RE: FCC Form 481, Carrier Annual Reporting Data Collection Form
Docket No. 13-00112

Dear Chairman Allison:

Pursuant to section 54.313(i) of the Federal Communications Commission's ("FCC's") rules,¹ AT&T Tennessee hereby provides a public version of its FCC Form 481, Carrier Annual Reporting Data Collection Form that it filed with the Universal Service Administrative Company ("USAC"). An identical report will be filed with the FCC once that agency resumes normal operations. If the FCC-stamped version of the report is necessary, we will provide a copy of the same as soon as possible. All eligible telecommunication carriers that receive high-cost and/or low income support must file Form 481 with the FCC in order to continue receiving such support. In a public notice released August 6, 2013, the FCC extended the Form 481 filing deadline to October 15, 2013.

The collection of data and information contained in FCC Form 481 is done under the FCC's authority in section 254 of the Communications Act of 1934, as amended, 47 U.S.C. § 254, and sections 54.313 and 54.422 of the Commission's rules, 47 C.F.R. §§ 54.313 and 54.422. The FCC anticipates that state commissions will use the data contained in carriers' FCC Form 481 filings to develop their section 54.314 certifications.² This year, such certifications are due on or before December 16, 2013.³

Form 481 filing contains confidential information (such as service outage information) that has been redacted from the public version of the report. USAC maintains the confidentiality of filings without the need for protective measures. As such, we are filing a public version of the USAC filing. By separate cover, under seal, and with appropriate protective measures in place, the Company is submitting a proprietary version of Form 481.

¹ 47 C.F.R. § 54.313(i).

³ *Wireline Competition Bureau Announces Filing Deadline of October 15, 2013 for Eligible Telecommunications Carriers to File High-Cost and Low-Income Annual Reports, and Announcing Filing Deadline of December 16, 2013 for States and ETCs to File Annual Use Certifications*, DA 13-1707, Public Notice (rel. Line 510 – Description of Compliance with Service Quality and Consumer Protection:

AT&T has established methods and procedures that are designed to facilitate compliance with applicable service quality standards and consumer protection rules. In the event that a service quality or consumer protection issue arises, AT&T works with appropriate government entities and/or customers to resolve the issue consistent with AT&T's obligations.

AT&T's wireline high-cost recipients comply with the company's privacy policy, *available at* <http://www.att.com/gen/privacy-policy?pid=13692> and, among other things, have implemented Customer Proprietary Network Information and Truth-in-Billing procedures in accordance with the Commission's requirements. AT&T's wireline high-cost recipients also make available the rates, terms and conditions of their offerings through service guides, guidebooks and, where applicable, tariffs, which consumers can access through AT&T's website (*available at* <http://www.att.com/gen/public-affairs?pid=11970>). Among other things, these documents clearly explain the terms of service, including dispute resolution procedures and billing and payment requirements. Consumers are able to contact AT&T with questions or concerns through a toll-free number or online. Also, AT&T's wireline high-cost recipients advertise their services using media of general distribution and these advertisements are clear and contain appropriate disclosures.

AT&T
Preparedness
Statement

Section 54.313(a)(6) of the Commission's rules requires an ETC to certify an ability to function in emergency situations as set forth in section 54.202(a)(2) of the Commission's rules. The standards set forth in section 54.202(a)(2) include a reasonable amount of back-up power to ensure functionality without an external power source, an ability to reroute traffic around damaged facilities and a capability to manage traffic spikes resulting from emergency situations.

All AT&T ILEC central offices are equipped with battery backup equipment. Offices with dedicated standby generators are equipped with sufficient battery capacity to run for approximately four hours without power; offices with access to portable generators have sufficient battery capacity to operate for approximately eight hours without power. The fuel tanks supporting the standby generators are sized to supply enough fuel for approximately 72 hours runtime at three-quarters full fuel capacity, for the continuous operation of the engine alternator set at 100% (full) load.

