**TENNESSEE PUBLIC UTILITY COMMISSION  
PETITION OF  
Kingsport Power Company  
DOCKET NO. TPUC 21-00107 Rate Case Discovery  
Data Requests and Requests for the Production  
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF  
THE ATTORNEY GENERAL'S OFFICE  
CA Supp. Set 1  
To Kingsport Power Company**

**Data Request CA 1-163:**

(Supplemental) Provide the most currently available bond ratings given to APCo and AEPSC, respectively, each of the major bond rating agencies including, but not necessarily limited to, Fitch, Inc. ("Fitch"), Moody's Investors Service, Inc. ("Moody's"), and Standard & Poor's Ratings Services ("S&P").

**Response CA 1-163:**

AEPSC is not rated by any of the three rating agencies. The current Senior Unsecured Bond ratings for Appalachian Power Company, and AEP, Inc. are as follows:

| Company                   | Moody's       | S&P             | Fitch        |
|---------------------------|---------------|-----------------|--------------|
| Appalachian Power Company | Baa1 (stable) | A- (negative)   | A-(stable)   |
| AEP, Inc.                 | Baa2 (stable) | BBB+ (negative) | BBB (stable) |

# American Electric Power Co. Inc.

## Rationale

| Business Risk: Excellent   | Financial Risk: Significant   |
|--|---|
| <ul style="list-style-type: none"> <li>Majority of consolidated cash flow from more predictable regulated lower-risk electric businesses;</li> <li>Large and well diversified customers base;</li> <li>Generally constructive regulatory frameworks; and</li> <li>Remaining generation mostly owned by regulated utilities.</li> </ul> | <ul style="list-style-type: none"> <li>Credit measures that support the assessment of the financial risk profile as significant;</li> <li>Operating cash flow supported with timely recovery of transmission investments, base rate increases, and the recovery of fuel and capacity costs in Ohio;</li> <li>High capital spending; and</li> <li>Negative discretionary cash flow leading to external funding needs.</li> </ul> |

## Outlook: Stable

S&P Global Ratings' stable rating outlook on American Electric Power Co. Inc. (AEP) and its subsidiaries reflects AEP's improving business risk profile that now consists almost entirely of regulated utility operations with adjusted funds from operations (FFO) to debt of about 18% on a consistent basis.

### Downside scenario

We could lower the ratings on AEP and its subsidiaries if AEP's financial performance weakens such that adjusted FFO to debt is consistently below 14% or if its business risk increases as a result of ineffective management of regulatory risk or the pursuit of risky unregulated investments.

### Upside scenario

While not likely, we could raise the ratings on AEP and its subsidiaries if AEP's financial performance improves such that adjusted FFO to debt remains consistently above 20% while business risk is unchanged.

## Our Base-Case Scenario

## Company Description

American Electric Power Co. Inc. is a U.S.-based electric utility holding company that operates in 11 midwestern and southwestern states.

## Business Risk: Excellent

Our assessment of AEP's business risk profile is based on the very low risk of the regulated utility industry and the company's mostly lower-risk, rate-regulated electric operations that provide an essential service. We expect management will maintain its strategic focus based mostly on utility operations. AEP benefits from operating and regulatory diversity and is very large with 5.3 million customers scattered over 11 states. Although it operates in 11 states, the company's operations in Ohio, Texas, Virginia, and West Virginia represent the majority of consolidated revenues. AEP has reached largely constructive regulatory outcomes in the jurisdictions in which it operates, ensuring a measure of cash flow stability over the next few years. AEP has been investing in transmission projects, a trend that is likely to continue in the future, providing ongoing support to credit quality through cash flow diversity and further regulatory diversification.

## Financial Risk: Significant

Our base-case scenario forecast includes annual adjusted FFO to debt in the 16%-17% range through 2019, or slightly below the midpoint of the benchmark range. Cash flow from the regulated utility operations have strengthened from greater cost recovery through base rates and rate riders. The supplemental ratio of FFO cash interest coverage supports this determination since in our base-case scenario we expect the measure to range between 4.5x-5.5x, near the stronger end of the benchmark range. We expect debt leverage, as measured by adjusted debt to EBITDA, in the 4.4x-4.7x range, around the weaker end of the benchmark range. Over the next several years, AEP's capital spending will be elevated and will exceed \$6 billion per year. About 5% will be allocated to contracted renewables and the

balance to regulated operations, including over 50% allocated to Federal Energy Regulatory Commission (FERC)-regulated transmission investments which benefit from a constructive regulatory framework that provides for timely investment recovery. The elevated capital spending along with dividends results in discretionary cash flow that is expected to be significantly negative, indicating external funding needs and likely will limit any material deleveraging. We have not reflected the reduced tax rate in our base-case scenario forecast. We base our financial risk assessment on moderate benchmarks as compared to a typical corporate issuer. This reflects the company's steady cash flow from its low-risk, rate-regulated utility operations and regulatory risk management.

Source: S&P Global Ratings.

**Liquidity: Adequate**

We assess AEP's liquidity as adequate because we believe its liquidity sources are likely to cover uses by more than 1.1x over the next 12 months and meet cash outflows even with a 10% decline in EBITDA. The assessment also reflects the company's generally prudent risk management, sound relationships with banks, and a generally satisfactory standing in credit markets.

| Principal Liquidity Sources   | Principal Liquidity Uses   |
|---|--|
| <ul style="list-style-type: none"> <li>• We estimate cash FFO of about \$4.7 billion;</li> <li>• Cash and liquid investments of roughly \$170 million; and</li> <li>• Average credit facility availability of about \$3 billion.</li> </ul> | <ul style="list-style-type: none"> <li>• Debt maturities, including outstanding commercial paper, of about \$1.85 billion;</li> <li>• Capital spending of about 4 billion; and</li> <li>• Dividends of about \$1.2 billion.</li> </ul> |

**Debt maturities**

- 2018: \$2.0 billion
- 2019: \$2.3 billion
- 2020: \$0.5 billion
- 2021: \$1.3 billion

**Covenant Analysis**

As of June 30, 2017, AEP had adequate cushion as per the financial covenant of consolidated total debt to total capital of no more than 67.5%.

| Compliance Expectations  | Requirements  |
|--|---|
| <ul style="list-style-type: none"> <li>• The company was in compliance as of June 30, 2017</li> <li>• Single-digit EBITDA growth and elevated capital spending should still permit a cushion; and</li> <li>• Although we believe the company will remain in compliance, covenant headroom could decrease without adequate cost recovery of capital investments or if, while making these investments, debt rises rapidly without adequate growth in equity.</li> </ul> | <ul style="list-style-type: none"> <li>• Current: no more than 67.5%</li> <li>• As of year-end 2018: no more than 67.5%</li> <li>• As of year-end 2019: no more than 67.5%</li> </ul> |

## Group Influence

Under the group rating methodology, we assess AEP as the parent of the group that includes all of the company's operating subsidiaries as members of the group. AEP's group credit profile is 'a-', leading to an issuer credit rating of 'A-'.

## Ratings Score Snapshot

### Corporate Credit Rating

A-/Stable/A-2

### Business risk: Excellent

- **Country risk:** Very low
- **Industry risk:** Very low
- **Competitive position:** Strong

### Financial risk: Significant

- **Cash flow/Leverage:** Significant

Anchor: a-

### Modifiers

- **Diversification/Portfolio effect:** Neutral (no impact)
- **Capital structure:** Neutral (no impact)
- **Financial policy:** Neutral (no impact)
- **Liquidity:** Adequate (no impact)
- **Management and governance:** Satisfactory (no impact)
- **Comparable rating analysis:** Neutral (no impact)

**Stand-alone credit profile : a-**

- **Group credit profile: a-**

## Issue Ratings

The short-term rating on AEP reflects the issuer credit rating.

### Subordination risk analysis

#### Capital structure

AEP's capital structure consists of about \$21 billion of debt of which priority debt is about \$20 billion.

#### Analytical conclusions

The senior unsecured debt at AEP is rated one notch below the issuer credit rating because priority debt exceeds 50% of the company's consolidated debt after which point AEP's debt could be considered structurally subordinated.

# American Electric Power Co. Inc.

## Credit Highlights

### Overview

#### Key Strengths

Mostly lower-risk electric utility holding company.

Large scale of operations with a customer base of about 5.4 million combined with solid geographic diversity with operations in 11 U.S. states.

Generally credit-supportive and constructive regulatory frameworks.

Coal-fired generation being scaled back through retirements as the company expands transmission assets.

#### Key Risks

Elevated capital spending program that requires ongoing balanced funding and timely cost recovery.

Operating cash flow lowered by U.S. tax reform.

Higher operational risk arising from the ownership of the Cook nuclear plant.

Financial measures at the lower end of the benchmark range for the financial risk profile, resulting in limited cushion.

**Purchase of wind energy assets will support the long-term strategy of diversifying its generation portfolio.** This is in line with American Electric Power Co. Inc.'s (AEP) previously announced strategy, and we expect the company to fund the transaction in a credit-supportive manner. This acquisition will help AEP lower its overall carbon dioxide emissions and the proportion of coal-based generation.

**Large multistate operations that have constructive regulatory frameworks bolster overall credit quality.** AEP is one of the largest electric utilities in the U.S., delivering electricity to about 5.4 million customers across 11 states. This diversity helps mitigate the impact of adverse regulatory decisions or regional economic challenges. The jurisdictions generally have a constructive regulatory framework that provides for the timely recovery of approved capital expenditures, as well as pass-through fuel cost mechanisms and recovery of various operating expenses.

**Federal Energy Regulatory Commission (FERC)-regulated transmission investments are credit-enhancing.** AEP's latest capital spending plan calls for higher spending on transmission infrastructure and projects. This should further increase its transmission rate base, providing stable and predictable cash flows by formula-based rates.

## Outlook: Stable

The stable outlook on AEP and its subsidiaries reflects the company's improving business risk profile that consists almost entirely of solid regulated utility operations. We expect AEP to generate FFO to debt of 14%-15% through 2020 after factoring in the impact of U.S. tax reform.

### Downside scenario

We could lower the ratings on AEP and its subsidiaries if the company's financial performance weakens such that FFO to debt is consistently below 14%, or if its business risk increases as a result of ineffective management of regulatory risk or the pursuit of risky unregulated investments.

### Upside scenario

While not likely, we could raise the ratings on AEP and its subsidiaries if the company's financial performance improves, with FFO to debt consistently above 20% while business risk is unchanged.

## Our Base-Case Scenario

| Assumptions   | Key Metrics                              |              |              |              |
|---|--|--------------|--------------|--------------|
| <ul style="list-style-type: none"> <li>Economic conditions in the company's service territories continue to improve modestly, supporting a gradual increase in load growth.</li> <li>Headwinds from U.S. tax reform result in lower operating cash flow.</li> <li>Capital spending is elevated at \$6 billion-\$6.5 billion per year.</li> <li>Common stock dividends total about \$1.3 billion annually.</li> <li>Negative discretionary cash flow indicates external funding needs.</li> <li>All debt maturities are refinanced.</li> </ul> |  | <b>2019E</b> | <b>2020E</b> | <b>2021E</b> |
|   | FFO to debt (%)                          | 14-16        | 14-16        | 15-17        |
|   | Debt to EBITDA (x)                       | 4.5-5        | 4.2-4.7      | 4.5-5        |
|   | FFO cash interest coverage (x)           | 4.2-4.7      | 4.5-5        | 4.8-5.3      |
|   | E--Expected. FFO--Funds from operations. |              |              |              |

### Base-case projections

- Gross margin benefits from rate recovery mechanisms and transmission formula rates, partially offset by the impact of U.S. tax reform.
- Annual debt to EBITDA is elevated into the upper-4x area.

- Negative discretionary cash flow is expected to be partly funded with debt.
- Adjusted FFO to debt of 14%-16% is expected to improve after incremental cost recovery through rates.

## **Company Description**

Columbus, Ohio-based AEP is a holding company of electric utilities that serve about 5.4 million customers in 11 states.

## **Business Risk: Excellent**

Our assessment of AEP's business risk profile is based on the very low risk of the regulated utility industry and the company's mostly lower-risk, rate-regulated operations that provide electricity, an essential service. Although in 11 states, the company's operations in Ohio, Texas, Virginia, and West Virginia represent the majority of consolidated revenues. AEP has reached largely constructive regulatory outcomes in the jurisdictions in which it operates, ensuring some cash flow stability over the next few years. AEP is investing in transmission projects, a trend that is likely to continue, providing ongoing support to credit quality through cash flow diversity and further regulatory diversification.

Quality of the service territories varies, but many are in stable and diverse economies. They collectively benefit from broad diversity that mitigates the effect of weather and local economic conditions. AEP also benefits from a diverse set of customers, which provides stability in the case of lower usage by any particular class, generating the bulk of revenues from residential, commercial, and wholesale customers with lower contribution from the more volatile industrial class.

AEP's 32,000-megawatt (MW) generation fleet benefits from low cost and efficient operations leading to competitive customer rates. Over time, the heavy reliance on coal capacity generation is reduced through plant retirements and coal plants that are mostly controlled, avoiding the need for large environmental compliance spending based on current rules. Increasing investments in transmission assets helps diversify the regulated rate base and potentially facilitate compliance with evolving environmental standards by bringing in power from other regions. These upsides are somewhat offset by the company's exposure to nuclear generation, which has higher operational risk. The company owns and operates the 2,200 MW Cook nuclear plant.

### **Peer comparison**

We consider AEP similar to peers Berkshire Hathaway Energy Co., Duke Energy Corp., WEC Energy Group Inc. (WEC), and Xcel Energy Inc. They all have excellent business risk profiles and significant financial risk profiles. They operate across numerous states, have many customers, and electric generation, including coal-fired plants. Like AEP, all peers except WEC have nuclear generation. Regulated electric transmission plays a part in each company's strategy. The three-year average of AEP's financial measures are the strongest of the peers, but after the impact of U.S. tax reform, the company is expected to decline among the middle of the peers. The utilities of these companies all operate under generally supportive regulatory environments with various rate and cost-recovery mechanisms.

FOCF--Free operating cash flow. FFO--Funds from operations.

**Financial Risk: Significant**

Under our base-case scenario, we anticipate that AEP's adjusted FFO to debt will be 14%-16% in 2019, improving to 15%-17% in the next few years as the company benefits from recovery mechanisms like the investment cost rider, formulaic transmission rates, and forward test years for rate cases. Various rate mechanisms allow for the timely recovery of costs and support more stable operating cash flow. We expect the company will continue to fund its investments in a manner that preserves credit quality.

Over the next several years, AEP's capital spending will be elevated and will exceed \$6 billion-\$6.5 billion per year. About 5% will be allocated to contracted renewables and the balance to regulated operations, including over 50% allocated to FERC-regulated transmission investments, which benefit from a constructive regulatory framework that

provides for timely investment recovery. The elevated capital spending along with dividends results in significantly negative discretionary cash flow, indicating external funding needs and likely limiting material deleveraging. We expect adjusted debt to EBITDA to be 4.5x-5x. We assess AEP's financial risk profile using our medial volatility financial benchmarks that reflects lower-risk regulated utility operations and effective management of regulatory risk. These benchmarks are more relaxed than those used for a typical corporate issuer.

FOCF--Free operating cash flow. FFO--Funds from operations. Capex--Capital expenditures.

## Liquidity: Adequate

We assess AEP's liquidity as adequate because we believe its sources are likely to cover uses by more than 1.1x over the next 12 months and meet cash outflows even with a 10% decline in EBITDA. The assessment also reflects the company's generally prudent risk management, sound relationships with banks, and a generally satisfactory standing in credit markets.

| Principal Liquidity Sources  | Principal Liquidity Uses   |
|--|--|
| <ul style="list-style-type: none"> <li>• About \$790 million cash and liquid investments.</li> <li>• Estimated cash FFO of about \$4.6 billion.</li> <li>• Credit facility availability of about \$3 billion.</li> <li>• Working capital inflows of around \$320 million.</li> </ul> | <ul style="list-style-type: none"> <li>• Capital spending of \$3.2 billion.</li> <li>• Debt maturities, including outstanding commercial paper, of about \$4.15 billion.</li> <li>• Dividends of about \$1.3 billion.</li> </ul> |

| Debt maturities   |
|---|
| <ul style="list-style-type: none"> <li>• 2019: 2.3 billion</li> <li>• 2020: 1.32 billion</li> <li>• 2021: 1.35 billion</li> <li>• 2022: 1.31 billion</li> </ul> |

## Covenant Analysis

As of Sept. 30, 2018, AEP had adequate cushion as per the financial covenant of consolidated total debt to total capital of no more than 67.5%.

| Compliance expectations   | Requirements  |
|---|---|
| <ul style="list-style-type: none"> <li>The company was in compliance as of Sept. 30, 2018.</li> <li>Single-digit percentage EBITDA growth and elevated capital spending should still permit a cushion.</li> <li>Although we believe the company will remain in compliance, covenant headroom could decrease without adequate cost recovery of capital investments or if, while making these investments, debt rises rapidly without adequate growth in equity.</li> </ul> | <ul style="list-style-type: none"> <li>Current: no more than 67.5%</li> <li>As of year-end 2019: no more than 67.5%</li> <li>As of year-end 2020: no more than 67.5%</li> </ul> |

## Environmental, Social, And Governance

With a total generation fleet capacity of over 32,000 MW, of which 75% is based on fossil fuels (about 47% coal; 28% natural gas), AEP's environmental footprint is a significant risk factor. The company's reliance on coal-fired generation exposes it to heightened risks, including the ongoing cost of operating older units in the face of disruptive technology advances and the potential for increasing environmental regulations that require significant capital investments. AEP began to reduce its reliance on coal through plant retirements and renewable investments such as hydro, wind, solar, and energy efficiency. However, this upside is partly offset by AEP's exposure to nuclear generation (7% of the generation fleet), which introduces higher operational risks and plant retirement responsibilities. AEP's management is taking active steps to reduce its fleet's environmental footprint, committing to an 80% reduction of carbon dioxide emissions by 2050 from 2000 levels.

From a social perspective, AEP's internal safety and health management systems processes enable it to effectively serve electricity customers in 11 states, serving one of the largest service territory footprints in North America. AEP's cost-reduction efforts enabled the company to stabilize operations and maintenance costs in an inflationary economic environment, facilitating competitive customer rates. This is important because all transmission and distribution companies are moving proactively to deploy capital to upgrade, modernize, and harden assets in the wake of recent weather events and for technological reasons.

Governance factors are neutral to our ESG assessment. Its governance practices are consistent with other publicly traded utilities.

## Group Influence

Under the group rating methodology, we assess AEP as the parent of the group that includes all of the company's

operating subsidiaries. AEP's group credit profile is 'a-', leading to an issuer credit rating of 'A-'.

## Issue Ratings - Subordination Risk Analysis

The short-term rating is 'A-2', based on our 'A-' issuer credit rating on the company.

| Capital structure   | Analytical conclusions   |
|---|--|
| AEP's capital structure consists of about \$21 billion of debt, of which about \$20 billion is priority debt. | We rate the unsecured debt at AEP one notch below the issuer credit rating because priority debt exceeds 50% of the company's consolidated debt, after which point AEP's debt is considered structurally subordinated. |

## Reconciliation

# American Electric Power Co. Inc.

## Credit Highlights

### Overview

| Key Strengths   | Key Risks  |
|---|--|
| Mostly lower-risk electric utility holding company.   | Elevated capital spending program requires ongoing balanced funding and timely cost recovery.                            |
| Large scale of operations with a customer base of about 5.4 million combined with solid geographic diversity with operations in 11 U.S. states. | Significant coal-fired generation remains.   |
| Generally credit-supportive and constructive regulatory frameworks.   | Higher operational risk arising from the ownership of the Cook Nuclear Plant.  |
| Coal-fired generation being scaled back through retirements as the company expands transmission assets.   | Financial measures at the lower end of the benchmark range for the financial risk profile, resulting in limited cushion. |

**Proposed North Central Wind rate-based generation investment in Oklahoma is a scalable strategy.** American Electric Power Co. Inc.'s (AEP's) proposal is credit supportive in that regulators can approve the construction of individual wind farms without approving the entire plan. S&P Global Ratings expects AEP to fund these investments in a credit-supportive manner. In addition, these wind farms will help AEP lower its overall carbon dioxide emissions and the proportion of coal-based generation.

**Large multistate operations that have constructive regulatory frameworks bolster overall credit quality.** AEP is one of the largest electric utilities in the U.S., delivering electricity to about 5.4 million customers across 11 states. This diversity helps mitigate the impact of adverse regulatory decisions or regional economic challenges. The jurisdictions generally have a constructive regulatory framework that provides for the timely recovery of approved capital expenditures, as well as pass-through fuel cost mechanisms and recovery of various operating expenses.

**Federal Energy Regulatory Commission (FERC)-regulated transmission investments are credit-enhancing.** AEP's latest capital spending plan calls for higher spending on transmission infrastructure and projects. This should further increase its transmission rate base, providing stable and predictable cash flows through formula-based rates.

## Outlook: Stable

The stable outlook on AEP and its subsidiaries reflects the company's improving business risk profile consisting almost entirely of solid regulated utility operations. We expect AEP to generate funds from operations (FFO) to debt of 15%-16% through 2021 after factoring in the impact of U.S. tax reform.

### Downside scenario

We could lower the ratings on AEP and its subsidiaries if the company's financial performance weakens such that FFO to debt is consistently below 14%, or if its business risk increases as a result of ineffective management of regulatory risk or the pursuit of risky unregulated investments.

### Upside scenario

While not likely, we could raise the ratings on AEP and its subsidiaries if the company's financial performance improves, with FFO to debt consistently above 20% while business risk is unchanged.

## Our Base-Case Scenario

| Assumptions  | Key Metrics   |              |              |              |
|--|---|--------------|--------------|--------------|
| <ul style="list-style-type: none"> <li>Economic conditions in the company's service territories continue to improve modestly, supporting a gradual increase in load growth.</li> <li>Operating cash flow expected to strengthen from rate recovery of additional capital and operating costs.</li> <li>Capital spending is elevated at \$5.8 billion-\$7.8 billion per year.</li> <li>Common stock dividends total about \$1.3 billion annually.</li> <li>Negative discretionary cash flow indicates external funding needs.</li> <li>Company refinances all debt maturities.</li> </ul> |   | <b>2019e</b> | <b>2020f</b> | <b>2021f</b> |
|  | Adjusted FFO to debt (%)                                | 13.3-14      | 14-16        | 15-17        |
|  | Adjusted debt to EBITDA (x)                             | 5.2-5.7      | 4.8-5.3      | 4.5-5        |
|  | Adjusted FFO cash interest coverage (x)                 | 4-4.5        | 4.2-4.7      | 4.5-5        |
|  | e--Expected. F--Forecasted. FFO--Funds from operations. |              |              |              |

### Base-case projections

- Gross margin benefits from rate recovery mechanisms and transmission formula rates, partially offset by the impact of U.S. tax reform.
- Annual debt to EBITDA averaging about 5x.

- Company uses debt to partly fund negative discretionary cash flow.
- Adjusted FFO to debt in the 14%-16% range, with the outer years strengthening following incremental recovery of costs through rates.

## **Company Description**

Columbus, Ohio-based AEP is a holding company of electric utilities that serve about 5.4 million customers in 11 states.

## **Business Risk: Excellent**

We base our assessment of AEP's business risk profile on the very low risk of the regulated utility industry and the company's mostly lower-risk, rate-regulated operations that provide electricity, an essential service. Although in 11 states, the company's operations in Ohio, Texas, Virginia, and West Virginia represent the majority of consolidated revenues. AEP has reached largely constructive regulatory outcomes in the jurisdictions where it operates, ensuring some cash flow stability over the next few years. AEP is investing in transmission projects, a trend that is likely to continue, providing support to credit quality through cash flow diversity and further regulatory diversification.

Quality of the service territories varies, but many are in stable and diverse economies. They collectively benefit from broad diversity that mitigates the effect of weather and local economic conditions. AEP also benefits from a diverse set of customers, which provides stability in the case of lower usage by any particular class, generating the bulk of revenues from residential, commercial, and wholesale customers with lower contribution from the more volatile industrial class.

AEP's generation fleet benefits from low-cost and efficient operations leading to competitive customer rates. Also, AEP has been lowering its historically high reliance on coal-fired generation through plant retirements and sales, bringing the company's coal-fired capacity at year-end 2019 down to 13,200 megawatts (MW), about one-half the level of 2010. In addition to lowering air emissions from generation assets, the company is avoiding the need for large environmental compliance spending to comply with existing air emissions rules. Increasing investments in transmission assets helps diversify the regulated rate base and potentially facilitate compliance with evolving environmental standards by bringing in power from other regions. These upsides are somewhat offset by the company's exposure to nuclear generation, which has higher operational risk. The company owns and operates the 2,200 MW Cook Nuclear Plant in Michigan.

### **Peer comparison**

We consider AEP similar to peers Berkshire Hathaway Energy Co., Duke Energy Corp., WEC Energy Group Inc. (WEC), and Xcel Energy Inc. They all have excellent business risk profiles and significant financial risk profiles. They operate across numerous states, have many customers, and electric generation, including coal-fired plants. Like AEP, all peers except WEC have nuclear generation. Regulated electric transmission plays a part in each company's strategy. The three-year average of AEP's financial measures after factoring in U.S. tax reform has resulted in the company declining to the middle of peers. The utilities of these companies all operate under generally supportive

regulatory environments with various rate and cost-recovery mechanisms.

FFO--Funds from operations. FOCF--Free operating cash flow. DCF--Discretionary cash flow.

**Financial Risk: Significant**

Under our base-case scenario, we anticipate AEP's adjusted FFO to debt will be in the 15%-16% range over the next few years as the company benefits from recovery mechanisms like the investment cost rider, formulaic transmission rates, and forward test years for rate cases. Various rate mechanisms allow for the timely recovery of costs and support more stable operating cash flow. We expect the company will continue to fund its investments in a manner that preserves credit quality.

Over the next several years, AEP will have elevated capital spending that will average about \$6 billion per year. About 10% will be allocated to generation including renewables and the balance to wires-based operations, including over 50% of total capital spending allocated to FERC-regulated transmission investments. These benefit from a constructive regulatory framework that provides for timely investment recovery. The elevated capital spending along with dividends results in significantly negative discretionary cash flow, indicating external funding needs and likely limiting material deleveraging. We expect adjusted debt to EBITDA in the 4.8x-5.5x range for 2020 and 2021. We assess AEP's financial risk profile using our medial volatility financial benchmarks that reflect lower-risk regulated utility operations and effective management of regulatory risk. These benchmarks are more relaxed than those used for a typical corporate issuer.

FFO--Funds from operations. FOCF--Free operating cash flow. DCF--Discretionary cash flow.

**Liquidity: Adequate**

We assess AEP's liquidity as adequate because we believe its sources are likely to cover uses by more than 1.1x over the next 12 months and meet cash outflows even with a 10% decline in EBITDA. The assessment also reflects the company's generally prudent risk management, sound relationships with banks, and a generally satisfactory standing in credit markets.

| Principal Liquidity Sources   | Principal Liquidity Uses   |
|---|--|
| <ul style="list-style-type: none"> <li>Cash and liquid investments of about \$210 million.</li> </ul> | <ul style="list-style-type: none"> <li>Capital spending of \$4.6 billion.</li> </ul> |

|  |   |
|--|---|
| <ul style="list-style-type: none"> <li>• Estimated cash FFO of about \$4.8 billion.</li> <li>• Credit facility availability of about \$4 billion.</li> </ul> | <ul style="list-style-type: none"> <li>• Debt maturities, including outstanding commercial paper, of about \$2.3 billion.</li> <li>• Dividends of about \$1.3 billion.</li> </ul> |
|--|---|

## Debt maturities

|  |
|--|
| <ul style="list-style-type: none"> <li>• 2020: \$1.02 billion</li> <li>• 2021: \$1.91 billion</li> <li>• 2022: \$2.79 billion</li> <li>• 2023: \$491 million</li> <li>• 2024: \$271 million</li> </ul> |
|--|

## Covenant Analysis

As of June 30, 2019, AEP had adequate cushion as per the financial covenant of consolidated total debt to total capital of no more than 67.5%.

| Compliance expectations  | Requirements  |
|--|---|
| <ul style="list-style-type: none"> <li>• The company was in compliance as of June 30, 2019.</li> <li>• Single-digit percentage EBITDA growth and elevated capital spending should still permit a cushion.</li> <li>• Although we believe the company will remain in compliance, covenant headroom could decrease without adequate cost recovery of capital investments or if, while making these investments, debt rises rapidly without adequate growth in equity.</li> </ul> | <ul style="list-style-type: none"> <li>• Current: no more than 67.5%</li> <li>• As of year-end 2020: no more than 67.5%</li> <li>• As of year-end 2021: no more than 67.5%</li> </ul> |

**Environmental, Social, And Governance**

We consider environmental factors in our rating analysis. AEP's social and governance factors are generally comparable with those of its peers. As both a vertically integrated and wires-only electric utility with a total generation fleet capacity of about 31,000 MW, of which 73% is based on fossil fuels (about 45% coal; 28% natural gas), AEP's environmental risks are greater than those of vertically integrated peers. The company's reliance on coal-fired generation exposes it to heightened risks, including the ongoing cost of operating older units in the face of disruptive technology advances and the potential for increasing environmental regulations that require significant capital investments. AEP began reducing its reliance on coal through plant retirements and renewable investments such as hydro, wind, solar, and energy efficiency. However, this upside is partly offset by AEP's exposure to nuclear generation (7% of the generation fleet), which introduces higher operational risks and plant retirement responsibilities. AEP's management is taking active steps to reduce its fleet's environmental footprint, committing to an 80% reduction of carbon dioxide emissions by 2050 from 2000 levels.

