TENNESSEE PUBLIC UTILITY COMMISSION
PETITION OF
Kingsport Power Company
DOCKET NO. TPUC 21-00107 Rate Case Discovery
Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Set 2
To Kingsport Power Company

Data Request CA 2-051:

Provide copies of all written customer complaints received by either the Company or TPUC (that is in the Company's possession) via either e-mail or traditional mail for the period January 1, 2019 through December 31, 2021. Further, please provide copies of all written replies provided by the Company in response to the customer complaints.

Response CA 2-051:

This response contains confidential information and is being provided pursuant to the Protective Order dated September 17, 2021 in this docket.

See CA 2-51 Confidential Attachments 1 through 3 for the requested information. Because of the Company's two-year electronic mail retention policy, Company responses to 2019 complaints were retrieved from archive because the emails are no longer available.

The Company has also reviewed the complaints submitted by the TPUC on February 7, 2022 in response to CA's January 28, 2022 records request to TPUC. There are a number of those complaints that the Company has no record of receiving, the complaint was not against KgPCo, or the complainant was not our customer.

Specifically, for 2019 the Company has no record of receiving the following:
Complaint nos. 190003, 190024, 190025, 190458, 190492-495, 190498, 190501, 190502, 190504-509, 190513, 190517, 190521 and 190596. Most of these appear to be from the same neighborhood. Complaint no. 190496 was not our customer.

For 2020, Complaint no. 200020 was not against KgPCo.

For 2021, we have no record of receiving Complaint nos. 210024, 210084, 210182, or 210252. Finally, Complaint no. 210119 was not our customer.

CA 2-51 Confidential Attachments 1 through 3

Kingsport Power Company
DOCKET NO. TPUC 21-00107 Rate Case Discovery
Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-53:

(Supplemental) Refer to the Company's response to Consumer Advocate DR No. 1-59 regarding the billing determinants for underground circuit charges for OL customers. The Company's reply indicates this information is contained in the response to Consumer Advocate DR No. 1-51. However, no such information appears in the response to CA1-51. Therefore, provide a breakdown of the monthly number and amount of underground circuit charges from December 2015 through June 2021 in the same format as the Company's response to Consumer Advocate DR No. 2-16 in TRA Docket No. 16-00001.

Response CA 2-53:

Please see CA 2-53 Attachment 1 for the requested information. The same information can be obtained from CA 1-51 Attachment 1 - MFR_12_Supplemental tab "Metered kWh" rows 47 through 133.

TENNESSEE PUBLIC UTILITY COMMISSION
PETITION OF
Kingsport Power Company
DOCKET NO. TPUC 21-00107 Rate Case Discovery
Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-54:

(Supplemental) Refer to the tariff summary provided in response to MFR 13. Specifically refer to the information provided for OL customers, which the Company's tariff provides additional charges for underground circuits in excess of 30 feet. Provide a breakdown of the monthly number and amount of underground circuit charges from December 2015 through June 2021 in the same format as the Company's response to Consumer Advocate DR No. 2-16 in TRA Docket No. 16-00001.

Response CA 2-54:

Please see CA 2-53 Attachment 1 for the requested information. The same information can be obtained from CA 1-51 Attachment 1 - MFR_12_Supplemental tab "Metered kWh" rows 47 through 133.

TENNESSEE PUBLIC UTILITY COMMISSION
PETITION OF
Kingsport Power Company
DOCKET NO. TPUC 21-00107 Rate Case Discovery
Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-55:

(Supplemental) Refer to Attachment 1 of the Company's response to Consumer Advocate DR No. 1-51 regarding billing determinants. Specifically refer to tariff code "015-Residential" on the "Billed Demand" tab of (Attachment 1). Provide a narrative explanation of the billing demand determinants for the residential customer class located here along with what tariff rate (if any) is applied to this billing demand.

Response CA 2-55:

No tariff rates are applied to the measurement of demand for tariff code 015 Residential. This data is automatically captured when a demand meter is present.

TENNESSEE PUBLIC UTILITY COMMISSION
PETITION OF
Kingsport Power Company
DOCKET NO. TPUC 21-00107 Rate Case Discovery
Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-56:

(Supplemental) Refer to (Attachment 1) of the Company's response to Consumer Advocate DR No. 1-51 regarding billing determinants. Specifically refer to tariff code "233-Small General Service - Non-Metered" on the "Fixture Count" tab of (Attachment 1). Provide a narrative explanation of the fixture count determinants for the Small General Service customer class located here along with what tariff rate (if any) is applied to this fixture count.

Response CA 2-56:

Tariff code 233 SGS non-metered serves unmetered account such as signs or billboards. These accounts include an estimated amount of usage each month similar to outdoor lights. The "fixture count" amount is a count of the number of non-metered units. No rates are applied to the fixture count.

TENNESSEE PUBLIC UTILITY COMMISSION

DIRECT TESTIMONY OF JESSICA M. CRISS
ON BEHALF OF
INDIANA MICHIGAN POWER COMPANY

I. Introduction of Witness

Q1. Please state your name and business address.

My name is Jessica M. Criss and my business address is 1 Riverside Plaza, Columbus, OH 43215.

Q2. By whom are you employed and in what capacity?

I am employed by American Electric Power Service Corporation (AEPSC) as a Tax Accounting and Regulatory Support Manager. AEPSC supplies engineering, accounting, planning, advisory, and other services to the subsidiaries of the American Electric Power (AEP) system, one of which is Indiana Michigan Power Company (I&M or the Company).

Q3. What are your responsibilities as a Tax Accounting and Regulatory Support Manager?

I participate in the recording of the tax accounting entries and records and the review of federal and state tax returns of AEP and its subsidiaries. I am also responsible for coordinating and developing state and federal tax data provided by the AEPSC Tax Department for use in regulatory proceedings. I have attended numerous tax, accounting, and regulatory seminars throughout my professional career.

Q4. Briefly describe your educational background and professional experience.

I earned a Bachelor of Science in Business Administration with a focus in Accounting and a Masters of Accounting from St. Louis University School of Business. I have been a Certified Public Accountant in the State of Ohio since 2015.

While pursuing my degrees I was employed part time at a regional public accounting firm in Chesterfield, MO from February 2012 to December 2013. I was hired at a regional public accounting firm in Akron, OH as a Tax Accountant in January 2014 and was promoted to Senior Tax Accountant in January 2016.

In December 2016 I was hired at L Brands, Inc., a retail corporation in Columbus, OH as a Tax Analyst and was promoted to Senior Tax Analyst in April 2019. I joined AEPSC in January 2020 as a Principal Tax Analyst and was promoted to my current position of Tax Accounting and Regulatory Support Manager effective February 20, 2021.

II. Purpose of Testimony

Q5. What is the purpose of your testimony?

I present and support:

- Federal and state income tax expense for the historical period ended December 31, 2020 (Historical Period) and for the forward-looking test period ended December 31, 2022 (Test Year);
- Accumulated Deferred Federal Income Taxes (ADFIT) and Accumulated Deferred Investment Tax Credit (ADITC) incorporated in the capital structure used by Company Witness Messner to calculate the Weighted Average Cost of Capital (WACC);

- Income tax expense adjustments related to certain ratemaking adjustments made to the Test Year as supported by other Company witnesses;
- Certain adjustments to income tax expense and accumulated deferred income taxes;
- Calculation of the gross revenue conversion factor and certain taxes other than income taxes;
- Calculation of effective federal income tax rates; and
- Illustrative calculation of the potential effects of a future change in the federal statutory tax rate.

Q6. Are you sponsoring any exhibits?

I am fully or partially sponsoring:

- Exhibit A-8: Test Year Calculation of Gross Revenue Conversion Factor
- Exhibit A-9: Test Year Effective Tax Rate

Q7. Are you sponsoring any attachments?

Yes, I am sponsoring:

Attachment JMC-1	Test Year state income tax rate
Attachment JMC-2	Test Year interest synchronization
Attachment JMC-3	Test Year Net Operating Loss Carryforward (NOLC)
Attachment JMC-4	Illustrative calculation of 28% Federal Statutory Rate Change using Test Year data

Q8. Are you sponsoring any workpapers?

Yes, I am sponsoring:

WP-JMC-1	Test year tax expense calculations and tax adjustments

In addition, I am co-sponsoring:

WP-A-RIDER-4	Excess Unprotected ADFIT Adjustment

I also sponsor the following sections of I&M-WP-1 (Total Company):

I&M WP 1-7	Historical tax expense
I&M WP 1-8	Historical parent company net interest tax benefit
I&M WP 1-9	Historical Gross Revenue Conversion Factor
I&M WP 1-10	Historical effective federal income tax rate
I&M WP 1-11	Historical effective state income tax rate

Q9. Were the exhibits, attachments, and workpapers that you are sponsoring prepared or assembled by you or under your direction and supervision?

Yes.

Q10. Please summarize your testimony.

The methods used in this case to develop the federal and state income tax expense for the Test year are consistent with prior rate filings. The Company's state and federal income tax expense has been properly recomputed to reflect the appropriate tax effects resulting from the various ratemaking adjustments supported in this case.

The Company's ADFIT balances have been properly recomputed to reflect the balance of deferred assets and liabilities necessary as an adjustment to the capital structure. The adjusted Test Year level of other tax expense is appropriate and necessary and reflects the proper amount of going-level expense. The Company's treatment of its net operating loss carryforward is reasonable and consistent with stand-alone ratemaking practices and IRC normalization requirements.

III. Federal and State Income Tax Expense

Q11. Please describe the methodology used to develop the federal and state income tax expense for the Test Year.

Consistent with prior rate filings and Commission Orders, including Cause Nos. 45235, 44967, and 44075, the Company's federal tax expense and ADFIT in the capital structure are calculated using stand-alone ratemaking practices using a normalized method of tax accounting. As in prior rate filings, the Company's state income tax expense is calculated using a stand-alone basis using a flow-through method of tax accounting.

The Company's income tax expense is based in large part on the components of Company pre-tax book income and expense presented by Company witness Heimberger, and the forecast of other various Schedule M items that would impact the computation of current and deferred income tax expense for the Test Year. The computations also include reversals of deferred taxes and amortization of deferred investment tax credits utilized in prior years.

Workpaper WP-JMC-1 shows the calculation of Test Year federal income tax expense. All deferred federal income taxes were computed based on the related Schedule M items as presented in the Company's forecast. (The Company's forecast process is explained in detail by Company witness Heimberger.) In addition, the workpapers show the calculation of the Test Year state income tax

expense. This was developed using the most recent available state tax rates and apportionment factors.

The Company's state and federal income tax expense has been properly recomputed to reflect the appropriate tax effects resulting from the various ratemaking adjustments supported in this case.

Q12. Please describe the methodology used to develop Taxes Other Than Income tax expense for the Test Year.

The Test Year level of forecasted Taxes Other Than Income Tax expense is representative of these types of ongoing tax expenses except for those tax adjustments that I am sponsoring in this proceeding. The adjusted Test Year level of other tax expense is appropriate and necessary and reflects the proper amount of going-level expense.

Q13. Please describe the calculation of the effective state income tax rate as shown on Attachment JMC-1.

Attachment JMC-1 shows the composite state income tax rate developed using the appropriate state income tax rates and apportionment factors. This composite rate is used to compute current state income tax expense and is used in the development of the Gross Revenue Conversion Factor.

Q14. Please describe the calculation of interest synchronization for federal income tax as shown on Attachment JMC-2.

Attachment JMC-2 shows the calculation of the amount of interest expense deduction used by the Company for purposes of computing income tax expense. This amount is calculated by multiplying the adjusted rate base by the weighted cost of long-term debt. As explained later in my testimony, this interest expense deduction is calculated as part of Current Federal Income Tax (CFIT)

and is consistent with past Commission practice including Cause Nos. 45235, 44967, and 44075.

Q15. Please describe the development of the federal and state income tax expense for the Historical Period.

The Company's historical income tax expense is based on the actual amounts recorded on I&M's books. The historical income tax expense has been adjusted for out-of-period or non-ongoing items and is presented in I&M-WP-1-7 for informational purposes only.

As with federal and state income tax in the Test Year, the Company's historical federal and state income tax expense is calculated using the stand-alone methodology as described in further detail in my testimony.

IV. Determination of Income Tax Components of Filing

Q16. How was Income Tax Expense within Cost of Service and ADFIT and ADITC within the capital structure determined in the filing?

Income Tax Expense, ADFIT, and ADITC were each determined on a stand-alone basis using a normalized method of tax accounting for Federal Income Taxes. State Income Taxes are being presented on a stand-alone basis using flow-through method of tax accounting.

Q17. What is meant by determination of income tax expense, ADFIT, and ADITC on a "stand-alone" basis?

The determination of income tax expense and ADFIT on a stand-alone basis means that taxes associated with revenues and expenses (operations) of the entity's rate regulated operations and assets only are included within this filing. All aspects of the Company's income taxes, including attributes such as NOLCs,

were computed based only on these items. The Company's taxable income or loss and ADFIT was determined based on the revenues and expenses included in this filing.

Q18. Does I&M file a separate corporate income tax return?

No.

Q19. If I&M does not file a separate income tax return, how are the associated revenues and expenses of the regulated operations and the assets of the Company calculated?

The operations of the Company are separately stated within the schedules of the consolidated return of the AEP Consolidated Group. In addition, the operations and the assets of the Company are maintained with separate books and records and only consolidated for tax and book filing purposes.

Q20. Why is it appropriate to determine income tax expense and ADFIT in the Capital Structure using a stand-alone approach?

The stand-alone approach is consistent with ratemaking principles as well as required to comply with the normalization rules of the Internal Revenue Code (IRC) regarding tax benefits of accelerated depreciation. Such rules require consistency among tax expense and the corresponding components of cost of service and the capital structure as a part of determining the WACC.

The stand-alone approach ensures that income taxes within the filing represent only those associated with the revenues and expenses of the regulated operations and assets of the Company, without regard to the Company's unregulated activities or the operations of the AEP Consolidated group.

As such, income taxes are consistent with the regulated assets reported in the capital structure as a part of determining the WACC and the regulated revenues

and expenses included in Cost of Service. The use of a separate entity approach prevents the cross-subsidization among the Company's affiliates.

Q21. You stated the use of a stand-alone approach is necessary to comply with the IRC's normalization rules. What is normalized tax accounting?

Normalization is a method of tax accounting in which the taxes reflected within an entity's income statement for a given period are matched with the associated revenues and expenses.

This methodology, also known as "deferred income tax" accounting, is required for financial reporting under Generally Accepted Accounting Principles (GAAP) (Financial Accounting Standards Board Accounting Standards Codification Topic 740 ("ASC 740"), formerly Statement of Financial Accounting Standards No. 109).

Q22. Why is normalized tax accounting necessary?

The determination of net income for financial reporting purposes under GAAP differs from the determination of taxable income under the IRC. As a result, revenues and expenses may be reflected in taxable income earlier or later than when such items are reflected within an income statement under GAAP. These "book-to-tax" differences result in a determination of taxes payable for a given period that differs from the amount of financial statement income tax expense.

Under a normalized method of tax accounting, the tax liability that would have been payable if determined solely under GAAP principles is merely deferred and not saved permanently. Therefore, financial statement reporting in accordance with GAAP requires a provision for deferred taxes to account for the tax effects temporary book-to-tax differences.

Q23. Can you provide an example of normalized tax accounting?

Yes. As an example, in the early years of an asset's life, accelerated tax depreciation often exceeds depreciation expense reported in the financial statements allowing for the deferral of income taxes due to the taxing authority. In such an instance, the taxes deferred are debited to a deferred tax expense account with a corresponding credit to a deferred tax liability.

In later years, when the book-to-tax difference reverses, the increase in tax due is mitigated by also reversing the deferred tax liability through a corresponding credit to deferred income tax expense. *Figure JMC-1* illustrates this point.

Figure JMC-1. Example of Normalized Accounting

	Year 1	Year 2	Year 3	Year 4	Year 5	Total
Revenues	1,000	1,000	1,000	1,000	1,000	5,000
Operating Expenses	(500)	(500)	(500)	(500)	(500)	(2,500)
Book Depreciation	(100)	(100)	(100)	(100)	(100)	(500)
Pre-tax Book Income (PTBI)	400	400	400	400	400	2,000
Tax Depreciation	(250)	(100)	(75)	(50)	(25)	(500)
Federal Taxable Income	250	400	425	450	475	2,000
Federal Current Tax Expense	53	84	89	95	100	420
Federal Deferred Tax Expense	32	-	(5)	(11)	(16)	-
Total Federal Tax Expense	84	84	84	84	84	420
Book/ Tax Depreciation Difference	(150)	-	25	50	75	-
DTA/ (DTL)	(32)	(32)	(26)	(16)	-	

Normalization is necessary to maintain inter-generational equity; that is, customers receive the income tax benefits commensurate with the expenses reflected in the cost of service.

Q24. What is the alternative to normalized accounting?

The alternative to a normalized method of tax accounting is referred to as "flow through" accounting. A flow-through approach bases income tax expense reported within the financial statements on the tax liability as reported on the tax return as opposed to that determined in accordance with ASC 740. As shown in

Figure JMC-1, the total amount of income tax expense is the same under both normalized and flow-through approaches – the difference is simply timing.

The term “normalization” evolved with respect to utilities, because income taxes computed on a the normalization basis caused net income to appear “normal”, in contrast to an approach based on the cash liability reported on the tax return.

Q25. In addition to GAAP reporting, are there normalization requirements within the IRC?

Yes. The Internal Revenue Code contains provisions requiring utility ratemaking to apply a normalized method of accounting with respect to tax benefits associated with accelerated tax depreciation, NOLCs due to accelerated depreciation, and Investment Tax Credits.

Q26. What are the normalization requirements for accelerated depreciation within the IRC?

The normalization requirements found within IRC Section 168 and former IRC Section 167(l), as well as regulations thereunder, prohibit the direct or indirect flow-through to customers of the tax benefits from accelerated depreciation of rate-regulated utility property.

A taxpayer applies a normalized method of tax accounting if the taxpayer:

1) Determines income tax expense within cost of service using book depreciation expense as opposed to accelerated tax depreciation expense allowed under the IRC;

2) Establishes a reserve account for the difference in income taxes due as the result of the use of accelerated tax depreciation for purposes of filing its federal income tax return (i.e. income tax deferred);

3) Maintains such reserve account and only reduces the aggregate reserve to (a) reflect the amount by which federal taxes due are higher as the

result of book depreciation exceeding tax depreciation or (b) reflect an asset's retirement; and

4) Excludes from rate base (or treats as zero-cost capital) a reserve amount for a period not in excess of the reserve for the period used in determining income tax expense within cost of service (i.e. maintains "consistency" among ratemaking assumptions for elements of rate base, depreciation expense and depreciation-related deferred taxes.

The Company follows the above guidelines for applying a normalized method of accounting.

Q27. Why do the normalization provisions of the IRC exist?

The provisions of the IRC providing for accelerated tax depreciation were enacted for the purpose of promoting investment in property and equipment.

However, Congress was concerned that, in the case of regulated utilities whose rates for providing service are set by reference to costs (including tax expense), such investment incentives could be extracted from the utility and flowed directly to customers through the rate-setting process.

Additionally, were this to occur, Congress had the secondary concern regarding how this would impact the government's taxable revenue base. As a result, the normalization rules were enacted to prevent these instances from occurring.

Q28. Are there consequences of violating the normalization requirements of the IRC?

Yes. As a condition for claiming accelerated tax depreciation on a tax return, a utility must comply with the IRC's normalization requirements. If a utility does not comply with the normalization rules applicable to accelerated tax depreciation, the consequence is that the utility loses the ability to claim accelerated tax depreciation for all property subject to the ratemaking jurisdiction of the regulatory body issuing an order inconsistent with normalization.

The IRS allows taxpayers to change to a practice or procedure that is consistent with the normalization rules with the taxpayer's next available opportunity before the IRS will assert that a normalization violation has occurred.

Q29. What is a Tax NOLC?

A tax NOLC occurs when, in a given year, a taxpayer has more deductions than taxable revenues, resulting in negative taxable income within its tax return. When a NOLC occurs, the IRC allows the taxpayer to carry the NOLC forward to subsequent years and offset otherwise taxable income produced in that year.

Q30. What might cause a taxpayer to incur a Tax NOLC?

Tax NOLCs are the product of tax return deductions exceeding taxable revenues. Due to the capital-intensive nature of the utility industry, deductions associated with accelerated tax depreciation can lead to tax years in which overall deductions exceed taxable revenues.

More specifically, bonus depreciation provisions of the IRC providing for enhanced tax depreciation in the year an asset is placed in service, have resulted in the creation of tax NOLCs for many utilities.

Q31. Is the AEP Consolidated group in a Tax NOLC position for the Test Year?

No.

Q32. Is the Company in a stand-alone Tax NOLC position for the Test Year?

Yes. As the result of accelerated depreciation, on a stand-alone basis, the Company incurred losses in tax years 2009- 2011, 2013, and 2016-2017.

As of 12/31/2022, the Company has a forecasted cumulative NOL balance of $205,672,569 as presented in Attachment JMC-3.

Q33. Do the accelerated depreciation normalization requirements pertain to NOLCs resulting from Accelerated Depreciation Deductions?

Yes. Regulations under former IRC Section 167(l) require the amount of tax deferred (and for which a reserve is allowed to be included as a reduction to WACC or treated as zero-cost capital) subject to normalization to be based on a calculation of tax due with accelerated tax depreciation compared to tax due without ("with-and-without" method).

In a series of Letter Rulings, the IRS has concluded that in order to avoid a normalization violation, the reserve for deferred taxes for the period used in determining tax expense in cost of service and reflected as a reduction to rate base (or zero-cost capital) must take into account instances in which taxes are not deferred due to accelerated tax depreciation creating a NOL.

These rulings further provide that any approach to determining the amount of tax deferral other than a "with-and-without" or "last dollars deducted" method, would violate normalization requirements[1].

Q34. How has the Company reflected the stand-alone NOLC into this filing?

The stand-alone NOLC generated by the Company has been included as a deferred tax asset (DTA), which is a reduction to ADFIT balances included in the capital structure as a component of WACC. This specific adjustment is discussed later in my testimony.

Q35. Did the Company include the stand-alone NOLC as a reduction to the ADFIT balances included in the capital structure as a component of WACC in previous filings?

No. During the preparation of this case, the Company determined the approved revenue requirement currently includes a reduction to adjusted capital but does

[1] Private Letter Rulings 201436037; 201438003; 201519021; 201534001; 201548017; 201709008.

not include the corresponding DTA. Accordingly, the NOLC ADFIT as proposed by the Company is necessary to correct this inconsistency.

Q36. Are there any other adjustments necessary to account for the stand-alone NOLC and comply with normalization requirements?

Yes. As discussed in the next section, tax reform legislation known as Tax Cuts and Jobs Act of 2017 (TCJA) was signed into law effective December 22, 2017. The TCJA includes provisions requiring adjustments to ADFIT.

V. Tax Cuts and Jobs Act of 2017 (TCJA)

Q37. What are the most notable provisions of the TCJA having an impact on the Company?

The most notable provisions of the Act include:

- *Corporate Tax Rate* – The TCJA lowered the federal corporate income tax rate to a flat 21 percent rate effective January 1, 2018, whereas under prior law, corporations were subject to a graduated tax rate with a maximum 35 percent rate.
- *Excess ADFIT* – The reduction in the corporate tax rate gives rise to "excess" ADFIT. Excess ADFIT represents deferred tax expense recovered in customer rates based upon a 35 percent tax rate, which beginning in 2018 will be paid to the IRS based upon the lower 21 percent tax rate.
- *Normalization requirements for property-related excess ADFIT* – The TCJA provides that utilities are not treated as applying normalization if they reduce their excess ADFIT in computing cost of service for ratemaking purposes and for purposes of reflecting operating results in their regulated book of account, more rapidly or to a greater extent than

the amount determined using the average rate assumption method ("ARAM").

- *Discontinuation of Bonus Depreciation* – Under the TCJA, rate regulated utilities are generally no longer eligible for bonus depreciation after December 31, 2017.

Q38. How did the Company determine its excess ADFIT?

To determine the amount of excess ADFIT, the Company performed a re-measurement of its cumulative ADFIT balances as of December 31, 2017, from values based upon the historical 35 percent tax rate to the 21 percent rate under the TCJA.

The Company then segregated excess ADFIT amounts associated with accelerated depreciation related book-to-tax differences into a category referred to as "protected" or "normalized" due to the requirements to normalize under the IRC. Remaining excess ADFIT amounts were classified as "unprotected" or "non-normalized".

Q39. Could you describe ARAM and how it is applied to protected excess ADFIT?

Section 13001(d)(3)(A)(i) of the TCJA requires that protected ADFIT (*i.e.*, those deferred taxes associated with accelerated tax depreciation book-to-tax differences) follow a normalization method of accounting.

More specifically, Section 13001 of the TCJA limits the extent to which protected excess ADFIT may be used to reduce the tax expense component of cost of service. This limitation is applied via the use of ARAM, which is a method under which protected excess ADFIT is reduced over the remaining life of the property which gave rise to the deferred taxes.

Under ARAM, protected excess ADFIT will be recognized over the life of the property as the underlying book-to-tax differences reverse, for example, in years in which the book depreciation of an asset exceeds tax depreciation.

Q40. How are excess ADFIT related amounts reflected in this filing?

As discussed in the next sections, protected excess ADFIT is reflected in this filing as part of the balances provided to Company Witness Messner for ADFIT and incorporated into the WACC as well as included in the cost of service.

Excess ADFIT amortization for unprotected excess in 2022 of $15,640,269 is removed from the cost of service as an adjustment and included in WP-A-RIDER-4 that I am co-sponsoring with Company Witness Seger-Lawson.

VI. Weighted Average Cost of Capital

Q41. Did you provide the balances of ADFIT and accumulated deferred investment tax credits (ADFITC) used by Company Witness Messner in his Exhibit A-7?

Yes. *Figure JMC-2* identifies the ADFIT and ADFITC balances I calculated in Schedule 1-5-8(a)(33) and provided to Company Witness Messner.

Figure JMC-2. ADFIT and ADFITC by year

Year	2020	2021	2022
ADFIT	$941,702,490	$1,010,598,387	$1,098,242,295
ADFITC	$21,260,705	$17,469,705	$13,678,705

Q42. What adjustments have been made to ADFIT, as recorded, to arrive at the balances shown in Exhibit A-7?

Adjustments made to the ADFIT balance as of 12/31/2022 include the following: (1) adjustments for ratemaking purposes, such as removing ADFIT that does not relate to the IN jurisdiction or that are not related to the provision of electric service; and (2) adjustments related to reducing ADFIT for the NOLC balance.

Q43. Can you discuss the adjustment to ADFIT for the NOLC?

The adjustment of $159,604,598 is being made to reduce the ADFIT balance for an NOLC calculated on a stand-alone basis for the year ended December 31, 2022. The adjustment represents the amount of ADFIT associated with accelerated depreciation that has not been able to produce cash benefits to the Company on the basis of a stand-alone method as of the end of the Test Year.

The calculation of the NOLC adjustment can be seen on Attachment JMC-3. This adjustment reflects the ADFIT associated with the taxable losses the Company has generated in excess of the taxable income it has generated and been able to offset based on the NOLC and carryback provisions of the IRC.

Q44. Was a "with-and-without" analysis performed to determine the amount of NOL required to be normalized?

Yes. A "with-and-without" calculation is required to determine if an NOL is the result of accelerated depreciation and subject to normalization rules.

This calculation was performed to determine the amount of the NOL required to reduce the ADFIT balance. The "with-and-without" calculation determined that all of the $205,672,569 NOLC is a result of accelerated tax depreciation and therefore subject to the normalization rules as described in my testimony.

Q45. Why is it appropriate to reflect this NOLC as a reduction to ADFIT?

The NOLC balance must be included as a decrease to the ADFIT balance because of the normalization rules discussed earlier in my testimony. The cash benefits from deductions taken for accelerated depreciation should be reflected in the cost of service consistent with the time period such cash benefits would be received by the Company if filing a separate return.

The inclusion of the NOLC as a reduction to ADFIT offsets the rate base reduction associated with deferred tax liabilities (DTLs) for accelerated depreciation for which the Company would not yet receive a cash benefit for on a stand-alone basis. This approach results in a neutral impact on rates as compared to a utility operating on a stand-alone basis.

Q46. Can you demonstrate how the inclusion of the NOLC and receipt of cash payments via tax sharing results in a neutral impact on rates?

Yes. First I will provide two examples showing the revenue requirement difference between a company that operates on its own with no affiliates versus a company that has affiliates and participates in tax sharing (like I&M and the AEP consolidated group). Then, I will show an example of how including the stand-alone NOLC as a ratemaking adjustment (as I&M proposes here) is necessary to arrive at the same revenue requirement as the first example involving a company with no affiliates.

Example 1 – Stand-Alone Company

Starting with a utility that has pre-tax book income (PTBI) of $10,000 and a deduction for accelerated tax depreciation of $11,000. This will result in an NOL of $1,000, a DTL of $2,310 and DTA of $210.

Figure JMC-3. Example 1 - Stand-Alone Company NOL, DTL, DTA calculation

	Taxable Income		Tax Rate	**(DTL) / DTA**
Pre-Tax Book Income	10,000			
Accelerated Tax Deduction	(11,000)	x	21%	(2,310)
				(2,310)
Taxable Income (Loss)	(1,000)			
Net Tax Loss Carry Forward	1,000	x	21%	210
Taxable Income After Net Operating Loss	0			(2,100)
	21%			
Current Tax Expense	0			

Next, assume the utility has a basic capital structure of debt and equity both of $100,000. Using a rate of 4% for the debt component, 10% for the equity component, and 0% for the ADFIT component, this will result in a weighted cost of capital of 1.98% and 4.95% respectively for the debt and equity for a total WACC of 6.93%.

