**Subject:** data request; docket 15-00089.

Good morning Greg,

Last Thursday, Staff sent Atmos a data request seeking to isolate the effects of the proposed depreciation rates on Atmos earnings through 2019. I understand that Atmos cannot know at this time the capital additions/retirements (and corresponding depreciation) in future years. Therefore, I am requesting that Atmos complete the requested schedules without inclusion of any capital additions beyond those approved in the rate case. (In other words, just keep the plant in service at the same levels for each year through 2019 and apply the new depreciation rates.) Incorporating only depreciation changes will result in isolating changes to all schedules including the overall revenue requirement.

Let me know if you want to discuss.