From a social perspective, AEP's internal safety and health management systems processes enable it to effectively serve one of the largest service territory footprints in North America. AEP's cost-reduction efforts enabled the company to stabilize operations and maintenance costs in an inflationary economic environment, facilitating competitive customer rates. This is important because all transmission and distribution companies are moving proactively to deploy capital to upgrade, modernize, and harden assets in the wake of recent weather events and for technological reasons. AEP's governance practices are consistent with other publicly traded utilities.

**Group Influence**

Under the group rating methodology, we assess AEP as the parent of the group that includes all of the company's operating subsidiaries. AEP's group credit profile is 'a-', leading to an issuer credit rating of 'A-'.

**Issue Ratings - Subordination Risk Analysis**

- The short-term rating is 'A-2', based on our issuer credit rating.
- We rate AEP's mandatory convertible equity units two notches below the issuer credit rating. This reflects that the units consist of a remarketable junior subordinated note due 2024 and a purchase contract that obligates the owners of the units to purchase AEP's common stock in three years.

| Capital structure  | Analytical conclusions   |
|--|--|
| <p>AEP's capital structure consists of about \$28 billion of debt, of which about \$22 billion is priority debt.</p> | <p>We rate AEP's unsecured debt one notch below the issuer credit rating because priority debt exceeds 50% of the company's consolidated debt, after which point AEP's debt is considered structurally subordinated.</p> |

## Reconciliation

# American Electric Power Co. Inc.

## Credit Highlights

| Overview  |  |
|---|--|
| Key strengths   | Key risks  |
| Mostly lower-risk electric utility holding company.   | Elevated capital spending program requires ongoing balanced funding and timely cost recovery.                            |
| Large scale of operations with a customer base of about 5.4 million combined with solid geographic diversity with operations in 11 U.S. states. | Significant coal-fired generation remains.   |
| Generally credit-supportive and constructive regulatory frameworks.   | Higher operational risk arising from the ownership of the Cook nuclear plant.  |
| Reducing coal-fired generation through retirements and expanding transmission assets.   | Financial measures at the lower end of the benchmark range for the financial risk profile, resulting in limited cushion. |

**Approved North Central Wind rate-based generation investment in Oklahoma is a scalable strategy.** American Electric Power Co. Inc.'s (AEP's) investment is credit supportive in that regulators can approve the construction of individual wind farms without authorizing the entire plan. The company achieved regulatory approvals in Oklahoma, Louisiana, Arkansas, and at the Federal Energy Regulatory Commission (FERC). S&P Global Ratings expects AEP to fund these investments in a credit-supportive manner. In addition, these wind farms will help AEP lower its overall carbon dioxide emissions and the proportion of coal-based generation.

**The reduction in coal-fired generation aligns with the advancement toward a clean energy future.** AEP has a goal of reducing its coal capacity to 24% of its total generation fleet by 2030. The company intends to retire 5,600 MW of coal generation within the next nine years, including the expiration of the lease on Rockport 2. With the rapid retirement of coal plants, AEP plans to replace with wind, solar, and natural gas generation.

**Large multistate operations that have constructive regulatory frameworks bolster overall credit quality.** AEP is one of the largest electric utilities in the U.S., delivering electricity to about 5.4 million customers across 11 states. The diversity helps mitigate the impact of adverse regulatory decisions or regional economic challenges. The jurisdictions generally have constructive regulatory frameworks that provide for the timely recovery of approved capital expenditures, as well as pass-through fuel cost mechanisms and recovery of various operating expenses.

**FERC-regulated transmission investments are credit-enhancing.** AEP's most recent capital spending plan calls for higher spending on transmission infrastructure and projects. This should further increase its transmission rate base, providing stable and predictable cash flows through formula-based rates.

## Outlook: Stable

The stable outlook on AEP and its subsidiaries reflects the company's improving business risk profile consisting almost entirely of solid regulated utility operations. We expect AEP to generate funds from operations (FFO) to debt 15%-16% through 2021 in our base case scenario.

### Downside scenario

We could lower the ratings on AEP and its subsidiaries if the company's financial performance weakens such that FFO to debt is consistently below 14%, or if its business risk increases as a result of ineffective management of regulatory risk or the pursuit of risky nonregulated investments.

### Upside scenario

While not likely, we could raise the ratings on AEP and its subsidiaries if the company's financial performance improves, with FFO to debt consistently above 20% while business risk is unchanged.

## Our Base-Case Scenario

### Assumptions

- Economic conditions in the company's service territories continue to improve modestly, supporting a gradual increase in load growth.
- Operating cash flows strengthen from rate recovery of additional capital and operating costs.
- Capital spending is elevated at \$6.1 billion to \$7.7 billion per year.
- Common stock dividends average about \$1.6 billion annually.
- Negative discretionary cash flow indicates external funding needs.
- Company refinances all debt maturities.

### Key Metrics

| American Electric Power Co. Inc.--Key Metrics |       |       |       |       |
|---|-------|-------|-------|-------|
|   | 2020e | 2021f | 2022f | 2023f |
| Adjusted FFO to debt (%)                      | 15-16 | 15-16 | 15-16 | 15-16 |
| Adjusted debt to EBITDA (x)                   | 5-5.5 | 5-5.5 | 5-5.5 | 5-5.5 |
| Adjusted FFO cash interest coverage (x)       | 4.5-5 | 4.5-5 | 4.5-5 | 4.5-5 |

e--expected. f--forecasted. FFO--Funds from operations.

## Base-case projections

- Gross margin benefits from rate recovery mechanisms and transmission formula rates.
- Annual debt to EBITDA averaging about 5x.
- Company uses debt to partly fund negative discretionary cash flow.
- Adjusted FFO to debt in the 15%-16% range, with the outer years strengthening following incremental recovery of costs through rates.

## Company Description

Columbus, Ohio-based AEP is a holding company of electric utilities that serve about 5.4 million customers in 11 states.

## Peer Comparison

We consider AEP similar to peers Berkshire Hathaway Energy Co., Duke Energy Corp., WEC Energy Group Inc. (WEC), and Xcel Energy Inc. They operate across multiple states, have many customers, and own electric generation, including coal-fired plants. Like AEP, all peers except WEC own nuclear generation. Regulated electric transmission play a part in each company's strategy

AEP's financial measures has resulted in the company being in the middle of its peers. These companies' utilities all operate generally supportive regulatory environments with various rate mechanisms for cost recovery.

**Business Risk: Excellent**

We base our assessment of AEP's business risk profile on the very low risk of the regulated utility industry and the company's mostly lower-risk, rate-regulated operations that provide electricity, an essential service. Although in 11 states, the company's operations in Ohio, Texas, Virginia, and West Virginia represent the majority of consolidated revenues. AEP has reached largely constructive regulatory outcomes in the jurisdictions where it operates, ensuring some cash flow stability over the next few years. AEP is investing in transmission projects, a trend that is likely to continue, providing support to credit quality through cash flow diversity and further regulatory diversification.

Quality of service territories varies, but many are in stable and diverse economies. They collectively benefit from broad diversity that mitigates the effect of severe weather and local economic conditions. AEP also benefits from a diverse set of customers, which provides stability against lower usage by any particular class, generating the bulk of revenues from residential, commercial, and wholesale customers with a lower contribution from more volatile industrial customers.

AEP's generation fleet benefits from low-cost and efficient operations leading to competitive customer rates. Also, AEP has been lowering its historically high reliance on coal-fired generation through plant retirements and sales, bringing the company's coal-fired capacity at year-end 2020 down to an expected 12,100 megawatts (MW), over 50% lower than in 2010. In addition to reducing air emissions from generation assets, retiring coal capacity results in the company avoiding large spending to comply with air emissions rules. Increasing investments in transmission assets helps

diversify the regulated rate base and potentially facilitates compliance with evolving environmental standards by bringing in power from other regions. AEP does own and operate the 2,200 MW Cook nuclear plant in Michigan, that overall, increased the company's operational risk.

## Financial Risk: Significant

Under our base-case scenario, we anticipate AEP's adjusted FFO to debt will be in the 15%-16% range over the next few years as the company benefits from recovery mechanisms like the investment cost rider, formulaic transmission rates, and forward test years for rate cases. Various rate mechanisms allow for timely recovery of costs and support more stable operating cash flow. We expect the company will continue to fund its investments in a manner that preserves credit quality.

Over the next several years, AEP will have elevated capital spending that will average about \$7 billion per year. About 15% will be allocated to renewables generation, and about 70% will focus on wires-based operations. These benefit from a constructive regulatory framework that provides for timely investment recovery. This aggressive capital spending along with robust dividends results in discretionary cash flow that is highly negative, indicating external funding needs that we expect will include debt issuances. We expect adjusted debt to EBITDA to average 5.0x through 2021. We assess AEP's financial risk profile using our medial volatility financial benchmarks that reflect lower-risk regulated utility operations and effective management of regulatory risk. These benchmarks are more relaxed than those used for a typical corporate issuer.

## Liquidity: Adequate

We assess AEP's liquidity as adequate because we believe its sources are likely to cover uses by more than 1.1x over the next 12 months and meet cash outflows even with a 10% decline in EBITDA. The assessment also reflects the company's general prudent risk management, sound relationships with banks, and a generally satisfactory standing in credit markets.

### Principal liquidity sources

- Cash and liquid investments of about \$350 million;
- Estimated cash FFO of about \$5 billion; and
- Credit facility availability of about \$4 billion.

### Principal liquidity uses

- Capital spending of \$2.5 billion;
- Debt maturities, including outstanding commercial paper, of about \$2.1 billion; and
- Dividends of about \$1.4 billion.

### **Debt maturities**

- 2021: \$2 billion
- 2022: \$3 billion
- 2023: \$740 million
- 2024: \$706 million
- Thereafter: \$18.9 billion

### **Covenant Analysis**

As of June 30, 2020, AEP had adequate cushion as per the financial covenant of consolidated total debt to total capital of no more than 67.5%.

### **Compliance expectations**

- The company was in compliance as of June 30, 2020.
- Single-digit-percentage EBITDA growth and elevated capital spending should still permit a cushion.
- Although we believe the company will remain in compliance, covenant headroom could decrease without adequate cost recovery of capital investments or if, while making these investments, debt rises rapidly without adequate growth in equity.

### **Requirements**

- Current: no more than 67.5%
- As of year-end 2021: 67.5%
- As of year-end 2022: 67.5%

## Environmental, Social, And Governance

We consider environmental factors in our rating analysis. AEP's social and governance factors are generally comparable with those of its peers. AEP through vertically integrated electric utilities and non-utility generation, owns generation capacity of about 24,000 MW, of which 72% is based on fossil fuels (about 43% coal; 29% natural gas). Because of the sizable generation capacity and exposure to fossil fuels, AEP's environmental risks are greater than those of some vertically integrated peers. The company's reliance on coal-fired generation exposes it to heightened risks, including the ongoing cost of operating older units in the face of disruptive technology advances and the potential for increasing environmental regulations that require significant capital investments. AEP began reducing its reliance on coal through plant retirements and investments in wind and solar generation, and batteries. Exposure to nuclear generation (8% of the generation fleet) introduces higher operational risks and plant retirement responsibilities. AEP's management is taking active steps to reduce its fleet's environmental footprint, committing to an 80% reduction of carbon dioxide emissions by 2050 from 2000 levels.

From a social perspective, AEP's internal safety and health management systems processes enable it to effectively serve one of the largest service territory footprints in North America. AEP's cost-reduction efforts enabled the company to stabilize operations and maintenance costs in an inflationary economic environment, facilitating competitive customer rates. This is important because all distribution and transmission companies are moving proactively to deploy capital to upgrade, modernize, and harden assets in the wake of recent weather events and for technological reasons. AEP's governance practices are consistent with other publicly traded utilities.

## Group Influence

Under the group rating methodology, we assess AEP as the parent of the group that includes all the operating subsidiaries. AEP's group credit profile is 'a-', leading to an issuer credit rating of 'A-'.

## Issue Ratings - Subordination Risk Analysis

- The short-term rating is 'A-2', based on our issuer credit rating.
- We rate AEP's mandatory convertible equity units two notches below the issuer credit rating. This reflects that the units consist of a remarketable junior subordinate note and a purchase contract that obligates the owners of the units to purchase AEP's common stock in three years.

## Capital structure

AEP's capital structure consists of about \$28 billion of debt, of which \$22 billion is priority debt.

## Analytical conclusions

We rate AEP's unsecured debt one notch below the issuer credit rating because priority debt exceeds 50% of the company's consolidated debt, after which point AEP's debt is considered structurally subordinated.

## Ratings Score Snapshot

### Issuer Credit Rating

A-/Stable/A-2

### Business risk: Excellent

- **Country risk:** Very low
- **Industry risk:** Very low
- **Competitive position:** Strong

### Financial risk: Significant

Research Update:

# American Electric Power Co. Inc. Outlook Revised To Negative On High Capital Spending And Limited Financial Cushion

April 28, 2021

## Rating Action Overview

- American Electric Power Co. Inc. (AEP) is proposing to add nearly 16,600 megawatts of renewable generation by 2030 to replace about 8,000 megawatts of retiring fossil fuel-based generation and its expiring purchase power agreements over the next 10 years, which leads us to anticipate that the company's financial measures will remain at the lower end of the range for its financial risk profile category.
- In addition, management indicated that it will purchase the coal-fired Rockport Generating Station (RGS) unit 2 from its existing owners for about \$115 million after the leases between the current owners and AEP's affiliates expire in late 2022. The company also launched a process to sell utility Kentucky Power Co. (KPCo) following a strategic review.
- We revised our outlook on parent AEP and its subsidiaries, except KPCo, to negative from stable and affirmed our 'A-' long-term issuer credit rating.
- The negative outlook on AEP and its subsidiaries (except KPCo) incorporates our expectation that the company's financial measures will remain at the lower end of the range for its financial risk profile category. In addition, the outlook reflects our assumption that AEP's management of regulatory risk will modestly weaken as it significantly increases its capital spending to execute its revised strategy. We expect the company's funds from operations (FFO) to debt to be in the 15%-16% range through 2023.

## Rating Action Rationale

**The negative outlook on AEP and its subsidiaries (except KPCo) incorporates our expectation that the company's financial measures will remain at lower-end of the range for its financial risk profile category. It also reflects our assumption that AEP's management of regulatory risk will gradually weaken.** We expect AEP's financial measures, including its FFO to debt, to remain at the lower end of its benchmark range through 2023 on aggressive capital spending averaging

\$7.5 billion per year and cumulative equity issuances of more than \$3.5 billion through 2023. The company's strategy of significantly reducing its carbon footprint, given its historically high dependence on fossil fuel-based generation, increases the associated execution risks involved in such an ambitious strategy. Throughout this process, AEP must effectively manage all of its stakeholders, including its customers, employees, and regulators. We expect that the company's management of regulatory risk will modestly weaken given its significant required investments and the typical regulatory lag when attempting to recover such investments. To account for AEP's modestly weaker management of regulatory risk, we revised our downgrade threshold for the current rating to FFO to debt of less than 16% (from 14% previously).

**We assess parent AEP's financial measures as being at the lower half of the range for its business risk profile category.** The benefits of the company's lower-risk transmission and distribution assets (about 45% of its revenue) are somewhat offset by its historically high reliance on coal generation (more than 13,000 megawatts; accounting for about 50% of its owned generation), the higher operational risk arising from its ownership of the Cook nuclear plant, and its unregulated generation and marketing business (about 10% of revenue). The generation and marketing business exposes AEP to fluctuating commodity prices and may involve significant liquidity needs, which would require diligent risk management.

**We revised our assessment of AEP subsidiary Indiana Michigan Power Co.'s (IMP) group status to highly strategic from core.** This revision reflects that the parent's announcement of its intention to sell affiliate KPCo, which we believe stems from its aggressive capital spending and funding needs, could lead to further sales of its utility subsidiaries. Specifically, we revised our assessment of IMP because of its smaller size in Indiana and Michigan, its large exposure to nuclear generation, and its longer-than-expected exposure to an elevated level of coal generation, particularly with the forthcoming purchase of the second unit at RGS in late 2022. Given AEP's ongoing strategic review, we no longer believe IMP is highly unlikely to be sold. At the same time, we revised our assessment of IMP's financial risk profile to intermediate from significant based on our expectation that its stand-alone FFO to debt will remain consistently above 23% over the next few years. As such, we also revised our stand-alone credit profile (SACP) on IMP to 'a-' from 'bbb+'. These revisions do not affect our issuer credit rating or issue-level ratings on IMP.

**We revised our assessment of KPCo's group status to moderately strategic from core.** This revision reflects AEP's announcement that it will initiate a process to sell KPCo. Despite this announcement, we continue to consider KPCo to be moderately strategic to AEP. Although KPCo may be sold, its continued access to the AEP money pool, which indicates that it is receiving some level of group support.

## Outlook

The negative outlook on AEP reflects the execution risk arising from its aggressive capital spending plan and the transformation of its generation fleet. We will monitor the company's funding decisions related to these capital investments, including whether its sources the funds from its indicated equity issuances, the conversion of mandatory convertible securities, or asset sales. Our baseline forecast for 2021-2023 assumes AEP's adjusted FFO to debt will be in the 15%-16% range.

## Downside scenario

We could lower our ratings on AEP and its subsidiaries in the next 24 months if its financial performance weakens such that its adjusted FFO to debt remains consistently below 16% or its business risk increases because of its ineffective management of regulatory risk or an increase in its riskier unregulated investments.

## Upside scenario

We could revise our outlook on AEP to stable over the next 24 months if its financial measures improve and it demonstrates a track record of maintaining FFO to debt of consistently above 16% without weakening its business risk. This could occur if AEP executes on its capital spending initiatives, including by transforming its generation fleet and funding its capital investments at least in line with disclosed amounts.

## Outlook For IMP

The negative outlook on IMP reflects our negative outlook on its parent AEP and our expectation that IMP's stand-alone financial measures will be consistently strong, including FFO to debt remaining above 23%.

## Downside scenario

We could lower our ratings on IMP over the next 24 months if we downgrade its parent AEP. We could also lower our ratings if IMP's stand-alone credit profile weakens, which could occur if its stand-alone business risk increases or its stand-alone financial measures weaken such that it maintains FFO to debt of consistently below 17%.

## Upside scenario

We could revise our outlook on IMP to stable over the next 24 months if we revise our outlook on parent AEP to stable and IMP maintains FFO to debt of consistently above 17% on a stand-alone basis without weakening its business risk.

## Company Description

Columbus, Ohio-based AEP is a holding company of electric utilities that serve about 5.5 million customers in 11 states.

## Our Base-Case Scenario

- Gross margin benefits from steady rate recovery through base-rate cases and rate surcharges, particularly for new capital spending (such as for North Central Wind);
- Capital spending inline with disclosed levels of \$7.5 billion in 2021, \$8.0 billion in 2022, and \$6.9 billion in 2023;

- Equity issuances of \$600 million in 2021, \$1.4 billion in 2022, and \$100 million in 2023. Mandatory convertible security conversions of \$805 million in 2021 and \$850 million in 2022;
- AEP ultimately sells KPCo and purchases RGS unit 2 for about \$115 million by year-end 2022;
- The company uses debt to partly fund its negative discretionary cash flow; and
- Adjusted FFO to debt in the 15%-16% range.

## Liquidity

We assess AEP's liquidity as adequate because we believe its sources of cash will likely be more than 1.1x its uses over the next 12 months and meet its outflows even if its EBITDA declines by 10%. Our assessment also reflects the company's generally prudent risk management, sound relationships with its banks, and generally satisfactory standing in the credit markets.

Principal liquidity sources:

- Cash and liquid investments of about \$470 million;
- Estimated cash FFO of about \$5.6 billion;
- Mandatory convertible conversion of \$805 million; and
- Credit facility availability of about \$5.5 billion.

Principal liquidity uses:

- Capital spending of \$4.6 billion;
- Debt maturities, including outstanding commercial paper, of about \$5.2 billion; and
- Dividends of about \$1.4 billion.

## Group Influence

Under our group rating methodology, we assess AEP as the parent of a group that includes all of its operating subsidiaries. Our group credit profile on AEP is 'a-', which leads to an issuer credit rating of 'A-'.

## Issue Ratings -- Subordination Risk Analysis

Our 'A-2' short-term on the company is based on our long-term issuer credit rating.

We rate AEP's mandatory convertible equity units two notches below our issuer credit rating. This reflects that the units, which comprise a junior subordinated note, can be remarketed and contain a purchase contract obligating the owners of the units to purchase AEP's common stock in three years.

## Capital structure

- AEP's capital structure comprises about \$34 billion, including \$24 billion of priority debt.

## Analytical conclusions

- We rate AEP's unsecured debt one notch below our issuer credit rating because its priority debt exceeds 50% of its consolidated debt, which leads us to consider this debt to be structurally subordinated.
- We rate IMP's senior unsecured debt the same level as our long-term issuer credit rating because it is the debt of a qualifying investment-grade utility.

Summary:

# Appalachian Power Co.

## Rationale

| Business Risk: Excellent  | Financial Risk: Significant   |
|---|---|
| <ul style="list-style-type: none"> <li>Vertically integrated, fully regulated electric utility.</li> <li>Generally constructive regulation.</li> <li>Large customer base, partially offset by a lack of geographic and regulatory diversity.</li> </ul> | <ul style="list-style-type: none"> <li>Financial measures supportive of financial risk profile assessment.</li> <li>Elevated capital spending.</li> <li>Negative discretionary cash flow for initial forecast period, leading to external funding needs.</li> </ul> |

## Outlook: Stable

The stable outlook on Appalachian Power Co. (AppCo) and parent American Electric Power Co. Inc. (AEP) reflects AEP's improving business risk profile that consists almost entirely of regulated utility operations, with adjusted funds from operations (FFO) to debt of about 18%.

### Downside scenario

S&P Global Ratings could lower the ratings on AppCo and AEP if AEP's financial performance weakens such that adjusted FFO to debt is consistently below 14%, or if its business risk increases as a result of ineffective management of regulatory risk or the pursuit of risky nonregulated investments.

### Upside scenario

While not likely, we could raise the ratings on AppCo and AEP if financial performance improves with adjusted FFO to debt consistently above 20% and AEP's business risk profile is unchanged.

## Our Base-Case Scenario

| Assumptions  | Key Metrics                    |                    |              |              |

## Company Description

AEP subsidiary AppCo is a vertically integrated electric utility operating in southern West Virginia and southwestern Virginia.

## Business Risk: Excellent

Our assessment of AppCo's business risk profile reflects the company's very low risk integrated electric utility operations that benefit from generally constructive regulatory frameworks, providing for timely recovery of fuel costs and invested capital. AppCo serves a large customer base of about 1 million primarily residential customers almost equally divided between Virginia and West Virginia. The customer base demonstrates little growth, and the service territory has only modest operating and regulatory diversity. AppCo's operating record for its regulated generation assets remains consistently strong, producing competitive and stable rates. However, about two-thirds of its generation capacity consists of coal-fired assets, potentially requiring additional environmental compliance capital spending.

## Financial Risk: Significant

Our stand-alone base-case scenario forecast includes adjusted FFO to debt averaging around 18%, at the midpoint of the benchmark range. Adjusted FFO cash interest coverage bolsters this determination since in our base-case scenario we expect this measure to average around 5x through the forecast period. We expect leverage, measured by debt to EBITDA, to range 3.7x-4.2x, well inside the benchmark range for the financial risk profile assessment. In our base-case forecast, we expect discretionary cash flow to remain negative after taking into account the utility's capital spending and dividend payments leading to the need for external funding.

AppCo benefits from various rate mechanisms that allow for the timely recovery of costs and support more stable operating cash flows. We expect the company will continue to fund its investments in a manner that preserves credit quality. We base our financial risk assessment on our more moderate financial ratio benchmarks as compared to a

typical corporate issuer. This reflects the company's steady cash flow from its low-risk, rate-regulated electric operations and management of regulatory risk.

## Liquidity: Adequate

We assess AppCo's stand-alone liquidity as adequate because we believe its sources are likely to cover uses by more than 1.1x over the next 12 months and meet cash outflows even with a 10% decline in EBITDA. The adequate assessment also reflects the company's generally prudent risk management, sound relationships with banks, ability to absorb high-impact, low-probability events with limited need for refinancing, and a generally satisfactory standing in the credit markets.

| Principal Liquidity Sources  | Principal Liquidity Uses   |
|--|--|
| <ul style="list-style-type: none"> <li>Estimated cash FFO of about \$900 million;</li> <li>Borrowing capacity of about \$600 million; and</li> <li>Working capital inflows of about \$30 million.</li> </ul> | <ul style="list-style-type: none"> <li>Debt maturities of about \$150 million;</li> <li>Capital spending of \$1 billion; and</li> <li>Dividends to parent of about \$180 million.</li> </ul> |

## Group Influence

We consider AppCo to be a core subsidiary of parent AEP because it is highly unlikely to be sold, has a strong long-term commitment from senior management, is successful, and contributes meaningful to the group.

## Ratings Score Snapshot

### Corporate Credit Rating

# Appalachian Power Co.

## Credit Highlights

### Overview

| Key Strengths  | Key Risks  |
|--|--|
| Vertically integrated regulated electric utility.  | Limited geographic and regulatory diversity, with most customers in West Virginia.                                   |
| Credit-supportive and constructive regulatory environment in Virginia and West Virginia.   | Over two-thirds of plant capacity is from coal-fired generation, which increases regulatory and environmental risks. |
| Mid-size utility with a customer base of about 960,000 predominantly residential and commercial customers that provide stable cash flows | Under the amended Virginia law, generation and distribution base rates are frozen until March 2020.                  |
|  | Federal tax reform temporarily weakens operating cash flow.  |

**Appalachian Power Co. (APCo) operates in generally credit-supportive environments.** Virginia provides a constructive regulatory framework that allows timely recovery of approved capital investments. The commission has also approved pass-through fuel cost mechanisms resulting in minimal regulatory lag.

**We project that debt leverage will remain elevated.** Debt leverage, as indicated by debt to EBITDA, is expected to remain in the mid- to high-4x over the next few years, partially reflecting a rate freeze until March 2020.

**Rate freeze until March 2020.** Under the amended Virginia law, APCo's existing generation and distribution base rates are frozen until after the Virginia commission rules on APCo's next biennial review, which APCo will file in March 2020 for the 2018 and 2019 test years.

## Outlook: Stable

The stable rating outlook on Appalachian Power Co. reflects that of its parent American Electric Power Co. Inc. (AEP). The stable outlook on AEP and its subsidiaries reflects that the company now consists almost entirely of regulated utilities and is likely to generate funds from operations (FFO) to debt of 14%-15% through 2020 (after factoring in the impact of tax reform).

### Downside scenario

We could lower the ratings on AEP and its subsidiaries if the company's financial performance weakens such that FFO to debt is consistently less than 14%, or if its business risk increases as a result of ineffective management of regulatory risk or the pursuit of risky unregulated investments.

### Upside scenario

While not likely, we could raise the ratings on AEP and its subsidiaries if the company's financial performance improves, with FFO to debt that consistently exceeds 20% and business risk remains unchanged.

## Our Base-Case Scenario

## Company Description

APCo is a vertically-integrated electric utility serving approximately 960,000 customers in southern West Virginia and southwestern Virginia.

## Business Risk: Excellent

Our assessment of APCo's business risk profile reflects its low-risk, vertically integrated electric utility business. This business has a generally credit-supportive regulatory framework in Virginia, which provides for the timely recovery of approved fuel costs and invested capital.

APCo serves a large customer base of about 960,000 primarily residential customers divided between Virginia and West Virginia. The company also benefits from a diverse set of customers, which provide stability in the case of lower usage by any particular class. APCo generates most of its revenues from residential, commercial, and wholesale customers, with smaller contributions from less stable industrial customers. The customer base demonstrates little growth, and the service territory has only modest operating and regulatory diversity.

In the state of Virginia, the company benefits from certain adjustments to fuel, transmission, and other rate mechanisms that provide for cost recovery in a timely manner. In early 2018, Virginia State passed the Grid Transformation & Security Act, which established triennial rate reviews for APCo beginning in 2020. In West Virginia, the company has an annual Expanded Net Energy Cost mechanism that provides for fuel cost recovery on a timely basis.

The company's operating record for its regulated generation assets remain consistently strong, producing competitive and stable prices. However, about 65% of the company's power is generated from coal, and this could result in stricter environmental regulations.

FFO--Funds from operations.

**Financial Risk: Significant**

APCo benefits from various rate mechanisms that allow for the timely recovery of costs and support stable operating cash flows. We expect the company will continue to fund its investments in a manner that preserves its credit quality.

Under our base-case scenario, we anticipate that APCo's stand-alone adjusted FFO to debt will be 16%-18% over the next few years, as the company benefits from recovery mechanisms like the fuel cost rider, forward test years for rate cases, and the recent Virginia law that established triennial rate reviews starting from 2020. These reviews should ensure the timely recovery of invested capital. In addition, ongoing discretionary cash flow deficits due to capital expenditures and dividend payments are expected to be at least partly funded with debt. We expect adjusted debt to EBITDA to be in 4.0x-5.0x range.

