

**IN THE TENNESSEE PUBLIC UTILITY COMMISSION
AT NASHVILLE, TENNESSEE**

IN RE:	)	
	)	
PETITION OF TENNESSEE	)	
WASTEWATER SYSTEMS, INC.,	)	DOCKET NO. 16-00139
FOR APPROVAL OF ADJUSTMENT	)	
OF ITS RATES AND NEW TARIFF	)	

TWSI'S RESPONSE TO TPUC SECOND DATA REQUEST

Tennessee Wastewater Systems, Inc. ("TWSI") files this response to the Tennessee Public Utility Commission's ("TPUC") *Second Data Request*.

1. Provide a chart of all affiliate companies of TWSI doing any business in the state of Tennessee. Provide a listing of the officers, board members and/or managing members, of each company.

RESPONSE:

See Exhibit 2-1.

2. Provide a listing of each TWSI affiliate performing any function for TWSI. Include a summary of the functions each affiliate performs for TWSI including the costs incurred by TWSI for each function for the year ending December 31, 2014, December 31, 2015 and December 31, 2016. This summary should identify labor, products the affiliate provides/sells to TWSI, and services the affiliate provides with any associated costs.

RESPONSE:

See Exhibit 2-2

3. Please provide a listing of all changes in TWSI's or any of the TWSI affiliates business plans that occurred in the past five (5) years. Include any consolidations, acquisitions and copies of contracts that allowed for these changes. Provide a copy of the business plan that incorporated any listed changes.

RESPONSE:

In 2014, the decision was made that TWSI could support itself and in July of that

year the utility redirected its business to being a self-supporting, standalone company. Until that time TWSI still relied on affiliated companies to support the utility. TWSI hired its own employees for customer service and operations/maintenance jobs and purchased its own equipment (trucks, etc...). In accordance with the Order issued in the company's previous rate case Docket 08-00202, the company continues to be billed for the services provided to it by shared Adenus employees (ie. executive, legal, accounting, managerial, etc...).

There are no business plans available for TWSI or any affiliate.

4. Please provide a listing of all changes in accounting of financial transactions for and/or between TWSI or any of the affiliates vs how they were accounted for in 2012, 2013, 2014, 2015, and 2016. Provide a list of the organizational changes that were incorporated within these financial reporting changes. Please explain the rationale and any assumptions made when making these changes.

RESPONSE:

There are no accounting changes. All transactions are recorded according to GAAP standards. Adenus and TWSI has made a concerted effort over the course of the recent years to minimize the use of affiliated companies and outside contractors and staff with its own TWSI employees.

5. Please provide any changes in Williamson County Rules and Regulations or requirements that require TWSI to operate differently in 2017 than TWSI operated in 2012, 2013, 2014, 2015 and 2016.

RESPONSE:

TWSI is unaware of any changes in Williamson County Rules and Regulations that will require TWSI to operate differently in 2017. TWSI changed its method of operation in 2016 to ensure its participation at the front end of the development process rather than in the middle where because of not being involved earlier in the development process, issues would arise leading to conflict and misunderstandings between TWSI, developers, engineers, and regulators. To mitigate these issues TWSI changed its operations so that it is now included at the onset of the development process. This enables TWSI to work closer with developers as they develop the plans for their projects and helps to avoid the conflicts and misunderstandings that used to plague certain projects.

6. Did any of the changes that TWSI made due to Williamson County Rules and Regulations or requirements result in TWSI incurring additional cost? If so, explain. Provide an itemization of the cost for years ending December 31, 2014, December 31, 2015 and December 31, 2016.

RESPONSE:

TWSI is unaware of any changes to Williamson County Rules and Regulations as such no additional costs have been incurred.

7. Provide a spreadsheet listing the effect that each of the applicable changes discussed in the question above will have on the Company, its Parent or any of its Affiliates method of allocating each change among its regulated, unregulated and jurisdictional operations.

RESPONSE:

There are no changes that affect the Company, its Parent or any of its Affiliates.

8. Please explain, in detail, whether TWSI considers River Road Limited Partnership an affiliated company.

RESPONSE:

River Road Limited Partnership is owned by some of the same individuals who own Adenus Group, however RRLP is not part of Adenus Group and is in not affiliated with TWSI. TWSI's lone dealing with the company is through their ownership of the land upon which the lagoon resides. TWSI is currently working on getting an easement executed for this land to satisfy TDEC and TRA land easement/ownership requirements for treatment facilities. The easement is also the last item needed to resolve the NOV issued to TWSI on the River Road facility.

9. Provide an updated list of TDEC permitted treatment facilities in excel worksheet format from the most recent billing register information. Please provide columns in the worksheet for the following: (1) TDEC SOP #, (2) Name of the Treatment Plant, (3) TRA/PSC Docket No. of the associated CCN, (4) County location of the Treatment Plant, (5) Number of Customers Now Active/Connected to Each Treatment Plant, (6) Number of lots contracted with Developer to Connect to each Treatment Plant (7) Number of lots sold and to be connected in the future currently paying access fees/capacity fees (8) Proposed Number of Customers to Connect to Each Plant by month for the year ending December 31, 2016 (9) Approved rate currently in place for each Treatment Location. (10) Identify each TDEC SOP if location is considered a residential location by noting (R), cabin rental by noting (CB), or strictly commercial (with or without food) by noting (C) next to the TDEC permit number.

RESPONSE:

See Exhibit 2-9. TWSI is unable to provide a response to item 8 as it does not project future growth nor does it control the development within the areas in which it serves. Any projections would be gross speculation and not be helpful in determining future revenues. Further any consideration of future revenue would also require a projection of future expenses and TWSI is unable to do this. Lastly, the rate case is based on an attrition period and any consideration of future revenue is inapplicable to the case at hand.

10. Provide a list of the pending TDEC applications, date submitted to TDEC, number of lots to be supported by each permit and number of gallons per day of flow to be supported by each pending permit.

RESPONSE:

The utility has multiple permits pending at TDEC at any given time. Most are 5-year renewal applications which do not include any modifications to the respective sites. TWSI currently has a permit to modify SOP 13026 that is pending with TDEC. It was submitted on March 30, 2017. It is a request to add 74 lots to the current permitted amount of 120 (194 total lots) which increases the capacity of the system from the currently permitted 36,000 gallons per day to 58,200 gallons per day.

11. If the Petition is approved, will TWSI bill at least one customer within each Rate Class in its proposed tariff?

RESPONSE:

Southridge customers will not be billed at Class Rate 9 until the lagoon is constructed.

12. Provide the number of customers by CCN/location that were lost as a result of the Sevier County fire in November 2016.