Each AT&T network (voice [long-distance, local]) IP, frame, ATM, etc.) is managed by a centralized network reliability center that manages and controls the network's operation. Network reliability centers are located throughout the United States. Network reliability centers are responsible for 1) Proactive 7x24 surveillance of network elements (fault management), 2) Progress & Event Notification to Customer Care Centers 3) Asset Management (including Spare Equipment Availability) 4) Logical Configuration Management, 5) Network Upgrades and Change Management and 6) Directing the Maintenance Activities of Business Partners (including the network field operations force and capacity management). Overseeing the network reliability centers and the hub of AT&T's overall network operations is the Global Network Operations Center, located in Bedminster, NJ. This center is staffed 24X7 and is constructed in a hardened facility. The GNOC staff monitors and proactively manages the data and voice traffic flowing across AT&T's domestic and global networks twenty-four hours a day, seven days a week. From their workstations on the GNOC floor, they can quickly survey a sweeping wall of 141 giant screens showing different aspects of network activity, network topography and news events. At their consoles, each team member monitors a different segment or technology in the network using the most advanced diagnostic and management tools available.

Planning for and responding to external crises is something that AT&T performs without hesitation. AT&T has a team of experts trained in working all types of situations around the

world. We practice this response several times per year. AT&T has run and managed some of the world's largest and most complex networks for over 120 years. AT&T understands network reliability and disaster planning.

Not only do we practice in a "real life situation," but we invite our clients and customers to observe what we have and what we can bring to bear to restore the AT&T network. We have extensive experience in planning for and responding to a wide variety of situations, from hurricanes to floods, to power outages and man-made disasters. We have a team of experienced Disaster Recovery First (DRF) responders that work to restore the AT&T network as quickly and safely as possible.

- Our Business Continuity Team has extensive experience in planning for and responding to a wide variety of situations that can affect the AT&T network. Our plans are designed to get the network back to a Business As Usual (BAU) state as quickly and safely as possible. The planning process includes incorporating improvement opportunities from previous events into future response activities.
- The AT&T Global Network Operation Center (GNOC) 3P (Preventive, Predictive, Pro-Active) Process collects, identifies, and evaluates the consolidated network view of any high-risk network vulnerabilities in a particular area to determine if there is a need to develop a mitigation response plan for the network.
 - This process is used for such events as National Special Security Events (NSSEs), political conventions, the Olympics, high profile sporting events, and hurricane/storm preparations.
 - The mitigation plan is developed to reduce the customer service disruption and to minimize network service affecting incidents with the activation of a managed restoration plan.
 - In addition to ensuring a response plan for any adverse events, the team also reviews and addresses issues such as capacity, infrastructure, and physical reliability.
- The AT&T Information Technology Service Continuity (ITSC) Program (ITSC) is committed to identifying and managing IT-related service continuity risks across the enterprise. The organization has established safeguards to minimize the risk, cost, and duration of disruption to essential business processes in the event of a major crisis or disaster. Accordingly, ITSC has taken a number of steps to ensure reliability of AT&T critical business processes and supporting infrastructures in order to provide high-quality communication services to AT&T customers. This includes up-front prevention and mitigation efforts, as well as comprehensive emergency response and recovery plans in the event of a disaster or crisis for three process area:
 - IT Business Continuity - development, maintenance, and emergency procedures consistent with industry best practices.
 - IT Disaster Recovery - planning, testing and actual recovery of IT critical infrastructure and applications.
 - IT Crisis Center (ITCC) - management of processes, procedures, resources, and teams in response to disasters including:

- Coordination with customer network recovery teams
- Compliance with local government, national agencies and Code of Federal Regulations (CFR) 47, which governs telecommunication restoration efforts

Based on the foregoing, the reporting carrier certifies it is able to function in emergency situations as set forth in section 54.202(a)(2).

- A. Individual line measured rate service is available only in certain central offices of the exchanges shown herein. Measured rate service will not be offered where RegionServ is available with the exception of service provided to customer-provided public telephones (see A3.1.E.).

Measured rate service requires special equipment and arrangements and is furnished only when such equipment and arrangements are available.

