17. Identify the LDC's twenty-five (25) largest customers, based on volumes delivered, for the latest fiscal year. If the LDC projects a material change in the volumes delivered or rates charged to any such customer, provide a mailing address, contact person, telephone number, and the following for each customer:

Due to customer privacy requirements, this information will be provided in an encrypted PDF to an email address designated by the Tennessee Public Utility Commission.

(a) Transportation (gas companies only) and sales volumes by tariff and by month for the last three (3) fiscal years for each customer, including the step volume information for the appropriate classification.

Navitas does not have any step volume tariffs.

(b) Copies of all correspondence and notes of discussion or meetings with these customers regarding their anticipated usage from the test period through the attrition period.

Not applicable.

18. Provide the number of the LDC's customers by rate classification and by month for the last three (3) fiscal years. Provide a summary schedule showing the number of days in each billing cycle for each month for the latest 18 months. Provide computer files for this information.

An electronic file summarizing this information will be provided to the email address designated by the Tennessee Public Utility Commission.

19. Provide a list of the LDC's customers who have changed rate classes in the test period. Show the schedule movement and any adjustments you have made to the bills and usage for the attrition period. Provide the number of net additions by customer classification and by month for the latest 24 months.

No customers have changed rate classes in the test period.

20. Provide the number of the LDC's billing cycles per month and the identity of any specific groups of customers billed on a particular cycle.

Navitas TN NG, LLC bills once per month. Generally, billing is conducted on the 7th or as close to the 7th as possible in the event of a weekend, holiday, or technical issue. All customers are billed on the same day.

21. For gas companies only, provide a copy of all weather normalization work papers used in projecting attrition period revenues. Provide weather normalized, if applicable, sales volumes in

dekatherms, by class of customer and supporting documentation for the test period. Provide computer files for this information.

Navitas intends to use normalization during the tariff design stage of the rate case. However, at the time of filing, Navitas had not engaged a consultant to perform a weather normalization study for the test period. Navitas will revisit the issue of whether to engage a consultant if resources permit.

Preliminary analysis indicates the test case year was 7% colder than normal, see enclosed data.

22. Provide a copy of any usage and growth trends and any adjustments used to project revenues.

A schedule of usage and growth trends is included herein.

23. For gas companies only, provide the computation of an average bill for a residential heating customer under present and proposed rate schedules through 2019.

RE: Late fees policy

Late fees policy

Gasco, the previous owner of the Jellico, Byrdstown, & Albany systems had an unwritten policy of not applying late fees during the grow-out period for chicken husbandry operations. Upon review of this policy, Navitas believes there may be potential regulatory issues with this unwritten policy. First and foremost, it must be applied equally to all growers equally. Second, we believe it should be a clear written policy. Third, it may need to be submitted to the Kentucky Public Service Commission for approval.

Since Navitas does not know when the growers obtain and sell livestock, our policy cannot take into account a specific grower's cycle. As such our policy will be uniform for all growers as follows:

- Navitas will waive up to two months of late fees so long as the account is brought current prior to a third late fee applying. Thus, once two months of late fees have been applied, the account (billed out on the 7th of the month) must be brought current before the 1st of the following month.
- Navitas will waive one month of late fees so long as the account is brought current prior to a fourth late fee. Thus, once three months of late fees have been applied, the account (billed out on the 7th of the month) must be brought current before the 1st of the following month. In this instance two of the three months of late fees will stand and be due and payable.
- No late fees will be waived for an account more than four months past due.

Keeping in mind that some months have more days than others, a simple description of the policy is that so long as the bill is paid in full every ten-weeks, penalties will be waived.

Please note that penalties will show on the bill until they are waived.

RE: Tax exemptions

DATE: March 2011

Tax exemption policy

Navitas involvement in taxes on consumer's bills is to apply and remit. Navitas does not determine if a particular consumer is exempt. Rather the consumer must provide a copy of their exemption certificate for our files. Once a certificate from the appropriate entity is provided, then Navitas will no longer apply the particular tax to the consumer's bill.

RE: Company disability program

DATE: June 26, 2019

Illness and non work related injury benefit program

Navitas Utility Corporation is implementing a new long-term illness and non work related injury benefit program. This program is in addition to the existing sick leave benefit as well as the regulated work related injury program.

Benefit

For each year of service an employee will be able to use one day of disability pay. The purpose of the disability pay is to provide monetary assistance to a worker who is unable to work due to a long-term illness or off the job injury and who has exhausted their sick days and vacation time. The amount of the disability pay will be $72.00 per day ($9.00 per hour x 8 hours per day) Monday through Friday only.

