## NETWORK INTERCONNECTION

### 1 General

- 1.1 The Parties shall provide interconnection with each other's networks for the transmission and routing of telephone exchange service (Local Traffic), ISP-Bound Traffic, and exchange access (Switched Access Traffic) on the following terms:

### 2 Definitions: (For the purpose of this Attachment)

For purposes of this attachment only, the following terms shall have the definitions set forth below:

- 2.1 **Automatic Location Identification (ALI)** is a feature by which the address associated with the calling party's telephone number (ANI) is forwarded to the PSAP for display. Access to the ALI database is described in Attachment 2 to this Agreement.
- 2.2 **Automatic Number Identification (ANI)** corresponds to the seven-digit telephone number assigned by the serving local exchange carrier.
- 2.3 **AT&T Trunk Group** is defined as a one-way trunk group carrying AT&T originated traffic to be terminated by AIN/Birch.
- 2.4 **911 Service** is as described in this Attachment.
- 2.5 **Call Termination** has the meaning set forth for "termination" in 47 C.F.R. § 51.701(d).
- 2.6 **Call Transport** has the meaning set forth for "transport" in 47 C.F.R. § 51.701(c).
- 2.7 **Call Transport and Termination** is used collectively to mean the switching and transport functions from the Interconnection Point to the last point of switching.
- 2.8 **Common (Shared) Transport** is defined as the transport of the originating Party's traffic by the terminating Party over the terminating Party's common (shared) facilities between (1) the terminating Party's tandem switch and end office switch, (2) between the terminating Party's tandem switches, and/or (3) between the terminating Party's host and remote end office switches. All switches referred herein must be entered into the The Telcordia® LERG™ Routing Guide (LERG).
- 2.9 **Dedicated Interoffice Facility** is defined as a switch transport facility between a Party's Serving Wire Center and the first point of switching within the LATA on the other Party's network.
- 2.10 **End Office Switching** is defined as the function that establishes a communications path between the trunk side and line side of the End Office switch.
- 2.11 **Fiber Meet** is an interconnection arrangement whereby the Parties physically interconnect their networks via an optical fiber interface at which one Party's facilities, provisioning, and maintenance responsibility begins and the other Party's responsibility ends.

- 2.12 **Final Trunk Group** is defined as the last choice trunk group between two (2) switches for which there is no alternate route.
- 2.13 **Integrated Services Digital Network User Part (ISUP)** is a message protocol to support call set-up and release for interoffice voice connections over SS7 signaling.
- 2.14 **Interconnection Point (IP)** is the physical telecommunications equipment interface that interconnects the networks of AT&T and AIN/Birch for the exchange of telecommunications traffic between the Parties.
- 2.15 **IntraLATA Toll Traffic** is as defined in this Attachment.
- 2.16 **ISP-Bound Traffic** is as defined in this Attachment.
- 2.17 **Local Channel** is defined as a switched transport facility between a Party's Interconnection Point and the IP's Serving Wire Center.
- 2.18 **Local Traffic** is as defined in this Attachment.
- 2.19 **Public Safety Answering Point (PSAP)** is the answering location for 911 calls.
- 2.20 **Selective Routing (SR)** is a standard feature that routes an E911 call from the tandem to the designated PSAP based upon the address of the ANI of the calling party.
- 2.21 **Serving Wire Center (SWC)** is defined as the wire center owned by one Party from which the other Party would normally obtain dial tone for its IP.
- 2.22 **Signaling System 7 (SS7)/Common Channel Signaling 7 (CCS7)** is an out-of-band signaling system used to provide basic routing information, call set-up and other call termination functions. Signaling is removed from the voice channel and put on a separate data network.
- 2.23 **Tandem Switching** is defined as the function that establishes a communications path between two switching offices through a third switching office through the provision of trunk side to trunk side switching.
- 2.24 **Transit Traffic** is traffic originating on AIN/Birch's network that is switched and/or transported by AT&T and delivered to a third party's network, or traffic originating on a third party's network that is switched and/or transported by AT&T and delivered to AIN/Birch's network.
- 3 Network Interconnection**
- 3.1 This Attachment pertains only to the provision of network interconnection where AIN/Birch owns, leases from a third party or otherwise provides its own switch(es).
- 3.2 Network interconnection may be provided by the Parties at any technically feasible point within AT&T's network. Requests to AT&T for interconnection at points other than as set forth in this Attachment may be made through the Bona Fide Request/New Business Request (BFR/NBR) Process set forth in Attachment 11.

- 3.2.1 Each Party is responsible for providing, engineering and maintaining the network on its side of the IP. The IP must be located within AT&T's serving territory in the LATA in which traffic is originating. The IP determines the point at which the originating Party shall pay the terminating Party for the Call Transport and Termination of Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic. In selecting the IP, both Parties will act in good faith and select the point that is most efficient for both Parties.
- 3.2.2 Pursuant to the provisions of this Attachment, the location of the initial IP in a given LATA shall be established at any technically feasible point within AT&T's network as requested by AIN/Birch. Subject to the requirements for establishing additional IPs, as set forth below, any IPs existing prior to the Effective Date of the Agreement will be accepted as initial IPs and will not require re-grooming. When the Parties mutually agree to utilize two-way interconnection trunk groups for the exchange of Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic between each other, , the Parties shall mutually agree to the location of the IP(s). If the Parties are unable to agree to a mutual initial IP, each Party, as originating Party, shall establish a single IP in the LATA for the delivery of its originated Local Traffic, ISP-Bound Traffic, and IntraLATA Toll Traffic to the other Party for Call Transport and Termination by the terminating Party.
- 3.2.3 Additional IP(s) in a LATA may be established by mutual agreement of the Parties. Notwithstanding the foregoing, additional IP(s) in a particular LATA shall be established, at the request of either Party, when the Local Traffic and ISP-Bound Traffic exceeds eight point nine (8.9) million minutes per month for three (3) consecutive months at the proposed location of the additional IP. If AT&T denies AIN/Birch's request for interconnection at the requested location, AT&T must prove to the Commission that interconnection at that point is not technically feasible. The Parties shall establish additional IPs in a LATA upon request by AIN/Birch. AT&T will not request the establishment of an IP in a AT&T Central Office where physical or virtual collocation space is not available or where AT&T fiber connectivity is not available. When the Parties agree to utilize two-way interconnection trunk groups for the exchange of Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic, the Parties must agree to the location of the IP(s). .
- 3.3 Interconnection via Dedicated Facilities
- 3.3.1 Local Channel Facilities. As part of Call Transport and Termination, the originating Party may obtain Local Channel facilities from the terminating Party. The percentage of Local Channel facilities utilized for Local Traffic and ISP-Bound Traffic shall be determined based upon the application of the Percent Local Facility (PLF) Factor as set forth in this Attachment. The charges applied to the percentage of Local Channel facilities used for Local Traffic and ISP-Bound Traffic as determined by the PLF factor are as set forth in Exhibit A. The remaining percentage of Local Channel facilities shall be billed at AT&T's intrastate Access Services Tariff or AT&T's FCC No. 1 Tariff rates.
- 3.3.2 Dedicated Interoffice Facilities. As a part of Call Transport and Termination, the originating Party may obtain Dedicated Interoffice Facilities from the terminating Party. The percentage of Dedicated Interoffice Facilities utilized for Local Traffic and ISP-Bound Traffic shall be determined based upon the application of the PLF factor as set forth in this Attachment. The charges applied to the percentage of the Dedicated Interoffice Facilities used for Local Traffic and ISP-Bound Traffic as determined by the PLF factor are as set forth in Exhibit A. The remaining percentage of the Dedicated Interoffice Facilities shall be billed at AT&T's intrastate Access Services Tariff or AT&T's FCC No. 1 Tariff rates.

- 3.4 Fiber Meet. Notwithstanding Sections 3.2.1, 3.2.2, and 3.2.3 above, if AIN/Birch elects to establish interconnection with AT&T pursuant to a Fiber Meet Local Channel, AIN/Birch and AT&T shall jointly engineer, operate and maintain a Synchronous Optical Network (SONET) transmission system by which they shall interconnect their transmission and routing of Local Traffic and ISP-Bound Traffic via a Local Channel at either the DS1 or DS3 level. The Parties shall work jointly to determine the specific transmission system. However, AIN/Birch's SONET transmission system must be compatible with AT&T's equipment, and the Data Communications Channel (DCC) must be turned off.
- 3.4.1 Each Party, at its own expense, shall procure, install and maintain the agreed upon SONET transmission system in its network.
- 3.4.2 The Parties shall agree to a Fiber Meet point between the AT&T Serving Wire Center and the AIN/Birch Serving Wire Center. The Parties shall deliver their fiber optic facilities to the Fiber Meet point with sufficient spare length to reach the fusion splice point for the Fiber Meet point. AT&T shall, at its own expense, provide and maintain the fusion splice point for the Fiber Meet. A building type CLLI code will be established for each Fiber Meet point. All orders for interconnection facilities from the Fiber Meet point shall indicate the Fiber Meet point as the originating point for the facility.
- 3.4.3 Upon verbal request by AIN/Birch, AT&T shall allow AIN/Birch access to the fusion splice point for the Fiber Meet point for maintenance purposes on AIN/Birch's side of the Fiber Meet point.
- 3.4.4 Neither Party shall charge the other for its Local Channel portion of the Fiber Meet facility used exclusively for Local Traffic and ISP-Bound Traffic. The percentage of Local Channel facilities utilized for Local Traffic and ISP-Bound Traffic shall be determined based upon the application of the PLF factor as set forth in this Attachment. The charges applied to the percentage of Local Channel facilities used for Local Traffic and ISP-Bound Traffic as determined by the PLF factor are as set forth in Exhibit A. The remaining percentage of Local Channel facilities shall be billed at AT&T's applicable access tariff rates. Charges for switched and special access services shall be billed in accordance with the applicable AT&T intrastate Access Services Tariff and or AT&T's FCC No. 1 Tariff.

#### **4 Interconnection Trunk Group Architectures**

- 4.1 AT&T and AIN/Birch shall establish interconnecting trunk groups and trunk group configurations between networks, including the use of one-way or two-way trunks in accordance with the following provisions set forth in this Attachment. For trunking purposes, traffic will be routed based on the digits dialed by the originating end user and in accordance with the LERG.
- 4.2 AIN/Birch shall establish an interconnection trunk group(s) to at least one (1) AT&T access tandem within the LATA for the delivery of AIN/Birch's originated Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic and for the receipt and delivery of Transit Traffic. To the extent AIN/Birch desires to deliver Local Traffic, ISP-Bound Traffic, IntraLATA Toll Traffic and/or Transit Traffic to AT&T access tandems within the LATA, other than the tandems(s) to which AIN/Birch has established interconnection trunk groups, AIN/Birch shall pay the appropriate rates for Multiple Tandem Access, as described in this Attachment.

- 4.2.1 Notwithstanding the forgoing, AIN/Birch shall establish an interconnection trunk group(s) to all AT&T access and local tandems in the LATA where AIN/Birch has homed (i.e., assigned) its NPA/NXXs. AIN/Birch shall home its NPA/NXXs on the AT&T tandems that serve the exchange rate center areas to which the NPA/NXXs are assigned. The specified exchange rate center assigned to each AT&T tandem is defined in the LERG. AIN/Birch shall enter its NPA/NXX access and/or local tandem homing arrangements into the LERG.
- 4.3 Switched access traffic will be delivered to and from IXC's based on AIN/Birch's NXX access tandem homing arrangement as specified by AIN/Birch in the LERG.
- 4.4 Any AIN/Birch interconnection request that (1) deviates from the interconnection trunk group architectures as described in this Agreement, (2) affects traffic delivered to AIN/Birch from a AT&T switch, and (3) requires special AT&T switch translations and other network modifications will require AIN/Birch to submit a BFR/NBR via the BFR/NBR Process as set forth in Attachment 11.
- 4.5 Recurring and nonrecurring rates associated with interconnecting trunk groups between AT&T and AIN/Birch are set forth in Exhibit A. To the extent a rate associated with the interconnecting trunk group is not set forth in Exhibit A, the rate shall be as set forth in the appropriate AT&T intrastate Access Services Tariff or AT&T's FCC No. 1 Tariff.
- 4.6 For two-way trunk groups that carry only both Parties' Local Traffic, the Parties shall be compensated at fifty percent (50%) of the nonrecurring and recurring rates for dedicated trunks and DS1 facilities. AIN/Birch shall be responsible for ordering and paying for any two-way trunks carrying Transit Traffic.
- 4.7 All trunk groups will be provisioned as SS7 capable where technically feasible. If SS7 is not technically feasible, multi-frequency (MF) protocol signaling shall be used.
- 4.8 In cases where AIN/Birch is also an IXC, the IXC's Feature Group D (FG D) trunk group(s) must remain separate from the local interconnection trunk group(s).
- 4.9 Each Party shall order interconnection trunks and trunk group including trunk and trunk group augmentations via the Access Service Request (ASR) process. A Firm Order Confirmation (FOC) shall be returned to the ordering Party, after receipt of a valid, error free ASR, within the timeframes set forth in each state's applicable Performance Measures. Notwithstanding the foregoing, blocking situations and projects shall be managed through AT&T's Carrier Interconnection Switching Center (CISC) Project Management Group and AIN/Birch's equivalent trunking group, and FOCs for such orders shall be returned in the timeframes applicable to the project. A project is defined as (1) a new trunk group or (2) a request for more than one hundred ninety-two (192) trunks on a single or multiple group(s) in a given AT&T local calling area.
- 4.10 Interconnection Trunk Groups for Exchange of Local Traffic and Transit Traffic
- 4.10.1 Upon mutual agreement of the Parties in a joint planning meeting, the Parties shall exchange Local Traffic on two-way interconnection trunk group(s) with the quantity of trunks being mutually determined and the provisioning being jointly coordinated. Furthermore, the Parties shall agree upon the IP(s) for two-way interconnection trunk groups transporting both Parties' Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic. AIN/Birch shall order such two-way trunks via the

ASR process. AT&T will use the Trunk Group Service Request (TGSR) to request changes in trunking. Furthermore, the Parties shall jointly review trunk performance and forecasts in accordance with Section 6 below. The Parties' use of two-way interconnection trunk groups for the transport of Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic between the Parties does not preclude either Party from establishing additional one-way interconnection trunks for the delivery of its originated Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic to the other Party. Other trunk groups for operator services, directory assistance and intercept must be established pursuant to AT&T's intrastate Access Services Tariff and/or AT&T's FCC No. 1 Tariff.

- 4.10.2 AT&T and AIN/Birch will share the facility costs for two-way local interconnection trunks such that each Party is responsible for fifty percent (50%) of the facility costs. AIN/Birch will be responsible for all facility costs associated with its one-way local interconnection trunks terminating to AT&T. AT&T will be responsible for all facility costs associated with its one-way local interconnection trunks terminating to AIN/Birch.
- 4.10.3 AT&T Access Tandem Interconnection. AT&T Access Tandem interconnection at a single Access Tandem provides access to those End Offices subtending that access tandem (Intratandem Access). Access Tandem interconnection is available for any of the following access tandem architectures:
- 4.10.3.1 Basic Architecture. In the basic architecture, AIN/Birch's originating Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic and originating and terminating Transit Traffic is transported on a single two-way trunk group between AIN/Birch and AT&T Access Tandem(s) within a LATA to provide Intratandem Access. This trunk group carries Transit Traffic between AIN/Birch and ICOs, IXCs, other CLECs, CMRS providers that have a Meet Point Billing arrangement with AT&T, and other network providers with which AIN/Birch desires to exchange traffic. This trunk group also carries AIN/Birch originated Transit Traffic transiting a single AT&T Access Tandem destined to third party tandems such as an ICO tandem or other CLEC tandem. AT&T originated Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic is transported on a separate single one-way trunk group terminating to AIN/Birch. The LERG contains current routing and tandem serving arrangements. The basic Architecture is illustrated in Exhibit B.
- 4.10.3.2 One-Way Trunk Group Architecture. In one-way trunk group architecture, the Parties interconnect using three (3) separate trunk groups. A one-way trunk group provides Intratandem Access for AIN/Birch-originated Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic destined for AT&T end users. A second one-way trunk group carries AT&T-originated Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic destined for AIN/Birch end users. A two-way trunk group provides Intratandem Access for AIN/Birch's originating and terminating Transit Traffic. This trunk group carries Transit Traffic between AIN/Birch and ICOs, IXCs, other CLECs, CMRS providers that have a Meet Point Billing arrangement with AT&T, and other network providers with which AIN/Birch exchanges traffic. This trunk group also carries AIN/Birch originated Transit Traffic transiting a single AT&T Access Tandem destined to third party tandems such as an ICO tandem or other CLEC tandem. AT&T originated Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic is transported on a separate single one-way trunk group terminating to AIN/Birch. The LERG contains current routing and tandem serving arrangements. The one-way trunk group architecture is illustrated in Exhibit C.

- 4.10.3.3 Two-Way Trunk Group Architecture. The two-way trunk group Architecture establishes one (1) two-way trunk group to provide Intratandem Access for the exchange of Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic between AIN/Birch and AT&T. In addition, a separate two-way transit trunk group must be established for AIN/Birch's originating and terminating Transit Traffic. This trunk group carries Transit Traffic between AIN/Birch and ICOs, IXCs, other CLECs, CMRS providers that have a Meet Point Billing arrangement with AT&T, and other network providers with which AIN/Birch exchanges traffic. This trunk group also carries AIN/Birch originated Transit Traffic transiting a single AT&T Access Tandem destined to third party tandems such as an ICO tandem or other CLEC tandem. AT&T originated traffic may, in order to prevent or remedy traffic blocking situations, be transported on a separate single one-way trunk group terminating to AIN/Birch. However, where AIN/Birch is responsive in a timely manner to AT&T's transport needs for its originated traffic, AT&T originating traffic will be placed on the two-way Local Traffic trunk group carrying ISP-Bound Traffic and IntraLATA Toll Traffic. The LERG contains current routing and tandem serving arrangements. The two-way trunk group architecture is illustrated in Exhibit D.
- 4.10.3.4 Supergroup Architecture. In the supergroup architecture, the Parties' Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic and AIN/Birch's Transit Traffic are exchanged on a single two-way trunk group between AIN/Birch and AT&T to provide Intratandem Access to AIN/Birch. This trunk group carries Transit Traffic between AIN/Birch and ICOs, IXCs, other CLECs, CMRS providers that have a Meet Point Billing arrangement with AT&T, and other network providers with which AIN/Birch desires to exchange traffic. This trunk group also carries AIN/Birch originated Transit Traffic transiting a single AT&T Access Tandem destined to third party tandems such as an ICO tandem or other CLEC tandem. AT&T originated traffic may, in order to prevent or remedy traffic blocking situations, be transported on a separate single one-way trunk group terminating to AIN/Birch. However, where AIN/Birch is responsive in a timely manner to AT&T's transport needs for its originated traffic, AT&T originating traffic will be placed on the Supergroup. Other trunk groups for operator services, directory assistance, emergency services and intercept must be established pursuant to the applicable AT&T tariff if service is requested. The LERG contains current routing and tandem serving arrangements. The supergroup architecture is illustrated in Exhibit E.
- 4.10.3.5 Multiple Tandem Access (MTA) Interconnection
- 4.10.3.5.1 Where AIN/Birch does not choose access tandem interconnection at every AT&T Access Tandem within a LATA, AIN/Birch must utilize AT&T's MTA interconnection. To utilize MTA AIN/Birch must establish an interconnection trunk group(s) at a minimum of one (1) AT&T Access Tandem within each LATA as required. AT&T will route AIN/Birch's originated Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic for LATA wide transport and termination. AIN/Birch must also establish an interconnection trunk group(s) at all AT&T Access Tandems where AIN/Birch NXXs are homed as described in Section 4.2.1 above. If AIN/Birch does not have NXXs homed at any particular AT&T Access Tandem within a LATA and elects not to establish an interconnection trunk group(s) at such AT&T Access Tandem, AIN/Birch can order MTA in each AT&T Access Tandem within the LATA where it does have an interconnection trunk group(s) and AT&T will terminate AIN/Birch's Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic to end users served through those AT&T Access Tandems where AIN/Birch does not have an interconnection trunk group(s). MTA shall be provisioned in accordance with AT&T's Ordering Guidelines.

- 4.10.3.5.2 AIN/Birch may also utilize MTA to route its originated Transit Traffic; provided, however, that MTA may not be utilized to route switched access traffic that transits the AT&T network to an IXC. Switched access traffic originated by or terminated to AIN/Birch will be delivered to and from IXCs based on AIN/Birch's NXX access tandem homing arrangement as specified by AIN/Birch in the LERG.
- 4.10.3.5.3 Compensation for MTA shall be at the applicable tandem switching and transport charges specified in Exhibit A and shall be billed in addition to any Call Transport and Termination charges.
- 4.10.3.5.4 To the extent AIN/Birch does not purchase MTA in a LATA served by multiple Access Tandems, AIN/Birch must establish an interconnection trunk group(s) to every Access Tandem in the LATA to serve the entire LATA. To the extent AIN/Birch routes its traffic in such a way that utilizes AT&T's MTA service without properly ordering MTA, AIN/Birch shall pay AT&T the associated MTA charges.
- 4.10.4 Local Tandem Interconnection
- 4.10.4.1 Local Tandem Interconnection arrangement allows AIN/Birch to establish an interconnection trunk group(s) at AT&T local tandems for: (1) the delivery of AIN/Birch-originated Local Traffic and ISP-Bound Traffic transported and terminated by AT&T to AT&T End Offices served by those AT&T local tandems, and (2) for local Transit Traffic transported by AT&T for third party network providers who have also established an interconnection trunk group(s) at those AT&T local tandems.
- 4.10.4.2 When a specified local calling area is served by more than one (1) AT&T local tandem, AIN/Birch must designate a "home" local tandem for each of its assigned NPA/NXXs and establish trunk connections to such local tandems. Additionally, AIN/Birch may choose to establish an interconnection trunk group(s) at the AT&T local tandems where it has no codes homing but is not required to do so. AIN/Birch may deliver Local Traffic and ISP-Bound Traffic to a "home" AT&T local tandem that is destined for other AT&T or third party network provider end offices subtending other AT&T local tandems in the same local calling area where AIN/Birch does not choose to establish an interconnection trunk group(s). It is AIN/Birch's responsibility to enter its own NPA/NXX local tandem homing arrangements into the LERG either directly or via a vendor in order for other third party network providers to determine appropriate traffic routing to AIN/Birch's codes. Likewise, AIN/Birch shall obtain its routing information from the LERG.
- 4.10.4.3 Notwithstanding establishing an interconnection trunk group(s) to AT&T's local tandems, AIN/Birch must also establish an interconnection trunk group(s) to AT&T Access Tandems within the LATA on which AIN/Birch has NPA/NXXs homed for the delivery of Interexchange Carrier Switched Access and toll traffic, and traffic to Type 2A CMRS connections located at the Access Tandems. AT&T shall not switch SWA traffic through more than one AT&T access tandem. SWA, Type 2A CMRS or toll traffic routed to the local tandem in error will not be backhauled to the AT&T Access Tandem for completion. (Type 2A CMRS interconnection is defined in Section A35 of AT&T's GSST).
- 4.10.4.4 AT&T's provisioning of Local Tandem Interconnection assumes that AIN/Birch has executed the necessary local interconnection agreements with the other third party network providers subtending those local tandems as required by the Act.

#### 4.10.5 Direct End Office-to-End Office Interconnection

4.10.5.1 Direct End Office-to-End Office one-way or two-way interconnection trunk groups allow for the delivery of a Party's originating Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic to the terminating Party on a direct end office-to-end office basis.

4.10.5.2 The Parties shall utilize direct end office-to-end office trunk groups under any one (1) of the following conditions:

4.10.5.2.1 Tandem Exhaust. If a tandem through which the Parties are interconnected is unable to, or is forecasted to be unable to support additional traffic loads for any period of time, the Parties will mutually agree on an end office trunking plan that will alleviate the tandem capacity shortage and ensure completion of traffic between AIN/Birch and AT&T.

4.10.5.2.2 Traffic Volume. To the extent either Party has the capability to measure the amount of traffic between AIN/Birch's switch and a AT&T End Office and where such traffic exceeds or is forecasted to exceed a single DS1 of traffic per month, then the Parties shall install and retain direct end office trunking sufficient to handle such traffic volumes. Either Party will install additional capacity between such points when overflow traffic exceeds or is forecasted to exceed a single DS1 of traffic per month. In the case of one-way trunking, additional trunking shall only be required by the Party whose trunking has achieved the preceding usage threshold.

4.10.5.2.3 Mutual Agreement. The Parties may install direct end office trunking upon mutual agreement in the absence of conditions (1) or (2) above.

#### 4.10.6 Transit Traffic Trunk Group

4.10.6.1 Transit Traffic trunks can either be two-way trunks or two (2) one-way trunks ordered by AIN/Birch to deliver and receive Transit Traffic. Establishing Transit Traffic trunks at AT&T Access and Local Tandems provides Intratandem Access to the third parties also interconnected at those tandems. AIN/Birch shall be responsible for all recurring and nonrecurring charges associated with Transit Traffic trunks and facilities.

#### 4.10.6.2 Toll Free Traffic

4.10.6.2.1 If AIN/Birch chooses AT&T to perform the Service Switching Point (SSP) Function (i.e., handle Toll Free database queries) from AT&T's switches, all AIN/Birch originating Toll Free traffic will be routed over the Transit Traffic Trunk Group and shall be delivered using GR-394 format. Carrier Code "0110" and Circuit Code (to be determined for each LATA) shall be used for all such calls.

4.10.6.2.2 AIN/Birch may choose to perform its own Toll Free database queries from its switch. In such cases, AIN/Birch will determine the nature (local/intraLATA/interLATA) of the Toll Free call (local/IntraLATA/InterLATA) based on the response from the database. If the call is a AT&T local or intraLATA Toll Free call, AIN/Birch will route the post-query local or IntraLATA converted ten (10)-digit local number to AT&T over the local or intraLATA trunk group. If the call is a third party (ICO, IXC, CMRS or other CLEC) local or intraLATA Toll Free call, AIN/Birch will route the post-query local or intraLATA converted ten (10)-digit local number to AT&T over the Transit Traffic Trunk Group and AIN/Birch shall provide to AT&T a Toll Free billing record when appropriate. If the query

reveals the call is an interLATA Toll Free call, AIN/Birch will route the post-query interLATA Toll Free call (1) directly from its switch for carriers interconnected with its network or (2) over the Transit Traffic Trunk Group to carriers that are not directly connected to AIN/Birch's network but that are connected to AT&T's Access Tandem.

- 4.10.6.2.3 All post-query Toll Free calls for which AIN/Birch performs the SSP function, if delivered to AT&T, shall be delivered using GR-394 format for calls destined to IXCs, and GR-317 format for calls destined to end offices that directly subtend a AT&T Access Tandem within the LATA.

## **5 Network Design And Management For Interconnection**

- 5.1 Network Management and Changes. The Parties will exchange toll-free maintenance contact numbers and escalation procedures. The Parties will provide public notice of network changes in accordance with applicable federal and state rules and regulations.
- 5.2 Interconnection Technical Standards. The interconnection of all networks will be based upon accepted industry/national guidelines for transmission standards and traffic blocking criteria. Interconnecting facilities shall conform, at a minimum, to the telecommunications industry standard of DS1 pursuant to Telcordia Standard No. GR-NWT-00499. Where AIN/Birch chooses to utilize SS7 signaling, also known as CCS7, SS7 connectivity is required between the AIN/Birch switch and the AT&T STP. AT&T will provide SS7 signaling using Common Channel Signaling Access Capability in accordance with the technical specifications set forth in the AT&T Guidelines to Technical Publication, GR-905-Core and ATT-TR-NIS-000-000-001. Facilities of each Party shall provide the necessary on-hook, off-hook answer and disconnect supervision and shall provide calling number ID (Calling Party Number) when technically feasible.
- 5.3 Network Management Controls. Both Parties will work cooperatively to apply sound network management principles by invoking appropriate network management controls (e.g., call gapping) to alleviate or prevent network congestion.

## **6 Forecasting for Trunk Provisioning**

- 6.1 Unless the parties have developed an existing forecasting arrangement, within six (6) months after execution of this Agreement, AIN/Birch shall provide an initial interconnection trunk group forecast for each LATA in which it plans to provide service within AT&T's region. Upon receipt of AIN/Birch's forecast, the Parties shall conduct a joint planning meeting to develop a joint interconnection trunk group forecast. Each forecast provided under this Section shall be deemed Confidential Information under the General Terms and Conditions.
- 6.1.1 At a minimum, the forecast shall include the projected quantity of Transit Trunks, AIN/Birch-to-AT&T one-way trunks (AIN/Birch Trunks), AT&T-to-AIN/Birch one-way trunks (AT&T Trunk Groups) and/or two-way interconnection trunks, if the Parties have agreed to interconnect using two-way trunking to transport the Parties' Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic. The quantities shall be projected for a minimum of six (6) months and shall include an estimate of the current year plus the next two (2) years total forecasted quantities. The Parties shall mutually develop AT&T Trunk Groups and/or two-way interconnection trunk forecast quantities.

- 6.1.2 All forecasts shall include, at a minimum, Access Carrier Terminal Location (ACTL), trunk group type (e.g., local/intraLATA toll, Transit, Operator Services, 911, etc.), A location/Z location (CLLI codes for AIN/Birch location and AT&T location where the trunks shall terminate), interface type (e.g., DS1), Direction of Signaling, Trunk Group Number, if known, (commonly referred to as the 2-6 code) and forecasted trunks in service each year (cumulative).
- 6.2 Once initial interconnection trunk forecasts have been developed, AIN/Birch shall continue to provide interconnection trunk forecasts at mutually agreeable intervals. AIN/Birch shall use its best efforts to make the forecasts as accurate as possible based on reasonable engineering criteria. The Parties shall continue to develop Reciprocal Trunk Group and/or two-way interconnection trunk forecasts as described in Section 6.1.1 above.
- 6.3 The submission and development of interconnection trunk forecasts shall not replace the ordering process for local interconnection trunks. Each Party shall exercise its best efforts to provide the quantity of interconnection trunks mutually forecasted. However, the provision of the forecasted quantity of interconnection trunks is subject to trunk terminations and facility capacity existing at the time the trunk order is submitted. Furthermore, the receipt and development of trunk forecasts does not imply any liability for failure to perform if capacity (trunk terminations or facilities) is not available for use at the forecasted time.
- 6.4 Trunk Utilization
- 6.4.1 For Final Trunk Groups AT&T and AIN/Birch shall monitor traffic on each Final Trunk Group that is ordered and installed. The Parties agree that the Final Trunk Groups will be utilized at sixty percent (60%) of the time consistent busy hour utilization level within ninety (90) days of installation. The Parties agree that the Final Trunk Groups will be utilized at seventy-five percent (75%) of the time consistent busy hour and that the high usage trunk groups will be utilized at ninety five percent (95%) of the time consistent busy hour utilization level within 180 calendar days of installation. Any Final Trunk Group not meeting the minimum thresholds set forth in this Section are defined as "under-utilized" trunks. Subject to Section 6.4., disconnects will not be processed to reduce trunks that would cause utilization to be more than seventy-five percent (75%). Any AT&T Final Trunk Group not meeting the minimum thresholds set forth in this Section are defined as "under-utilized" trunks. Subject to Section 6.4.3 below, AT&T may disconnect any under-utilized Final Trunk Groups and AIN/Birch shall refund to AT&T the associated nonrecurring and recurring trunk and facility charges paid by AT&T, if any.
- 6.4.2 Either Party may notify the other of any under-utilized Final Trunk Groups and the number of such trunk groups that Party wishes to disconnect. The requesting Party will provide supporting information either by email or facsimile to the other Party who will either agree or disagree with the disconnection request within seven (7) business days. If the other Party disagrees with the disconnection request, it shall reply with such supporting information as expected traffic volumes (including traffic volumes generated due to Local Number Portability) and the timeframes within which it expects to need such trunks. The Parties will also discuss whether or not agreement can be reached on the number of Final Trunk Groups to be removed, if any. If no agreement can be reached, either Party may issue disconnect orders to the other Party. The due date of these orders will be four (4) weeks after one Party was first notified by the other in writing of the under-utilization of the trunk groups.