We base our financial risk assessment on our more moderate financial ratio benchmarks as compared to a typical corporate issuer. This reflects the company's steady cash flow from its low-risk, rate-regulated electric operations, and its management of regulatory risk.

FFO--Funds from operations.

## Liquidity: Adequate

We assess APCo.'s stand-alone liquidity as adequate because we believe its liquidity sources are likely to cover uses by more than 1.1x over the next 12 months and meet cash outflows even if EBITDA declines by 10%.

We believe APCo has sound banking relationships, the ability to absorb high-impact low probability events without the

need for refinancing, and a satisfactory standing in the credit markets.

| Principal Liquidity Sources  | Principal Liquidity Uses   |
|--|--|
| <ul style="list-style-type: none"> <li>• Estimated cash FFO of about \$775 million;</li> <li>• Borrowing availability through the group credit facilities of about \$600 million; and</li> <li>• Working capital inflows of about \$20 million.</li> </ul> | <ul style="list-style-type: none"> <li>• Debt maturities of about \$530 million;</li> <li>• Capital spending of about \$550 million; and</li> <li>• Dividends of about \$190 million.</li> </ul> |

| Environmental, Social, And Governance   |
|---|
| <p>APCo's carbon footprint is a significant environmental risk factor in the long run due to its high level of coal-based power generation. Of APCo's 7,440 megawatts (MW) of owned generation capacity and 919 MW of purchased power capacity, coal contributes around 65%, hydro and wind around 16%, and natural gas about 19%.</p> <p>The company's reliance on coal-fired generation exposes it to heightened risks, including the ongoing cost of operating older units in the face of disruptive technology advances, and the potential for significant capital investments to meet increasing environmental regulation. APCo and parent AEP have begun to reduce reliance by retiring coal plants, and investing in hydro, wind, solar, and energy efficiency. Parent AEP's management is taking active steps to reduce the company's environmental footprint, committing to cutting CO2 emissions to 80% of 2000 levels by 2050.</p> |

## Group Influence

We consider APCo to be a core subsidiary of AEP because it is highly unlikely to be sold, has a strong long-term commitment from senior management, is successful at what it does, and contributes significantly to the group. There are no meaningful insulation measures that protect APCo from AEP. Therefore, our issuer credit rating on APCo is in line with AEP's group credit profile of 'a'.

## Issue Ratings

The short-term rating on APCo is 'A-2' based on the issuer credit rating.

## Issue Ratings - Subordination Risk Analysis

## Capital structure

APCo's capital structure consists of roughly \$4.3 billion of debt.

## Analytical conclusions

We rate APCo's senior unsecured debt the same as the issuer credit rating because it is the debt of a qualified investment-grade utility.

## Reconciliation

## Credit Highlights

### Overview

| Key strengths   | Key risks  |
|---|--|
| Regulated vertically integrated electric utility.   | Limited geographic and regulatory diversity, with most customers in West Virginia.                                   |
| Credit-supportive regulatory environment in Virginia and West Virginia.   | Over two-thirds of plant capacity is from coal-fired generation, which increases environmental and regulatory risks. |
| Mid-size utility with a customer base of about 960,000 predominantly residential and commercial customers, which provides stable cash flows | Generation and distribution base rates have been frozen in Virginia.   |

**Appalachian Power Co. (APCo) operates in generally credit-supportive environments.** Virginia provides a constructive regulatory framework that allows timely recovery of approved capital investments. The commission has also approved pass-through fuel cost mechanisms resulting in minimal regulatory lag.

**Rate freeze until the PSC authorizes a new rate change.** Under the amended Virginia law, APCo's existing generation and distribution base rates are frozen until after the Virginia commission rules on APCo's pending triennial review that it filed in March 2020 for the 2018 and 2019 test years. We will continue to monitor for this review and its outcome as to how the commission will rule.

**We project that debt leverage will remain elevated.** Debt leverage, as indicated by debt to EBITDA, is expected to remain in the mid- to high-4x over the next few years, partially reflecting the rate freeze.

**Outlook: Stable**

The stable outlook on APCo reflects that of its parent American Electric Power Co. Inc. (AEP). The stable outlook reflects AEP's improving business risk profile consisting almost entirely of solid regulated utility operations. We expect AEP to generate funds from operations (FFO) to debt of 15%-16% through 2021 after factoring in the impact of tax reform.

**Downside scenario**

We could lower the ratings on AEP and its subsidiaries if its financial performance weakens such that FFO to debt is consistently below 14%, or if its business risk increases as a result of ineffective management of regulatory risk or the pursuit of risky unregulated investments.

**Upside scenario**

While not likely, we could raise the ratings on AEP and its subsidiaries if its financial performance improves, with FFO to debt consistently above 20% while business risk is unchanged.

**Our Base-Case Scenario**

| Assumptions  | Key Metrics                    |              |              |              |

## Company Description

APCo is a vertically integrated electric utility serving approximately 960,000 customers in southern West Virginia and southwestern Virginia.

## Business Risk: Excellent

Our assessment of APCo's business risk profile reflects its low-risk, vertically integrated electric utility business. This business has generally credit-supportive regulation that provides for the timely recovery of approved fuel costs and invested capital.

APCo serves a large customer base of about 960,000 primarily residential customers divided between Virginia and West Virginia. The company also benefits from a diverse set of customers, which provide stability in the case of lower usage by any particular class. APCo generates most of its revenues from residential, commercial, and wholesale customers, with smaller contributions from less stable industrial customers. The customer base demonstrates little growth, and the service territory has only modest operating and regulatory diversity.

In Virginia, the company benefits from certain adjustments to fuel, transmission, and other rate mechanisms that provide for cost recovery in a timely manner. Beginning this year, the Virginia commission will be conducting triennial rate reviews of APCo.

The company's operating record for its regulated generation assets remains consistently strong, producing competitive and stable prices. However, about 65% of the company's power is generated from coal, and this could result in stricter environmental regulations.

FFO--Funds from operations. FOCF--Free operating cash flow. DCF--Discretionary cash flow.

## Financial Risk: Significant

Under our base-case scenario, we anticipate that APCo's stand-alone adjusted FFO to debt will be 16%-18% over the next few years. Our financial risk profile assessment is also supported by adjusted FFO cash interest coverage in the 4.4x-5.2x range. Ongoing discretionary cash flow deficits, in part from ongoing capital spending and dividends, will require external funding including through debt issuances. The regulated nature of the transmission and distribution business provides stable cash flows, which we view as credit supportive.

APCo benefits from various rate mechanisms that allow for the timely recovery of costs and support stable operating cash flows. This includes rate surcharges like the fuel cost rider, forward test years for rate cases, and the recent Virginia law that established triennial rate reviews starting from 2020. We expect the company will continue to fund its investments to preserve its credit quality. These capital expenditures, along with dividends, are expected to drive ongoing discretionary cash flow deficits that are expected to be at least partly funded with debt. We expect adjusted debt to EBITDA to be in 4.2x-4.7x range, indicating significant debt leverage.

We use our medial volatility table, which reflects more relaxed benchmarks than those used for most corporate issuers. This reflects the company's steady cash flow, rate-regulated utility operations, and effective regulatory risk management.

FFO--Funds from operations.

## Liquidity: Adequate

We assess APCo's stand-alone liquidity as adequate because we believe its liquidity sources will likely cover uses by more than 1.1x over the next 12 months and meet cash outflows even if EBITDA declines 10%. We believe APCo has sound banking relationships, the ability to absorb high-impact, low probability events without needing refinancing, and a satisfactory standing in the credit markets.

| Principal Liquidity Sources  | Principal Liquidity Uses   |
|--|--|
| <ul style="list-style-type: none"> <li>• Estimated cash FFO of about \$760 million; and</li> <li>• Borrowing availability through the group credit facilities of about \$600 million.</li> </ul> | <ul style="list-style-type: none"> <li>• Debt maturities of about \$430 million;</li> <li>• Capital spending of about \$600 million; and</li> <li>• Dividends of about \$200 million.</li> </ul> |

**Environmental, Social, And Governance**

APCo's carbon footprint is a significant environmental risk factor in the long run due to its high level of coal-based power generation. Of APCo's 7,440 megawatts (MW) of owned generation capacity and 919 MW of purchased power capacity, coal contributes around 65%, hydro and wind around 16%, and natural gas about 19%. The company's reliance on coal-fired generation exposes it to heightened risks, including the ongoing cost of operating older units in the face of disruptive technology advances, and the potential for significant capital investments to meet increasing environmental regulation. APCo and parent AEP have begun to reduce reliance by retiring coal plants, and investing in hydro, wind, solar, and energy efficiency. Parent AEP's management is taking active steps to reduce its environmental footprint, committing to cutting carbon dioxide emissions to 80% of 2000 levels by 2050.

## Group Influence

We consider APCo to be a core subsidiary of AEP because it is highly unlikely to be sold, has a strong long-term commitment from senior management, is successful at what it does, and contributes significantly to the group. There are no significant insulation measures that protect APCo from AEP. Therefore, our issuer credit rating on APCo is in line with AEP's group credit profile of 'a-'.

## Issue Ratings - Subordination Risk Analysis

The short-term rating on APCo is 'A-2' based on the issuer credit rating.

### Capital structure

APCo's capital structure consists of roughly \$4.1 billion of debt.

### Analytical conclusions

We rate APCo's senior unsecured debt the same as the issuer credit rating because it is the debt of a qualified investment-grade utility.

## Reconciliation

# Appalachian Power Co.

## Credit Highlights

### Overview

#### Key strengths

Regulated and vertically integrated electric utility.

The credit-supportive regulatory environment in both Virginia and West Virginia.

Midsized utility with a customer base of about 960,000 predominantly residential and commercial customers, which provide stable cash flows.

#### Key risks

Limited geographic and regulatory diversity with most customers located in West Virginia.

Over two-thirds of plant capacity comes from coal-fired generation, which increases environmental and regulatory risks.

**Appalachian Power Co. (APCo) operates in generally credit-supportive environments.** Virginia provides a constructive regulatory framework that allows for the timely recovery of approved capital investments. The Virginia commission has also approved fuel cost pass-through mechanisms that lead to minimal regulatory lag. However, we are monitoring proposed legislation in Virginia that would modify the existing regulatory framework.

**APCo has appealed the Virginia commission's decision for no rate change in its most recent rate case.** APCo filed its triennial review in March 2020 for the 2018 and 2019 test years. The Virginia regulatory commission deemed that no rate change was appropriate and the utility subsequently filed an appeal in December 2020. We will continue to monitor this appeal to see how the commission ultimately rules.

**We project that APCo's debt leverage will remain elevated.** We expect the company's debt leverage, as measured by its debt-to-EBITDA ratio, to remain in the high-4x range over the next few years, which partly reflects the Virginia commission's decision for no rate change in its most recent rate case.

## Outlook: Stable

The stable outlook on Appalachian Power Co. (APCo) reflects our stable outlook on its parent American Electric Power Co. Inc. (AEP). The stable outlook on AEP and its subsidiaries reflects the company's improving business risk profile, which now consists almost entirely of solid regulated utility operations. We expect AEP to generate funds from operations (FFO) to debt of 15%-16% through 2021 under our base-case scenario.

### Downside scenario

We could lower our ratings on AEP and its subsidiaries if its financial performance weakens such that its FFO to debt remains consistently below 14%. We could also lower our rating if its business risk increases because of ineffective management of regulatory risk or the pursuit of risky unregulated investments.

### Upside scenario

While unlikely at this time, we could raise our ratings on AEP and its subsidiaries if its financial performance improves such that it sustains FFO to debt of consistently above 20% and its business risk remains unchanged.

## Our Base-Case Scenario

### Assumptions

- Elevated capital spending of \$750 million–\$1 billion per year, mainly for infrastructure investments;
- After capital spending and dividend payments, we expect the company's discretionary cash flow to be negative and anticipate it will partly fund the deficit with debt;
- Ongoing cost recovery through various regulatory mechanisms; and
- All debt maturities are refinanced.

### Key Metrics

|                                | 2020e     | 2021f     | 2022f     | 2023f     |

## **Business Risk: Excellent**

Our assessment of APCo's business risk profile reflects its operations as a vertically integrated electric utility. The utility has typically operated under credit-supportive regulation that provides for the timely recovery of approved fuel costs and invested capital. APCo serves a large customer base of about 960,000 primarily residential customers divided between Virginia and West Virginia. The company also benefits from its diverse set of customers, which helps stabilize its demand if it experiences reduced usage from any particular class. APCo generates most of its revenue from its residential, commercial, and wholesale customers, with smaller contributions from potentially more cash flow volatile industrial customers. The utility's customer base has demonstrated little growth and we view its service territory as offering only modest operating and regulatory diversity.

In Virginia, the company benefits from certain fuel, transmission, and other rate mechanisms that provide for timely cost recovery. The Virginia commission conducts triennial reviews of APCo's electricity rates.

The operating record of the company's regulated generation assets has remained consistently strong and it produces competitive and stable prices. However, APCo generates about 65% of its power from coal, which could cause it to face stricter environmental scrutiny.

## **Financial Risk: Significant**

Under our base-case scenario, we anticipate that APCo's stand-alone adjusted FFO to debt will be in the 15%-18% range over the next few years. Our financial risk profile assessment also reflects our forecast for adjusted FFO cash interest coverage in the 4.5x-5.0x range. However, the utility's ongoing discretionary cash flow deficits--due, in part, to its capital spending and dividends--will require external funding, including through debt issuances. The regulated nature of the utility's operations provides it with stable cash flows that we believe support its credit quality.

APCo benefits from various rate mechanisms that allow for the timely recovery of costs and support its stable operating cash flows. This includes rate surcharges like the fuel cost rider, forward test years for rate cases, and the Virginia law that established triennial rate reviews beginning in 2020. We expect the company will continue to fund its investments in a manner that preserves its credit quality. We expect its capital expenditure and dividends to lead to ongoing discretionary cash flow deficits, which we expect it will fund, at least partly, with debt. In addition, we expect APCo to sustain significant adjusted debt to EBITDA in 4.6x-5.0x range over the next few years.

We assess APCo's financial risk profile using our medial volatility financial benchmarks, which reflect its lower-risk regulated utility operations and effective management of regulatory risk. These benchmarks are more relaxed than the benchmarks we use for typical corporate issuers.

## **Financial summary**

## Liquidity: Adequate

We assess APCo's stand-alone liquidity as adequate because we believe its sources will likely be more than 1.1x its uses over the next 12 months and continue to meet its cash outflows even if its EBITDA declines by 10%. We believe the utility has sound banking relationships, the ability to absorb high-impact, low-probability events without needing to refinance, and a satisfactory standing in the credit markets.

| <b>Principal Liquidity Sources</b>  | <b>Principal Liquidity Uses</b>  |
|---|--|
| <ul style="list-style-type: none"> <li>Estimated cash FFO of about \$830 million;</li> <li>Cash and liquid investments of about \$3 million; and</li> <li>Borrowing availability through group credit facilities of about \$500 million.</li> </ul> | <ul style="list-style-type: none"> <li>Debt maturities of about \$590 million;</li> <li>Capital spending of about \$450 million; and</li> <li>Dividends of about \$170 million.</li> </ul> |

## Environmental, Social, And Governance

APCo's carbon footprint is a significant environmental risk factor due to its high level of coal-based power generation. Of the utility's 7,400 megawatts (MW) of owned generation capacity and 919 MW of purchased power capacity, it derives about 65% from coal, about 20% from natural gas, and approximately 15% from hydro and wind. The company's reliance on coal-fired generation exposes it to heightened risks, including the ongoing cost of operating older units in the face of disruptive technology advances and the potential for significant required capital investments to meet increasingly stringent environmental regulation. APCo and its parent AEP have begun to reduce their reliance on fossil fuels by retiring coal plants and investing in hydro, wind, and solar generation while improving their energy efficiency. Parent AEP's management is taking active steps to reduce its environmental footprint, including by committing to cut its carbon dioxide emissions to 80% of 2000 levels by 2050.

## Group Influence

Under our group rating methodology, we consider APCo to be a core subsidiary of parent AEP, which reflects our view that it is highly unlikely to be sold, is integral to the group's overall strategy, possesses a strong long-term commitment from senior management, and is closely linked to the parent's name and reputation. Therefore, our issuer credit rating on APCo is in line with our 'a-' group credit profile on AEP.

## Issue Ratings - Subordination Risk Analysis

- Our 'A-2' short-term rating on APCo is based on our long-term issuer credit rating.

### Capital structure

- APCo's capital structure includes roughly \$4.8 billion of debt.

### Analytical conclusions

- We rate APCo's senior unsecured debt at the same level as our long-term issuer credit rating because it is the debt of a qualifying investment-grade utility.

## RATING ACTION COMMENTARY

# Fitch Affirms American Electric Power and Subsidiaries Ratings; Outlook Stable

Wed 01 Jul, 2020 - 3:59 PM ET

Fitch Ratings - New York - 01 Jul 2020: Fitch Ratings has affirmed the Long-Term Issuer Default Rating (IDR) and senior unsecured ratings for American Electric Power Company, Inc. (AEP) at 'BBB+' and AEP's Short-Term IDR and CP at 'F2'. Additionally, Fitch has affirmed AEP's utility operating subsidiaries as follows: Ohio Power Co. (OPCo) at 'A-'; AEP Texas (AEPTX), Appalachian Power Co. (APCo), Indiana Michigan Power Co. (IMPCo), and Public Service Company of Oklahoma (PSO) at 'BBB+'; Kentucky Power Co. (KPCo) and Southwestern Electric Power Co. at 'BBB'. The Rating Outlook for AEP and all of the above subsidiaries is Stable.

The affirmation of AEP and subsidiaries is based on AEP's low risk profile as a regulated utility system, its transition of the regulated generation fleet away from coal generation, and ongoing efforts to improve regulated returns. However, AEP and most of its subsidiaries have limited to no headroom at the current rating levels when considering the company's current public capex forecast and after giving effect for Fitch's coronavirus base scenario. Fitch expects AEP will take the necessary action in the form of capex reductions, capital rotation, or equity funding to return metrics to within the stated thresholds. Absent such measures, negative

rating actions are likely. Fitch's ratings also are predicated on the maintenance of strong regulatory relationships in its multiple state jurisdictions.

## KEY RATING DRIVERS

American Electric Power Co.

**Coronavirus Impacts:** The coronavirus pandemic is causing unprecedented disruptions to state and local economies, including the numerous states in which AEP operates. Many of AEP's service territories have significant large commercial and industrial customer base. Fitch estimates AEP's retail revenue mix in 2019 to be approximately residential-49%, commercial-27%, and industrial 24%. As such, AEP is expected to see significant near term reductions in kilowatt hour sales, revenues, and cash flow. The company has revised its 2020 load estimate as follows: residential +3.0% versus -1.4%, commercial -5.6% versus -0.4%, and industrial -8.0% versus +3.2% and announced that it has shifted \$500 million of 2020 capex to later in the five year plan. Most of the company's jurisdictions have implemented tracking or deferral mechanisms; however, the ultimate recovery of COVID-19 related expenses are unknown at this time. Fitch has utilized its coronavirus base scenario of residential sales up 2%; commercial down 10%; industrial down 15% from 2019; nine months of impact in 2020; three months of impact 2021. AEP's transmission-only subsidiary, AEP Transmission LLC (AEP Transco, A-/Stable), is expected to be minimally impacted from coronavirus, given that its revenue is not volume dependent.

**Balanced Regulatory Construct:** Fitch views the state regulatory constructs within AEP's service territories as balanced. Approximately 97% of AEP's 2019 EBITDA is derived from its utility subsidiaries. Authorized state ROEs are close to the industry average in most jurisdictions and include provisions to mitigate commodity and environmental regulation risks. AEP's transmission entities, most of which are subsidiaries of AEP Transco, operate under a tariff approved by the Federal Energy Regulatory Commission (FERC). The FERC tariff provides timely recovery of capital and operating costs as well as favorable ROEs (10.35% and 10.50%) and robust capital structures. Management expects that nearly 70% of the company's 2020-2024 capital plan will be recoverable under reduced lag mechanisms. Fitch expects consolidated earned ROE, which was 9.1% for the LTM ended March 31, 2020, to average around 9% in 2020-2022.

**Large Capex Spending:** Fitch's base case scenario includes management's 2019 capex forecast with the aforementioned \$500 million shift as follows: 2020-\$5.8 billion, 2021-\$6.2 billion, and 2022-\$6.4 billion. While not included in Fitch's rating case, the company current forecast indicates 2023-2024 capex to increase to \$7 billion annually, bringing the five-year total to \$33 billion. AEP's capex is almost exclusively geared to expanding the regulated rate base, with 47% planned for transmission assets, the majority of which are regulated by FERC. As a result of AEP's increased investments in transmission and distribution assets, its consolidated net plant profile has shifted to 24% generation in 2019 from 50% generation in 2009.

**Fleet Transformation:** AEP remains committed to reducing its reliance on coal generation. Coal-fired generation is expected to account for 44% of AEP's total generating and capacity mix in 2020, down significantly from 70% in 2005. The company plans to continue to reduce its reliance on coal-fired generation and increase renewable capacity through construction of rate-based assets and power purchase agreements (PPAs). In the wake of the July 2018 cancellation of its \$4.5 billion Wind Catcher Energy Connection project, AEP in 2019 announced the planned purchase of three wind projects totaling \$2.0 billion to supply SWEPCo and PSO 1,485MW of wind power, which is not reflected in the current 2020-2024 capex plan.

**Rate Based Wind Transaction:** As proposed, North Central Wind will be split between PSO (45.5% ownership) and SWEPCO (54.5% ownership) and will be rate-based assets. One of the projects, totaling 199MW, is required to be in service by the end of 2020 and the other two projects, totaling 1,286MW, by YE 2021. AEP has received regulatory approvals from four of the five jurisdictions, with Texas (20.8% participation) remaining and plans to move forward with the entire planned acquisition. The company has stated that it plans to finance the wind project investment with 50%-66% equity.

**Contracted Renewables Transaction:** In April 2019, AEP closed on the acquisition of Sempra Energy's renewable portfolio. The transaction value was \$1.05 billion, including the assumption of \$470 million of existing project debt and tax equity. The 724 net MW wind portfolio spans seven states and has 21% of its PPAs with AEP subsidiaries Ohio Power Co., SWEPCo, and Indiana Michigan Power Co. The acquisition advances AEP's commitment to invest \$2.2 billion in contracted renewables by 2023, and includes experienced personnel and a 1 gigawatt

development pipeline. AEP issued \$805 million in equity units in 2019 to fund the Sempra transaction and for other corporate purposes.

**Weaker Credit Protection Measures:** Prior to the effect of the coronavirus, AEP's consolidated credit metrics as measured by FFO leverage were expected to be at or near its current downgrade threshold of 5.0x as a result of continued high capex. Given the expected additional financial impacts due to the coronavirus, AEP's FFO leverage is expected to be above its stated downgrade metric over the forecast period. Fitch expects AEP will take the necessary action in the form of capex reductions, capital rotation, or equity funding to return metrics to within the stated thresholds. Absent such measures, negative rating actions are likely.

Weaker credit metrics are partially offset by favorable qualitative considerations such as the regulatory, geographic and cash flow diversity provided by the AEP's ownership of nine regulated electric utilities operating in 11 states and the company's growing investments in FERC-regulated transmission projects. Additionally, Fitch estimates AEP's parent-level debt will account for approximately 20%-25% of AEP's total debt load over the forecast period, against 25%-30% at its most of its peers.

**Parent-Subsidiary Rating Linkage:** AEP and its regulated subsidiaries have operational, financial and functional ties, resulting in moderate ratings linkage. The treasury function is centrally managed and all regulated subsidiaries depend on AEP for short-term liquidity and participate in AEP's money pool. The money pool allows the utilities to manage working capital needs and provides short-term financing. Legal ties are weak, as the parent does not guarantee the debt obligations of its regulated subsidiaries.

AEP and most of its subsidiaries have limitations on capital structure from covenants in the bank credit agreement (debt/total capitalization that does not exceed 67.5%) and from regulatory requirements to maintain a specific equity ratio. No cross-default provisions exist among AEP and its subsidiaries. Due to these linkages, Fitch typically limits the notching difference between AEP and its subsidiaries to one to two notches.

Fitch applied a bottom-up approach in rating AEP's utility subsidiaries. Regulated subsidiaries are rated lower and/or higher than AEP, reflecting the strength of their balance sheets, the quality of their service areas and the constructiveness of their regulatory environments. Fitch rates AEP on a consolidated basis. AEP Transco and

OPCo are considered to have stronger credit profiles than AEP, while AEP is considered to have a stronger credit profile than some of its other utility subsidiaries, due to benefits from regulatory and geographic diversity. Fitch applies a one-notch uplift to the ratings of KPCo as a reflection of the implied support from the stronger parent company. Fitch expects AEP will adjust dividends from subsidiaries as needed and/or inject equity into subsidiaries to maintain regulatory capital structures and support credit metrics.

#### AEP Texas Inc.

**Low-Risk Business Profile:** AEPTX owns and operates regulated electricity T&D networks located in the Electric Reliability Council of Texas (ERCOT). The Public Utility Commission of Texas (PUCT) sets rates on a cost-of-service basis with the opportunity for capital recovery outside of base rate proceedings through annual or semi-annual clause mechanisms. AEPTX does not have direct exposure to commodity prices. The energy from AEPTX's partial interest in the Oklaunion Power Station, a 650MW coal-fired plant in Texas, is sold to an affiliated company through a cost pass-through power purchase agreement. AEP expects to close the Oklaunion plant by September 2020.

**Recent Base Rate Proceeding:** AEPTX recently concluded, as per settlement, its first base rate proceeding since 2006. The approved settlement resulted in a \$40 million revenue decrease based upon a 9.4% ROE, 42.5% hypothetical equity capital structure and 2018 test year. In addition to traditional rate case issues, the somewhat contentious proceedings included return of excess federal income taxes collected due to the Tax Cuts and Jobs Act of 2017 (TCJA), implementation of ringfencing measures, inclusion in base rates of amounts previously recovered under rate riders, and consolidation of rate structures of AEPTX's two predecessor entities. AEP is required to file its next base rate case within four years of the April 2020 final PUCT order. AEPTX's last rate cases were adjudicated by its two predecessor companies, AEP Texas Central and AEP Texas North, in 2007 and 2008, respectively, where rates for both entities were established on a 60%/40% debt/equity capital structure and an ROE of 9.96%.

**Resumption of Cost Recovery Mechanisms:** With the resolution of the base rate case, AEPTX is now able to resume filings for the annual distribution cost recovery factor (DCRF) and semi-annual transmission cost of service (TCOS). Both recovery mechanisms allow the company to recover capital outside of base rate proceedings and help to reduce regulatory lag. In April, AEPTX submitted a DCRF filing to add

approximately \$441 million in assets to rate base and a TCOS filing to recover \$806 million in transmission investments.

**Ring Fencing Measures:** The PUCT ordered ring-fencing measures in AEPTX's base rate case. Among the measures agreed to in AEPTX settlement were restrictions on guarantees and pledge of assets, prohibition on participation in credit facilities with unregulated affiliates, and maintenance of a AEPTX's standalone credit profile and credit ratings. The commission allowed AEPTX to continue to participate in the AEP utility money pool and use shared assets as governed by the PUCT's affiliate rules. While dividend restrictions were debated, the PUCT did not impose any in the final order.

**Energy Industry Exposure:** AEPTX's service territory encompasses the Eagle Ford and Permian shale gas basins, which had been experiencing an uptick in economic activity. AEPTX's weather-normalized kWh sales were expected to increase 2.5% in 2020, with industrial sales expected to increase around 11.0%. While both areas are considered to have better economics than other U.S. oil and gas producing formations, price declines due to worldwide over production and reduced demand to the coronavirus could result in lower than expected economic activity in AEPTX's service territory. For the 12 months ended December 2018, AEPTX's top 10 industrial customers accounted for 45% of its industrial sales.

**Pressured Credit Metrics:** Fitch expects AEPTX's FFO leverage to remain elevated at, or slightly above, its 5.0x downgrade metric as a result of tax reform, continued robust capex plan, and expected service territory weakness. The company's 2020-2022 capex forecast of almost \$3.4 billion is flat versus the prior three-year forecast. Fitch expects parent AEP will continue to make equity infusions to maintain credit metrics consistent with AEPTX's current ratings and required regulatory capital structure. Over 2017-2019, AEP made approximately \$600 million in equity contributions to AEPTX.

## Appalachian Power Company

**Constructive Virginia Regulation:** Fitch considers Virginia utility regulation, including legislatively enacted changes in 2018, to be supportive of credit quality. Legislation passed in March 2018 addressed the effect of the TCJA, codified the next base rate proceedings and allowed for the reinvestment of any overearnings proceeds. APCo's rates have been frozen in Virginia since 2015. However, adjustment mechanisms in place for fuel costs, purchased power, infrastructure and

environmental investments have resulted in relatively stable cash flow. The company was required to file a Virginia base rate case in March 2020.

**Virginia Base Rate Filing:** APCo filed its legislatively-mandated triennial review covering the earnings test years of 2017-2019 on March 31, 2020. The company is requesting a net revenue increase of \$38 million after giving effect for \$27 million of depreciation and amortization adjustments. The company's filing is based upon a 9.9% ROE and 50% equity capitalization. The company is requesting to increase the residential fixed monthly charge to \$14.00 from \$7.96. Hearings are expected to begin in September with new rates effective 1Q21.

