**TENNESSEE AMERICAN WATER COMPANY**
**DOCKET NO. 19-00031**
**SECOND DISCOVERY REQUEST OF THE**
**CONSUMER ADVOCATE AND PROTECTION DIVISION**

**Responsible Witness: Elaine K. Chambers**

**Question:**

19. Respond to the following concerning the 2018 CapRider Cost Detail file, specifically the AFUDC Equity and Debt charge types:

a. The "GL account column" includes a reference to either account 101 or 106. Further, for a given work order, there is also a reference to account 107 in the "external GL account" column. Provide an explanation differentiating the reference to different account numbers between the "GL account" and "external GL account columns";

b. Provide the supporting calculation underlying the AFUDC rate used within the "WKP-Charge Detail" tab; and

c. Confirm that AFUDC is only applied to those work orders prior to their completion.

**Response:**

19. Please refer to the responses below:

a. The G/L account is the account number the cost is currently sitting in on the general ledger. The external g/l account is the account number the cost was originally capitalized in. When a cost is recorded to construction work in progress, it is recorded to account 107. At that time the g/l account and external g/l account are the same, 107. When that cost is placed in-service the cost is transferred from account 107 to account 106. At this time the g/l account becomes 106 but the external g/l account stays 107. The company's fixed asset system tracks where the cost was originally capitalized as well as where it is currently capitalized.

b. The AFUDC rate utilized is based on the authorized rate of return from the most recent general rate proceeding. AFUDC Equity rate is .0344 and AFUDC Debt rate is .038. AFUDC is calculated on cumulative eligible

balances compounding previously recorded AFUDC. The full monthly AFUDC rate will be applied to the cumulative eligible balance of expenditures as of the end of the prior month. The half (1/2) AFUDC rate will be applied to the current month eligible direct expenditures. The month in which the work is placed in service, AFUDC will be applied at the half (½) rate for all accumulated eligible expenditures. Accrued expenditures, such as the capex accrual, will not be included in the AFUDC calculation. AFUDC is recalculated for projects actually placed into service in prior months, but not indicated as such in the system until a subsequent period resulting in reversal of previously recorded AFUDC. Land purchased for the intended use of constructing utility plant assets will be included in the AFUDC eligible base of the plant assets' work order until those assets become used and useful.

c. AFUDC is only applied to those work orders prior to their in-service date.

**TENNESSEE AMERICAN WATER COMPANY**
**DOCKET NO. 19-00031**
**SECOND DISCOVERY REQUEST OF THE**
**CONSUMER ADVOCATE AND PROTECTION DIVISION**

**Responsible Witness: Brent E. O'Neill**

**Question:**

20. Refer to the Company's Response to CA Request No. 1-28 in the current Docket where it indicates that "Project I26-020032 was placed in-serviced [sic] in November of 2015", while later in the response it indicates the same project was "…later completed in November 2016." Provide a comprehensive explanation of when the plant was actually providing service to customers and reconcile the two statements above. The explanation should include the distinction between "placed in service" and "completed."

**Response:**

20. The assets are used and useful on the in-service date of the work order. The completion date is when the remaining costs have been incurred and the project as-built is ready to be completed. These dates are based on each individual project and the job tasks required to complete each. For example, a main replacement would be placed in-service when it is connected to the network and able to provide service to the customer while it may not be completed until final paving/restoration is completed.

**TENNESSEE AMERICAN WATER COMPANY**
**DOCKET NO. 19-00031**
**SECOND DISCOVERY REQUEST OF THE**
**CONSUMER ADVOCATE AND PROTECTION DIVISION**

**Responsible Witness: Elaine K. Chambers**

**Question:**

21. Refer to TAW_DRCPADDR1_NUM017_081619_Attachment.pdf, provided in response to CA Request No. 1-17. The invoiced amount of taxes does not match the taxes listed within the attached rider for each invoice/rider combination. Provide an explanation for these discrepancies. Further, provide an explanation of why the rider on the last page of the response indicates that service was provided in Cherry Hill, New Jersey, and why these costs should be eligible for recovery under the TAWC Capital Riders.

**Response:**

21. The attachment provided in response to CA Request No. 1-17 has total invoice amounts listed as $37,801.20 of the total cost summary of $42,810.05 for work order #R26-02M1.18-P-8001. The total amount of actual invoices provided is $37,801.20 which included sales/use taxes. The company did not find any discrepancies related to the invoices provided to CA in the response, paid to the vendor, and capitalized to work order #R26-02M1.18-P-8001.