RESPONSE:

See Exhibit 2-12.

13. Provide a reconciliation of locations and amount between the CIAC as filed in the Annual Reports from 2002 thru 2016 and the Ad Valorem Property Tax Report for Tennessee.

RESPONSE:

Schedule WS3-A lines 1 and 4 of the Ad Volarem report was misrepresented in the years 2012 – 2017. The following assets were added to fixed assets in the fiscal years that were not Contribution in Aid of Development: The following amounts should have been removed from Line 1 and added to Line 4.

**Fiscal Year 2011 Tall Oaks \$2,498.00
Fiscal Year 2013 Griffiths Mill Treatment \$1,000.00
Fiscal Year 2013 Jackson Bend \$860.00
Fiscal Year 2014 Dyers Hollow Drip \$38,472.50**

14. Provide an update on the Southridge project in Montgomery County, including whether funds have been secured for the loan to build the system and if construction has commenced.

RESPONSE:

Funding has not been secured for the Muddy Branch Lagoon. TWSI has been focused on the funding for the emergency order repairs (Maple Green, Cedar Hill, Smoky Village, and Summit View). TWSI has limited borrowing capacity and currently the priority of funding the emergency repairs have taken great precedence. No plans have been approved nor construction commenced on the project at this time.

15. Based on TWSI's response to CAPD Discovery 2-3 pertaining to the volatility of revenues, please explain the volatility in the Commercial Flat Sewer revenues between 2011 and 2014 (decrease in revenues). The response provided explained the increase; however, the decrease between 2010 and 2014 was not explained. Why did revenues go down from \$308,000 to \$267,000 (\$41,000) 13% between 2010 and 2014?

RESPONSE:

TWSI Operation and Maintenance (O&M) revenue is up 29% from 2010-2014. The offset to the decrease in Commercial Flat Sewer revenue is offset in the O&M account. TWSI uses these accounts as an internal accounting mechanism and the offset to the decrease in account 521.2 is in 536.6. The fire at the Black Bear Ridge resort in 2013 caused a decrease in revenues starting in late 2013 through 2016.

16. TWSI's response to CAPD Discovery 2-13 concerning the Non-Utility Developer Income (421.5) indicates the price-out is on Exhibit 2-1. Please pinpoint where the price-out is for the \$151,030 (2016) income reported for 421.5. The price-out requested should be an itemization of the \$151,300 of 421.5 revenue by location. In addition, please explain why TWSI considers this is a non-utility revenue.

RESPONSE:

There is no tariff to accomplish a price-out. The General Ledger detailed reports provide the amounts and customers that represent the income reported in 421.5.

TWSI considers this non-utility revenue because TWSI had an understanding when it established this fee with the TPUC staff that it would not be regulated income as it did not pertain to the rate payer and it was a cost associated with the startup of the development prior to the rate payer taking ownership. As a result of the understanding TWSI does not bear any of the development cost in their expenses nor can we currently identify those prior costs to offset the Non-Utility income.

If requested by the TPUC or the CPAD, TWSI could track those expenses on a going forward basis to determine whether the expense estimates made approximately eight years ago are still accurate. TWSI believes that the

expenses today would probably be larger than those estimates since the legal and regulatory costs associated with obtaining and maintaining a certificate prior to the provision of service have increased. If TWSI is asked to track those expenses, the categories of expenses associated with this income would include time of Adenus employees spent on contracting, engineering, legal, permitting, project management, accounting, and regulatory costs. These costs are incurred whether the project is ever completed and service initiated. TWSI believes that other wastewater utilities in Tennessee also receive revenue from developers to cover expenses in these categories and that these revenues are not recorded as regulated revenue. TWSI affiliates also operate in Alabama, Kentucky, and Ohio. Wastewater service is subject to rate regulation in these states and none exercises jurisdiction over negotiations between the utility and the developer or the resulting financial arrangements.

17. TWSI's response to CAPD Discovery 2-12 regarding account number 421.3 (Non Utility Oncome – Utility Fee) states there has been revenue in this account each year and to see attached Exhibit 2-1; however, the revenue on Exhibit 2-1 is 0. Provide the itemization of the 2013 revenue amount. Also, please provide the source and support for this revenue stream as previously requested in CAPD 2-12. If on Exhibit 2-1, please pinpoint where it is and provide the itemization.

RESPONSE:

Account 421.3 and 412.6 are synonymous. Information is shown in Exhibit 2-1, Line 23.

18. In TWSI's response to CAPD Discovery 2-14, please explain what farmland this refers to. Is it land that is part of a wastewater system? What location is Danny Holt renting? Please explain and provide a copy of the rental contract between Danny Holt and TWSI or fully explain the relationship between Danny Holt and TWSI and why TWSI is renting Danny Holt property. If there is not a contract, please provide the verbal agreement explaining why the particular amounts that are shown.

RESPONSE:

The Sarah Holt Estate property is subject to a 99-year lease for the Muddy Branch Lagoon which is to be erected to disconnect Southridge from Clarksville Water and Gas. The property is being share cropped by Marks and Head Farms and TWSI receives 25% of the revenue generated by the crops harvested and sold from the site. There is no contract and TWSI has no relationship with Dennis Holt.

19. Please provide dates that Charles Myers and Clint Wayman were employed by TWSI or any of the Adenus Companies. Provide the company each worked for and the dates each were employed by that company.

RESPONSE:

See Exhibit 2-19.

TARIFF SPECIFIC:

20. Provide Attachment No. 1 (Section 2, Original Page 3) and Attachment No. 2 (Section 2, Original Page 7) as referred to in the proposed tariff.

RESPONSE:

Attachment No. 1 is the Sewer Subscription Contract with the customer and Attachment No. 2 is the "Do's and Don'ts" manual provided to customers upon the initiation of service. Both of these documents are being revised. Updated versions will be filed in the docket once available. The updated versions are based on the same titled attachments which are part of the current tariff.

21. Provide the Docket Number(s) approving any current contracts that TWSI requests customers to sign as Sewer Service Agreements for rates, products and services.

RESPONSE:

The service agreement is part of the tariff and became effective by operation of law thirty days after it was filed several years ago.

