Sharla Dillon Dockets Manager Tennessee Public Utility Commission 500 Deaderick Street, 4<sup>th</sup> Floor Nashville, TN 37242

RE: Atmos Energy Corporation – Response to Order Opening Investigation

TPUC Docket No. 18-<u>00034</u>

Dear Ms. Dillon:

Enclosed for filing is Response of Atmos Energy Corporation to the Commission's Order Opening an Investigation and Requiring Deferred Accounting Treatment, along with our check in the amount of \$25.00 for the filing fee.

In accordance with TPUC rules, an original and four copies are enclosed, along with the electronic PDF version for the TPUC docket website. I have also provided a live Excel version of Exhibit A for use by TPUC staff.

Best regards.

Sincerely,

A. Scott Ross

### IN THE TENNESSEE PUBLIC UTILITY COMMISSION AT NASHVILLE, TENNESSEE

IN RE:	)	
TENNESSEE PUBLIC UTILITY	)	<b>Docket No. 18-</b> 00034
COMMISSION INVESTIGATION OF	)	
IMPACTS OF FEDERAL TAX REFORM	)	
ON THE PUBLIC UTILITY REVENUE	)	
REQUIREMENTS	)	

### RESPONSE OF ATMOS ENERGY CORPORATION TO THE COMMISSION'S ORDER OPENING AN INVESTIGATION AND REQUIRING DEFERRED ACCOUNTING TREATMENT

Pursuant to the Commission's February 6, 2018 Order, Atmos Energy Corporation ("Atmos Energy" or the "Company") respectfully submits this response (1) describing the impacts of the Tax Cuts and Jobs Act ("TCJA") on Atmos Energy's financial operations and providing an estimate of excess accumulated deferred income taxes ("ADIT"); (2) explaining how the effects of the TCJA will be reflected in the Company's rates and confirming that it is tracking, in a deferred account, the portion of its revenue representing the difference between the cost of service approved by the Commission in the Company's most recent ARM docket (*see* Docket No. 17-00012) and the cost of service that would have resulted had the provision for federal income taxes been based on 21% rather than 35%; and (3) proposing a method to reduce Atmos Energy's rates to reflect some of the TCJA's impacts more quickly than would be reflected through the use of the Company's Annual Review Mechanism ("ARM").

#### I. Executive Summary

As soon as the TCJA was signed into law, Atmos Energy began taking necessary action to value and record the TCJA's impacts on the Company's financial operations. This included revaluing the Company's ADIT to reflect that Atmos Energy will not have to pay taxes at the level anticipated when those funds were collected from customers. This process also included taking into account the tax rate change when calculating the most recently approved cost of service.

In addition, Atmos Energy immediately began the process of discerning potential paths to incorporate the savings into customer rates such that customers may see the benefits of the TCJA as soon as possible in a way that comports with the rates and regulatory constructs in each of the eight states in which the Company operates. As described further below, because of the use of a comprehensive ARM in Tennessee rather than reliance on traditional general rate cases, these benefits will be fully incorporated into customer rates without any additional action necessary from the Commission. However, the Company proposes a means to allow the Commission to lower existing rates to reflect the tax change from the TCJA more quickly, should it so desire.

This filing describes the TCJA's impact on the Company's financial operations, including the determination of an estimated \$29.3 million of excess ADIT associated with the Company's operations in Tennessee. It includes (1) a calculation of the difference between the cost of service approved by the Commission in the Company's most recent ARM and the cost of service that would have resulted had the provision for federal income taxes been based on 21% rather than 35% and (2) an estimate of the excess deferred tax liability resulting from the TCJA.

### II. The TCJA's Impact on Atmos Energy's Financial Operations

The impacts to Atmos Energy's financial operations are best understood by bifurcating the impacts between those that occurred upon enactment of the TCJA and those that will occur over the long term in each subsequent quarter and fiscal year.

#### Financial Impact upon Enactment

Reduction in the federal corporate tax rate required the Company to revalue its Accumulated Deferred Income Taxes ("ADIT") using the new statutory tax rate. Deferred taxes represent taxes due or payable in the future when items of income and expense are recognized for tax purposes in a period different than they are recognized for financial reporting purposes. ADIT simply represents the accumulated tax for all items deferred to future periods. ADIT is accrued to the balance sheet at the currently enacted statutory tax rate; thus, a lowering of the statutory tax rate results in an excess of ADIT accrued in prior periods, or excess deferred taxes.

These excess deferred taxes must be removed from the balance of the Company's ADIT account. This was done in two ways. Excess deferred taxes associated with regulated operations were removed by establishing a new regulatory liability for refund to customers. Excess deferred taxes associated with items that were not included in the Company's rate base or for items that were never reflected in the Company's cost of service were recognized as a onetime non-cash impact to the Company's fiscal year ended September 30, 2018, earnings.

