Enclosures

cc: Wayne Irvin, Esq. (by hand delivery)

REQUEST:

Refer to Page 14 of Mr. Waller's testimony. Please identify the 124 Tennessee customers that Atmos estimates would be using the Align system. In addition, please describe the current billing system for these 124 customers and explain how the Align system will enhance their billing.

RESPONSE:

The Company now estimates 125 Tennessee customers would utilize the Align system. A list is attached as Confidential Attachment 1.

The Align Pipe project is a replacement for the GTMS billing application used for all of our Transportation and certain of our Industrial Sales customers whose rate or billing configuration is too complex for our SAP Billing system. The Pipe module of Align provides functionality including contract pricing, scheduling of nominations, allocations and billing. This critical functionality is not present in our SAP billing system nor is that system intended or capable of billing either our Transportation or complex Sales customers. Additionally, Align Pipe replaces an existing 25 year old software application used to manage and bill transportation and large volume sales customers. The existing software has very limited remaining life because it is dependent upon old and no longer supported technologies from the vendor as well as ever increasing cyber security vulnerabilities.

The Pipe module of Align is the new product that was developed to replace the aging software application. The project cost is allocated based upon transportation and sales volumes for applicable divisions/jurisdictions. The initial users of the system were Atmos Pipeline Texas and Mid-Tex. The Louisiana business unit has since been added to the system with the remaining divisions being brought on-line over time.

REQUEST:

Refer to the "2017 Revenue Requirement Schedules" spreadsheet that was included with the Company's filing. Specifically refer to the "WP7-1" and "WP7-2" tabs of this spreadsheet. Please provide a comparison for each component of rate base, with and without the Company's "AEAM" and "ALGN" allocators, using as a base the allocation factor calculation methodologies adopted in the rate case.

RESPONSE:

Please see Attachment 1 showing AEAM and ALGN allocators removed and these assets being allocated per SSU allocation rates.

REQUEST:

Refer to the "2017 Revenue Requirement Schedules" spreadsheet that was included with the Company's filing. Specifically refer to the "2RB" tab of this spreadsheet. Finally, refer to Cell "I24" which contains the Company's Rate Base deduction of $2,927, 113 for "Adjustment for Capitalized Incentive Compensation." Explain why the Company omits any amortization of this adjustment from the Income Statement.

RESPONSE:

The amount referenced in the request includes the appropriate amount of amortization for the rate base disallowance. The amount is linked to and also appears on Schedule 7 line 25. The source is WP 7-8, which is linked to the primary source "Tennessee Minimum Filing Requirement #38". The amount referenced is the sum of three numbers itemized below (and shown on WP 7-8):

Item	Source (Tab)	Amount
Amount estimated for Test Year Ending 5/31/18 (no amortization)	"Disallowance Amort" cell C13	$908,913
Amount estimated for Test Year Ending 5/31/17 - (Incl. 1 yr amort).	"FY15 Disallowance Amort" cell C14	$856,138
Actual amount for Test Year Ending 5/31/16 - (Incl. 2 yrs amort).	"2016 True up Disallowance Amort" cell C15	$1,162,062
Total		**$2,927,113**

Because this is a ratemaking adjustment specific to the Tennessee jurisdiction, the Company has not made entries consistent with the above amounts or amortization of same in its general ledger. As the Company amortizes the rate base disallowances shown above (a theoretical debit to plant) it would be inappropriate to recognize a ratemaking adjustment for the offsetting theoretical credit to amortization expense because the Company did not recognize the initial theoretical debit to amortization expense at the time of the original disallowance.

REQUEST:

Refer to the "Tennessee Minimum Filing Requirement #38" spreadsheet that was included with the Company's filing. Specifically refer to the "FY15 Incentive Comp" tab of this spreadsheet. Finally, refer to Cells "L 7, L13, and L22" which contain the "Allocated Capital to Div 093" of $442,311 and Cells "G27, G33" which contain the totals for the capitalized incentive compensation subaccounts for Div 091. Explain why the Company fails to include any FYE 2015 amounts in WP7-8 of the "2017 Revenue Requirement Schedules" spreadsheet that was included with the Company's filing.

RESPONSE:

The test years appropriate for ratemaking under the Company's ARM tariff are the 12 month periods ending May 31 of each year. The Company, in this filing, has made ratemaking adjustments to remove capitalized incentive compensation for each test year since the ARM tariff was approved by the TRA in Docket No. 14-00146 (which is also the Company's most recent rate case). The first such test year was the 12 month period ending May 31, 2016 (which includes the last 4 months of FY15).

REQUEST:

Refer to the "Tennessee Minimum Filing Requirement #38" spreadsheet that was included with the Company's filing. Specifically refer to the "2016 True up Disallowance Amort" tab of this spreadsheet. Finally, refer to Cells "C4, *CS"* which contains the "Weighted Average Allocated Depreciation Expense" of $11,498,891and the "Weighted Average Allocated Gross Plant" of $476,544,061. The source from both cells refers to a separate spreadsheet titled "Settlement Model FINAL - 2015 revenue requirement schedules - True-Up.xis". Please provide a copy of this spreadsheet. In addition, we would request that the Company always include referenced spreadsheets from prior dockets along with its filings in future dockets.

RESPONSE:

Please see Attachment 1.