22. Based on previous tariff language and TRA Rules and Regulations 1220-4-13-.02, the wastewater system is comprised of tanks, pipes, pumps and filters. In the proposed tariff, TWSI proposes to change the language of its tariff to include maintaining only the *components* of the tanks, control systems and service lines with the following language added: *"The Customer owns the tank and is responsible for the replacement or change of the tank according to TWSI's specifications."* In addition the proposed tariff Section 2, Original page 8 adds "and/or tank" to the *Damages* paragraph stating that "the Company will not be responsible for maintaining". The *Damages* paragraph also adds language in the proposed tariff that *"Any damage to the water valve, locks of the water valve, lids, or any other component of the system shall be paid for by the customer."*

Please explain how the proposed tariff changes will comply with TRA Rule 1220-4-13-.02. and explain why TWSI is proposing this change? Has TWSI or an affiliate of TWSI provided any tanks, control systems/panels and or service lines at any of the wastewater system locations currently serviced by TWSI during 2015, 2016 or to date 2017?

RESPONSE:

The proposed tariff language does not change anything about TRA Rule 1220-4-13-

.02 which is a definition of how the term “wastewater system” is used throughout the rules. What the tariff language is intended to do is clarify the ownership issue. Not change any obligations of the utility with respect to maintenance.

TWSI still considers the tank, components, water valves, etc... as part of the wastewater system. The tariff includes new language to better define for the customer what their responsibilities are with regards to the tank. Over the years there has been much confusion regarding the ownership of the tank and who is responsible to pay for certain repairs or maintenance of it. IRS rules dictate that the utility cannot own personal property on a customer's property. This means TWSI cannot own the tank. TWSI maintains the tank as part of its normal service to the customer. If it is obvious the tank and/or other system components are being abused by the customer the customer then bears the responsibility of additional repair and/or maintenance costs. For instance, a normal tank may require pumping once every 10 years. If a particular customer's tank needs to be pumped once every year or two, they are likely abusing the system and will be responsible for paying for the additional pumping.

Adenus Technologies provides the panels and software that run the sewer system and components within the tank.

23. Provide an accounting of the cost by year and by location/system since 2009 of all lids, tanks, water valve, locks of water valves that have been replaced? Were these costs paid for with escrow funds? Please separate as normal expenses and amounts paid out of escrow.

RESPONSE:

See Exhibit 2-23.

24. TWSI proposes a \$120 annual Capacity Reservation Fee for each property owner that is provided a service connection when the sewer system is built. Please define “service connection”. Describe any and all equipment and or resources that will be put in place at this time. Has the system been built to service these customers for both treatment and collection at the time the customer receives the first bill for \$120 or is the \$120 merely a reservation for the system that will eventually be built?

RESPONSE:

A service connection is the sewer collection line present at the property line of the lot where sewer service and capacity is available allowing for that customer to tap onto the system. If a service connection is available to a customer, full sewer service is available at that location provided capacity available. If capacity is not available, a reservation fee is not charged. The reservation fee is for the allocation (reservation) of established sewer capacity for that lot. The fee is charged once the system is completed and service and capacity is available to the lot.

25. Provide TWSI's collection process and procedures, inclusive of any notification procedures prior to revoking access to the sewer system?

RESPONSE:

TWSI's collection process starts with monthly bills and reminders of past due balances. Past due balances are initially attempted to be collected through phone calls, emails, and letters notifying the customer of their past due balance. Customers are notified in writing and by stickering the door of the residence if their access to the sewer system is in jeopardy of being revoked. Revocation occurs in accordance with Commission rules.

26. Please describe any differences between the Capacity Reservation Fee and Sewer Access Fee other than the collection terms?

RESPONSE:

Fundamentally there is no difference. TWSI's sister company Alabama Wastewater Systems, Inc. has a similar fee and it is called a Capacity Reservation Fee because it reserves capacity on a given system – just like the Sewer Access Fee. The terminology change is in part to be consistent between the companies, but also because the purpose of the fee is better described by the new name. The fee reserves capacity and as proposed by the policy in the proposed tariff, non-payment of the fee results in revocation of the capacity. In the past, it has proven difficult for TWSI to collect this fee from developers and other lot owners and the minimal amount of the fee makes it impracticable to sue to enforce payment. In Alabama, AWSI has the ability, after notice and opportunity to cure, to revoke capacity for a lot owner's non-payment of the Capacity Reservation Fee. Should a lot owner have the capacity revoked, they must pay a new tap fee to reserve capacity on the system again. This new policy has resulted in over 90% of delinquent accounts bringing their Capacity Reservation Fees current.

27. Provide an itemized listing of the total amount TWSI spent in 2015 for labor hours across all accounts? This should include TWSI employees, and any other labor hours for companies including, but not limited to Adenus Technologies, Adenus Operations, DRT Services, LLC etc. Please itemize by company paid, employee/contractor/executive, date of service, date of payment, location of service and labor hours.

RESPONSE:

See Exhibit 2-27.

CABIN REVENUES:

28. TWSI's Overnight Rental Customers complete a Sewer Service Agreement/Cabin Sewer Subscription Contract "up front" as to their specific needs (capacity/flow). If the measurements go outside those specific needs,

- a) Will each customer be able to monitor its monthly usage?

RESPONSE:

The current tariff provides ways for TWSI to monitor excessive usage of wastewater system, however TWSI does not have its own meters available for customers to monitor. If customers have a water meter attached to their cabin they would be able to monitor the water usage and have an idea of the corresponding wastewater use. Customers are also free to install their own monitoring if they so choose.

- b) Does TWSI have a method to measure capacity/flow for every customer that is charged Overnight Rental Customer rates? Are any of the customers using private wells for water? How would those be measured? If TWSI does not have a method to measure flow for each customer, please explain how rates and charges, based on flows, would be computed for these customers.

RESPONSE:

TWSI currently does not monitor flow except in certain situations (rare) where the customers have water meters which can be read by TWSI. TWSI's current rates are not based on measuring flow nor has that been proposed in the new tariff. It would be extremely cost prohibitive in terms of additional personnel needed to go around reading meters and equipment (trucks, meters, etc...) to do so.

TWSI does have customers that use private wells for water. TWSI would need to install meters at these cabins to measure flow.

- c) The last resort for measurement is stated as potable water meter. Do all customers have potable water meters.

RESPONSE:

No.

- d) TPUC's Data Request 1, question no. 6 requests a definition for excessive and why the .0358 per square footage will not be sufficient to cover excessive usage. TWSI states that, although the excessive provision has always been in the tariff, it has never had to resort to using this tariff provision (referring to excessive /exceptionally high volumes). In addition TWSI states in the pre-filed testimony filed in this Docket that square footage is more indicative of the wastewater system's capacity than number of bedrooms. However, TWSI's tariff does not call for rates by number of bedrooms. TWSI's overnight rental tariff is set by the gallons per day of flow with rates graduated up in tier levels, based on the number of gallons of daily flow.

