TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

81. Identify each and every person whom the company expects to call as an expert, fact, or other witness at the hearing on the merits of this matter, or for whom the company expects to file Direct or Rebuttal Testimony. For each expert identified, please identify and produce:

    a. The subject matter on which the expert is expected to testify, any data, documents, materials, or other information shown to, relied upon, created by or considered by the witness as part of this case, any exhibits to be used by the witness, a full resume for the witness, the compensation to be paid for the testimony or, if a permanent employee of the company, the salary paid to the witness, and a listing of any other cases in which the witness has testified at trial, by deposition, or submitted written testimony.

    b. Any and all engagement letters, expert reports and work papers (including drafts, if found to be discoverable and not overly broad or unduly burdensome by the TRA) created by or provided to any expert, fact or other witness.

    c. A copy of any and all trade articles, journals, treatises, speeches and publications of any kind in any way utilized or relied upon by any of the company's proposed witnesses in evaluating, reaching conclusions or formulating an opinion in this matter, as well as articles, journals speeches, or books written by any company witness.

Response:

    a. The Company objects to this question on the grounds that the requested information is unduly burdensome, overly broad, and contains information subject to attorney/client privilege.

At this time, the Company intends to offer the testimony and exhibits thereto that it has already filed in this case, and may rely on some or all of the responses it has provided to TRA data requests and the intervenors' discovery. The Company does not know at this time if additional testimony or exhibits will be offered, including but not limited to rebuttal testimony. The Company will seasonably supplement its responses. The list of cases in which appearances have been made by Dr. Vander Weide and Paul Herbert are attached to their testimony, and Mr. Baryenbruch's testimony history has been provided in previous CAPD discovery. Dr. Spitznagel's consulting history is provided in the schedules attached and identified as TN-CAPD-SUPPLEMENTAL-Q81-ATTACHMENT 1. Mr. Miller has testified in numerous proceedings before the public utility commissions of West Virginia, Kentucky, Tennessee and Virginia, including every WAWC rate case since 1991, every KAWC rate case since 2000, every TAWC rate case since 2000, the rate cases for VAWC in 2000, 2003 and 2009, the Divestiture Cases for KAWC and WVAWC, all of which can be found on the various commission websites. Ms. Miller has appeared in all TAWC and KAWC rate cases since 2000.

b. Pursuant to the agreement reached by the Company, the intervenors and the TRA, the requested information is not discoverable except for the workpapers relied on and that support the expert's testimony. The working papers utilized by the Company's witnesses have been previously provided in response to TN-TRA-01-Q13.

c. See the Company's response to part a. above.

Previous Weather Normalization Testimony of Edward L. Spitznagel, Jr.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

82. Please identify and produce any and all documentation, items, reports, data, communications, and evidence of any kind that the company intends to offer as evidence at the hearing or to refer to in any way at the hearing. In answering this response, it is not necessary to re-file, or reproduce any items that have already been filed with the Tennessee Regulatory Authority in Docket 10-00189.

Response:

Please see the response to TN-CAPD-SUPPLEMENTAL-Q81. The Company will seasonably supplement as required.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

83. Provide a detailed line item for every amount included in Benefits Overhead of $978,790 per TRA-01-Q013-MANAGEMENT FEES, Page 10 of 12. Include in your response, payee, amount per payee, and business reason for payee. Also, include in your response the amounts, which were directly incurred in support of TAWC or allocated to TAWC by formula.

Response:

Please see the attached document labeled TN-CAPD-SUPPLEMENTAL-Q83-ATTACHMENT for a breakdown of Service Company overheads by account number. The Company's accounting system for AWWSC costs does not track overheads by direct or allocated formulas. In accordance with the 1989 Service Company agreement between TAWC and AWWSC, labor is either directly charged (the preferred method) when employees are working directly on TAWC's behalf, or allocated when the type of work is related to more than one subsidiary. Also in accordance with the 1989 Service Company Agreement (Article III. Paragraphs 3.1 and 3.2) overheads shall be allocated in the proportion of total labor to each subsidiary. This process is discussed in detail in the Management Audit attached as Exhibit MAM-8 to Mr. Miller's testimony.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

84. Provide all amounts for Incentive Payroll ("AIP") by AIP component: Financial, Operational, and Individual allocated and or directly charged to TAWC since April 2008 through September 2010 by month for expense amounts in the following format:

Expense Amounts:

(1)	(2)	(3)	(4)	(5)
Year	**Month**	**NARUC Acct #**	**Account Description**	**Amount**

Response:

Please see attachment document labeled as TN-CAPD-01-SUPPLEMENTAL-Q84-ATTACHMENT which provides the amounts for AWWSC Incentive Payroll ("AIP") allocated and or directly charged to TAWC since April 2008 through September 2010. The expense amounts are not recorded by AIP component.

An accrual is recorded each pay period for AWWSC employees, and a portion is allocated to TAWC based on the employees' labor distribution.

DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

85. Provide documentation of any and all initiatives by TAWC to "opt out" of services from AWWSC for a more efficient TAWC operation. (Schumaker & Company, Management Audit Report, August 2010, page 45).

Response:

TAWC has not elected to opt-out of the portfolio of basic services provided by AWWSC as permitted by the 1989 Service Company Agreement. The Company has on a regular basis used third party contractors for many services, when circumstances dictate and it is more beneficial to do so, that are within the broad scope of the functions provided by AWWSC, such as, engineering design and project management on large capital projects, and to address specialized needs in community relations and communications, legal, information technology, human resources, water quality testing, rate case preparation and testimony, accounting services, etc. The Company has continued to use the portfolio of services from AWWSC because it has demonstrated on many occasions that the costs of the services provided by AWWSC to TAWC are less than the costs of those same services if provided by a third party and in some circumstances less costly than providing those services in-house. See Exhibits MAM-8, 10, and 11 of Mr. Miller's direct testimony in this case. Also see the testimony of Mr. Baryenbruch in this proceeding.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **John Watson**

Question:

86. Indicate whether Government Affairs Specialist (Kino Becton) will be a registered lobbyist or will be engaged in lobbying activities in Tennessee now or in the future on behalf of TAWC. If so, provide the percentage of time the Government Affairs Specialist has been or will be engaged in lobbying activities. (Mr. John Watson, direct testimony, page 23 and TN-TRA-01-Q002A).

Response:

Yes. The Company estimates that 20% of Mr. Becton's time will be spent lobbying on behalf of TAWC and its customers. Many legislative and governmental agency actions involve changes such as environmental issues and water quality issues. TAWC's involvement in those types of matters can and will benefit the customer's of TAWC in the form of better service at the same time addressing the cost of such actions by regulators and governmental agencies which impact the customer rates.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

87. Provide the Consumer Price Index ("CPI") for the years 2005-2011 exclusive of group insurance and pensions. Include in your response the independent source for CPI, supporting work papers documenting the calculation of CPI net of growth in group insurance and pensions. (Mr. Mike Miller, Direct Testimony, Exhibit MAM-4, Page 2 of 2).

Response:

The Company objects to this question on the grounds that the question is vague, unclear and appears to be a misrepresentation of Mr. Miller's testimony.

Notwithstanding the objection, the CPI used by Mr. Miller was obtained from Value Line, August 27, 2010 at page 2695. Mr. Miller did not calculate a CPI net growth in group insurance and pensions as indicated in this question. Mr. Miller's testimony and Exhibit MAM-4 are clear that Mr. Miller eliminated non-recurring items, write-offs of regulatory assets, non-recurring SOX compliance costs, non-recurring divestiture costs and the Net Negative Salvage reclassification, and group insurance and pensions (entirely) from this analysis in arriving at the annual percentage increase of the remaining TAWC O&M costs which he then compared to the published CPI in the Value Line Publication referenced above (See Note 1 at the bottom of Exhibit MAM-4). The purpose of the Exhibit was to demonstrate that for the O&M costs of TAWC that are not influenced by factors other than inflation (such as financial market conditions and capital investment), TAWC has been able to hold those costs below the rate of inflation (CPI) present in the overall economy. The Company believes this analysis demonstrates that TAWC has been successful in managing its business in an efficient and cost effective manner.

SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

88. Provide the amounts of Total Operating Revenue, Total Operation and Maintenance Expenses, Total Depreciation Expense, Total Taxes Other than Income, Total Income Taxes, Total NOI, and Total Rate Base by year to calculate the achieved returns reported as shown in Exhibit MAM-1, Page 1 of 2. (Mr. Mike Miller, Direct Testimony).

Response:

Please see the attached document identified as TN-CAPD-SUPPLEMENTAL-Q88-ATTACHMENT. The attachment consists of income statements and balance sheets for TAWC for the years 2001-2009, and TAWC internal schedules for the forecasted data for 2010/2011.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

89. Provide a detailed line item for every amount included in General Overhead of $1,119,663 per TRA-O1-Q013-MANAGEMENT FEES, Page 10 of 12. Include in your response, payee, amount per payee, and business reason for payee. Also, include in your response the amounts, which were directly incurred in support of TAWC or allocated to TAWC by formula.

Response:

See the response to TN-CAPD-SUPPLEMENTAL-Q83 and attachment which also provides the information responsive to this request.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness:

Question:

90. Provide all work papers, documentation, and calculations for each amount on Exhibit MAM-11, Page 1 of 2. (Mr. Mike Miller, Direct Testimony).

Response:

The electronic excel file of Exhibit MAM-11 was provided in the response to TN-TRA-01-Q001. Many of the cells on page 1 of 1 of the exhibit are determined by linked calculations to page 2 of 2 of the Exhibit. The CAPD will need to review the electronic version of the files for both page 1 of 2 and 2 of 2 to follow the determination and support on page 1 of 2. The following will be an explanation of how the file works and where data was calculated. For any cell the user can press the F2 function key, and the calculation and links to page 2 will be highlighted for easy reference.

The information in column 1 was determined from the Company's internal Rate & Revenue Department (RRD) schedule which is a schedule prepared by the rate department to reconcile the cost of service to the rate increase granted in each case. The RRD-3 form for case number 03-00018 is attached and identified as TN-CAPD-SUPPLEMENTAL-Q90-ATTACHMENT. Please refer to the lines titled labor, group insurance, pensions and management fees.

The information in columns 2-9 are determined by multiplying on a cumulative basis the data in column 1 by the actual percentage increase as determined on page 2 of 2 for labor, group insurance and pension costs on a per employee basis. By clicking on the cells in columns 2-9 and using the F2 function the calculations can easily be determined. The labor, group insurance, pension costs and number of employees were taken from the records of TAWC (the expenses can be found on the income statement provided in

response to TN-CAPD-SUPPLEMENTAL-Q88-ATTACHMENT). The cell calculation for the yearly cost per employee and the percentage increase annually should clarify how the percentage increases shown in the shaded area of page 2 of 2 which are then used to inflate/deflated the 2003 base year numbers on page 1 of 1, columns 2-9.

The 2003 management fees in column 1 of page 1 of 2 were inflated annually (columns 2-9 page 1 of 1) by the fully loaded percentage increases on page 2 of 2 because management fees is comprised of both labor and labor overheads.

The attrition year numbers in column 10 were taken from the Company internal costs of service RRD-1 schedule prepared for this case and are identical to the expenses included in the Company's accounting exhibit and working papers provided in this case. A copy of the RRD-1 prepared for this case is also provided in the Attachment to this question referenced above.

Finally the numbers in column 11 are a calculation of the differences between column 10 and 9 except for the adjustment for depreciation on assets now held at AWWSC that would be classified as capital costs if recorded at TAWC. TN-CAPD-SUPPLEMENTAL-Q90-ATTACHMENT also includes the AWWSC recap of expenses utilized by Mr. Miller to determine the depreciation and capital costs embedded in AWWSC costs for the attrition year and are identified by a * symbol.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **John Watson**

Question:

91. Provide the amounts from the "Annual Business Plan" included in the Company's Exhibits in this docket. (Mr. John Watson, direct testimony, page 6, Lines 24-26).

Response:

The capital spending plan for the Company was provided in response to TN-TRA-01-Q013. Refer to document labeled as TRA-01-Q013-RATE BASE, pages 1-4 of 62. Also, see the response to TN-CAPD-SUPPLEMENTAL-Q88 that provides the 2010 latest quarterly reforecast and the TAWC plan for 2011.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

92. Given that the Company has requested: a 19% increase in TRA Docket #06-00290, a 21% increase in TRA docket #08-00039, and a 28% increase in this docket, does the Company intend to file for a rate increase in 2012? Also, what was the initial start date by the Company in preparation for this rate petition?

Response:

The Company objects to this request on the grounds that it seeks information that is neither relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving this objection, at this time the Company does not know if it will be necessary to file for a rate case in 2012. The outcome of this case and the economy in general are just a few of the factors that will determine whether filing a rate case in 2012 is necessary.