Figure JMC-4. Example 1 - Stand-Alone Company Weighted Cost of Capital

	Initial Capital	Ratio	Cost	Weighted Cost
Debt	100,000	49.48%	4.00%	1.98%
Equity	100,000	49.48%	10.00%	4.95%
ADFIT	2,100	1.04%	0.00%	0.00%
Total	202,100			6.93%

The net rate base is composed of plant of $200,000 and a net ADFIT liability of $2,100. When the rate base is multiplied by the WACC of 6.93%, the result is a revenue requirement of $14,000.

Figure JMC-5. Example 1 - Stand-Alone Company Revenue Requirement

Plant	202,100
WACC	6.93%
Rev Req	14,000

Example 2 – Company Participating in Tax Sharing

The utility in this next example participates in tax sharing and has received $210 cash for its NOL. When the utility receives cash, this replaces the debt/equity otherwise needed to be raised, allowing the ADFIT balance related to accelerated depreciation only (excluding the NOL) to lower the WACC and lower the revenue requirement.

Figure JMC-6. Example 2 – Company Tax Sharing

	Initial Capital	Cash Tax Alloc	Adjusted Capital	Ratio	Cost	Weighted Cost
Debt	100,000	(105)	99,895	49.43%	4.00%	1.98%
Equity	100,000	(105)	99,895	49.43%	10.00%	4.94%
ADFIT	2,100	210	2,310	1.14%	0.00%	0.00%
Total	202,100	0	202,100			6.92%

Because of the receipt of cash, the total need for capital raised from debt and equity is reduced by the $210 resulting in a WACC of 6.92%.

When the rate base is multiplied by the WACC of 6.92%, the result is a revenue requirement of $13,985, a reduction as a result of the consolidated tax adjustment.

Figure JMC-7. Example 2 – Company Tax Sharing Revenue Requirement

Plant	202,100
WACC	6.92%
Rev Req	13,985

Example 3 – Rate Neutral Impact of NOLC Adjustment

As the Company proposes to do in this case, the utility in Example 2 will maintain rate neutrality by removing the impact to the debt equity requirements that resulted from the funds received from affiliates as those funds represent a consolidated tax adjustment. A proforma adjustment representative of the stand-alone NOLC removes the consolidated tax adjustment, allowing the WACC to reflect the operations of the utility itself.

Figure JMC-8. Example 3 – Rate Neutral Impact of the Stand-Alone NOLC

	Initial Capital	Cash Tax Alloc	Proforma Tax Alloc	Adjusted Capital	Ratio	Cost	Weighted Cost
Debt	100,000	(105)	105	100,000	49.48%	4.00%	1.98%
Equity	100,000	(105)	105	100,000	49.48%	10.00%	4.95%
ADFIT	2,100	210	(210)	2,100	1.04%	0.00%	0.00%
Total	202,100	0	0	202,100			6.93%

When the rate base net of ADFIT is multiplied by the WACC of 6.93%, the result is a revenue requirement of $14,000 (the same as Example 1).

Figure JMC-9. Example 3 – Stand-Alone NOLC Revenue Requirement

Plant	202,100
WACC	6.93%
Rev Req	14,000

This approach results in the exact same revenue requirement as the first example in which the utility's revenue requirement is reflective of the company's own operations. This is important because it demonstrates that the Company's proposed accounting is revenue neutral and designed to address the normalization violation by removing any consolidated tax adjustments from rate base. This ensures that income taxes within this filing represent only those

associated with the revenues and expenses of the regulated operations and assets of the Company.

VII. Tax Expense Adjustments

Q47. What Tax Expense Adjustments are you sponsoring?

I am sponsoring ratemaking Tax Expense Adjustment Nos. 1-3, as shown on Exhibit A-5. These adjustments include “pretax” expense adjustments (which are adjustments made to cost of service resulting in a change in tax expense) and “tax only” adjustments (which are adjustments made to tax expense that do not relate to changes in pretax book income).

Both types of adjustments are necessary to reflect an adjusted Test Year level of tax expense that is representative of ongoing operations and are consistent with the Company’s prior rate case filings.

Exhibit A-5 presents Tax Expense Adjustments Nos. 1-3 on a total Company basis. Company witness Duncan provided the allocation factors that are used to calculate the jurisdictional amounts.

Q48. Please describe Tax Expense Adjustment No. 1.

Tax Expense Adjustment No. 1 increases total Company state income tax expense by $2,256,608 to reflect the adjustments to state taxable income resulting from the ratemaking adjustments supported by various Company witnesses that affect pre-tax state book income and the related Schedule M adjustments.

This adjustment includes all state income tax expense where the Company has a business presence. Consistent with past rate treatment by this Commission, no deferred state income tax expense has been recorded in utility cost of service, consistent with the flow-through methodology.

Q49. Please describe Tax Expense Adjustment No. 2.

Tax Expense Adjustment No. 2 increases total Company CFIT expense by $9,058,479 to reflect the current federal income tax effect at 21% of the federal taxable income related to the ratemaking adjustments supported by various Company witnesses, which affect pre-tax book income.

CFIT expense has been adjusted by I&M's allocated share of the tax benefit of the net interest expense portion of the parent company (American Electric Power Co. Inc.). This methodology is consistent with the Commission's December 22, 1982 Order in Cause No. 36760, the Commission's November 12, 1993 Order in Cause No. 39314, and all subsequent I&M rate case orders. I&M-WP-1-8 shows the computation of this amount.

Q50. Please describe Tax Expense Adjustment No. 3.

Tax Expense Adjustment No. 3 increases total Company Deferred Federal Income Taxes (DFIT) by $29,311,955. This adjustment can be broken down into two parts: to reflect total Company excess amortization including excess related to the stand-alone NOLC and the adjustment for unprotected excess related to the IN jurisdiction.

The latter is an adjustment included in WP-A-RIDER-4 in which $15,640,269 of unprotected excess ADFIT amortization is removed from 2022 test year base rates. This remaining benefit will be credited to customers through a tax rider until unprotected excess ADFIT is fully amortized. The remaining $13,671,686 is a reduction to total company excess ADFIT to reflect the stand-alone NOLC which is outlined on Attachment JMC-3.

Q51. Does total DFIT expense reflect the amortization and treatment agreed to in the settlement agreement approved in Cause No. 44967, for the excess protected and unprotected ADFIT?

Yes. The Final Order in Cause No. 44967 provided that the total annual amortization of protected and unprotected excess ADFIT was to equal $29.9 million. To the extent that the actual annual amortization using ARAM differed from the estimated amount in the filing, the amortization of unprotected ADFIT is increased or decreased to equal the $29.9 million.

For test year 2022, amortization of protected excess ADFIT related to Indiana is $3,132,997. Before the end of the test period, unprotected excess will be fully depreciated and only $15,640,269 will be amortized through August 2022.

The total DFIT expense reflects a $3,132,997 million credit to Indiana jurisdictional deferred federal income tax expense relative to the amortization of protected excess ADFIT using ARAM.

A credit of $15,640,269 of unprotected excess is removed from cost of service and included in WP-A-RIDER-4 co-sponsored by myself and Company Witness Seger-Lawson to be credited to customers through a tax rider until unprotected excess ADFIT is fully amortized

Q52. Does amortization of protected excess ADFIT related to Indiana include amortization of excess related to the NOLC?

Yes. Protected excess amortization related to Indiana has been adjusted to reflect the excess related to the NOLC. Excess related to the NOLC is considered deficient and will offset the excess related to the deferred liability and therefore reduces the total excess benefit presented in the cost of service.

VIII. Gross Revenue Conversion Factor (GRCF)

Q53. Please describe the calculation of the Gross Revenue Conversion Factor (GRCF) as shown on Exhibit A-8.

The GRCF calculated on Exhibit A-8 indicates the appropriate factor that should be applied to the income deficiency in order to determine the amount of incremental revenue needed to obtain the required level of operating income.

It is necessary to apply this factor to the income deficiency in order to provide sufficient revenues to cover the additional federal and state income tax expense, the Indiana Utility Receipts Tax expense, the public utility assessment fees and uncollectible accounts expense.

IX. Effective Federal Income Tax Rate

Q54. Please describe the calculation of the effective federal income tax rate as shown on Exhibit A-9.

Exhibit A-9 calculates the Company's effective federal income tax rate after taking into consideration permanent and flow-through timing differences, excess deferred federal income taxes, and deferred investment tax credit amortization.

The overall effective federal income tax rate before rate relief is 16.08% and is calculated by dividing total federal income tax expense by pre-tax electric operating income including interest expense.

X. Future Implications of Federal Statutory Rate Change

Q55. Company witness Seger-Lawson discusses the Company's proposed treatment of any subsequent change in the federal statutory tax rate. Have

you prepared an illustrative calculation of how a hypothetical increase to a 28% tax rate would impact the Company?

Yes. As discussed by Company witnesses Seger-Lawson, Ross, and Messner, an increase in the federal statutory rate would cause changes to current and deferred federal income tax expense, ADFIT balances, the GRCF, and WACC.

Attachment JMC-4 illustrates that, using Test Year data, federal income tax expense, ADFIT, and GRCF would increase assuming a 28% tax rate.

Q56. Does this conclude your pre-filed verified direct testimony?

Yes.

VERIFICATION

I, Jessica M Criss, Tax Accounting and Regulatory Support Manager for American Electric Power Service Corporation, affirm under penalties of perjury that the foregoing representations are true and correct to the best of my knowledge, information and belief.

REBUTTAL TESTIMONY OF JESSICA M. CRISS
ON BEHALF OF
INDIANA MICHIGAN POWER COMPANY

I. Introduction

Q1. Please state your name and business address.

My name is Jessica M. Criss and my business address is 1 Riverside Plaza, Columbus, OH 43215.

Q2. By whom are you employed and in what capacity?

I am employed by American Electric Power Service Corporation (AEPSC) as a Tax Accounting and Regulatory Support Manager.

Q3. Are you the same Jessica M. Criss that previously filed testimony in this proceeding?

Yes.

Q4. Are you sponsoring any attachments or workpapers?

Yes. I am sponsoring the following attachments:

1) JMC-1R: Summary of Updated Tax Calculations related to the Test Year
2) JMC-2R: Parent Company Loss Benefit
3) JMC-3R: Stand Alone NOLC Computations (Updated JMC-3 Attachment from my direct testimony)

I am also including as workpapers the Excel versions of my attachments.

Q5. Were all the attachments and workpapers that you sponsor prepared or assembled by you or under your direction and supervision?

Yes.

II. Purpose of testimony

Q6. What is the purpose of your rebuttal testimony?

My rebuttal testimony addresses certain positions and recommendations related to the federal income tax normalization rules and I&M's stand-alone net operating loss carryforward (NOLC) deferred tax asset (DTA) that is included in the accumulated deferred income tax (ADFIT) included as cost-free capital in the Company's capital structure.

Specifically, I rebut Mr. Mark E. Garrett on behalf of the Indiana Office of Utility Consumer Counselor (OUCC), Mr. Michael P. Gorman on behalf of the I&M Industrial Group, and Ms. Constance T. Cannady on behalf of the City of Fort Wayne, Indiana, the City of Marion, Indiana, Marion Municipal Utilities, and the City of South Bend, Indiana (collectively, "Joint Municipals").

These witnesses claim that the inclusion of the NOLC, after I&M has received a cash payment from its affiliates for its losses, results in "double counting" the benefits associated with the AEP Tax Sharing Allocation Agreement. My rebuttal testimony demonstrates the following:

- First, the tax sharing agreement and tax allocation methodology is utilized for financial purposes only; proper ratemaking purposes require the restatement of I&M's tax position on a stand-alone basis;
- Second, the cash payment received by I&M and other loss affiliates by virtue of the tax sharing agreement represents an equity infusion from the parent and reduces the debt/equity that would otherwise need to be raised for I&M's capital investments;

- Third, excluding the stand-alone NOLC as proposed by the OUCC and intervenors would mean customers are receiving an inadvertent benefit by reducing the weighted average cost of capital (WACC). The inclusion of the stand-alone NOLC brings the WACC back to the appropriate level reflecting I&M's stand-alone benefit without benefit or detriment provided by affiliates of the consolidated group;
- Fourth, while the tax sharing agreement provides non-tax-related customer benefits, it is not intended to provide tax benefits or otherwise impact ratemaking; and
- Lastly, the IRS guidance quoted by OUCC witness Mark Garrett and the Texas proceeding he cites does not apply to the facts of this case.

In addition, my testimony updates certain calculations included in the Company's case-in-chief, specifically the parent savings benefit, the NOLC DTA, and excess amortization as included in the jurisdictional cost of service and the Tax Rider.

Q7. If you do not respond to a position addressed in another party's testimony, does that imply I&M's acceptance of that party's position?

No, it does not.

III. NOLC Ratemaking Issue

Q8. To provide context for your rebuttal, please summarize what the term "stand-alone" accounting means in your discussion of the Company's NOLC.

My direct testimony explains that I&M's current federal income tax expense (CFIT), ADFIT, accumulated deferred investment tax credit (ADITC), and NOLC were all determined *for ratemaking purposes* based on the revenues and

operating expenses of I&M's rate-regulated operations and assets using a normalized method of tax accounting. Criss Direct at 7. This is referred to as the "stand-alone" or separate entity basis. *For tax reporting purposes*, I&M does not file a separate income tax return. Instead, I&M's operations are separately stated within the schedules of the consolidated federal income tax return of the AEP Consolidated Group. Criss Direct at 7, 9.[1]

My direct testimony explained the use of the stand-alone approach is consistent with ratemaking principles and prevents cross-subsidization among the Company's affiliates. *Id.* at 8, 9. This approach ensures that income taxes within the rate case filing represent only those taxes associated with the revenues and expenses of the regulated operations and assets of the Company, without regard to the Company's unregulated activities or the operations of the AEP Consolidated group. *Id.* at 8. This stand-alone approach has been used consistently in I&M's prior rate cases. *Id.* at 5.

Q9. You noted above that you respond to the testimony of the OUCC and certain Intervenors regarding the normalization rules. Again to provide context for that discussion, please summarize the normalization rules as you understand them.

As explained in my direct testimony, the Company must comply with the Internal Revenue Code's normalization rules, which requires that companies follow a normalized method of tax accounting for accelerated tax depreciation.

Normalization is a method of tax accounting in which the taxes reflected within an entity's income statement for a given period are matched with the associated revenues and expenses. Criss Direct at 9. As a result of normalization, revenues and expenses may be reflected in taxable income earlier or later than when

[1] The Company's participation in the consolidated return is recognized in the CFIT component of the revenue requirement. My direct testimony explains that CFIT was adjusted to include I&M's allocated share of the net interest expense portion of the parent company consistent with the prior orders of this Commission. *Id.* at 24.

such items are reflected within an income statement under Generally Accepted Accounting Principles (GAAP). *Id.*

Notably, under a normalized method of tax accounting, the tax liability that would have been payable if determined solely under GAAP is merely deferred and not saved permanently. *Id.* at 9. Therefore, financial statement reporting in accordance with GAAP requires a provision for deferred taxes to account for the tax effects' temporary book-to-tax differences. *Id.*[2]

The term "normalization" evolved with respect to utilities, because income taxes computed on the normalization basis caused net income to appear "normal". *Id.* at 11. Use of the normalization method in ratemaking maintains inter-generational equity; customers receive the income tax benefits commensurate with the expenses reflected in the cost of service. *Id.* at 10.

Q10. You stated above that under the normalized method of tax accounting, the tax liability that would have been payable if determined solely under GAAP is merely deferred and not saved permanently and therefore, the Company has a provision for deferred taxes. How are deferred taxes related to the treatment of I&M's NOLC at issue in this case?

Due to the capital-intensive nature of the utility industry, deductions associated with accelerated tax depreciation can lead to tax years in which overall deductions exceed taxable revenues. Criss Direct at 13. In my direct testimony, I explained that this is the case for I&M; due to accelerated depreciation, I&M incurred losses in tax years 2009-2011, 2013 and 2016-2017. *Id.* at 13.

When a taxpayer has more deductions than taxable revenues, resulting in negative taxable income within its tax return, the taxpayer is allowed to carry the

[2] My direct testimony illustrated this in the context of a utility asset, explaining that in the early years of an asset's life, accelerated tax depreciation often exceeds depreciation expense reported in the financial statements, allowing for the deferral of income taxes due to the taxing authority. In such an instance, the taxes deferred are debited to a deferred tax expense account with a corresponding credit to a deferred tax liability. In later years, when the book-to-tax difference reverses, the increase in tax due is mitigated by also reversing the deferred tax liability through a corresponding credit to deferred income tax expense. *Id.*

operating loss forward to offset otherwise taxable income produced in a subsequent year. *Id.* at 13. This is called a tax Net Operating Loss Carryforward (NOLC). *Id.*

When a NOLC occurs, the Internal Revenue Code (IRC) allows the taxpayer to carry the NOLC forward to subsequent years and offset otherwise taxable income produced in that year. As of the end of the Test Year (12/31/2022), I&M has a forecasted cumulative net operating loss (NOL) balance of $80,742,164.[3] Notably, this is an I&M NOLC; the AEP Consolidated Group is not forecasted to be in a tax NOLC position for the Test Year. Criss Direct at 13.

As discussed in my direct testimony, in a series of Private Letter Rulings (PLRs), the IRS has concluded that in order to avoid a normalization violation, the reserve for deferred taxes for the period used in determining tax expense in a utility's cost of service and reflected as a reduction to rate base (or zero-cost capital) must take into account instances in which taxes are not deferred due to accelerated tax depreciation creating a NOL. *Id.* at 14.

My direct testimony explained that I&M's cumulative Test Year-end NOLC (*i.e.*, the deferred tax asset or DTA), is part of the Company's ADFIT. Because the NOLC DTA offsets otherwise taxable income in subsequent years, the NOLC DTA reduces the ADFIT balance included as cost-free capital in the capital structure. *Id.* at 14, 19.

Finally, my direct testimony identified this as a change to past rate cases, where I&M's stand-alone NOLC DTA was not included as a reduction to the ADFIT balances included in the capital structure. *Id.* at 14-15. More specifically, I&M's current rates are based on a revenue requirement that includes the ADFIT balance (but not the NOLC) as cost-free capital in the capital structure.

While this presentation is accurate under GAAP accounting standards, it generates an inconsistency for ratemaking purposes between tax expense and ADFIT in the calculated revenue requirement. Simply put, the past ratemaking

[3] This number is updated from my direct testimony, as explained later in my rebuttal testimony.

treatment of I&M's NOLC overstates the deferred tax balance and is not consistent with the way the Company's tax expense is calculated on a stand-alone basis.

An inconsistency with the assumptions used in the revenue requirement for depreciation expense, tax expense, rate base and ADFIT violates the Internal Revenue Service (IRS) normalization rules. This inconsistency was not intentional but was discovered when the Company was preparing this rate case. This rate case is the Company's "Next Available Opportunity" under the IRS' "safe harbor[4]" rules to correct this. Therefore, the Company's filing includes the NOLC DTA as part of the ADFIT to correct the identified inconsistency and avoid a violation of the IRS normalization rules. *Id.* at 14-15.

Q11. With this background and context, please summarize the positions of OUCC witness Mark Garrett, Industrial Group witness Gorman, and Joint Municipals' witness Cannady that are the subject of your rebuttal on this issue.

OUCC. OUCC witness Mark Garrett (6-9) contends the I&M NOLC is "hypothetical" and should not be included in the ADFIT reflected as cost-free capital in the capital structure because 1) I&M participates in the parent company consolidated return; and 2) I&M received a payment from AEP under the Consolidated Tax Sharing Agreement. Mr. Garrett disagrees that the Company's inclusion of its NOLC in its ADFIT is necessary to comply with the normalization requirements. *Id.* at 10. He also disagrees that the PLRs referenced in my direct testimony support my positon on this issue. *Id.* at 14. Mr. Mark Garrett recommends that the "hypothetical" stand-alone NOLC not be used to reduce the balance of ADFIT. *Id.* at 19.

Industrial Group. Similarly, Industrial Group witness Gorman (p. 35) notes that on a stand-alone basis, a utility with an operating loss would not receive cash benefits associated with accelerated depreciation and asserts that the

[4] Rev Proc 2017-47 (page 10-11), available at: https://www.irs.gov/pub/irs-drop/rp-17-47.pdf

cash payments I&M received under the AEP Tax Sharing Agreement offset the tax timing differences. He contends that I&M proposes to restate I&M's cash position as though it does not operate within the AEP consolidated tax agreement, thereby ignoring the cash payments I&M could receive from AEP related to net operating losses created by accelerated depreciation. *Id.*

While Mr. Gorman agrees that I&M's income tax expense included in the revenue requirement should be based on a stand-alone basis, he does not agree that the Company's treatment of its NOLC is appropriate or reasonable. *Id.* at 37. Mr. Gorman also agrees there should be concern with inter-generational equity, but does not agree that I&M's proposed remedy in this case achieves that objective. *Id.* at 41.

Mr. Gorman contends the referenced PLRs do not address the circumstances of this case. *Id.* at 42-44. He says the Commission should direct I&M to request a PLR on this issue and states the historical treatment of ADFIT should remain in place unless and until I&M receives official confirmation from the IRS that I&M's interpretation of the normalization requirement is correct. *Id.* at 45. Mr. Gorman also recommends that if the IRS provides a PLR affirming the Company's interpretation of the normalization rules, the Commission should conduct an investigation as to whether the consolidated tax agreement provides benefits to ratepayers sufficient to justify I&M's continued participation. *Id.*

Joint Municipals. Joint Municipals witness Cannady (p. 9) states that the Company has received payments from AEP for use of I&M's NOLC in the consolidated federal income tax returns and that under GAAP, such payments would be accounted for by reducing the amount of the NOLC by the cash payment received. Witness Cannady states that I&M's GAAP accounting records show a zero NOLC balance due to the payments received from AEP. *Id.* at 10.

Witness Cannady acknowledges that if I&M had not received payments from AEP, then the I&M NOLC would need to be accounted for in the ADFIT balance as a deferred tax asset to comply with the IRS normalization rules. *Id.* She

states that because I&M has recorded its NOLC balance as $0 on its financial records in accordance with GAAP, it is not appropriate to make an adjustment to the ADFIT balance under the IRS normalization rules. *Id.* at 10-11.

IV. NOLC Accounting Presentation

Q12. Both OUCC witness Garrett (pp. 7, 14) and Joint Municipals witness Cannady (p. 10) note in their testimony that I&M does not have an NOLC recorded on its financial books and records at the end of the Test Year. Please respond.

This is simply a presentation issue in what is used for financial reporting as opposed to ratemaking and is not a basis for excluding the NOLC for ratemaking purposes. In determining income taxes in the separate financial statements of the members of a consolidated tax return group, GAAP allows for different methods of doing so.

Accounting Standards Codification (ASC) 740-10-30-27 (ASC 740) does not require the use of any particular allocation method and only requires that the method adopted be systematic, rational, and consistent with the broad principles of ASC 740. The members of the AEP consolidated federal income tax return (consolidated return group) have elected the method of tax allocation that follows a "parent company down" method.[5]

I&M does not have an NOLC recorded on its financial books and records at the end of the Test Year because the consolidated return group has produced taxable income sufficient to offset the losses contributed by I&M. In other words, the GAAP financial statements of I&M reflect its proportionate share of the consolidated return group's NOLC. But, for ratemaking purposes, it is necessary

[5] In the parent company down method, the allocation of taxes is calculated by applying a pro-rata allocation of a member's attribute (i.e. taxable income, pre-tax book earnings, etc.) to that of the return group's attribute.

to reflect the NOLC generated strictly based on the Company's stand-alone taxable income.

Contrary to Mr. Gorman's assertion (p. 42), the calculation and inclusion of the NOLC is not a "stark change to I&M's past positions" and does not reverse I&M's historical accounting practices. This method of accounting for allocating the taxes of a consolidated group is an accounting policy election made many years ago when I&M agreed to participate in a consolidated return and the methodology cannot be changed absent a policy change. I&M has not made an election to change this accounting policy and follows the guidance provided by GAAP and ASC-740. For ratemaking purposes, which is a separate concept from GAAP accounting, and consistent with prior I&M rate cases, I&M calculates income tax expense on a stand-alone basis. Per the concept of stand-alone ratemaking and normalization rules, this requires the inclusion of the NOLC deferred tax asset in the Company's ADFIT balance.

Q13. You mention above that ASC 740 does not require the use of any particular allocation method. Are there other ways in which a company can record the taxes related to the consolidated return group while still being paid by the parent for its losses?

Yes. One common alternative to the "parent company down" method is known as the "separate-return" method. One member of the consolidated filing group, typically a parent, will pay a separate or carve-out entity for temporary difference DTAs each period as they arise. In this case, the separate entity would recognize DTAs associated with the tax attributes (in this situation, an NOLC). This is premised on the fact that, under the separate-return method, income taxes are allocated to the separate financial statements in accordance with ASC 740 as if the separate reporting entity had filed a separate tax return.

Q14. How does the existence of alternative consolidated accounting methods relate to the concern raised by Mr. Garrett and Ms. Cannady that the Company did not record an NOLC on its financial books and records?

This is relevant because both Mr. Garrett and Ms. Cannady incorrectly assert that the Company's *financial* reporting should govern the *ratemaking* treatment of the NOLC. As shown below in greater detail, alternative consolidated accounting approaches would result in a difference in how the NOLC is reported on I&M's books for financial purposes. However, it is a long-standing principle that ratemaking should be calculated on a stand-alone basis in order to mitigate the potential issue of varied ratemaking.

On the topic of tax allocation agreements, the Federal Energy Regulatory Commission (FERC) recognized that the various methods allowed by the Code and regulations can be quite different and noted that one method could produce the opposite result of another.[6] As FERC explained, these differences in *financial* allocations should not lead to disparate *ratemaking* results:

> *There are, however, two reasons we cannot treat the allocation used for tax purposes as the pipelines' actual tax costs for cost of service purposes. First, the Code and regulations require an allocation of the consolidated tax liability to determine each member's "earnings and profits." This, in turn, is necessary to determine whether a distribution is a taxable dividend or a tax-free return of capital.*
>
> *So the allocation is required to administer the revenue laws. It has no other effect. It does not determine what each member pays to the parent to help discharge the liability. Nor does the allocation attempt to ascertain the tax costs of a member for ratemaking, or any other, purpose. Hence, we think the allocation a consolidated group reports for tax purposes is simply too far removed from the issues before us to warrant its adoption as the allocation to be used for cost of service*

[6] *Columbia Gulf Transmission Company,* Docket No. RP75-105-002 (June 22, 1983), 54 P.U.R.4th 31 (F.E.R.C.), 23 FERC P 61396, 1983 WL 874322.

purposes.

The important thing about these alternative methods of allocating the consolidated tax liability is that they are elective. A group can choose any one of them. Hence to treat the amounts allocated to members for tax purposes as the member's actual tax costs for ratemaking purposes would mean the tax allowance of a regulated member of an affiliated group would be determined by the election of the group. Thus, the rates charged to ratepayers of different companies could vary considerably because of the way the members of the groups have chosen to adjust their earnings and profits. As a policy matter, we think that is unacceptable.[7]

Mr. Mark Garrett and Ms. Cannady's approach of focusing solely on the method of allocating the consolidated tax liability would result in the variation in rates that FERC deemed "unacceptable."

Q15. Please explain how the OUCC and Joint Municipals' approach (*i.e.*, basing *ratemaking* results solely on the *financial* books) would result in varied rates charged to customers.

Let's compare the following hypothetical examples:

Utility A is a stand-alone entity operating on its own and files its own tax return. Utility A has taxable losses of ($1,000) and assuming that this loss is not due to tax specific deductions, this would result in a deferred tax benefit of ($210). *Figure JMC-1* illustrates the accounting for the taxes of Utility A:

Figure JMC-1. Stand-Alone Tax Computation

Utility A	Debit	Credit	
Deferred Tax Expense		210	Record Deferred Tax Benefit
Deferred Tax Asset - NOLC	210		Record DTA

[7] *Id.* at 16.

In this example, the tax entries of $210 deferred tax benefit would be included as a reduction to rates in their cost of service. The $210 DTA related to the NOLC would be included as a decrease to ADFIT as included in WACC as cost-free capital. In this example, ratemaking would match the financial reporting.

In the following example, assume that Utility A now participates in a consolidated return filing and all other affiliates have income and the consolidated group is in an income position. This affiliate group has elected to utilize the Parent Company Down method for recording their allocation of the tax liability. In addition, Utility A has agreed to participate in a tax sharing agreement which dictates that cash will be paid to loss affiliates in the amount that offsets the consolidated group's tax liability. This cash will be paid by income affiliates for their stand-alone tax liability. *Figure JMC-2* illustrates the accounting for taxes of Utility A:

Figure JMC-2. Consolidated Income Tax utilizing Parent Company Down

Utility A	Debit	Credit	
Deferred Tax Expense		210	Record Deferred Tax Benefit
Deferred Tax Asset - NOLC	210		Record DTA
Deferred Tax Asset - NOLC		210	Reduce DTA for losses utilized in consolidation
Cash	210		Receipt of Cash for Losses from affiliates

Figure JMC-2 demonstrates that Utility A continues to have $210 deferred tax benefit included as a reduction to rates in their cost of service. However, the allocation methodology dictates that the NOLC included on their financial books and records reflect the attributes of the consolidated return and therefore the DTA NOLC is reduced to $0 and not included as a decrease to ADFIT as included in WACC as cost-free capital. This is the methodology I&M has elected to use to allocate taxes from the consolidated return group and participates in a tax sharing agreement whereby I&M is paid for its losses and also, when in an income position, pays other affiliates for their losses.