TWSI's Overnight Rental Units tariff states that the *"monthly sewer charge is based on the monthly average daily flow monitored from the unit being served. A minimum of \$69.15 per month will be charged for up to the first 300 gallons per day of average flow. For each additional 100 gallons per day of average daily flow, up to a total of*

1,000 gallons per day, an additional charge of \$15 per month per 100 gallons will be levied. For avg daily flows over 1,000 gallons per day, an additional charge monthly charge of \$157.95 per 1,000 gallons of avg. daily flow will apply”.

The tariff goes on to explain how TWSI will measure to determine how much will be billed on a monthly basis by each customer and the three forms of measurement which are the same three forms of measurement to determine excessive in the proposed tariff. The tariff also states if excessive usage is determined that the customer will be measured every ninety days, listing the form of measurement used on the customer's bill; however, if TWSI does not measure the customer's usage the customer will receive an estimated bill that will be trued up when TWSI does measure it.

Has TWSI ever billed according to these tariff provisions. Please explain.

RESPONSE:

No – though TWSI is currently monitoring the use of some cabins in East TN with the intent of billing those customers for overusing the system. TWSI's current tariff is based on design flow which is an engineering estimate (including a safety factor) of how much wastewater flow in gallons a dwelling will use per day. Current TDEC design flow criteria is 300 gallons per day. Some older systems were designed and approved at 250 gallons per day.

The reference to bedrooms is in regard to cabin occupancy. Cabin occupancy is often based on how many bedrooms a cabin has (ie. a 2-bedroom cabin would sleep 4 people) however this does not take into account any open areas in the cabin conducive to air mattresses or sleeping bags, any basement or loft areas where people could sleep, etc... So while a 2 bedroom cabin may be designed to sleep 4 – it could (and often does) in reality sleep two or three times that number.

The problems TWSI is experiencing with most of its cabin resorts is a result of the excessive occupancy. This excessive occupation will cause a cabin to significantly exceed the flow designated for that cabin on the system.

- e) If these customers are billed by the correct tiers according to their usage and the current tariff, will their expenses be recovered?

RESPONSE:

See Example 28e. No. The issue with the cabins is that they have the capability of housing a larger number of occupants than just “2 per bedroom”. The layouts of these cabins allow for people to sleep on sofas, on air mattresses, sleeping bags, etc... This results in cabins that have a greater capacity than often stated in their marketing materials. The greater occupancy results in significantly greater use of the wastewater system. More water flows through the system as a result of the increased occupancy. For most cabins, the 300 gpd design flow the rates are based upon is too low a figure given how much flow the system receives from their occupants. The purpose of moving to calculating flow based on square footage is to factor into the rate how many people any given cabin can accommodate.

Another issue is when many of these cabin communities were constructed, the builders represented to TWSI that a certain type of cabin would be built (ie. 2-3 bedroom), but ended up building much larger structures that accommodate more guests. The wastewater systems were design and built based on the original representations of the developer so the larger cabins have put a strain on many of the systems.

Using Exhibit 2-28e you have a cabin that was (1) built with 9 bedrooms – greatly exceeding the 2-3 bedrooms represented to TWSI by the developer; (2) a contract signed by the cabin owner representing that the cabin will sleep 16 people; and (3) an advertisement for the rental of the cabin stating the cabin sleeps 28 people. The reason why the cabin can sleep as many as 28 people is due to the overall size of the structure – not because of the number of bedrooms. The difference in occupancy between the contract and advertisement is 12 people though the number of bedrooms remains the same. And given that the size of the structure allows for greater occupancy, there is greater use of and demand placed upon the wastewater system.

TWSI also has issues with customers who claim their cabin is residential, yet it is found out these cabins are often used and promoted as a commercial cabin property. Commercial rental cabins tend to have higher use and abuse of their wastewater systems than residential cabins. So it is often difficult to ascertain what the proper tier is based on usage for a cabin customer.

- f) If all of the above is not completed and measured as stated, why is it in the current tariff and proposed tariff?

RESPONSE:

The provision is in the current and proposed tariffs because no matter how rates are based (ie. design flow, square footages, etc...) there will always be customers that abuse the system. TWSI needs to have a way to assess abuse of the system and hold those customers accountable. TWSI is not as concerned with the occasional abuser as their impact on the overall wastewater system is somewhat minimal. TWSI is concerned with the habitual abuser whose constant overuse of the system creates operational and regulatory issues for the utility and potential health and environmental hazards for the public. For these reasons, it is important for TWSI to have the ability to assess abusers of the wastewater system for any expansion of the system necessary to sure continued operational and regulatory compliance as well as ensure public and environmental safety.

29. In the response to question #7 of the TPUC's First Data Request, TWSI gave some examples of customers being billed by square feet. Please provide a customer listing of Summit View customers, square feet per customer and the rate each would be charged under the proposed tariff.

RESPONSE:

See Exhibit 2-29.

30. Have Summit View customers ever been billed based on the monthly average gallons of flow per customer?

RESPONSE:

No. Summit View customers have been billed according to their rate class in the tariff.

31. Was there a way to measure average monthly gallons per day for each Summit View customer in 2015 by one of these methods? a) Effluent Flow Meter, b) Step Pump, c) potable water meter?

RESPONSE:

No. The cabins are on a well system which is not conducive to any of the three monitoring methods.

32. Does TWSI have a way to measure average monthly gallons of flow by each customer at Summit View?

RESPONSE:

TWSI can install flow meters at each cabin, however the meters are quite expensive and cost prohibitive for the utility to justify installing.

33. Once TWSI has determined a customer has excessive usage, how soon will TWSI notify the specific customer, the POA and the management company that they are in violation of the contract, and may be required to pay any capital costs associated with increasing the capacity of the system? Will the consumers be notified in writing? If not, why?

RESPONSE:

Customers will be notified after monitoring their usage for three (3) months. If a customer's use of the system is excessive, they will receive a written notice to that effect and be given a reasonable amount of time to remedy the issue before TWSI proceeds with charging the customer their pro rata share of expanding the system capacity.

34. Pursuant to the proposed tariff how many written notices will be given to a customer to rectify an issue before new construction begins to expand the system to accommodate the specific needs?

RESPONSE:

Minimum of one written notice regarding the customer's abuse of the system. If customer acts in good faith towards curing the problem, TWSI will allow a reasonable amount of time for the customer to attempt to remedy the problem. If the problem cannot be remedied in a reasonable amount of time, TWSI will provide a second written notice notifying the customer as to their charges for expanding the system to accommodate their needs on the system.