The Company began preparing its filing in this case in May, 2010.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **John Watson**

Question:

93. In TRA Docket #08-00039, Mr. John Watson stated in his direct testimony, "Complete construction of the Phase I improvements to the Citico Water Treatment Improvements at a cost of $1.800 million for flocculation equipment and rehabilitation of the Aldrich Units #3 and #4. Additionally, the Company will expend nearly $7.0 million dollars in 2008/2009 for the Phase II improvements to the Citico Treatment Plant which will replace sedimentation basins, flocculation equipment, chlorination improvements, electrical improvements including provision for a stand-by generator and to improve the hydraulic capacity of the Citico plant."

(Page 14, Lines 10-21) Now in this docket, "TAWC's rate base will include significant additions to utility plant for the Citico Treatment Plant upgrade, Phase 1A....Project costs are estimated to total approximately $8.7 million." (Mr. John Watson, direct testimony, page 5, Lines 8-20) Was the $8.7 million in TRA Docket #08-00039 expended on the Citico Water Treatment plant in 2008/2009? If not, why not? Is the $6.7 million in this docket the same planned amount as in TRA Docket #08-00039? If not, why not?

Response:

The Company was required to break the Citico Treatment Plant Improvement into smaller phases due to funding limitations. A portion of the $8.7 million included in the 2008 rate case was deferred until 2010/2011 and is included in this case. Please see the response to TN-CAPD-01-PART III-Q62.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **John Watson**

Question:

94. In TRA Docket #08-00039, Mr. John Watson stated in his direct testimony, "Replace the Lookout Supply Mains costing $.910 million." (Page 14, Line 1) Now in this docket, "TAWC's Lookout Mountain service area, which includes replacing the mains that provide the entire supply of drinking water ....The estimated cost of this project is $1.6 million." (Mr. John Watson, direct testimony, page 5, Lines 21-27 and page 6, Lines 1-6) Was the $.910 million in TRA Docket #08-00039 expended on replacing the Lookout Supply Mains in 2008/2009? If not, why not? Is the $1.6 million in this docket the same planned amount as in TRA Docket #0800039? If not, why not?

Response:

The construction of the Lookout supply mains was not completed in 2009 due in part to issues pertaining to right of ways from the National Park Service and others, and in part due to available funding. This project is now complete and was placed in service on May 17, 2010.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller/John Watson**

Question:

95. Provide the supporting documentation for "our operating and maintenance costs have increased only 2.5% per year on average, compared to an inflation rate of 2.59% during the same timeframe." (Mr. John Watson, direct testimony, page 7, Lines 21-23) Also, please reconcile this statement with TAWC's total operations and maintenance expense increasing 53% from December 2003 to December 2009 per filed TRA 3.06 surveillance reports.

Response:

Please refer to Exhibit MAM-4, page 2 of 2 attached to Mr. Miller's direct testimony. On the line titled "Cumulative Increase in O&M/Customer" the total cumulative increase of 17.5% is in the column FTY 12-31-2011. The 2.50% average annual increase in the O&M/Customer is determined by dividing the 17.5% by 7 years. The 2.59% average annual increase in the CPI (inflation) is determined by dividing the 18.10% cumulative increase in CPE in the 12-31-2011 column by 7 years.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **John Watson/Michael A. Miller**

Question:

96. Provide the actual AWWSC management fee monthly invoices approved by Mr. John Watson for the twelve months ended September 30, 2010.

Response:

See the information provided in response to TN-COC-01-Q12. The monthly invoices from 2007 through September 30, 2010 were included in that response.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **John Watson**

Question:

97. Quantify the cost savings resulting from parking a portion of the vehicle fleet. (Mr. John Watson, direct testimony, page 33) Include documentation supporting any quantified savings.

Response:

The Company has limited the use of its 3 large dump trucks which were previously assigned to distribution crews. Those large dump trucks are not needed as often as in the past due to the requirement to use flowable fill for street excavations in the City of Chattanooga. The flowable fill is provided by the contractor (usually cement) which greatly reduced the hauling of much less expensive gravel which had historically been used to fill excavations up to the pavement level. While the Company has not quantified the savings in vehicle fleet costs, those savings are real and embedded in the historical test-year expenses on which the Company based its attrition year in this case.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: John Watson

Question:

98. Provide the cost, the account charged, the date the cost was incurred for the study, *Analysis of Non-Revenue Water: Technical Memoranda.* (Mr. John Watson, direct testimony, Page 42, Lines 13-15).

Response:

The total cost was $110,100, charged to account 105275.31, from November 2006 to October 2007.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Sheila Miller**

Question:

99. Does the Company maintain separate subaccounts corresponding with the depreciable plant accounts, in which the accumulated depreciation is segregated as required by NARUC USOA? If not, why not?

Response:

Yes.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller/John Watson**

Question:

100. Provide a voucher summary for any expense amount paid by TAWC or charged to TAWC by AWWSC and other affiliated utility service companies exceeding $1,000 for the period from April 1, 2008 through September 30, 2010 in the following format:

(1)	(2)	(3)	(4)	(5)	(6)
Month	**Year**	**Payee**	**Amount**	**USOA**	**Account Business Reason**

Response:

See attached documents labeled as TN-CAPD-SUPPLEMENTAL-Q100-ATTACHMENT 1-2. Attachment 1 details the affiliate amounts allocated to TAWC and Attachment 2 details the expense amounts paid by TAWC exceeding $1,000.

Tennessee American Water Company

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Sheila Miller**

Question:

101. Provide all NARUC accounts 601-through 675 by month, by account and show the actual or forecasted gross amount and net expense after deducting salaries and wages for the 36 months ended December 2011.

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome and seeks information that is neither relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, the attached document identified as TN-CAPD-SUPPLEMENTAL-Q101-ATTACHMENT contains the actual amounts for 2009 through September 2010. The Company did not calculate each attrition year adjustment by month. Therefore, the monthly attrition year amounts are not available in the format requested. For the attrition year, please refer to the response provided to TN-TRA-01-Q028.

RT026USR
TN-CAPD-SUPPLEMENTAL-Q101

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

102. Provide the amounts from Attachment 3-1 in the format below from the Overland Consulting regulatory audit of California American Water Company for TAWC by business unit number, budget account, and object account detail amount for the test periods ending March 2010, September 2010, and the attrition year 2011. The term "National" in this request means "AWWSC."

National (Before Allocation)

Belleville Lab

Customer Service

Finance

Human Resources

Information Technology

"NSC Functions"

Operations

Shared Services

Procurement

Total NSC

After Allocation to TAWC

Belleville Lab

Customer Service Finance

Human Resources

Information Technology

"NSC Functions"

Operations

Shared Services

Procurement

Total TAWC

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome and seeks information that is neither relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, see the attached document labeled as TN-CAPD-SUPPLEMENTAL-Q102-ATTACHMENT 1 for the data requested for AWWSC in total. The Company did not determine the attrition year total AWWSC costs but only determined the TAWC attrition year total by adjustments to the TAWC portion of AWWSC costs for the historical test-year. The 2011 budget process is still being completed and 2011 figures for total AWWSC are not available at this time.

See the attached document labeled as TN-CAPD-SUPPLEMENTAL-Q102-ATTACHMENT 2 that contains the 12 month adjusted actual Tennessee Service Company costs for March 2010 and September 2010, as well as the proforma periods March 2011 and December 2011.

SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

103. Provide the amounts, dates, and JDE and NARUC accounts for legal fees incurred by the Company before the State of Tennessee Court of Appeals for the 2006 and 2008 rate cases.

Response:

The Company objects to this question on the grounds that the requested information is not relevant to this proceeding or likely to lead to information relevant to this proceeding. The Company charged its costs for rate case appeals to account 566700.16, rate case expense. However, the Company did not seek rate recovery of these expenses in this case, and is only seeking recovery of the rate case costs associated with the Company's 2010 rate case and the remaining unamortized rate case expense authorized by the TRA in case number 08-00039. See the working paper provided in response to TN-TRA-01-Q013, at page titled TRA-01-Q013-REGULATORY EXPENSES (page 1 of 1).

Question:

104. Provide all of the Business Transformation Initiative (per 2009 SEC Form 10-K, pages 33 and 63) "incremental expenses" by JDE and NARUC accounts, by company for the test periods ending March 2010 and September 2010.

Response:

There were no incremental expenses booked during the test periods ended March 2010 and September 2010.

Question:

105. Provide all of the contracted services amounts to remediate internal control weaknesses (per 2009 SEC Form 10-K, page 41) by JDE and NARUC accounts, by company for the test periods ending March 2010 and September 2010.

Response:

The contracted service amounts to remediate internal control weaknesses for AWWC in the year 2009 were approximately $51,000. There were no contracted service amounts to remediate internal control weaknesses in the year 2010. TAWC was allocated $1,140 of this cost during 2009.

CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

111. Provide the analysis "that addresses changes in terminology, changes in functions performed by AWWSC, changes in allocations to non-regulated subsidiaries, results of the customer versus cost causative allocation methodology study, and updated corporate structure and organization charts that would provide the TRA with a current view and analysis of the AWWSC organization at the time of the 1989 Service Company Agreement. That analysis will be completed in the next month, at which time it will be filed with the TRA for review." (Per Rebuttal Testimony, Mr. Mike Miller, Page 47, Lines 27-31, Page 48, Lines 1-3, Virginia American Water Company, Case No. PUE-2010-00001). Include in your response all work papers utilized in the study in excel format with all formulas intact, a description of the methodology or methodologies utilized in the study, identify the authors and contributors to the study, and identify what witness will sponsor the study as evidence in this matter and all facts underlying the expert's opinion.

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome and seeks information that is neither relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, the Company is in the process of completing this analysis. The Company will supplement this response once the final analysis is completed.

Question:

113. Page 18 of the 2009 audit report indicates that the "Company recorded state net operating loss carryforwards ("NOLs"), which will reduce future taxable income. The NOLs will begin to expire in 2024 if not utilized." What is the Company's position on the appropriate amount of NOLs to be utilized of NOLs for the attrition year? Include in your response all documentation and work papers and the amount of NOLs available at the end of 2009.

Response:

The amount of NOL to be used in the attrition year ended 12/31/11 is $6,331,680. The amount of NOL available at the end of 2009 is $6,560,608. Please see the attached documentation labeled as TN-CAPD-SUPPLEMENTAL-Q113-ATTACHMENT. The Company would note that these NOL's are primarily related to the catch-up capitalized repairs deductions taken in 2008, and accordingly will not reoccur in the attrition year. The Company would also note that the Company has proposed to normalize the capitalized repairs deduction for rate making purposes in this case and has included a significant rate base reduction for the ADITs related to the capitalized repairs deductions through the attrition year.

Tennessee American Water Company
Response to Question #113

Total Tennessee NOL Carryforward from 12/31/2008 Tax Return	8,179,643
Less: NOL Utilized in 12/31/2009 Tax Return	(1,619,035)
Less: Projected NOL Utilization for 12/31/2010	(228,928)
Less: Projected NOL Utilization for 12/31/2011	(6,331,680)
Projected NOL Carryforward	0

	12/31/10	12/31/11
Projected Pre-Tax Book Income	1,858,926	4,465,115
* Projected Book/Tax adjustments	(1,629,998)	3,340,813
Projected Taxable Income before utilization of NOL Carryforward	228,928	7,805,928
NOL Utilization	(228,928)	(6,331,680)
Taxable Income after NOL Utilization	0	1,474,248

* - Projected Book/Tax adjustments for 12/31/2010 includes Bonus Depreciation whereas 12/31/2011 does not because the legislation only extended Bonus Depreciation through 12/31/2010.

Question:

114. Referencing TRA Docket #09-00086, specifically TAWC's letter of September 27, 2010 and notice of filing confidential and proprietary work papers, provide an electronic copy of the confidential and proprietary work papers filed in that docket.

Response:

The requested documents were provided to the CAPD on a CD on November 19, 2010. See the Company's response to COC-01-Q19.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

115. For the purpose of responding to questions 115, 116, and 117, "decoupling mechanism" shall be defined as a system in which:

> Revenue per customer would be calculated for a customer class based upon attrition year revenues and meters. Each year, actual revenue per customer (meter) would be compared to benchmark revenue per customer (meter). If the revenue per customer declines, then rates would be adjusted to bring the revenue per customer back up to the benchmark. If the revenue per customer increases, then customer rates would be adjusted to reduce the revenue per customer back to the benchmark.

Also, for this request, assume TRA Staff Data Request 109 describes a "decoupling mechanism." Referencing 'IRA Staff Data Requests 109-111, provide the jurisdictions in which a regulated American Water Works Company subsidiary has implemented a decoupling mechanism and provide copies of public utility commission orders approving the implementation.

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome and seeks information that is neither relevant nor reasonably calculated to lead to the discovery of admissible evidence.

Without waiving these objections, TAWC has not researched revenue adjustments or decoupling mechanisms in every state where AWWC has regulated subsidiaries, the Company is aware that California American Water Company and Long Island American Water Company are two companies which have a Water Revenue Adjustment Mechanism ("WRAM"), or an adjustment mechanism which includes a revenue adjustment true-up. Please see document labeled as TN-CAPD-SUPPLEMENTAL-

Q115-ATTACHMENT for Long Island American Water Company and California tariffs relevant to this request.

