Chairman Mary W. Freeman c/o Sharla Dillon Tennessee Regulatory Authority 460 James Robertson Parkway Nashville, Tennessee 37243

> Re: Docket No. 10-00189: Petition Of Tennessee American Water Company To Change And Increase Certain Rates And Charges So As To Permit It To Earn A Fair And Adequate Rate Of Return On Its Property Used And Useful In Furnishing Water Service To Its Customers

Dear Chairman Freeman:

Enclosed please find an original and five (5) sets of copies of Tennessee American Water Company's Responses to the TRA's Third Data Request dated January 28, 2011, Questions 139 through 146.

A compact disk is being provided in the binder of each set of copies. This disk contains all responses and attachments. In addition, these responses are being filed today by way of email to the Tennessee Regulatory Authority Docket Manager, Sharla Dillon. I have enclosed a second disk labeled "Docket Manager Disk" for Ms. Dillon that contains a single PDF file of this material.

Please file the original and four copies of this material and stamp the additional copy as "filed." Then please return the stamped copy to me by way of our courier.

Should you have any questions concerning this matter, please do not hesitate to contact me at the email address or telephone number listed above.

Sincerely,

David Killion

**Enclosures**

**Docket No. 10-00189** 

Tennessee Regulatory Authority Staff Data Request No. 3

Responsible Witness: Michael A. Miller & James I. Warren

RATE BASE

**Question:** 

139. On page 55 (lines 7-10) of his direct testimony, Mr. Buckner states that CAPD

"recommends that the FIN 48 amount be included as a deduction from rate base.

Conversely, TAWC has excluded the FIN 48 amount for setting rates in this docket."

TAWC witness Mr. Miller states on page 62 (lines 23-24) of his testimony that the

"Company proposes that its jurisdictional rate base be reduced for the value of the

additional ADITs arising from application of the tax accounting change." On page 63

(lines 15-17), Mr. Miller states "I am attaching to this testimony Rebuttal Exhibit MAM-

14 which I believe demonstrates what level of rate base reduction is in the Company's

filing related to deferred income taxes-capitalized repairs (net of the FIN 48 reserve)."

Please reconcile these statements (whether in your opinion TAWC has included a

reduction to rate base to reflect FIN 48) and provide your position as to this inclusion or

exclusion of the reduction to rate base for FIN 48. Provide any documentation,

workpapers, or reference to previously submitted workpapers that will support your

position.

**Response:** 

Please note the MAM-14 referred to above was not a Rebuttal Exhibit but an Exhibit

attached to the direct testimony of Mr. Miller. The Company did include ADITs related

to the capitalized repairs as shown in Exhibit MAM-14 attached to Mr. Miller's direct

testimony. The FIN 48 Reserve amount was deducted from the tax deduction generated

on the entirety of the capitalized repairs deduction (\$323,956-SIT and \$1,744,373-FIT) as

shown on Exhibit MAM-14. The ADITs recorded on the Company's books do not

include the FIN 48 Reserve because they are not interest-free capital. Per the requirements of FIN 48, interest must be recorded on the FIN 48 Reserve. This is based on the opinion of the Company and its expert tax advisors, which was a product of a detailed analysis that is required by FIN 48 to assess "uncertain tax positions." Based on this detailed analysis, the Company and its tax advisors believe the FIN 48 portion of the capitalized repairs deduction will not be recognized by the IRS and will therefore have to be repaid to the IRS with interest.

It is the Company's opinion that the Company's rate base should not be reduced by the FIN 48 Reserve because:

- The uncertain tax position regarding capitalized repairs has been determined to be "more likely than not" to be rejected at least in part (approximately 30% of total deduction taken) by the IRS. This belief is based on a detailed study performed by the Company and its internal and external tax experts, including its outside independent auditor, PwC.
- 2. The FIN 48 Reserve is not an ADIT because it is not interest-free capital at this point based on the detailed assessment required by FIN 48. It can only become an ADIT if the IRS eliminates the uncertainty of the Company's aggressive tax deduction. This could only be done by IRS clarification by way of further IRS instruction or an audit regarding the permitted unit of property, or the statute of limitations expiring, which will not happen until 2012 for the first capitalized repair deduction taken by the Company on the 2008 federal income tax deduction (including the catch-up deduction required when a change in tax accounting occurs).
- 3. If the FIN 48 Reserve is deducted from rate base in this case, the Company could never recover the lost revenue from its customers if the FIN 48 portion of the capitalized repairs deduction is not determined to be deductible by the IRS. The Company's tax experts have determined that "the more likely than not" scenario is that the FIN 48 portion of the capitalized repairs will not be allowed to be deducted.

