VIA ELECTRONIC FILING

Hon. Herbert H. Hilliard, Chairman c/o Sharla Dillon Tennessee Regulatory Authority 502 Deaderick Street, 4th Floor Nashville, TN 37243

> RE: Petition of Tennessee American Water Company Regarding the 2015 Investment and Related Expenses Under Qualified Infrastructure Investment Program Rider, the Economic Development Investment Rider, and the Safety and Environmental Compliance Rider, TRA Docket No. 14-00121

Dear Chairman Hilliard:

Attached for filing please find *Tennessee American Water Company's Response the City of Chattanooga's First Discovery Requests* in the above-captioned matter.

As required, an original of this filing, along with four (4) hard copies, will follow. Should you have any questions concerning this filing, or require additional information, please do not hesitate to contact me or Melvin Malone.

Very truly yours,

BUTLER SNOW LLP

Valeria E. Gomez

Responsible Witness: Linda C. Bridwell

Question:

1. Please state the Construction Work In Progress amount for Citico Improvement Phase 1B ("Citico 1B") included in Docket No. 10-00189. Please provide references to the record in Docket No. 10-00189 describing the Citico 1B project and all expenses and investment attributable to it (by document, page, and line, if available).

Response:

In Docket No. 10-00189, Tennessee American included an investment project of Citico Phase 1A and Phase 1B identified as project 26020503. (Refer to the response to Item 13 of the TRA's First Data Request, Attachment TRA-010Q013-RATE BASE pages 1 and 2 of 62). The workpaper showed a prior balance of \$1,387,087.74, construction expenditures in 2010 of \$4,748,344.06, and construction expenditures in 2011 of \$2,490,248.00. This would total \$8,625,679 through the end of 2011, or the end of the attritition year.

In his testimony, John Watson identified Citico Phase 1A as a primary project in the case, and indicated it would be placed in-service in December 2010 for a total cost of \$6.7 million. The information in the case does not provide a specific breakdown of the difference between Phase 1A and Phase 1B. Assuming all of the 2011 expenditures are to be considered Phase 1B, then the amount in Docket 10-00189 regarding Citico Phase 1B in CWIP is \$2,49,248.00.

Also in the workpapers, \$5,301,305 for this same number project is placed in service in October, 2010 (refer to the response to Item 13 of the TRA's First Data Request, Attachment TRA-010Q013-RATE BASE page 12 of 62). There is no detail in the docket record or in the files that TAW has located to reconcile the balance.

Responsible Witness: Linda C. Bridwell

Question:

2. Please state all other investments or expenses relating to Citico 1B included in Docket No. 10-00189. Please provide references to the record in Docket No. 10-00189 describing the Citico 1B project and all expenses and investment attributable to it (by document, page, and line, if available).

Response:

No other investments or expenses relating to Citico 1B were included in Docket No. 10-00189 other than identified in response to Item 1 of this same data request.

Tennessee American has reviewed the record in Docket No. 10-00189 and has identified the following descriptions of Citico project, either in entirety, Phase 1A, or Phase 1B:

- -Direct Testimony of John Watson, page 5, lines 8-20 is a description of the Citico Phase 1A project
- -Response to Item 93 of the Consumer Advocate and Protection Division Discover Request describes the reason for the delay and the distinction from the prior project
- -Response to Item 53 of the Tennessee Regulatory Authority Discovery Request, Attachment 1 includes 102 pages of 2007 study and cost estimates of the Citico Phase 1 project before it was divided into smaller components
- -Response to Item 3 of the City of Chattanooga Discovery Request, Supplemental Attachment filed December 13, 2010 lists Citico project costs from 2000 to 2010 as part of an overall schedule

Responsible Witness: Linda C. Bridwell

Question:

3. Please state the total of all amounts, if any, that were included in Utility Plant in Service, in Construction Work in Progress, or in any other manner in Docket Nos. 12-00049 or 13-00130 for Citico IB. Please provide applicable references to the record in the respective dockets to each mention or discussion of Citico 1B and all expenses and investment attributable to them (by document, page, and line, if available).

Response:

\$170,000 was projected Construction Work in Progress to begin design for Citico 1B in Docket No. 12-00049, with \$180,000 in the calendar year 2013 in total. No amount was included in Utility Plant in Service in that Docket. Please refer to my direct testimony, page 31, lines 1 through 7. Also refer to the workpapers provided in response to Item 13 of the Tennessee Regulatory Authority's First Data Request, pages 921, 924 and 927 of 1236 which shows no amount in service, and pages 989, 992, 995, 998, and 1001 of 1236 which shows the cumulative CWIP balances by month.

The capital riders in Docket No. 13-00130 included the identification of \$3,000,000 for Citico Plant Improvements Phase 1B in 2014 as Construction Work in Progress; however, the Construction Work in Progress is not included in the calculation of the capital riders in 13-00130. Please refer to Direct Testimony of Brent O'Neill, Exhibit 2014 SCEP-BEO and workpaper 2014 SCEP In-Serviced. The final version of both the exhibit and workpaper were filed in Response to the Item 6 of the Tennessee Regulatory Authority's Third Discovery Request, dated January 31, 2014, Attachment 1 with AVG Impact change.

Responsible Witness: Linda C. Bridwell

Question:

4. Please state the total amount of rate revenue that has been recovered by TAWC from the effective date of the revised tariffs in Docket No. 10-00189 through December 31, 2014 attributable to the investment for Citico IB approved in Docket No. 10-00189, including, without limitation, return on investment, depreciation, taxes, and other expenses or amounts. Please identify each item separately.

Response:

It is impossible to identify any revenues collected by the Company as attributable to a single project identified under Construction Work in Progress in a prior case. In Docket No. 10-000189, Tennessee American identified a balance of Construction Work in Progress at the end of the test period of \$4,201,421 and a total rate base of \$125,472,973. The Tennessee Regulatory Authority authorized a Construction Work in Progress balance of \$2,681,318 with an overall total rate base of \$118,459,809. The Attrition Year in that Docket ended December 31, 2011. Tennessee American filed Docket No. 12-00049 with a test period ending December 31, 2011 with an identified total rate base of \$124,500,928.

Responsible Witness: Linda C. Bridwell

Question:

5. Please state the total of all amounts, included in Utility Plant in Service, in Construction Work in Progress, or in any other manner in Docket No. 14-00121 for Citico lB. Please provide applicable references to the record in the docket to each mention or discussion of Citico 1B and all expenses and investment attributable to them (by document, page, and line, if available).

Response:

In Docket No. 14-00121, Tennessee American Water identified \$1,600,000 for the Citico 1B project in the 2015 Strategic Capital Expenditures Plan attached as Exhibit 2015 SCEP – BEO to Brent O'Neill's Direct Testimony. No amount was included in Utility Plant in Service in this Docket, and Construction Work in Progress is not included in the calculation of the Capital Riders in this Docket.

Responsible Witness: Linda C. Bridwell

Question:

6. Please state the total of all expenditures, if any, that were included in Utility Plant in Service, in Construction Work in Progress, or in any other form in Docket Nos. 10-00189, 12-00049, or 13-00130 for or related to any improvements to TAWC's wastewater treatment or handling facilities or equipment, identifying the amount included in each Docket. Please provide applicable references to the record in the respective dockets to each mention or discussion of TAWC's wastewater treatment or handling facilities or equipment and all expenses and investment attributable to them (by document, page, and line, if available).