In addition, the Company is aware of several other states that permit forecasted test-years including weather normalization and trending adjustments to water sales levels in the forecasted test-year which in part mitigates the need for a WRAM. While TAWC has not researched revenue adjustments or decoupling mechanisms in every state where AWWC has regulated subsidiaries, it is not aware of states other than California and New York where a WRAM-like mechanism has been proposed. In addition, the Company is not aware if the WRAM was developed in California or New York in response to a filing by the local operating company or a general rulemaking procedure before the Commission.

The Company believes the WRAM or WRAM-like mechanisms mentioned above for California and New York are a form of decoupling. The Company is aware that "decoupling" related to water tariffs has been a subject at several recent NARUC meetings. The Company is aware that other AWWC regulated subsidiaries are assessing "decoupling" issues in relation to the national trend of declining water sales.

RE: Long Island Water Corporation, d/b/a Long Island American Water's Revenue and Property Tax Reconciliation Mechanism for the Rate Year ended March 31, 2010
Case No. _____

Dear Secretary Brilling:

Long Island Water Corporation, d/b/a/ Long Island American Water ("LIWC" or the "Company"), hereby submits its proposed treatment for the Company's Revenue and Property Tax Reconciliation Mechanism ("RPT") for the rate year ending March 31, 2010. The summary of the RPT for the period 4/1/09 through 3/31/10 is attached as Attachment A. The revenue and production reconciliation is attached as Attachment B. The property tax reconciliation is attached as Attachment C. The property tax refund and MTBE proceeds per Case 09-W0581, are attached as Attachment D.

The RAC surcharge would be $47.27 per customer at March 31, 2010. The PTC credit would be $13.39 per customer at March 31, 2010. There is also an additional credit based on Case 09-W-0581 for the 2009 Property Tax refund and the MTBE proceeds which would credit each customer $37.72 at March 31, 2010. Additionally, the Net Over Refund surcharge as shown on Attachment A would be $.09 per customer at March 31, 2010.

The RPT mechanism and the credit per Case 09-W-0581 results in a one-time refund of $3.75 per customer at March 31, 2010. Additionally, interest will continue to accrue up to the start of the refund.

I have also attached a copy of the tariff leaf from the Company's last rate case, which reflects the target levels for the RPT.

Sincerely,

John F. Bastian
Senior Financial Analyst

PSC No. 1 - WATER
COMPANY: LONG ISLAND WATER CORPORATION d/b/a LONG ISLAND AMERICAN WATER
INITIAL EFFECTIVE DATE:

STATEMENT TYPE: RPCRC
STATEMENT No.: 1

GENERAL INFORMATION

STATEMENT #1

Revenue and Production Cost Reconciliation Adjustment Clause and Property Tax Clause #2

Applicable to all Metered Customers in Service Classifications 1, 1A and 3.

Commission Order in Case 07-W-0508, dated March 5, 2008, directed that the rates applicable to all metered customer accounts, as defined above, be subject to automatic adjustment by way of a surcharge, or credit, based on the difference between the actual net revenues (operating revenues less production costs) for the preceding rate year and the net revenue target as estimated in the most recent rate case. The difference is then surcharged (or credited) to be recovered (or refunded) over the ensuing year. In this proceeding, target levels for revenues, production costs and property taxes were set for future years as follows, with the levels from the third rate year carrying forward for all future years until new target levels are set in the next rate proceeding (the revenue numbers below do not include net RAC adjustments of $51,800 ($125,700 for the Service Centers and ($73,900) for Demutualization) from the Commission decision on 11/20/2002 in Cases 02-W-0054 and 02-W-0056):

Year Ending	March 31, 2009	March 31, 2010	March 31, 2011
Revenues	$42,684,949 (1)	$43,593,548	$44,539,511
Production Costs	$3,723,402	$3,791,540	$3,868,130
Property Taxes	$12,085,345	$12,306,507	$12,531,716

Note (1): The Revenue number for the RYE 3/31/09 needs to be adjusted upward for the conversion of customers from quarterly to monthly.

The surcharge/credit for the year ending March 31, 2009 is calculated as follows:

The actual net revenues for the year ended March 31, 2009 of $ was compared to the target level set forth above. The difference, including accrued interest, results in a surcharge/credit to customers of $.

The net amount to be surcharged/refunded to customers derived from the calculation described above, during the ensuing year ending March 31, 2010 is: $

Since the total number of metered customers is:

The surcharge/credit per customer amounts to: $

In accordance with the property tax mechanism set forth in the settlement agreement approved by the Commission in Case 07-W-0508, the PSC has permitted the company to reconcile property taxes. For the rate year ended March 31, 2009, such reconciliation resulted in a surcharge/credit to customer of $.

As a result, the net surcharge/credit to each customers' bill amounts to $.

Issued in compliance with the Commission Order in Case 07-W-0508 dated March 5, 2008

Issued by: William M. Varley, President, 733 Sunrise Highway, Lynbrook, NY

GENERAL INFORMATION

GENERAL INFORMATION
STATEMENT #1

Revenue and Production Cost Reconciliation Adjustment Clause and Property Tax Clause #2

Any refunds due ratepayers from any net over-recovery in the rate year will be credited to customers' bills in the earliest month, as administratively practical, of the following rate year. Customer bills will be surcharged, no greater than $4 per customer per month, to recover any deferral of cost recovery in the rate year beginning in the earliest month, as administratively practical, of the following rate year and continue each month thereafter, as necessary, until the entire deferral is recovered. Should the $4 per customer per month surcharge limit be inadequate to fully recover any deferred costs prior to the end of the following rate year, the limit will be waived. For sprinkler customers there will be a one time credit/surcharge. Any credit/surcharge is subject to the applicable local gross revenue taxes as set forth in the current tax statements.

CORONADO, CA 92118

Revised C.P.U.C. SHEET NO. 5287-W

CANCELLING Original C.P.U.C. SHEET NO. 5285-W

PRELIMINARY STATEMENT
(continued)

KK. Monterey Modified Cost Balancing Account (MCBA) (continued)

1. ACCOUNTING PROCEDURE: (continued)
   a. (Continued)
      ii. If the annual report shows that there is a combined over-collection in the WRAM/MCBA net balance that exceeds 2.5% of the total recorded revenue requirement for the prior calendar year, California American Water will file an advice letter within 30 days that refunds the balance in the WRAM and MCBA account within one year. Refunds of over collections will be passed on to ratepayers through a flat surcredit for each account (residential and non-residential) that is subject to the WRAM/MCBA.
      iii. If the 2.5% threshold is not met, these balancing accounts will be refunded or recovered in the next GRC.
   b. A debit or credit entry equal to the under or over collection of revenues.
   c. The MCBA will capture the cost savings and cost increases associated with purchased water, purchased power, and pump taxes (all of which are recovered through the quantity charge under both the current and proposed rate designs).

LL. Ambler Park Water Revenue Adjustment Mechanism ("WRAM") Balancing Account (N)

1. PURPOSE: The purpose of the Ambler Park WRAM Balancing Account is to track the total quantity charge revenues authorized by the Commission for Ambler Park, and the total revenues actually recovered through the quantity charge based on actual sales, excluding private fire protection service and miscellaneous charges.
2. APPLICABILITY: California American Water's Ambler Park Subsystem of the Monterey District
3. ACCOUNTING PROCEDURE: California American Water was granted a balancing account in Decision No. (D.) 09-07-021.
   a. A debit or credit entry equal to the under or over collection of revenues.
   b. By March 31 of each year, Cal Am will provide Water Division (with a copy to DRA) a written report on the status of the WRAM balances.
      i. If the annual report shows a combined under-collection in the WRAM/MCBA, California American Water would wait until the next GRC to request recovery unless the net balance exceeds 2.5% of the total recorded revenue requirement for the prior calendar year. If the net balance of the WRAM and MCBA accounts exceeds 2.5%, California American Water will file an advice letter within 30 days to either collect the amount of the under-collection via a rate element similar to that used for purchased water, or through a surcharge. This would be concurrent with California American Water's attrition step rate increases. Whether it is a rate element or a surcharge, the amount of revenues collected through the rate element or surcharge will be tracked in a balancing account compared to the total amount of the under-collection. California American Water would revisit the rate change 6 months later to see if it has stabilized and provide a report to the Water Division and DRA with the results. (N)

PRELIMINARY STATEMENT
(continued)

LL. Ambler Park Water Revenue Adjustment Mechanism ("WRAM") Balancing Account (N)

3. ACCOUNTING PROCEDURE: (continued)
   b. (Continued)
      ii. If the annual report shows that there is a combined over-collection in the WRAM/MCBA net balance that exceeds 2.5% of the total recorded revenue requirement for the prior calendar year, California American Water will file an advice letter within 30 days that refunds the balance in the WRAM and MCBA account within one year. Refunds of over collections will be passed on to ratepayers through a flat surcredit for each account (residential and non-residential) that is subject to the WRAM/MCBA.
      iii. If the 2.5% threshold is not met, these balancing accounts will be refunded or recovered in the next GRC.
   c. In addition to the above, an Unaccounted For Water Incentive Program will be implemented as follows
      i. Provide the total water production for each system for the preceding calendar year.
      ii. Calculate each system's adopted unaccounted for water quantity by multiplying the adopted percentage from the table in Section 6.1.11 in Decision 09-07-021by the actual production quantity for the period in item i. above.
      iii. Calculate the actual unaccounted for water for the period by determining the difference between each system's production meters and the sum of all the system's customer meters.
      iv. Subtract the actual volume of unaccounted for water from the adopted volumes calculated in item ii. above for each system.
      v. Multiply the difference calculated in item iv. above by $2,018.79/acre-foot based on the adopted standard rate of $4.5345/Ccf.
      vi. If the actual unaccounted for water is less than the standard, then this is a reward amount that will be added to the balance to be included in rates via WRAM Balancing Account amortization.
      ii. If the actual unaccounted for water is greater than the standard, then this ia a penalty amount that would be entered as a debit to the amount to be recovered from ratepayers through the WRAM Balancing Account.

MM. Ambler Park Modified Cost Balancing Account (MCBA)

1. PURPOSE: The purpose of the Monterey MCBA is to track variable costs for Ambler Park on a going forward basis, specifically, the account will track:
   a. The difference between the total variable costs authorized by the Commission ("Total Adopted Variable (MCBA Cost"), and the total variable costs actually incurred ("Total Actual Variable MCBA Costs").
   b. An MCBA tracks changes in price and quantity (amount of consumption), and will capture both cost savings and cost increases.
2. APPLICABILITY: California American Water's Ambler Park Sub System of the Monterey District (N)

PRELIMINARY STATEMENT
(continued)

I. Water Revenue Adjustment Mechanism ("WRAM") Balancing Account

1. PURPOSE: The purpose of the WRAM Balancing Account is to track the under collection or over collection of revenues due to the differences in the per-capita rate design and the CPUC standard design. The WRAM account tracks the differences between adopted and actual revenues recovered through the quantity charge.
2. APPLICABILITY: Applicable districts served by California American Water.
3. ACCOUNTING PROCEDURE: California American Water has been granted memorandum accounts for each district from various CPUC decisions.
   a. A debit or credit entry equal to the under or over collection of revenues.
   b. By March 31 of each year, Cal Am will provide Water Division (with a copy to DRA) a written report on the status of the WRAM balances. If the report shows the net balance exceeds 2.5% of a district's total recorded revenue requirement for the prior calendar year, Cal Am will file an advice letter within 30 days that amortizes the balance through a volumetric surcharge if it is an under-collection, or a volumetric sur-credit if it is an over-collection. If the 2.5% threshold is not met, these balancing accounts will be amortized in the next general rate case.

J. Endangered Species Act ("ESA") Memorandum Account

1. PURPOSE: The purpose of the ESA Memorandum Account is to track costs incurred for compliance with Endangered Species Act ("ESA") requirements, except for ESA compliance costs associated with the San Clemente Dam.
2. APPLICABILITY: California American Water's Monterey District.
3. ACCOUNTING PROCEDURE: California American Water was granted authority to maintain its memorandum account for ESA costs in Decision D. 09-07-021. (C)
   a. A debit entry equal to the costs associated with ESA compliance. (C)
   b. Fines related to ESA may not be tracked in this account.

K. Monterey Peninsula Water Management District ("MPWMD") Conservation Balancing Account

1. PURPOSE: The MPWMD Conservation Balancing Account is a one-way balancing account designed to track conservation related expenses and surcharges. This balancing account shall be capped at $1,156,000 for the three year period, from January 1, 2009 through December 31, 2011.
2. APPLICABILITY: California American Water's Monterey District, excluding Ambler, Ralph Lane, Chualar and Toro.
3. ACCOUNTING PROCEDURE: California American Water was granted a one-way balancing account for these costs in Decision No. 09-05-029.
   a. A credit entry equal to the amounts collected through the MPWMD conservation surcharge.
   b. A debit entry equal to the conservation-related expenses outlined in D. 09-05-029.

