Subject: Say NO to Kingsport Power's Power Grab: Preserve Net Metering!

Dear Tennessee Regulatory Authority,

Net metering is a core policy that will allow me and other Tennesseans to install solar panels on our homes and businesses. Unfortunately, Kingsport Power is attacking this policy - despite the fact that it has helped bring jobs and rooftop solar markets to 43 states.

This is a blatant, anti-consumer attempt to eliminate competition and stifle energy choice. Kingsport Power is trying to stop solar before it really starts in Tennessee. I'm opposed to any solar-only charges that would undermine my ability to power my home with solar energy and take control of my power bill.

Please reject monopoly utility power grabs that come at the expense of choice and competition in our energy market.

Please reject Kingsport Power's anti-solar proposal.

Sincerely,

Joyce Herzog

There is a coal farm near me, and it is much less disruptive than the spewing fumes from a coal plant or the ecological disaster of a coal ash spill. I am now pain more each month on my electric bill due to the TVA coal ash spill. We consumers are footing the costs by paying a surcharge on our bills each month. Coal generated electricity is costing us more as consumers, both financially and environmentally. Tennessee has wonderful natural resources which is a benefit for residents and in generating tourism revenues, as well as preserving out natural heritage for future generations. Let us transition to more environmentally alternate energy sources, rather than continuing to depend on ever decreasing fin it nonrenewable resources, such as coal, which also devastates the environment during the process of extraction, particularly with mountain top mining that destroy's landscapes, wildlife habitats, people's homes, and water supplies. Please do not allow the special interests of

the coal lobby to override the best interests of Tennessee citizens, as has already occurred in Nevada.

Please reject monopoly utility power grabs that come at the expense of choice and competition in our energy market.

Please reject Kingsport Power's anti-solar proposal.

Sincerely,

Sherry Morris