EXPENSES:

35. Swan Harbor was identified as the "Class" accounted for in the Transactions by Account for over \$90,000 of the \$250,188.57 Materials and Suppliers charges filed in response to the Consumer Advocates Data Question #25. Provide a detailed listing of each function with associated cost performed at Swan Harbor during 2015 to total the \$90,000 plus.

RESPONSE:

See Exhibit 2-35.

36. Please explain why \$90,000 plus was spent to rehab Swan Harbor when it appears that TDEC's issue was resolved in November and confirmed resolved in the November inspection report. Why was this considered an emergency?

RESPONSE:

The TDEC issue and general system maintenance and repair are two totally separate matters. Swan Harbor was not considered an emergency. It received priority because TDEC approval for the rehab was not required. Further, the funding for the repairs at Swan Harbor came out of escrow whereas other sites – given the nature and scope of the necessary and required repairs - are dependent upon the approval of financial arrangements by the Commission before issues can be addressed.

37. Please itemize and identify how each invoice contributed to the "Rehab" of Swan Harbor as referred to in the 2015 Escrow filing.

RESPONSE:

See Exhibit 2-37.

38. If Swan Harbor needed a complete rehab, please explain why costs incurred were not capitalized rather than expensed?

RESPONSE:

Assets are only capitalized (as opposed to expensed) when the useful life of the asset has been increased or there has been an increase in the capacity of that asset. Since

the rehab was merely to bring the site to an acceptable level of operation performance, the cost of that rehab is considered expensed.

39. Please explain why TWSI spent \$90,000 plus to rehab the system at Swan harbor when a letter from Jeff Riden to TDEC dated October 15, 2015, stated the Swan Harbor system is not in need of rehab.

RESPONSE:

The October 15, 2015 letter to TDEC was in response to a Notice of Violation (NOV) issued to TWSI for alleged violations of the company's SOP for Swan Harbor. The letter specifically addressed the issue(s) raised in the NOV not the general condition of the aging wastewater facilities. The system, while in compliance with its SOP still required attention – as an aging system - for general maintenance as well as to improve the technology and operational efficiency of the overall system and facility.

40. Provide a copy of the bond expensed in 2014 and removed from expenses in 2015 for the construction of Paris Landing State Park.

RESPONSE:

See Exhibit 2-40.

41. Provide a copy of the invoice from the insurance company for the bond expensed and removed for Paris Landing State Park.

RESPONSE:

See Exhibit 2-41

42. Provide the regulated and non-regulated construction revenues and expenses for Paris Landing State Park. This should list all expenses paid out and total revenue collected as well as net income to TWSI to complete the construction contract.

RESPONSE:

See Exhibit 2-42

43. Please provide documentation showing entitlement in the Utility's name for the Paris Landing wastewater treatment system and wastewater collection system as well as deeds and maps to the land where the treatment and collection system are located.

RESPONSE:

See Exhibit 2-43.

44. Please describe DRT Services LLC and explain in detail the services that were performed, including the equipment and labor hours (inclusive of a per diem expense) to rehab the Swan Harbor system. Please provide an explanation of why TWSI used DRT Services instead of its own employees, including any cost-benefit analysis.

RESPONSE:

See Exhibit 2-35 Swan Harbor Escrow Details.

DRT provides construction services to TWSI. These services are of a nature not typically performed by TWSI system operators or maintenance personnel (ie. laying drip pipe, building control buildings, etc...).

At Swan Harbor DRT completed an extensive overhaul of the wastewater treatment facilities including upgrades to the drip area, control building, and control panel.

The reasons for using DRT rather than TWSI employees is the work required greater knowledge and specialization than TWSI operators or maintenance personnel have. Further, the day to day duties of TWSI operators and maintenance personnel does not provide them with the flexibility and availability to handle construction related matters on behalf of TWSI. Lastly, TWSI has a very limited construction crew and their services have been utilized in Williamson County helping address the growth in the Eudaily service territory.

45. Provide a billing register by month for the customers at Swan Harbor for 2015, 2016 and January and February 2017.

RESPONSE:

See Exhibit 2-45.

46. Provide a listing of the customers at Swan Harbor that were billed the annual Sewer Access Fee for 2015 and 2016.

RESPONSE:

See Exhibit 2-46.

47. The general ledger expenses for the "rehab" of Swan Harbor total over \$100,000 from late 2015 to early 2016. Please explain why the rehab of Swan Harbor received preference over the rehab of any of the four locations in Docket 14-00136?

RESPONSE:

The repairs at Swan Harbor are significantly different than the issues facing the four sites originally in Docket 14-00136. The sites in 14-00136 require capital improvements – which is why TWSI petitioned the TPUC to assess the costs across the rate base. Swan Harbor did not require a capital investment. In addition, Swan

Harbor did not require TDEC to approve any plans for the repairs whereas three of the systems in Docket 14-00136 required plans approval from TDEC (and the one that did not was held up due to TDEC's mistaken claims that the plans had expired).

48. Provide a copy of the Adenus Technologies, LLC "Sales by Customer Detail" report for January 2015 through December 2016 .

RESPONSE:

See Exhibit 2-48.

49. Explain in detail the large increase in the AUG-MGMT Expenses of \$81,213.04 in 2014 to \$148,788.04 in 2015 and to \$223,460.11 in 2016.

RESPONSE:

Matters involving the TPUC and TDEC over the last few years have required a greater investment of time by shared employees which lead to increased hours billed to TWSI. Also, effective in 2016 Bob Pickney has been filling the role of ETN operations manager so his payroll is posted through this account into TWSI.

50. According to the General Ledger a new Contractual Expense ("IT Expenses") from February 2016 to September 2016 was paid to Adenus Group. Please explain the services that were performed resulting in this expense, why it first occurred in February 2016 and why it stopped in September 2016.

RESPONSE:

Beginning in Feb 2016 TWSI outsourced its IT services to NSG. Adenus Group pays the bill and the expense is prorated amongst the Adenus affiliated companies for their respective portions. In Oct 2016, the accounting department began coding these bills to a different account - Account 775.3 – Licenses & Permits. License and Permits are more representative of the type of service that is offered than Contract Expense. TWSI is neutral if the Staff feels the charges should be coded to a different account.

51. Provide TWSI's written policy for capitalization. If a written policy is not in place, please explain the rationale for determining whether an item will be capitalized or expensed?

RESPONSE:

TWSI has no written policy on Capitalization. Determinations on whether an item will be capitalized or expensed are made in accordance with the standards set by the IRS, FASB rulings, and GAAP. But generally speaking, assets are capitalized when the useful life of the asset has been increased or there has been an increase in the

capacity of the asset. All other expenditures are expensed.