**Constructive West Virginia Settlement:** Fitch Ratings views APCo's 2019 rate settlement as constructive. The West Virginia Public Service Commission (WVPSC) approved the settlement agreement on Feb. 27, 2019, concluding APCo's first rate case in its West Virginia jurisdiction in over five years. The settlement includes an annual base rate increase of \$44 million (including \$8 million for WPCo) based on a 9.75% return on common equity, 50.16% equity capitalization and \$4.0 billion combined rate base. APCo's last West Virginia rate decision was in May 2015, when rates were set based on a 9.75% ROE and 47.16% equity capitalization.

**Improving West Virginia regulation:** Fitch historically has considered the regulatory compact in West Virginia to be restrictive, owing to a history of lower than average ROEs and historic test years that exacerbate regulatory lag. However, Fitch views recent rate decisions in the state as more balanced from a credit perspective including settled outcomes and use of riders for certain costs.

**Challenged Service Territory:** Historically, economic activity in APCo's service area has been primarily driven by coal mining, which has seen significant contraction in recent years. West Virginia coal output has decreased by about 40% over the last decade. APCo's average residential customer count has declined about 1% over the same time period, while large commercial and industrial customer numbers have declined approximately 7%. The company is actively pursuing economic development opportunities in its service territory. Fitch expects that growth in oil and gas extraction will mitigate some of the effects of the secularly declining coal industry, especially in West Virginia.

**Reliance on Coal Shifting:** APCo's approximately 61% coal generation (including PPAs) is the second highest of the AEP integrated companies. As a result, the company is exposed to potentially higher expenditures as increasingly stringent

environmental regulations are implemented. APCo continues to pursue clean energy resources. The company owns 785MW of renewable generation and has PPAs in place for another 575MW, totaling almost 18% of its generation mix. APCo has shuttered 1,270MW of coal-fired generation since 2011.

**Capex Program:** APCo's capex is expected to increase approximately 3% compared with previous three year forecasts. Fitch expects the company to expand its rate base by almost 6% annually in 2018-2022 with expenditures of \$2.5 billion in 2020-2022. While not included in our rating case, 2023-2024 capex is forecast by the company to increase an average of \$988 million annually, bringing the five-year total to \$4,501 million. Approximately 76% of APCo's capex is for transmission and distribution investments and 8% is earmarked for regulated renewables.

**Weaker Credit Metrics:** As of LTM March 31, 2020, APCo's earned ROE decreased to 8.7% from 9.2% at LTM Dec. 31, 2019. Unfavorable weather and higher depreciation expense offset the result of satisfactory outcomes to general rate case in West Virginia, effective rate adjustment mechanisms in Virginia and cost-reduction programs. Prior to Fitch's coronavirus base scenario assumptions, APCo's credit metrics were expected to be at or near its 4.8x downgrade metric. Given the expected economic impacts of the coronavirus and large capex budget, Fitch expects APCo's credit metrics to remain elevated at, or slightly above, its stated downgrade metric. Fitch expects parent AEP will manage APCo's dividends to maintain the company's regulatory capital structure and support credit metrics.

Indiana Michigan Power Co.

**Supportive Regulation:** Fitch considers the regulatory regime in Indiana and Michigan to be supportive. In addition to slightly above average ROEs, both states utilize recovery riders for environmental upgrades, fuel costs, energy-efficiency programs and other costs.

The Indiana Utility Regulatory Commission (IURC) issued in March 2020 an order authorizing a \$26 million net annual base rate increase based upon a 9.7% ROE, 46.8% equity capitalization and 2020 forecasted test year. The two part increase will be phased in beginning March 2020 and the full rate effective January 2021.

IMPCo's last Indiana rate case was resolved by a rate settlement approved in May 2018 that resulted in a gross revenue increase of \$182 million effective July 1, 2018 and net change to of \$97 million after rolling some existing rider amounts into base

rates and the effect of tax reform. The 2018 rate decision was based on a 9.95% ROE and 35.73% equity capitalization.

In IMPCo's smaller Michigan jurisdiction, the Michigan Public Service Commission (MPSC) authorized a \$30 million net rate increase effective February 2020. The rate increase was based on a 9.86% ROE, 46.56% equity capitalization, 2020 forecasted test year. The company's previous MPSC rate decision resulted in an authorized \$49 million rate effective April 2018 on a 9.9% ROE and 36.38% equity capitalization.

Capex Program: Fitch expects IMPCO to expand its rate base by almost 6% annually in 2018-2022 with expenditures of \$1.7 billion in 2020-2022. While not included in our rating case, 2023-2024 capex is forecast by the company to increase an average of \$600 million annually, bringing the five-year total to \$2,923 million. The company plans to invest \$413 million for the life extension of the D.C. Cook Nuclear Plant (Cook) and \$1,752 million in transmission and distribution assets. About 70% of Cook-related expenditures are attributable to Indiana and recoverable almost contemporaneously through a rider mechanism.

Improved Credit Metrics: As a result of adequate rate relief including ability to utilize a forecast test year, IMPCo's credit metrics have remained stable despite significant capex. As such, IMPCo's credit metrics have adequate headroom at the current rating level to absorb Fitch's coronavirus base scenario assumptions. After giving effect for Fitch's coronavirus assumptions, IMPCo's credit metrics were expected to be around 4.3x versus its downgrade metric of 4.8x.

Kentucky Power Co.

Constructive Regulatory Environment: Fitch views the regulatory compact in Kentucky as generally constructive. A variety of cost recovery mechanisms, including fuel, purchased power, environmental compliance and infrastructure replacement clauses, are in place that mitigate the impact of regulatory lag. On Jan. 18, 2018, the Kentucky Public Service Commission (KPSC) granted KPCo a gross revenue increase of \$30 million effective Jan. 19, 2018. The net change to KPCo's rates is \$12 million after giving effect for implementation of the reduction in the federal corporate tax rate and incremental rider recovery. The rate increase was based on a 9.70% ROE and 41.68% equity capitalization. On June 29, 2020, KPCo filed a rate case requesting \$65 million net increase based upon a 10.0% ROE and 43.3% capitalization for new rates to expected to be at the end of the existing base rate increase moratorium.

**Challenged Service Territory:** KPCo's service area is primarily driven by coal mining, which has seen significant contraction in recent years. KPCo's residential customer count has declined about 6% over the last decade, while large commercial and industrial customer numbers have declined almost 20%. The company is actively pursuing economic development opportunities in its service territory. Additionally, growth in oil and gas extraction mitigates some of the effects of the secular decline in the coal industry. However, Fitch remains concerned that lower sales volumes will continue to pressure metrics and earned returns in the medium term.

**Weaker Credit Metrics:** KPCo's recent credit metrics have weakened after the significant improvement in cash flow generation achieved in 2017. KPCo has a capex program that will expand its rate base by about 6% annually through 2022. The company plans to invest \$554 million in 2020-2022, which is a 18% reduction from the prior three year forecast. While not included in our rating case, 2023-2024 capex is forecast by the company to average \$165 million annually, bringing the five-year total to \$885 million. Fitch expects that planned capex, a rate freeze through January 2022, effects of the coronavirus, continued service territory weakness will result in FFO leverage that will remain outside of its downgrade threshold of 5.5x over the forecast period. As a result, Fitch applies a one-notch uplift to the ratings of KPCo as a reflection of the implied support from the stronger parent company.

**Reliance on Coal Remains High:** KPCo's approximately 80% coal mix (including Rockport PPA) leaves the utility exposed to potentially higher expenditures as increasingly stringent environmental regulations are implemented. While KPCo has an environmental clause allowing for recovery of mandated expenditures, retail electricity rates could rise, reducing flexibility for KPCo to earn an attractive ROE and potentially inviting political scrutiny.

#### Ohio Power Co.

**Low-Risk Business Profile:** OPCo owns and operates regulated electricity T&D networks under a cost of service-based regulatory framework in Ohio. The company has minimal direct exposure to commodity prices. OPCo is a 20% participant in Ohio Valley Electric Corporation (OVEC) and recovers its OVEC revenues and costs through a power purchase agreement (PPA) rider.

**Supportive Regulatory Construct:** OPCo's rates have been established by the Public Utilities Commission of Ohio (PUCO) under a multiyear ESP. OPCo reached a settlement in 2018 that was approved by the PUCO extending the current ESP until

2024. As required, the company filed a base rate case on June 1, 2020 to roll existing rider amounts into base rates. The net increase request is \$41.0 million after giving effect to rider adjustments, based upon a 10.15% ROE and 54.43% equity capitalization. OPCo's earned ROE as of TTM March 31, 2020 was 9.9%.

**Strong Credit Metrics:** OPCo plans \$2.1 billion of capex through 2022, an increase of approximately \$244 million from the prior three-year forecast. The company expects rate base to grow by over 9% from 2018 to 2022. Approximately 65% of forecast capex are expected to be spent on distribution, 22% on transmission, and 13% on corporate and other. Supportive regulatory constructs minimize the impact of the capex plan on OPCo's balance sheet with PUCO-regulated rates on approximately 65%-70% of the company's \$5.3 billion rate base and FERC rates on approximately 30%-35%. Fitch expects OPCo's credit metrics of FFO leverage to remain within 4.0x downgrade metric over the next three years, after given effect for Fitch's base coronavirus impacts.

#### Public Service Company of Oklahoma

**Constructive Rate Settlement:** Fitch views PSO's March 2019 rate settlement as constructive. The Oklahoma Corporation Commission (OCC) approved the joint stipulation on March 14, 2019, concluding PSO's most recent rate case in five months. PSO's net revenues will increase \$46 million based on a 9.4% ROE. The settlement is silent as to the common equity ratio and rate base. Additionally, two new or expanded rate riders will provide additional revenue and help alleviate regulatory lag. In PSO's last rate case the company was granted an \$84 million gross revenue increase in January 2018, based on a 9.3% ROE and 48.51% equity capitalization. As per the settlement, PSO is required to file a new base rate requests between October 2020 and 2021.

**Improving Regulatory Environment:** PSO's rate settlement represents an important step toward an improved regulatory environment, despite a below-average authorized ROE. The quick resolution of the last two rate cases serves to reduce regulatory lag stemming from the state's use of an historic test year. The joint stipulation provides for the expansion of the SPP transmission cost tariff (SPPTC tariff) and the implementation of a distribution reliability and safety (DRS) rider. The DRS rider will recover capital-related costs of investments made for safety and reliability up to \$5 million annually. The SPPTC tariff and the DRS rider will be in effect until PSO's next base rate case.

**Retirement of Oklaunion Power Station:** In September 2018, AEP and PSO announced the closure of the 650MW coal-fired Oklaunion Power Station by October 2020. PSO is the plant's operator and owns approximately 16%. PSO's remaining \$49 million is currently being recovered in rates through 2046. In the most recent rate case, PSO sought to accelerate the recovery of Oklaunion to 2028; however, depreciation rates were left unchanged. Fitch expects that Oklaunion recovery will be addressed in the company's next rate filing; which is mandated as per the Joint Settlement between October 2020 and October 2021.

**Favorable Generation Mix:** PSO is the least coal-exposed of the AEP integrated utilities, with coal-fired generation accounting for only 9.4% of generating and capacity mix. The company owns 3,833MW of generating capacity and has long-term PPAs on another 2,246MW, over half of which is wind.

**Capex Program:** PSO's capex budget has increased approximately 16% compared with the prior forecast. Fitch expects the company to expand its rate base by about 10% annually with expenditures of \$1,143 million in 2020-2022. While not included in Fitch's rating case, 2022-2023 capex is forecast by the company to increase an average of \$411 million annually, bringing the five-year total to \$1,966 million. Approximately 65% of PSO's five-year capex is for transmission and distribution investments and 22% is earmarked for regulated renewables. The current capex forecast does not include North Central Wind transaction.

**Improved Credit Metrics:** Historically, PSO's capex program combined with limited rate relief resulted in pressured credit metrics. The company's recent rate cases have provided timely and adequate rate relief, despite tax cut headwinds. FFO leverage improved to 3.7x for the LTM ended Dec. 31, 2019 from a high of 5.4x for the LTM ended Dec. 31, 2016. As a result, PSO's credit metrics have adequate headroom in most years for impacts from coronavirus. Fitch expects PSO's FFO leverage will remain around 4.8x over the forecast period, but could improve if the new wind projects are funded with higher equity component.

#### Southwestern Electric Power Co

**Mixed Regulatory Environment:** SWEPCo operates in three state jurisdictions, Louisiana (38% of rate base), Texas (36% of rate base) and Arkansas (20% of rate base), as well as FERC (6% of rate base). Fitch views the regulatory construct for integrated utilities in Louisiana as balanced, while Texas and Arkansas are more challenging. Various recovery mechanisms are in place to improve earnings stability

in all jurisdictions, including fuel and purchased power adjustment clauses that mitigate commodity price exposure.

SWEP Co's earned ROE was only 6.2% as of the LTM ended March 31, 2020, significantly behind AEP's consolidated earned ROE of 9.1%. The company's low ROE reflects approximately 112bps of drag due to the ongoing lack of recovery of the Arkansas portion of the Turk coal plant. The company settled its first rate case filed in Arkansas in 10 years in 4Q19. The commission approved the settlement, which resulted in a \$18 million net increase (after \$6 million depreciation and amortization adjustments). The settlement is based on a 9.45% ROE and 47.9% equity capitalization. The company's original request was a \$75 million gross base rate increase based on a 10.5% ROE and 50.5% capital structure. After giving effect for \$29 million in current riders moving into base rates and a \$12 million request for the distribution reliability rider, the net increase request is \$34 million. The company has initiated rate proceedings in Louisiana, but has not specified a formal rate request amount.

Capex Program: Fitch expects the company to expand its rate base by about 4% annually through 2024 with expenditures of \$1.254 billion in 2020-2022. While not included in our rating case, the company forecasts 2023--2024 average annual capex of \$554 million, bringing the five-year total to \$2,363 million. Approximately 68% of SWEP Co's capex is for transmission and distribution investments, 12% is earmarked for environmental generation-related investments, and 9% is for fossil and hydro generation. SWEP Co's capex budget does not include the North Central Wind Transaction.

Pressure on Credit Metrics: SWEP Co's capex program combined with limited near-term rate relief and 2018 effects of TCJA will continue to delay expected improvement in credit metrics. Prior to the current coronavirus pandemic, Fitch did not expect SWEP Co's FFO leverage to improve dramatically from its 5.3x as of LTM Dec. 31, 2019. Given the expected economic impacts of the coronavirus and large capex budget, Fitch expects SWEP Co's credit metrics to remain elevated at, or slightly above, its stated downgrade metric. As such, Fitch expects parent AEP may need to make equity infusions or other measures to adjustments maintain credit metrics that are consistent with SWEP Co's current rating.

## DERIVATION SUMMARY

AEP compares favorably with other large multistate utility holding companies, given the company's improved risk profile after its 2017 merchant fossil generation exit, its stable consolidated credit metrics and limited parent-level debt. Fitch expects AEP's FFO-adjusted leverage to average around 5.3x over the forecast period, which is weaker than Xcel Energy Inc. (XEL: BBB+/Stable), Southern Company (SO; BBB+/Negative), and Dominion Energy, Inc. (DEI: BBB+/Stable). Fitch expects Xcel's FFO-adjusted leverage to be 4.7x-4.9x over the forecast period, SO's consolidated FFO-adjusted leverage to be 5.0x by the end of the forecast, and DEI's consolidated FFO-adjusted leverage to be 5.0x. AEP derives approximately 97% of its EBITDA from regulated assets, compared with 100% at Xcel, 86% at SO and 70% at DEI. AEP historically has limited parent-level debt (10%-15%) versus its peers. While Fitch currently estimates parent-level debt will account for approximately 20%-25% of AEP's total debt load over the forecast period, this is lower than the 25%-35% at its peers.

## KEY ASSUMPTIONS

### Fitch's Key Assumptions Within Our Rating Case for the Issuer

--Coronavirus-related sales impacts of residential up 2%; commercial down 10%; industrial down 15% from 2019; nine months of impact in 2020; three months of impact 2021; subsequent annual volumetric increase in sales in 2022 at between 0.5% and 1%;

- Rate case filings over the forecast period in Arkansas, Ohio, Oklahoma and Texas;

- Management's publically available forecasts over the 2020-2022 forecast period of capex (2020-\$5.8 billion, 2021-\$6.2 billion, and 2022-\$6.4 billion), dividends (\$1.4 billion annually), and \$800 million equity issuance, and conversion of \$805 million equity units in 2022.

## RATING SENSITIVITIES

### American Electric Power

### Developments That May, Individually or Collectively, Lead to Positive Rating Action

- Sustained FFO leverage at or below 4.0x;
- Continued balanced jurisdictional rate regulation across AEP's service territory;
- Continued strategic focus on relatively low risk utility and transmission businesses.

#### Developments That May, Individually or Collectively, Lead to Negative Rating Action

- Sustained FFO leverage exceeding 5.0 on a sustained basis;
- Renewed emphasis on non-regulated or uncontracted investments;
- Significant unexpected regulatory developments at any of the regulated operating companies.

#### AEP Texas

#### Developments That May, Individually or Collectively, Lead to Positive Rating Action

- Sustained FFO leverage at or below 4.0x;
- Continued balanced jurisdictional rate regulation.

#### Developments That May, Individually or Collectively, Lead to Negative Rating Action

- Sustained FFO leverage exceeding 5.0x on a sustained basis;
- Unexpected regulatory development.

#### Appalachian Power, Indiana Michigan Power, Public Service Oklahoma

#### Developments That May, Individually or Collectively, Lead to Positive Rating Action

- Sustained FFO leverage at or below 4.0x;
- Continued balanced jurisdictional rate regulation.

#### Developments That May, Individually or Collectively, Lead to Negative Rating Action

- Sustained FFO leverage exceeding 4.8x on a sustained basis;
- Unexpected regulatory development.

Kentucky Power, Southwestern Electric Power

Developments That May, Individually or Collectively, Lead to Positive Rating Action

- Sustained FFO leverage at or below 4.5x;
- Continued balanced jurisdictional rate regulation.

Developments That May, Individually or Collectively, Lead to Negative Rating Action

- Sustained FFO leverage exceeding 5.5x on a sustained basis;
- Unexpected regulatory development.

Ohio Power

Developments That May, Individually or Collectively, Lead to Positive Rating Action

- A positive rating action is not likely at this time, as OPCO's ratings are constrained by its participation in a money pool with regulated affiliates that are rated two notches lower.

Developments That May, Individually or Collectively, Lead to Negative Rating Action

- Sustained FFO leverage exceeding 4.0x on a sustained basis;
- Unexpected regulatory development.

## **BEST/WORST CASE RATING SCENARIO**

International scale credit ratings of Non-Financial Corporate issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating

transitions, measured in a negative direction) of four notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit <https://www.fitchratings.com/site/re/10111579>.

## **LIQUIDITY AND DEBT STRUCTURE**

AEP has a \$4.0 billion committed revolving credit facility maturing in June 2022, which also serves as a backstop for AEP's CP program and LOC. AEP must maintain a ratio of debt/total capitalization that does not exceed 67.5%, under the covenants to its credit agreement. This contractually-defined percentage was 59.8% as of March 31, 2020. In March 2020, the company added and fully drew a \$1 billion 364-day term loan as a source of additional liquidity during the financial market uncertainty resulting from coronavirus pandemic. As of March 31, 2020, AEP had \$1.291 billion available on its revolving credit facility and cash of \$1.555 billion.

AEP has parent level corporate maturities as follows: \$500 million in 2020, \$400 million in 2021, and \$300 million in 2022. AEP has \$805 million of equity units issued in 2019 for which Fitch does not give equity credit. The notes are expected to be remarketed in 2022, at which time the interest rate will reset at the then current market rate and forward equity purchase contract associated with the units will be settled with the issuance of equity. The remarketing will result in no additional funds to AEP. If the remarketing is unsuccessful, investors have the right to put their notes to AEP at a price equal to the principal. Fitch assumes a successful remarketing for the equity units.

AEP's regulated subsidiaries use a pool of corporate borrowing to meet short-term funding needs. The money pool operates according to regulators' approved terms and conditions, and includes maximum authorized borrowing limits for individual companies.

## **SUMMARY OF FINANCIAL ADJUSTMENTS**

As of Dec. 31, 2019, Fitch has made the following adjustments:

--\$1.3 billion of securitized debt has been removed from Fitch's AEP consolidated debt calculation;

--\$777 million of securitized debt has been removed from Fitch's AEPTX debt calculation;

--\$280 million of securitized debt has been removed from Fitch's IMPCo debt calculation;

--\$248 million of securitized debt has been removed from Fitch's APCo debt calculation.

These disclosures are updated on a daily basis.

Corporate Finance   Utilities and Power   North America   United States

# American Electric Power Company, Inc.

American Electric Power Company, Inc. (AEP) is a public utility holding company that provides generation, transmission and distribution services to approximately 5.4 million customers across 11 states from Texas to Michigan. Fitch Ratings' July 2020 affirmation of AEP's Issuer Default Rating was based on AEP's low risk profile as a regulated utility system, its transition of the regulated generation fleet away from coal generation and ongoing efforts to improve regulated returns. However, AEP and most of its subsidiaries have limited to no headroom at the current rating levels when considering the company's current capex forecast and after giving effect for Fitch's coronavirus base scenario. Fitch expects AEP will take the necessary action in the form of capex reductions, capital rotation or equity funding to return metrics to within the stated thresholds.

## Key Rating Drivers

**Coronavirus Impacts:** The coronavirus pandemic is causing unprecedented disruptions to state and local economies, including the numerous states in which AEP operates. Many of AEP's service territories have a significant large commercial and industrial customer base. Fitch estimates AEP's retail revenue mix in 2019 to be approximately 49% residential, 28% commercial and 23% industrial/wholesale. As such, AEP has seen significant reduction in kWh sales and revenues for commercial and industrial customers. The company's most recent 2020 weather-normalized sales forecast is as follows: residential up 3.1%, commercial down 4.8% and industrial down 6.5%. The current sales forecast is improved from the April 2020 forecast, with the company now expecting total retail sales to be down 2.7%, versus down 3.4% at the start of the pandemic. Prior to the pandemic, AEP expected weather-normalized 2020 sales to increase 0.5%.

Soon after the start of the pandemic, AEP announced that it had shifted \$500 million of 2020 capex to later in the five-year plan. However, the company has since reinstated \$100 million of the previously deferred capex into the current year. Most of AEP's jurisdictions have implemented tracking or deferral mechanisms. However, the ultimate recovery of coronavirus-related expenses are unknown at this time. Fitch has utilized its coronavirus base scenario of residential sales up 2%; commercial down 10%; industrial down 15% from 2019; nine months of impact in 2020; three months of impact 2021. AEP's transmission-only subsidiary, AEP Transmission Company, LLC (AEP Transco, A-/Stable), is expected to be minimally affected from the coronavirus, given that its revenue is not volume dependent.

**Balanced Regulatory Construct:** Fitch views the state regulatory constructs within AEP's 11-state service territory as balanced. Authorized state ROEs are close to the industry average in most jurisdictions and include provisions to mitigate commodity and environmental regulation risks. AEP's transmission entities, most of which are subsidiaries of AEP Transco, operate under a tariff approved by the Federal Energy Regulatory Commission (FERC). The FERC tariff provides timely recovery of capital and operating costs as well as favorable ROEs (10.35% and 10.50%) and robust capital structures. Fitch expects consolidated earned ROE, which was 9.0% for the LTM ended Sept. 30, 2020, to average around 9.0% in 2020-2022.

**Large Capex Spending:** AEP's recently released 2021-2025 capex plan is 13% larger than the previous five-year plan, and will result in a 7.4% average annual rate base growth from 2019. Management expects that nearly 70% of the company's 2021-2025 capital plan will be recoverable under reduced lag mechanisms. AEP's capex is almost exclusively geared to expanding the

regulated rate base, with 49% planned for transmission assets, the majority of which are regulated by FERC. As a result of AEP's increased investments in transmission and distribution assets, the company's consolidated net plant profile has shifted to 25% generation in 2020 from 50% generation in 2009.

**Fleet Transformation:** AEP remains committed to reducing its reliance on coal generation. Coal-fired generation is expected to account for 43% of AEP's total generating and capacity mix in 2020, down significantly from 70% in 2005. The company plans to continue to reduce its reliance on coal-fired generation and increase renewable capacity through construction of rate-based assets and power purchase agreements (PPAs). Hydro, wind, solar and pumped storage generation currently constitutes 18% of the generation capacity and is expected to increase to almost 40% over the next 10 years.

**Rate-Based Wind Transaction:** After receiving approvals from state regulators in Oklahoma, Louisiana and Arkansas, AEP announced in May 2020 that it would move forward with the \$2 billion North Central Wind investment, which will supply 1,485MW of wind power to subsidiaries Public Service Company of Oklahoma (PSO, BBB+/Stable) and Southwestern Electric Power Co. (SWEPCO, BBB/Stable). The rate-based investment, which will be purchased from the developer, will be split between PSO (45.5% ownership) and SWEPCO (54.5% ownership). The three wind farms will enter service separately with the first, totaling 199MW, expected in service by March 2021, and the other two projects, totaling 1,286MW, by YE 2021 or early 2022. The company has stated that it intends to use equity to finance approximately two-thirds of the North Central Wind investment.

**Contracted Renewables Transaction:** In April 2019, AEP closed on the acquisition of Sempra Energy's renewable portfolio. The transaction value was \$1.05 billion, including the assumption of \$470 million of existing project debt and tax equity. The 724 net MW wind portfolio spans seven states and has 21% of its PPAs with AEP subsidiaries Ohio Power Company (OPCo, A-/Stable), SWEPCO and Indiana Michigan Power Company (BBB+/Stable). The acquisition advances AEP's commitment to invest \$2.2 billion in contracted renewables by 2023, and includes experienced personnel and a 1-gigawatt development pipeline. AEP issued \$805 million in equity units in 2019 to fund the Sempra transaction and for other corporate purposes. The company has earmarked \$2.1 billion (6%) of its 2021–2025 capex forecast to contracted renewable investments.

**Weaker Credit Protection Measures:** Prior to the effect of the coronavirus, AEP's consolidated credit metrics as measured by FFO leverage were expected to be at or near its current downgrade threshold of 5.0x as a result of continued high capex. Given the expected additional financial impacts due to the coronavirus, AEP's FFO leverage is expected to be at or above its stated downgrade metric over the forecast period. Fitch expects AEP will take the necessary action in the form of capital rotation or equity funding to return metrics to within the stated thresholds. Absent such measures, negative rating actions are likely. The company issued \$850 million of mandatory convertible equity notes in August 2020. Fitch does not give equity credit for the 2020 or 2019 equity units until equity conversion three years from issuance.

Weaker credit metrics are partially offset by favorable qualitative considerations, such as the regulatory, geographic and cash flow diversity provided by the AEP's ownership of nine regulated electric utilities operating in 11 states and the company's significant investments in FERC-regulated transmission projects. Additionally, Fitch estimates AEP's parent-level debt will account for approximately 20%–25% of AEP's total debt load over the forecast period, versus 25%–30% at its most of its peers.

**Parent-Subsidiary Rating Linkage:** AEP and its regulated subsidiaries have operational, financial and functional ties, resulting in moderate rating linkage. The treasury function is centrally managed and all regulated subsidiaries depend on AEP for short-term liquidity and participate in AEP's money pool. The money pool allows the utilities to manage working capital needs and provides short-term financing. Legal ties are weak, as the parent does not guarantee the debt obligations of its regulated subsidiaries.

AEP and most of its subsidiaries have limitations on capital structure from covenants in the bank credit agreement (debt/total capitalization that does not exceed 67.5%) and from regulatory requirements to maintain a specific equity ratio. No cross-default provisions exist among AEP and its subsidiaries. Due to these linkages, Fitch typically limits the notching difference between AEP and its subsidiaries to 1–2 notches.

Fitch applied a bottom-up approach in rating AEP's utility subsidiaries. Regulated subsidiaries are rated lower and/or higher than AEP, reflecting the strength of their balance sheets, the quality of their service areas and the constructiveness of their regulatory environments. Fitch rates AEP on a consolidated basis. AEP Transco and OPCo are considered to have stronger credit profiles than AEP, while AEP is considered to have a stronger credit profile than some of its other utility subsidiaries, due to benefits from regulatory and geographic diversity. Fitch applies a one-notch uplift to the ratings of Kentucky Power Company (BBB/Stable) as a reflection of the implied support from the stronger parent company. Fitch expects AEP will adjust dividends from subsidiaries as needed and/or inject equity into subsidiaries to maintain regulatory capital structures and support credit metrics.

## Financial Summary

## Rating Derivation Relative to Peers

AEP compares favorably with other large multistate utility holding companies, given the company's improved risk profile after its 2017 merchant fossil generation exit, its stable consolidated credit metrics and limited parent-level debt. Fitch expects AEP's FFO leverage to average around 5.3x over the forecast period, which is weaker than Xcel Energy Inc. (BBB+/Stable), The Southern Company (SO, BBB+/Stable) and Dominion Energy, Inc. (DEI, BBB+/Stable). Fitch expects Xcel's FFO leverage to be 4.9x over the forecast period, SO's consolidated FFO leverage to be less than 5.0x by the end of the forecast and DEI's consolidated FFO leverage to be 5.0x. AEP derives approximately 97% of its EBITDA from regulated assets, compared with 100% at Xcel, 86% at SO and 85% at DEI. AEP historically has limited parent-level debt (10%–15%) versus its peers. While Fitch currently estimates parent-level debt will account for approximately 20%–25% of AEP's total debt load over the forecast period, this is lower than the 25%–35% at its peers.