- 6.4.3 If either Party observes that a Final Trunk Group is exceeding its designed call carrying capacity, the Parties shall immediately augment the over-utilized Final Trunk Group as soon as possible in order to minimize the impact on customers. In order to prevent or remedy traffic blocking situations, a Party may transport traffic on a separate single one-way trunk group terminating to the other Party. To the extent that any interconnection trunk group is utilized at a time-consistent busy hour of eighty percent (80%) or greater, the Parties may review the trunk groups and, if necessary, shall negotiate in good faith for the installation of augmented facilities.

## **7 Local Dialing Parity**

- 7.1 AT&T and AIN/Birch shall provide local and toll dialing parity, as defined in FCC rules and regulations, with no unreasonable dialing delays. Dialing parity shall be provided for all originating Telecommunications Services that require dialing to route a call.

## **8 Interconnection Compensation**

- 8.1 Compensation for Call Transport and Termination for Local Traffic, ISP-Bound Traffic and IntraLATA Toll Traffic
- 8.1.1 For the purposes of this Attachment and for intercarrier compensation for Local Traffic exchanged between the Parties pursuant to this Attachment, Local Traffic is defined as any telephone call that originates from one Party's customer located in one exchange and terminates to the other Party's customer in either the same exchange, or other local calling area associated with the originating calling party's exchange as defined and specified in Section A3 of AT&T's GSST.
- 8.1.1.1 Additionally, Local Traffic includes any cross boundary, voice-to-voice intrastate, interLATA or interstate, interLATA calls established as a local call by the ruling regulatory body.
- 8.1.2 For purposes of this Attachment and for intercarrier compensation for ISP-Bound Traffic exchanged between the Parties, ISP-Bound Traffic is defined as calls to an information service provider or Internet Service Provider (ISP) that are dialed by using a local dialing pattern (seven (7) or ten (10) digits) by a calling party in one (1) exchange to an ISP server or modem in either the same exchange or other local calling area associated with the originating exchange as defined and specified in Section A3 of AT&T's GSST. ISP-Bound Traffic is not Local Traffic subject to reciprocal compensation, but instead is information access traffic subject to the FCC's jurisdiction.
- 8.1.3 Neither Party shall pay compensation to the other Party (defined as "Bill and Keep") for per minute of use rate elements as set forth in Exhibit A associated with the Call Transport and Termination of Local Traffic or ISP-Bound Traffic so long as such traffic between the Parties remains in balance in accordance with this Section 8.1.3.
- 8.1.3.1 The Parties agree that Local Traffic and ISP-Bound Traffic exchanged between the Parties will be subject to Bill and Keep as the method of intercarrier compensation provided that Local Traffic and ISP-Bound Traffic exchanged between the Parties is in balance within +/- 5% of equilibrium (50%).
- 8.1.3.1.1 The calculation for determining whether traffic is in balance will be based on the difference between the Local Traffic and ISP-Bound Traffic originated by each Party's end users terminated to the other

Party's End Users, divided by the sum of both Parties' end users' terminated Local Traffic, and ISP-Bound Traffic, multiplied by 100.

- 8.1.3.2 In the event one Party determines the Local Traffic and ISP-Bound Traffic, originated and terminated by the Parties, is out-of-balance by more than 5% per month for three (3) consecutive months, then such Party will provide written notice to the other Party. Upon written notice, the Parties will have thirty (30) days to negotiate new terms. The requesting Party will provide supporting usage data for the three (3) consecutive months used to determine the Local Traffic and ISP-Bound Traffic is out-of-balance to the other Party. If the Parties are unable to agree on new terms within thirty (30) days of receipt of written notice, then the terms in Sections 8.1.4-8.1.6 below will apply until such new terms have been agreed upon and an amendment reflecting those terms is approved by each respective Commission. In the event that Sections 8.1.4-8.1.6 become applicable, the effective date of those terms will begin with the second billing cycle following receipt of such notice.
- 8.1.4 Notwithstanding the definitions of Local Traffic and ISP-Bound Traffic above, and pursuant to the FCC's Order on Remand and Report and Order in CC docket 99-68 released April 27, 2001 (ISP Order on Remand), AT&T and AIN/Birch agree to the rebuttable presumption that all combined Local and ISP-Bound Traffic that exceeds a 3:1 ration of terminating to originating traffic on a statewide basis shall be considered ISP-Bound Traffic for compensation purposes. AT&T and AIN/Birch further agree to the rebuttable presumption that all combined Local and ISP-Bound Traffic that does not exceed a 3:1 ration of terminating to originating traffic on a statewide basis shall be considered Local Traffic for compensation purposes. Either Party has the right to rebut the 3:1 ISP-Bound Traffic presumption by identifying the actual ISP-Bound Traffic by any means mutually agreed by the Parties, or by any method approved by the Commission. If a Party seeking to rebut the presumption takes appropriate action at the Commission pursuant to Section 252 of the Act and the Commission agrees that such Party has rebutted the presumption, the methodology and/or means approved by the Commission for use in determining the ration shall be utilized by the Parties as of the date of the Commission approval and, in addition, shall be utilized to determine the appropriate true-up as described below. During the pendency of any such proceedings to rebut the presumption, the Parties will remain obligated to pay the reciprocal compensation rates set forth in Section 8.1.5 for Local Traffic, and the rates set forth in Section 8.1.6 for ISP-Bound Traffic. ISP-Bound Traffic is subject to a true-up upon the conclusion of such proceedings. Such true-up shall be retroactive back to the date a Party first sought appropriate relief from the Commission.
- 8.1.5 The Parties shall compensate each other at the appropriate elemental rates set forth in Exhibit A1 for the Call Transport and Termination of Local Traffic. AIN/Birch will only be paid End Office rate elements.
- 8.1.6 The Parties shall compensate each other at the composite rate of \$0.0007 for the Call Transport and Termination of ISP-Bound Traffic.
- 8.1.7 The appropriate elemental rates set forth in Exhibit A shall apply for Transit Traffic as described in this Attachment and for MTA as described in this Attachment.
- 8.1.8 Neither Party shall represent Switched Access Traffic as Local Traffic or ISP-Bound Traffic for purposes of determining compensation for the call. If AIN/Birch delivers Switched Access Traffic to AT&T for termination in violation of this Section, AT&T shall charge AIN/Birch terminating switched access charges as set forth in AT&T's Intrastate Access Services Tariff and/or AT&T's FCC No. 1

Tariff, as appropriate. Additionally, such delivery of traffic shall constitute improper use of AT&T facilities as set forth in Section 2.5 of the General Terms and Conditions of this Agreement.

- 8.1.9 IntraLATA Toll Traffic is defined as all traffic, regardless of transport protocol method, that originates and terminates within a single LATA that is not Local Traffic or ISP-Bound traffic under this Attachment.
- 8.1.9.1 For terminating its intraLATA toll traffic on the other Party's network, the originating Party will pay the terminating Party the terminating Party's current intrastate or interstate, whichever is appropriate, terminating switched access tariff rates (but such compensation shall not exceed the compensation contained in AT&T's tariff in whose exchange area the End User is located) as filed and in effect with the FCC or appropriate Commission. The appropriate charges will be determined by the routing of the call. Additionally, if one (1) Party is the other Party's customer's presubscribed interexchange carrier or if one (1) Party's customer uses the other Party as an interexchange carrier on a 101XXXX basis, the originating party will charge the other Party the appropriate originating switched access tariff rates as set forth in the originating Party's intrastate or interstate Access Services Tariff (but such compensation shall not exceed the compensation contained in AT&T's tariff in whose exchange area the End User is located) as filed and in effect with the FCC or appropriate Commission.
- 8.1.10 A Primary Toll Carrier (PTC) is a company that provides IntraLATA Toll Traffic Service for its own End User customers and potentially for a Third Party ILEC's End User customers. In this ILEC arrangement, the PTC would receive the ILEC End User IntraLATA toll traffic revenues. In AT&T Georgia, AT&T Indiana, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T Nevada, AT&T Oklahoma, AT&T South Carolina and/or AT&T Tennessee wherein PTC arrangements are mandated, and AT&T Georgia, AT&T Indiana, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T Nevada, AT&T Oklahoma, AT&T South Carolina, and/or AT&T Tennessee is functioning as the PTC for a Third Party ILEC's End User customers, the following provisions apply to the IntraLATA toll traffic which is subject to the PTC arrangement:
- 8.1.10.1 AT&T Indiana, AT&T Nevada, and/or AT&T Oklahoma shall deliver such IntraLATA toll traffic that originated from that Third Party ILEC and terminated to AIN/Birch as the terminating carrier in accordance with the terms and conditions of such PTC arrangement mandated by the respective state Commission. AT&T Indiana, AT&T Nevada, and/or AT&T Oklahoma shall pay AIN/Birch on behalf of the originating Third Party ILEC for the termination of such IntraLATA toll traffic at the terminating switched access rates as set forth in AIN/Birch's intrastate access service tariff, but such compensation shall not exceed the compensation contained in the AT&T intrastate access service tariff in the respective state.
- 8.1.10.2 AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T South Carolina, and/or AT&T Tennessee shall deliver such IntraLATA toll traffic that originated from that third Party ILEC and terminated to AIN/Birch as the terminating carrier in accordance with the terms and conditions of such PTC arrangement mandated by the respective state Commission. Where AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T South Carolina, and/or AT&T Tennessee is functioning as the PTC for a Third Party ILEC's End User customers, the following provisions apply to the minutes of use terminating to AIN/Birch. AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T South Carolina, and/or AT&T Tennessee and AIN/Birch will work cooperatively to develop a percentage of the amount of state specific PTC ILEC originated

intraLATA toll minutes of use that are within the state specific total ILEC originated minutes of use reflected in the monthly EMI 11-01-01 records provided to AIN/Birch by AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T South Carolina, and/or AT&T Tennessee. AIN/Birch will apply this state specific percentage against the state specific total ILEC originated EMI 11-01-01 minutes of use each month to determine the amount of PTC intraLATA toll minutes of use for which AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T South Carolina, and/or AT&T Tennessee will compensate AIN/Birch. Such percentage will be updated no more than twice each year. AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T South Carolina, and/or AT&T Tennessee will compensate AIN/Birch for this PTC traffic as it would for AT&T originated traffic as set forth in AIN/Birch's Interconnection Agreement with AT&T.

- 8.1.10.3 AT&T Georgia, AT&T Indiana, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T Nevada, AT&T Oklahoma, AT&T South Carolina, and/or AT&T Tennessee shall deliver such IntraLATA toll traffic that originated from AIN/Birch and terminated to Third Party ILEC in accordance with the terms and conditions of such PTC arrangement mandated by the respective state Commission. AIN/Birch shall pay AT&T Georgia, AT&T Indiana, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T Nevada, AT&T Oklahoma, AT&T South Carolina, and/or AT&T Tennessee for the use of its facilities at the rates set forth in AT&T's intrastate access service tariff in the respective state. AIN/Birch shall pay the ILEC directly for the termination of such traffic originated from AIN/Birch.
- 8.1.11 If either Party assigns NPA/NXXs to specific AT&T rate centers within the LATA and assigns numbers from those NPA/NXXs to customers physically located outside of that LATA, the other Party's traffic originating from within the LATA where the NPA/NXXs are assigned and delivered to a customer physically located outside of such LATA, shall not be deemed Local Traffic and shall be exchanged by the Parties on a bill and keep basis..
- 8.2 Jurisdictional Reporting
- 8.2.1 Percent Local Use (PLU). Each Party shall report to the other a PLU factor. The application of the PLU will determine the amount of local or ISP-Bound minutes to be billed to the other Party. Each Party shall update its PLU on the first of January, April, July and October of the year and shall send it to the other Party to be received no later than thirty (30) days after the first of each such month based on local and ISP-Bound usage for the past three (3) months ending the last day of December, March, June and September, respectively. Requirements associated with PLU calculation and reporting shall be as set forth in AT&T's Jurisdictional Factors Reporting Guide.
- 8.2.2 Percent Local Facility (PLF). Each Party shall report to the other a PLF factor. The application of the PLF will determine the portion of switched dedicated transport to be billed per the local jurisdiction rates. The PLF shall be applied to Multiplexing, Local Channel and Interoffice Channel Switched Dedicated Transport utilized in the provision of local interconnection trunks. Each Party shall update its PLF on the first of January, April, July and October of the year and shall send it to the other Party to be received no later than thirty (30) days after the first of each such month to be effective the first bill period the following month, respectively. Requirements associated with PLF calculation and reporting shall be as set forth in AT&T's Jurisdictional Factors Reporting Guide.
- 8.2.3 Percent Interstate Usage (PIU). Each Party shall report to the other the projected PIU factors, including but not limited to PIU associated with facilities (PIUE) and Terminating PIU (TPIU) factors. The application of the PIU will determine the respective interstate traffic percentages to be billed at

AT&T's FCC No. 1 Tariff rates. All jurisdictional report requirements, rules and regulations for Interexchange Carriers specified in AT&T's intrastate Access Services Tariff will apply to AIN/Birch. After interstate and intrastate traffic percentages have been determined by use of PIU procedures, the PLU and PLF factors will be used for application and billing of local traffic and facilities. The intrastate toll traffic shall be billed at AT&T's intrastate Access Services Tariff rates. Each Party shall update its PIUs on the first of January, April, July and October of the year and shall send it to the other Party to be received no later than thirty (30) days after the first of each such month, for all services showing the percentages of use for the past three (3) months ending the last day of December, March, June and September. Additional requirements associated with PIU calculations and reporting shall be as set forth in AT&T's Jurisdictional Factors Reporting Guide.

- 8.2.4 Notwithstanding the provisions in Sections 8.2.1, 8.2.2, and 8.2.3 above, where AT&T has message recording technology that identifies the jurisdiction of traffic terminated as defined in this Agreement, such information shall, at AT&T's option, be utilized to determine the appropriate jurisdictional reporting factors (i.e., PLU, PIU, and/or PLF), in lieu of those provided by AIN/Birch. In the event that AT&T opts to utilize its own data to determine jurisdictional reporting factors, AT&T shall notify AIN/Birch at least fifteen (15) days prior to the beginning of the calendar quarter in which AT&T will begin to utilize its own data.
- 8.2.5 Audits. On thirty (30) days written notice, each Party must provide the other the ability and opportunity to conduct an annual audit to ensure the proper billing of traffic. AT&T and AIN/Birch shall retain records of call detail for a minimum of nine (9) months from which the PLU, PLF and/or PIU can be ascertained. The audit shall be conducted during normal business hours at an office designated by the Party being audited. Audit requests shall not be submitted more frequently than one (1) time per calendar year. Audits shall be performed by an independent auditor paid for by the Party requesting the audit. The audited factor (PLF, PLU and/or PIU) shall be adjusted based upon the audit results and shall apply to the usage for the audited period through the time period when the audit is completed. If, as a result of an audit, either Party is found to have overstated the PLF, PLU and/or PIU by twenty percentage points (20%) or more, that Party shall reimburse the auditing party for the cost of the audit.
- 8.3 Compensation for IntraLATA 8XX Traffic. AIN/Birch shall pay the appropriate switched access charges set forth in the AT&T's intrastate Access Services tariff and/or AT&T's FCC No. 1 Tariff. AIN/Birch will pay AT&T the database query charge as set forth in the applicable AT&T intrastate Access Services Tariff and/or AT&T's FCC No. 1 Tariff. AIN/Birch will be responsible for any applicable Common Channel Signaling (SS7) charges.
- 8.3.1 Records for 8XX Billing. Where technically feasible, each Party will provide to the other Party the appropriate records, in accordance with industry standards, necessary for billing intraLATA 8XX providers. The records provided will be in a standard EMI format.
- 8.3.2 8XX Toll Free Dialing Ten Digit Screening Service (8XX TFD). AT&T's provision of 8XX TFD to AIN/Birch requires interconnection from AIN/Birch to AT&T's 8XX Signal Channel Point. Such interconnections shall be established pursuant to AT&T's Common Channel Signaling Interconnection Guidelines and Telcordia's CCS Network Interface Specification document, TR-TSV-000905. AIN/Birch shall establish SS7 interconnection at the AT&T LSTPs serving the AT&T 8XX Signal Channel Points that AIN/Birch desires to query. The terms and conditions for 8XX TFD are set out in the appropriate AT&T Access Services Tariff.

#### 8.4 Mutual Provision of Switched Access Service

- 8.4.1 Switched Access Traffic. Switched Access Traffic is described as telephone calls requiring local transmission or switching services for the purpose of the origination or termination of Telephone Toll Service. Switched Access Traffic includes, but is not limited to, the following types of traffic: Feature Group A, Feature Group B, Feature Group C, Feature Group D, toll free access (e.g., 8XX), 900 access and their successors. Additionally, any PSTN interexchange telecommunications traffic, regardless of transport protocol method, where the originating and terminating points, end-to-end points, are in different LATAs, or are in the same LATA and the Parties' Switched Access services are used for the origination or termination of the call, shall be considered Switched Access Traffic. Irrespective of transport protocol method or method of originating or terminating the call, a call that originates in one LATA and terminates in another LATA (i.e., the end-to-end points of the call) or a call in which the Parties' Switched Access Services are used for the origination or termination of the call, shall be considered Switched Access Traffic.
- 8.4.2 If a AT&T end user chooses AIN/Birch as their presubscribed interexchange carrier, or if a AT&T end user uses AIN/Birch as an interexchange carrier on a 101XXXX basis, the originating Party will charge the other Party the appropriate tariff charges for originating switched access services, but such compensation shall not exceed the compensation contained in AT&T's tariff in whose exchange area the End User is located.
- 8.4.3 Where the originating Party delivers a call to the terminating Party over switched access facilities, the originating Party will pay the terminating Party terminating, switched access charges as set forth in the terminating Party's intrastate or interstate tariff, as appropriate. Such compensation shall not exceed the compensation contained in AT&T's tariff in whose exchange area the End User is located.
- 8.4.4 When AIN/Birch's end office switch provides an access service connection to or from an IXC by a direct trunk group to the IXC utilizing AT&T facilities, each Party will provide its own access services to the IXC and bill on a multi-bill, multi-tariff meet-point basis. Each Party will bill its own access services rates to the IXC with the exception of the interconnection charge. The interconnection charge will be billed by AIN/Birch as the Party providing the end office function. Each party will use the Multiple Exchange Carrier Access Billing (MECAB) guidelines to establish Meet Point Billing for all applicable traffic. The Parties shall utilize a thirty (30) day billing period.
- 8.4.4.1 AIN/Birch must have a unique hosted Revenue Accounting Office (RAO) code where AIN/Birch's end office subtends the AT&T Access Tandem switch for receipt or delivery of switched access traffic and provides an access service connection to or from an IXC via AT&T's Access Tandem switch, AT&T, as the tandem company agrees to provide to AIN/Birch, as the End Office Company, as defined in MECAB, at no charge, all the switched access detail usage data, recorded at the access tandem, within no more than sixty (60) days after the recording date. Each Party will notify the other when it is not feasible to meet these requirements. As business requirements change, data reporting requirements may be modified as necessary.
- 8.4.5 AT&T, as the tandem provider company, will retain for a minimum period of sixty (60) days, access message detail sufficient to recreate any data that is lost or damaged by the tandem provider company or any third party involved in processing or transporting data.

- 8.4.6 AIN/Birch shall not deliver switched access traffic to AT&T for termination over any trunks and facilities other than AIN/Birch ordered switched access trunks and facilities.
- 8.5 Transit Traffic
- 8.5.1 AT&T shall provide tandem switching and transport services for AIN/Birch's Transit Traffic. Rates for local Transit Traffic and ISP-Bound Transit Traffic shall be the applicable rate elements for Tandem Switching, Common Transport and Tandem Intermediary Charge as set forth in Exhibit A. Rates for Switched Access Transit Traffic shall be the applicable charges as set forth in AT&T's intrastate Access Services Tariff and/or AT&T's FCC No. 1 Tariff. Billing associated with all Transit Traffic shall be pursuant to MECAB guidelines. Traffic between AIN/Birch and Wireless Type 1 third parties or Wireless Type 2A third parties that do not engage in Meet Point Billing with AT&T shall not be treated as Transit Traffic from a routing or billing perspective until such time as such traffic is identifiable as Transit Traffic.
- 8.5.2 The delivery of traffic that transits the AT&T network is excluded from any AT&T billing guarantees. AT&T agrees to deliver Transit Traffic to the terminating carrier; provided, however, that AIN/Birch is solely responsible for negotiating and executing any appropriate contractual agreements with the terminating carrier for the exchange of Transit Traffic through the AT&T network. AT&T will not be liable for any compensation to the terminating carrier or to AIN/Birch. In the event that the terminating third party carrier imposes on AT&T any charges or costs for the delivery of Transit Traffic, AIN/Birch shall reimburse AT&T for such charges or costs.
- 8.6 For purposes of intercarrier compensation, AT&T will not be responsible for any compensation associated with the exchange of traffic between AIN/Birch and a CLEC utilizing AT&T switching. Where technically feasible, AT&T will use commercially reasonable efforts to provide records to AIN/Birch to identify those CLECs utilizing AT&T switching with whom AIN/Birch has exchanged traffic. Such traffic shall not be considered Transit Traffic from a routing or billing perspective, but instead will be considered as traffic exchanged solely between AIN/Birch and the CLEC utilizing AT&T switching.
- 8.6.1 AIN/Birch is solely responsible for negotiating and executing any appropriate contractual agreements with the terminating carrier for the exchange of traffic with a CLEC utilizing AT&T switching. AT&T will not be liable for any compensation to the terminating carrier or to AIN/Birch. In the event that the terminating third party carrier imposes on AT&T any charges or costs for the delivery of such traffic, AIN/Birch shall reimburse AT&T for all such charges or costs.
- 8.7 AIN/Birch shall send all IntraLATA toll traffic to be terminated by an independent telephone company to the End User's IntraLATA toll provider and shall not send such traffic to AT&T as Transit Traffic. IntraLATA toll traffic shall be any traffic that originates outside of the terminating independent telephone company's local calling area.
- 9 Ordering Charges**
- 9.1 The facilities purchased pursuant to this Attachment shall be ordered via the ASR process.
- 9.2 The rates, terms and conditions associated with submission and processing of ASRs are as set forth in AT&T's FCC No. 1 Tariff, Section 5.

**10 Basic 911 and E911 Interconnection**

10.1 Basic 911 and E911 provides a caller access to the applicable emergency service bureau by dialing 911.

10.2 Basic 911 Interconnection. AT&T will provide to AIN/Birch a list consisting of each municipality that subscribes to Basic 911 service. The list will also provide, if known, the E911 conversion date for each municipality and, for network routing purposes, a ten (10) digit directory number representing the appropriate emergency answering position for each municipality subscribing to 911. AIN/Birch will be required to arrange to accept 911 calls from its end users in municipalities that subscribe to Basic 911 service and translate the 911 call to the appropriate ten (10) digit directory number as stated on the list provided by AT&T. AIN/Birch will be required to route that call to the appropriate PSAP. When a municipality converts to E911 service, AIN/Birch will be required to begin using E911 procedures.

10.3 E911 Interconnection. AIN/Birch shall install a minimum of two (2) dedicated trunks originating from its SWC and terminating to the appropriate E911 tandem. The SWC must be in the same LATA as the E911 tandem. The dedicated trunks shall be, at a minimum, DS0 level trunks configured as part of a digital (one point five forty-four (1.544) Mb/s) interface (DS1 facility). The configuration shall use CAMA-type signaling with MF pulsing or SS7/ISUP signaling either of which shall deliver ANI with the voice portion of the call. If SS7/ISUP connectivity is used, AIN/Birch shall follow the procedures as set forth in Appendix A of the CLEC Users Guide to E911 for Facility Based Providers that is located on the AT&T ' Wholesale – Southeast Region Web site. If the user interface is digital, MF pulses as well as other AC signals shall be encoded per the u-255 Law convention. AIN/Birch will be required to provide AT&T daily updates to the E911 database. AIN/Birch will be required to forward 911 calls to the appropriate E911 tandem along with ANI based upon the current E911 end office to tandem homing arrangement as provided by AT&T. If the E911 tandem trunks are not available, AIN/Birch will be required to route the call to a designated seven (7) digit or ten (10) digit local number residing in the appropriate PSAP. This call will be transported over AT&T's interoffice network and will not carry the ANI of the calling party. AIN/Birch shall be responsible for providing AT&T with complete and accurate data for submission to the 911/E911 database for the purpose of providing 911/E911 to its end users.

10.4 Trunks and facilities for 911 Interconnection may be ordered by AIN/Birch from AT&T pursuant to the terms and conditions set forth in this Attachment.

10.5 The detailed practices and procedures for 911/E911 interconnection are contained in the E911 Local Exchange Carrier Guide For Facility-Based Providers that is located on the AT&T's Wholesale – Southeast Region Web site.

**11 SS7 Network Interconnection**

11.1 Signaling Protocol. SS7 Signaling is AT&T's preferred method for signaling. Where multi-frequency signaling is currently used, the Parties agree to use their best efforts to convert to SS7. If SS7 services are provided by AT&T, they will be provided in the applicable access tariffs. Where multi-frequency signaling is currently used, the Parties agree to Interconnect their networks using multi-frequency ("MF") or dual tone MF ("DTMF") signaling, subject to availability at the End Office Switch or Tandem Switch at which Interconnection occurs. The Parties acknowledge that the use

of MF signaling may not be optimal. AT&T will not be responsible for correcting any undesirable characteristics, service problems or performance problems that are associated with MF/SS7 interworking or the signaling protocol required for Interconnection with CLEC employing MF signaling.

## AT&T COLLOCATION

### 1. Scope of Attachment

#### 1.1 AT&T Premises

1.1.1 The rates, terms and conditions contained within this Attachment shall only apply when AIN/Birch is physically collocated as a sole occupant or as a Host within a AT&T Premises pursuant to this Attachment. AT&T Premises, as defined in this Attachment includes AT&T Central Offices, and Remote Terminals (hereinafter "AT&T Premises"). This Attachment is applicable to AT&T Premises owned or leased by AT&T. Where not specified, the language in this Attachment applies to both Central Office and Remote Site Collocation.

1.1.2 Third Party Property. If the AT&T Premises, or the property on which it is located, is leased by AT&T from a third party or otherwise controlled by a third party, special considerations and intervals may apply in addition to the terms and conditions of this Attachment. Additionally, where AT&T notifies AIN/Birch that AT&T's agreement with a third party does not grant AT&T the ability to provide access and use rights to others, upon AIN/Birch's request, AT&T will use commercially reasonable efforts to obtain the owner's consent and to otherwise secure such rights for AIN/Birch. AIN/Birch agrees to reimburse AT&T for all costs incurred by AT&T in obtaining such rights for AIN/Birch. In cases where a third party agreement does not grant AT&T the right to provide access and use rights to others as contemplated by this Attachment and AT&T, is unable to secure such access and use rights for AIN/Birch, AIN/Birch shall be responsible for obtaining such permission to access and use such property. AT&T shall cooperate with AIN/Birch in obtaining such permission.

#### 1.2 Right to Occupy

1.2.1 AT&T shall offer to AIN/Birch collocation on rates, terms and conditions that are just, reasonable, nondiscriminatory and consistent with the rules of the FCC. Subject to the rates, terms and conditions of this Attachment, where space is available and it is technically feasible, AT&T will allow AIN/Birch to occupy a certain area designated by AT&T within a AT&T Premises, or on AT&T property upon which the AT&T Premises is located, of a size which is specified by AIN/Birch and agreed to by AT&T (hereinafter "Collocation Space"). Except as otherwise specified, any references to Collocation Space shall be for physical collocation. The necessary rates, terms and conditions for a premises as defined by the FCC, other than AT&T Premises, shall be negotiated upon reasonable request for collocation at such premises.

1.2.2 Neither AT&T nor any of AT&T's affiliates may reserve space for future use on more preferential terms than those set forth in this Attachment.

1.2.2.1 In all states other than Florida, the size specified by AIN/Birch may contemplate a request for space sufficient to accommodate AIN/Birch's growth within a twenty-four (24) month period.

1.2.2.2 In the state of Florida, the size specified by AIN/Birch may contemplate a request for space sufficient to accommodate AIN/Birch's growth within an eighteen (18) month period.

1.3 Space Allocation. AT&T shall assign AIN/Birch Collocation Space that utilizes existing infrastructure (e.g., heating, ventilation, air conditioning (HVAC), lighting and available power), if such space is available for collocation. Otherwise, AT&T shall attempt to accommodate AIN/Birch's requested space preferences, if any, including the provision of contiguous space for any subsequent request for collocation. In allocating Collocation Space, AT&T shall not materially increase AIN/Birch's cost or materially delay AIN/Birch's occupation and use of the Collocation Space, assign Collocation Space that will impair the quality of service or otherwise limit the service AIN/Birch wishes to offer, reduce unreasonably the total space available for physical collocation or

preclude reasonable physical collocation within the AT&T Premises. Space shall not be available for collocation if it is: (a) physically occupied by non-obsolete equipment; (b) assigned to another collocated telecommunications carrier; (c) used to provide physical access to occupied space; (d) used to enable technicians to work on equipment located within occupied space; (e) properly reserved for future use, either by AT&T or another collocated telecommunications carrier; or (f) essential for the administration and proper functioning of the AT&T Premises. AT&T may segregate Collocation Space only if the proposed separated space is (a) available in the same or a shorter time frame as non-separated space; (b) at a cost not materially higher than the costs of non-separated space; and (c) is comparable, from a technical and engineering standpoint, to non-separated space. AT&T may require employees and contractors of collocating carriers to use a central or separate entrance to AT&T's building, provided, however, that the employees and contractors of AT&T's affiliates and subsidiaries are subject to the same restriction. AT&T may construct or require AIN/Birch to construct a separate entrance to access physical Collocation Space only when: (a) construction of a separate entrance is technically feasible; (b) either legitimate security concerns, or operational constraints unrelated to AT&T's or any of its affiliates' or subsidiaries' competitive concerns, warrant such separation; (c) construction of a separate entrance will not artificially delay collocation provisioning; or (d) construction of a separate entrance will not materially increase AIN/Birch's costs.

#### 1.4 Transfer of Collocation Space

1.4.1 AIN/Birch shall be allowed to transfer Collocation Space to another CLEC under the following conditions: (1) the AT&T Premises is not at or near space exhaustion; (2) the transfer of space shall be contingent upon AT&T's approval, which will not be unreasonably withheld; (3) AIN/Birch has no unpaid, undisputed collocation charges; and (4) the transfer of the Collocation Space is in conjunction with AIN/Birch's sale of all or substantially all, of the in-place collocation equipment to the same CLEC.

1.4.2 The responsibilities of AIN/Birch shall include: (1) submitting a letter of authorization to AT&T for the transfer; (2) entering into a transfer agreement with AT&T and the acquiring CLEC; and (3) returning all Security Access Devices to AT&T. The responsibilities of the acquiring CLEC shall include: (1) submitting an application to AT&T for the transfer of the Collocation Space; (2) satisfying all requirements of its interconnection agreement with AT&T; (3) submitting a letter to AT&T for the assumption of services; and (4) entering into a transfer agreement with AT&T and AIN/Birch.

1.4.3 In conjunction with a transfer of Collocation Space, any services associated with the Collocation Space shall be transferred pursuant to separately negotiated rates, terms and conditions.

