs" as a component of the fixed customer charge will better reflect cost of service. The proposed $1.75 minimum system charge reflects the first step of the phase-in of minimum system cost as discussed by Mr. Herbert.

Q41. As a step towards adoption of STP, did the Company review a uniform block structure for Zone 1?

A. Yes. As discussed by Mr. Herbert, the Company is proposing a uniform block structure for Zone 1. As discussed below, IAWC is proposing a one-block block structure for the residential class in all rate areas, including Zone 1.

Q42. As a step towards adoption of STP, did the Company review the extent to which common usage rates may be appropriate for Zone 1?

A. Yes. As discussed by Mr. Herbert, the Company is proposing common usage rates for Zone 1 (including Champaign and Sterling), except for South Beloit. Because South Beloit is a purchased water area, IAWC is proposing a different usage charge for South Beloit to reflect the fact that it is a purchased water area. Because South Beloit customers pay for water purchased through a purchased water rider, the usage rates for South Beloit are below those in other Zone 1 areas, to reflect the difference in approach in recovery of water supply costs.

Q43. Is the Company making any other proposals to move toward STP?

A. Yes. The Company is proposing movement towards a uniform customer charge for all districts, and is also proposing a uniform, one-block block structure for the residential customer class in all rate areas. These are discussed further below.

Customer Charges

Q44. Please further describe IAWC's review of its customer charges.

A. Although the requirement of the Docket 07-0507 order to consider uniform customer service charges only applies to the "downstate" districts (Zone 1), the rationale for uniform customer charges is that costs that the Company incurs to serve its customers that do not vary with use (such as costs for metering, meter reading, customer accounting, billing, customer service and administrative and general costs) are similar regardless of the physical location of the customers and could apply to all IAWC's rate areas. Thus, the Company considered, based on the cost of service results for each rate area, whether a uniform customer charge should be implemented in other rate areas beyond Zone 1. As discussed by Mr. Herbert, on a Company-wide cost of service basis, for a 5/8 inch meter,

the monthly customer charge would be $18.14. As discussed above, the Company also studied customer charges to assess the recovery of a greater portion of fixed costs in the customer charge, as directed by the Commission in Docket 07-0507. That review indicated that the minimum system cost referenced above should be added as a customer charge component. The Company proposes to implement a uniform customer charge for a 5/8 inch meter for Pekin and all areas in Zone 1, except Champaign and South Beloit, and move towards a uniform customer charge for Chicago Metro, Champaign, Lincoln and South Beloit.

Q45. Please further discuss the Company's proposal with respect to inclusion of minimum system cost as a component of the customer charge.

A. As discussed by Mr. Herbert, the Company is proposing that minimum system cost be included in the customer charge for all customers through a phase-in process. The first step of the phase in (inclusion of a minimum system charge of $1.75) would come at the conclusion of this proceeding. The next step would come at the conclusion of the next rate case.

Inclining Block Structures

Q46. Did the Company design alternative inclining-block rate structures for each rate area?

A. Yes. As discussed by Mr. Herbert for each rate area, the Company designed an inclining block rate structure. For non-residential customers, however, the Company does not believe that such structures properly reflect cost of service considerations. For residential customers, the Company is not proposing an

inclining block structure. The Company is, however, proposing a uniform, one-block block structure, which the Company believes better reflects the cost of service for the residential customer class. Under the one-block structure for residential customers, a high volume residential user's usage would not move into the second block where usage would be subject to a lower usage rate. The Company believes that this proposal will discourage excessive residential lawn irrigation and mitigate summer peak demand. For non-residential customers, the Company proposes to retain a declining block structure which properly reflects the cost of service for these classes.

Non-residential demand charges

Q47. Did the Company analyze potential rate structures for non-residential customers that would include the use of demand charges in addition to customer charges and volumetric charges?

A. Yes, as discussed below and in the testimony of Mr. Herbert. Example demand rates are set forth in IAWC Exhibit 9.04 sponsored by Mr. Herbert.

Q48. Does the Company presently have demand charges in its tariffs?

A. Yes. IAWC's standby tariffs (under which only one customer presently takes service) contain a monthly demand charge.

Q49. Is the Company proposing to implement other non-residential demand charges in this proceeding?

A. Not at this time. As discussed below, the Company's review indicates that there are concerns with regard to the availability of reliable water demand meters and the associated costs. In order to propose class- or customer-specific demand

charges, information regarding customer-specific demands must be collected to determine the level of revenue that would result from the application of demand charges. The Company therefore proposes to implement demand metering for certain customers deemed to be appropriate candidates for demand charges (wholesale, and, if appropriate, large industrial customers), and gather billing data for those customers. The Company proposes to present the results of this process and investigation, and propose demand charges if appropriate, in its first rate case after the present case. The Company also intends to work cooperatively with certain wholesale and large industrial customers to obtain information regarding the ability of the customers to control maximum day and maximum hour usage.

Q50. What factors will the Company consider to determine if it would be appropriate to implement demand charges?

A. The Company must further study both the cost and the reliability of the equipment that would be needed to effectively administer and bill the demand charges. As discussed above, the Company has one customer who is currently on the Standby Tariff in the Pontiac District. The Company uses a demand metering device in that location. The Company has experienced reliability issues related to the equipment that is in place to record the daily usage. Also, in Docket No. 07-0507, the Company submitted a demand study which made use of two types of demand meters that cost between $1,300 and $2,500 per meter. The Company incurred costs in connection with the operation and maintenance of these meters to resolve technical and reliability issues. Due to cost and

reliability concerns, the Company at this time does not propose to expand the use of such meters for sale-for-resale or larger industrial customer billing. The use of demand rates is not common in the water industry because of the cost and reliability of the equipment that is currently needed to implement demand rates. If the Company determines that adequate metering equipment is available, a cost for that equipment and appropriate addition to the applicable customer charge for a demand rate can be determined.

Q51. Is the Company aware of any alternative to the use of demand meters?

A. Yes. The Company is aware of the use of motorized control valves which may be used to restrict the flow of water to a customer based on a required peak day demand. For example, a customer whose peak day demand is 200,000 gallons would have a motorized control valve to prevent peak day usage above that level. Depending on the location of the metering point, the cost to install this type of device would range from $25,000 to $50,000. The use of a motorized control valve may be feasible for customers that have an alternative water supply, because this process would restrict the customer's peak daily demand on IAWC's system. Customers without an alternative supply may oppose the use of such equipment.

The Company plans to review all these factors and options and others as they become known, and based on this will make a recommendation to the Commission on the use of demand charges or flow control devices in the first rate case after the present case.

Public Fire Charges

Q52. Did the Company review the cost to provide public fire service for each municipality or fire district based on the cost of service allocation studies within each rate area?

A. Yes. Based on the review, and as discussed by Mr. Herbert, IAWC proposes to implement the public fire charges shown on Mr. Herbert's Exhibit 9.10. For the Chicago Metro District, the Company proposes to retain a single fire protection charge ($7.86) applicable to all customers. As Mr. Herbert discusses, this uniform charge is reasonable because it recovers a reasonable portion of the cost of providing fire protection to each Chicago Metro customer. As Mr. Herbert also discusses, the Company is recommending increasing the uniform fire protection charge in Chicago Metro by 75% per month. The 75% increase represents less than half of the updated cost of service for fire protection for this rate area.

Sewer Rate Design

Q53. Please explain IAWC's proposals regarding sewer rate design in the Chicago Metro District.

A. As explained by Mr. Herbert, the rate design for Chicago Metro District - Wastewater relies upon the results of the cost of service allocation presented in IAWC Exhibit 9.01. The cost allocation results show that under the allowed rates in the previous rate case, Collection Only customers are contributing revenues in excess of their costs and the Collection and Treatment and Treatment Only customers are contributing revenues far less than their allocated costs. The proposed rate design for this case therefore seeks to better align these sewer

revenues with the cost of service, and is presented in IAWC Exhibit 9.05. For Collection Only customers, the Company is proposing to not adjust the current rates, which consist of a fixed charge and a single block consumption charge. The residential fixed charge includes an allowance of 1.33 ccf or 1,000 gallons, which provides the unit rate for customers with less than 1,000 gallons of usage as referenced in the Docket 07-0507 Order. For Collection and Treatment customers, the proposed rates move revenues closer to recovering the cost of service, and include a fixed charge and a single block consumption charge for residential and a two-block consumption charge for non-residential. The residential fixed charge also includes an allowance of 1.33 ccf or 1,000 gallons.

Q54. Is IAWC making other proposals with respect to sewer rate design?

A. Yes. As discussed by Mr. Herbert, IAWC is proposing a flat per user monthly charge for Treatment Only (wholesale) customers Tinley Park and Tinley Park West.

Other Rate Design Issues

Q55. Was IAWC required to perform other reviews related to the design of its rates and charges in Docket 07-0507?

A. Yes. The Docket 07-0507 Order indicated that IAWC should submit a report regarding after-hours reconnections by district. The Docket 07-0507 Order also stated that IAWC should review the $25 home inspection fee for all districts.

Q56. Has IAWC prepared the report with respect to after-hours reconnections?

A. Yes. The report is attached as IAWC Exhibit 5.05. It shows the after-hours reconnections by district and the fees charged.

Q57. Based on its review of after-hours reconnections, does IAWC recommend a change to the after-hours reconnection charge?

A. Yes. The Company believes that a uniform reconnection charge is appropriate for after-hours reconnections. In Docket 08-0463, IAWC conducted a cost analysis to determine the appropriate level of the after-hours reconnection fee. That analysis showed that the cost of after-hours reconnections in the various areas is affected by such factors as the applicable union contract work rules (e.g., 3 hours minimum for a call-out in Chicago Metro and 2 hours in other areas) and the average travel distance required for a call-out due (2 miles for Champaign as compared to 4.5 miles for Chicago Metro or 7 miles for Peoria). IAWC has now updated this cost analysis to reflect test year level of expenses, as shown on IAWC Exhibit 5.06. In light of the emphasis on uniform charges in Docket 07-0507, IAWC is proposing, based on the updated cost analysis, to implement a uniform charge of $138 per after-hours reconnection for all rate areas. This charge represents the average cost of an after hours reconnection as shown on IAWC Exhibit 5.06.

Q58. Has IAWC reviewed the $25 home inspection fee for all districts?

A. Yes. Based on the review, IAWC has determined that customers are not requesting home inspections. No home inspections were conducted over the past three years. IAWC is therefore proposing that the home inspection fee be eliminated for all rate areas.

Q59. Is the Company proposing other changes to miscellaneous tariff charges?

A. Not at this time.

V. OTHER ISSUES

Q60. Are there other issues you would like to address?

A. Yes. I would like to address the amount of pension and other post-retirement benefits ("OPEBs") costs in the test year.

Q61. Please discuss the amounts reflected in the test year operating expense level for costs related to pensions and OPEBs.

A. In accord with the ratemaking treatment of these items approved by the Commission in past proceedings, IAWC has proposed recovery in rates as operating expenses of the accrued levels of these costs under the applicable accounting rules. These are Financial Accounting Board Statement No. 87 ("FAS 87") in the case of pension expense and Financial Accounting Board Statement No. 106 ("FAS 106") in the case of OPEB. The proposed rate recovery for these costs is based on actuarial studies that determine each respective cost.

Due to market conditions, however, the level of pension/OPEB cost increased significantly, commencing in 2009, from the level for the prior year. Based on the changed level and pattern of these costs, IAWC intends to file with the Commission a Petition seeking approval to amortize a portion of the amount of pension and OPEB costs commencing in 2009, with deferral of the unamortized balance. In this regard, IAWC believes that the pattern of these expenses is expected to be similar to that of other costs that are amortized for rate making purposes. If IAWC's proposal is approved, IAWC would seek to update the proposed level of cost recovery for these items to reflect amortization

of a portion of the 2009 and 2010 pension and OPEB costs, with inclusion of the unamortized balance of these costs in rate base. If the Commission does not approve the proposal, IAWC will seek recovery of the projected levels of these costs as reflected in the present filing.

Q62. Does this conclude your testimony?

A. Yes.

ATTACHMENT A

EDWARD J. GRUBB

Edward J. Grubb is the Rates and Regulation Director for American Water. Mr. Grubb is also the Assistant Treasurer for Illinois American Water Company.

As Rates and Regulation Director, his main responsibilities are to:

1) Plan and oversee the preparation and presentation of all rate increase applications and supporting documents and exhibits as prescribed by management policies, guidelines and regulatory commission requirements;

2) Oversee rate analyses and studies to evaluate the effect of proposed rates on the revenues, rate of return and tariff structure of the company;

3) Oversee the implementation of rate orders, including development of the revised tariff pricing necessary to produce the proposed revenue level;

4) Oversee the preparation of Company budgets and analyses;

5) Oversee the review of Company financial statements;

6) Oversee employee relations in the Finance Department, including the recommendation regarding personnel changes and the training and evaluation of assigned personnel;

7) Provide support for financial analysis of proposed acquisitions and expansion of service territory, including preparation of applicable Commission filings;

8) Assure that policies, procedures, programs, standards of performance, and approved objectives are adhered to and/or achieved including those involving safety, affirmative action, community relations, and labor relations.

Mr. Grubb has prepared rate cases and presented testimony before the Maryland Public Service Commission, West Virginia Public Service Commission, Tennessee Public Service Commission, Illinois Commerce Commission, Kentucky Public Service Commission, Iowa Utilities Board, Public Utility Commission of Ohio, Missouri Public Service Commission, Indiana Utility Regulatory Commission and the Virginia State Corporation Commission.

In June 1978, Mr. Grubb was awarded a Bachelor of Science Degree in Business Administration from Drexel University with a major in accounting. In May 1989, he was awarded a Masters of Business Administration from the University Of West Virginia College Of Graduate Studies. In September 1993, Mr. Grubb successfully completed the Certified Management Accounting program and received his certificate as a Certified Management Accountant (CMA). And, in January 1998, he successfully completed the Certified in Financial Management (CFM) program and received his certificate as a CFM from the Institute of Management Accountants.

Mr. Grubb began his career in 1978 with American Water Works Service Co., Inc. as an Internal Auditor. As an Internal Auditor, he conducted financial and procedural audits of American System operating companies. In 1983, Mr. Grubb was promoted to Rate Analyst. In 1984, he was promoted to Revenue Requirement Specialist and in 1988, Mr. Grubb was promoted to Assistant Director - Rates and Revenue. In these three positions, he has assisted, prepared and presented testimony and accounting exhibits before regulatory bodies concerning rate increase applications and other matters.

In January 1998, Mr. Grubb was promoted to the position of Comptroller of Kentucky-American Water Company. In his capacity as Comptroller, Mr. Grubb was responsible for all aspects of the accounting and regulation for the Company, including the preparation of financial statements, tax returns, and regulatory filings. In October 2000, Mr. Grubb was promoted to the Director, Rates and Planning with Missouri-American Water. In April 2008, Mr. Grubb was appointed to his current position.

Exhibit 5.01

AGREEMENT

Agreement dated January 1, 1989, between AMERICAN WATER WORKS SERVICE COMPANY, INC., a Delaware corporation (hereinafter "Service Company"), and ILLINOIS-AMERICAN WATER COMPANY, a Illinois corporation (hereinafter "Water Company").

The background of this Agreement is that:

1. Both Service Company and Water Company are subsidiaries of American Water Works Company, Inc., a Delaware corporation (hereinafter "American").

2. Water Company has been organized for and is presently engaged in the business of providing potable water as a public utility in the State of Illinois.

3. Service Company maintains an organization whose officers and employees are familiar with all facets of the water utility business, including the development, business and property of Water Company, and are experienced in the efficient management, financing, accounting and operation of water utility properties and the extension and improvement thereof. The officers and employees of Service Company are qualified to aid, assist and advise Water Company in its business operations through the services to be performed under this Agreement.

4. Service Company has provided administrative and operating services to Water Company for many years, the past 17 years pursuant to an agreement dated January 1,

1971. Because Water Company is of the opinion that it cannot obtain the same quality and diversification of services on a comparable economic basis elsewhere, it proposes to enter into a new agreement with Service Company more specifically defining the types of services available to it.

5. Service Company has entered or proposes to enter into agreements similar to this agreement with other affiliated water companies (hereinafter collectively "Water Companies").

6. The services to be rendered under this agreement are to be rendered by Service Company to Water Companies at their cost to Service Company, as hereinafter provided.

NOW, THEREFORE, in consideration of the premises and mutual agreements herein contained, the Water Company and Service Company agree that:

ARTICLE 1. PERSONNEL AND SERVICES TO BE PROVIDED

1.1 During the term of this agreement and upon the terms and conditions hereinafter set forth, Service Company shall provide corporate guidance for Water Company. In addition to the guidance provided by the officers and employees of Service Company through the coordination of functional activities for all subsidiaries of American, the officers and employees of Service Company shall furnish and Water Company shall purchase from Service Company, the following services: Accounting, Administration, Communication, Corporate Secretarial, Engineering, Financial, Human Resources,

Information Systems, Operation, Rates and Revenue, Risk Management and Water Quality, together with such other services as Water Company and Service Company may agree; provided, however, that Water Company may perform the service with its own personnel or engage another company or person to provide those services on its behalf. Service Company by mutual consent may engage another Company or person to provide such services on its behalf.

1.2 Service Company shall employ qualified officers and employees and those persons shall be available for election by Water Company to serve as officers of Water Company.

1.3 Without limitation, services to be provided by the Service Company shall be rendered as follows:

A. Accounting: Service Company shall assist in the preparation and implementation of accounting methods and procedures to determine that they conform fully to the requirements, rules and regulations of governmental authorities having jurisdiction and review Water Company's monthly financial reports, annual reports and other reports to stockholders and to any governmental authorities. It shall advise and assist in the establishment and maintenance of current record keeping techniques; review accounting procedures, methods and forms; and evaluate systems of internal control for receipt and disbursement of funds, materials and supplies, and other assets. Service Company shall maintain accounting records as required by Water Company. When appropriate, Service Company shall cooperate and consult with Water Company's independent certified public accountants.

Service Company shall assist in the preparation of operating and construction budgets and monitor the control over such budgets by comparing experienced costs to the projections.

Service Company shall prepare or assist in the preparation of federal, state and local tax returns for and to the extent required by Water Company.

B. **Administration**: Service Company shall make qualified employees available to perform or assist in the performance of Water Company's corporate activities. Those employees shall keep themselves informed on all aspects of Water Company's operations and shall regularly visit Water Company's facilities. They shall make recommendations to Water Company for operating expenditures and for additions to and improvements of property, plant and equipment. They shall keep abreast of economic, regulatory, governmental and operational developments and conditions that may affect Water Company; and advise Water Company of any such developments and conditions to the extent that they may be important to Water Company. Service Company shall provide an internal audit staff for periodic audits of accounts, records, policies and procedures of Water Company and submit reports thereon.

C. **Communications**: Service Company shall recommend procedures to promote satisfactory relations with employees, customers, communities and the general public and assist in the preparation of communication materials, (including press releases, brochures, audio visual presentations and speeches) plant tours, public exhibits and displays and other related services to inform the public.

D. **Corporate Secretarial**: Service Company shall maintain, in such places and manner as may be required by applicable law, documents of Water Company, such as minute books, charters, by-laws, contracts, deeds and other corporate records, and shall administer an orderly program of records retention. It shall maintain, or arrange for the maintenance of, records of stockholders of Water Company, prepare or arrange for the preparation of stock certificates, perform duties relating to the transfer of stock and perform other corporate secretarial functions as required including preparation of notices of stockholder and director meetings and the minutes thereof.

Service Company shall review and may assist in the preparation of documents and reports required by Water Company such as deeds, easements, contracts, charters, franchises, trust indentures and regulatory reports and filings.

E. **Engineering**: Service Company shall advise, and provide engineering services to assist Water Company in planning for, operating, maintaining and constructing its facilities.

It shall conduct distribution system surveys and hydraulic analyses and prepare or review maps, charts, operating statistics, reports and other pertinent data.

It shall assist Water Company in the proper maintenance and protection of Water Company properties by periodic inspection of its structures, tanks, reservoirs, dams, wells and electrical and mechanical equipment.

The engineering services provided by Service Company shall also include the conduct of field investigations as necessary to

obtain engineering information and, when required, the preparation of studies, reports, designs, drawings, cost estimates, specifications, and contracts for the construction of additions to or improvements of Water Company's source of supply, treatment plant, pumping stations, distribution system, and such other facilities as Water Company may request. Service Company shall provide a Materials Management Program to arrange for the purchase of equipment, materials, and supplies in volume on a basis advantageous to Water Company and assist in the evaluation of new and existing products and application procedures.

F. **Financial**: Service Company shall assist in the development and implementation of financing programs for Water Company, including the furnishing of advice from time to time on securities market conditions and the form and timing of financing; advise concerning arrangements for the sale of its securities; and assist in the preparation of necessary papers, documents, registration statements, prospectuses, petitions, applications and declarations. It shall prepare reports to be filed with, and reply to inquiries made by, security holders and bond and mortgage trustees.

Service Company shall assist Water Company in cash management including arrangements for bank credit lines, establishment of collection policies, and development of temporary investment programs.

Service Company shall provide assistance to Water Company in the preparation of all financial reports.

G. **Human Resources**: Service Company shall assist in obtaining qualified personnel for Water Company; in establishing appropriate rates of pay for those employees; and in negotiating with bargaining units representing Water Company employees. It shall carry out training programs for the development of personnel and advise and assist Water Company regarding personnel. It shall also advise and assist Water Company in regard to group employee insurance, pension and benefit plans and in the drafting or revising of those plans when required. It will keep Water Company apprised of all employment laws and develop procedures and controls to assure compliance.

H. **Information Systems**: Service Company shall make available to Water Company electronic data processing services. Those services shall include customer billing and accounting, preparation of financial statements and other reports including those required by Federal and State agencies.

I. **Operation**: Service Company shall develop and assist in the implementation of operating procedures to promote the efficient and economic operation of Water Company. Periodic operational reviews will be performed by Service Company personnel and any deviations from adopted procedures will be reported to Water Company.

J. **Rates and Revenue**: Service Company personnel shall make recommendations for changes in rates, rules and regulations and shall assist Water Company in the conduct of proceedings before, and in its compliance with the rulings of, regulatory bodies having jurisdiction over its operation. These personnel

shall keep abreast of economic and regulatory developments and conditions that may affect Water Company; and advise Water Company of any such developments and conditions to the extent that they may be important to Water Company. Rates and Revenue personnel shall assist in the preparation of rate filings or applications and the supporting documents and exhibits requested or required by the Water Company and their respective regulatory commissions. Service Company shall also provide qualified personnel to testify on Water Company's behalf as required during any regulatory proceedings.

K. **Risk Management**: Service Company shall provide a Risk Management Program to review the exposures to accidental loss of the Water Company, recommend efficient methods of protection either through the purchase of insurance, self-insurance or other risk management techniques and arrange for the purchase of insurance coverage. It shall also supervise investigation procedures; review claims; and negotiate and assist in, and evaluate proposals for, settlement at the request of Water Company. It shall assist in the establishment of safety and security programs to avoid or minimize risk and loss.

L. **Water Quality**: Service Company shall assist Water Company to comply with standards of governmental agencies and establish and attain water quality objectives of the Water Company. It shall assist in providing design criteria for processes, coordinating with public agencies, developing approaches and solutions to water quality problems, and providing

technical assistance and general direction for Water Company personnel.

It shall also provide laboratory services for programmed analyses as required by drinking water regulations, and special analyses as required by Water Company.

ARTICLE II. PAYMENT FOR SERVICES

2.1 In consideration for the services to be rendered by Service Company as hereinabove provided, Water Company agrees to pay to Service Company the cost thereof determined as provided in this Article II and in Article III.

2.2 All costs of service rendered by Service Company personnel for Water Company or in common with other Water Companies shall be charged to Water Company based on actual time spent by those personnel as reflected in their daily time sheets or other mutually acceptable means of determination.

2.3 All costs of Service Company incurred in connection with services rendered by Service Company which can be identified and related exclusively to Water Company, shall be charged directly to Water Company.

2.4 All costs incurred in rendering services to Water Company in common with similar services to other Water Companies which cannot be identified and related exclusively to services rendered to a particular Water Company, shall be allocated among all Water Companies so served, or, in the case of costs incurred with respect to services rendered to a particular group of Water

Companies, among the members of such group, based on the number of customers served at the immediately preceding calendar year end.

2.5 Cost for support personnel (secretaries, clerical personnel, clerks, messengers, telephone operators, mail clerks, and other incidental support personnel of the Service Company) as well as the cost of lease payments, depreciation, utilities and other costs associated with leasing office space and equipment by Service Company shall be allocated among the Water Companies on the basis of the proportion of the aggregate cost allocated under Sections 2.3 and 2.4.

ARTICLE III. ALLOWANCE FOR OVERHEAD

3.1 In determining the cost to be assessed by Service Company for the rendering of services to Water Company as herein provided, there shall be added to the salaries of all officers and employees for whose services charges are to be made, a percentage sufficient to cover the general overhead of Service Company, as defined below, properly allocable thereto. Such percentage shall be calculated each month and shall be the ratio of the total general overhead of the Service Company for the month to the total salaries of the employees for whose service charges are to be made to the Water Companies. No general overhead of Service Company shall be added to costs incurred for services of non-affiliated consultants employed by Service Company.

3.2 The term "general overhead" shall include:

(a) pension and insurance premiums paid for the benefit of Service Company employees,

(b) legal and other fees for services rendered to the Service Company,

(c) taxes,

(d) other general office supplies and other similar expenses, and

(e) interest on working capital.

ARTICLE IV. BILLING PROCEDURES AND BOOKS AND RECORDS

4.1 As soon as practicable after the last day of each month, Service Company shall render a bill to Water Company for all amounts due from Water Company for services and expenses for such month plus an amount equal to the estimated cost of such services and expenses for the current month, all computed pursuant to Articles II and III. Such bill shall be in sufficient detail to show separately the charge for each class of service rendered. All amounts so billed shall reflect the credit for payments made on the estimated portion of the prior bill and shall be paid by Water Company within a reasonable time after receipt of the bill therefore.

4.2 Service Company agrees to keep its books and records available at all times for inspection by representatives of Water Company or by regulatory bodies having jurisdiction over Water Company.

4.3 Service Company shall at any time, upon request of Water Company, furnish any and all information required by Water Company with respect to the services rendered by Service Company

hereunder, the costs thereof, and the allocation of such costs among Water Companies.

ARTICLE V. OTHER AGREEMENTS

5.1 It is understood by Water Company that Service Company has entered or may enter into similar agreements with other Water Companies that are affiliated with American to which similar services are to be furnished. Service Company will not enter into agreements to perform similar services for other companies on terms more favorable than those provided herein.

5.2 It is understood by Water Company that Service Company has entered or may enter into an agreement or agreements with American and certain other companies not engaged in the water or sewer service business to which limited services are to be furnished; Water Company consents to such additional agreements, provided, however, that no part of the cost of furnishing such services will be charged to Water Company.

ARTICLE VI. TERM OF AGREEMENT

This agreement shall become effective as of the later of (a) the date first mentioned above or (b) the date the parties receive the last of any necessary approvals of governmental regulatory agencies having jurisdiction in the premises. Upon becoming effective, this agreement shall be the sole agreement between the parties concerning the subject matter hereof and shall supersede all prior agreements, written or oral, including the agreement dated January 1, 1971, which shall terminate on the date this

agreement becomes effective. This agreement shall continue in full force and effect until terminated by either of the parties hereto giving the other party hereto ninety day's notice in writing; provided, however, that this agreement shall terminate as of the date Water Company or Service Company ceases to be an affiliate of American.

IN WITNESS WHEREOF, Service Company and Water Company have caused this agreement to be signed in their respective corporate names by their respective Presidents or Vice Presidents, and impressed with their respective corporate seals attested by their respective Secretaries or Assistant Secretaries, all as of the day and year first above written.

ADDENDUM I
TO AGREEMENT
DATED JANUARY 1, 1989
BETWEEN
AMERICAN WATER WORKS SERVICE COMPANY, INC.
AND
ILLINOIS-AMERICAN WATER COMPANY

WHEREAS, Illinois-American Water Company ("Illinois-American") and Northern Illinois Water Corporation ("Northern Illinois") intend to enter into a Merger Agreement under which Northern Illinois will merge with and into Illinois-American, with Illinois-American being the surviving corporation (the "Merger"), Northern Illinois and American Water Works Service Company, Inc. ("Service Company") hereby agree that, pending the effective date of the Merger, (i) Service Company will provide services to Northern Illinois in accordance with the terms of the Agreement, dated January 1, 1989 ("Service Agreement"), under which Service Company provides services to Illinois-American, and (ii) Northern Illinois will pay Service Company for such service in accordance with the terms which govern Illinois-American's payments to Service Company under the Service Agreement. This Addendum I is subject to approval by the Illinois Commerce Commission (the "Commission"). This Addendum I shall become effective on the date that it is approved by the Commission and shall terminate on the date the Merger becomes effective.

Tier 1 Allocators – American Water Works Service Company

FORMULAS SELECTED FOR ALLOCATING TIER ONE CHARGES

Where possible, Service Company employees charge the cost of a service to a specific affiliate directly ("Direct Charge"). Where Service Company employees provide common services that benefit a group of both regulated and non-regulated Business Units, the Tier 1 Allocator formulas will be used to allocate the cost of providing the common services (i.e., the Tier One allocation). Tier One metrics are designed to ensure a fair and appropriate allocation of costs between regulated and unregulated Business Units within the American Water System who are receiving services from the Service Company.

Listed below are the Tier 1 Allocators:

3-Factor Formula – Uses the following metrics: (1) operating revenues, (2) net property, plant and equipment and (3) employees, which are common to the operation of regulated and non-regulated Business Units. The metrics are equally weighted within the formula. Also, these metrics will only include those non-regulated Business Units that are receiving service.

2-Factor Formula – Uses the following metrics: (1) operating revenues and (2) employees. The metrics are equally weighted within the formula. Also, these metrics will only include those non-regulated Business Units that are receiving services.

Revenue Factor – Uses the following metric: operating revenues as a surrogate for customers because certain of the non-regulated affiliates do not have their own customers. Also, this metric will only include those non-regulated Business Units that are receiving services.

Total Premises Factor – Includes the metric: number of premises maintained on the AS 400 database. This metric will only include those non-regulated Business Units that are receiving service.

Employee Factor – Includes the metric: number of employees. This metric will only include those non-regulated Business Units that are receiving service.

Budgeted Capital Projects and Engineering Project Management Factor - Includes the metric: dollar value of budgeted capital expenditures for the year. This metric will only include those non-regulated Business Units that are receiving service.

Accounts Payable Factor – Includes the metric: number of invoices, purchase orders and P-Card transactions processed on an annual basis. This metric will only include those non-regulated Business Units that are receiving service.

Employee and Retiree Factor - Includes the metric: Sum of the number of employees and the number of retirees. This metric will only include those non-regulated Business Units that are receiving service.

Purchasing Factor – Includes the metric: number of purchase orders created on an annual basis. This metric will only include those non-regulated Business Units that are receiving service.

III. STUDY CONCLUSIONS 6

DIRECT TESTIMONY OF BERNARD L. UFFELMAN **IAWC EXHIBIT 10.00**

I. WITNESS INTRODUCTION

Q1. Please state your name and business address.

A. My name is Bernard L. Uffelman. My business address is 32 Autumn Oaks Drive, Austin, Texas 78738.

Q2. By whom and in what capacity are you employed?

A. I am President of Uffelman Advisory Services, LLC, a firm that specializes in energy and utility regulatory and litigation support services.

Q3. Please summarize your educational background and professional affiliations.

A. I received a Bachelor of Science degree in accounting from Southern Illinois University and a Master of Business Administration degree in finance from Illinois State University. I am a certified public accountant ("CPA") and a member of the American Institute of Certified Public Accountants and the Texas Society of Certified Public Accountants. I am a licensed CPA in Illinois and Texas.

Q4. Please summarize your professional work experience.

A. I have been associated with the regulated utilities industry for over 38 years. My experience includes that as an employee of major investor-owned electric and gas utilities, Chief Accountant of the Illinois Commerce Commission ("Commission"), Director of Accounting for the Public Utility Commission of Texas, and consultant to public utility commissions, interveners and utilities. As a staff member of the Illinois and Texas Commissions, I have advised commissioners on accounting, financial and

tax policy and have recommended ratemaking treatment for complex regulatory issues. Prior to my retirement from Deloitte & Touche LLP ("Deloitte & Touche") in August 2008, I was a Partner at the firm and the U.S. Regulatory Services Leader for Deloitte & Touche's Energy & Resources Practice, where my primary responsibilities included regulatory accounting, revenue requirements development, regulatory and litigation support, cost allocation, affiliate transactions and codes of conduct, financial and business planning, and strategic services.

I served as a contributing author to Accounting for Public Utilities (LexisNexis) and have co-authored other industry publications. I have moderated and participated in panel discussions on various industry topics, and have presented papers on various utility issues in numerous forums. I am a past member of the National Association of Regulatory Utility Commissioners' ("NARUC") Staff Subcommittee on Accounts. I served as Chairman of the Natural Gas, Telecommunications and Electric Industries Committee of the Texas Society of Certified Public Accountants. I served on the Public Utilities Advisory Committee for the University of Texas Regulatory Institute, Graduate School of Business and as an instructor for the Institute. I also served on the Advisory Council for the Center for Public Utilities at New Mexico State University. I have conducted utility regulatory and ratemaking training sessions for the staffs of several state public utility commissions, and presented white papers on utility issues before several regulatory bodies including the NARUC.

Q5. Have you previously testified as an expert witness before regulatory bodies?

A. Yes. I have presented testimony regarding utility matters before the Illinois, Alaska, Arizona, California, Georgia, Indiana, Iowa, Kansas, Kentucky, Louisiana, Nevada, New Jersey, New Mexico, New York, Oklahoma, Oregon and Texas public utility commissions. I have testified before the Illinois Legislature; the Texas Railroad Commission; the Supreme Court of the State of New York; the Superior Court of the State of California; the Circuit Courts for Baltimore, Maryland and Cook County, Illinois; the US District Court for Colorado; the King County, Seattle, Washington franchise authority; the City Council of Garland, Texas; and the Board of Water and Power Commissioners, the Commerce, Energy and Natural Resources Committee, and the City Council of the City of Los Angeles, California. A listing of the regulatory jurisdictions and proceedings in which I have testified and the issues addressed are shown in attached Appendix A, which includes a complete copy of my resume.

II. PURPOSE OF TESTIMONY

Q6. What is the purpose of your testimony?

A. The purpose of my Direct Testimony is to discuss the Service Company Cost Study ("Study") performed by Deloitte & Touche, which is marked as IAWC Exhibit 11.01. I am jointly sponsoring the Study with Mr. Mark Young of Deloitte & Touche. I also provide a brief summary of the conclusions reached in the Study.

Q7. What was your role in the preparation of the Study?

A. I was engaged by Deloitte & Touche to work directly with Mr. Young in preparing the Study.

Q.8 Please discuss the Study.

A. The Study was prepared in response to the Illinois Commerce Commission's ("Commission") Order of July 30, 2008 in Docket 07-0507 that Illinois-American Water Company ("IAWC"):

> "...conduct a study comparing the cost of each service obtained from the Service Company to the costs of such services had they been obtained through competitive bidding on the open market. As part of the study, IAWC must also provide an analysis of the services provided by the Service Company to all of IAWC's affiliates. The analysis must provide details on the specific services provided to IAWC and how costs are allocated among affiliates of IAWC. IAWC shall include the study in its next rate filing."[1]

As the testimony of IAWC's President, Ms. Teasley, explains, in response to this requirement, IAWC has presented the testimony of five witnesses, including the testimony of Mr. Mark Young and myself, who sponsor the Study.

As Ms. Teasley explains, in procuring services, IAWC's practice is to provide support for utility operations based on considerations of cost-effectiveness, timeliness, reliability and adequacy. For certain services, IAWC is able to maintain adequate service quality and achieve efficiencies through the use of qualified third-party providers (i.e., American Water Works Service Company, Inc. ("AWWSC") or a non-affiliate provider). As

[1] Illinois Commerce Commission Docket 07-0507, Section IV. B. 6. d

Ms. Teasley indicates, for certain services that can be outsourced, IAWC has determined that use of a non-affiliate provider is not feasible. For the reasons Ms. Teasley explains, the services in this category include corporate governance, the customer service center, and the employee benefits call center. Ms. Teasley sponsors a study that compares the cost incurred by IAWC in obtaining these, and other services, from AWWSC to the market cost that IAWC would incur if it were to itself retain the personnel needed to provide these services on a stand-alone basis ("Self Provision Study"). Thus the Self Provision Study provides the applicable market comparison for services that cannot be outsourced to non-affiliates. The required market comparison for services that IAWC can effectively outsource to either an affiliate or non-affiliate provider is the subject of the Study.

As discussed above, the Self Provision Study provides the applicable market comparison for IAWC's customer service center-related cost (comparing the cost incurred by IAWC to obtain this service from AWWSC to the cost for self-provisioning, i.e., the cost to IAWC of retaining the needed personnel in the market to provide this service on a stand-alone basis). In addition to the market comparison for services that IAWC can outsource to either an affiliate or non-affiliate providers, the Study provides an additional analysis of customer service center costs that supports the Self Provision Study sponsored by Ms. Teasley. The additional analysis performed by Deloitte & Touche provides a comparison

of IAWC's customer service cost to the customer service costs reported by other utilities in narrowly defined customer accounts for providing comparable services. Although not a market cost comparison for this type of service, the additional analysis demonstrates that IAWC's customer service cost to obtain this service through AWWSC is below the average level of cost incurred by other utilities for this function.

III. STUDY CONCLUSIONS

Q9. Please summarize the Study conclusions.

A. The provision of services to IAWC through the Service Company results in significant cost benefits to IAWC. Based on the Market Analysis described in the Study, the cost savings expected to be realized by IAWC during the future test year ending December 31, 2010 from obtaining certain professional and managerial services through the Service Company, when compared to the costs of acquiring such services in the open market from third-party service providers, amount to $ 7.692 million. The net savings expected to be realized by IAWC results from the Service Company's ability to provide services at a cost which is lower than the projected market cost of such services.