In this final example, assume that Utility A is still part of a consolidated return filing, but the affiliate group has elected to use the Separate Return method for recording their allocation of the tax liability. In addition, Utility A has agreed to participate in a tax sharing agreement which dictates that cash will be paid to loss affiliates in the amount that offsets the consolidated group's tax liability. This cash will be paid by income affiliates for their stand-alone tax liability.

Figure JMC-3 illustrates the accounting for taxes of Utility A:

Figure JMC-3. Consolidated Income Tax utilizing Separate Return Method

Utility A	Debit	Credit	
Deferred Tax Expense		210	Record Deferred Tax Benefit
Deferred Tax Asset - NOLC	210		Record DTA
Equity		210	Adjustment to Equity for losses utilized in consolidation
Cash	210		Receipt of Cash for Losses from affiliates

Figure JMC-3 demonstrates that Utility A continues to have $210 deferred tax benefit included as a reduction to rates in their cost of service. In addition, the DTA NOLC is still reflected as a decrease to ADFIT as included in WACC as cost-free capital.

All three examples above show that the tax allocation accounting policy chosen by a consolidated group can have a varying impact on their financial books and records. If ratemaking followed the financial records only, as Mr. Mark Garrett and Ms. Cannady propose, it would produce varied rates calculated and charged to customers. Their proposal also fails to recognize the economic realities of the tax allocation and creates operational risk for both I&M and its affiliates.

The Company's approach, which determines income tax expense, ADFIT, ADITC, and NOLC on a stand-alone basis, properly ensures that only the taxes associated with revenues and expenses of I&M's rate regulated operations and assets are included in the rate filing. This approach also ensures that,

regardless of the method elected for the consolidated tax filing (or even whether the utility participates in a consolidated tax filing), the resulting ratemaking impact is identical.

Q16. You just stated that excluding the NOLC from ADFIT does not properly recognize the economic realities of the tax sharing agreement. Please explain.

The following hypothetical example illustrates this point.

First, let's assume that an affiliate company (Utility A) had a current tax liability. Utility A would have made a cash payment for its current tax liability to AEP. Let's also assume that I&M has a taxable loss, and as a result, I&M received a cash payment from AEP (to the extent that taxable loss was used by the group) under the tax sharing agreement.

In this example, the consumer parties of Utility A could argue that to the extent the consolidated group return was able to use I&M's taxable loss, Utility A's current tax expense was actually deferred. They could then argue that because this tax was deferred, the additional deferral should also be a reduction to Utility A's rate base or be included in the capital structure as cost-free capital.

This argument, when taken to its logical extension, builds problem on top of problem. Both I&M and Utility A could face capital structure and/or rate base reductions over the same cash transfer under the tax allocation agreement. It is unreasonable to count one cash payment twice. Instead, the prudent approach is the stand-alone approach as this aligns the tax benefits and burdens of each regulated utility with the tax expense and capital structure for that utility with no consideration for any affiliate or upstream, downstream, or side-stream activity.

V. Ratemaking Impact of the NOLC

Q17. OUCC witness Mark Garrett (p. 9), Joint Municipals witness Cannady (p. 10), and IG witness Gorman (p. 10) all note that I&M received a cash payment from AEP for the use of I&M's NOLC in the AEP consolidated tax filing. All three witnesses contend that because I&M received this cash payment, it would be "double counting" to include the NOLC in ADFIT. What is your general response to this concern?

Simply put, there is no "double counting" of the NOLC for ratemaking purposes. While it is true that I&M received payments from its affiliates for use of the NOLC under the AEP consolidated tax sharing agreement, those cash payments were not used to decrease ADFIT by $159M. Instead, those cash payments reduced the need to issue additional debt and equity. I&M's rate base represents only those assets that are used and useful in providing utility service. I&M may have used the cash payments instead of debt or equity infusions from its parent, but the ultimate capital investment, and resulting rate base, remains the same either way. In other words, there is no "extra" rate base resulting from the tax allocation payment received under the tax sharing agreement and no "double counting" of benefits.

My direct testimony (page 22), directly illustrates this point. I showed that I&M's proposal results in the same WACC as a company with no tax allocation agreement and no resulting cash payments. I further showed that the proposal to exclude the stand-alone NOLC DTA will result in a decrease in I&M's WACC used to provide service to the public. That is, the tax allocation payments do not incrementally increase the WACC, but rather substitute for the issuance of additional debt and equity. Stated differently, if there were no tax allocation payments, I&M would have been required to get that money from some other source (*i.e.*, debt or equity). In the end, the cash allocation payments are no different than an equity infusion from I&M's parent, for which the equity investor should be compensated with an applicable return.

Q18. Mr. Mark Garrett (p. 9) states that the AEP tax sharing agreement requires that I&M be paid for any NOLC used by the parent and thus "I&M has been paid in full for any NOLC used by AEP". Please respond.

I disagree that the tax payments have any bearing on the inclusion of I&M's stand-alone NOLC for ratemaking purposes. As discussed above, I&M and its affiliates have agreed to participate in a tax sharing agreement. Through this agreement, those companies with taxable income make tax payments to AEP equal to their separate return liability. To the extent that the income from these companies can be offset by losses generated by other affiliates, AEP makes a distribution to the loss companies. The tax sharing agreement is simply a mechanism for each affiliate in the AEP consolidated group to pay the taxes they would otherwise have paid on a stand-alone basis. In other words, while the tax sharing agreement reflects how cash is to be settled among the participants, it does not necessarily impact the amount of tax expense or benefit that would be reported in a subsidiary's separate company financial statements.

In contrast, if the NOLC were excluded from ADFIT as Mr. Mark Garrett proposes, the result would be the cross-subsidization of costs/benefits from affiliate companies. If cash payments received for taxable losses are to be considered for ratemaking purposes, then the operations of affiliates would impact I&M's utility rates. Instead of the rate base reduction being based on the stand-alone deferred tax expense that has been reflected in customer rates, excluding the stand-alone NOLC suggests that part of capital reduction should be funded by the customers of affiliate companies.

In addition, the payments made by income affiliates do not serve to reduce the affiliates' taxes and their customers' cost of service. The affiliates' cost of service calculations likewise are not reduced by the tax-allocation payments, but are calculated on a stand-alone basis – just like I&M. The receipt or payment of a distribution through the tax sharing agreement is entirely outside the scope of the regulated operations of the Company.

Q19. Mr. Gorman states (p. 40) that it is "reasonable to expect that a utility would only be permitted to participate in affiliate service agreements and/or consolidated tax agreements to the extent these affiliate transactions can produce benefits to the utility and its ratepayers, that the utility could not create on its own." He adds that it is also reasonable to expect that these agreements "would not result in harm to the utility or its ratepayers."

To reiterate, the tax sharing agreement is merely an agreement to allocate cash amongst affiliates and the tax allocation methodology is merely an accounting policy that should not impact rates that are charged to customers. Thus Mr. Gorman's concern is outside the scope of this ratemaking proceeding. That said, the AEP tax sharing agreement both (1) produces non-tax benefits to the utility and its customers; and (2) does not result in harm to the utility or its customers. More specifically, the tax sharing agreement provides two non-tax-related benefits.

First, AEPSC provides the tax compliance and accounting necessary for affiliate companies. By filing a consolidated tax return, costs associated with the required compliance related to multiple affiliates is greatly reduced. If each affiliate required a separate return, the cost would include the annual tax return filing, extension form filing, potential amended returns, potential audit of each return, four estimated tax payments per tax return, and an extension payment and final payment (a total of six annual payments per return).

Even if a payment is not due, based on taxable losses or carryforward attributes, the potential liability needs to be tracked, analyzed, and reviewed for accuracy. Once separate returns are filed for each affiliate, the number of state returns, payments, extensions, audits, etc. multiply rapidly. The cost to prepare, analyze, and maintain all of these records would be astronomical and incalculable. The consolidated tax return and tax sharing agreement provides a benefit to customers by creating economies of scale that reduce O&M costs included in the cost of service.

The second non-tax related benefit from the tax sharing agreement is the temporary cash received if the Company has losses that can be utilized by the consolidated group. I&M receives cash now for its losses versus waiting to be able to utilize those losses on a future tax return. If I&M filed a separate return, the IRS would not issue a refund or payment if I&M incurred a taxable loss. Moreover, the Company also would not have received payments if affiliates within the consolidated return group had not produced taxable income. These are benefits that I&M "could not create on its own".

The tax sharing agreement provides no income tax expense benefits or detriments as the agreement states "no member of the consolidated group shall be allocated a federal income tax which is greater than the federal income tax computed as if such a member had filed a separate return." In other words, there is no harm or benefit to I&M and its customers by virtue of the tax sharing agreement.

Q20. Mr. Gorman asserts (p. 41) that your proposal "will deprive I&M and its customers of the savings/benefits of its participation in the AEP consolidated tax filing" and is a "fundamental shift in how the Agreement has operated in the past." Do you agree?

No. As just explained, the tax sharing agreement provides non-tax benefits to I&M and its customers. These benefits continue under I&M's proposal. I&M is not proposing any shift in how the tax sharing agreement operates. As noted throughout my testimony, the existence and methodology of the tax sharing agreement should have no ratemaking impact because income tax expense, ADFIT, ADITC, and NOLC must be calculated on a stand-alone basis for ratemaking purposes. The only change I&M proposes is to cure the normalization violation created by excluding the NOLC from the ADFIT balance.

Q21. Mr. Garrett contends (p. 13) that it is "common for utilities to raise normalization violation concerns in an attempt to keep tax savings that

should go to ratepayers." Is that why I&M is seeking to cure its normalization inconsistency in this case?

No. I&M is responsible for complying with the tax laws and regulations. Not doing so can have serious consequences, as I discuss later in my testimony. To the extent that Mr. Garrett is suggesting I am raising an issue on behalf of I&M to somehow "game" the system, he is incorrect.

AEP is a publicly-traded company and the Securities and Exchange Commission (SEC) requires the filing of audited financial statements in order to obviate the fear of loss from reliance on inaccurate information, thereby encouraging public investment in the Nation's industries. The Company is accountable and responsible for assuring the figures it reports are accurate.

I also disagree with Mr. Garrett's suggestion (p. 13) that the normalization rules are intended to flow tax savings to ratepayers. The IRS explained that Congress had two principal objectives in adopting the Normalization Rules:

> *The first objective was to preserve the utility's incentive to invest. Congress enacted the ITC and accelerated depreciation to stimulate investment. These incentives were not intended to subsidize the consumption of any products or services, including utility products or services. Recognizing that public utility rates are set based on the utility's costs incurred to provide the utility service, including federal income tax expense, Congress enacted a set of rules to assure that some or all of the value of the incentives it provided for utility capital investment would not be diverted from investment by utilities to lower prices for consumption by customers of utilities.*

> *The second objective was to protect the government's tax revenue. Congress reasoned that when a utility elected accelerated depreciation and its regulator lowered rates to reflect the resulting tax benefit, the federal government would experience a reduction in tax revenue twice: once from the added accelerated depreciation deductions taken by the utility, and again from the decline in the*

revenue received by the utility as a result of its lower rates.[8]

In addition, as stated in Rev. Proc. 2017-47 (p. 7):

> *[U]nlike most tax provisions the sanctions imposed under the Normalization Rules were not intended to directly increase or decrease federal tax revenues. They were intended to discourage the flow through of tax benefits to customers in order to allow utilities to benefit from the underlying depreciation and ITC provisions and prevent the loss of revenue the federal government would suffer if the benefits were flowed through to customers.*

Mr. Mark Garrett's position is contrary to the stated objectives of the normalization rules and would undermine federal policy with respect to utility capital investment.

Q22. Mr. Mark Garrett further argues (p. 10) that the stand-alone NOLC adjustment would "deprive ratepayers of the benefit of the cost-free capital received by I&M." Do you agree?

No. In addition to my discussion above, the recommendation to exclude the I&M NOLC from ADFIT fails to recognize the longstanding ratemaking principle that deferred tax expense and ADFIT are inextricably linked. Included in the cost of service is current and deferred tax expense. Current tax expense is what is currently payable to the IRS and deferred is what will be paid (or will reduce future payments). The deferred expense is recorded as ADFIT, which is included as cost-free capital in the capital structure because ADFIT represents the cumulative amount of tax expense that has been included in the cost of service but has not yet been remitted to the IRS and will be paid at a future time. I&M's stand-alone NOLC represents the deferred tax benefit that has been included and ultimately reduced the cost of service and customer rates.

[8] Rev. Proc. 2017-47 at 2.

To exclude the NOLC DTA would result in capital in the case being reduced by an amount greater than the deferred taxes recognized through the ratemaking process. In I&M's case, ADFIT is over-stated by $80M. As previously explained, income tax expense is recorded on a stand-alone basis, and as such, the losses incurred by I&M have been included as a deferred tax benefit, reducing the cost of service. However, due to the tax allocation methodology selected by I&M and the affiliate group, the ADFIT does not reflect the stand-alone NOLC as part of ADFIT. The $80M benefit customers received should ultimately reduce the ADFIT which represents the cumulative tax expense that has been included as an expense in the cost of service. Including the NOL carryforward in the ADFIT balance provides an accurate representation of the overall rate base reduction and is commensurate with regulated operations and assets of the utility.

Q23. Joint Municipal witness Cannady (pp. 14-18) also proposes the Commission reject the Company's inclusion of deficient ADFIT related to the stand-alone NOLC and the reduction to the excess amortization benefit in cost of service based. Does the deficient tax inclusion with the excess tax create a "double counting" issue?

No. The premise behind excess ADFIT is that there is a dollar-for-dollar return of cash that was over-collected as a result of a rate change. The inclusion of the deficient ADFIT associated with the NOLC and reduction to excess amortization in the cost of service ensures that the Company credits only the amount of cash that it collected from customers through rates for its deferred taxes. If the Company's position is not accepted, it would result in I&M crediting customers an amount beyond what the amount reflected in prior rates.

Q24. Can you please provide an example to demonstrate this point?

Yes. Let me first show the calculation of total income tax expense. Assume there are no permanent differences between book and tax income. *Figure JMC-4* illustrates if the utility has $10,000 in pre-tax book income

(revenue requirement) and the statutory tax rate is 35%, the result would be a total tax expense of $3,500 included in rates.

Figure JMC-4. Total Income Tax Expense Calculation

Pre-Tax Net Income	10,000
Statutory Tax Rate	35%
Total Tax Expense	3,500

Figure JMC-5 illustrates that the utility was able to accelerate deductions for tax purposes and those deductions exceed the book income for the year thereby creating a NOL.

Figure JMC-5. Taxable Expense Computation

	Taxable Income		Tax Rate	**(DTL) / DTA**
Pre-Tax Book Income	10,000			
Accelerated Tax Deduction Reducing Income to Zero	(10,000)	x	35%	(3,500)
Remaining Accelerated Tax Depreciation	(1,000)	x	35%	(350)
Taxable Income (Loss)	(1,000)			(3,850)
Net Tax Loss Carry Forward	1,000	x	35%	350
Taxable Income After Net Operating Loss	0			
	35%			
Current Tax Expense	0			(3,500)

In this example, the current tax expense is zero because no tax is currently payable to the IRS as a result of the NOL. The $3,500 difference between the total tax expense and the current tax expense is deferred tax expense. That is also the amount of taxes collected from customers in rates, deferred as a result of accelerated depreciation and the ADFIT that reduces rate base.

Figure JMC-6 assumes that the tax rate changes from 35% to 21% and as a result the utility must revalue its ADFIT balance.

Figure JMC-6. ADFIT Remeasurement

	Taxable Income		Tax Rate		(DTL) / DTA		Reduction to Tax Rate	Reg. (Liability)
Pre-Tax Book Income	10,000							
Accelerated Tax Deduction Reducing Income to Zero	(10,000)	x	35%		(3,500)	x	14%	(1,400)
Remaining Accelerated Tax Depreciation	(1,000)	x	35%		(350)	x	14%	(140)
Taxable Income (Loss)	(1,000)				(3,850)			(1,540)
Net Tax Loss Carry Forward	1,000	x	35%		350	x	14%	140
Taxable Income After Net Operating Loss	0							
	35%							
Current Tax Expense	0				(3,500)			(1,400)

A regulatory liability (asset) is set up for each timing difference by multiplying the timing difference by the change in the tax rate. This results in a net regulatory liability of $1,400 as well as a reduction to ADFIT of the same amount.[9] The revalued ADFIT balance of $2,100 ($3,500 original - $1,400 for change in tax rate) represents the future tax liability that the utility will pay to the IRS. The $1,400 regulatory liability is the amount of deferred taxes that the company has collected in rates ($3,500) that exceeds its future tax liability ($2,100).

As evident in this example, including the excess ADFIT associated with the NOLC (as proposed by I&M) ensures that the cash that is returned to customers is exactly the amount that customers provided to the utility.

Q25. How does the recommendation of the witnesses differ from this example?

The recommendation is to exclude the stand-alone NOLC ADFIT and the associated deficient ADFIT.

[9] For simplicity purposes, this example does not include any gross-up of the regulatory liability.

Figure JMC-7 modifies the above examples to show the impact of excluding the deficient ADFIT.

Figure JMC-7. Remeasurement excluding deficient ADFIT related to NOLC

	Taxable Income		Tax Rate		(DTL) / DTA		Reduction to Tax Rate	Reg. (Liability)
Pre-Tax Book Income	10,000							
Accelerated Tax Deduction Reducing Income to Zero	(10,000)	x	35%		(3,500)	x	14%	(1,400)
Remaining Accelerated Tax Depreciation	(1,000)	x	35%		(350)	x	14%	(140)
Taxable Income (Loss)	(1,000)				(3,850)			(1,540)
Net Tax Loss Carry Forward	1,000	x	35%		0	x	14%	0
Taxable Income After Net Operating Loss	0							
	35%							
Current Tax Expense	0				(3,850)			(1,540)

Total tax expense remains $3,500 and the split of current and deferred tax expense remains the same ($0 and $3,500, respectively). The exclusion of the deficient ADFIT would result in a rate base reduction of $3,850 as opposed to $3,500 in Figure JMC-2. The revaluation of ADFIT as a result of the tax rate change would result in a regulatory liability of $1,540. The utility has collected $3,500 for deferred tax expense from customers. The company will still be required to pay $2,100 in tax expense in the future years. But the exclusion of the deficient tax related to the NOLC would require that $1,540 be refunded to customers.

This results in the utility now having only $1,960 ($3,500 - $1,540) of cash remaining from its customers to pay its future tax liability of $2,100. The Company's position that the NOLC related deficient ADFIT should be included in the overall excess ADFIT balance provided to customers ensures that the amount that is returned to customers is the exact amount that customers have paid in excess taxes to the Company.

Q26. On pages 15 through 18 of his testimony, OUCC witness Mark Garrett discusses a pending Texas utility case and suggests it supports his position to exclude I&M's NOLC from rate base. Please respond.

I disagree that the Texas proceeding cited by Mr. Garrett is persuasive as to how the Commission should address this issue. First, Mr. Garrett is referring to a "proposal for decision"; the case remains pending as of the filing of this rebuttal testimony. Second, as Garrett discusses (pp. 16-17), the Texas proposed decision references language from IRS Rev. Proc. 2020-39. I disagree that this IRS guidance is relevant to the Company's proposed NOLC treatment.

Third, the language from the Texas proposed decision cited by Mr. Garrett discusses the same "double-counting" concern Mr. Garrett raises in this case, which I specifically address in this rebuttal testimony. Finally, the scope of the Texas case differs from the Indiana case as the Texas proceeding is intertwined with a disagreement over the interpretation of a Texas statute (PURA § 36.060) that does not govern Indiana regulatory cases.

Q27. Please explain why you believe the IRS guidance quoted by Mr. Mark Garrett (pp. 16-17) does not apply to the Company's proposed treatment of the NOLC.

The IRS issued Rev. Proc. 2020-39 to clarify the normalization requirements following the corporate tax rate reduction from the Tax Cuts and Job Act (TCJA). Under Section 3, titled "Scope", Rev. Proc. 2020-39 states this guidance "addresses only the effects of ***tax rate changes*** on timing differences related to accelerated depreciation. Any issues unrelated to the effects of tax rate changes on accelerated depreciation are beyond the scope of this revenue procedure." (emphasis added).

The NOLC is the result of cumulative taxable losses as of 12/31/2022 at a 21% tax rate. The deficient tax related to the NOLC as of 12/31/2017 is included in this case, but the OUCC and intervenors do not contest whether it is due to accelerated depreciation. Rather, they argue that it should not be included in the

case at all. Because the dispute in this case is regarding the inclusion of the stand-alone NOLC and not whether it is the result of accelerated depreciation, the IRS guidance cited by Mr. Garrett does not apply.

Even if Rev. Proc. 2020-39 was applicable to I&M's NOLC, the language quoted by Mr. Garrett is not determinative of the inclusion of the NOLC in ADFIT. The relevant section states that it applies to determining the portion of an NOLC attributable to depreciation, an issue not in dispute in this proceeding.

> ***Net operating loss carryforward (NOLC).*** *Compliance with normalization requires a determination of the source of an NOLC so that rate base is not overstated in jurisdictions in which net deferred tax liabilities reduce rate base. While § 1.167(l)-1(h)(1)(iii) is the relevant general authority, there is not one single methodology provided for determination of the portion of an NOLC that is attributable to depreciation.*
>
> *Section 1.167(l)-1(h)(1)(iii) instead informs taxpayers that the amount and time of the deferral of tax attributable to depreciation when there is an NOLC should be taken into account in such "appropriate time and manner as is satisfactory to the district director." Regulating commissions have expertise in this area, and any reasonable method for determining the portion of the NOLC attributable to depreciation should generally be respected provided such method does not clearly violate normalization requirements.*

This guidance relates to determining the portion of an NOLC attributable to depreciation, an issue not in dispute in this proceeding. It does not address the inclusion of an NOLC as an offset to ADFIT to avoid a normalization violation.

VI. Existing Private Letter Rulings (PLRs)

Q28. OUCC Witness Mark Garrett (p. 14) states the Private Letter Rulings (PLRs) you cite in your direct testimony are non-precedential and do not support your position. Please respond.

I recognize that PLRs are non-precedential, but do believe they provide helpful guidance as to how the IRS would likely rule in similar situations. Mr. Garrett admits that the referenced PLRs "conclude that the NOLC-related account balances associated with accelerated depreciation must be included in the revenue requirement to avoid normalization violations, which was already known and generally agreed with."

This is precisely what I&M proposes to do in this proceeding. His disagreement stems from his confusion regarding the difference between accounting for consolidated tax purposes and I&M's stand-alone accounting for ratemaking purposes, which I addressed above. Whether an NOLC has been "fully utilized by the consolidated group" has no bearing on the need to reflect the NOLC as a reduction to ADFIT as I&M has done here.

Q29. IG Witness Gorman (pp. 42-44) similarly contends the PLRs do not address the circumstances of this case and should not be relied upon because they precede the start date of the Tax Cuts and Jobs Act (TCJA). He further notes (p. 43) that you did not offer any IRS rulings since the passage of the TCJA. Please respond.

Normalization rules of the IRC precede the start date of the TCJA and these earlier PLRs related to normalization remain relevant. Moreover, more recent PLRs reach similar conclusions. For example, PLR 202010002, released March 6, 2020, states (p. 18):[10]

> *Because the reserve account for deferred taxes (ADIT), reduces rate base, it is clear that the portion of the net operating loss carryover*

[10] https://www.irs.gov/pub/irs-wd/202010002.pdf

(NOLC) that is attributable to accelerated depreciation must be taken into account in calculating the amount of the ADIT account balance. Thus, the ADIT asset resulting from the NOLC should be included in rate base, given the inclusion in rate base of the full amount of the ADIT liability resulting from accelerated tax depreciation.

While the PLRs cited in my direct testimony do not specifically address tax allocation payments, I would not expect them to because stand-alone treatment is the standard ratemaking approach. In other words, while tax sharing agreements among a consolidated group are relatively common, intercompany tax allocations are not relevant to the discussion for normalization purposes.

Q30. Can you provide an example of a more recent PLR in which a taxpayer discussed a tax sharing payment in the context of a NOLC?

Yes. In PLR 201828010, the utility was "a member of Parent's consolidated group that file a consolidated federal income tax return".[11] The facts further indicated that under the tax sharing agreement, the utility received payments for the use of its NOLC. Notably, the treatment of the utility's NOLC as an offset to its ADFIT balance was not even an issue, as recited in the facts:

Taxpayer has generated significant net operating losses ("NOLs") in a number of prior tax years and continues to have an NOL carryforward ("NOLC") balance. To accurately reflect the economics of this NOLC, Taxpayer has recorded a deferred tax asset ("DTA") on both its State A and State B regulated books of account. Taxpayer properly takes this DTA into account when computing the ADFIT balance by which it reduces its rate base and both Commission A and Commission B have accepted this treatment.

In making its ruling and resolving the normalization question for the utility, the IRS attached no significance to the tax sharing agreement and the payment

[11] https://www.irs.gov/pub/irs-wd/201828010.pdf

received by the utility for the use of its NOLC. The fact that the IRS simply ignored the tax sharing payment in its analysis further supports I&M's position that the NOLC must be included in ratemaking on a stand-alone basis.

VII. Identification and Consequence of a Normalization Violation

Q31. OUCC witness Mark Garrett (p. 15) describes I&M's NOLC proposal as part of a "newly-developed strategy" for several AEP operating companies. Please respond.

What the OUCC describes as a "newly-developed strategy" is AEP's recognition of the inconsistency with the normalization rules if a stand-alone NOLC is not included in ratemaking. As discussed below, a normalization violation would have a significant, negative impact on I&M's customers. In order to avoid this negative impact, I&M (and other AEP operating companies) are following the IRS "safe harbor" guidance by using their next available opportunity to change to a practice or procedure that is consistent with the normalization rules.

Q32. Mr. Garrett states (p. 12) that if the Company's position is correct, then "I&M, and all of the other AEP operating companies, would have been committing normalization violations consistently for at least 12 years now." Why didn't the Company recognize this normalization inconsistency prior to this case?

Normalization rules are complex in nature. Inconsistencies are hard to identify and are not always immediately obvious. GAAP and ASC-740 can produce results that are acceptable from a financial statement perspective and the IRC normalization guidelines, yet give a different answer in terms of ratemaking. The Company did a thorough examination and analysis of the guidance provided by the IRS on the topic. It consulted nationally recognized experts in the field to independently analyze the guidance as well.

This particular normalization inconsistency relates to the interaction and differences between ratemaking and financial reporting, adding additional complexity. For example, an audit of AEP's tax returns would not immediately bring to light any normalization issues included in rate cases. The IRS does not audit rate cases. Normalization inconsistencies are typically brought to the attention of the IRS via a company or commission seeking additional guidance.

Q33. OUCC witness Mark Garrett states (p. 12) that normalization violations are "extremely rare". Please respond.

As stated on page 13 of my direct testimony and as Mr. Garrett recognizes (page 12), normalization violations are rare because the IRS allows taxpayers to cure a potential rule violation by changing to a practice or procedure that is consistent with the normalization rules with the taxpayer's "Next Available Opportunity" before the IRS will assert that a normalization violation has occurred.[12] The Company identified the incorrect NOLC treatment in the preparation for this case, which is the "Next Available Opportunity" to cure the inadvertent inconsistency.

Q34. Please respond to Mr. Mark Garrett's claim (p. 12) that "in practice" a normalization violation is not a serious problem.

I disagree with Mr. Garrett's contention that in practice a normalization violation is not a serious problem. Mr. Garrett's discussion is referring to the IRS' practice of allowing a taxpayer to correct normalization inconsistencies (which I discuss above). He is not referring to the actual result of a normalization violation. As previously stated, normalization violations are rare because a company or regulatory commission must knowingly put into rates a practice or procedure that is inconsistent with the normalization rules. Yet, as Mr. Garrett concedes (p.

[12] As defined in Rev. Proc. 2017-47 (p. 10). "Next Available Opportunity" means the next rate proceeding in the case of a taxpayer without a rate proceeding; and the currently pending proceeding if a case is pending.

12), and as discussed below, if left uncured, a normalization violation could result in the utility losing its ability to take accelerated depreciation for tax purposes. This would have a significant negative impact for customers.

Q35. Please further explain the consequences of a normalization violation for I&M.

If a company or commission knowingly puts into rate a practice or procedure that is inconsistent with normalization rules, the company will no longer be able to utilize accelerated depreciation as part of their tax return filing. This impacts I&M's ratemaking in two areas: 1) a significant reduction to the cost-free ADFIT included in the capital structure, and 2) an increase to the current tax payable.

The reduction to ADFIT will occur due to the inability to utilize accelerated depreciation. With significant deductions related to accelerated depreciation, one of the main components of ADFIT is the DTL related to accelerated depreciation. Without accelerated depreciation, the DTL related to accelerated depreciation will eventually become $0, reducing the total cost-free ADFIT that reduces the weighted average cost of capital (WACC). As of 2020, the DTL related to accelerated depreciation was approximately $457 million or about 40% of the total ADFIT on I&M's financial records. As this DTL reduces over time, the WACC will increase, negatively impacting customer rates.