#### 1.5 Space Reclamation

1.5.1 In the event of space exhaust within a AT&T Premises, AT&T may include in its documentation for the Petition for Waiver filed with the Commission, any unutilized space in the AT&T Premises. AIN/Birch will be responsible for the justification of unutilized space within its Collocation Space, if the Commission requires such justification.

1.5.2 AT&T may reclaim unused Collocation Space when a AT&T Premises is at, or near, space exhaustion and AIN/Birch cannot demonstrate that AIN/Birch will utilize the Collocation Space in the time frames set forth below in Section 1.5.3. In the event of space exhaust or near exhaust within a AT&T Premises, AT&T will provide written notice to AIN/Birch requesting that AIN/Birch release non-utilized Collocation Space to AT&T, when one hundred percent (100%) of the Collocation Space in AIN/Birch's collocation arrangement is not being utilized.

- 1.5.3 Within twenty (20) days of receipt of written notification from AT&T, AIN/Birch shall either: (1) return the non-utilized Collocation Space to AT&T in which case AIN/Birch shall be relieved of all obligations for charges associated with that portion of the Collocation Space applicable from the date the Collocation Space is returned to AT&T; or (2) for all states, with the exception of Florida, provide AT&T with information demonstrating that the Collocation Space will be utilized within twenty-four (24) months from the date AIN/Birch accepted the Collocation Space (Acceptance Date) from AT&T. For Florida, AIN/Birch shall provide information to AT&T demonstrating that the Collocation Space will be utilized within eighteen (18) months from the Acceptance Date.
- 1.5.4 Disputes concerning AT&T's claim of space exhaust, or near exhaust, or AIN/Birch's refusal to return requested Collocation Space should be resolved by AT&T and AIN/Birch pursuant to the dispute resolution language contained in the General Terms and Conditions.
- 1.6 Use of Space. AIN/Birch may only place in the Collocation Space equipment necessary for interconnection with AT&T's services/facilities or for accessing AT&T's unbundled network elements for the provision of Telecommunications Services, as specifically set forth in this Agreement. The Collocation Space assigned to AIN/Birch may not be used for any purposes other than as specifically described herein, including, but not limited to office space or a place of reporting for AIN/Birch's employees or certified suppliers.
- 1.7 Rates and Charges. AIN/Birch agrees to pay the rates and charges identified in Exhibit B.
- 1.8 Due Dates. If any due date contained in this Attachment falls on a weekend or a national holiday, then the due date will be the next business day thereafter. For intervals of ten (10) days or less, national holidays will be excluded. For purposes of this Attachment, national holidays include the following: New Year's Day, Martin Luther King, Jr. Day, President's Day (Washington's Birthday), Memorial Day, Independence Day, Labor Day, Columbus Day, Veteran's Day, Thanksgiving Day and Christmas Day.
- 1.9 Compliance. Subject to Section 24 of the General Terms and Conditions of this Agreement, the Parties agree to comply with all applicable federal, state, county, local and administrative laws, rules, ordinances, regulations and codes in the performance of their obligations hereunder.
- 2 Optional Reports**
- 2.1 Space Availability Report. Upon request from AIN/Birch and at AIN/Birch's expense, AT&T will provide a written report (Space Availability Report) describing in detail the space that is currently available for collocation at a particular AT&T Premises. This report will include the amount of Collocation Space available at the AT&T Premises requested, the number of collocators present at the AT&T Premises, any modifications in the use of the space since the last report on the AT&T Premises requested and the measures AT&T is taking to make additional space available for collocation arrangements. A Space Availability Report does not reserve space at the AT&T Premises for which the Space Availability Report was requested by AIN/Birch.
- 2.1.1 The request from AIN/Birch for a Space Availability Report must be in writing and include the AT&T Premises street address, as identified in the LERG, and the CLLI code for the AT&T Premises requested. CLLI code information is located in the NECA Tariff FCC No. 4.
- 2.1.2 AT&T will respond to a request for a Space Availability Report for a particular AT&T Premises within ten (10) days of the receipt of such request.
- 2.1.3 AT&T will use commercially reasonable efforts to respond in ten (10) days to a Space Availability Report request when the request includes from two (2) to five (5) AT&T Premises within the same state. The response time for Space Availability Report requests of more than five (5) AT&T Premises, whether the request is for the same state or for two (2) or more states within the AT&T Southeast Region, shall be negotiated between the Parties.

- 2.2 Remote Terminal Information. Upon request, AT&T will provide AIN/Birch with the following information concerning AT&T's remote terminals: (i) the address of the remote terminal; (ii) the CLLI code of the remote terminal; (iii) the carrier serving area of the remote terminal; (iv) the designation of which remote terminals subtend a particular central office; and (v) the number and address of customers that are served by a particular remote terminal.
- 2.2.1 AT&T will provide this information within thirty (30) days of a AIN/Birch request subject to the following conditions: (i) the information will only be provided on a CD in the same format in which it appears in AT&T's systems; and (ii) the information will only be provided for each serving wire center designated by AIN/Birch, up to a maximum of thirty (30) wire centers per AIN/Birch request per month per state. AT&T will bill the nonrecurring charge pursuant to the rates in Exhibit B at the time AT&T sends the CD.
- 3 Collocation Options**
- 3.1 Cageless Collocation. AT&T shall allow AIN/Birch to collocate AIN/Birch's equipment and facilities without requiring the construction of a cage or similar structure. AT&T shall allow AIN/Birch to have direct access to AIN/Birch's equipment and facilities in accordance with Section 5.1.2 below. AT&T shall make cageless collocation available in single bay increments. Except where AIN/Birch's equipment requires special technical considerations (e.g., special cable racking or isolated ground plane), AT&T shall assign cageless Collocation Space in conventional equipment rack lineups where feasible. For equipment requiring special technical considerations, AIN/Birch must provide the equipment layout, including spatial dimensions for such equipment pursuant to generic requirements contained in Telcordia GR-63-Core, and shall be responsible for compliance with all special technical requirements associated with such equipment.
- 3.2 Caged Collocation
- 3.2.1 AT&T will make caged Collocation Space in Central Offices available in fifty (50) square foot increments. At AIN/Birch's option and expense, AIN/Birch will arrange with a Supplier certified by AT&T (AT&T Certified Supplier) to construct a collocation arrangement enclosure in accordance with AT&T's specifications for a wire mesh enclosure prior to starting equipment installation. Where local building codes require enclosure specifications more stringent than AT&T's wire mesh enclosure specifications, AIN/Birch and AIN/Birch's AT&T Certified Supplier must comply with the more stringent local building code requirements. AIN/Birch's AT&T Certified Supplier shall be responsible for filing and obtaining any and all necessary permits and/or licenses for such construction. AT&T or AT&T's designated agent or contractor shall provide, at AIN/Birch's expense, documentation, which may include existing building architectural drawings, enclosure drawings, specifications, etc., necessary for AIN/Birch's AT&T Certified Supplier to obtain all necessary permits and/or other licenses. AIN/Birch's AT&T Certified Supplier shall bill AIN/Birch directly for all work performed for AIN/Birch. AT&T shall have no liability for, nor responsibility to pay, such charges imposed by AIN/Birch's AT&T Certified Supplier. AIN/Birch must provide the local AT&T Central Office Building Contact with two (2) Access Keys that will allow entry into the locked enclosure. Except in the case of an emergency, AT&T will not access AIN/Birch's locked enclosure prior to notifying AIN/Birch at least forty-eight (48) hours or two (2) business days, whichever is greater, before access to AIN/Birch's Collocation Space is required. Upon request, AT&T shall construct the enclosure for AIN/Birch.
- 3.2.2 In the event AIN/Birch's AT&T Certified Supplier will construct the collocation arrangement enclosure, AT&T may elect to review AIN/Birch's plans and specifications, prior to allowing the construction to start, to ensure compliance with AT&T's wire mesh enclosure specifications. AT&T will notify AIN/Birch of its desire to conduct this review in AT&T's Application Response, as defined herein, to AIN/Birch's Initial Application. If AIN/Birch's Initial Application does not indicate its desire to construct its own enclosure and AIN/Birch subsequently decides to construct its own enclosure

prior to AT&T's Application Response, then AIN/Birch will resubmit its Initial Application, indicating its desire to construct its own enclosure. If AIN/Birch subsequently decides construct its own enclosure after the bona fide firm order (hereinafter "BFFO") has been accepted by AT&T, AIN/Birch will submit a Subsequent Application, as defined in Section 6.2 below. If AT&T elects to review AIN/Birch's plans and specifications, then AT&T will provide notification to AIN/Birch within ten (10) days after the Initial Application BFFO date or, if a Subsequent Application is submitted as set forth in the preceding sentence, then the Subsequent Application BFFO date. AT&T shall complete its review within fifteen (15) days after AT&T's receipt of AIN/Birch's plans and specifications. Regardless of whether or not AT&T elects to review AIN/Birch's plans and specifications, AT&T reserves the right to inspect the enclosure after construction has been completed to ensure that it is constructed according to AIN/Birch's submitted plans and specifications and/or AT&T's wire mesh enclosure specifications, as applicable. If AT&T decides to inspect the constructed Collocation Space, AT&T will complete its inspection within fifteen (15) days after receipt of AIN/Birch's written notification that the enclosure has been completed. Within seven (7) days after AT&T has completed its inspection of AIN/Birch's caged Collocation Space, AT&T shall require AIN/Birch, at AIN/Birch's expense, to remove or correct any structure that does not meet AIN/Birch's plans and specifications or AT&T's wire mesh enclosure specifications, as applicable.

### 3.3 Shared Caged Collocation

- 3.3.1 AIN/Birch may allow other telecommunications carriers to share AIN/Birch's caged Collocation Space, pursuant to the terms and conditions agreed to by AIN/Birch (Host) and the other telecommunications carriers (Guests) contained in this Section, except where the AT&T Premises is located within a leased space and AT&T is prohibited by said lease from offering such an option to AIN/Birch. AT&T shall be notified in writing by AIN/Birch upon the execution of any agreement between the Host and its Guest(s) prior to the submission of an application. Further, such notification shall include the name of the Guest(s), the term of the agreement, and a certification by AIN/Birch that said agreement imposes upon the Guest(s) the same terms and conditions for Collocation Space as set forth in this Attachment between AT&T and AIN/Birch. The term of the agreement between the Host and its Guest(s) shall not exceed the term of this Agreement between AT&T and AIN/Birch.
- 3.3.2 AIN/Birch, as the Host, shall be the sole interface and responsible Party to AT&T for the assessment and billing of rates and charges contained within this Attachment and for the purposes of ensuring that the safety and security requirements of this Attachment are fully complied with by the Guest(s), its employees and agents. AT&T shall provide AIN/Birch with a pro-ration of the costs of the Collocation Space based on the number of collocators and the space used by each. There will be a minimum charge of one (1) bay/rack per Host/Guest. In addition to the above, for all states other than Florida, AIN/Birch shall be the responsible Party to AT&T for the purpose of submitting applications for initial and additional equipment placement for the Guest(s). In Florida, the Guest(s) may submit its own Initial Application and Subsequent Applications for equipment placement using the Host's ACNA. A separate Guest application shall result in the assessment of an Initial Application Fee or a Subsequent Application Fee, as set forth in Exhibit B, which will be billed to the Host on the date that AT&T provides its written Application Response to the Guest(s) Bona Fide application.
- 3.3.3 Notwithstanding the foregoing, the Guest(s) may submit service orders directly to AT&T to request the provisioning of interconnecting facilities between AT&T and the Guest(s), the provisioning of services, and/or access to Network Elements. The bill for these interconnecting facilities, services and Network Elements will be charged to the Guest(s) pursuant to the applicable AT&T Tariff or the Guest's Interconnection Agreement with AT&T.

- 3.3.4 AIN/Birch shall indemnify and hold harmless AT&T from any and all claims, actions, causes of action, of whatever kind or nature arising out of the presence of AIN/Birch's Guest(s) in the Collocation Space, except to the extent caused by AT&T's sole negligence, gross negligence, or willful misconduct.
- 3.4 Adjacent Collocation
- 3.4.1 Subject to technical feasibility and space availability, AT&T will permit an adjacent collocation arrangement (Adjacent Arrangement) on AT&T Premises' property only when space within the requested AT&T Premises is legitimately exhausted and where the Adjacent Arrangement does not interfere with access to existing or planned structures or facilities on the AT&T Premises' property. An Adjacent Arrangement shall be constructed or procured by AIN/Birch or AIN/Birch's AT&T Certified Supplier and must be in conformance with the provisions of AT&T's design and construction specifications. Further, AIN/Birch shall construct, procure, maintain and operate said Adjacent Arrangement pursuant to all of the applicable rates, terms and conditions set forth in this Attachment.
- 3.4.2 If AIN/Birch requests Adjacent Collocation, pursuant to the conditions stated in Section 3.4 above, AIN/Birch must arrange with a AT&T Certified Supplier to construct or procure the Adjacent Arrangement structure in accordance with AT&T's specifications. AT&T will provide the appropriate specifications upon request. Where local building codes require specifications more stringent than AT&T's own specifications, AIN/Birch and AIN/Birch's AT&T Certified Supplier shall comply with the more stringent local building code requirements. AIN/Birch's AT&T Certified Supplier shall be responsible for filing and obtaining any and all necessary zoning, permits and/or licenses for such construction. AIN/Birch's AT&T Certified Supplier shall bill AIN/Birch directly for all work performed for AIN/Birch to comply with this Attachment. AT&T shall have no liability for, nor responsibility to pay such charges imposed by AIN/Birch's AT&T Certified Supplier. AIN/Birch must provide the local AT&T contact with two (2) cards, keys or other access devices used to gain entry into the locked enclosure. Except in the case of an emergency, AT&T will not access AIN/Birch's locked enclosure prior to notifying AIN/Birch at least forty-eight (48) hours or two (2) business days, whichever is greater, before access to the Collocation Space is required.
- 3.4.3 AIN/Birch must submit its Adjacent Arrangement construction plans and specifications to AT&T when it places its Firm Order. AT&T shall review AIN/Birch's plans and specifications prior to the construction of an Adjacent Arrangement to ensure AIN/Birch's compliance with AT&T's specifications. AT&T shall complete its review within fifteen (15) days after receipt of the plans and specifications from AIN/Birch for the Adjacent Arrangement. AT&T may inspect the Adjacent Arrangement during and after construction is completed to ensure that it is constructed according to AIN/Birch's submitted plans and specifications. If AT&T decides to inspect the completed Adjacent Arrangement, AT&T will complete its inspection within fifteen (15) days after receipt of AIN/Birch's written notification that the Adjacent Arrangement has been completed. Within seven (7) days after AT&T has completed its inspection of AIN/Birch's Adjacent Arrangement, AT&T shall require AIN/Birch, at AIN/Birch's expense, to remove or correct any structure that does not meet its submitted plans and specifications or AT&T's specifications, as applicable.
- 3.4.4 AIN/Birch shall provide a concrete pad, the structure housing the Adjacent Arrangement, HVAC, lighting and all of the facilities that are required to connect the structure (i.e., racking, conduits, etc.) to the AT&T point of demarcation. At AIN/Birch's option and where the local authority having jurisdiction permits, AT&T shall provide an AC power source and access to physical Collocation services and facilities, subject to the same nondiscriminatory requirements as those applicable to any other physical Collocation arrangement. In Alabama and Louisiana, at AIN/Birch's request and expense, AT&T will provide Direct Current (DC) power to an Adjacent Collocation site where technically feasible, as that term has been defined by the FCC, and in accordance with applicable

law. AT&T will provide DC power in an Adjacent Arrangement provided that such provisioning can be done in compliance with the National Electric Code (NEC), all safety and building codes and any local codes, such as, but not limited to, local zoning codes, and upon completion of negotiations between the Parties on the applicable rates and provisioning intervals. AIN/Birch will pay for any and all DC power construction and provisioning costs to an Adjacent Arrangement through individual case basis (ICB) pricing that must be paid as follows: fifty percent (50%) before the DC installation work begins and fifty percent (50%) at completion of the DC installation work to the Adjacent Arrangement. AIN/Birch's AT&T Certified Supplier shall be responsible, at AIN/Birch's sole expense, for filing the required documentation to obtain any and all necessary permits and/or licenses for an Adjacent Arrangement. AT&T shall allow Shared Caged Collocation within an Adjacent Arrangement, pursuant to the terms and conditions set forth in Section 3.3 above.

### 3.5 Direct Connect

3.5.1 AT&T will permit AIN/Birch to directly interconnect between its own physical/virtual Collocation Spaces within the same AT&T Premises (Direct Connect). AIN/Birch shall contract with a AT&T Certified Supplier to place the Direct Connect, which shall be provisioned using facilities owned by AIN/Birch. A Direct Connect shall utilize AT&T common cable support structure. There will be a recurring charge per linear foot, per cable, of the actual common cable support structure used by AIN/Birch to provision the Direct Connect between its physical/virtual Collocation Spaces. In those instances where AIN/Birch's physical/virtual Collocation Spaces are contiguous in the central office, AIN/Birch will have the option of using AIN/Birch's own technicians to deploy the Direct Connect using either electrical or optical facilities between its Collocation Spaces by constructing its own dedicated cable support structure. AIN/Birch will deploy such electrical or optical connections directly between its own equipment without being routed through AT&T's equipment or common cable support structure. AIN/Birch may not self-provision a Direct Connect on any AT&T distribution frame, Point of Termination (POT) Bay, Digital System Cross-Connect (DSX) panel or Light Guide Cross-Connect (LGX) panel. AIN/Birch is solely responsible for ensuring the integrity of the signal.

3.5.2 To place an order for a Direct Connect, AIN/Birch must submit an Initial Application or Subsequent Application to AT&T. If no modification to the Collocation Space is requested other than the placement of a Direct Connect, the Co-Carrier Cross Connect/Direct Connect Application Fee for Direct Connect, as defined in Exhibit B, will apply. If other modifications are requested, in addition to the placement of a Direct Connect, either an Initial Application Fee or a Subsequent Application Fee will apply, pursuant to Section 6.2 below. AT&T will bill this nonrecurring charge on the date that AT&T provides an Application Response to AIN/Birch.

### 3.6 Co-Carrier Cross Connect (CCXC)

3.6.1 A CCXC is a cross connection between AIN/Birch and another collocated telecommunications carrier, other than AT&T, in the same AT&T Premises. Where technically feasible, AT&T will permit AIN/Birch to interconnect between its Collocation Space(s) and the physical/virtual collocation space(s) of another collocated telecommunications carrier(s) within the same AT&T Premises via a CCXC, pursuant to the FCC's Rules. The other collocated telecommunications carrier's agreement must also contain CCXC rates, terms and conditions before AT&T will permit the provisioning of a CCXC between the two (2) collocated carriers. The applicable AT&T charges will be assessed to AIN/Birch upon AIN/Birch's request for the CCXC. AIN/Birch is prohibited from using the Collocation Space for the sole or primary purpose of cross-connecting to other collocated telecommunications carriers.

3.6.2 AIN/Birch must contract with a AT&T Certified Supplier to place the CCXC. The CCXC shall be provisioned using facilities owned by AIN/Birch. Such cross-connections to other collocated

telecommunications carriers may be made using either electrical or optical facilities. AIN/Birch shall be responsible for providing a LOA, with the application, to AT&T from the other collocated telecommunications carrier to which it will be cross-connecting. The CCXC shall utilize AT&T common cable support structure. There will be a recurring charge per linear foot, per cable, of the common cable support structure used by AIN/Birch to provision the CCXC to the other collocated telecommunications carrier. In those instances where AIN/Birch's equipment and the equipment of the other collocated telecommunications carrier are located in contiguous caged Collocation Space, AIN/Birch may use its own technicians to install the CCXC using either electrical or optical facilities between the equipment of both collocated telecommunications carriers by constructing a dedicated cable support structure between the two (2) contiguous cages. AIN/Birch shall deploy such electrical or optical cross-connections directly between its own equipment and the equipment of the other collocated telecommunications carrier without being routed through AT&T's equipment or, in the case of a CCXC provisioned between contiguous collocation spaces, common cable support structure. AIN/Birch shall not provision CCXC on any AT&T distribution frame, POT Bay, DSX panel or LGX panel. AIN/Birch is solely responsible for ensuring the integrity of the signal.

- 3.6.3 To place an order for a CCXC, AIN/Birch must submit an application to AT&T. If no modification to the Collocation Space is requested other than the placement of a CCXC, the Co-Carrier Cross Connect/Direct Connect Application Fee for a CCXC, as defined in Exhibit B, will apply. If other modifications are requested, in addition to the placement of a CCXC, either an Initial Application or a Subsequent Application Fee will apply, pursuant to Section 6.2 below. AT&T will bill this nonrecurring charge on the date that it provides an Application Response to AIN/Birch.

#### **4 Occupancy**

- 4.1 Space Ready Notification. AT&T will notify AIN/Birch in writing when the Collocation Space is ready for occupancy (Space Ready Date).
- 4.2 Acceptance Walkthrough. AIN/Birch will schedule and complete an acceptance walkthrough of new or additional provisioned Collocation Space with AT&T within fifteen (15) days after the Space Ready Date. AT&T will correct any identified deviations from AIN/Birch's original or jointly amended application within seven (7) days after the walkthrough, unless the Parties mutually agree upon a different time frame. AT&T will then establish a new Space Ready Date. Another acceptance walkthrough will be scheduled and conducted within fifteen (15) days after the new Space Ready Date. This follow-up acceptance walkthrough will be limited to only those deviations identified in the initial walkthrough. If AIN/Birch completes its acceptance walkthrough within the fifteen (15) day interval associated with the applicable Space Ready Date, billing will begin upon the date of AIN/Birch's acceptance of the Collocation Space (Space Acceptance Date). In the event AIN/Birch fails to complete an acceptance walkthrough within the fifteen (15) day interval associated with the applicable Space Ready Date, the Collocation Space shall be deemed accepted by AIN/Birch on the Space Ready Date and billing will commence from that date.
- 4.3 Early Space Acceptance. If AIN/Birch decides to occupy the Collocation Space prior to the Space Ready Date, the date AIN/Birch executes the Agreement for Customer Access and Acceptance to Unfinished Collocation Space is the date that will be deemed the Space Acceptance Date and billing will begin from that date.
- 4.4 Equipment Installation. AIN/Birch shall notify AT&T in writing that its collocation equipment installation is complete. AIN/Birch's collocation equipment installation is complete when AIN/Birch's equipment is connected to AT&T's network for the purpose of provisioning Telecommunication Services to AIN/Birch's customers. AT&T may refuse to accept any orders for cross-connects until it has received such notice from AIN/Birch.
- 4.5 Termination of Occupancy.

- 4.5.1 In addition to any other provisions addressing termination of occupancy in this Agreement, AIN/Birch may terminate its occupancy of a particular Collocation Space by submitting a Subsequent Application requesting termination of occupancy for such Collocation Space. Such termination shall be effective upon AT&T's acceptance of the Space Relinquishment Form. Billing for monthly recurring charges will cease on the date that AIN/Birch and AT&T conduct an inspection of the terminated space and jointly sign off on the Space Relinquishment Form or on the date that AIN/Birch signs off on the Space Relinquishment Form and sends this form to AT&T, provided no discrepancies are found during AT&T's subsequent inspection of the terminated space. If the subsequent inspection by AT&T reveals any discrepancies, billing will cease on the date that AT&T and AIN/Birch jointly conduct an inspection, confirming that AIN/Birch has corrected all of the noted discrepancies identified by AT&T. A Subsequent Application Fee will not apply for the termination of occupancy; however, specific disconnect fees may apply to the services terminating to such Collocation Space. The particular disconnect fees that would apply in each state are contained in Exhibit B.
- 4.5.2 Upon termination of occupancy, AIN/Birch, at its sole expense, shall remove its equipment and any other property owned, leased or controlled by AIN/Birch from the Collocation Space. AIN/Birch shall have thirty (30) days from the Bona Fide Firm Order (BFFO) date (Termination Date) to complete such removal, including the removal of all equipment and facilities of AIN/Birch's Guest(s), unless AIN/Birch's Guest(s) has assumed responsibility for the Collocation Space housing the Guest(s)'s equipment and executed the appropriate documentation required by AT&T to transfer the Collocation Space to the Guest(s) prior to AIN/Birch's Termination Date.
- 4.5.3 AIN/Birch shall continue the payment of all monthly recurring charges to AT&T until the date AIN/Birch, and if applicable AIN/Birch's Guest(s), has fully vacated the Collocation Space and the Space Relinquishment Form has been accepted by AT&T. If AIN/Birch or AIN/Birch's Guest(s) fails to vacate the Collocation Space within thirty (30) days from the Termination Date, AT&T shall have the right to remove and dispose of the equipment and any other property of AIN/Birch or AIN/Birch's Guest(s), in any manner that AT&T deems fit, at AIN/Birch's expense and with no liability whatsoever for AIN/Birch's property or AIN/Birch's Guest(s) property.
- 4.5.4 Upon termination of AIN/Birch's right to occupy specific Collocation Space, the Collocation Space will revert back to AT&T's central office space inventory. AIN/Birch shall surrender the Collocation Space to AT&T in the same condition as when it was first occupied by AIN/Birch, with the exception of ordinary wear and tear, unless otherwise agreed to by the Parties. AIN/Birch's AT&T Certified Supplier shall be responsible for updating and making any necessary changes to AT&T's records as required by AT&T specifications including, but not limited to, AT&T's Central Office Record Drawings and ERMA Records. AIN/Birch shall be responsible for the cost of removing any AIN/Birch constructed enclosure, as well as any supporting structures (e.g., racking, conduits, power cables, etc.), by the Termination Date and restoring the grounds to their original condition.

## **5 Use of Collocation Space**

### **5.1 Equipment Type**

- 5.1.1 AT&T shall permit the collocation and use of any equipment necessary for interconnection to AT&T's network and/or access to AT&T's unbundled network elements in the provision of Telecommunications Services, as the term "necessary" is defined by FCC 47 C.F.R. § 51.323 (b). The primary purpose and function of any equipment collocated in a AT&T Premises must be for interconnection to AT&T's network or access to AT&T's unbundled network elements in the provision of Telecommunications Services. Equipment is necessary for interconnection if an inability to deploy that equipment would, as a practical, economical, or operational matter, preclude the requesting carrier from obtaining interconnection with AT&T at a level equal in quality to that which AT&T obtains within its own network or what AT&T provides to any affiliate, subsidiary, or

other party.

- 5.1.2 Examples of equipment that would not be considered necessary include, but are not limited to: traditional circuit switching equipment, equipment used exclusively for call-related databases, computer servers used exclusively for providing information services, OSS equipment used to support collocated telecommunications carrier network operations, equipment that generates customer orders, manages trouble tickets or inventory, or stores customer records in centralized databases, etc. AT&T will determine upon receipt of an application if the requested equipment is necessary based on the criteria established by the FCC. Multifunctional equipment placed on a AT&T Premises must not place any greater relative burden on AT&T's property than comparable single-function equipment. AT&T reserves the right to allow the collocation of any equipment on a nondiscriminatory basis.
- 5.1.3 Such equipment must, at a minimum, meet the following Telcordia Network Equipment Building Systems (NEBS) General Equipment Requirements: for Central Offices Criteria Level 1 requirements as outlined in Telcordia Special Report SR-3580, Issue 1 and for Remote Sites Criteria Level 3 requirements as outlined in the Telcordia Special report SR-3580, Issue 1. Except where otherwise required by a Commission, AT&T shall comply with the applicable FCC rules relating to denial of collocation equipment based on AIN/Birch's failure to comply with this Section.
- 5.1.3.1 To the extent AIN/Birch wishes to place equipment in its collocation that does not meet the standards set forth in 5.1.3, AIN/Birch may request in writing, pursuant to the Notices section of the General Terms & Conditions, a waiver to such standards. AT&T may provide a waiver in its sole discretion.
- 5.1.4 At a Remote Site, all AIN/Birch equipment installation shall comply with AT&T TR 73503-11h, "Grounding - Engineering Procedures". Metallic cable sheaths and metallic strength members of optical fiber cables as well as the metallic cable sheaths of all copper conductor cables shall be bonded to the designated grounding bus for the Remote Site Location. All copper conductor pairs, working and non-working, shall be equipped with a solid-state protector unit (over-voltage protection only), which has been listed by a nationally recognized testing laboratory.
- 5.2 Terminations. AIN/Birch shall not request more DS0, DS1, DS3 and/or optical terminations for a collocation arrangement than the total port or termination capacity of the equipment physically installed in the Collocation Space. The total capacity of the equipment collocated in the Collocation Space will include equipment contained in an application, as well as any equipment already placed in the Collocation Space. If full network termination capacity of the equipment being installed is not requested in the application submitted by AIN/Birch, additional network terminations for the installed equipment will require the submission of a Subsequent Application. In the event AIN/Birch submits an application for terminations that will exceed the total capacity of the collocated equipment, AIN/Birch will be informed of the discrepancy by AT&T and required to submit a revision to the application.
- 5.3 Security Interest in Equipment. Commencing with the most current calendar quarter after the Effective Date of this Agreement, and thereafter with respect to each subsequent calendar quarter during the term of this Agreement, AIN/Birch will, no later than thirty (30) days after the close of such calendar quarter, provide a report to ICS Collocation Product Management, Room 34th Floor, 675 W. Peachtree Street, Atlanta, Georgia 30375, listing any equipment in the Collocation Space (i) that was added during the calendar quarter to which such report pertains, and (ii) for which there is a UCC-1 lien holder or to another entity that has a secured financial interest in such equipment (Secured Equipment). If no Secured Equipment has been installed within a given calendar quarter, no report shall be due hereunder in connection with such calendar quarter.
- 5.4 No Marketing. AIN/Birch shall not use the Collocation Space for marketing purposes, nor shall it

place any identifying signs or markings outside the Collocation Space or on the grounds of the AT&T Premises.

- 5.5 Equipment Identification. AIN/Birch shall place a plaque or affix other identification (e.g., stenciling or labeling) to each piece of AIN/Birch's equipment, including the appropriate emergency contacts with their corresponding telephone numbers, in order for AT&T to properly identify AIN/Birch's equipment in the case of an emergency. For caged Collocation Space, such identification must be placed on a plaque affixed to the outside of the caged enclosure.
- 5.6 Entrance Facilities.
- 5.6.1 AIN/Birch may elect to place AIN/Birch-owned or AIN/Birch leased fiber entrance facilities into its Collocation Space. AT&T will designate the point of interconnection in close proximity to the AT&T Premises housing the Collocation Space, such as at an entrance manhole or a cable vault for Central Offices, which is physically accessible by both Parties. For Central Offices, AIN/Birch will provide and place fiber cable in the entrance manhole of sufficient length to be pulled through conduit and into the splice location. AIN/Birch will provide and install a sufficient length of fire retardant riser cable, to which AT&T will splice the entrance cable. The fire retardant riser cable will extend from the splice location to AIN/Birch's equipment in AIN/Birch's Collocation Space. In the event AIN/Birch utilizes a non-metallic, riser-type entrance facility, a splice will not be required. For Remote Terminals AIN/Birch will provide and place copper cable through conduit from the Remote Site Collocation Space to the feeder distribution interface. Such copper cable must be of sufficient length to reach the splice location for splicing by AT&T. AIN/Birch must contact AT&T for authorization and instruction prior to placing any entrance facility cable in an entrance manhole or cable vault. AIN/Birch is responsible for the maintenance of the entrance facilities. Nonrecurring charges for cable installation will be assessed on a per cable basis as set forth in Exhibit B upon receipt of AIN/Birch's BFFO. Recurring charges for the cable support structure will be billed at the rates set forth in Exhibit B.
- 5.6.2 Central Office Microwave Transmission Facilities. At AIN/Birch's request, AT&T will accommodate, where technically feasible and space is available, a microwave entrance facility, pursuant to separately negotiated rates, terms and conditions.
- 5.6.3 Central Office Copper and Coaxial Cable Entrance Facilities. In Florida and Georgia, AT&T shall permit AIN/Birch to use copper or coaxial cable entrance facilities, if approved by the Commission, but only in those rare instances where AIN/Birch demonstrates a necessity and entrance capacity is not at or near exhaust in a particular AT&T Premises in which AIN/Birch's Collocation Space is located. In Florida, AIN/Birch must have approval by the Commission before it submits a request for copper entrance facilities. Notwithstanding the foregoing, in the case of adjacent collocation, copper facilities may be used between the adjacent collocation arrangement and the central office demarcation point, unless AT&T determines that limited space is available for the placement of these entrance facilities.
- 5.7 Dual Entrance Facilities at a Central Office. AT&T will provide at least two (2) interconnection points at each Central Office where at least two (2) such interconnection points are available and capacity exists. Upon receipt of a request by AIN/Birch for dual entrance facilities to its physical Collocation Space, AT&T shall provide AIN/Birch with information regarding AT&T's capacity to accommodate the requested dual entrance facilities. If conduit in the serving manhole(s) is available and is not reserved for another purpose or for utilization within twelve (12) months of the receipt of an application for collocation, AT&T will make the requested conduit space available for the installation of a second entrance facility to AIN/Birch's Collocation Space. The location of the serving manhole(s) will be determined at the sole discretion of AT&T. Where dual entrance facilities are not available due to a lack of capacity, AT&T will provide this information to AIN/Birch in the Application Response.