PRELIMINARY STATEMENT
(continued)

AA. Monterey Interim Rate True-Up Memorandum Account (C)

In accordance with the Rate Case Plan authorized in D. 07-05-062 and Administrative Law Judge Ruling dated December 23, 2008 this memorandum account is to track the difference between interim rates and final rates granted in General Rate Case (GRC) Applications (A.) 08-01-027 and 08-01-024. Interim rates are effective from May 11, 2009 pursuant to Advice Letter 750-B. The 2010 step rates approved by Advice Letter 818-A will be tracked as part of the
interim rate true-up memorandum account.

AB. Los Angeles Districts Water Revenue Adjustment Mechanism (WRAM) and Modified Cost Balancing Accounts (MCBA)

Per Decision 08-06-002, these balancing accounts are to ensure recovery of the adopted fixed costs recovered through volumetric rates and the actual variable costs for purchased water, purchased power, and pump taxes. Each service area has a WRAM and a MCBA. The WRAM has separate reporting by customer class. These accounts will be considered together when determining the need for revenue recovery from or refunds to ratepayers in that service area. The WRAM and MCBA will accrue interest at the 90-day commercial paper rate.

By March 31st of each year, California American Water will provide a written report that includes the net WRAM/MCBA balance in each service area as of December 31 of the prior year. If the annual report shows a combined over or under collection for the WRAM or MCBA in any service area that exceeds 2.5% of the service area's recorded revenue requirement for the prior calendar year, California American Water will file an advice letter within 30 days that amortizes the balance through a volumetric surcharge or surcredit. If the 2.5% threshold is not met, these balancing accounts will be amortized in the next GRC.

Monterey Water Revenue Adjustment Mechanism ("WRAM") Balancing Account

1. PURPOSE: The purpose of the Monterey WRAM Balancing Account is to track the difference between the total quantity charge revenues authorized by the Commission ("Total Adopted Quantity Revenues"), and the total revenues actually recovered through the quantity charge based on actual sales ("Total Actual Quantity Revenues") during conservation rates, emergency rates, or rationing rates, excluding:
   a. Revenue from Ambler Park, Ralph Lane, Chular, Toro
   b. Private Fire Protection Service (Schedule No. MO-4); and Private Fire Hydrant Service (Schedule No. MO-4H)
   c. Revenue from the Coastal Water Project surcharge or equivalent water supply project (to be revisited when a new water supply project comes online); and
   d. Miscellaneous charges.
2. APPLICABILITY: California American Water's Monterey System (including Bishop, Hidden Hills, Ryan Ranch, and Monterey) main system with the exception of private fire as noted above.
3. ACCOUNTING PROCEDURE: California American Water was granted a balancing account in Decision No. (D.) 09-07-021.
   a. A debit or credit entry equal to the under or over collection of revenues.
   b. By March 31 of each year, Cal Am will provide Water Division (with a copy to DRA) a written report on the status of the WRAM balances.
      i. If the annual report shows a combined under-collection in the WRAM/MCBA, California American Water would wait until the next GRC to request recovery unless the net balance exceeds 2.5% of the total recorded revenue requirement for the prior calendar year. If the net balance of the WRAM and MCBA accounts exceeds 2.5%, California American Water will file an advice letter within 30 days to either collect the amount of the under-collection via a rate element similar to that used for purchased water, or through a surcharge. This would be concurrent with California American Water's attrition step rate increases. Whether is it a rate element or a surcharge, the amount of revenues collected through the rate element or surcharge will be tracked in a balancing account compared to the total amount of the under-collection. California American Water would revisit the rate change 6 months later to see if it has stabilized and provide a report to the Water Division and DRA with the results.
      ii. If the annual report shows that there is a combined over-collection in the WRAM/MCBA net balance that exceeds 2.5% of the total recorded revenue requirement for the prior calendar year, California American Water will file an advice letter within 30 days that refunds the balance in the WRAM and MCBA account within one year. Refunds of over collections will be passed on to ratepayers through a flat surcredit for each account (residential and non-residential) that is subject to the WRAM/MCBA.
      iii. If the 2.5% threshold is not met, these balancing accounts will be refunded or recovered in the next GRC.
   c. In addition to the above, an Unaccounted For Water Incentive Program will be implemented as follows
      i. Provide the total water production for each system for the preceding calendar year.

CANCELLING _____ C.P.U.C. SHEET NO. _____

PRELIMINARY STATEMENT
(continued)

Monterey Water Revenue Adjustment Mechanism ("WRAM") Balancing Account (continued) (N)

3. ACCOUNTING PROCEDURE: (continued)
   c. (Continued)
      ii. Calculate each system's adopted unaccounted for water quantity by multiplying the adopted percentage from the table in Section 6.1.11 in the Decision by the actual production quantity for the period in item a. above.
      iii. Calculate the actual unaccounted for water for the period by determining the difference between each system's production meters and the sum of all the system's customer meters.
      iv. Subtract the actual volume of unaccounted for water from the adopted volumes calculated in item b. above for each system.
      v. Multiply the difference calculated in item d. above by $2,018.79/acre-foot based on the adopted standard rate of $4.5345/Ccf.
      vi. If the actual unaccounted for water is less than the standard, then this is a reward amount that will be added to the balance to be included in rates via WRAM Balancing Account amortization.
      vii. If the actual unaccounted for water is greater than the standard, then this ia a penalty amount that would be entered as a debit to the amount to be recovered from ratepayers through the WRAM Balancing Account.

Monterey Modified Cost Balancing Account (MCBA)

1. PURPOSE: The purpose of the Monterey MCBA is to track variable costs on a going forward basis, specifically, the account will track:
   a. The difference between the total variable costs authorized by the Commission ("Total Adopted Variable (MCBA Cost"), and the total variable costs actually incurred ("Total Actual Variable MCBA Costs").
   b. An MCBA tracks changes in price and quantity (amount of consumption), and will capture both cost savings and cost increases.
2. APPLICABILITY: California American Water's Monterey Main System (including Bishop, Hidden Hills, Ryan Ranch, and Monterey).
3. ACCOUNTING PROCEDURE: California American Water was granted a balancing account in Decision No. (D.) 09-07-021.
   a. By March 31 of each year, Cal Am will provide Water Division (with a copy to DRA) a written report on the status of the WRAM balances.
      i. If the annual report shows a combined under-collection in the WRAM/MCBA, California American Water would wait until the next GRC to request recovery unless the net balance exceeds 2.5% of the total recorded revenue requirement for the prior calendar year. If the net balance of the WRAM and MCBA accounts exceeds 2.5%, California American Water will file an advice letter within 30 days to either collect the amount of the under-collection via a rate element similar to that used for purchased water, or through a surcharge. This would be concurrent with California American Water's attrition step rate increases. Whether it is a rate element or a surcharge, the amount of revenues collected through the rate element or surcharge will be tracked in a balancing account compared to the total amount of the under-collection. California American Water would revisit the rate change 6 months later to see if it has stabilized and provide a report to the Water Division and DRA with the results. (N)

Monterey Modified Cost Balancing Account (MCBA) (continued)

3. ACCOUNTING PROCEDURE: (continued)
   a. (Continued)
      ii. If the annual report shows that there is a combined over-collection in the WRAM/MCBA net balance that exceeds 2.5% of the total recorded revenue requirement for the prior calendar year, California American Water will file an advice letter within 30 days that refunds the balance in the WRAM and MCBA account within one year. Refunds of over collections will be passed on to ratepayers through a flat surcredit for each account (residential and non-residential) that is subject to the WRAM/MCBA.
      iii. If the 2.5% threshold is not met, these balancing accounts will be refunded or recovered in the next GRC.
   b. A debit or credit entry equal to the under or over collection of revenues.
   c. The MCBA will capture the cost savings and cost increases associated with purchased water, purchased power, and pump taxes (all of which are recovered through the quantity charge under both the current and proposed rate designs).

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

116. For purposes of this request, assume TRA Staff Data Request 109 describes a "decoupling mechanism". List all jurisdictions in which American Water Works Company is aware of in which decoupling mechanisms have been approved and implemented for any regulated water and wastewater utilities.

Response:

The Company incorporates its response to TN-CAPD-SUPPLEMENTAL-Q115 in its entirety as its response to this request..

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

117. For purposes of this request, assume TRA Staff Data Request 109 describes a "decoupling mechanism". Referencing TRA Staff Data Requests 109-111, provide a calculation of the rate adjustments (i.e. amount rates would be lowered or raised) under the decoupling mechanism described in TRA Staff Data Request 109 for the customer classes TAWC submits should be subject to a decoupling mechanism in response to TRA Staff Data Request 110. Start the calculation using the customer classes and rates placed into effect May, 2007 at the conclusion of TRA Docket #06-00290 through the effective date of new rates authorized in TRA Docket #08-00039 up until September 30, 2010. In the alternative if the Company objects, provide the information and data necessary to perform the calculation.

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome and seeks information that is neither relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, the Company believes that if a "Revenue Adjustment True-up Mechanism", similar to the one asked about by the TRA in Request TN-TRA-02-Q109, were in place during 2009 the Company would be entitled to a true-up tariff of approximately $3.293 million dollars to offset the revenue shortfall resulting from the 2009 sales levels and corresponding revenue authorized by the TRA in its order in docket number 08-00039. The Company's basis for this position can be found in the response to TN-CAPD-01-Q20.

The Company is not aware of any schedules or support data issued by the TRA in support of the residential sales levels on which they based their decision concerning the final residential sales and revenues authorized in their Order from the Company's 2008 Rate

Case. The CAPD has the information on the billing determinants for the revenue calculation at present rates in the Company's responses to TN-CAPD-01-Q12 – Q20.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

118. Provide an explanation of the calculation utilized in the response to the preceding discovery request No. 117), as well as the work papers in excel format with formulas intact.

Response:

The Company incorporates its response to TN-CAPD-SUPPLEMENTAL-Q117 in its entirety as its response to this request.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

119. Identify the experts that will testify on any issues discussed in TRA Staff Data Requests 109-111 and the Company's corresponding responses to TRA Staff Data Requests 109-111 and provide all facts, documents, work papers and the underlying rationale supporting their opinion.

Response:

The Company did not present decoupling as part of its rate case. Accordingly, at this time, the Company has not made this determination. The Company will supplement this response if appropriate or required.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Dr. Edward L. Spitznagel, Jr.**

Question:

120. In order to ascertain the development of the calculations in Dr. Spitznagel's exhibits and work papers on the Company's proposed weather normalization adjustment, please provide a copy of Dr. Spitznagel's work papers that include a properly documented and footnoted audit trail to all calculations and source documents.

Response:

See the attached document identified as TN-CAPD-SUPPLEMENTAL-Q120-ATTACHMENT.

Step 1: Obtain Excel files from TAWC containing residential and commercial consumption information:

Tn Residential Sales.xls (Double-click to open in Excel):

TENNESSEE-AMERICAN WATER COMPANY
2003 BUDGET RESIDENTIAL
NET WATER SALES (1000 GALS.)
03/31/10

Tn Commercial Sales--Revision.xls (Double-click to open in Excel):

TENNESSEE-AMERICAN WATER COMPANY
2004 BUDGET COMMERCIAL
NET WATER SALES (1000 GALS.)COM'L
08/29/06

Step 2: Open each of the above data sets and extract consumption information for April 2001 through March 2010, after formatting each cell to increase precision (five digits to the right of the decimal point):

Step 3: Connect to the Internet and access the NOAA PMDI data:

http://www1.ncdc.noaa.gov/pub/data/cirs/drd964x.pmdi.txt

Step 4: The information used is for Tennessee (State Code 40), Climate Division 01, April 2000 through March 2010. Although my program extracts the information directly from the full NOAA data set, for simplicity I have listed the actual information that was used below. Note: The information used was "frozen" from the NOAA website on May 31, 2010. Very small changes have since been made by NOAA to the 2009 and 2010 data since that time. The maximum difference in the weather-sensitive months of May through December was a negligible 0.01. For example, November 2009 PMDI is currently (as of November 7, 2010) reported as 4.26 whereas it appears as 4.25 below.

4001082000	.	.	.	0.10	-0.24	0.33	-0.10	-0.59	-0.42	-2.17	-1.61	-2.07

4001082010	4.57	3.00	1.10	.	.	.	.	.	.	.	.	.