The increase to current tax payable will likewise occur due to the inability to utilize accelerated depreciation. Accelerated depreciation results in higher deductions for current tax payable and defers tax due to the future. Without accelerated depreciation, the tax payment is due now. I&M would need to borrow more cash to cover the increased tax payable. Having to borrow more cash will increase the cost of debt.

An increase to the cost of debt increases the WACC, negatively impacting customer rates. In addition, any investment in future property would not produce any cash tax benefits, requiring a higher cash investment without being able to utilize accelerated tax depreciation to reduce the tax bill. Both consequences of

a normalization violation and the inability to utilize accelerated depreciation increase the WACC and negatively impact customers.

Q36. Does I&M's position on the stand-alone NOLC rest entirely on normalization requirements and the adverse impacts of a normalization violation?

No. Absent the normalization requirements there are still sound reasons that the Company should include a NOLC on a stand-alone basis. The income taxes included in ratemaking should be based only on the revenue and expenses included in the revenue requirement of the utility. There should not be revenues or expenses included in the Company's rate filing unrelated to the Company that influence the income taxes. This is simply a sound ratemaking concept.

The stand-alone NOLC also insures that there is no cross-subsidization of affiliates. The benefits and burdens of affiliate companies should have no bearing on the rates that I&M charges its customers.

Furthermore, the use of a stand-alone NOLC aligns the reduction to rate base for ADFIT with the deferred tax expense that has been included in the rates charged to customers. Including an ADFIT that includes the impact of a tax sharing agreement breaks the inherent connection between the deferred tax expense included in rates and the ADFIT that reduces rate base.

VIII. Private Letter Ruling

Q37. Mr. Garrett states (p. 14) the Company "is not seriously concerned about a normalization violation" because it has not yet informed the IRS of its potential violation nor sought a PLR. Please respond.

This speculation is not accurate. The Company did a thorough examination and analysis of the guidance provided by the IRS on the topic, including the PLRs referenced in my direct testimony. It also consulted nationally recognized

experts in the field to independently analyze the IRS' guidance. We undertook this research because the Company was concerned that there was an inadvertent normalization violation. After this analysis, it was determined that there was a preponderance of evidence to support the Company's position.

As explained above, the IRS safe harbor allows a company to cure an inadvertent violation at its "Next Available Opportunity", which is this rate case. Because the inadvertent violation was discovered as we were preparing this case, I&M is reasonably focused on curing the issue and has not sought a PLR from the IRS.

Q38. Have any AEP affiliates sought a PLR to support their case for a stand-alone NOLC?

Yes. Southwestern Electric Power Company (SWEPCO) has filed a PLR with the IRS. As of the date of filing this rebuttal testimony, the Public Service Company of Oklahoma (PSO) is in the process of drafting and filing its own PLR request.

Q39. IG witness Gorman (p. 45) recommends that if the IRS returns a PLR affirming the Company's position on the stand-alone NOLC, the Commission "should conduct an investigation as to whether the consolidated tax agreement provides benefits to ratepayers sufficient to justify I&M's continued participation." Please respond.

I disagree that such an investigation is necessary or warranted. AEP's consolidated tax sharing agreement has been in place for many years and has provided for affiliates of the consolidated return to pay only their liability as if they were filing a return on a stand-alone basis.

As discussed earlier in my testimony, the tax sharing agreement benefits customers in that it creates economies of scale related to the processing and filing of a tax return. The agreement also provides a non-tax benefit to

customers in the form of cash receipt for losses that would otherwise not be available when filing a stand-alone return.

The tax sharing agreement also guarantees that “no member of the consolidated group shall be allocated a federal income tax greater than the federal income tax computed as if such member had filed a separate return”, meaning that I&M is no worse off than it would be absent the tax sharing agreement.

Q40. If the Commission adopts Mr. Gorman’s recommendation on page 45 to direct the Company to request a PLR, how do you recommend mitigating a normalization violation while waiting for a PLR?

If Mr. Gorman’s alternative recommendation is adopted, it is important that I&M be granted appropriate accounting authority to mitigate the potential of a normalization violation while awaiting further IRS guidance.

More specifically, the Company recommends the Commission authorize I&M to establish a regulatory asset for the return that would be associated with the inclusion of the proposed NOLC adjustment in the calculation of ADFIT in I&M’s capital structure, as well as the cost of service impact of the proposed NOLC impact to the net excess ADFIT amortization. The accrual of this regulatory asset will have an effective date equal to the effective date of the rates being implemented in this proceeding. I&M will be authorized recovery of that regulatory asset through the Tax Rider over a twelve-month amortization period upon receipt of an IRS determination that removal of the proposed NOLC ADFIT from the calculation of the capital structure constitutes a normalization violation. If the IRS determines that such removal does not constitute a normalization violation, the regulatory asset will be written-off and not recovered from customers.

IX. Updated Tax Calculations

Q41. Have adjustments been made since the filing of this case?

Yes. Substantive adjustments were required related to the stand-alone NOLC as a part of ADFIT, accounts included as a reduction to ADFIT, and the parent savings benefit included as a reduction to the Jurisdictional Cost of Service (JCOS). Please see Attachment JMC-3R for a comprehensive list of adjustments since filing the case.

During discovery, it was determine that ADFIT accounts not related to regulated operations were inadvertently included in the ADFIT balance as a reduction to rate base. The accounts combined were a $4.6M DTA, detrimentally impacting the ADFIT balance included as a reduction to capital. As such, the non-utility accounts have been removed, resulting in a $4.6M increase to ADFIT.

In addition, there were two substantive changes to the stand-alone NOLC. Firstly, taxable income related to an unregulated subsidiary of I&M are included in the tax return. In order to calculate the regulated stand-alone NOLC, the taxable income or losses related to this entity must be removed from the computation. Secondly, the forecasted taxable income for 2021 and 2022 were not updated for the forecasted operations included in this case filing. Attachment JMC-1R includes the updated computation of the stand-alone NOLC. For the Test Year ended December 31, 2022, this had a cumulative impact of $36.5M additional DTA, a reduction to ADFIT and increase to WACC.

During discovery, it was also determined that the parent savings benefit in tax expense was not computed correctly. As such, an updated computation was prepared and provided in discovery. Please see Attachment JMC-2R for an update to WP-IM-8 Parent Company Net Interest Benefit. This results in a decrease to Total Company CFIT of $2.2M and Indiana of $1.6M.

Other impacts to the JCOS also occurred, as a flowthrough from the change in the computation of the NOLC. These adjustments are listed in Attachment JMC-3R and minimally impact ADFIT, JCOS, and the Tax Rider.

Q42. Does this conclude your pre-filed verified rebuttal testimony?

Yes.

VERIFICATION

I, Jessica M. Criss, Tax Accounting and Regulatory Support Manager of American Electric Power Service Corporation, affirm under penalties of perjury that the foregoing representations are true and correct to the best of my knowledge, information, and belief.

Column A		Column B
Description	FERC Account No.	Total Company
Increase rate base to include the stand-alone Net Operating Loss ("NOL") Deferred Tax Asset ("DTA") and Protected Excess ADIT balance related to the NOL as 12/31/2017, the date of Tax Cuts and Jobs Act ("TCJA"), and decrease Protected Amortization expense due to offsetting protected excess benefit related to the NOL.		
2017 - Pre TCJA		
Entry to reflect Stand Alone NOL as of 12.31.17		
	1901001	$ 355,716,775
	Debt/Equity	$ (355,716,775)
2017 - Post TCJA		
Entry to reflect remeasurements of NOL and corresponding deficient deferred taxes		
	1901001	$ (142,286,710)
	2821001	$ 142,286,710
	2824001	$ (142,286,710)
	1904001	$ (51,166,301)
	2544001	$ 193,453,011
Entry to remove remeasurements related to consolidated NOLC (original 12.31.17 plus Amended Return)	2831001	$ (10,248,391)
	2834001	$ 10,248,391
	1904001	$ 3,685,321
	2544001	$ (13,933,712)
	Debt/Equity	$ 10,248,391
2018 through Forecasted 2022 Activity		
Entry to recognize NOL utilized 2018 through end of test period activity		
	1901001	$ (132,687,902)
	Debt/Equity	$ 132,687,902
Adjustment to Test Year Protected Amortization		
Entry to reflect reduced amortization of Protected Excess for 12 Month Test Period		
	2544001	$ (7,353,697)
	4101001	$ 5,408,721
	2821001	$ (5,408,721)
	2824001	$ 5,408,721
	1904001	$ 1,944,976
Adjustment to Test Year Unprotected Amortization		
Entry to reflect change in amortization of Unprotected Excess in order to comply with Cause No. 44967 of total excess amortization of $29.9M. Unprotected EADIT is fully amortized as of August 2021.	2544001	$ (4,384,485)
	4101001	$ 3,224,834
	2831001	$ (3,224,834)
	2834001	$ 3,224,834
	1904001	$ 1,159,650
Adjustment to Pre-Test Year Protected Amortization		
Entry to reflect reduced amortization of Protected Excess for activity in 2018 through Forecasted 2021.		
	2544001	$ (22,446,306)
	Debt/Equity	$ 16,509,493
	2821001	$ (16,509,493)
	2824001	$ 16,509,493
	1904001	$ 5,936,814
Adjustment to Pre-Test Year Unprotected Amortization		
Entry to reflect increased amortization of Unprotected Excess in order to comply with Cause No. 44967 of total excess amortization of $29.9M.	2544001	$ 12,631,512
	Debt/Equity	$ (12,631,512)
	2831001	$ 9,290,609
	2834001	$ (9,290,609)
	1904001	$ (3,340,903)
Total Company NOLC Forecasted as of 12/31/2022		**$ 384,486,494**
Total Company DTA Related to NOLC Forecasted as of 12/31/2022		**$ 80,742,164**
Total Adjustment to WACC as of 12/31/2022		**$ 202,614,729**

I. INTRODUCTION

Q. WILL YOU PLEASE STATE YOUR NAME, BUSINESS ADDRESS AND POSITION?

A. Yes. My name is Allyson M. Keaton. My business address is 1 Riverside Plaza, Columbus, Ohio 43215. My position is Tax Analyst Principal – Tax Accounting and Regulatory Support for American Electric Power Service Corporation (AEPSC), a wholly-owned subsidiary of American Electric Power Company, Inc. (AEP).

Q. PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND AND WORK EXPERIENCE.

A. I earned a Bachelor of Science Degree in Accounting from Mount Vernon Nazarene University in 1998. I earned a Masters of Taxation Degree from Capital University Law School in 2006. I began my career in FirstEnergy Corporation's tax department in June 1998. In August 2002, I joined AEP as a Tax Analyst III. I was promoted to Tax Analyst II in 2006, and in 2014 I was promoted to Tax Analyst I. In 2016, my title became Tax Analyst Sr. I was promoted to Tax Analyst Principal in 2019, which is my current position.

Q. HAVE YOU PREVIOUSLY FILED TESTIMONY?

A. Yes. Although this is the first time I have filed testimony before the Arkansas Public Service Commission (APSC), I have previously filed testimony before the Virginia State Corporation Commission and before the Kentucky Public Service Commission.

II. PURPOSE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

A. My responsibilities are to present Southwestern Electric Power Company's (SWEPCO or the Company) total company federal and state tax information.

Q. HAVE YOU INCLUDED ANY DIRECT EXHIBITS IN CONNECTION WITH YOUR TESTIMONY?

A. Yes, the direct exhibit I have included in connection with my testimony is listed in the index to my testimony.

Q. DO YOU SPONSOR OR CO-SPONSOR ANY MINIMUM FILING REQUIREMENT (MFR) SCHEDULES REQUIRED BY SECTION 8 OF THE APSC RULES OF PRACTICE AND PROCEDURE?

A. Yes, I sponsor or co-sponsor the following Minimum Filing Requirements (MFR) schedules filed in this proceeding: C-8 Taxes Other than Income Taxes, C-9 Investment Tax Credits, C-10 Accumulated Deferred Income Taxes (ADIT), C-11 Calculation of Current Income Tax Expense, and C-12 Calculation of Deferred Income Tax Expense. The adjustments I sponsor are on a total company basis.

III. MFR SCHEDULES AND PRO-FORMA ADJUSTMENTS

Q. ARE ANY PRO-FORMA ADJUSTMENTS PROPOSED TO THE TEST YEAR AMOUNTS CONTAINED IN VARIOUS MFR SCHEDULES YOU SPONSOR OR CO-SPONSOR?

A. Yes. The Company proposes various pro-forma adjustments to the rate base MFR schedules, the test year income statement MFR schedules and the cost of capital MFR

schedules. I support federal and state tax pro-forma adjustments, while other SWEPCO witnesses support the remainder of the pro-forma adjustments.

A. Rate Base Pro-Forma Adjustments

Q. WHAT RATE BASE PRO-FORMA ADJUSTMENTS ARE YOU SPONSORING?

A. I am sponsoring the accumulated deferred income tax (ADIT) rate base pro-forma adjustments.

Q. PLEASE EXPLAIN THE RATE BASE ADJUSTMENTS YOU SPONSOR OR SWEPCO IS PROPOSING.

A. The Company is including a stand-alone net operating loss carryforward (NOLC) deferred tax asset of $78,455,337. The Company has utilized the stand-alone approach for ratemaking purposes historically in Arkansas, including Docket 19-008-U. This adjustment represents the taxable losses the Company incurred and does not include depreciation deductions related to the Turk Plant (Turk). The Company excluded all Statements of Financial Accounting Standards (SFAS) 109 balances as of April 30, 2021, consistent with Docket No. 19-008-U.

B. Income Statement Pro-Forma Adjustments

Q. PLEASE EXPLAIN THE PRO-FORMA INCOME STATEMENT TAX ADJUSTMENTS THE COMPANY IS PROPOSING.

A. The Company is proposing three pro-forma income statement tax adjustments:

1. Payroll tax adjustment which reduces payroll tax expenses related to the payroll, incentive compensation plan, and long-term incentive compensation plan adjustments.
2. The ad valorem adjustment that utilizes an effective ad valorem tax rate based upon plant balances at January 1, 2020 and actual ad valorem tax liability for the year 2020. This effective ad valorem tax rate is then applied to the Company's requested plant in service. The ad valorem tax adjustment also removes Turk expense from the cost of service.
3. Federal and state income tax adjustments are synchronized with the Company's adjusted operating revenues and expenses. The income tax expense also includes a $16,484,367 credit for amortization of protected excess ADIT. This amortization is based upon the current corporate federal income tax rate of 21%. The ADIT credit for amortization of Arkansas unprotected ADIT is zero because it has been refunded to customers.

C. Cost of Capital Pro-Forma Adjustments

Q. WHAT TAX COMPONENTS HAVE YOU INCLUDED IN DETERMINING THE COMPANY'S WEIGHTED AVERAGE COST OF CAPITAL?

A. The Company has included ADIT, and accumulated deferred investment tax credits (ADITC) as detailed in the MFRs.

Q. HOW ARE ADIT AND ADITC TREATED IN THE ARKANSAS FILING COMPARED TO OTHER SWEPCO JURISDICTIONS?

A. ADIT and ADITC are zero cost elements of the Capital Structure in Arkansas. They are components of the Cost of Capital in Schedules D-1.2 and D-1.3. In other SWEPCO jurisdictions, ADIT and ADITC are offsets to rate base.

Q. PLEASE EXPLAIN THE PRO-FORMA ADJUSTMENTS TO ADIT.

A. The primary adjustment to ADIT relates to the removal of Turk ADIT of $227,449,030 in the pro-forma test year. In addition, the associated excess ADIT for Turk of $156,245,746 was excluded from other current, accrued and other liabilities. These and other adjustments are consistent with those included in Docket 19-008-U.

IV. POSSIBLE FEDERAL STATUTORY TAX RATE CHANGE

Q. COMPANY WITNESSES THOMAS P. BRICE AND JASON M. YODER DISCUSS THE COMPANY'S PROPOSED TREATMENT OF ANY SUBSEQUENT CHANGE IN THE FEDERAL STATUTORY TAX RATE. HAVE YOU PREPARED AN ILLUSTRATIVE CALCULATION OF HOW A HYPOTHETICAL INCREASE TO A 28% TAX RATE WOULD IMPACT THE COMPANY'S INCOME TAX EXPENSE?

A. Yes. As discussed by Company witnesses Brice and Yoder, an increase in the federal statutory rate would cause changes to the following: current and deferred federal income tax expense, ADFIT, and the excess ADFIT regulatory liability. Please see DIRECT EXHIBIT AMK-1 for an example of how those items would change based on an assumed 28% corporate tax rate.

Q. IS A CHANGE IN CURRENT AND DEFERRED INCOME TAX EXPENSE INCLUDED IN THIS PROCEEDING'S COST OF SERVICE THE ONLY ITEMS THAT WOULD BE IMPACTED IF THE CORPORATE INCOME TAX RATE IS INCREASED?

A. No, it is not. As noted earlier, SWEPCO has refunded all of its unprotected excess income taxes to Arkansas customers. Should the corporate income tax rate increase, SWEPCO would have an unprotected excess income deficiency regulatory asset as described by SWEPCO witness Yoder. In addition, the amount of protected excess income tax refund included in this case would be overstated. Please see DIRECT EXHIBIT AMK-1 for an example of that overstatement assuming a 28% corporate income tax rate.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes, it does.

CERTIFICATE OF SERVICE

The undersigned hereby certifies that a copy of the foregoing Direct Testimony was electronically served upon all parties of record via the Commission's EFS system on this 23rd day of July 2021.

I. INTRODUCTION

Q. WOULD YOU PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.

A. Yes. My name is Allyson M. Keaton. My business address is 1 Riverside Plaza, Columbus, Ohio 43215. My position is Tax Analyst Principal – Tax Accounting and Regulatory Support for American Electric Power Service Corporation (AEPSC), a wholly owned subsidiary of American Electric Power Company, Inc. (AEP).

Q. ARE YOU THE SAME ALLYSON M. KEATON WHO PREVIOUSLY PROVIDED DIRECT TESTIMONY IN THIS DOCKET?

A. Yes I am.

II. PURPOSE OF REBUTTAL TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

A. The purpose of my Rebuttal Testimony is to address the positions of the Arkansas Public Service Commission (APSC or Commission) General Staff (Staff), the Office of the Attorney General (AG), and Western Arkansas Large Energy Consumers (WALEC) concerning:

1. The Company's stand-alone net operating loss carryforward (NOLC) deferred tax asset of $78,455,337,
2. Arkansas' state tax rate of 5.9% for year 2022,
3. Staff's jurisdictional income tax calculation; and
4. Turk accumulated deferred federal income taxes (ADFIT) and Excess ADFIT Balances.

Q. ARE YOU SPONSORING ANY EXHIBITS WITH YOUR TESTIMONY?

A. Yes. I sponsor the following Rebuttal Exhibits:

REBUTTAL EXHIBIT AMK-1	Private Letter Ruling 201828010
REBUTTAL EXHIBIT AMK-2	Private Letter Ruling 201709008
REBUTTAL EXHIBIT AMK-3	Private Letter Ruling 201548017

REBUTTAL EXHIBIT AMK-5	Private Letter Ruling 201519021
REBUTTAL EXHIBIT AMK-6	Private Letter Ruling 201438003
REBUTTAL EXHIBIT AMK-7	Private Letter Ruling 201436037
REBUTTAL EXHIBIT AMK-8	Income Tax Calculation
REBUTTAL EXHIBIT AMK-9	Turk ADFIT

Q. DOES THE FACT THAT YOU MAY NOT ADDRESS AN ISSUE OR POSITION ADVOCATED BY OTHER PARTIES INDICATE THAT YOU AGREE WITH THEIR POSITIONS?

A. No. The fact that I do not address an issue does not mean I agree with any filed position.

III. NORMALIZATION OF NET OPERATING LOSSES EXPLANATION

Q. WHAT IS A NET OPERATING LOSS?

A. A net operating loss (NOL) occurs when, in a given year, a taxpayer has more tax deductions than taxable revenues. In other words, a tax loss. When an NOL occurs, the Internal Revenue Code (Code) allows the taxpayer to carry the NOL forward to subsequent years and offset taxable income produced in that future year.

Q. ARE THERE NORMALIZATION REQUIREMENTS INCLUDED WITHIN THE CODE?

A. Yes. The Code and accompanying treasury regulations provide normalization requirements in three specific areas: 1) Accelerated depreciation and the associated

deferred tax liability that results from its use; 2) NOL Carryforwards (NOLC) resulting from accelerated depreciation; and 3) Investment Tax Credits (ITC). The Code also provides penalties should a Commission/Utility violate these provisions.

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS IN THE CODE AS IT RELATES TO ACCELERATED DEPRECIATION?

A. The Code dictates that a regulated public utility must use the normalization method of accounting to calculate tax expense on temporary differences associated with accelerated depreciation when determining rates using a cost of service/rate of return methodology. 26 U.S. Code §168(i)(9)(A) states that in order for a public utility to be considered to be using a normalized method of accounting:

> (i) the taxpayer must, in computing its tax expense for purposes of establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, use a method of depreciation with respect to such property that is the same as, and a depreciation period for such property that is no shorter than, the method and period used to compute its depreciation expense for such purposes, and
>
> (ii) if the amount allowable as a deduction under this section with respect to such property (respecting all elections made by the taxpayer under this section) differs from the amount that would be allowable as a deduction under section 167 using the method (including the period, first and last year convention, and salvage value) used to compute regulated tax expense under clause (i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS AS THEY RELATE TO A NOLC?

A. This is specifically addressed in Treasury Regulation § 1.167(*l*)-1(h)(1)(iii), which states:

> If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (l) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover (as determined under section 172)

> to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (l) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Although neither the Code nor the regulations specifically address the manner in which the NOLC should be treated in ratemaking under the normalization rules, the IRS has addressed this issue in several private letter rulings (PLRs). PLRs 201436037, 21438003, 201519021, 201534001, 201548017, 201709008, and 201828010 clarify that a tax calculation with and without accelerated depreciation is used to determine the amount of the NOLC accumulated deferred federal income tax (ADFIT) required to be normalized.[1] Since Arkansas includes ADFIT in cost of capital at zero costs, the amount of ADFIT included in the capital structure should be reduced by the NOLC.

Q. WHAT IS THE RATIONALE FOR THIS TREATMENT OF THE NOLC ADFIT?

A. When a regulated utility experiences a NOLC, the taxpayer has not yet received the benefit of the depreciation-related ADFIT, i.e., there is no interest free loan or zero cost of capital from the federal government. Accordingly, the ADFIT cost free capital is deferred until the NOLC is utilized and the zero cost of capital loan is extended.

Q. PLEASE DESCRIBE THE CONCLUSIONS IN THE PLRS MENTIONED ABOVE.

A. The PLRs mentioned above confirm that NOLC ADFIT must be included in rate base to avoid a normalization violation. They describe the NOLC as a necessary reduction to the rate base impact of the deferred tax liability associated with accelerated depreciation.

[1] The PLRs are included as REBUTTAL EXHIBITS AMK-1 – AMK-7.

Further, the PLRs prescribe either one of two approaches for determining the amount of the NOLC ADFIT that must be included in rate base: a "with-and-without" or "last dollar deducted" approach. Both of these approaches look at the hypothetical taxable income of the "utility," not a utility's affiliates, without the deductions for accelerated depreciation. The extent to which an NOLC is then attributable to accelerated depreciation must be included in ADFIT to avoid a normalization violation. The PLRs all contain language very similar to the following:

> Because the [ADFIT] account [Account 282], the reserve account for deferred taxes, reduces rate base, it is clear that the portion of an NOLC that is attributable to accelerated depreciation must be taken into account in calculating the amount of the reserve for deferred taxes [(ADFIT)]…
>
> The "with or without" [or "last dollar deducted"] methodology employed by Taxpayer is specifically designed to ensure that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated depreciation to ratepayers[2]

IV. NOLC ACCOUNTING PRESENTATION

Q. DOES THE COMPANY HAVE A NOLC RECORDED ON ITS FINANCIAL BOOKS AND RECORDS AT THE END OF THE TEST YEAR?

A. No. The books and records of the Company match the financial reports provided to the Federal Energy Regulatory Commission (FERC). FERC requires the "parent company down" approach for financial reporting purposes.[3] In the parent company down method, the allocation of taxes is calculated by applying a pro-rata allocation of a member's attribute (i.e., taxable income, pre-tax book earnings, etc.) to that of the consolidated

[2] Bracketed entry added for clarity.

[3] FERC Guidance AI93-5-000.

group's attribute. While FERC requires this parent down approach for financial reporting purposes, it established as precedent a stand-alone method for the income tax allowance within the cost of service for each individual regulated utility in Opinion No. 173.[4] On the topic of tax allocation agreements, the FERC opinion states the following:

> The important thing about these alternative methods of allocating the consolidated tax liability is that they are elective. A group can choose any one of them. Hence to treat the amounts allocated to members for tax purposes as the member's actual tax costs for ratemaking purposes would mean the tax allowance of a regulated member of an affiliated group would be determined by the election of the group. Thus, the rates charged to ratepayers of different companies could vary considerably because of the way the members of the groups have chosen to adjust their earnings and profits. As a policy matter, we think that is unacceptable.

As you can see, FERC requires one method for financial reporting that includes the impact of a consolidated income tax return but requires a different method for ratemaking, which ignores the consolidated return. The Company's proposal in this rate case is consistent with FERC and IRS normalization provisions under the Code.

Generally Accepted Accounting Principles **(**GAAP) allows a utility to use one of several methods in determining income taxes in the separate financial statements of the members of a consolidated tax return group. ASC 740-10-30-27 (ASC 740) does not require the use of any particular allocation method and only requires that the method adopted be systematic, rational, and consistent with the broad principles of ASC 740. The members of the AEP consolidated federal income tax return (consolidated return group) have elected the method of tax allocation that follows a "parent company down" method for GAAP reporting. Accordingly, Southwestern Electric Power Company

[4] Columbia Gulf Transmission Company; Docket No. RP75-105-002.

(SWEPCO or the Company) does not have a NOLC recorded on its financial books and records at the end of the test year because the AEP consolidated return group has produced taxable income sufficient to offset the losses contributed by SWEPCO. In other words, the GAAP financial statements of SWEPCO reflect its proportionate share of the AEP consolidated return group's NOLC. For ratemaking purposes, however, it is necessary to reflect the NOLC generated strictly based on SWEPCO's stand-alone taxable income.

The AEP consolidated return group's method of accounting for allocating the taxes of a consolidated group under GAAP is an *accounting policy election.* However, for ratemaking purposes, the Company (consistent with prior rate cases) calculates "income tax expense" on a stand-alone basis. Stand-alone ratemaking and normalization rules require the inclusion of the NOLC deferred tax asset in the SWEPCO ADFIT balance included as zero cost of capital in the capital structure.

Q. YOU MENTION ABOVE THAT ASC 740 DOES NOT REQUIRE THE USE OF ANY PARTICULAR ALLOCATION METHOD. ARE THERE OTHER WAYS IN WHICH A COMPANY CAN RECORD THE TAXES RELATED TO THE CONSOLIDATED RETURN GROUP WHILE STILL BEING PAID BY THE PARENT FOR ITS LOSSES?

A. Yes. One common alternative to the "parent company down" method is known as the "separate-return" method. One member of the consolidated filing group, typically a parent, will pay a separate or carve-out entity for temporary difference deferred tax assets (DTA) each period as they arise. In this case, the separate entity would recognize DTAs associated with the tax attributes (in this situation, a NOLC). This is premised on the

fact that, under the separate-return method, income taxes are allocated to the separate financial statements in accordance with ASC 740 as if the separate reporting entity had filed a separate tax return. Thus, instead of reducing the NOLC, the utility would record this cash receipt from its parent just like it records other cash receipts, as equity.

Q. HOW DOES THE EXISTENCE OF ALTERNATIVE CONSOLIDATED ACCOUNTING METHODS RELATE TO THE CONCERN RAISED BY WALEC THAT THE COMPANY DID NOT RECORD A NOLC ON ITS FINANCIAL BOOKS AND RECORDS?

A. As shown below in greater detail, alternative consolidated accounting approaches would result in a difference in how the NOLC is reported on the Company's books for financial purposes. However, it is a long-standing principle that ratemaking should be calculated on a stand-alone basis in order to mitigate the potential issue of ratemaking outcomes differing depending on differences in financial reporting.

On the topic of tax allocation agreements, FERC recognized that the various methods allowed by the Internal Revenue Code (IRC) and regulations can be quite different and that one method could produce the opposite result of another.[5] As FERC explained, these differences in financial allocations should not lead to disparate ratemaking results:

> There are, however, two reasons we cannot treat the allocation used for tax purposes as the pipelines' actual tax costs for cost of service purposes. First, the Code [IRC] and regulations require an allocation of the consolidated tax liability to determine each member's "earnings and profits." This, in turn, is necessary to determine whether a distribution is a taxable dividend or a tax-free return of capital.
>
> So the allocation is required to administer the revenue laws. It has no other

[5] Columbia Gulf Transmission Company; Docket No. RP75-105-002.

> effect. It does not determine what each member pays to the parent to help discharge the liability. Nor does the allocation attempt to ascertain the tax costs of a member for ratemaking, or any other, purpose. Hence, we think the allocation a consolidated group reports for tax purposes is simply too far removed from the issues before us to warrant its adoption as the allocation to be used for cost of service purposes.

WALEC's approach of focusing solely on the method of allocating the consolidated tax liability would result in the variation in rates that FERC avoids by using a "stand-alone" approach.

Q. PLEASE EXPLAIN HOW WALEC'S APPROACH (I.E. BASING RATEMAKING RESULTS SOLELY ON THE FINANCIAL BOOKS) WOULD RESULT IN DIFFERENT RATES CHARGED TO CUSTOMERS DEPENDING ON THE METHOD CHOSEN.

