I am very concerned about the future increase in our water rates. It is so hard to just keep my utilities turned on and to be able to pay my monthly bills now. I am a senior citizen living on a very minimal social security. I so pray that this will be taken into consideration before this increase is passed. We have seen repeat increases on our electric bills for several months in a row. I have had to wear heavy clothes in my house all winter because I could not afford to keep my house warm. Please consider this before the rate increases keep taking place. Thanks so much....Betty Crabtree...Chattanooga, TN.