The rates specified, with zone charges applicable to those services furnished outside the BRA of an exchange, entitle subscribers to a usage allowance for calls completed to stations in the local calling area, i.e., all stations bearing the designation of central offices of the serving exchange and additional exchanges as shown in A3.6, Local Calling Areas.

Charges for local usage in excess of the allowances are specified in A3.2.3, and are based on mechanized records kept of all calls originated on the line.

A3.15 Local Operator Verification/Interruption Service

A3.15.1 General

Verification Service provides operator assistance in determining if a called line is in use. Interruption Service provides for operator interruption of a conversation in progress on a called line. The customer may request these services for a charge, where facilities are available, by calling the "O" Operator.

A3.15.2 Application Of Charges

- A. The charges specified in A3.15.3. following will apply to all requests except:
1. Emergency requests from official emergency agencies when the request is received on an agency line from agency personnel.
 2. Emergency requests in which the caller identifies that the request is to
 - a. an official public emergency agency,
 - b. an emergency medical number, or
 - c. privately endowed and operated suicide, drug, alcohol, or runaway crisis reporting center.
 3. Requests in which the operator encounters a trouble condition or has reason to believe a trouble condition exists.
 4. Requests from railroad companies where loss of property, including loss of employee wages, is involved. For the interruption charge to be waived, a listing of telephone numbers from which the interruptions originate must be on file with the Company prior to the call interruption.
- B. Verification: A charge applies each time the operator verifies a called line and hears voice communication.

A3. BASIC LOCAL EXCHANGE SERVICE

A3.15 Local Operator Verification/Interruption Service (Cont'd)

A3.15.2 Application Of Charges (Cont'd)

- D.** If an operator both verifies the condition of the line and interrupts conversation on the same request, the interrupt charge only applies. (M)
- E.** The charges for Verify/Interrupt service are in addition to any applicable message rates. (M)

A3.18.5 Schools - School/Parent Communications Service

- A. A concession may be granted to schools (K-12) which will apply as a credit toward charges applicable for lines dedicated exclusively to School/Parents Communications Systems.

This arrangement may also include a voice mail-box at the school so that incoming messages to the school or recorded responses made during initial calls may be directed to an individual teacher.
 2. The use of automated dialers shall be restricted to making outgoing calls to the residences of students enrolled in the school. A3.21 Multiline Service¹

(T)

A3.21.1 General

- A. Multiline Service is an optional bulk line or trunk service for subscribers utilizing large quantities of local lines between a single service location and the normal serving wire center. This service is provided in specific two wire line package sizes or its equivalency (four wire service requires two, two wire lines) and is available for basic line, PBX trunk classes of service, or channel services as specified in A13.25.4 of this Tariff or a combination thereof in locations where local measured service is provided.
- B. Multiline Service is provided subject to the availability of adequate facilities as determined by the Company. Network access for lines within these packages is provided only on a Bulk Usage Measured Rate Service basis as specified in A3.21.2.B. following. Bulk Usage Measured Rate Service when furnished on LightGate[®] service or MegaLink[®] channel service is provided at the rates and charges described in A3.26.
- C. Bulk Usage Measured Rate Service is a business measured rate service option available for subscribers of multiline service only, except as stated in B. preceding. The monthly rates for this service stated following include a monthly calling allowance for dialed sent paid local calls.

Note 1: Where RegionServ is available, Multiline Service will not be available to new subscribers. Existing customers may modify or change their existing arrangement at their current location, but may not relocate existing arrangement to a different address.