Response:

No expenditures for TAWC's wastewater treatment or handling facilities were included in Docket No. 10-00189 in Utility Plant in Service or in Construction Work in Progress. The project is listed as IP 2602-6 in the workpapers (Response to Item 13 of the TRA first discover request, Attachment TRA-01-13-Q013-RATE BASE, pages 1-4 of 62) as a future project with no capital expenditures in the test year or the attrition year.

No expenditures for TAWC's wastewater treatment or handling facilities were included in Docket No. 12-00049 in Utility Plant in Service. \$397,141 was projected Construction Work in Progress to begin Wastewater Treatment & Handling Improvements design in Docket No. 12-00049, with \$400,000 in 2013 in its entirety. Please see my testimony at Page 31, Lines 8-13. Also please refer to the workpapers provided in response to Item 13 of the Tennessee Regulatory Authority's First Data Request, pages 921, 924 and 927 of 1236 which shows no amount in service, and pages 989, 992, 995, 998, and 1001 of 1236 which shows the cumulative CWIP balances by month.

The capital riders in Docket No. 13-00130 included the identification of \$2,000,000 for Wastewater Treatment & Handling Improvements as Construction Work in Progress; however, the Construction Work in Progress is not included in the calculation of the capital riders in 13-00130. Please refer to Direct Testimony of Brent O'Neill, Exhibit 2014 SCEP-BEO and workpaper 2014 SCEP In-Serviced. The final version of both the exhibit and workpaper were filed in Response to the Item 6 of the Tennessee Regulatory Authority's Third Discovery Request, dated January 31, 2014, Attachment 1 with AVG Impact change.

Responsible Witness: Brent E. O'Neill

Question:

7. Please identify each of the projects included in Item B Mains Replaced-Restored in Docket No. 13-00130 (the "2014 Item B Projects"), listing for each a description of the project, the location of the project, total expenditures related to the project, and the date each was completed. Please provide relevant references to the record in Docket No. 13-00130 (by document, page, and line, if available).

Response:

In Response to Question 1 of the First Discovery Request in Docket No. 13-00130, Tennessee American indicated that it anticipated completing 11 projects during the 2014 construction season. As indicated in the Direct Testimony of Brent O'Neill in Docket No. 14-00121 on pages 5 lines 23 and 24 and page 6 lines 1 through 6, Tennessee American delayed four (4) of these main replacement projects due to the need to shift resources and budget dollars to other lines. Tennessee American undertook the following projects during 2014:

- 1) Installed 751 If of 4 inch ductile main along Glenn Avenue to replace 2 inch cast iron main at a cost of \$68,474 and was placed in service on May 20, 2014.
- 2) Installed 710 lf of 8 inch ductile main along Castle Avenue to replace 2 inch cast iron main at a cost of \$90,527 and was placed in service on August 15, 2014.
- 3) Installed 602 lf of 6 inch ductile main along 1st Avenue to replace 2 inch and 6 inch cast iron main at a cost of \$65,259 and was placed in service on August 12, 2014
- 4) Installed 638 lf of 6 inch ductile main along Crescent Park Drive to replace 2 inch cast iron main at a cost of \$58,521 and was placed in service on August 14, 2014.
- 5) Installed 1,633 lf of 6 inch ductile main along Clearview Road to replace 2 inch cast iron main at a cost of \$180,995 and was placed in service on March 4, 2014.
- 6) Installed 814 If of 8 inch ductile main along Arlington Avenue to replace 2 inch cast iron main at a cost of \$97,573 and was place in service on July 10, 2014.
- 7) Installed 98 If of 6 inch ductile main in Dayton Boulevard at Poole and Oakwood prior to paving of Dayton Boulevard at a cost of \$32,916 and was place in service on June 5, 2014.

- 8) Installed 1,211 lf of 12 inch ductile main along Silverdale to replace a 10" cast iron main at a cost of \$120,647 and was placed in service on August 18, 2014.
- 9) Installed 820 lf of 6 inch ductile main and 120 lf of 8 inch ductile iron main along Sunbeam Avenue at a cost of 114,433 and was place in service on October 29, 2014.

Responsible Witness: Brent E. O'Neill

Question:

8. Please state the expenditures actually made for each of the 2014 Item B Projects during 2014.

Response:

The following is the spend amount that occurred for each project listed in Question 7.

- 1) Glenn Avenue Main Replacement Project expenditures were \$13,417 during 2014.
- 2) Castle Avenue Main Replacement Project expenditures were \$90,432 during 2014.
- 3) 1st Avenue Main Replacement Project expenditures were \$63,485 during 2014.
- 4) Crescent Park Drive Main Replacement Project expenditures were \$58,425 during 2014.
- 5) Clearview Road Main Replacement Project expenditures were \$154,668 during 2014.
- 6) Arlington Avenue Main Replacement Project expenditures were \$97,592 during 2014.
- 7) Dayton Boulevard at Poole and Oakwood Main Replacement expenditures were \$32,943 during 2014.
- 8) Silverdale Main Replacement Project expenditures were \$115,543 during 2014.
- 9) Sunbeam Avenue Main Replacement Project expenditures were \$114,040.37 during 2014.

Responsible Witness: Brent E. O'Neill

Question:

9. Please identify each of the projects included in Item B Mains Replaced-Restored in Docket No. 14-00121 (the "2015 Item B Projects"), listing for each a description of the project, the location of the project, total expenditures related to the project, and the date each was completed. Please provide relevant references to the record in Docket No. 14-00121 (by document, page, and line, if available).

Response:

The capital expenditures included in Item B Mains Replaced-Restored in Docket No. 14-00121 are for estimated projects to be completed in 2015 and as such the exact information requested is not available. However, as provided in the Direct Testimony of Brent O'Neill in Docket N. 14-0021 page 6 lines 10 to 36 and page 7 lines 1 to 11, TAWC expects to undertake the following projects:

- 1) Install 1,152 linear feet ("lf") of 6-inch ductile iron main along Standifer Road to replace 1.5-inch galvanized main at an estimated cost of \$81,000. This project was originally scheduled for 2014 but was delayed until 2015 due to emerging relocation projects during 2014.
- 2) Install 535 If of 6-inch ductile iron main along Michigan Avenue to replace 2-inch cast iron main at an estimated cost of \$115,000. This project was originally scheduled for 2014 but was delayed until 2015 due to emerging relocation projects during 2014.
- 3) Install 842 If of 8-inch, 522 If of 6-inch and 125 If of 4-inch ductile iron main along 35th Street Place to replace 2-inch galvanized and cast iron main at an estimated cost of \$180,000. This project was originally scheduled for 2014 but was delayed until 2015 due to emerging relocation projects during 2014.
- 4) Install 515 If of 8-inch and 145 If of 4-inch ductile iron main along W 47th Street to replace 2 inch cast iron main at an estimated cost of \$122,000. This project was originally scheduled for 2014 but was delayed until 2015 due to emerging relocation projects during 2014.
- 5) Install 1,800 lf of 6-inch ductile iron main along Signal View Street to replace 2-inch galvanized water main, at an estimated cost of \$196,000.

- 6) Install 2,720 lf of 6-inch ductile iron main along Centro and Center Streets to replace 1.5-inch galvanized and 2.25-inch cast iron water mains, at an estimated cost of \$236,000.
- 7) Install 800 If of 6-inch ductile iron main along Hanover Street to replace 2-inch galvanized water mains, at an estimated cost of \$96,000.
- 8) Install 1,700 lf of 6-inch ductile iron main along Semi Circle Drive to replace 2-inch cast iron and 1.25-inch galvanized water mains, at an estimated cost of \$204,000.
- 9) Install 1,800 lf of 6-inch ductile iron main along Fairy Trail to replace 2-inch galvanized water mains, at an estimated cost of \$216,000.
- 10) Install 325 If of 4-inch ductile iron main along Pine View Lane to replace 2.25-inch galvanized water main at an estimated cost of \$54,000.