By way of example: You have five-years of service with the company and have used no sick leave or vacation time for the year. You seriously break your leg at a family reunion football game requiring five- weeks of traction. You would use your five-days of sick leave first, and then fifteen-days of vacation time, and finally five-days of disability pay.

Another example: You have four years of service with the company and have used two-days of sick leave and one-week of vacation. You contract bird flu requiring two-weeks of quarantine. You would use your three-days of sick leave first, and then five-days of vacation time, and finally two-days of disability pay.

Note – in the above scenarios there may be additional State benefits available.

Eligibility

Your must be a full-time employee (40 hours per week year-round). Each qualified person employed on January 1 will receive an additional disability day benefit (regardless of what day during the year they were employed on).

Application of and maximum benefit

As noted in the examples, sick days are to be applied first, then vacation days, and finally disability days.

The maximum disability days available for a single event for use by an employee will be twenty, regardless of the total number of eligible days available to that employee.

This benefit does individually accrue or cash out upon termination of service. In the event an employee does not use the days they are eligible for during the normal course of employment the company retains the days in the disability pool to offset future minimum pay escalations. Additionally, this benefit is at the discretion of management and can be rescinded at anytime in the event the Company believes it is being abused or in the event that State or Federal regulation disallows or penalizes the offering of the benefit in any way as determined by management.

Inception benefit

In recognition of past service, the Company is granting up to ten-days of disability benefit to existing employees. Attached is our list of employees and the number of days they will start with based on the number of years of service with Navitas and the previous utility. Disability days are shown for the number of days they will have as of January 1, 2019.

Memorandum

Date: July 11, 2016

To: All Employees

From: Thomas

RE: Defined Skills

Defined skills

Within each position, certain skills will be defined. The achievement of a skill will carry with it a specific and immediate increase in pay (i.e. – The Construction position may have as a defined skill a certified welding certificate, the achievement of which would lead to a $0.25 increase in hourly pay.). The company will reimburse the employee for the cost of training classes associated with a defined skill.

Structuring of these skill sets is an ongoing process and management welcomes employee input in the creation and adjustment of the definitions.

List of skills

Attached is the revised list for the defined skills advancement program. From time to time management may elect to change the list or add additional skills. Employees are encouraged to suggest potential additional skill sets.

Eligibility

Hourly employees that work 40 hours or more per week are eligible to participate in the defined skills program. A maximum of seven defined skills are eligible for compensation at a rate of $0.25 per hour each. A maximum of one defined skill may be added per quarter. Employees may add five skills from their assigned area and two from another area.

An employee permanently reassigned from one work classification area to another (i.e. – moved from Construction to Field) will be eligible to earn and submit seven compensated skills within their new area, regardless of whether they had previously earned them while in their prior assignment(s). Out of area skills are not allowed.

Implementation

Employees seeking compensation adjustment for a defined skill must submit a short (one page) request. The request should include the employee's name, the skill being sought for approval, any certifications (i.e. – school completion certificates), a brief discussion of the skill and how it improves their work, and their supervisor's approval.

RE: New customer bonus clarification

I am taking this opportunity to clarify some aspects of the Navitas new customer bonus plan. A number of you have received a bonus this past year and a number more are eligible.

1. The goal of the program is for the field service persons to solicit new business in their area, especially commercial business.

2. The bonus is $100 per new service line. For example, a property developed with a house and a barn that are separately metered only counts as one service line.

3. The service must be new and must be sourced in the field. Therefore the property has never been on gas before, with the exception of irrigation services that have been offline for at least two-years. A new service that is initiated by the customer through the office is not eligible. New subdivisions will be reviewed on a case by case basis.

4. Requests for bonus must be turned within three-months of the service installation. This allows the company to better manage cash flow. (Note – an exception will be made for 2009)

5. Other notes – If the company feels the program is being abused it will be discontinued. The field service persons will want to consider acknowledging the assistance they receive from the customer service people in getting the new service set-up.

Book versus Tax Depreciation

Given Navitas status as a pass through entity this section may not be applicable.
However there are other factors that also render this comparison askew.
As a very small company Navitas has traditionally extended its corporate tax filings to September 15th.
Thus the most recent figures available are year-end 2017.
Moreover, in 2018 Navitas Assets closed a particular entity and sold off its assets.
This asset had substantial accelerated depreciation, thus will be subject to depreciation recapture in 2018.