## 5.8 Shared Use

- 5.8.1 AIN/Birch may utilize spare capacity on an existing telecommunications carrier's entrance facility for the purpose of obtaining an entrance facility to AIN/Birch's Collocation Space within the same AT&T Premises.
- 5.8.2 AT&T shall allow the splice, as long as the fiber is non-working dark fiber. AIN/Birch must arrange with AT&T in accordance with AT&T's Special Construction Procedures, RL93-11-030BT, and provide a LOA from the other telecommunications carrier authorizing AT&T to perform the splice of the AIN/Birch-provided riser cable to the spare capacity on the other telecommunications carrier's entrance facility. If AIN/Birch desires to allow another telecommunications carrier to use its entrance facilities, the telecommunications carrier must arrange with AT&T in accordance with AT&T's Special Construction Procedures, RL93-11-030BT, and provide a LOA from AIN/Birch authorizing AT&T to perform the splice of the telecommunications carrier's provided riser cable to the spare capacity on AIN/Birch's entrance facility.

## 5.9 Demarcation Point

- 5.9.1 In Tennessee, if AIN/Birch elects the Tennessee Regulatory Authority (TRA) rates as set forth in Exhibit C, the additional language also set forth in Exhibit C for Demarcation Point, will be effective in conjunction with the remaining terms and conditions of this Attachment.
- 5.9.2 AT&T will designate the point(s) of demarcation between AIN/Birch's equipment and/or network facilities and AT&T's network facilities. For 2-wire and 4-wire connections, the demarcation point shall be a common block on the AT&T designated conventional distribution frame. AIN/Birch shall be responsible for providing the common block and cabling and AIN/Birch's AT&T Certified Supplier shall be responsible for installing and properly labeling/stenciling the common block and any necessary cabling identified in Section 7 below. For DS1, DS3, STS1, and optical terminations, AT&T shall designate, provide, and install demarcation point hardware on a per arrangement basis. AIN/Birch shall be responsible for providing, and AIN/Birch's AT&T Certified Supplier shall be responsible for installing any necessary cabling and properly labeling/stenciling the demarcation point hardware for terminations identified in Section 7 below.
- 5.9.3 AIN/Birch or its agent must install, maintain and operate the equipment/facilities on its side of the demarcation point, pursuant to Section 5.10 below and may self-provision cross-connects that may be required within its own Collocation Space to activate service requests.
- 5.10 Equipment and Facilities. AIN/Birch, or if required by this Attachment, AIN/Birch's AT&T Certified Supplier, is solely responsible for the design, engineering, installation, testing, provisioning, performance, monitoring and maintenance/repair of the equipment and network facilities used by AIN/Birch, which must be performed in compliance with all applicable AT&T specifications. Such equipment and network facilities may include, but are not limited to, cable(s), equipment, and POT connections. AIN/Birch and its designated AT&T Certified Supplier must follow and comply with all AT&T specifications outlined in the following AT&T Technical Requirements: TR 73503, TR 73519, TR 73572 and TR 73564.

## 5.11 AT&T's Access to Collocation Space

- 5.11.1 From time to time, AT&T may require access to AIN/Birch's Collocation Space. AT&T retains the right to access AIN/Birch's Collocation Space for the purpose of making AT&T equipment and building modifications (e.g., installing, altering or removing racking, ducts, electrical wiring, HVAC, and cabling). In such cases, AT&T will give notice to AIN/Birch at least forty-eight (48) hours before access to AIN/Birch's Collocation Space is required. AIN/Birch may elect to be present whenever AT&T performs work in the AIN/Birch's Collocation Space. The Parties agree that AIN/Birch will not bear any of the expense associated with this type of work.

- 5.11.2 In the case of an emergency, AT&T will provide oral notice of entry as soon as reasonably practicable after such entry.
- 5.11.3 AIN/Birch must provide the local AT&T Central Office Building Contact with two (2) Access Devices that will allow AT&T entry into any enclosed and locked Collocation Space including, but not limited to, an Adjacent Arrangement, pursuant to the requirements contained in this Section.
- 5.12 AIN/Birch's Access
- 5.12.1 Pursuant to Section 12 below, AIN/Birch shall have access to its Collocation Space twenty-four (24) hours a day, seven (7) days a week. AIN/Birch agrees to provide the name, date of birth and either the social security number or driver's license number of each employee, supplier or agent of AIN/Birch or AIN/Birch's Guest(s) with AIN/Birch's written request for access keys or cards (Access Devices) for specific AT&T Premises, prior to the issuance of said Access Devices, using Form RF-2906-C, the "CLEC and CLEC Certified Supplier Access Request and Acknowledgement" form. The appropriate key acknowledgement forms (the "Collocation Acknowledgement Sheet" for access cards and the "Key Acknowledgement Form" for keys) must be signed by AIN/Birch and returned to AT&T Access Management within fifteen (15) days of AIN/Birch's receipt of these forms. Failure to return these properly acknowledged forms will result in the subsequent access key or card requests being held by AT&T until the proper acknowledgement documents have been received by AT&T and reflect current information. Charges for Security Access System and for Security Access Devices will be billed at the rates set forth in Exhibit B. Access Devices may not be duplicated under any circumstances. AIN/Birch agrees to be responsible for all Access Devices and for the return of all Access Devices in the possession of AIN/Birch's employees, suppliers, agents or Guests after termination of the employment relationship, the contractual obligation with AIN/Birch ends, upon the termination of this Agreement, or upon the termination of occupancy of Collocation Space in a specific AT&T Premises. AIN/Birch shall pay all applicable charges associated with lost or stolen Access Devices.
- 5.12.2 AIN/Birch must submit to AT&T the completed Access Control Request Form for all employees, suppliers, agents or Guests requiring access to a AT&T Premises at least thirty (30) days prior to the date AIN/Birch desires to gain access to the Collocation Space. In order to permit reasonable access during construction of the Collocation Space, AIN/Birch may submit a request for its one (1) free accompanied site visit to its designated Collocation Space at any time subsequent to AT&T's receipt of the BFFO. In the event AIN/Birch desires access to its designated Collocation Space after the first accompanied free visit and AIN/Birch's access request form(s) has not been approved by AT&T or AIN/Birch has not yet submitted an access request form to AT&T, AIN/Birch shall be permitted to access the Collocation Space accompanied by a AT&T security escort, at AIN/Birch's expense, which will be assessed pursuant to the Security Escort fees contained in Exhibit B. AIN/Birch must request that escorted access be provided by AT&T to AIN/Birch's designated Collocation Space at least three (3) business days prior to the date such access is desired. A AT&T security escort will be required whenever AIN/Birch or its approved agent or supplier requires access to the entrance manhole.
- 5.13 Lost or Stolen Access Devices. AIN/Birch shall immediately notify AT&T in writing when any of its Access Devices have been lost or stolen. If it becomes necessary for AT&T to re-key buildings or deactivate an Access Device as a result of a lost or stolen Access Device(s) or for failure of AIN/Birch's employees, suppliers, agents or Guest(s) to return an Access Device(s), AIN/Birch shall pay for the costs of re-keying the building or deactivating the Access Device(s).
- 5.14 Interference or Impairment
- 5.14.1 Notwithstanding any other provisions of this Attachment, AIN/Birch shall not use any product or service provided under this Agreement, any other service related thereto or used in combination

therewith, or place or use any equipment or facilities in any manner that (1) significantly degrades, interferes with or impairs service provided by AT&T or any other entity or any person's use of its telecommunications services; (2) endangers or damages the equipment, facilities or any other property of AT&T or any other entity or person; (3) compromises the privacy of any communications routed through the AT&T Premises; or (4) creates an unreasonable risk of injury or death to any individual or to the public. If AT&T reasonably determines that any equipment or facilities of AIN/Birch violates the provisions of this paragraph, AT&T shall provide written notice to AIN/Birch, which shall direct AIN/Birch to cure the violation within forty-eight (48) hours of AIN/Birch's receipt of written notice or, if such cure is not feasible, at a minimum, to commence curative measures within twenty-four (24) hours and exercise reasonable diligence to complete such measures as soon as possible thereafter. After receipt of the notice, the Parties agree to consult immediately and, if necessary, to conduct an inspection of the Collocation Space.

5.14.2 Except in the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services, if AIN/Birch fails to cure the violation within forty-eight (48) hours or, if such cure is not possible, to commence curative action within twenty-four (24) hours and exercise reasonable diligence to complete such action as soon as possible, or if the violation is of a character that poses an immediate and substantial threat of damage to property or injury or death to any person, or any other significant degradation, interference or impairment of AT&T's or another entity's service, then and only in that event, AT&T may take such action as it deems necessary to eliminate such threat including, without limitation, the interruption of electrical power to AIN/Birch's equipment and/or facilities. AT&T will endeavor, but is not required, to provide notice to AIN/Birch prior to the taking of such action and AT&T shall have no liability to AIN/Birch for any damages arising from such action, except to the extent that such action by AT&T constitutes willful misconduct.

5.14.3 For purposes of this Section, the term "significantly degrades" shall be defined as an action that noticeably impairs a service from a user's perspective. In the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services and AIN/Birch fails to cure the violation within forty-eight (48) hours, or if such cure is not possible, to commence curative action within twenty-four (24) hours and exercise reasonable diligence to complete such action as soon as possible, AT&T will establish before the appropriate Commission that the technology deployed is causing the significant degradation. Any claims of network harm presented to AIN/Birch or, if subsequently necessary, the Commission must be provided by AT&T with specific and verifiable information. When AT&T demonstrates that a certain technology deployed by AIN/Birch is significantly degrading the performance of other advanced services or traditional voice band services, AIN/Birch shall discontinue deployment of that technology and migrate its customers to other technologies that will not significantly degrade the performance of such services. Where the only degraded service itself is a known disturber, and the newly deployed technology satisfies at least one of the criteria for a presumption that it is acceptable for deployment, pursuant to 47 C.F.R. § 51.230, the degraded service shall not prevail against the newly-deployed technology.

5.15 Personalty and Its Removal. Facilities and equipment placed by AIN/Birch in the Collocation Space shall not become a part of the Collocation Space, even if nailed, screwed or otherwise fastened to the Collocation Space, but shall retain their status as personal property and may be removed by AIN/Birch at any time. Any damage caused to the Collocation Space by AIN/Birch's employees, suppliers, agents or Guests during the installation or removal of such property shall be promptly repaired by AIN/Birch at its sole expense. If AIN/Birch decides to remove equipment and/or facilities from its Collocation Space and the removal requires no physical work be performed by AT&T and AIN/Birch's physical work includes, but is not limited to, power reduction, cross-connects, or tie pairs, AT&T will bill AIN/Birch the Administrative Only Application Fee associated

with the type of removal activity performed by AIN/Birch, as set forth in Exhibit B. This nonrecurring fee will be billed on the date that AT&T provides an Application Response to AIN/Birch.

- 5.16 Alterations. Under no condition shall AIN/Birch or any person acting on behalf of AIN/Birch make any rearrangement, modification, augment, improvement, addition, and/or other alteration which could affect in any way space, power, HVAC, and/or safety considerations to the Collocation Space or the AT&T Premises, hereinafter referred to individually or collectively as "Alterations", without the express written consent of AT&T, which shall not be unreasonably withheld. The cost of any such Alteration shall be paid by AIN/Birch. An Alteration shall require the submission of a Subsequent Application and will result in the assessment of the applicable application fee associated with the type of alteration requested, as set forth in Sections 6.2.1 and 7.1.4 below, which will be billed by AT&T on the date that AT&T provides AIN/Birch with an Application Response.
- 5.17 Central Office Janitorial Service. AIN/Birch shall be responsible for the general upkeep of its Collocation Space. AIN/Birch shall arrange directly with a AT&T Certified Supplier for janitorial services applicable to caged Collocation Space. Upon request, AT&T shall provide a list of such suppliers on a AT&T Premises-specific basis.
- 5.18 Upkeep of Remote Collocation Space. AIN/Birch shall be responsible for the general upkeep and cleaning of the Remote Collocation Space. AIN/Birch shall be responsible for removing any of AIN/Birch's debris from the Remote Collocation Space and from in and around the Remote Site Location on each visit.

## **6 Ordering and Preparation of Collocation Space**

- 6.1 Initial Application. For AIN/Birch's or AIN/Birch's Guest's(s') initial equipment placement, AIN/Birch shall input a physical Expanded Interconnection Application Document (Initial Application) for physical Collocation Space directly into AT&T's electronic application (e.App) system for processing. The Initial Application is considered Bona Fide when it is complete and accurate, meaning that all of the required fields on the Initial Application are completed with the appropriate type of information. An Initial Application Fee, as set forth in Exhibit B, will apply to each Initial Application submitted by AIN/Birch for Central Office or Remote Site Collocation, as applicable, and will be billed by AT&T on the date AT&T provides AIN/Birch with an Application Response.
- 6.1.1 For Remote Site Collocation, a request for additional space at a later date will require the submission of an Initial Application. The installation of additional shelves/equipment within an existing bay does not require an Initial Application.
- 6.2 Subsequent Application. In the event AIN/Birch or AIN/Birch's Guest(s) desires to modify its use of the Collocation Space in a Central Office after a BFFO, AIN/Birch shall complete an application that contains all of the detailed information associated with a requested Alteration of the Collocation Space, as defined in Section 5.15 above (Subsequent Application). The Subsequent Application will be considered Bona Fide when it is complete and accurate, meaning that all of the required fields on the Subsequent Application have been completed with the appropriate type of information associated with the requested Alteration. AT&T shall determine what modifications, if any, to the AT&T Premises are required to accommodate the change(s) requested by AIN/Birch in the Subsequent Application. Such modifications to the AT&T Premises may include, but are not limited to, floor loading changes, changes necessary to meet HVAC requirements, changes to power plant requirements, equipment additions, etc.
- 6.2.1 Subsequent Application Fees. The application fee paid by AIN/Birch for an Alteration in a Central

Office shall be dependent upon the level of assessment needed to provide a complete Application Response for the Alteration requested. Where the Subsequent Application does not require provisioning or construction work, but requires AT&T to perform an administrative activity, an Administrative Only Application Fee shall apply as set forth in Exhibit B. The Administrative Only Application Fee will apply to Subsequent Applications associated with a transfer of ownership of the Collocation Space, the addition, exchange or removal of equipment from the Collocation Space (where the removal requires no physical work to be performed by AT&T which require no additional space, power or terminations to be provided to AIN/Birch's collocation arrangement), and a virtual-to-physical conversion (in place). The Co-Carrier Cross Connect/Direct Connect Application Fee will apply when AIN/Birch submits a Subsequent Application for a direct connection between its own physical and virtual Collocation Space(s) in the same AT&T Central Office or between its physical or virtual Collocation Space and that of another collocated telecommunications carrier within the same AT&T Central Office. In Florida and Tennessee, the Power Reconfiguration Only Application Fee will apply when AIN/Birch submits a Subsequent Application that reflects only an upgrade or reduction in the amount of power that AT&T is currently providing to AIN/Birch's physical Collocation Space in a Central Office. The fee for a Subsequent Application, for which the Alteration requested has limited effect (e.g., requires limited assessment and sufficient cable support structure, HVAC, power and terminations are available), shall be the Subsequent Application Fee, as set forth in Exhibit B. The appropriate nonrecurring application fee will be billed on the date that AT&T provides AIN/Birch with an Application Response.

- 6.3 Space Preferences. If AIN/Birch has previously requested and received a Space Availability Report for the AT&T Premises, AIN/Birch may submit up to three (3) space preferences on its application by identifying the specific space identification numbers referenced on the Space Availability Report for the space it is requesting. In the event AT&T cannot accommodate AIN/Birch's space preference(s), AIN/Birch may accept the space allocated by AT&T or cancel its application and submit another application requesting additional space preferences for the same AT&T Premises. This application will be treated as a new application and the appropriate application fee will apply. The application fee will be billed by AT&T on the date that AT&T provides AIN/Birch with an Application Response.
- 6.4 Space Availability Notification
- 6.4.1 For all states except Florida and Tennessee, AT&T will respond to an application within ten (10) days as to whether space is available or not available within the requested AT&T Premises. In Florida and Tennessee, AT&T will respond to an application within fifteen (15) days as to whether space is available or not available within a AT&T Premises. AT&T's e.App system will reflect when AIN/Birch's application is Bona Fide. If the application cannot be Bona Fide, AT&T will identify what revisions are necessary for the application to become Bona Fide.
- 6.4.2 If the amount of space requested is not available, AT&T will notify AIN/Birch of the amount of space that is available and no application fee will apply. When AT&T's response includes an amount of space less than that requested by AIN/Birch or space that is configured differently, no application fee will apply. If AIN/Birch decides to accept the available space, AIN/Birch must resubmit its application to reflect the actual space available, including the configuration of the space, prior to submitting a BFFO. When AIN/Birch resubmits its application to accept the available space, AT&T will bill AIN/Birch the appropriate application fee.
- 6.5 Denial of Application. If AT&T notifies AIN/Birch that no space is available (Denial of Application), AT&T will not assess an application fee to AIN/Birch. After notifying AIN/Birch that AT&T has no available space in the requested AT&T Premises, AT&T will allow AIN/Birch, upon request, to tour the entire AT&T Premises within ten (10) days of such Denial of Application. In order to schedule this tour, AT&T must receive the request for the tour of the AT&T Premises within five (5) days of

the Denial of Application.

- 6.6 Petition for Waiver. Upon Denial of Application, AT&T will timely file a petition with the appropriate Commission pursuant to 47 U.S.C. § 251(c)(6). AT&T shall provide to the Commission any information requested by that Commission. Such information shall include which space, if any, AT&T or any of AT&T's affiliates have reserved for future use and a detailed description of the specific future uses for which the space has been reserved. Subject to an appropriate nondisclosure agreement or provision, AT&T shall permit AIN/Birch to inspect any floor plans or diagrams that AT&T provides to the Commission.
- 6.7 Waiting List
- 6.7.1 On a first-come, first-serve basis, which is governed by the date of receipt of an application or Letter of Intent, AT&T will maintain a waiting list of requesting telecommunications carriers that have either received a Denial of Application or, where it is publicly known that a AT&T Premises is out of space, have submitted a Letter of Intent to collocate in that AT&T Premises. AT&T will notify each telecommunications carrier on the waiting list that can be accommodated by the amount of space that becomes available, according to the position of the telecommunications carrier on said waiting list.
- 6.7.2 In Florida, on a first-come, first-serve basis, which is governed by the date of receipt of an application or Letter of Intent, AT&T will maintain a waiting list of requesting telecommunications carriers that have either received a Denial of Application or, where it is publicly known that a AT&T Premises is out of space, have submitted a Letter of Intent to collocate in that AT&T Premises. Sixty (60) days prior to space becoming available, if known, AT&T will notify the Commission and the telecommunications carriers on the waiting list by mail when space will become available. If AT&T does not know sixty (60) days in advance of when space will become available, AT&T will notify the Commission and the telecommunications carriers on the waiting list within two (2) business days of the determination that space will become available. A telecommunications carrier that, upon denial of physical Collocation Space, requests virtual Collocation Space shall automatically be placed on the waiting list for physical Collocation Space that may become available in the future.
- 6.7.3 When physical Collocation Space becomes available, AIN/Birch must submit an updated, complete and accurate application to AT&T within thirty (30) days of notification by AT&T that physical Collocation Space will be available in the requested AT&T Premises previously out of space. If AIN/Birch has originally requested caged Collocation Space and cageless Collocation Space becomes available, AIN/Birch may refuse such space and notify AT&T in writing, within the thirty (30) day timeframe referenced above, that AIN/Birch wishes to maintain its place on the waiting list for caged physical Collocation Space, without accepting the available cageless Collocation Space.
- 6.7.4 AIN/Birch may accept an amount of space less than what it originally requested by submitting an application as set forth above, and upon request, may maintain its position on the waiting list for the remaining space that was initially requested. If AIN/Birch does not submit an application or notify AT&T in writing within the thirty (30) day timeframe as described in Section 6.7.2 above, AT&T will offer the available space to the next telecommunications carrier on the waiting list and remove AIN/Birch from the waiting list. Upon request, AT&T will advise AIN/Birch as to its position on the waiting list for a particular AT&T Premises.
- 6.8 Public Notification. AT&T will maintain on its Wholesale – Southeast Region Web site, a notification document that will indicate all AT&T Premises that are without available space. AT&T shall update such document within ten (10) days of the date that AT&T becomes aware that insufficient space is available to accommodate physical Collocation. AT&T will also post a document on its Wholesale Southeast Region Web site that contains a general notice when space

becomes available in a AT&T Premises previously on the space exhaust list.

## 6.9 Application Response

6.9.1 In Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina and South Carolina, when space has been determined to be available for physical (caged or cageless) Collocation arrangements, AT&T will provide an Application Response within twenty (20) days of receipt of a Bona Fide application. The Application Response will be a written response that includes sufficient information to enable AIN/Birch to place a Firm Order, which, at a minimum, will include the configuration of the space, the Cable Installation Fee, the Cable Records Fee, and any other applicable space preparation fees, as described in Section 8 below.

6.9.2 In Florida and Tennessee, within fifteen (15) days of receipt of a Bona Fide application, when space has been determined to be available or when a lesser amount of space than that requested is available, then with respect to the space available, AT&T will provide an Application Response including sufficient information to enable AIN/Birch to place a Firm Order. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, the Cable Records Fee and any other applicable space preparation fees, as described in Section 8 below. When AIN/Birch submits ten (10) or more applications within ten (10) days, the initial fifteen (15) day response interval will increase by ten (10) days for every additional ten (10) applications or fraction thereof.

6.10 Application Modifications. If a modification or revision is made to any information in the Bona Fide application after AT&T has provided the Application Response and prior to a BFFO, with the exception of modifications to (1) Customer Information, (2) Contact Information or (3) Billing Contact Information, whether at the request of AIN/Birch or as necessitated by technical considerations, the application shall be considered a new application and handled as a new application with respect to the response and provisioning intervals. AT&T will charge AIN/Birch the appropriate application fee associated with the level of assessment performed by AT&T, pursuant to Sections 6.1 and 6.2 above.

## 6.11 Bona Fide Firm Order

6.11.1 AIN/Birch shall indicate its intent to proceed with a Collocation Space request in a AT&T Premises by submitting a BFFO to AT&T. The BFFO must be received by AT&T no later than thirty (30) days after AT&T's Application Response to AIN/Birch's Bona Fide application or AIN/Birch's application will expire.

6.11.2 AT&T will establish a Firm Order date based upon the date AT&T is in receipt of AIN/Birch's BFFO. AT&T will acknowledge the receipt of AIN/Birch's BFFO within seven (7) days of receipt, so that AIN/Birch will have positive confirmation that its BFFO has been received. AT&T's response to a BFFO will include a Firm Order Confirmation, which contains the firm order date. No revisions may be made to a BFFO.

## 7 **Construction and Provisioning**

### 7.1 Construction and Provisioning Intervals

7.1.1 In Florida and Tennessee, AT&T will complete construction of physical Collocation Space as soon as possible within a maximum of ninety (90) days from receipt of a BFFO or as agreed to by the Parties. For virtual Collocation Space, AT&T will complete construction as soon as possible within a maximum of sixty (60) days from receipt of a BFFO or as agreed to by the Parties. For Alterations requested to Collocation Space after the initial space has been completed, AT&T will complete construction for Collocation Space as soon as possible within a maximum of forty-five (45) days from receipt of a BFFO or as agreed to by the Parties, as long as no additional space

has been requested by AIN/Birch. If additional space has been requested by AIN/Birch, AT&T will complete construction for the requested Collocation Space as soon as possible within a maximum of ninety (90) days from receipt of a BFFO for physical Collocation Space and forty five (45) days from receipt of a BFFO for virtual Collocation Space. If AT&T does not believe that construction will be completed within the relevant provisioning interval and AT&T and AIN/Birch cannot agree upon a completion date, within forty-five (45) days of receipt of the BFFO for an initial request, or within thirty (30) days of receipt of the BFFO for an Alteration, AT&T may seek an extension from the Commission.

- 7.1.2 In Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina and South Carolina, AT&T will complete construction for caged physical Collocation Space under ordinary conditions as soon as possible within a maximum of ninety (90) days from receipt of a BFFO or as agreed to by the Parties. AT&T will complete construction for cageless physical Collocation Space under ordinary conditions as soon as possible within a maximum of sixty (60) days from receipt of a BFFO and ninety (90) days from receipt of a BFFO for extraordinary conditions, or as agreed to by the Parties. Ordinary conditions are defined as space available with only minor changes required to AT&T's support systems. (Examples include, but are not limited to: minor modifications to HVAC, cabling and AT&T's power plant.) Extraordinary conditions include, but may not be limited to: major AT&T equipment rearrangements or additions; power plant additions or upgrades; major mechanical additions or upgrades; major upgrades for ADA compliance; environmental hazards or hazardous materials abatement; and arrangements for which equipment shipping intervals are extraordinary in length. The Parties may mutually agree to renegotiate an alternative provisioning interval for the Collocation Space requested or AT&T may seek a waiver from the ordered interval, as set forth above, from the appropriate Commission, if AT&T does not believe that construction will be completed within the relevant provisioning interval.
- 7.1.3 Records Only Change. When AIN/Birch adds equipment, that was originally included on AIN/Birch's Initial Application or a Subsequent Application, and the installation of this equipment requires no additional space preparation work or cable terminations on the part of AT&T, then AT&T will impose no additional charges or intervals.
- 7.1.4 For Central Offices in the states of Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, and South Carolina, AT&T will provide the reduced intervals outlined below to AIN/Birch, when AIN/Birch requests an Alteration specifically identified in Sections 7.1.4.1 through 7.1.4.9 below as an "Augment". Except as otherwise set forth in Section 7.1.4.10 below, such Augment will require a Subsequent Application and will result in the assessment of the appropriate application fee associated with the type of Augment requested by AIN/Birch. AT&T will assess the appropriate nonrecurring application fee set forth in Exhibit B on the date that it provides an Application Response to AIN/Birch.
- 7.1.4.1 Simple Augments will be completed within twenty (20) days after receipt of the BFFO for an:
- Extension of Existing AC Circuit Capacity within Arrangement where Sufficient Circuit Capacity is Available
  - Fuse Change and/or Increase or Decrease -48 Volt (-48V) DC Power
- 7.1.4.2 Minor Augments will be completed within forty-five (45) days after receipt of the BFFO for:
- 168 DS1 Terminations at the AT&T Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)
  - 96 DS3 Terminations at the AT&T Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)

- 99 Fiber terminations at the AT&T Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)
- Maximum of 2000 Service Ready DS0 Terminations at the AT&T Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)

- 7.1.4.3 Intermediate Augments will be completed within sixty (60) days after receipt of the BFFO for:
- 168 DS1s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure, as Required)
  - 96 DS3s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure, as Required)
  - 99 Fiber Terminations (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure, as Required)
  - 2000 DS0s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure, as Required)
  - Installation of Cable Racking or Other Support Structure, as Required, to Support CCXCs (Adequate Floor or Ceiling Structural Capacity Exists and Support/Protection structure for Fiber Patch Cord is Excluded)
- 7.1.4.4 Major Augments of physical Collocation Space will be completed within ninety (90) days after BFFO. All requests for additional Physical Collocation Space (caged or cageless) are included in this category.
- 7.1.4.5 Major Augments of virtual Collocation Space will be completed within seventy-five (75) days after BFFO. This category includes all requests for additional virtual Collocation Space.
- 7.1.4.6 If AIN/Birch submits an Augment that includes two (2) Augment items from the same category in either Sections 7.1.4.1, 7.1.4.2 or 7.1.4.3 above, the provisioning interval associated with the next highest Augment category will apply (e.g., if two (2) items from the Minor Augment category are requested on the same request, then an interval of sixty (60) days from the receipt of the BFFO would apply, which is the interval associated with the Intermediate Augment category).
- 7.1.4.7 If AIN/Birch submits an Augment that includes three (3) Augment items from the same category in either Sections 7.1.4.1, 7.1.4.2, or 7.1.4.3 above, the Major Augment interval of ninety (90) days from the receipt of the BFFO would apply (e.g., if three (3) items from the Simple Augment category are requested on the same request for a physical Collocation arrangement, then an interval of ninety (90) days from the receipt of the BFFO would apply, which is the Major physical Augment interval; likewise if three (3) items from the Simple Augment category are requested on the same request for a virtual Collocation arrangement, then an interval of seventy-five (75) days from the receipt of the BFFO would apply, which is the Major virtual Augment interval).
- 7.1.4.8 If AIN/Birch submits an Augment that includes one (1) Augment item from two (2) separate categories in Sections 7.1.4.1, 7.1.4.2 and 7.1.4.3 above, the Augment interval associated with the highest Augment category will apply (e.g., if an item from the Minor Augment category and an item from the Intermediate Augment category are requested on the same request, then an interval of sixty (60) days from the receipt of the BFFO would apply, which is the interval associated with the Intermediate Augment category).
- 7.1.4.9 All Augments not expressly included in the Simple, Minor, Intermediate or Major Augment categories, as outlined above, will be placed into the appropriate category as negotiated by AIN/Birch and AT&T. If AIN/Birch and AT&T are unable to determine the appropriate category

through negotiation, then the appropriate Major Augment category, identified in Sections 7.1.4.4 and Section 7.1.4.5 above, would apply based on whether the Augment is for AIN/Birch's physical or virtual Collocation Space.