52. New control panels were installed in nine (9) locations between January 2016 and July 2016: Trillium Cove, Turners Landing, Smokey Cove, Windsor Pointe, Black Bear, Elk Springs, German Creek, Legacy Preserve, Settlers Ridge, with Swan Harbor starting in 2015 and being completed in 2016.

- a) Were there any additional control panels or rehab's of the TWSI systems during 2015 and 2016? If so, please identify the locations.

RESPONSE:

All the requested information on rehab and panels were charged to the escrow account with detailed explanations. TWSI provides all the details of the escrow account including invoices and descriptions to the TPUC each fiscal year.

- b) Provide an accounting by location of amounts that were spent, itemizing by part, amounts expensed or outsourced for any installations and total labor hours for each location. Identify any equipment rental or expenses incurred during installation, including labor hours associated with the labor hours in salaries and wages or the AUG Management fees included in TWSI's Income Statement.

RESPONSE:

AUG Management fees represent those hours spent by non-TWSI employees on TWSI business. The hours charged represent several different topics and situations. Each time sheet for each employee includes the details of the work they performed on behalf of TWSI. This information has been filed in this docket as Exhibit 2-37 in response to CPAD's Second Request for Discovery.

To the best of TWSI's knowledge there are no equipment or rental equipment charges in AUG Management fees.

- c) Were any of these locations expanded beyond the original TDEC permit for gallons per day flow (gpd)?

RESPONSE:

No.

- d) Were any of these locations expanded to cover additional lots?

RESPONSE:

No.

- e) According to the detailed information included with TWSI Escrow filings, the amounts charged to escrow specifically for these locations totaled in excess of \$500,000. Please explain if any of these costs will be capitalized or will it remain expensed?

RESPONSE:

These charges will remain in the escrow reserve. The charges represent replacements or upgrades to existing facilities and equipment. The assets replaced did not prolong the life of the original asset capitalized or increase the capacity of any facility. Pumps, floats, and computer components are maintenance in nature and are not capitalized.

- f) Were these control panels installed as “first time control panels” or as updated control panels to provide new technology. Please explain by location.

RESPONSE:

All panels were updated to keep up with the developments in technology available to monitor these systems better as well as to comply with TDEC rules and regulations regarding site visits/monitoring. TDEC rules require site visits every 14 days unless telemetry monitoring is in place. If telemetry monitoring is in place, a site only needs to be visited once every 30 days. With the upgraded panels, sites only need to be visited once a month. The panel updates save TWSI and the ratepayer money as TWSI would have to add employees and equipment (ie. trucks) at great expense to comply with a twice a month site visit schedule.

53. In addition to control panels, “sheds/buildings” to house the wastewater treatment equipment/control panels were built at many of these locations as well as other locations.

- a) Identify all the locations where sheds have been built.

RESPONSE:

**Turner’s Landing
German Creek
Grainger’s Landing
Trillium Cove
Elk Springs
Settler’s Ridge**

- b) Provide an itemization of the amounts spent by year and by location where sheds were built in 2015 and 2016. Please itemize by part/materials used; work outsourced to build the shed, such as but not limited to DRT Services and Shelly May; labor hours included in building the shed; and total cost of each shed. Indicate if these funds came out of escrow and whether the amounts were expensed or capitalized.

RESPONSE:

See Exhibits 37b1 and 37b2. The funds came out of escrow.

54. Provide the cost to TWSI for telemetry packages from Adenus Technology. Provide a listing of all options that are available for the telemetry packages at each location and the options which TWSI has subscribed to. Provide an explanation of why telemetry for each location is important/necessary to TWSI.

RESPONSE:

See Exhibit 2-54.

Telemetry for each location is important and necessary for the following reasons:

- 1. Change in TDEC rules (as stated in the SOP for a given system) regarding frequency of site visits/system monitoring required either a visit to a facility every 14 days or once a month if system has telemetry monitoring.**
 - 2. Saves the company and rate payers money. If TWSI had to have a person inspect every site every 14 days it would require the utility to hire several more employees and incur the cost of providing them with trucks and other equipment. Telemetry monitoring reduces site visits to once a month which can be handled with current TWSI staff and equipment.**
 - 3. Ensures systems are operating the way they should with 24/7/365 instant feedback on the performance of any system.**
 - 4. Allows the utility to address potential issues with a system before they become actual issues – preventing potential permit violations and other hazards from occurring.**
 - 5. Allows remote operations of systems to assist with troubleshooting and analysis of system operations.**
55. Explain why TWSI purchases telemetry packages from Adenus Technology instead of directly from the vendor. Identify any cost savings TWSI has realized by purchasing the packages from Adenus Technology.

RESPONSE:

Adenus Technology is the vendor for the telemetry packages. Adenus Technology builds the panels which operate the HawkMS software.

56. Does Adenus Technologies furnish telemetry packages to other customers? If so, provide documentation detailing the charges assessed to other customers for such packages.

RESPONSE:

Yes. See Exhibit 2-56.

REVENUE:

57. Please explain why the Sewer Subscription Contract is not an attachment to TWSI's proposed tariff.

RESPONSE:

It was an oversight however, the contract is currently being revised. The revised contract will be filed in the docket when available.

58. Please explain why TWSI considers Sewer Access Fees as non-utility revenue?

RESPONSE:

TWSI considers Sewer Access Fees (Empty Lot Fees) regulated revenue. TWSI does not consider this as non-utility revenue.

CAPACITY FEE:

59. Once capacity has been secured with the \$6,000 Capacity Fee for an established system, is that customer established with a billing record in the TWSI billing system and does this start the billing of the annual Capacity Reservation Fee (previously termed "Sewer Access Fee") until connected to the wastewater system? Please explain.

RESPONSE:

Yes. Once service is established to an empty lot (unimproved lot) the owner of that lot will be billed annually for the \$120 Capacity Reservation Fee. Once connected to the sewer system the customer will execute a sewer service agreement and billing will convert to the monthly rate corresponding to their type and level of service.

60. Where certain components (drip fields, fencing, etc.) are not initially completed according to the engineering and design plans which support the TDEC approved permit before being placed into service by the Utility, or systems that are not constructed large enough to meet the gpd capacity according to the design plan and TDEC's issued permit, please answer the following:

- a) Does the Developer pay the Utility the difference to complete the system at a later date? If not, please explain why the Developer would not pay and why TWSI would accept a system not fully built in accordance with the approved design plans.

