REQUEST:

Refer to Schedule 3o of the Company's filing captioned as "KMD FYI 7 CapEx Projected Budget Final". Specifically refer to the annual budget details for the "093DIV Tennessee Division" on this spreadsheet totaling $44,465,775. Please provide a narrative description of the cost for the individual projects included in this total along with a justification for their need.

RESPONSE:

Please see the Company's response to CPAD DR No. 1-26.

REQUEST:

Refer to Schedule 3o of the Company's filing captioned as "KMD FYI 7 CapEx Projected Budget Final". Specifically refer to the annual budget details for the "093DIV Tennessee Division" on this schedule totaling $44,465,775. Finally refer to the budget details for System Improvement and System Integrity totaling $18,830,898 and $10,045,254 respectively. Does the Company consider these particular costs to be extraordinary or normal capital expenditures that will also be required in future periods?

RESPONSE:

The Company considers the budgeted FY17 System Improvement ($18,830,898) and System Integrity ($10,045,254) capital expenditures to represent recurring capital expenditures. In FY 2018, the Company has planned $13,579,000 of system improvement capital expenditures and $10,581,000 of system integrity work, which further confirms the recurring capital expenditure trend. Moreover, at the Company's current pace of system infrastructure renewal, necessary replacements in order to continue to provide safe and reliable service will continue for the foreseeable future. In addition, compliance with proposed changes to Part 192, Code of Federal Regulations regarding transmission pipelines will likely drive additional capital and O&M spending. The full impact of these new regulations will not be fully understood until the rulemaking process is finalized.

REQUEST:

Refer to Schedule 3o of the Company's filing captioned as "KMD FYI 7 CapEx Projected Budget Final". Specifically refer to the annual budget details for the "093DIV Tennessee Division" on this schedule totaling $44,465,775. Finally refer to the budget details for Public Improvements totaling $5,805,938. In the 2016 ARM budget filing, this category was only budgeted at $2,517,657. Please provide a narrative explanation for this escalation.

RESPONSE:

The escalation in Public Improvements spending from 2016 to 2017 is primarily due to the Tennessee Department of Transportation (TDOT) widening of Duplex Road in Spring Hill, TN. The Company is relocating approximately 18,000 feet of pipe along Duplex Road. The project was budgeted for $2,628,146 in 2017. As of February 28 2017, the Company has spent $2,613,999.