Q10. Does this conclude your Direct Testimony?

A. Yes, it does.

Appendix A

Bernard L. Uffelman

President
Uffelman Advisory Services, LLC
Austin, Texas
(512) 608-9005
bluffelman@austin.rr.com

Professional Experience

Mr. Uffelman is President of Uffelman Advisory Services, LLC, a firm that specializes in energy and utility regulatory and litigation support services. Prior to his retirement from Deloitte & Touche LLP, Mr. Uffelman was a Partner and the U.S. Regulatory Services Leader for Deloitte & Touche's Energy & Resources Practice. Mr. Uffelman has been associated with the regulated utilities industry for over 38 years, including experience as an employee of major investor-owned utilities. Mr. Uffelman also served as Chief Accountant of the Illinois Commerce Commission and Director of Accounting for the Public Utility Commission of Texas. His primary responsibilities have included regulatory accounting, revenue requirements development, regulatory and litigation support, financial and business planning, and strategic services. Mr. Uffelman has testified on utility industry issues before public utility commissions and courts in 20 states and in over 60 different proceedings.

Major Projects

- Managed the accounting divisions of two state public utility regulatory commissions. Directed the staff's review of rate filing packages of electric, gas, telephone, and water utilities. Managed the preparation of staff's case in such areas as accounting, tax, rate of return, depreciation, fuel, cost allocation, rate design, forecasted test periods, and financial integrity. Presented testimony as a commission witness in rate cases and other dockets. Recommended accounting, financial and tax policy to commissioners and prescribed ratemaking treatment for complex regulatory issues.

- Participated as a member of a multi-disciplinary team of consultants and attorneys in developing the regulatory strategy and approach for the combination of two large multi-state electric utilities. Addressed the affiliate transaction and cost allocation issues associated with the merger of two electric registered public utility holding companies. Testified to the regulatory treatment for the gain resulting from the sale of a utility's jurisdictional operations. Testified to the proper accounting and ratemaking treatment for production maintenance costs of a large public power association. Developed the price-cap ratemaking methodology for privatization of a government owned island electric utility. Reviewed internal controls related to an

electric utility's fuel procurement, trading operations and fuel adjustment clause filings.

- Testified to a gas company's rate case revenue requirement levels and proposed ratemaking for adoption of Statement of Financial Accounting Standards No. 106 - "Employers' Accounting for Postretirement Benefits Other Than Pensions." Testified to the reasonableness of a gas company's and a water utility's postretirement benefits. Presented a seminar on SFAS 106 to the parties to Hawaii Public Utilities Commission Docket No. 7243.

- Managed the review of a State Uniform System of Accounts (USOA) and recommended changes to comply with the FERC USOA. Worked with utilities to modify their accounting systems to track specific costs as required by public utility commissions. Represented the NARUC accounting committee in developing a USOA for the cellular telecommunications industry. Assisted utilities with regulatory filings with the FERC.

- Testified to deferred accounting treatment (DAT) for plant costs until such time as the generating unit was recognized as plant in service for cost of service and ratemaking purposes. Reviewed the DAT used by a large municipal power agency and the effects of the accounting deferrals on the agency's future rates. Participated in the analysis and implementation of a phase-in plan to rate base a major electric generating station. Chaired the revenue requirements committee of a major electric utility's rate moderation task force responsible for moderating the rate effect of rate basing the utility's three nuclear generating units. Participated as a commission staff member in the prudency reviews of nuclear generating stations. Analyzed and testified to the financial impact on shareholders and rate payers of deregulating a utility's nuclear generating facilities.

- Assisted Cable TV operators to respond with reply comments to the FCC's Notice of Proposed Rule making regarding re-regulation of cable service and cost-of-service standards resulting from the Cable Television Act of 1992. Assisted operators with calculating permitted rates for regulated cable programming services and equipment charges. Testified in Cable TV franchise renewal and late fee proceedings.

- Conducted a national survey and analysis of state commission cost allocation issues and transfer pricing policies. Analyzed the appropriate capital structure to support the utility related operations of a major electric utility's fuel subsidiary. Analyzed and testified to an electric utility's financial reorganization plan and the prudence of its coal contracts. Performed affiliate transaction and cost allocation reviews for major electric, gas, and water utilities. Testified to affiliate transactions, cost allocations, transfer pricing, and accounting control systems for several major electric and gas utilities. Testified to the reasonable and prudently incurred costs of a major gas distribution company's customer information system.

- Responded to a public utility commission's request for information regarding the effects of the Tax Reform Act of 1986 on a major electric utility. Conducted a nationwide survey of U.S. public utility regulators to determine the predominant practice of each of the nation's public utility regulatory commissions regarding the use of certain non-traditional approaches to the calculation of federal income taxes for ratemaking purposes. Testified to the continued use and application of the traditional "stand-alone" method (as opposed to a consolidated effective tax rate method) for computing the income tax component of cost of service. Responded to a public utility commission's request for comments regarding the commission's rules on depreciation methods.

- Directed the review of the outside customer accounts collection function for a large multi-state gas distribution company including the review of the use of third party collection agencies. Directed the regulatory and ratemaking assessment related to the acquisition of water and wastewater properties by a major real estate developer. Testified on behalf of a major real estate developer in support of the developer's request to finance water and wastewater utility plant additions. Reviewed a major gas and electric utility's legal services function and made recommendations as to the appropriate use of in-house and outside counsel to achieve cost reductions. Analyzed the financial and regulatory effects of an innovative marketing/financing arrangement for a major electric utility. Performed an analysis and comparison of a major utility's present and projected electric rates to those of other utilities.

- Provided litigation support in electric, gas, and water contract rate disputes. Provided litigation support in an electric utility property tax dispute and a mining company lignite contract dispute. Prepared rate filing packages for major electric and gas distribution companies. These filings included revenue requirements, cost of service studies, testimony, exhibits and financial statements. Conducted a management audit of a large southwestern electric utility. Testified to the reliability of a company's GRC filings for ratemaking purposes. Prepared and testified to lead-lag studies for major electric and gas utilities.

- Assisted a Regional Bell Operating Company (RBOC) in responding to a state commission mandated regulatory audit. Regulatory assistance included direct and reply testimony responding to various issues raised by the audit. Managed the review of internal controls to prevent customer "slamming" for a large long-distance reseller and assisted the Company in obtaining an operating license to provide local service.

- Directed the accounting, budgeting, and financial functions associated with project accounting as a member of the project construction team of a major electric utility. Directed the cash accounting and cash management functions of a major utility, including investments, borrowings, and commercial bank relations. Supervised internal audits of a major electric and gas utility, prepared audit reports and conducted management audit conferences.

Mr. Uffelman has provided client services to a number of regulated and non-regulated entities including:

Testimony

- Testified before the Alaska, Arizona, California, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Nevada, New Jersey, New Mexico, New York, Oklahoma, Oregon and Texas public utility commissions. Testified before the Illinois Legislature; the Texas Railroad Commission; the Supreme Court of the State of New York; the Superior Court of the State of California; the Circuit Courts for Baltimore, Maryland and Cook County, Illinois; the US District Court for Colorado; the King County, Seattle, Washington franchise authority; the City Council of Garland, Texas; and the Board of Water and Power Commissioners, the Commerce, Energy and

Natural Resources Committee, and the City Council of the City of Los Angeles, California.

Certifications and Memberships

- Certified Public Accountant and member of the American Institute of Certified Public Accountants and the Texas Society of Certified Public Accountants
- Licensed Certified Public Accountant in Illinois and Texas
- Completed the National Association of Regulatory Utility Commissioners (NARUC) Annual Regulatory Studies Program
- Served as a member of the NARUC Staff Subcommittee on Accounts
- Served as Chairman of the Texas Society of Certified Public Accountants Natural Gas, Telecommunications, and Electric Industries Committee
- Served on the University of Texas Regulatory Institute Advisory Committee and as an instructor for the University of Texas Regulatory Institute
- Served on the Advisory Council for the Center for Public Utilities at New Mexico State University
- Moderated and participated in panel discussions on numerous industry topics

Education

- Illinois State University (MBA - Finance)
- Southern Illinois University (BS - Accounting)

Presentations

- *Regulated Utility Training*, Vectren Corporation, Evansville, Indiana, November 29, 2007
- *Ratemaking and Rate Proceeding Seminar*, WBI Holdings, Inc./MDU Resources Group, Inc., Bismarck, North Dakota, November 13-14, 2007
- *Ratemaking and Rate Proceeding Training,* Deloitte Training Seminar, Dallas, Texas, March 27-29, 2007
- *Rate Case Training*, Public Utility Commission of Texas, Austin, Texas, February 14, 2006
- *Rate Case Training*, Kansas City Power & Light, Kansas City, Missouri, August 29-31, 2005

- *Rate Case Challenges*, Southeastern Electric Exchange, Baltimore, Maryland, June 30, 2005

- *FERC Update*, Southeast Public Utility Accounting Workshop, Tampa, Florida, March 29-30, 2004

Publications

- *Cost Allocation and Affiliate Transactions: A Survey and Analysis of State Cost Allocation Issues and Transfer Pricing Policies*, June 1999. Mr. Uffelman co-authored this Deloitte & Touche report on behalf of the Edison Electric Institute.

- *Federal, State and Local Tax Implications of Electric Utility Industry Restructuring*, October 1996. Mr. Uffelman co-authored Deloitte & Touche's analysis for The National Council on Competition and the Electric Industry.

- *Survey of Federal Income Taxes in Regulation*, March 1994. Mr. Uffelman co-authored this report on how public utility regulatory commissions determine federal income tax expense for ratemaking purposes.

- *Accounting for Public Utilities* published by Matthew Bender and updated annually. Mr. Uffelman served as a contributing author on this work which provides a basic, but comprehensive, analysis of accounting for public utilities.

Testimony

Alaska
Alaska Public Utilities Commission

- APUC Docket No. U-93-1, Rate Case; direct testimony on behalf of Chugach Electric Association, Inc., January 1993; Rebuttal testimony on behalf of Chugach Electric Association, Inc., February 1993; testified to the proper accounting and ratemaking treatment for production maintenance costs.

Regulatory Commission of Alaska

- RCA Docket No. U-02-47, Revenue Requirements Study; prefiled testimony on behalf of Waste Management of Alaska, Inc., March 2003; testified to the functioning of WMA's revenue requirements models and the input of test year data, both financial and statistical, into the models for each of WMA's regulated service areas; prefiled reply testimony on behalf of Waste Management of Alaska, Inc., May 2004 .

Arizona - Arizona Corporation Commission

- ACC Docket No. E-1032-93-111, Rate Case; rebuttal testimony on behalf of Citizens Utilities Company's Arizona Gas Division, January 1994, regarding the effects of adoption of SFAS No. 106 - "Employers' Accounting for Postretirement Benefits Other Than Pensions".

- ACC Docket No. E-1032-92-073, Application for approval of the accounting method used to record AFUDC. Direct testimony on behalf of Citizens Utilities Company, May 1994.

- ACC Docket No. U-1551-93-272, Rate Case; rebuttal testimony, May 1994 on behalf of Southwest Gas Corporation regarding the prudence of costs associated with the development of the Company's customer information system.

- ACC Docket No. U-2199-94-439, Application for approval of financing and accounting orders. Direct testimony on behalf of Pima Utility Company (Robson Communities), December 1994; rebuttal testimony on behalf of Pima Utility Company (Robson Communities), May 1995.

- ACC Docket No. U-2492-94-448, Application for approval of financing and accounting orders. Direct testimony on behalf of SaddleBrooke Development Company (Robson Communities), December 1994. Rebuttal testimony on behalf of SaddleBrooke Development Company (Robson Communities), May 1995.

- ACC Docket No. U-2849, Application of SaddleBrooke Utility Company for a rate increase. Direct testimony (cost of capital) on behalf of SaddleBrooke Utility Company, (Robson Communities), November 1995.

- ACC Docket No. E-1032-95-433, Application of Citizens Utilities Company, Arizona Electric Division, for a hearing to determine the fair value of its properties for ratemaking purposes. Rebuttal testimony on behalf of Citizens Utilities Company, July 1996. Rejoinder testimony on behalf of Citizens Utilities Company, August 1996. (Accounting method used to record AFUDC)

- ACC Docket No. E-1032-95-473, Application of Citizens Utilities Company, Northern Arizona Gas Division, for a hearing to determine the fair value of its properties for ratemaking purposes. Rebuttal testimony on behalf of Citizens Utilities Company, August 1996. Rejoinder testimony on behalf of Citizens Utilities Company, September 1996. (Accounting method used to record AFUDC)

- ACC Docket No. E-1032-95-417, Application of Citizens Utilities Company, Maricopa Water/Wastewater Division, for a hearing to determine the fair value of its properties for ratemaking purposes. Rebuttal testimony on behalf of Citizens Utilities Company, September 1996. Rejoinder testimony on behalf of Citizens Utilities Company, October 1996. (Accounting method used to record AFUDC)

- ACC Docket No. U-1944-92-261, Application of Lago Del Oro Water Company (Robson Communities) for financing authorization. Rebuttal testimony on behalf of Robson Communities, December 1996. (Capital structure and use of Advances and Contributions in Aid of Construction)

- ACC Docket No. U-2849-97-383, Application of SaddleBrooke Utility Company (Robson Communities) for a rate increase; direct testimony (cost of capital) on behalf of SaddleBrooke Utility Company, June 1997.

- ACC Docket No. G-01551A-00-0309, Earnings Determination; supplemental testimony, May 2001, on behalf of Southwest Gas Corporation regarding the appropriateness of the inclusion of certain items in the rate case test year.

California

California Public Utilities Commission

- Order Instituting Rulemaking/Investigation on the Commission's Own Motion to Assess and Revise the New Regulatory Framework for Pacific Bell and Verizon California Inc. (R. 01-09-001/I. 01-09-002)

- Direct testimony on behalf of SBC Pacific Bell in Phase 2A, May 2002, in response to Overland Consulting's regulatory audit of Pacific Bell relating to various issues including depreciation reserve deficiency amortization and postretirement benefits other than pensions; reply testimony on behalf of SBC Pacific Bell in Phase 2A, May 2002.

- Direct testimony on behalf of SBC Pacific Bell in Phase 2B, June 2002, relating to local competition costs, software buy-out agreement, local number portability costs, and contingent liabilities; reply testimony on behalf of SBC Pacific Bell in Phase 2B, July 2002.

- California-American Water Company Compliance Filing Regarding Review By Deloitte & Touche LLP In CPUC Case Nos. A.05-02-012 And A.05-02-013; direct testimony on behalf of California-American Water Company regarding the reliability of the Company's General Rate Case filings for ratemaking purposes, April 2005; rebuttal testimony on behalf of California-American Water Company, July 2005.

City of Los Angeles

- Direct testimony on behalf of the Los Angeles Department of Water and Power regarding Water System Rate Proposal (Proposed Amendments to Water Rates Ordinance No. 170435) to the Board of Water and Power Commissioners; the Commerce, Energy and Natural Resources Committee of the City Council; and the City Council, April 2004.

Superior Court of the State of California

- Testimony on behalf of the Los Angeles Department of Water and Power in the Superior Court of the State of California in and for the County of San Bernardino. Civil Action No. SCVSS 100293, State of California, ex rel. Barakat Consulting Incorporated, et al., Plaintiffs, vs. Los Angeles Department of Water and Power, et al., Defendants, December 2006.

Colorado - US District Court for Colorado

- Civil Action No. 01-BB-1546(PAC) Western Retail Energy Company, Plaintiff, v. TXU Energy Services Company, Defendant; expert report and testimony on behalf of TXU Energy Services regarding natural gas pricing, June 2002.

Georgia - Georgia Public Service Commission

- Docket No. 14311-U, Atlanta Gas Light Company, Rate Case; direct testimony on behalf of AGL regarding AGL's cash working capital requirement and lead-lag study, January 2002.

Hawaii - Hawaii Public Utilities Commission

- Parties to HPUC Docket No. 7243; seminar on SFAS No. 106 - "Employers' Accounting for Postretirement Benefits Other Than Pensions," May 1992.

Illinois

Illinois Commerce Commission

- Docket Nos. 87-0043, 87-0044, 87-0057, 87-0096, consolidated ; Commonwealth Edison Company, Rate Case; direct testimony regarding spin-off of nuclear generation assets, April 1987, on behalf of:
    - The People of the State of Illinois, by Neil F. Hartigan, Attorney General

- The Governor of the State of Illinois, James R. Thompson, by the Governor's Office of Consumer Services
- The People of Cook County, by Richard M. Daley, Cook County State's Attorney
- William G. Shephard, Small Business Utility Advocate

- Approximately twelve cases as ICC Staff witness. (Mr. Uffelman testified in approximately twelve cases as a Staff witness of the Illinois Commerce Commission. Mr. Uffelman does not have copies of his testimony which he filed on behalf of the ICC Staff, but copies can be obtained from the ICC.)

- Docket No. 07-0507, Illinois-American Water Company ("IAWC") Rate Case. Direct testimony regarding *Analysis of Water Rates, Fees and Charges For Selected Cities In The Vicinity Of The Chicago Metro District Of Illinois-American Water Company* on behalf of IAWC, August, 2007.
  Rebuttal testimony on behalf of IAWC, February, 2008. Surrebuttal testimony on behalf of IAWC, March, 2008.

Joint Committee on Public Utility Regulation of the Illinois Legislature

- Direct testimony regarding "Management Audits of Public Utilities" on behalf of the Illinois Commerce Commission, February 1985.

Circuit Court of Cook County, Illinois

- Case No. 95CH11993; BOE AND DEBRA CHMIL, Plaintiff, v. TELE-COMMUNICATIONS, INC., ET AL., Defendant; direct testimony on behalf of Defendant, August 1998.

Indiana - Indiana Utility Regulatory Commission

- IURC Cause No. 39713, Rate Case; direct testimony on behalf of Indianapolis Water Company, June 1993, regarding the effects of adoption of SFAS No. 106 - "Employers' Accounting for Postretirement Benefits Other Than Pensions".

Iowa - Iowa Utilities Board

- IUB Docket Nos. RPU-01-3 and RPU-01-___ ; direct testimony on behalf of MidAmerican Energy Company, June 2001; issues related to the prior flow-through of Iowa state income taxes.

Kansas - Kansas State Corporation Commission

- KSCC Docket No. 175,456-U; rebuttal testimony on behalf of Centel Corporation (CENTEL), August 1991; sale and transfer of the Electrical Utility Operations and Business of CENTEL to UtiliCorp United, Inc. (UTILICORP).

- KSCC Docket No. 03-KGSG-602-RTS; rebuttal testimony on behalf of Kansas Gas Service, a Division of ONEOK, Inc. August 2003, regarding the allocation of ONEOK's A&G and corporate overhead costs to KGS.

- KSCC Docket No. 06-KGSG-1209-RTS; rebuttal testimony on behalf of Kansas Gas Service, a Division of ONEOK, Inc. October 2006, regarding the allocation of ONEOK's A&G and corporate overhead costs to KGS.

Kentucky - Kentucky Public Service Commission

- KPSC Case 9613 Rebuttal, November 1986; rebuttal testimony on behalf of Big Rivers Electric Corporation regarding financial reorganization plan and prudence of coal contracts.

- KPSC Case No. 2006-00464, In The Matter Of Atmos Energy Corporation For An Adjustment Of Gas Rates; direct testimony regarding Gas Cost of Service Study prepared on behalf of Atmos Energy Corporation Kentucky Division, December 2006.

Louisiana - Louisiana Public Service Commission

- LPSC Docket No. U-24064; Red Simpson, Inc. et al. v. Cleco Corporation; in re: Alleged acts of prohibited subsidization of non-regulated affiliates, violation of General Orders and unfair competition through predatory pricing; direct testimony on behalf of Cleco Corporation, June 2000; rebuttal testimony on behalf of Cleco Corporation, September 2000.

Maryland - Circuit Court For Baltimore, Maryland

- Case No. 95311038/CL204287; LOUIS BURCH, ET AL., Plaintiff, v. UNITED CABLE TELEVISION OF BALTIMORE LIMITED PARTNERSHIP, Defendant; direct testimony on behalf of Defendant, June 1997.

Nevada
Public Service Commission of Nevada

- PSCN Docket Nos. 93-3003, et al. Rate Case Rehearing Issues; Direct testimony, April 1994 on behalf of Southwest Gas Corporation and rebuttal testimony, July 1994 on behalf of Southwest Gas Corporation relating to the prudence of costs associated with the development of the Company's customer information system.

Nevada Public Utilities Commission

- NPUC Docket No. 04-3011, Rate Case; direct testimony, March 2004 on behalf of Southwest Gas Corporation relating to cash working capital; rebuttal testimony, June 2004 on behalf of Southwest Gas Corporation relating to cash working capital.

New Jersey - New Jersey Board of Public Utilities

- NJBPU Docket No. GR 02040245, Rate Case; direct testimony, April 2002 on behalf of NUI Utilities Inc. d/b/a Elizabethtown Gas Company, regarding cash working capital requirement and lead-lag study; supplemental testimony, July 2002 on behalf of NUI Utilities Inc. d/b/a Elizabethtown Gas Company, regarding cash working capital requirement and lead-lag study; rebuttal testimony, September 2002 on behalf of NUI Utilities Inc. d/b/a Elizabethtown Gas Company, regarding cash working capital requirement and lead-lag study.

New Mexico - New Mexico Public Service Commission

- Docket No. 2162, Rate Case, El Paso Electric Company; direct testimony, November 1987 on behalf of EPE; testified to EPE's cost allocation study as to compliance with the NMPSC's Order of January 16, 1987, approving the stipulation in Case No. 2074 relating to the Company's general diversification plan.

New York
New York Public Service Commission

- NYPSC Case No. 91-G-1199 Rate Case; on behalf of Corning Natural Gas Corporation, November 1991; direct testimony regarding the effects of adoption of SFAS No. 106 - "Employers' Accounting for Postretirement Benefits Other Than Pensions".

Supreme Court of The State of New York

- Village of Bergen et al, Petitioners, v. Power Authority of the State of New York, Respondent Index No. 081556; testimony on behalf of the New York Power Authority (NYPA) January 1999, regarding the allocation of overhead costs as one of the components of the rate charged by NYPA.

Oklahoma - Oklahoma Corporation Commission

- Cause No. PUD 200400610, Application of Oklahoma Natural Gas Company, a Division of ONEOK, Inc., for a Review and Change or Modification in its Rates, Charges, Tariffs, and Terms and Conditions of Service. Rebuttal testimony, June 2005, on behalf of Oklahoma Natural Gas related to the continued use of the Distrigas Method by ONEOK for allocating corporate administrative and general expenses to the various ONEOK business units.

- Cause No. PUD 200500151, application of Oklahoma Gas and Electric Company ("OG&E") for an Order of the Commission authorizing Applicant to Modify its Rates, Charges, and Tariffs for retail Electric Service in Oklahoma. Rebuttal testimony, September 2005, on behalf of OG&E related to the continued use of the Distrigas Method by OGE Energy Corp. ("OGE") for allocating corporate administrative and general expenses to the various OGE business units.

Oregon - Public Utility Commission of Oregon

- PUCO Case UE 170, Pacific Power & Light, Request for a General Rate Increase. Rebuttal testimony, June 2005, on behalf of PacifiCorp related to the continued use and application of the traditional "stand-alone" method (as opposed to a consolidated effective tax rate method) for computing the income tax expense component of cost of service.

Texas
Texas Public Utility Commission

- PUCT Docket No. 6350, El Paso Electric Company Rate Case. Direct testimony on behalf of the PUCT Staff, October 1985 on various issues including deferred accounting treatment, nuclear plant phase-in plan, nuclear decommissioning costs and cash working capital.

- PUCT Docket No. 7460, El Paso Electric Company Rate Case. Rebuttal testimony on behalf of EPE, August 1987 supporting the Company's deferred tax study and position.

- PUCT Docket No. 9165, El Paso Electric Company Rate Case. Direct testimony on behalf of EPE, November 1989 regarding the accuracy and reliability of the Company's rate case data and information.

- PUCT Docket No. 9945, El Paso Electric Company Rate Case. Direct testimony on behalf of EPE, July 1991 regarding reasonableness and necessity of rate case fees and expenses.

- PUCT Docket No. 10060, Brazos River Authority Rate Case. Direct testimony on behalf of BRA, February 1991 relating to BRA's accounting and indirect cost allocation system, and revenue requirement determination.

- PUCT Docket No. 10200, Texas-New Mexico Power Company Rate Case. Prudence rebuttal testimony on behalf of TNP, December 1991 relating to plant in service balance for ratemaking purposes. Revenue requirements rebuttal testimony on behalf of TNP, January 1992 regarding plant in service balance, capital structure and deferred accounting treatment.

- PUCT Docket No. 16705, Entergy Gulf States, Inc.'s Transition to Competition Plan. Direct testimony on behalf of EGSI, November 1996 regarding affiliate transactions and depreciation expense accounting. Supplemental direct testimony on behalf of EGSI, April 1997, regarding affiliate transactions and regulatory accounting issues associated with EGSI's transition to competition plan. Rebuttal testimony on behalf of EGSI, October 1997, associated with EGSI's transition to competition plan.

Railroad Commission of Texas

- RCT Docket No. GUD8664, Lone Star Pipeline Company and Lone Star Gas Company - Transmission Rate Case. Rebuttal testimony on behalf of Lone Star Gas Company on the issues of cash working capital and postretirement benefits other than pensions, January 1997.

City of Garland, Texas

- Testimony before the Garland City Council, April 1995, regarding the review of selected financial and rate-making practices of the Texas Municipal Power Agency (TMPA).

Washington - King County, Seattle, Washington

- Renewal of King County Cable Television Franchises of TCI Cablevision of Washington, Inc. Rebuttal testimony on behalf of TCI Cablevision of Washington, Inc., October 1995 regarding reasonableness of TCI's compensation for franchise.

Employment History of Bernard L. Uffelman

Uffelman Advisory Services, LLC – Austin, Texas
- President — October 2008 to present

Deloitte & Touche LLP – Austin, Texas
- US. Regulatory Services Leader, Energy & Resources — June 1997 to September 2008
- Partner, Public Utility Services — July 1994 to June 1997

KPMG Peat Marwick – Austin, Texas
- Partner in Charge – National Utility Consulting — October 1993 to July 1994
- Partner, National Utility Consulting — July 1993 to October 1993
- Director, National Utility Consulting — October 1990 to July 1993

FINANCO, Inc. – Austin, Texas
- Principal & Shareholder — November 1988 to October 1990

Peat Marwick Main & Co. – Austin, Texas
- Senior Manager – National Utilities Industry Practice — May 1986 to November 1988

Texas Public Utility Commission – Austin, Texas
- Director of Accounting — April 1985 to May 1986

Illinois Commerce Commission – Springfield, Illinois
- Chief Accountant — September 1982 to April 1985

Houston Lighting and Power Company
- Project Controller — 1982

Illinois Commerce Commission – Springfield, Illinois
- Accountant — 1980 to 1982

Central Louisiana Electric Company – Lafayette, Louisiana
- Manager of Regulatory Accounting — 1979 to 1980

Illinois Power Company – Decatur, Illinois
- Rate Administrator — 1977 to 1979
- Cash Accountant — 1972 to 1977
- Internal Auditor — 1969 to 1972

III. SERVICE COMPANY COST STUDY 26

DIRECT TESTIMONY OF JOHN S. YOUNG **IAWC EXHIBIT 12.00**

I. WITNESS IDENTIFICATION AND BACKGROUND

Q1. Please state your name and business address.

A. My name is John S. Young. My business address is American Water Works Service Company, Inc., 1025 Laurel Oak Road, Voorhees, NJ 08043.

Q2. By whom are you employed and in what capacity?

A. I am employed by American Water Works Service Company, Inc. (the "Service Company") as President. The Service Company is a subsidiary of American Water Works Company, Inc. ("American Water") and an affiliate of Illinois-American Water Company ("IAWC").

Q3. Please summarize your education and employment history.

A. I have a Civil Engineering Bachelor's Degree from Duke University, and a Master's Degree in Environmental Engineering from the University of North Carolina (Chapel Hill). I have been employed by the Service Company for over 30 years. I began my employment as Director of Water Quality-Eastern Division, and thereafter held positions of increasing responsibility, including the position of Director, Engineering Design. From 1991 to 2003, I served as Vice President of Engineering. I became Chief Operating Officer of American Water (Operating Companies and the Service Company) in October, 2005, and have been President of the Service Company since 2005. My resume is attached to this testimony as Appendix A.

Q4. Please summarize your responsibilities as President of the Service Company.

A. In this position, I am responsible for managing several functions within the Service Company, providing appropriate governance and managing the financial performance of the Service Company.

Q5. Mr. Young, what is the purpose of your testimony?

A. As IAWC witness Karla O. Teasley explains, in the last IAWC rate order, the Illinois Commerce Commission ("Commission") required that in its next rate filing, IAWC include certain information regarding the costs incurred by IAWC for services provided by the Service Company. As Ms. Teasley indicates, I am one of the five witnesses presented by IAWC to address this requirement. My testimony will describe each area of service provided by the Service Company to IAWC. In addition, I will discuss certain information provided by the Service Company for use by IAWC witnesses Bernard L. Uffelman and Mark Young in connection with the Service Company Cost Study marked for identification as IAWC Exhibit 11.01.

II. DESCRIPTION OF SERVICES

Q6. Please discuss the areas of service provided by the Service Company that are available to IAWC and other American Water subsidiaries.

A. The principal areas of support services available through the Service Company are Communications and External Affairs, Corporate Finance, Customer Service, Division Operations Support and Regulated Operations, Human Resources, Information Technology Services, Legal, Operations Services, and Shared Services. Each of these areas includes governance and support responsibilities. For example, governance responsibilities would include areas such as general

policies and practices, and financial and operational oversight. Support related activities and other areas of service will be discussed below.

Communications and External Affairs

Q7. Please describe the Communications and External Affairs ("Communications") function.

A. The Communications function provides comprehensive coordination and support for the broad spectrum of communications needs of the Operating Companies, including IAWC. The customers of IAWC (and other Operating Companies), governmental officials and employees require various types of information. The Communications function is structured to provide standardized information resources at an efficient cost, and works with IAWC personnel to assure the accuracy of all information provided. As one method of communication, the Communications function works with IAWC in preparing website information concerning such matters as rates, service application requirements, bill payment information, a Customer Bill of Rights required by Illinois law, and other customer information.

Corporate Finance

Q8. Please discuss the Corporate Finance function of the Service Company and the services provided by this function to IAWC.

A. The Service Company Finance function works in coordination with IAWC employees, and supports rate activities, budget preparation and analysis, and other regulatory and financial analysis as requested by the management of IAWC. The Service Company team includes employees located in St. Louis,

Missouri; Voorhees, New Jersey; and the Shared Service Center ("SSC") located in Cherry Hill, New Jersey.

The Service Company Finance function is organized into the following areas - Treasury, Controller, and Planning and Reporting. Treasury administers the investment by American Water in the common equity of the Operating Companies, and oversees the borrowing and debt compliance requirements of American Water Capital Corporation (AWCC) and the Operating Companies. AWCC is a wholly owned subsidiary of American Water that pools the financial needs of the American Water subsidiaries in order to secure cost-effective financing for the Operating Companies.

The Controller function provides research and interpretation of accounting pronouncements of regulatory agencies such as the Financial Accounting Standards Board and the Internal Revenue Service. It is also responsible for the implementation of required internal controls that protect the interests of customers and investors.

Planning and Reporting reviews the accounting of, and coordinates the preparation of budgets and financial forecasts for IAWC, other Operating Companies and the Service Company. This group implements expense controls and performs variance analysis and detail reviews of Service Company charges to the Operating Companies.

Customer Service Center

Q9. Please explain the purpose and operations of the Service Company's Customer Service Center function.

A. The Customer Service Center ("CSC") of the Service Company performs many of the activities involved in providing customer service, including call center operations and centralized billing and collections activities. Although the CSC is physically located in two different locations (Alton, IL and Pensacola, FL), it operates as one organization. These facilities respond to virtually all customers inquiries from the Operating Companies.

Q10. What customer service functions are performed at the CSC?

A. The CSC responsibilities include the following:

Call Handling – receive, handle and process inbound customer calls and correspondence (mail, fax, e-mail) regarding billing, collections, and services; respond to customer needs; create service orders as required.

Billing – calculate bills, process adjustments, resolve billing issues.

Collections – manage collection of unpaid bills, issue notices, handle outbound calling, issue shut-off orders, resolve collection disputes, and handle bankruptcy processing.

Education & Development – train new hires and provide ongoing and refresher training.

Quality Control – monitor quality of call handling, service order creation, billing and collections, and provide reports to CSC leadership regarding quality of call handling for coaching and ongoing development.

Support Functions – provide needed finance, work force management, human resources, information technology, and administration functions, including cost

control, recruitment, human resource, staffing, scheduling, overtime needs, administrative functions, and system/desktop support.

Q11. How does the CSC provide customer service?

A. The CSC and IAWC work together to provide high-quality service delivery to customers in Illinois. CSC functions include greeting customers making inbound calls, answering their questions, handling their requests, processing service orders, processing correspondence, billing accounts, and collecting on accounts. IAWC field service operations are responsible for reading meters and providing other required field services to customers.

The CSC operates a telephone system to route and deliver calls to call handling agents, or Customer Service Representatives ("CSRs"). Calls from Operating Company customers can be answered at either location, with the exception of certain calls requiring specialized customer support. The CSC uses a computer telephony interface for screen-pop delivery to CSRs, Interactive Voice Response ("IVR") and speech recognition to provide self-service functionality, and servers for real-time and historical call statistics and reporting. As calls are received, they are identified by an automatic call distributor ("ACD") according to type (e.g., emergencies, inquiries, service calls) and are either delivered to a waiting CSR or are queued pending CSR availability. The CSC uses workforce management software for CSR scheduling. This system enables call center managers to schedule staff, measure performance, and analyze trends and opportunities, while learning of customer concerns and working with call center staff.

Operational continuity is assured by routing and switching for personal computers and the voice network. Backups are performed off-site. The CSC has battery backup and an on-site generator to ensure continuous operation of its systems. In addition, it maintains a 24 x 7 maintenance agreement for on-site or remote technical support.

Q12. Does the CSC assess the quality of interactions with customers?

A. Yes. The CSC monitors calls to ensure that customers' issues are resolved efficiently and courteously. Active listening, effective problem diagnosis and an emphasis on first-call resolutions are critical metrics developed in response to customer survey results.

Q13. Does the CSC use any other means to assess performance?

A. The CSC monitors and tracks internal metrics to assess overall performance and effectiveness. These include, but are not limited to, service level, abandonment rate, average speed of answer and first-call resolution.

Q14. Please further discuss the operations of the CSC.

A. The CSC answers customer calls 24 hours per day, seven days per week. The CSC is able to effectively smooth call volume peaks by handling a traditional daily call distribution over the entire day with the latest staffing and scheduling programs. This enhances customer convenience and improves service levels by spreading peak volumes. The CSC also invests in leading-edge training facilities and techniques, which have led to improved first-call effectiveness and increased customer satisfaction.

The CSC provides economies of scale in the use of technologies needed

to meet increasing customer expectations, ongoing comparison with established measures of service excellence, and a focus on improving customers' experiences in contacting the Operating Companies, including IAWC.

One example of the CSC's services for Illinois is the Chicago Metro District "specialty desk." In response to increased customer inquiries in Chicago Metro in 2005, a Chicago-area "specialty desk" was established at the CSC. Calls coming from the Chicago area have been routed to specially trained CSRs. CSRs have received additional in-depth training about Chicago systems, processes and billing, and are available to Chicago Metro customers "24/7".

Divisional Operations Support and Regulated Operations

Q15. Please describe Divisional Operations Support and Regulated Operations.

A. The Service Company's Western Division multi-state management support organization provides support to IAWC, primarily in the areas of customer relations and engineering related services. Customer relations includes Field Resource Coordination Center ("FRCC") employees that provide support for activities such as bill reviews and service order reviews, and to IAWC Field Service Representatives ("FSRs") with regard to dispatch and monitoring of field work. For example, utilizing innovative software systems implemented several years ago as part of the "Service First" program, the FRCC coordinators are responsible for assigning service orders to the FSRs and, throughout the day, monitoring the FSRs progress and the status of "special handle" service orders received during the day, such as emergency orders. Customer Service also includes "Time Critical" employees to assist in the processing of same day

service orders like water quality and emergency service requests. Because the FRCC covers multiple states in the Western Division, it can achieve economies of scale in the provision of these support services to IAWC. Engineering support includes assistance in engineering related areas, such as capital program planning, design, and construction and comprehensive planning activities.

Regulated Operations, through the President of Regulated Operations, provides senior executive management oversight of all Operating Companies. The President of Regulated Operations is ultimately responsible for the operational and financial performance of the Operating Companies, including IAWC, as well as for the effective performance of the national Customer Call Center.

The services performed for IAWC as described above promote integrated and consistent management and operational support and guidance to drive best operating practices, facilitate access to cost effective capital, and to thereby help ensure high quality, reliable, service to customers.

The Service Company also provides similar operational support services to the Eastern Division, which does not provide services to IAWC.

Human Resources

Q16. Please discuss the Human Resource function.

A. The Human Resources function ("HR") is responsible for employees from the beginning of their employment to the termination of their employment and/or retirement. HR is organized into five areas: Compensation and Benefits, Employee and Labor Relations, HR Systems and Processes, Business Center

and Corporate Staffing, and Organizational and Talent Development. These functional areas administer compensation and benefits plans, performance review procedures and forms, HR-related policy and practice administration, and HR policy analysis and research.