RESPONSE:

It depends on the situation. In some cases the development is planned to happen in stages over a period of time. In these situations the treatment system may be completely installed (ie. the treatment and capacity) but the disposal capacity is

installed according to when lots are platted. For instance, if a developer looked to develop 200 lots, but looked to develop them in 40 lot phases, TWSI may install the components necessary to serve all 200 lots (treatment and capacity), however drip might only be installed to service each phase as the lots are platted.

In situations where only part of the treatment system is installed, if the developer is still in business they would be looked to to cover the completion of the system.

- b) If the system is not complete and funds have not been received when the Utility accepts the system, has the Utility received contracts signed by all three parties (Utility, Builder, Developer) that the system is to be completed at a later date and who will be providing funds for completion. Provide copies of all such contracts for 2011 through 2016.

RESPONSE:

There are two scenarios here; one where TWSI is responsible for the construction of a system and another where someone other than TWSI is responsible for constructing the system. When TWSI is responsible, payments must be made during the construction of the system or else TWSI will not accept and operate the system. Where a third party is responsible for construction TWSI requires construction performance bonds in the event the system is not completed by the third party, TWSI can call the bond to provide the funds to complete the system.

In many cases, while the treatment facilities are constructed, not all the drip piping is installed as that is typically done by phases as lots are platted. In this case, if a developer does not pay for the drip piping to be installed the final plat will not be signed and development of that plat cannot begin.

61. Section 4 of the proposed tariff states that the Capital Capacity Fee is for Williamson County - \$6,000 per equivalent residential unit "*as required by Williamson County Regulation*".

- a) Please provide a copy of the Williamson County Regulation referred to in the proposed tariff
- b) Define equivalent residential unit.

RESPONSE:

This question has been withdrawn by the Commission.

62. If a control panel is replaced by Adenus Technologies, is there any due diligence completed to insure Adenus Technologies offers the "best price"? Please explain.

RESPONSE:

No. TWSI is unaware of any other company that provides a comparable panel and

software package. The panels are an integral part of the overall operation of the wastewater treatment system especially with regards to the telemetry monitoring and the integration of the HawkMS software which is the most technically advanced programming available for decentralized wastewater systems in the country.

RESPECTFULLY SUBMITTED,

Jeff Riden (BPR No. 32769)

SEWER SERVICE AGREEMENT

Tennessee Wastewater Systems, Inc.
P. O. Box 22771
Knoxville, TN 37933-0771

This agreement entered into between Tennessee Wastewater Systems, Inc., a Tennessee Corporation, hereinafter called "TWSI" and _____
hereinafter called "customer".
(Print Name)

WITNESSETH

Whereas, customer desires to purchase sewer services from TWSI and to enter into a sewer service agreement and TWSI desires to provide sewer services. Now therefore, in consideration of the mutual covenants, promises and agreements herein contained, it is hereby understood and agreed by the parties hereto as follows: In compliance with laws and environmental regulations set forth by the State of Tennessee, TWSI shall provide sewer services to the customer's property located at the following address:

2251 Upper Middle Creek Rd. Sevierville TN 37876
Address City State and Zip Code
25 9 16 Summit View Lodge 7-12-2010
Lot # # of Bedrooms Maximum # Cabin Will Sleep Cabin Name Date of Connection/Closing

The customer shall provide an address in which monthly bills are to be sent:

Address City State and Zip Code

Home Telephone Number Office Telephone Number Cell Phone Number

Email Address Fax Number

The customer agrees to grant to TWSI, its successors and assigns, a perpetual easement in, over, under and upon the above described land, with the right to erect, construct, install and maintain sewer system components. The customer shall be responsible for operation and repair of the outfall line to the septic tank and all plumbing in structures on the property described above. Customer further agrees to grant TWSI permission to enter the property for any reason connected with the provision or removal of sewer service or collection thereof. Customer agrees that should he/she use the system in such a manner to abuse or damage any components of the system, customer must bear the expense to repair or replace the same in accordance with the plans of TWSI. TWSI shall be responsible for operation and repair of all components of the sewer system starting at the septic tank as described above and all elements of the SIEG (septic tank effluent gravity) or STEP (septic tank effluent pumping) system.

The customer agrees to pay for sewer service in accordance with authorized rate schedules present and future and to use same in accordance with applicable rules and regulations that have been provided. The time and place of payment will be as set forth by TWSI. Customer agrees to allow TWSI to install and/or have access to the cut-off valve on customer's water service line and to use such cut-off valve in the event customer fails to pay sewer charges. In addition to the cut-off of water service, failure of the customer to pay sewer service charges duly imposed shall result in the imposition of penalties set forth by TWSI's current schedule of rates. If TWSI employs a collection agency to collect any amount not paid by customer, customer shall pay all of TWSI's costs to employ the collection agency. If any suit, action or proceeding is instituted by TWSI to collect any amount not paid by customer, customer shall pay all of TWSI's reasonable attorney fees and collection costs whether incurred before, during or after a trial, or before, during or after an appeal.

The customer agrees not to exceed the maximum number of persons the rental property will sleep listed above. The interceptor tank size at this commercial rental property shall be based on 125 gpd per person. An escalating TRA established commercial rate shall apply to the larger rental properties. Should excess loads above those listed in the Sewer Service Agreement occur, customer agrees that TWSI may cut-off water and sewer service at said commercial rental property.

This agreement shall remain in effect for the duration of time that the customer owns, resides upon or rents the above described property. When circumstances no longer exist, customer agrees to provide notice to TWSI within thirty days of such change in circumstances.

IN WITNESS THEREOF, we have executed this agreement this 28 day of July, 2010.

SUMMIT VIEW LODGE - PIGEON FORGE, TENNESSEE

9 BEDROOMS - 4 LEVELS

*click on any image below to view the entire gallery

Summit View Lodge is luxuriously appointed in every way imaginable with five large private master suites featuring seven bathrooms and 4 balconies.

The views of Summit View are what will capture the attention of each and every guest. They are truly beyond

Cabin Amenities:

- 9 Bedroom(s)
- 7 Bathroom(s)
- Sleeps 28
- Fireplace
- Phone
- Air Conditioning
- Stereo
- Satellite TV
- VCR
- Hot Tub or Jacuzzi
- Microwave
- Dishwasher
- Full kitchen
- Washer
- Dryer
- No Smoking
- Linens provided
- Utensils Provided

Cabin Location:

- Mountains

Additional Location Information

- Smokin' View of the mountains!
- Minutes form Great Smoky Mountain National Park
- Only 45 minutes from the Knoxville airport
- Easy access from Interstate 40

Rates:

- Please contact us or view our website for more information.