Step 5: Merge the above three sets of data and run twenty-four regression models. Note: Although these models can be estimated in Excel, doing so requires considerable manual work, to fit each model individually and then extract the information from each model. It is much more efficient to do it with a statistics package. The program code used is shown below. Its output is directed to a file named `FitSeparateMonthlyRegressions.lst`. This output file was provided in Adobe Acrobat format as Appendix B to my testimony. It was also provided as a Microsoft Word file in response to a request for my workpapers, and I have in addition appended it to the bottom of this document as Supplement (3). **Verification of results:** As a demonstration that this method yields the same results as can be obtained from Excel, I have run one of the 24 regressions in Excel and appended the spreadsheet at the bottom of this document as Supplement (2).

```

proc reg; model residential = pmdi since_2000; where month=11; title2 "Residential Model, NOVEMBER";
proc reg; model residential = pmdi since_2000; where month=12; title2 "Residential Model, DECEMBER";

proc reg; model commercial = since_2000; where month=01; title2 "Commercial Model, JANUARY";
proc reg; model commercial = since_2000; where month=02; title2 "Commercial Model, FEBRUARY";
proc reg; model commercial = since_2000; where month=03; title2 "Commercial Model, MARCH";
proc reg; model commercial = since_2000; where month=04; title2 "Commercial Model, APRIL";

proc reg; model commercial = pmdi since_2000; where month=05; title2 "Commercial Model, MAY";
proc reg; model commercial = pmdi since_2000; where month=06; title2 "Commercial Model, JUNE";
proc reg; model commercial = pmdi since_2000; where month=07; title2 "Commercial Model, JULY";
proc reg; model commercial = pmdi since_2000; where month=08; title2 "Commercial Model, AUGUST";
proc reg; model commercial = pmdi since_2000; where month=09; title2 "Commercial Model, SEPTEMBER";
proc reg; model commercial = pmdi since_2000; where month=10; title2 "Commercial Model, OCTOBER";
proc reg; model commercial = pmdi since_2000; where month=11; title2 "Commercial Model, NOVEMBER";
proc reg; model commercial = pmdi since_2000; where month=12; title2 "Commercial Model, DECEMBER";

run;
```

Step 6: Extract the model coefficients from the output file obtained in Step 5. Each regression model has two (for January through April) or three coefficients (for May through December. These coefficients are identifiable by the following labels: "Intercept", "since_2000", and "pmdi". The following program searches for these three labels and places the coefficients into three separate data sets:

```
data a; infile "h:\c\chattanooga\2010\FitSeparateMonthlyRegressions.lst" truncover;
input line $char80.;
file "h:\c\chattanooga\2010\intercept.out"  NEW; if index(line,"Intercept")  then put line $char80.;
file "h:\c\chattanooga\2010\since_2000.out" NEW; if index(line,"since_2000") then put line $char80.;
file "h:\c\chattanooga\2010\pmdi.out"       NEW; if index(line,"pmdi")       then put line $char80.;
run;
```

The resulting output data sets are:

intercept.out:

Intercept	1	148.37133	4.53640	32.71	<.0001
Intercept	1	149.13200	7.56123	19.72	<.0001

pmdi	1	-5.22141	9.87737	-0.53	0.6134

Comments on the Results from Step 6: In each case, the third column contains the coefficient estimates. All twenty-four coefficients for the time variable, since_2000, are negative, consistent with past findings of consumption gradually decreasing over time. If there were no downward trend, about half should be negative and half positive. The probability of all 24 being negative by chance alone is $1/2^{24}$, approximately one in seventeen million, less than the chance of being dealt a royal flush in (five-card) poker. Thus, there is very strong evidence for decreasing usage over time. There are sixteen coefficients for the pmdi variable, corresponding to the eight weather-sensitive months of May through December. All but one of these sixteen coefficients are negative, consistent with past findings that consumption is related to available moisture. The probability of at most one coefficient being positive by chance alone is $17/2^{16}$, about the chance of being dealt a poker hand containing four-of-a-kind. Thus, there is also strong evidence for usage being weather-related.

Step 7: Copy the model coefficients from the above three files to the Excel workbook TAWC2010.xls, sheets pmdi, since_2000, and intercept. This can be done conveniently by marking only the appropriate column for copy (press and hold down the Alt key and then click-and-drag the mouse):

pmdi	1	-0.37378	0.89727	-0.42	0.6895
pmdi	1	-2.24094	1.43759	-1.56	0.1630
pmdi	1	-1.75384	1.42966	-1.23	0.2596
pmdi	1	-1.57529	0.81575	-1.93	0.0948
pmdi	1	-2.79927	0.89628	-3.12	0.0168
pmdi	1	-1.67471	0.54519	-3.07	0.0180
pmdi	1	-0.67926	0.40426	-1.68	0.1368
pmdi	1	0.62668	0.66715	0.94	0.3788
pmdi	1	-10.42526	14.64356	-0.71	0.4995
pmdi	1	-7.53976	11.15863	-0.68	0.5209
pmdi	1	-27.42851	10.77748	-2.54	0.0384
pmdi	1	-8.98576	6.49747	-1.38	0.2092
pmdi	1	-23.95103	5.27929	-4.54	0.0027
pmdi	1	-2.84553	6.41207	-0.44	0.6706
pmdi	1	-12.60500	4.90780	-2.57	0.0371
pmdi	1	-5.22141	9.87737	-0.53	0.6134

Step 8: Copy the values from these three sheets to Columns B, C, and D of sheets Residential and Commercial in TAWC2010.xls. The first half go to the Residential sheet, and the second half go to the Commercial sheet.

Example:

	A	B	C	D
1			Projections of Resider	
2				
3		Slope of	Slope of	
4	Month	PMDI	SINCE_2000	Intercept
5				
6	Jan	0	-2.72661	148.3713
7	Feb	0	-2.48273	149.1320
8	Mar	0	-2.77739	148.2727
9	Apr	0	-2.08915	145.3902
10	May	-0.37378	-2.07299	155.7500
11	Jun	-2.24094	-1.28662	168.0807
12	Jul	-1.75384	-0.68972	175.4137
13	Aug	-1.57529	-2.28454	177.7466
14	Sep	-2.79927	-1.68101	176.1979
15	Oct	-1.67471	-1.92096	164.1413
16	Nov	-0.67926	-3.16835	159.8214
17	Dec	0.62668	-2.95350	153.0862

Step 9: Extract the past thirty years of data for Tennessee (State Code 40), Climate Division 01, April 1980 through March 2010, from the NOAA website given in Step 4, then calculate monthly averages. The program code used to perform the extraction and averaging is as follows:

```
options nodate nonumber ps=500 ls=150 nocenter;

title1 "Chattanooga -- Obtain 30 Year Averages of pmdi";

data pmdi; infile 'h:\c\chattanooga\2010\noaa\drd964x.pmdi.txt' LRECL=500;
input state 1-2 division 3-4 year 7-10 x1-x12; if state=40 and division=01;
array x(*) x1-x12; do month=1 to 12; pmdi = x(month); output; end;

data pmdi; set pmdi; if 1980<=year<=2010;
if year=2010 and month>=4 then delete;
if year=1980 and month<=3 then delete;

proc sort; by month;

proc means noprint; var pmdi; by month;
output out=monthlymeans mean=pmdi; run;

proc print; id month; var pmdi; run;
```

The resulting twelve values (for the months of January through December) are:

```
  0.24167
  0.10000
 -0.31733
  0.01067
  0.27133
  0.49800
  0.35033
  0.23600
  0.38000
  0.23667
  0.36300
  0.36400
```

Step 10: Copy these monthly average pmdi values to Column E of sheets Residential and Commercial in the Excel workbook TAWC2010.xls. Note: Although all twelve are copied, the values for January through April are not used for computations since for temperate climates, water usage is insensitive to weather during those months. Example:

	A	B	C	D	E
1			Projections of Residential Water		
2					
3		Slope of	Slope of		30-yr Avg
4	Month	PMDI	SINCE_2000	Intercept	PMDI
5					
6	Jan	0	-2.72661	148.3713	0.24167
7	Feb	0	-2.48273	149.1320	0.10000
8	Mar	0	-2.77739	148.2727	-0.31733
9	Apr	0	-2.08915	145.3902	0.01067
10	May	-0.37378	-2.07299	155.7500	0.27133
11	Jun	-2.24094	-1.28662	168.0807	0.49800
12	Jul	-1.75384	-0.68972	175.4137	0.35033
13	Aug	-1.57529	-2.28454	177.7466	0.23600
14	Sep	-2.79927	-1.68101	176.1979	0.38000
15	Oct	-1.67471	-1.92096	164.1413	0.23667
16	Nov	-0.67926	-3.16835	159.8214	0.36300
17	Dec	0.62668	-2.95350	153.0862	0.36400

Step 11: Populate the sheets Residential and Commercial with formulas to "predict" weather-normalized daily usage. Examples:

For February 2011 Residential usage: `=($B7*$E7+$C7*(H$3-2000)+$D7)`, which evaluates to:
$0 \times 0.10000 - 2.48273 \times (2011-2000) + 149.1320 =$ **121.82** gallons per customer day.

For July 2011 Residential usage: `=($B12*$E12+$C12*(H$3-2000)+$D12)`, which evaluates to:
$-1.75384 \times 0.35033 - 0.68972 \times (2011-2000) + 175.4137 =$ **167.21** gallons per customer day.

	A	B	C	D	E	F	G	H
1			Projections of Residential Water Utilization, Gallons per Day, T					
2								
3		Slope of	Slope of		30-yr Avg	Days	2010	2011
4	Month	PMDI	SINCE_2000	Intercept	PMDI		Gal/Day	Gal/Day
5								
6	Jan	0	-2.72661	148.3713	0.24167	31	121.11	118.38
7	Feb	0	-2.48273	149.1320	0.10000	28	124.30	**121.82**
8	Mar	0	-2.77739	148.2727	-0.31733	31	120.50	117.72
9	Apr	0	-2.08915	145.3902	0.01067	30	124.50	122.41
10	May	-0.37378	-2.07299	155.7500	0.27133	31	134.92	132.85
11	Jun	-2.24094	-1.28662	168.0807	0.49800	30	154.10	152.81
12	Jul	-1.75384	-0.68972	175.4137	0.35033	31	167.90	**167.21**
13	Aug	-1.57529	-2.28454	177.7466	0.23600	31	154.53	152.24
14	Sep	-2.79927	-1.68101	176.1979	0.38000	30	158.32	156.64
15	Oct	-1.67471	-1.92096	164.1413	0.23667	31	144.54	142.61
16	Nov	-0.67926	-3.16835	159.8214	0.36300	30	127.89	124.72
17	Dec	0.62668	-2.95350	153.0862	0.36400	31	123.78	120.83
18								
19				Annual projections:			138.11	135.93

Step 12: For annual weather-normalized usage, calculate the weighted average of the twelve months' usage values: `=SUMPRODUCT($F6:$F17,H6:H17)/SUM($F6:$F17)`, which evaluates to:
49,615.77 / 365 = **135.93** gallons per customer day. (See the value in Cell H19 above.)
Notes: Using the weighted average accounts for the fact that the first six month of the year have slightly fewer days than the second six months. The weighted average for 2012 uses a slightly modified formula to account for the "leap day" in 2012. I have inserted the completed workbook (previously provided in my testimony and workpapers) as Supplement (1) below.

Supplements:

2010	0.91464	0.90555	0.83094									

Note: A statistics package, rather than Excel, was used to calculate the twenty-four regression models. The benefits are greater efficiency and accuracy.
To demonstrate that the results are the same as would be obtained with Excel, the calculations are re-done in Excel below, for residential consumption in October.

Step 1: Copy the Residential Customer consumption values from the October column above and multiply by 1000.
Step 2: Copy the PMDI values from the October column above.
Step 3: Copy the year values and subtract 2000. (Subtracting 2000 provides greater computational accuracy.)
Step 4: Select the Regression tool from the Tools → Data Analysis menu, filling in the necessary information.

(Step 1) GCD	(Step 2) PMDI	(Step 3) year−2000
161.74	-2.17	0
158.43	0.45	1
162.35	1.20	2
158.92	4.63	3
146.04	4.12	4
157.39	-0.44	5
149.06	2.58	6
162.09	-4.39	7
153.22	-3.16	8
133.42	4.53	9

(Step 4)

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Dr. Edward L. Spitznagel, Jr.**

Question:

121. Provide a copy of the electronic spreadsheets (with formulas intact) in Microsoft Excel format of the Company's weather normalization exhibits and supporting work papers.

Response:

The weather normalization working papers were provided in response to TN-TRA-01-Q13.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Sheila Miller**

Question:

122. Provide a copy of the electronic spreadsheets (with formulas intact) in Microsoft Excel format of the Company's development of **their** attrition period billing determinants as shown in Company Exhibit No. 4 and summarized on Schedule A of the Company's Cost of Service Study. These spreadsheets should include the development and documentation of the Company's adjustments for weather normalization, customer growth and any other pro forma adjustments made to the test period billing determinants.

Response:

The electronic spreadsheets detailing the billing determinants and all other revenue adjustments as shown in Company Exhibit No. 4 was provided in response to TN-TRA-01-Q13, labeled as Tennessee-American BA.xls. This information was also provided in response to TN-CAPD-01-Q15 and TN-TRA-02-Q92.

TENNESSEE AMERICAN WATER COMPANY
DOCKET NO. 10-00189
SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness:

Question:

123. In testimony before the Kentucky Public Service Commission, Mr. Mike Miller testified that weather normalization had been used in Tennessee since 1989. In TAWC's appeal of Docket 08-00039, the Company utilizes pre-filed testimony from a 1991 Tennessee Public Service Commission ("TPSC") in support of its position on Dr. Spitznagel's weather normalization adjustment. The TRA does not maintain public records of TPSC dockets. Provide copies of all testimony and final orders of the rate cases, from 1985 through 1995, filed by TAWC before the TPSC that are in the company's possession.

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome and seeks information that is neither relevant nor reasonably calculated to lead to the discovery of admissible evidence. In addition, most of the pertinent data was in the working papers and accounting exhibits which are not part of the case files maintained by the Company for each TAWC rate case.