A3. BASIC LOCAL EXCHANGE SERVICE

A3.21 Multiline Service¹ (Cont'd)

A3.21.1 General (Cont'd)

- D. Regulations elsewhere in this Tariff pertaining to individual line or trunk measured rate service also apply to this service, except as modified herein. Specifically all conditions listed in A3.2.3 of this Tariff for other types of measured rate service apply to this service, except that the summarized total usage charges in excess of ten dollars per line or PBX Trunk for all dialed sent paid local calls will instead be reduced by 50 percent prior to the application of the monthly calling allowance. Bulk Usage Measured Rate Service may not be combined with other types of measured rate service on the same service account.
- E. Rates apply in addition for all other related services furnished such as Flat Rate Grouping Service, Custom Calling Service, etc., and are in addition to the monthly rate and usage charges for Bulk Usage Measured Rate Service shown following. (C)
- F. Local calls that are not dialed sent paid, i.e. operator assisted, mechanized calling card, etc., will be billed individually at the same measured rate service usage rates specified in A3.2 (including Time/Day usage provisions), in addition to any applicable Local Calling Card Service or Operator Assisted Local Call surcharges. Such calls are itemized on the subscriber's billing statement and are billed outside any applicable calling allowance or usage billing reductions for dialed sent paid local calls.

Note 1: Where RegionServ is available, Multiline Service will not be available to new subscribers. Existing customers may modify or change their existing arrangement at their current location, but may not relocate existing arrangement to a different address.

A3.31 Lifeline

A3.31.1 Description of Service

- A. The Lifeline program is designed to increase the availability of telecommunications services to low income subscribers by providing a credit to monthly recurring local service to qualifying residential subscribers. Basic terms and conditions are in compliance with the FCC's Order on Universal Service in FCC 97-157, which adopts the Federal-State Joint Board's recommendation in CC Docket 96-45, which complies with the Telecommunications Act of 1996 and the FCC Report and Order and Further Notice of Proposed Rulemaking in WC Docket No. 11-42, adopted January 31, 2012. Specific terms and conditions are as prescribed by the Tennessee Regulatory Authority and are as set forth in this tariff.
- B. Lifeline is supported by the federal universal service support mechanism.
- C. Federal *uniform* support of **\$9.25** is available for each Lifeline service and is passed through to *an eligible customer via a monthly Federal Lifeline credit*. An additional \$3.50 credit is provided by the Company. The total *monthly* Lifeline credit available to an eligible customer in Tennessee is **\$12.75**. The amount of credit will not exceed the charge for local service. (C)

A3.31.2 Regulations

- A. General
 - 1. One low income credit is available per household and is applicable to the primary residential connection only. Lifeline support is limited to a single subscription per household where household is defined to be any individual or group of individuals who are living together at the same address as one economic unit. For the purposes of this rule, an economic unit consists of all adult individuals contributing to and sharing in the income and expenses of a household.
 - 2. A Lifeline customer may subscribe to the capped message rate Lifeline plan (USOC LM8) or any local service offering available to other residence customers.
 - 3. Toll blocking, if elected, will be provided at no charge to the Lifeline subscriber.
 - 4. The deposit requirement is not applicable to a Lifeline customer who subscribes to toll blocking. If a Lifeline customer removes toll blocking prior to establishing an acceptable credit history, a deposit may be required. When applicable, advance payments will not exceed the connection and local service charges for one month.
 - 5. A Lifeline customer is exempt from the Late Payment Charge in Section A2 of the General Exchange Guidebook.
 - 6. The Federal Universal Service Charge will not be billed to Lifeline customers.
 - 7. A Lifeline subscriber's local service will not be disconnected for non-payment of toll charges. Local service may be denied for non-payment of local service in accordance with A2. Access to toll service may be denied for non-payment of toll charges. A Lifeline subscriber's request for reconnection of local service will not be denied if the service was previously denied for non-payment of toll charges.
 - 8. The non-discounted federal Lifeline credit amount will be passed along to resellers ordering local service at the prescribed resale discount from this Tariff, for their eligible end users. The additional credit to the end user will be the responsibility of the reseller. Eligible Telecommunications Carriers, as defined by the FCC, are required to establish their own Lifeline programs.

2. The Company reserves the right to periodically audit its records, working in conjunction with the appropriate state agencies, for the purpose of determining continuing eligibility. Information obtained during such audit will be treated as confidential information to the extent required under State and Federal laws.