Focusing on Navitas TNNG, LLC specifically at the end of 2017
The net tax value was $420,223
The net book value was $485,574
Thus, over the course of eight-years beginning in 2010 the TNNG had defer $65,366 in taxable income.
This averages $8,171 per year in deferred taxable income representing $3,023 per year in deferred taxes.

51. Provide the monthly plant additions and retirements by account number for the last three (3) fiscal years to include the test period. Please break down plant additions into normal or special projects as defined below:

a) Normal construction requirements should be considered to include the needs created through normal system expansion, such as serving residential areas, shopping areas, old home conversions, replacement of tools and work equipment, transportation equipment, etc.

Schedule provided herein.

b) Special construction requirements should be considered to arise from extensive replacement of old facilities which cannot be foreseen, major expansion projects such as industrial parks, system improvements such as change from low pressure to high pressure required because of changing delivery patterns, and changes required by government action such as street improvement and relocation, community and neighborhood development, bridge replacement, etc. These requirements should be considered to be outside the control of the LDC.

None of the capex additions since the last rate case are classified in this category.

c) For the last three (3) fiscal years, identify any contributions in aid of construction.

Navitas does not have any contributions in aid of construction for the reporting periods.

52. Break down budgeted plant additions between normal and special projects, using the criteria defined above, for the months between the end of the last fiscal year and the end of the attrition period. Provide sufficient detail of each individual project as to the date of inception and completion, and the proposed methods of financing. Identify those budgeted plant additions that are in process or have already been completed. Basic assumptions underlying budgets should be submitted including the assumptions for sales volumes.

The Navitas TN NG systems are relatively static in their customer count.

In both Jellico and Byrdstown, the system installs or relocates a few services annually. These are performed on an as needed basis and the budget for this activity is less than $10,000 per year.

53. Identify all special projects from the end of the test period through the attrition period, using the criteria defined in Item (2) above, by work order number and include the estimated cost. Provide a signed authorization for each special project and identify the planned starting and completion dates.

Navitas TN NG has not engaged or identified any special projects and there are none from the end of the test period through the attrition period.

54. Identify by account the salvage and cost of removal for retirements provided in response to Item (2) for the last four (4) fiscal years to include the test period.

During the test and attrition period, Navitas has not identified costs applicable to this Item.

55. Describe the LDC's budgeting process including, but not limited to the following:

a) How far in advance are operating and construction budgets prepared? On what basis is the total operation and construction budget determined? Explain the "approval process" in budget development.

As a collection of micro utilities with very low customer densities and very few industrial customers, Navitas must always be concerned with net plant per customer implications as well as cash flow. Navitas identifies and prioritizes projects within each management region. This process occurs during winter each year. Projects to be performed are limited to those which can be managed by Navitas field personnel. Thus, the approval process is limited by the forecast of available management time.

b) How many views or updates of the same budget year are made before a final view is adopted?

As described above, the budget driver for Navitas is time as opposed to dollars. The field supervisor working with management initially determines which projects are to be pursued in the various regions. This selection may be modified once the shared resources are scheduled between regions. Thus, essentially it is a two-pass process.

c) Are budgets prepared on a monthly, quarterly, or annual basis?

As noted, the budgeting is done on the analysis of time and can be very dynamic to changes in the field. For example, if an event occurs, i.e. a third-party line strike diverting field, management and shared resources, a reexamination of pending projects is conducted to determine which projects can be completed during the construction season.

d) Which individual or department head has overall responsibility for budgets / reconciliations?

Thomas Hartline, President of Navitas Utility Corporation, has overall responsibility for budgets.

e) Once a final budget has been adopted, are budget to actual (reconciliation) comparisons routinely made? How frequently are reconciliations prepared and by whom?

For major new construction projects, reconciliations are done quarterly. All other projects are analyzed at the end of the year prior to the budget process for the following year.

f) For the last two (2) completed fiscal years, provide copies of all budgets, budget to actual and indicated reasons for the variances.

Outside of major new construction projects, Navitas has not had a written budget process to date, and there have been no new major construction projects in Tennessee since the last rate case.

g) Comparisons on a total Company, total LDC, and TN only basis.

During the available annual construction season of 32 weeks, for 2 weeks during the test period, and 3 weeks in the last 12 months, Navitas has dispatched its shared resources crew to Tennessee and Kentucky.

h) Provide total LDC and TN Operations budgets and all supporting work papers for the current fiscal year and next fiscal year.

Navitas does not have a formal written budget for its existing LDC or Navitas operations.