A. Let's compare the following three hypothetical examples:

Example 1: Utility A is a stand-alone entity operating on its own and files its own tax return. Utility A has taxable losses of ($1,000) and assuming that this loss is not due to tax specific deductions, this would result in a deferred tax benefit of ($210). The following illustrates the accounting for the taxes of Utility A:

Stand-Alone Tax Computation

Utility A	Debit	Credit	
Deferred Tax Expense		210	Record Deferred Tax Benefit
Deferred Tax Asset - NOLC	210		Record DTA

In this example, the tax entries of $210 deferred tax benefit would be included as a reduction to rates in Utility A's cost of service. The $210 DTA related to the NOLC would be included as a decrease to ADFIT included in ratemaking. In this example, ratemaking would match the financial reporting.

Example 2: In the following example, assume that Utility A now participates in a consolidated return filing, all other affiliates have income, and the consolidated group is in a taxable income position. This affiliate group has elected to utilize the Parent Company Down method for recording their allocation of the tax liability. In addition, Utility A has agreed to participate in a tax sharing agreement, which dictates that cash will be paid to loss affiliates in the amount that offsets the consolidated group's tax liability. This cash will be paid by income affiliates for their stand-alone tax liability. The following illustrates the accounting for taxes of Utility A:

Consolidated Income Tax Utilizing Parent Company Down

Utility A	Debit	Credit	
Deferred Tax Expense		210	Record Deferred Tax Benefit
Deferred Tax Asset - NOLC	210		Record DTA
Deferred Tax Asset - NOLC		210	Reduce DTA for losses utilized in consolidation
Cash	210		Receipt of Cash for Losses from affiliates

This demonstrates that Utility A continues to have $210 deferred tax benefit included as a reduction to rates in its cost of service. However, the allocation methodology dictates that the NOLC included on their financial books and records reflect the attributes of the consolidated return and therefore the DTA NOLC is reduced to $0 and not included as a decrease to ADFIT as included in ratemaking. This is the methodology in which the Company has elected to use to allocate taxes from the consolidated return group and participates in a tax sharing agreement whereby the Company is paid for its losses and when in an income position, pays its own stand-alone liability which then AEP distributes to other affiliates for their losses.

Example 3: In this final example, assume that Utility A is still part of a consolidated return filing, but the affiliate group has elected to use the Separate Return method for

recording their allocation of the tax liability. In addition, Utility A has agreed to participate in a tax sharing agreement, which dictates that cash will be paid to loss affiliates in the amount that offsets the consolidated group's tax liability. This cash will be paid by income affiliates for their stand-alone tax liability. The following illustrates the accounting for taxes of Utility A:

Consolidated Income Tax Utilizing Separate Return Method

Utility A	Debit	Credit	
Deferred Tax Expense		210	Record Deferred Tax Benefit
Deferred Tax Asset - NOLC	210		Record DTA
Equity		210	Adjustment to Equity for losses utilized in consolidation
Cash	210		Receipt of Cash for Losses from affiliates

The illustration above demonstrates that Utility A continues to have $210 deferred tax benefit included as a reduction to rates in their cost of service. In addition, the DTA NOLC is still reflected as a decrease to ADFIT as included in ratemaking and would have a higher equity balance.

All three examples above show that the impact on a utility's financial books and records depends on the tax allocation accounting policy selected. If ratemaking followed the financial records *only*, as WALEC proposes, rates calculated and charged to customers would differ depending on the choice each utility makes, which is not appropriate. WALEC's proposal also ignores the economic realities of the tax allocation, which is that the receipt of cash from the Company's parent is an equity infusion, and creates operational risk for both the Company and its affiliates. The Company's approach, which determines income tax expense, ADFIT, accumulated deferred investment tax credit (ADITC), and NOLC on a stand-alone basis, properly ensures that only the taxes associated with revenues and expenses of the Company's rate regulated operations and assets are included in the rate filing. The

Company's approach also ensures that, regardless of the method elected for the consolidated tax filing and financial reporting (or even whether the utility participates in a consolidated tax filing), the resulting ratemaking impact is identical.

V. NET OPERATING LOSS CARRYFORWARD (NOLC)

Q. STAFF WITNESS MIDDLETON RAY AND AG WITNESS GREG R. MEYER STATE IN THEIR DIRECT TESTIMONIES THAT THE COMPANY RECEIVED PAYMENT FOR ITS NOL CARRYFORWARD AND THEREFORE SHOULD NOT REFLECT THE NOLC IN THE COMPANY'S CAPITAL STRUCTURE. CAN YOU DISCUSS?

A. Yes. Through the tax sharing agreement, those companies with taxable income make tax payments to AEP, Inc. (Parent) equal to their separate return liability. To the extent that the income from these companies can be offset by losses generated by other affiliates, Parent makes a distribution to the loss companies (e.g., the Company). In other words, Parent is making an investment in the loss company, which in this case is SWEPCO. These distributions to companies with losses is entirely dependent upon having affiliate companies with taxable income. The receipt of a distribution through the tax sharing agreement is entirely outside of the scope of the regulated operations of the Company and is not based on the rendition of utility services to its customers. In fact, it relies upon taxable income generated through the rendition of services by affiliate companies and a tax sharing agreement that allows Parent to invest in a loss company.

Q. DOES THE IRS ISSUE REFUNDS OR PAYMENTS TO COMPANIES THAT INCUR A TAXABLE LOSS?

A. No. A taxpayer is only able to seek a refund to the extent that is has overpaid its income tax liability. A taxable loss does not result in a negative tax liability in the current year; therefore, the IRS would not issue a refund. A taxpayer that incurs a loss may however carry that loss forward to offset future taxable income. This loss carryforward results in the NOLC deferred tax asset in question in this case.

Q. IF THE COMPANY WERE NOT PART OF THE CONSOLIDATED RETURN GROUP, WOULD IT HAVE RECEIVED PAYMENTS FOR ITS NOLC?

A. No, it would not have. The only reason that the Company was able to receive payments for its NOLC is due to its membership in the consolidated return group with a tax sharing agreement. Moreover, it also would not have received payments if affiliates within the consolidated return group had not produced taxable income. The payments from Parent are entirely dependent upon the financial position of affiliate companies.

Q. STAFF AND WALEC WITNESS GARRETT NOTE THAT INCLUDING THE NOLC IN ADFIT AFTER RECEIVING PAYMENTS FROM THE TAX ALLOCATION AGREEMENT WOULD DUPLICATE OR DOUBLE COUNT ITS EFFECT ON CAPITAL, THUS UNDERSTATING ADFIT AND RESULTING IN AN OVERSTATEMENT OF THE RATE OF RETURN. DO YOU AGREE?

A. No, I do not. Simply put, there is no double counting of the NOLC for ratemaking purposes in the Company's rate request. While it is true that the Company received payments from AEP through its affiliates for the use of the NOLC under the AEP tax sharing agreement, it is also true that those cash payments have had no bearing on the deferred tax expense included in rates. As the ADFIT in the capital structure is by

definition the accumulation of deferred tax expense, it does not stand to reason that the cash received through the AEP tax sharing agreement should have an impact on ADFIT when it had no impact on deferred tax expense.

Staff and WALEC's position ignores the economic realities of the NOLC ADFIT and the tax sharing payments. The Company's rate base represents only those assets that are used and useful in providing utility service. The Company used the cash payments from its parent just like an equity infusion, to fund assets that are used and useful in providing utility service. In other words, there is no extra cost free ADFIT capital resulting from the tax sharing payment and no double counting. In the end, the tax sharing agreement payments are no different from an equity infusion from the Company's parent, for which the equity investor should be compensated with a return. The fact that this cash was provided by AEP and not by customers is not in dispute in this case. What is in dispute is whether this cash payment should get a reasonable return, as expected by investors or no return at all. By including the NOLC ADFIT in the capital structure, the Company is simply requesting a return on the cash infusion from AEP until such time that the operations of the Company generate sufficient taxable income to absorb its own taxable losses and it no longer has a stand-alone NOLC.

There is no "extra" cost free ADFIT capital resulting from the tax allocation payment received under the tax sharing agreement and no "double counting" of benefits.

Q. WALEC STATES THAT THE COMPANY HAS IGNORED THE NOLC STAND-ALONE ISSUE FOR THE PAST 12 YEARS. DO YOU AGREE?

A. No. Normalization rules are complex in nature. Inconsistencies are hard to identify and are not always immediately obvious. The Company did a thorough examination and

analysis of the guidance provided by the IRS on the topic. It consulted nationally recognized experts in the field and asked them to independently analyze the IRS guidance as well.

This particular normalization inconsistency relates to the interaction and differences between ratemaking and financial reporting, adding additional complexity. For example, an audit of AEP's tax returns would not immediately bring to light any normalization issues included in rate cases. The IRS does not audit rate cases. Normalization inconsistencies are typically brought to the attention of the IRS via a company or commission seeking additional guidance. The Company identified the normalization inconsistency while preparing for the latest Texas base case filed in 2020. Because of the risk identification, the Company is now using its next available opportunity by seeking a correction of inconsistency with the request for rates in this base case.

Q. WALEC CLAIMS THAT "IN PRACTICE" A NORMALIZATION VIOLATION IS NOT A SERIOUS PROBLEM. PLEASE RESPOND.

A. Witness Garrett's discussion on a normalization violation not being a serious problem "in practice" is regarding the IRS' practice of allowing a taxpayer to correct normalization inconsistencies. He is not referring to the actual result of a normalization violation. Normalization violations are rare because a company or regulatory commission must knowingly put into rates a practice or procedure that is inconsistent with the normalization rules.

Q. PLEASE FURTHER EXPLAIN THE CONSEQUENCES OF A NORMALIZATION VIOLATION.

A. If a company or commission knowingly puts into rates a practice or procedure that is inconsistent with normalization rules, the company will no longer be able to utilize accelerated depreciation as part of their tax return filing. This impacts ratemaking in two areas: 1) a significant reduction to the cost-free ADFIT included in the capital structure; and 2) an increase to the current tax payable.

The reduction to ADFIT will occur due to the inability to utilize accelerated depreciation. With significant deductions related to accelerated depreciation, one of the main components of ADFIT is the deferred tax liability (DTL) related to accelerated depreciation. Without accelerated depreciation, the DTL related to accelerated depreciation will eventually become $0, reducing the total cost-free ADFIT that reduces the weighted average cost of capital (WACC). As this DTL reduces over time, the WACC will increase, thus negatively impacting customer rates.

The increase to current tax payable will likewise occur due to the inability to utilize accelerated depreciation. Accelerated depreciation results in higher deductions for current tax payable and defers tax due to the future. Without accelerated depreciation, the tax payment is due now. The Company would need to borrow more cash and obtain more equity to cover the increased tax payable. Having to borrow more cash and obtain more equity will increase the cost of capital. In other words, debt and equity that have a cost, will replace ADFIT, which is cost-free.

This increase to the WACC negatively impacts customer rates. In addition, any investment in future property would not produce any cash tax benefits, requiring a higher

cash investment without being able to utilize accelerated tax depreciation to reduce the tax bill. Both consequences of a normalization violation and the inability to utilize accelerated depreciation increase the WACC and negatively impact customers.

Q. THE TESTIMONY OF WALEC CHARACTERIZES THE THREAT OF NORMALIZATION VIOLATIONS BY UTILITIES AS AN ATTEMPT TO KEEP SAVINGS THAT SHOULD GO TO CUSTOMERS. CAN YOU DISCUSS?

A. Yes. The testimony of Witness Garrett attempts to paint utilities in a dark shadow by insinuating that raising the issue of a normalization violation is a strategy used in order to keep money for the utility that should rightfully go to customers. Witness Garrett goes on further to make it appear that all instances in which normalization concerns were raised by utilities, the commissions and courts ignored those concerns and money was provided to customers with no normalization violations.

Utilities do raise the concern of normalization violations as a violation comes with very serious repercussions, as seen in REBUTTAL EXHIBITS AMK-1 - 7. The exhibits provide multiple examples in which utilities did raise the concern of a normalization violation, and the IRS ruled that the practice or procedure in question would be a normalization violation.

Q. THE TESTIMONY OF WALEC DESCRIBES THE INTRODUCTION OF A STAND-ALONE NOL IN THE CURRENT CASE AS WELL AS IN THE BASE CASES OF OTHER AEP OPERATING COMPANIES AS A "NEWLY-DEVELOPED STRATEGY".[6] PLEASE DISCUSS.

A. What Witness Garrett describes as a "newly-developed strategy," is AEP's recognition of the inconsistency with the normalization rules if a stand-alone NOLC is not included in ratemaking. Just like SWEPCO is using the current case as its first available opportunity in Arkansas to change to a practice or procedure that is consistent with the normalization rules, other AEP operating companies are using their current base case filings as their opportunity to do so too.

Q. DOES THE COMPANY'S POSITION ON THE STAND-ALONE NOLC REST ENTIRELY ON NORMALIZATION REQUIREMENTS AND THE ADVERSE IMPACTS OF A NORMALIZATION VIOLATION?

A. No. Absent the normalization requirements, there are still sound reasons that the Company should include a NOLC on a stand-alone basis. The income taxes included in ratemaking should be based only on the revenue and expenses included in the revenue requirement of the utility. There should not be revenues or expenses included in the Company's rate filing unrelated to the Company that influence the income taxes. This is simply a sound ratemaking concept, and one that is followed by FERC as discussed earlier.

[6] Direct Testimony of Mark Garrett at p. 24

The stand-alone NOLC also ensures that there is no cross-subsidization of affiliates. The benefits and burdens of affiliate companies should have no bearing on the rates that the Company charges its customers.

Furthermore, the use of a stand-alone NOLC aligns the ADFIT included in the capital structure with the deferred tax expense that has been included in the rates charged to customers. Including an ADFIT that includes the impact of a tax sharing agreement breaks the inherent connection between the deferred tax expense included in rates and the ADFIT included in the capital structure

VI. PENDING CASE IN TEXAS JURISDICTION

Q. WALEC'S TESTIMONY REFERS TO A PROPOSAL FOR DECISION IN THE COMPANY'S BASE CASE BEFORE THE PUBLIC UTILITY COMMISSION OF TEXAS (PUCT) IN DOCKET NO. 51545. PLEASE DISCUSS.

A. The Company had a base rate case before the PUCT in which the Company also requested the inclusion of a stand-alone NOLC in rate base to adhere to the normalization rules. In that case, the administrative law judges (ALJs) initially issued a proposal for decision to the PUCT rejecting the Company's request for the NOLC but recommending the Company obtain a PLR and be allowed to accrue a regulatory asset as if the impacts of the NOLC had been included in Texas retail rates.

Q. WERE THERE ANY PERTINENT DEVELOPMENTS IN THE COMPANY'S TEXAS CASE SINCE THE PROPOSAL FOR DECISION?

A. Yes. In the Company's exceptions to the ALJ's proposal for decision, the Company stated its intentions to request a PLR from the IRS on the normalization concerns that were raised in the case. The Company also requested that the PUCT include language in

the final order that would protect the Company's Texas customers and the Company from a normalization violation. The Company requested that the final order from the PUCT include one of two ordering paragraphs: 1) Authorize rates which include the requested NOLC in the revenue requirement subject to refund if the IRS were to issue a PLR that states that it would not be a normalization violation to exclude the NOLC; or 2) Authorize rates which exclude the request NOLC in the revenue requirement but authorize the Company to accrue a regulatory asset for the return on the NOLC ADFIT and the return of the NOLC excess ADFIT amortization.

Q. DID THE PUCT STAFF RESPOND TO THE COMPANY'S REQUEST TO THE PUCT FOR THE FINAL ORDER?

A. Yes, in a supplemental reply to the Company's exceptions document, the PUCT Staff supported the second alternative ordering paragraph in which the Company would be authorized to accrue a regulatory asset related to the NOLC. This regulatory asset would be recoverable if the Company receives a PLR from the IRS indicating that it would be a normalization violation to exclude the NOLC ADFIT from rate base.

Q. DID THE TEXAS COMMISSION ADOPT THE ALTERNATIVE ORDERING PARAGRAPH?

A. Yes. The ALJs stated in their Exception Letter dated November 9, 2021, they are "persuaded to adopt-in an abundance of caution-the Company's second alternative proposal for addressing the asserted risk of a normalization violation if the Company is not permitted to include the NOLC ADFIT in rate base. Namely, the Commission would authorize the Company to create a regulatory asset to track the return that would be associated with the inclusion of the NOLC ADFIT in rate base and the excess NOLC

ADFIT amortization, pending a resolution with the IRS regarding potential normalization violations." At the November 18, 2021 Open Meeting, the Texas Commission adopted the ALJ's proposal for decision as amended by the ALJs in the November 9 letter to authorize the regulatory asset. However, as of the preparation of this rebuttal, SWEPCO has not received the written order in the case.

VII. NOLC RECOMMENDATION

Q. WHAT ARE YOUR RECOMMENDATIONS FOR THE RATEMAKING FOR THE NOLC ADFIT AND NOLC EXCESS ADFIT?

A. I recommend that the Commission approve a revenue requirement requested by SWEPCO that includes the NOLC ADFIT in the capital structure as well as the amortization of NOLC excess ADFIT in the cost of service. An order including these elements will protect the Arkansas customers of SWEPCO as well as the Company from the harsh punishment that results from a normalization violation. It will also ensure that rates are set using sound ratemaking in which there is no cross-subsidization of affiliated companies. The taxes included in the rates will reflect only those associated with providing utility service to SWEPCO's customers.

Q. DO YOU HAVE AN ALTERNATIVE RECOMMENDATION?

A. Yes, I do. If the Commission is not persuaded by SWEPCO's discussion on cross-subsidization and not satisfied by SWEPCO's analysis of the normalization rules, I would recommend that the Commission include language in its final order similar to what SWEPCO requested of the PUCT in its Texas case.

I would recommend that the final order by the Commission in this case provide relief for SWEPCO and its customers from the financial implications of a normalization violation by including one of two options:

1) The rates set in this case include SWEPCO's request for the NOLC ADFIT in the capital structure as well as the NOLC excess ADFIT amortization in the cost of service. These rates would be subject to refund pending the outcome of a PLR from the IRS; or

2) The rates set in this case exclude SWEPCO's request for the NOL ADFIT in the capital structure as well as the NOLC excess ADFIT amortization in the cost of service but authorize SWEPCO to accrue a regulatory asset. The regulatory asset would include both the amount of the forgone revenue requirement for the return on the NOLC ADFIT and the NOLC excess ADFIT amortizations in the cost of service. Accrual of the regulatory asset would be aligned with the timing of the implementation of rates resulting from the case. If SWEPCO receives a PLR from the IRS stating that it would be a normalization violation to exclude the NOLC ADFIT then SWEPCO would be authorized to recover the regulatory asset. If the PLR determines that it would not be a normalization violation then the regulatory asset would be written off and SWEPCO would not seek recovery.

   Both of these options recognize the importance of complying with the normalization rules and protect customers and SWEPCO from the negative impacts that would result in not doing so.

VIII. ARKANSAS INCOME TAX RATES

Q. PLEASE EXPLAIN THE ARKANSAS STATE INCOME TAX RATES THE COMPANY USED IN THE CURRENT BASE CASE.

A. Arkansas Act 822 of the 92nd Legislative Session leads the Company to use different rates for the different periods in this case. The rates used are 6.5 percent for the eight months of May through December 2020 and 6.2 percent for the four months of January through April of 2021.

Q. DOES THE COMPANY AGREE WITH STAFF WITNESSES RAY AND TROY EGGLETON THAT THE 2022 ARKANSAS STATE INCOME TAX RATE OF 5.9 PERCENT IS KNOWN AND MEASURABLE?

A. Yes, SWEPCO agrees the test year of 12 months ended April 30, 2021 with the 12 months of known and measurable adjustments for April 2022 should include the 5.9 percent of Arkansas state income tax. The resulting total company federal and state current tax difference of including the 2022 rate is a decrease of $204,843.

IX. STAFF JURISDICTIONAL TAX CALCULATION

Q. DO YOU AGREE WITH THE STAFF'S INCOME TAX CALCULATION IN DIRECT EXHIBIT WLM-6?

A. No, I do not. Staff Witness William L. Matthews calculated Federal Income Tax with the current Federal Rate of 21% and State Income Tax with Arkansas 2022 Tax Rate of 5.9%, but included the wrong total company Excess Protected ADFIT Amortization amount. The incorrect amortization amount was based on the assumption of a 28% Federal Income Tax Rate. The correct total company amount of ($9,968,343) is in Rebuttal Schedule C WP C-12-2 and REBUTTAL EXHIBIT AMK-8.

Q. WAS THERE A CHANGE TO THE AMORTIZATION OF EXCESS DEFERRED FIT PRO FORMA YEAR AMOUNT IN REBUTTAL SCHEDULE C WP C-12-2?

A. Yes. The Excess Protected Amortization Adjustment was incorrect in the original filing and is corrected in Rebuttal Schedule C, WP C-12-2 and REBUTTAL EXHIBIT AMK-8.

X. TURK ADIT AND EXCESS ADIT BALANCES

Q. DO YOU AGREE WITH STAFF WITNESS DAN DAVES ADIT TURK ADJUSTMENT OF ($227,449,030) FOR THE COST OF CAPITAL? PLEASE EXPLAIN.

A. No. Staff is only removing part of the ADIT that is related to the Turk Plant. Due to the recovery of the Turk Plant not being approved in Arkansas and Arkansas customers not paying for the plant, all Turk Plant related amounts should be removed from the filing.

Q. PLEASE EXPLAIN THE COMPANY'S ADIT TURK AMOUNT THAT SHOULD BE REMOVED.

A. Prior to the TCJA of 2017, the deferred income taxes were all recorded as ADIT in FERC accounts 190, 282, and 283. After the TCJA, the change in the tax rate required the ADIT accounts to be restated at 21%, which required the excess ADIT to be reclassified to Account 254 regulatory liability. Both the Turk ADIT balance and the Turk excess ADIT balances included in CAOLs $227,449,030 and $156,245,746 respectively, are treated the same for ratemaking and both should be excluded related to Turk. These ADIT balances used in the Turk adjustment are further discussed in SWEPCO witness Jason M. Yoder's Rebuttal Testimony.

Q. CAN THE COMPANY DETERMINE THE AMOUNT OF ADIT SPECIFICALLY GENERATED BY THE TURK PLANT ASSETS?

A. Yes. The Company maintains a tax depreciation system for its utility assets. The Turk assets are accounted for by the plant address as a separate tax class within the tax depreciation system. The tax system maintains a book basis to tax basis reconciliation. The system accounts for additions and retirements and all normalized and permanent basis differences. The tax system accounts for ADIT provisions and maintains the history of the calculated ADIT. Actual ADIT for Turk is provided from the tax system. A copy of Turk Plant's Deferred Tax report is provided in WP B-2-5-3 and REBUTTAL EXHIBIT AMK-9.

XI. CONCLUSION

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes, it does.

CERTIFICATE OF SERVICE

The undersigned hereby certifies that a copy of the foregoing Rebuttal Testimony was electronically served upon all parties of record via the Commission's EFS system on this 13th day of January 2022.

Dear :

This letter responds to Parent's request, made on behalf of Taxpayer, dated October 19, 2017, for a ruling on the application of the Normalization Rules of the Internal Revenue Code (Code) to certain accounting and regulatory procedures, as described below.

The representations set out in your letter follow.

Taxpayer is an investor-owned regulated utility incorporated in State B and State C. Taxpayer is a wholly-owned subsidiary of X, a State D limited liability company classified as a corporation for income tax purposes. X is wholly-owned by Parent. Taxpayer is a member of Parent's consolidated group that files a consolidated federal income tax return on a calendar year basis using an accrual method of accounting.

Taxpayer is engaged in the purchase, transmission, distribution, and sale of electric energy in State A and State B. Taxpayer is subject to regulation with respect to terms and conditions of services by Commission A, Commission B, and Commission C. Each

of these regulators establishes Taxpayer’s rates ba

Private Letter Rulings

Private Letter Ruling 201709008, 03/03/17, IRC Sec(s). 168

UIL No. 167.22-01

Accelerated cost recovery system-normalization-accumulated deferred income tax-net operating loss carryforward-limitations on reasonable allowance in case of property of public utilities.

Headnote:

In order to avoid violation of Code Sec. 168(i)(9); 's and Reg § 1.167(l)-1 's normalization requirements, it was necessary to include in regulated integrated electric utility/sub.'s rate base ADIT asset resulting from NOL carryforward, given inclusion in rate base of full amount of ADIT liability resulting from accelerated tax depreciation.

Dear [Redacted Text]:

This letter responds to the request, dated June 15, 2016, submitted by Parent on behalf of Taxpayer for a ruling on the application of the normalization rules of the Internal Revenue Code to certain accounting and regulatory procedures, described below.

The representations set out in your letter follow.

Taxpayer is an integrated electric utility headquartered in State. Taxpayer is a wholly owned subsidiary of Parent and is included in Parent's consolidated federal income tax return. Taxpayer employs the accrual method of accounting and reports on a calendar year basis.

Taxpayer's business includes retail electric utility operations regulated within State by Commission A and Taxpayer is subject to the regulatory jurisdiction of Commission B with respect to terms and conditions of its wholesale electric transmission service and as to the rates it may charge for the provision of such services. Taxpayer's rates are established on a cost of service basis.

On Date 1, Taxpayer filed a rate case application (Case) with Commission B requesting authorization to change from charging stated rates for wholesale electric transmission service to a formula rate mechanism pursuant to which rates for wholesale transmission service are calculated annually in accordance with an approved formula. The proposed formula consisted of updating cost of service components, including investment in plant and operating expenses, based on information contained in Taxpayer's annual financial report filed with Commission B, as well as including projected transmission capital projects to be placed into service in the following year. The projections included are subject to true-up in the following year's formula rate.

In computing its income tax expense element of cost of service, the tax benefits attributable to accelerated depreciation were normalized and were not flowed thru to ratepayers.

In its rate case filing, Taxpayer anticipated that it would claim accelerated depreciation, including "bonus depreciation" on its tax returns to the extent that such depreciation was available. Taxpayer incurred a net operating loss (NOL) in each of Year 1 through Year 2 due to Taxpayer's claiming bonus depreciation, producing a net operating loss carryover (NOLC).

On its regulatory books of account, Taxpayer "normalizes" the differences between regulatory depreciation and tax depreciation. This means that, where accelerated depreciation reduces taxable income, the taxes that a taxpayer would have paid if regulatory depreciation (instead of accelerated tax depreciation) were claimed constitute "cost-free capital" to the taxpayer. A taxpayer that normalizes these differences, like Taxpayer, maintains a reserve account showing the amount of tax liability that is deferred as a result of the accelerated depreciation. This reserve is the accumulated deferred income

tax (ADIT) account. Taxpayer maintains an ADIT account. In addition, Taxpayer maintains an offsetting series of entries - a "deferred tax asset" and a "deferred tax expense" - that reflect that portion of those `tax losses' which, while due to accelerated depreciation, did not actually defer tax because of the existence of a NOLC.

In the setting of utility rates by Commission B, a utility's rate base is offset by its ADIT balance. In its rate case filing, Taxpayer maintained that the ADIT balance should be reduced by the amounts that Taxpayer calculates did not actually defer tax due to the presence of the NOLC, as represented in the deferred tax asset account. Thus, Taxpayer argued that the rate base should be reduced by its federal ADIT balance net of the deferred tax asset account attributable to the federal NOLC. It based this position on its determination that this net amount represented the true measure of federal income taxes deferred on account of its claiming accelerated tax depreciation deductions and, consequently, the actual quantity of "cost-free" capital available to it. It also asserted that the failure to reduce its rate base offset by the deferred tax asset attributable to the federal NOLC would be inconsistent with the normalization rules.

On Date 2, Commission B issued an order accepting Taxpayer's revisions to its rates. On Date 3, new rates went into effect, subject to refund. Several intervenors submitted challenges to the rate case and on Date 4, Taxpayer and those intervenors entered into a Settlement Agreement, which was filed with Commission B. On Date 5, Commission B issued an order accepting the Settlement Agreement, which allows for the inclusion of the ADIT related to the NOLC asset in rate base.

Commission B further stated in the order that it is the intent of Commission B that Taxpayer comply with the normalization method of accounting and tax normalization regulations. The order also requires Taxpayer to seek a private letter ruling (PLR) from the Service regarding Taxpayer's treatment of the ADIT related to the NOLC asset. Commission B also noted that after the Service issues a PLR, Taxpayer shall adjust, to the extent necessary, its ratemaking treatment of the ADIT related to the NOLC asset prospectively from the date of the PLR.

Taxpayer requests that we rule as follows:

> 1. In order to avoid a violation of the normalization requirements of § 168(i)(9) and
> Treasury Regulation § 1.167(l)-1, it is necessary to include in rate base the Accumulated Deferred Income Tax (ADIT) asset resulting from the Net Operating Loss Carryforward (NOLC), given the inclusion in rate base of the full amount of the ADIT liability resulting from accelerated tax depreciation.
> 2. The exclusion from rate base of the entire ADIT asset resulting from the NOLC, or the inclusion in rate base of a portion of that ADIT asset that is less than the amount attributable to accelerated tax depreciation, computed on a "with and without" basis, would violate the normalization requirements of § 168(i)(9) and § 1.167(l)-1.

Law and Analysis

Section 168(f)(2) of the Code provides that the depreciation deduction determined under § 168 shall not apply to any public utility property (within the meaning of § 168(i)(10)) if the taxpayer does not use a normalization method of accounting.