Some of the areas of service provided to IAWC include employee benefits, discrimination issues, collective bargaining unit negotiation strategies, as well as employee issues, including hiring practices, employee development, training and relocations. The areas of service provided by HR are further discussed below:

- *Benefits/Benefits Service Center* – Members of HR working in the Benefits and Compensation area operate a national Benefits Service Center ("BSC") for the Operating Companies. The BSC is staffed with specialized employees who have the knowledge and skill-set necessary to address employee and retiree questions and to resolve questions raised on a daily basis by active employees, retirees and their dependents, regarding obtaining benefits to which they are entitled under benefit plans and programs.

  Since the Service Company utilizes a bid process to select benefit service providers for the Operating Companies, multiple providers may be selected to provide various types of benefits. As a result, it is more efficient for the Service Company to staff, equip and operate the BSC to address the benefit administration questions of active employees, retirees and their dependents through a single source rather than to rely on separate communication by the affected individuals with multiple providers.

Through the BSC, the Operating Companies receive a cost advantage from large volume purchasing of benefits plans covering all Operating Companies, and a reduced cost for administration and vendor selection.

- *Compensation* – HR designs, implements, and manages compensation programs that:
  - ensure cost-effective operations and provide strong competitive market positioning. In establishing compensation levels, HR conducts extensive research regarding market-based compensation levels applicable to each employee position;
  - support the attraction and retention of talent;
  - reinforce the performance culture;
  - put accountability in the hands of line management; and
  - comply with regulatory and statutory requirements.
- *HR Policy and Practice Administration* – HR also develops and administers HR-related policies and practices, and conducts industry-wide HR policy research and analysis for all levels of management. In addition, HR prepares required reports to governmental agencies at the state and federal levels.
- *Labor and Labor Relations* – HR supports Operating Company personnel with regard to labor relations by:
  - providing training for field negotiations teams;
  - providing information regarding national labor market trends;
  - overseeing recruiting using a variety of national and regional job boards for all Operating Companies. This approach reduces the cost of access to these services by leveraging the combined size of the Operating Companies to obtain better pricing while localizing recruiting efforts. As a result,

IAWC incurs a lower cost for recruiting than it would if this process were handled on a stand-alone basis;

- overseeing and administering the applicant tracking system. In this regard, HR negotiates price advantages for the identification of candidates based on the combined volume of Operating Company use of the services involved;

- overseeing and administering background screening for applicants (criminal background, drug testing, education confirmation, etc.). HR also obtains volume purchase discounts for the Operating Companies for background check services; and

- providing training tools and guidance for various employee development initiatives (supervisory training, ethics/respect training, etc.).

Information Technology Services

Q17. Please describe the organization and operations of the Information Technology Services ("ITS") function.

A. The ITS organization is comprised of six departments: Enterprise Architecture, Security Architecture, Infrastructure and Operations, Business Application Development, Client Services and Support, and the Project Management Office ("PMO").

The Enterprise Architecture team focuses on long range ITS technology planning. The objective is to focus on technologies that provide value to the Operating Companies, are cost-effective to implement and maintain, and are consistent with expected performance standards. The objective of Security Architecture is to develop strategies, policies, and standards for ITS resources that will ensure information security. Key responsibilities of this organization include developing information security processes that achieve risk management objectives and information security controls and measures that protect Operating

Company customers' identities.

The Infrastructure & Operations team is responsible for the operations, support, and maintenance of the data center, voice and data communications infrastructure. This includes responsibility for all the servers in the data center, back-up and recovery processes, voice and network performance, and bill print and distribution operations.

The Business Application Development team focuses on the design, development, and delivery of software applications necessary for Operating Company requirements. Business Application Development also provides maintenance support for all application-related technology. The team also addresses ongoing enhancement requests and upgrades to applications.

The Client Services and Support organization provides many levels of end user support. These functions include end user desktop support, service desk support, user access provisioning, change control management, desktop and software patching, cyber-security monitoring, vulnerability management, and security testing.

The PMO is responsible for the management of all projects within ITS.

As compared to a stand-alone operation for each Operating Company, the Service Company ITS Function reduces the per-customer cost incurred for information technology services by taking advantage of economies of scale and scope, volume discounts where applicable, and by spreading IT costs over the larger customer base of the combined Operating Companies. For example, ITS is able to drive down the per customer cost of software licenses based on total

volume purchases of the required licenses. Similarly, ITS is able to leverage the server infrastructure, purchasing fewer larger servers to house applications, instead of multiple smaller servers at each Operating Company, all of which have to be monitored, patched, and maintained. With the ITS approach, fewer total servers can then be maintained by fewer individuals, with less time consumed. Similarly, applications can be developed and maintained centrally instead of at each Operating Company. The individual Operating Company approach, by contrast, would require application changes to be made multiple times, as well as more resources with more idle time, because of the number of skill-sets required and the lower volume of work in each of those skill-sets for a single Operating Company.

The ability to efficiently employ the specialized skills of personnel is also a key benefit provided by ITS. The operation and maintenance of a single software application requires multiple people with specialized skills because most of the requisite skills are not found within a single individual. Through ITS, IAWC has access to a team of skilled technicians that IAWC could not provide on a cost-effective basis through a stand-alone approach. The work required to maintain the server infrastructure is the same regardless of the number of end users (e.g., 10 or 1000) because the application residing on the server has all the same functions. Additionally, application developers typically specialize in a specific set of languages. Due to the specialized nature of the skills of each technician, IAWC as a stand-alone could not as efficiently employ the services of the required technical staff.

Legal

Q18. Please describe the Legal function.

A. The Legal function consists of team members who provide legal support for many aspects of Operating Company functions, including those of IAWC. When specialized legal counsel is required, members of the legal function make decisions to select and retain outside counsel. Members of the legal function also are responsible for corporate governance responsibilities, such as the Corporate Secretary function for the Operating Companies and the preparation of required materials for the Operating Company Board of Directors meetings. Members of the Legal function team also provide legal advice regarding litigation, regulatory matters, business development, contract negotiations, financings, labor (including collective bargaining, and the handling of grievances and arbitrations), purchasing and general corporate matters. Members of the legal team also provide advice regarding the interpretation of environmental laws and regulations.

In addition, Legal function team members handle certain civil litigation and manage claims made against the Operating Companies, including IAWC. Legal team members negotiate for, and review, property easements, leases, and handle acquisitions and dispositions of real estate. Team members also conduct discussions with developer representatives regarding the installation of main extensions and draft-related agreements. In addition, team members conduct negotiations with governmental bodies regarding franchises for operations within the boundaries of particular governmental entities. Members of the Legal team

also assure compliance with all business registration, licensing and corporate reporting requirements.

As a regulated entity, IAWC must comply with a host of national, state and local laws, rules and regulations, and is subject to regulations by various state and federal administrative agencies. The legal function provides IAWC with access to specialized legal personnel with knowledge and experience related to the areas of law that affect IAWC's operations on a cost-effective basis. Through the Legal function, IAWC's legal cost is below the amount it would incur to retain stand-alone, in-house legal personnel due to the sharing of cost with other Operating Companies. The Legal function also provides IAWC with access to legal expertise at a cost below that of retaining outside counsel.

Operations Services Department

Q19. Could you please describe the Operations Services Department?

A. Operations Services is a multi-disciplined department comprised of technical, operations and business professionals serving American Water subsidiaries in the following functional areas: (1) Engineering; (2) Maintenance & SCADA Services; (3) Innovation and Environmental Stewardship; (4) Central Laboratory Services; (5) Supply Chain; (6) Best Operating Practices; and (7) Operational Risk Management. Each of these groups is responsible for establishing and implementing functional strategies with supporting policies, practices and standards. These groups also provide specialized consultancy expertise and resources to the Operating Companies, including IAWC, as appropriate, to address issues or events, support implementation of functional strategies and

augment Operating Company staff on larger or more complex projects. The Operations Services Department leverages both economies of scale and scope, as well as expertise to provide highly experienced, specialized resources to the Operating Companies in a cost-effective manner. The Operations Services teams are also charged with driving best practices in their respective functional areas to produces service level benefits and operational efficiencies that otherwise would be lost.

Q20. Please further discuss the individual functional areas within Operations Services.

A. The following sections provide greater detail on each of the Operations Services functional departments.

1. Engineering.

The Engineering group leads the Service Company's functional initiatives in the areas of Asset Planning and Capital Investment Management ("CIM"), Technical Services and Design Management, and Project Delivery and Construction Management. The Asset Planning group maintains the water and wastewater system planning standards and provides technical resources to the Operating Companies as needed to support or perform system specific capital improvement master planning. The output of the asset planning effort is the primary input to the Operating Companies' and the Service Company's Capital Investment Programs ("CIP"), and the Engineering function is charged with establishing and administering the corresponding CIM Policy, Practice and Standards used to implement the CIP.

The Technical Services team within Engineering is responsible for maintaining the technical standards, specifications, approved product listings, etc. applicable to the asset base. This team also provides specialized engineering expertise in the areas of treatment process selection and design, and the structural, geotechnical, electrical and control system disciplines. Resources from this group are used, upon request, to augment the Operating Company staffs to study alternatives and develop conceptual design solutions and manage the detailed design effort for larger or more complex capital projects.

The Project Delivery and Construction Management team is charged with developing and maintaining the various project delivery models and supporting documents needed to satisfy the range of projects (size, complexity, schedule drivers, etc.) to be delivered in the CIP. Project delivery methods include traditional design-bid-build delivery and a range of alternative project delivery methods. The Project Delivery team provides guidance and training on the selection of project delivery methods. Resources from this group are used to augment the Operating Company staffs on larger and more complex projects to develop bidding and contract documents, administer the bidding and award of contracts and to manage the construction, field inspection and facility commissioning tasks. The group also investigates innovative approaches to complete needed projects on a cost-effective basis.

This approach to functional alignment within the Engineering discipline produces timely, high quality, and proactive capital plans with efficient and effective technical design, procurement and delivery of the CIP.

2. Maintenance and SCADA Services.

The Maintenance and SCADA Services department provides technical services in the areas of maintenance management, equipment testing and diagnostics, and Supervisory Control and Data Acquisition ("SCADA") systems. The resources and expertise in this department supplement the Operating Company staff and are charged with implementing the Service Company's Reliability Centered Maintenance ("RCM") and SCADA strategies. RCM is a widely recognized best practice that proactively considers service level requirements, related asset criticality, asset failure cost and other factors, in order to set forth an appropriate and cost-effective maintenance plan. RCM also requires the assessment of asset condition, performance of equipment diagnostic testing and predictive maintenance tasks. The Service Company has developed the expertise within the Maintenance Services staff to provide these services which include infrared thermography, advanced vibration analysis, motor winding analysis, insulating and lubrication oil testing, ultrasonic testing, as well as other more traditional electrical and mechanical testing and diagnostic techniques. When deficiencies are identified through the diagnostic testing, the Maintenance Services Department also performs the needed repairs. The Maintenance Services team has also recently completed the design and configuration of a Computerized Maintenance Management System (CMMS) for the Operating Companies. Currently, around 7,000 assets are being managed within the American Water system, and the expanded deployment of this system is continuing. IAWC will begin building its database for the system in 2009. SCADA services provided by this group include setting strategy, technical and

448 equipment standards and providing programming services and field technician
449 support. These services address ongoing equipment and control system
450 calibration, maintenance and repairs, emergency response support during
451 operational events and providing system configuration input, design support and
452 control system programming for new and expanded facilities.

453 3. Innovation and Environmental Stewardship.

454 The Innovation and Environmental Stewardship function is a team of
455 scientists and environmental engineers charged with setting Environmental
456 Policy and directing the Service Company's programs for water quality,
457 environmental compliance and stewardship, and applied research. The team is
458 also responsible for regulatory interface (for example, with the United States
459 Environmental Protection Agency ("USEPA")), including the direct input and
460 collaboration on new or updated water quality or environmental regulations. This
461 team also conducts comprehensive facility environmental audits and provides
462 expert resources to operations when needed to address difficult treatment, water
463 quality or other complex environmental issues. The applied research efforts of
464 this function are tailored to serve the needs of the Operating Companies and
465 include nationally recognized work in the areas of drinking water quality,
466 infrastructure needs, and wastewater. The research activities are well aligned
467 with Operating Company needs.

468 4. Central Water Quality Laboratory.

469 The Central Laboratory, located in Belleville, Illinois, is a key service
470 offering supporting American Water's mission to provide high quality drinking
471 water to customers and the communities it serves. The Laboratory employs

highly skilled scientific personnel and is certified by the Illinois Environmental Protection Agency ("ILEPA") and other state water quality certification programs in states where the Operating Companies provide service. These certifications are done in accordance with the requirements set forth by the National Environmental Laboratory Accreditation Conference. The Laboratory provides timely, accurate and cost-effective water chemistry analytical services to assure regulatory compliance, support treatment process control and optimization, maintain and improve distribution system water quality, and address customer inquiries related to water quality.

Using many certified analytical methods, nearly 53,000 water quality tests were conducted in 2008 covering more than 100 regulated analytes under the Safe Drinking Water Act (and approximately 200 analytes in total). As a dedicated facility, the Laboratory consolidates all analytical testing and archived data in a single location and is able to offer a higher level of service, at a lower cost, when compared to the alternative of commercial laboratories. This topic is further discussed in the testimony of Mr. Edward Grubb. The higher service levels include sample kit scheduling, shipping and management, filing of analytical reports to meet regulatory compliance requirements, comparison of test results to regulatory limits and action levels with immediate issuance of alerts as needed, and the handling of rush or special requests. The Laboratory works closely with the USEPA and other laboratories to maintain an expert position on challenging and new analytical methods and upcoming regulations. In 2008, the Laboratory became one of only 14 laboratories in the country to achieve

certification for the testing methods related to Phase 2 of the USEPA Unregulated Contaminant Monitoring Rule (UCMR2). Through these efforts, the Laboratory is able to provide expert guidance to American Water field personnel for complex water chemistry conditions and analytical requirements for current and new regulations.

5. Supply Chain Department.

The Supply Chain Department engages in strategic sourcing on behalf of Operating Companies. Through strategic sourcing, Supply Chain procures goods and materials, such as chemicals, pipe, meters, hydrants and other items directly from manufacturers, thus eliminating the mark-up from distributors and maintaining a direct vendor management relationship with the manufacturer. For goods and materials that cannot be procured nationally, procurement professionals perform a similar function by working with regional suppliers to obtain beneficial pricing on items such as copper tubing and certain other items which must be purchased regionally. Strategic sourcing also includes the sourcing of local contractors who perform duties such as, street paving, residual removal/disposal and distribution system routine replacement and repair. By consolidating the purchasing needs of all Operating Companies, each Operating Company, including IAWC, benefits from economies of scale that would not otherwise be obtained. In 2008, the Supply Chain Department managed more than 800 vendor agreements covering approximately $560 million of external spend for the Service Company. Through these efforts the Service Company achieved Purchasing Performance savings of more than $42 million for all Operating Companies. Of this amount, the savings realized by IAWC were

519 approximately $6.6 million. Purchasing Performance savings are the difference
520 between the average market price quoted to the Supply Chain Department and
521 the price paid by the Operating Companies for goods and materials procured.
522 This is a conservative measure of the savings achieved through Supply Chain's
523 strategic sourcing activities.

524 Within the Supply Chain Department there is an energy management
525 group which works with local Operating Company operations staff and third-party
526 electric providers to enter into long-term contracts that lock in rates for the
527 Operating Companies' large consumption locations. The goals of this energy
528 supply procurement process are to achieve lower pricing than would be possible
529 without an agreement and to reduce price volatility. Where Operating Company
530 facilities are served under a regulated tariff instead of by a competitive provider,
531 the Supply Chain takes steps to ensure that its facilities are served at the most
532 appropriate and cost-effective rate schedule.

533 Supply Chain also administers American Water's Supplier Diversity
534 Program. American Water recognizes the value of supplier diversity as a
535 strategic business decision and our Supplier Diversity Policy broadens the
536 supplier base, increases competition, and ensures that American Water receives
537 the finest materials and services at the best available cost.

538 6. Best Operating Practices.

539 The Best Operating Practices ("BOP") team specializes in the areas of
540 water treatment and production facility operations, distribution system operations
541 and maintenance, and field customer service. This team also administers
542 Customer Satisfaction and Service Quality survey programs. The team

collaborates with numerous operational working teams to develop practices or strategies in the areas of distribution system operations and maintenance, meter reading, material inventory, and field customer service. The BOP team also conducts targeted operational reviews.

7. Operational Risk Management.

The Operational Risk Management function administers the following programs for the Operating Companies, including IAWC: Health and Safety, Operational and Physical Security, Event Management, Business Continuity and Emergency Response Planning, Hazardous Materials Management, Accident Investigation and Claims Management related to Workers Compensation, General and Auto Liability.

Through these focused efforts IAWC has been able to achieve improvements in terms of reduced injury rates, lost workday cases, and workers compensation claims. The reduction of work-related injuries is a positive indicator of business performance in that safe working conditions, worker productivity and effective safety programs are not mutually exclusive, but rather are synergistic. Strong safety performance results in higher productivity, improved business efficiencies and customer service through decreased employee absenteeism, decreased overtime and decreased administrative costs. It also results in higher employee morale which positively impacts productivity. In the area of security, the Service Company supports the efforts of Operating Companies to insure the safety and security of Operating Company customers and employees.

Shared Service Center

Q21. Please describe the Shared Service Center ("SSC").

A. The SSC provides various accounting and financial activities on behalf of the Operating Companies, including IAWC. The services provided include, but are not limited to: general accounting, financial reporting, payroll processing and reporting, oversight of accounts payable and purchasing card transactions, invoice payments, the processing of capital expenditures and fixed asset processing, the receipt and distribution of cash (cash management), tax-related services, and providing support for the rates and regulation functions of IAWC and other American Water subsidiaries.

Operation of the SSC allows IAWC (and the other Operating Companies) to realize economies of scale that could not be obtained on a subsidiary stand-alone basis. Also, the use of specialized software technology at the SSC, such as for asset capitalization and maintenance, sales and use tax management, treasury workstation, automated cash handling, bank lockbox management and invoice scanning and documentation software, provide benefits to each Operating Company. The cost to purchase, implement, and train the users of these vital technologies would be higher for IAWC on a stand-alone basis. Centralizing the knowledge-base necessary to utilize these technologies allows IAWC (and other Operating Companies) to realize additional economies of scale.

Other Services

Q22. Are there other services available to IAWC through the Service Company?

A. Yes. The discussion above addresses the principal areas of service. The

Service Company, however, provides certain other services for the Operating Companies, including IAWC, which include:

(1) Business Development – This function provides coordination for the Operating Companies of business development resources, activities and reporting, including acquisition support and training;

(2) Regulatory Programs – This function provides the Operating Companies with expertise and support as needed with respect to regulatory issues and policies. Regulatory Programs also provides support for litigation involving rate cases and other regulatory proceedings or investigations, as well as civil litigation.

(3) Internal Audit – The Internal Audit team conducts periodic audits of accounts, records, policies and procedures; and

(4) Investor Relations – This function has strategic responsibility that integrates expertise in finance, communication, marketing and securities law compliance to enable effective communication with the financial community. Such programs maximize the financial resources of the Operating Companies, enabling them to support the infrastructure necessary to meet its public service obligations at a low cost to customers.

III. SERVICE COMPANY COST STUDY

Q23. Did the Service Company provide information which was utilized by Deloitte & Touche, LLP ("Deloitte & Touche") in preparing the Service Company Cost Study marked for identification as IAWC Exhibit 11.01?

A. Yes. As discussed in IAWC Exhibit 11.01, the Service Company provided to Deloitte & Touche information regarding the services expected to be provided to IAWC for the 2010 forecasted test year. This information included: an

identification of the business units and locations providing services; the functional areas of service; the categories of service to be provided; the job titles of the personnel expected to provide service; the number of positions by job title; the number of hours expected to be worked in providing service; and the cost expected to be incurred (including the cost of labor, labor overheads, building and office costs and other overheads). The information included the projected unitized cost per hour for each service.

The Service Company also worked with Deloitte & Touche in assigning the Service Company positions to the market service pricing categories identified by Deloitte & Touche through its market research. The alignment of Service Company personnel with the market categories was based on consideration, for each position, of the work responsibilities and the required level of education, training and experience.

Also, as discussed in IAWC Exhibit 11.01, Deloitte & Touche requested information from American Water with regard to the pricing of services offered to or obtained by American Water or one of its subsidiaries from non-affiliate providers in relevant markets. As discussed in IAWC Exhibit 11.01, Deloitte & Touche utilized this information to supplement the market data obtained from other sources. The Service Company obtained the supplemental data from sources throughout the American Water system, and provided the information to Deloitte & Touche. The forecasted Service Company hourly cost and supplement market data referenced above was utilized in preparing the following Schedules of IAWC Exhibit 11.01: 1.1, 2.1, 2.2, 3.1, 3.3, 4.1, 4.4, 5.1 and 5.2.

Each Schedule identifies the information that the Service Company provided. As shown, Schedules 1.1, 2.1, 3.1, 4.1 and 5.1 of Exhibit 11.01 were prepared by the Service Company.

The Service Company also provided to Deloitte & Touche with the forecasted customer service cost data for the Service Company shown on Schedule 7.1 of IAWC Exhibit 11.01. As in the case of the hourly cost data referenced above, the forecasted data utilized for Schedule 7.1 is based on the 2010 forecast data utilized for the test year.

Q24. Does this conclude your direct testimony?

A. Yes.

APPENDIX A

JOHN S. YOUNG, JR.

Business: American Water
1025 Laurel Oak Road
Voorhees, New Jersey 08043
856-346-8250

Education: B. S. Civil Engineering, Duke University, 1975;
M.S. Environmental Engineering, University of North Carolina at Chapel Hill, August 1977 (two year program)
Thesis: "Chloroform Formation in Public Water Supplies: A Case Study"; presented at the 97th Annual Convention of AWWA, May, 1977; published JAWWA February, 1979

Employment Record:

President
7/08 - Present

American Water Works Service Company
American Water Services
Responsible for the management of American Water Works Service Company which provides functional support services to the business and operation of American Water utility subsidiaries. Responsible for a business transformation program to improve process and efficiency, enhance customer service and replace antiquated IT systems across the business. Additionally responsible for facilitating and managing growth opportunities within American Water.

Chief Operating Officer
10/05 – 7/08

American Water
Responsible for developing and integrating the Company's strategic plan including establishing balance between the company's immediate business goals and long-term vision, developing and implementing policies, procedures and standards, as well as maintaining and enhancing quality service.

Vice President – Operations and Investment Performance
11/03 – 10/05

American Water
Responsible for the following functions/activities:

1) Identifying and implementing operational improvements, and efficiencies and best practices across the business;
2) Managing the Americas Region $600M capital program;
3) Risk Management – Health & Safety, Security and Event Management;
4) Environmental compliance, management and stewardship;

5) Engineering;
6) Research & Technology.
7) Assessment of commercial and growth initiatives.

Vice President – Technical Services
1/03 – 11/03

American Water
Responsible for managing the American Water technical services including the engineering, environmental management and research functions. Additionally, responsible for improving business performance through identifying and implementing operational efficiencies, material procurement and energy management initiatives. Provide technical leadership for commercial opportunities to maximize value and performance.

Vice President – Engineering
4/91 – 1/03

American Water Works Service Co., Inc.
Responsible for managing the engineering function of the American Water System. This includes the preparation of comprehensive planning studies for system operations in twenty-two (22) states and the design, design overview and construction management or projects involving water supply, treatment, pumping, distribution and transmission facilities. Responsibilities also include development of engineering standards, project management procedures, employee development and business development.

Director – Engineering Design
1/86 – 4/91

American Water Works Service Co., Inc.
Responsible for managing engineering design for American System Engineering Office. Responsibilities include:

1) Review and approval of in-house design of water treatment, pumping and storage facilities.
2) Development of detailed design concepts and coordination of water works design and construction.
3) Pilot plant testing and start-up of new or expanded facilities.
4) Instruction at training seminars.
5) Technical presentations.
6) Expert testimony.

Director – Engineering Planning
9/84 – 12/85

American Water Works Service Co., Inc.
Responsible for managing engineering planning for American System Engineering Office. This group developed Comprehensive Planning Studies for water systems which included water demand projections and regional water supply plans, analysis of sources of supply and production facilities and modeling of distribution systems.

Supervising Engineer
10/82 – 9/84

American Water Works Service Co., Inc.
Served as project engineer for the major design projects within System Engineering Office and supervised personnel on other design and planning projects.

System Environmental Engineer **12/79 – 10/82**	**American Water Works Service Co., Inc.** Project engineer with primary responsibility for process, hydraulic, chemical feed and instrumentation and control design and coordination of structural, electrical and HVAC for new and renovated water works facilities. These facilities included turbidity removal, greensand filtration, lime softening, GAC adsorption, air stripping and residual solids processing.
System Water Quality Engineer **10/78 – 12/79**	**American Water Works Service Co., Inc.** Evaluated the performance and efficiency of treatment facilities for American System Water Quality Office.
Director of Water Quality – Eastern Division **9/77 – 10/78**	**American Water Works Service Co., Inc.** Responsible for the review and implementation of recommendations to improve finished and raw water quality, treatment efficiency and laboratory.
Teaching Assistant **9/76 – 6/77**	**University of North Carolina** Involved the preparation and instruction of laboratory exercises for three graduate level courses in water and wastewater unit processes.
Student Research Assistant **9/75 – 9/76**	**Bogue Sound Water Quality Study** **University of North Carolina** Duties included field sampling and collection of background data to develop recommendations for pollution abatement.
Assistant Engineer **1975, 1976 (part-time)**	**Wiggins-Rimer & Associates** Collection and analysis of watershed and stream flow data for 208 regional water quality/quantity planning studies.
Professional Certifications	Registered Professional Engineer in multiple states.
Professional Organizations:	**National Drinking Water Advisory Council (2001- 2007)** NDWAC Affordability Workgroup NDWAC Water Security Workgroup **American Water Works Association** Standards Council Member Chair – AWWA/ASDWA Additives Committee 1992-1994 New Jersey Section Program Committee Chair 1994-1999 New Jersey Section Board of Trustees 1997 New Jersey Section Chair 1994 Fuller Award Recipient 2007 – 2010 AWWA Board of Directors **American Society of Civil Engineers** **Design/Build Institute of America** Board Member 2004-2010 Treasurer 2009

USEPA Effective Utility Management Workgroup

Court Appointed Special Master, Jefferson County Alabama – Sewer System. November 2008

Civic:

Trinity Presbyterian Church
Board of Deacons
Moderator – Board of Deacons
Elder – Session
President – Board of Trustees
Chair - $1.5 Million Capital Campaign

Awards:

Betty Anne Simon Dollar Energy Low Income Community Award, 2007.

Distinguished Alumnus Award: University of North Carolina – Chapel Hill, School of Public Health, 2008.

Presentations and Publications:

- "Effective Utility Management Application of the EUM Primer", presented at the 2009 AWWA/WEF Utility Management Conference, in New Orleans, LA, February 2009.
- "Energy Management & Alternative Energy Use in the Water Sector", presented at the Mayors Water Council Summit, in Palm Beach, FL, November 2008.
- "Privatization/Regionalization in Water Resource Management", presented at a memorial symposium for Dr. Daniel A. Okun, in Chapel Hill, NC, November 2008.
- Key Note Speaker, NJAWWA Annual Conference, Atlantic City, NJ, March 2008.
- "State of the Sector – Water Emerging Trend" presented at the Center for Public Utilities Current Issues Conference, in Santa Fe, NM, March 2008.
- "Water Resource Technologies" presented at the National Drinking Water Symposium, in La Jolla, CA, October 2007.
- Keynote – "U.S. Water System Needs and Affordability" presented at the National Low Income Energy Consortium Conference (NLIEC), in Nashville, TN, June 2007.
- "Emerging Water Utility Trends" presented at the New Jersey Section – American Water Works Association, March 2007.

- "On-Line Instrumentation – Practical Consideration" presented to the New Jersey Section – American Water Works Association; March 1986.
- "Pilot-Scale Investigation of Air Stripping for Removal of Volatile Organics" presented to New Jersey Section – American Water Works Association; September 1981.
- "Utilization of Belt Filter Press for Dewatering Water Treatment Plant Sludge" presented to the New Jersey Section – American Water Works Association; September 1981.
- "Operating Experience with Granular Activated Carbon" presented to the New Jersey Section – American Water Works Association; September 1979.
- "Chloroform Formation in Public Water Supplies: A Case Study" presented to the 97th Annual Convention of the American Water Works Association; May 1977. Published in *Journal* of the American Water Works Association; February 1979.
- "Adsorption of Alkyl Phenols by Activated Carbon"; Singer, Yen, Young; presented at American Chemical Society – Division of Environmental Chemistry; September 1978.
- "Adsorption of Phenolic Constituents of Coal Conversion Wastewaters"; Singer, Yen, Young; presented at the Purdue Industrial Waste Conference; 1977.

Guest Lecturer: Johns Hopkins University: "Pilot Studies for Process Selection".
Rowan University: "Challenges in the Water Industry".
Lehigh University: "Water Treatment Process Selection Criteria"

Instructor: American Water System – Water Treatment Plant Design Course.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Patrick Baryenbruch

Other Participating Employees: Michael A. Miller

Question:

37. Please provide all ***Workpapers*** or other ***Documents*** prepared in connection with, transmitted in connection with, or which concern, refer to, or relate to the ***Baryenbruch Report,*** including, without limitation all ***Workpapers*** and source ***Documents*** that support the calculation of the $59 per customer figure depicted on page 11 of the ***Baryenbruch Report.***

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome. The Company further objects to this request to the extent it seeks privileged communications or work product. Without waiving these objections, at the Monday November 22, 2010 status conference the intervenors, TRA and the Company agreed that communications with expert witnesses would not be produced. The Company has produced Mr. Baryenbruch's testimony and the work papers that support his testimony. See the Company's response TN-TRA-01-Q13, subfolder Patrick Baryenbruch. In addition, see the Company's response to TN-COC-01-29.

Please see TN-COC-01-Q37-ATTACHMENT for the calculation of the $59 per customer. The FERC back-up data for the calculation can be found on the enclosed CD in Folder TN-COC-01-Q37. Please refer to the excel file labeled as TN-COC-01-Q37-ATTACHMENT 2.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Tom McKitrick

Question:

38. Identify and provide copies of all ***Documents*** constituting, referring to, or relating to billing contracts referred to in testimony of John S. Young, Jr. before the Public Utilities Commission of the State of California.

Response:

The Company objects to this question on the grounds that it is overly broad, unduly burdensome, and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, Mr. Young's testimony addressed third party billing and collections agreements for the California operations. TAWC does provide third-party billing services such as sewer billing services to the City of Chattanooga and several other sanitary boards in the Chattanooga area. TAWC's situation is entirely different than California American's situation. Please see page 31 of the Schumaker Management Audit regarding third party billing services provided by TAWC.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: None

Question:

39. Please provide a copy of all advertising, promotional, or descriptive materials made available to potential customers and all contract forms used in connection with the "Service Line Protection Program" offered by ***TAWC*** to its customers.

Response:

The Company objects to this question on the grounds that the request is overly broad, unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, the Company's only involvement in the Service Line Protection Program is to provide third party billing and collection services at the TRA approved tariff for such third party billing services. TAWC does not provide the "Service Line Protection Program". See the responses to TN-CAPD-01-Q77 and Q78. Also see the attached contract between TAWC and AWR that is identified as TN-C0C-01-Q39-ATTACHMENT 1 as well as the attached sample of the advertisements used by AWR in Tennessee attached and identified as TN-COC-01-Q39-ATTACHMENT 2.

AGREEMENT FOR SUPPORT SERVICES

BETWEEN

AMERICAN WATER RESOURCES, INC.
AND
TENNESSEE AMERICAN WATER COMPANY

This Service Agreement, dated as of the 1st day of May, 2004 (the "Agreement"), is by and between the AMERICAN WATER RESOURCES, INC. (AWR), a corporation organized and existing under the laws of the Commonwealth of Virginia, with its principal office located at 1025 Laurel Oak Road, Voorhees, New Jersey 08043, and TENNESSEE AMERICAN WATER COMPANY (Utility), a corporation organized and existing under the laws of the State of Tennessee, with its principal office located at 1101 Broad Street, Chattanooga, Tennessee, 37401.

WHEREAS, AWR provides certain services to utility customers, as more particularly described on Appendix A which is attached hereto and incorporated herein by reference, which list may be modified or amended from time to time by AWR (hereinafter the "Programs"); and

WHEREAS, Utility is the owner of a public water supply system; and

WHEREAS, many of Utility's residential customers may desire to and qualify to participate in one or more of AWR's Programs; and

WHEREAS, Utility desires to make certain or all of the Programs available to its customers upon the terms and conditions contained herein; and

WHEREAS, AWR desires to contract with Utility for certain customer support services for the Programs; and

WHEREAS, Utility possesses the necessary ability and experience to provide such customer support services and is willing to provide such services for the Programs upon the

terms and conditions contained herein; and

WHEREAS, it is the mutual desire of the parties to enter into this Agreement providing for the customer support for the Programs;

NOW, THEREFORE, for and in consideration of the mutual promises set forth herein, and subject to the terms and conditions herein stated, AWR and Utility agree as follows:

SECTION 1. Definitions.

The following words and phrases when used in this Agreement shall have the following meaning:

"Agreement" means this Agreement between AWR and Utility.

"Force Majeure" means those events set forth in Section 13 of this Agreement.

"Fully Distributed Costs" means costs determined in a manner that complies with the standards and procedures for the apportionment of special, joint, and common costs between the Utility and any non-regulated entity in accordance with applicable regulations of the State commission or board having jurisdiction over the operations of Utility, except taxes as discussed in Section 5. A fully distributed costing methodology apportions the total costs of a group of services or products, including the authorized rate of return, among the individual services or products in that group.

Should the commission or board having jurisdiction over operations of Utility assign different costs than Utility has assigned, such commission or board assigned costs, once such assignment is final and non-appealable, shall be the Fully Distributed Costs, until such time as such commission or board assigns different costs, at which time such newly assigned costs shall be the Fully Distributed Costs. Whether to appeal a decision of the commission or board shall be in Utility's sole discretion.

"Services" means all of the duties, obligations, and services as defined herein to be provided by Utility that are related to the performance and operation of AWR's Programs.

SECTION 2. Appointment of Utility.

AWR hereby engages and appoints Utility to provide certain customer support services for the Programs.

SECTION 3. Term; Termination.

3.1 Term. The term of this Agreement shall commence on April 15, 2004, and be for a period of one (1) year unless sooner terminated or extended as hereinafter provided.

3.2 Renewal. The Agreement will automatically renew itself for periods of one (1) year, each following one after the other, unless either party gives written notice of termination to the other party in accordance with Section 3.3.1.1.

3.3 Termination.

3.3.1 Termination Without Cause:

3.3.1.1 Procedure - After the initial one (1) year term, this Agreement may be terminated without cause or penalty by either party upon giving the other party sixty (60) days written notice in advance of the date upon which the termination becomes effective. This Agreement shall automatically terminate at such time as either party, or its successor is no longer an affiliate of American Water Works Company, Inc.

3.3.1.2 Transition Services Following Termination Without Cause - Upon termination of the Agreement without cause, Utility shall continue to provide services to AWR, at AWR's request, for a period of not longer than sixty (60) days during AWR's transition to another service provider. Such transition services shall be provided under and subject to the same terms and provisions of this Agreement, including compensation.

3.3.2 Termination Upon Material Breach - Either party to the Agreement may terminate this Agreement upon material breach by the other party. The non-breaching party shall provide written notice of such breach to the other party, setting forth in detail the alleged failure and/or deficiency, and, if such breach is not corrected within thirty (30) days from receipt of written notice by certified mail, this Agreement shall be terminated.

SECTION 4. Compensation.

4.1 Fee. The fee paid to Utility by AWR for Services rendered pursuant to this Agreement shall be equal to one hundred and fifteen (115%) percent of the Fully Distributed Costs incurred by Utility in providing the Services except for billing and collection services. The Fee for billing and collection services rendered by Utility as set forth in Paragraph 6.1.3 below shall be at a rate of $.405 per customer per billing period and apply in the aggregate to customers participating in one or more of AWR's Programs. The $.405 rate may be adjusted from time to time as determined by the agency having regulatory authority over Utility to be consistent with any other such billing and collection service rates charged by Utility, under tariff, to others.

4.2 Allocation by Regulating Authority. Notwithstanding the fee schedule contained in Section 4.1, should the agency having regulatory authority over Utility disallow any cost of the Utility in excess of the Fully Distributed Costs as a result of the services provided to AWR pursuant hereto, AWR shall reimburse Utility for such disallowed costs, within thirty (30) days of receipt of notice of same and the fees due pursuant hereto shall be adjusted to reflect such allocation by such regulatory authority.

4.3 Reporting and Payments.

4.3.1 Utility shall maintain detailed records of all costs incurred in providing services to AWR. Utility will make such detailed records available for AWR's periodic review upon request by AWR, during normal business hours, at Utility's principal office.

4.3.2 Utility shall invoice AWR monthly or quarterly, at Utility's discretion, for the fee for services on or about the tenth business day of each billing period during the term of this Agreement. The invoice shall detail the services provided and the costs incurred. AWR shall pay such fee to Utility within fifteen (15) days of the date of the invoice.

SECTION 5. Taxes.

Any tax or other amount which Utility may be required to pay to or collect for a government agency upon or with respect to the Services rendered hereunder, or the use or delivery of any products or parts thereof on behalf of AWR, except income taxes, will be billed to AWR as separately stated charges and will be paid by AWR in addition to the fees paid pursuant to Section 4. In the event AWR disputes the taxability of an item hereunder, Utility will continue to collect such tax unless and until AWR provides Utility with documentation authorized and prescribed by the taxing authority, such as a certificate of exemption, relieving Utility from liability for the collection and payment of such tax.

SECTION 6. Scope of Services.