## Rating Sensitivities

### Factors That Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

- Sustained FFO leverage at or below 4.0x;
- Continued balanced jurisdictional rate regulation across AEP's service territory;
- Continued strategic focus on relatively low-risk utility and transmission businesses.

### Factors That Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

- Sustained FFO leverage exceeding 5.0 on a sustained basis;
- Renewed emphasis on nonregulated or uncontracted investments;
- Significant unexpected regulatory developments at any of the regulated operating companies.

### Liquidity and Debt Structure

AEP has a \$4.0 billion committed revolving credit facility maturing in June 2022, which also serves as a backstop for AEP's CP program and LOC. AEP must maintain a ratio of debt/total capitalization that does not exceed 67.5% under the covenants to its credit agreement. This contractually defined percentage was 57.7% as of Sept. 30, 2020. As of Sept. 30, 2020, AEP had \$3.35 billion available on its revolving credit facility and cash of \$409.7 million. In March 2020, the company added and fully drew a \$1 billion 364-day term loan as a source of additional liquidity during the financial market uncertainty resulting from the coronavirus pandemic. The term loan was repaid in full in November 2020 with net proceeds from AEP's senior note issuance.

After giving effect for the recent senior note issuance, AEP has parent-level corporate maturities as follows: \$400 million in 2021, \$300 million in 2022 and \$1,050 million in 2023. Additionally, AEP has \$805 million of equity units issued in 2019 and \$850 million issued in 2020, for which Fitch does not give equity credit. The notes are expected to be remarketed in 2022 and 2023, respectively, at which time the interest rate will reset at the then-current market rate and forward equity purchase contract associated with the units will be settled with the issuance of equity. The remarketings will result in no additional funds to AEP. If either remarketing is unsuccessful, investors have the right to put their notes to AEP at a price equal to the principal. Fitch assumes successful remarketings for the equity units.

### ESG Considerations

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity.

For more information on Fitch's ESG Relevance Scores, visit [www.fitchratings.com/esg](http://www.fitchratings.com/esg).

## Key Assumptions

### Fitch's Key Assumptions Within Our Rating Case for the Issuer Include

- Coronavirus-related sales impacts are: residential up 2%; commercial down 10%; industrial down 15% from 2019; nine months of impact in 2020; three months of impact 2021; subsequent annual volumetric increase in sales in 2022 at between 0.5% and 1%.
- Rate case filings over the forecast period in Arkansas, Ohio, Oklahoma and Texas.
- Management's publicly stated 2020–2022 forecast including capex as follows: \$5.8 billion in 2020; \$7.5 billion in 2021; and \$8.0 billion in 2022; dividends of \$1.4 billion–\$1.5 billion annually; \$2 billion equity issuance; and conversion of \$805 million equity units in 2022.

#### Operating Environment

|      |                      |    |   |
|------|----------------------|----|---|
| aa+  | Economic Environment | aa | Very strong combination of countries where economic value is created and where assets are located.  |
| aa   | Financial Access     | aa | Very strong combination of issuer specific funding characteristics and of the strength of the relevant local financial market.              |
|      | Systemic Governance  |    | Systemic governance (e.g. rule of law, corruption, government effectiveness) of the issuer's country of incorporation consistent with 'aa'. |
| b-   |                      |    |   |
| ccc+ |                      |    |   |

#### Regulatory Environment

|      |  |     |   |
|------|--|-----|---|
| a    | Degree of Transparency and Predictability    | bbb | Generally transparent and predictable regulation with limited political interference. |
| a-   | Timeliness of Cost Recovery                  | bbb | Moderate lag to recover capital and operating costs.                                  |
| bbb+ | Trend in Authorized ROEs                     | a   | Above-average authorized ROE.   |
| bbb  | Mechanisms Available to Stabilize Cash Flows | bbb | Revenues partially insulated from variability in consumption.                         |
| bbb- | Mechanisms Supportive of Creditworthiness    | bbb | Effective regulatory ring-fencing or minimum creditworthiness requirements.           |

#### Asset Base and Operations

|      |   |     |  |
|------|---|-----|--|
| a    | Diversity of Assets                             | a   | High-quality and/or large-scale diversified assets.              |
| a-   | Operations Reliability and Cost Competitiveness | a   | Track record of reliable, low-cost operations.                   |
| bbb+ | Exposure to Environmental Regulations           | bbb | Limited or manageable exposure to environmental regulations.     |
| bbb  | Capital and Technological Intensity of Capex    | bbb | Moderate reinvestments requirements in established technologies. |
| bbb- |   |     |  |

#### Profitability

|      |                             |     |   |
|------|-----------------------------|-----|---|
| a    | Free Cash Flow              | bbb | Structurally neutral to negative FCF across the investment cycle.         |
| a-   | Volatility of Profitability | a   | Higher stability and predictability of profits relative to utility peers. |
| bbb+ |                             |     |   |
| bbb  |                             |     |   |
| bbb- |                             |     |   |

#### Financial Flexibility

|      |                       |     |  |
|------|-----------------------|-----|--|
| a    | Financial Discipline  | a   | Clear commitment to maintain a conservative policy with only modest deviations allowed.                          |
| a-   | Liquidity             | bbb | One-year liquidity ratio above 1.25x. Well-spread maturity schedule of debt but funding may be less diversified. |
| bbb+ | FFO Interest Coverage | bbb | 4.5x   |
| bbb  |                       |     |  |
| bbb- |                       |     |  |

**How to Read This Page:** The left column shows the three-notch band assessment for the overall Factor, illustrated by a bar. The right column breaks down the Factor into Sub-Factors, with a description appropriate for each Sub-Factor and its corresponding category.

#### Management and Corporate Governance

|      |                        |    |  |
|------|------------------------|----|--|
| a+   | Management Strategy    | a  | Coherent strategy and good track record in implementation.   |
| a    | Governance Structure   | aa | No record of governance failing. Experienced board exercising effective check and balance to management. No ownership concentration. |
| a-   | Group Structure        | a  | Group structure shows some complexity but mitigated by transparent reporting.  |
| bbb+ | Financial Transparency | a  | High quality and timely financial reporting.   |
| bbb  |                        |    |  |

#### Market Position

|      |                          |     |   |
|------|--------------------------|-----|---|
| a    | Market Structure         | bbb | Established market structure but some level of uncertainty in price-setting mechanisms. |
| a-   | Consumption Growth Trend | bbb | Customer and usage growth in line with industry averages.                               |
| bbb+ | Customer Mix             | a   | Favorable customer mix.   |
| bbb  | Geographic Location      | a   | Favorable location or high geographic diversity.  |
| bbb- | Supply Demand Dynamics   | bbb | Moderately favorable outlook for prices/rates.  |

#### Commodity Exposure

|      |   |     |  |
|------|---|-----|--|
| a    | Ability to Pass Through Changes in Fuel | bbb | Limited exposure to changes in commodity costs.        |
| a-   | Underlying Supply Mix                   | bbb | Low variable costs and moderate flexibility of supply. |
| bbb+ | Hedging Strategy                        | a   | Highly captive supply and customer base.               |
| bbb  |   |     |  |
| bbb- |   |     |  |

#### Financial Structure

|      |  |     |       |
|------|--|-----|-------|
| a-   | FFO Leverage                             | bbb | 5.0x  |
| bbb+ | Total Debt With Equity Credit/Op. EBITDA | bb  | 4.75x |
| bbb  |  |     |       |
| bbb- |  |     |       |
| bb+  |  |     |       |

#### Credit-Relevant ESG Derivation

|   |    |        |   | Overall ESG |  |
|---|----|--------|---|-------------|--|
| American Electric Power Company, Inc. has 12 ESG potential rating drivers |    |        |   |             |  |
| key driver  | 0  | issues | 5 |             |  |

Credit-Relevant ESG Derivation

American Electric Power Company, Inc. has 12 ESG potential rating drivers

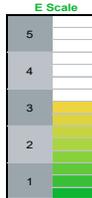

- American Electric Power Company, Inc. has exposure to emissions regulatory risk but this has very low impact on the rating.
- American Electric Power Company, Inc. has exposure to energy productivity risk but this has very low impact on the rating.
- American Electric Power Company, Inc. has exposure to waste & impact management risk but this has very low impact on the rating.
- American Electric Power Company, Inc. has exposure to extreme weather events but this has very low impact on the rating.
- American Electric Power Company, Inc. has exposure to access/affordability risk but this has very low impact on the rating.
- American Electric Power Company, Inc. has exposure to customer accountability risk but this has very low impact on the rating.

| Overall ESG Scale   |    |        |   |
|---------------------|----|--------|---|
| key driver          | 0  | issues | 5 |
| driver              | 0  | issues | 4 |
| potential driver    | 12 | issues | 3 |
| not a rating driver | 2  | issues | 2 |
|                     | 0  | issues | 1 |

Environmental (E)

| General Issues   | E Score | Sector-Specific Issues   | Reference  |
|--|---------|--|--|
| GHG Emissions & Air Quality                                | 3       | Emissions from operations  | Asset Base and Operations; Commodity Exposure; Regulation; Profitability |
| Energy Management  | 3       | Fuel use to generate energy and serve load   | Asset Base and Operations; Commodity Exposure; Profitability             |
| Water & Wastewater Management                              | 2       | Water used by hydro plants or by other generation plants, also effluent management | Asset Base and Operations; Regulation; Profitability                     |
| Waste & Hazardous Materials Management; Ecological Impacts | 3       | Impact of waste from operations  | Asset Base and Operations; Regulation; Profitability                     |
| Exposure to Environmental Impacts                          | 3       | Plants' and networks' exposure to extreme weather                                  | Asset Base and Operations; Regulation; Profitability                     |

How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

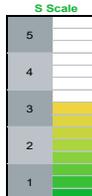

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies the some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

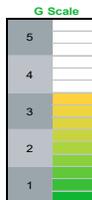

Social (S)

| General Issues   | S Score | Sector-Specific Issues  | Reference   |
|--|---------|---|---|
| Human Rights, Community Relations, Access & Affordability  | 3       | Product affordability and access  | Asset Base and Operations; Regulation; Profitability; Financial Structure |
| Customer Welfare - Fair Messaging, Privacy & Data Security | 3       | Quality and safety of products and services; data security                  | Regulation; Profitability   |
| Labor Relations & Practices                                | 3       | Impact of labor negotiations and employee (dis)satisfaction                 | Asset Base and Operations; Profitability                                  |
| Employee Wellbeing   | 2       | Worker safety and accident prevention                                       | Profitability; Asset Base and Operations                                  |
| Exposure to Social Impacts                                 | 3       | Social resistance to major projects that leads to delays and cost increases | Asset Base and Operations; Profitability                                  |

Governance (G)

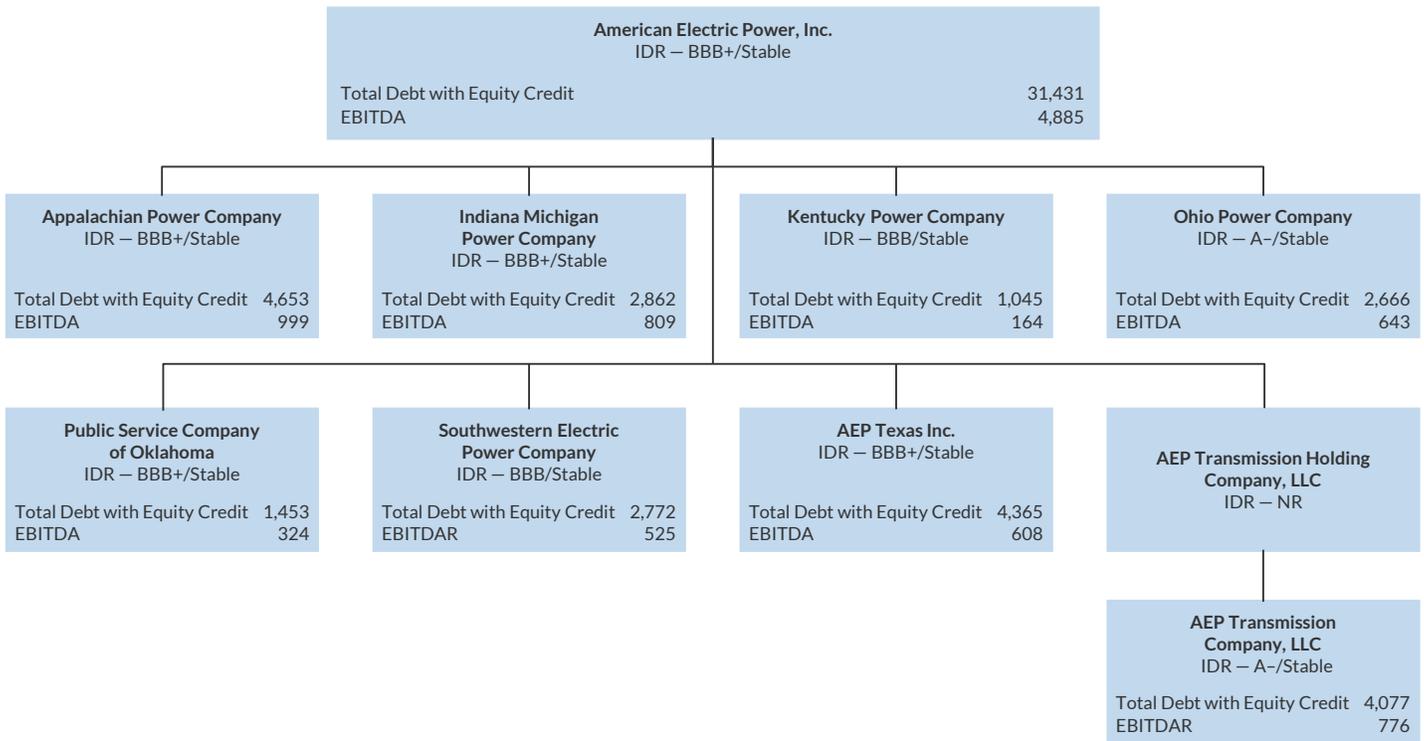

| General Issues         | G Score | Sector-Specific Issues  | Reference                           |
|------------------------|---------|---|-------------------------------------|
| Management Strategy    | 3       | Strategy development and implementation                       | Management and Corporate Governance |
| Governance Structure   | 3       | Board independence and effectiveness; ownership concentration | Management and Corporate Governance |
| Group Structure        | 3       | Complexity, transparency and related-party transactions       | Management and Corporate Governance |
| Financial Transparency | 3       | Quality and timing of financial disclosure                    | Management and Corporate Governance |

| CREDIT-RELEVANT ESG SCALE  |   |  |
|--|---|--|
| How relevant are E, S and G issues to the overall credit rating? |   |  |
| 5  | Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.                         |  |
| 4  | Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.                 |  |
| 3  | Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator. |  |
| 2  | Irrelevant to the entity rating but relevant to the sector.   |  |
| 1  | Irrelevant to the entity rating and irrelevant to the sector.   |  |

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion is based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at anytime for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

08 APR 2021

## **Fitch Affirms AEP at 'BBB+'; Outlook Revised to Negative**

Fitch Ratings - New York - 08 Apr 2021: Fitch Ratings has affirmed American Electric Power Company, Inc.'s (AEP) Long-Term Issuer Default Rating (IDR) and senior unsecured ratings at 'BBB+', and Short-Term IDR and CP at 'F2'. Additionally, Fitch has affirmed the following AEP state-regulated operating subsidiaries: Ohio Power Co. (OPCo) at 'A-'; Appalachian Power Co. (APCo), Indiana Michigan Power Co. (IMPCo), and Public Service Company of Oklahoma (PSO) at 'BBB+'; Kentucky Power Co. (KPCo) and Southwestern Electric Power Co. at 'BBB'. The Rating Outlook for AEP and OPCo has been revised to Negative from Stable. The Rating Outlook for APCo, IMPCo, PSO, KPCo, and SWEPco is Stable. Fitch has downgraded the AEP Texas's (AEPTX) Long-Term IDR to 'BBB' from 'BBB+'. AEPTX's Rating Outlook is Stable.

The rating affirmations of AEP and the majority of its subsidiaries, is based on AEP's low risk profile as a regulated utility system; its transition of the regulated generation fleet away from coal generation; and ongoing efforts to improve regulated returns. The Negative Outlooks at AEP and OPCo reflect expected credit metrics that are outside of stated downgrade thresholds. Additionally, other AEP subsidiaries have limited to no headroom at the current rating levels. Fitch expects AEP will take necessary actions like capex reductions, capital rotation, or equity funding to return metrics to within the stated thresholds. Absent such measures, negative rating actions are likely.

AEPTX's one-notch downgrade reflects the weaker credit measures due to lower equity capitalization and lower than expected parent capital contributions, as well as continued high capex, and regulatory lag as a result of significant service territory growth.

### **Key Rating Drivers**

American Electric Power Company, Inc.

Balanced Regulatory Construct: Fitch views the state regulatory constructs within AEP's 11-state service territory as balanced. Authorized state ROEs are close to the industry average in most jurisdictions and include provisions to mitigate commodity and environmental regulation risks. AEP's transmission entities, most of which are subsidiaries of AEP Transco, operate under a tariff approved by the Federal Energy Regulatory Commission (FERC). The FERC tariff provides timely recovery of capital and operating costs as well as favorable ROEs (10.35% and 10.50%) and robust capital structures. Fitch expects consolidated earned ROE, which was 9.1% for the LTM ended Dec. 31, 2020, to average around 9.0% in 2021-2023.

**Coronavirus Impacts:** The coronavirus pandemic is causing unprecedented disruptions to state and local economies, including the numerous states in which AEP operates. Many of AEP's service territories have a significant large commercial and industrial customer base. As such, AEP has seen significant reduction in kWh sales and revenues for commercial and industrial customers, which were down 4.2% and 5.7%, respectively, for LTM Dec. 31, 2020 on a weather-normalized basis. Positively, the more profitable residential sales were up 3.2% over the same period. For 2021, the company expects weather-normalized total sales to increase 0.2% compared to 2020; led by industrial increase of 1.9%. The company currently expects residential sales to decrease 1.1% and commercial sales to decrease 0.5% versus 2020.

Most of AEP's jurisdictions have implemented tracking or deferral mechanisms. However, the ultimate recovery of pandemic-related expenses is currently unknown. Disconnections have resumed in most of AEP's state jurisdictions. The company continues to work with the regulators and stakeholders in Virginia and Arkansas in hopes of resuming disconnections in those jurisdictions in the first half of 2021.

**Large Capex Spending:** AEP's 2021-2023 capex plan is 18% larger than the previous three-year plan, and will result in a 7.4% average annual rate base growth from 2019. Management expects that nearly 70% of the company's capital plan will be recoverable under reduced lag mechanisms. AEP's capex is almost exclusively geared to expanding the regulated rate base, with 43% planned for transmission assets, the majority of which are regulated by FERC. As a result of AEP's increased investments in transmission and distribution assets, the company's consolidated net plant profile has shifted to 25% generation in 2020 from 50% generation in 2009.

**Improving Asset Base:** As a result of the companies' focus on transmission investment, AEP Transco is currently AEP's second largest subsidiary in terms of equity investment, and is expected to be the largest by the end of the forecast period. Fitch expects that the favorably FERC-regulated entity will account for almost 20% of AEP's consolidated EBITDA, resulting in a lower risk profile for the combined company. Additionally, AEP remains committed to reducing its reliance on coal generation. Coal-fired generation is expected to account for 43% of AEP's total generating and capacity mix in 2020, down significantly from 70% in 2005. The company plans to continue reducing its reliance on coal-fired generation and increase renewable capacity through construction of rate-based assets and power purchase agreements (PPAs). Hydro, wind, solar and pumped storage generation currently constitutes 18% of the generation capacity, and is expected to increase to almost 40% over the next 10 years.

**Rate-Based Wind Transaction:** After receiving approvals from state regulators in Oklahoma, Louisiana and Arkansas, AEP announced in May 2020 that it would move forward with the \$2 billion North Central Wind investment, which will supply 1,485MW of wind power to subsidiaries Public Service Company of Oklahoma (PSO, BBB+/Stable) and Southwestern Electric Power Co. (SWEPCO, BBB/Stable). The rate-based investment, which will be purchased from the developer, will be split between PSO (45.5% ownership) and SWEPCO (54.5% ownership).

The three wind farms will enter service separately with the first, totaling 199MW, expected in service by April 2021, and the other two projects, totaling 1,286MW, by YE 2021 or early 2022. The company has

stated that it intends to use equity to finance approximately two-thirds of the North Central Wind investment.

**Weaker Credit Protection Measures:** Prior to the pandemic, AEP's consolidated credit metrics as measured by FFO leverage, were expected to be at or near its current downgrade threshold of 5.0x, as a result of continued high capex. Despite executing on a significant equity funding commitment, Fitch expects AEP's FFO leverage to be above its stated downgrade metric over the forecast period. Fitch's calculations include the effect and assumed favorable regulatory treatment of approximately \$1 billion in additional fuel or purchased power costs amassed in February 2021 at PSO and SWEPCO as a result of Winter Storm Uri.

Absent a reduction in capex spend, AEP will need to take action in the form of capital rotation, or additional equity funding to return metrics to within the stated thresholds. Absent such measures, a rating downgrade of the parent company's rating is likely. The company issued \$805 million and \$850 million of mandatory convertible equity notes in 2019 and 2020. Fitch does not give equity credit for the equity units until equity conversion three years from issuance. Fitch estimates AEP's parent-level debt will account for approximately 20%-25% of AEP's total debt load over the forecast period, versus 25%-30% at its most of its peers.

**Parent-Subsidiary Rating Linkage:** AEP and its regulated subsidiaries have operational, financial and functional ties, resulting in moderate rating linkage. The treasury function is centrally managed and all regulated subsidiaries depend on AEP for short-term liquidity and participate in AEP's money pool. The money pool allows the utilities to manage working capital needs and provides short-term financing. Legal ties are weak, as the parent does not guarantee the debt obligations of its regulated subsidiaries.

AEP and most of its subsidiaries have limitations on capital structure from covenants in the bank credit agreement (debt/total capitalization that does not exceed 67.5%), and from regulatory requirements to maintain a specific equity ratio. No cross-default provisions exist among AEP and its subsidiaries. Due to these linkages, Fitch typically limits the notching difference between AEP and its subsidiaries to one or two notches.

Fitch applied a bottom-up approach in rating AEP's utility subsidiaries. Regulated subsidiaries are rated lower and/or higher than AEP, reflecting the strength of their balance sheets, quality of their service areas, and the constructiveness of their regulatory environments. Fitch rates AEP on a consolidated basis. Fitch applies a one-notch uplift to Kentucky Power Company's (BBB/Stable) ratings as a reflection of the implied support from the stronger parent company. Fitch expects AEP will adjust dividends from subsidiaries as needed and/or inject equity into subsidiaries to maintain regulatory capital structures and support credit metrics.

AEP Texas Inc.

**Low-Risk Business Profile:** AEPTX owns and operates regulated electricity T&D networks located in the Electric Reliability Council of Texas (ERCOT). The Public Utility Commission of Texas (PUCT) sets rates on a cost-of-service basis with the opportunity for capital recovery outside of base rate proceedings through annual or semi-annual clause mechanisms. AEPTX does not have direct exposure to

commodity prices. AEPTX has had no material impact from the market disruptions, due to the February 2021 winter storm; however, it is unknown at this time if the company will be impacted longer term from any potential changes in ERCOT market structure or PUCT regulation.

2020 Base Rate Proceeding: AEPTX concluded in April 2020, as per the settlement, its first base rate proceeding since 2006. The approved settlement resulted in a \$40 million revenue decrease based on a 9.4% ROE, 42.5% hypothetical equity capital structure and 2018 test year. The lower equity capitalization further pressures metrics already affected by significant capex spend. In addition to traditional rate case issues, the somewhat contentious proceedings included a return of excess federal income taxes collected, due to the Tax Cuts and Jobs Act of 2017 (TCJA), implementation of ringfencing measures, inclusion in base rates of amounts previously recovered under rate riders, and consolidation of rate structures of AEPTX's two predecessor entities.

Energy Industry Exposure: AEPTX's service territory encompasses the Eagle Ford and Permian shale gas basins, which have experienced an uptick in economic activity. AEPTX's weather-normalized kWh sales increased 1.3% in 2020 versus 2019, despite the pandemic. The company forecasts total weather-normalized kWh sales to increase by 2.7% in 2021, with industrial sales up 10.4%.

Pressured Credit Metrics: As a result of AEPTX's lower equity capitalization and continued regulatory lag due to the service territory's high growth, AEPTX's FFO leverage is no longer consistent with a 'BBB+' rating. The company's 2021-2023 capex forecast of almost \$3.4 billion is flat versus the prior three-year forecast, but still at an elevated level. Fitch now expects parent AEP will only make equity infusions to maintain the regulatory capital structure as authorized, which will result in credit metrics lower than most 'BBB' rated utilities. However, Fitch considers the low risk nature of the T&D companies in Texas an offsetting factor in assigning the current rating.

## Appalachian Power

Virginia Triennial Review: APCo received an order on Nov. 24, 2020 in its first legislatively mandated triennial review, which covers the 2017-2019 earnings test years. The Virginia State Corporation Commission (SCC) order resulted in no gross revenue increase, and a net revenue decrease of \$25.5 million, based upon 9.2% ROE and 50% equity capitalization. The company believes the commission erred in certain aspects of its determination, and has sought a re-hearing, and appealed the decision to the Virginia Supreme Court. Fitch considers the current outcome modestly negative, but in line with current rating assumptions.

Constructive Virginia Regulation: Despite the lower than expected outcome in APCo's recent triennial review, Fitch considers Virginia utility regulation supportive of credit quality. Legislation passed in March 2018 addressed the effect of the Tax Cuts and Jobs Act of 2017, codified base rate proceedings and allowed for the reinvestment of any overearnings proceeds. Prior to the revenue decrease enacted in January 2021, APCo's Virginia base rates have been frozen since 2015. However, adjustment mechanisms in place for fuel costs, purchased power, infrastructure and environmental investments have resulted in relatively stable cash flow.

In April 2020, the governor of Virginia signed the Virginia Clean Economy Act (VCEA) into law, which

replaced the state's voluntary renewable energy portfolio with a mandatory program. The legislation mandates fossil-fuel plant retirements, deems renewable investments to be in the public interest and eligible for rider recovery, and increases thresholds for energy efficiency. Fitch expects APCo's capex to remain elevated, as it complies with VCEA's provisions. However, favorable regulatory constructs should help alleviate pressure on credit metrics.

**Improving West Virginia Regulation:** Fitch has considered the regulatory compact in West Virginia to be restrictive, owing to a history of lower than average ROEs and historic test years that exacerbate regulatory lag. However, Fitch views recent rate decisions in the state as more balanced from a credit perspective, including settled outcomes and use of riders for certain costs. The West Virginia Public Service Commission (WVPSC) approved the settlement agreement on Feb. 27, 2019, concluding APCo's first rate case in its West Virginia jurisdiction in over five years.

The settlement includes an annual base rate increase of \$44 million (including \$8 million for WPCo) based on a 9.75% return on common equity, 50.16% equity capitalization and \$4.0 billion combined rate base. Additionally, APCo, along with affiliate Wheeling Power Company (WPCo; not rated), have requested approval for an experimental recovery mechanism, that would allow the companies to recover investment expenditures made between rate cases. Hearings are likely to be held in May 2021 with a decision expected during Summer 2021. Fitch believes such investment recovery mechanisms are beneficial to reducing regulatory lag and supporting credit quality.

**Modest Coronavirus Impacts:** Due to the pandemic, APCo has experienced a 2.5% decline in weather-normalized load. Unadjusted unit sales fell in all customer classes, with commercial declining 8% and industrial declining 7%. Fitch estimates that APCo's residential sales account for approximately 50% of the company's revenues. The SCC and WVPSC have authorized the establishment of regulatory assets to track pandemic-related expenses. Disconnects have resumed in West Virginia, but have not in Virginia. Thus far, bad debt expense has been manageable. Additionally, APCO received \$30 million in combined funds from Virginia and West Virginia to apply to past due residential customer balances.

**Reliance on Coal Shifting:** APCo's approximately 65% coal generation, including purchased power agreements (PPAs), is the second highest of the AEP integrated companies. As a result, the company is exposed to potentially higher expenditures as increasingly stringent environmental regulations are implemented. APCo continues to pursue clean energy resources. The company owns 785MW of renewable generation and has PPAs in place for another 575MW, totaling almost 18% of its generation mix.

**Capex Program:** APCo's 2021-2023 capex forecast is expected to increase approximately 20% compared with previous three-year forecasts. Fitch expects the company to expand its rate base by 5%, with expenditures averaging approximately \$1 billion annually. Approximately 68% of APCo's capex is for transmission and distribution investments and 6% is earmarked for regulated renewables.

**Weaker Credit Metrics:** As of LTM Dec. 31, 2020, APCo's earned ROE decreased to 8.6% from 9.2% at LTM Dec. 31, 2019. The lower ROE was the result of lower usage, higher depreciation expense, and increased capex, partially offset by O&M cost reductions. Fitch expects that APCO's credit metrics will

be at or near its 4.8x downgrade metric over the next few years.