- 7.1.4.10 Individual application fees associated with Simple, Minor and Intermediate Augments are contained in Exhibit B. If AIN/Birch requests multiple items from different Augment categories, AT&T will bill AIN/Birch the Augment application fee, as identified in Exhibit B, associated with the higher Augment category only. The appropriate application fee will be assessed to AIN/Birch at the time AT&T provides AIN/Birch with the Application Response. AIN/Birch will be assessed a Subsequent Application Fee for all Major Augments (Major Augments are defined above in Sections 7.1.4.4 and 7.1.4.5 above for physical and virtual Collocation Space, respectively). The Subsequent Application Fee is also reflected in Exhibit B.
- 7.2 Joint Planning. Unless otherwise agreed to by the Parties, a joint planning meeting or other method of joint planning between AT&T and AIN/Birch will commence within a maximum of twenty (20) days from AT&T's receipt of a BFFO. At such meeting, the Parties will agree to the preliminary design of the Collocation Space and the equipment configuration requirements, as reflected in the application and affirmed in the BFFO.
- 7.3 Permits. Each Party, its agent(s) or AT&T Certified Supplier(s) will diligently pursue filing for the permits required for the scope of work to be performed by that Party, its agent(s) or AT&T Certified Supplier(s) within ten (10) days of the completion of the finalized construction design and specifications.
- 7.4 Central Office Circuit Facility Assignments
- 7.4.1 Unless otherwise specified, AT&T will provide Circuit Facility Assignments (CFAs) to AIN/Birch prior to the applicable provisioning interval set forth herein (Provisioning Interval) for those AT&T Premises in which AIN/Birch has physical Collocation Space with no POT bay or with a grandfathered POT bay provided by AT&T. AT&T cannot provide CFAs to AIN/Birch prior to the Provisioning Interval for those AT&T Premises in which AIN/Birch has physical Collocation Space with a POT bay provided by AIN/Birch or virtual Collocation Space, until AIN/Birch has provided AT&T with the following information:
- 7.4.1.1 For physical Central Office Collocation Space with a AIN/Birch-provided POT bay, AIN/Birch shall provide AT&T with a complete layout of the POT panels on an Equipment Inventory Update (EIU) form that shows the locations, speeds, etc.; or
- 7.4.1.2 For virtual Central Office Collocation Space, AIN/Birch shall provide AT&T with a complete layout of AIN/Birch's equipment on an EIU form, that includes the locations of the low speed ports and the specific frame terminations to which the equipment will be wired by AIN/Birch's AT&T Certified Supplier.
- 7.4.2 AT&T cannot begin work on the CFAs until the complete and accurate EIU form has been received from AIN/Birch. If the EIU form is provided within ten (10) days prior to the ending date of the Provisioning Interval, then the CFAs will be made available by the ending date of the Provisioning Interval. If the EIU form is not received ten (10) days prior to the ending date of the Provisioning Interval, then the CFAs will be provided within ten (10) days of AT&T's receipt of the EIU form.
- 7.4.3 AT&T will bill AIN/Birch a nonrecurring charge, as set forth in Exhibit B, each time AIN/Birch requests a resend of its original CFA information for any reason other than a AT&T error in the CFAs initially provided to AIN/Birch.
- 7.5 Use of AT&T Certified Supplier. AIN/Birch shall select a supplier which has been approved as a AT&T Certified Supplier to perform all engineering and installation work. AIN/Birch, if a AT&T

Certified Supplier or AIN/Birch's AT&T Certified Supplier must follow and comply with all of AT&T's specifications and the following AT&T Technical Requirements: TR 73503, TR 73519, TR 73572 and TR 73564. Unless the AT&T Certified Supplier has met the requirements for all of the required work activities, AIN/Birch must use a different AT&T Certified Supplier for the work activities associated with transmission equipment, switching equipment and power equipment. AT&T shall provide AIN/Birch with a list of AT&T Certified Suppliers, upon request. AIN/Birch, if a AT&T Certified Supplier, or AIN/Birch's AT&T Certified Supplier(s) shall be responsible for installing AIN/Birch's equipment and associated components, extending power cabling to the AT&T power distribution frame, performing operational tests after installation is complete, and notifying AT&T's equipment engineers and AIN/Birch upon successful completion of the installation and any associated work. When a AT&T Certified Supplier is used by AIN/Birch, the AT&T Certified Supplier shall bill AIN/Birch directly for all work performed for AIN/Birch pursuant to this Attachment. AT&T shall have no liability for nor responsibility to pay, such charges imposed by AIN/Birch's AT&T Certified Supplier. AT&T shall make available its supplier certification program to AIN/Birch or any supplier proposed by AIN/Birch and will not unreasonably withhold certification. All work performed by or for AIN/Birch shall conform to generally accepted industry standards.

- 7.6 Alarms and Monitoring. AT&T shall place environmental alarms in the AT&T Premises for the protection of AT&T equipment and facilities. AIN/Birch shall be responsible for the placement, monitoring and removal of environmental and equipment alarms used to service AIN/Birch's Collocation Space. Upon request, AT&T will provide AIN/Birch with an applicable AT&T tariffed service(s) to facilitate remote monitoring of collocated equipment by AIN/Birch. Both Parties shall use best efforts to notify the other of any verified environmental condition (e.g., temperature extremes or excess humidity) known to that Party.
- 7.7 Virtual to Physical Relocation. In the event physical Collocation Space was previously denied at a AT&T Central Office due to technical reasons or space limitations and physical Collocation Space has subsequently become available, AIN/Birch may relocate its existing virtual Collocation arrangement(s) to a physical Collocation arrangement(s) and pay the appropriate fees associated with the rearrangement or reconfiguration of the services being terminated into the virtual Collocation arrangement, as set forth in Exhibit B. If AT&T knows when additional physical Collocation Space may become available at the AT&T Central Office requested by AIN/Birch, such information will be provided to AIN/Birch in AT&T's written denial of physical Collocation Space. AIN/Birch must arrange with a AT&T Certified Supplier for the relocation of equipment from a virtual Collocation Space to a physical Collocation Space and will bear the cost of such relocation, including the costs associated with moving the services from the virtual Collocation Space to the new physical Collocation Space.
- 7.7.1 In Alabama, AT&T will complete a relocation of a virtual collocation arrangement to a cageless physical collocation arrangement within sixty (60) days from AT&T's receipt of a BFFO and from a virtual collocation arrangement to a caged physical collocation arrangement within ninety (90) days from AT&T's receipt of a BFFO.
- 7.8 Virtual to Physical Conversion (In-Place)
- 7.8.1 Virtual collocation arrangements in Central Offices may be converted to "in-place" physical caged collocation arrangements if the potential conversion meets all of the following criteria: (1) there is no change in the amount of equipment or the configuration of the equipment that was in the virtual Collocation Space; (2) the conversion of the virtual collocation arrangement will not cause the equipment or the results of that conversion to be located in a space that AT&T has reserved for its own future needs; and (3) any changes to the arrangement can be accommodated by existing power, HVAC, and other requirements. Unless otherwise specified herein, AT&T will complete virtual to physical Collocation Space conversions (in-place) within sixty (60) days from receipt of

the BFFO. AT&T will bill AIN/Birch an Administrative Only Application Fee, as set forth in Exhibit B, on the date AT&T provides an Application Response to AIN/Birch.

- 7.8.2 In Alabama and Tennessee, AT&T will complete virtual to physical conversions (in place) within thirty (30) days from receipt of the BFFO as long as the conversion meets all of the criteria specified in Section 7.8.1 above.
- 7.9 Cancellation. Unless otherwise specified in this Attachment, if at any time prior to Space Acceptance, AIN/Birch cancels its order for Collocation Space (Cancellation), AT&T will bill the applicable nonrecurring charge(s) for any and all work processes for which work has begun or been completed. In Florida, if AIN/Birch cancels its order for Collocation Space at any time prior to the Space Ready Date, no cancellation fee shall be assessed by AT&T; however, AIN/Birch will be responsible for reimbursing AT&T for any costs specifically incurred by AT&T on behalf of AIN/Birch up to the date that the written notice of cancellation was received by AT&T. In Georgia, if AIN/Birch cancels its order for Collocation Space at any time prior to space acceptance, AT&T will bill AIN/Birch for all costs incurred prior to the date of Cancellation and for any costs incurred as a direct result of the Cancellation, not to exceed the total amount that would have been due had the Firm Order not been canceled.
- 7.10 Licenses. AIN/Birch, at its own expense, will be solely responsible for obtaining from governmental authorities, and any other appropriate agency, entity, or person, all rights, privileges, permits, licenses and certificates necessary or required to operate as a provider of telecommunications services to the public or to build-out, equip and/or occupy Collocation Space in a AT&T Premises.
- 7.11 Environmental Compliance. The Parties agree to utilize and adhere to the Environmental Hazard Guidelines identified in Exhibit A attached hereto.
- 8 Rates and Charges**
- 8.1 Rates. AIN/Birch agrees to pay the rates and charges identified in Exhibit B attached hereto.
- 8.1.1 In Tennessee, if AIN/Birch elects the TRA rates as set forth in Exhibit C, the additional language also set forth in Exhibit C for Application Fee, Space Preparation, Floor Space and Caged Collocation Power Usage metering, will be effective in conjunction with the remaining terms and conditions of this Attachment.
- 8.1.2 Should AIN/Birch elect to transition to the TRA Option after the execution of this Agreement, AIN/Birch shall notify AT&T in writing sixty (60) days prior to the implementation of this election.
- 8.2 Application Fees. AT&T shall assess any nonrecurring application fees within thirty (30) days of the date that AT&T provides an Application Response to AIN/Birch or on AIN/Birch's next scheduled monthly billing statement.
- 8.3 Recurring Charges
- 8.3.1 If AIN/Birch has met the applicable fifteen (15) day acceptance walk through interval specified in Section 4.2 above, billing for recurring charges will begin upon the Space Acceptance Date. In the event AIN/Birch fails to complete an acceptance walk through within the applicable fifteen (15) day interval, billing for recurring charges will commence on the Space Ready Date. If AIN/Birch occupies the space prior to the Space Ready Date, the date AIN/Birch occupies the space is deemed the Space Acceptance Date and billing for recurring charges will begin on that date. The billing for all applicable monthly recurring charges will begin in AIN/Birch's next billing cycle and will include any prorated charges for the period from AIN/Birch's Space Acceptance Date or Space Ready Date, whichever is appropriate pursuant to Section 4.2 above, to the date the bill is issued by AT&T.

- 8.3.2 Unless otherwise stated in Section 8.9 below, monthly recurring charges for -48V DC power will be assessed per fused ampere (amp), per month, based upon the total number of fused amps of power capacity requested by AIN/Birch on AIN/Birch's Initial Collocation Application and all Subsequent Collocation Applications, which may either increase or decrease the originally requested, and any subsequently augmented, number of fused amps of power capacity requested, consistent with Commission orders.
- 8.3.3 AT&T shall have the right to inspect and inventory any DC power fuse installations at a AT&T BDFB or DC power circuit installations at AT&T's main power board for any AIN/Birch collocation arrangement, to verify that the total number of fused amps of power capacity installed by AIN/Birch's AT&T Certified Supplier matches the number of fused amps of DC power capacity requested by AIN/Birch on AIN/Birch's Initial Application and all Subsequent Applications. If AT&T determines that AIN/Birch's AT&T Certified Supplier has installed more DC capacity than AIN/Birch requested on its Initial Application and all Subsequent Applications, AT&T shall notify AIN/Birch in writing of such discrepancy and shall assess AIN/Birch for the additional DC power fuse/circuit capacity from the Space Acceptance Date or Space Ready Date, whichever is applicable pursuant to Section 8.3.1 above, for the most recent Initial Application or Subsequent Application, submitted for such collocation arrangement. AT&T shall also revise AIN/Birch's recurring DC power charges, on a going-forward basis, to reflect the higher number of fused amps of power capacity available for the collocation arrangement.
- 8.4 Nonrecurring Charges. Unless specified otherwise herein, AT&T shall assess nonrecurring charges, including all application fees, within thirty (30) days of the date that AT&T provides an Application Response to AIN/Birch or on AIN/Birch's next scheduled monthly billing statement, if AIN/Birch's current month's billing cycle has already closed. Nonrecurring charges associated with the processing of the Firm Order for collocation space preparation (Firm Order Processing Fee) shall be billed by AT&T within thirty (30) days of AT&T's confirmation of AIN/Birch's BFFO or on AIN/Birch's next scheduled monthly billing statement.
- 8.5 In some cases, Commissions have ordered AT&T to separate its disconnect costs and its installation costs into two separate nonrecurring charges. Accordingly, unless otherwise noted in this Agreement, the Commission ordered disconnect charges will be applied at the time the disconnect activity is performed by AT&T, regardless of whether or not a disconnect order is issued by AIN/Birch. Disconnect charges are set forth in Exhibit B of this Attachment.
- 8.6 Central Office Space Preparation. Space preparation fees consist of a nonrecurring charge for Firm Order Processing and monthly recurring charges for Central Office Modifications and Common Systems Modifications. For all states except Florida, AIN/Birch shall remit the payment of the nonrecurring Firm Order Processing Fee coincident with the submission of AIN/Birch's BFFO. In Florida, the nonrecurring Firm Order Processing Fee will be billed by AT&T, pursuant to Section 8.4 above. The monthly recurring charge for Central Office Modifications will be assessed per arrangement, per square foot, for both caged and cageless physical Collocation Space. The monthly recurring charge for Common Systems Modifications will be assessed per arrangement, per square foot for cageless physical Collocation Space and on a per cage basis for caged physical Collocation Space. These charges recover the costs associated with preparing the Collocation Space, which includes, but is not limited to, the following items: a survey, engineering of the Collocation Space, and design and modification costs for network, building and support systems.
- 8.7 Central Office Floor Space. The Floor Space Charge includes reasonable charges for lighting, HVAC, and other allocated expenses associated with maintenance of the AT&T Premises; however, this charge does not include any expenses associated with AC or DC power supplied to AIN/Birch's Collocation Space for the operation of AIN/Birch's equipment. For caged physical

Collocation Space, AIN/Birch shall pay floor space charges based upon the number of square feet enclosed. The minimum size for caged Collocation Space is fifty (50) square feet. Additional caged Collocation Space may be requested in increments of fifty (50) square feet. For cageless Collocation Space, AIN/Birch shall pay floor space charges based upon the following floor space calculation:  $[(\text{depth of the equipment lineup in which the rack is placed}) + (0.5 \times \text{maintenance aisle depth}) + (0.5 \times \text{wiring aisle depth})] \times (\text{width of rack and spacers})$ . For purposes of this calculation, the depth of the equipment lineup shall consider the footprint of equipment racks plus any equipment overhang. AT&T will assign cageless Collocation Space in conventional equipment rack lineups where feasible. In the event AIN/Birch's collocated equipment requires special cable racking, an isolated ground plane, or any other considerations and treatment which prevents placement within conventional equipment rack lineups, AIN/Birch shall be required to request an amount of floor space sufficient to accommodate the total equipment arrangement.

8.8 Remote Site Bay Space. In a Remote Site, the bay space charge recovers the costs associated with air conditioning, ventilation and other allocated expenses for the maintenance of the Remote Site Location, and includes the amperage necessary to power AIN/Birch's equipment. AIN/Birch shall remit bay space charges based upon the number of bays requested. AT&T will assign Remote Site Collocation Space in conventional Remote Site bay lineups where feasible.

8.9 Power

8.9.1 In a Central Office AT&T shall make available -48V DC power for AIN/Birch's Collocation Space at a AT&T BDFB. When obtaining DC power from a AT&T BDFB, AIN/Birch's fuses and power cables (for the A & B feeds) must be engineered (sized), and installed by AIN/Birch's AT&T Certified Supplier, in accordance with the number of fused amps of DC power requested by AIN/Birch on AIN/Birch's Initial Application and any Subsequent Applications. AIN/Birch is also responsible for contracting with a AT&T Certified Supplier to run the power distribution feeder cable from the AT&T BDFB to the equipment in AIN/Birch's Collocation Space. The AT&T Certified Supplier contracted by AIN/Birch must provide AT&T with a copy of the engineering power specifications prior to the day on which AIN/Birch's equipment becomes operational (hereinafter "Commencement Date"). AT&T will provide the common power feeder cable support structure between the AT&T BDFB and AIN/Birch's Collocation Space. AIN/Birch shall contract with a AT&T Certified Supplier who shall be responsible for performing those power provisioning activities required to enable AIN/Birch's equipment to become operational, which may include, but are not limited to, the installation, removal or replacement of the following: dedicated power cable support structure within AIN/Birch's Collocation Space, power cable feeds and terminations of the power cabling. AIN/Birch and AIN/Birch's AT&T Certified Supplier shall comply with all applicable NEC, AT&T TR 73503, Telcordia and ANSI Standards that address power cabling, installation and maintenance.

8.9.1.1 At a Remote Site, AT&T shall make available -48V DC power for AIN/Birch's Remote Collocation Space at a BDFB within the Remote Site Location. The charge for power shall be assessed as part of the recurring charge for bay space, as referenced in Section 8.6 above. If the power requirements for AIN/Birch's equipment exceed the capacity available, then such additional power requirements shall be assessed on an individual case basis.

8.9.2 In Florida Central Offices only, subject to technical feasibility, commercial availability and safety limitations, AT&T will permit AIN/Birch to request DC power in five (5) amp increments from five (5) amps up to one hundred (100) amps from the AT&T BDFB. However, in accordance with industry standard fuse sizing, AIN/Birch may request that AT&T provision DC power of seventy (70) amps or greater directly from AT&T's main power board. The industry standard fuse size (which is a circuit breaker on the main power board) available at a AT&T main power board in all AT&T Premises is a two hundred twenty-five (225) amp circuit breaker.

- 8.9.3 AT&T will revise AIN/Birch's Central Office recurring power charges, in accordance with Section 8.3 above, to reflect a power upgrade when AIN/Birch submits a Subsequent Application requesting an increase in the number of fused amps it is currently receiving from AT&T for its Collocation Space. If AIN/Birch's existing fuses and power cables (for the A&B power feed) are not sufficient to support the additional number of fused amps requested, AIN/Birch's AT&T Certified Supplier shall perform whatever activities are necessary, which may include the installation of new/additional fuses or power cables, to comply with the appropriate NEC, AT&T TR 73503, Telcordia and ANSI Standards, as well as the requirements noted in Sections 8.9.1 and 8.9.1.1 above. AIN/Birch's AT&T Certified Supplier shall provide notification to AT&T when these activities have been completed.
- 8.9.4 AT&T will revise AIN/Birch's Central Office recurring power charges, in accordance with Section 8.3 above, to reflect a power reduction upon AT&T's receipt of the Power Reduction Form from AIN/Birch, certifying the completion of the power reduction work, including the removal of any associated power cabling by AIN/Birch's AT&T Certified Supplier. Notwithstanding the foregoing, if AIN/Birch's AT&T Certified Supplier has not removed or, at AT&T's discretion, cut the power cabling within thirty (30) days, the power reduction will not become effective until the cabling is removed or, at AT&T's discretion, cut by AIN/Birch's AT&T Certified Supplier and AIN/Birch shall pay for the amount of power that had been requested prior to the power reduction request for the period up to the date the power cabling is actually removed.
- 8.9.5 If AIN/Birch requests an increase or a reduction in the amount of power that AT&T is currently providing in a Central Office, AIN/Birch must submit a Subsequent Application. In all states other than Florida and Tennessee if no modification to the Collocation Space is requested other than the increase or reduction in power, the Simple Augment fee will apply. In Florida and Tennessee the Power Reconfiguration Only Application Fee as set forth in Exhibit B will apply. If modifications are requested in addition to the increase or reduction of power, the Subsequent Application Fee will apply. AT&T will bill this nonrecurring fee on the date that AT&T provides an Application Response to AIN/Birch's Subsequent Application.
- 8.9.5.1 In Central Offices in Alabama and Louisiana, if AIN/Birch has existing power configurations currently served from the AT&T main power board and requests that its power be reconfigured to connect to a AT&T BDFB, in a specific AT&T Premises, AIN/Birch must submit a Subsequent Application to AT&T. AT&T will provide a response to such application within seven (7) days and no Simple Augment Application Fee will be assessed by AT&T for this one time only power reconfiguration to a AT&T BDFB. For any power reconfigurations thereafter, AIN/Birch will submit a Subsequent Application and the appropriate Simple Augment Application Fee will apply.
- 8.9.6 If AIN/Birch elects to install its own DC Power Plant, AT&T shall provide AC power to feed AIN/Birch's DC Power Plant. Charges for AC power will be assessed on a per breaker ampere, per month basis, pursuant to the rates specified in Exhibit B. The AC power rates include recovery for the provision of commercial and standby AC power. When obtaining power from a AT&T service panel, protection devices and power cables must be engineered (sized) and installed by AIN/Birch's AT&T Certified Supplier, with the exception that AT&T shall engineer and install protection devices and power cables for Adjacent Collocation. AIN/Birch's AT&T Certified Supplier must provide a copy of the engineering power specifications prior to the Commencement Date. AC power voltage and phase ratings shall be determined on a per location basis. At AIN/Birch's option, AIN/Birch may arrange for AC power in an adjacent collocation arrangement from a retail provider of electrical power.
- 8.9.7 AIN/Birch shall contract with a AT&T Certified Supplier to perform the installation and removal of dedicated power cable support structure within AIN/Birch's arrangement and terminations of cable within the Collocation Space.

8.9.8 Fused Amp Power. In all states, except as otherwise set forth in this Agreement, AT&T shall make available -48V DC power on a per fused amp, per month basis, pursuant to the following:

For power provisioned from a BDFB. The number of fused amps requested by AIN/Birch on its collocation application for power that is being provisioned from a AT&T BDFB will be multiplied by the DC power fused amp rate set forth in Exhibit B. A minimum of ten (10) fused amps is required.

For existing power configurations that are provisioned from AT&T's main power board. The number of fused amps made available at the main power board, in increments of two hundred and twenty-five (225) amps/main power board circuit, will be multiplied by the DC power fused amp rate set forth in Exhibit B.

8.9.9 Florida Power Usage Option

8.9.9.1 In Central Offices in Florida only, AIN/Birch may request that -48 DC power provisioned by AT&T to AIN/Birch's Collocation Space be assessed per amp, per month based upon amps used, pursuant to the rates set forth in Exhibit B. Monthly recurring power charges will be assessed on the Space Acceptance Date or Space Ready Date, whichever is appropriate, pursuant to Section 8.3 above. If AIN/Birch desires to convert existing physical collocation arrangements to the Florida Power Usage Option (hereinafter "FL Option"), then the monthly recurring power charges that are applicable to the FL Option, contained in Exhibit B, will be assessed on the Space Ready Date associated with the Subsequent Application submitted by AIN/Birch to convert an existing collocation arrangement to the FL Option. The monthly recurring charges for DC power, under the FL Option, shall be calculated and applied based on the amount of power AIN/Birch requests that it be allowed to draw at a given time to a specific physical collocation arrangement in a particular AT&T Premises on AIN/Birch's Initial Application or Subsequent Application. AT&T shall allow AIN/Birch at AIN/Birch's option, to order a power feed that is capable of delivering a higher DC power level but to fuse this power feed so as to allow a power level less than the feed's maximum to be drawn by AIN/Birch. AT&T is not required to build its central office power infrastructure to meet AIN/Birch's forecasted DC power demand. AIN/Birch must specify on its Initial or Subsequent Application the power level it wishes to be able to draw from AT&T's power plant for each existing collocation arrangement AIN/Birch converts to the FL Option or for any new collocation arrangements AIN/Birch establishes under the FL Option.

8.9.9.2 AT&T, at any time and at its own expense, shall have the right to verify the accuracy of AIN/Birch's power usage under the FL Option for a specific collocation arrangement in a particular AT&T Premises, based on a meter reading(s) taken by AT&T of the amount of power being consumed by AIN/Birch's collocation arrangement. AT&T may perform its own meter reading(s) via any method it chooses, such as, but not limited to, a clamp-on ammeter. If the meter reading(s) varies by more than ten percent (10%) or five (5) amps from the power usage that has been requested by AIN/Birch for the collocation arrangement, under the FL Option, the Parties agree to work cooperatively to reconcile such discrepancy and establish the appropriate usage figure in a reasonable and expeditious manner. If the Parties substantiate AT&T's reading, then AT&T shall adjust AIN/Birch's billing to reflect AT&T's power reading beginning with the first day of the month immediately following the date of the last metered reading taken by AT&T.

8.9.9.3 AT&T shall assess AIN/Birch a monthly recurring charge for DC power under the FL Option, as set forth in Exhibit B. AIN/Birch shall notify AT&T of any change in its DC power usage by submitting a Subsequent Application, which reflects the new DC power level desired by AIN/Birch. The requested change in DC power usage will be reflected in AIN/Birch's next scheduled monthly billing cycle.

8.9.10 Tennessee Caged Collocation Power Usage Metering Option. In Central Offices in Tennessee

only, AIN/Birch may request that DC power provisioned by AT&T to AIN/Birch's caged Collocation Space be assessed pursuant to the orders entered by the Tennessee Regulatory Authority in Dockets 97-01262, 99-00430, and 00-00544 for Collocation for Tennessee. By electing the TRA Option, AIN/Birch accepts the TRA rates, terms and conditions of Exhibit C in their entirety in conjunction with the other terms and conditions of Attachment 4.

- 8.9.11 Georgia Caged Collocation Power Usage Metering Option. - In Georgia, AIN/Birch may request that DC power provisioned by AT&T to AIN/Birch's Collocation Space be assessed pursuant to Georgia Public Service Commission Order Docket No. 14361-U ("Order"). AT&T will assess AIN/Birch for -48V DC power using the actual number of load Amps measured. The power circuits may be fed from either a AT&T BDFB or AIN/Birch's BDFB. These recurring power charges will be assessed by AT&T on the Space Acceptance Date or Space Ready Date, whichever is appropriate, pursuant to Section 8.3.
- 8.9.11.1 Upon AIN/Birch's election of the power metering option AIN/Birch will convert existing caged collocation arrangements to the power metering rate structure. The recurring power charges that are contained Exhibit B of this Attachment will be assessed on the Space Ready Date associated with the Subsequent Application submitted by AIN/Birch to convert an existing caged collocation arrangement to the metered power rates.
- 8.9.11.2 Pursuant to the Order, AIN/Birch shall provide a Fluke Model 189 AC/DC multimeter and Fluke Model i410 clamp-on ammeter probe for each central office where they have requested metered power. One copy of the FlukeView software must also be provided for each Fluke 189 multimeter, and each copy must comply with Fluke copyrights.
- 8.9.11.3 AIN/Birch may, at its sole cost and expense, install its own meters on its BDFB(s) located in its own caged Collocation Space(s) and notify AT&T of the option of using such meters for the purposes of measuring AIN/Birch's actual power usage. In such case, AT&T, or its AT&T Certified Supplier, will have the option of reading and recording the actual power usage from either the meter installed on AIN/Birch's own BDFB(s) or via the aforementioned Fluke 189 multimeter equipped with a Fluke i410 clamp-on ammeter probe.
- 8.9.11.4 AT&T, at its sole option and at its own cost, may choose to purchase, install, and use its own ammeter measurement device. The usage reading for the option elected by AT&T shall be used for purposes of calculating the DC power usage billing.
- 8.9.11.5 AT&T, or its AT&T Certified Supplier, will perform all metering activities, to measure the actual power usage being drawn by AIN/Birch's collocation equipment on both the A and B power feeds. The charge will be the sum of both the A and B power feeds and will be based upon either an instantaneous reading or busy hour average current reading, depending on the capabilities of the ammeter measurement device.
- 8.9.11.6 If AT&T, or its AT&T Certified Supplier, requires access to AIN/Birch's caged Collocation Space(s) for purposes of measuring the power usage, AT&T or its AT&T Certified Supplier shall provide AIN/Birch with a minimum of forty-eight (48) hours (two business days) notice that access is required. AIN/Birch shall respond to such request for access within twenty-four (24) hours for the purpose of establishing the date and time of access to AIN/Birch's caged Collocation Space(s). Once the date and time of access to AIN/Birch's caged Collocation Space(s) has been agreed upon, AIN/Birch and AT&T, or its AT&T Certified Supplier, shall adhere to the agreed upon date and time, or provide a minimum of three (3) hours notice to the other Party if the original appointment(s) will be missed or must be canceled and rescheduled. Once a mutually agreed upon date and time are established and AIN/Birch does not provide minimum of three (3) hours notice, AT&T's Certified Supplier will only remain at the site for thirty (30) minutes. After thirty (30) minutes the appointment will be considered missed by AIN/Birch.

- 8.9.11.7 If AIN/Birch fails to provide access to its caged Collocation Space(s) or fails to provide AT&T, or its AT&T Certified Supplier, with sufficient notification of the missed appointment(s), as noted above, then AIN/Birch shall pay the nonrecurring “Additional Meter Reading Trip Charge”, as set forth in Exhibit B of this Attachment, for each additional meter reading trip that must be rescheduled to measure AIN/Birch’s power usage for such caged Collocation Space(s). AIN/Birch and the AT&T Certified Supplier may jointly agree to less stringent notification requirements to address, for example, any service interruption or restoration of service situations, on a location-by-location basis.
- 8.9.11.8 For each new caged collocation arrangement, AIN/Birch shall indicate on AIN/Birch’s Initial Application that they are electing to have metered power. For each location that AIN/Birch wishes to convert to metered power AIN/Birch will submit a Subsequent Application and agrees to include in the Comments section of the Subsequent Application the following comment:
- This Subsequent Application is AIN/Birch’s certification that AIN/Birch is opting to convert this caged collocation arrangement to metered power and will permit AT&T, or the AT&T Certified Supplier, to measure its actual power usage on all power feeds.
- 8.9.11.9 AT&T will bill AIN/Birch a Simple Augment Application Fee, as set forth in Exhibit B of this Attachment, on the date that AT&T provides an Application Response to each Subsequent Application submitted by AIN/Birch converting its caged collocation arrangements to the metered power rates. AT&T shall then arrange for the measurement of AIN/Birch’s actual power usage on each power feed (each A and B power feed) once each quarter at each of AIN/Birch’s caged collocation arrangements for which AIN/Birch has submitted an Initial or Subsequent Application electing metered power.
- 8.9.11.10 Based upon the actual power usage measurement taken by AT&T or the AT&T Certified Supplier, AT&T shall assess AIN/Birch for power usage for the following quarter based upon AIN/Birch’s actual metered usage for each power feed (both the A and B power feeds) or a minimum of ten (10) amps of –48V DC power usage for the sum of the A and B feeds for each power cable, whichever is greater. Such usage shall then be multiplied by the rate for Load Amps either with a AT&T BDFB or with AIN/Birch BDFB as set forth in Exhibit B of this Attachment, to determine the appropriate monthly recurring power usage charge that will be billed to AIN/Birch for the following three (3) months or until the next power usage measurement is taken, whichever is later.
- 8.9.11.11 Either Party, within fifteen (15) days of notice of the usage measurement established by the scheduled meter reading, may challenge the accuracy of that reading by requesting a new reading. If AIN/Birch requests that an unscheduled (prior to the next scheduled quarterly power reading date) power usage reading be taken, then AIN/Birch will be responsible for paying the “Additional Meter Reading Trip Charge” contained in Exhibit B of this Attachment. If AT&T requests a power usage reading be taken in this instance, then AIN/Birch will not be charged the “Additional Meter Reading Trip Charge” for the unscheduled meter reading. If the readings vary by more than ten (10) % or five (5) Amps, whichever is greater, the Parties shall work cooperatively to reconcile such discrepancies and establish the appropriate usage figure in a reasonable and expeditious manner. If the readings do not vary outside these ranges, the initial reading will be used to calculate AIN/Birch’s AC usage charge for the next three (3) months.
- 8.9.11.12 AT&T, at any time and at its own expense, shall have the right to verify the accuracy of AIN/Birch’s BDFB meter by performing its own meter reading via an alternate method, such as, but not limited to, an ammeter. If the meter readings vary by more than ten (10) % or five (5) Amps, whichever is greater, the Parties agree to perform a joint investigation. If AIN/Birch’s BDFB meter is found to be in error, then AIN/Birch agrees to recalibrate, repair, or replace its meter as required. The Parties recognize that the meter readings discussed in this Attachment are instantaneous readings that

can experience minor fluctuations due to usage traffic, voltage fluctuations, and calibration of the meters themselves. The readings must vary by more than ten (10) % or five (5) Amps, whichever is greater, before any recalibration, repair, or replacement will be required. If the AT&T reading is substantiated, AT&T shall adjust AIN/Birch's billing retroactive to the beginning of the quarter for which the last meter reading was taken.