- 4. If the aggressive tax position of the Company turns out to be fully deductible in the future (a scenario that the Company's tax experts have determined to be unlikely), the customer will receive the full benefit of that deduction through the ADIT increase (by reversal of the FIN 48 Reserve) which would then be amortized fully over the remaining book life of the assets driving the timing difference.
- 5. The Company's position is consistent with all regulatory commission decisions in contested rate cases that the Company is aware of (See footnotes on page 49 of Mr. Miller's rebuttal testimony).

The Company's position regarding FIN 48 is more fully explained in the Rebuttal Testimony of Mr. James Warren (at pages 25-36) and Mr. Miller's rebuttal testimony (at pages 44-49).

The Company provided a number of responses to discovery requests that support its position on FIN 48 in this case, including the following:

- TRA-02-Q134
- TN-CAPD-01-Q56
- TN-CAPD-02-Q1

**Docket No. 10-00189** 

Tennessee Regulatory Authority Staff Data Request No. 3

**Responsible Witness:** 

**Sheila Miller** 

**RATE BASE** 

**Question:** 

140. Regarding the Company's CWIP forecast, please explain whether retirements were

included in the balances of CWIP and provide justification for the inclusion (or exclusion)

of retirements in that calculation.

**Response:** 

The Company inadvertently included retirements in the balances of CWIP in its original

filing. The CWIP retirements were inadvertently included as an offset in the CWIP

balance, which overstated the rate base by \$1,165,021.

The Company has acknowledged this error, as described in the rebuttal testimony of

Sheila Miller, on page 14. The retirements should not be included in the CWIP balance

because they are included in retirement work in progress and not part of construction

work in progress.

**Docket No. 10-00189** 

Tennessee Regulatory Authority Staff Data Request No. 3

Responsible Witness: Sheila Miller

**RATE BASE** 

**Question:** 

141. With regard to UPIS forecast, should the addition of \$250,000 of land be included in

additions to Plant in determining the 13-month average? Provide justification for your

position.

**Response:** 

The Company's office building lease expires in 2013. The Company has been notified

that the TVA will be purchasing the office building from the Company's lessor and the

TVA does not wish to continue to rent the Company's office building to the Company.

The land purchase will be made to facilitate an office building more compatible with

current TAWC operations. The land purchase should be included in rate base, but due to

the timing of the new office building it should have been reflected as CWIP instead of

UPIS. Given that it is only in the Company's attrition year for two months, and land is

not depreciated, whether the land is included as CWIP or UPIS creates no change in the

overall rate base requested by the Company.

**Docket No. 10-00189** 

Tennessee Regulatory Authority Staff Data Request No. 3

Responsible Witness: Michael A. Miller/James I. Warren

RATE BASE

**Question:** 

Provide a reconciliation of the TAWC Trial Balance Sum of Deferred Income Taxes as 142.

referenced on RB-ADIT in the amount of \$31,014,034 (\$27,159,180 + \$3,854,854) at

September 2010 and the Per Books Rate Base at 9/30/2010 (TN-TRA-02-Q138-

Attachment Page 1 of 1) in the amount of \$20,317,638. Provide all supporting workpapers

or reference to previously submitted workpapers.

**Response:** 

See attached schedules which will facilitate this response. TN-TRA-03-Q142-

ATTACHMENT 1 corrects the Attachment previously supplied in response to TN-TRA-

02-Q138. The original response to TN-TRA-02-Q138 included the "Other Deferred

Regulatory Liabilities" accounts which were primarily made up of the Net Negative

Salvage reclassification which has been reflected appropriately in the Company's

Accumulated Depreciation account to be consistent with the TRA's inclusion of NNS in

the regulatory book depreciation rates.

TN-TRA-03-Q142-ATTACHMENT 2 provides the reconciliation of the per books

balances of ADITs (net of FAS 71 tax assets) to RB-ADIT per Mr. Buckner's original

testimony. Please note that Mr. Buckner corrected his original testimony and now offsets

the ADIT balance with the regulatory tax assets in his revised testimony.

