RE: Docket 19-00028

Dear Sir or Madam,

I wanted to bring to your attention a matter that greatly effects homeowners residing in Chalet Village North with regards to a proposed massive and aggressive water base rate charge from Tennessee Water.

As you are hopefully aware, the area was tremendously affected by the fires of November 2016. There has already been a great deal of hardship and toil trying to rebuild in the area. Many of my fellow residents have been unable to rebuild or move forward with rebuilding due to insurance issues and the extreme cost of a rebuild. To add this base rate phased increase to those individuals who have supported the community by rebuilding seems unreasonably unjust, outrageous and unfair.

It is my understanding the Water Company should have reinsurance and other methods to recover their losses. To put this additional expense on this small group of homeowners who with their own dollars also support the community is a gross injustice. If an increase is warranted it should be levied against the entire service area and not single out the victims of the fire who have already gone through tremendous emotional and financial times. This selective phased increase not only further divides the community but adds insult to injury. I implore you to consider your community and constituents when reviewing this retched and vile increase.

Regards,
Meg Champion
Wiley Oakley, CV North.