6.1 Utility agrees that it shall provide the following customer support services for the Programs in accordance with the terms and provisions of this Agreement:

6.1.1 Distribution of Promotional Materials. Upon request of AWR, Utility shall manage and direct the distribution of informational and promotional materials regarding the Program to its customers. Such materials shall be developed by AWR and provided to Utility in

sufficient quantities and in a timely manner so as not to impede any planned distribution efforts by Utility. The materials shall be distributed as a part of Utility's normal billing process, unless arrangements are made, at least sixty (60) days in advance, for a special mailing. The materials provided by AWR must be satisfactory in form and content to Utility, and nothing in this Agreement shall require Utility to distribute any materials that are not satisfactory to Utility. Utility shall make all reasonable efforts to promptly notify AWR when additional quantities of promotional materials are needed. Utility shall have the sole discretion to determine the customers who will receive the informational and promotional materials for the Program.

6.1.2 Notification of Claim. Should a Utility associate, as a part of his/her normal duties, determine that a Utility customer has a covered occurrence with the Customer's water or sewer service line, the Utility associate shall notify AWR by calling a toll-free telephone number to be supplied by AWR. AWR shall then engage a qualified contractor to provide the covered services to the customer. AWR shall timely provide the necessary information to cause Utility's customer records to reflect when coverage is available.

6.1.3 Billing and Collection. AWR shall provide Utility with a list of enrolled customers in its Programs who have chosen to have charges from AWR included on their bill from Utility, and shall keep such list up to date. Utility shall include such charges on the customer's bill and collect such charges from the customer until such time as the customer or AWR notifies Utility that the customer is no longer receiving service from AWR or has elected a different payment option. Utility shall forward collected payments from enrolled customers to AWR within fifteen days following the end of each calendar month for amounts collected during such month. All payments made by the customer shall be credited first to payment of any amount owed for utility service furnished by Utility; any remainder shall first be credited to

payment of any amount owed for utility service furnished by someone other than Utility but shown as a line item on the bill sent to the customer by Utility; and any remainder shall then be credited to payment of any amount owed to AWR. Utility shall not interrupt, cease or refuse utility service to a customer for non-payment of amounts owed to AWR. AWR shall be responsible for all collection efforts for non-payment by Utility customers for AWR Programs.

6.1.4 Other Services. Utility shall perform such other and further services as are agreed to in a Service Order in the form attached hereto as **Exhibit 1** executed by the parties during the Term hereof.

SECTION 7. Provision of Information.

Except as provided herein, any specifications, diagrams, sketches, models, examples, tools, computer or other apparatus, programs, software, technical or business information, written, oral or otherwise (all thereinafter collectively referred to as "Confidential Information"), furnished by one party (hereinafter referred to as the "Disclosing Party") to the other party (hereinafter referred to as the "Receiving Party") under this Agreement or in contemplation of this Agreement will remain the property of the Disclosing Party and will be held Confidential by the Receiving Party. All copies of such information will be returned to the Disclosing Party upon request. The Receiving Party, and any individual assigned by the Receiving Party will not permit the duplication, use or disclosure of the Confidential Information whether such disclosure be oral, written, in the form of computer tapes, drawings or other medium to any person other than the Receiving Party's employees, agents or representatives who must have such information to provide the Services, unless otherwise specifically authorized in writing by the Disclosing Party.

Confidential Information does not include any information which, at the time of disclosure, is generally known by the public, is rightfully obtained from third parties, is independently developed by the Receiving Party and any individual assigned by the Receiving Party outside the scope of its performance herein, or had been in the possession of the Receiving Party and any individual assigned by the Receiving Party prior to its commencement of the performance of its services.

The Receiving Party and any individual assigned by the Receiving Party agrees that: (1) this covenant not to disclose our use Confidential Information shall survive termination of this Agreement; and (2) it shall be liable for any and all breaches of such covenant by the Receiving Party, it employees, agents or representatives, whether such breach occurs during or after the term of this Agreement.

The Receiving Party shall take such steps as may be necessary in order to limit access to the Confidential Information on a need-to-know basis and assure compliance by the employees, agents and representatives to whom such information is given.

The provisions of this section shall survive termination of this Agreement.

It is understood that the Receiving Party may be required to furnish information to judicial, regulatory, or administrative bodies. In such an event, the Receiving Party will promptly notify the Disclosing Party of such requirement and will cooperate with the Disclosing Party should the Disclosing Party desire to seek a protective order to prevent the public disclosure of its information.

SECTION 8. Compliance with Laws.

Both parties agree to comply with the provisions of the Fair Labor Standards Act of 1938, as amended, and all other applicable federal and state laws, rules, regulations and codes with

which they are obligated to comply in the performance of this Agreement, including the procurement of permits and certificates where needed. Both parties further agree not to discriminate against any employee or applicant for employment because of race, color, religion, sex, national origin, age or handicap, and to comply with all applicable federal and state laws, orders, rules and regulations on this subject during the performance of this Agreement.

This Agreement shall be subject to any and all applicable federal, state and local laws, regulations, and ordinances, as well as any applicable tariffs. To the extent necessary, the parties agree to amend this Agreement to conform to the requirements of any such laws, regulations, ordinances, or tariffs.

AWR shall provide Utility with evidence reasonably requested by Utility to demonstrate compliance herewith.

SECTION 9. Insurance.

9.1 AWR shall, during the term of this Agreement, maintain the following insurance coverages with respect to the Programs, and shall include Utility as an Additional Insured:

9.1.1 Comprehensive General Liability, including Products and Completed Operations, and Contractual Liability with limit of $2,000,000, combined single limit.

9.1.2 Comprehensive Automobile Liability with limit of $2,000,000, combined single limit.

9.1.3 Excess Comprehensive General and Automobile Liability with limit of $2,000,000, excess of $2,000,000.

9.2 AWR shall cause each contractor it engages to perform services under the Programs (collectively "Repair Contractors"), during the term of this Agreement, to maintain the

following insurance coverages with respect to the Programs, which coverages in subsections 9.2.1-9.2.3 shall include Utility as an Additional Insured:

9.2.1 Comprehensive General Liability, including Products and Completed Operations, and Contractual Liability with limit of $1,000,000, combined single limit.

9.2.2 Comprehensive Automobile Liability with limit of $1,000,000, combined single limit.

9.2.3 Excess Comprehensive General and Automobile Liability with limit of $1,000,000, excess of $1,000,000.

9.2.4 Workers Compensation coverage with Statutory Limits.

9.3 AWR shall, and shall cause its Repair Contractors to, furnish Utility with certificates of insurance evidencing coverage as required by this Paragraph.

SECTION 10. Obligations of AWR.

10.1 Development of Informational Materials. AWR shall be responsible for developing, producing, and printing all informational materials for the Programs, and supplying such materials to Utility. AWR shall provide Utility with the opportunity to review and approve all such materials in advance of any distribution to Utility's customers.

10.2 Training. AWR shall provide all necessary training and information to Utility personnel as is necessary to allow Utility to fully perform hereunder. Such training will be specific to educating Utility employees in the operation, terms, and conditions of the Programs. Utility shall make the necessary arrangements to provide a location for such training at or near Utility's facilities.

10.3 Contractors. AWR shall be responsible for engaging qualified independent contractors to perform the services included in the Programs. AWR shall contract with and

maintain a sufficient number of contractors to perform promised services under the Programs, during the term of this Agreement. The cost of all services provided by such contractors shall be paid by AWR. Nothing in this Agreement shall be deemed to create any obligation on the part of Utility to undertake performance of any such services or pay for such services by the contractors engaged by AWR.

10.4 Administration. AWR shall be responsible for coordinating all administrative activities for the Programs and its customers including, but not limited to, enrollments, billings, accounting, marketing, financial analysis and reporting. AWR shall promptly notify Utility of customer enrollments in the Programs, including any changes in enrollment or billing status.

SECTION 11. Joint Obligations of the Parties.

11.1 AWR and Utility agree to cooperate to review existing planning, management and operations practices for the Programs.

SECTION 12. Arbitration.

It is the stated intent and purpose of both parties at all times to reach agreement by negotiation between AWR and Utility, without recourse to arbitration. In the event, however, that such dispute or difference is not settled, either party may request that the matter be referred to arbitration. The demand for arbitration must be submitted to the American Arbitration Association within sixty (60) calendar days after the date of such request, in which case the arbitration shall cover and resolve any then existing controversy or claim between the parties hereto which directly or indirectly arises out of or relates to this Agreement. The arbitration shall be conducted in the Chattanooga, Tennessee in accordance with the rules and procedures then existing under the Commercial Arbitration Rules of the American Arbitration Association, provided that notwithstanding anything to the contrary contained in such Rules the following

shall apply: The arbitration board shall consist of three arbitrators. AWR shall choose one arbitrator and Utility shall choose one arbitrator. If the two arbitrators appointed by the parties fail to agree within five (5) business days upon the selection of a third arbitrator, the third arbitrator shall be selected from a list of arbitrators supplied by the American Arbitration Association or otherwise in accordance with such Rules. After the appointments of the third arbitrator, the arbitration board shall meet as necessary for the purpose of reaching a determination in the dispute or difference, and the decision of the majority of the board, submitted in writing, to AWR and Utility shall be final and binding upon both parties. Judgment upon any decision rendered by such arbitration board may be entered in any court having jurisdiction. Each party shall bear the expense of its own arbitrators and witnesses, and the expenses of the third arbitrator and any general expenses of the arbitration shall be born equally by both parties.

SECTION 13. Force Majeure.

If, because of any act or occurrence beyond the reasonable control of either party, including, without limitation, acts of God, legislation or lawful regulations of any governmental body, court orders, fire, flood, explosion, strikes, labor disputes or shortage, wars or civil commotion, either party is reasonably prevented from performing any or all of its obligations hereunder, and if the party unable to perform shall be required to resume performance of its obligations under this Agreement upon the termination of the aforementioned Force Majeure, any time or date limitations shall be extended to the extent such party is so prevented.

SECTION 14. Assignments.

This Agreement shall not be assigned by either party without the prior written consent of the other party unless such assignment shall be to an affiliate or successor of either party.

SECTION 15. Amendments.

This Agreement may be modified only by a written amendment signed by both parties.

SECTION 16. Notices.

All notices provided for in this Agreement shall be in writing and shall be deemed to have been given when hand delivered or deposited in the U.S. mail, postage prepaid, registered or certified, return receipt requested, as follows:

If to AWR:

American Water Resources, Inc.
1025 Laurel Oak Road
Voorhees, New Jersey 08043
Attention: Walter Lynch, President

If to Utility:

Tennessee American Water Company
1101 Broad Street
Chattanooga, Tennessee 37401
Attention: David B. Schultz, President

SECTION 17. Governing Law.

This Agreement, including the validity thereof and the rights and obligations of the parties thereunder, shall be construed in accordance with, and governed by the laws of the State of Tennessee.

SECTION 18. Indemnification.

18.1 AWR shall, and shall cause its Repair Contractors to, defend, indemnify and hold harmless Utility, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suits and actions (including reasonable attorney's fees), for personal injury, including death, property damage or other injury, to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of AWR, its Repair Contractors, or their respective officers, employees, agents, contractors, and subcontractors in connection with the services rendered to Utility by AWR pursuant to the terms of this Agreement.

18.2 Utility shall defend, indemnify and hold harmless AWR, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suits and actions (including reasonable attorney's fees), for personal injury, including death, property damage or other injury, to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of Utility, its officers, employees, agents, contractors, and subcontractors in connection with the services rendered to AWR by Utility pursuant to the terms of this Agreement.

SECTION 19. No Waiver.

The failure of a party to insist on strict performance of any or all of the terms of this Agreement, or to exercise any right or remedy under this Agreement, shall not constitute a waiver or relinquishment of any nature regarding such right or remedy or any other right or remedy. No waiver of any breach or default hereunder shall be considered valid unless in writing and signed by the party giving such waiver, and no such waiver shall be deemed a waiver of any subsequent breach or default of the same or similar nature.

SECTION 20. Severability.

In case one or more of the covenants, terms or provisions contained in this Agreement shall be held invalid, illegal, or unenforceable in any respect, the validity of the remaining covenants, terms, and provisions contained herein shall be in no way affected, prejudiced, or disturbed and the remaining covenants, terms, and provisions shall remain in full force and effect.

SECTION 21. No Third-Party Beneficiaries.

No customer of the Programs, contractors of AWR, or any other third party shall be deemed a third-party beneficiary of this Agreement.

SECTION 22. Independent Contractor.

It is understood that the relationship of Utility to AWR is that of an independent contractor and not that of an employee and or agent of AWR. None of the employees or agents of Utility shall be considered employees of AWR. None of the employees or agents of AWR shall be considered employees of Utility. Each party shall be wholly responsible and liable for the employment taxes and withholdings due as a result of their performance hereunder.

SECTION 23. Complete Agreement.

This Agreement sets forth the entire understanding of the parties, which supersedes and merges all prior proposals, understandings and all other agreements, oral or written, between the parties relating to the subject matter hereof and my not be modified except in a writing executed by both parties.

SECTION 24. Titles and Headings.

Titles and headings to sections or paragraphs herein are inserted merely for convenience of reference and are not intended to be a part of or to affect the meaning or interpretation of this Agreement.

SECTION 25. Counterparts.

This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

SECTION 26. Condition Precedent.

This Agreement may be conditioned upon any necessary approval of the Tennessee Regulatory Authority.

SECTION 27. Limitation of Liability.

NEITHER PARTY WILL BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES, WHETHER ARISING OUT

OF BREACH OF WARRANTY, BREACH OF CONTRACT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE, ATTRIBUTABLE TO OR RESULTING FROM ITS PERFORMANCE HEREUNDER. In no event will Utility's liability for damages caused by its failure to supply material or perform services in a proper or timely manner exceed the amount paid by AWR to Utility for such materials or services.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives, as of the day and year first above written.

APPENDIX A

Water Line Protection Program:

For a periodic fee, Utility customers may enroll in the Water Line Protection Program that, subject to its terms and conditions, provides a service to repair customer-owned water lines that leak or break due to normal wear and tear.

Sewer Line Protection Program:

For a periodic fee, Utility customers may enroll in the Sewer Line Protection Program that, subject to its terms and conditions, provides a service to clear or repair blocked customer-owned sewer lines that become clogged or blocked due to normal wear and usage.

Exhibit 1

SERVICE ORDER

American Water Resources, Inc. (AWR) hereby engages Tennessee American Water Company (Utility) to perform the following services, pursuant to the Agreement for Support Services executed between the parties on May 1, 2004:

Water and Sewer Line Protection Programs:

1. Distribution of Promotional Materials. See Section 6.1.1 for scope of services.

2. Repair Service Initiation. See Section 6.1.2 for scope of services.

3. Distribution of Customer Surveys. From time to time, AWR may develop customer surveys designed to measure customer satisfaction with the Programs, and if necessary, make Program enhancements. AWR shall submit such survey materials to Utility for review and comment prior to distribution to customers.

4. Billing and Collecting. Utility shall bill each of its customers who AWR identifies as having requested service and billing from Utility by a line item on the customer's water bill. AWR shall furnish reasonable evidence that a customer has requested the service to Utility upon Utility's request. Utility shall collect payments from the enrolled customers and forward same to AWR within fifteen days following the end of each calendar month for amounts collected during such month. All payments made by the customer shall be credited first to payment of any amount owed for utility service furnished by Utility; any remainder shall first be credited to payment of any amount owed for utility service furnished by someone other than Utility but shown as a line item on the bill sent to the customer by Utility; and any remainder shall then be credited to payment of any amount owed to AWR. Utility shall not interrupt, cease or refuse utility service to a customer for non-payment of amounts owed to AWR. AWR shall be responsible for all collection efforts for non-payment by Utility customers for AWR Programs.

**********AUTO**MIXED AADC 430
Jeremy Kierman
1025 Laurel Oak Rd
Voorhees, NJ 08043-3506

SUBJECT: Your responsibility
for Water and Sewer Line repairs
at 2315 E 5th St Apt# B

RESPONSE REQUESTED: 10/31/09

Dear Jeremy Kierman,

As a valued Water Customer, you are receiving this Important Correspondence to advise you of certain property owner responsibilities.

Did you know that normal wear and tear can cause a break in your Water Line and blockage in the Sewer Line that runs through your property? And did you know that, as the property owner, you are responsible for both?

Many homeowners are NOT aware
that Water and Sewer Line damage under their property
is THE LEGAL RESPONSIBILITY OF THE PROPERTY OWNER.

And many don't realize that thousands of dollars
in repair costs are NOT COVERED
BY STANDARD HOMEOWNER INSURANCE POLICIES.

In addition, Jeremy Kierman, many homeowners are NOT aware that they are also **responsible for finding a reliable contractor to do the work.** And that can be a difficult task considering the equipment required to repair an underground Water or Sewer Line.

To help protect our Water Customers, American Water Resources®, an affiliate of Tennessee American Water®, has developed **a low-cost Program that takes all these responsibilities off your shoulders.** And when you

Save $24 a year →

(Over, please)

000003250

enroll during this Special Offer, your cost is **just $12 a month!** (That's a **savings of $24 a year** compared to the cost of protecting your Water and Sewer Lines separately!)

WHENEVER DAMAGE OCCURS: American Water Resources takes on the responsibility to find a reliable contractor in your area.

WHEN REPAIRS BEGIN: American Water Resources is responsible to pay the contractor as much as $4,000 for Water Line repairs ... PLUS ... as much as $8,000 for Sewer Line repairs.

WHEN THE WORK IS DONE: American Water Resources stands by the repairs!

We are pleased to make this valuable Program available only to our Water Customers through our affiliate, American Water Resources, Inc. And we encourage you to enroll as soon as possible.

Enroll during this Special Offer, and your cost is just $12 a month!
(SAVE $24! It's like getting two months a year FREE!)

So please don't delay. I encourage you to complete and return the Immediate Action Form today!

Sincerely,

John Watson
President

P.S. You can't prevent underground water and sewer line damage. But now, for just $12 a month, you can protect yourself against **thousands of dollars** in repairs and **hours of frustration**. Take advantage of our Special Offer and enroll today!

$50 service fee applies for the sewer line program only when a contractor is dispatched to your home.
If you live in a dwelling such as a condo, duplex or townhouse, please contact your local homeowners association to determine if you are responsible for your water and sewer lines, as in some states you would not have ownership of the water line or sewer line.

For complete Terms & Conditions of this program, please go to www.amwaterresources.com/termsandconditions.

IMPORTANT INFORMATION
ABOUT YOUR SEWER LINE

TENNESSEE AMERICAN WATER
1101 Broad St., P.O. Box 6338 • Chattanooga, TN 37401

Good news — your water line is currently covered.

Sample A Sample
TN - SL Brochure Pkg 0210
123 Any Street
Anytown, US 01234-5678

However, your sewer line is not covered and is 3 times more likely to be damaged.

Dear Sample A Sample,

Not long ago you made a smart decision to sign up for the Water Line Protection Program from American Water Resources, an affiliate of Tennessee American Water.

As a valued customer, we want you to know **you are legally responsible for the sewer line extending from your home into the street.** Did you also realize that **most standard homeowner insurance policies do not cover repairs to your sewer line?**

Without any coverage, you would need to contact a contractor, hope repairs are made quickly and correctly, then pay for it out of your own pocket. Since you are already an American Water Resources customer, we want to give you an opportunity to protect yourself from these unexpected worries. Here's how the Sewer Line Protection Program benefits you:

- **You're protected from expensive sewer line repairs including blocked and backed up lines, clogged cleanouts, root invasion and common waste blockage**
- **In case of a problem, call toll-free and a qualified contractor will be quickly dispatched***
- **Easy claims process covers you for up to $8,000 in repairs including excavation, site restoration plus sidewalk and street repaving**
- **American Water Resources takes care of everything and stands behind all the work**

If you enroll now, this important coverage will cost you only $9 a month, a small price to pay for thousands of dollars in protection. For your convenience, the cost can be added to your monthly water bill.

For peace of mind, be sure to enroll in the Sewer Line Protection Program now by calling **1-877-320-4613** or complete and mail the form below using the enclosed postage-paid envelope.

You can't prevent underground sewer line damage, but you can protect yourself from these unexpected costs. Please act now and enroll today.

Sincerely,

John Watson, President

P.S. Please enroll before April 30, 2010 by calling **1-877-320-4613**.
Only $9 per month protects you from thousands of dollars in sewer line repairs.

* $50 service fee applies when a contractor is dispatched to your home.
Typical sewer line ownership extends from the sewer main to your home. Your responsibility may vary.
If you live in a dwelling such as a condo, duplex or townhouse, contact your local homeowners association to determine if you are responsible for your sewer line, as in some states you would not have ownership of the sewer line.
For complete Terms and Conditions of this program, please go to www.amwaterresources.com/termsandconditions.

FOR IMMEDIATE SERVICE
Enroll Now! Call Toll-Free:
1-866-315-4472

Dear Sample A Sample,

Our records indicate that you have not yet taken advantage of the **Water Line Protection Program.** Keep in mind that normal wear and tear can cause sudden leaks or breaks in the water line that runs through your property, and as the owner, you're responsible. Your homeowner insurance policy probably won't provide coverage, so if the water line on your property were to leak or break, you would need to spend a lot of time and money to repair the damage.

You would have to locate a reliable and qualified contractor, pay the contractor thousands of dollars to repair the damage, and worry about whether the job would be done properly. For just $5 a month, you can enroll in the **Water Line Protection Program.** Take a moment to compare what the Program provides versus continuing without protection:

WATER LINE PROTECTION PROGRAM
CHECKLIST OF BENEFITS FOR SAMPLE A SAMPLE

	WHEN YOU'RE COVERED	WHEN YOU'RE NOT COVERED
Reliable, qualified contractor promptly dispatched to your property.	✓ YES	NO
Save up to $5,000 in costly repairs.	✓ YES	NO
Peace-of-mind that comes with this valuable protection.	✓ YES	NO

Tennessee American Water is pleased to introduce this special Water Line Protection Program, offered by our affiliate American Water Resources℠, to cover these unexpected costs. When you consider the time and money you'll save, along with the peace-of-mind protection from the largest water company in the country, I'm sure you'll agree that this Program is one of the best opportunities available to you as a homeowner.

Respond by March 31, 2010 and you'll pay just $5 a month for this valuable protection.

Simply call us toll-free at 1-866-315-4472, or complete and return the Immediate Action Form.

Sincerely,

John Watson
President

P.S. It's time to protect yourself from the expense and worry that a broken water line can cause.

If you live in a dwelling such as a condo, duplex or townhouse please contact your local homeowners association to determine if you are responsible for your water line, as in some states you would not have ownership of the water line.

For complete Terms & Conditions of this program, please go to www.amwaterresources.com/termsandconditions.

PROBLEM:

- A burst pipe floods the kitchen ... the plunger doesn't fix the overflowing toilet ... you can't shower because the drain is totally clogged ... sooner or later most homes experience a plumbing emergency
- It could take days for the repair to be completed
- Emergency repairs can be very expensive

SOLUTION:

The In-Home Plumbing Emergency Program offered by American Water Resources®

DELIVERED TO:
**********AUTO**MIXED AADC 430
Jeremy Kierman
1025 Laurel Oak Rd
Voorhees, NJ 08043-3506

Dear Jeremy Kierman:

You know it's going to happen at the worst possible moment. A toilet overflows. Your sink backs up. Or a water pipe bursts in your basement. That's no time to have to search for a plumber and worry about what the unexpected repair will cost you.

That's why Tennessee American Water is so pleased to introduce you to a great companion to your existing Service Line Protection Program. The NEW In-Home Plumbing Emergency Program is a welcome time-saving and money-saving solution — and as a Service Line Protection subscriber, you're eligible to add this protection at a special discounted rate. It's your one-call solution when an in-home plumbing emergency occurs.

Just make one toll-free call — and have the experts take it from there.

Instead of thumbing through the phone book for names, just call the Emergency Service Hotline 24 hours a day, 365 days a year — and relax. American Water Resources will promptly dispatch a qualified plumber to your home, and pay the bill up to $3,000*! When you consider what you could otherwise pay for an emergency repair of a clogged bathtub drain ... burst frozen water pipe ... blocked toilet and more ... you'll agree this is protection you won't want to be without.

What's more, there's no limit on the number of times you can take advantage of the In-Home Plumbing Emergency Program. A plumbing crisis can happen unexpectedly in any home, and if you value having peace of mind you'll be delighted with this smart and affordable protection.

For just pennies a day, you'll be prepared for the next plumbing emergency.

Because you already subscribe to the Service Line Protection Program, you can save up to 50% on the standard new customer price when you add the In-Home Plumbing Emergency Program. New customers pay up to $7.99 a month, but you'll pay a remarkably affordable price of just $3.99 a month added directly to your water bill ... plus a modest service call fee of $50 no matter if it's nighttime, the weekend, or even a holiday. Imagine what just one after-hours service visit from a plumber could cost!

Please carefully read the enclosed Program terms and conditions; **American Water Resources is committed to customer satisfaction and wants you to understand this program is for plumbing emergencies only and does not cover broken fixtures, faucets, and appliances.** Keep this information for future reference. Then simply return your Priority Enrollment Form in the enclosed envelope, and you'll be on your way to enjoying ready relief from this common homeowner hassle. Do it today, while it's on your mind.

Sincerely,

John Watson
President

P.S. Be prepared for your next plumbing emergency. Enroll in this affordable Program today!

$1,500 for water supply system repairs and $1,500 for wastewater drainage system repairs per occurrence.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: None

Question:

40. Please ***Explain*** how all costs associated with any inspections, repairs, or other work undertaken in connection with the "Service Line Protection Program" offered by ***TAWC*** to its customers are recorded on the books and records of ***TAWC***. Please provide all worksheets, income and expense statements, invoices, and other ***Documents*** that address how these costs are treated for accounting and ratemaking purposes.

Response:

The Company objects to this question on the grounds that the request is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, TAWC does not offer a Service Line Protection Program. See the response to TN-CAPD-01-Q77 and Q78. The program is offered by AWR and the costs of AWR for inspections, repairs and other work related to the Service Line Protection Program are recorded on the books of AWR. See also the Schumaker Report (Exhibit MAM-8 attached to the direct testimony of Mr. Miller at page 42 of 143).

DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: George Conroy

Question:

43. Please ***Identify*** all monthly amounts paid by ***TA WC*** since January 1, 2007, to ***AWWC*** or any ***AWWC*** subsidiary or affiliate, and provide the information as to each such amount in the following format:

Payment Date	Amount of Payment	Purpose of Payment	If Payment for Services, Amount of Time Reflected in Charge	Hourly Rate Change	If for Equipment of Materials, Description of Each Piece of Equipment or Material	Unit Charge for Each Piece of Equipment or Material	Agreement Under Which Provided (89 Service Agreement or Other)

Response:

The Company objects to this question on the grounds that it is unduly burdensome, requests information neither readily available nor in the format requested, and in part is not relevant to the current proceeding.

COC's request involves a voluminous amount of data, which was already provided to the COC in the previous case. Please see the response to TN-COC-01-10 in Docket No. 08-00039.

Also, see the response to TRA-01-Q014, which provides additional information about payments to AWWSC, AWCC and AWR (formerly known as American Anglian Technologies). In addition, see the response to TN-COC-01-Q61 that also provides data responsive to this request.

Please see the attached file identified as TN-COC-01-Q43-ATTACHMENT which presents total Service Company hours and charges for TAWC for the years 2005 through September 2010 and the associated full-time equivalent positions allocated to TAWC by function. TN-COC-01-Q43 Attachment includes a summary schedule that shows the yearly totals and FTE's by function. The other schedules provide a breakdown of the charges by month for the years 2005 through 2010.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: **Michael A. Miller/John Watson**

Other Participating Employees: **None**

Question:

44. Please provide all ***Documents*** that constitute, relate to, or refer to the terms of any contracts (including all attachments and amendments thereto) in effect at any time since January 1, 2006 between ***TAWC*** and ***AWWC, AWWSC, AWR, AWCC,*** or any subsidiary or affiliate of any of them.

Response:

The Company objects to this question on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably likely to lead to the discovery of admissible evidence. Without waiving these objections see the attached document labeled as TN-COC-01-Q44-ATTACHMENT that includes the current contracts between TAWC and AWWSC, AWCC and AWE. The current contract for third party billing of charges related to AWR was provided in the response to TN-COC-01-Q39.

REC'D TN. PUBLIC
SERVICE COMM.
1987 SEP 23 PM 3:03
OFFICE OF THE
EXEC.

AGREEMENT

Agreement dated January 1, 1989, between AMERICAN WATER WORKS SERVICE COMPANY, INC., a Delaware corporation (hereinafter "Service Company"), and TENNESSEE-AMERICAN WATER COMPANY, a Tennessee corporation (hereinafter "Water Company").

The background of this Agreement is that:

1. Both Service Company and Water Company are subsidiaries of American Water Works Company, Inc., a Delaware corporation (hereinafter "American").

2. Water Company has been organized for and is presently engaged in the business of providing potable water as a public utility in the State of Tennessee.

3. Service Company maintains an organization whose officers and employees are familiar with all facets of the water utility business, including the development, business and property of Water Company, and are experienced in the efficient management, financing, accounting and operation of water utility properties and the extension and improvement thereof. The officers and employees of Service Company are qualified to aid, assist and advise Water Company in its business operations through the services to be performed under this Agreement.

4. Service Company has provided administrative and operating services to Water Company for many years, the past 17 years pursuant to an agreement dated January 1,

1971. Because Water Company is of the opinion that it cannot obtain the same quality and diversification of services on a comparable economic basis elsewhere, it proposes to enter into a new agreement with Service Company more specifically defining the types of services available to it.

5. Service Company has entered or proposes to enter into agreements similar to this agreement with other affiliated water companies (hereinafter collectively "Water Companies").

6. The services to be rendered under this agreement are to be rendered by Service Company to Water Companies at their cost to Service Company, as hereinafter provided.

NOW, THEREFORE, in consideration of the premises and mutual agreements herein contained, the Water Company and Service Company agree that:

ARTICLE 1. PERSONNEL AND SERVICES TO BE PROVIDED

1.1 During the term of this agreement and upon the terms and conditions hereinafter set forth, Service Company shall provide corporate guidance for Water Company. In addition to the guidance provided by the officers and employees of Service Company through the coordination of functional activities for all subsidiaries of American, the officers and employees of Service Company shall furnish and Water Company shall purchase from Service Company, the following services: Accounting, Administration, Communication, Corporate Secretarial, Engineering, Financial, Human Resources,

Information Systems, Operation, Rates and Revenue, Risk Management and Water Quality, together with such other services as Water Company and Service Company may agree; provided, however, that Water Company may perform the service with its own personnel or engage another company or person to provide those services on its behalf. Service Company by mutual consent may engage another Company or person to provide such services on its behalf.

1.2 Service Company shall employ qualified officers and employees and those persons shall be available for election by Water Company to serve as officers of Water Company.

1.3 Without limitation, services to be provided by the Service Company shall be rendered as follows:

A. Accounting: Service Company shall assist in the preparation and implementation of accounting methods and procedures to determine that they conform fully to the requirements, rules and regulations of governmental authorities having jurisdiction and review Water Company's monthly financial reports, annual reports and other reports to stockholders and to any governmental authorities. It shall advise and assist in the establishment and maintenance of current record keeping techniques; review accounting procedures, methods and forms; and evaluate systems of internal control for receipt and disbursement of funds, materials and supplies, and other assets. Service Company shall maintain accounting records as required by Water Company. When appropriate, Service Company shall cooperate and consult with Water Company's independent certified public accountants.

Service Company shall assist in the preparation of operating and construction budgets and monitor the control over such budgets by comparing experienced costs to the projections.

Service Company shall prepare or assist in the preparation of federal, state and local tax returns for and to the extent required by Water Company.

B. **Administration**: Service Company shall make qualified employees available to perform or assist in the performance of Water Company's corporate activities. Those employees shall keep themselves informed on all aspects of Water Company's operations and shall regularly visit Water Company's facilities. They shall make recommendations to Water Company for operating expenditures and for additions to and improvements of property, plant and equipment. They shall keep abreast of economic, regulatory, governmental and operational developments and conditions that may affect Water Company; and advise Water Company of any such developments and conditions to the extent that they may be important to Water Company. Service Company shall provide an internal audit staff for periodic audits of accounts, records, policies and procedures of Water Company and submit reports thereon.

C. **Communications**: Service Company shall recommend procedures to promote satisfactory relations with employees, customers, communities and the general public and assist in the preparation of communication materials, (including press releases, brochures, audio visual presentations and speeches) plant tours, public exhibits and displays and other related services to inform the public.

D. **Corporate Secretarial**: Service Company shall maintain, in such places and manner as may be required by applicable law, documents of Water Company, such as minute books, charters, by-laws, contracts, deeds and other corporate records, and shall administer an orderly program of records retention. It shall maintain, or arrange for the maintenance of, records of stockholders of Water Company, prepare or arrange for the preparation of stock certificates, perform duties relating to the transfer of stock and perform other corporate secretarial functions as required including preparation of notices of stockholder and director meetings and the minutes thereof.

Service Company shall review and may assist in the preparation of documents and reports required by Water Company such as deeds, easements, contracts, charters, franchises, trust indentures and regulatory reports and filings.

E. **Engineering**: Service Company shall advise, and provide engineering services to assist Water Company in planning for, operating, maintaining and constructing its facilities.

It shall conduct distribution system surveys and hydraulic analyses and prepare or review maps, charts, operating statistics, reports and other pertinent data.

It shall assist Water Company in the proper maintenance and protection of Water Company properties by periodic inspection of its structures, tanks, reservoirs, dams, wells and electrical and mechanical equipment.

The engineering services provided by Service Company shall also include the conduct of field investigations as necessary to

obtain engineering information and, when required, the preparation of studies, reports, designs, drawings, cost estimates, specifications, and contracts for the construction of additions to or improvements of Water Company's source of supply, treatment plant, pumping stations, distribution system, and such other facilities as Water Company may request. Service Company shall provide a Materials Management Program to arrange for the purchase of equipment, materials, and supplies in volume on a basis advantageous to Water Company and assist in the evaluation of new and existing products and application procedures.

F. **Financial**: Service Company shall assist in the development and implementation of financing programs for Water Company, including the furnishing of advice from time to time on securities market conditions and the form and timing of financing; advise concerning arrangements for the sale of its securities; and assist in the preparation of necessary papers, documents, registration statements, prospectuses, petitions, applications and declarations. It shall prepare reports to be filed with, and reply to inquiries made by, security holders and bond and mortgage trustees.

Service Company shall assist Water Company in cash management including arrangements for bank credit lines, establishment of collection policies, and development of temporary investment programs.

Service Company shall provide assistance to Water Company in the preparation of all financial reports.

G. Human Resources: Service Company shall assist in obtaining qualified personnel for Water Company; in establishing appropriate rates of pay for those employees; and in negotiating with bargaining units representing Water Company employees. It shall carry out training programs for the development of personnel and advise and assist Water Company regarding personnel. It shall also advise and assist Water Company in regard to group employee insurance, pension and benefit plans and in the drafting or revising of those plans when required. It will keep Water Company apprised of all employment laws and develop procedures and controls to assure compliance.

H. Information Systems: Service Company shall make available to Water Company electronic data processing services. Those services shall include customer billing and accounting, preparation of financial statements and other reports including those required by Federal and State agencies.

I. Operation: Service Company shall develop and assist in the implementation of operating procedures to promote the efficient and economic operation of Water Company. Periodic operational reviews will be performed by Service Company personnel and any deviations from adopted procedures will be reported to Water Company.

J. Rates and Revenue: Service Company personnel shall make recommendations for changes in rates, rules and regulations and shall assist Water Company in the conduct of proceedings before, and in its compliance with the rulings of, regulatory bodies having jurisdiction over its operation. These personnel

shall keep abreast of economic and regulatory developments and conditions that may affect Water Company; and advise Water Company of any such developments and conditions to the extent that they may be important to Water Company. Rates and Revenue personnel shall assist in the preparation of rate filings or applications and the supporting documents and exhibits requested or required by the Water Company and their respective regulatory commissions. Service Company shall also provide qualified personnel to testify on Water Company's behalf as required during any regulatory proceedings.

K. Risk Management: Service Company shall provide a Risk Management Program to review the exposures to accidental loss of the Water Company, recommend efficient methods of protection either through the purchase of insurance, self-insurance or other risk management techniques and arrange for the purchase of insurance coverage. It shall also supervise investigation procedures; review claims; and negotiate and assist in, and evaluate proposals for, settlement at the request of Water Company. It shall assist in the establishment of safety and security programs to avoid or minimize risk and loss.

L. Water Quality: Service Company shall assist Water Company to comply with standards of governmental agencies and establish and attain water quality objectives of the Water Company. It shall assist in providing design criteria for processes, coordinating with public agencies, developing approaches and solutions to water quality problems, and providing

technical assistance and general direction for Water Company personnel.

It shall also provide laboratory services for programmed analyses as required by drinking water regulations, and special analyses as required by Water Company.

ARTICLE II. PAYMENT FOR SERVICES

2.1 In consideration for the services to be rendered by Service Company as hereinabove provided, Water Company agrees to pay to Service Company the cost thereof determined as provided in this Article II and in Article III.

2.2 All costs of service rendered by Service Company personnel for Water Company or in common with other Water Companies shall be charged to Water Company based on actual time spent by those personnel as reflected in their daily time sheets or other mutually acceptable means of determination.

2.3 All costs of Service Company incurred in connection with services rendered by Service Company which can be identified and related exclusively to Water Company, shall be charged directly to Water Company.

2.4 All costs incurred in rendering services to Water Company in common with similar services to other Water Companies which cannot be identified and related exclusively to services rendered to a particular Water Company, shall be allocated among all Water Companies so served, or, in the case of costs incurred with respect to services rendered to a particular group of Water

Companies, among the members of such group, based on the number of customers served at the immediately preceding calendar year end.

2.5 Cost for support personnel (secretaries, clerical personnel, clerks, messengers, telephone operators, mail clerks, and other incidental support personnel of the Service Company) as well as the cost of lease payments, depreciation, utilities and other costs associated with leasing office space and equipment by Service Company shall be allocated among the Water Companies on the basis of the proportion of the aggregate cost allocated under Sections 2.3 and 2.4.

