Subject: re Lynnwood Utility's request for an increase

I understand that Lynnwood has asked for another rate increase. We have a history of devious and deceptive practice with them. They tried the non profit route to sneak a fee past us which was overturned and denied. All fees were to be returned. They have not done so. Certainly nothing else should be considered from them until that obligation is completed. Now they are claiming expenses enough to justify an increase. I understand that sewage fees are usually just equal to the water bill...which makes no sense as much if not most of that bill goes on the yard and does not return through the system....regardless I hope the board looks with great disfavor on this request. We have a letter that residents have signed to protest - I was unable to get there to sign but please accept this as my objection to an unwarranted and insensitive utility increase.