Without waiving these objections, the Company has reviewed the orders and testimony in its rate case files and provides the testimony of Mr. Edwin Oxley and Mr. Edward Grubb, employees of AWWSC who provided testimony concerning the weather normalization issue in the Company's 1991 and 1996 rate cases which both ended in settlement. In Mr. Oxley's testimony in the 1991 case, (beginning on page 3, question and answer 10) he indicates the Company used the weather normalization approach used by the Staff in the Company's previous rate case (case number TPSC U-89-15388). In Mr. Grubb's testimony from the 1996 rate case (Case number U-96-00959) he again describes (beginning on page 3-line 15 and continuing to page 6 line 9) that the Company utilized the regression model developed by the Tennessee Public Service Commission Staff and has been used by the Staff in the last three rates cases.

Copies of the testimony of Mr. Oxley and Mr. Grubb are attached to this response and identified as TN-CAPD-SUPPLEMENTAL-Q123-ATTACHMENT. The Company could find no other mention of WNA because its historical TAWC rate case records are limited and presumably because the cases ended in settlement with no dispute or issue regarding the WNA approach.

TENNESSEE-AMERICAN WATER COMPANY
CASE NO. 96-_____
Direct Testimony
Edward J. Grubb

Q. **WILL YOU PLEASE STATE YOUR NAME AND BUSINESS ADDRESS FOR THE RECORD.**

A. My name is Edward J. Grubb and my business address is 200 East Park Drive, Suite 600, Mt. Laurel, New Jersey 08054

Q. **BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

A. I am employed by the American Water Works Service Co., Inc. ("Service Company") as the Assistant Director - Rates and Revenues.

Q. **WHAT ARE YOUR RESPONSIBILITIES IN THIS POSITION?**

A. My responsibilities include the preparation and presentation of rate filings requested by the eight operating companies, which comprise the Regional Office of the American Water Works Service Co., Inc. of which Tennessee-American Water Company is included.

Q. **HAVE YOU PREVIOUSLY PARTICIPATED IN REGULATORY MATTERS?**

A. Yes, I have prepared rate cases and presented testimony before the Maryland Public Service Commission, West Virginia Public Service Commission, Tennessee Public Service Commission, Illinois Commerce Commission, Missouri Public Service Commission, Iowa Utilities Board, Virginia State Corporation Commission and the Kentucky Public Service Commission.

Q. **WOULD YOU PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND BUSINESS EXPERIENCE?**

A. In June 1978, I was awarded a Bachelor of Science Degree in Business Administration from Drexel University with a major in accounting. In May 1989, I was awarded a

Masters of Business Administration from the University of West Virginia College of Graduate Studies. I have attended Programs II and III of Depreciation Programs, Inc. Seminars on Life and Salvage Estimation. I have also attended the NARUC Water Utility Rate Seminar in 1989. In September 1993, I successfully completed the Certified Management Accounting Program and received my certificate as a Certified Management Accountant (CMA).

I began my career in 1978 with American Water Works Service Co., Inc. as an Internal Auditor. As an Internal Auditor, I conducted financial and procedural audits of American System operating companies.

In 1983, I was promoted to Rate Analyst. In 1984, I was promoted to Revenue Requirement Specialist and in 1988, I was promoted to Assistant Director - Rates and Revenues. In these three positions, I have assisted, prepared and presented testimony and accounting exhibits before regulatory bodies concerning rate increase applications.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS CASE?

A. The purpose of my testimony is to 1) sponsor the Company's Exhibits which support the proposed revenue increase of $2,448,943 and 2) support the Company's attrition year level of Regulatory Expense; Insurance, Other Than Group; Customer Accounting; Rents; General Office Expense; Miscellaneous Expense; Maintenance Expense; Interest on Customer Deposits; AFUDC; Income Taxes and the Lead/Lag Study. I will also address the Company's Weather Normalization adjustment used to adjust revenues.

Q. WHAT IS THE TEST PERIOD REFLECTED IN THIS CASE?

A. The Company has used a historical test period of the twelve months ending December 31, 1995. The Company has adjusted the test period for two levels of adjustments. The first adjustment normalizes the test year. The next level adjusts the normalized year to arrive at the attrition year which is the twelve months ended October 31, 1997. Various

witnesses will address specific aspects of the normalized and attrition year adjustments.

Q. MR. GRUBB, ARE THERE ANY EXHIBITS YOU WISH TO SPONSOR BEFORE YOU CONTINUE?

A. Yes. I would like to briefly discuss the accounting schedules which details and supports the rate base, revenues, expenses, capitalization and bill analysis for the test year and attrition year.

Exhibit 1 is a financial summary of the filing which details how the Company derived the amount of the requested revenue increase. There is also a rate base summary for the test year and the attrition year along with supporting schedules.

Exhibit 2 is an operating income summary for the test year and the attrition year with supporting schedules that are broken-down by major account group.

Exhibit 3 provides a cost of capital summary for the attrition year and supporting schedules providing detail on each component of the capital structure.

Exhibit 4 provides a bill analysis for the attrition year at both present and proposed rates.

Q MR. GRUBB, YOU STATED EARLIER IN YOUR TESTIMONY THAT YOU WILL BE ADDRESSING THE WEATHER NORMALIZATION ISSUE IN THIS CASE. IS THAT CORRECT?

A. Yes it is.

Q. WOULD YOU PLEASE EXPLAIN.

A. I used a regression analysis model to develop a weather normalization adjustment for Tennessee-American. The model was developed by the Tennessee Public Service Commission Staff and has been used by the Staff in the last three rate cases. The purpose of the weather normalization model is an attempt to "predict" or "forecast" a level of water sales based on weather patterns considered to be "normal." Therefore, the calculation of a normalized level of sales will be based on a level of "average" weather for a specific period of time.

Q. WOULD YOU PLEASE EXPLAIN WHAT A REGRESSION ANALYSIS IS.

A. Regression analysis is a statistical tool that uses the relation between two or more quantitative variables so that one variable can be predicted from the other. In a weather normalization adjustment, we are trying to determine if there is a relationship or correlation between the amount of water that the Company sells and the weather in the Company's service territory.

Q. WOULD YOU PLEASE EXPLAIN HOW YOU WENT ABOUT USING THE MODEL.

A. I started with the basic regression analysis function of Y=M(x)+B where Y is the dependent variable water sales and M is the regression coefficient or slope of the regression line. It indicates the change in the value of Y(dependent variable) per unit increase in X (independent variable). X is the independent variable (weather) and B is the constant in the regression function.

Q. WHAT IS THE SOURCE OF THE WEATHER DATA IN THE MODEL?

A. The Company obtained from the "National Oceanic and Atmospheric Administration (NOAA)," a copy of the monthly weather report for the Chattanooga, Tennessee area. The Company used rainfall in inches, cooling degree days and heating degree days as the variables in the analysis.

Q. PLEASE CONTINUE.

A. Rainfall is self-explanatory. It represents the number of inches of rain that fell in the Chattanooga area during a specific month. Heating and cooling degree days are the aggregate of the temperature variances over or under a base of 65 degrees fahrenheit during a specific month.

Q. HOW MUCH DATA DID THE COMPANY COLLECT?

A. The Company has collected 27 years of weather history data for cooling degree days and

30 years of weather history data for rainfall and heating degree days. The company also assembled water sales and customer history data for the years 1984-1995. The analysis was performed for the period ending December 31, 1995.

Q. WOULD YOU PLEASE EXPLAIN HOW YOU WENT ABOUT YOUR CALCULATION OF NORMALIZED SALES?

A. The Company is using a series of Symphony spreadsheets that were developed by the Tennessee Commission Staff. The spreadsheets have been used in the last three Tennessee-American Water Company rate cases to forecast water sales for its residential and commercial customers. The spreadsheets are broken down between weather files, customer files, sales files and an analyze file. The "Analyze" Spreadsheet calculates the regression analysis using either one, two or three independent variables.

Q. WHAT WERE THE RESULTS OF YOUR ANALYSIS?

A. I performed the regression analysis on the following customer classes: monthly residential and monthly commercial customers. The results of the analysis were measured based on the coefficient of determination R^2. This coefficient is a measure of variation in the dependent variable which is based on the independent variables used in the analysis. The higher the R^2 factor approaches 100% the better the correlation between the dependent and independent variables.

Q. IS THERE ANYTHING SPECIFIC ABOUT YOUR CALCULATIONS THAT YOU WOULD LIKE TO DISCUSS?

A. Yes. In using the model, I performed two sets of regression calculations. The first was based on "calendar" weather data. This means that billed water sales for a specific month were regressed against weather patterns for that month in which the weather occurred, and the sales were billed to the customer. However, in reality, water sales are not only affected by weather in the month in which sales are billed but also prior month(s), where the customer actually used the water but had yet to be billed. Therefore, a second

regression analysis was performed. This was done on "cycle" weather data. This means that for a monthly account that was billed in July, this data was regressed against weather data that was averaged for the month of June and July. As the results will show, the use of cycle weather data generates a higher correlation factor than calendar weather data.

For each of the customer classes noted above, I performed a regression analysis using one, two and three independent variables. The Company utilized a three independent variable analysis. Based on this analysis, test year sales for the residential class were reduced by 42,992 CCF and commercial sales were reduced by 63,760 CCF. The resulting impact on revenue is a reduction of $102,698 for residential and $94,503 for commercial.

Q. MR. GRUBB, YOU LISTED A NUMBER OF EXPENSE CATEGORIES THAT YOU WILL BE SUPPORTING. WOULD YOU PLEASE DISCUSS EACH ONE?

A. Yes. Each of the following expense categories were reviewed for the test year and then appropriately adjusted to reflect the level of expense for the attrition year. Some of the expenses were adjusted for a cost trend factor of 4.02%.

Q. HOW WAS THE 4.02% FACTOR CALCULATED?

A. The factor was calculated based on forecasted levels of inflation by six financial institutions through the third quarter of 1997. Average inflation factors were calculated for the attrition year and the test year. The increase in the factor for the attrition year over the test year was 4.02%. This increase represents an increase over a twenty-two month period of approximately 2% annually.

Regulatory Expense

The Company has estimated the cost of the preparation and presentation of this current filing to be $215,000. The Company is proposing to amortize these costs over a two-year period resulting in an annual cost of $107,500. Also, included in the attrition year cost is two months amortization totaling $2,284 for the cost of a depreciation study that was

prepared in 1991, and $88,349 for the three-year amortization of the Sales Adjustment Mechanism (SAM) that was part of the last case's stipulation. Total proposed attrition year expense is $198,133.

The cost of the preparation and presentation of the current rate case includes: costs related to preparation of accounting exhibits; schedules and supporting workpapers; preparation of testimony; financial and operational review of exhibits and testimony; legal fees associated with all aspects of the filing; responding to Staff and intervenor data requests; responding to Staff inquires during an on-site audit; review of Staff and intervenor testimony and exhibits; preparation of Rebuttal Testimony and exhibits; preparation for hearings; attending hearings; preparation of legal briefs and implementation of new rates. Also, reflected in the cost are fees that are paid to a cost of money consultant.

In the last case, the stipulation reflected a SAM for sales to Coca Cola. The parties agreed to a level of sales for Coca Cola. If the actual sales deviated from the agreed to level, an adjustment mechanism was utilized. During the period September 1993 through March 1996, actual sales to Coca Cola was 417,687 CCF less than that included in the Company's last rate case. The Company adjusted this figure to project the total shortage through October 31, 1996. This amounts to 500,388 CCF and results in a total SAM of $265,046. The Company is proposing to amortize this amount over three years and has included it in Regulatory Expense in the amount of $88,349.

Insurance, Other Than Group

The Company's proposed level for this expense for the attrition year is $331,721 and is based on the Company's 1996 budget. This expense category includes costs for general liability, workers compensation and property insurance.

Customer Accounting Expense

Customer accounting expense for the test year was $633,565 (excluding customer billing

computer). The Company is proposing to increase this expense by $9,493 to reflect the use of the 4.02% cost trend factor. The Company did not apply the inflation factor to either uncollectibles expense or postage expense.

This category includes the costs associated with the billing and collecting function. It includes the costs for office supplies, report forms, computer supplies, postage expense. collection agency fees. lock box expenses, janitorial service, electric expense and other miscellaneous customer accounting expenses.

Rent Expense

The Company is not proposing an adjustment to this expense category. The test year expense of $26,951 is projected to be the level experienced for the attrition year.

This category includes the costs associated with the renting of mobile radios, postage equipment, copiers, and land.

General Office Expense

General office expenses for the test year was $224,499. The Company is proposing to increase this expense by $8,926 to reflect the use of the 4.02% cost trend factor. The Company did not apply the inflation factor to postage expense that is included in this category.

This expense category includes the costs associated with general expenses for the offices. These would include report forms, stationary, safety shoes and supplies, reprographic supplies, computer supplies, overnight mail expenses, janitorial service, electric expense, employee expenses, credit line fees, bank service charges and other miscellaneous general office expenses.