ARTICLE III. ALLOWANCE FOR OVERHEAD

3.1 In determining the cost to be assessed by Service Company for the rendering of services to Water Company as herein provided, there shall be added to the salaries of all officers and employees for whose services charges are to be made, a percentage sufficient to cover the general overhead of Service Company, as defined below, properly allocable thereto. Such percentage shall be calculated each month and shall be the ratio of the total general overhead of the Service Company for the month to the total salaries of the employees for whose service charges are to be made to the Water Companies. No general overhead of Service Company shall be added to costs incurred for services of non-affiliated consultants employed by Service Company.

3.2 The term "general overhead" shall include:

(a) pension and insurance premiums paid for the benefit of Service Company employees,

(b) legal and other fees for services rendered to the Service Company,

(c) taxes,

(d) other general office supplies and other similar expenses, and

(e) interest on working capital.

ARTICLE IV. BILLING PROCEDURES AND BOOKS AND RECORDS

4.1 As soon as practicable after the last day of each month, Service Company shall render a bill to Water Company for all amounts due from Water Company for services and expenses for such month plus an amount equal to the estimated cost of such services and expenses for the current month, all computed pursuant to Articles II and III. Such bill shall be in sufficient detail to show separately the charge for each class of service rendered. All amounts so billed shall reflect the credit for payments made on the estimated portion of the prior bill and shall be paid by Water Company within a reasonable time after receipt of the bill therefore.

4.2 Service Company agrees to keep its books and records available at all times for inspection by representatives of Water Company or by regulatory bodies having jurisdiction over Water Company.

4.3 Service Company shall at any time, upon request of Water Company, furnish any and all information required by Water Company with respect to the services rendered by Service Company

hereunder, the costs thereof, and the allocation of such costs among Water Companies.

ARTICLE V. OTHER AGREEMENTS

5.1 It is understood by Water Company that Service Company has entered or may enter into similar agreements with other Water Companies that are affiliated with American to which similar services are to be furnished. Service Company will not enter into agreements to perform similar services for other companies on terms more favorable than those provided herein.

5.2 It is understood by Water Company that Service Company has entered or may enter into an agreement or agreements with American and certain other companies not engaged in the water or sewer service business to which limited services are to be furnished; Water Company consents to such additional agreements, provided, however, that no part of the cost of furnishing such services will be charged to Water Company.

ARTICLE VI. TERM OF AGREEMENT

This agreement shall become effective as of the later of (a) the date first mentioned above or (b) the date the parties receive the last of any necessary approvals of governmental regulatory agencies having jurisdiction in the premises. Upon becoming effective, this agreement shall be the sole agreement between the parties concerning the subject matter hereof and shall supersede all prior agreements, written or oral, including the agreement dated January 1, 1971, which shall terminate on the date this

agreement becomes effective. This agreement shall continue in full force and effect until terminated by either of the parties hereto giving the other party hereto ninety day's notice in writing; provided, however, that this agreement shall terminate as of the date Water Company or Service Company ceases to be an affiliate of American.

IN WITNESS WHEREOF, Service Company and Water Company have caused this agreement to be signed in their respective corporate names by their respective Presidents or Vice Presidents, and impressed with their respective corporate seals attested by their respective Secretaries or Assistant Secretaries, all as of the day and year first above written.

FINANCIAL SERVICES AGREEMENT

THIS AGREEMENT, dated as of June 15, 2000, by and between Tennessee-American Water Company (the "Company") and American Water Capital Corp. ("AWCC").

BACKGROUND

The Company currently performs its own financial services.

However, the Company has determined that it can obtain these services more efficiently through the consolidation of certain necessary management and staff functions with those performed for other entities that may enter into agreement with AWCC substantially similar to this one ("Co-Participants").

AWCC is dedicated to performing such consolidated functions.

Accordingly, the parties have determined to enter into this Agreement for the provision of financial services by AWCC to the Company and for the proper determination and allocation of the costs of providing such services.

Therefore, the parties agree as follows:

AGREEMENT

1. Services. AWCC will provide, either directly or through arrangements with third parties for the benefit of the Company, such financial services as the Company and AWCC may from time to time agree, including but not limited to those more fully described in Appendix I attached to this Agreement.

2. Costs. In consideration of the provision of the services contemplated by paragraph 1, the Company agrees to pay AWCC a portion of the costs and appropriate overhead incurred by AWCC in providing those services, as follows. The costs incurred by AWCC in connection with its bank credit lines and short-term public borrowings will be divided among the Co-Participants in proportion to the maximum principal amount that each Co-Participant requests be made available to it during the course of a year. The costs incurred by AWCC in connection with each long-term borrowing by AWCC will be divided among each Co-Participant in proportion to the principal amount of that borrowing that is loaned to that Co-Participant. AWCC's overhead will be allocated among the Co-Participants in the same proportion as each Co-Participant's long-term and maximum, requested short-term borrowings and investments in a calendar year bear to all of the long and maximum short-term borrowings and investments by all Co-Participants during the same year.

3. Statements. AWCC will prepare and deliver to the Company monthly statements of the services provided by AWCC and amounts payable to AWCC, giving effect to

all the provisions of this Agreement. The Company shall pay the net amount shown on its statement within thirty (30) days after the billing date.

4. Inspection. Upon reasonable notice, AWCC will make available to the Company for its inspection AWCC's books, records, bills, accounts and any other documents which describe or support the costs allocated to the Company under this Agreement.

5. Obligations Not Joint. AWCC and the Company expressly agree: (a) that the obligations of the Company and each Co-Participant to AWCC are several and not joint; (b) that the Company will not be responsible to any Co-Participant, to AWCC or to any assignee or creditor of AWCC for any payment in excess of payments due by the Company to AWCC under this Agreement or a Note in the form attached to this Agreement; and (c) that no Co-Participant will be responsible to the Company, to any other Co-Participant, to AWCC or to any assignee or creditor of AWCC for any payment in excess of payments due by that Co-Participant to AWCC under any agreement substantially similar to this Agreement or under any Note attached to that other agreement. AWCC covenants and agrees that it will require, as a condition to its entering into any such other agreement with a Co-Participant, that such other agreement contains the same provision as that contained in the immediately preceding sentence.

6. Notes. The Company's borrowings under this Agreement will be evidenced by one or more promissory notes in the form of Exhibit A or Exhibit B attached to this Agreement.

7. Non-Exclusivity. Nothing in this Agreement prohibits or restricts the Company from borrowing from third parties, or obtaining services described in this Agreement from third parties, whenever and on whatever terms it deems appropriate.

8. Effectiveness. This Agreement shall be effective as of June 15, 2000, provided that, if prior approval by the regulatory commission of any jurisdiction is required before this Agreement may become effective as to the Company, or before AWCC may provide a particular service hereunder to the Company, this Agreement shall not be effective as to the Company or as to that service, as the case may be, unless and until the required approval has been obtained. Unless and until this Agreement becomes effective as to the Company in whole or in part, the Company shall not be entitled to the benefits of, nor shall it have any rights or duties under, this Agreement. This Agreement may be amended or rescinded only by written instrument signed by the Company and AWCC.

9. Termination. The Company may terminate its participation in this Agreement by giving ten (10) days prior written notice of such termination to AWCC; and (b) AWCC may terminate this Agreement by giving ninety (90) days prior written notice of such termination to the Company. Termination of this Agreement will not affect: (a) the Company's obligations under any Promissory Notes; (b) any party's obligations with respect to any amounts owing under Sections 2 and 3 of this Agreement (including such amounts attributable to obligations of any terminating party under any Promissory Notes that remain outstanding after this Agreement is terminated as to that party); or (c) AWCC's obligations to repay any investments made by a Company pursuant to Appendix I.

10. Copies. This Agreement may be executed by the parties in one or more copies and each executed copy shall be considered an original.

In witness of the foregoing, each of the Company and AWCC has caused its respective corporate seal to be affixed to this Agreement and has caused this Agreement to be signed on its behalf by its duly authorized officers.

APPENDIX I

DESCRIPTION OF FINANCIAL SERVICES

Set forth below is a list of the services which AWCC agrees to provide to the Company upon its request pursuant to the Agreement to which this Appendix is attached.

1. Short-Term Loans. AWCC will provide Short-Term Loans to the Company pursuant to the terms set forth in the promissory notes to be issued by the Company to AWCC, each substantially in the form attached to this Agreement as Exhibit A.

2. Long-Term Borrowings. AWCC will provide loans other than Short-Term Loans to the Company pursuant to the terms set forth in the promissory notes to be issued by the Company to AWCC, each substantially in the form attached hereto as Exhibit B.

3. Cash Management. Cash not required by the Company to pay its daily disbursements or to pay when due the principal of and interest on, the Company's borrowings from AWCC other than Short-Term Loans will be used by AWCC first to reduce the outstanding principal balance of the Company's Short-Term Loans owing to AWCC and any excess will be deemed to be invested with AWCC and will earn a daily rate of interest that is equal to the interest income earned by AWCC on those funds. Upon the request of that Company, AWCC shall execute one or more promissory notes in favor of the Company, in form and substance substantially similar to the Promissory Note attached as Exhibit A to the Agreement as evidence of such investment.

EXHIBIT A
PROMISSORY NOTE
FOR SHORT-TERM LOANS

$_____ _____, 2000

FOR VALUE RECEIVED, [NAME OF COMPANY], a _____ corporation (herein "Borrower") hereby promises to pay ON DEMAND to the order of American Water Capital Corp., a Delaware corporation ("Lender"), in same day funds at its offices at Voorhees, New Jersey or such other place as Lender may from time to time designate, the principal sum of _____ dollars ($_____) (the "Maximum Principal Sum"), or such lesser amount as shall equal the aggregate unpaid principal amount of the loans made by Lender to Borrower (other than loans evidenced by a promissory note under which the principal amount is due and payable in one or more scheduled installments more than one year after the date of its issue), together with interest thereon from the date hereof until paid in full. Interest will be charged on the unpaid outstanding principal balance of this Note at a rate per annum equal to Lender's actual cost of funds to make such loan, such rate to change as Lender's actual cost of funds changes. Interest on borrowings shall be due and payable on the first business day of each month, commencing with the first business day of the month after the month in which this Note is executed. In the absence of manifest error, the records maintained by Lender of the amount and term, if any, of borrowings hereunder shall be deemed conclusive.

Borrower may borrow, repay and reborrow hereunder in amounts which do not, in the aggregate outstanding at any time, exceed the Maximum Principal Sum.

The occurrence of one or more of any of the following shall constitute an event of default hereunder:

(a) Borrower shall fail to make any payment of principal and/or interest due hereunder or under any other promissory note between Lender and Borrower within five business days after the same shall become due and payable, whether at maturity or by acceleration or otherwise;

(b) Borrower shall apply for or consent to the appointment of a receiver, trustee or liquidator of itself or any of its property, admit in writing its inability to pay its debts as they mature, make a general assignment for the benefit of creditors, be adjudicated a bankrupt or insolvent or file a voluntary petition in bankruptcy or a petition or an answer seeking reorganization or an arrangement with creditors or to take advantage of any bankruptcy, reorganization, insolvency, readjustment of debt, dissolution or liquidation of law or statute, or an answer admitting the material allegations of a petition filed against it in any proceeding under any such law, or if action shall be taken by Borrower for the purposes of effecting any of the foregoing; or

(c) Any order, judgment or decree shall be entered by any court of competent jurisdiction, approving a petition seeking reorganization of Borrower or all or a substantial part of the assets of Borrower, or appointing a receiver, trustee or liquidator of

Borrower or any of its property, and such order, judgment or decree shall continue unstayed and in effect for any period of sixty (60) days.

Upon the occurrence of any event of default, the entire unpaid principal sum hereunder plus all interest accrued thereon plus all other sums due and payable to Lender hereunder shall, at the option of Lender, become due and payable immediately. In addition to the foregoing, upon the occurrence of any event of default, Lender may forthwith exercise singly, concurrently, successively or otherwise any and all rights and remedies available to Lender by law, equity, statute or otherwise.

Borrower hereby waivers presentment, demand, notice of nonpayment, protest, notice of protest or other notice of dishonor in connection with any default in the payment of, or any enforcement of the payment of, all amounts due hereunder. To the extent permitted by law, Borrower waives the right to any stay of execution and the benefit of all exemption laws now or hereafter in effect.

Following the occurrence of any event of default, Borrower will pay upon demand all costs and expenses (including all amounts paid to attorneys, accountants, and other advisors employed by Lender), incurred by Lender in the exercise of any of its rights, remedies or powers hereunder with respect to such event of default, and any amount thereof not paid promptly following demand therefor shall be added to the principal sum hereunder and will bear interest at the contract rate set forth herein from the date of such demand until paid in full. In connection with and as part of the foregoing, in the event that this Note is placed in the hands of an attorney for the collection of any sum payable hereunder, Borrower agrees to pay reasonable attorneys' fees for the collection of the amount being claimed hereunder, as well as all costs, disbursements and allowances provided by law.

If for any reason one or more of the provisions of this Note or their application to any entity or circumstances shall be held to be invalid, illegal or unenforceable in any respect or to any extent, such provisions shall nevertheless remain valid, legal and enforceable in all such other respects and to such extent as may be permissible. In addition, any such invalidity, illegality or unenforceability shall not affect any other provisions of this Note, but this Note shall be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

This Note inures to the benefit of Lender and binds Borrower and Lender's and Borrower's respective successors and assigns, and the words "Lender" and "Borrower" whenever occurring herein shall be deemed and construed to include such respective successors and assigns.

This Promissory Note is one of the promissory notes referred to in the Financial Services Agreement dated as of June 15, 2000 between Borrower and Lender to which reference is made for a statement of additional rights and obligations of the parties hereto.

IN WITNESS WHEREOF, Borrower has executed this Promissory Note the day and year first written above.

[BORROWER]

Name and Title:

EXHIBIT B
PROMISSORY NOTE
FOR LONG-TERM BORROWINGS

$_____ _____, 2000

FOR VALUE RECEIVED, [NAME OF COMPANY], a _____ corporation (herein "Borrower") hereby promises to pay to the order of American Water Capital Corp., a Delaware corporation ("Lender"), in same day funds at its offices at _____ or such other place as Lender may from time to time designate, the principal sum of _____ dollars ($_____), together with interest thereon from the date hereof until paid in full. Interest shall be charged on the unpaid outstanding principal balance hereof at a rate per annum equal to the rate paid and to be paid by Lender with respect to the borrowings it made in order to provide funds to Borrower hereunder. Interest on borrowings shall be due and payable in immediately available funds on the same business day on which the Lender must pay interest on the borrowings it made in order to provide funds to the Borrower hereunder. The principal amount hereof shall be due and payable hereunder at such times and in such amounts and in such installments hereunder as the Lender must pay with respect to the borrowings it made in order to provide funds to the Borrower hereunder. Lender has provided Borrower with a copy of the documentation evidencing the borrowings made by Lender in order to provide funds to Borrower hereunder. In the absence of manifest error, such documentation and the records maintained by Lender of the amount and term, if any, of borrowings hereunder shall be deemed conclusive.

The occurrence of one or more of any of the following shall constitute an event of default hereunder:

(a) Borrower shall fail to make any payment of principal and/or interest due hereunder or under any other promissory note between Lender and Borrower within five business days after the same shall become due and payable, whether at maturity or by acceleration or otherwise;

(b) Borrower shall apply for or consent to the appointment of a receiver, trustee or liquidator of itself or any of its property, admit in writing its inability to pay its debts as they mature, make a general assignment for the benefit of creditors, be adjudicated a bankrupt or insolvent or file a voluntary petition in bankruptcy or a petition or an answer seeking reorganization or an arrangement with creditors or to take advantage of any bankruptcy, reorganization, insolvency, readjustment of debt, dissolution or liquidation of law or statute, or an answer admitting the material allegations of a petition filed against it in any proceeding under any such law, or if action shall be taken by Borrower for the purposes of effecting any of the foregoing; or

(c) Any order, judgment or decree shall be entered by any court of competent jurisdiction, approving a petition seeking reorganization of Borrower or all or a substantial part of the assets of Borrower, or appointing a receiver, trustee or liquidator of Borrower or any of its property, and such order, judgment or decree shall continue unstayed and in effect for any period of sixty (60) days.

Upon the occurrence of any event of default, the entire unpaid principal sum hereunder plus all interest accrued thereon plus all other sums due and payable to Lender hereunder shall, at the option of Lender, become due and payable immediately. In addition to the foregoing, upon the occurrence of any event of default, Lender may forthwith exercise singly, concurrently, successively or otherwise any and all rights and remedies available to Lender by law, equity, statute or otherwise.

Borrower hereby waivers presentment, demand, notice of nonpayment, protest, notice of protest or other notice of dishonor in connection with any default in the payment of, or any enforcement of the payment of, all amounts due hereunder. To the extent permitted by law, Borrower waives the right to any stay of execution and the benefit of all exemption laws now or hereafter in effect.

Following the occurrence of any event of default, Borrower will pay upon demand all costs and expenses (including all amounts paid to attorneys, accountants, and other advisors employed by Lender), incurred by Lender in the exercise of any of its rights, remedies or powers hereunder with respect to such event of default, and any amount thereof not paid promptly following demand therefor shall be added to the principal sum hereunder and will bear interest at the contract rate set forth herein from the date of such demand until paid in full. In connection with and as part of the foregoing, in the event that this Note is placed in the hands of an attorney for the collection of any sum payable hereunder, Borrower agrees to pay reasonable attorneys' fees for the collection of the amount being claimed hereunder, as well as all costs, disbursements and allowances provided by law.

If for any reason one or more of the provisions of this Note or their application to any entity or circumstances shall be held to be invalid, illegal or unenforceable in any respect or to any extent, such provisions shall nevertheless remain valid, legal and enforceable in all such other respects and to such extent as may be permissible. In addition, any such invalidity, illegality or unenforceability shall not affect any other provisions of this Note, but this Note shall be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

This Note inures to the benefit of Lender and binds Borrower and Lender's and Borrower's respective successors and assigns, and the words "Lender" and "Borrower" whenever occurring herein shall be deemed and construed to include such respective successors and assigns.

This Promissory Note is one of the promissory notes referred to in the Financial Services Agreement dated as of June 15, 2000 between Borrower and Lender to which reference is made for a statement of additional rights and obligations of Lender and Borrower.

IN WITNESS WHEREOF, Borrower has executed this Promissory Note the day and year first written above.

[BORROWER]

By:_____
Name and Title:

GAC LEASE AGREEMENT

CHATTANOOGA, TENNESSEE

This AGREEMENT made this 26th day of July, 2000, between American Water Resources, Inc.: (dba American Carbon Services) a Virginia corporation, having its principal office at 1025 Laurel Oak Road, Voorhees, New Jersey (hereinafter "ACS"); and Tennessee- American Water Company, a Tennessee corporation, having its principal office in Chattanooga, Tennessee (hereinafter "Tennessee");

WHEREAS, ACS provides custom Granular Activated Carbon ("GAC") and carbon reactivation services to the potable water industry; and

WHEREAS, Tennessee has a need for GAC for the purpose of Taste & Odor, ("T&O") control at its Chattanooga, Tennessee water plant; and

WHEREAS ACS is willing to provide GAC to Tennessee on a lease basis; and

WHEREAS, Tennessee desires to contract with ACS to provide for all GAC that Tennessee will contract for in 2000, 2001 and 2002.

NOW THEREFORE, in consideration of the mutual promises contained herein, Tennessee and ACS agree as follows:

A. SERVICES

1. ACS will pick up spent GAC requiring reactivation from the filters during the fourth quarters of 2000, 2001 and 2002 in accordance with Exhibit C, hereto, and transport the spent GAC to the GAC reactivation plant in Columbus, Ohio during the initial term of this contract on a schedule agreed to by the parties. ACS will provide all equipment and labor to operate the equipment for the

removal and replacement of all GAC at the Chattanooga, Tennessee water plant. Equipment shall include, but not be limited to eductors, transfer hose, booster pump and all-miscellaneous fittings and connections to permit the filter media removal.

2. ACS will reactivate all spent GAC and will return all reactivated GAC meeting the quality control specifications, set forth in Exhibit A, hereto. At the time of delivery of the GAC, ACS will provide Quality Control Data, i.e., Certificate of Analysis for each truckload of GAC. ACS will provide all virgin carbon required for make up returning to Tennessee the required volume fill for each filter. Tennessee acknowledges that ACS has title to and is the owner of all GAC supplied by ACS under this Agreement. Tennessee may not remove the GAC from the filters or cause the GAC to be removed except for emergency maintenance in accordance with the terms of this Agreement.

3. ACS will perform testing on all carbon supplied under this Agreement every six months. The first testing shall occur during the month of May 2001. The testing shall include Iodine Number, Apparent Density, Abrasion Number, Total Ash and Screen Analysis.

4. After the GAC has been in the filter for thirty-six (36) months, Tennessee may, during the terms of this Agreement; elect to (a) have ACS reactivate the GAC in accordance with paragraphs B.1, B.2, B.3 or B.4. of this Agreement, (b) have ACS remove the GAC in accordance with paragraph B.5. below, or (c) maintain the GAC in service for a period not to exceed six (6) months in accordance with paragraph B.5.

5. Tennessee will provide the necessary water, electricity and suitable drainage to accomplish the transfer of all carbon into and out of Tennessee's filters.

B. CONSIDERATION

1. Tennessee shall pay ACS for the services provided under clauses 1 through 3 of

Section A, a monthly fee of $1,280.00 per Aldrich filters #1, and #3, and $561.00 per convention filters #13 - #20, beginning on the first day of the month following installation of GAC in the filters in 2000 and each month thereafter for thirty-five (35) months.

2. Tennessee will pay to ACS for the services provided under clauses 1 through 3 of Section A, a monthly fee of $805.00 per conventional filters #7 – #12, beginning on the first day of the month following installation of the GAC in the filters in 2000 and each month thereafter for twenty-three (23) months.

3. Tennessee will pay to ACS for the services provided under Clauses 1 through 3 of Section A, a monthly fee of $1,333.00 per Aldrich filters #4, #6 and #8 and $584.00 per convention filters #1 - #6, beginning on the first day of the month following installation of GAC in the filters in 2001 and each month thereafter for thirty-five (35) months.

4. Tennessee will pay to ACS for the services provided under Clauses 1 through 3 of Section A, a monthly fee of $1,386.00 per Aldrich filters #2, #5, and #7, and $616.00 per conventional filters #7 -#12 beginning on the first day of the month following installation of GAC in the filters in 2002 and each month thereafter for thirty-five (35) months.

5. In the event that Tennessee elects to maintain the GAC in service beyond the normal thirty-six (36) month warranty period, Tennessee shall pay ACS a monthly fee of one-half of the applicable monthly fee shown in Section B.1, B.2, or B.4 per filter for all months beyond thirty-six (36) that the GAC is in service. In the event that Tennessee elects to maintain the GAC in service beyond twenty-four (24) month warranty period, Tennessee shall pay ACS a monthly fee of one-half of the applicable monthly fee shown in Section B.2 per filter for all months beyond twenty-four (24) that the GAC is in service.

6. In the event that Tennessee elects to terminate this Agreement as provided in Section D below, not enter into a renewal agreement or otherwise have the GAC removed from the filters, ACS will provide the services in Section A.4 and Tennessee will pay ACS for the actual cost of such services. The payment shall be due in thirty (30) days after the invoice date.

C. WARRANTY

1. ACS warrants that the GAC supplied under this Agreement under Sections B.1, B.3 and B.4 will, for a period of thirty-six (36) months after installation, provide acceptable T&O control as detailed in Exhibit B, hereto, as well as meet all state criteria regarding filter media specifications. ACS warrants that the GAC supplied under this Agreement under Section B.2 will, for a period of twenty-four (24) months after installation provide acceptable T&O control as detailed in Exhibit B, hereto, as well as meet all state criteria regarding filter media specifications.

D. TERM

1. The initial term of this Agreement shall begin upon installation of GAC filters in the fourth quarter of 2000 as shown in Exhibit C, hereto, and continue for a period of sixty (60) months. At the end of the initial term, this Agreement shall be automatically extended on a month-to-month basis unless and until Tennessee provides not less than thirty (30) days prior written notice to ACS of termination, provided, however, that any such extension shall not extend the warranty of any GAC covered under Section C beyond thirty-six (36) months after installation.

E. FORCE MAJEURE

Either party hereto shall be excused to the extent that its performance is prevented by any circumstance reasonably beyond its control, including, but not limited to, fire,

explosion, strike, labor dispute, war, act of God, riot, or action of any governmental authority.

F. GOVERNING LAW

This Agreement shall be governed and construed in accordance with the laws of the state of Tennessee without giving effect to conflict of law principles.

G. NOTICES

All notices required under this Agreement shall be given by Certified Mail, Return Receipt Requested and shall be deemed made when deposited in the U.S. Mails properly addressed, with postage prepaid, as follows:

American Water Resources, Inc.
1025 Laurel Oak Road
P.O. Box 1770
Voorhees, NJ 08043
Attn: Ray Lee, President

Tennessee-American Water Company
1101 Broad Street
Chattanooga, TN 37402
Attn: William F. L'Ecuyer, President

H. TAXES

The fees provided for in this Agreement to be paid by Tennessee do not include any taxes or other assessments. Tennessee agrees to pay all taxes or assessments imposed on the services to be provided by ACS except penalties and fines on civil or criminal judgements or settlements arising from a regulatory, administrative, legal or judicial action.

I. MISCELLANEOUS

1. This Agreement shall not be assignable by either party without the written consent of the other party, which consent shall not unreasonably be withheld. Any assignees shall assume all the

obligations of this Agreement and the assignor shall not be relived of its obligations under this Agreement by reason of an assignment.

2. This Agreement constitutes the entire Agreement between the parties. All previous representations relative hereto, either written or oral, are hereby annulled and superseded. No modifications shall be binding on either party unless it shall be in writing and signed by an authorized officer of both parties.

3. Any waiver by either party of any provision or condition of this Agreement shall not be construed or deemed to be a waiver of any other provisions or conditions of this Agreement nor a waiver of a subsequent breach of the same provision or condition unless such waiver be so expressed in writing and signed by the party to be bound.

4. If any provision contained herein is held to be unenforceable by a court of law or equity, this Agreement shall be construed as if such provisions did not exist and the unenforceability of such provision shall not be held to render any other provision of this Agreement unenforceable.

5. ACS hereby agrees to indemnify, defend and save harmless Tennessee against any and all liability, loss, damage, costs or expense which Tennessee may incur, suffer or be required to pay by any release of hazardous materials, hazardous wastes or hazardous substances, which release arises out of or occurs in connection with the acts of transportation, handling, treatment, storage, disposal or other activity in connection with the GAC which is the subject hereof for any cause of action whatsoever nature arising from or as a result of ACS's failure to perform in accordance with this Agreement or ACS's violation of any Federal, State or local laws or regulations in its performance under this Agreement.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives.

Uniformity Coefficient	2.1 maximum
Moisture	2% maximum
Abrasion Number	75 minimum
Typical Mesh Size	8 X 30 mm

EXHIBIT B

WARRANTY

ACS warrants that under normal conditions, the GAC provided under this Agreement shall perform the function of adsorption of dissolved organics which contribute to taste and odors during the life of the warranty. For purposes of warranty, effective T&O control is defined as the reduction of adsorbable dissolved odors such that the threshold order number of the GAC filtered water as measured by the procedure defined in "Standard Methods for the Examination of Water and Wastewater", 20th Edition, shall not persistently exceed two (2) in the GAC filtered plant effluent for four (4) consecutive days with the treatment plant in normal operation. The warranty will begin on the date of installation of the GAC and continue for thirty-six (36) months thereafter. The warranty is contingent on the following:

A. If the concentration of organics in the raw water supply should greatly exceed general background levels, as in the case of an accidental industrial discharge, chemical spill or other adversity, it may be necessary for Tennessee to initiate emergency procedures such as a complete bypass of contaminated water during the course of abnormal conditions. If emergency measures are not taken immediately to prevent the GAC from being exposed to excessive levels of organic contaminants the warranty will be voided.

B. Normal treatment of the water prior to GAC filtration shall continue to be practiced. This includes suitable disinfection, coagulation and clarification of the raw water and stabilization of the clarified water before GAC filtration.

C. Average and maximum filtration rates will not exceed 6.1 and 9.2 gallons per minute per square foot, respectively.

D. The GAC shall be maintained by Tennessee in the filters with the exception of a possible loss of up to one (1) inch of GAC bed depth per year due to attrition. If losses should exceed one (1) inch of bed depth in any filter during any one-(1) year of operation, the excess GAC loss will be replaced. Tennessee shall pay ACS for any such replacement of GAC.

E. The water plant filters shall be maintained in good operating condition and in accordance with accepted industry practice. If the GAC fails to perform due to encrustation inorganic precipitates, this shall not be considered to be a breach of the warranty and Tennessee shall bear the cost of cleaning the GAC to restore performance, in accordance with procedures provided by ACS. Should the GAC during the warranty period fail to perform in accordance with the warranty. ACS shall, at its sole option, either reactivate or replace all or part of the GAC to restore

its capability to meet the warranty. All cost to bring the GAC back into compliance with the terms of this warranty shall be for the account of ACS.

EXCEPT AS SET FORTH IN THIS EXHIBIT B, ACS MAKES NO WARRANTY EXPRESSED OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE GAC OR THE SERVICES TO BE PROVIDED UNDER THIS AGREEMENT. ACS SHALL HAVE NO LIABILITY FOR ANY INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF A BREACH OF THIS WARRANTY. TENNESSE'S SOLE REMEDY FOR ANY BREACH OF THIS WARRANTY SHALL BE TO REQUIRE ACS TO EITHER REACTIVATE OR REPLACE CARBON AS PROVIDED ABOVE.

GAC LEASE AGREEMENT

CHATTANOOGA, TENNESSEE

This AGREEMENT made this _____day of_____, 2003, between American Water Resources, Inc., a Virginia corporation, having its principal office at 1025 Laurel Oak Road, Voorhees, New Jersey (hereinafter "ACS"); and Tennessee- American Water Company, a Tennessee corporation, having its principal office in Chattanooga, Tennessee (hereinafter "Tennessee");

WHEREAS, ACS provides custom Granular Activated Carbon ("GAC") and carbon reactivation services to the potable water industry; and

WHEREAS, Tennessee has a need for GAC for the purpose of Taste & Odor, ("T&O") control at its Chattanooga, Tennessee water plant; and

WHEREAS ACS is willing to provide GAC to Tennessee on a lease basis; and

WHEREAS, Tennessee desires to contract with ACS to provide for all GAC that Tennessee will contract for in 2004, 2005 and 2006.

NOW THEREFORE, in consideration of the mutual promises contained herein, Tennessee and ACS agree as follows:

A. SERVICES

1. ACS will pick up spent GAC requiring reactivation from the filters during the fourth quarters of 2003, 2004 and 2005 in accordance with Exhibit C, hereto, and transport the spent GAC to the GAC reactivation plant in Columbus, Ohio during the initial term of this contract on a schedule agreed to by the parties. ACS will provide all equipment and labor to operate the equipment for the removal and replacement of all GAC at the Chattanooga,

Tennessee water plant. Equipment shall include, but not be limited to eductors, transfer hose, booster pump and all-miscellaneous fittings and connections to permit the filter media removal.

2. ACS will reactivate all spent GAC and will return all reactivated GAC meeting the quality control specifications, set forth in Exhibit A, hereto. At the time of delivery of the GAC, ACS will provide Quality Control Data, i.e., Certificate of Analysis for each truckload of GAC. ACS will provide all virgin carbon required for make up returning to Tennessee the required volume fill for each filter. Tennessee acknowledges that ACS has title to and is the owner of all GAC supplied by ACS under this Agreement. Tennessee may not remove the GAC from the filters or cause the GAC to be removed except for emergency maintenance in accordance with the terms of this Agreement.

3. ACS will perform testing on all carbon supplied under this Agreement every six months. The first testing shall occur during the month of May 2004. The testing shall include Iodine Number, Apparent Density, Abrasion Number, Total Ash and Screen Analysis.

4. After the GAC has been in the filter for thirty-six (36) months, Tennessee may, during the terms of this Agreement; elect to (a) have ACS reactivate the GAC in accordance with paragraphs B.1, B.2, B.3 or B.4. of this Agreement, (b) have ACS remove the GAC in accordance with paragraph B.5. below or (c) maintain the GAC in service for a period not to exceed one (1) year in accordance with paragraph B.5.

5. Tennessee will provide the necessary water, electricity and suitable drainage to accomplish the transfer of all GAC into and out of Tennessee's filters.

B. CONSIDERATION

1. Tennessee shall pay ACS for the services provided under clauses 1 through

3 of Section A, a monthly fee of $1,297.46 per Aldrich filters #1, and #3, and $568.03 per conventional filters #13 - #20, beginning on the first day of January following installation of GAC in the filters in 2003 and each month thereafter for thirty-five (35) months.

2. Tennessee will pay to ACS for the services provided under Clauses 1 through 3 of Section A, a monthly fee of $1,342.53 per Aldrich filters #4, #6 and #8 and $587.76 per convention filters #1 - #6, beginning on the first day of January following installation of GAC in the filters in 2004 and each month thereafter for thirty-five (35) months.

3. Tennessee will pay to ACS for the services provided under Clauses 1 through 3 of Section A, a monthly fee of $1,376.85 per Aldrich filters #2, #5, and #7, and $602.78 per conventional filters #7 -#12 beginning on the first day of January following installation of GAC in the filters in 2005 and each month thereafter for thirty-five (35) months.

4. In the event that Tennessee elects to maintain the GAC in service beyond the normal thirty-six (36) month warranty period, Tennessee shall pay ACS a monthly fee of one-half of the applicable monthly fee shown in Section B.1, B.2, or B.4 per filter for all months beyond thirty-six (36) that the GAC is in service.

5. If Tennessee elects to terminate this Agreement as provided in Section D below, not enter into a renewal agreement or otherwise have the GAC removed from the filters, ACS will provide the services in Section A.4 and Tennessee will pay ACS for the actual cost of such services. The payment shall be due in thirty (30) days after the invoice date.

C. WARRANTY

1. ACS warrants that the GAC supplied under this Agreement under Sections B.1, B.3 and B.4 will, for a period of thirty-six (36) months after installation, provide acceptable T&O control as detailed in Exhibit B, hereto, as well as meet all state criteria regarding filter media specifications.

D. TERM

1. The initial term of this Agreement shall begin upon installation of GAC filters in the fourth quarter of 2003 as shown in Exhibit C, hereto, and continue for a period of sixty (60) months. At the end of the initial term, this Agreement shall be automatically extended on a month-to-month basis unless and until Tennessee provides not less than thirty (30) days prior written notice to ACS of termination, provided, however, that any such extension shall not extend the warranty of any GAC covered under Section C beyond thirty-six (36) months after installation.

E. FORCE MAJEURE

Either party hereto shall be excused to the extent that its performance is prevented by any circumstance reasonably beyond its control, including, but not limited to, fire, explosion, strike, labor dispute, war, act of God, riot, or action of any governmental authority.

F. GOVERNING LAW

This Agreement shall be governed and construed in accordance with the laws of the state of Tennessee without giving effect to conflict of law principles.

G. NOTICES

All notices required under this Agreement shall be given by Certified Mail, Return Receipt Requested and shall be deemed made when deposited in the U.S. Mails properly addressed, with postage prepaid, as follows:

American Water Resources, Inc.
1025 Laurel Oak Road
Voorhees, NJ 08043
Attn: President

Tennessee-American Water Company
1101 Broad Street
Chattanooga, TN 37402
Attn: President

H. TAXES

The fees provided for in this Agreement to be paid by Tennessee do not include any taxes or other assessments. Tennessee agrees to pay all taxes or assessments imposed on the services to be provided by ACS except penalties and fines on civil or criminal judgments or settlements arising from a regulatory, administrative, legal or judicial action.

I. MISCELLANEOUS

1. This Agreement shall not be assignable by either party without the written consent of the other party, which consent shall not unreasonably be withheld. Any assignees shall assume all the obligations of this Agreement and the assignor shall not be relived of its obligations under this Agreement by reason of an assignment.

2. This Agreement constitutes the entire Agreement between the parties. All

previous representations relative hereto, either written or oral, are hereby annulled and superseded. No modifications shall be binding on either party unless it shall be in writing and signed by an authorized officer of both parties.

3. Any waiver by either party of any provision or condition of this Agreement shall not be construed or deemed to be a waiver of any other provisions or conditions of this Agreement nor a waiver of a subsequent breach of the same provision or condition unless such waiver be so expressed in writing and signed by the party to be bound.

4. If any provision contained herein is held to be unenforceable by a court of law or equity, this Agreement shall be construed as if such provisions did not exist and the unenforceability of such provision shall not be held to render any other provision of this Agreement unenforceable.

5. ACS hereby agrees to indemnify, defend and save harmless Tennessee against any and all liability, loss, damage, costs or expense which Tennessee may incur, suffer or be required to pay by any release of hazardous materials, hazardous wastes or hazardous substances, which release arises out of or occurs in connection with the acts of transportation, handling, treatment, storage, disposal or other activity in connection with the GAC which is the subject hereof for any cause of action whatsoever nature arising from or as a result of ACS's failure to perform in accordance with this Agreement or ACS's violation of any Federal, State or local laws or regulations in its performance under this Agreement.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives.

REACTIVATED GAC SALE AGREEMENT
2009

THIS REACTIVATED GAC SALE AGREEMENT ("Agreement") is agreed to as of the 3rd day of February, 2009 ("Effective Date"), by and between AAET, L.P., a Delaware limited partnership, having its principal office at 1025 Laurel Oak Road, Voorhees, New Jersey 08043 (hereinafter, "ACS") and Tennessee-American Water Company, a Tennessee corporation, having its principal office at 1101 Broad Street, Chattanooga, Tennessee 37402 (hereinafter, "TAWC").