56. Provide schedules showing the development of the average TN account balances listed below for the last fiscal year. (If partially provided in other items, provide the remaining data here.)

b) Construction Work in Progress

None.

o) Prepaids

57. Provide an explanation and calculation of the method used to allocate to Tennessee any portions included in Item (6) above.

Included herein is an explanation and calculation of the method used to allocate charges to Navitas TN NG, LLC.

58. Provide the investment, accumulated depreciation, and deferred FIT on all property that is owned by an affiliate of the LDC, its Parent, Multi-State Utility, or Affiliated Utility Service

Company, where applicable, and leased or allocated to the LDC or Multi-State Utility. An operating division of a Multi-State Utility is not an affiliate.

The affiliates of Navitas TNNG, LLC do not lease or directly allocate property to the LDC. Rather certain property is proportionally rented including: the real property of the corporate office (Navitas Assets, LLC), operations headquarters (Fort Cobb Fuel Authority, LLC), and personal property (Navitas Utility Corporation, i.e. – rolling stock, computers, meters, etc.). The proportional amount of the rent is the same as the other allocations. Additionally, the rent passes the following tests:

1. **Is the total amount of rent for the item at or below a third party cost, e.g. – is it a market rate of rent? For example, if Navitas rented the Ford F150 provided to J. Walker in Jellico from Hertz Equipment Rental, would the monthly charge be greater than the amount billed by Navitas Utility to Navitas TN NG?**
2. **Is the total amount of rent at or below the amount that would otherwise be incurred if the item were part of the rate base? For example, if the F150 were included in the rate base, would the return on the purchase price plus the depreciation component be greater than the amount billed by Navitas Utility to Navitas TN NG?**
3. **Does the rent for the item not include profit? Do the components of the rent outlined in the monthly bill from Navitas Utility to Navitas TN NG include a profit amount?**

   Please see Item 13 for copies of the billing.

ITEM 56(a)

Navitas Utility Corporation (NUC) performs the billing for its operating systems, including Navitas TN NG, LLC. All costs and expenses, categorized as either a direct or indirect cost, are passed through to the systems on a monthly basis subject to the orders of the appropriate regulatory governing bodies.

Billing method includes:

- Payroll Expenses
- System Billing
- Invoices and Bills

Payroll Expenses

1. Payroll Details for both Biweekly and Semimonthly employees are printed from ADP software for the month.
2. The pretax pay for each employee is entered into an Excel spreadsheet ("Indirect Costs Breakdown") which then applies the percentage for the cost ADP charges for its payroll management software and services in proportion to an employee's earnings.
3. The total payroll costs, including ADP charges, are entered into QuickBooks as a Bill for a Direct Cost (account 5099, subaccount 5100 - Services) to Navitas Utility Corporation (NUC).
4. These payroll costs can be viewed in QuickBooks in the Account QuickReport as a Bill for Salary payroll and Field Payroll under the NUC account.
5. A General Journal entry is created in QuickBooks under the NUC account as an Allocation and Reallocation of the Payroll Expenses reflecting the total amount as a Direct Costs for account 5099 under the Credit column and a breakdown of the Direct Costs and the Indirect Costs for the accounts in parentheses below under the Debit column. The Memo column is used to delineate the employees' initials so that:

- Salary Payroll General Journal entry:
  - Direct Costs (893) reflects the initials JI for the salaried employee that handles the Maintenance of Meters which is billed as a direct cost and passed through directly to the systems that benefit from such service.
  - Indirect Costs (920) reflects the initials RV, TH, RM… for the salaried employees that handle Administration & General Sales for all the systems which is billed as an indirect cost and passed through to all the systems as such.
- Field Payroll General Journal entry:
  - Indirect Costs (908) reflects the initials KC, TK, VK for the field employees that handle Customer Assistance for all the systems which is billed as an indirect cost and passed through to all the systems as such.
  - Indirect Costs (908.46) reflects the initials PL, TF, AR for the field employees that handle Customer Assistance for Oklahoma which is billed as an indirect cost and passed through to Oklahoma.
  - Direct Costs (894) reflects the initials SC for the field employee that handles Maintenance of Other Equipment which is billed as a Direct Cost and passed through to Oklahoma.

- Direct Costs (874.46) reflects the initials JF, AF, RH…for the field employees that handle Mains & Services for Oklahoma which is billed as a direct cost and passed through to Oklahoma.
- Direct Costs (874.16) reflects the initials JW for the field employee that handles Mains & Services for Tennessee which is billed as a direct cost and passed through to Tennessee.
- Direct Costs (893) reflects the initials of JerS, SY for the field employees that handle Maintenance of Meters which is billed as a direct cost and passed through as such.
- Indirect Costs (920) reflects the initials CR, RM for the employees that handle Administration & Gen Sales which is billed as an indirect cost and passed through as such.