In order to use a normalization method of accounting, § 168(i)(9)(A)(i) requires the taxpayer, in computing its tax expense for establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, to use a method of depreciation with respect to public utility property that is the same as, and a depreciation period for such property that is not shorter than, the method and period used to compute its depreciation expense for such purposes. Under § 168(i)(9)(A)(ii), if the amount allowable as a deduction under § 168 differs from the amount that-would be allowable as a deduction under § 167 using the method, period, first and last year convention, and salvage value used to compute regulated tax expense under § 168(i)(9)(A)(i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

Section 168(i)(9)(B)(i) provides that one way the requirements of § 168(i)(9)(A) will not be satisfied is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with such requirements. Under § 168(i)(9)(B)(ii), such inconsistent procedures and adjustments include the use of an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under § 168(i)(9)(A)(ii), unless such estimate or projection is also used, for ratemaking purposes, with respect to all three of these items and with respect to the rate base.

Former § 167(l) generally provided that public utilities were entitled to use accelerated methods for depreciation if they used a "normalization method of accounting." A normalization method of accounting was defined in former § 167(l)(3)(G) in a manner consistent with that found in § 168(i)(9)(A).

Section 1.167(l)-1(a)(1) provides that the normalization requirements for public utility property pertain only to the deferral of federal income tax liability resulting from the use of an accelerated method of depreciation for computing the allowance for depreciation under § 167 and the use of straight-line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. These regulations do not pertain to other book-tax timing differences with respect to state income taxes, F.I.C.A. taxes, construction costs, or any other taxes and items.

Section 1.167(l)-1(h)(1)(i) provides that the reserve established for public utility property should

reflect the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes.

Section 1.167(l)-1(h)(1)(iii) provides that the amount of federal income tax liability deferred as a result of the use of different depreciation methods for tax and ratemaking purposes is the excess (computed without regard to credits) of the amount the tax liability would have been had the depreciation method for ratemaking purposes been used over the amount of the actual tax liability. This amount shall be taken into account for the taxable year in which the different methods of depreciation are used. If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (1) method for purposes of determining the taxpayer's reasonable allowance under § 167(a) results in a net operating loss carryover to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under § 167(a) using a subsection (1) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Section 1.167(l)-1(h)(2)(i) provides that the taxpayer must credit this amount of deferred taxes to a reserve for deferred taxes, a depreciation reserve, or other reserve account. This regulation further provides that, with respect to any account, the aggregate amount allocable to deferred tax under § 167(1) shall not be reduced except to reflect the amount for any taxable year by which Federal income taxes are greater by reason of the prior use of different methods of depreciation. That section also notes that the aggregate amount allocable to deferred taxes may be reduced to reflect the amount for any taxable year by which federal income taxes are greater by reason of the prior use of different methods of depreciation under § 1.167(l)-1(h)(1)(i) or to reflect asset retirements or the expiration of the period for depreciation used for determining the allowance for depreciation under § 167(a).

Section 1.167(l)-1(h)(6)(i) provides that, notwithstanding the provisions of subparagraph (1) of that paragraph, a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes under § 167(l) which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking.

Section 1.167(l)-1(h)(6)(ii) provides that, for the purpose of determining the maximum amount of the reserve to be excluded from the rate base (or to be included as no-cost capital) under subdivision (i), above, if solely an historical period is used to determine depreciation for Federal income tax expense for ratemaking purposes, then the amount of the reserve account for that period is the amount

of the reserve (determined under § 1.167(l)-1(h)(2)(i)) at the end of the historical period. If such determination is made by reference both to an historical portion and to a future portion of a period, the amount of the reserve account for the period is the amount of the reserve at the end of the historical portion of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during the future portion of the period.

Section 1.167(l)-1(h) requires that a utility must maintain a reserve reflecting the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes. Taxpayer has done so. Section 1.167(l)-1(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Section 56(a)(1)(D) provides that, with respect to public utility property the Secretary shall prescribe the requirements of a normalization method of accounting for that section.

Regarding the first issue, § 1.167(l)-1(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Because the reserve account for deferred taxes (ADIT), reduces rate base, it is clear that the portion of the net operating loss carryover (NOLC) that is attributable to accelerated depreciation must be taken into account in calculating the amount of the ADIT account balance. Thus, the order by Commission to include in rate base the ADIT asset resulting from the NOLC, given the inclusion in rate base of the full amount of the ADIT liability resulting from accelerated tax depreciation is in accord with the normalization requirements.

Regarding the second issue, § 1.167(l)-1(h)(1)(iii) makes clear that the effects of an NOLC must be taken into account for normalization purposes. Section 1.167(l)-1(h)(1)(iii) provides generally that, if, in respect of any year, the use of other than regulatory depreciation for tax purposes results in an NOLC carryover (or an increase in an NOLC which would not have arisen had the taxpayer claimed only regulatory depreciation for tax purposes), then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director. The "with or without" methodology employed by Taxpayer is specifically designed to ensure that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated

depreciation to ratepayers. Under these specific facts, any method other than the "with or without" method would not provide the same level of certainty and therefore the use of any other methodology in computing the portion of the ADIT asset attributable to accelerated depreciation is inconsistent with the normalization rules.

We rule as follows:

1. In order to avoid a violation of the normalization requirements of § 168(i)(9) and Treasury Regulation § 1.167(l)-1, it is necessary to include in rate base the Accumulated Deferred Income Tax (ADIT) asset resulting from the Net Operating Loss Carryforward (NOLC), given the inclusion in rate base of the full amount of the ADIT liability resulting from accelerated tax depreciation.
2. The exclusion from rate base of the entire ADIT asset resulting from the NOLC, or the inclusion in rate base of a portion of that ADIT asset that is less than the amount attributable to accelerated tax depreciation, computed on a "with and without" basis, would violate the normalization requirements of § 168(i)(9) and § 1.167(l)-1.

This ruling is based on the representations submitted by Taxpayer and is only valid if those representations are accurate. The accuracy of these representations is subject to verification on audit.

Except as specifically determined above, no opinion is expressed or implied concerning the Federal income tax consequences of the matters described above.

This ruling is directed only to the taxpayer who requested it. Section 6110(k)(3) of the Code provides it may not be used or cited as precedent. In accordance with the power of attorney on file with this office, a copy of this letter is being sent to your authorized representative. We are also sending a copy of this letter ruling to the Director.

Sincerely,

Patrick S. Kirwan

Private Letter Ruling 201548017, 11/27/2015, IRC Sec(s). 168

UIL No. 167.22-01

Accelerated depreciation-accumulated deferred income tax-net operating loss carryforward-normalization-limitations on reasonable allowance in case of property of public utilities.

Headnote:

Reduction of taxpayer/regulated natural gas distributor's rate base by balance of its ADIT accounts unreduced by its NOLC-related deferred tax account, by full amount of its ADIT account balances offset by portion of NOLC-related account balances, or any reduction in taxpayer's tax expense element of cost of service to reflect tax benefit of its NOLC would be inconsistent with Code Sec. 168(i)(9); and Reg § 1.167(l)-1 requirements.

Dear [Redacted Text]:

This letter responds to the request, dated May 14, 2015, of Taxpayer for a ruling on the application of the normalization rules of the Internal Revenue Code to certain accounting and regulatory procedures, described below.

The representations set out in your letter follow.

Taxpayer is primarily engaged in the regulated distribution of natural gas in State A. It is incorporated in State B and is wholly owned by Parent. Taxpayer is subject to the regulatory jurisdiction of Commission with respect to terms and conditions of service and particularly the rates it may charge for the provision of service. Taxpayer's rates are established on a rate of return basis. Taxpayer takes accelerated depreciation, including "bonus depreciation" where available and, for each year beginning in Year A and ending in Year B, Taxpayer incurred net operating losses (NOL). On its regulatory books of account, Taxpayer "normalizes" the differences between regulatory depreciation and tax depreciation. This means that, where accelerated depreciation reduces taxable income, the taxes that a taxpayer would have paid if regulatory depreciation (instead of accelerated tax depreciation) were claimed constitute "cost-free capital" to the taxpayer. A taxpayer that normalizes these differences, like Taxpayer, maintains a reserve account showing the amount of tax liability that is deferred as a result of the accelerated depreciation. This reserve is the accumulated deferred income tax (ADIT) account. Taxpayer maintains an ADIT account. In addition, Taxpayer maintains an offsetting series of entries - a "deferred tax asset" and a "deferred tax expense" - that reflect that portion of those `tax losses' which, while due to accelerated depreciation, did not actually defer tax because of the existence of an net operating loss carryover (NOLC). Taxpayer, for normalization purposes, calculates the portion of the NOLC attributable to accelerated depreciation using a "last dollars deducted" methodology, meaning that an NOLC is attributable to accelerated depreciation to the extent of the lesser of the accelerated depreciation or the NOLC.

Taxpayer filed a general rate case with Commission on Date A (Case). The test year used in the Case was the 12 month period ending on Date B. In computing its income tax expense element of cost of service, the tax benefits attributable to accelerated depreciation were normalized in accordance with Commission policy and were not flowed thru to ratepayers. In establishing the rate base on which Taxpayer was to be allowed to earn a return Commission offsets rate base by Taxpayer's ADIT balance. Taxpayer argued that the ADIT balance should be reduced by the amounts that Taxpayer calculates did not actually defer tax due to the presence of the NOLC, as represented in the deferred tax asset account. Testimony by various other participants in Case argued against Taxpayer's proposed calculation of ADIT. One proposal made to Commission was, if Commission allowed Taxpayer to reduce the ADIT balance as Taxpayer proposed, then an offsetting reduction should be made to Taxpayer's income tax expense element of service.

A Utility Law Judge upheld Taxpayer's position with respect to the NOLC-related ADIT and ordered Taxpayer to seek a ruling from the Internal Revenue Service on this matter. This request is in response to that order.

Taxpayer requests that we rule as follows:

1. Under the circumstances described above, the reduction of Taxpayer's rate base by the balance of its ADIT accounts unreduced by its NOLC-related deferred tax account would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.

2. Under the circumstances described above, the reduction of Taxpayer's rate base by the full amount of its ADIT account balances offset by a portion of its NOLC-related account balance that is less than the amount attributable to accelerated depreciation computed on a "last dollars deducted" basis would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.

3. Under the circumstances described above, any reduction in Taxpayer's tax expense element of cost of service to reflect the tax benefit of its NOLC would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.

Law and Analysis

Section 168(f)(2) of the Code provides that the depreciation deduction determined under section 168 shall not apply to any public utility property (within the meaning of section 168(i)(10)) if the taxpayer does not use a normalization method of accounting.

In order to use a normalization method of accounting, section 168(i)(9)(A)(i) of the Code requires the taxpayer, in computing its tax expense for establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, to use a method of depreciation with respect to public utility property that is the same as, and a depreciation period for such property that is not shorter than, the method and period used to compute its depreciation expense for such purposes. Under section 168(i)(9)(A)(ii), if the amount allowable as a deduction under section 168 differs from the amount that-would be allowable as a deduction under section 167 using the method, period, first and last year convention, and salvage value used to compute regulated tax expense under section 168(i)(9)(A)(i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

Section 168(i)(9)(B)(i) of the Code provides that one way the requirements of section 168(i)(9)(A) will not be satisfied is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with such requirements. Under section 168(i)(9)(B)(ii), such inconsistent procedures and adjustments include the use of an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under section 168(i)(9)(A)(ii),

unless such estimate or projection is also used, for ratemaking purposes, with respect to all three of these items and with respect to the rate base.

Former section 167(l) of the Code generally provided that public utilities were entitled to use accelerated methods for depreciation if they used a "normalization method of accounting." A normalization method of accounting was defined in former section 167(l)(3)(G) in a manner consistent with that found in section 168(i)(9)(A). Section 1.167(1)-1(a)(1) of the Income Tax Regulations provides that the normalization requirements for public utility property pertain only to the deferral of federal income tax liability resulting from the use of an accelerated method of depreciation for computing the allowance for depreciation under section 167 and the use of straight-line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. These regulations do not pertain to other book-tax timing differences with respect to state income taxes, F.I.C.A. taxes, construction costs, or any other taxes and items.

Section 1.167(l)-1(h)(1)(i) provides that the reserve established for public utility property should reflect the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes.

Section 1.167(1)-1(h)(1)(iii) provides that the amount of federal income tax liability deferred as a result of the use of different depreciation methods for tax and ratemaking purposes is the excess (computed without regard to credits) of the amount the tax liability would have been had the depreciation method for ratemaking purposes been used over the amount of the actual tax liability. This amount shall be taken into account for the taxable year in which the different methods of depreciation are used. If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (1) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (1) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Section 1.167(1)-1(h)(2)(i) provides that the taxpayer must credit this amount of deferred taxes to a reserve for deferred taxes, a depreciation reserve, or other reserve account. This regulation further provides that, with respect to any account, the aggregate amount allocable to deferred tax under section 167(1) shall not be reduced except to reflect the amount for any taxable year by which Federal income taxes are greater by reason of the prior use of different methods of depreciation. That section also notes that the aggregate amount allocable to deferred taxes may be reduced to reflect the amount

for any taxable year by which federal income taxes are greater by reason of the prior use of different methods of depreciation under section 1.167(1)-1(h)(1)(i) or to reflect asset retirements or the expiration of the period for depreciation used for determining the allowance for depreciation under section 167(a).

Section 1.167(1)-(h)(6)(i) provides that, notwithstanding the provisions of subparagraph (1) of that paragraph, a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes under section 167(l) which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking.

Section 1.167(1)-(h)(6)(ii) provides that, for the purpose of determining the maximum amount of the reserve to be excluded from the rate base (or to be included as no-cost capital) under subdivision (i), above, if solely an historical period is used to determine depreciation for Federal income tax expense for ratemaking purposes, then the amount of the reserve account for that period is the amount of the reserve (determined under section 1.167(1)-1(h)(2)(i)) at the end of the historical period. If such determination is made by reference both to an historical portion and to a future portion of a period, the amount of the reserve account for the period is the amount of the reserve at the end of the historical portion of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during the future portion of the period.

Section 1.167(l)-1(h) requires that a utility must maintain a reserve reflecting the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes. Taxpayer has done so. Section 1.167(1)-(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Section 56(a)(1)(D) provides that, with respect to public utility property the Secretary shall prescribe the requirements of a normalization method of accounting for that section.

Section 1.167(1)-1(h)(1)(iii) makes clear that the effects of an NOLC must be taken into account for normalization purposes. Further, while that section provides no specific mandate on methods, it does provide that the Service has discretion to determine whether a particular method satisfies the normalization requirements. Section 1.167(1)-(h)(6)(i) provides that a taxpayer does not use a

normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Because the ADIT account, the reserve account for deferred taxes, reduces rate base, it is clear that the portion of an NOLC that is attributable to accelerated depreciation must be taken into account in calculating the amount of the reserve for deferred taxes (ADIT). Thus, the proposed order by the Utility Law Judge upholding Taxpayer's position that the NOLC-related deferred tax account must be included in the calculation of Taxpayer's ADIT is in accord with the normalization requirements. The "last dollars deducted" methodology employed by Taxpayer is specifically designed to ensure that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated depreciation to ratepayers. Under these facts, any method other than the "last dollars deducted" method would not provide the same level of certainty and therefore the use of any other methodology is inconsistent with the normalization rules.

Regarding the third issue, reduction of Taxpayer's tax expense element of cost of service, we believe that such reduction would, in effect, flow through the tax benefits of accelerated depreciation deductions through to rate payers even though the Taxpayer has not yet realized such benefits. In addition, such adjustment would be made specifically to mitigate the effect of the normalization rules in the calculation of Taxpayer's NOLC-related ADIT. In general, taxpayers may not adopt any accounting treatment that directly or indirectly circumvents the normalization rules. See generally, § 1.46-6(b)(2)(ii) (In determining whether, or to what extent, the investment tax credit has been used to reduce cost of service, reference shall be made to any accounting treatment that affects cost of service); Rev. Proc 88-12, 1988-1 C.B. 637, 638 (It is a violation of the normalization rules for taxpayers to adopt any accounting treatment that, directly or indirectly flows excess tax reserves to ratepayers prior to the time that the amounts in the vintage accounts reverse). This "offsetting reduction" would violate the normalization provisions.

Based on the representations submitted by Taxpayer, we rule as follows:

1. Under the circumstances described above, the reduction of Taxpayer's rate base by the balance of its ADIT accounts unreduced by its NOLC-related deferred tax account would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.

2. Under the circumstances described above, the reduction of Taxpayer's rate base by the full amount of its ADIT account balances offset by a portion of its NOLC-related account balance that is less than the amount attributable to accelerated depreciation computed on a "last dollars deducted" basis would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.

3. Under the circumstances described above, any reduction in Taxpayer's tax expense element of cost of service to reflect the tax benefit of its NOLC would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.

Except as specifically determined above, no opinion is expressed or implied concerning the Federal income tax consequences of the matters described above.

This ruling is directed only to the taxpayer who requested it. Section 6110(k)(3) of the Code provides it may not be used or cited as precedent. In accordance with the power of attorney on file with this office, a copy of this letter is being sent to your authorized representative. W e are also sending a copy of this letter ruling to the Director.

Sincerely,

Peter C. Friedman

Dear [Redacted Text]:

This letter responds to the request, dated January 9, 2015, submitted on behalf of Taxpayer for a ruling on the application of the normalization rules of the Internal Revenue Code to certain accounting and regulatory procedures, described below.

The representations set out in your letter follow.

Taxpayer is the common parent of an affiliated group of corporations and is incorporated under the laws of State A and State B. Taxpayer is engaged primarily in the businesses of regulated natural gas distribution, regulated natural gas transmission, and regulated natural gas storage. Taxpayer's regulated natural gas distribution business delivers gas to customers in several states, including State A. Taxpayer is subject to, as relevant for this ruling, the regulatory jurisdiction of Commission with respect to terms and conditions of service and as to the rates it may charge for the provision of its gas distribution service in State A. Taxpayer's rates are established on a "rate of return" basis.

Taxpayer filed a rate case application on Date A (Case). In its filing, Taxpayer's application was based on a fully forecasted test period consisting of the twelve months ending on Date B. Taxpayer updated, amended, and supplemented its data several times during the course of the proceedings. In a final order dated Date C, rates were approved by Commission for service rendered on or after Date D.

In each year from Year A to Year B, Taxpayer incurred a net operating loss carryforward (NOLC). In each of these years, Taxpayer claimed accelerated depreciation, including "bonus depreciation" on its tax returns to the extent that such depreciation was available. On its regulatory books of account, Taxpayer "normalizes" the differences between regulatory depreciation and tax depreciation. This means that, where accelerated depreciation reduces taxable income, the taxes that a taxpayer would have paid if regulatory depreciation (instead of accelerated tax depreciation) were claimed constitute "cost-free capital" to the taxpayer. A taxpayer that normalizes these differences, like Taxpayer, maintains a reserve account showing the amount of tax liability that is deferred as a result of the accelerated depreciation. This reserve is the accumulated deferred income tax (ADIT) account. Taxpayer maintains an ADIT account. In addition, Taxpayer maintains an offsetting series of entries - a "deferred tax asset" and a "deferred tax expense" - that reflect that portion of those `tax losses' which, while due to accelerated depreciation, did not actually defer tax because of the existence of an NOLC.

In the setting of utility rates in State C, a utility's rate base is offset by its ADIT balance. In its rate case filing and throughout the proceeding, Taxpayer maintained that the ADIT balance should be reduced by the amounts that Taxpayer calculates did not actually defer tax due to the presence of the NOLC, as represented in the deferred tax asset account. Thus, Taxpayer argued that the rate base should be reduced by its federal ADIT balance net of the deferred tax asset account attributable to the federal NOLC. It also asserted that the failure to reduce its rate base offset by the deferred tax asset attributable to the federal NOLC would be inconsistent with the normalization rules. The attorney general for State C argued against Taxpayer's proposed calculation of ADIT.

Commission, in its final order, agreed with Taxpayer but concluded that the ambiguity in the relevant normalization regulations warranted an assessment of the issue by the IRS and this ruling request followed.

Taxpayer requests that we rule as follows:

> 1. Under the circumstances described above, the reduction of Taxpayer's rate base by the full amount of its ADIT account balance unreduced by the balance of its NOLC-related account balance would be inconsistent with (and, hence, violative of) the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
>
> 2. For purposes of Ruling 1 above, the use of a balance of Taxpayer's NOLC-related account that is less than the amount attributable to accelerated depreciation computed on a "last dollars deducted" basis would be inconsistent with (and, hence, violative of) the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.

Law and Analysis

Section 168(f)(2) of the Code provides that the depreciation deduction determined under section 168 shall not apply to any public utility property (within the meaning of section 168(i)(10)) if the taxpayer does not use a normalization method of accounting.

In order to use a normalization method of accounting, section 168(i)(9)(A)(i) of the Code requires the taxpayer, in computing its tax expense for establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, to use a method of depreciation with respect to public utility property that is the same as, and a depreciation period for such property that is not shorter than, the method and period used to compute its depreciation expense for such purposes. Under section 168(i)(9)(A)(ii), if the amount allowable as a deduction under section 168 differs from the amount that-would be allowable as a deduction under section 167 using the method, period, first and last year convention, and salvage value used to compute regulated tax expense under section 168(i)(9)(A)(i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

Section 168(i)(9)(B)(i) of the Code provides that one way the requirements of section 168(i)(9)(A) will not be satisfied is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with such requirements. Under section 168(i)(9)(B)(ii), such inconsistent procedures and adjustments include the use of an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under section 168(i)(9)(A)(ii),

unless such estimate or projection is also used, for ratemaking purposes, with respect to all three of these items and with respect to the rate base.

Former section 167(l) of the Code generally provided that public utilities were entitled to use accelerated methods for depreciation if they used a "normalization method of accounting." A normalization method of accounting was defined in former section 167(l)(3)(G) in a manner consistent with that found in section 168(i)(9)(A). Section 1.167(l)-1(a)(1) of the Income Tax Regulations provides that the normalization requirements for public utility property pertain only to the deferral of federal income tax liability resulting from the use of an accelerated method of depreciation for computing the allowance for depreciation under section 167 and the use of straight-line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. These regulations do not pertain to other book-tax timing differences with respect to state income taxes, F.I.C.A. taxes, construction costs, or any other taxes and items.

Section 1.167(l)-1(h)(1)(i) provides that the reserve established for public utility property should reflect the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes.

Section 1.167(l)-1(h)(1)(iii) provides that the amount of federal income tax liability deferred as a result of the use of different depreciation methods for tax and ratemaking purposes is the excess (computed without regard to credits) of the amount the tax liability would have been had the depreciation method for ratemaking purposes been used over the amount of the actual tax liability. This amount shall be taken into account for the taxable year in which the different methods of depreciation are used. If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (1) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (1) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Section 1.167(l)-1(h)(2)(i) provides that the taxpayer must credit this amount of deferred taxes to a reserve for deferred taxes, a depreciation reserve, or other reserve account. This regulation further provides that, with respect to any account, the aggregate amount allocable to deferred tax under section 167(1) shall not be reduced except to reflect the amount for any taxable year by which Federal income taxes are greater by reason of the prior use of different methods of depreciation. That section also notes that the aggregate amount allocable to deferred taxes may be reduced to reflect the amount

for any taxable year by which federal income taxes are greater by reason of the prior use of different methods of depreciation under section 1.167(l)-1(h)(1)(i) or to reflect asset retirements or the expiration of the period for depreciation used for determining the allowance for depreciation under section 167(a).

Section 1.167(l)-1(h)(6)(i) provides that, notwithstanding the provisions of subparagraph (1) of that paragraph, a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes under section 167(l) which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking.

Section 1.167(l)-1(h)(6)(ii) provides that, for the purpose of determining the maximum amount of the reserve to be excluded from the rate base (or to be included as no-cost capital) under subdivision (i), above, if solely an historical period is used to determine depreciation for Federal income tax expense for ratemaking purposes, then the amount of the reserve account for that period is the amount of the reserve (determined under section 1.167(l)-1(h)(2)(i)) at the end of the historical period. If such determination is made by reference both to an historical portion and to a future portion of a period, the amount of the reserve account for the period is the amount of the reserve at the end of the historical portion of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during the future portion of the period.

Section 1.167(l)-1(h) requires that a utility must maintain a reserve reflecting the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes. Taxpayer has done so. Section 1.167(l)-1(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Section 56(a)(1)(D) provides that, with respect to public utility property the Secretary shall prescribe the requirements of a normalization method of accounting for that section.

Regarding the first issue, § 1.167(l)-1(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of

capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Because the ADIT account, the reserve account for deferred taxes, reduces rate base, it is clear that the portion of an NOLC that is attributable to accelerated depreciation must be taken into account in calculating the amount of the reserve for deferred taxes (ADIT). Thus, to reduce Taxpayer's rate base by the full amount of its ADIT account balance unreduced by the balance of its NOLC-related account balance would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.

Regarding the second issue, § 1.167(l)-1(h)(1)(iii) makes clear that the effects of an NOLC must be taken into account for normalization purposes. Section 1.167(l)-1(h)(1)(iii) provides generally that, if, in respect of any year, the use of other than regulatory depreciation for tax purposes results in an NOLC carryover (or an increase in an NOLC which would not have arisen had the taxpayer claimed only regulatory depreciation for tax purposes), then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director. While that section provides no specific mandate on methods, it does provide that the Service has discretion to determine whether a particular method satisfies the normalization requirements. The "last dollars deducted" methodology employed by Taxpayer ensures that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated depreciation to ratepayers. Under these specific facts, any method other than the "last dollars deducted" method would not provide the same level of certainty and therefore the use of any other methodology is inconsistent with the normalization rules.

This ruling is based on the representations submitted by Taxpayer and is only valid if those representations are accurate. The accuracy of these representations is subject to verification on audit.

Except as specifically determined above, no opinion is expressed or implied concerning the Federal income tax consequences of the matters described above.

This ruling is directed only to the taxpayer who requested it. Section 6110(k)(3) of the Code provides it may not be used or cited as precedent. In accordance with the power of attorney on file with this office, a copy of this letter is being sent to your authorized representative. W e are also sending a copy of this letter ruling to the Director.

Sincerely,

Peter C. Friedman

Dear [Redacted Text]:

This letter responds to the request, dated October 1, 2014, submitted on behalf of Taxpayer for a ruling on the application of the normalization rules of the Internal Revenue Code to certain accounting and regulatory procedures, described below.

The representations set out in your letter follow.

Taxpayer is a regulated, investor-owned public utility incorporated under the laws of State A primarily engaged in the business of supplying natural gas service in State A. Taxpayer is subject to the regulatory jurisdiction of Commission with respect to terms and conditions of service and as to the rates it may charge for the provision of service. Taxpayer's rates are established on a cost of service basis.

Taxpayer is wholly owned by Parent, and Taxpayer is included in a consolidated federal income tax return of which Parent is the common parent. Taxpayer employs the accrual method of accounting and reports on a calendar year basis.

Taxpayer filed a rate case application on Date A (Case). In its filing, Taxpayer used as its starting point actual data from the historic test period, calendar Year A. It then projected data for Year B through Year D. Taxpayer updated, amended, and supplemented its data several times during the course of the proceedings. Rates in this proceeding were intended to, and did, go into effect for the period Date B through Date C.

In computing its income tax expense element of cost of service, the tax benefits attributable to accelerated depreciation were normalized and were not flowed thru to ratepayers.

In its rate case filing, Taxpayer anticipated that it would claim accelerated depreciation, including "bonus depreciation" on its tax returns to the extent that such depreciation was available in all years for which data was provided. Additionally, Taxpayer forecasted that it would incur a net operating loss (NOL) in each of Year B, Year C, and Year D. Taxpayer anticipated that it had the capacity to carry back a portion of this NOL with the remainder producing a net operating loss carryover (NOLC) as of the end of Year C and Year D, the beginning and end of the test period.

On its regulatory books of account, Taxpayer "normalizes" the differences between regulatory depreciation and tax depreciation. This means that, where accelerated depreciation reduces taxable income, the taxes that a taxpayer would have paid if regulatory depreciation (instead of accelerated tax depreciation) were claimed constitute "cost-free capital" to the taxpayer. A taxpayer that normalizes these differences, like Taxpayer, maintains a reserve account showing the amount of tax liability that is deferred as a result of the accelerated depreciation. This reserve is the accumulated deferred income tax (ADIT) account. Taxpayer maintains an ADIT account. In addition, Taxpayer maintains an offsetting series of entries - a "deferred tax asset" and a "deferred tax expense" - that reflect that portion of those `tax losses' which, while due to accelerated depreciation, did not actually defer tax because of the

existence of an NOLC.

In the setting of utility rates in State, a utility's rate base is offset by its ADIT balance. In its rate case filing and throughout the proceeding, Taxpayer maintained that the ADIT balance should be reduced by the amounts that Taxpayer calculates did not actually defer tax due to the presence of the NOLC, as represented in the deferred tax asset account. Thus, Taxpayer argued that the rate base should be reduced as of the end of Year D by its federal ADIT balance net of the deferred tax asset account attributable to the federal NOLC. It based this position on its determination that this net amount represented the true measure of federal income taxes deferred on account of its claiming accelerated tax depreciation deductions and, consequently, the actual quantity of "cost-free" capital available to it. It also asserted that the failure to reduce its rate base offset by the deferred tax asset attributable to the federal NOLC would be inconsistent with the normalization rules Testimony by another participant in Case argued against Taxpayer's proposed calculation of ADIT.