#### Indiana Michigan Power Co.

**Supportive Regulation:** Fitch believes the regulatory regime in Indiana and Michigan are supportive. In addition to slightly above average ROEs, both states utilize recovery riders for environmental upgrades, fuel costs, energy-efficiency programs and other costs. In March 2020, the Indiana Utility Regulatory Commission (IURC) issued an order authorizing a \$26 million net annual base rate increase based on a 9.7% ROE, 46.8% equity capitalization and 2020 forecast test year. In IMPCo's smaller Michigan jurisdiction, the Michigan Public Service Commission (MPSC) authorized a \$30 million net rate increase effective February 2020. The rate increase was based on a 9.86% ROE, 46.56% equity capitalization, 2020 forecast test year.

**Capex Program:** Fitch expects IMPCo to expand its rate base by almost 4% annually with expenditures of \$2.1 billion in 2021-2023. While not included in Fitch's rating case, IMPCo forecasts 2024-2025 capex to spend an average of \$600 million annually, bringing the five-year total to \$3,364 million. The company plans to invest \$358 million for the life extension of the D.C. Cook Nuclear Plant (Cook) and \$2.0 billion in transmission and distribution assets. About 70% of Cook-related expenditures are attributable to Indiana, and recoverable almost contemporaneously through a rider mechanism.

**Improved Credit Metrics:** As a result of adequate rate relief including ability to utilize a forecast test year, IMPCo's credit metrics have remained stable despite significant capex. When adjusted for the Rockport leases, IMPCo's credit metrics continue to have adequate headroom at the current rating level. Fitch expect IMPCo's FFO leverage metrics, adjusted for Rockport to average around 3.5x.

#### Kentucky Power Co.

**Constructive Regulatory Environment:** Fitch views the regulatory compact in Kentucky as generally constructive. A variety of cost recovery mechanisms, including fuel, purchased power, environmental compliance and infrastructure replacement clauses are in place that mitigate the impact of regulatory lag. On Jan. 13, 2021, the Kentucky Public Service Commission (KPSC) granted KPCo a revenue increase of \$52.4 million effective Jan. 14, 2021. The rate increase was based on a 9.30% ROE and 43.25% equity capitalization and a March 31, 2020 test year.

**Challenged Service Territory:** KPCo's service area is primarily driven by coal mining, which has seen significant contraction in recent years. KPCo's residential customer count has declined about 6% over the last decade, while large commercial and industrial customer numbers have declined almost 20%. The company is actively pursuing economic development opportunities in its service territory. Additionally, growth in oil and gas extraction mitigates some of the effects of the secular decline in the coal industry. However, Fitch remains concerned that lower sales volumes will continue to pressure metrics and earned returns in the medium term.

**Weaker Credit Metrics:** KPCo's credit metrics have weakened significantly over the past couple years due to capex, a rate freeze through January 2022, effects of the coronavirus, and continued service territory weakness. Nonetheless, KPCo has a capex program that will expand its rate base by about 5%

annually. The company plans to invest \$579 million in 2021-2023, which is a 5% increase from the prior three year forecast. KPCo's FFO leverage remain outside of its downgrade threshold of 5.5x over the first couple years of the forecast period; however are expected to improve in 2023 with the expiration of Rockport PPA.

Reliance on Coal Remains High: KPCo's approximately 80% coal mix (including Rockport PPA) leaves the utility exposed to potentially higher expenditures as increasingly stringent environmental regulations are implemented. While KPCo has an environmental clause allowing for recovery of mandated expenditures, retail electricity rates could rise, reducing flexibility for KPCo to earn an attractive ROE and potentially inviting political scrutiny.

Ohio Power Co.

Supportive Regulatory Construct: The majority of OPCo's revenues are derived from rates established by the PUCO under a multiyear electric security plan (ESP). OPCo reached a settlement in 2018, approved by the PUCO extending the current ESP until 2024. As required, the company filed a base rate case on June 1, 2020 to roll existing rider amounts into base rates. The net increase request is \$41.0 million after giving effect to rider adjustments, based on a 10.15% ROE and 54.43% equity capitalization. The company and intervenors have reached a settlement, which results in a minimal net rate increase.

As a transmission and distribution utility, OPCo has minimal exposure to commodity prices. The company is a 20% participant in Ohio Valley Electric Corporation (OVEC; BBB-/Stable) and currently recovers OVEC costs via a non-bypassable charge allocated to all electric distribution utilities in the state, as per Ohio House Bill (H.B.) 6, which remains enforceable for recovery of OVEC expenses. OPCo's earned ROE as of TTM Dec. 31, 2020 was 10.7%.

Weaker Credit Metrics: After a period of strong credit metrics, OPCo's credit metrics have weakened as a result of significant capex and the flow back of excess deferred taxes. OPCo plans \$2.3 billion of capex in 2021-2023. The company expects rate base to grow by 8%. Approximately 65% of forecast capex are expected to be spent on distribution; 22% on transmission; and 13% on corporate and other. Currently, OPCo's credit metrics are inconsistent with the company's current 'A-' IDR.

As a result of continued high capex and dividends upstreamed to parent company, Fitch expects OPCo's FFO leverage to approach 5.0x. Partially mitigating OPCo's high leverage is the low risk nature of its T&D asset base and supportive regulatory constructs with PUCO-regulated rates on approximately 65%-70% of the company's \$5.3 billion rate base and FERC rates on approximately 30%-35%.

Public Service Company of Oklahoma

Upcoming Rate Proceedings: PSO is expected to file a base rate case on, or about April 30, 2021. The company has not indicated the filing amount, but it is expected to include recovery of its 45.5% ownership of the \$2 billion North Central Wind project, which was approved by the Oklahoma Corporation Commission (OCC) in July 2020. Rate cases in Oklahoma are adjudicated in 180 days.

Additionally, PSO has made a filing requesting regulatory asset treatment for increased natural gas and purchase power expense as a result of Winter Storm URI in February 2021.

PSO initially publicly disclosed an estimated \$825 million in expenditures; however, has reduced the estimate to \$650 million in a subsequent filing to OCC. While the company has not specified the timing and return parameters, Fitch is using a 5-year recovery period with the current rate of return.

**Favorable Generation Mix:** PSO is the least coal-exposed of the AEP integrated utilities, with coal-fired generation accounting for only 9.4% of generating and capacity mix. The company owns 3,833MW of generating capacity and has long-term PPAs on another 2,246MW, over half of which is wind.

**Capex Program:** After giving effect for the North Central Wind transaction, PSO's capex budget has increased approximately 100% compared with the prior forecast. Fitch expects the company to expand its rate base by about 12% annually with expenditures of \$2,309 million in 2021-2023. Approximately 41% of PSO's five-year capex is for transmission and distribution investments and 25% is earmarked for regulated renewables.

**Pressured Credit Metrics:** As a result of improved prior regulatory outcomes, pre-pandemic financial measures improved enough to warrant the current 'BBB+' rating. However, PSO's capex program (especially the North Central Wind transaction) has resulted in pressured credit metrics. In order to maintain current ratings, Fitch will look for the reasonable regulatory outcomes in the current fuel adjustment clause proceedings and upcoming base rate proceeding. Additionally, Fitch expects AEP to contribute equity as necessary to support the regulatory capital structure. The company's FFO leverage for LTM Dec. 31, 2020 was 6.2x and is expected to improve by 2023 to just at or slightly above its downgrade threshold of 4.8x, which may warrant a negative rating action.

#### Southwestern Electric Power Co

**Mixed Regulatory Environment:** SWEPCo operates in three state jurisdictions: Louisiana (38% of rate base), Texas (36% of rate base) and Arkansas (20% of rate base), as well as FERC (6% of rate base). Fitch views the regulatory construct for integrated utilities in Louisiana as balanced, while Texas and Arkansas are more challenging. SWEPCo's earned ROE was 7.5% as of the LTM ended Dec. 31, 2020, significantly behind AEP's consolidated earned ROE of 9.1% for the same period, but an improvement from the company's 6.8% earned ROE for LTM ended Dec. 31, 2019.

The company's low ROE reflects pandemic induced loss of load and the ongoing lack of recovery of the Arkansas portion of the Turk coal plant, which accounts for approximately 110bps of ROE drag. The company is currently pursuing base rate cases in Louisiana and Texas that, assuming constructive outcomes, could result in improved credit metrics. Additionally, the company will seek to include in its Arkansas and Louisiana jurisdictional rates the subsidiaries' 54.5% ownership of the \$2 billion North Central Wind project.

**Louisiana Rate Filing:** SWEPCo has requested a net revenue increase in Louisiana of \$93 million after giving effect for \$41 million of depreciation and amortization adjustments. The December 2020 rate filing is based on a 10.35% ROE and 50.8% equity capitalization. The company is proposing an

extension, with modifications, of the current decades-long formula rate plan (FRP). The company has included in its request the recovery of approximately \$100 million of major storm related expenses. To address the issue of storm cost recovery going forward, the company is requesting approval to defer for future recovery major storm costs that are in excess of the amount included in rates.

**Recent Texas Base Rate Filing:** SWEPCo filed a base rate case with the Public Utility Commission of Texas (PUCT) in October 2020. The company requests a net revenue increase of \$73 million in its Texas jurisdiction after giving effect for \$17 million of depreciation and amortization adjustments. The request is based on a 10.35% ROE and 49.4% equity capitalization. The request amount excludes \$15 million of retail revenues attributed to the transmission cost recovery factor (TCRF) and distribution cost recovery factor (DCRF), which will move into base rates. In the rate filing, SWEPCo is seeking \$45 million for the recovery of its Texas jurisdictional share of Dolet Hills Power Station, which the company plans to retire by Dec. 31, 2021. The company is also seeking to establish a storm reserve in the amount of \$3.6 million. A decision is expected to in late October 2021.

**Arkansas Rate Case Settlement:** The Arkansas Public Service Commission approved SWEPCO 4Q19 settlement, which resolved the SWEPCo's first Arkansas rate case in 10 years. The settlement resulted in a \$18 million net increase (after \$6 million depreciation and amortization adjustments), based upon a 9.45% ROE and 47.9% equity capitalization.

**Coronavirus Impacts:** Due to the pandemic, SWEPCo experienced a 3.7% decline in weather-normalized load in 2020 versus the prior year. Unadjusted unit sales fell in all customer classes, with commercial and industrial classes each declining 8%. Fitch estimates that SWEPCo's residential sales account for approximately 43% of the company's revenues. SWEPCO's three state jurisdictions have authorized the establishment of regulatory assets to track coronavirus-related expenses, including incremental bad debt. Disconnects have resumed in Louisiana and Texas, but have not resumed as of yet in Arkansas.

**Capex Program:** SWEPCo's 2021-2023 capex forecast is expected to double compared to the previous three-year forecast. Driving the increase, is the inclusion of the \$1.1 billion North Central Wind investment. Fitch expects the company to expand its rate base by about 5%, with total expenditures of \$2.5 billion of expenditures through 2023. Approximately 49% of SWEPCo's five-year capex forecast is for transmission and distribution investments, 29% is for renewables, 9% is earmarked for environmental generation-related investments, and 6% is for fossil and hydro generation.

**Pressure on Credit Metrics:** SWEPCo's capex program combined with limited near-term rate relief and lingering economic effects of the pandemic continue to stall significant improvement in SWEPCo's credit metrics. Additionally, the company recently disclosed that as a result of the severe winter weather in February 2021, that it incurred a significant increase in natural gas fuel costs. The company will seek to recover a reported \$375 million of additional costs through fuel clauses in its state jurisdictions; however, the recovery timeframe may be elongated. Nonetheless, Fitch expects that SWEPCo will stay within Fitch's stated FFO leverage downgrade threshold of 5.5x, assuming adequate base rate relief, recovery of storm expenses, and parent support. As of LTM Dec. 31, 2020, SWEPCo's FFO leverage was 5.6x.

## Derivation Summary

AEP's business mix compares favorably with other large multistate utility holding companies, given the company's improved risk profile after its 2017 merchant fossil generation exit. Over the forecast period AEP is expected to derive approximately 90% of its EBITDA from regulated assets, compared with 100% at Xcel, 86% at SO and 85-90% at DEI. However, AEP's consolidated credit metrics are weaker, owing to significant capex. Absent offsetting management actions, Fitch expects AEP's FFO leverage to average around 5.7x over the forecast period, which is weaker than Xcel Energy Inc. (XEL: BBB+/Stable), Southern Company (SO; BBB+/Stable), and Dominion Energy, Inc. (DEI: BBB+/Stable).

Fitch expects Xcel's FFO leverage to be 5.0x over the forecast period, SO's consolidated FFO leverage to average 5.0x through the forecast, and DEI's consolidated FFO leverage to be 5.0x. AEP is unique among the large multistate entities for its limited parent-level debt. Fitch currently estimates AEP parent-level debt will account for approximately 20%-25% of AEP's total debt load over the forecast period, this is lower than the 25%-35% at its peers.

## Key Assumptions

Fitch's Key Assumptions Within The Rating Case for the Issuer:

- Consolidated capital expenditures of \$22.3 billion over 2021-2023;
- Common dividends of \$1.4 billion in 2021, \$1.5 billion in 2022, \$1.5 billion in 2023 as per managements publicly stated forecast;
- Equity Issuances of \$600 million in 2021, \$1.4 billion in 2022, \$100 million in 2023 as per managements publicly stated forecast;
- Conversion of \$805 million equity units in 2022 and \$850 million equity units in 2023;
- Rate case filings or resolutions there of over the forecast period in Arkansas, Kentucky, Ohio, Oklahoma and Texas.

## RATING SENSITIVITIES

American Electric Power

Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Sustained FFO leverage at or below 4.0x;
- Continued balanced jurisdictional rate regulation across AEP's service territory;
- Continued strategic focus on relatively low risk utility and transmission businesses.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Sustained FFO leverage exceeding 5.0x on a sustained basis;
- Renewed emphasis on non-regulated or uncontracted investments;
- Significant unexpected regulatory developments at any of the regulated operating companies.

AEP Texas

Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Sustained FFO leverage at or below 5.0x;
- Continued balanced jurisdictional rate regulation.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Sustained FFO leverage exceeding 6.5x on a sustained basis;
- Unexpected regulatory development.

Appalachian Power, Indiana Michigan Power, Public Service Oklahoma

Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Sustained FFO leverage at or below 4.0x;
- Continued balanced jurisdictional rate regulation.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Sustained FFO leverage exceeding 4.8x on a sustained basis;
- Unexpected regulatory development.

Kentucky Power, Southwestern Electric Power

Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Sustained FFO leverage at or below 4.5x;
- Continued balanced jurisdictional rate regulation.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Sustained FFO leverage exceeding 5.5x on a sustained basis;
- Unexpected regulatory development.

## Ohio Power

Factors that could, individually or collectively, lead to positive rating action/upgrade:

- A positive rating action is not likely at this time, as OPCo's ratings are constrained by its participation in a money pool with regulated affiliates that are rated two notches lower.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Sustained FFO leverage exceeding 4.5x on a sustained basis;
- Unexpected regulatory development.

### **Best/Worst Case Rating Scenario**

International scale credit ratings of Non-Financial Corporate issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of four notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit <https://www.fitchratings.com/site/re/10111579>.

### **Liquidity and Debt Structure**

AEP has a \$4.0 billion committed revolving credit facility maturing in March 2026 and a \$1 billion committed facility maturing in March 2023, both of which serve as a backstop for AEP's CP program and LOC. AEP must maintain a ratio of debt/total capitalization that does not exceed 67.5%, under the covenants to its credit agreement. This contractually-defined percentage was 58.6% as of Dec. 31, 2020. As of Dec. 31, 2020, AEP had \$2,147 million available on its revolving credit facility (then sized at \$4 billion and giving effect for CP issuance) and cash of \$392.7 million.

AEP has parent level corporate maturities as follows: \$400 million in 2021, \$1,605 million in 2022, and \$1,900 in 2023, \$300 in 2024. AEP has \$805 million of equity units issued in 2019 and \$850 million issued in 2020 for which Fitch does not give equity credit. The notes are expected to be remarketed in 2022 and 2023, respectively, at which time the interest rate will reset at the then current market rate and forward equity purchase contract associated with the units will be settled with the issuance of equity. If either remarketing is unsuccessful, investors have the right to put their notes to AEP at a price equal to the principal. Fitch assumes successful remarketings for the equity units.

AEP's regulated subsidiaries use a pool of corporate borrowing to meet short-term funding needs. The money pool operates according to regulators' approved terms and conditions, and includes maximum authorized borrowing limits for individual companies.

## Summary of Financial Adjustments

As of Dec. 31, 2020, Fitch has made the following adjustments:

--\$716 million of securitized debt has been removed from Fitch's AEP consolidated debt calculation;

--\$492 million of securitized debt has been removed from Fitch's AEPTX debt calculation;

--\$223 million of securitized debt has been removed from Fitch's APCo debt calculation.

Copyright © 2021 by Fitch Ratings, Inc., Fitch Ratings Ltd. and its subsidiaries. 33 Whitehall Street, NY, NY 10004. Telephone: 1-800-753-4824, (212) 908-0500. Fax: (212) 480-4435. Reproduction or retransmission in whole or in part is prohibited except by permission. All rights reserved. In issuing and

maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues

issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

## Endorsement policy

Fitch's international credit ratings produced outside the EU or the UK, as the case may be, are endorsed for use by regulated entities within the EU or the UK, respectively, for regulatory purposes, pursuant to the terms of the EU CRA Regulation or the UK Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019, as the case may be. Fitch's approach to endorsement in the EU and the UK can be found on Fitch's [Regulatory Affairs](#) page on Fitch's website. The endorsement status of international credit ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.

## RATING ACTION COMMENTARY

# Fitch Downgrades AEP's L-T IDR to 'BBB' and S-T IDR to 'F3'; Affirms Kentucky Power

Thu 28 Oct, 2021 - 11:24 AM ET

Fitch Ratings - New York - 28 Oct 2021: Fitch Ratings has downgraded American Electric Power Company, Inc.'s (AEP) Long-Term Issuer Default Rating (IDR) and senior unsecured ratings to 'BBB' from 'BBB+'. Fitch has also downgraded AEP's Short-Term IDR and CP to 'F3' from 'F2'. Additionally, Fitch has affirmed Kentucky Power Co.'s (KPCo) Long-Term IDR at 'BBB' and senior unsecured rating at 'BBB+'. The Rating Outlook for AEP has been revised to Stable from Negative. The Rating Outlook for KPCo is Stable.

The downgrade of AEP's Long-Term IDR reflects the company's announcement that the \$1.45 billion cash proceeds from the planned sale of KPCo to Algonquin Power & Utilities (APUC, BBB/Stable) will be used to offset forecasted equity needs in 2022. As a result, Fitch expects the company's credit metrics to continue to exceed the stated downgrade threshold for a 'BBB+' rating. The downgrade of AEP's Short-Term IDR reflects Fitch's assessment of AEP's financial structure, flexibility and operating environment, which results in the assignment of the lower of the two short-term options for the current long-term rating.

The affirmation of KPCo's Long-Term IDR reflects the company's weak, but expected to improve credit metrics and the anticipation that new ownership will continue to support KPCo in a manner that will be consistent with its current 'BBB' rating. Additionally, Fitch expects any conditions imposed by the Kentucky Public Service Commission (KPSC) will

not be a deterrent to improved credit metrics at KPCo. The sale also includes KPCo's ownership of AEP Kentucky Transco, which is currently owned by AEP Transmission Company, LLC (AEP Transco, A-/Stable). AEP Transco is not impacted by the transaction, given AEP Kentucky Transco's small size.

## KEY RATING DRIVERS

American Electric Power Company, Inc.

KPCo Strategic Review Outcome: AEP announced on Oct. 26, 2021 that it has reached an agreement to sell KPCo to Liberty Utilities (LU, BBB/Stable) the regulated business subsidiary of APUC in a transaction valued at \$2.846 billion, including the assumption of \$1.3 billion in debt. The sale announcement is the result of a strategic review process announced in April 2021. The sale includes KPCo's Federal Energy Regulatory Commission (FERC) regulated assets, both at KPCo and AEP Transco. The transaction is expected to close 2Q22 and will require the approval of the KPSC and FERC, as well as federal clearance under the Hart-Scott-Rodino Act and the Committee on Foreign Investment in the U.S.

Separately, the parties are negotiating a new operating agreement for the coal-fired Mitchell plant, which is currently operated by KPCo, but jointly-owned by KPCo and AEP subsidiary Wheeling Power Co. (WPCo, NR). Under the new agreement WPCo will assume operational responsibility. Additionally, the agreement is expected to resolve Mitchell's disposition past 2028. The new agreement will require approval by KPSC, Public Service Commission of West Virginia, and FERC. Approval of the new Mitchell operating agreement is required for the transaction to close.

Sale Proceeds to Offset Equity: AEP has announced that the \$1.45 billion after tax cash proceeds from the sale of KPCo will be used to offset forecasted equity needs in 2022. As a result, Fitch expects the company's FFO leverage to average 5.4x over the forecast period exceeding the stated downgrade threshold for a 'BBB+' rating of FFO leverage of 5.0x. Fitch's calculations include the effect and assumed favorable regulatory treatment of approximately \$1 billion in additional fuel or purchased power costs amassed in February 2021 at PSO and SWEPCO as a result of Winter Storm Uri.

Capex Largely Debt Funded. AEP's 2021-2023 capex plan is 18% larger than the previous three-year plan, and will result in a 7.4% average annual rate base growth from 2019. Over recent years, the company has increasingly debt financed its capex leading to higher leverage. As of TTM June 30, 2021, cash from operations financed only 50% of capex. On a positive note, AEP's capex is almost exclusively geared to expanding the regulated rate

base, with 43% planned for transmission assets, the majority of which are regulated by FERC. Management expects that nearly 70% of the company's capital plan will be recoverable under reduced lag mechanisms. Fitch estimates AEP's parent-level debt will account for approximately 20%-25% of AEP's total debt load over the forecast period, versus 25%-30% at its most of its peers.

**Balanced Regulatory Construct:** Fitch views the state regulatory constructs within AEP's 11-state (soon to be 10 state) service territory as balanced. Authorized state ROEs are close to the industry average in most jurisdictions and include provisions to mitigate commodity and environmental regulation risks. AEP's transmission entities, most of which are subsidiaries of AEP Transco, operate under a tariff approved by the FERC. The FERC tariff provides timely recovery of capital and operating costs as well as favorable ROEs (10.35% and 10.50%) and robust capital structures. Fitch expects consolidated earned ROE, which was 9.0% for the LTM ended June 30, 2021, to average around 9.0% in 2021-2023.

**Improving Asset Base:** As a result of the companies' focus on transmission investment, AEP Transco is currently AEP's second largest subsidiary in terms of equity investment, and is expected to be the largest by the end of the forecast period. Fitch expects that the favorably FERC-regulated entity will account for almost 20% of AEP's consolidated EBITDA, resulting in a lower risk profile for the combined company. Additionally, the company plans to continue reducing its reliance on coal-fired generation and increase renewable capacity through construction of rate-based assets and power purchase agreements (PPAs). Hydro, wind, solar and pumped storage generation currently constitutes 19% of the generation capacity, and is expected to increase to almost 52% over the next 10 years.

**Parent-Subsidiary Rating Linkage:** AEP and its regulated subsidiaries have operational, financial and functional ties, resulting in moderate rating linkage. The treasury function is centrally managed and all regulated subsidiaries depend on AEP for short-term liquidity and participate in AEP's money pool. The money pool allows the utilities to manage working capital needs and provides short-term financing. Legal ties are weak, as the parent does not guarantee the debt obligations of its regulated subsidiaries.

AEP and most of its subsidiaries have limitations on capital structure from covenants in the bank credit agreement (debt/total capitalization that does not exceed 67.5%), and from regulatory requirements to maintain a specific equity ratio. No cross-default provisions exist among AEP and its subsidiaries. Due to these linkages, Fitch typically limits the notching difference between AEP and its subsidiaries to one or two notches.

Fitch applied a bottom-up approach in rating AEP's utility subsidiaries. Regulated subsidiaries are rated lower and/or higher than AEP, reflecting the strength of their balance sheets, quality of their service areas, and the constructiveness of their regulatory environments. Fitch rates AEP on a consolidated basis. Fitch expects AEP will adjust dividends from subsidiaries as needed and/or inject equity into subsidiaries to maintain regulatory capital structures and support credit metrics. Fitch applies a one-notch uplift to Kentucky Power Company's (BBB/Stable) ratings as a reflection of the implied support from the stronger parent company. Fitch expects that APUC will continue to support KPCo in a manner that will be consistent with the subsidiary's current 'BBB'.

Kentucky Power Co.

**KPSC Merger Process:** The sale of KPCo will require approval by the KPSC, which is expected to take up to 120 days once the case is filed. Fitch does not anticipate that merger conditions will be onerous. The KPSC will evaluate if the acquiror has the financial, technical, and managerial abilities to operate KPCo, and that the merger is consistent with the public interest. The KPSC commenced an investigation of KPCo on Sept. 15, 2021, likely in anticipation of the sale of the entity. Previously, the commission had expressed concern about spending for transmission and Mitchell environmental capex. Lower capex spending would benefit KPCo's credit metrics.

**Constructive Regulatory Environment:** Absent the KPSC's prior stated concerns about KPCo's capex spending, Fitch views the regulatory compact in Kentucky as generally constructive. A variety of cost recovery mechanisms, including fuel, purchased power, environmental compliance and infrastructure replacement clauses are in place that mitigate the impact of regulatory lag. On Jan. 13, 2021, the KPSC granted KPCo a revenue increase of \$52.4 million effective Jan. 14, 2021. The rate increase was based on a 9.30% ROE and 43.25% equity capitalization and a March 31, 2020 test year.

**Challenged Service Territory:** KPCo's service area is primarily driven by coal mining, which has seen significant contraction in recent years. KPCo's residential customer count has declined about 6% over the last decade, while large commercial and industrial customer numbers have declined almost 20%. Growth in oil and gas extraction mitigates some of the effects of the secular decline in the coal industry. However, Fitch remains concerned that lower sales volumes will continue to pressure metrics and earned returns in the medium term.

**Weaker Credit Metrics:** KPCo's credit metrics have weakened significantly over the past couple years due to capex, a prior rate freeze, effects of the coronavirus, and continued

service territory weakness. KPCo has been a perennially under earning asset, with 5.9% earned ROE as of TTM June 30, 2021 compared to 9.0% for AEP consolidated. Fitch expects that new ownership will likely trim KPCo's capex budget, which was \$579 million in 2021-2023, a 5% increase from the prior three years. Additionally, KPCo's FFO leverage is expected to improve in 2023 with the expiration of Rockport PPA.

## DERIVATION SUMMARY

AEP's business mix compares favorably with other large multistate utility holding companies, given the company's improved risk profile after its 2017 merchant fossil generation exit. Over the forecast period, AEP is expected to derive approximately 90% of its EBITDA from regulated assets, compared with 100% at Xcel Energy Inc. (XEL: BBB+/Stable), 86% at Southern Company (SO; BBB+/Stable) and 85%-90% at Dominion Energy, Inc. (DEI: BBB+/Stable). However, AEP's consolidated credit metrics are weaker, owing to significant capex. Fitch expects AEP's FFO leverage to average around 5.4x over the forecast period, which is weaker than Xcel, SO, and DEI.

Fitch expects Xcel's FFO leverage to be 5.0x over the forecast period, SO's consolidated FFO leverage to average 5.0x through the forecast, and DEI's consolidated FFO leverage to be 5.0x. AEP is unique among the large multistate entities for its limited parent-level debt. Fitch currently estimates AEP parent-level debt will account for approximately 20%-25% of AEP's total debt load over the forecast period, this is lower than the 25%-35% at its peers.

## KEY ASSUMPTIONS

Fitch's Key Assumptions Within The Rating Case for the Issuer:

- Consolidated capital expenditures of \$22.3 billion over 2021-2023;
- Sale of KPCo completed 2Q22, after tax proceeds of \$1.45 billion used to offset equity needs;
- Common dividends of \$1.4 billion in 2021, \$1.5 billion in 2022, \$1.5 billion in 2023 as per managements publicly stated forecast;
- Equity Issuances of \$100 million in 2023 as per managements publicly stated forecast;
- Conversion of \$805 million equity units in 2022 and \$850 million equity units in 2023;

--Rate case filings or resolutions there of over the forecast period in Arkansas, Ohio, Oklahoma and Texas.

## **RATING SENSITIVITIES**

### American Electric Power

Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Sustained FFO leverage at or below 5.0x;
- Continued balanced jurisdictional rate regulation across AEP's service territory;
- Continued strategic focus on relatively low risk utility and transmission businesses.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Sustained FFO leverage exceeding 5.5x on a sustained basis;
- Renewed emphasis on non-regulated or uncontracted investments;
- Significant unexpected regulatory developments at any of the regulated operating companies.

### Kentucky Power

Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Sustained FFO leverage at or below 4.5x;
- Continued balanced jurisdictional rate regulation.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Sustained FFO leverage exceeding 5.5x on a sustained basis;
- Unexpected regulatory development.

## **BEST/WORST CASE RATING SCENARIO**

International scale credit ratings of Non-Financial Corporate issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of four notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit <https://www.fitchratings.com/site/re/10111579>.

## LIQUIDITY AND DEBT STRUCTURE

AEP has a \$4.0 billion committed revolving credit facility maturing in March 2026 and a \$1 billion committed facility maturing in March 2023, both of which serve as a backstop for AEP's CP program and LOC. AEP must maintain a ratio of debt/total capitalization that does not exceed 67.5%, under the covenants to its credit agreement. This contractually-defined percentage was 59.3% as of Sept. 30, 2021. As of Sept. 30, 2021, AEP had \$3.746 billion available on its revolving credit facility (giving effect for CP issuance) and cash of \$1.373 billion.