    The last invoice provided to CA for $4,053.88 indicated a service address in Cherry Hill, NJ which was incorrect as this address is where the invoices were sent for payment. The service address was 1003 Riverside Drive, Chattanooga, which is reflected on the invoice cover page. This project installed a new Video Management System (VMS) for security and surveillance.

**TENNESSEE AMERICAN WATER COMPANY**
**DOCKET NO. 19-00031**
**SECOND DISCOVERY REQUEST OF THE**
**CONSUMER ADVOCATE AND PROTECTION DIVISION**

**Responsible Witness: John R. Wilde**

**Question:**

23. Regarding the response to CA Request No. 1-12 in this Docket, confirm that the Company uses straight line depreciation (without MACRS) applied to the various classes of utility property on its corporate federal Income Tax return for all property other than 5-year property. If this is not confirmed, provide the applicable table identifying the tax depreciation rates utilized by asset year for each class of utility property. If confirmed, provide the justification for not utilizing one established tax depreciation methodology for all property.

**Response:**

No, on the tax returns, there was also 7 yr property using MACRS depreciation. For rider eligible property the Company applied the same method and life for the purpose of estimating tax depreciation in this case, that it would use to depreciate the property on its tax return. The Company's reasoning was to compute tax depreciation estimates in this case, consistent with the method and life used on the applicable tax return

See attachment provided in "TAW_R_CPADDR2_NUM015_090919_Attachment" which has the Tables.

**TENNESSEE AMERICAN WATER COMPANY**
**DOCKET NO. 19-00031**
**SECOND DISCOVERY REQUEST OF THE**
**CONSUMER ADVOCATE AND PROTECTION DIVISION**

**Responsible Witness: John R. Wilde**

**Question:**

24. In Docket No. 18-00022, Mr. Wilde discussed concerns with potential normalization violations at length and indicates the company would lose the ability to claim accelerated depreciation on its public utility property if such violation occurred. Identify the accelerated depreciation rates utilized in the Capital Riders calculation by asset class and compare them with the corresponding (non-accelerated) tax depreciation rates that would be used if accelerated rates were not able to be used.

**Response:**

See attachment "TAW_R_CPADDR2_NUM024_090919_Attachment" for a comparison of the book depreciation rates to the accelerated tax depreciation rates. Note that the tax depreciaton rates can change every year, such as for 5 & 7 year property, but for this analysis, only the first year rate was used.

**TENNESSEE AMERICAN WATER COMPANY**
**DOCKET NO. 19-00031**
**SECOND DISCOVERY REQUEST OF THE**
**CONSUMER ADVOCATE AND PROTECTION DIVISION**

**Responsible Witness: Elaine K. Chambers**

**Question:**

25. Concerning the affordability of TAWC's bills, provide the following:

a. An analysis of the bad debt ratio for each of TAWC's service areas – Chattanooga, Lookout Mountain, Lakeview, Suck Creek, and Whitwell – for 2018 along with an explanation of how such ratios were determined; and

b. Provide a breakdown of the TAWC Accounts Receivable balance as of December 31, 2018, broken into the following categories by area: Current; 0-30 days past due; 30-60 days past due; and greater than 60 days past due.

**Response:**

a. The bad debt ratio is calculated by dividing the bad debts net of recoveries into billed sales.

| | Chattanooga* | Suck Creek | Whitwell | Total |
|---|---|---|---|---|
| Bad Debt Ratio | 1.4% | 0.6% | 2.2% | 1.4% |

*Lookout Mountain and Lakeview are not tracked separately and are included in Chattanooga.

b. See TAW_R_CPADDR2_NUM025_090919_Attachment. Accounts receivable balances are not tracked by area.

**Responsible Witness: John R. Wilde**

**Question:**

26. Regarding comments supplied by American Water in IRS Notice 2019-33, confirm that no input was sought or obtained from a Consumer Advocate or similar group or any state utility commission staff in the preparation of the comments.

**Response:**

As a general matter IRS Notice 2019-33 was a solicitation to all interested parties and allowed the types of parties listed in the body of the question to provide input. In fact, it appears from the published list of commenters that at least four such groups provided input, including Consumer Advocate Unit of the Tennessee Attorney General's Office. American Water did not separately solicit input from those groups specific to the comments it provided to the IRS pursuant to IRS Notice 2019-33. The IRS sought public comments from parties like the Consumer Advocate Unit of the Tennessee Attorney General's Office. Moreover, the IRS did not include a requirement that commenters like Americal Water solicit input from a Consumer Advocate or similar group before submitting its own comments.