As reported in the March 10, 2015 Utility Coordination Meeting with the City of Chattanooga, only two of the above projects are nearing completion, Standifer Road and Michigan Avenue. The remaining projects are expected to be completed during the remainder of the year. TAWC also reported during the March 10, 2015 meeting that the following projects had been added to the list of projects that the company anticipates to construct during 2015:

- 11) Install 1,100 If of 8 inch ductile iron main along Nurick Drive. Expected to start during Third Quarter.
- 12) Install 995 If of 6 inch ductile iron main along Francis Street Expected to start by Third Quarter.

Responsible Witness: Linda C. Bridwell

Question:

10. Please state the total of all expenditures, if any, that were included in Utility Plant in Service, in Construction Work in Progress, or in any other manner in each of Docket Nos. 10-00189 or 12-00049 for or related to any 2014 Item B Projects or 2015 Item B Projects, identifying the amount included in each Docket. Please provide relevant references to the record in Dockets No. 10-00189 and 12-00049 (by document, page, and line, if available).

Response:

In Docket Nos. 10-00189 and 12-00049, specific projects under Item B were not identified. Both Dockets had an Attrition Year that ended prior to 2014. Therefore, none of the 2014 Item B Projects or 2015 Item B Projects were included in Utility Plant in Service or in Construction Work in Progress, or in any other manner in those Dockets.

Responsible Witness: Linda C. Bridwell

Question:

11. Please (a) state the total amount of expenditures included for each of Item C Mains-Unscheduled and for Item D Mains-Relocated ("2014 Item C and D Mains") in Docket No. 13-00130. Please provide relevant references to the record in Docket No. 13-00130 (by document, page, and line, if available).

Response:

2014 Item C-Mains-Unscheduled was a total of \$800,000 and 2014 Item D- Mains – Relocated were \$250,000 in Docket No. 13-00130. Please refer to the Exhibit 2014 SCEP – BEO attached to Brent O'Neill's testimony and workpaper 2014 SCEP In-Serviced. The final version of both were filed in response to Item 6 of the Tennessee Regulatory Authority's Third Discovery Request, dated January 31, 2014 as Attachment 1 with AVG Impact Change.

TENNESSEE AMERICAN WATER COMPANY DOCKET NO. 14-00121

FIRST DISCOVERY REQUEST OF THE CITY OF CHATTANOOGA

Responsible Witness: Brent E. O'Neill

Question:

12. Please identify the 2014 Item C and D Mains actually completed during 2014, listing for each a description of the project, the location of the project, total expenditures related to the project, and the date each was completed.

Response:

During 2014 TAWC undertook thirty seven (37) projects under the Item C – Unscheduled Mains involving the replacement or restoration of existing mains that was caused by unexpected breaks of mains during 2014. The cost for material and installation of unscheduled main are not independently tracked by separate projects but are grouped into what the company calls a blanket work order that remains open during the entire year collecting the costs. The costs indicated below are based mostly on the length and size of main replaced during the unscheduled event. The following locations are where these main breaks occurred and caused an unscheduled replacement of a section of main:

- 1) 3741 Dorris Street (\$7,756) 3/14/14
- 2) 2605 E 30th Street (\$7,756) 7/17/14
- 3) Revere Circle (\$7,756)- 11/8/14
- 4) 35 Hollywood Ave (\$10,393)
- 5) 2807 E 47th Street (\$10,393) 4/08/14
- 6) 403 Sequoia Drive (\$10,393) 4/23/14
- 7) 3104 Carlton Avenue (\$10,393) 7/18/14
- 8) 3010 12th Avenue (\$10,393) 7/06/14
- 9) 3612 Tanaka Trace (\$10,393) 8/11/14
- 10) 13th Street (\$10,393)
- 11) 1504 Fruitland Drive (\$10,393) 5/29/14
- 12) 902 W Pine (\$15,511) 4/10/14
- 13) 2606 Andrews Street (\$15,511)
- 14) 600 W. 42nd Street (\$15,511) 6/25/14
- 15) 619 E Brow Road (\$15,511) 8/07/14
- 16) 3109 E 34th Street (\$15.511) 8/05/14
- 17) 4505 Caine Avenue (\$15,511) 7/08/14
- 18) 4100 Milinda Street (\$19,389)
- 19) 364 Carnation Street (\$19,389) 6/06/14

- 20) 1804 Madison Avenue (\$19,389) 4/22/14
- 21) 801 Belvoir Avenue (\$19,389)
- 22) 2407 Latta Street (\$23,267) 4/08/14
- 23) 3502 Ringgold Road (\$23,267) 4/22/14
- 24) 900 Foster Street (\$31,022) 5/28/14
- 25) 3723 Anderson Avenue (\$31,022) 6/25/14
- 26) 443 Roberts Street (\$33,649) 6/09/14
- 27) 761 Lanoir Circle (\$33,649) 7/07/14
- 28) 3713 Pirola Street (\$34,900) 9/23/14
- 29) 1607 Arlington (\$38,552) 4/15/14
- 30) 43rd St @ 7th Ave (\$40,707) 7/07/14
- 31) 6836 McCutcheon Road (\$42,061) 7/03/14
- 32) 731 Lanoir Street (\$42,061) 7/01/14
- 33) 1814 Madison Ave (\$42,061) 4/22/14
- 34) 215 Peak Street (\$42,656) 3/27/14
- 35) 300 E 38th Street (\$61,060) 7/07/14
- 36) 3727 Mission View (\$73,678) 6/24/14
- 37) Memorial Drive 16" Main (\$18,921) -8/18/14

During 2014 TAWC undertook three (3) main relocations projects under Item D Main – Relocated. These projects are as follows:

- 1) Bonny Oaks/ Volkswagen Drive Main Relocation due to the Tennessee Department of Transportation widening project. Project involved the relocation of 839 lf of 12 inch ductile main to make room for an additional lane at a cost of \$181,048 and was placed in service during December 2014.
- 2) Relocation of 6 inch and 4 inch ductile main with 140 lf of 6 inch ductile main and 109 lf of 4 inch ductile main along Stringer Street due to Tennessee Department of Transportation storm drainage work. The project cost was \$37,490 and was placed in service during February 2014.
- 3) Relocation of a 10 inch cast iron main with 47 lf of 12 inch ductile main along Wisdom Street due to a conflict with a proposed storm structure. The project cost was \$17,818 and was placed in service during December 2014.

Responsible Witness: Linda C. Bridwell

Question:

13. Please state the total of all expenditures, if any, that were included in Utility Plant in Service, in Construction Work in Progress, or in any other form in each of Docket Nos. 10-00189 or 12-00049 for or related to any 2014 Item C and D Mains, identifying the amount included in each Docket. Please provide relevant references to the record in Dockets No. 10-00189 and 12-00049 (by document, page, and line, if available).

Response:

In Docket Nos. 10-00189 and 12-00049, specific projects under Item C and Item D were not identified. Both Dockets had an Attrition Year that ended prior to 2014. Therefore, none of the 2014 Item C or 2014 Item D Projects were included in Utility Plant in Service or in Construction Work in Progress, or in any other manner in those Dockets.