Profit & Loss

- The monthly standard Profit & Loss statement of NUC is printed out with a focus on the expenses and costs including the following categories: Mains & Services for each system (KY 874.15, TN 874.16, TX 874.28, and OK 874.46), Maintenance of Mains for each system (KY 887.15, TN 887.16, TX 887.28, and OK 887.46), Maintenance of Meters (893), Maintenance of Other Equipment (894), Customer Records (903), Customer Assistance (908), Administration & Sales (920), Office Supplies (921), Outside Services (923), Safety & Security, Employee Benefits (926), Rents (931), and Maintenance of General Plant (932). These categories are drawn from the Uniform System of Accounts Prescribed for Natural Gas Companies.

System Billing

- The Direct and Indirect Costs and Expenses on the Profit & Loss statement are then entered into Excel spreadsheets ("System Billing") for the corresponding month. The spreadsheets mathematically compute the expense allocations to all the operating systems, using the correlating account QuickBooks categories, based on each systems' meter use percentage and number of customers. Expenses (and revenues) are delineated on separate pages for the QuickBooks' categories as follows:
  - The Direct Charges page reflects expenses for:
    - Mains & Services (account 874) including the expense breakdown for KY, TN, OK, and TX (accounts 874.15, 874.16, 874.46 and 874.28 respectively).
    - Maintenance of Mains (account 887) including the expense breakdown for KY, TN, OK, and TX (accounts 887.15, 887.16, 887.46 and 887.28 respectively).
    - Maintenance of Other Equipment (account 894).
    - Customer Records & Collection (account 903) including the expense breakdown for KY, TN, OK, and TX (accounts 903.15, 903.16, 903.46 and 903.28 respectively).
    - Customer Assistance (account 908) including the expense for OK (908.46).
    - Office Supplies (account 921) including the expense breakdown for KY, TN, OK, and TX (accounts 921.15, 921.16, 921.46 and 921.28 respectively).
    - Outside Services (account 923) including the expense breakdown for KY, TN, OK, and TX (accounts 923.15, 923.16, 923.46 and 923.28 respectively).
  - The Allocation Charges page reflects a breakdown of the monthly expenses allocated to each system including KY, TN, OK, and TX in proportion to the number of customers each system services for the year.

- Allocated charges include Maintenance of Meters (893), Customer Records & Collection (903), Customer Assistance (908), Info Advertising (909), Administration & Gen Sales (920), Office Supplies (921), Outside Services (923), Insurance (924), Safety & Security (925), Employee Benefits (926), Misc Gen Expense (930), Rents (931), Maintenance of General Plant (932) and Equipment Rental for pickups, trucks, heavy equipment, tools, office equipment, and meters.
    - Meter costs are allocated to all the operating systems, as is one of the employee's trucks since the employee services all the systems.
    - Equipment expense associated with a rental truck is allocated to TN because the truck is located there and gets rented there.
    - The building rent associated with the corporate office in Costa Mesa is allocated to all the operating systems because the corporate office services all systems. The building is rented by Navitas Assets because this company is the holding entity.
    - The building rent associated with the operating office in Eakly, OK is allocated to all the systems because it services all the systems. The office is also rented by Navitas Assets.
- The Oklahoma page reflects a breakdown of the monthly expenses and commodity for the systems in OK including FCFA, LeAnn, OK3, and Winstar using the same category of charges as above.
- The Commodity OK page reflects the Units, Cost, Price per Unit per Transporters and Suppliers, and Sales in MCF, Usage by percentage, PGA Portion, and Prior Month Sales for the OK systems including FCFA, OK3, LeAnn (FCFALD), and Winstar.
- The Tennessee page reflects the breakdown of the monthly expenses billed to TN NG system using the same categories for charges as above.
- The Kentucky page reflects the breakdown of the monthly expenses billed to KY NG system using the same category of charges as above.
- The Commodity TN KY page reflects breakdowns for monthly Sales in CCF, Usage, PGA Portion, and Prior Month Sales for the KY and TN systems including the Albany location in KY and the Byrdstown/Fentress and Jellico locations in TN.
- The Commodity Texas page reflects monthly commodity and expenses, using the same categories for charges as above, for the TX system.
- The NUC Rent page reflects the Original Value, Debt/Equity Ratio, Bank Interest Charge for Debts and Depreciation values for pickups, trucks, heavy equipment, tools, office equipment, and meters.
- The NALLC Rent page reflects the corporate office rent Value, Debt/Equity Ratio, Bank Interest Rate and Depreciation value. The corporate office is located in Costa Mesa, CA.
- The FCFA Rent page reflects the FCFA office rent Value, Debt/Equity Ratio, Bank Interest Rate and Depreciation value. The FCFA office is located in Eakly, OK.