Activities:

- Snow Skiing
- Snow Boarding
- Ice Skating
- Hiking
- Biking
- Fishing
- Nature Trails
- National Parks
- Horseback Riding
- Golf
- Tennis
- Shopping
- Swimming
- Water Skiing
- Boating

CONTRACT BOND
TENNESSEE STATE BUILDING COMMISSION STANDARD FORM

Bond No. 1099762

Know all men by these presents: that we

Tennessee Wastewater Systems, Inc.
851 Aviation Parkway
Smyrna, Tennessee 37167

(hereinafter called the "Principal") and
Lexon Insurance Company
10002 Shelbyville Road, Suite 100
Louisville, KY 40223

(hereinafter called the "Surety") do hereby acknowledge ourselves indebted and securely bound and held unto

STATE OF TENNESSEE
Department of General Services

(hereinafter called the "Owner"), and in the penal sum of

One Million One Hundred Eighty Thousand and no/100ths Dollars (\$1,180,000.00)

good and lawful money of the United States of America, for the use and benefit of those entitled thereto, for the payment of which, well and truly to be made, we bind ourselves, our heirs, our administrators, executors, successors, and assigns, jointly and severally, firmly by these presents.

But the condition of the foregoing obligation or bond is this:

Whereas, the Owner has engaged the principal for the sum of

One Million One Hundred Eighty Thousand and no/100ths Dollars (\$1,180,000.00)

to complete the Work of the project titled:

Utility Grant
Sewer System Upgrade
Paris Landing State Park
Buchanan, Henry County, Tennessee
SBC Project No. 126/075-01-2009-01

as more fully appears in a written agreement or contract bearing the date of

a copy of which said agreement or contract is by reference hereby made a part hereof, as fully and to the same extent as if copied at length herein, and it is the desire of the Owner that the Principal shall assure all undertakings under said agreement or contract and shall assure and protect all laborers and furnishers of material on said Work both as provided by Tennessee Code Annotated Sections 4-15-102 (f)(2) and 12-4-201 through 12-4-206, and any and all amendments thereto, and shall assure the prompt payment of claims as provided by Tennessee Code Annotated Sections 12-4-207 through 12-4-208, and any and all amendments thereto. The Principal shall also comply with provisions of Tennessee Code Annotated Sections 12-4-401 through 12-4-415, and any and all amendments thereto, pertaining to the payment of the prevailing wage rate.

006113-1

Now, therefore, if the Principal shall fully and faithfully perform all undertakings and obligations under the contract hereinbefore referred to and shall fully indemnify and hold harmless the Owner from all costs and damage whatsoever which it may suffer by reason of any failure on the part of the Principal to do so, and shall fully reimburse and repay the Owner any and all outlay and expense which it may incur in making good any such default, and shall fully pay for all of the labor, material and work used by the Principal and any immediate or remote sub-contractor or furnisher of material under him in the performance of said contract, in lawful money of the United States, as the same shall become due, then this obligation or bond shall be null and void, otherwise to remain in full force and effect.

And for value received, it is hereby stipulated and agreed that no change, extension of time, alteration or addition to the terms of the contract or to the Work to be performed thereunder or to the specifications accompanying the same shall in any wise affect the obligation under this bond, and notice is hereby waived of any such change, extension of time, alteration or addition to the terms of the contract or to the Work or to the specifications.

In witness whereof the Principal has hereunto affixed its signature and Surety has hereunto caused to be affixed its corporate signature and seal, by its duly authorized officers, on this _____ day of _____, 20____.

Executed in 6 (Six) counterparts.

SBC Project No. 126/075-01-2009-01

Surety Company issuing bond shall be licensed to transact business in State of Tennessee by Tennessee Department of Commerce and Insurance. Bonds shall have certified and current Power-of-Attorney for the Surety's Attorney-in-Fact attached. Attorney-in-fact who executes bond on behalf of Surety shall be licensed by and a resident of State of Tennessee, and shall affix license number to bond; or, countersignature by a licensed agent who is a resident of State of Tennessee, and the agent's license number, shall be affixed to the bond in addition to the signature of the Attorney-in-Fact

006113-1

Lexon Insurance Company

KNOW ALL MEN BY THESE PRESENTS, that **LEXON INSURANCE COMPANY**, a Texas Corporation, with its principal office in Louisville, Kentucky, does hereby constitute and appoint:

Brook T. Smith, Raymond M. Hundley, Jason D. Cromwell, James H. Martin, Barbara Duncan,*****

Sandra L. Fusinetti, Mark A. Guidry, Jill Kemp, Jackie C. Koestel, Lynnette Long, Amy Meredith, Deborah Neichter, Sheryon Quinn, Dawson West, Bonnie J. Wortham

its true and lawful Attorney(s)-In-Fact to make, execute, seal and deliver for, and on its behalf as surety, any and all bonds, undertakings or other writings obligatory in nature of a bond.

This authority is made under and by the authority of a resolution which was passed by the Board of Directors of **LEXON INSURANCE COMPANY** on the 1st day of July, 2003 as follows:

Resolved, that the President of the Company is hereby authorized to appoint and empower any representative of the Company or other person or persons as Attorney-In-Fact to execute on behalf of the Company any bonds, undertakings, policies, contracts of indemnity or other writings obligatory in nature of a bond not to exceed \$4,000,000.00 Four Million dollars, which the Company might execute through its duly elected officers, and affix the seal of the Company thereto. Any said execution of such documents by an Attorney-In-Fact shall be as binding upon the Company as if they had been duly executed and acknowledged by the regularly elected officers of the Company. Any Attorney-In-Fact, so appointed, may be removed for good cause and the authority so granted may be revoked as specified in the Power of Attorney.

Resolved, that the signature of the President and the seal of the Company may be affixed by facsimile on any power of attorney granted, and the signature of the Assistant Secretary, and the seal of the Company may be affixed by facsimile to any certificate of any such power and any such power or certificate bearing such facsimile signature and seal shall be valid and binding on the Company. Any such power so executed and sealed and certificate so executed and sealed shall, with respect to any bond of undertaking to which it is attached, continue to be valid and binding on the Company.

IN WITNESS THEREOF, **LEXON INSURANCE COMPANY** has caused this instrument to be signed by its President, and its Corporate Seal to be affixed this 21st day of September, 2009.

LEXON INSURANCE COMPANY

BY _____

David E. Campbell
President

ACKNOWLEDGEMENT

On this 21st day of September, 2009, before me, personally came David E. Campbell to me known, who be duly sworn, did depose and say that he is the President of **LEXON INSURANCE COMPANY**, the corporation described in and which executed the above instrument; that he executed said instrument on behalf of the corporation by authority of his office under the By-laws of said corporation.