Responsible Witness: Brent E. O'Neill

Question:

14. Please identify the location, purpose, and total cost of each main project included in Line A - Mains, New (each of which is referred to as a "2014 Line A Project") that TAWC sought to recover under the Economic Development Investment Rider ("EDI Rider") in Docket No. 13-00130, listing for each a description of the project, the location of the project, total expenditures related to the project, and the date each was completed.

Response:

TAWC undertook one main extension under Item A – Mains New for 2014. The project was the Olan Mills Extension for the development of the Coca-Cola Bottling Company Distribution Center. The project involved the addition of 1,667 lf of 12 inch ductile main. The project cost was \$105,190.63 and the project was placed in service during January 2015.

Responsible Witness: Brent E. O'Neill

Question:

15. For each 2014 Line A Project for which TAWC sought recovery under the EDI Rider in Docket No. 13-00130, please identify with specificity the opportunities for economic benefit created in the area directly served by such Line A Project, identify the economic development investment and the number of jobs created in the area directly served by such Line A Project, and identify the company(ies) making such investments and creating such jobs.

Response:

As indicated in response to Question 14 of this same discovery request, TAWC undertook the Olan Mills Extension for the development of the Coca-Cola Bottling Company Distribution Center. As reported in an article posted by the Area Development Online News Desk on 04/28/2014, Chattanooga Coca-Cola Bottling Company is building a \$62 million, state-of-the-art distribution and sales facility on the former Olan Mills site. With the investment, Coca-Cola Bottling plans to create 43 new jobs and retain 270 existing jobs that would have been moved elsewhere without the new facility. According to the article, the City of Chattanooga applauded the company's decision and would work closely with the company to support their timetable. TAWC worked with Coca-Cola and the City to ensure that the redevelopment of the area was supported by the new main installed under Item A – New Mains.

Responsible Witness: Brent E. O'Neill

Question:

16. Please identify the location, purpose, and total cost of each main project included in Line A- Mains, New (each of which is referred to as a "2015 Line A Project") that TAWC seeks to recover under the EDI Rider in Docket No. 14-00121.

Response:

As in indicated in the Direct Testimony of Brent O'Neill regarding Docket No. 14-00121 on page 12 lines 1 and 5, TAWC plans to spend approximately \$95,000 on various size water mains within distribution system that are associated with eliminating dead ends or upsizing of developer initiated extensions. At this time TAWC has not identified any projects for 2015 since the company has not been made aware of any opportunities. TAWC based its expected spend within Line A on the 2012 investment amount of \$116,244. This is lower than 2013 spending of \$230,419. Projecting into 2015, TAWC anticipates that 2012 spending levels offer a more relevant comparison.

Responsible Witness: Brent E. O'Neill

Question:

17. For each 2015 Line A Project for which TAWC seeks recovery under the EDI Rider in Docket No. 14-00121, please identify with specificity the opportunities for economic benefit to be created in the area directly served by each 2015 Line A Project, identify the economic development investment and the number of jobs to be created in the area directly served by such 2015 Line A Project, and identify the company(ies) that will make such investments and create such jobs.

Response:

To date, no economic development opportunities have been reported to TAWC and as such no projects have been identified during the first part of 2015. However, this line item includes new water mains, valves, and other appurtenances that are necessary to perform the work that is funded by the TAWC, including upsizing of developer initiated extensions; Company initiated and funded new mains that are not related to immediate growth but support future growth, such as new mains that eliminate existing dead ends or provide new transmission capacity; and new customer initiated extensions in accordance with tariffs that may include some customer contribution (customer funded portion under Developer Initiated Projects). This item may also include new mains that parallel existing mains to increase transmission capacity, provide reliability, increase fire protection or establish an additional pressure gradient. Similar to the Coca Cola project, Line A is utilized to foster economic development through new mains in place for new customers or to address reliability or additional demands.

Responsible Witness: Brent E. O'Neill

Question:

18. Please identify each hydrant and valve installation included in Line E- Hydrants and Valves, New (each of which is referred to as a "2014 Line E Project") that TAWC sought to recover under the EDI Rider in Docket No. 13-00130, listing for each a description of the project, the location of the project, total expenditures related to the project, and the date each was completed.

Response:

During 2014, TAWC installed three (3) new valves at the following locations:

- 1) Install an 8-inch valve at Alstrom Windtower (\$10,605) placed in service on June 23, 2014.
- 2) Install an 8-inch valve at Moccasin Bend Road (\$10,316) placed in service on June 30, 2014.
- 3) Install an 8-inch valve at 4146 S. Creek Road (\$4,336) placed in service by December 2014.

During 2014, TAWC installed two (2) new hydrants at the following locations:

- 1) 1121 Healing Springs Road (\$10,815) placed in service by December 2014.
- 2) Chickamauga Avenue (\$7,765) placed in service on November 17, 2014.

Responsible Witness: Brent E. O'Neill

Question:

19. For each 2014 Line E Project for which TAWC sought recovery under the EDI Rider in Docket No. 13-00130, please identify with specificity the opportunities for economic benefit created in the area directly served by each 2014 Line E Project, identify the economic development investment and the number of jobs created in the area directly served by such 2014 Line E Project, and identify the company(ies) making such investments and creating such jobs.

Response:

While the new main projects associated with Line A – New Mains can be directly attributed to a specific project or request for increased service, the projects associated with Line E have a broader impact on the overall development of an area. At this time TAWC is not aware of any statistics that are available to provide the direct correlation between the creation of jobs and the work associated with Line E Projects. TAWC believes that investment in placing new valves and hydrants within the distribution system benefits the community being served by ensuring that the distribution system is reliable and can meet the demands of a growing area. The United States Environmental Protection Agency's has indicated that "(m)aking these investments in water infrastructure has immense returns for communities. Clean, reliable water brings not only public health and environmental benefits but it also fuels the economy, creates jobs and increases the quality of life in communities." (http://water.epa.gov/infrastructure/waterfinancecenter.cfm)

New fire hydrants assist with the communities to maintain or improve on the communities Insurance Service Organization Public Protection Classification. As indicated within the Fire Rescue Publication January 2015 Issue, "...economic development agencies, chambers of commerce, and individual commercial building owners are recognizing the appeal of doing business in a well-protected, well-equipped community and are being proactive in their communities' risk reduction. (http://www.firefighternation.com/article/firefighter-safety/iso-public-protection-classification)

Responsible Witness: Brent E. O'Neill

Question:

20. Please identify the location, purpose, and total cost of each hydrant and valve installation included in Line E - Hydrants and Valves, New (each of which is referred to as a "2015 Line E Project") that TAWC seeks to recover under the EDI Rider in Docket No. 14-00121.

Response:

As indicated in the Direct Testimony of Brent O'Neill for Docket No. 14-00121 on page 12 lines 11 and 18, TAWC plans to spend approximately \$48,000 on a combination of 21 new hydrants and valves. At this time TAWC has not identified any projects for 2015. This investment plan item includes the installation of new hydrants, including hydrant assemblies and valves that are installed on existing mains or installed in conjunction with main extension projects, which are company funded. This item generally includes all public hydrants. This item is used to foster economic development by providing new fire protection or enhancing fire protection in currently served areas beyond what is created under CIAC. Improved infrastructure in existing older service areas, including fire protection, is a key to redevelopment in economic growth. TAWC based its expected spend on the previous spend within this line for the past several years. In addition, TAWC is currently working with the City of Chattanooga Fire Department to identify locations for new hydrants that the department believes will assist them in responding to emergencies.