Invoices & Bills

- Using the System Billing Excel computations, the expense allocations are entered into QuickBooks to prepare the Invoices which get billed from NUC to all the operating systems which are set up as customers.
- A corresponding bill is prepared in QuickBooks under each operating system using the same expense information as the Invoice.

IN CASE OF ERRORS OR QUESTIONS ABOUT YOUR STATEMENT, PLEASE WRITE OR CONTACT US AT THE PHONE NUMBER OR ADDRESS LISTED ON THE FIRST PAGE OF YOUR STATEMENT.

If you think your statement is wrong, or if you need more information about a transaction on your statement, write us on a separate sheet at the address shown on your statement as soon as possible. PLEASE NOTIFY BANK IN WRITING OF CHANGE OF ADDRESS.

TERMS GOVERNING ACCOUNTS

When the Bank deems such action proper, the Bank may require that the account be closed.

The provisions hereof shall control, in event of conflict with any deposit slip.

The Bank reserves the right to change the provisions hereof by printing on its statement Terms Governing Accounts, incorporating the change. The new Terms Governing Accounts will be effective, prospectively, when the statement containing the change is made available to the customer, by mail or otherwise.

STATEMENTS

If you do not notify us of an unauthorized signature or alteration within a reasonable amount of time (not to exceed 30 days) after we send or make available to you your statement and items: (1) you can assert the unauthorized signature or alteration against us, even if we are unable to show a loss due to your failure and, (2) you cannot assert any unauthorized signatures or alterations by the same wrongdoer on items paid by us after the reasonable time mentioned above elapses, but before we receive your notice. We lose these protections if we fail to exercise ordinary care in paying an item with an unauthorized signature or alteration, unless you do not notify us of the problem within 60 days of when we send or make available to you the statement and items. You must report any other account problem (e.g. erroneous statement or passbook entry, missing signature, unauthorized endorsement, etc.) within this 60 day period or lose your right to assert the problem against us.

IN CASE OF ERRORS OR QUESTIONS ABOUT YOUR STATEMENT, PLEASE WRITE OR CONTACT US AT THE PHONE NUMBER OR ADDRESS LISTED ON THE FIRST PAGE OF YOUR STATEMENT.

If you think your statement is wrong, or if you need more information about a transaction on your statement, write us on a separate sheet at the address shown on your statement as soon as possible. PLEASE NOTIFY BANK IN WRITING OF CHANGE OF ADDRESS.

TERMS GOVERNING ACCOUNTS

Deposit in or presentment to the Bank of any item for a customer's account shall constitute the customer's consent to the terms hereof with respect to the account and all items deposited therein or presented to the Bank for payment.

When the Bank deems such action proper, the Bank may require that the account be closed.

The provisions hereof shall control, in event of conflict with any deposit slip.

The Bank reserves the right to change the provisions hereof by printing on its statement Terms Governing Accounts, incorporating the change. The new Terms Governing Accounts will be effective, prospectively, when the statement containing the change is made available to the customer, by mail or otherwise.

STATEMENTS

If you do not notify us of an unauthorized signature or alteration within a reasonable amount of time (not to exceed 30 days) after we send or make available to you your statement and items: (1) you can assert the unauthorized signature or alteration against us, even if we are unable to show a loss due to your failure and, (2) you cannot assert any unauthorized signatures or alterations by the same wrongdoer on items paid by us after the reasonable time mentioned above elapses, but before we receive your notice. We lose these protections if we fail to exercise ordinary care in paying an item with an unauthorized signature or alteration, unless you do not notify us of the problem within 60 days of when we send or make available to you the statement and items. You must report any other account problem (e.g. erroneous statement or passbook entry, missing signature, unauthorized endorsement, etc.) within this 60 day period or lose your right to assert the problem against us.

62. Explain the nature and extent of each of the LDC's or, where applicable, Multi-State Utility's non-regulated operations.

