RE: Docket No. 19-00030 – *Compliance and Status Report*

Dear Chairman Hill,

The Commission directed Tennessee Wastewater Systems, Inc. ("TWSI") to report in this docket the status of providing wastewater service to the Chelsea's Way Subdivision and the status of compliance with the filing requirements contained in the Commission's order in this docket.

At the time of this filing, the wastewater system is complete except for the installation of the electric service. Electric service is expected to be installed within the next sixty (60) days. Within the next ninety (90) days, TWSI expects to close on the system which will include the signing of the final plat, confirming the costs related to the collection system and land conveyed to the utility, and collecting the federal income tax owed by the developer on the Contributions In Aid of Construction. The documentation representing these outstanding items will be filed in this docket per the requirements outlined in the Commission's order.

Lastly, as required by the Commission's order, the as-built plant and final State Operating Permit issued by TDEC are being filed along with this report.

Please let me know if you have any questions about this report or any other concerns about the status of this project.

Kind regards,

Jeff Ridsen  
General Counsel
