Subject: RE: question re: CCN Order for CleanLine (Docket No. 14-00036)

Ms. Morton,

Thank you for your recent inquiry. As you noted, on January 12, 2015, the Tennessee Regulatory Authority granted, without restriction, Plains and Eastern Clean Line, LLC's Petition for a Certificate of Convenience and Necessity (CCN) to construct and operate electric transmission facilities in the state of Tennessee. When it is issued, the Authority's Order will reflect its actions taken on January 12, 2015.

As a general matter, electrical power companies in Tennessee have statutory authority, subject to certain obligations and procedures, to condemn and acquire property for public use (i.e., eminent domain). As a public utility providing electric transmission services, Clean Line has authority to exercise and must comply with all of the attendant rights and duties of such utilities under Tennessee law.

Should you have any particular questions or concerns as to Clean Line's construction or service plans, please contact Mario Hurtado, Clean Line Executive Vice President – Development, at phone number (832) 319-6331 or by email to MHurtado@CleanLineEnergy.com.

Sincerely,

Kelly Cashman-Grams
Deputy General Counsel/Hearing Officer
Tennessee Regulatory Authority

Subject: question re: CCN Order for CleanLine (Docket No. 14-00036)

Ms. Grams,

In regards to the order related to the above docket number granting Clean Line Energy public utility status in Tennessee, I would like to know if Clean Line was granted eminent domain under Tennessee law in this order. I understand the order has not been filed yet but is in effect as of as of January 12, 2015. Since the order is affecting this project at this time, please forward the answer to this question for future planning.