Responsible Witness: Brent E. O'Neill

Question:

21. For each 2015 Line E Project for which TAWC seeks recovery under the EDI Rider in Docket No. 14-00121, please identify with specificity the opportunities for economic benefit to be created in the area directly served by each 2015 Line E Project, identify the economic development investment and the number of jobs to be created in the area directly served by such 2015 Line E Project, and identify the company(ies) making such investments and creating such jobs.

Response:

To date, no economic development opportunities have been reported to TAWC and as such no projects have been identified during the first part of 2015. In addition, the location of new fire hydrants being requested by the City of Chattanooga Fire Department has not been communicated at this time. In general, this investment plan item includes the installation of new hydrants, including hydrant assemblies and valves that are installed on existing mains or installed in conjunction with main extension projects, which are company funded. This item generally includes all public hydrants. This item is used to foster economic development by providing new fire protection or enhancing fire protection in currently served areas beyond what is created under CIAC. Improved infrastructure in existing older service areas, including fire protection, is a key to redevelopment in economic growth.

Responsible Witness: Brent E. O'Neill

Question:

22. Please identify each new services installation included in Line G- Services, New (each of which is referred to as a "2014 Line G Project") that TAWC sought to recover under the EDI Rider in Docket No. 13-00130, listing for each a description of the project, the location of the project, total expenditures related to the project, and the date each was completed.

Response:

TAWC installed 535 new services during 2014. The cost for material and installation of these services are not independently tracked by separate projects but are grouped by the size of service installed. Please see TAW_R_COCDR1_NUM022_Attachment_032515 that provides a listing of each address and installation date for each new service.

Responsible Witness: Brent E. O'Neill

Question:

23. For each 2014 Line G Project for which TAWC sought recovery under the EDI Rider in Docket No. 13-00130, please identify with specificity the opportunities for economic benefit created in the area directly served by each 2014 Line G Project, identify the economic development investment and the number of jobs created in the area directly served by such 2014 Line G Project, and identify the company(ies) making such investments and creating such jobs.

Response:

While TAWC does not attempt to create or track data that would provide the direct correlation between the creation of jobs and the work associated with specific Line G Projects, TAWC makes every attempt to stay abreast of publicly available information regarding economic growth and job creation in the area. TAWC believes that these types of investments are important to the economic development of the community. The work associated with this line is driven from the requests for new services by new companies or new residences or from relocating companies or residents in to new areas being developed within the city. New services foster economic development by creating jobs, providing new residents, and increasing taxes paid to the local government. Further, the development of these areas is bringing jobs into the community through the construction jobs and revenues from additional taxes paid during construction.

Responsible Witness: Brent E. O'Neill

Question:

24. Please identify the location, purpose, and total cost of each new services installation included in Line G- Services, New (each of which is referred to as a "2015 Line G Project") that TAWC seeks recovery under the EDI Rider in Docket No. 14-00121.

Response:

The capital expenditures in Line G-Service, New for 2015 in Docket No. 14-00121 are an estimate of expected total expenditures in 2015 and are not tied to specific service installations that have not been requested yet. TAWC based its expected spend on the previous spend within this line for the past several years. Therefore, the information requested is not available. As indicated in the Direct Testimony of Brent O'Neill for Docket No. 14-00121 on page 13 lines 3 through 8, TAWC plans to spend approximately \$480,000 on the installation of approximately 360 services at an average cost of \$1,333 per service. Further, TAWC has not identified any significant installations of new services since the company has not been made aware of any requested installations.

Responsible Witness: Brent E. O'Neill

Question:

25. For each 2015 Line G Project for which TAWC seeks recovery under the EDI Rider in Docket No. 14-00121, please identify with specificity the opportunities for economic benefit to be created in the area directly served by each 2015 Line G Project, identify the economic development investment and the number of jobs to be created in the area directly served by such 2015 Line G Project, and identify the company(ies) making such investments and creating such jobs.

Response:

At this time TAWC has not identified any significant installations of new services since the company has not been made aware of any requested installations. The capital expenditures in Line G-Service, New for 2015 in Docket No. 14-00121 are an estimate of expected total expenditures in 2015 and are not tied to specific service installations that have not been requested yet. TAWC based its expected spend on the previous spend within this line for the past several years. Therefore, the information requested is not available. The work associated with this line is driven from the requests for new services by new companies or new residences or from relocating companies or residents in to new areas being developed within the city. New services foster economic development by creating jobs, providing new residents, and increasing taxes paid to the local government. Further, the development of these areas is bringing jobs into the community through the construction jobs and revenues from additional taxes paid during construction.

Responsible Witness: Brent E. O'Neill

Question:

26. Please identify each meter and meter setting installation included in Line I- Meters and Meter Settings, New (each of which is referred to as a "2014 Line I Project") that TAWC sought to recover under the EDI Rider in Docket No. 13-00130, listing for each a description of the project, the location of the project, total expenditures related to the project, and the date each was completed.

Response:

TAWC installed 535 new meters and meter settings during 2014. The cost for material and installation of these meters and setters are not independently tracked by separate projects but are grouped by the size of meter installed. Please refer to the attachment to the response to Question 22 of this same discovery request.

Responsible Witness: Brent E. O'Neill

Question:

27. For each 2014 Line I Project for which TAWC sought recovery under the EDI Rider in Docket No. 13-00130, please identify with specificity the opportunities for economic benefit created in the area directly served by each 2014 Line I Project, identify the economic development investment and the number of jobs created in the area directly served by such 2014 Line I Project, and identify the company(ies) making such investments and creating such jobs.

Response:

While TAWC does not attempt to create or track data that would provide the direct correlation between the creation of jobs and the work associated with specific Line G Projects, TAWC makes every attempt to stay abreast of publicly available information regarding economic growth and job creation in the area. TAWC believes that these types of investments are important to the economic development of the community. The work associated with this line is similar to that described for Line G. New meters, as part of the new service installations, foster economic development by creating jobs, providing new residents, and increasing taxes paid to the local government. Further, the development of these areas is bringing jobs into the community through the construction jobs and revenues from additional taxes paid during construction.

Responsible Witness: Brent E. O'Neill

Question:

28. Please identify the location, purpose, and total cost of each meter and meter setting installation included in Line I- Meters and Meter Settings, New (each of which is referred to as a "2015 Line I Project") that TAWC seeks to recover under the EDI Rider in Docket No. 14-00121.

Response:

The capital expenditures in Line I-Meters and Meter Settings, New for 2015 in Docket No. 14-00121 are an estimate of expected total expenditures in 2015 and are not tied to specific meters or meter settings that have not been requested yet. TAWC based its expected spend on the previous spend within this line for the past several years. As indicated in the Direct Testimony of Brent O'Neill for Docket No. 14-00121 on page 13 lines 12 through 16, TAWC plans to spend approximately \$575,000 on the installation of approximately 738 new meters and setters at an average cost of \$779 per meter and setter. At this time TAWC has not identified any significant installations of new meters since the company has not been made aware of any requested installations.

Responsible Witness: Brent E. O'Neill

Question:

29. For each 2015 Line I Project for which TAWC seeks recovery under the EDI Rider in Docket No. 14-00121, please identify with specificity the opportunities for economic benefit to be created in the area directly served by each 2015 Line I Project, identify the economic development investment and the number of jobs to be created in the area directly served by such Line I Project, and identify the company(ies) making such investments and creating such jobs.