- 8.9.11.13 When AIN/Birch submits the appropriate Initial or Subsequent Application for a specific caged collocation arrangement in a particular AT&T Premises, AT&T will provide the associated Application Response pursuant to Section 6 above. It will then be the responsibility of AIN/Birch to submit a BFFO. After AT&T receives the BFFO from AIN/Birch, the Initial or Subsequent Application will be completed by AT&T within the provisioning intervals contained in Section 7 above and AIN/Birch will be notified of the Space Ready Date or when the appropriate record and database changes have been made by AT&T to reflect AIN/Birch's conversion to the metered power rates (which will be considered the "Space Ready Date" for purposes of a Subsequent Application submitted to convert a specific caged collocation arrangement in a particular AT&T Premises to the metered power rates).
- 8.9.11.14 AT&T will not permit AIN/Birch to elect an earlier Space Acceptance Date than the Space Ready Date for any request submitted via a Subsequent Application for an existing caged collocation arrangement. When a Subsequent Application is used to elect metered power and there are no other changes requested, billing for the recurring charges associated with metered power will begin upon the Space Ready Date. If AIN/Birch occupies the space prior to the Space Ready Date, for Initial Application requests only, the date AIN/Birch occupies the space will be deemed the new Space Acceptance Date and billing for metered power will begin on that date. When AIN/Birch moves to metered power the number of fused amps of DC Power requested by AIN/Birch on its Initial or Subsequent Application will be used for calculating the number of amps to be billed until such time as AT&T or its AT&T Certified Supplier can perform, under the currently existing quarterly meter reading schedule, a reading of AIN/Birch's power usage for the requested caged Collocation Space. As soon as this reading has been taken, AT&T will adjust AIN/Birch's billing accordingly to reflect the actual metered usage back to the Space Acceptance Date. AT&T will also use this reading for billing purposes until the next quarterly meter reading is performed by AT&T or its AT&T Certified Supplier.
- 8.9.11.15 AIN/Birch agrees to submit a Subsequent Application to notify AT&T when AIN/Birch has removed or installed telecommunications equipment in AIN/Birch's physical Collocation Space to ensure that AIN/Birch's existing fused DC power capacity is sufficiently engineered to accommodate the power requirements associated with the installation of additional equipment in AIN/Birch's Collocation Space. An associated change in power usage will be reflected in the next quarterly power measurement billing cycle.
- 8.9.11.16 AT&T will bill AIN/Birch a monthly recurring charge per caged Collocation Space for each arrangement that AIN/Birch has converted to metered power or for new caged Collocation Spaces under the election of metered power. This "Meter Reading" monthly recurring rate element will be assessed per circuit for each circuit read by AT&T or its AT&T Certified Supplier, at the rates set forth in Exhibit B.
- 8.9.12 In Alabama and Louisiana, AIN/Birch has the option to purchase power directly from an electric utility company. Under such option, AIN/Birch is responsible for contracting with the electric utility company for its own power feed and meter and is financially responsible for purchasing all equipment necessary to accomplish the arrangement, including inverters, batteries, power boards, bus bars, BDFBs, backup power supplies and cabling. The actual work to install this arrangement must be performed by a AT&T Certified Supplier hired by AIN/Birch. AIN/Birch's AT&T Certified Supplier must comply with all applicable safety codes, including the NEC and National Electric

Safety Code (NESC) standards, in the installation of this power arrangement. If AIN/Birch currently has power supplied by AT&T, AIN/Birch may request to change its Collocation Space to obtain power from an electric utility company by submitting a Subsequent Application. AT&T will waive the application fee for this Subsequent Application if no other changes are requested therein. Any floor space, cable racking, etc., utilized by AIN/Birch in provisioning said power will be billed by AT&T on an ICB basis.

- 8.9.13 In South Carolina, AIN/Birch has the option to purchase power directly from an electric utility company where technically feasible and where space is available in a requested AT&T Premises. Under such option, AIN/Birch is responsible for contracting with the electric utility company for its own power feed and meter, and is financially responsible for purchasing all equipment necessary to accomplish the conversion of the commercial AC power to DC power, including inverters, batteries, power boards, bus bars, BDFBs, backup power supplies and power cabling. The actual work to install this arrangement must be performed by a AT&T Certified Supplier hired by AIN/Birch. AIN/Birch's AT&T Certified Supplier must comply with all applicable national, regional, state and local safety, electrical, fire and building codes, including the NESC standards, in the installing of this power arrangement, just as AT&T is required to comply with these codes. AIN/Birch must submit an application to AT&T for the appropriate amount of Collocation Space that AIN/Birch requires in order to install this type of power arrangement. AT&T will evaluate the request and determine if the appropriate amount of space is available within the AT&T Premises for the installation of AIN/Birch's power equipment and facilities. This type of power arrangement must be located in an appropriate area in the AT&T Premises that has been properly conditioned for the installation of power equipment and conforms to the applicable national, regional, state and local safety, electrical, fire and building codes. AT&T shall waive the application fee or any other nonrecurring charge that would otherwise be due from a CLEC that decides to reconfigure an existing collocation power arrangement so as to purchase power directly from an electric utility company as provided herein. AIN/Birch shall be responsible for the recurring charges associated with the additional space needed in the AT&T Premises for this type of power arrangement, including space required to place associated power-related equipment and facilities (i.e., batteries, generator, fuse panel, power meter, etc.). If there is no space available for this type of power arrangement in the requested AT&T Premises, AT&T may seek a waiver of these requirements from the Commission for the AT&T Premises requested. AIN/Birch would have the option to order its power needs directly from AT&T.
- 8.10 Central Office Cable Installation. Cable Installation fees will be assessed on a per entrance cable basis. This nonrecurring charge will be billed by AT&T upon receipt of AIN/Birch's BFFO. Charges for cable racking, cable support structure and entrance fiber structure are recurring fees and will also be assessed according to the rates set forth in Exhibit B.
- 8.11 Central Office Cable Records. Cable Records charges apply for work activities required to build or remove existing cable records assigned to AIN/Birch in AT&T's database systems. The VG/DS0 per cable record charge is for a maximum of thirty-six hundred (3,600) records per request. The fiber cable record charge is for a maximum of ninety-nine (99) records per request. Cable Record fees will be assessed as a nonrecurring charge, upon receipt of AIN/Birch's BFFO, in all AT&T states, except Louisiana. In Louisiana, Cable Record fees will be assessed on a monthly recurring charge basis, upon receipt of AIN/Birch's BFFO. All charges will be assessed the rates set forth in Exhibit B.
- 8.12 Security Escort. After AIN/Birch has used its one (1) accompanied site visit, pursuant to Section 5.12.1 above, and prior to AIN/Birch's completion of the AT&T Security Training requirements, contained in Section 12 below, a security escort will be required when AIN/Birch's employees, approved agent, supplier, or Guest(s) desire access to the entrance manhole or a AT&T Premises. The rates for security escort service are assessed pursuant to the fee schedule contained in

Exhibit B, beginning with the scheduled escort time agreed to by the Parties. AT&T will wait for one-half (1/2) hour after the scheduled escort time to provide such requested escort service and AIN/Birch shall pay for such half-hour charges in the event AIN/Birch's employees, approved agent, supplier or Guest(s) fails to show up for the scheduled escort appointment.

- 8.13 Other. If no collocation rate element and associated rate is identified in Exhibit B, the Parties, upon request by either Party, will negotiate the rate for the specific collocation service or function identified in this Attachment.

## **9 Insurance**

- 9.1 AIN/Birch shall, at its sole cost and expense, procure, maintain, and keep in force insurance as specified in this Section and underwritten by insurance companies licensed to do business in the states applicable under this Agreement and having a Best's Insurance Rating of A.
- 9.2 AIN/Birch shall maintain the following specific coverage:
- 9.2.1 Commercial General Liability coverage in the amount of ten million dollars (\$10,000,000) or a combination of Commercial General Liability and Excess/Umbrella coverage totaling not less than ten million dollars (\$10,000,000). AT&T shall be named as an Additional Insured on the Commercial General Liability policy as specified herein.
- 9.2.2 Statutory Workers Compensation coverage and Employers Liability coverage in the amount of one hundred thousand dollars (\$100,000) each accident, one hundred thousand dollars (\$100,000) each employee by disease, and five hundred thousand dollars (\$500,000) policy limit by disease.
- 9.2.3 All Risk Property coverage on a full replacement cost basis insuring all of AIN/Birch's real and personal property situated on or within a AT&T Premises.
- 9.2.4 AIN/Birch may elect to purchase business interruption and contingent business interruption insurance, having been advised that AT&T assumes no liability for loss of profit or revenues should an interruption of service occur.
- 9.3 The limits set forth in Section 9.2 above may be increased by AT&T from time to time during the term of this Agreement, upon thirty (30) days notice to AIN/Birch, to at least such minimum limits as shall then be customary with respect to comparable occupancy of AT&T structures.
- 9.4 All policies purchased by AIN/Birch shall be deemed to be primary and not contributing to or in excess of any similar coverage purchased by AT&T. All insurance must be in effect on or before the date equipment is delivered to AT&T's Premises and shall remain in effect for the term of this Agreement or until all of AIN/Birch's property has been removed from AT&T's Premises, whichever period is longer. If AIN/Birch fails to maintain required coverage, AT&T may pay the premiums thereon and seek reimbursement of same from AIN/Birch.
- 9.5 AIN/Birch shall submit certificates of insurance reflecting the coverage required pursuant to this Section within a minimum of ten (10) business days prior to the commencement of any work in the Collocation Space. Failure to meet this interval may result in construction and equipment installation delays. AIN/Birch shall arrange for AT&T to receive thirty (30) business days' advance notice of cancellation or non-renewal from AIN/Birch's insurance company. AIN/Birch shall forward a certificate of insurance and notice of cancellation/non-renewal to AT&T at the following address:

AT&T Southeast  
Collocation Service Center  
600 North 19<sup>th</sup> Street  
22<sup>nd</sup> Floor

Birmingham, AL 35203

- 9.6 AIN/Birch must conform to recommendations made by AT&T's fire insurance company to the extent AT&T has agreed to, or shall hereafter agree to, such recommendations.
- 9.7 Self Insurance. If AIN/Birch's net worth exceeds five hundred million dollars (\$500,000,000), AIN/Birch may elect to request self-insurance status in lieu of obtaining any of the insurance required in Section 9.2 above. AIN/Birch shall provide audited financial statements to AT&T thirty (30) days prior to the commencement of any work in the Collocation Space. AT&T shall then review such audited financial statements and respond in writing to AIN/Birch in the event that self-insurance status is not granted to AIN/Birch. If AT&T approves AIN/Birch for self-insurance, AIN/Birch shall annually furnish to AT&T, and keep current, evidence of such net worth that is attested to by one of AIN/Birch's corporate officers. The ability to self-insure shall continue so long as AIN/Birch meets all of the requirements of this Section. If AIN/Birch subsequently no longer satisfies the requirements of this Section, AIN/Birch is required to purchase insurance as indicated by Section 9.2 above.
- 9.8 The net worth requirements set forth in Section 9.7 above may be increased by AT&T from time to time during the term of this Agreement upon thirty (30) days' notice to AIN/Birch to at least such minimum limits as shall then be customary with respect to comparable occupancy of a AT&T Premises.
- 9.9 Failure to comply with the provisions of this Section will be deemed a material breach of this Attachment.
- 10 Mechanics Lien**
- 10.1 If any mechanics lien or other liens are filed against property of either Party (AT&T or AIN/Birch), or any improvement thereon by reason of or arising out of any labor or materials furnished or alleged to have been furnished or to be furnished to or for the other Party or by reason of any changes, or additions to said property made at the request or under the direction of the other Party, the other Party directing or requesting those changes shall, within thirty (30) business days after receipt of written notice from the Party against whose property said lien has been filed, either pay such lien or cause the same to be bonded off the affected property in the manner provided by law. The Party causing said lien to be placed against the property of the other shall also defend at its sole cost and expense, on behalf of the other, any action, suit or proceeding which may be brought for the enforcement of such liens and shall pay any damage and discharge any judgment entered thereon.
- 11 Inspections**
- 11.1 AT&T may conduct an inspection of AIN/Birch's equipment and facilities in AIN/Birch's Collocation Space(s) prior to the activation of facilities and/or services between AIN/Birch's equipment and equipment of AT&T. AT&T may conduct an inspection if AIN/Birch adds equipment and may otherwise conduct routine inspections at reasonable intervals mutually agreed upon by the Parties. AT&T shall provide AIN/Birch with a minimum of forty-eight (48) hours or two (2) business days, whichever is greater, advance notice of all such inspections. All costs of such inspections shall be borne by AT&T.
- 12 Security and Safety Requirements**
- 12.1 Unless otherwise specified, AIN/Birch will be required, at its own expense, to conduct a statewide

investigation of criminal history records for each AIN/Birch employee hired in the past five (5) years being considered for work on a AT&T Premises, for the states/counties where the AIN/Birch employee has worked and lived for the past five (5) years. Where state law does not permit statewide collection or reporting, an investigation of the applicable counties is acceptable. AIN/Birch shall not be required to perform this investigation if an affiliated company of AIN/Birch has performed an investigation of the AIN/Birch employee seeking access, if such investigation meets the criteria set forth above. This requirement will not apply if AIN/Birch has performed a pre-employment statewide investigation of criminal history records of the AIN/Birch employee for the states/counties where the AIN/Birch employee has worked and lived for the past five (5) years or, where state law does not permit a statewide investigation, an investigation of the applicable counties.

- 12.2 AIN/Birch will be required to administer to its personnel assigned to the AT&T Premises security training either provided by AT&T, or meeting criteria defined by AT&T at AT&T's Wholesale – Southeast Region Web site, [http://wholesale.att.com/reference\\_library/guides](http://wholesale.att.com/reference_library/guides).
- 12.3 AIN/Birch shall provide its employees and agents with picture identification, which must be worn and visible at all times while in AIN/Birch's Collocation Space or other areas in or around the AT&T Premises. The photo identification card shall bear, at a minimum, the employee's name and photo and AIN/Birch's name. AT&T reserves the right to remove from a AT&T Premises any employee of AIN/Birch not possessing identification issued by AIN/Birch or who has violated any of AT&T's policies as outlined in the CLEC Security Training documents. AIN/Birch shall hold AT&T harmless for any damages resulting from such removal of AIN/Birch's personnel from a AT&T Premises. AIN/Birch shall be solely responsible for ensuring that any Guest(s) of AIN/Birch is in compliance with all subsections of this Section.
- 12.4 AIN/Birch shall not assign to the AT&T Premises any personnel with records of felony criminal convictions. AIN/Birch shall not assign to the AT&T Premises any personnel with records of misdemeanor convictions, except for misdemeanor traffic violations, without advising AT&T of the nature and gravity of the offense(s). AT&T reserves the right to refuse building access to any of AIN/Birch's personnel who have been identified to have misdemeanor criminal convictions. Notwithstanding the foregoing, in the event AIN/Birch chooses not to advise AT&T of the nature and gravity of any misdemeanor conviction, AIN/Birch may, in the alternative, certify to AT&T that it shall not assign to the AT&T Premises any personnel with records of misdemeanor convictions (other than misdemeanor traffic violations).
- 12.4.1 AIN/Birch shall not knowingly assign to the AT&T Premises any individual who was a former employee of AT&T and whose employment with AT&T was terminated for a criminal offense, whether or not AT&T sought prosecution of the individual for the criminal offense.
- 12.4.2 AIN/Birch shall not knowingly assign to the AT&T Premises any individual who was a former supplier of AT&T and whose access to a AT&T Premises was revoked due to the commission of a criminal offense, whether or not AT&T sought prosecution of the individual for the criminal offense.
- 12.5 For each AIN/Birch employee or agent hired by AIN/Birch within the last five (5) years, who requires access to a AT&T Premises to perform work in AIN/Birch Collocation Space(s), AIN/Birch shall furnish AT&T certification that the aforementioned background check and security training were completed. This certification must be provided to and approved by AT&T before an employee or agent will be granted such access to a AT&T Premises. The certification will contain a statement that no felony convictions were found and certify that the employee completed the security training. If the employee's criminal history includes misdemeanor convictions, AIN/Birch will disclose the nature of the convictions to AT&T at that time. In the alternative, AIN/Birch may certify to AT&T that it shall not assign to the AT&T Premises any personnel with records of misdemeanor convictions, other than misdemeanor traffic violations.

- 12.5.1 For all other AIN/Birch employees requiring access to a AT&T Premises pursuant to this Attachment, AIN/Birch shall furnish AT&T, prior to an employee gaining such access, a certification that the employee is not subject to the requirements of Section 12.5 above and that security training was completed by the employee.
- 12.6 At AT&T's request, AIN/Birch shall promptly remove from the AT&T Premises any employee of AIN/Birch that AT&T does not wish to grant access to a AT&T Premises: 1) pursuant to any investigation conducted by AT&T, or 2) prior to the initiation of an investigation if an employee of AIN/Birch is found interfering with the property or personnel of AT&T or another collocated telecommunications carrier, provided that an investigation shall be promptly commenced by AT&T.
- 12.7 Security Violations. AT&T reserves the right to interview AIN/Birch's employees, agents, suppliers, or Guests in the event of wrongdoing in or around a AT&T Premises or involving AT&T's or another collocated telecommunications carrier's property or personnel, provided that AT&T shall provide reasonable notice to AIN/Birch's Security representative of such interview. AIN/Birch and its employees, agents, suppliers, or Guests shall reasonably cooperate with AT&T's investigation into allegations of wrongdoing or criminal conduct committed by, witnessed by, or involving AIN/Birch's employees, agents, suppliers, or Guests. Additionally, AT&T reserves the right to bill AIN/Birch for all reasonable costs associated with investigations involving its employees, agents, suppliers, or Guests if it is established and mutually agreed in good faith that AIN/Birch's employees, agents, suppliers, or Guests are responsible for the alleged act(s). AT&T shall bill AIN/Birch for AT&T property, which is stolen or damaged, where an investigation determines the culpability of AIN/Birch's employees, agents, suppliers, or Guests and where AIN/Birch agrees, in good faith, with the results of such investigation. AIN/Birch shall notify AT&T in writing immediately in the event that AIN/Birch discovers one of its employees, agents, suppliers, or Guests already working on the AT&T Premises is a possible security risk. Upon request of the other Party, the Party who is the employer shall discipline consistent with its employment practices, up to and including removal from AT&T's Premises, any employee found to have violated the security and safety requirements of this Section. AIN/Birch shall hold AT&T harmless for any damages resulting from such removal of AIN/Birch's personnel from a AT&T Premises.
- 12.8 Use of Supplies. Unauthorized use of equipment, supplies or other property by either Party, whether or not used routinely to provide telephone service will be strictly prohibited and handled appropriately. Costs associated with such unauthorized use may be charged to the offending Party, as may be all associated investigative costs.
- 12.9 Use of Official Lines. Except for non-toll calls necessary in the performance of their work, neither Party shall use the telephone(s) of the other Party on AT&T's Premises. Charges for unauthorized telephone calls may be charged to the offending Party, as may be all associated investigative costs.
- 12.10 Accountability. Full compliance with the Security requirements of this Section shall in no way limit the accountability of either Party to the other for the improper actions of its employees, agents, suppliers, or Guests.
- 13 Destruction of Collocation Space**
- 13.1 In the event a Collocation Space is wholly or partially damaged by fire, windstorm, hurricane, tornado, flood or by similar force majeure circumstances to such an extent as to be rendered wholly unsuitable for AIN/Birch's permitted use hereunder, then either Party may elect within ten (10) days after such damage, to terminate occupancy of the damaged Collocation Space, and if either Party shall so elect, by giving the other written notice of termination, both Parties shall stand released of and from further liability under the terms hereof. If the Collocation Space shall suffer only minor damage and shall not be rendered wholly unsuitable for AIN/Birch's permitted use, or is

damaged and the option to terminate is not exercised by either Party, AT&T covenants and agrees to proceed promptly without expense to AIN/Birch, except for improvements not to the property of AT&T, to repair the damage. AT&T shall have a reasonable time within which to rebuild or make any repairs, and such rebuilding and repairing shall be subject to delays caused by storms, shortages of labor and materials, government regulations, strikes, walkouts, and causes beyond the control of AT&T, which causes shall not be construed as limiting factors, but as exemplary only. AIN/Birch may, at its own expense, accelerate the rebuild of its Collocation Space and equipment provided, however, that a AT&T Certified Supplier is used and the necessary space preparation has been completed. If AIN/Birch's acceleration of the project increases the cost of the project, then those additional charges will be incurred at AIN/Birch's expense. Where allowed and where practical, AIN/Birch may erect a temporary facility while AT&T rebuilds or makes repairs. In all cases where the Collocation Space shall be rebuilt or repaired, AIN/Birch shall be entitled to an equitable abatement of rent and other charges, depending upon the unsuitability of the Collocation Space for AIN/Birch's permitted use, until such Collocation Space is fully repaired and restored and AIN/Birch's equipment installed therein (but in no event later than thirty (30) days after the Collocation Space is fully repaired and restored). Where AIN/Birch has placed an Adjacent Arrangement pursuant to Section 3.4 above, AIN/Birch shall have the sole responsibility to repair or replace said Adjacent Arrangement provided herein. Pursuant to this Section, AT&T will restore the associated services to the Adjacent Arrangement.

#### **14 Eminent Domain**

- 14.1 If the whole of a Collocation Space or Adjacent Arrangement shall be taken by any public authority under the power of eminent domain, then this Attachment shall terminate with respect to such Collocation Space or Adjacent Arrangement as of the date possession shall be taken by such public authority and rent and other charges for the Collocation Space or Adjacent Arrangement shall be paid up to that day with a proportionate refund by AT&T of such rent and charges as may have been paid in advance for a period subsequent to the date of the taking. If any part of the Collocation Space or Adjacent Arrangement shall be taken under eminent domain, AT&T and AIN/Birch shall each have the right to terminate this Attachment with respect to such Collocation Space or Adjacent Arrangement and declare the same null and void, by written notice of such intention to the other Party within ten (10) days after such taking.

#### **15 Nonexclusivity**

- 15.1 AIN/Birch understands that this Attachment is not exclusive and that AT&T may enter into similar agreements with other Parties. Assignment of Collocation Space pursuant to all such agreements shall be determined by space availability and made on a first come, first serve basis.

## ENVIRONMENTAL AND SAFETY PRINCIPLES

The following principles provide basic guidance on environmental and safety issues when applying for and establishing physical collocation arrangements.

### 1. General Principles

- 1.1 Compliance with Applicable Law. AT&T and AIN/Birch agree to comply with applicable federal, state, and local environmental and safety laws and regulations including U.S. Environmental Protection Agency (USEPA) regulations issued under the Clean Air Act (CAA), Clean Water Act (CWA), Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act (SARA), the Toxic Substances Control Act (TSCA), and Occupational Safety and Healthy Act (OSHA) regulations issued under the OSHA of 1970, as amended and National Fire Protection Association (NFPA), NEC and NESC (Applicable Laws) requirements. Each Party shall notify the other if compliance inspections are conducted by regulatory agencies and/or citations are issued that relate to any aspect of this Attachment.
- 1.2 Notice. AT&T and AIN/Birch shall provide notice to the other, including any Material Safety Data Sheets (MSDSs), of known and recognized physical hazards or Hazardous Chemicals existing on site or brought on site. A Hazardous Chemical inventory list is posted on an OSHA Poster and updated annually at each Central Office. This Poster is normally located near the front entrance of the building or in the lounge area. Each Party is required to provide specific notice for known potential Imminent Danger conditions. AIN/Birch should contact 1-800-743-6737 for any AT&T MSDS required.
- 1.3 Practices/Procedures. AT&T may make available additional environmental control procedures for AIN/Birch to follow when working at a AT&T Premises (See Section 2, below). These practices/procedures will represent the regular work practices required to be followed by the employees and suppliers of AT&T for environmental protection. AIN/Birch will require its suppliers, agents, Guests, and others accessing the AT&T Premises to comply with these practices. Section 2 below lists the Environmental categories where AT&T practices should be followed by AIN/Birch when operating in the AT&T Premises.
- 1.4 Environmental and Safety Inspections. AT&T reserves the right to inspect the AIN/Birch space with proper notification. AT&T reserves the right to stop any AIN/Birch work operation that imposes Imminent Danger to the environment, employees or other persons in or around a AT&T Premises.
- 1.5 Hazardous Materials Brought On Site. Any hazardous materials brought into, used, stored or abandoned at a AT&T Premises by AIN/Birch are owned by and considered the property of AIN/Birch. AIN/Birch will indemnify AT&T for claims, lawsuits or damages to persons or property caused by these materials. Without prior written AT&T approval, no substantial new safety or environmental hazards can be created by AIN/Birch or different hazardous materials used by AIN/Birch at an AT&T Premises. AIN/Birch must demonstrate adequate emergency response capabilities for the materials used by AIN/Birch or remaining at a AT&T Premises.
- 1.6 Spills and Releases. When contamination is discovered at a AT&T Premises, either Party discovering the condition must notify the other Party. All Spills or Releases of regulated materials will immediately be reported by AIN/Birch to AT&T.
- 1.7 Coordinated Environmental Plans and Permits. AT&T and AIN/Birch will coordinate plans, permits or information required to be submitted to government agencies, such as emergency response

plans, spill prevention control and countermeasures (SPCC) plans and community reporting. If fees are associated with filing, AT&T and AIN/Birch will develop a cost sharing procedure. If AT&T's permit or EPA identification number must be used, AIN/Birch must comply with all of AT&T's permit conditions and environmental processes, including environmental "best management practices (BMP)" (see Section 2, below) and the selection of AT&T disposition vendors and disposal sites.

- 1.8 Environmental and Safety Indemnification. AT&T and AIN/Birch shall indemnify, defend and hold harmless the other Party from and against any claims (including, without limitation, third-party claims for personal injury or death or real or personal property damage), judgments, damages (including direct and indirect damages and punitive damages), penalties, fines, forfeitures, costs, liabilities, interest and losses arising in connection with the violation or alleged violation of any Applicable Law or contractual obligation or the presence or alleged presence of contamination arising out of the acts or omissions of the indemnifying Party, its employees, agents, suppliers, or Guests concerning its operations at a AT&T Premises.

## 2. **Categories for Consideration of Environmental Issues**

- 2.1 When performing functions that fall under the following Environmental categories on AT&T's Premises, AIN/Birch agrees to comply with the applicable sections of the current issue of AT&T's Environmental and Safety Methods and Procedures (M&Ps), incorporated herein by this reference. AIN/Birch further agrees to cooperate with AT&T to ensure that AIN/Birch's employees, agents, suppliers and/or Guests are knowledgeable of and satisfy those provisions of AT&T's Environmental M&Ps, which apply to the specific Environmental function being performed by AIN/Birch, its employees, agents, suppliers, and/or Guests.
- 2.2 The most current version of the reference documentation must be requested from AIN/Birch's AT&T Regional Contract Manager (RCM).

### 3. Definitions

Generator. Under RCRA, the person whose act produces a Hazardous Waste, as defined in 40 C.F.R. § 261, or whose act first causes a Hazardous Waste to become subject to regulation. The Generator is legally responsible for the proper management and disposal of Hazardous Wastes in accordance with regulations.

Hazardous Chemical. As defined in the U.S. OSHA hazard communications standard (29 C.F.R. § 1910.1200), any chemical which is a health hazard or physical hazard.

Hazardous Waste. As defined in Section 1004 of RCRA.

Imminent Danger. Any conditions or practices at a AT&T Premises which are such that a danger exists which could reasonably be expected to cause immediate death or serious harm to people or immediate significant damage to the environment or natural resources.

Spill or Release. As defined in Section 101 of CERCLA.

### 4. Acronyms

RCM – Regional Collocation Manager (f/k/a Account Team Collocation Coordinator)

CRES – Corporate Real Estate and Services (formerly PS&M)

DEC/LDEC – Department Environmental Coordinator/Local Department Environmental Coordinator

E/S – Environmental/Safety

EVET – Environmental Vendor Evaluation Team

GU-BTEN-001BT – AT&T Environmental Methods and Procedures

NESC – National Electrical Safety Codes

P&SM – Property & Services Management

Std T&C – Standard Terms & Conditions

## ACCESS TO NUMBERS AND NUMBER PORTABILITY

### 1. Non-Discriminatory Access to Telephone Numbers

- 1.1 During the term of this Agreement, where AIN/Birch is utilizing its own switch, AIN/Birch shall contact the North American Numbering Plan Administrator (NANPA), or, where applicable, the relevant Number Pool Administrator for the assignment of numbering resources.
- 1.2 Where AT&T provides resold services to AIN/Birch, AT&T will provide AIN/Birch with online access to available telephone numbers as defined by applicable FCC rules and regulations on a first come first served basis. AIN/Birch acknowledges that such access to numbers shall be in accordance with the appropriate FCC rules and regulations. AIN/Birch may designate up to a forecasted six (6) months supply of available numbers as intermediate (an available number provided to AIN/Birch) telephone numbers per rate center if the following conditions are met:
- 1.2.1 AIN/Birch must: (1) indicate that all of the intermediate numbers currently held by AIN/Birch in each rate center where AIN/Birch will be requesting intermediate telephone numbers have six (6) or less months to exhaust; (2) supply projected monthly telephone number demand on a rate center basis for the coming twelve (12) months for each rate center where AIN/Birch will be requesting intermediate telephone numbers; and, (3) demonstrate that the utilization level on current intermediate numbers held by AIN/Birch in the rate center where AIN/Birch is requesting telephone numbers has reached at least seventy-five percent (75%).
- 1.2.2 The above information will be provided by AIN/Birch by submitting to AT&T a fully completed "CO Code Assignments Months To Exhaust Certification Worksheet – TN Level" (MTE Worksheet), Appendix B to the Central Office Code (NXX) Assignments Guidelines, INC 95-0407-008 for each rate center where AIN/Birch will be requesting intermediate telephone numbers. The utilization level is calculated by dividing all intermediate numbers currently assigned by AIN/Birch to customers by the total number of intermediate numbers held by AIN/Birch in the rate center and multiplying the result by one hundred (100).
- 1.2.3 If fulfilling AIN/Birch's request for intermediate numbers results in AT&T having to submit a request for additional telephone numbers to a national numbering administrator (either NANPA CO Code Administration or NeuStar Pooling Administration or their successors), AT&T will submit the required numbering request to the national numbering administrator to satisfy AIN/Birch's request for intermediate numbers. AT&T will also pursue all appropriate steps (including submitting a safety valve request (petition) to the appropriate Commission if the numbering request is denied by the national administrator) to satisfy AIN/Birch's request for intermediate numbers. In these cases, AT&T is not obligated to

fulfill the request by AIN/Birch for intermediate numbers unless, and until, AT&T's request for additional numbering resources is granted.

1.2.4 AIN/Birch agrees to supply supporting information for any numbering request and/or safety valve request that AT&T files pursuant to Section 1.2.3 above.

1.3 AIN/Birch acknowledges that there may be instances where there is an industry shortage of available telephone numbers in a number plan area (NPA). These instances occur where a jeopardy status has been declared by NANPA and the industry has determined that limiting the assignment of new numbers is the appropriate method to employ until the jeopardy can be alleviated. In such NPA jeopardy situations where assignment of new numbers is restricted per the jeopardy guidelines developed by the industry, AT&T may request that AIN/Birch cancel all or a portion of its unassigned intermediate numbers. AIN/Birch's consent to AT&T's request shall not be unreasonably withheld.

## 2. Local Number Portability

2.1 The Parties will offer LNP in accordance with rules, regulations and guidelines adopted by the Commission, the FCC and industry fora.

2.2 Service Management System (SMS) Administration. The Parties will work cooperatively with other local service providers to establish and maintain contracts for the LNP SMS.

2.3 Network Architecture. The Parties agree to adhere to applicable FCC rules and orders governing LNP network architecture.

2.4 Signaling. In connection with LNP, each Party agrees to use SS7 signaling in accordance with applicable FCC rules and orders.