RECITALS

WHEREAS, TAWC owns and operates a water treatment plant in Chattanooga, Tennessee ("Plant"), which treats water for the purpose of taste and odor ("T&O") control using, among other things, Granular Activated Carbon ("GAC") media; and

WHEREAS, ACS owns and operates, and also contracts the use of, GAC custom reactivation facilities (collectively, "Facility"), which reactivate GAC to be used, among other things, by treatment plants in the potable water industry; and

WHEREAS, ACS leased certain GAC media to TAWC under a separate agreement, for the use in Aldrich Unit #3 and Aldrich Unit #4 (each, a "Filter" and collectively, "Filters") located in the Plant; and

WHEREAS, the GAC located in the Filters has reached the end of its useful life and requires reactivation; and

WHEREAS, TAWC and ACS have agreed that ACS would remove the leased GAC media used in the Filters and reactivate it at ACS's Facility ("Reactivated GAC"); and

WHEREAS, TAWC wishes ACS to replace the Reactivated GAC in the Filters, at which time TAWC will purchase the Reactivated GAC from ACS; and

WHEREAS, ACS has agreed to replace the Reactivated GAC in the Filters and sell the Reactivated GAC to TAWC.

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the adequacy of which is hereby acknowledged, and intending to be legally bound, the parties hereto agree as follows:

A. Services/Transfer of Ownership

1. Following the Effective Date of this Agreement, ACS will install the Reactivated GAC in the Filters, ensuring that it meets the requirements set forth in Section K., below. Once installed, TAWC will assume ownership of and title to the Reactivated GAC.

B. Term

1. The term of this Agreement shall begin as of the Effective Date and end upon conclusion of the Warranty Period (as defined below) ("Term"), subject to the termination provisions set forth hereinbelow. It is understood and agreed by and between the parties that the individual Filters will have distinct Warranty Period expiration dates, which will be determined by the date the Reactivated GAC is returned to the filter following reactivation. Accordingly, the Term will conclude upon the later of the Warranty Period expiration dates.

C. Consideration

1. In consideration of the provision of Reactivated GAC, transfer of ownership of same, and the respective Warranty Period for each Filter, TAWC shall compensate ACS as set forth below:

Chattanooga Plant	
Year	**Unit Price/Cubic Foot of GAC**
2009	$57.05

2. ACS will invoice TAWC for the services performed following reinstallation of the Reactivated GAC in its respective Filter. In instances where ACS will be performing services on multiple filters concurrently, ACS will submit its charge for

the work performed on both Filters in one invoice.

3. ACS will transmit invoices to the "Shared Services Center" of American Water Works Company, Inc., and should likewise direct a copy to the attention of the following TAWC representative, unless and until TAWC designates a different individual:

John Watson
Chattanooga
Tennessee American Water Company
1101 Broad Street.
Chattanooga, Tennessee 37402
Office: 423-755-7607
E-mail: john.Watson@amwater.com
Workbasket: A26AMGR02

4. TAWC shall remit payment to ACS thirty (30) days after the receipt of ACS's invoice in the Shared Services Center JDE system. If TAWC fails to timely remit payment to ACS, TAWC shall pay interest on all outstanding amounts due at a rate of prime (as published in The Wall Street Journal), plus three percent (3%). Such interest shall be calculated and added to any unpaid amounts on a monthly basis, but shall not be compounded or treated as recomputed principal. Interest shall begin to accrue on the fifteenth (15^{th}) day following the due date of the invoice.

D. Warranty

1. Pursuant to the terms of the "Warranty" set forth in Exhibit III, annexed hereto and incorporated herein, ACS warrants that the Reactivated GAC will provide T&O control for a period of thirty-six (36) months from the date of the Reactivated GAC's installation in the Plant's respective Filters ("Warranty Period"). In no instance will ACS's Warranty of the Reactivated GAC be extended beyond the thirty-six (36) month Warranty Period. The Warranty Period will be such date as is memorialized by the parties in a form substantially similar to that set forth in Exhibit IV, annexed hereto and incorporated herein.

2. During the Warranty Period, ACS will test all Reactivated GAC supplied under this Agreement every six (6) months from samples supplied by TAWC to

determine levels of exhaustion, which ACS will do at its sole cost and expense. The testing shall include the following parameters: Iodine Number, Apparent Density, Total Ash, Abrasion Number, Effective Size, Uniformity Coefficient, and Screen Analysis. ACS will submit copies of the test results to TAWC's local Production Superintendent, as well as the Director of Water Quality for TAWC.

3. Upon conclusion of a Filter's Warranty Period, TAWC shall have the right to do the following, subject to Uncontrollable Circumstances: (a) request that ACS remove the Reactivated GAC from the Filter, reactivate the Reactivated GAC, and return the Reactivated GAC to the Filter for another term, at a cost to be agreed-upon by and between the parties and memorialized in a separate agreement; (b) request that ACS remove the Reactivated GAC from the Filter without reactivation, at a cost to be agreed-upon by and between the parties and memorialized in a separate agreement, at which time ACS will reassume ownership of and title to the Reactivated GAC and TAWC will relinquish any rights, title and interest therein; (c) retain the Reactivated GAC in the Filter without any form of warranty, with no further cost to TAWC; (d) any combination of the above, as may be practicable; or (e) such other arrangement as agreed upon by and between the parties. TAWC shall notify ACS of its election of the above options not less than sixty (60) days prior to the conclusion of the Filter's Warranty Period.

E. Uncontrollable Circumstances

1. An "Uncontrollable Circumstance" is any act, event, condition or circumstance that (1) is beyond the reasonable control of the party relying thereon as justification for not performing an obligation of such party under the Agreement, (2) by itself or in combination with other acts, events, conditions or circumstances adversely affects, interferes with or delays the party's ability to perform its obligations under the Agreement, expands the scope of the party's obligations under the Agreement, or increases the party's cost of performing its obligations under the Agreement, and (3) is not the direct result of the willful or negligent act, intentional misconduct, or breach of the Agreement by the party claiming the occurrence of an Uncontrollable Circumstance.

2. If an Uncontrollable Circumstance occurs, the affected party shall be entitled to (1) relief from its performance obligations under the Agreement to the extent the occurrence of the Uncontrollable Circumstance prevents its performance of such obligations, (2) an extension of schedule to perform its obligations under the Agreement to the extent the occurrence of the Uncontrollable Circumstance prevents its ability to perform such obligations in the time specified in the Agreement, and (3) an increase in the fee to be paid under the Agreement to the extent the occurrence of the Uncontrollable Circumstance increases its costs of performance of its obligations under the Agreement. The occurrence of an Uncontrollable Circumstance shall not, however, excuse or delay TAWC's obligation to pay monies previously accrued and owing to ACS under the Agreement, or for ACS to perform any obligation under the Agreement not affected by the occurrence of the Uncontrollable Circumstance.

F. Default/Termination

1. Notwithstanding the terms set forth under Section C., above, relating to TAWC's failure to timely pay ACS's invoices, either party shall be deemed in default under the Agreement for its failure to perform any material term, covenant, or condition of the Agreement, and such failure continues for more than thirty (30) days following the non-defaulting party ("Non-Defaulting Party") giving written notice to the defaulting party ("Defaulting Party") outlining the basis for the alleged material breach or default of its obligations under this Agreement; provided, however, that if, and to the extent such default cannot reasonably be cured within the thirty (30) day period, and the Defaulting Party has diligently attempted to cure same and continues to diligently attempt to cure same thereafter, then the cure period provided for herein shall extend up to, but in no case more than, a collective sixty (60) days.

2. The Non-Defaulting Party shall have the right to terminate the Agreement upon notice to the Defaulting Party following conclusion of the cure period(s) set forth in Section F.1., above; provided that, (1) the Defaulting Party has not cured such default within thirty (30) days of notice being given to it, or (2) such breach is capable of being cured or remedied but cannot be cured or remedied within such thirty (30) day period, and the Defaulting Party either fails to commence such cure or remedy

as soon as reasonably possible following such thirty (30) day period or fails to cure the default within a collective sixty (60) days.

3. If TAWC defaults under this Agreement, it shall automatically relinquish ownership of and title to the Reactivated GAC, which will revert to ACS as if title had never passed to TAWC.

4. The right to terminate for default shall be in addition to any other remedy available at law for material breach or default.

G. Liability/Indemnification

1. ACS will indemnify, defend and save harmless TAWC against any and all liability, loss, damage, costs or expense that TAWC may incur, suffer or be required to pay as a result of ACS's negligent acts, errors or omissions or failure to perform in accordance with this Agreement, or ACS's violation of any Federal, State or local laws or regulations in its performance of this Agreement; but in either case only to the extent of and in proportion to the degree of fault, failure, or negligence of ACS or any of its officers, directors, employees and agents.

2. TAWC will indemnify, defend and save harmless ACS against any and all liability, loss, damage, costs or expense which ACS may incur, suffer or be required to pay as a result of TAWC's negligent acts, errors or omissions or failure to perform in accordance with this Agreement, or TAWC's violation of any Federal, State or local laws or regulations in its performance of this Agreement; but in either case only to the extent of and in proportion to the degree of fault, failure, or negligence of TAWC or any of its officers, directors, employees and agents. TAWC hereby agrees to indemnify, defend and save harmless ACS against any and all liability, loss, damage, costs or expense which ACS may incur, suffer or be required to pay as a result of GAC media becoming classified as a hazardous material, hazardous waste or hazardous substance pursuant to applicable environmental laws, while in the care, possession and control of TAWC.

3. In no event shall the parties be liable to each other, and each party specifically waives as against the other, any and all claims for consequential, incidental, special or punitive damages resulting in any way from performance or non-performance

of this Agreement, whether such damages are characterized as arising under breach of contract or warranty, tort (including negligence), fault, strict liability, indemnity or other theory of legal liability.

H. Dispute Resolution

1. If there is a dispute between the parties arising under, or out of, this Agreement that does not involve claims made by or asserted against third parties, the parties to this Agreement agree to submit such disputes to non-binding mediation, which shall be considered an express condition precedent to any further resolution process. If the parties are unable to resolve such disputes through mediation, the parties shall be entitled to submit the dispute to a court of competent jurisdiction in the State of Tennessee. If the parties mutually agree to do so, the parties may agree to arbitration in lieu of litigation in the local court system, through a mutually agreed upon dispute resolution agency.

2. If there is a claim or demand made in any proceeding against ACS by any third party, which arises out of or relates to the ACS's duties or obligations under this Agreement, nothing in this Agreement shall be construed to limit, waive or otherwise impair ACS's ability to join TAWC as a party to those proceedings, and to assert claims in the nature of indemnity or contribution for any damages or losses made against ACS in said proceedings.

3. If there is a claim or demand made in any proceeding against TAWC by any third party, which arises out of or relates to ACS's work under this Agreement, nothing in this Agreement shall be construed to limit, waive or otherwise impair TAWC's ability to join ACS and to assert claims in the nature of indemnity or contribution for any damages or losses made against TAWC in said proceedings.

I. Notices

All notices required under this Agreement shall be given by Certified Mail, Return Receipt Requested and shall be deemed made when deposited in the U.S. Mail properly addressed, with postage prepaid, as follows:

To ACS: AAET, L.P.
c/o Carbon Services Group
1025 Laurel Oak Road
Voorhees, New Jersey 08043
Attn: Adam R. McDonough, Vice President, AAET, Inc.

To TAWC: Tennessee-American Water Company
1101 Broad Street
Chattanooga, Tennessee 37402
Attn: John Watson, President

J. Taxes

The fees to be paid by TAWC under this Agreement do not include any taxes or other assessments. TAWC agrees to pay all taxes or governmental assessments imposed on the services and materials provided by ACS pursuant to this Agreement.

K. Performance Requirements

1. The reactivation of the GAC that will be placed in the Filters will be conducted in a Facility dedicated exclusively to the reactivation of GAC media from potable water treatment plants and which shall not have accepted GAC media used for purposes other than potable water treatment. All of the GAC media prepared for reactivation shall be treated as a discreet and separate batch, and shall not contact, be mixed with, or blended with any Reactivated GAC or exposed to any reactivation products that are not Reactivated GAC or reactivation products originating from the Plant. All equipment used for reactivation, transport and installation that will come in contact with the GAC media, including but not limited to GAC media storage and feed equipment, cooling, screening and handling equipment, shall be cleaned and thoroughly purged of any other material.

2. ACS will use only NSF-approved bituminous virgin GAC media for makeup purposes. The supplier of the virgin GAC media shall have provided virgin GAC media to at least ten (10) water treatment plants of similar source as the Plant, and such plants shall have been in service for at least five (5) years. No other sources of GAC media for reactivation purposes will be acceptable.

3. At least two (2) weeks prior to beginning the Reactivated GAC installation, a duly authorized ACS representative shall meet with the applicable TAWC Production Superintendent or his/her designated representative to review the plans for the Reactivated GAC installation, including the dates work is to begin and to end, to determine if any special circumstances exist, and to determine if any special equipment is required. ACS shall provide any auxiliary equipment, services, or materials required to conduct the Reactivated GAC installation, which it shall do at no additional cost to TAWC. TAWC shall provide all necessary water, electricity, and suitable drainage to accomplish the installation of the Reactivated GAC into the Filters at the Plant, which it will provide at its sole cost and expense.

4. The Reactivated GAC installation shall commence promptly each day by 8:00 A.M., or other mutually agreed upon time, and ACS shall provide such labor necessary to minimize the amount of time each filter is out of service during installation. ACS shall reimburse any overtime incurred by TAWC personnel as a result of deviation from this schedule, except where such deviation is due to TAWC's request, fault, failure or negligence, or an Uncontrollable Circumstance.

5. All scheduling of material, equipment, services, and GAC media deliveries shall be conducted by the ACS representative. Any additional costs incurred as a result of scheduling conflicts, errors, or omissions shall be paid solely by ACS, except where such cost overage is due to TAWC's rescheduling, fault, failure or negligence, or an Uncontrollable Circumstance.

6. ACS will install the Reactivated GAC to the level of GAC media existing in each Filter before removal, based upon the measurement of media depth in place after backwashing ("Noted Level"). Upon completion of the reinstallation of the Reactivated GAC in each filter, the depth of the Reactivated GAC shall deviate by no more than one (1) inch from the Noted Level.

7. In order to avoid equipment freezing and installation delays that could jeopardize the operation of the Plant, the Reactivated GAC installation will not occur during periods in which air temperatures drop below fifteen (15) degrees Fahrenheit, to the extent reasonably and operationally practicable. Where possible and reasonably practical, the installation shall be temporarily postponed and rescheduled to

a time when temperature conditions exceed fifteen (15) degrees Fahrenheit.

L. Insurance

1. ACS shall return two (2) copies of its current "Certificate of Insurance" ("Certificate") concurrent with the signed Agreement. ACS shall not commence any work under this Agreement until it has provided the Certificate to TAWC.

2. ACS shall carry Workers Compensation Insurance during the life of this Agreement to insure its statutory liability to its employees in the State of Tennessee plus $100,000 Employers Liability coverage. ACS shall carry the Comprehensive form of General Liability and property damage insurance during the life of this Agreement covering all risks itemized in the form for "Certificate of Insurance" provided in this Agreement. The limits shall not be less than $1,000,000 for each occurrence of bodily injury and property damage and $1,000,000 for general aggregate. ACS shall carry the comprehensive form of Automobile Liability and Property damage insurance during the life of this Agreement to cover the risks itemized in the form "Certificate of Insurance" provided for in this Agreement. The limits shall be not less than $1,000,000 for each occurrence of bodily injury and property damage combined.

3. ACS shall carry Umbrella and/or Excess Liability Insurance during the life of this Agreement covering all risks above the limits shown above. The limit shall not be less than $4,000,000.

M. Miscellaneous

1. This Agreement shall not be assignable by either party without the prior written consent of the other party, which consent shall not be unreasonably withheld. Any assignee shall assume all the obligations of this Agreement and the assignor shall not be relieved of its obligations under this Agreement by reason of an assignment.

2. This Agreement constitutes the entire agreement between the parties. All previous representations relative hereto, either written or oral, are hereby annulled and superseded. No modifications shall be binding on either party unless it shall be in writing and signed by an authorized officer of both parties.

3. The failure of a party to insist on strict performance of any or all of the terms of this Agreement, or to exercise any right to remedy under this Agreement, shall not constitute a waiver or relinquishment of any nature regarding such right or remedy or any other right or remedy. Any waiver by either party of any provision or condition of this Agreement shall not be construed or deemed to be a waiver of any other provision or condition of this Agreement, nor a waiver of a subsequent breach of the same provision or condition unless such waiver be so expressed in writing and signed by the party to be bound.

4. If any provision contained herein is held to be unenforceable by a court of law or equity, this Agreement shall be construed as if such provisions did not exist and the unenforceability of such provision shall not be held to render any other provision of this Agreement unenforceable.

5. The covenants, warranties, and agreements set forth in Section D.1 and Exhibit III of this Agreement shall survive termination of this Agreement.

6. ACS shall not be liable or responsible for the transportation, handling, treatment, storage, disposal or other activity in connection with GAC media that is or becomes a hazardous material, hazardous waste or hazardous substance.

7. This Agreement shall be governed and construed in accordance with the laws of the State of Tennessee without giving effect to conflict of law principles.

8. The Recitals first set forth above are hereby incorporated into and made part of this Agreement.

[*signature page to follow*]

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives as of the date first set forth above.

EXHIBIT I

Tennessee-American Water Company — Chattanooga WTP

Reactivated GAC Installation Schedule

Filter(s) No.	Surface Area	GAC Depth	GAC Volume	Installation Period	Estimated Project Price
Aldrich Unit #3	922 sq. ft.	24 in.	1844 cu. ft.	On or about February 3, 2009, to February 6, 2009	$105,200.20
Aldrich Unit #4	922 sq. ft.	24 in.	1844 cu. ft.	On or about February 3, 2009, to February 6, 2009	$105,200.20

EXHIBIT II

GRANULAR ACTIVATED CARBON PROPERTIES

The Reactivated GAC shall contain no soluble inorganic or organic substances in quantities capable of producing deleterious or injurious effects on the health of those consuming the water and shall not impart to the water any contaminant that exceeds the limits as defined by the United States Environmental Protection Agency, Drinking Water Regulations.

The Reactivated GAC shall meet the following specifications:

Iodine number	800 minimum
Density	28-30 lb./cubic foot
Effective Size	0.8 – 1.0 mm
Uniformity Coefficient	2.1 maximum
Moisture	2% maximum
Abrasion Number	75 minimum
Water Soluble Ash	1% maximum
Typical Mesh Size	8 x 30

EXHIBIT III

WARRANTY

ACS warrants that, when used under the conditions that exist at the Plant as of the Effective Date of this Agreement, which are considered "normal" conditions, the GAC provided under this Agreement will perform the function of adsorption of dissolved organics that contribute to taste and odors for a period of thirty-six (36) months after installation of the Reactivated GAC into the respective filters. For purposes of the warranty, effective T&O adsorption, defined as the reduction of absorbable dissolved odors, such that the threshold odor number of the carbon filtered water as measured by the procedure defined in "Standard Methods for the Examination of Water and Wastewater", 20th Edition, shall not exceed a level two (2) in the carbon filtered effluent for a duration of four (4) consecutive days while the treatment plant is in normal operation.

The thirty-six (36) month warranty period for the Reactivated GAC installed into the filters will begin once the respective filtering unit is placed in service after backwashing following installation of the Reactivated GAC.

ACS's obligation under the warranty is contingent, for the duration of the warranty period, on the following conditions within the control of TAWC:

A. If the concentration of organics in the raw water supply should exceed normal operational levels (e.g., in the case of an accidental industrial discharge, chemical spill or other adversity), TAWC will initiate the feed of powdered activated carbon or may elect a complete bypass of contaminated water during the course of abnormal conditions. If TAWC does not immediately take emergency measures to prevent the Reactivated GAC from being exposed to excessive levels of organic contaminants, the warranty for such filters shall be null and void.

B. TAWC will continue to practice normal and customary water treatments prior to carbon filtration. These customary treatments include, without limitation, providing suitable disinfection, coagulation, and clarification of the raw water and stabilizing the clarified water to prevent the deposition of calcium carbonate scale on the media.

C. Average and maximum filtration rates will not exceed 3.0 and 4.0 gallons per minute per square foot, respectively.

D. TAWC will maintain the GAC media bed depth in each filter as close to the Noted Level as possible, with the exception of a possible loss of up to two (2) inches of GAC media bed depth per filter, per year, due to attrition losses. If losses should exceed two (2) inches of bed depth in any filter during any one (1) year of operation, TAWC shall immediately advise ACS to replace the excess GAC media loss in that filter with GAC

media equal to that supplied. TAWC shall pay ACS for any such replacement of GAC media at a price agreed to by both parties. If the parties are unable to agree-upon a price for the replacement GAC media, then TAWC has the right to seek an alternate supplier therefor. In such instance, however, the alternate supplier shall provide GAC media that meets the same quality and standards as the GAC media that ACS provides and the GAC media shall meet ACS's approval, in its reasonable discretion. The failure of the alternate GAC media to meet these standards shall deem the warranty null and void. Notwithstanding anything set forth above, if TAWC does not immediately advise ACS of the loss and replace such loss, the warranty for the Reactivated GAC in such filter shall be null and void.

E. TAWC will maintain the Plant's filters in good operating condition and in accordance with accepted industry practice. Notwithstanding the above, if the Reactivated GAC fails to perform due to encrustation by inorganic precipitates, it shall not be considered to be a breach of this warranty, but TAWC will bear the cost of cleaning, and if necessary, replacing the Reactivated GAC to restore performance, in accordance with procedures provided by ACS.

If, during the warranty period, the Reactivated GAC fails to perform in accordance with the parameters established in this warranty and in the Agreement, subject to the conditions contained herein, ACS will, at its sole option and cost, either reactivate or replace all or part of the Reactivated GAC to restore its capability.

EXCEPT AS SET FORTH IN THIS EXHIBIT III, ACS MAKES NO WARRANTY EXPRESSED OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE CARBON OR THE SERVICES TO BE PROVIDED UNDER THIS AGREEMENT. ACS SHALL HAVE NO LIABILITY FOR ANY INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF A BREACH OF THIS WARRANTY. TAWC'S SOLE REMEDY FOR ANY BREACH OF THIS WARRANTY SHALL BE TO REQUIRE ACS TO EITHER REACTIVATE OR REPLACE CARBON AS PROVIDED ABOVE.

EXHIBIT IV

WARRANTY PERIOD

Filter(s) No.	Warranty Period
Aldrich Unit #3	February ___, 2009, to February __, 2012
Aldrich Unit #4	February ___, 2009, to February __, 2012

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

UNION ELECTRIC COMPANY	(1) [X] An Original (2) [ ] A Resubmission	04/19/2010	End of 2009/Q4

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production	120,874,238		
4	Transmission	3,683,937		
5	Regional Market			
6	Distribution	31,107,044		
7	Customer Accounts	14,738,859		
8	Customer Service and Informational	4,585,799		
9	Sales	264,294		
10	Administrative and General	46,047,318

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

Line No.	Number and Title of Rate schedule (a)	MWh Sold (b)	Revenue (c)	Average Number of Customers (d)	KWh of Sales Per Customer (e)	Revenue Per KWh Sold (f)

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production	27,542,568		
4	Transmission	1,547,536

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production	232,789,195		
4	Transmission	10,442,168		
5	Regional Market			
6	Distribution	46,519,064		
7	Customer Accounts	30,292,243		
8	Customer Service and Informational	2,214,409		
9	Sales			
10	Administrative and General	135,160,792		
11	TOTAL Operation (Enter Total of lines 3 thru 10)	457,417,871		
12	Maintenance			
13	Production	95,303,677		
14	Transmission	12,813,842		
15	Regional Market			
16	Distribution	56,581,706		
17	Administrative and General	3,502,721		
18	TOTAL Maintenance (Total of lines 13 thru 17)	168,201,946		
19	Total Operation and Maintenance			
20	Production (Enter Total of lines 3 and 13)	328,092,872		
21	Transmission (Enter Total of lines 4 and 14)	23,256,010		
22	Regional Market (Enter Total of Lines 5 and 15)			
23	Distribution (Enter Total of lines 6 and 16)	103,100,770		
24	Customer Accounts (Transcribe from line 7)	30,292,243		
25	Customer Service and Informational (Transcribe from line 8)	2,214,409		
26	Sales (Transcribe from line 9)			
27	Administrative and General (Enter Total of lines 10 and 17)	138,663,513		
28	TOTAL Oper. and Maint. (Total of lines 20 thru 27)	625,619,817		625,619,817

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production	5,582,193

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production	7,511,266		
4	Transmission	1,398,922		
5	Regional Market			
6	Distribution	4,696,068		
7	Customer Accounts	3,205,909		
8	Customer Service and Informational	1,954,922		
9	Sales	120		
10	Administrative and General	2,795,722		
11	TOTAL Operation (Enter Total of lines 3 thru 10)	21,562,929		
12	Maintenance			
13	Production	4,290,558		
14	Transmission	1,458,134		
15	Regional Market			
16	Distribution	5,403,393		
17	Administrative and General	183,597		
18	TOTAL Maintenance (Total of lines 13 thru 17)	11,335,682		
19	Total Operation and Maintenance			
20	Production (Enter Total of lines 3 and 13)	11,801,824		
21	Transmission (Enter Total of lines 4 and 14)	2,857,056		
22	Regional Market (Enter Total of Lines 5 and 15)			
23	Distribution (Enter Total of lines 6 and 16)	10,099,461		
24	Customer Accounts (Transcribe from line 7)	3,205,909		
25	Customer Service and Informational (Transcribe from line 8)	1,954,922		
26	Sales (Transcribe from line 9)	120		
27	Administrative and General (Enter Total of lines 10 and 17)	2,979,319		
28	TOTAL Oper. and Maint. (Total of lines 20 thru 27)	32,898,611		32,898,611
29	Gas			
30	Operation			
31	Production-Manufactured Gas			
32	Production-Nat. Gas (Including Expl. and Dev.)			
33	Other Gas Supply			
34	Storage, LNG Terminaling and Processing

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production	17,394,722

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production	284,970,406		
4	Transmission	11,073,552

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)
1	Electric			
2	Operation			
3	Production	158,731,678

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Patrick Baryenbruch

Other Participating Employees: George Conroy

Question:

46. For purposes of this request please refer to ***TAWC's*** response to TRA Data Request 1-3 TAWC10 Baryenbruch, WP7, Tab "AWW Calls Per Customer." Please provide the same information for each of the years 2005, 2006, 2007, and 2008. Provide the same information for calls related to Tennessee inquiries by customers.

Response:

The table below presents the same total company per customer call information for the years 2005 through 2008.

Total AWW			
Year	Total Inbound Calls	Total Active Accounts	Inbound Calls Per Customers
2005	5,417,736	2,699,896	2.01
2006	5,463,082	2,775,028	1.97
2007	5,747,662	2,505,393	2.29
2008	5,399,935	1,882,253	2.87

The table below presents the average number of calls per TAWC customer for the years 2005 through 2008.

TAWC Only			
Year	Total Inbound Calls	Total Active Accounts	Inbound Calls Per Customers
2005	181,820	75,658	2.40
2006	195,277	76,932	2.54
2007	199,796	78,250	2.55
2008	187,557	79,646	2.35

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Patrick Baryenbruch

Other Participating Employees: None

Question:

47. For purposes of this request please refer to ***TAWC's*** response to TRA Data Request 1-3 TAWC10 Baryenbruch WP2. Please ***Explain*** in detail why the costs in columns F and G were excluded from the analysis developed in this spreadsheet.

Response:

The excluded costs represent items that an outside service provider would recover from clients over and above their hourly fees. For instance, if an outside attorney is asked by a client to travel to another city to conduct a deposition, then the attorney would bill the client for the time at an hourly rate plus out of pocket travel expenses. Thus, these travel expenses are incremental to and not included in the calculation of the attorney's hourly billing rate.

On pages 12 and 13 of his report, Mr. Baryenbruch further explains the rationale for each of the three categories of excluded costs.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Patrick Baryenbruch

Other Participating Employees: None

Question:

48. For purposes of this request please refer to ***TAWC's*** response to TRA Data Request 1-3 TAWC10 Baryenbruch, WP8. Please provide the ***Workpapers*** and all other ***Documents*** that actually derive the amounts depicted in Tab "Rate Calc." Please ***Explain*** why each category of expense was excluded from the tab "FERC Pivot". Provide all ***Workpapers*** and supporting ***Documents*** used to develop this response.

Response:

With one exception, all of the information used to derive the amounts depicted in Tab "Rate Calc" is already contained in this spreadsheet. The additional item is source information for the number of regulated customers for each utility holding company that has a service company in the comparison group. That document is attached and labeled as TN-COC-01-Q48-ATTACHMENT.

Certain FERC accounts are excluded from the calculation of each comparison group service company's cost per customer because these items are not in the charges from American Water's Service Company to TAWC. For instance, the balance of FERC account 902 - Meter reading expenses is excluded from the cost per customer calculation because these costs are incurred by and recorded as an expense of TAWC. The Service Company does not perform meter reading for TAWC. The exclusion is necessary to ensure the comparison of per customer costs can be made on an apples-to-apples basis. If the balances in these FERC accounts were not excluded, then the comparison group average costs would be overstated.

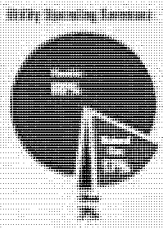
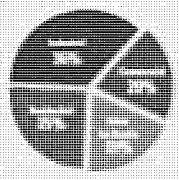
Alliant

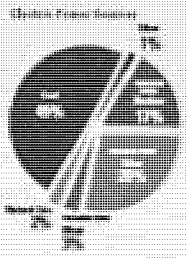
COMPANY AT A GLANCE

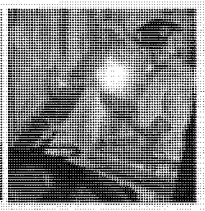
Who we are

Alliant Energy, headquartered in Madison, Wis., is an investor-owned public utility holding company traded on the New York Stock Exchange under the symbol "LNT." Alliant Energy's regulated utility subsidiaries own a portfolio of electric generating facilities with a diversified fuel mix including coal, natural gas and renewable resources. The output from these generating facilities, supplemented with purchased power, is used to provide electric service to approximately 1 million electric customers in the upper Midwest. The utility business also procures natural gas from various suppliers to provide service to approximately 410,000 natural gas customers in the upper Midwest.





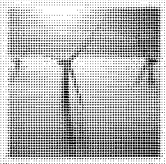




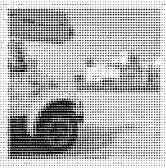
Non-regulated businesses

Alliant Energy Resources, LLC (Resources) is the parent company of Alliant Energy's non-regulated businesses. The strategic plan for Alliant Energy's non-regulated operations involves maintaining a portfolio of businesses that are sensitive to earnings but not significant users of capital. Resources' portfolio of businesses includes:

RMT. Creates energy and environment solutions that balance business and sustainability goals. RMT has developed, designed and constructed over 3,000 megawatts (MW) of renewable energy facility nameplate, and has helped leading industrial and commercial companies reduce their environmental footprints through fuel switching, air quality improvements, regulatory compliance and waste management.



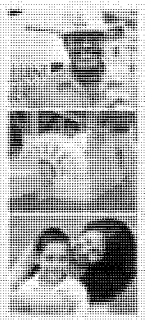
Other non-regulated investments. This platform includes investments in non-regulated generation, transportation and several other investments. Non-regulated generation owns the Sheboygan Falls Energy Facility (leased to WPL) and wind-powered generation at Industrial Energy Applications, Inc. Transportation includes a shortline railway that provides freight service, a barge terminal and loading services, and other transfer and storage services.



Utility business

Interstate Power and Light Company (IPL) and Wisconsin Power and Light Company (WPL) are Alliant Energy's two utility subsidiaries. As the primary targets of our future capital investments, the utilities also represent our growth platform. The strategic plan for Alliant Energy's utility operations is concentrated on:

* building or acquiring and maintaining the generation and infrastructure necessary to provide Alliant Energy's utility customers with safe, reliable and environmentally responsible energy service;
* implementing emission controls at its existing fleet of generating facilities; and,
* using education, awareness and technology to promote energy efficiency and conservation.



Support services

Alliant Energy Corporate Services, Inc. supports the company with traditional administrative functions including strategy, accounting and finance, treasury, fuel procurement, supply chain, corporate communications, legal, regulatory, corporate governance, information technology, human resources, labor relations, internal audit, infrastructure security, facilities, public affairs, and environmental and safety management.

2008 STATISTICS	TOTALS
Minimum goal for diamond (megawatts)	5,481
Number of total electric customers	982,467
Number of total natural gas customers	417,777
Utility electric sales (thousands of megawatt hours)	30,177
Utility natural gas sold and transported (thousands of dekatherms)	197,617

Black Hills Corporation
Black Hills Corporation is a strong, diversified energy company with a vision to be the energy partner of choice. Our utility operations include Black Hills Power - an electric utility and our legacy business that provides service to approximately 66,600 customers in the Black Hills region and sells surplus power in wholesale markets - and Cheyenne Light Fuel & Power, serving 39,800 electric customers and 33,300 natural gas customers in the greater Cheyenne, Wyo., area.
Additionally, our recently acquired Black Hills Energy utility operations provide electric services to approximately 93,300 customers in southeastern Colorado and natural gas utility services to approximately 524,000 customers in Colorado, Iowa, Kansas and Nebraska.
Our energy portfolio also includes non-utility businesses. Black Hills Exploration & Production produces oil and natural gas in New Mexico, Wyoming and Colorado. Enserco Energy provides wholesale natural gas marketing and producer services for natural gas and crude oil. The Wyodak coal mine in Wyoming's Powder River Basin supports the Company's low-cost, mine-mouth power generation. Black Hills also has a fleet of power generation facilities in Colorado, Wyoming and South Dakota that produce more than 1,000 MW of energy annually for our own utility customers as well as others.

Dominion Resources

as of 6/8/10

Dominion Profile

Business Units

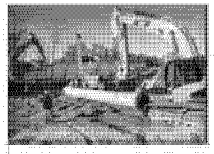
Dominion Virginia Power

- 6,000 miles of electric transmission lines
- 56,000 miles of electric distribution lines
- 2.4 million franchise retail electric customer accounts in Virginia and North Carolina
- 2.0 million non-regulated customer accounts in 12 states (Dominion Retail)

- Electric Distribution
- Electric Transmission
- Unregulated Retail

Dominion Energy

- Operates the largest natural gas storage system in the U.S.
- 12,000 miles of natural gas transmission, gathering and storage pipeline
- 1.3 million franchise retail natural gas customer accounts in Ohio and West Virginia
- Cove Point liquified natural gas import terminal on the Chesapeake Bay



- Gas Transmission
- Gas Distribution
- Producer Services

Dominion Generation

- ~27,500 megawatts of capacity, including nuclear, fossil and renewable power (~18,300 MW utility and ~9,200 MW merchant)
- Additional 5,600 megawatts of utility capacity needed during next decade to meet load growth
- Rider projects with enhanced ROE to support utility load growth underway
- 7th largest generating capacity in the U.S.
- Well-positioned in New England and PJM power markets
- More than 40% of total electric output from emissions-free nuclear and renewable power, primarily hydro, wind and biomass

- Utility Generation
- Merchant Generation

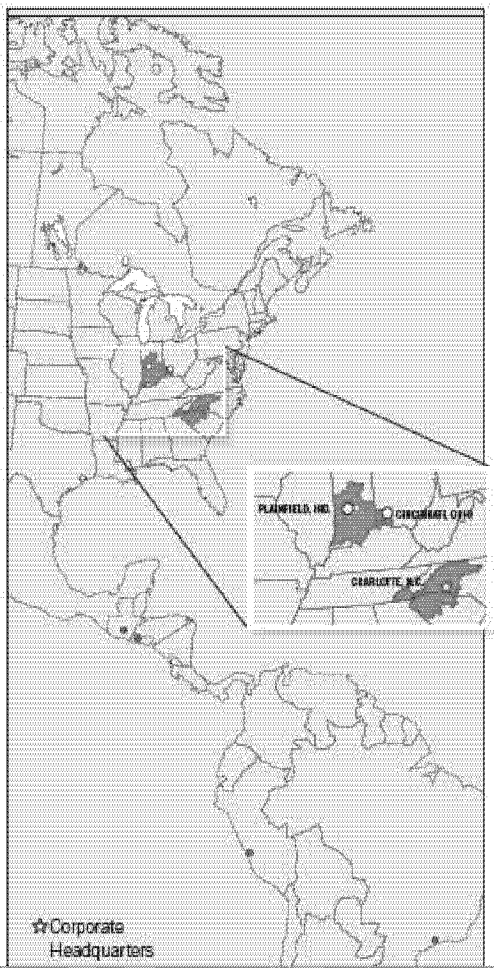
Duke Energy

DUKE ENERGY AT A GLANCE



U.S. Franchised Electric and Gas

U.S. Franchised Electric and Gas (USFE&G) consists of Duke Energy's regulated generation, electric and gas transmission and distribution systems. USFE&G's generation portfolio is a balanced mix of energy resources having different operating characteristics and fuel sources designed to provide energy at the lowest possible cost.

Electric Operations

- Owns approximately 27,000 megawatts (MW) of generating capacity
- Service area covers about 50,000 square miles with an estimated population of 11 million
- Service to approximately 4 million residential, commercial and industrial customers
- Over 151,600 miles of distribution lines and a 20,900-mile transmission system

Gas Operations

- Regulated natural gas transmission and distribution services to approximately 500,000 customers in southwestern Ohio and northern Kentucky

Commercial Power

Commercial Power owns, operates and manages power plants, primarily located in the Midwest. Commercial Power's subsidiary, Duke Energy Retail Sales, serves retail electric customers in Ohio with generation and other energy services at competitive rates. Commercial Power also includes Duke Energy Generation Services (DEGS), an on-site energy solutions and utility services provider.

- Owns and operates a balanced generation portfolio of approximately 7,550 net MW of power generation (excluding wind assets)
- DEGS currently has approximately 735 MW of wind energy in operation and over 5,000 MW of wind energy projects in development

corporate overview

Great Plains Energy Incorporated (NYSE: GXP) is the holding company of Kansas City Power & Light and KCP&L Greater Missouri Operations Company. The utilities operate under the brand name KCP&L.