Commission, in an order issued on Date D, held that it is inappropriate to include the NOL in rate base for ratemaking purposes. Commission further stated that it is the intent of the Commission that Taxpayer comply with the normalization method of accounting and tax normalization regulations. Commission noted that if Taxpayer later obtains a ruling from the IRS which affirms Taxpayer's position, Taxpayer may file seeking an adjustment. Commission also held that to the extent tax normalization rules require including the NOL in rate base in the specified years, no rate of return is authorized.

Taxpayer requests that we rule as follows:

> 1. Under the circumstances described above, the reduction of Taxpayer's rate base by the full amount of its ADIT account balance unreduced by the balance of its NOLC-related account balance would be inconsistent with (and, hence, violative of) the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
>
> 2. For purposes of Ruling 1 above, the use of a balance of Taxpayer's NOLC-related account balance that is less than the amount attributable to accelerated depreciation computed on a "with and without" basis would be inconsistent with (and, hence, violative of) the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
>
> 3. Under the circumstances described above, the assignment of a zero rate of return to the balance of Taxpayer's NOLC-related account balance would be inconsistent with (and, hence, violative of) the requirements of § 168(i)(9) and § 1.167(l)-1.

Law and Analysis

Section 168(f)(2) of the Code provides that the depreciation deduction determined under section 168 shall not apply to any public utility property (within the meaning of section 168(i)(10)) if

the taxpayer does not use a normalization method of accounting.

In order to use a normalization method of accounting, section 168(i)(9)(A)(i) of the Code requires the taxpayer, in computing its tax expense for establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, to use a method of depreciation with respect to public utility property that is the same as, and a depreciation period for such property that is not shorter than, the method and period used to compute its depreciation expense for such purposes. Under section 168(i)(9)(A)(ii), if the amount allowable as a deduction under section 168 differs from the amount that-would be allowable as a deduction under section 167 using the method, period, first and last year convention, and salvage value used to compute regulated tax expense under section 168(i)(9)(A)(i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

Section 168(i)(9)(B)(i) of the Code provides that one way the requirements of section 168(i)(9)(A) will not be satisfied is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with such requirements. Under section 168(i)(9)(B)(ii), such inconsistent procedures and adjustments include the use of an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under section 168(i)(9)(A)(ii), unless such estimate or projection is also used, for ratemaking purposes, with respect to all three of these items and with respect to the rate base.

Former section 167(l) of the Code generally provided that public utilities were entitled to use accelerated methods for depreciation if they used a "normalization method of accounting." A normalization method of accounting was defined in former section 167(l)(3)(G) in a manner consistent with that found in section 168(i)(9)(A). Section 1.167(l)-1(a)(1) of the Income Tax Regulations provides that the normalization requirements for public utility property pertain only to the deferral of federal income tax liability resulting from the use of an accelerated method of depreciation for computing the allowance for depreciation under section 167 and the use of straight-line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. These regulations do not pertain to other book-tax timing differences with respect to state income taxes, F.I.C.A. taxes, construction costs, or any other taxes and items.

Section 1.167(l)-1(h)(1)(i) provides that the reserve established for public utility property should reflect the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes.

Section 1.167(l)-1(h)(1)(iii) provides that the amount of federal income tax liability deferred as a result of the use of different depreciation methods for tax and ratemaking purposes is the excess (computed without regard to credits) of the amount the tax liability would have been had the depreciation method for ratemaking purposes been used over the amount of the actual tax liability. This amount shall be taken into account for the taxable year in which the different methods of depreciation are used. If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (1) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (1) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Section 1.167(l)-1(h)(2)(i) provides that the taxpayer must credit this amount of deferred taxes to a reserve for deferred taxes, a depreciation reserve, or other reserve account. This regulation further provides that, with respect to any account, the aggregate amount allocable to deferred tax under section 167(1) shall not be reduced except to reflect the amount for any taxable year by which Federal income taxes are greater by reason of the prior use of different methods of depreciation. That section also notes that the aggregate amount allocable to deferred taxes may be reduced to reflect the amount for any taxable year by which federal income taxes are greater by reason of the prior use of different methods of depreciation under section 1.167(l)-1(h)(1)(i) or to reflect asset retirements or the expiration of the period for depreciation used for determining the allowance for depreciation under section 167(a).

Section 1.167(l)-1(h)(6)(i) provides that, notwithstanding the provisions of subparagraph (1) of that paragraph, a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes under section 167(l) which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking.

Section 1.167(l)-1(h)(6)(ii) provides that, for the purpose of determining the maximum amount of the reserve to be excluded from the rate base (or to be included as no-cost capital) under subdivision (i), above, if solely an historical period is used to determine depreciation for Federal income tax expense for ratemaking purposes, then the amount of the reserve account for that period is the amount of the reserve (determined under section 1.167(l)-1(h)(2)(i)) at the end of the historical period. If

such determination is made by reference both to an historical portion and to a future portion of a period, the amount of the reserve account for the period is the amount of the reserve at the end of the historical portion of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during the future portion of the period.

Section 1.167(l)-1(h) requires that a utility must maintain a reserve reflecting the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes. Taxpayer has done so. Section 1.167(l)-1(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Section 56(a)(1)(D) provides that, with respect to public utility property the Secretary shall prescribe the requirements of a normalization method of accounting for that section.

Regarding the first issue, § 1.167(l)-1(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Because the ADIT account, the reserve account for deferred taxes, reduces rate base, it is clear that the portion of an NOLC that is attributable to accelerated depreciation must be taken into account in calculating the amount of the reserve for deferred taxes (ADIT). Thus, the order by Commission is not in accord with the normalization requirements.

Regarding the second issue, § 1.167(l)-1(h)(1)(iii) makes clear that the effects of an NOLC must be taken into account for normalization purposes. Section 1.167(l)-1(h)(1)(iii) provides generally that, if, in respect of any year, the use of other than regulatory depreciation for tax purposes results in an NOLC carryover (or an increase in an NOLC which would not have arisen had the taxpayer claimed only regulatory depreciation for tax purposes), then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director. While that section provides no specific mandate on methods, it does provide that the Service has discretion to determine whether a particular method satisfies the normalization requirements. The "with or without" methodology employed by Taxpayer is specifically designed to ensure that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated depreciation to ratepayers.

Under these specific facts, any method other than the "with and without" method would not provide the same level of certainty and therefore the use of any other methodology is inconsistent with the normalization rules.

Regarding the third issue, assignment of a zero rate of return to the balance of Taxpayer's NOLC-related account balance would, in effect, flow the tax benefits of accelerated depreciation deductions through to rate payers. This would violate the normalization provisions.

We rule as follows:

1. Under the circumstances described above, the reduction of Taxpayer's rate base by the full amount of its ADIT account balance unreduced by the balance of its NOLC-related account balance would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
2. For purposes of Ruling 1 above, the use of a balance of Taxpayer's NOLC-related account balance that is less than the amount attributable to accelerated depreciation computed on a "with and without" basis would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
3. Under the circumstances described above, the assignment of a zero rate of return to the balance of Taxpayer's NOLC-related account balance would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.

This ruling is based on the representations submitted by Taxpayer and is only valid if those representations are accurate. The accuracy of these representations is subject to verification on audit.

Except as specifically determined above, no opinion is expressed or implied concerning the Federal income tax consequences of the matters described above.

This ruling is directed only to the taxpayer who requested it. Section 6110(k)(3) of the Code provides it may not be used or cited as precedent. In accordance with the power of attorney on file with this office, a copy of this letter is being sent to your authorized representative. W e are also sending a copy of this letter ruling to the Director.

Sincerely,

Peter C. Friedman

Dear [Redacted Text]:

This letter responds to the request, dated January 24, 2014, and additional submission dated May 19, 2014, submitted on behalf of Taxpayer for a ruling on the application of the normalization rules of the Internal Revenue Code to certain accounting and regulatory procedures, described below.

The representations set out in your letter follow.

Taxpayer is a regulated, investor-owned public utility incorporated under the laws of State A primarily engaged in the business of supplying electricity in State A. Taxpayer is subject to the regulatory jurisdiction of Commission A and Commission B with respect to terms and conditions of service and particularly the rates it may charge for the provision of service. Taxpayer's rates are established on a rate of return basis.

Taxpayer is wholly owned by Parent, and Taxpayer is included in a consolidated federal income tax return of which Parent is the common parent. Taxpayer employs the accrual method of accounting and reports on a calendar year basis.

Taxpayer filed a rate case application on Date A (Case). In its filing, Taxpayer used as its starting point actual data from the historic test period, calendar Year A. It then projected data for Year B through Year C. Taxpayer updated, amended, and supplemented its data several times during the course of the proceedings. Rates in this proceeding were intended to, and did, go into effect for the period Date B through Date C.

In computing its income tax expense element of cost of service, the tax benefits attributable to accelerated depreciation were normalized and were not flowed thru to ratepayers.

In its rate case filing, Taxpayer anticipated that it would claim accelerated depreciation, including "bonus depreciation" on its tax returns to the extent that such depreciation was available in all years for which data was provided. Additionally, Taxpayer forecasted that it would incur a net operating loss (NOL) in Year D. Taxpayer anticipated that it had the capacity to carry back a portion of this NOL with the remainder producing a net operating loss carryover (NOLC) as of the end of Year D.

On its regulatory books of account, Taxpayer "normalizes" the differences between regulatory depreciation and tax depreciation. This means that, where accelerated depreciation reduces taxable income, the taxes that a taxpayer would have paid if regulatory depreciation (instead of accelerated tax depreciation) were claimed constitute "cost-free capital" to the taxpayer. A taxpayer that normalizes these differences, like Taxpayer, maintains a reserve account showing the amount of tax liability that is deferred as a result of the accelerated depreciation. This reserve is the accumulated deferred income tax (ADIT) account. Taxpayer maintains an ADIT account. In addition, Taxpayer maintains an offsetting

series of entries - a "deferred tax asset" and a "deferred tax expense" - that reflect that portion of those 'tax losses' which, while due to accelerated depreciation, did not actually defer tax because of the existence of an NOLC.

In the setting of utility rates in State, a utility's rate base is offset by its ADIT balance. In its rate case filing and throughout the proceeding, Taxpayer maintained that the ADIT balance should be reduced by the amounts that Taxpayer calculates did not actually defer tax due to the presence of the NOLC, as represented in the deferred tax asset account. Thus, Taxpayer argued that the rate base should be reduced as of the end of Year D by its federal ADIT balance net of the deferred tax asset account attributable to the federal NOLC. It based this position on its determination that this net amount represented the true measure of federal income taxes deferred on account of its claiming accelerated tax depreciation deductions and, consequently, the actual quantity of "cost-free" capital available to it. It also asserted that the failure to reduce its rate base offset by the deferred tax asset attributable to the federal NOLC would be inconsistent with the normalization rules Testimony by another participant in Case argued against Taxpayer's proposed calculation of ADIT.

Commission A, in an order issued on Date D, held that it is inappropriate to include the NOL in rate base for ratemaking purposes. Commission A further stated that it is the intent of the Commission that Taxpayer comply with the normalization method of accounting and tax normalization regulations. Commission noted that if Taxpayer later obtains a ruling from the IRS which affirms Taxpayer's position, Taxpayer may file seeking an adjustment. Commission A also held that to the extent tax normalization rules require recording the NOL to rate base in the specified years, no rate of return is authorized.

Taxpayer requests that we rule as follows:

> 1. Under the circumstances described above, the reduction of Taxpayer's rate base by the full amount of its ADIT account balance unreduced by the balance of its NOLC-related account balance would be inconsistent with (and, hence, violative of) the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
>
> 2. For purposes of Ruling 1 above, the use of a balance of Taxpayer's NOLC-related account balance that is less than the amount attributable to accelerated depreciation computed on a "with and without" basis would be inconsistent with (and, hence, violative of) the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
>
> 3. Under the circumstances described above, the assignment of a zero rate of return to the balance of Taxpayer's NOLC-related account balance would be inconsistent with (and, hence, violative of) the requirements of § 168(i)(9) and § 1.167(l)-1.

Law and Analysis

Section 168(f)(2) of the Code provides that the depreciation deduction determined under section 168 shall not apply to any public utility property (within the meaning of section 168(i)(10)) if the taxpayer does not use a normalization method of accounting.

In order to use a normalization method of accounting, section 168(i)(9)(A)(i) of the Code requires the taxpayer, in computing its tax expense for establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, to use a method of depreciation with respect to public utility property that is the same as, and a depreciation period for such property that is not shorter than, the method and period used to compute its depreciation expense for such purposes. Under section 168(i)(9)(A)(ii), if the amount allowable as a deduction under section 168 differs from the amount that-would be allowable as a deduction under section 167 using the method, period, first and last year convention, and salvage value used to compute regulated tax expense under section 168(i)(9)(A)(i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

Section 168(i)(9)(B)(i) of the Code provides that one way the requirements of section 168(i)(9)(A) will not be satisfied is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with such requirements. Under section 168(i)(9)(B)(ii), such inconsistent procedures and adjustments include the use of an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under section 168(i)(9)(A)(ii), unless such estimate or projection is also used, for ratemaking purposes, with respect to all three of these items and with respect to the rate base.

Former section 167(l) of the Code generally provided that public utilities were entitled to use accelerated methods for depreciation if they used a "normalization method of accounting." A normalization method of accounting was defined in former section 167(l)(3)(G) in a manner consistent with that found in section 168(i)(9)(A). Section 1.167(l)-1(a)(1) of the Income Tax Regulations provides that the normalization requirements for public utility property pertain only to the deferral of federal income tax liability resulting from the use of an accelerated method of depreciation for computing the allowance for depreciation under section 167 and the use of straight-line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. These regulations do not pertain to other book-tax timing differences with respect to state income taxes, F.I.C.A. taxes, construction costs, or any other taxes and items.

Section 1.167(l)-1(h)(1)(i) provides that the reserve established for public utility property should

reflect the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes.

Section 1.167(l)-1(h)(1)(iii) provides that the amount of federal income tax liability deferred as a result of the use of different depreciation methods for tax and ratemaking purposes is the excess (computed without regard to credits) of the amount the tax liability would have been had the depreciation method for ratemaking purposes been used over the amount of the actual tax liability. This amount shall be taken into account for the taxable year in which the different methods of depreciation are used. If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (1) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (1) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Section 1.167(l)-1(h)(2)(i) provides that the taxpayer must credit this amount of deferred taxes to a reserve for deferred taxes, a depreciation reserve, or other reserve account. This regulation further provides that, with respect to any account, the aggregate amount allocable to deferred tax under section 167(1) shall not be reduced except to reflect the amount for any taxable year by which Federal income taxes are greater by reason of the prior use of different methods of depreciation. That section also notes that the aggregate amount allocable to deferred taxes may be reduced to reflect the amount for any taxable year by which federal income taxes are greater by reason of the prior use of different methods of depreciation under section 1.167(l)-1(h)(1)(i) or to reflect asset retirements or the expiration of the period for depreciation used for determining the allowance for depreciation under section 167(a).

Section 1.167(l)-1(h)(6)(i) provides that, notwithstanding the provisions of subparagraph (1) of that paragraph, a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes under section 167(l) which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking.

Section 1.167(l)-1(h)(6)(ii) provides that, for the purpose of determining the maximum amount of the reserve to be excluded from the rate base (or to be included as no-cost capital) under subdivision (i), above, if solely an historical period is used to determine depreciation for Federal income tax

expense for ratemaking purposes, then the amount of the reserve account for that period is the amount of the reserve (determined under section 1.167(l)-1(h)(2)(i)) at the end of the historical period. If such determination is made by reference both to an historical portion and to a future portion of a period, the amount of the reserve account for the period is the amount of the reserve at the end of the historical portion of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during the future portion of the period.

Section 1.167(l)-1(h) requires that a utility must maintain a reserve reflecting the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes. Taxpayer has done so. Section 1.167(l)-1(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Section 56(a)(1)(D) provides that, with respect to public utility property the Secretary shall prescribe the requirements of a normalization method of accounting for that section.

Regarding the first issue, § 1.167(l)-1(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Because the ADIT account, the reserve account for deferred taxes, reduces rate base, it is clear that the portion of an NOLC that is attributable to accelerated depreciation must be taken into account in calculating the amount of the reserve for deferred taxes (ADIT). Thus, the order by Commission A is not in accord with the normalization requirements.

Regarding the second issue, § 1.167(l)-1(h)(1)(iii) makes clear that the effects of an NOLC must be taken into account for normalization purposes. Section 1.167(l)-1(h)(1)(iii) provides generally that, if, in respect of any year, the use of other than regulatory depreciation for tax purposes results in an NOLC carryover (or an increase in an NOLC which would not have arisen had the taxpayer claimed only regulatory depreciation for tax purposes), then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director. While that section provides no specific mandate on methods, it does provide that the Service has discretion to determine whether a particular method satisfies the normalization requirements. The "with or without" methodology employed by Taxpayer is specifically designed to ensure that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the

amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated depreciation to ratepayers. Under these facts, any method other than the "with and without" method would not provide the same level of certainty and therefore the use of any other methodology is inconsistent with the normalization rules.

Regarding the third issue, assignment of a zero rate of return to the balance of Taxpayer's NOLC-related account balance would, in effect, flow the tax benefits of accelerated depreciation deductions through to rate payers. This would violate the normalization provisions.

We rule as follows:

1. Under the circumstances described above, the reduction of Taxpayer's rate base by the full amount of its ADIT account balance unreduced by the balance of its NOLC-related account balance would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
2. For purposes of Ruling 1 above, the use of a balance of Taxpayer's NOLC-related account balance that is less than the amount attributable to accelerated depreciation computed on a "with and without" basis would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
3. Under the circumstances described above, the assignment of a zero rate of return to the balance of Taxpayer's NOLC-related account balance would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.

This ruling is based on the representations submitted by Taxpayer and is only valid if those representations are accurate. The accuracy of these representations is subject to verification on audit.

Except as specifically determined above, no opinion is expressed or implied concerning the Federal income tax consequences of the matters described above.

This ruling is directed only to the taxpayer who requested it. Section 6110(k)(3) of the Code provides it may not be used or cited as precedent. In accordance with the power of attorney on file with this office, a copy of this letter is being sent to your authorized representative. W e are also sending a copy of this letter ruling to the Director.

Sincerely,

Peter C. Friedman

Private Letter Ruling 201436037, 09/05/14, IRC Sec(s). 167

UIL No. 167.22-01

Accelerated depreciation-accumulated deferred income tax-net operating loss carryover-computation based on with or without basis-normalization-limitations on reasonable allowance in case of property of public utilities.

Headnote:

Reduction of regulated electric utility's rate base by full amount of its ADIT account balances offset by portion of its NOLC-related account that is less than amount attributable to accelerated depreciation computed on "with or without" basis would be inconsistent with Code Sec. 168(i)(9); and Reg § 1.167(l)-1 requirements.

Dear [Redacted Text]:

This letter responds to the request, dated November 25, 2013, of Taxpayer for a ruling on the application of the normalization rules of the Internal Revenue Code to certain accounting and regulatory procedures, described below.

The representations set out in your letter follow.

Taxpayer is a regulated public utility incorporated in State A and State B. It is wholly owned by Parent. Taxpayer is engaged in the transmission, distribution, and supply of electricity in State A and State C. Taxpayer is subject to the regulatory jurisdiction of Commission A, Commission B, and Commission C with respect to terms and conditions of service and particularly the rates it may charge for the provision of service. Taxpayer's rates are established on a rate of return basis. Taxpayer takes accelerated depreciation, including "bonus depreciation" where available and, for each year beginning in Year A and ending in Year B, Taxpayer individually (as well as the consolidated return filed by Parent) has or expects to, produce a net operating loss (NOL). On its regulatory books of account, Taxpayer "normalizes" the differences between regulatory depreciation and tax depreciation. This means that, where accelerated depreciation reduces taxable income, the taxes that a taxpayer would have paid if regulatory depreciation (instead of accelerated tax depreciation) were claimed constitute "cost-free capital" to the taxpayer. A taxpayer that normalizes these differences, like Taxpayer, maintains a reserve account showing the amount of tax liability that is deferred as a result of the accelerated depreciation. This reserve is the accumulated deferred income tax (ADIT) account. Taxpayer maintains an ADIT account. In addition, Taxpayer maintains an offsetting series of entries - a "deferred tax asset" and a "deferred tax expense" - that reflect that portion of those `tax losses' which, while due to accelerated depreciation, did not actually defer tax because of the existence of an net operating loss carryover (NOLC). Taxpayer, for normalization purposes, calculates the portion of the NOLC attributable to accelerated depreciation using a "with or without" methodology, meaning that an NOLC is attributable to accelerated depreciation to the extent of the lesser of the accelerated depreciation or the NOLC.

Taxpayer filed a general rate case with Commission B on Date A (Case). The test year used in the Case was the 12 month period ending on Date B. In computing its income tax expense element of cost of service, the tax benefits attributable to accelerated depreciation were normalized in accordance with Commission B policy and were not flowed thru to ratepayers. The data originally filed in Case included six months of forecast data, which the Taxpayer updated with actual data in the course of proceedings. In establishing the rate base on which Taxpayer was to be allowed to earn a return Commission B offset rate base by Taxpayer's ADIT balance, using a 13-month average of the month-end balances of

the relevant accounts. Taxpayer argued that the ADIT balance should be reduced by the amounts that Taxpayer calculates did not actually defer tax due to the presence of the NOLC, as represented in the deferred tax asset account. Testimony by various other participants in Case argued against Taxpayer's proposed calculation of ADIT. One proposal made to Commission B was, if Commission B allowed Taxpayer to reduce the ADIT balance as Taxpayer proposed, then Taxpayer's income tax expense element of service should be reduced by that same amount.

Commission B, in an order issued on Date C, allowed Taxpayer to reduce ADIT by the amount that Taxpayer calculates did not actually defer tax due to the presence of the NOLC and ordered Taxpayer to seek a ruling on the effects of an NOLC on ADIT. Rates went into effect on Date C.

Taxpayer proposed, and Commission B accepted, that it be permitted to annualize, rather than average, its reliability plant additions and to extend the period of anticipated reliability plant additions to be included in rate base for an additional quarter. Taxpayer also proposed, and Commission B accepted, that no additional ADIT be reflected as a result of these adjustments inasmuch as any additional book and tax depreciation produced by considering these assets would simply increase Taxpayer's NOLC and thus there would be no net impact on ADIT.

Taxpayer requests that we rule as follows:

> 1. Under the circumstances described above, the reduction of Taxpayer's rate base by the full amount of its ADIT account balances offset by a portion of its NOLC-related account balance that is less than the amount attributable to accelerated depreciation computed on a "with or without" basis would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
> 2. The imputation of incremental ADIT on account of the reliability plant addition adjustments described above would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.
> 3. Under the circumstances described above, any reduction in Taxpayer's tax expense element of cost of service to reflect the tax benefit of its NOLC would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.

Law and Analysis

Section 168(f)(2) of the Code provides that the depreciation deduction determined under section 168 shall not apply to any public utility property (within the meaning of section 168(i)(10)) if the taxpayer does not use a normalization method of accounting.

In order to use a normalization method of accounting, section 168(i)(9)(A)(i) of the Code requires the taxpayer, in computing its tax expense for establishing its cost of service for ratemaking purposes

and reflecting operating results in its regulated books of account, to use a method of depreciation with respect to public utility property that is the same as, and a depreciation period for such property that is not shorter than, the method and period used to compute its depreciation expense for such purposes. Under section 168(i)(9)(A)(ii), if the amount allowable as a deduction under section 168 differs from the amount that-would be allowable as a deduction under section 167 using the method, period, first and last year convention, and salvage value used to compute regulated tax expense under section 168(i)(9)(A)(i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

Section 168(i)(9)(B)(i) of the Code provides that one way the requirements of section 168(i)(9)(A) will not be satisfied is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with such requirements. Under section 168(i)(9)(B)(ii), such inconsistent procedures and adjustments include the use of an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under section 168(i)(9)(A)(ii), unless such estimate or projection is also used, for ratemaking purposes, with respect to all three of these items and with respect to the rate base.

Former section 167(l) of the Code generally provided that public utilities were entitled to use accelerated methods for depreciation if they used a "normalization method of accounting." A normalization method of accounting was defined in former section 167(l)(3)(G) in a manner consistent with that found in section 168(i)(9)(A). Section 1.167(1)-1(a)(1) of the Income Tax Regulations provides that the normalization requirements for public utility property pertain only to the deferral of federal income tax liability resulting from the use of an accelerated method of depreciation for computing the allowance for depreciation under section 167 and the use of straight-line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. These regulations do not pertain to other book-tax timing differences with respect to state income taxes, F.I.C.A. taxes, construction costs, or any other taxes and items.

Section 1.167(l)-1(h)(1)(i) provides that the reserve established for public utility property should reflect the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes.

Section 1.167(1)-1(h)(1)(iii) provides that the amount of federal income tax liability deferred as a result of the use of different depreciation methods for tax and ratemaking purposes is the excess (computed without regard to credits) of the amount the tax liability would have been had the depreciation method for ratemaking purposes been used over the amount of the actual tax liability. This

amount shall be taken into account for the taxable year in which the different methods of depreciation are used. If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (1) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (1) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Section 1.167(1)-1(h)(2)(i) provides that the taxpayer must credit this amount of deferred taxes to a reserve for deferred taxes, a depreciation reserve, or other reserve account. This regulation further provides that, with respect to any account, the aggregate amount allocable to deferred tax under section 167(1) shall not be reduced except to reflect the amount for any taxable year by which Federal income taxes are greater by reason of the prior use of different methods of depreciation. That section also notes that the aggregate amount allocable to deferred taxes may be reduced to reflect the amount for any taxable year by which federal income taxes are greater by reason of the prior use of different methods of depreciation under section 1.167(1)-1(h)(1)(i) or to reflect asset retirements or the expiration of the period for depreciation used for determining the allowance for depreciation under section 167(a).

Section 1.167(1)-(h)(6)(i) provides that, notwithstanding the provisions of subparagraph (1) of that paragraph, a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes under section 167(l) which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking.

Section 1.167(1)-(h)(6)(ii) provides that, for the purpose of determining the maximum amount of the reserve to be excluded from the rate base (or to be included as no-cost capital) under subdivision (i), above, if solely an historical period is used to determine depreciation for Federal income tax expense for ratemaking purposes, then the amount of the reserve account for that period is the amount of the reserve (determined under section 1.167(1)-1(h)(2)(i)) at the end of the historical period. If such determination is made by reference both to an historical portion and to a future portion of a period, the amount of the reserve account for the period is the amount of the reserve at the end of the historical portion of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during the future portion of the period.

Section 1.167(l)-1(h) requires that a utility must maintain a reserve reflecting the total amount of the deferral of federal income tax liability resulting from the taxpayer's use of different depreciation methods for tax and ratemaking purposes. Taxpayer has done so. Section 1.167(1)-(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Section 56(a)(1)(D) provides that, with respect to public utility property the Secretary shall prescribe the requirements of a normalization method of accounting for that section.

In Case, Commission B has reduced rate base by Taxpayer's ADIT account, as modified by the account which Taxpayer has designed to calculate the effects of the NOLC. Section 1.167(1)-1(h)(1)(iii) makes clear that the effects of an NOLC must be taken into account for normalization purposes. Further, while that section provides no specific mandate on methods, it does provide that the Service has discretion to determine whether a particular method satisfies the normalization requirements. Section 1.167(1)-(h)(6)(i) provides that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Because the ADIT account, the reserve account for deferred taxes, reduces rate base, it is clear that the portion of an NOLC that is attributable to accelerated depreciation must be taken into account in calculating the amount of the reserve for deferred taxes (ADIT). Thus, the order by Commission B is in accord with the normalization requirements. The "with or without" methodology employed by Taxpayer is specifically designed to ensure that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated depreciation to ratepayers. Under these facts, any method other than the "with and without" method would not provide the same level of certainty and therefore the use of any other methodology is inconsistent with the normalization rules.

Regarding the second issue, § 1.167(1)-(h)(6)(i) provides, as noted above, that a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes which is excluded from the base to which the taxpayer's rate of return is applied exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's expense in computing cost of service in such ratemaking. Increasing Taxpayer's ADIT

account by an amount representing those taxes that would have been deferred absent the NOLC increases the ADIT reserve account (which will then reduce rate base) beyond the permissible amount.

Regarding the third issue, reduction of Taxpayer's tax expense element of cost of service, we believe that such reduction would, in effect, flow through the tax benefits of accelerated depreciation deductions through to rate payers even though the Taxpayer has not yet realized such benefits. This would violate the normalization provisions.

We rule as follows:

1. Under the circumstances described above, the reduction of Taxpayer's rate base by the full amount of its ADIT account balances offset by a portion of its NOLC-related account balance that is less than the amount attributable to accelerated depreciation computed on a "with or without" basis would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1 of the Income Tax regulations.
2. The imputation of incremental ADIT on account of the reliability plant addition adjustments described above would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.
3. Under the circumstances described above, any reduction in Taxpayer's tax expense element of cost of service to reflect the tax benefit of its NOLC would be inconsistent with the requirements of § 168(i)(9) and § 1.167(l)-1.

This ruling is based on the representations submitted by Taxpayer and is only valid if those representations are accurate. The accuracy of these representations is subject to verification on audit.

Except as specifically determined above, no opinion is expressed or implied concerning the Federal income tax consequences of the matters described above.

This ruling is directed only to the taxpayer who requested it. Section 6110(k)(3) of the Code provides it may not be used or cited as precedent. In accordance with the power of attorney on file with this office, a copy of this letter is being sent to your authorized representative. W e are also sending a copy of this letter ruling to the Director.