2.5 N-1 Query. The Parties agree to adhere to applicable FCC rules and orders governing LNP N-1 queries.

2.6 Porting of Reserved Numbers and Suspended Lines. Customers of each Party may port numbers, via LNP, that are in a denied state or that are on suspend status. In addition, customers of each Party may port reserved numbers that the customer has paid to reserve. Portable reserved numbers are identified on the Customer Service Record (CSR). In anticipation of porting from one Party to the other Party, a Party's customer may reserve additional telephone numbers and include them with the numbers that are subsequently ported to the other Party. It is not necessary to restore a denied number before it is ported.

2.7 Splitting of Number Groups. The Parties shall permit blocks of subscriber numbers (including, but not limited to, Direct Inward Dial (DID) numbers and MultiServ groups) to be split in connection with an LNP request. AT&T and AIN/Birch shall permit customers who port a portion of DID numbers to retain DID service on the remaining portion of numbers. If a Party requests porting a range of DID numbers smaller than a whole block, that Party shall pay the applicable charges for doing so as set forth in Attachment 2. In the event no rate is set forth in Attachment 2, then the Parties shall negotiate a rate for such services.

- 2.8 The Parties will set Location Routing Number (LRN) unconditional or ten (10) digit triggers where applicable. Where triggers are set, the porting Party will remove the ported number at the same time the trigger is removed.
- 2.9 A trigger order is a service order issued in advance of the porting of a number. A trigger order 1) initiates call queries to the AIN SS7 network in advance of the number being ported; and 2) provides for the new service provider to be in control of when a number ports.
- 2.10 Where triggers are not set, the Parties shall coordinate the porting of the number between service providers so as to minimize service interruptions to the customer.
- 2.11 AT&T and AIN/Birch will work cooperatively to implement changes to LNP process flows ordered by the FCC or as recommended by standard industry foras addressing LNP.
- 2.12 Where AIN/Birch utilizes AT&T's LNP Query Service, AT&T shall bill and AIN/Birch shall pay the query charge associated with LNP Query Service as set forth in Attachment 2. To receive the LNP Query Service charge set forth in Attachment 2, AIN/Birch shall fill out and submit the Interconnection data sheet for AT&T LNP Query Service. The form can be obtained on AT&T's Wholesale – Southeast Region Web site under AT&T LNP Query Service and click on forms. Once the form has been filled out and submitted the LNP Query charge will take effect on the approved date. This charge is not subject to the resale discount set forth in Attachment 1.
- 3. Service Order Charges**
- 3.1 The terms, conditions and rates for OSS utilized in connection with LNP are as set forth in Attachment 6 and Exhibit A of Attachment 2.

### **Pre-Ordering, Ordering, Provisioning, Maintenance and Repair**

TABLE OF CONTENTS

1. Quality of Pre-Ordering, Ordering, Provisioning, Maintenance and Repair..... 3

2. Access to Operations Support Systems..... 3

3. Miscellaneous..... 7

**PRE-ORDERING, ORDERING, PROVISIONING, MAINTENANCE AND REPAIR****1. Quality of Pre-Ordering, Ordering, Provisioning, Maintenance and Repair**

- 1.1 AT&T shall provide to AIN/Birch nondiscriminatory access to its OSS and the necessary information contained therein in order that AIN/Birch can perform the functions of pre-ordering, ordering, provisioning, maintenance and repair, and billing. AT&T shall provide AIN/Birch with all relevant documentation (manuals, user guides, specifications, etc.) regarding business rules and other formatting information as well as practices and procedures necessary to ensure requests are efficiently processed. All documentation will be readily accessible at AT&T's Wholesale – Southeast Region Web site. AT&T shall ensure that its OSS are designed to accommodate requests for both current and projected demands of AIN/Birch and other CLECs in the aggregate.

**2. Access to Operations Support Systems**

- 2.1 AT&T shall provide to AIN/Birch nondiscriminatory access to its OSS and the necessary information contained therein in order that AIN/Birch can perform the functions of pre-ordering, ordering, provisioning, maintenance and repair, and billing. AT&T shall provide nondiscriminatory access to the OSS through manual and/or electronic interfaces as described in this Attachment. It is the sole responsibility of AIN/Birch to obtain the technical capability to access and utilize AT&T's OSS interfaces. Specifications for AIN/Birch's access and use of AT&T's electronic interfaces are set forth at AT&T's Wholesale – Southeast Region Web site.

- 2.1.1 AIN/Birch agrees to comply with the provisions of the OSS Interconnection Volume Guidelines as set forth at AT&T's Wholesale – Southeast Region Web site.

**2.2 Pre-Ordering**

- 2.2.1 AT&T will provide electronic access to its OSS and the information contained therein in order that AIN/Birch can perform the following pre-ordering functions: service address validation, telephone number selection, service and feature availability, due date information, customer record information and loop makeup information. Mechanized access is provided by electronic interfaces whose specifications for access and use are set forth at AT&T's Wholesale – Southeast Region Web site. The process by which the Parties will manage these electronic interfaces to include the development and introduction of new interfaces will be governed by the change management process as described in Section 2.7 below.
- 2.2.2 AT&T shall provide to AIN/Birch electronic access to customer service record information in accordance with the applicable performance intervals referenced in Attachment 9. If

electronic access is not available, AT&T shall provide to AIN/Birch such information within twenty-four (24) hours. AIN/Birch shall provide to AT&T access to customer record information, including circuit numbers associated with each telephone number where applicable. AIN/Birch shall provide such information within four (4) hours after request via electronic access where available. If electronic access is not available, AIN/Birch shall provide to AT&T paper copies of customer record information, including circuit numbers associated with each telephone number where applicable. AIN/Birch shall provide to AT&T such customer service records within twenty-four (24) hours of a valid request, exclusive of Saturdays, Sundays and holidays.

- 2.2.3 The Parties agree not to view, copy, or otherwise obtain access to the other Party's customer record information about any of the other Party's customers without that customer's permission. AIN/Birch will obtain access to customer record information only in strict compliance with applicable laws, rules, or regulations of the state in which the service is provided. AT&T reserves the right to audit AIN/Birch's access to customer record information. If AT&T has reason to believe, through its audit or by any other means, that AIN/Birch is accessing customer record information without having obtained the proper customer authorization, AT&T upon reasonable notice to AIN/Birch may take corrective action, including but not limited to suspending or terminating AIN/Birch's access to AT&T's pre-ordering and ordering OSS, and the provisioning of pending and existing services.

## 2.3 Ordering

- 2.3.1 AT&T will make available to AIN/Birch electronic interfaces for the purpose of exchanging order information, including order status and completion notification, for non-complex and certain complex resale requests and certain network elements. Specifications for access and use of AT&T's electronic interfaces are set forth at AT&T's Wholesale – Southeast Region Web site. The process by which the Parties will manage these electronic interfaces to include the development and introduction of new interfaces will be governed by the change management process as described in Section 2.7 below.
- 2.3.2 AIN/Birch shall place orders for services by submitting a LSR to AT&T. AT&T shall bill AIN/Birch an electronic service order charge at the rate set forth in the applicable Attachment to this Agreement for each LSR submitted by means of an electronic interface. AT&T shall bill AIN/Birch a manual service order charge at the rate set forth in the applicable Attachment to this Agreement for each LSR submitted by means other than the electronic Interfaces (e.g., mail, fax, courier, etc.). An individual LSR will be identified for billing purposes by its PON.
- 2.3.2.1 AIN/Birch may submit an LSR to request that a customer's service be temporarily suspended, denied, or restored. Alternatively, AIN/Birch may submit a list of such customers if AIN/Birch provides a separate PON for each location on the list. AT&T will bill an electronic or manual service order charge for each location.

- 2.3.2.2 AT&T will bill the electronic or manual service order charge, as applicable, for an LSR, regardless of whether that LSR is later supplemented, clarified or cancelled.
- 2.3.2.3 Notwithstanding the foregoing, AT&T will not bill an additional electronic or manual service order charge for supplements to any LSR submitted to clarify, correct, change or cancel a previously submitted LSR.
- 2.3.2.4 AT&T shall return a Firm Order Confirmation (FOC) or LSR clarification in accordance with the applicable performance intervals referenced in Attachment 9. AIN/Birch shall provide to AT&T a FOC within twenty-four (24) hours of the receipt from AT&T of a complete and accurate LSR, exclusive of Saturdays, Sundays and holidays. AIN/Birch shall provide to AT&T an LSR clarification within twenty-four (24) hours of the receipt from AT&T of an incomplete and inaccurate LSR, exclusive of Saturdays, Sundays and holidays.
- 2.4 Provisioning
- 2.4.1 AT&T shall provision services during its regular working hours. To the extent AIN/Birch requests provisioning of service to be performed outside AT&T's regular working hours, or the work so requested requires AT&T's technicians or project managers to work outside of regular working hours, overtime charges set forth in AT&T's intrastate Access Services Tariff, Section E13.2, shall apply. Notwithstanding the foregoing, if such work is performed outside of regular working hours by a AT&T technician or project manager during his or her scheduled shift and AT&T does not incur any overtime charges in performing the work on behalf of AIN/Birch, AT&T will not assess AIN/Birch additional charges beyond the rates and charges specified in this Agreement.
- 2.4.2 In the event AT&T must dispatch to the customer's location more than once due to incorrect or incomplete information provided by AIN/Birch (e.g., incomplete address, incorrect contact name/number, etc.), AT&T will bill AIN/Birch for each additional dispatch required to provision the circuit due to the incorrect/incomplete information provided. AT&T will assess the applicable Maintenance of Service rates from AT&T's FCC No. 1 Tariff, Section 13.3.1.
- 2.4.3 Cancellation Charges. If AIN/Birch cancels an LSR for network elements or resold services subsequent to AT&T's generation of a service order, any costs incurred by AT&T in conjunction with provisioning of Services as requested on the cancelled LSR will be recovered in accordance with the cancellation methodology set forth in the Cancellation Charge Percentage Chart found on AT&T's Wholesale – Southeast Region Web site. In addition, AT&T reserves the right to assess cancellation charges if AIN/Birch fails to respond within nine (9) business days to a Missed Appointment order notification.
- 2.4.3.1 Notwithstanding the foregoing, if AIN/Birch places an LSR based upon AT&T's loop makeup information, and such information is inaccurate resulting in the inability of AT&T to provision the network elements requested and another spare compatible facility cannot be found with the transmission characteristics of the network elements originally requested,

cancellation charges described in this Section shall not apply. Where AIN/Birch places a single LSR for multiple network elements or services based upon loop makeup information, and information as to some, but not all, of the network elements or services is inaccurate, if AT&T cannot provision the network elements or services that were the subject of the inaccurate loop makeup information, AIN/Birch may cancel its request for those network elements or services without incurring cancellation charges as described in this Section. In such instance, should AIN/Birch elect to cancel the entire LSR, cancellation charges as described in this Section shall apply to those elements and services that were not the subject of inaccurate loop makeup.

- 2.4.4 Service Date Advancement Charges (Expedites). For Service Date Advancement requests by AIN/Birch, Service Date Advancement charges will apply for intervals less than the standard interval as outlined in the AT&T Product and Services Interval Guide. The charges are as set forth in Exhibit A of Attachment 2.
- 2.4.5 Order Modification Charges. If AIN/Birch modifies an order after being sent a FOC from AT&T, the Order Modification Charge (OMC) or Order Modification Charge Additional Dispatch (OMCAD) will be paid by AIN/Birch in accordance with Exhibit A of Attachment 2.
- 2.5 Maintenance and Repair
- 2.5.1 AT&T will make available to AIN/Birch electronic interfaces for the purpose of reporting and monitoring service troubles. Specifications for access and use of AT&T's maintenance and repair electronic interfaces are set forth at AT&T's Wholesale – Southeast Region Web site. The process by which the Parties will manage these electronic interfaces to include the development and introduction of new interfaces will be governed by the change management process as described in Section 2.7 below. Requests for trouble repair are billed in accordance with the provisions of this Agreement. AT&T and AIN/Birch agree to adhere to AT&T's Operational Understanding. The Operational Understanding may be accessed via AT&T's Wholesale – Southeast Region Web site.
- 2.5.2 If AIN/Birch reports a trouble on a AT&T Network Element and no trouble is found in AT&T's network, AT&T will charge AIN/Birch a Maintenance of Service Charge for any dispatching and testing (both inside and outside the CO) required by AT&T in order to confirm the working status. AT&T will assess the Maintenance of Service rates as set forth in AT&T's FCC No. 1 Tariff, Section 13.3.1.
- 2.5.2.1 In the event AT&T must dispatch to the customer's location more than once due to incorrect or incomplete information provided by AIN/Birch (e.g., incomplete address, incorrect contact name/number, etc.), AT&T will bill AIN/Birch for each additional dispatch required to repair the circuit due to the incorrect/incomplete information provided. AT&T will assess the Maintenance of Service rates as set forth in AT&T's FCC No. 1 Tariff, Section 13.3.1.

- 2.5.3 If AIN/Birch reports a trouble on a or a resold service and no trouble is found in AT&T's network, AT&T will charge AIN/Birch a Trouble Determination Charge or a Trouble Location Charge for any dispatching and testing (both inside and outside the CO) required by AT&T in order to confirm the working status. AT&T will assess the Trouble Determination Charge or Trouble Location Charge from the applicable AT&T tariff.
- 2.5.3.1 In the event AT&T must dispatch to the customer's location more than once due to incorrect or incomplete information provided by AIN/Birch (e.g., incomplete address, incorrect contact name/number, etc.), AT&T will bill AIN/Birch for each additional dispatch required to repair the circuit due to the incorrect/incomplete information provided. AT&T will assess the Trouble Determination Charge or Trouble Location Charge from the applicable AT&T tariff.
- 2.6 Billing. AT&T will provide AIN/Birch nondiscriminatory access to billing information as specified in Attachment 7.
- 2.7 Change Management. The Parties agree that the collaborative change management process known as the Change Control Process (CCP) will be used to manage changes to existing interfaces, introduction of new interfaces and retirement of interfaces. The Parties agree to comply with the provisions of the documented CCP as may be amended from time to time and incorporated herein by reference. The change management process will cover changes to AT&T's electronic interfaces, AT&T's testing environment, associated manual process improvements, and relevant documentation. The process will define a procedure for resolution of change management disputes. Documentation of the CCP as well as related information and processes will be clearly organized and readily accessible to AIN/Birch at AT&T's Wholesale – Southeast Region Web site.
- 2.8 Rates. Unless otherwise specified herein, charges for the use of AT&T's OSS, and other charges applicable to pre-ordering, ordering, provisioning and maintenance and repair, shall be at the rates set forth in the applicable Attachment of this Agreement.
- 2.9 The Commissions in some states have ordered per element manual additive nonrecurring charges for Network Elements and Other Services ordered by means other than one of the interactive interfaces. These ordered Network Elements and Other Services manual additive nonrecurring charges will apply in these states, rather than the charge per LSR. The per element charges are listed in Exhibit A of Attachment 2.
- 3. Miscellaneous**
- 3.1 Pending Orders. To the extent that AIN/Birch submits an LSR with incomplete, incorrect or conflicting information, AT&T will return the LSR to AIN/Birch for clarification. AIN/Birch shall respond to the request for clarification within thirty (30) days by submitting a supplemental LSR. If AIN/Birch does not submit a supplement LSR within thirty (30) days, AT&T will cancel the original LSR and AIN/Birch shall be required to submit a new LSR, with a new PON.

- 3.2 Single Point of Contact. AIN/Birch will be the single point of contact with AT&T for ordering activity for network elements and other services used by AIN/Birch to provide services to its customers, except that AT&T may accept a request directly from another CLEC, or AT&T, acting with authorization of the affected customer. AIN/Birch and AT&T shall each execute a blanket LOA with respect to customer requests so that prior proof of customer authorization will not be necessary with every request (except in the case of a local service freeze). The Parties shall each be entitled to adopt their own internal processes for verification of customer authorization for requests, provided, however, that such processes shall comply with applicable state and federal law and industry and regulatory guidelines. Pursuant to a request from another carrier, AT&T may disconnect any network element being used by AIN/Birch to provide service to that customer and may reuse such network elements or facilities to enable such other carrier to provide service to the customer. AT&T will notify AIN/Birch that such a request has been processed but will not be required to notify AIN/Birch in advance of such processing.
- 3.2.1 Neither Party shall prevent or delay a customer from migrating to another carrier because of unpaid bills, denied service, or contract terms.
- 3.2.2 Use of Facilities. When a customer of AIN/Birch elects to discontinue service and to transfer service to another local exchange carrier, including AT&T, AT&T shall have the right to reuse the facilities provided to AIN/Birch, regardless whether those facilities are provided as Network Elements or as part of a resold service, and regardless of whether the end user served with such facilities has paid all charges to AIN/Birch or has been denied service for nonpayment or otherwise. AT&T will notify AIN/Birch that such a request has been processed after the disconnect order has been completed.
- 3.3 Contact Numbers. The Parties agree to provide one another with toll-free nation-wide (50 states) contact numbers for the purpose of ordering, provisioning and maintenance of services. Contact numbers for maintenance/repair of services shall be staffed twenty-four (24) hours per day, seven (7) days per week. AT&T will close trouble tickets after making a reasonable effort to contact AIN/Birch for authorization to close a ticket. AT&T will place trouble tickets in delayed maintenance status after making a reasonable effort to contact AIN/Birch to request additional information or to request authorization for additional work deemed necessary by AT&T.
- 3.4 Subscription Functions. In cases where AT&T performs subscription functions for an IXC (i.e., PIC and LPIC changes via Customer Account Record Exchange (CARE)), AT&T will in all possible instances provide the affected IXCs with the OCN of the local provider for the purpose of obtaining customer billing account and other customer information required under subscription requirements.
- 3.4.1 When AIN/Birch's customer, served by resale or loop and port combinations, changes its PIC or LPIC, and per AT&T's FCC or state tariff the interexchange carrier elects to charge the customer the PIC or LPIC change charge, AT&T will bill the PIC or LPIC change

charge to AIN/Birch, which has the billing relationship with that customer, and AIN/Birch may pass such charge to the customer.

## BILLING

### 1. Payment and Billing Arrangements

The terms and conditions set forth in this Attachment shall apply to all services ordered and provisioned pursuant to this Agreement.

- 1.1 AT&T will bill through the Carrier Access Billing System (CABS), Integrated Billing System (IBS) and/or the Customer Records Information Systems (CRIS) depending on the particular service(s) provided to AIN/Birch under this Agreement. AT&T will use its best efforts to format bills in CABS Billing Output Specification (CBOS) standard format. AT&T's billing format may change in accordance with applicable industry standards; provided, however, that AT&T may, in some instances, not apply CBOS standard format for certain types of billing for certain products and services. Billing in a format other than CBOS shall not be the basis of any AIN/Birch dispute or withholding of payment.
  - 1.1.1 For any service(s) AT&T receives from AIN/Birch, AIN/Birch shall bill AT&T in CBOS format.
  - 1.1.2 Any switched access charges associated with interexchange carrier access to the resold local exchange lines will be billed by, and due to AT&T.
  - 1.1.3 AT&T will render bills each month on established bill days for each of AIN/Birch's accounts. If either Party requests multiple billing media or additional copies of the bills, the billing Party will provide these at the rates set forth in AT&T's FCC No. 1 Tariff, Section 13.3.6.3, except for resold services which shall be at the rates set forth in AT&T's Non-Regulated Services Pricing List N6.
  - 1.1.4 AT&T will bill AIN/Birch in advance for all services to be provided during the ensuing billing period except charges associated with service usage and nonrecurring charges, which will be billed in arrears.
    - 1.1.4.1 For resold services, charges for services will be calculated on an individual customer account level, including, if applicable, any charge for usage or usage allowances. AT&T will also bill AIN/Birch, and AIN/Birch will be responsible for and remit to AT&T, all charges applicable to said services including but not limited to 911 and E911 charges, EUCL charges, federal subscriber line charges, telecommunications relay charges, and franchise fees, unless otherwise ordered by a Commission.
    - 1.1.4.2 AT&T shall provide AIN/Birch usage records, where AT&T has the capability in place, necessary to bill third parties for terminating traffic to its customers.
  - 1.1.5 AT&T will not perform billing and collection services for AIN/Birch as a result of the execution of this Agreement.
- 1.2 Establishing Accounts and Subsequent State Certifications. After submitting a credit profile and deposit, if required, and after receiving certification as a local exchange carrier from the appropriate Commission, AIN/Birch will provide the appropriate AT&T Senior Carriers Account Manager responsible for new CLEC activation, the necessary documentation to enable AT&T to establish accounts for Local Interconnection, Network Elements and Other Services and/or resold services. Such documentation shall include the Application for Master Account, if applicable, proof of

authority to provide Telecommunications Services, the appropriate OCN for each state as assigned by the NECA, CIC, if applicable, ACNA, if applicable, AT&T's blanket form LOA, Misdirected Number form, and a tax exemption certificate, if applicable. Notwithstanding anything to the contrary in this Agreement, AIN/Birch may not order services under a new account and/or subsequent state certification, established in accordance with this Section until thirty (30) days after all information specified in this Section is received from AIN/Birch.

- 1.2.1 ACNAs. AIN/Birch shall provide AT&T with documentation from Telcordia identifying the ACNA assigned to it by Telcordia (as applicable) in the same legal name as reflected in the preamble to this Agreement. Such ACNA will be used by AIN/Birch to order services pursuant to this Agreement and will not be shared by AIN/Birch with another entity.
- 1.2.2 Company Identifiers. If AIN/Birch needs to change, add to, eliminate or convert its OCN(s), ACNAs and other identifying codes (collectively "Company Identifiers") under which it operates when AIN/Birch has already been conducting business utilizing those Company Identifiers, AIN/Birch shall follow the Mergers and Acquisitions Process as described on AT&T's Wholesale – Southeast Region Web site, and shall be subject to separately negotiated rates, terms and conditions.
- 1.2.3 Tax Exemption. It is the responsibility of AIN/Birch to provide AT&T with a properly completed tax exemption certificate in the current version of the form customarily used by AT&T and at intervals required by the appropriate taxing authorities or reasonably requested by AT&T. A tax exemption certificate must be supplied for each individual AIN/Birch entity purchasing Services under this Agreement. Upon AT&T's receipt of a properly completed tax exemption certificate, subsequent billings to AIN/Birch will not include those taxes or fees from which AIN/Birch is exempt. Prior to receipt of a properly completed exemption certificate, AT&T shall bill, and AIN/Birch shall pay all applicable taxes and fees. In the event that AIN/Birch believes that it is entitled to an exemption from and refund of taxes with respect to the amount billed prior to AT&T's receipt of a properly completed exemption certificate, AT&T shall assign to AIN/Birch its rights to claim a refund of such taxes. If applicable law prohibits the assignment of tax refund rights or requires the claim for refund of such taxes to be filed by AT&T, AT&T shall, after receiving a written request from AIN/Birch and at AIN/Birch's sole expense, pursue such refund claim on behalf of AIN/Birch, provided that AIN/Birch promptly reimburses AT&T for any costs and expenses incurred by AT&T in pursuing such refund claim; and, provided further, that AT&T shall have the right to deduct any such outstanding costs and expenses from the amount of any refund obtained prior to remitting such refund to AIN/Birch or to deduct any such outstanding costs and expenses from any amounts owed by AT&T to AIN/Birch if no refund is obtained. AIN/Birch shall be solely responsible for the computation, tracking, reporting and payment of all taxes and fees associated with the services provided by AIN/Birch to its customers.
- 1.3 Deposit Policy. Prior to the inauguration of service or, thereafter, upon AT&T's request, AIN/Birch shall complete the AT&T Credit Profile (AT&T form) and provide information to AT&T regarding AIN/Birch's credit and financial condition. Based on AT&T's analysis of the AT&T Credit Profile and other relevant information regarding AIN/Birch's credit and financial condition, AT&T reserves the right to require AIN/Birch to provide AT&T with a suitable form of security deposit for AIN/Birch's account(s). If, in AT&T's sole discretion, circumstances so warrant and/or AIN/Birch's gross monthly billing has increased, AT&T reserves the right to request additional security (or to require a

security deposit if none was previously requested) and/or file a Uniform Commercial Code (UCC-1) security interest in AIN/Birch's "accounts receivables and proceeds".

- 1.3.1 Security deposit shall take the form of cash, an irrevocable letter of credit (AT&T form), surety bond (AT&T form) or, in AT&T's sole discretion, some other form of security proposed by AIN/Birch and accepted by AT&T. Any such security deposit shall in no way release AIN/Birch from its obligation to make complete and timely payments of its bill(s). If AT&T requires AIN/Birch to provide a security deposit, AIN/Birch shall provide such security deposit prior to the inauguration of service or within fifteen (15) days of AT&T's request, as applicable. Security deposit request notices will be sent to AIN/Birch via certified mail or overnight delivery. Such notice period will start the day after the deposit request notice is rendered by certified mail or overnight delivery. Interest on a cash security deposit shall accrue and be applied or refunded in accordance with the terms in AT&T's GSST.
- 1.3.2 Security deposits collected under this Section shall not exceed two (2) months' estimated billing for services pursuant to this Agreement. Estimated billings are calculated based upon the monthly average of the previous six (6) months current billings, if AIN/Birch has received service from AT&T during such period at a level comparable to that anticipated to occur over the next six (6) months. If either AIN/Birch or AT&T has reason to believe that the level of service to be received during the next six (6) months will be materially higher or lower than received in the previous six (6) months, AIN/Birch and AT&T shall agree on a level of estimated billings based on all relevant information.
- 1.3.3 In the event AIN/Birch fails to provide AT&T with a suitable form of security deposit or additional security deposit as required herein, defaults on its account(s), or otherwise fails to make any payment or payments required under this Agreement in the manner and within the time required, service to AIN/Birch may be Suspended, Discontinued or Terminated in accordance with the terms of Section 1.5 below. Upon Termination of services, AT&T shall apply any security deposit to AIN/Birch's final bill for its account(s). If no bill is rendered to AIN/Birch, AT&T shall, nevertheless, apply any security deposit to AIN/Birch's outstanding balance.
- 1.3.3.1 At least seven (7) days prior to the expiration of any letter of credit provided by AIN/Birch as security under this Agreement, AIN/Birch shall renew such letter of credit or provide AT&T with evidence that AIN/Birch has obtained a suitable replacement for the letter of credit. If AIN/Birch fails to comply with the foregoing, AT&T shall thereafter be authorized, in its sole discretion, to draw down the full amount of such letter of credit and utilize the cash proceeds as security for AIN/Birch accounts(s). If AIN/Birch provides a security deposit or additional security deposit in the form of a surety bond as required herein, AIN/Birch shall renew the surety bond or provide AT&T with evidence that AIN/Birch has obtained a suitable replacement for the surety bond at least seven (7) days prior to the cancellation date of the surety bond. If AIN/Birch fails to comply with the foregoing, AT&T shall thereafter be authorized, in its sole discretion, to take action on the surety bond and utilize the cash proceeds as security for AIN/Birch's account(s). If the credit rating of any bonding company that has provided AIN/Birch with a surety bond provided as security hereunder has fallen below B, AT&T will provide written notice to AIN/Birch that AIN/Birch must provide a replacement bond or other suitable security within fifteen (15) days of AT&T's written notice. If AIN/Birch fails to comply with the foregoing, AT&T shall thereafter be authorized, in its sole discretion, to take action on the surety bond and utilize the cash proceeds as security for AIN/Birch's account(s). Notwithstanding anything contained in this Agreement to the contrary, AT&T shall be authorized, in

its sole discretion, to draw down the full amount of any letter of credit or take action on any surety bond provided by AIN/Birch as security hereunder if AIN/Birch defaults on its account(s) or otherwise fails to make any payment or payments required under this Agreement in the manner and within the time, as required herein and apply the cash proceeds to any outstanding balance on AIN/Birch's accounts and utilize any remaining cash proceeds as security for AIN/Birch's account(s).

1.4 Payment Responsibility. Payment of all charges will be the responsibility of AIN/Birch. AIN/Birch shall pay invoices by utilizing wire transfer services or automatic clearing house services. AIN/Birch shall make payment to AT&T for all services billed including disputed amounts. AT&T will not become involved in billing disputes that may arise between AIN/Birch and AIN/Birch's customer.

1.4.1 Payment Due. Payment of undisputed charges for services provided will be due on or before the next bill date and is payable in immediately available funds. Information required to apply payments must accompany the payment. The information must notify AT&T of billing Account Numbers (BAN) paid; invoices paid and the amount to be applied to each BA and invoice (Remittance Information). Payment is considered to have been made when the payment and Remittance Information are received by AT&T. If the Remittance Information is not received with payment, AT&T will be unable to apply amounts paid to AIN/Birch's accounts. In such event, AT&T shall hold such funds until the Remittance Information is received. If AT&T does not receive the remittance Information by the payment due date for any account(s), late payment charges shall apply.

1.4.1.1 Due Dates. The payment due date shall ordinarily be thirty (30) days after the Bill Date set forth on the applicable bill. If the payment due date falls on a Sunday or on a holiday that is observed on a Monday, the payment due date shall be the first non-holiday day following such Sunday or holiday. If the payment due date falls on a Saturday or on a holiday which is observed on Tuesday, Wednesday, Thursday, or Friday, the payment due date shall be the last non-holiday day preceding such Saturday or holiday. In the event of an emergency, system failure or other such condition which prevents AT&T from transmitting billing information via the media selected by the Parties, AT&T shall notify AIN/Birch of such difficulties as soon as practicable and will deliver the billing information to AIN/Birch by another media as agreed to by the Parties. In such cases the payment due date will be thirty (30) days after the Bill Date in a form that can be processed and that otherwise meets the specifications set forth in this Attachment. If payment is not received by the payment due date, a late payment charge, as set forth in Section 1.4.1.2, below, shall apply.

1.4.1.2 Late Payment. If any portion of the payment is not received by AT&T on or before the payment due date as set forth above, or if any portion of the payment is received by AT&T in funds that are not immediately available to AT&T, then a late payment and/or interest charge shall be due to AT&T. The late payment and/or interest charge shall apply to the portion of the payment not received and shall be assessed as set forth in Section A2 of AT&T's GSST, Section B2 of the Private Line Service Tariff or Section E2 of the AT&T intrastate Access Services Tariff, or pursuant to the applicable state law as determined by AT&T. In addition to any applicable late payment and/or interest charges, AIN/Birch may be charged a fee for all returned checks at the rate set forth in Section A2 of AT&T's GSST or pursuant to the applicable state law.