Response:

At this time TAWC has not identified any significant installations of new meter since the company has not been made aware of any requested installations. This investment plan item includes the installation of new meters and meter settings. Accompanying new services, new meters and meter settings include all new meters regardless of size. All new meters along with new services foster economic development by creating jobs, providing new residents, and increasing taxes paid to the local government.

As indicated in the response to Question 27 of this same discovery request, the work associated with this line is driven from the requests for new meters by new companies or new residences or from relocating companies or residents in to new areas being developed within the city.

Responsible Witness: Brent E. O'Neill

Question:

30. Please identify with specificity the location, purpose, alternative fuel type, and total cost of each item of infrastructure and equipment included in Line O -Transportation Equipment ("2014 Line O Equipment") for which TAWC sought recovery under the EDI Rider in Docket No. 13-00130, including, without limitation, its manufacturer(s), storage capacity, and fueling capabilities.

Response:

Please refer to Brent O'Neill's Testimony in Docket No. 15-00029, page 9, lines 6-9. TAWC made the decision to delay the spend of \$95,573 for the purchase of fuel alternative vehicles and/or the conversion of vehicles due to concerns of technology maturity and the availability of alternative fuels and its impact to operations to locate the fuels for refilling the vehicles.

Responsible Witness: Linda C. Bridwell

Question:

31. Please confirm that no amounts received by TAWC for 2014 Line O Equipment were actually expended in 2014.

Response:

TAWC spent \$524,186 in 2014 under Line O, Vehicles. However, as identified in the filing in Docket No. 15-00029, no capital expenditures under 2014 Line O Equipment qualified for inclusion in the QIIP, EDI, or SEC.

Responsible Witness: Brent E. O'Neill

Question:

32. Please identify with specificity the location, purpose, alternative fuel type, and total cost of each item of infrastructure and equipment included in Line O-Transportation Equipment ("2015 Line O Equipment") for which TAWC seeks recovery under the EDI Rider in Docket No. 14-00121, including, without limitation, its manufacturer(s), storage capacity, and fueling capabilities.

Response:

As indicated in the Direct Testimony of Brent O'Neill for Docket No. 14-00121 on page 14 lines 3 through 12, TAWC plans to spend \$100,000 out of a total of \$400,000 in Line O for 2015 on alternative fuel vehicles. TAWC plans to purchase five new vehicles to replace existing vehicles that are reaching their expected service life or have seen an increase in maintenance cost. Of these five vehicles, TAWC expects to continue to evaluate the purchase of some of the new vehicles with the capability to use alternative fuels such as Liquid Propane ("LP") or natural gas. In addition, TAWC plans to convert two existing vehicles within its fleet to be able to use LP. As with the decision to not purchase the alternative fuel vehicles in 2014, TAWC will continue to determine if the technology maturity and the availability of alternative fuels will impact to operations to locate the fuels for refilling the vehicles and will not be in the best interest of the company.

Responsible Witness: Brent E. O'Neill

Question:

33. Please confirm that all of the 2015 Line O Equipment for which TAWC seeks recovery under the EDI Rider in Docket No. 14-00121 are motor vehicles, and identify the types of and fuel to be used by each of the motor vehicles that TAWC intends to purchase.

Response:

Please refer to the response to Question 32 of this same discovery request.

Responsible Witness: Brent E. O'Neill

Question:

34. Please identify the location, purpose, and total cost of each item included in Line Q - Process Plant and Equipment (each of which is referred to as a "2014 Line Q Item") that TAWC sought to recover under the Safety Rider in Docket No. 13-00130 and specify the amount actually spent for each such 2014 Line Q Item in 2014 and the date it was placed into service.

Response:

The following projects were undertaken as part of the Line Q – Process Plant and Equipment during 2014:

- 1) Replace No. 16 High Service Motor at Citico Water Treatment Plant to ensure high service pumping reliability and improve wire to water efficiency for the Citico facility. Project cost was \$78,132 and was placed in service on June 30, 2014.
- 2) Replace No. 18 High Service Motor at Citico Water Treatment Plant to ensure high service pumping reliability and improve wire to water efficiency for the Citico facility. Project cost was \$76,415 and was placed in service on June 30, 2014.
- 3) Rehabilitation of Aldrich Unit No. 4 at the Citico Water Treatment Plant to rehabilitate the filter insert plates to address loss of media. Project cost was \$23,176 and was placed in service on July 31, 2014.
- 4) Replace UPS (Uninterruptable Power Source) Battery Back Up for the Pump Station and Chemical Building at the Citico Water Treatment Plant to replace existing UPS systems that were installed during the mid 1990's and ensure facility reliability during power failures. Project cost was \$25,181 and was placed in service on April 17, 214.
- 5) Replace North End Field House #2 Surface Wash Connection at Citico Water Treatment Plant to allow for better control of surface wash for the Citico filters. Surface wash is critical to reducing sedimentation break-through and ensuring water quality through filters. Project cost was \$7,662 and was placed in service on March 27, 2014.
- 6) Rehabilitation of Hill City No. 7 Pump at the Hill City Booster Pump Station to ensure pumping reliability and improve wire to water efficiency. Project cost was \$68,432 and was placed in service on March 9, 2014.

- 7) Citico Station Water Treatment Plant Filter No. 4 Filter Rehabilitation at the Citico Water Treatment Plant to replace the existing underdrain system with more efficient filter underdrain equipment and allow for future installation of an air wash system. Project was to ensure future compliance with water quality standards and improve operation of the facility. Project cost was \$301,608 and was placed in service on August 29, 2014.
- 8) Purchase and install Air Release Valves for Filter House No. 2 at the Citico Water Treatment Plant. Installation of air release valves was to address release of trapped air in filter backwash lines that could result in catastrophic failure of underdrain system. Project cost was \$4,119 and was placed in service on April 17, 2014.
- 9) Replace Carbon Slurry Line for the Citico Water Treatment Plant to ensure reliability to introduce carbon slurry into treatment process to address taste and odor events, contaminant removal in raw water, and ensure compliance with water quality requirements. Project cost was \$41,302 and was placed in service on June 16, 2014.
- 10) Replace No. 12 Low Service Coupling at the Citico Water Treatment Plant to ensure reliability of raw water intake for the treatment plant. Project cost was \$23,138 and was placed in service on June 25, 2014.
- 11) Install Valve at Citico Water Treatment Plant to ensure ability to isolate areas of the plant and ensure reliability to continue to produce treated water. Project cost was \$9,862 and was placed in service on July 16, 2014.
- 12) Replace Hill City Backflow Preventer and Pressure Reducing Valve at the Hill City Booster Station. Project cost was \$5,431 and was placed in service on August 17, 2014.
- 13) Install New Impeller for St. Elmo Booster Pump to ensure reliability of booster station and to ensure efficient operation of station. Project cost was \$9,632 and was placed in service on August 28, 2014.
- 14) Replacement of the roof at Rossville Booster Station, Red Bank Booster Station, New York Booster Station, Elder Mountain Booster Station, Citico Screen House Building. The replacement of the roof was to ensure protection of the equipment within the structures and provide a safe working environment for personnel. Project cost was \$70,151 and were placed in service between December 15 and 17, 2014.
- 15) Replacement of Citico Plant No. 1 Post Chlorine Feed Line at the Citico Water Treatment Plant to ensure ability to feed disinfectant to the finished water to meet required drinking water requirements. The project cost was \$2,914 and was placed in service on December 17, 2014.