Theoretically, Navitas Assets and certain of its subsidiaries have three types of non-regulated operations. (1) Navitas Assets owns certain intrastate, short-run (i.e. less than 49 miles) pipelines in Oklahoma. By Agreement with the Oklahoma Corporation Commission these pipelines are regulated with the Oklahoma LDC's. (2) Navitas Utility Texas owns an LDC, which by virtue of having no residential customers, is unregulated. (3) Navitas Utility Texas owns a short-run, intrastate pipeline in Texas, which is unregulated. Both (2) and (3) are treated by Navitas Utility as if they are regulated and both are tariffed by contract.

63. Provide an Income Statement and identify assets devoted to and liabilities specifically arising from non-regulated operations of the LDC, its Parent, Multi-State Utility, or Affiliated Utility Service Company, for the last two (2) fiscal years. For each year, identify each class of revenue separately (appliances, propane sales, etc.). The statements should include the following information for each year:

a) The direct expense incurred by the LDC for each operation.

b) The general office expense allocated to each operation by the LDC, its Parent, Multi-State Utility, or Affiliated Utility Service Company.

c) All expenses charged to the LDC, its Parent, Multi-State Utility, or Affiliated Utility Service Company from non-regulated activities.

d) All revenues billed by the LDC's regulated operations to the non-regulated operations.

The pipelines discussed in Item 62 above are included in the monthly systems billing provided in Item 13 herein. These billing sheets detail the allocation and allocation method and cover subsections (a), (b), (c), and (d).

64. Provide a complete explanation and calculation of how costs (other than salaries and wages) as requested above were allocated to non-utility operations for the test period and for the period from the end of the test period through the attrition period.

The non-utility operations of Navitas are fairly minimal. The figures appear as extraordinary income in Navitas Utility. The most common non-utility revenue (excluding investment-in revenue) is the incidental sale of pipe to plumbers completing new service installations.

65. Provide the percentage of non-regulated labor for the test period.

As noted, Oklahoma non-regulated is regulated by choice. Texas non-regulated is treated as if it were regulated. The percentage of labor assigned to the customer in Texas is proportional to its allocation. This allocation is shown on the monthly billing.

66. Provide a calculation of the LDC's, its Parent's, Multi-State Utility's, or Affiliated Utility Service Company's debt, equity capital and the debt and equity ratios for the last two (2) years. Show long and short-term debt, preferred stock and common equity separately.

The chart below is from the Navitas companies' pro forma consolidation for 2017 and 2018 enclosed herein.

Consolidated	2017	2018
Member Loan	**0**	**130,000**
CPLTD	**397,000**	**385,000**
Long Term Debt	**8,022,000**	**6,887,000**
Total Debt	**8,419,000**	**7,272,000**
Total Equity	**2,856,000**	**3,402,000**
Debt to Equity Ratio	**2.95**	**2.14**

67. Provide a copy of any information filed with other Regulatory Commissions (other than the TRA) where such information describes the Company's debt position and equity position. Provide all data submitted in the last twelve (12) months and also on a forward-going basis.

Included herein are copies of information filed with the Kentucky Public Utility Commission and the Oklahoma Corporate Commission in 2018.

68. Provide a calculation of the average composite interest cost for the long-term debt and short-term debt for the last two (2) years.

The calculation of average composite interest cost is provided herein. Note that short-term debt is comprised of the current portion of long-term debt and line(s) of credit. Thus, the vast majority of short-term debt mirrors the long-term debt.

69. Provide a schedule identifying the following for the LDC, its Parent, Multi-State Utility, or Affiliated Utility Service Company, for the last two (2) fiscal years and adjust for any stock splits:

Neither Navitas nor any of its affiliates or sister companies are publicly traded entities and therefore there are no adjustments for stock splits.

70. Provide a schedule identifying the date and amount of each common stock dividend paid during the last three (3) fiscal years. Include any announced future dividend payments and adjust for any stock splits.

No cash distribution was made in the last 3 fiscal years. Prior to 2019, Navitas had not made cash distributions since 2008.

71. Provide the computer file showing items below for Parent, Multi-State Utility, or Affiliated Utility Service Company for the last fifteen (15) fiscal years:

Neither Navitas nor any of its affiliates or sister companies are publicly traded entities, thus this Item is not applicable.

72. In a computer file, provide the balance for the following for each month of the latest fiscal year:

a) Long-term debt issued and aggregated

Provided in computer file.

b) Preferred stock by issue and aggregate

Not applicable.

c) Common equity

Provided in computer file.

73. In a computer file, provide a schedule for each month of the latest fiscal year, showing interest rates, dividend rates, the monthly amortization of discount, premium and issuance expense and the monthly unamortized balances of discount, premium and issuance expense for long-term debt and preferred stock identified in response to the item above. Specifically, be sure to provide in your response for each month the balances by issue for unamortized discount, premium, and issuance expense for all of the Parent's, Multi-State Utility's, or Affiliated Utility Service Company's long and medium-term debt and preferred stock, if any.