AEP has parent level corporate maturities as follows: \$400 million in 2021, \$1.605 billion in 2022, and \$1.900 billion in 2023, \$300 million in 2024. AEP has \$805 million of equity units issued in 2019 and \$850 million issued in 2020 for which Fitch does not give equity credit. The notes are expected to be remarketed in 2022 and 2023, respectively, at which time the interest rate will reset at the then current market rate and forward equity purchase contract associated with the units will be settled with the issuance of equity. If either remarketing is unsuccessful, investors have the right to put their notes to AEP at a price equal to the principal. Fitch assumes successful remarketings for the equity units.

AEP's regulated subsidiaries use a pool of corporate borrowing to meet short-term funding needs. The money pool operates according to regulators' approved terms and conditions, and includes maximum authorized borrowing limits for individual companies.

## ISSUER PROFILE

AEP is a utility holding company of regulated electric utility subsidiaries serving portions of Arkansas, Indiana, Kentucky, Louisiana, Michigan, Ohio, Oklahoma, Tennessee, Texas, Virginia and West Virginia. Additionally, the company has significant investments in FERC regulated transmission assets.

**SUMMARY OF FINANCIAL ADJUSTMENTS**

As of Dec. 31, 2020, Fitch has made the following adjustments:

--\$716 million of securitized debt has been removed from Fitch's AEP consolidated debt calculation;

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have

shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

## **SOLICITATION STATUS**

The ratings above were solicited and assigned or maintained by Fitch at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

## ENDORSEMENT POLICY

Fitch's international credit ratings produced outside the EU or the UK, as the case may be, are endorsed for use by regulated entities within the EU or the UK, respectively, for regulatory purposes, pursuant to the terms of the EU CRA Regulation or the UK Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019, as the case may be. Fitch's approach to endorsement in the EU and the UK can be found on Fitch's [Regulatory Affairs](#) page on Fitch's website. The endorsement status of international credit ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.

**RATING ACTION COMMENTARY**

# **Fitch Affirms AEP and Select Subsidiaries; Upgrades IMPCo**

Thu 23 Dec, 2021 - 1:09 PM ET

Fitch Ratings - New York - 23 Dec 2021: Fitch Ratings has affirmed the Long-Term Issuer Default Rating (IDR) and senior unsecured rating for American Electric Power Company, Inc. (AEP) at 'BBB'. Fitch has also affirmed AEP's Short-Term IDR and CP at 'F3'.

Simultaneously, AEP's Short-Term IDR and CP ratings are being withdrawn for commercial purposes. AEP's Rating Outlook is Stable.

Additionally, Fitch has affirmed the IDRs of AEP's utility operating subsidiaries as follows: Ohio Power Co. (OPCo) at 'A-'; Appalachian Power Co. (APCo) and Public Service Company of Oklahoma (PSO) at 'BBB+'; AEP Texas (AEPTX) at 'BBB'; and Kentucky Power Co. (KPCo) and Southwestern Electric Power Co. (SWEPCO) at 'BBB'. Fitch has upgraded Indiana Michigan Power Co. (IMPCo) to 'A-' from 'BBB+'. The senior unsecured ratings for all of the aforementioned utility operating subsidiaries receive a one-notch uplift relative to their respective IDRs. OPCo's Outlook has been revised to Stable from Negative. The Outlooks for the APCo, AEPTX, IMPCo, KPCo, PSO, and SWEPCo are Stable.

The affirmation of AEP and subsidiaries is based on AEP's low-risk profile as a regulated utility system, its transition of the regulated generation fleet away from coal generation, and ongoing efforts to improve regulated returns. Fitch expects AEP's FFO leverage to average around 5.4x over the forecast period, which Fitch views as consistent with 'BBB' rating. The upgrade of IMPCo reflect expectation for continued strong credit metrics including the resolution of Rockport lease termination. The stabilization of OPCo's Outlook

is predicated on the expectation that AEP will manage its capital allocation policy to support credit metrics consistent with the subsidiaries current 'A-' IDR.

Fitch has withdrawn AEP's Short-Term IDR and CP for commercial reasons.

## **KEY RATING DRIVERS**

### **AEP**

**Kentucky Power Sale:** AEP announced on Oct. 26, 2021 that it has reached an agreement to sell KPCo (BBB/Stable) to Liberty Utilities (BBB/Stable) the regulated business subsidiary of Algonquin Power & Utilities (BBB/Stable) in a transaction valued at \$2.846 billion, including the expected assumption of \$1.3 billion in debt. The sale announcement is the result of a strategic review process announced in April 2021. The sale includes KPCo's Federal Energy Regulatory Commission (FERC) regulated assets, both at KPCo and AEP Transco. The transaction is expected to close in 2Q22 and will require the approval of the Kentucky Public Service Commission (KPSC) and FERC, as well as federal clearance under the Hart-Scott-Rodino Act and the Committee on Foreign Investment in the U.S.

Separately, the parties have negotiated a new operating agreement for the coal-fired Mitchell plant, which is currently operated by KPCo, but jointly-owned by KPCo and AEP subsidiary Wheeling Power Co. (WPCo, NR). Under the new agreement WPCo will assume operational responsibility. Additionally, the agreement is expected to resolve Mitchell's disposition past 2028. The new agreement will require approval by KPSC, Public Service Commission of West Virginia and FERC. Approval of the new Mitchell operating agreement is required for the transaction to close.

**Sale Proceeds to Offset Equity:** AEP has announced the \$1.45 billion after-tax cash proceeds from the sale of KPCo will be used to offset forecasted equity needs in 2022. Fitch expects the company's FFO leverage to average 5.4x over the forecast period, which is consistent with a 'BBB' rating. Fitch's calculations include the effect and assumed favorable regulatory treatment of approximately \$1 billion in additional fuel or purchased power costs amassed in February 2021 at PSO and SWEPCO as a result of Winter Storm Uri.

**Capex Largely Debt Funded:** AEP's 2022-2024 capex plan is 3% larger than the previous three-year plan and will result in a 7.3% average annual rate base growth from 2020. Over recent years, the company has increasingly debt financed its capex, leading has led to higher

leverage. Over the forecast period internal funding of capex is expected to average 75%, which is an improvement from 64% in 2019 and 55% in 2020.

AEP's capex is almost exclusively geared to expanding the regulated rate base, with 38% planned for transmission assets, the majority of which are regulated by FERC. Management expects that nearly 85% of the company's capital plan will be recoverable under reduced lag mechanisms. Fitch estimates AEP's parent-level debt will account for approximately 20% of AEP's total debt load over the forecast period, versus 25%-30% at most of its peers.

**Balanced Regulatory Construct:** Fitch views the state regulatory constructs within AEP's 11-state (soon to be 10-state) service territory as balanced. Authorized state ROEs are close to the industry average in most jurisdictions and include provisions to mitigate commodity and environmental regulation risks. AEP's transmission entities, most of which are subsidiaries of AEP Transco, operate under a tariff approved by the FERC. The FERC tariff provides timely recovery of capital and operating costs as well as favorable ROEs (10.35% and 10.50%) and robust capital structures. Fitch expects consolidated earned ROE, which was 9.0% for the LTM ended Sept. 30, 2021, to average around 9.0% in 2021-2024.

**Improving Asset Base:** As a result of the companies' focus on transmission investment, AEP Transco is currently AEP's second largest subsidiary in terms of equity investment and is likely to be the largest by the end of the forecast period. Fitch expects that the favorably FERC-regulated entity will account for almost 20% of AEP's consolidated EBITDA. The company plans to continue reducing its reliance on coal-fired generation and increase renewable capacity through acquisition of rate-based assets and power purchase agreements (PPAs).

**Parent-Subsidiary Rating Linkage:** There is parent subsidiary linkage between AEP and all of its rated subsidiaries. Fitch determines AEP's standalone credit profile (SCP) based upon consolidated metrics. Fitch considers APCo, IMPCo, OPCo and PSO to have SCPs stronger than AEP. As such, Fitch has followed the stronger subsidiary path. Emphasis is placed on the subsidiaries' status as regulated entities. Legal ring fencing is considered porous given the general protections afforded by economic regulation. Access and control are evaluated as porous.

AEP centrally manages the treasury function for all of its entities and is the sole source of equity; however, each subsidiary issues its own long-term debt. AEP Texas and SWEPCo, are rated the same as AEP, but if their SCPs were to be stronger than AEP the two subsidiaries would follow the same linkage consideration as outlined above. Due to the

aforementioned linkage considerations, Fitch will limit the difference between AEP and any of its higher rated regulated subsidiaries to two notches.

KPCo is considered to have a weaker SCP than AEP. Fitch has followed the stronger parent path. Legal incentives are weak as AEP does not guarantee KPCo debt. AEP has announced the sale of KPCo thereby rendering strategic incentives as weak. Operational incentives are scored as medium given the joint-ownership of the Mitchell plant, which will require the approval of a new ownership and operational agreement to complete the sale. As a result of the aforementioned assessment, Fitch has applied a one notch uplift to KPCo's ratings.

## AEPTX

**Low-Risk Business Profile:** AEPTX owns and operates regulated electricity T&D networks located in the Electric Reliability Council of Texas (ERCOT). The Public Utility Commission of Texas (PUCT) sets rates on a cost-of-service basis with the opportunity for capital recovery outside of base rate proceedings through annual or semi-annual clause mechanisms. AEPTX does not have direct exposure to commodity prices. AEPTX had no material impact from the market disruptions due to the February 2021 winter storm.

**2020 Base Rate Proceeding:** AEPTX concluded in April 2020, as per the settlement, its first base rate proceeding since 2006. The approved settlement resulted in a \$40 million revenue decrease based on a 9.4% ROE, 42.5% hypothetical equity capital structure and 2018 test year. The lower equity capitalization further pressures metrics already affected by significant capex spend. In addition to traditional rate case issues, the somewhat contentious proceedings included a return of excess federal income taxes collected, due to the Tax Cuts and Jobs Act of 2017 (TCJA), implementation of ringfencing measures, inclusion in base rates of amounts previously recovered under rate riders and consolidation of rate structures of AEPTX's two predecessor entities.

**Energy Industry Exposure:** AEPTX's service territory encompasses the Eagle Ford and Permian shale gas basins, which have experienced an uptick in economic activity. AEPTX's weather-normalized kWh sales increased 1.3% in 2020 versus 2019, despite the pandemic. The company forecasts total weather-normalized kWh sales to increase by 2.6% in 2021 and 6.7% in 2022.

**Pressured Credit Metrics:** As a result of AEPTX's lower equity capitalization and continued regulatory lag due to the service territory's high growth, AEPTX's FFO leverage has declined significantly versus prior periods and is expected to exceed 6.0x over the forecast period. The company's 2022-2024 capex forecast of almost \$3.5 billion is approximately

4% higher versus the prior three-year forecast. Fitch expects parent AEP will only make equity infusions to maintain the regulatory capital structure as authorized, which will result in credit metrics lower than most 'BBB' rated utilities. However, Fitch considers the low risk nature of the T&D companies in Texas an offsetting factor to support the current rating.

## APCo

**Virginia Triennial Review:** APCo received an order on Nov. 24, 2020 in its first legislatively mandated triennial review, which covers the 2017-2019 earnings test years. The Virginia State Corporation Commission order resulted in no gross revenue increase, and a net revenue decrease of \$25.5 million, based upon 9.2% ROE and 50% equity capitalization. The company believes the commission erred in certain aspects of its determination, and has sought a re-hearing, and appealed the decision to the Virginia Supreme Court. Fitch considers the current outcome modestly negative, but in line with current rating assumptions.

**Constructive Virginia Regulation:** Despite the lower than expected outcome in APCo's recent triennial review, Fitch considers Virginia utility regulation supportive of credit quality. Legislation passed in March 2018 addressed the effect of the TCJA of 2017, codified base rate proceedings and allowed for the reinvestment of any overearnings proceeds. Prior to the revenue decrease enacted in January 2021, APCo's Virginia base rates have been frozen since 2015. However, adjustment mechanisms in place for fuel costs, purchased power, infrastructure and environmental investments have resulted in relatively stable cash flow.

In April 2020, the governor of Virginia signed the Virginia Clean Economy Act (VCEA) into law, which replaced the state's voluntary renewable energy portfolio with a mandatory program. The legislation mandates fossil-fuel plant retirements, deems renewable investments to be in the public interest and eligible for rider recovery, and increases thresholds for energy efficiency. Fitch expects APCo's capex to remain elevated, as it complies with VCEA's provisions. However, favorable regulatory constructs should help alleviate pressure on credit metrics.

**Improving West Virginia Regulation:** Fitch has considered the regulatory compact in West Virginia to be restrictive, owing to a history of lower than average ROEs and historic test years that exacerbate regulatory lag. However, Fitch views recent rate decisions in the state as more balanced from a credit perspective, including settled outcomes and use of riders for certain costs. The West Virginia Public Service Commission (WVPSC) approved

the settlement agreement on Feb. 27, 2019, concluding APCo's first rate case in its West Virginia jurisdiction in over five years.

The settlement includes an annual base rate increase of \$44 million, including \$8 million for affiliate Wheeling Power Company (WPCo; not rated) based on a 9.75% return on common equity, 50.16% equity capitalization and \$4.0 billion combined rate base. In June 2021, the WVPSC issued an order approving a recovery mechanism that will allow APCo, along with WPCo to recover investment expenditures made between rate cases. Fitch believes such investment recovery mechanisms are beneficial to reducing regulatory lag and supporting credit quality.

**Modest Coronavirus Impacts:** Due to the pandemic, APCo has experienced a 2.5% decline in weather-normalized load. Unadjusted unit sales fell in all customer classes, with commercial declining 8% and industrial declining 7%. Fitch estimates that APCo's residential sales account for approximately 50% of the company's revenues. The company forecasts total weather-normalized kWh sales to increase by 1.5% in 2021 and decrease by 0.6% in 2022.

**Reliance on Coal Shifting:** APCo's approximately 65% coal generation, including PPAs, is the second highest of the AEP integrated companies. As a result, the company is exposed to potentially higher expenditures as increasingly stringent environmental regulations are implemented. APCo continues to pursue clean energy resources. The company owns 785MW of renewable generation and has PPAs in place for another 575MW, totaling almost 18% of its generation mix.

**Capex Program.** Fitch expects APCo to expand its rate base by almost 6% annually, with expenditures of \$3.8 billion in 2022-2024 and five-year total of \$6.7 billion. Over the five-year capital plan, APCo plans to invest \$3.6 billion in transmission and distribution assets, and \$1.8 billion in renewables.

**Weaker Credit Metrics:** As of LTM Sept. 30, 2021, APCo's earned ROE decreased to 7.3% from 8.6% at LTM Dec. 31, 2020. The lower ROE was the result of lower usage, higher depreciation expense, and increased capex, partially offset by O&M cost reductions. Fitch expects that APCO's credit metrics will be at or near its 4.8x downgrade metric over the next few years.

IMPCo

Supportive Regulation: Fitch believes the regulatory regimes in Indiana (80% of rate base) and Michigan (20% of rate base) are supportive. In addition to slightly above average ROEs, both states utilize recovery riders for environmental upgrades, fuel costs, energy-efficiency programs and other costs.

In November 2021, a settlement was filed with Indiana Utility Regulatory Commission (IURC) in IMPCo's current Indiana rate case. Under the terms of the settlement, IMPCo will implement a two-step rate decrease. The first step of \$4.7 million reduction will be effective upon receipt of an order, which is expected 1Q22. The second reduction in the amount of \$94.7 million is expected to be implemented in January 2023.

The reduction reflects the removal of \$141 million of annual expenses for the Rockport power plant, which IMPCo will terminate the lease in December 2022. The settlement is based upon a 9.7% ROE and an investor-supplied capital that is to be no higher than 50%. In IMPCo's smaller Michigan jurisdiction, the Michigan Public Service Commission (MPSC) authorized a \$30 million net rate increase effective February 2020. The rate increase was based on a 9.86% ROE, 46.56% equity capitalization, 2020 forecast test year.

Modest Coronavirus Effects: Due to the pandemic, IMPCo experienced a 2.8% decline in weather-normalized load in 2020. Unadjusted commercial unit sales declined 4.0% and industrial unit sales declined 5.0%. Unadjusted residential unit sales increased by 1.0%. The company forecasts total weather-normalized kWh sales to increase by 1.1% in 2021 and flat in 2022. Fitch estimates IMPCo's residential sales, on average, over the last five years account for approximately 30% of the company's retail unit sales but 40% of retail revenues. The IURC and MPSC authorized the establishment of regulatory assets to track pandemic-related expenses. Disconnects resumed in both jurisdictions. Thus far, bad debt expense has been manageable.

Reliance on Coal Shifting: IMPCo's approximately 46% coal generation, including PPAs, is the third-highest of the AEP integrated companies. IMPCo, along with AEGCo is a participant in the Rockport power plant, which consists of two 1,300MW coal-fired units. IMPCo is a 50% co-owner of Unit 1 and a 50% lessee of Unit 2, which was sold into a sale-leaseback transaction in 1989. IMPCo and AEGCo reached an agreement with the owner trustee on April 20, 2021 to buy out 100% of the equity interest in Rockport Unit 2 for \$115 million. The transaction is expected to close in December 2022 and will allow for the flexibility to close both Rockport units by 2028, if not earlier.

IMPCo owns the 2,288MW D.C. Cook Nuclear Plant (Cook), which accounts for approximately 44% of the company's generation capacity and is the only nuclear asset in

the AEP system. While Fitch considers nuclear generation to have higher operating risk, Cook has operated with a 90%-capacity factor over the last several years, roughly in line with the industry average, and is an important component of AEP's continued transition to a low-carbon environment.

**Capex Program:** Fitch expects IMPCo to expand its rate base by almost 5% annually, with expenditures of \$1.8 billion in 2022-2024 and five-year total of \$3.8 billion. Over the five-year capital plan, IMPCo plans to invest \$347 million for the life extension of Cook, \$1.6 billion in transmission and distribution assets, and \$900 million in renewables. About 70% of nuclear-related expenditures are attributable to Indiana, and recoverable almost contemporaneously through a rider mechanism.

**Improved Credit Metrics:** As a result of adequate rate relief, including the ability to utilize a forecast test year, IMPCo's credit metrics remained stable despite significant capex. IMPCo's FFO leverage is expected to be in the range of 3.5x -4.0x, which is consistent with an 'A-' integrated utility.

## KPCo

**KPSC Merger Process:** The sale of KPCo will require approval by the KPSC, which is expected to take up to 120 days once the case is filed. Fitch does not anticipate that merger conditions will be onerous. The KPSC will evaluate if the acquiror has the financial, technical, and managerial abilities to operate KPCo, and that the merger is consistent with the public interest. The KPSC commenced an investigation of KPCo on Sept. 15, 2021, likely in anticipation of the sale of the entity. Previously, the commission had expressed concern about spending for transmission and Mitchell environmental capex. Lower capex spending would benefit KPCo's credit metrics.

**Constructive Regulatory Environment:** Absent the KPSC's prior stated concerns about KPCo's capex spending, Fitch views the regulatory compact in Kentucky as generally constructive. A variety of cost recovery mechanisms, including fuel, purchased power, environmental compliance and infrastructure replacement clauses are in place that mitigate the impact of regulatory lag. On Jan. 13, 2021, the KPSC granted KPCo a revenue increase of \$52.4 million effective Jan. 14, 2021. The rate increase was based on a 9.30% ROE and 43.25% equity capitalization and a March 31, 2020 test year.

**Challenged Service Territory:** KPCo's service area is primarily driven by coal mining, which has seen significant contraction in recent years. KPCo's residential customer count has declined about 6% over the last decade, while large commercial and industrial customer

numbers have declined almost 20%. Growth in oil and gas extraction mitigates some of the effects of the secular decline in the coal industry. However, Fitch remains concerned that lower sales volumes will continue to pressure metrics and earned returns in the medium term.

**Weaker Credit Metrics:** KPCo's credit metrics have weakened significantly over the past couple years due to capex, a prior rate freeze, effects of the coronavirus and continued service territory weakness. KPCo has been a perennially under earning asset, with 6.9% earned ROE as of TTM Sept. 30, 2021 compared to 9.0% for AEP consolidated. Fitch expects that new ownership will likely trim KPCo's capex budget, which was \$579 million in 2021-2023, a 5% increase from the prior three years. Additionally, KPCo's FFO leverage is expected to improve in 2023 with the expiration of Rockport PPA.

## OPCo

**Low-Risk Business Profile:** OPCo owns and operates regulated electricity transmission and distribution networks in Ohio under cost of service-based regulatory frameworks. The company is regulated by the Public Utilities Commission of Ohio (PUCO) and FERC. The company has minimal direct exposure to commodity prices. OPCo is a 20% participant in Ohio Valley Electric Corporation (OVEC; BBB-/Stable) and currently recovers OVEC costs via a non-bypassable charge allocated to all electric distribution utilities in the state as per Ohio House Bill (H.B.) 6. Prior to the enactment of H.B. 6, OPCo recovered OVEC costs through a PUCO-approved power purchase agreement (PPA) rider.

**Supportive Regulatory Construct:** The majority of OPCo's revenues are derived from rates established by PUCO under a multiyear electric security plan (ESP). OPCo reached a settlement in 2018 that was approved by the PUCO extending the current ESP until 2024. As required, the company filed a base rate case on June 1, 2020 to roll existing rider amounts into base rates. The net increase request was \$41.0 million after giving effect to rider adjustments, based upon a 10.15% ROE and 54.43% equity capitalization.

The PUCO approved a settlement on Nov. 17, 2021 which resulted in a minimal change to current rates. The settlement provides for an increase in the residential monthly customer charge to \$10.00 from \$8.40, discontinues revenue decoupling, and continues the distribution investment rider subject to specified annual revenue caps. OPCo's earned ROE as of TTM Sept. 30, 2021 was 9.3%.

**Coronavirus Impacts:** Due to the pandemic, OPCo experienced a 2.4% decline in weather-normalized load in 2020. The company has resumed disconnections as of September 2020,

and the PUCO has approved accounting orders for the deferral of various pandemic-related expenses. The company forecasts total weather-normalized kWh sales to increase by 4.8% in 2021 and 1.2% in 2022.

**Weaker Credit Metrics:** After a period of strong credit metrics, OPCo's credit metrics weakened in 2019-2020 as a result of significant capex and the flow back of excess deferred taxes. OPCo plans \$2.4 billion of capex in 2022-2024, which is approximately 4% increase from the prior forecast. The company expects rate base to grow by 6%. Approximately 58% of forecast capex is expected to be spent on distribution; 30% on transmission; and 12% on corporate and other.

The stabilization of OPCo's current Outlook is predicated on the expectation that AEP will manage its capital allocation policy to support credit metrics consistent with the company's current 'A-' IDR. Also supporting OPCo's current rating is the low risk nature of its T&D asset base and supportive regulatory constructs with PUCO-regulated rates on approximately 65%-70% of the company's \$5.3 billion rate base and FERC rates on approximately 30%-35%.

## PSO

**Rate case settlement:** PSO filed a settlement agreement with the Oklahoma Commerce Commission (OCC) in September 2021, that if improved would result in a \$51 million net annual revenue increase. The increase is based upon 9.4% ROE and 53% equity capitalization. A commission order is expected by year end 2021. While the settlement is less than the company's original net increase request of \$115 million, Fitch considers the outcome in line with Fitch's expectations. .

**Winter Storm Uri:** PSO has deferred and is seeking recovery from ratepayers of approximately \$670 million of increased natural gas and purchase power expense as a result of Winter Storm Uri in February 2021. The company received a waiver from the OCC allowing the company to defer the increased expenses for an unspecified amount of time at an interim rate of 0.75%. In April 2021, Oklahoma enacted legislation allowing the OCC to approve the use of securitization for extraordinary fuel and purchased power costs.

PSO has filed an application for a financing order to pursue securitization. An order from the OCC is expected in 1Q22. In the interim, the subsidiary has funded the additional expense with approximately \$500 million in capital contributions from parent AEP and the remaining amount with debt. Fitch's calculations include the effect and assumed favorable regulatory treatment of Winter Storm Uri expenses.

Favorable Generation Mix: PSO is the least coal-exposed of the AEP integrated utilities, with coal-fired generation accounting for only 7.9% of generating and capacity mix. The company owns 3,833MW of generating capacity and has long-term power purchase agreements on another 2,246MW, over half of which is wind.

Rate-Based Wind Transaction: After receiving approvals from state regulators in Oklahoma, Louisiana and Arkansas, AEP announced in May 2020 that it would move forward with the \$2 billion North Central Wind (NCW) investment, which will supply 1,485MW of wind power to PSO and Southwestern Electric Power Co. (SWEPCO, BBB/Stable). The rate-based investment, which will be purchased from the developer, will be split between PSO (45.5% ownership) and SWEPCO (54.5% ownership). Sundance (199MW) entered service on April 14, 2021, Maverick (287MW) entered service on Sept. 10, 2021, and the third project, Traverse (999MW) is expected to be in service in sometime January 2022 to April 2022.

Capex Program: PSO's capex budget continues to increase significantly. Fitch expects the company to expand its rate base by about 15% annually with expenditures of \$2,877 million in 2022-2024.

Pressured Credit Metrics: As a result of improved prior regulatory outcomes, pre-pandemic financial measures improved enough to warrant the current 'BBB+' rating. However, PSO's ongoing capex program has resulted in higher credit metrics. In order to maintain current ratings, Fitch will look for the reasonable regulatory outcomes in the current fuel adjustment clause proceedings and base rate proceeding.

Additionally, Fitch expects AEP to manage its capital allocation policy as it pertains to PSO to support the subsidiary's authorized regulatory capital structure. PSO's FFO leverage for LTM Dec. 31, 2020 was 6.2x and is expected to improve by 2023 to just at or slightly better than its downgrade threshold of 4.8x.

## SWEPCo

Mixed Regulatory Environment: SWEPCo operates in three state jurisdictions, Louisiana (approximately 38% of rate base), Texas (approximately 36% of rate base) and Arkansas (approximately 20% of rate base), as well as FERC (approximately 6% of rate base). Fitch views the regulatory construct for integrated utilities in Louisiana as balanced, while Texas and Arkansas are more challenging. SWEPCo's earned ROE was 8.2% as of the LTM ended Sept. 30, 2021, behind AEP's consolidated earned ROE of 9.0% for the same period, but an improvement from the company's 6.8% earned ROE for LTM ended Dec. 31, 2019.

The company's low ROE reflects the ongoing lack of recovery of the Arkansas portion of the Turk coal plant, which accounts for approximately 110bps of ROE drag, partially offset in 1Q21 by increased off-system sales due to the severe winter storm event. The company is currently pursuing base rate cases in all three of its jurisdictions. Constructive outcomes in SWEPCo's current round of rate cases, could result in improved credit metrics.

**February 2021 Weather Event:** Severe weather in February 2021 impacted SWEPCo's service territory resulting in power outages, asset damage, and increased fuel and purchased power expenses. As of Sept. 30, 2021, SWEPCo has booked deferred regulatory assets of \$489 million related to natural gas fuel expense and electricity purchases from Feb. 9, 2021 to Feb. 20, 2021. SWEPCo has active fuel clauses in all of its jurisdictions that adjust periodically. However, to reduce customer bill impact, the company has requested, and has been granted, deferral mechanisms in Arkansas and Louisiana and is currently recovering the increased expenses in the two jurisdictions over a five-year period with a yet-to-be-determined carrying charge. The company filed an application to implement a net interim fuel surcharge in Texas in August 2021, requesting a five-year recovery with a carrying charge of 7.18%.

Given the magnitude of the costs, Fitch expects prudence reviews are likely in all three jurisdictions, which could result in reduced recovery. To address the near-term cash flow impacts resulting from the severe weather in SWEPCo and other AEP service territories, AEP entered into and drew the full amount of a \$500 million, 364-day term loan in March 2021. AEP has also contributed \$280 million in capital to SWEPCo YTD.

**Pressure on Credit Metrics:** SWEPCo's capex program, which is expected to double compared to the previous three-year forecast, combined with limited near-term rate relief continue to stall significant improvement in SWEPCo's credit metrics. Additionally, expenses from the severe winter weather in February 2021 are being recovered over an elongated time frame. Nonetheless, Fitch expects that SWEPCo will stay within Fitch's stated FFO leverage downgrade threshold of 5.5x, assuming adequate base rate relief, recovery of storm expenses, and parent support. As of LTM Dec. 31, 2020, SWEPCo's FFO leverage was 5.6x.

**Rate Based Wind Transaction:** North Central Wind's three facilities, totaling approximately 1,485 MWs, are being constructed on a fixed-cost, turnkey basis and will cost approximately \$2 billion with ownership split between SWEPCO (54.5% ownership) and AEP subsidiary Public Service Company of Oklahoma (BBB+/Stable) (45.5% ownership). Sundance (199MW) entered service on April 14, 2021, Maverick (287MW) entered service

on Sept. 10, 2021, and the third project, Traverse (999MW) is expected to be in service in sometime January 2022 to April 2022.

The addition of the North Central Wind capacity will reduce SWEPCO's reliance on coal in its generation mix, which is currently 47.7%. SWEPCo is funding the expenditures in a balanced manner with significant equity component, helping to alleviate the pressure on credit metrics from the large expenditure program.