In addition to revaluing ADIT, the Company will take into account the tax rate change when calculating current year earnings. Atmos Energy is a September 30th fiscal year taxpayer, complicating the calculation. Section 15 of the Internal Revenue Code ("IRC") requires the Company to use a blended tax rate in the year of enactment if the enactment date does not fall on the first day of the Company's fiscal year. Since this is the case for Atmos Energy, taxes calculated

for the Company's fiscal year ending September 30, 2018, will use a blended federal statutory tax rate. This rate must be used for current year earnings and for the portion of ADIT expected to reverse during the current fiscal year.<sup>1</sup>

In addition, since the TCJA was enacted during the Company's first quarter, only three months of actual results existed at the time of the calculation of current year activity. Estimates for activity occurring during the remainder of the year were used in calculating the impact to fiscal year ended September 30, 2018. While the Company believes these estimates are reasonable, actual results recorded during the fiscal year likely will require adjustments to the Company's revaluation of ADIT and the resulting regulatory liability amounts.

The implementation of the TCJA had no immediate impact on cash flow or the overall balance of liabilities included in establishing customer rates. The combined total of the revalued ADIT balance and the regulatory liability established to refund excess deferred taxes equals the total pre-TCJA ADIT liability (the amount normally recorded as a decrease to rate base in Company filings).

<sup>&</sup>lt;sup>1</sup> Exhibit A calculates the annual impact of the tax rate change from 35% to 21% in order to strike new rates based on the lower cost of service. Those new rates will ultimately be effective for service rendered on and after January 1, 2018 through a combination of deferred accounting and/or implementation of the Company's proposal described in Section IV below and thus it is appropriate to use 21% in calculating cost of service.

#### Financial Impact Post-Enactment (Excess ADIT)

Beginning October 1, 2018, the IRC requirement to use a blended rate will no longer be applicable, and the Company will utilize a federal statutory rate of 21% to calculate current year earnings.

The regulatory liability recorded upon enactment of the TCJA for excess deferred taxes will be returned to customers through a reduction in rates as part of the Company's next forward-looking ARM filing. The timing of that filing, which would have normally been filed February 1, 2018 pursuant to the Company's ARM tariff, is pending the outcome of Docket No. 17-00091. The amount of excess ADIT is currently estimated at \$29.3 million. That amount has been recognized as a deferred liability on the Company's books. The precise amount of excess ADIT will not be known until sometime in November 2018, after the end of the Company's fiscal year; however, the estimate is not expected to change materially. The Company and the Commission will have to determine how to amortize this regulatory liability back to customers in a manner that conforms to the requirements of the IRC.

The IRC specifies how the regulatory liability for certain excess ADIT should be amortized to customers. Failure to follow the IRC amortization procedures would have adverse tax consequences for the Company, which would lead to an increase in the Company's cost of service and a corresponding increase to customer rates. The IRC requires that "protected" excess ADIT be amortized back to customers using the Average Rate Assumption Method ("ARAM"), unless the Company's records do not contain the necessary data to use this method, in which case the IRC prescribes the use of the Reverse South Georgia method. Under this method a taxpayer computes the excess tax reserve on all public utility property included in the plant account based on the weighted average life or composite rate used to compute depreciation for regulatory purposes, then

reduces the excess tax reserve ratably over the remaining regulatory life of the property. At a high level, the IRC-prescribed amortization methodologies amortize the excess ADIT back over the life of the underlying property that gave rise to the excess ADIT.

A notable distinction between the two methodologies is that the ARAM methodology is applicable only to those excess ADIT balances which arise due to book-to-tax depreciation differences, i.e. method and life of depreciation differences. The excess ADIT associated with depreciation is deemed to be "protected" by the normalization rules which require the use of the ARAM for amortization. Excess ADIT balances associated with other plant related differences are not protected and the use of the ARAM to amortize the other plant related excess ADIT balances is not required. The Reverse South Georgia method differs from ARAM in that it applies to excess ADIT associated with all public utility property and not just that associated with depreciation. Therefore, the use of the Reverse South Georgia method results in excess ADIT balances for all public utility property being protected and subject to the amortization as computed under the method.

The Company maintains its accounting records in accordance with FERC requirements and Generally Accepted Accounting Principles. Book depreciation is computed using rates approved in the jurisdictions the Company operates in. To use the ARAM, the Company must calculate and track accumulated depreciation for assets by vintage. Since this methodology does not align with FERC requirements applicable to Atmos Energy or the methodology required in Tennessee, the Company has determined that it does not possess the appropriate records necessary to utilize the ARAM. Instead, the Reverse South Georgia method must be used, which is defined as the "alternative method" in the TCJA.<sup>2</sup> At this time, the Company is working with consultants and its

<sup>2</sup> See TCJA §1651(d)(2)-(3).

- 6 -

auditors to determine the time required to make any necessary modifications to the Company's tax and plant accounting systems in order to calculate amortization using the Reverse South Georgia method. Until such modifications are complete and the Company is able to perform a full and detailed computation of amortization, the best estimate the Company can provide is an amortization period of 24 years.