Miscellaneous Expenses

Miscellaneous expenses for the test year were $1,277,812. The Company is proposing four adjustments to this category. The first adjustment is the cost trend factor adjustment previously noted. This results in an increase of $46,383. The Company did not apply the inflation factor to the Employee Stock Option Plan (ESOP) expense, 401K expense or postage expense.

The second adjustment is to the ESOP and 401K expense. These expenses were increased by $14,963 to reflect current employee participation ratios and the current level of Company contributions to the plan. The third adjustment was to normalize legal expense. During the test year, the Company incurred legal expenses totaling $100,395. The Company is proposing to decrease this expense by $39,038 to a more normal level. The Company used a four year average of legal expenses to arrive at the attrition year expenses of $61,357 (excluding the cost trend factor adjustment).

The fourth adjustment reflects the Company's proposal to include in the cost of service the cost of the following items: 1) Cost of Economic and Business Analysis of TAWC as a standalone utility ($24,000). This study was recommended by the recently completed Management Audit (II.RI). The expected completion date is January 1997. 2) Cost of an employee opinion survey ($15,000). The expected completion date is June 1997. This study was recommended by the Management Audit (IV.RI). 3) Establish an energy management program to gather the essential data for current and future cost reductions. (Total cost $40,000 and amortized over three years - $13,333.) This item was also recommended by the Management Audit (III.R5). The expected completion date is December 1996. 4) The actual cost of the Management Audit was $231,387. The Company is proposing a three-year amortization of $77,129 per year.

The total of the adjustments is $151,770. Total proposed miscellaneous expense for the attrition year is $1,429,582.

Maintenance Expense

Maintenance expense for the test year was $674,736. The Company is proposing to increase this expense by $83,120 to reflect the use of the 4.02% inflation factor and to normalize the level of programmed maintenance for the test year. Programmed maintenance for the test year amounted to $40,260. The four-year average is $94,097. Therefore, the Company increased the test year expense by $53,836.

This expense category includes costs associated with maintaining the assets and property of the Company. These would include repair parts, tools, electrical supplies, painting supplies, contracted services, paving materials, Stock E plant supplies, maintenance agreements and other maintenance expenses.

Interest on Customer Deposits

This adjustment is made to reflect the interest costs on customer deposits incurred by the Company as operating expenses. The Company has included in rate a deduction for customer deposits. The interest on these deposits was calculated based on a rate of 6%.

Allowance for Funds Used During Construction (AFUDC)

AFUDC is based on a three-year average. This adjustment was made to reflect AFUDC as an above the line item for ratemaking purposes.

Income Taxes

Exhibit 2, Schedule 6, page 1 of 2 shows a summary of income taxes per books, normalized and attrition year end at present and proposed rates.

Current income taxes were calculated based on the statutory rates and is shown in detail on Exhibit 2, Schedule 6, page 2. Deferred taxes were calculated for the normalization for book and tax depreciation on post 1980 property, Deferred Investment Tax Credits, Reverse South Georgia Amortization and the amortization of deferred taxes on

Contributions in Aid of Construction.

Q. MR. GRUBB, WHAT METHOD DID THE COMPANY USE IN CALCULATING ITS WORKING CAPITAL ALLOWANCE IN THE CASE?

A. The Company is using a Lead/Lag Study that was performed based on historical data for the twelve months ended October 31, 1995.

Q. OTHER THAN THE LEAD/LAG STUDY, DID THE COMPANY EVALUATE OTHER METHODS FOR COMPUTING ITS WORKING CAPITAL ALLOWANCE?

A. Yes. The Company is aware of two other methods for computing a working capital allowance. The first method for computing a working capital allowance is the balance sheet approach. This method involves the summation of asset accounts used for utility operations, which are not included in net plant accounts. This amount is then reduced by the liability accounts used for utility operations but is not considered in the rate base or rate of return calculation. While this method is easy to compute, controversies exist over which asset and liability accounts should be considered. Also, the balance sheet approach is a "point-in-time" approach and does not consider the daily fluctuations in account balances. Therefore, this method does not provide for a true working capital allowance. The second method is the formula approach. This method applies a 1/6 or 1/8 formula to a Company's level of operation and maintenance expenses. This method is the simplest of the three methods. However, it may not reflect specific operating characteristics of a particular company unless the formula is based upon the results of a Lead/Lag Study. The Tennessee Commission has utilized the Lead/Lag Study to calculate the Company's working capital allowance in prior cases.

Q. WOULD YOU PLEASE DESCRIBE THE LEAD/LAG STUDY METHOD IN CALCULATING THE WORKING CAPITAL ALLOWANCE?

A. This method measures the net time lag between the date when the customers receive

service from the Company and the date when they pay for those services (revenue lag), and the lag between the date the Company receives goods and services and the date they pay for those goods and services (expense lag). If applied correctly, a Lead/Lag Study can be a useful tool in calculating a working capital allowance.

Q. DOES THIS MEAN THE COMPANY WILL PREPARE A LEAD/LAG STUDY FOR EACH CASE?

A. No. The time in preparing a complete Lead/Lag Study would prohibit the Company from performing one for each rate filing.

Q. HOW OFTEN SHOULD THE COMPANY PREPARE AND PRESENT A NEW LEAD/LAG STUDY?

A. The actual time frame will depend on the billing and payment patterns of the company and its customers. If, for example, the revenue and expense lags of the Company should change materially, then a new Lead/Lag Study should be prepared. Without any material changes, a five-year interval between studies is recommended.

Q. BASED ON THE LEAD/LAG STUDY, WHAT IS THE LEVEL OF WORKING CAPITAL ALLOWANCE THAT THE COMPANY IS PROPOSING IN THIS CASE?

A. The Company is proposing a working capital allowance of $383,000.

Q. PLEASE DESCRIBE WHAT IS ON EXHIBIT NO. 1, SCHEDULE 3, PAGE 2 OF 6.

A. This exhibit summarizes the Company's Lead/Lag Study. The actual study was based on data for the twelve months ending October 31, 1995. The lead/lag days were then applied to the attrition year operating results. The basic principle of the study, as shown on this schedule, was to multiply the daily cost of operations to the net interval between the time the customer delays payment of services rendered (revenue lag) and the time the Company

delays payment of its operating expenses (expense lag).

The daily cost of operation is merely the proforma cost of providing service divided by 365 days. The revenue lag, or the days the customers delay payment of service, contains three components, (1) service lag, (2) billing lag, and (3) collection lag.

The service lag is the average median service days of the billing pattern for a 365-day year. The average service period is calculated by dividing 365 days by twelve billing periods per year and dividing by two to arrive at 15.21 days average service period. The Company bills its fire service in advance; therefore, the lag will be negative because revenues are received before the entire service is rendered. Quarterly fire service is billed on the first day of the billing cycle. The lag for this service is [45.63] days. The composite service period lag is shown on Exhibit No. 1, Schedule 3, page 4 of 6 and is 13.20 days.

The billing lag is the number of days between meter reading date and the date the bills are mailed. The billing lag is determined by analysis of the actual lag between reading and billing dates. A twelve-month billing period was analyzed for the study. The billing lag was determined to be 4.62 days.

The collection lag is the number of days between the billing date and the date bills are paid by the customers. A daily accounts receivable balance was reviewed for a twelve- month period. Next, the average daily billed revenues were calculated by dividing total water revenues billed for the same twelve-month period by the number of days in the period. The average daily balance of accounts receivable was divided by the average daily billed revenues. The result provides the average number of days that a dollar of billed revenues remains in accounts receivable, or the collection lag. This lag was determined to be 24.43 days. As shown on Exhibit No. 1, Schedule 3, page 4 of 6, the total revenue lag is 42.25 days.

Q. HOW WAS THE EXPENSE LAG CALCULATED?

A. The expense lag, or days the Company delays payment of expenses was determined by a time-consuming and comprehensive analysis of the Company's vouchers. A separate calculation of lead/lag days was computed for major expense category, i.e., labor, chemicals, fuel and power, group insurance, etc. Vouchers in each category were analyzed to determine if it was payment for the receipt of goods, or to cover a service period. Once this is known, the median days were computed, that being zero for the receipt of goods, or one-half the service period for items such as power bills or telephone bills. The number of lag or lead days was added to the median days for the payment date of the voucher. These total days were then multiplied by the dollar amount of the applicable voucher to produce the dollar days. The total dollar days for each category were summarized and were then divided by the total dollar amount of vouchers analyzed for the respective category. The result of this computation is the lead or lag days for that category of expense. The composite expense lag was determined to be 37.34 days by applying lead and the lags to the Company's attrition test year.

Q. EXHIBIT 1, SCHEDULE 3, PAGE 3 SHOWS THAT THE AMOUNTS FOR NET EARNINGS, DEPRECIATION AND DEFERRED TAXES ARE ASSIGNED A ZERO LAG. WHY ARE ZERO LAGS APPROPRIATE FOR THESE ITEMS?

A. I will address each item one at a time. First, a zero lag is appropriate for net earnings because as service is rendered, net earnings will be retained and reinvested until they are paid out as common dividends. The second item, depreciation expense, is recognized by this Commission as a proper operating expense to recover the use of the Company's assets over their respective service lives. These annual depreciation charges are accumulated and deducted from the original cost of property to arrive at net utility plant in service. The issue that must be addressed and appropriately recognized in the rate making process is that the Company realizes a considerable delay in the recovery of these depreciation charges from the customers. Because of this delay, a zero lag for depreciation and deferred taxes are appropriate.

Q. MR. GRUBB, CAN YOU GIVE US AN ILLUSTRATION OF THE CONSIDERABLE DELAY IN THE RECOVERY OF THE DEPRECIATION CHARGES?

A. Yes. The investors supplied the cash to fund the investment in the new plant. Depreciation expense represents the recovery of those cash expenditures from customers who are receiving service. The investors are allowed to earn a return on the plant in service less any depreciation charges that were collected from the customers. For example, if there is a lag of 42 days between the time that customers receive service and when they pay for that service, then depreciation charges will not be collected in cash from the customers until an average of 42 days after service is provided. If this 42 day lag in the collection of depreciation charges is not included in rate base, then the investors will not have the opportunity to earn a return on their full investment. I have attached to my testimony Exhibit EJG-1, which consists of three pages.

Q. WOULD YOU PLEASE EXPLAIN THIS EXHIBIT?

A. Page 1 of 3 illustrates the purchase of plant on January 1, 1996 at a cost of $5,000. The life of the asset is two (2) years. This illustration has been simplified, but the theory is the same despite cost or service life. During this two (2) year life, the rate base would be the gross cost less the accumulated depreciation that has been recorded on the books.

Page 2 of 3 illustrates the timing of the cash collection of the depreciation expense. The asset was purchased and placed into service on January 1, 1996. The cash collection from the customer will begin on February 11, 1997 which is 42 days after the asset was placed into service. Therefore, there is a 42 day lag in the collection of the recorded depreciation. The asset will be retired on December 31, 1998 and be fully depreciated and excluded from rate base. The last cash collection will be on February 11, 1999.

Q. PLEASE CONTINUE WITH PAGE 3 OF EXHIBIT EJG-1.

A. This page illustrates that if rates were set using a rate base at December 31, 1997, the amount in rate base would be $2,500, which is the original cost of $5,000 less the recorded

accumulated depreciation of $2,500. As shown on page 2 of Exhibit EJG-1, there is a lag of 42 days in the collection of depreciation charges. Therefore, only $2,212 has been actually collected from the customers ($2,500 x [365 - 42] / 365 days). Because the Company only collected $2,212 in depreciation charges, rates should be set on a rate base of $2,788 ($5,000 less $2,212). This would be accomplished through a rate base that included $2,500 for net utility plant and working capital of $288, which is calculated by dividing the annual depreciation expense of $2,500 by 365 days and multiplying that by the difference in the revenue lag of 42 days and the lag for depreciation expense of zero days. The result for this illustration is $288 ($2,500 / 365 x [42 - 0]).

Q. DOES THE ABOVE ILLUSTRATION FOR DEPRECIATION EXPENSE ALSO APPLY TO DEFERRED TAXES?

A. Yes, it does. The Company makes a cash expenditure for an asset, begins recording deferred taxes, but must wait 42 days before the deferred taxes are collected from the customers.

Q. WHAT IS THE TARIFF DESIGN THAT THE COMPANY IS PROPOSING IN THIS CASE?

A. The Company is proposing an across the board increase to all of its tariff rates as shown on tariff sheets No. 3, 4, 6, 8 and 9. Mr. Bailey will address two other proposed changes to the Company's tariffs in his direct testimony.

Q DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes.

TENNESSEE-AMERICAN WATER COMPANY
DIRECT TESTIMONY
EDWIN L. OXLEY

1. Q. WILL YOU PLEASE STATE YOUR NAME AND BUSINESS ADDRESS?

A. My name is Edwin L. Oxley and my business address is 1325 Virginia Street, East, Charleston, WV 25322.

2. Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by the American Water Works Service Company, Inc. as a Revenue Requirement Specialist.