Responsible Witness: Brent E. O'Neill

Question:

35. Please identify the location, purpose, and total cost of each item included in Line Q-Process Plant and Equipment (each of which is referred to as a "2015 Line Q Item") that TAWC seeks to recover under the Safety Rider in Docket No. 14-00121.

Response:

As indicated in the Direct Testimony of Brent O'Neill in Docket No. 14-00121 on page 17, lines 2 through 11, TAWC plans on the replacement of six conventional filter underdrain systems at the Citico Water Treatment Plant No. 2 to ensure continued environmental compliance at a per filter cost of \$220,000 with a combined cost of \$1,320,000. A \$300,000 investment is planned that will entail the replacement of the cone valves on the high service discharge at the Citico Water Treatment Plant due to the inability to obtain parts for the valves and to improve the efficiency of the control of flow from the high service pumps. TAWC will change out two high service motors at the Citico Water Treatment Plant to improve on power efficiency and reliability of high service pumping at an approximate cost of \$132,300. Other work, such as improvements to the chemical vaults on the Citico facility and the addition of a tank aeration system at Elder Mountain Tank, are expected to be completed during this period as well.

Responsible Witness: Brent E. O'Neill

Question:

36. Please identify each 2014 Line Q Item and 2015 Line Q Item that was or is required by safety requirements imposed by the state or federal government, and produce all Documents that constitute, record, or relate to each such safety requirement and its imposition by the state or federal government.

Response:

As indicated in the Direct Testimony of Gary VerDouw in Docket 13-000130, page 34 lines 18 and 19, "Tennessee American believes that environmental compliance investments are specifically related to the safety of the drinking water and in the public interest". As indicated in the Congressional Research Service publication dated February 5, 2014 titled *Safe Drinking Water Act (SDWA): A Summary of the Act and Its Major Requirements*, "A key component of SDWA is the requirement that the EPA promulgate national primary drinking water regulations for contaminants that may pose health risks and that are likely to be present in public water supplies." With the key component being the regulation of contaminants that pose a health risk to its customers, compliance with those regulations is a safety requirement imposed on the company to ensure safe drinking water. In addition, the company must meet the requirements as set forth by the Tennessee Department of Environmental and Conservation whose Mission Statement is "to enhance the quality of life for citizens of Tennessee and to be stewards of our natural environment by: Protecting and Promoting human health and safety".

The projects identified in the 2014 Line Q Item and 2015 Line Q Item were undertaken primarily to ensure that the company can meet water quality requirements, public health requirements and safety requirements. These requirements are included in legislation such as the Safe Drinking Water Act, and specifically the requirements to the Tennessee Department of Environment and Conservation. In addition to the Federal and State Environmental Protection Agencies, some of the projects are associated with protecting our employees from unsafe working environments as required by the United States Department of Labor Occupational Safety and Health Administration (29 CFR, Part 1910 – Occupational Safety and Health Standards).

Although this is not intended to be an exhaustive list of drinking standard requirements, drinking water standards are set primarily by the Environmental Protection Agency within Title 40, Chapter I, Subchapter D, Part 141 and the Tennessee Department of Environmental and Conservation requirements as set forth in Chapter 0400-45-01 Public Water Systems. The projects allow the company to reliably produce safe drinking water in a safe environment for our employees.

Responsible Witness: Brent E. O'Neill

Question:

37. Please identify each safety requirement imposed by the state or federal government that mandates TAWC's Citico Process Wastewater Improvement Project, and please produce all Documents that constitute, record, or relate to each such safety requirement and its imposition by the state or federal government.

Response:

As indicated in Question 36, Tennessee American believes that environmental compliance investments are specifically related to the safety of the drinking water and in the public interest. Typical to surface water treatment plants, the Citico Water Treatment Plant needs to eliminate water and sludge for the water treatment process in an approved manner. This is either done by discharging directly into the Waters of the United States or forwarding onto a wastewater facility for further processing until it is passed onto the Waters of the United States. In both cases the discharge is controlled by the Clean Water Act which is administered by both the Federal Environmental Protection Agency and the Tennessee Department of Environment and Conservation. The discharge must meet the standards as set forth in the Clean Water Act (CWA); Criteria for Classification of Solid Waste Disposal Facilities and Practices (40 CFR, Part 257), among others. Section 257.3-3 Surface Water, paragraph b indicates that section 404 of the Clean Water Act be followed.

The Federal Environmental Protection Agency web site on Section 404 Enforcement indicates "...that EPA's Section 404 enforcement program has three goals: protect the environment and human health and safety, deter violations, and treat the regulated community fairly and equitably."

(http://water.epa.gov/type/wetlands/outreach/fact15.cfm)

With the Citico Water Treatment Plant, Tennessee American Water has used the option to forward the filter backwash and sludge from the water treatment process to the City of Chattanooga sanitary system. Similar to Tennessee American Water, the City of Chattanooga is also held to the same regulations as stated in the Clean Water Act. In order to ensure that the city can meet the requirements as set out by the Clean Water Act, the City employs a pretreatment permit for industrial customers such as Tennessee American Water. Tennessee American Water is under City of Chattanooga Permit No. 0074. This permit outlines certain effluent limitations which allows the City of Chattanooga to meet the Clean Water Act and meet their mission "... to preserve and enhance the quality of the physical environment and infrastructure through prompt, cost effective and courteous delivery of services which protect the health, safety and welfare

of citizens." (http://www.chattanooga.gov/public-works/waste-resources/interceptor-sewer/pretreatment)

The Citico Process Wastewater Improvement Project allows Tennessee American Water to meet the effluent limitations as indicated in the Wastewater Discharge Permit No. 0074 and to address the development of a Pretreatment System as indicated in the permit. Upon completion, this project will address the permit and allow the City of Chattanooga to comply with the Clean Water Act and meet its mission to protect the health, safety and welfare of the citizens. Tennessee American Water believes that the protection of water resources is a critical component of safety of public health.

Without the completion of the Citico Process Wastewater Improvement Project, TAWC will not be able to remove the zinc-rich sediment that is settled from the raw water during the water treatment process. Without the removal of the sediment from the sludge discharge, the material sent to the City of Chattanooga would exceed the zinc limits outlined in the Wastewater Discharge Permit No. 0074 and could jeopardize the City of Chattanooga compliance with their NPDES Permit No. TN0024210.

Responsible Witness: Linda C. Bridwell

Question:

38. Please describe how each expense and cost related to (a) Citico 1B, (b) each 2015 Line B Project, and (c) the 2015 Lines C and D Mains, for which TAWC seeks recovery in Docket No. 14-00121, is in the public interest.

Response:

Tennessee American is not seeking recovery for any expenditures for the Investment Project Citico Phase 1B in Docket No. 14-00121.

2015 Line B – Mains Replaced/Restored is the scheduled replacement, renewal or improvement of existing water mains including valves and other appurtenances that are necessary to perform the work. A description of the ten projects anticipated to make proposed \$1,500,000 in capital expenditures in 2015 Line B is included in Brent O'Neill's testimony beginning at page 6, Line 10. However, as with all forecasts for Line B, Tennessee American may be required to move projects around or delay anticipated projects to accommodate other projects or capital expenditures that may arise unexpectedly. 2015 Line C - Mains Unscheduled is the unscheduled replacement or restoration of existing or restoration of existing water mains, including valves and other appurtenances that are necessary to perform the work. As the description implies, these are unscheduled replacements and are therefore not detailed. Tennessee American has proposed \$800,000, similar to the amount for 2014. 2015 Line D- Mains-Relocated/Repaired is the relocation of existing water mains, including valves and other appurtenances, that are necessary due to municipal or state agency projects that are not reimbursable. At this time, Tennessee American is not aware of any specific major projects, but has proposed \$350,000 for 2015.