Please see the rebuttal testimony of Mr. Miller (pages 33-44 and Rebuttal Exhibit MAM-

7) and Mr. Warren (pages 4-25) which provides Mr. Miller's and Mr. Warren's

discussion of the correct ADITs using the FAS109 approach, and the Company's position

that the income tax expense proposed by Mr. Buckner's pre-tax income approach does

not account for the taxes being paid by the Company for the reversal of the timing difference on pre-1981 flowed-thru for rate recovery by the TRA (and/or the TN PSC), the AFUDC gross-up and changes in income tax rates, now that Mr. Buckner has recognized the existence of the regulatory tax assets as an offset to ADITs with the filing of his revised testimony in this case.

**RATE BASE** 

**Question:** 

143. Provide a reconciliation of each of the above (Trial Balance and Per Books Rate Base) for

Deferred Tax to the Total Deferred Tax of \$14,153,878 shown on Exhibit MAM-13.

Provide all supporting workpapers or reference to previously submitted workpaper.

**Response:** 

As explained in more detail in the Rebuttal Testimony of Mr. Miller (pages 38 – Q&A

middle of page – through page 40), the Company filed this case using the APB 11

approach to ADITs which includes only ADITs on the post-1980 property timing

differences (the balance sheet netting approach) instead of the gross ADITs under the

SFAS 109 approach (including the ADITS on the pre-1981 flow-thru property) which

then have to be reduced by the regulatory assets under the SFAS 109 approach for the

reversal of the SFAS 109 regulatory tax assets.

The information shown on Exhibit MAM-13 shows only the ADITs generated on post-

1980 property that are required to be normalized by the IRS, and the Company added to

that the amount of ADITs that would result from the normalization of the capitalized

repairs deduction (net of FIN 48).

Provided with this response and identified as TRA-03-Q143-ATTACHMENT 1 (an

expanded version of Rebuttal Exhibit MAM-7 that was attached to Mr. Miller's Rebuttal

Testimony) is a schedule that compares (i) the SFAS 109 approach to ADITs and the

addition to income tax expense required to reflect the reversal of the timing differences

on pre-1981 flow-through property, AFUDC gross-up, and change in tax rates that would

be required to reverse the SFAS 109 regulatory tax assets (column 1), (ii) the Company's

ADITs prepared under the APB 11 approach (column 2), (iii) the CAPD's approach in Mr. Buckner's original testimony (column 3), and (iv) the CAPD's approach in Mr. Buckner's revised testimony (column 4).

The difference in ADITs in the APB 11 approach versus the SFAS 109 approach results from the manner in which the timing differences related to pre-1981 property, the AFUDC gross-up, and the change in tax rates are reflected on the balance sheet. In addition, the impact of the reversal of the SFAS 109 regulatory tax assets are embedded in the Company's income tax calculation and they are omitted from Mr. Buckner's normalized pre-tax income tax expense approach as reflected in Schedule 7 (Exhibit 1, page 7 of 9) of his revised testimony.

Please note that in Mr. Miller's Rebuttal Testimony, at page 44, bullet #5, he recommends that the ADITs (net of the FIN 48 Reserve) in this case should be determined under the SFAS 109 approach as reflected in Rebuttal Exhibit MAM-7, column 1. This ADIT rate base reduction should only be used if, and only if, the income tax expense is determined in this case under the SFAS 109 approach, or determined under the normalized pre-tax income approach that has been proposed by the CAPD (as amended) to increase the CAPD's income tax stance by the impact of the reversal of the regulatory tax assets (timing difference on pre-1981 flow-thru property, AFUDC gross-up and tax rate changes) in the amount of \$623,832 for the current income taxes in this case. The additional income tax expense for the reversal of the SFAS 109 regulatory assets is required to be made to the CAPD's approach because those tax adjustments are not captured in the pre-tax book income, as reflected in the CAPD's income tax calculation.

At page 44 of Mr. Miller's rebuttal testimony, bullet #6, Mr. Miller indicates that if the Authority does not recognize the adjustment required to correct the CAPD's income tax expense in the amount of \$623,832 to reflect the required adjustment to the pre-tax book income approach, then the Company's ADITs as determined under the APB 11 approach should be utilized to determine the rates in this case.