3. Q. WHAT ARE YOUR RESPONSIBILITIES AS A REVENUE REQUIREMENT SPECIALIST?

A. My responsibilities include the preparation and presentation of rate filings requested by the six operating companies which comprise the Southern Region of American Water Works. In addition to Tennessee, these companies are located in the States of Kentucky, West Virginia, Maryland and Virginia.

4. Q. WOULD YOU DESCRIBE YOUR EDUCATIONAL BACKGROUND AND BUSINESS EXPERIENCE?

A. I received a Bachelor of Business Administration degree from Marshall University (major in accounting with a minor in finance) in May 1978.

I was employed by the West Virginia Public Service Commission as a Rate Analyst and Senior Rate Analyst from October 1978 to March

1984. In March 1984, I was hired by the American Water Works Service Company, Inc., Southern Region Office, as a Revenue Requirement Specialist.

In August 1981, I attended the NARUC regulatory course held at Michigan State University.

In October 1989, I attended the Annual Eastern Utility Rate Seminar held in Hollywood, Florida.

5. Q. **HAVE YOU PREVIOUSLY PARTICIPATED IN REGULATORY MATTERS?**

A. Yes. I have prepared rate case filings and presented testimony before state regulatory commissions in Tennessee, Kentucky, West Virginia, Virginia and Maryland. While employed by the Public Service Commission of West Virginia, I performed audits and presented testimony in numerous electric, gas, motor carrier, water and sewer company rate proceedings.

6. Q. **WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS CASE?**

A. The purpose of my testimony is to sponsor information contained in the accounting exhibits which have been filed by Tennessee-American in support of its proposed tariffs.

7. Q. **WHAT ASPECTS OF THE ACCOUNTING INFORMATION DO YOU INTEND TO SPONSOR?**

A. I will sponsor operating revenues and Federal/State income taxes.

8. Q. HOW DID THE COMPANY DETERMINE ITS ATTRITION YEAR OPERATING REVENUES?

A. Billing determinants from the twelve months ended January 1991 was employed as a basis for attrition year revenues. This twelve-month period differs from the historical test year ended March 1991 by two months.

9. Q. WHY WASN'T THE TEST PERIOD DATA USED?

A. Tennessee-American initiated a re-routing of its meter reading schedules during the month of February 1991. This procedure has resulted in more efficient operation by reducing three full-time meter reading positions from the Company's labor force since the Company's last rate case. However, the change in customer meter reading dates caused fluctuations in billed days from prior billings. Thus, affected customers' billing determinants for the test year do not conform to a 365 billing period normally used in setting rates.

10. Q. DID THE COMPANY UTILIZE A NORMALIZATION METHOD TO FORECAST WATER SALES?

A. Yes. Tennessee-American was impressed by a normalization study used by the Commission staff in the Company's last rate case. After the completion of that case, the Company requested a copy of the study which has been updated for this rate filing. The study

analyzes the correlation between weather data and residential and commercial customer's water usage. Historical weather information is then inserted into a formula to yield a normalized level of water sales.

11. Q. **How did the Company forecast water sales for its other classes of water customers?**

A. The actual sales experienced for the Industrial, Other Public Authority and Sale for Resale classes during the twelve months ended January 1991 was used with the following exception. A major customer, Central Soya, has announced that it will cease operations and no longer purchase water from the Company. This loss in sales of approximately $171,000 will be partially offset by the addition of a new customer (ADM). Tennessee-American has been informed by ADM of its projected water needs (roughly 50% of Central Soya) and that it will begin operations this summer.

12. Q. **How was fire service revenues determined?**

A. Private and Public fire service revenues were calculated by using the projected number of fire service facilities and hydrants at June 30, 1992, the mid-point of the attrition test period.

13. Q. **What is the basis for Other Operating Revenues?**

A. Miscellaneous revenues (mostly reconnection fees), rental income and late payment revenues for the test year ended March 1991 were adopted for use in the attrition year. The first two items are relatively constant from year to year. Late payment penalties were authorized by the Commission in the Company's last rate case and were first levied in July 1990. As would be expected, penalties were substantial during the first couple of months. However, as customers recognized the consequence of late payments, the number of penalties reduced drastically.

Adjustments have been made to sewer billing revenues which reflect the anticipated changes in customer billings for the attrition test period.

Tennessee-American is proposing Commission approval of a service activation charge of $12.50. This charge will be imposed on customers requesting water service at a specific location and is anticipated to generate $202,500 of additional revenue. The new charge will require those customers who create the additional expense to at least share in the cost. A fee of $12.50 was chosen after a study was made of similar charges by other utility companies.

14. Q. HOW HAVE FEDERAL AND STATE INCOME TAXES BEEN CALCULATED?

A. The Company's provision for Federal and State income taxes is detailed on Statement A, Schedule 5 of the accounting exhibits. Taxable income for federal and state purposes is derived by subtracting operating expenses and statutory deductions (additions) from taxable revenues. The statutory federal and state tax rates have been applied to the resulting income to yield current taxes. Deferred Federal income taxes are comprised of the normalization requirements due to A.C.R.S. tax depreciation and the ratable flow-back of excess Deferred Federal Income Tax A.C.R.S. and investment tax credits.

15. Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes.

TENNESSEE PUBLIC SERVICE COMMISSION

SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

124. Provide a list of state jurisdictions in which AWWC subsidiaries have approval for weather normalization adjustments. Provide copies of the most recent public utility commission orders approving weather normalization adjustments for AWWC subsidiaries.

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome and seeks information that is neither relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, Mr. Miller is aware that revenue normalizing adjustments in establishing rates have been utilized in both Virginia and Maryland related to both very hot/dry and wet/cool historical test-years, although the cases ended in settlement without reference to the methodology in the Settlement Agreement or Commission Orders. The Commissions in Kentucky and California have historically used weather normalization for establishing forecasted test-year sales. See the attached excerpts for the Kentucky and California Commission Orders identified as TN-CAPD-01-SUPPLEMENTAL-Q124-ATTACHMENT. The Kentucky Commission's decision was based on the WNA model developed by Dr. Spitznagel, the Company's witness in this case, and has used Dr. Spitznagel's recommendation in every KAWC case since case number 97-00034.

The Company also notes that the rates of TAWC from at least 1991 have been developed using a weather normalized sales approach first proposed by the Tennessee PSC staff in 1989, and in all cases from 2002 forward based on the recommendation of Dr. Spitznagel. This included all general rate filings of TAWC up to and including the Company's 2008 rate case.

Unamortized KU Refund	(47,562)
Meter Deviation - Net Plant Savings	(63,940)
Net Investment Rate Base	$ 126,749,355

Income Statement

Kentucky-American reported base period and forecasted period net utility operating income of $10,408,700 and $10,899,642, respectively.[56] Kentucky-American's forecast is reasonable and has been accepted for rate-making purposes with the following exceptions:

Weather Normalization. In Kentucky-American's last rate case, Case No. 95-554, it used a two step weather normalization procedure to adjust test period operating revenues. The Commission found that, for short-term use, Kentucky-American's model was sufficient, but if the time between rate cases should lengthen, the reliability of Kentucky-American's forecasts could erode quickly. Therefore, the Commission ordered Kentucky-American to develop a more rigorous single model based upon all the reliable data available.

In the instant case, Kentucky-American constructed and utilized a statistical weather normalization model which uses actual and historical meteorological data and other known predictor variables to predict customer water utilization or sales levels. These weather-normalized sales levels are then applied to forecasted number of bills for the various customer classes to determine projected test period operating revenues.

---

56 Exhibit 38, Schedule C-2, page 1.

Following preliminary tests on its new model, Kentucky-American found that the significant predictor variables are a drought severity index, calendar month, and calendar year. Kentucky-American modified its weather normalization model to include only these variables. Furthermore, preliminary tests proved that the water utilization levels of only four customer classes proved to be sensitive to weather, namely, the residential, commercial quarterly, commercial monthly, and Other Public Authority ("OPA") monthly classes. Kentucky-American's final weather normalization model was then used to predict sales levels for these four customer classes.

The Commission is satisfied that Kentucky-American has constructed a reasonable and appropriate weather normalization model which will reliably predict water utilization or sales levels for customer classes whose water usage is sensitive to changes in weather conditions. The Commission accepts Kentucky-American's weather normalization model for use in this case.

Monthly OPA Sales. Kentucky-American's projected weather normalized monthly OPA sales included sales to the Bluegrass Army Depot ("Depot"). According to Kentucky-American, the Depot had abnormally high usage from January 1992 through February 1994 apparently due to numerous water leaks. Therefore, Kentucky-American used operational judgment to forecast a realistic sales level.[59] The AG maintains that forecasted weather normalized sales data for the OPA class should exclude sales to the Depot. Kentucky-American agreed and proposed to increase its net revenue amount by

[59] Kentucky-American Response to Item 16 of the AG's Second Data Request.

(c) If the party asserts that information is privileged, the party shall maintain a privilege log showing exactly which documents exist, what portions of documents are alleged to be privileged, and the specific basis for each claim of privilege.

(d) If the parties are unable to resolve the matter, the requesting party may file a motion to compel, and any response to the motion shall be filed and served, with facsimile or electronic mail courtesy copy, no later than five days after the motion is filed.

D. Common Forecasting Methodology

ORA proposed that the final RCP adopt a common forecasting methodology for the number of customers and per customer usage for residential and small commercial customer classes. In its reply comments, ORA proposed modifications to its proposal as a result of continuing discussions with the utilities. We adopt these proposals, as modified.

California American Water Company (Cal-Am) did not oppose adopting common forecasting methodologies, so long as the utility may also propose alternatives. Cal-Am did, however, propose a refinement for treating drought years. Cal-Am noted that ORA proposed to exclude all drought years from the forecast of average consumption per customer. Cal-Am stated that excluding all drought years would tend to result in lower consumption. Cal-Am recommended that the RCP only exclude drought years where the Commission had authorized the utility to recover the lost revenues due to lower consumption though a memorandum account.

Suburban Water Systems (Suburban) opposed ORA's initial proposal to use a simple five-year average for sales forecasting. Suburban stated that such a forecasting methodology would be major departure from current practice and would result in significant revenue changes for many utilities. Suburban

explained that a statistically-sound forecasting methodology based on annual amounts, as ORA proposed, would require 45 to 74 years of annual data to provide sufficient data for a reliable regression analysis. As such data are not available, Suburban concluded that the two methods based on annual data "fall far short." Suburban recommended using a particular forecasting methodology with 20 years of monthly data (240 periods) and limiting independent variables to rainfall and temperature.

In reply comments, ORA changed its proposal to the "New Committee Method," which relies on a multiple regression methodology based on Standard Practice No. U-2 and Supplement to Standard Practice No. U-25. ORA also included several improvements, including using a five-year average for customer growth, basing temperature and rain on a 30-year average, and removing recognized drought periods, but supplementing with additional historical data to obtain 10 years of monthly data.

ORA's proposal limited rate case participants to using this forecasting method for the first two years of the first three-year rate case cycle. ORA would then require that the Water Division conduct workshops and report to the Commission on whether to change or retain this forecasting methodology.

ORA stated that the modified proposal resulted from its "continuing discussions with the utilities." The modified proposal addresses Suburban's and Cal-Am's most significant concerns. We will, therefore, adopt ORA's proposal, including the experimental period followed by a recommendation from the Water Division.

E. Interim Rate Relief

Section 455.2 permits a utility that is subject to the RCP to request interim rate relief if the Commission has not resolved the utility's GRC by the

SUPPLEMENTAL DISCOVERY REQUEST OF THE
CONSUMER ADVOCATE AND PROTECTION DIVISION

Responsible Witness: **Michael A. Miller**

Question:

125. Provide the balance in object account #186453 at September 2010, by payee and business reason for each amount in the account. Indicate in your response whether any of the expenses and or amounts from the Booz Allen audit report as submitted in TRA Docket #08-00039 are included in this docket.

Response:

The balance in account 186453 includes costs for two management audits that have been performed on behalf of Tennessee American Water Company. However, there are no costs in the current rate filing for the Booz Allen Hamilton expenses. The Company is seeking a five year amortization for the Schumaker & Co., Inc. expenses.

Schumaker & Co Inc	$184,964
Booz Allen Hamilton	$315,338

Question:

126. Provide the achieved rate of returns for each American Water regulated company for the year ended 2009. Include in your response the calculations deriving each achieved rate of return.

Response:

The Company objects to this request on the grounds that it is overly broad, unduly burdensome and seeks information that is neither relevant nor reasonably calculated to lead to the discovery of admissible evidence. Without waiving these objections, please see the attached schedule identified as TN-CAPD-SUPPLEMENTAL-Q126-ATTACHMENT. The Company would note that this schedule has not been adjusted for one-time or non-recurring items, and reflects many different approaches to rate recovery, such as, historical test-year/forecasted test-year, WNA, revenue true-up mechanisms, DISC surcharges, post test-year construction, post construction AFUDC, different authorized ROE's, different timing of rate cases, recovery/non-recovery of acquisition adjustments, etc. which make a comparison difficult without a thorough analysis. A comparison is made more difficult without analysis of weather patterns across the country and the impact on operations from the financial crisis and recession, and timing of financings.