Our electric utilities serve over 800,000 customers in 47 counties in Missouri and Kansas with a combined diverse generation platform of more than 6,100 MW of capacity.

Management is focused on building a solid platform that will provide long-term earnings growth for shareholders and provide low cost, reliable energy for customers. In addition, Great Plains Energy has an attractive annualized dividend of $0.80 per share. Great Plains Energy's dividend, combined with earnings growth potential, provide investors with a strong total return investment alternative.

corporate values

Strategic Intent: Great Plains Energy is focused on providing long-term value to shareholders and customers through its utilities by supplying and delivering electricity and energy solutions to meet customers' current and future needs and enhance their quality of life. To achieve these objectives, we believe there are four key values upon which the Company must focus:

- Top-Tier Operating Performance: Across the organization we strive for industry-leading financial and operational performance.
- Long-Range Perspective: We manage the Company for long-term performance, not short-sighted gains. Our Comprehensive Energy Plan (CEP) is a key example. It is a five-year strategy, which commenced in 2005, to increase the Company's power generation capabilities, and to improve regional air quality through environmental upgrades to existing facilities, and to invest in demand side management, distributed generation, customer efficiency and affordability programs, and transmission and distribution improvements. We are also continuing to plan for the future by working now to develop our Sustainable Resource Strategy (SRS) for 2010-2020.
- Winning Culture: The Company is focused on building a culture dedicated to achieving Great Plains

BUILDING
INVESTMENT-DRIVEN GROWTH

GAS DISTRIBUTION

- One of the nation's largest natural gas distribution companies serving more than 3.3 million customers
- Established best-in-class platform for sustainable earnings growth through:
  - Comprehensive long-term infrastructure-investment programs
  - Thoughtful customer programs
  - Creative regulatory approaches

GAS TRANSMISSION & STORAGE

- 15,000-mile network of interstate natural gas pipelines
- One of the nation's largest market area storage systems
- Strong strategic footprint in the growing Marcellus Shale production region of Appalachia
- Extensive array of attractive investment opportunities

ELECTRIC GENERATION & DISTRIBUTION

- Environmentally compliant fleet of electric generation facilities
- Total generating capability of 3,322 megawatts
- Recently added natural-gas fired Sugar Creek facility
- More than 450,000 industrial, commercial and residential electric customers in a growing marketplace

Introduction to Pepco Holdings, Inc. (PHI)

PHI is one of the largest energy delivery companies in the Mid-Atlantic region, serving about 1.9 million customers in Delaware, the District of Columbia, Maryland and New Jersey. PHI subsidiaries Pepco, Delmarva Power and Atlantic City Electric provide regulated electricity service; Delmarva Power also provides natural gas service. PHI provides competitive wholesale generation services through Conectiv Energy and retail energy products and services through Pepco Energy Services.

PHI's family of energy-related businesses includes:

- Pepco is a regulated electric utility delivering electricity to 778,000 customers in Washington, D.C., and its Maryland suburbs.
- Delmarva Power is a regulated utility to 498,000 electric delivery customers in Delaware and the Delmarva Peninsula and 123,000 natural gas delivery customers in northern Delaware.
- Atlantic City Electric is a regulated electric utility to 547,000 customers in southern New Jersey.

(Delmarva Power and Atlantic City Electric previously operated under the brand name Conectiv Power Delivery.)

- Pepco Energy Services is a leading provider of deregulated energy and energy-related services for residential, small business and large commercial customers.

FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Patrick Baryenbruch

Other Participating Employees: None

Question:

49. Please provide a complete copy with all exhibits and appendices of the 2010 version of the 2007 AICPA National PCPS/TSCPA Management of an Accounting Practice Survey used by ***Mr. Baryenbruch.***

Response:

The AICPA's National PCPS/TSCPA Management of an Accounting Practice Survey is performed on a bi-annual basis and there are no others more current that the version Mr. Baryenbruch used for his TAWC study. The version he used is dated 2008 and contains information from 2007 (this fact is noted on page 18 in Mr. Baryenbruch's study). The 2010 version of the survey, containing 2009 data, has not yet been published.

Question:

50. Please provide for each year and quarter since January 1, 2006 and as projected for 2010, 2011, and 2012, the complete audited financial statements (including income statement and balance sheet) for ***AWWSC*** and ***AWWC*** and each subsidiary or affiliate of ***AWWC*** affiliate. If audited financial statements are not available, provide unaudited financial statements (including income statement and balance sheet) for such periods.

Response:

The Company objects to this request on the grounds that the request is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, see the Company's response to TN-COC-01-Q11 that attached the unaudited financial statements of AWWSC and AWCC, both of which provide direct services to TAWC. Also, see the response to TN-TRA-01-Q005 that provides the consolidated (reflecting the consolidated operation of all AWWC subsidiaries) audited financial statements of AWWC and the audited financial statements of TAWC for 2005-2009. The 2010 publicly available audited financial statements of AWWC can be found at amwater.com.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Jim Bozman

Question:

51. For purposes of this request please refer to ***TAWC's*** response to TRA-01-Q12, the Financial Statements of ***AWWC***. Please provide a detailed explanation of all sources of lines delineated "J&J Miscellaneous Income", the "Management Fees", and "Other Revenue" depicted on these financial statements for each of the years shown. Provide the amount projected for 2010 and 2011 for each of these items.

Response:

The Company objects to this request on the grounds that it seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving this objection, the Company would note that M&J income is recorded below the line for TAWC and the revenue and expenses in this category are not included in the Company's rate filing.

AWWC does not have income and/or revenue that fall in either of these two categories.

Merchandising & Jobbing (M&J) Miscellaneous Income is the net of two accounts 715111- M&J Revenues-Outside and 716121- M&J Expenses-Outside. This line accounts for jobs contracted by the company from outside vendors for various work. An example would be to fix a broken hydrant due to car accident.

Other Revenue on the Income statement consists of reconnection fees, application/Initiation fees for new customers, NSF check fees, and third-party billing fees.

Please see the response to TN-COC-01-Q61 for a breakdown of the management fees charged to TAWC.

Responsible Witness: Michael A. Miller

Other Participating Employees: Sheila Miller

Question:

52. Please ***Identify*** and provide copies (in the original medium and format) of all advertisements published in newspapers or other media, radio advertisements, and TV advertisements paid for by ***AWWC*** or any subsidiary or affiliate of ***AWWC*** since January 1, 2008 to date which were placed, displayed, or distributed in any area served by ***TAWC***.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, AWWC does not allocate any cost to TAWC. The Company eliminated all advertising expense charged to TAWC by AWWSC in the historical test-year and the attrition year from its requested cost of service in this case. See the Company's working papers provided in response to TN-TRA-01-Q013, at TRA-01-Q013-MANAGEMENT FEES, pages 1 and 11 of 12.

FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: None

Question:

53. Please provide a detailed listing of all expenditures for the advertisements identified in response to the previous Request, for all advertisements incurred by business unit 032068 CORP Marketing, and for all other advertisements since January 1, 2008 to date showing the amount, date, and payee. Explain which of these expenditures were charged to ***TAWC*** in whole or part and which were included in the historic, normalized, and attrition test years.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, AWWC does not allocate any cost to TAWC. The Company eliminated all advertising expense charged to TAWC by AWWSC in the historical test-year and the attrition year from its requested cost of service in this case. See the Company's working papers provided in response to TN-TRA-01-Q013, at TRA-01-Q013-MANAGEMENT FEES, pages 1 and 11 of 12.

Responsible Witness: Michael A. Miller

Other Participating Employees: George Conroy

Question:

54. Please ***Identify*** all ***Non-Regulated Services*** provided by ***TAWC, AWWC, AWWSC, AWR, AWCC,*** or any other affiliate or subsidiary of ***TAWC, AWWC, AWWSC, AWR,*** or ***AWCC*** to unaffiliated companies or customers. Describe in detail the services provided to each non-affiliated company and customer.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, TAWC does not provide unregulated services. TAWC receives non-regulated services from AWWSC, AWCC and AWR as described in the agreements and/or contracts provided in the response to TN-COC-01-Q44. In addition, see the response to TN-TRA-01-Q014 for a description of the services received from non-regulated subsidiaries of AWWC. In addition, see the Schumaker Report (Exhibit MAM-8 of Mr. Miller's direct testimony at pages 25-27 of 143).

Question:

59. For each of the ***AWS Services*** or any other service or product attributed to American Water Solutions, please ***Explain*** what services or products are performed or provided and state which, if any, of the services or products are regulated by any state utility regulatory agency. For any services or products that are regulated, please ***Identify*** the state utility regulatory agency that regulates them.

Response:

The Company objects to this request on the grounds that it seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. All products and/or services offered under the umbrella American Water Solutions are not regulated. American Water Solutions is not an entity of AWWC but is a group heading that outlines all products and services AWWC offers.

Please see the attached document labeled as TN-COC-01-Q59-ATTACHMENT with detailed explanations of these products and services offered.

Residential Services

Service Line Protection Program

You may not realize it, but as a homeowner, you are responsible for paying for repairs to the water and sewer lines running from your home to the street, and plumbing repairs that occur within the home. In many cases, those lines were put in place years ago when your home was originally built.

American Water Resources, Inc., a subsidiary of American Water, provides specialized water line, sewer line and in-home plumbing protection services that help to insulate you from the unexpected high repair costs associated with water or sewer line failures and in-home plumbing repairs. At any time, normal wear and tear can cause water lines to leak or break and the sewer line to block or clog from natural aging, seasonal changes and root invasion from trees. You may experience a clogged bathroom sink, blocked or overflowing toilet, or a burst frozen water pipe. Worst of all, most homeowner insurance policies do not cover this type of damage.

The Water Line, Sewer Line and In-Home Plumbing Protection Programs* will cover these unexpected costs and provide you with peace of mind. This means that you won't have to spend hours searching for a qualified repair contractor - you can leave that to the experts. The Water Line, Sewer Line and In-Home Plumbing Protection Programs allow customers to enjoy:

- Peace-of-mind protection from the most experienced water resource manager in the country
- Convenience of fast and professional expert plumbing service - no hassle of searching for a qualified contractor
- Affordable payment terms with convenient monthly billing on customer water bills, or via check or credit card
- Claim coverage amounts up to $5,000** for your water line and $8,000** for your sewer line

Enroll Now and start protecting your home and property from unwanted repair costs!

For more information on the Water Line, Sewer Line and In-Home Plumbing Protection Programs* and their availability in your area, please call 1-866-430-0819 or contact us at cs@amwater.com.

**In CA this program is offered through American Water Resources Insurance Services. In CA and VA, this program is insurance provided by Virginia Surety Company, Inc.*

*** Coverage amounts vary by region*

Applied Water Management

With more than 6.7 billion people in the world, the demand on the water supply grows everyday. So smart use and reuse of this precious resource should be everyone's priority. That's where we come in. And that's where you come in. Because regardless of project size, every gallon of water saved makes a positive impact on the environment. Together we'll share information, ideas and most importantly, find solutions to our customers's water and wastewater challenges.

Established in 1984 and headquartered in Hillsborough, NJ, American Water's Applied Water Management Group offers award-winning, customized solutions to real estate developers, industrial clients, and new and expanding communities. We provide our clients with safe, reliable, long-lasting and highly-efficient solutions to suit individual water and wastewater needs.

The Applied Water Management Group has unparalleled experience in delivering geoscience services, designing, constructing and operating decentralized water and wastewater facilities. We offer a full range of water resource management services and are recognized as leaders in the industry for providing custom solutions and innovative use of technology.

Serving communities across the nation, American Water's Applied Water Management Group has offices in Delaware, Maryland, New Jersey, Nevada, Pennsylvania and Virginia. Our customized solutions include:

- Planning: We carefully integrate your needs with innovative technology
- Engineering: Our expertise in process, mechanical, electrical, structural and civil design ensures that we meet your project standards
- Design/Build: Complete community On-site Wastewater/Water Systems (COWS)solutions with guaranteed design costs
- Operations: Our licensed operators are highly-trained and qualified in their field

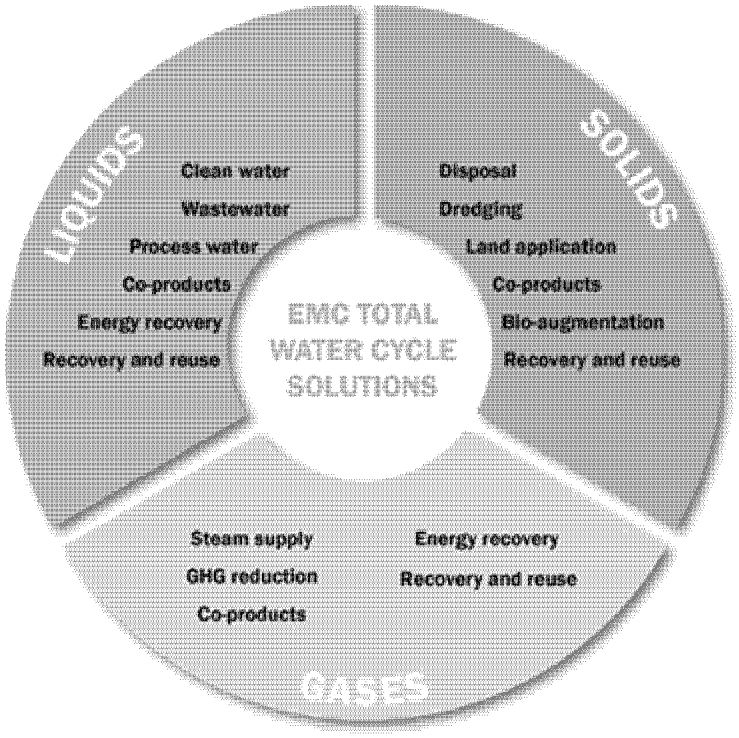
We also provide the following services:

- Expertise in the reclamation of treated wastewater
- Site Evaluation, design, permitting, construction management and operations services - provided independently or in conjunction with our other services
- Management, operation and maintenance of independent and decentralized facilities
- Asset ownership service model

We work closely and collaboratively with our customers to develop custom applications of the latest technologies in geoscience services, and the design, construction and operation of decentralized water and wastewater systems. We provide a broad range of services for residential, commercial, industrial and government clients. Where appropriate, Applied Water Management can assume ownership of these facilities, operating them exclusively as a state-regulated utility or in cooperation with one of the many regulated American Water utilities in North America.

Environmental Management Corporation

Headquartered in St. Louis, Missouri, American Water's Environmental Management Corporation is a forerunner in the development of sustainable and innovative solutions for effective water treatment management and operations. We pioneer solutions for optimizing the total water cycle - turning its liquids, solids and gases into our customers' best advantage.



Our services include sustainable project development and process operations. We will prospect ways to bring you predictable and sustainable value so you can focus on your core business while we lower your operating expenses with safe and reliable performance.

Environmental Management Corporation's customers are supported by strong local, regional and central teams of experts. Our world-class talent provides depth and breadth in science, engineering, operations, and finance. This diverse scientific expertise and broad process knowledge allows us to take a holistic approach to process-oriented system design. And we employ sophisticated systems and software to ensure the highest level of performance and reliability at the lowest possible cost.

Our organization is driven by operational key performance indicators. We achieve daily performance improvement with real-time transparency and pro-active management. We also create productivity gains by implementing best practices resulting from continuous benchmarking efforts and technology gains.

Sustainable Project Development

We excel at sustainable project development. With a long-term agreement, we will assume the technology, construction and lifecycle operating risk of your project.

We will ensure the facility is designed to deliver a safe and environmentally compliant operation with the highest quality water service. We consider process performance, best operating practices and technologies, and lowest lifecycle cost while ensuring your reliability is not compromised.

Our solutions are comprehensive and unbiased. We do not have any long-term commitments to any one equipment supplier, allowing us to select the best equipment for our customer's particular application.

Process Operations

Our Interlink™ offering will lead you to more efficient process operations. We can connect your facility to our team of experts to enhance your site's day-to-day operations, data management, system optimization and sharing of best practices.

Interlink™ will complement your current facility operations while reducing risk, increasing cost-savings opportunities, and long-term benefits. To allow our customers to choose the support most appropriate for their needs, we offer three levels of Interlink™ service.

Interlink™ Pro - Professional oversight and 24/7 monitoring
Interlink™ Plus - Professional oversight, 24/7 monitoring plus site audits/visits conducted by EMC field management
Interlink™ Max - Complete transfer of risk and operational responsibilities to Environmental Management Corporation

Commercial Services

Our experienced teams have helped clients all over the country with their water and wastewater systems and value-added services such as LineSaver® service line protection programs.

We have the capability to operate and manage municipal water and wastewater systems, design and build systems of all sizes, and deploy teams of engineers and planners to help develop state-of-the-art systems. We can also customize, implement and manage the LineSaver® service line protection program.

Our commercial clients count on us everyday to help them develop, build and maintain their systems, or to help improve existing ones. Our solutions are varied and are customized to meet the needs of our clients. We don't provide one-size-fits-all solutions and we work hard to understand the true nature of the project and develop the best approach.

Our Commercial Services area will show you the many ways we can help you and your business, whether you're a manufacturer, a shopping mall, an NFL football stadium, or a restaurant.

Visit our case studies for information on specific projects.

Environmental Management Corporation (see detail under Residential Services)

Planning & Engineering

For more information, contact us at 908.359.5501 or email us at awe.projectinquiries@amwater.com.

American Water's American Water Enterprises Group (AWE) works with commercial and industrial clients to design, build and operate decentralized water and wastewater facilities. Decentralized treatment facilities provide service to developments where connection to a central water utility is not feasible and allow for efficient water recycling and reuse.

Our work with clients on decentralized water and wastewater systems begins with planning and engineering. Partnering with leading engineering and design firms in the development and construction of state-of-the-art facilities, we provide expertise in process, mechanical, electrical, structural and civil design for clients.

Our planning and engineering services include:

- Project oversight – We supervise facility planning and engineering from start to finish.
- Feasibility and analysis studies – We conduct research to determine a development's most efficient water and wastewater service options.
- Site evaluation – We determine optimum locations for facilities.
- Permitting – We secure the permits necessary to build facilities.
- Plant and process design – We provide custom solutions and innovative uses of technology.

Design/Build

The lack of adequate water supply can pose numerous problems to development and slow growth. Bringing water to areas where it doesn't exist or where it is in short supply is another challenge that American Water helps businesses and communities overcome. Our teams have helped to plan and build infrastructure for all types of projects. We've worked with new residential communities, shopping malls, office buildings and international corporations to provide them with water and wastewater services.

Our strength as a leader in water service and wastewater treatment stems from our expert teams and our longevity in the industry. Our teams of experts work hard each day to develop solutions that provide our customers with the water that is necessary to everyday life. Whatever the challenge is, chances are American Water can help to solve it. We have the expertise and the capabilities to design and build decentralized water and wastewater facilities for developers, helping them deliver projects on time and on budget.

We manage water resources in an environmentally sensitive way, and always take into account the environmental impact of the projects we design and build. One type of system we design - Community On-Site Water/Wastewater Systems (COWS) – are small decentralized systems that are managed as one without being physically interconnected. The COWS model minimizes environmental impact by recycling water or recharging groundwater.

We're a trusted water resource company dedicated to creating and delivering innovative solutions, and we're able to put our experience to use for you.

Contract Operations

For companies seeking to maintain ownership of their decentralized water and wastewater treatment facilities, American Water's American Water Enterprises Group (AWE) can manage, operate and maintain the facilities under contract. We provide communities across the country with a variety of services, which include providing water and wastewater-related services, engineering and planning for new projects or upgrades to existing projects, consulting and sales of water infrastructure and distribution products, such as pipes, to water and wastewater utilities and other consumers.

Benefits to contracting your plant's operations include:

- The use of specialized, highly automated techniques to run facilities efficiently

- Ensuring that your treatment plants are run by licensed operators whose training and experience make them leaders in the field
- Tapping into a team who has extensive experience operating under a variety of contract scenarios and are committed to cost-effective operations

Our teams of experts have experience in every stage, and in every facet of water and wastewater service solutions - from managing the design and building of a new system, to upgrading an existing project, to the operating and maintaining the project once it is complete.

For more information, contact Bill Patterson, Senior Vice President of Business Development, at 856-346-8200.

LineSaver® Service Line Protection Program

LineSaver®
Water Line Protection Program*
Sewer Line Protection Program*
In-Home Plumbing Emergency Protection Program*

American Water's service line protection programs are available nationwide under the LineSaver® brand to municipalities that have self-operated systems or have a public-private partnership for their water and sewer systems.

As a municipal leader, you can enhance the image of your community and utility by reducing homeowner complaints, providing a valuable public service, and securing a new income opportunity.

What Is LineSaver?
Homeowners in your community may not be aware of their responsibility to maintain the water and sewer laterals that run through their property. LineSaver helps protect homeowners from the high cost of internal and external water and sewer line repairs typically not covered by homeowners insurance.

How Does LineSaver Work?
American Water Resources®, a subsidiary of American Water, fully manages the Program. With over 10 years of experience designing, testing, and administrating service line protection programs, our team of experts will customize LineSaver to meet the operational, resource, and financial needs of your municipality.

Benefits include:

- Income opportunity for your municipality
- No capital investment, no budget increase, and no new taxes
- Service line repairs (within program terms and conditions) paid by American Water
- Convenient 24/7 customer service for 365 days a year
- Guaranteed 24 hour contractor response
- Efficient claims management
- Local contractor network established by American Water

- American Water Resources develops, distributes, and pays for homeowner educational and marketing materials
- Optional program enrollment for homeowners
- Reduced community complaints
- Peace of mind protection for your community

It's time to bring LineSaver to your municipality!
To secure a meeting or conference call presentation with our experts, call the Homeowner Services Group of American Water at 1-800-931-1548 or contact us at LineSaver@amwater.com.

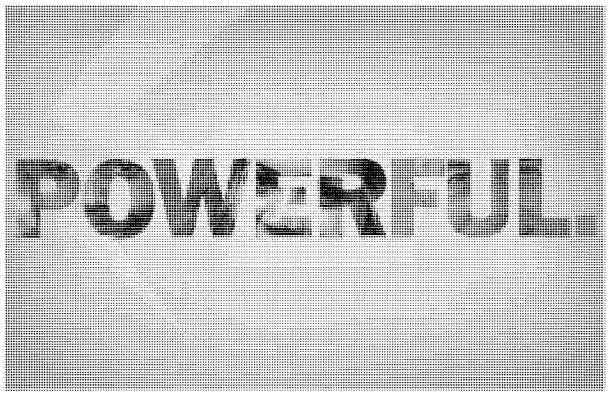
**In CA this program is offered through American Water Resources Insurance Services. In CA and VA, this program is insurance provided by Virginia Surety Company, Inc.*

LineSaver Utility Partnerships

American Water Resources offers other utility companies the opportunity to build a LineSaver partnership that can help tap into incremental revenue growth, differentiate your business from competitors, bundle programs, and continue to provide your customers with exceptional products and services that enhance your brand and build loyalty.

Over the years, American Water Resources - a subsidiary of American Water - has become the most experienced provider of water and sewer line service contract protection with hundreds of thousands of satisfied customers across the country enrolled in our programs. Our Water Line Protection, Sewer Line Protection and In-Home Plumbing Emergency Programs were developed in response to homeowner interest in protecting themselves from repairs that could potentially cost thousands of dollars and which require prompt attention and skilled resolution.

View our LineSaver benefits matrix here or contact Amy Marks-Bash for more information at 856.874.4954 or amarks@amwater.com.



*Insurance provided by Virginia Surety Company, Inc. In California, program is administered by American Water Resources Insurance Services.

Service Line Partnerships

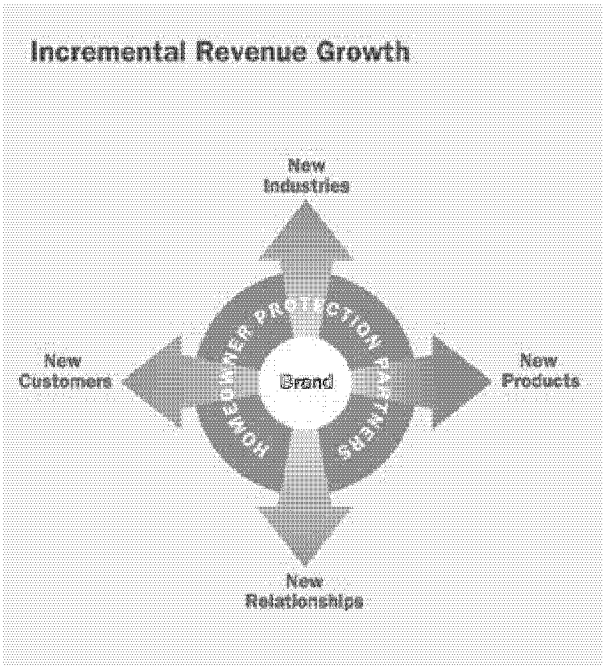
Homeowner Protection Partners

Your partner in opportunity.

Homeowner Protection Partners is a growing resource for companies seeking to increase revenue by taking advantage of the benefits of strategic brand extension and innovative marketing initiatives. Whether you are looking to introduce your brand to a new industry, create new and powerful affiliate relationships, or enhance customer service, you can trust Homeowner Protection Partners.

We create new value in existing customer relationships by providing access to innovative products and services that drive loyalty and build revenue.

Through our strategic affiliation, your company enjoys a new revenue stream with no capital investment.



Building on Success.

Hundreds of thousands of homeowners nationwide are already taking advantage of our service line protection programs, and for good reason. Broken water lines or sewer line blockages can cause real financial hardship for homeowners, especially when they discover that they are responsible to cover the repair costs. Service line repairs can cost thousands of dollars, and are typically not covered by homeowners insurance. Our success is attributed to educating homeowners about service line ownership. We currently manage over 600,000 service line protection contracts nationwide and are now poised for growth via partnerships with leading companies.

Homeowner Protection Partners is administered by American Water Resources®, a subsidiary of American Water, one of the nation's largest water and wastewater services provider. American Water employs nearly

7,000 people and serves more than 15 million customers. With a proud heritage of over 120 years of experience providing exceptional service and innovative solutions, American Water is a resource you can trust.

Open up a pipeline to greater profits!
Interested companies click here, e-mail HomeownerProtectionPartners@amwater.com or call 1.866.601.1608 to find out how.

**In CA this program is offered through American Water Resources Insurance Services. In CA and VA, this program is insurance provided by Virginia Surety Company, Inc.*

Billing Services

American Water's partnerships with communities on water and wastewater management have yielded substantial cost reductions, measurable performance improvements and superior service to citizens.

By offering a suite of automated billing services, we have helped communities operate their water utilities more efficiently. By implementing advanced information technology plans and using the internet, we help communities automate traditional manual processes, including:

- Meter Reading
- Customer Accounts
- Communications
- Collections
- Consumption Calculations
- Water Quality Analysis
- Work Orders, Purchase Orders and Inventory

By centralizing systems and applications, we can reduce costs and eliminate redundancy in systems, staff and support. And by leveraging these applications over time, communities can realize continued efficiency improvement.

Residuals Management

American Water Residuals (Terratec Environmental Ltd.) is a leading provider of residuals management throughout North America.

With over 30 years of biosolids management experience, Terratec's professional, agricultural and technical staff provides comprehensive biosolids management programs which include recommendations regarding application methods equipment requirements, storage facility considerations, monitoring systems and agricultural nutrient management considerations as well as the organization of public relations programs and government agency liaison.

Our Residuals Management group provides a vast array of innovative and sustainable solutions for all residuals challenges.

We are pleased to offer a wide array of specialized services including:

- Beneficial Reuse Through Land Application
- Advanced Technology/Products
- Commercial Services
- Special Projects

Our Clients Include:

Municipal

- Toronto
- Halton

Carbon Services

American Water is a leading provider of granular activated carbon (GAC) – a filter medium used to remove organic materials during water treatment and control water taste and odor. We are the only U.S. provider of custom GAC reactivation services in North America.

Our Carbon Services Group has the right carbon to best fit several specific treatment applications. We offer three types of GAC:

- Virgin GAC – We remove, reactivate and dispose of spent GAC from the treatment facility and replace it with the proper volume of virgin GAC, produced from raw materials.
- Reactivated GAC – We remove and reactivate spent GAC and add virgin GAC as make-up to replace all losses incurred at the treatment facility. The proper volume is returned to the facility.
- Custom Blended GAC – We remove and reactivate spent GAC and add virgin GAC to create a custom blend of virgin/reactivated GAC proportioned to be most cost-effective. The proper volume is returned to the treatment facility.

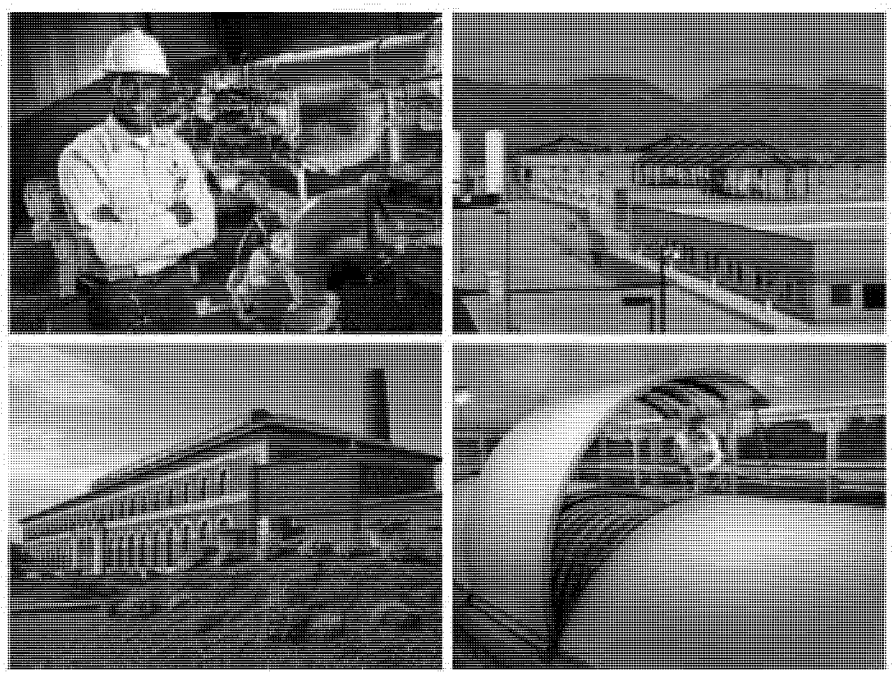
American Water also offers a wide range of services related to GAC and other filter media, including:

- GAC Analysis
- Plant Operations/Optimization
- Media Change-Outs
- Media Supply
- Media Disposal
- Media Equipment and Vessels
- Emergency/Temporary Services

Case Studies

Over the years, and all across North America, American Water has had the opportunity to work on exciting projects of all sizes. What can we do for you?

Click the image below to view the American Water Solutions website:



Developer Services

Working with knowledgeable and experienced teams can bring enormous value to a development project. Not only do we offer a variety of water and wastewater services for developers across the nation, we offer teams of experienced professionals who can help you complete projects of any size.

Visit our case studies for information on specific projects.

Applied Water Management Group (see detail under Residential Services)

Planning & Engineering (see detail under Commercial Services)

Design/Build (see detail under Commercial Services)

Contract Operations (see detail under Commercial Services)

Own/Operate

In addition to operating decentralized water and wastewater systems, American Water's American Water Enterprises Group (AWE) can assume ownership of facilities and their assets. As the facility owner and operator, we offer developments the opportunity to receive financial benefit while relieving them from the risk and responsibility of running a utility.

As facility owner, we assume responsibility for:

- Operations
- Management

- Maintenance
- Customer Billing

Whether you represent a homeowners association, developer or public service provider, we can provide an asset purchase solution to suit your needs.

Geosciences Services

Offering expertise in accessing groundwater sources and returning effluent responsibly to the ground, American Water's Geosciences Services team helps developers identify the optimum locations for treatment facilities. Housed within our Applied Water Management (AWM) Group, our team is comprised of experts in the field of geosciences. Known as the Geosciences Services Group, this team provides AWM with in-house expertise in hydrogeology, environmental geology, engineering geology and soil science.

The team's expertise is a core service offered by AWM, and provides additional value as the group works with clients to develop decentralized water and wastewater utilities. The Geosciences team also independently offers its services to a variety of clients including residential developers, municipalities and private utilities throughout the Mid-Atlantic region. Comprised of professional geologists, soil scientists and field technicians, the Geosciences Services Group provides clients with reliable and sustainable water solutions through planning studies, feasibility assessments, detailed investigation, analysis, modeling, permitting, construction management and expert testimony.

As part of the planning and engineering process for new facilities, our Geosciences Services include:

- Fracture trace analysis to locate the best-yielding groundwater sources in fractured bedrock aquifers
- Test drilling to access groundwater sources
- Monitoring groundwater wells
- Securing water allocation permits
- Modeling for effluent disposal

For more information, contact Applied Water Management at 908.359.5501.

Permitting

American Water assists developers in securing the permits necessary to build a decentralized water or wastewater treatment plant. While requirements vary from state to state and project to project, our permitting expertise allows us to keep projects on track. Permits typically secured for water or wastewater treatment projects include:

- Water Allocation Permit
- Wastewater Management Plan Amendment
- Disposal Permit
- Treatment Works Approval

Water Recycle & Reuse

In areas where water demand outweighs supply, American Water specializes in the reclamation and reuse of treated wastewater. Recycled water can be used for several purposes, such as irrigation, toilet flushing, facilities cooling and industrial applications. It can also be released to recharge groundwater or streams.

We have contributed our expertise in water reuse to several innovative projects, including self-contained wastewater recycling systems in New York high-rises and a system built to help an NFL football stadium handle the halftime flush by recycling and reusing its own water.

Watch our video on reclaimed water to learn more. View our Reuse projects here.

Visit amwatersolutions.com to learn more about many of the solutions we've completed across the country.

Green Solutions

It's no secret that the earth's water supply is dwindling, and it's no secret that there is a growing need to develop and perfect new processes and technologies to preserve and recycle what supply we do have.

The lack of adequate water supply can pose numerous problems to development and slow the growth. Bringing water to areas where it doesn't exist or where it is in short supply is another challenge that American Water helps businesses and communities overcome. Our teams have helped to plan and build infrastructure for all types of projects. We've worked with new residential communities, shopping malls, office buildings and international corporations to provide them with water and wastewater services.

Over the past few years, American Water experts have become involved in projects that help to recycle water supply and tap into sources that have been previously out of reach. At Gillette Stadium in Massachusetts, and at the Solaire luxury high-rise apartment building in New York City, our expertise has been tapped to develop self-contained wastewater recycling systems that save water by treating and reusing water that is used inside the buildings.

We've also been hired to help with a seawater desalination treatment plant in Tampa, Florida. The project will convert ocean water to drinking water and serve a wide area of residents and businesses in the drought-prone area in Florida. This facility, as well as a facility that is underway in Monterey, California, will help to ensure that high-quality water remains available in these areas and that the conversion process is safe and environmentally sound. The desalination plant in Tampa, Florida, is the largest of its kind in the United States.

To learn more about Gillette Stadium, Tampa Bay and other Green Solutions, visit our Case Studies section.

Case Studies (see detail under Commercial Services)

Federal Services

Our American Water Enterprises and Military Services Group works with the United States Government to provide water and wastewater services to a number of locations across the country. We're able to provide our full array of services, design/build, planning and engineering, and many more to help solve water and wastewater service challenges of all scopes and sizes.

Military Services

Our Military Services Group works with the United States Military to treat and supply water and to collect and treat wastewater for military installations all over the country.

Visit our Current Customers page to learn about the solutions we are currently providing to the U.S. Military.

For more information about Military Services Group, please contact Gary Kolp, Business Development, 856.359.2081.

Case Studies (see detail under Commercial Services)

Municipal Services

For more than 121 years, we've been providing high-quality water and wastewater service to cities and towns across the country. We've seen all types of issues and challenges and have learned that one size solution doesn't fit all. Our solutions are varied and are customized to meet the unique needs of each individual project.

We're experienced in creating infrastructure plans, building custom water and wastewater systems, developing "green solutions", providing water to areas that lack adequate supply, and implementing and managing service line protection programs.

But that's not the whole story. We also help communities by providing operation, maintenance and upgrades to existing systems. We can even help out with billing and administrative systems and revenue-generating value-added services. Our Municipal Services area will show you the many ways we can help you and your community improve service to your customers, while still maintaining local ownership.

Applied Water Management Group (see detail under Residential Services)

Environmental Management Corporation (see detail under Residential Services)

What We Do For Municipalities

Our teams of expert scientists, engineers and plant operators, as well as our field teams and customer service representatives work hard every day to provide the highest level of service to our municipal customers. Our longevity in the water industry, as well as a our national footprint, allow us to offer a wide array of capabilities that other water utility companies cannot.

In addition to our standard services like operations, maintenance, planning and engineering, we are also able to create public private partnerships, help with infrastructure upgrades and create concession relationships. All of our programs are customized to fit the unique needs of the municipality's water and wastewater needs.

A recent report from the USEPA gives us a look inside our country's water pipes, plants and other infrastructure. Calling it a "significant challenge," the report states that $300 billion in updates will have to be made over the course of the next 20 years in order to ensure the reliability and quality of water and

wastewater service in the U.S. A high percentage of cities and towns across the country have neither the expertise, nor the budgets to make these necessary upgrades and repairs on their own. We do. And we've been helping cites like Buffalo and Seattle deliver a higher standard of service and higher quality water to their businesses and residents.

In certain situations, American Water can even provide financial relief to a municipality. For customized solutions that can help overcome budget gaps, declining credit ratings or borrowing capacity limitations, American Water delivers. Put the power of the largest investor-owned U.S. water and wastewater services company to work for your municipality. With a proven history of success working with communities around the country, we are making a difference for municipalities through innovative and responsible ways of addressing financial and infrastructure challenges. For more information on how we may be able to help, call Bill Patterson at (856) 346-8200 to learn more.