The enactment of the TCJA is expected to reduce Company cash flows from operations primarily due to 1) the collection of taxes at a lower rate and 2) the return of regulatory liabilities established in response to the enactment of the TCJA and regulatory activities to utility customers. Atmos Energy intends to externally finance this reduction in operating cash flow in a balanced fashion, so as to maintain an equity capitalization ratio ranging from 50% to 60%, and preserve its current credit ratings. Atmos Energy currently anticipates this incremental external financing need will range from \$500 million to \$600 million through its fiscal year 2022.

Recognizing the TCJA's impact on cash flows and the loss of bonus depreciation treatment, on January 19, 2018, Moody's Investors Service ("Moody's") revised downward its outlooks of 25 US regulated utilities. Atmos Energy was not one of those 25 companies, primarily due to the Company's strong credit metrics. Atmos Energy has strengthened its balance sheet by building its equity as it continues through a period of increasing capital investment to maintain its safe and reliable system. Therefore, because the Company intends to maintain its capital structure in the above-referenced range, Atmos Energy does not expect financial impacts due to changes in its credit rating in the foreseeable future, assuming supportive regulatory treatment as it navigates the challenges created by the TCJA.

### III. How the Effects of the TCJA will be Reflected in Atmos Energy's Rates and Tracking of a Deferred Regulatory Liability

Taxes, like all other prudently incurred costs, are passed through to customers through the Company's rates. Atmos Energy is committed to ensuring its customers receive full benefit of reduced cost of service resulting from the TCJA. Atmos Energy's rates in Tennessee are set every year pursuant to its ARM tariff.

Due to the nature of the ARM, which contains a reconciliation mechanism, all of the benefits of the tax change resulting from the TCJA will automatically flow through to the Company's customers in time. Essentially, the reconciliation mechanism results in a process of annual "true-ups," in which over-collections and/or under-collections are adjusted to ensure that the Company recovers no more and no less revenue than is required to earn its allowed rate of return. Since the tax changes resulting from the TCJA reduce Atmos Energy's overall tax expense, the Company's cost of service is also reduced. That in turn lowers the amount of tax expense that needs to be recovered in the Company's currently effective rates. Accordingly, at the next ARM reconciliation filing, the Company's rates will be adjusted to reflect any current over-collection of tax expense caused by the TCJA that has and will occur between January 1, 2018 and either the implementation of new forward-looking rates filed pursuant to the ARM tariff, or Commission acceptance of the Company's proposal outlined in Section IV below.

Pursuant to the Commission's Order of February 6, 2018, the Company has been tracking the portion of its revenue representing the difference between the cost of service approved by the Commission in its most recent rate filing and the cost of service that would have resulted had the provision for federal income taxes been based on 21% rather than 35% in a deferred account. Exhibit A calculates the difference between the currently effective rates approved by the Commission and the rates that would have resulted had the provision for federal income taxes in

those rates been based on 21% rather than 35%. On an annual basis, the over-collection caused by the difference in rates is estimated to be \$4.2 million, which is also shown on Exhibit A. Through February 28, 2018, the Company has deferred \$998,631.

### IV. Proposal to Reflect Some of the Effects of the TCJA in Rates More Quickly

Rather than waiting for the next ARM forward-looking filing to provide customers the benefit of the TCJA's lower tax rates, the Company proposes to lower its rates sooner. Approximately five business days after the issuance of a Commission Order, the Company could lower its currently effective rates to those shown on Exhibit A. This would lower the gas bills of Atmos Energy's customers going forward and immediately provide them the benefits of the tax change. Upon the implementation of these rates, there would be no difference between the Company's new rates and the rates resulting from the TCJA and therefore no need to continue tracking and deferring the difference.

For over-collections of tax expense prior to the issuance of such a Commission Order, those amounts have been recorded in the deferred account. As part of the next reconciliation filing, the dollar-amount in the deferred account would be reflected as an over-collection of tax expense when reconciling the Company's cost of service for that time period.

#### V. Conclusion

As described above, the tax changes resulting from the TCJA result in excess ADIT and a reduction in ongoing tax expense. The Company is tracking both, consistent with the Commission's order of February 6, 2018. These benefits will flow through to the Company's customers automatically under the normal operation of the forward-looking filing and the reconciliation of the Company's ARM, without any additional action by the Commission. However, should the Commission wish to expedite the reduction in rates resulting from the TCJA's

reduction in income tax expense, the Company proposes that the Commission issue an order approving the lower rates outlined in Exhibit A, effective five days after the Commission's order. This would immediately reflect the reduced tax expense in the Company's rates going forward; excess ADIT and prior over-collections would be incorporated into rates within the context of the next forward-looking filing and next annual reconciliation filing, respectively. Under either option, Atmos Energy's customers ultimately will receive the full benefits of the reduction in the Company's cost of service resulting from the TCJA from January 1, 2018, forward.

Respectfully submitted,