For long-term debt noted in Item 72(a) above, the interest rate is fixed either for the life of the loan or, in the case of the acquisition loan(s) for 5-year increments. All issuance expense(s), if any, are, in the view of the Company, not material and are fully expensed at inception.

74. In a computer file, provide for each month of the latest fiscal year the balances of capital surplus. Separate the surplus between common and preferred stock. For purposes of this request, "capital surplus" means amounts paid in that are less than or are in excess of par value of the respective stock issues.

The Navitas companies do not have capital surplus accounts and thus this Item is not applicable.

75. In a computer file, provide unamortized balances, if any, on the gain or loss on reacquired preferred or preference stock for each month in the latest fiscal year. Clearly identify the issue for each unamortized balance.

The Navitas companies are not publicly traded entities and thus this Item is not applicable.

76. In a computer file, provide the monthly amortization of any gain or loss on reacquired preferred or preference stock, if any, for each month of the latest fiscal year.

The Navitas companies do not have reacquired preferred or preference stock.

77. In a computer file, provide the unamortized balances, if any, of gain or loss in reacquired long-term debt for each month in the latest fiscal year. Be sure to clearly identify the issue for each unamortized balance.

The Navitas companies do not have unamortized balances from reacquired long-term debt.

78. In a computer file, provide the monthly amortization, if any, of the gain or loss on reacquired long-term debt for each month of the latest fiscal year.

The Navitas companies do not have any reacquired long-term debt.

79. If applicable, provide the amount of return on investment billed to the LDC by any affiliate of the LDC for the latest fiscal year and for the attrition period. Include in your response a calculation of the return on equity percent and the account charged for the return amount. As used in this Item (14), "affiliate" means any entity that controls, is controlled by, or is under common control with the LDC, its Parent, Multi-State Utility, or Affiliated Utility Service Company.

Not applicable.

80. For the latest two (2) fiscal years and for each month to the present for which data is available, provide a monthly listing of the shares of common stock sold by the LDC directly to investors and shareholders.

Included herein is the report of issuance of member interest to its parent, Navitas Assets, LLC.

81. Separate the monthly listing between stock sold through the Stock Purchase Plan of the LDC and stock sold through the Dividend Reinvestment Plan of the LDC.

Navitas does not have sales of stock through a Stock Purchase Plan or a Dividend Reinvestment Plan.

82. Provide copies of the LDC's projected annual equity ratio for the next five (5) fiscal years.

Enclosed herein is the Navitas companies pro forma annual debt to equity ratio since the last rate case as-well-as the projected ratio of 2:1.

83. Provide copies of the LDC's projected new stock and debt issues for the next five (5) fiscal years.

No additional debt is projected for Navitas TN NG, LLC. Additional member interest, if issued, will be to the single member parent, Navitas Assets, LLC.

84. Provide copies of the LDC's projected annual dividends per share of common stock for the next five (5) years.

Navitas has only issued a return of cash to its shareholders in two of the last thirteen-years. As such it makes no projection for issuing a return of cash in the future.

85. If material to the Tennessee Operations, provide copies of projected annual earnings per share of common stock for the next five (5) fiscal years.

This Item is not material to the Tennessee operations.

86. If not provided in response to Rule 1220-4-12.03, Item (4), provide the most recent 10K filed with the SEC.

Neither Navitas nor any of its affiliates or sister companies are publicly traded entities and thus did not file a 10K with the SEC.

87. Provide the number of stockholders of record for the LDC, its Parent, Multi-State Utility, or Affiliated Utility Service Company for the last ten (10) fiscal years.

Beginning in 2010 and continuing today, Navitas TNNG, LLC has wholly owned subsidiary of Navitas Assets, LLC. Since its inception in 2006, the Navitas companies are held by two shareholders, Richard Varner and Thomas Hartline.

Accumulated Provision for Depreciation of Gas Utility Plant (Account 108)

1. Explain in a footnote any important adjustments during year.
2. Explain in a footnote any difference between the amount for book cost of plant retired, line 10, column (c), and that reported for gas plant in service, page 204-209, column (d), excluding retirements of nondepreciable property.
3. The provisions of Account 108 in the Uniform System of Accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.
4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.
5. At lines 7 and 14, add rows as necessary to report all data. Additional rows should be numbered in sequence, e.g., 7.01, 7.02, etc.