Attached to this response and identified as TRA-03-Q142-ATTACHMENT 2 are the working papers and Accounting Exhibits that support the Company's determination of the \$14,153,878.01 of ADITs on post-1980 property as reflected on Exhibit MAM-13. These workpapers have previously been provided in their native format to the TRA Staff and the other parties to this case.

**Docket No. 10-00189** 

Tennessee Regulatory Authority Staff Data Request No. 3

Responsible Witness: Michael A. Miller

**RATE BASE** 

**Question:** 

144. Does the booked Accrued Deferred Income Tax amount of \$31,014,034 provided on the

trial balance for the period ending 9/30/2010 include or reflect timing differences

attributable to Post 80 booked depreciation through 9/30/2010? Please fully explain your

response.

**Response:** 

Yes. The amount of \$31,014,034 includes the ADITs attributable to both pre-1981

property and post-1980 property. As explained in the Q&A on page 38 of Mr. Miller's

rebuttal testimony, SFAS 109 requires that all ADITs (normalized for rate recovery or

flowed-thru for rate recovery) related to book/tax timing differences be reflected on the

balance sheet, but permits the regulatory assets, subject to the provisions of SFAS 71 for

the flow-thru property (pre-1981 property), so long as the reversal of those timing

differences that were previously flowed-thru in the year the timing difference occurred,

are recovered in rates over the book life of the property. The APB 11 approach (U.S.

GAAP prior to 1992) only required ADITs on the balance sheet for the property

normalized for rate recovery (post-1980 property).

Please see the response to TN-TRA-03-Q143 which also addresses this question.

**Docket No. 10-00189** 

Tennessee Regulatory Authority Staff Data Request No. 3

Responsible Witness: Michael A. Miller

**RATE BASE** 

**Question:** 

145. Provide an explanation for the differences in the amount of Accumulated Deferred Income

Taxes provided in TRA responses #58, #138 and in the General Ledger.

**Response:** 

The response to TN-TRA-03-Q142 corrects the Company's previous response to TN-

TRA-02-Q138. The Company's response to TN-TRA-03-Q142 agrees to the general

ledger. The Company will also provide a supplemental response to TRA-02-Q138.

The response to TRA-01-Q58 provided Accumulated Deferred Income Taxes for

AWWSC and AWR. The assets and liabilities of AWWSC and AWR are not reflected

on the general ledger of TAWC other than through the management fees billed to TAWC

which are billed to TAWC at cost.

**Docket No. 10-00189** 

Tennessee Regulatory Authority Staff Data Request No. 3

Responsible Witness: Michael A. Miller

**RATE BASE** 

**Question:** 

146. Please explain how the Accumulated Deferred Income Tax calculated by CAPD in the

amount of \$33,664,910 (RB-ADIT) is incorrect and why the methodology applied in

arriving at this amount should not be approved. Note: The docket file should contain any

data needed to answer this question. If not, please consult with the other party to obtain any

needed information.

**Response:** 

The ADIT of \$33,664,910 is incorrect in that it includes the FIN 48 Reserve (\$2,068,329)

which is not an ADIT as explained in the response to TN-TRA-03-Q139. In addition,

Mr. Buckner carried the full amount of \$33,664,910 as a rate base reduction in his

original testimony. The Company contends the amount of \$33,664,910 should be

reduced by the regulatory tax assets (\$8,375,977) related to the reversal of the timing

differences on pre-1981 flow-thru property, the AFUDC gross-up, and the state tax rate

changes in arriving at the rate base reduction. Mr. Buckner also reflected these same

regulatory assets in his ADIT rate base reduction provided in his revised testimony.

The only issue between the Company and the CAPD on ADITs now is limited to the FIN

48 issue. As stated in the response to TN-TRA-03-Q143, the income tax calculation as

proposed by Mr. Buckner is required to include the reversal of the SFAS 109 regulatory

assets Mr. Buckner now acknowledges exist in his revised testimony.

If the TRA should reject the adjustment the Company contends is required to be added to

the normalized pre-tax income approach for income tax expense, then the Company's

ADITs as proposed in its filing (using the APB 11 approach which does not include the

ADITs on pre-1981 flow-through property) should be used to establish the rates in this

case.