NATIONAL LEADERSHIP • INNOVATIVE SOLUTIONS • PROVEN EXPERTISE • ENVIRONMENTAL STEWARDSHIP • RELIABLE CUSTOMER SERVICE

Public-Private Partnerships

You might not realize it, but your water system has always involved the private sector. From the lawyers who assist with financing arrangements, to the contractor who poured the concrete, to the engineers who design pump stations, you rely on private services to get water to your customers. Choosing a single, experienced private provider can streamline all of those contacts, making far less work for you and bringing greater reliability and service to your customers. That means that public-private partnerships are not revolutionary at all but, instead, merely an evolution of how to most efficiently and cost-effectively deliver reliable water and wastewater services to customers

When a water or wastewater system is designed and built, typically the municipality is burdened with coordinating and overseeing all of the private contractors involved, including each construction specialty, financing and legal work. That means the municipality also assumes the risk involved in this fragmented management system. Relying on a single private partner who is experienced in the industry to manage all aspects of the project can transfer these risks to the private partner and will deliver high-quality, less stressful results.

To American Water, a public-private partnership is exactly what it sounds like: a partnership in which the public truly comes first. It's all about local involvement, improving the quality and reliability of a community's water or wastewater system and service to its customers, updating its pipes and treatment plants to handle the growth its area is experiencing, and being a good neighbor in the areas we serve.

A public-private partnership with American Water can also help you upgrade your system infrastructure, which could be decades or even a century old, without the resistance you might see from residents. It will also relieve the pressure that changing weather patterns like drought and flooding are putting on communities across the country by linking you to a company that regularly deals with and has developed best practices around changing weather patterns. Many cities are forced to impose water restrictions and find ways to deal with heavy rain but those are the issues American Water effectively deals with every day – for over 121 years. It's what we do.

In Buffalo, New York, we've helped save $21 million so far by partnering with the city to operate and manage its water system, to conduct maintenance and repairs and to automate its customer record maintenance system. The operation serves a population of 290,000 and produces about 85 million gallons of water each day. Together with the City of Buffalo, we won the 2007 Outstanding Achievement Award in Public/Private Partnerships given by the U.S. Conference of Mayors Business Council.

The Tolt treatment facility in Seattle is another success story. In 1997, American Water began working on the project which now provides the city with 120 million gallons of water per day, or roughly 30% of the City of Seattle's annual drinking water supply. The plant's design/build/operate model developed by American Water and its partners saved the city an estimated $60 to $70 million over its original benchmark design costs.

View the entire Buffalo and Seattle case studies here.

Types of Public-Private Partnerships:

Contract Operations

For companies seeking to maintain ownership of their decentralized water and wastewater treatment facilities, American Water's American Water Enterprises Group (AWE) can manage, operate and maintain the facilities under contract. We provide communities across the country with a variety of services, which include providing water and wastewater-related services, engineering and planning for new projects or upgrades to existing projects, consulting and sales of water infrastructure and distribution products, such as pipes, to water and wastewater utilities and other consumers.

Benefits to contracting your plant's operations include:

- The use of specialized, highly automated techniques to run facilities efficiently
- Ensuring that your treatment plants are run by licensed operators whose training and experience make them leaders in the field

- Tapping into a team who has extensive experience operating under a variety of contract scenarios and are committed to cost-effective operations

Our teams of experts have experience in every stage, and in every facet of water and wastewater service solutions - from managing the design and building of a new system, to upgrading an existing project, to the operating and maintaining the project once it is complete.

For more information, contact Bill Patterson, Senior Vice President of Business Development, at 856-346-8200.

Design/Build

The lack of adequate water supply can pose numerous problems to development and slow growth. Bringing water to areas where it doesn't exist or where it is in short supply is another challenge that American Water helps businesses and communities overcome. Our teams have helped to plan and build infrastructure for all types of projects. We've worked with new residential communities, shopping malls, office buildings and international corporations to provide them with water and wastewater services.

Our strength as a leader in water service and wastewater treatment stems from our expert teams and our longevity in the industry. Our teams of experts work hard each day to develop solutions that provide our customers with the water that is necessary to everyday life. Whatever the challenge is, chances are American Water can help to solve it. We have the expertise and the capabilities to design and build decentralized water and wastewater facilities for developers, helping them deliver projects on time and on budget.

We manage water resources in an environmentally sensitive way, and always take into account the environmental impact of the projects we design and build. One type of system we design - Community On-Site Water/Wastewater Systems (COWS) – are small decentralized systems that are managed as one without being physically interconnected. The COWS model minimizes environmental impact by recycling water or recharging groundwater.

We're a trusted water resource company dedicated to creating and delivering innovative solutions, and we're able to put our experience to use for you.

LineSaver® Service Line Protection Program

LineSaver®
Water Line Protection Program*
Sewer Line Protection Program*
In-Home Plumbing Emergency Protection Program*

American Water's service line protection programs are available nationwide under the LineSaver® brand to municipalities that have self-operated systems or have a public-private partnership for their water and sewer systems.

As a municipal leader, you can enhance the image of your community and utility by reducing homeowner complaints, providing a valuable public service, and securing a new income opportunity.

What Is LineSaver®?
Homeowners in your community may not be aware of their responsibility to maintain the water and sewer laterals that run through their property. LineSaver® helps protect homeowners from the high cost of internal and external water and sewer line repairs typically not covered by homeowners insurance.

How Does LineSaver® Work?
American Water Resources®, a subsidiary of American Water, fully manages the Program. With over 10 years of experience designing, testing, and administrating service line protection programs, our team of experts will customize LineSaver® to meet the operational, resource, and financial needs of your municipality.

Benefits include:

- Income opportunity for your municipality
- No capital investment, no budget increase, and no new taxes
- Service line repairs (within program terms and conditions) paid by American Water
- Convenient 24/7 customer service, 365 days a year
- Guaranteed 24 hour contractor response
- Efficient claims management
- Local contractor network established by American Water
- American Water Resources develops, distributes, and pays for homeowner education and marketing materials
- Optional program enrollment for homeowners
- Reduced community complaints
- Peace of mind protection for your community

It's time to bring LineSaver® to your municipality!
To secure a meeting or conference call presentation with our experts, call the Homeowner Services Group of American Water at 1-800-931-1548 or contact us at LineSaver@amwater.com.

**In CA this program is offered through American Water Resources Insurance Services. In CA and VA, this program is insurance provided by Virginia Surety Company, Inc.*

Billing Services

American Water's partnerships with communities on water and wastewater management have yielded substantial cost reductions, measurable performance improvements and superior service to citizens.

By offering a suite of automated billing services, we have helped communities operate their water utilities more efficiently. By implementing advanced information technology plans and using the internet, we help communities automate traditional manual processes, including:

- Meter Reading
- Customer Accounts
- Communications
- Collections
- Consumption Calculations
- Water Quality Analysis
- Work Orders, Purchase Orders and Inventory

By centralizing systems and applications, we can reduce costs and eliminate redundancy in systems, staff and support. And by leveraging these applications over time, communities can realize continued efficiency improvement.

Infrastructure Upgrades

The United States Environmental Protection Agency (USEPA) estimates that approximately $277 billion of capital spending will be needed between 2003 and 2022 to replace aging water infrastructure and comply with stricter water quality standards, and the USEPA estimates that approximately $388 billion will be needed between 2000 and 2019 to replace aging wastewater infrastructure. We intend to invest capital prudently to enable us to continue to provide essential services to our regulated water and wastewater utility customers. Investing in our infrastructure is critical to our mission of serving our customers high-quality water and wastewater services.

We have a strong, ongoing commitment to investing in infrastructure and keeping it updated. We are committed to delivering excellent services, that our customers depend upon, at an exceptional value. Tap water costs about a penny a gallon - a remarkable value compared to any other utilities today. With few exceptions, water service remains the lowest utility bill that a household will pay.

Challenges In The Water Industry: Fragmented Water Systems

Challenges In The Water Industry: Infrastructure And Its Role In Water Supply

Concessions

It may seem unusual, but when we look at your water system, we consider your pipes and treatment plants to be important yet underleveraged assets. In this new form of public/private partnership, you are able to raise funds for your city by monetizing those assets while retaining ownership and control. You receive an upfront cash payment while maintaining ownership and control of the implementation of added efficiencies and cost savings through the expertise of an experienced operator like American Water. In addition, your city continues to control the water system and set the rates.

The concession model is similar to a long-term lease. The contract might be 20-30 years or longer but is negotiable. During negotiation of the contract, you will determine how the water system will be run and how rates will be set. Once the contract is finalized, your municipality will receive a large infusion of money, which can be used to help address financial constraints for key infrastructure projects or other important city priorities.

Environmentally Friendly Products

A little bit of effort can go a long way.

By choosing to use environmentally friendly products such as recycled paper, non-aerosol products,

organically-based cleaners and other earth-friendly products, you can do your part to help protect the environment and our natural resources.

Clean Green

Some ordinary household cleaning products are considered hazardous materials. An easy way to familiarize yourself with most household hazardous wastes is to look on container labels for danger symbols. Products may be poisonous, corrosive, highly flammable or even explosive. When hazardous materials are disposed of improperly, they can be a threat to your health and to the environment, including our waterways. To help produce the threat, use environmentally friendly products to replace the toxic ones. Alternative products can be made by using simple ingredients found in most stores. Some of the basic ingredients you will need include: baking soda, water, vinegar, borax, lemon juice, salt, a pump spray bottle and little elbow grease.

Start with a few recipes and discover the alternatives that work best for you. Remember, some of the alternatives work more slowly and require more scrubbing than their commercial counterparts, but they are safer for your family and the environment. Non-toxic alternatives are also less expensive and require less storage space.

Easy Recipes for General Cleaning
All Purpose Cleaner
1 gallon hot water
1/2 cup washing soda
Mix well, wash surface, rinse.

Window and Glass Cleaner
1 gallon water
1/2 cup white vinegar
Apply with cloth or mist/
spray bottle; dry with clean cloth.

Wood Furniture/Floor Polish
1/2 cup white vinegar
1/2 cup vegetable oil
Mix well; rub on surface; buff
with clean, dry cloth.

Toilet Bowl Cleaner
1/2 cup borax
Drop of mint extract
Scrub bowl

Rust
Soak with lemon juice. Rub with salt. Dry in direct sunlight and wash.

Mildew: Clean with hydrogen peroxide (an environmentally-safe alternative to chlorine-based products); then scrub with a thin paste of lemon juice and borax to inhibit mildew formation.

Spot/Stain Removers: Immediately soak in cool water and sponge. Hot water can set the stain.

Grease: Rub with cloth dipped in borax or apply a paste of cornstarch and water. Let dry and brush off.

Oil Stain: Before laundering, rub white chalk into oil stain.

Ink (ballpoint): Sponge with rubbing alcohol or hair spray. Rub with soap, rinse and wash.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Tom McKitrick

Question:

60. For each of the years 2005, 2006, 2007, 2008, 2009, and the test year, and for 2010 to date, please provide all ***Documents*** that ***Identify*** all expenses and revenues incurred or received for ***AWS Services,*** how the expenses and revenues were or are to be allocated, and how such expenses and revenues were or are to be treated for regulatory purposes. Provide all ***Workpapers*** and supporting ***Documents*** used to develop this response.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, TAWC does not receive services from AWS; is not charged or allocated any expenses or revenue from AWS; and has not included any revenues or expenses from AWS in the calculation of the revenue requirement in this case.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: George Conroy

Question:

61. With respect to all expenses allocated to ***TAWC*** by *A **WWC, A WWSC, AWR, AWCC,*** or any other subsidiary or affiliate of any of them, please provide for 2006, 2007, 2008, 2009, the test year, the normalization period, and the attrition period and as projected for 2010 and 2011, the total dollars charged by each company, affiliate, or subsidiary, the NARUC account number to which such expenses were recorded, the allocation factor or method applied to each such expense account, and a complete description of the allocation factor or method. Provide all ***Workpapers*** and supporting ***Documents*** used to develop this response.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. To comply with this request would literally require the Company to provide copies of hundreds of thousands (if not millions) of invoices and payroll charges at an astronomical cost which the Company does not believe is necessary or reasonable in establishing the fair and reasonable rates of the Company in this case. Without waiving these objections, please see the attached file labeled TN-COC-01-Q61-ATTACHMENT that contains allocated and direct charges to AWWSC from AWWSC and other affiliates for the periods requested. Further, the TRA ordered the Company to provide a Management Audit of AWWSC, which included an audit of a statistically valid sample of the transactions supporting the costs of AWWSC charged to TAWC. The Management Audit, including the audit of AWWSC's transactions costs has

been provided as Exhibit MAM-8 to Mr. Miller's direct testimony. Finally, the Company's records are located in its office in Chattanooga, and the offices of AWWSC in Voorhees, NJ. The Company is willing to make available the millions of documents supporting these charges to the City if they choose to review them at their cost.

Question:

62. With respect to costs directly charged to ***TAWC*** by ***AWWC, AWWSC, AWR, AWCC,*** or any other subsidiary or affiliate of any of them, please provide for the following information for 2006, 2007, 2008, 2009, the test year, the normalization period, and the attrition period and as projected for 2010 and 2011 the total dollars charged by each company, affiliate, or subsidiary, the NARUC account number to which such expenses were recorded, the allocation factor or method applied to each such expense account, and a complete description of the allocation factor or method. Provide all ***Workpapers*** and supporting ***Documents*** used to develop this response.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. To comply with this request would literally require the Company to provide copies of hundreds of thousands (if not millions) of invoices and payroll charges at an astronomical cost which the Company does not believe is necessary or reasonable in establishing the fair and reasonable rates of the Company in this case. Without waiving these objections, please see the attached file labeled TN-COC-01-Q61-ATTACHMENT that contains allocated and direct charges to AWWSC from AWWSC and other affiliates for the periods requested. Further, the TRA ordered the Company to provide a Management Audit of AWWSC, which included an audit of a statistically valid sample of the transactions supporting the costs of AWWSC charged to TAWC. The Management Audit, including the audit of AWWSC's transactions costs has been provided as Exhibit MAM-8 to Mr. Miller's direct testimony. Finally, the

Company's records are located in its office in Chattanooga, and the offices of AWWSC in Voorhees, NJ. The Company is willing to make available the millions of documents supporting these charges to the City if they choose to review them at their cost.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Lori O'Malley

Question:

63. Please ***Identify*** for each year since January 1, 2003, the number of employees by position at the National Call Centers and for each position set forth the unburdened base hourly wage or salary rate (without overheads). In the event there is more than one base hourly rate for each position, provide the average and median base hourly rates for each such position.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, please see the attached document labeled as TN-COC-01-Q63-ATTACHMENT that lists the number of employees by position at the National Call Centers and their corresponding hourly rates at year end 2005-2009. The Company replaced its accounting system in 2005 and therefore, the data for 2003-2004 is not readily available using the Company's current accounting system.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Jim Bozman

Question:

64. ***Identify*** and provide all ***Documents*** constituting, reporting, or referring to call center operating statistics and reports that are prepared for management of ***TAWC***, ***AWWSC***, or any other subsidiary or affiliate of ***AWWC*** relating to, referring to, or concerning the efficiency, effectiveness, or other aspects of the operations of the call centers, including, without limitation, such information for operations related to ***Non-Regulated Services*** or other activities of non-regulated operations and companies served by the call centers.

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome, and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, operational productivity and service quality at the call centers are monitored and tracked with the following reports: 1) CSC Managing Directors Report, 2) Service Level Targets Report, and 3) Call Handling Data - Skill by Month Report. These three reports are attached to this response identified as TN-COC-01-Q64-ATTACHMENT. In addition, the Management Audit attached to Mr. Miller's direct testimony as Exhibit MAM-8 has substantial discussion and findings regarding the Call Center Statistics, trends, findings and recommendation.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: John Watson

Other Participating Employees: Jim Bozman

Question:

65. Please provide the number of customers for all water and wastewater operations of ***TAWC*** and other ***AWWC*** subsidiaries and affiliates, by company, for each of the years 1999 through 2009, each month of 2010 and as projected for 2010 and 2011.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, please see the attached document identified as TN-COC-01-Q65-ATTACHMENT.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Jim Bozman

Question:

66. For each of the years 2005, 2006, 2007, 2008, 2009, each month of 2010 and as projected for 2010 and 2011, please provide total ***AWWSC*** charges to each ***AWWC*** subsidiary or affiliate, whether regulated or not, that provides water or wastewater services, and each unaffiliated company that is provided services by ***AWWSC***.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, please see the attached document labeled as TN-COC-01-Q66-ATTACHMENT.

JOB DESCRIPTION			
Job Title: Analyst Premise QA (N)			**Job Code: 402442**
	Grade: L12	**FLSA: Non-Exempt**	**EEO: 5. Office and Clerical**
Salary Plan:	**Level: Not Applicable**		
Reports To:	**Supvr Regional Cust Svc**		

Status: Active	**Approved:** ☑ 4/4/2007	**Revised:** ☐

Primary Role: Responsible for executing and analyzing validation audits on revenue impacting fields on a consistent sampling of premises set up in ECIS to ensure billing is complete and accurate. Review exception (mismatch) reports that identify premises that contain potential revenue impacting errors in the premise set up and work with District Premise Champions, the Billing Department and Shared Services to correct the validated errors and ensure compliance with premise set-up process.

Key Accountabilities:	Percentage of Time:
Assess the validity and accuracy of the information supporting the billing impacting fields for a consistent sampling of new premises: - Complete and analyze daily reports for new premises set up in ECIS for each type of status (PN, IP, AP, RP, etc.) - Collect and evaluate all information and supporting documentation for new premises with active or RP status. - Utilize report information in developing recommendations for new premise processes.	40
Perform monthly reconciliations between new active premises with Tap Install and Set Meter orders: - Perform reconciliation of monthly reports for Tap Install and Set Meter orders and research any inconsistencies. - Perform reconciliation of monthly reports for new premises with active status and research any inconsistencies.	5
Manage the remediation process by communicating to the field any unusual exception from either the reconciliations performed, reports run, or data validation for immediate resolution: - Trend resolution by maintaining a log of communication sent to the field for resolution, including sent date, status, cleared date. - Review log with field on regular basis to determine any necessary steps needed for process compliance.	20
Evaluate mismatch report to monitor potential errors and partner with District Premise Champions, Shared Services and the Billing Department to take corrective actions on new premises set up in ECIS.	10

AMERICAN WATER

On a monthly basis provide reporting to the Regional QA Manager full scope document of all exceptions found during the audit of billing impacting fields and errors found on any of the mismatch and reconciliation performed during the month.	5
On a monthly basis provide reporting to the Regional QA Manager with a list of open exceptions that the field has not been able to address.	5

Education:	Associate's degree or 2+ years experience in related business environment.
Skills:	Excellent analytical skills. Personal computing experience, including Microsoft Office applications, ECIS. Strong organizational, communication skills.
Knowledge:	Undetermined
Scope: (Minimum)	Total Supervised: Exempt 0 Non-Exempt: 0 Direct Budget: $0 Indirect Budget: $0 Direct Revenue: $0 Indirect Revenue: $0
Experience:	Undetermined
Certifications & Licenses:	None Required
Work Environment:	Undetermined
Travel Requirements:	25%
Key Interfaces:	District, FRCC, Shared Services and Billing Personnel
Other:	Key Accountabilities (cont.): Validate any requests to update or edit Mismatch validation tables: -This includes evaluating the evidence submitted with the change request to determine if the change has been properly substantiated. If the evidence is adequate the QA team will sign-off on the evidence and pass the request to the Regional Premise Champion so the table can be updated. If the evidence is inadequate the QA team will inform the requester and ask for additional evidence. 5% Validate customer data from acquisitions: -Prior to migrating customer account and premise data from an acquisition into ECIS, the QA team should perform due diligence on the data. This would include checks on the number of active accounts and premises, checking for invalid or missing key data elements. 10%

AMERICAN WATER

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller/John Watson

Other Participating Employees: George Conroy/Sheila Miller

Question:

69. Describe all business development projects any portion of which was charged to ***TAWC*** during for 2006, 2007, 2008, 2009, the test year, the normalization period, the attrition period each month of 2010 and as projected for 2010 and 2011; state the amount of the charges to ***TAWC;*** and for each such project ***Explain*** how these charges benefited ratepayers of ***TAWC.***

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome. Without waiving these objections, see the list of completed and on-going business development projects related to operation in Tennessee identified as TN-COC-01-Q69-ATTACHMENT. The business development activities are primarily handled by the Manager of Business Development ("BD") at the Eastern Division of AWWSC who splits his time between activities in Tennessee and Kentucky, and the Director of BD at the Eastern Division who splits his time between the nine states that comprise the Eastern Division of AWWSC. In addition, there are support personnel at both AWWSC and the Eastern Division that assist in the preparation of models and other information specific to the projects for TAWC. The time and expenses related to BD are provided in the response to TN-COC-01-Q14-ATTACHMENT under the business unit for business development for each year 2007-2010. For easy reference, the totals for BD activities in TAWC for 2007-2010, and for the historical test-year and attrition year are shown below.

2007 - $99,318

2008 - $42,555

2009 - $71,892

2010 (forecast) - $74,360

HTY 3-31-10 - $78,677

Attrition Year - $81,037

Growth in revenues and customers from BD activities directly benefit the customers in a number of ways. The addition of new customers permit the spreading of fixed costs over a larger customer base incrementally lowering the cost to each customer, and revenue and earnings from BD growth directly lower the overall revenue requirement for all customers. The Company's BD activities have resulted in new bulk sales to Walden's Ridge, the acquisition of the former Suck Creek Utility District and the operation agreement with Lone Oak Utility District which have directly lowered the cost to the other customers of TAWC as described above. The BD activities have also led to renewal of existing bulk sales contracts, and the identification of potential growth opportunities that if implemented will benefit existing TAWC customers.

Tennessee American Water Company

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Sheila Miller/George Conroy

Question:

70. ***Identify*** the total amount of charitable contributions, corporate social responsibility, external affairs/communication, and functions expense, recorded at the National Service Center and Local Service Center levels for 2006, 2007, 2008, 2009, the test year, the normalization period, the attrition period, each month of 2010 and as projected for 2010 and 2011, the amount allocated to ***TAWC*** or any other regulated subsidiaries or affiliates of ***AWWC*** during each such period, and the accounts to which the costs were or are to be charged.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, the Company did not include charitable contributions for either TAWC or AWWSC in its revenue requirement calculation in this case. In addition, see the Company's response TN-TRA-01-Q013-ATTACHMENT at pages TRA-01-Q013-MANAGEMENT FEES, pages 1, 11-12 of 12. On page 1 the Company provided a summary of the management fee adjustment that eliminates charitable contributions and several other expense categories. The detail of the expenses listed on page 1 is provided in the shaded areas on pages 11-12. In addition see the response to TN-COC-01-Q14 where the summary of charges for external affairs/communications can be found under that function group which includes business units for corporate social responsibility. The amount of External Affairs/Communications costs recapped from the information provided in TN-COC-01-

Q14-ATTACHMENT for 2007-2010 and in the historical test-year and attrition year for TAWC is shown below.

2007 -	$127,632
2008 -	$163,531
2009 -	$194,286
2010 (forecast)-	$135,072
Historical Test-Year -	$186,957
Attrition Year -	$192,566

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: George Conroy

Question:

71. Provide all 2008, 2009, and 2010 travel and entertainment vouchers and receipts associated with charges to the following business units: CORP-Government Affairs, CORP External Affairs, CORP-Marketing, CORP-External Communications. CORP-Internal Communications, CORP-Corp Social Resp, WE-External Affairs, Business Transformation, and CORP-Investor Relations.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, see the attached spreadsheet identified as TN-COC-01-Q71-ATTACHMENT 1 for a listing of travel and entertainment expenses for the business units requested. The attachment identified as TN-COC-01-Q71-ATTACHMENT 2 contains copies of invoices for all paid voucher payment types (labeled PV on the report). See the response to TN-TRA-01-Q013 at TRA-01-Q013-MANAGEMENT FEES, pages 1, and 2-8 of 12 for detail of the p-card charges the Company eliminated from the historical test-year management fee expense as part of this rate case.

The Company is not providing the receipts for payments using Company purchasing cards (labeled CC on the report) due to the enormous number of receipts. The Company is willing to make this data available to the City for review at the AWWSC offices where the information is kept.

Subject Re: AP Invoices

paid in Feb

Hi kay,
Can you please research for any missing invoices for the month of March.
Thanks,

Subject AP Invoices

Deborah,

Regarding the AP invoice for A23ASST06- Collina is my sign on, I did not receive a statement for Costco for the month of March. The current statement of amount due $1788.02 is partly from the month of March. I have all the receipts for the current billing month of April totalling $605.53, of which I entered in the RVI notes. Can you forward me the unpaid billing for the month of March?

I know this seems confusing, but it must of went to someone else and it has been tossed from person to person.

Thanks for your help in trying to get this resolved.

Subject COSTCO CREDIT

Kay,

Attached are the copies of the Costco credit of $ 227. 86 we spoke of this morning, as you said you had not received copies.
This purchase was on the March bill and the credit was on the April bill.
I reentered per your request the April charges and codes. The total amount of charges were $605.53 for April.

Please advise me if you need more information.

Thanks,
Dolly

Question:

72. Please describe the services provided to ***TAWC*** for each month of 2008 and 2009 and as projected for 2010 and 2011 which are associated with the charges from "Business Transformation" business unit. ***Explain*** how these costs were allocated or changed to ***TAWC*** and precisely the work performed. Provide all travel and entertainment vouchers and receipts associated with charges to this business unit.

Response:

The Business Transformation project is an initiative to identify the investments necessary to replace aged business systems and improve our core business processes. The activities that are being carried/will be carried out to properly plan and manage this project include:

- Review and analyze 'as-is' process models, performance metric data and other documentation to establish a baseline.
- Conduct workshops, interviews and site visits to other companies to identify potential 'to-be' processes and communicate to stakeholders.
- Develop and document 'to-be' business requirements.
- Develop 'to-be' process models.
- Perform a gap analysis between 'as-is' and 'to-be' process models. Assess and document the impact of change on the business as it relates to job roles and responsibilities, capability requirements, and job skills.
- Prioritize process improvements.
- Obtain stakeholder acceptance of the 'to-be' process model and business requirements.

- Visit other companies to assess technology choices and determine technology requirements and impact to software selection.
- Prepare request for proposal for solicitation of software.
- Prepare a Business Case including estimate of benefits and cost of process improvement initiatives and technology solutions.
- Select system software platform.
- Hire system implantation partner to help build new processes and utilize new software solutions.
- Design and build and test new systems processes.
- Conduct formal training sessions to teach employees the new processes and software.
- Install software and begin new processes.

The costs for these services are being allocated to TAWC and other companies based on customer count formulas. The majority of the costs are currently being capitalized.

Please see attached document labeled as TN-COC-01-Q72-ATTACHMENT for the current and projected costs of the business transformation project for the period requested, as well as voucher level detail for travel and entertainment expenses.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Lori O'Malley

Question:

73. ***Identify*** each employee, by unique ***Identifying*** number, at the Local Service Center and National Service Center service level that allocated or directly charged costs to ***TAWC*** during 2008 and 2009 and as projected for 2010 and 2011.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, the Company does not maintain the information in the format requested in the ordinary course of its business. Please see the attachments identified as TN-COC-01-Q73-ATTACHMENT 1 and TN-COC-01-Q73-ATTACHMENT 2, that list employees at the Customer Service Centers that allocated or directly charged costs to TAWC during 2008 and 2009. Please also refer to the response to TN-CAPD-01-PART III-Q41 for a list of employees as of September 30, 2010. A projected list of employees for 2011 is not readily available since the company has not yet completed the 2011 budget. The Company's attrition year management fees were determined based on reasonable projections of cost increases and elimination of non-recurring expenses and expenses not normally recovered in rates as provided in the response to TN-TRA-01-Q013, at TRA-01-Q013-MANAGEMENT FEES, pages 1-12 of 12.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: None

Question:

74. Provide a mapping of the National Service Center and Local Service Center business units to the uniform System of Accounts.

Response:

The Company objects to this request on the grounds that the requested information is vague and ambiguous, unduly burdensome, overly broad and seeks information not in possession of the Company in the format requested. The Company also objects on the ground that the request seeks information not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, each business unit of AWWSC records its costs by the uniform system of accounts number system. The Company has provided in the response to TN-COC-01-Q14 a detailed report by year of the costs by each AWWSC function/business unit further detailing that information by account number (USOA). Please refer to the functional business units with the designation of CSC. All O&M management fees for TAWC are charged to account 535000.16.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Sheila Miller

Question:

75. ***Identify*** by business unit the amount of expense included in Exhibit 2, Schedule 3, page 1, under the line item labeled "Management Fees."

Response:

Please see the attached information identified as TN-COC-01-Q75 for the historical test-year. The Company's attrition year was not determined by individual business unit. As shown in the response to TN-TRA-01-Q12, in the attachments at TN-TRA-01-Q013, identified as TRA-01-Q013-MANAGEMENT FEES, at pages 1-12 of 12 , the Company used a factor of 3% annually based on reasonably expected increases for salaries and employee benefits to determine the management fee costs in the attrition year from the normalized March 2010 historical test-year information.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: None

Question:

76. Please provide all ***Documents*** that ***Explain,*** relate to, refer, or describe the process of allocating costs from any subsidiary or affiliate of ***AWWC*** to ***TAWC,*** including but not limited to how and when new allocation factors are developed, how costs are directly assigned, and how companies can choose to acquire from other sources services provided by ***AWWSC.***

Response:

The Company objects to this question on the grounds the requested information is overly broad and unduly burdensome. Without waiving the objections, see the response to TN-CMA-01-Q4 parts a-d., and attachments 2-4 which are responsive to this request. Also see the response to TN-COC-01-Q19-CONFIDENTIAL ATTACHMENTS that contains extensive information about cost allocations and internal controls surrounding those cost allocations. See the management audit by Schumaker & Co attached as Exhibit MAM-8 to Mr. Miller's testimony at Sections II and III which provide detailed discussions, findings and recommendations about the AWWSC allocations and internal controls related to the AWWSC billing (including both direct and allocation processes).

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Tom McKitrick

Question:

77. Please ***Identify*** and provide a copy of all management audits completed since January 1, 2007, including any directed by the TRA or any other state regulatory agency, performed by or for ***TAWC, AWWSC, AWWC*** or any subsidiary or affiliate of ***AWWC*** other than the ***Schumaker Report.***

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, the Booz Allen management audit performed and provided in docket number 08-0039 was previously provided to the City and is available on the TRA website under that docket number. Please see TN-CAPD-01-PART III-Q73-ATTACHMENT for the Pennsylvania American Management Audit.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Sheila Miller

Question:

78. In connection with "Summary of Adjustment to Test Year Operating Expense" (Exhibit 2, Schedule 3 of the filing), please ***Identify*** *in* detail all adjustments (Column "Test Year Adjustments Present Rates" and "Attrition Year Adjustments") for the Management Fees (Line 11) and provide all ***Documents*** constituting, referencing, containing, relating to, or referring to the Exhibit and Schedule and to such adjustments.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome. Without waiving these objections, the working papers for the management fees adjustments were provided in response to TN-TRA-01-Q013 and labeled as TRA-01-Q013-MANAGEMENT FEES, Pages 1 thru 12. The Excel file was also included in response to that same question and is labeled as Misc Line 18-21.xls, tab Management Fees. The summary of those adjustments to historical test-year management fees are provided in Exhibit MAM-9 to Mr. Miller's testimony. In addition, Mr. Miller's direct testimony and Exhibits MAM-10 and 11 to his testimony provide additional information on this topic.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Tom McKitrick

Question:

79. Please provide a schedule ***Identifying*** for each of calendar years 2006 through 2009, 2010 to date, and as projected for 2010 and 2011 (i) each subsidiary or affiliate of ***AWWC*** to which ***AWWSC*** provided services of any kind; (ii) the total amount paid by each such subsidiary or affiliate to ***AWWSC*** and (ii) the number of end-user customers for each such subsidiary or affiliate at the beginning and end of each calendar year. Provide all ***Workpapers*** and ***Documents*** supporting, referring to, or related to the requested information.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, see the responses to COC-01-Q65 and Q66 which provides information responsive to this request through the latest actual accounting close, October 2010. The 2011 plan is not complete at this time.

Question:

80. Please provide for all companies that charge salaries and wages to ***TAWC, a*** breakdown of the total amount of gross payroll and employee benefit costs (by benefit type) for the test year, the prior two historical years, the normalization year, the attrition year and as projected for 2010 and 2011 and between amounts expensed and amounts capitalized, and provide the percentage of payroll and employee benefits (by benefit type) charged to expense for each year. Provide all ***Workpapers*** and ***Documents*** supporting, referring to, or related to the requested information.

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome, and seeks information the Company does not maintain in the format requested. The Company further objects that the request is vague and ambiguous. Without waiving these objections, however, please see the attached schedule, identified as TN-COC-01-Q80-ATTACHMENT. A breakdown of AWWSC labor and benefits charged to TAWC is provided for the test year, 2008, 2009, the attrition year and projected for 2010. The normalization year is the same period as the test year. Projected 2011 information is not available in the format requested. Also see the responses to TN-COC-01-Q75 and Q76 for information on how the attrition year management fees were determined.

The breakdown of labor between capital and expense is provided. Employee benefit overheads are distributed based on the allocation of labor dollars providing the same capitalization percentage as that of labor.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller/John Watson

Other Participating Employees: Lori O'Malley

Question:

81. Please provide documentation containing the salary and/or wages for each position at ***TAWC*** or ***AWWSC***, all or part of the cost of which is charged to ***TAWC***.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, the hourly rate or salary for the TAWC employees was provided in response to TN-CAPD-01-PART III-Q21-CONFIDENTIAL ATTACHMENT. Please also see TN-CAPD-01-PART III-Q41 for the wages of each AWWSC position as of September 30, 2010 and the amount charged to TAWC.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: George Conroy

Question:

82. Please list separately for all companies, divisions, or entities that charge salaries and wages to ***TAWC***, the actual number of employees (where available), for each year 2003 through 2009, and monthly for 2010. If the labor force levels are other than full-time equivalent positions, please provide a separate listing stated in terms of full-time equivalent positions. Provide all ***Workpapers*** and ***Documents*** supporting, referring to, or related to the requested information.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, this request seeks information not readily available and/or in the possession of the Company in the format requested. However, please see the response to TN-COC-01-Q43 for total Service Company hours and charges for Tennessee for the years 2005 through September 2010 and the associated full-time equivalent positions allocated to Tennessee by function.

The summary schedule contains the yearly totals and FTE's by function. The other schedules provide a breakdown of the charges by month for the years 2005 through 2010. Detailed data for the years 2003 and 2004 was not reasonably available and was therefore not presented.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Sheila Miller/Lisa Brooks/Other Witnesses

Question:

83. Please produce a copy of all trade articles, journals, treatises, speeches and publications of any kind in any way utilized or relied upon by any of ***TAWC's*** proposed expert witnesses in evaluating, reaching conclusions, or formulating an opinion in the captioned matter as well as all articles, journals, speeches, or books written or co-written by any of the ***TAWC*** witnesses.

Response:

The Publications written by the expert witnesses were identified in their testimony provided in the original filing of this rate case. Also see the response submitted to TN-CAPD-01-SUPPLEMENTAL-Q81c.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Sheila Miller/Lisa Brooks/Other Witnesses

Question:

84. Please ***Identify*** and produce any and all ***Documents*** or evidence of any kind that ***TAWC*** intends to offer as evidence at the hearing or to refer to in any way at the hearing.

Response:

At this time, the Company intends to offer the testimony and exhibits thereto, which it has already filed in this docket along with the responses it has provided to data and discovery requests from the TRA staff and intervenors. The Company does not know at this time if additional testimony or exhibits will be offered including, but not limited to, rebuttal testimony and any document produced in discovery. The Company will seasonably supplement its response.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: Tom McKitrick/Others

Question:

85. For all expenses included in the "Summary Bill Reports," during each year 2003 through 2009, and monthly for 2010, please provide for each category of service and for each month a description of the purpose and amount of each expense.

Response:

The Company objects to this request on the grounds that it is overly broad and unduly burdensome and seeks information that is not relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, the types of services provided to TAWC are governed by the 1989 Service Company Agreement and the types of functional services provided by AWWSC have not materially changed since 1990 or since the Company's 2008 rate case. The Company provided significant information to Schumaker and Company during the management audit provided as Exhibit MAM-8 to Mr. Miller's direct testimony. The entire report (all sections) contains discussions, findings and recommendations on the types and breadth of services provided to TAWC by AWWSC and would indicate the entire report is responsive to this request. In addition the Company would specifically cite to Section II-A., beginning on page 13 of the management audit report referenced above. The Company would also refer the City to the response to TN-COC-01-Q19-CONFIDENTIAL ATTACHMENT provided on CD, with specific reference to Schumaker discovery request IR #3 which is directly responsive to this question.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
FIRST DISCOVERY REQUEST OF THE
CITY OF CHATTANOOGA

Responsible Witness: Michael A. Miller

Other Participating Employees: None

Question:

86. Please provide all ***Documents*** constituting, referencing, containing, relating to, responding to, or referring to any benchmarking studies or similar reports for ***TAWC***, ***AWWC***, ***AWWSC***, and any other subsidiary or affiliate of ***AWWC***, performed by outside consulting or benchmarking firms (for example, but not limited to: Gartner, Ernst & Young, Towers-Perrin, Hackett, Saratoga, and industry or functional associations), whether in draft or final form, with all associated documentation, including, but not limited to definitions, instructions, data inputs, and supplementary reports that have been initiated or completed since January 1, 2000. The requested ***Documents*** include, without limitation, all ***Documents*** constituting, referencing, containing, relating to, responding to, or referring to internal analyses of these reports, including, without limitation, remediation plans, schedules and progress reports associated with follow-up for this work. Please provide all ***Documents*** referencing, relating to, responding to, or referring to any such benchmarking stud(ies).

Response:

This question has already been asked verbatim. Please see the Company's response to TN-COC-01-Q18.