**Louisiana Formula Rate Plan Filing:** SWEPCo has requested a net revenue increase in Louisiana of \$73 million after giving effect for \$41 million of depreciation and amortization adjustments. The December 2020 rate filing (which was revised in March 2021) is based upon a 10.35% ROE and 50.8% equity capitalization. The company is proposing an extension, with modifications, of the current decades-long formula rate plan. In its revised filing, the company requested, and the Louisiana Public Service Commission (LPSC) granted, the removal of hurricane storm cost recovery. In October 2021, SWEPCo made a separate filing the LPSC requesting the recovery of \$152 million in hurricane and storm costs.

**Texas Base Rate Filing:** SWEPCo filed a base rate case with the PUCT in October 2020. The company requests a net revenue increase of \$73 million in its Texas jurisdiction after giving effect for \$17 million of depreciation and amortization adjustments. The request is based upon a 10.35% ROE and 49.4% equity capitalization. In the rate filing, SWEPCo is seeking \$45 million for the recovery of its Texas jurisdictional share of Dolet Hills Power Station, which the company plans to retire by Dec. 31, 2021. The company is also seeking to establish a storm reserve in the amount of \$3.6 million. A decision is expected to in late 2021.

**Arkansas Rate Case:** SWEPCo filed a base rate case with the Arkansas Public Service Commission on July 23, 2021. The company is requesting a net revenue increase of \$56 million after giving effect of \$29 million of depreciation and amortization adjustments. The filing is based upon a 10.35% ROE and 51.3% equity capitalization. SWEPCo's last rate case, which was its first in 10 years, was resolved December 2020 via settlement.

## **DERIVATION SUMMARY**

AEP compares favorably with other 'BBB' rated utility parent companies -- Emera Incorporated (Emera, BBB/Stable), CenterPoint Energy (CNP, BBB/Stable), CMS Energy Corp. (CMS, BBB/Stable), and DTE Energy (DTE, BBB/Stable). All companies derive approximately 90%-95% of EBITDA from regulated assets. AEP is the largest of the

aforementioned companies and has the most geographically diverse asset mix in the U.S., operating in 11 (soon to be 10) states; however, Emera also operates in Canada.

Fitch expects AEP's FFO leverage to average around 5.4x over the forecast period, which is in line with DTE's range of 5.1x-5.5x, and slightly weaker than CMS's 4.9x-5.0x, and CNP's low 5.0x. Emera is expected to be more levered with FFO leverage at approximately 5.6x-5.8x. AEP's parent level debt is expected to be approximately 20% over the forecast period. CNP, CMS and DTE parent level debt is expected to be 25-30%. Emera's parent level debt is expected to be higher at 40%.

## **KEY ASSUMPTIONS**

Fitch's Key Assumptions Within The Rating Case for the Issuer:

--Consolidated capital expenditures of \$30.3 billion over 2021-2024;

--Sale of KPCo completed 2Q22, after tax proceeds of \$1.45 billion used to offset equity needs;

--Common dividends of \$1.4 billion in 2021, \$1.6 billion in 2022, \$1.6 billion in 2023, \$1.7 billion in 2024 as per managements publicly stated forecast;

--Equity Issuances of \$100 million in 2023 and \$600 million in 2024 as per managements publicly stated forecast;

--Conversion of \$805 million equity units in 2022 and \$850 million equity units in 2023;

--Rate case filings or resolutions there of over the forecast period in Arkansas, Indiana, Oklahoma and Texas.

## **RATING SENSITIVITIES**

AEP

Factors that could, individually or collectively, lead to positive rating action/upgrade:

--Sustained FFO leverage at or below 4.8x;

--Continued balanced jurisdictional rate regulation across AEP's service territory;

--Continued strategic focus on relatively low risk utility and transmission businesses.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

--Sustained FFO leverage exceeding 5.8x on a sustained basis;

--Renewed emphasis on non-regulated or uncontracted investments;

--Significant unexpected regulatory developments at any of the regulated operating companies.

AEPTX

Factors that could, individually or collectively, lead to positive rating action/upgrade:

--Sustained FFO leverage at or below 5.0x;

--Continued balanced jurisdictional rate regulation.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

--Sustained FFO leverage exceeding 6.5x on a sustained basis;

--Unexpected regulatory development.

Appalachian Power, Public Service Oklahoma

Factors that could, individually or collectively, lead to positive rating action/upgrade:

--Sustained FFO leverage at or below 4.0x;

--Continued balanced jurisdictional rate regulation.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

--Sustained FFO leverage exceeding 4.8x on a sustained basis;

--Unexpected regulatory development.

Kentucky Power Co., Southwestern Electric Power Company's

Factors that could, individually or collectively, lead to positive rating action/upgrade:

--Sustained FFO leverage at or below 4.5x;

--Continued balanced jurisdictional rate regulation.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

--Sustained FFO leverage exceeding 5.5x on a sustained basis;

--Unexpected regulatory development.

Indiana Michigan Power, Ohio Power

Factors that could, individually or collectively, lead to positive rating action/upgrade:

--Sustained FFO leverage at or below 3.5x and an upgrade of AEP;

--Continued balanced jurisdictional rate regulation.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

--Sustained FFO leverage exceeding 4.5.0x on a sustained basis;

--A downgrade of one notch or more at AEP;

--Unexpected regulatory development.

## **BEST/WORST CASE RATING SCENARIO**

International scale credit ratings of Non-Financial Corporate issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of four notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more

information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit <https://www.fitchratings.com/site/re/10111579>.

## **LIQUIDITY AND DEBT STRUCTURE**

AEP has a \$4.0 billion committed revolving credit facility maturing in March 2026 and a \$1 billion committed facility maturing in March 2023, both of which serve as a backstop for AEP's CP program and LOC. AEP must maintain a ratio of debt/total capitalization that does not exceed 67.5%, under the covenants to its credit agreement. This contractually-defined percentage was 59.3% as of Sept. 30, 2021. As of Sept. 30, 2021, AEP had \$3.746 billion available on its revolving credit facility (giving effect for CP issuance) and cash of \$1.373 billion.

AEP has parent level corporate maturities as follows: \$1.605 billion in 2022, and \$1.900 billion in 2023, \$300 million in 2024. AEP has \$805 million of equity units issued in 2019 and \$850 million issued in 2020 for which Fitch does not give equity credit. The notes are expected to be remarketed in 2022 and 2023, respectively, at which time the interest rate will reset at the then current market rate and forward equity purchase contract associated with the units will be settled with the issuance of equity. If either remarketing is unsuccessful, investors have the right to put their notes to AEP at a price equal to the principal. Fitch assumes successful re-marketing for the equity units.

AEP's regulated subsidiaries use a pool of corporate borrowing to meet short-term funding needs. The money pool operates according to regulators' approved terms and conditions, and includes maximum authorized borrowing limits for individual companies.

## **ISSUER PROFILE**

AEP is a utility holding company of regulated electric utility subsidiaries serving portions of Arkansas, Indiana, Kentucky, Louisiana, Michigan, Ohio, Oklahoma, Tennessee, Texas, Virginia and West Virginia. Additionally, the company has significant investments in FERC regulated transmission assets.

## **SUMMARY OF FINANCIAL ADJUSTMENTS**

As of Dec. 31, 2020, Fitch has made the following adjustments:

--\$716 million of securitized debt has been removed from Fitch's AEP consolidated debt calculation;

--\$492 million of securitized debt has been removed from Fitch's AEPTX debt calculation;

--\$223 million of securitized debt has been removed from Fitch's APCo debt calculation.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically

mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

# Appalachian Power Company

Appalachian Power Company's (APCo) ratings reflect the company's integrated electric utility asset base and credit supportive regulatory environment in Virginia, along with the improving environment in West Virginia. The company's rate base is split relatively equal between Virginia and West Virginia. The company owns or controls 7,409MW of generating capacity and has long-term power purchase agreements (PPAs) on another 919MW. The ratings also consider APCo's relationship with its parent, American Electric Power Company, Inc. (AEP; BBB+/Negative), on which APCo relies for equity contributions and access to short-term liquidity.

## Key Rating Drivers

**Virginia Triennial Review:** APCo received an order on Nov. 24, 2020 in its first legislatively mandated triennial review, which covers the 2017-2019 earnings test years. The Virginia State Corporation Commission (SCC) order resulted in no gross revenue increase, and a net revenue decrease of \$25.5 million, based upon 9.2% ROE and 50% equity capitalization. The company requested a net revenue increase of \$38 million after giving effect for \$27 million of depreciation and amortization adjustments, based upon a 9.9% ROE and 50% equity capitalization. The company's request to increase the residential fixed monthly charge to \$14.00 from \$7.96, was denied.

The SCC determined that the company's earnings over the review period fell within the pre-determined earnings band and therefore was not entitled to a gross revenue increase. The commission's decision was largely driven by the view that certain coal plants assets should have been amortized over 10 years rather than impairing them in a single year. APCo's position is that the \$93 million (pretax) impairment taken in 2019 is consistent with state law. The company believes the commission erred in certain aspects of its determination and sought a rehearing with the SCC, but the order was affirmed. The company has appealed the decision to the Virginia Supreme Court, which could take up to a year to complete. Fitch Ratings considers the current outcome modestly negative, but in line with current rating assumptions.

**Constructive Virginia Regulation:** Despite the lower than expected outcome in APCo's recent triennial review, Fitch considers Virginia utility regulation supportive of credit quality. Legislation passed in March 2018 addressed the effect of the Tax Cuts and Jobs Act of 2017, codified base rate proceedings and allowed for the reinvestment of any overearnings proceeds. Prior to the revenue decrease enacted in January 2021, APCo's Virginia base rates have been frozen since 2015. However, adjustment mechanisms in place for fuel costs, purchased power, infrastructure and environmental investments have resulted in relatively stable cash flow.

In April 2020, the governor of Virginia signed the Virginia Clean Economy Act (VCEA) into law, which replaced the state's voluntary renewable energy portfolio with a mandatory program. The legislation mandates fossil-fuel plant retirements, deems renewable investments to be in the public interest and eligible for rider recovery, and increases thresholds for energy efficiency. Fitch expects APCo's capex to remain elevated, as it complies with VCEA's provisions. However, favorable regulatory constructs should help alleviate pressure on credit metrics

**Improving West Virginia Regulation:** Fitch has considered the regulatory compact in West Virginia to be restrictive, owing to a history of lower than average ROEs and historic test years that exacerbate regulatory lag. However, Fitch views recent rate decisions in the state as more balanced from a credit perspective, including settled outcomes and use of riders for certain costs. The West

[ivana.ergovic@fitchratings.com](mailto:ivana.ergovic@fitchratings.com)

Virginia Public Service Commission (WVPSC) approved the settlement agreement on Feb. 27, 2019, concluding APCo's first rate case in the jurisdiction in over five years.

The settlement includes an annual base rate increase of \$44 million (including \$8 million for WPCo) based on a 9.75% return on common equity, 50.16% equity capitalization and \$4.0 billion combined rate base. Additionally, APCo, along with affiliate Wheeling Power Company (WPCo; not rated), have requested approval for an experimental recovery mechanism, that would allow the companies to recover investment expenditures made between rate cases. Hearings are likely to be held in May 2021 with a decision expected during the summer of 2021. Fitch believes such investment recovery mechanisms are beneficial to reducing regulatory lag and supporting credit quality.

**Modest Coronavirus Impacts:** Due to the pandemic, APCo has experienced a 2.5% decline in weather-normalized load. Unadjusted unit sales fell in all customer classes, with commercial declining 8% and industrial declining 7%. Fitch estimates that APCo's residential sales account for approximately 50% of the company's revenues. The SCC and WVPSC have authorized the establishment of regulatory assets to track pandemic-related expenses. Disconnects have resumed in West Virginia, but not in Virginia. Thus far, bad debt expense has been manageable. Additionally, APCo received \$30 million in combined funds from Virginia and West Virginia to apply to past due residential customer balances.

**Reliance on Coal Shifting:** APCo's approximately 65% coal generation, including purchased power agreements (PPAs), is the second highest of the AEP integrated companies. As a result, the company is exposed to potentially higher expenditures as increasingly stringent environmental regulations are implemented. APCo continues to pursue clean energy resources. The company owns 785MW of renewable generation and has PPAs in place for another 575MW, totaling almost 18% of its generation mix.

**Capex Program:** APCo's 2021-2023 capex forecast is expected to increase approximately 20% compared with previous three-year forecasts. Fitch expects the company to expand its rate base by 5%, with capex averaging approximately \$1 billion annually. Approximately 68% of APCo's capex is for transmission and distribution investments and 6% is earmarked for regulated renewables.

**Weaker Credit Metrics:** As of the LTM ended Dec. 31, 2020, APCo's earned ROE decreased to 8.6% from 9.2% at the LTM ended Dec. 31, 2019. The lower ROE was the result of lower usage, higher depreciation expense, and increased capex, partially offset by O&M cost reductions. Fitch expects that APCo's credit metrics will be at or near its 4.8x downgrade metric over the next few years.

**Parent-Subsidiary Rating Linkage:** AEP and its regulated subsidiaries have operational, financial and functional ties, resulting in moderate ratings linkage. The treasury function is centrally managed and all regulated subsidiaries depend on AEP for short-term liquidity and participate in AEP's money pool. The money pool allows the utilities to manage working capital needs and provides short-term financing. Legal ties are weak, as the parent does not guarantee the debt obligations of its regulated subsidiaries.

AEP and most of its subsidiaries have limitations on capital structure from covenants in the bank credit agreement (debt/total capitalization that does not exceed 67.5%) and from regulatory requirements to maintain a specific equity ratio. No cross-default provisions exist among AEP and its subsidiaries. Due to these linkages, Fitch typically limits the notching difference between AEP and its subsidiaries to one to two notches. Fitch applied a bottom-up approach in rating AEP's utility subsidiaries, including APCo.

## Financial Summary

| (\$ Mil., as of Dec. 31)                           | 2017  | 2018  | 2019  | 2020  |
|--|-------|-------|-------|-------|
| Gross Revenue                                      | 2,902 | 2,938 | 2,893 | 2,764 |
| Operating EBITDA                                   | 1072  | 882   | 916   | 1022  |

| FFO Leverage (x)                                   | 3.8   | 4.3   | 5.0   | 4.8   |
| Total Debt with Equity Credit/Operating EBITDA (x) | 3.7   | 4.6   | 4.8   | 4.6   |

Source: Fitch Ratings, Fitch Solutions

## Rating Derivation Relative to Peers

APCo's FFO leverage is expected to be at or near its 4.8x downgrade metric over the next few years, which is stronger than AEP affiliate Public Service Company of Oklahoma (PSO; BBB+/Stable), but weaker than AEP affiliate Indiana Michigan Power Co. (IMPCo; BBB+/Stable). Excluding recent storm costs, Fitch expects PSO to exceed its FFO leverage metric of 4.8x over the next two years before returning appropriate metrics for its rating. IMPCo's metrics are expected to be strong over the forecast period, with FFO leverage metrics, adjusted for the Rockport lease, to average around 3.5x.

APCo is stronger than AEP affiliate Kentucky Power Co. (KPCo; BBB/Stable), which operates in an adjacent, but more challenged, service territory. KPCo's FFO leverage remains outside of its downgrade threshold of 5.5x over the first two years of the forecast period; however, leverage is expected to improve in 2023 with the expiration of Rockport PPA. AEP recently announced that it is exploring strategic opportunities for Kentucky Power as part of the company's portfolio optimization and capital allocation process.

APCo's metrics are weaker than Dominion Energy subsidiary Virginia Electric and Power's (VEPCO; A-/Stable) FFO leverage of 3.3x. VEPCO is much larger than APCo and has a predominately Virginia service territory that is economically stronger than APCo's. All five companies own regulated coal-fired assets in their generating mix: APCo's generation mix is 65% coal, KPCo's is 81% (including Rockport PPA), IMPCo's is 46%, VEPCo's is 19% and PSO's is 8%.

## Rating Sensitivities

### Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

- Sustained FFO leverage at or below 4.0x;
- Continued balanced jurisdictional rate regulation.

### Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

- Sustained FFO leverage exceeding 4.8x on a sustained basis;
- Unexpected regulatory development.

## Liquidity and Debt Structure

AEP has a \$4.0 billion committed revolving credit facility maturing in March 2026 and a \$1 billion committed facility maturing in March 2023, both of which serve as a backstop for AEP's CP program and LOC. AEP must maintain a ratio of debt/total capitalization that does not exceed 67.5%, under the covenants to its credit agreement. This contractually-defined percentage was 59.5% as of March 31, 2021. Additionally, to address the near-term cash flow effects from severe weather in

some of AEP's service territories, AEP entered into, and drew the full amount of, a \$500 million, 364-day term loan in March 2021. As of March 31, 2021, AEP had \$3,126 million available on its revolving credit facility (after giving effect for CP issuance of \$1.874 billion) and cash of \$273 million.

AEP's regulated subsidiaries use a pool of corporate borrowing to meet short-term funding needs. The money pool operates according to regulator-approved terms and conditions, and includes maximum authorized borrowing limits for individual companies. Under the money pool terms and conditions, the maximum borrowing limit for APCo is \$500 million. APCo has modest near-term maturities over the rating horizon of \$17.5 million due in 2021, \$329.4 million due in 2022, and \$86 million due in 2024.

## ESG Considerations

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit [www.fitchratings.com/esg](http://www.fitchratings.com/esg).

## Key Assumptions

### Fitch's Key Assumptions Within Our Rating Case for the Issuer Include

- Capex of \$3.0 billion over 2021-2023;
- 5% rate base growth;
- Dividend policy managed to maintain authorized capital structures.

US Utilities

### Operating Environment

|      |                      |    |   |
|------|----------------------|----|---|
| aa+  | Economic Environment | aa | Very strong combination of countries where economic value is created and where assets are located.  |
| aa   | Financial Access     | aa | Very strong combination of issuer specific funding characteristics and of the strength of the relevant local financial market.            |
| b-   | Systemic Governance  | aa | Systemic governance (eg rule of law, corruption; government effectiveness) of the issuer's country of incorporation consistent with 'aa'. |
| ccc+ |                      |    |   |

### Regulatory Environment

|      |  |     |   |
|------|--|-----|---|
| a    | Degree of Transparency and Predictability    | bbb | Generally transparent and predictable regulation with limited political interference. |
| a-   | Timeliness of Cost Recovery                  | bbb | Moderate lag to recover capital and operating costs.                                  |
| bbb+ | Trend in Authorized ROEs                     | a   | Above-average authorized ROE.   |
| bbb  | Mechanisms Available to Stabilize Cash Flows | bbb | Revenues partially insulated from variability in consumption.                         |
| bbb- | Mechanisms Supportive of Creditworthiness    | bbb | Effective regulatory ring-fencing or minimum creditworthiness requirements.           |

### Asset Base and Operations

|      |   |     |  |
|------|---|-----|--|
| a    | Diversity of Assets                             | bbb | Good quality and/or reasonable scale diversified assets.         |
| a-   | Operations Reliability and Cost Competitiveness | a   | Track record of reliable, low-cost operations.                   |
| bbb+ | Exposure to Environmental Regulations           | bbb | Limited or manageable exposure to environmental regulations.     |
| bbb  | Capital and Technological Intensity of Capex    | bbb | Moderate reinvestments requirements in established technologies. |
| bbb- |   |     |  |

### Profitability

|      |                             |     |   |
|------|-----------------------------|-----|---|
| a    | Free Cash Flow              | bbb | Structurally neutral to negative FCF across the investment cycle.         |
| a-   | Volatility of Profitability | a   | Higher stability and predictability of profits relative to utility peers. |
| bbb+ |                             |     |   |
| bbb  |                             |     |   |
| bbb- |                             |     |   |

### Financial Flexibility

|      |                       |     |   |
|------|-----------------------|-----|---|
| a    | Financial Discipline  | a   | Clear commitment to maintain a conservative policy with only modest deviations allowed. |
| a-   | Liquidity             | bb  | Liquidity ratio around 1.0x. Less smooth debt maturity or concentrated funding.         |
| bbb+ | FFO Interest Coverage | bbb | 4.5x  |
| bbb  |                       |     |   |
| bbb- |                       |     |   |

**How to Read This Page:** The left column shows the three-notch band assessment for the overall Factor, illustrated by a bar. The right column breaks down the Factor into Sub-Factors, with a description appropriate for each Sub-Factor and its corresponding category.

### Management and Corporate Governance

|      |                        |    |  |
|------|------------------------|----|--|
| a+   | Management Strategy    | a  | Coherent strategy and good track record in implementation.   |
| a    | Governance Structure   | aa | No record of governance failing. Experienced board exercising effective check and balance to management. No ownership concentration. |
| a-   | Group Structure        | a  | Group structure shows some complexity but mitigated by transparent reporting.  |
| bbb+ | Financial Transparency | a  | High quality and timely financial reporting.   |
| bbb  |                        |    |  |

### Market Position

|      |                          |     |   |
|------|--------------------------|-----|---|
| a-   | Market Structure         | bbb | Established market structure but some level of uncertainty in price-setting mechanisms. |
| bbb+ | Consumption Growth Trend | bbb | Customer and usage growth in line with industry averages.                               |
| bbb  | Customer Mix             | bbb | Less diversified customer base.   |
| bbb- | Geographic Location      | bbb | Beneficial location or reasonable locational diversity.                                 |
| bbb+ | Supply Demand Dynamics   | bbb | Moderately favorable outlook for prices/rates.  |

### Commodity Exposure

|      |   |     |  |
|------|---|-----|--|
| a    | Ability to Pass Through Changes in Fuel | bbb | Limited exposure to changes in commodity costs.        |
| a-   | Underlying Supply Mix                   | bbb | Low variable costs and moderate flexibility of supply. |
| bbb+ | Hedging Strategy                        | a   | Highly captive supply and customer base.               |
| bbb  |   |     |  |
| bbb- |   |     |  |

### Financial Structure

|      |  |     |       |
|------|--|-----|-------|
| a    | FFO Leverage                             | bbb | 5.0x  |
| a-   | Total Debt With Equity Credit/Op. EBITDA | bbb | 3.75x |
| bbb+ |  |     |       |
| bbb  |  |     |       |
| bbb- |  |     |       |

### Credit-Relevant ESG Derivation

|   |  |                     |    | Overall ESG |   |        |   |
|---|--|---------------------|----|-------------|---|--------|---|
| Appalachian Power Company has 12 ESG potential rating drivers |  |                     |    | key driver  | 0 | issues | 5 |
| ➔   | Emissions from operations                                  | driver              | 0  | issues      | 4 |        |   |
| ➔   | Fuel use to generate energy and serve load                 | potential driver    | 12 | issues      | 3 |        |   |
| ➔   | Impact of waste from operations                            | not a rating driver | 2  | issues      | 2 |        |   |
| ➔   | Plants' and networks' exposure to extreme weather          |                     |    |             |   |        |   |

## Appalachian Power Company

### Corporates Ratings Navigator US Utilities

#### Credit-Relevant ESG Derivation

Appalachian Power Company has 12 ESG potential rating drivers

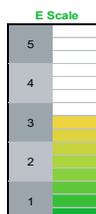

- ➔ Appalachian Power Company has exposure to emissions regulatory risk but this has very low impact on the rating.
- ➔ Appalachian Power Company has exposure to energy productivity risk but this has very low impact on the rating.
- ➔ Appalachian Power Company has exposure to waste & impact management risk but this has very low impact on the rating.
- ➔ Appalachian Power Company has exposure to extreme weather events but this has very low impact on the rating.
- ➔ Appalachian Power Company has exposure to access/affordability risk but this has very low impact on the rating.
- ➔ Appalachian Power Company has exposure to customer accountability risk but this has very low impact on the rating.

Showing top 6 issues

|                     |    |        | Overall ESG Scale |  |
|---------------------|----|--------|-------------------|--|
| key driver          | 0  | issues | 5                 |  |
| driver              | 0  | issues | 4                 |  |
| potential driver    | 12 | issues | 3                 |  |
| not a rating driver | 2  | issues | 2                 |  |
|                     | 0  | issues | 1                 |  |

#### Environmental (E)

| General Issues   | E Score | Sector-Specific Issues   | Reference  |
|--|---------|--|--|
| GHG Emissions & Air Quality                                | 3       | Emissions from operations  | Asset Base and Operations; Regulation; Profitability         |
| Energy Management  | 3       | Fuel use to generate energy and serve load   | Asset Base and Operations; Commodity Exposure; Profitability |
| Water & Wastewater Management                              | 2       | Water used by hydro plants or by other generation plants, also effluent management | Asset Base and Operations; Regulation; Profitability         |
| Waste & Hazardous Materials Management; Ecological Impacts | 3       | Impact of waste from operations  | Asset Base and Operations; Regulation; Profitability         |
| Exposure to Environmental Impacts                          | 3       | Plants' and networks' exposure to extreme weather                                  | Asset Base and Operations; Regulation; Profitability         |

#### How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

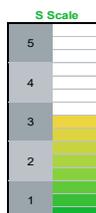

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies the some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

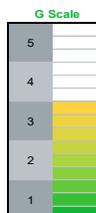

#### Social (S)

| General Issues   | S Score | Sector-Specific Issues  | Reference   |
|--|---------|---|---|
| Human Rights, Community Relations, Access & Affordability  | 3       | Product affordability and access  | Asset Base and Operations; Regulation; Profitability; Financial Structure |
| Customer Welfare - Fair Messaging, Privacy & Data Security | 3       | Quality and safety of products and services; data security                  | Regulation; Profitability   |
| Labor Relations & Practices                                | 3       | Impact of labor negotiations and employee (dis)satisfaction                 | Asset Base and Operations; Profitability                                  |
| Employee Wellbeing   | 2       | Worker safety and accident prevention                                       | Profitability; Asset Base and Operations                                  |
| Exposure to Social Impacts                                 | 3       | Social resistance to major projects that leads to delays and cost increases | Asset Base and Operations; Profitability                                  |

#### Governance (G)

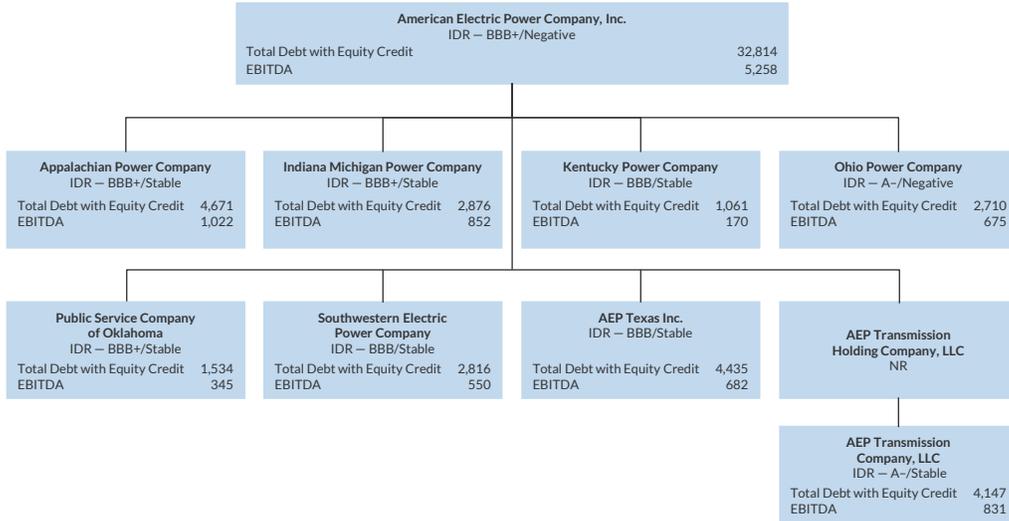

| General Issues         | G Score | Sector-Specific Issues  | Reference                           |
|------------------------|---------|---|-------------------------------------|
| Management Strategy    | 3       | Strategy development and implementation                       | Management and Corporate Governance |
| Governance Structure   | 3       | Board independence and effectiveness; ownership concentration | Management and Corporate Governance |
| Group Structure        | 3       | Complexity, transparency and related-party transactions       | Management and Corporate Governance |
| Financial Transparency | 3       | Quality and timing of financial disclosure                    | Management and Corporate Governance |

| CREDIT-RELEVANT ESG SCALE  |   |
|--|---|
| How relevant are E, S and G issues to the overall credit rating? |   |
| 5  | Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.                         |
| 4  | Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.                 |
| 3  | Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator. |
| 2  | Inrelevant to the entity rating but relevant to the sector.   |
| 1  | Inrelevant to the entity rating and irrelevant to the sector.   |

Reproduction or retransmission in whole or in part is prohibited except by permission. All rights reserved. In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion is based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at anytime for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

**TENNESSEE PUBLIC UTILITY COMMISSION  
PETITION OF  
Kingsport Power Company  
DOCKET NO. TPUC 21-00107 Rate Case Discovery  
Data Requests and Requests for the Production  
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF  
THE ATTORNEY GENERAL'S OFFICE  
CA Supp. Set 1  
To Kingsport Power Company**

**Data Request CA 1-165:**

(Supplemental) Provide the total actual balance of CWIP broken down into CWIP earning AFUDC and CWIP not earning AFUDC for Kingsport for each month (or most frequently available) from January 1, 2017, to the most currently available.

**Response CA 1-165:**

Please see CA 1-165 Attachments 1 through 5 for the requested monthly information for 2017, 2018, 2019, 2020, and 2021, respectively.

Within the column labeled ELIGIBLE\_FOR\_AFUDC, please note the following coding:

Eligible for AFUDC = 1

Not Eligible for AFUDC = 0