1.5 Discontinuing Service to AIN/Birch. The procedures for discontinuing service to AIN/Birch are as follows:

Version: 4Q06 Standard ICA  
11/30/06

- 1.5.1 In order of severity, Suspend/Suspension, Discontinue/Discontinuance and Terminate/Termination are defined as follows for the purposes of this Attachment:
- 1.5.1.1 Suspend/Suspension is the temporary restriction of the billed Party's access to the ordering systems and/or access to the billed Party's ability to initiate PIC-related changes. In addition, during Suspension, pending orders may not be completed and orders for new service or changes to existing services may not be accepted.
- 1.5.1.2 Discontinue/Discontinuance is the denial of service by the billing Party to the billed Party that will result in the disruption and discontinuation of service to the billed Party's customers. Additionally, at the time of Discontinuance, AT&T will remove any Local Service Freezes in place on the billed Party's customers.
- 1.5.2 Terminate/Termination is the disconnection of service by the billing Party to the billed Party.
- 1.5.3 Suspension. If payment of amounts due as described herein is not received by the bill date in the month after the original bill date, or thirty (30) days from the date of a deposit request in the case of security deposits, AT&T will provide written notice to AIN/Birch that additional applications for service may be refused, that any pending orders for service may not be completed, and/or that access to ordering systems may be suspended if payment of such amounts, and all other amounts not in dispute that become past due before refusal, incompleteness or Suspension of service, are not received by the fifteenth (15th) day following the date of said notice. For CABS billed services, AIN/Birch will receive a PIC freeze notice which is the Suspension notice for CABS billed services. This PIC freeze notice will be sent the day after the payment due date and is notification that CABS billed services will be suspended within seven (7) days if payment is not received.
- 1.5.3.1 The Suspension notice shall also provide that all past due charges for CRIS and IBS billed services, and all other amounts that become past due for such services before Discontinuance, must be paid within thirty (30) days from the date of the suspension notice to avoid Discontinuance of CRIS and IBS billed services.
- 1.5.3.2 For CABS billed services, AT&T will provide a Discontinuance notice that is separate from the Suspension notice, that all past due charges for CABS billed Services, and all other amounts that become past due for such services before Discontinuance, must be paid within thirty (30) days from the date of the Suspension notice to avoid Discontinuance of CABS billed services. This Discontinuance notice may be provided at the same time that AT&T provides the Suspension notice.
- 1.5.4 Discontinuance. If payment of amounts due as described herein is not received by the bill date in the month after the original bill date, AT&T will provide written notice that AT&T may Discontinue the provision of existing services to AIN/Birch if payment of such amounts, and all other amounts that become past due before Discontinuance, including requested security deposits, is not received by wire transfer, automatic clearing house or cashier's check in the manner set forth in Section 1.4.1 above or in the case of a deposit in accordance with Section 1.3.1 above, within thirty (30) days following such written notice; provided, however, that AT&T may provide written notice that such existing services may be Discontinued within fifteen (15) days following such notice, subject to the criteria described in Section 1.5.4.1 below.

- 1.5.4.1 AT&T may take the action to Discontinue the provision of existing service upon fifteen (15) days from the day after AT&T provides written notice of such Discontinuance if (a) such notice is sent by certified mail or overnight delivery; (b) AIN/Birch has not paid all amounts due pursuant to a subject bill(s), or has not provided adequate security pursuant to a deposit request; and (c) either:
- (1) AT&T has sent the subject bill(s) to AIN/Birch within seven (7) business days of the bill date(s), verifiable by records maintained by AT&T:
    - i. in paper or CDROM form via the United States Postal Service (USPS), or
    - ii. in magnetic tape form via overnight delivery, or
    - iii. via electronic transmission; or
  - (2) AT&T has sent the subject bill(s) to AIN/Birch, using one of the media described in (1) above, more than thirty (30) days before notice to Discontinue service has been rendered.
- 1.5.4.2 In the case of Discontinuance of services, all billed charges, as well as applicable disconnect charges, shall become due.
- 1.5.4.3 AIN/Birch is solely responsible for notifying the customer of the Discontinuance of service. If, within seven (7) days after AIN/Birch's services have been Discontinued, AIN/Birch pays, by wire transfer, automatic clearing house or cashier's check, all past due charges, including late payment charges, outstanding security deposit request amounts if applicable and any applicable restoral charges as set forth in Section A4 of AT&T's GSST, then AT&T will reestablish service for AIN/Birch.
- 1.5.5 Termination. If within seven (7) days after AIN/Birch's service has been Discontinued and AIN/Birch has failed to pay all past due charges as described above, then AIN/Birch's service will be Terminated.
- 1.5.6 If the billing Party Suspends, Terminates or Discontinues service to the billed Party in error, the billing Party will reestablish service to the billed Party immediately and without cost to the billed Party.
- 2. Billing Disputes**
- 2.1 AIN/Birch shall electronically submit all billing disputes to AT&T using the form specified by AT&T. In the event of a billing dispute, the Parties will endeavor to resolve the dispute within sixty (60) days of the notification date. Within five (5) business days of AT&T's denial, or partial denial, of the billing dispute, if AIN/Birch is not satisfied with AT&T's resolution of the billing dispute or if no response to the billing dispute has been received by AIN/Birch by such sixtieth (60<sup>th</sup>) day, AIN/Birch must pursue the escalation process as outlined in the Billing Dispute Escalation Matrix, set forth on AT&T's Wholesale – Southeast Region Web site, or the billing dispute shall be considered denied and closed. If, after escalation, the Parties are unable to reach resolution, then the aggrieved Party, if it elects to pursue the dispute shall pursue dispute resolution in accordance with General Terms and Conditions.
- 2.2 For purposes of this Section 2, a billing dispute means a reported dispute submitted pursuant to Section 2.1 above of a specific amount of money actually billed by AT&T within twelve (12) months of the submission of such dispute. AIN/Birch agrees to not submit billing disputes for amounts billed

more than twelve (12) months prior to submission of a billing dispute filed for amounts billed. The billing dispute must be clearly explained by AIN/Birch and supported by written documentation, which clearly shows the basis for disputing charges. The determination as to whether the billing dispute is clearly explained or clearly shows the basis for disputing charges shall be within AT&T's sole reasonable discretion. Disputes that are not clearly explained or those that do not provide complete information may be rejected by AT&T. Claims by AIN/Birch for damages of any kind will not be considered a billing dispute for purposes of this Section. If AT&T resolves the billing dispute, in whole or in part, in favor of AIN/Birch, any credits and interest due to AIN/Birch as a result thereof shall be applied to AIN/Birch's account by AT&T upon resolution of the billing dispute.

### **3. Non-InterCompany Settlements**

- 3.1 Direct Participants are Telecommunications carriers that exchange data directly with other Direct Participants via the Centralized Message Distribution System (CMDS) Data Center (Direct Participant) and may act as host companies (Host) for those Telecommunications carriers that do not exchange data directly via the CMDS Data Center.
- 3.2 The Non-InterCompany Settlements (NICS) is the national system administered by Telcordia that is used in the settlement of revenues for calls that are originated and billed by two (2) different local exchange carriers (LEC) within a single Direct Participant's territory to another for billing. NICS applies to calls involving another LEC where the Earning Company and the Billing Company are located within AT&T's Southeast Region territory.
- 3.3 In association with message distribution service, AT&T will provide AIN/Birch with associated intercompany settlements reports as appropriate.
- 3.4 Notwithstanding anything in this Agreement to the contrary, in no case shall either Party be liable to the other for any direct or consequential damages incurred as a result of the obligations set out in this Section 3.
- 3.5 Intercompany Settlements Messages
  - 3.5.1 Intercompany Settlements Messages facilitate the settlement of revenues associated with traffic originated from or billed by AIN/Birch as a facilities based provider of local exchange Telecommunications Services.
  - 3.5.2 AT&T will receive the monthly NICS reports from Telcordia on behalf of AIN/Birch and will distribute copies of these reports to AIN/Birch on a monthly basis.
  - 3.5.3 Through NICS, AT&T will collect the revenue earned by AIN/Birch within the AT&T territory from another LEC also within the AT&T territory where the messages are billed, less a per message billing and collection fee of five cents (\$0.05), on behalf of AIN/Birch. AT&T will remit the revenue billed by AIN/Birch within the AT&T region to the LEC also within the AT&T region, where the messages originated, less a per message billing and collection fee of five cents (\$0.05). These two (2) amounts will be netted together by AT&T and the resulting charge or credit issued to AIN/Birch via a CABS miscellaneous bill on a monthly basis in arrears.

- 3.5.4 AT&T and AIN/Birch agree that monthly netted amounts of less than fifty dollars (\$50.00) will not be settled.

## **Attachment 8**

### **Rights-of-Way, Conduits and Pole Attachments**

## **Rights-of-Way, Conduits and Pole Attachments**

AT&T will provide nondiscriminatory access to any pole, duct, conduit, or right-of-way owned or controlled by AT&T pursuant to 47 U.S.C. § 224, as amended by the Act, pursuant to terms and conditions of a separate license agreement negotiated with AT&T.

## **Attachment 9**

### **Service Quality Measurements**

## SERVICE QUALITY MEASUREMENTS

Upon a particular Commission's issuance of an order pertaining to Service Quality Measurements in a proceeding expressly applicable to all CLECs generally, AT&T shall implement in that state such Service Quality Measurements as of the date specified by the Commission. Service Quality Measurements that have been ordered in a particular state can currently be accessed via the internet at <http://pmap.wholesale.att.com>.

## 1.0 PURPOSE

In the unlikely event of a disaster occurring that affects AT&T's long-term ability to deliver traffic to a CLEC, general procedures have been developed by AT&T to hasten the recovery process in accordance with the Telecommunications Service Priority (TSP) Program established by the FCC to identify and prioritize telecommunication services that support national security or emergency preparedness (NS/EP) missions. A description of the TSP Program as it may be amended from time to time is available on AT&T's Wholesale – Southeast Region Web site. Since each location is different and could be affected by an assortment of potential problems, a detailed recovery plan is impractical. However, in the process of reviewing recovery activities for specific locations, some basic procedures emerge that appear to be common in most cases.

These general procedures should apply to any disaster that affects the delivery of traffic for an extended time period. Each CLEC will be given the same consideration during an outage, and service will be restored as quickly as possible.

This document will cover the basic recovery procedures that would apply to every CLEC.

## 2.0 SINGLE POINT OF CONTACT

When a problem is experienced, regardless of the severity, the AT&T Network Management Center (NMC) will observe traffic anomalies and begin monitoring the situation. Controls will be appropriately applied to insure the sanity of AT&T's network; and, in the event that a switch or facility node is lost, the NMC will attempt to circumvent the failure using available reroutes.

AT&T's NMC will remain in control of the restoration efforts until the problem has been identified as being a long-term outage. At that time, the NMC will contact AT&T's ECC and relinquish control of the recovery efforts. Even though the ECC may take charge of the situation, the NMC will continue to monitor the circumstances and restore traffic as soon as damaged network elements are revitalized.

**The telephone number for the AT&T Network Management Center in Atlanta, as published in Telcordia's National Network Management Directory, is 404-321-2516.**

## 3.0 IDENTIFYING THE PROBLEM

During the early stages of problem detection, the NMC will be able to tell which CLECs are affected by the catastrophe. Further analysis and/or first hand observation will determine if the disaster has affected CLEC equipment only, AT&T equipment only or a combination. The initial restoration activity will be largely determined by the equipment that is affected.

Once the nature of the disaster is determined and after verifying the cause of the problem, the NMC will initiate reroutes and/or transfers that are jointly agreed upon by the affected CLECs' Network Management Center and the AT&T NMC. The type and percentage of controls used will depend upon available network capacity. Controls necessary to stabilize the situation will be invoked and the NMC will attempt to re-establish as much traffic as possible.

For long-term outages, recovery efforts will be coordinated by the ECC. Traffic controls will continue to be applied by the NMC until facilities are re-established. As equipment is made available for service, the ECC will instruct the NMC to begin removing the controls and allow traffic to resume.

### **3.1 SITE CONTROL**

In the total loss of building use scenario, what likely exists will be a smoking pile of rubble. This rubble will contain many components that could be dangerous. It could also contain any personnel on the premises at the time of the disaster. For these reasons, the local fire marshal with the assistance of the police will control the site until the building is no longer a threat to surrounding properties and the companies have secured the site from the general public.

During this time, the majority owner of the building should be arranging for a demolition contractor to mobilize to the site with the primary objective of reaching the cable entrance facility for a damage assessment. The results of this assessment would then dictate immediate plans for restoration, both short term and permanent.

In a less catastrophic event, i.e., the building is still standing and the cable entrance facility is usable, the situation is more complex. The site will initially be controlled by local authorities until the threat to adjacent property has diminished. Once the site is returned to the control of the companies, the following events should occur.

An initial assessment of the main building infrastructure systems (mechanical, electrical, fire and life safety, elevators, and others) will establish building needs. Once these needs are determined, the majority owner should lead the building restoration efforts. There may be situations where the site will not be totally restored within the confines of the building. The companies must individually determine their needs and jointly assess the cost of permanent restoration to determine the overall plan of action.

Multiple restoration trailers from each company will result in the need for designated space and installation order. This layout and control is required to maximize the amount of restoration equipment that can be placed at the site, and the priority of placements.

Care must be taken in this planning to ensure other restoration efforts have logistical access to the building. Major components of telephone and building equipment will need to be removed and replaced. A priority for this equipment must also be jointly established to facilitate overall site restoration. (Example: If the AC switchgear has sustained damage, this would be of the highest priority in order to regain power, lighting, and HVAC throughout the building.)

If the site will not accommodate the required restoration equipment, the companies would then need to quickly arrange with local authorities for street closures, rights of way or other possible options available.

### 3.2 ENVIRONMENTAL CONCERNS

In the worse case scenario, many environmental concerns must be addressed. Along with the police and fire marshal, the state environmental protection department will be on site to monitor the situation.

Items to be concerned with in a large central office building could include:

1. Emergency engine fuel supply. Damage to the standby equipment and the fuel handling equipment could have created "spill" conditions that have to be handled within state and federal regulations.
2. Asbestos-containing materials that may be spread throughout the wreckage. Asbestos could be in many components of building, electrical, mechanical, outside plant distribution, and telephone systems.
3. Lead and acid. These materials could be present in potentially large quantities depending upon the extent of damage to the power room.
4. Mercury and other regulated compounds resident in telephone equipment.
5. Other compounds produced by the fire or heat.

Once a total loss event occurs at a large site, local authorities will control immediate clean up (water placed on the wreckage by the fire department) and site access.

At some point, the companies will become involved with local authorities in the overall planning associated with site clean up and restoration. Depending on the clean up approach taken, delays in the restoration of several hours to several days may occur.

In a less severe disaster, items listed above are more defined and can be addressed individually depending on the damage.

In each case, the majority owner should coordinate building and environmental restoration as well as maintain proper planning and site control.

### 4.0 THE ECC

The ECC is located in the Midtown 1 Building in Atlanta, Georgia. During an emergency, the ECC staff will convene a group of pre-selected experts to inventory the damage and initiate corrective actions. These experts have regional access to AT&T's personnel and equipment and will assume control of the restoration activity anywhere in the nine-state area.

In the past, the ECC has been involved with restoration activities resulting from hurricanes, ice storms and floods. They have demonstrated their capabilities during these calamities as well as during outages caused

by human error or equipment failures. This group has an excellent record of restoring service as quickly as possible.

During a major disaster, the ECC may move emergency equipment to the affected location, direct recovery efforts of local personnel and coordinate service restoration activities with the CLECs. The ECC will attempt to restore service as quickly as possible using whatever means is available, leaving permanent solutions, such as the replacement of damaged buildings or equipment, for local personnel to administer.

Part of the ECC's responsibility, after temporary equipment is in place, is to support the NMC efforts to return service to the CLECs. Once service has been restored, the ECC will return control of the network to normal operational organizations. Any long-term changes required after service is restored will be made in an orderly fashion and will be conducted as normal activity.

## **5.0 RECOVERY PROCEDURES**

The nature and severity of any disaster will influence the recovery procedures. One crucial factor in determining how AT&T will proceed with restoration is whether or not AT&T's equipment is incapacitated. Regardless of whose equipment is out of service, AT&T will move as quickly as possible to aid with service recovery; however, the approach that will be taken may differ depending upon the location of the problem.

### **5.1 CLEC OUTAGE**

For a problem limited to one CLEC (or a building with multiple CLECs), AT&T has several options available for restoring service quickly. For those CLECs that have agreements with other CLECs, AT&T can immediately start directing traffic to a provisional CLEC for completion. This alternative is dependent upon AT&T having concurrence from the affected CLECs.

Whether or not the affected CLECs have requested a traffic transfer to another CLEC will not impact AT&T's resolve to re-establish traffic to the original destination as quickly as possible.

### **5.2 AT&T OUTAGE**

Because AT&T's equipment has varying degrees of impact on the service provided to the CLECs, restoring service from damaged AT&T equipment is different. The outage will probably impact a number of Carriers simultaneously. However, the ECC will be able to initiate immediate actions to correct the problem.

A disaster involving any of AT&T's equipment locations could impact the CLECs, some more than others. A disaster at a Central Office (CO) would only impact the delivery of traffic to and from that one location, but the incident could affect many Carriers. If the CO is a Serving Wire Center (SWC), then traffic from the entire area to those Carriers served from that switch would also be impacted. If the switch functions as an Access Tandem, or there is a tandem in the building, traffic from every CO to every CLEC could be interrupted. A disaster that destroys a facility hub could disrupt various traffic flows, even though the switching equipment may be unaffected.

The NMC would be the first group to observe a problem involving AT&T's equipment. Shortly after a disaster, the NMC will begin applying controls and finding re-routes for the completion of as much traffic as possible. These reroutes may involve delivering traffic to alternate Carriers upon receiving approval from the CLECs involved. In some cases, changes in translations will be required. If the outage is caused by the destruction of equipment, then the ECC will assume control of the restoration.

### 5.2.1 Loss of a CO

When AT&T loses a CO, the ECC will

- a) Place specialists and emergency equipment on notice;
- b) Inventory the damage to determine what equipment and/or functions are lost;
- c) Move containerized emergency equipment and facility equipment to the stricken area, if necessary;
- d) Begin reconnecting service on a parity basis for Hospitals, Police and other emergency agencies or customers served by AT&T or CLEC in accordance with the TSP priority restoration coding scheme entered in the AT&T Maintenance database prior to the emergency.

### 5.2.2 Loss of a CO with SWC Functions

The loss of a CO that also serves as a SWC will be restored as described in Section 5.2.1.

### 5.2.3 Loss of a CO with Tandem Functions

When AT&T loses a CO building that serves as an Access Tandem and as a SWC, the ECC will

- a) Place specialists and emergency equipment on notice;
- b) Inventory the damage to determine what equipment and/or functions are lost;
- c) Move containerized emergency equipment and facility equipment to the stricken area, if necessary;
- d) Begin reconnecting service on a parity basis for Hospitals, Police and other emergency agencies or customers served by AT&T or CLEC in accordance with the TSP priority restoration coding scheme entered in the AT&T Maintenance database prior to the emergency;
- e) Re-direct as much traffic as possible to the alternate access tandem (if available) for delivery to those CLECs utilizing a different location as a SWC;
- f) Begin aggregating traffic to a location near the damaged building. From this location, begin re-establishing trunk groups to the CLECs for the delivery of traffic normally found on the direct trunk groups. (This aggregation point may be the alternate access tandem location or another CO on a primary facility route.)

### 5.2.4 Loss of a Facility Hub

In the event that AT&T loses a facility hub, the recovery process is much the same as above. Once the NMC has observed the problem and administered the appropriate controls, the ECC will assume authority for the repairs. The recovery effort will include

- a) Placing specialists and emergency equipment on notice;

- b) Inventorying the damage to determine what equipment and/or functions are lost;
- c) Moving containerized emergency equipment to the stricken area, if necessary;
- d) Reconnecting service on a parity basis for Hospitals, Police and other emergency agencies or customers served by AT&T or CLEC in accordance with the TSP priority restoration coding scheme entered in the AT&T Maintenance database prior to the emergency; and
- e) If necessary, AT&T will aggregate the traffic at another location and build temporary facilities. This alternative would be viable for a location that is destroyed and building repairs are required.

### **5.3 COMBINED OUTAGE (CLEC AND AT&T EQUIPMENT)**

In some instances, a disaster may impact AT&T's equipment as well as the CLECs'. This situation will be handled in much the same way as described in Section 5.2.3. Since AT&T and the CLECs will be utilizing temporary equipment, close coordination will be required.

### **6.0 T1 IDENTIFICATION PROCEDURES**

During the restoration of service after a disaster, AT&T may be forced to aggregate traffic for delivery to a CLEC. During this process, T1 traffic may be consolidated onto DS3s and may become unidentifiable to the Carrier. Because resources will be limited, AT&T may be forced to "package" this traffic entirely differently than normally received by the CLECs. Therefore, a method for identifying the T1 traffic on the DS3s and providing the information to the Carriers is required.

## 7.0 ACRONYMS

|      |   |                                             |
|------|---|---------------------------------------------|
| CLEC | - | Competitive Local Exchange Carrier          |
| CO   | - | Central Office (AT&T)                       |
| DS3  | - | Facility that carries 28 T1s (672 circuits) |
| ECC  | - | Emergency Control Center (AT&T)             |
| NMC  | - | Network Management Center                   |
| SWC  | - | Serving Wire Center (AT&T switch)           |
| T1   | - | Facility that carries 24 circuits           |
| TSP  | - | Telecommunications Service Priority         |

### **Hurricane Information**

During a hurricane, AT&T will make every effort to keep CLECs updated on the status of our network. Information centers will be set up throughout AT&T. These centers are not intended to be used for escalations, but rather to keep the CLEC informed of network related issues, area damages and dispatch conditions, etc.

Hurricane-related information can also be found on AT&T's Wholesale – Southeast Region Web site by clicking on the link "Relief Information" in the special alert box located on the Web page. Additionally, information concerning Mechanized Disaster Reports can also be found by clicking on the link "Click here for information concerning Disaster Recovery Reports" on the Hurricane Relief page.

### **BST Disaster Management Plan**

AT&T maintenance centers have geographical and redundant communication capabilities. In the event of a disaster removing any maintenance center from service another geographical center would assume maintenance responsibilities. The contact numbers will not change and the transfer will be transparent to the CLEC.

## **Attachment 11**

### **Bona Fide Request and New Business Request Process**

**BONA FIDE REQUEST AND NEW BUSINESS REQUEST PROCESS**

1. **Bona Fide Request**
  - 1.1 The Parties agree that AIN/Birch is entitled to order any Network Element, interconnection option or service option required to be made available by FCC or Commission requirements pursuant to the Act. A Bona Fide Request (BFR) is to be used when AIN/Birch makes a request of AT&T to provide a new or modified Network Element, interconnection option or other service option pursuant to the Act that was not previously provided for in this Agreement.
  - 1.2 A BFR shall be submitted in writing by AIN/Birch and shall specifically identify the requested service date, technical requirements, space requirements and/or such other specifications that clearly define the request such that AT&T has sufficient information to analyze and prepare a response. Such a request shall also include AIN/Birch's designation of the request as being pursuant to the Telecommunications Act of 1996 (i.e., a BFR). The request shall be sent to AIN/Birch's designated AT&T Sales contact or Senior Carriers Accounts Manager.
  - 1.3 Within two (2) business days of receipt of a BFR, AT&T shall acknowledge in writing its receipt and identify a single point of contact responsible for responding to the BFR and shall request any additional information needed to process the request to the extent known at that time. Notwithstanding the foregoing, AT&T may reasonably request additional information from AIN/Birch at any time during the processing of the BFR.
  - 1.4 Within thirty (30) business days of AT&T's receipt of the BFR, if the preliminary analysis of the requested BFR is not of such complexity that it will cause AT&T to expend extraordinary resources to evaluate the BFR, AT&T shall respond to AIN/Birch by providing a preliminary analysis of the new or modified Network Element or interconnection option not ordered by the FCC or Commission that is the subject of the BFR. The preliminary analysis shall either confirm that AT&T will offer access to the new or modified Network Element, interconnection option or service option or confirm that AT&T will not offer the new or modified Network Element, interconnection option or service option.
  - 1.5 For any new or modified Network Element, interconnection option or service option not ordered by the FCC or Commission, if the preliminary analysis states that AT&T will offer the new or modified Network Element, interconnection option or service option, the preliminary analysis will include an estimate of the costs of utilizing existing resources, both personnel and systems, in the development including, but not limited to, request parameters analysis, determination of impacted AT&T departments, determination of required resources, project management resources, etc. (Development Rate) including a general breakdown of such costs associated with the Network Element, interconnection option or service option and the date the request can be met. If the preliminary analysis states that AT&T will not offer the new or modified Network Element, interconnection option or service option, AT&T will provide an explanation of why the request is not technically feasible, does not qualify as a BFR for the new or modified Network Element, interconnection option or service option, should actually be submitted as a New Business Request (NBR) or is otherwise not required to be provided under the Act. If AT&T cannot

provide the Network Element, interconnection option or service option by the requested date, AT&T shall provide an alternative proposed date together with a detailed explanation as to why AT&T is not able to meet AIN/Birch's requested date.

- 1.6 For any new or modified Network Element, interconnection option or service option not ordered by the FCC or Commission, if AT&T determines that the preliminary analysis of the requested BFR is of such complexity that it will cause AT&T to expend extraordinary resources to evaluate the BFR, AT&T shall notify AIN/Birch within ten (10) business days of AT&T's receipt of BFR that a fee will be required prior to the preliminary evaluation of the BFR. Such fee shall be limited to AT&T's extraordinary expenses directly related to the complex request that require the allocation and engagement of additional resources above the existing allocated resources used on BFR cost development which include, but are not limited to, expenditure of funds to develop feasibility studies, specific resources that are required to determine request requirements (such as operation support system analysts, technical managers, software developers), software impact analysis by specific software developers; software architecture development, hardware impact analysis by specific system analysts, etc. and the request for such fee shall be accompanied with a general breakdown of such costs. If AIN/Birch accepts the complex request evaluation fee proposed by AT&T, AIN/Birch shall submit such fee within thirty (30) business days of AT&T's notice that a complex request evaluation fee is required. Within thirty (30) business days of AT&T's receipt of the complex request evaluation fee, AT&T shall respond to AIN/Birch by providing a preliminary analysis, consistent with Section 1.4 above.
- 1.7 AIN/Birch may cancel a BFR at any time up until thirty (30) business days after receiving AT&T's preliminary analysis. If AIN/Birch cancels the BFR within thirty (30) business days after receipt of AT&T's preliminary analysis, AT&T shall be entitled to keep any complex request evaluation fee submitted in accordance with Section 1.6 above, minus those costs included in the fee that have not been incurred as of the date of cancellation.
- 1.8 AIN/Birch will have thirty (30) business days from receipt of preliminary analysis to accept the preliminary analysis or cancel the BFR. If AIN/Birch fails to respond within this thirty (30) business day period, the BFR will be deemed cancelled. Acceptance of the preliminary analysis must be in writing and accompanied by the estimated Development Rate for the new or modified Network Element, interconnection option or service option quoted in the preliminary analysis.
- 1.9 Notwithstanding any other provision of this Agreement, AT&T shall propose a firm price quote, including the firm Development Rate, the firm nonrecurring rate and the firm recurring rate, and a detailed implementation plan within ten (10) business days of receipt of AIN/Birch's accurate BFR application for a Network Element, interconnection option or service option that is operational at the time of the request; thirty (30) business days of receipt of AIN/Birch's accurate BFR application for a new or modified Network Element, interconnection option or service option ordered by the FCC or Commission; and within sixty (60) business days of receipt of AIN/Birch's accurate BFR application for a new or modified Network Element, interconnection option or service option not ordered by the FCC or Commission or not operational at the time of the request. The firm nonrecurring rate will not include any of the Development Rate or the complex request evaluation fee, if

required, in the calculation of this rate. Such firm price quote shall not exceed the estimate provided with the preliminary analysis by more than twenty-five percent (25%).

- 1.10 AIN/Birch shall have thirty (30) business days from receipt of firm price quote to accept or deny the firm price quote and submit any additional Development or nonrecurring rates quoted in the firm price quote.
- 1.11 Unless AIN/Birch agrees otherwise, all prices shall be consistent with the applicable pricing principles and provisions of the Act.
- 1.12 If AIN/Birch believes that AT&T's firm price quote is not consistent with the requirements of the Act, either Party may seek dispute resolution in accordance with the dispute resolution provisions set forth in General Terms and Conditions.
- 1.13 Upon agreement to the rates, terms and conditions of a BFR, the Parties shall negotiate in good faith an amendment to this Agreement.

## **2 New Business Request**

- 2.1 AIN/Birch also shall be permitted to request the development of new or modified facilities or service options which may not be required by the Act. Procedures applicable to requesting the addition of such elements, services and options are specified in this Attachment. A NBR is to be used by AIN/Birch to make a request of AT&T for a new or modified feature or capability of an existing product or service, a new product or service that is not deployed within the AT&T network or operations and business support systems, or a new or modified service option that was not previously included in this Agreement (Requested NBR Services) and is not required by the Act.
- 2.2 An NBR shall be submitted in writing by AIN/Birch and shall specifically identify the requested service date, technical requirements, space requirements and/or such specifications that clearly define the request such that AT&T has sufficient information to analyze and prepare a response. The request shall be sent to AIN/Birch's designated AT&T Sales contact or Senior Carrier Accounts Manager.
- 2.3 Within two (2) business days of receipt of an NBR, AT&T shall acknowledge in writing its receipt and identify a single point of contact responsible for responding to the NBR and shall request any additional information needed to process the request to the extent known at that time. Notwithstanding the foregoing, AT&T may reasonably request additional information from AIN/Birch at any time during the processing of the NBR.
- 2.4 If the preliminary analysis of the requested NBR is not of such complexity that it will cause AT&T to expend extraordinary resources to evaluate the NBR, within thirty (30) business days of its receipt of the NBR, AT&T shall respond to AIN/Birch by providing a preliminary analysis of such Requested NBR Services that are the subject of the NBR. The preliminary analysis shall either confirm that AT&T will offer access to the Requested NBR Services or confirm that AT&T will not offer the Requested NBR Services.
- 2.5 If the preliminary analysis states that AT&T will offer the Requested NBR Services, the preliminary analysis will include an estimate of the Development Rate including a general breakdown of costs and the date the request can be met. If AT&T cannot provide the

Requested NBR Service by the requested date, it shall provide an alternative proposed date together with a detailed explanation as to why AT&T is not able to meet AIN/Birch's requested date.

- 2.6 If AT&T determines that the preliminary analysis of the requested NBR is of such complexity that it will cause AT&T to expend extraordinary resources to evaluate the NBR, AT&T shall notify AIN/Birch within ten (10) business days of AT&T's notice that a complex request evaluation fee is required prior to the evaluation of the NBR. Such fee shall be limited to AT&T's extraordinary expenses directly related to the complex request. If AIN/Birch accepts the complex request evaluation fee amount proposed by AT&T, AIN/Birch shall submit such complex request evaluation fee within thirty (30) business days of AT&T's notice that a complex request evaluation fee is required.
- 2.7 Within thirty (30) business days of AT&T's receipt of the complex request evaluation fee, AT&T shall respond to AIN/Birch by providing a preliminary analysis of such Requested NBR Services.
- 2.8 AIN/Birch may cancel an NBR at any time. If AIN/Birch cancels the request more than ten (10) business days after submitting it, AIN/Birch shall pay AT&T's reasonable and demonstrable costs of processing and/or implementing the NBR up to the date of cancellation in addition to any fee submitted in accordance with Section 1.6 above.
- 2.9 AIN/Birch will have thirty (30) business days from receipt of the preliminary analysis to accept the preliminary analysis or cancel the NBR. If AIN/Birch fails to respond within this thirty (30) business day period, the NBR will be deemed cancelled.
- 2.10 Acceptance of the preliminary analysis must be in writing and accompanied by the estimated Development Rate for the Requested NBR Services quoted in the preliminary analysis.
- 2.11 AT&T shall propose a firm price quote including the firm Development Rate, the firm nonrecurring rate, and the firm recurring rate, and a detailed implementation plan within ten (10) business days of receipt of AIN/Birch's accurate NBR application for a Requested NBR Service that is operational at the time of the request and within sixty (60) business days of receipt of AIN/Birch's accurate NBR application for the Requested NBR Services not operational at the time of the request. The firm nonrecurring rate will not include any of the Development Rate or the complex request evaluation fee, if required, in the calculation of this rate. Such firm price quote shall not exceed the estimate provided with the preliminary analysis by more than twenty-five percent (25%).
- 2.12 AIN/Birch shall have thirty (30) business days from receipt of the firm price quote to accept or deny the firm price quote and submit any additional nonrecurring, non-refundable fees quoted in the firm price quote. If the firm price quote is less than the preliminary analysis' estimate of the Development Rate, AT&T will credit AIN/Birch's account for the difference.
- 2.13 Upon agreement to the rates, terms and conditions of a NBR, an amendment to this Agreement, or a separate agreement, may be required and the Parties shall negotiate such agreement or amendment in good faith.