Gary VerDouw, in his direct testimony in Docket No. 13-00130, beginning at page 9, describes the critical need for replacement of water infrastructure. In 2013, the American Society of Civil Engineers identified a shortfall of \$13 billion of investment each year to replace aging infrastructure and maintain reliable and safe drinking water systems. As described on page 12, a substantial portion of Tennessee American's distribution infrastructure is between 50 and 100 years old and is nearing or at the end of its useful service life. Replacing critical, aged infrastructure is in the public interest whether it is scheduled, or unscheduled. Further, the relocation of mains in conjunction with municipal or state agency projects is in the public interest in order not to delay or increase the cost of municipal or state agency projects.

Responsible Witness: Linda C. Bridwell

Question:

39. Please describe how each expense and cost related to (a) each 2015 Line A Project, (b) each 2015 Line E Project, (c) each 2015 Line G Project, (d) each 2015 Line I Project, and (e) each item of 2015 Line O Equipment, for which TAWC seeks recovery under the EDI Rider in Docket No. 14-00121, is in the public interest.

Response:

Line A - Mains, New

This line item includes new water mains, valves, and other appurtenances that are necessary to perform the work that is funded by the TAWC, including upsizing of developer initiated extensions; Company initiated and funded new mains that are not related to immediate growth, such as new mains that eliminate existing dead ends or provide new transmission capacity; and new customer initiated extensions in accordance with tariffs that may include some customer contribution (customer funded portion under Developer Initiated Projects). This item may also include new mains that parallel existing mains to increase transmission capacity, provide reliability, increase fire protection or establish an additional pressure gradient. These efforts to improve, enhance, and increase transmission mains are in the public interest. Similar to the Coca Cola project, Line A is utilized to foster economic development through new mains in place for new customers or to address reliability or additional demands.

Line E – Hydrants and Valves, New

This investment plan item includes the installation of new hydrants, including hydrant assemblies and valves that are installed on existing mains or installed in conjunction with main extension projects, which are company funded. This item generally includes all public hydrants. Fire protection, either new or enhanced, saves lives and is in the public interest. This item is used to foster economic development by providing new fire protection or enhancing fire protection in currently served areas beyond what is created under CIAC. These efforts to provide either new or enhanced fire protection, along with improved reliability, are in the public interest. Improved infrastructure in existing older service areas, including fire protection, is a key to redevelopment in economic growth.

<u>Line G – Services, New</u>

This investment line item includes the installation of new water services or improvements, including corporation stops which are the valves that drill into the main to connect the service line to TAWC's water main and shut-off valves. TAW has included all new services in the Line G, including residential, commercial, industrial and fire

services. New services benefit existing customers through economies of scale, and are in the public interest. Clearly, all new services foster economic development by creating jobs, providing new residents, and increasing taxes paid to the local government.

<u>Line I – Meters and Meter Settings, New</u>

This investment plan item includes the installation of new meters and meter settings. As with new services, new meters provide economies of scale for existing customers and are in the public interest. Accompanying new services, new meters and meter settings include all new meters regardless of size. All new meters along with new services foster economic development by creating jobs, providing new residents, and increasing taxes paid to the local government.

Responsible Witness: Linda C. Bridwell

Question:

40. Please describe how each expense and cost related to (a) each 2015 Line Q Item and (b) the Citico Process Wastewater Improvement Project, for which TAWC seeks recovery under the Safety Rider in Docket No. 14-00121, is in the public interest.

Response:

Line Q- Process Plant Facilities and Equipment

This investment line item is for the new purchase or replacement of existing components of water supply, water treatment, water pumping, water storage, and water pressure regulation facilities, including associated building components and equipment. Replacements may be planned or made because of failure, or may include improvements. Again, because these items are directly related to water quality and thus public health, TAW has included them in the Safety and Environmental Compliance Capital Rider. In 2014 TAW proposed \$797,990 and is proposing 2,631,203 in 2015. The increased investment level is based on the replacement of six conventional filter underdrain systems to ensure continued environmental compliance at a per filter cost of \$220,000 of combined cost of \$1,320,000. In addition a \$300,000 investment will be the replacement of the cone valves on the high service discharge due to the inability to obtain parts for the valves and to improve the efficiency of the control of flow from the high service pumps. TAW will change out two high service motors to improve on power efficiency and system reliability at an approximate cost of \$132,300. Other work such as improvements to the chemical vaults on the Citico facility and the addition of a tank aeration system at Elder Mountain Tank are expected to be completed during this period. Improvements to production facilities that are directly related to water quality and thus public health, are in the public interest.

Citico Process Wastewater Improvement Project

TAWC has a Capital Investment Project that will be placed in service during 2015. The project is the Citico Process Wastewater Improvement Project with an approximate cost of \$15.3 million. The Citico Process Wastewater Improvements is intended to address the change in permit requirements from the City of Chattanooga on the allowable level of zinc to be discharged to the city's wastewater collection system. Because of the zinc levels in the surface water source for the Citico Station Plant, this option was selected as the most cost effective solution. Tennessee American will need to meet the new discharge requirement during early 2015 as indicated in the Pretreatment Permit No. 0074.

The Process Wastewater Improvement Project includes the modification of the existing Thickener No. 1 to receive sediment and sludge from Plant 1 and installation of a thickened sludge transfer pump station to transfer material from the thickener to the new dewatering facilities. The project will add a sludge storage tank to receive thickened sludge from Thickener No. 1 prior to polymer addition and dewatering and reducing the potential operational challenges caused by the new transfer pump station. A second thickener will be added to operate in parallel with Thickener No. 1 and serve the sediment and sludge from Plant 2, and provide a measure of redundancy for sludge thickening when maintenance is required on either thickener. A concrete tank structure with a fixed weir and adjustable weir will be constructed to split the sedimentation and sludge discharge from Plant 1 between the two thickeners to ensure optimal operation of the thickeners. The two weirs, or thin walls built to allow only the clear surface water to discharge, allows for the efficient separation of the decant water and the sludge at the bottom of the tank. A filter backwash equalization and decant tank for Plant 1 will be constructed with a volume of 200,000 gallons to allow for the handling of backwash activities from Plant 1 and will work in parallel with the existing backwash equalization tank for Plant 2 to allow the thickeners to operate efficiently and produce consistent thickened sludge. The major component added with the project will be a mechanical centrifuge dewatering equipment and a building to house the two (2) centrifuge dewatering units, polymer storage and feed system, dewatered sludge conveyance equipment and truck loading area. The building will also house the needed electrical and control equipment for dewatering equipment installed with the project.

The two centrifuges and associated improvements will provide adequate dewatering capacity and redundancy for processing average daily and maximum week solids loading conditions from the sedimentation removal of both Plant 1 and 2. To dewater the average daily solids from the two plants it is anticipated that the two centrifuges will need to operate approximately 9.5 hours a day for five days a week allowing for operation of the facilities with existing plant personnel. TAW believes this project to be a key component in improving water quality in the Tennessee River and strongly believes that protecting water quality, for both TAW customers and downstream users, is a critical component of public health and safety. TAW believes that protecting water quality is in the public interest.