Sincerely,

Peter C. Friedman

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is David A. Hodgson. My business address is American Electric Power, 1 Riverside Plaza, Columbus, Ohio 43215.

Q. PLEASE INDICATE BY WHOM YOU ARE EMPLOYED AND IN WHAT CAPACITY.

A. I am a Tax Accounting & Regulatory Support Manager for American Electric Power Service Corporation (AEPSC), a wholly owned subsidiary of American Electric Power Company, Inc. (AEP).

Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATIONAL BACKGROUND AND BUSINESS EXPERIENCE.

A. I graduated from The Ohio State University with a Bachelor of Science in Business Administration in Accounting. In 2000, I accepted a position with AEPSC as a Tax Analyst V. I was promoted to positions from Tax Analyst IV to Tax Analyst I over the course of 2002–2009. In 2011, I was promoted to Sr. Tax Analyst and later that year to Tax Project Manager and in 2013 to Tax Manager. I was promoted to my current position in 2019. As Tax Accounting & Regulatory Support Manager, I participate in the recording of the tax accounting entries and records and the review of federal and state tax returns of AEP and its subsidiaries. I am also responsible for coordinating and developing state and federal tax data provided by the AEPSC Tax Department for use in regulatory proceedings. I have attended numerous tax, accounting, and regulatory seminars throughout my professional career.

II. PURPOSE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of my testimony is to present and sponsor the G-7 tax schedules included in the Rate Filing Package (RFP) and federal income tax amounts included in the cost of service and rate base for the Company for the historical test year. I will specifically discuss:

- Federal Income Taxes included in cost of service;
- Tax Schedules provided in the Rate Filing Package (RFP); and
- Proforma Adjustments.

Q. WHAT IS THE AMOUNT OF FEDERAL INCOME TAX EXPENSE THE COMPANY IS REQUESTING TO BE INCLUDED IN RATES?

A. The Company is requesting the amount of federal income tax expense that is included in the cost of service reflected on Schedule G-7.

Q. WHAT IS THE TEST YEAR FOR WHICH THE TAX SCHEDULES ARE PROVIDED?

A. Amounts in the schedules are shown for the historical test year with adjustments, for the 12-month period ended March 31, 2020.

Q. WHAT IS THE SOURCE OF INFORMATION USED FOR THE PREPARATION OF THE TAX SCHEDULES INCLUDED IN THIS RATE FILING?

A. All amounts included in the tax schedules for this rate filing are taken from the books and records of the Company.

III. SCHEDULES SPONSORED

Q. PLEASE LIST THE SCHEDULES THAT YOU ARE SPONSORING AND PROVIDE A BRIEF SUMMARY OF EACH.

A. I sponsor the following schedules:

- Schedule G-7: This schedule shows the calculation of federal income taxes using the "return" method for the test year by function. This schedule represents what is known as the Method 1 calculation of test year federal income tax expense. This schedule starts with the return on rate base and adjusts this return by subtracting interest synchronization, investment tax credit (ITC) amortization, excess deferred federal income taxes (EDFIT) amortization and other permanent deductions. Flow-through depreciation and non-deductible expenses are then added to the return amount to arrive at the taxable component of return. This taxable component of return is multiplied by the applicable tax factor (tax rate divided by 1 minus the tax rate) to arrive at federal income taxes before adjustments. This federal income tax amount is then adjusted for applicable ITC amortization, EDFIT amortization, and other credits to arrive at total federal income tax expense.
- Schedule G-7.1: This schedule is the reconciliation of book net income to taxable net income for the test year and for the most recent year for which a federal income tax return was filed. The workpapers for Schedule G-7.1 contain explanations of all items in the reconciliation for both the test year and the tax return.
- Schedule G-7.1a: This schedule includes a listing of timing differences and other items that produce federal income tax at a tax rate different than the statutory 21% tax rate, with explanations describing each item.
- Schedule G-7.2: This schedule provides the tax basis, tax in-service date, tax depreciation methods, tax depreciation in the test year and projected for the two subsequent years, and amount of Accumulated Deferred Federal Income Tax (ADFIT) as of the test year end for all generation plants purchased or constructed since the Company's last rate case. This schedule is not applicable for this filing as the Company has not purchased or constructed any generation plants since the last rate case.
- Schedule G-7.3 (HS) (all): These schedules are not applicable to SWEPCO. In the 2013 Regular Session, Senate Bill 1364 repealed the language in Public Regulatory Act § 36.060 regarding the consolidated tax savings adjustment. The 2018 federal income tax consolidated return, which was filed in October 2019 is included as part of the RFP as a workpaper to Schedule G-7.13 and is treated as highly sensitive, protected material.
- Schedule G-7.4: This schedule shows the balance sheet amount of ADFIT for the twelve months of the test year; at the end of the test year; and the additions and

reductions for the test year, as well as the requested adjustments to the balances. Each item that gives rise to ADFIT is shown separately on this schedule.

- Schedule G-7.4a: This schedule describes the nature of each timing difference listed in Schedule G-7.4 that gives rise to an ADFIT deferral.
- Schedule G-7.4b: This schedule shows the details of the adjustments to the balance sheet ADFIT accounts. The reasons for these adjustments are included as well as the supporting calculations, if any.
- Schedule G-7.4c: This schedule provides the ADFIT and Accumulated Deferred Investment Tax Credit (ADITC) at test year-end related to additions to generating plant in service since the Company's last rate filing. This generation plant addition information is provided on Schedule G-7.2. Neither schedule is applicable for this filing as the Company has not purchased or constructed any generation plants since the last rate case.
- Schedule G-7.4d: This schedule provides the ADFIT associated with rate case expense from prior proceedings.
- Schedule G-7.5: This schedule presents the analysis of the ITC adjustment for Deferred Investment Tax Credit (DITC) to be included in cost of service. The "stripped" book depreciation rate requested is derived from the book depreciation calculation. This rate represents the life or investment portion of the book depreciation rate without regard to amounts for cost of removal or salvage. The stripped depreciation rate is multiplied by the ITC amortization base to calculate the annual amount of DITC amortization that is included in cost of service. This DITC amortization is included in cost of service as a reduction of tax expense. The stripped depreciation rate is used in this computation to avoid a potential normalization violation that could result if the ITCs were amortized in cost of service at a rate more rapid than ratably. As described later, Section 46(f)(2) of the Internal Revenue Code (the Code) requires that these credits be amortized in cost of service no more rapidly than ratably.
- Schedule G-7.5a: This schedule is a summary of all ITC utilized by the Company for tax return purposes. The schedule shows the ITC by year adjusted for ITC recapture. The totals from this schedule support the ITC amortization base found on G-7.5.
- Schedule G-7.5b: This schedule presents ITCs that have been generated but not utilized by the Company. All ITC that has been generated has been utilized.
- Schedule G-7.5c: This schedule shows ITC utilized by the Company as if it had filed its tax return on a separate return basis taking into account the limitations included in the Code based on the separate return methodology.
- Schedule G-7.5d: This schedule indicates the tax elections made by Southwestern Electric Power Company (SWEPCO) with regard to ITC. There have not been any new ITC elections made since Docket No. 46449. In 1971, SWEPCO made the Section 46(f)(2) election concerning treatment of ITC for ratemaking purposes.

This Code section requires that these credits be amortized in the cost of service no more rapidly than ratably, with no rate base reduction. The Pre-1971 ITC utilized for rate purposes was not restricted by the Code and is therefore afforded both rate base reduction as well as cost of service amortization. The Pre-1971 ITC has been fully amortized and is not a consideration in this filing.

- Schedule G-7.5e: This schedule shows the balance of the unamortized ADITC in FERC Account No. 255 – ADITCs as of March 31, 2020.

- Schedule G-7.6: This schedule calculates federal income tax expense for the test year using Tax Method 2. This method of calculating federal income tax expense determines the current and deferred components of federal income tax expense separately. The components of federal income tax expense shown on this schedule include taxes currently payable, deferred taxes, and DITC amortization. The Tax Method 2 calculation of federal income tax is equal to the amount of federal income tax computed under the Return Method (see Schedule G-7.8).

- Schedule G-7.6a: This schedule is an analysis of each deferred tax item that makes up the deferred tax expense in Schedule G-7.6.

- Schedule G-7.7: This schedule provides the detail support for the requested adjustment to return for additional depreciation. This schedule summarizes the major components related to flow-through book depreciation for which there is no deferred tax benefit.

- Schedule G-7.8: This schedule provides the calculation of federal income tax expense using the return method. This schedule is identical to Schedule G-7, Federal Income Taxes.

- Schedule G-7.9: This schedule summarizes the amortization of protected and unprotected EDFIT and the amortization methodology utilized. At the time of this filing, the Public Utility Commission of Texas (the Commission) has not issued an order for the amortization of SWEPCO's unprotected EDFIT. As described in the testimony of Company witnesses Michael Baird and Tom Brice, the Company is proposing to utilize the customer benefit of the unamortized balance of EDFIT to partially offset the undepreciated book cost of the Dolet Hills Power Station. Therefore, no amortization of unprotected EDFIT is reflected as a benefit to tax expense in the cost of service.

- Schedule G-7.9a: This schedule shows the details of the information contained in Schedule G-7.9 by timing difference. This information includes the remaining excess deferred tax balance at the end of the test year and the requested amortization for each item.

- Schedule G-7.9b: This schedule provides the ADFIT balances and adjustments by timing difference due to the tax rate change of 35% to 21% as codified by the Tax Cuts and Jobs Act (TCJA). It shows the balances just prior to enactment of the rate change as well as the remeasurement for the 14% rate differential and the balance after adjustment. The remeasurement of each individual timing difference is offset

by a new excess ADFIT timing difference for a net zero impact on ADFIT and maintaining rate base neutrality.

- Schedule G-7.9c: Normally this schedule would provide balances at the end of the year in accounts established by the Commission for reserve accounting. The Company has no such reserve accounting requirements, therefore this schedule is not applicable for this filing.
- Schedule G-7.10: Normally, this schedule would list and explain all effects on federal income tax and ADFIT of any Company accounting order (cost) deferrals. SWEPCO has no such accounting orders, therefore this schedule is not applicable for this filing.
- Schedule G-7.11: Normally, this schedule would list and explain all effects on federal income tax and ADFIT of any Company post-test year adjustments. The Company has no post-test year adjustments, therefore this schedule is not applicable for this filing.
- Schedule G-7.12: Normally, this schedule would provide an explanation of how federal income tax and ADFIT would be impacted by a rate moderation plan request. The Company has not requested a rate moderation plan, therefore this schedule is not applicable for this filing.
- Schedule G-7.12a: Normally, this schedule would provide an explanation of how federal income tax and ADFIT are treated in any existing rate moderation plans. SWEPCO does not have any existing rate moderation plans, therefore this schedule is not applicable for this filing.
- Schedule G-7.13: This schedule lists all witnesses that are filing testimony in this case that supports federal income tax and ADFIT. In addition, this schedule indicates that the most recent tax return filed should be included as a workpaper. As indicated above, the most recent tax return filed (for the year 2018) is included as a workpaper to Schedule G-7.13.
- Schedule G-7.13a: This schedule details the history of tax normalization for the Company and also provides details for timing items in which deferred taxes were not provided, resulting in flow-through differences.
- Schedule G-7.13b: Tax elections made by SWEPCO are detailed in this schedule. Certain provisions in the Code require taxpayers to include elections in returns specifying the tax treatment selected by the taxpayer which may be binding on future treatment of like transactions.
- Schedule G-7.13c: This schedule provides an explanation of any changes in the Company's accounting for deferred federal income taxes that would have an impact on regulatory ratemaking. The Company has not made any changes to its method of accounting since its most recent rate filing.
- Schedule G-7.13d: This schedule explains the Company's current audit status with the Internal Revenue Service. SWEPCO is currently being audited for amended

returns filed for the years 2014 through 2017. The year 2018 is open under the general statute of limitations.

- Schedule G-7.13e (HS): This schedule includes a list of Private Letter Rulings received by SWEPCO or its parent company since the Company's last rate filing.
- Schedule G-7.13f (HS): This schedule relates to the accounting for Net Operating Loss (NOL) carryforwards. It presents the taxable income and losses that have contributed to the NOLC representative of the utility operations of the Company. It also demonstrates the journal entries that the Company would use to record both the generation and utilization of NOLs.
- Schedule B-1: This schedule details the various rate base accounts and accumulated provision accounts included in rate base for the historical test year. Amounts that I sponsor on this schedule are the Total Company ADFIT balances, SFAS 109 regulatory assets and liabilities, and Pre-1971 unamortized deferred ITC. Other items on this schedule are sponsored by and discussed in the testimony of Company witness Michael Baird.

IV. ACCOUNTING FOR INCOME TAXES

Q. CAN YOU PLEASE DESCRIBE NORMALIZED INCOME TAX ACCOUNTING?

A. Accounting Standards Codification (ASC) 740 covers how companies should both account for and report taxes based on income. The two basic objectives of ASC 740 are to recognize both the amount of taxes that are either payable or refundable for the current tax year as well as to recognize the deferred tax assets and liabilities for the future tax consequences that have been recognized in a company's financial statements. The accounting for income taxes called for by ASC 740 is known as normalized income tax accounting. Normalization accounting for income taxes calculates income tax expense on the pre-tax items of income and expense recorded for financial statement purposes or included in the cost of service for ratemaking purposes. The income tax expense is then adjusted for permanent differences between income recorded for financial reporting (book) purposes and income determined for income tax reporting

(tax) purposes. Tax expense is then divided between the amount currently payable to the IRS and the amount that must be paid in the future. This division between current and deferred tax expense is calculated based on certain temporary differences between book and taxable income. The tax expense incurred in the current year for which payment is deferred due to temporary book/tax differences is recorded on the balance sheet as an ADFIT liability or asset, whichever the case may be.

Q. PLEASE EXPLAIN WHAT NORMALIZATION TAX ACCOUNTING MEANS IN THE CONTEXT OF A PUBLIC UTILITY COMPANY.

A. For a public utility company, normalization is a method of accounting in which the tax benefits of accelerated depreciation on public utility assets are shared with customers ratably over the regulatory useful life of the assets in the form of reduced rates.

Q. CAN YOU EXPLAIN FLOW-THROUGH TAX ACCOUNTING AND HOW THAT DIFFERS FROM NORMALIZED TAX ACCOUNTING?

A. The flow-through method of tax accounting looks only at the amount of taxes that are payable or refundable for the current tax year and does not recognize the future benefit or detriment of temporary differences in income recorded for book purposes and income determined for tax purposes. This method treats any temporary difference as a permanent increase or decrease in the income taxes for the period depending on the direction of the temporary difference. This method results in benefits and detriments being allocated among customers in different periods depending on when a temporary difference originates and reverses. For example, a timing difference that results in a deduction in Year 1 would be enjoyed by the set of customers of the company in Year 1 as a reduction to the current year taxes payable. However, if this timing difference

were to reverse in Year 2, the detriment of the increase to the current year taxes payable would be borne by the set of customers of the company in Year 2, which, of course, is not necessarily the same set of customers as in Year 1. As the flow-through method only recognizes the current tax payable or receivable and ignores the impact of future tax impacts from timing differences, there is no deferred tax expense and as a result no ADFIT that would be provided as a reduction to rate base.

Q. IN YOUR DESCRIPTION OF NORMALIZED TAX ACCOUNTING YOU DISCUSS TEMPORARY DIFFERENCES, CAN YOU PLEASE EXPLAIN THIS CONCEPT?

A. Yes. A temporary difference is a difference in the timing of recognition of an item of book income and taxable income that occurs in one year and reverses in another. A temporary difference does not change the overall income tax expense payable over the life of the underlying timing difference, it simply impacts the timing of the payment of a liability. Under the normalized tax accounting method, such temporary differences do not have an impact on the overall tax expense for the period.

An example of a temporary difference and one that is generally the largest in magnitude for a public utility company results from the use of accelerated depreciation for tax purposes. While depreciation of an asset can only equal the cost of such asset and can only be recognized over the life of the asset, a temporary difference can occur when there are differing depreciation methods. For tax purposes accelerated tax depreciation may be taken whereas for book purposes the depreciation expense recognized for that same asset is calculated using the straight-line method. Over the life of the asset, the same total amount of depreciation will be recognized. However,

under the accelerated depreciation method used for tax purposes, those deductions will be recognized to a greater extent in the earlier years as compared to the straight-line method. This results in taxable income that is lower in the earlier years. As the straight-line depreciation begins to exceed the accelerated depreciation in the later years, it results in a taxable income that is higher than book income. Over the life of the asset, the amount of depreciation deducted from income for both book and tax will be the same and the only impact will be the period in which the deductions are recognized.

Q. WHAT ARE PERMANENT DIFFERENCES AND HOW DO THEY DIFFER FROM TEMPORARY DIFFERENCES?

A. As described in my testimony, a temporary difference results only in a change in the period in which an item of income or expense is recognized for book and tax. A permanent difference is an item of income or expense that will never be recognized for either book income or for taxable income. These differences arise due to the different rules that pertain to book accounting and the tax law. Because it is an item that will never be recognized for one or the other, it results in a difference that will not reverse over time as in the case of a temporary difference.

An example of a permanent difference is meals and entertainment expenses. For book purposes, these expenses are generally recognized and reduce the overall net income of the company. However, for tax purposes entertainment expenses are not allowed as a deduction from income and generally only 50% of the cost of meals allowed as a deduction from income. The difference between the book deduction and the tax deduction for these expenses is one that will never reverse even over the course

of time. Therefore, tax expense must be increased by the tax on the non-deductible amount of these expenses.

Q. WHAT IS AN NOL?

A. A net operating loss or NOL occurs when, in a given year, a taxpayer has more deductions than taxable revenues. When an NOL occurs, the Code allows the taxpayer to carry the NOL forward to subsequent years and offset otherwise taxable income produced in that future year.

Q. ARE THERE NORMALIZATION REQUIREMENTS INCLUDED WITHIN THE CODE?

A. Yes. The Code and accompanying treasury regulations provide normalization requirements and specifically in three areas: 1) Accelerated depreciation and the associated deferred tax liability (DTL) that results from its use; 2) Net Operating Loss Carryforwards (NOLC) as a result of accelerated depreciation; and 3) Investment Tax Credits (ITC).

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS IN THE CODE AS IT RELATES TO ACCELERATED DEPRECIATION?

A. The Code dictates that a regulated public utility must use the normalization method of accounting to calculate tax expense on temporary differences associated with accelerated depreciation when determining rates using a cost of service/rate of return methodology. 26 U.S. Code §168(i)(9)(A) states that in order for a public utility to be considered to be using a normalized method of accounting,

> (i) the taxpayer must, in computing its tax expense for purposes of establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, use a method of

> depreciation with respect to such property that is the same as, and a depreciation period for such property that is no shorter than, the method and period used to compute its depreciation expense for such purposes, and
>
> (ii) if the amount allowable as a deduction under this section with respect to such property (respecting all elections made by the taxpayer under this section) differs from the amount that would be allowable as a deduction under section 167 using the method (including the period, first and last year convention, and salvage value) used to compute regulated tax expense under clause (i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference[1].

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS AS THEY RELATE TO NOLC?

A. This is specifically addressed in Treasury Regulation § 1.167(l)-1(h)(1)(iii), which states:

> If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (l) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover (as determined under section 172) to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (l) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Although neither the Code nor the regulations specifically address the manner in which the NOL should be treated in ratemaking under the normalization rules, the IRS has addressed this issue in several private letter rulings (PLRs). PLRs 201436037, 21438003, 201519021, 201534001, 201548017, 201709008, and 202010002[2] clarify

[1] 26 U.S.C. § 168(i)(9)(A).
[2] Included as Exhibits DAH-1 – DAH-7.

that a tax calculation with and without accelerated depreciation is utilized to determine the amount of the NOLC ADFIT required to be normalized. To the extent that accelerated depreciation creates an NOLC, the NOLC ADFIT must be a component of rate base. This can be reflected in rate base through ADFIT in either one of two ways to adhere to the normalization rules. In the first method, the DTL that is a result of accelerated depreciation would simply be reduced by the amount of the NOLC ADFIT. In the second method, the full DTL is included as a rate base reduction and a separate DTA in the amount of the NOLC ADFIT is included as a rate base increase. The result of both is the same in that the impact on rate base includes the net balance of the ADFIT for accelerated depreciation and the ADFIT for the NOLC. The PLRs uniformly conclude that excluding the NOLC ADFIT would constitute a normalization violation.

Q. WHAT IS THE RATIONALE FOR THIS TREATMENT OF THE NOLC ADFIT?

A. When a regulated utility experiences a NOLC, the taxpayer has not yet received the benefit of the depreciation-related ADFIT, i.e., there is no interest free loan from the federal government. Accordingly, the rate base reduction is deferred until the NOLC is utilized and the loan is extended.

Q. PLEASE DESCRIBE THE CONCLUSIONS IN THE PLRS MENTIONED ABOVE.

A. The PLRs mentioned above all relate to whether NOLC ADFIT are required to be included in rate base and the method which is to be used to determine the amount that is required to be included. These PLRs confirm that NOLC ADFIT must be included in rate base to avoid a normalization violation. They describe the NOLC as a necessary reduction to the rate base impact of the DTL associated with accelerated depreciation. Further, the PLRs prescribe a “with-and-without” or “last dollar deducted” approach

for determining the amount of the NOLC ADFIT that must be included in rate base. Both of these approaches look at the hypothetical taxable income of the utility without the deductions for accelerated depreciation. The extent to which a NOLC is then attributable to accelerated depreciation must be included in rate base to avoid a normalization violation. The PLRs all contain language very similar to the following:

> Because the ADIT account [Account 282], the reserve account for deferred taxes, reduces rate base, it is clear that the portion of an NOLC that is attributable to accelerated depreciation must be taken into account in calculating the amount of the reserve for deferred taxes (ADIT)…
>
> The "with or without" [or "last dollar deducted"] methodology employed by Taxpayer is specifically designed to ensure that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated depreciation to ratepayers[3]

Q. IS THE INCLUSION OF AN NOL CARRYFORWARD IN RATE BASE ALSO A SOUND ACCOUNTING AND REGULATORY PRACTICE?

A. Yes. The normalization treatment of an NOLC assures that the customers of a utility receive the benefit of the deferred tax payment associated with accelerated depreciation no sooner than they would be able to do so based on the operations of the utility as an entity that files a separate return. This lines up the timing of customer benefits with the ability of the utility operations to provide those benefits.

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS AS THEY RELATE TO ITC?

[3] Bracketed entry added for clarity.

A. The normalization rules as they relate to ITC require that the benefit of ITC cannot be passed to customers any faster than ratably over the book depreciable life of the underlying assets that generated the ITC. As such, a utility is unable to provide the benefits of the ITC to customers either at the time in which the credit is generated or at the time in which the credit is utilized and reduces the tax liability of the utility. A utility may elect to pass the benefit of ITC to customers through one of two methods as directed by §46(f)(1) and §46(f)(2).

Under §46(f)(1), a utility passes the benefit of the ITC through a reduction to rate base, provided that the reduction is restored not less rapidly than ratably. No adjustment may be made to cost of service on account of the ITC. Under §46(f)(2), a utility shares the benefit of the ITC with customers by amortizing the benefit in the cost of service no more rapidly than ratably over the book life of the property generating the credit. No reduction to rate base is permissible under this method.

Q. ARE THERE REPERCUSSIONS TO NOT FOLLOWING THE NORMALIZATION REQUIREMENTS FOR ACCELERATED DEPRECIATION?

A. Yes. A depreciation-related normalization violation results in the utility no longer being allowed to use accelerated depreciation on all property used to provide regulated service to the jurisdiction in which the violation occurred.[4] In addition, the taxes that have been deferred as a result of the prior accelerated depreciation must be paid to the federal government more quickly than they would be in the absence of the violation.

[4] 26 U.S.C. § 168(f)(2).

Q. WHAT IMPACT WOULD A NORMALIZATION VIOLATION HAVE ON CUSTOMERS?

A. A normalization violation would result in higher utility rates for customers. As noted above, a normalization violation would prevent the utility from claiming deductions for accelerated depreciation and would result in the company paying the IRS more rapidly for the previously deferred taxes. This would result in a lower ADFIT balance which would cause the rate base for the company to increase. As customers pay a return on rate base, any increase in rate base would directly result in higher rates. This lower ADFIT would represent the reduction to a cost-free source of capital for the company.

Q. WHAT IS THE PENALTY FOR AN ITC NORMALIZATION VIOLATION?

A. In the case of an ITC normalization violation, a utility would have to refund to the IRS the balance of the unamortized ITC at the time the violation occurred. This would eliminate the future benefit to customers of any reduction to rates through either a cost of service or rate base reduction.

V. FEDERAL INCOME TAX CALCULATION METHOD

Q. WHAT TAX ACCOUNTING METHODOLOGY DESCRIBED IN YOUR TESTIMONY IS USED IN THE DETERMINATION OF THE TAX EXPENSE REQUESTED IN THIS CASE?

A. The tax expense as presented in this case is calculated using the normalized method of tax accounting. The use of the normalized method is required by 16 Texas Administrative Code Rule §25.231. Specifically, §25.231(b)(1)(D) describes one of the components of allowable expenses as:

Federal income taxes on a normalized basis. Federal income taxes shall be computed according to the provisions of the Public Utility Regulatory Act §36.060.

Q. HOW HAVE FEDERAL INCOME TAXES INCLUDED IN THE COST OF SERVICE BEEN CALCULATED?

A. Federal income taxes have been calculated using the "return" method for the historical test year, as required by the Instructions and Schedules to the RFP. In addition, they are calculated consistent with Generally Accepted Accounting Principles, the FERC Uniform System of Accounts, the Code, including associated Treasury regulations and IRS guidance, and Texas laws and precedent concerning the treatment of taxes in a utility's cost of service.

Q. WHAT IS THE "RETURN" METHOD?

A. The calculation of federal income taxes provided on Schedule G-7 is commonly referred to as the "return" method because it calculates federal income taxes using after-tax return as a starting point. Under this method, the equity return, or total return less interest, is adjusted for items for which there is no tax deduction to offset amounts recovered through revenues, such as book depreciation of permanent and flow-through basis differences, preferred dividend credits, ITC amortization, the reversal of excess ADFIT, and the disallowed tax deduction for business meals. The "return" method calculates federal income tax expense in total with no segregation between current and deferred federal income taxes. The return method tax calculation provided on Schedule G-7 reflects a separate return approach to calculating federal income taxes.

Q. IF THE "RETURN" METHOD DOES NOT SEGREGATE BETWEEN CURRENT AND DEFERRED TAX EXPENSE, HOW IS IT CONSISTENT WITH THE NORMALIZED METHOD?

A. While the "return" method (or Method 1) does not segregate between current and deferred tax expense, it does provide the correct total tax expense of the Company. Schedule G-7.6 demonstrates the Method 2 approach and segregates tax expense between both current and deferred and arrives at the same total tax expense. As described earlier in my testimony, a temporary difference does not have an impact on the overall tax expense of the Company, but rather impacts the timing of when the tax is payable or receivable. Method 2 shows the amount of tax expense in the period that is currently payable as well as the amount of tax expense that is being deferred and to be paid at a later time. The "return" method therefore focuses on items other than temporary differences which would have an impact on total tax expense such as permanent differences, DITC amortization, and EDFIT amortization. The "return" method provides a total tax expense consistent with normalization, but does not provide the tax expense that is deferred and therefore provided as a reduction to rate base as is demonstrated in the Method 2 approach.

VI. SEPARATE RETURN ACCOUNTING

Q. EARILER IN YOUR TESTIMONY YOU STATED THAT THE TAXES REQUESTED IN THIS CASE REPRESENT A SEPARATE RETURN APPROACH TO CALCULATING FEDERAL INCOME TAXES. WHAT IS MEANT BY A "SEPARATE RETURN" APPROACH?

A. The "separate return" methodology calculates income taxes on utility revenues and expenses that are included in the utility's revenue requirement. This approach appropriately allocates income taxes between customers and shareholders using a benefits/burdens criteria. Under this methodology, income tax expense relates to, and results from, the provision of utility service to customers. Additionally, the "separate return" income tax calculation includes an adjustment to synchronize interest. Synchronized interest represents the portion of return which is deductible for tax purposes, and is calculated by multiplying the weighted cost of debt by rate base. Use of synchronized interest in the tax calculation effectively "synchronizes" the calculation of income tax expense with rate base and rate of return. It calculates income taxes consistent with the assumptions used to calculate rate base and the rate of return. Synchronized interest may be more or less than the actual interest deducted on the tax return.

Q. WHY IS THE "SEPARATE RETURN" APPROACH THE PROPER METHODOLOGY TO USE IN CALCULATING FEDERAL INCOME TAXES FOR RATEMAKING PURPOSES?

A. The "separate return" approach includes in the cost of service only income taxes that result from the provision of utility service to customers and, as explained below, is consistent with the Public Utility Regulatory Act (PURA). Federal income taxes requested by the Company are based on revenues and expenses included in the cost of service calculation. There are no additions to or reductions from tax expense resulting from revenues or expenses not included in the Company's request. It is neither appropriate nor equitable to increase or reduce cost of service by tax costs or benefits

that are not related to the rendition of utility service to customers. The use of a separate return approach prevents the cross-subsidization of costs or benefits among affiliate companies. Normalization requires consistency among tax expense, book depreciation expense, rate base, and the deferred tax reserve. [5]

Q. HAS THE COMPANY COMPUTED FEDERAL INCOME TAXES IN ACCORDANCE WITH SECTIONS 36.059 AND 36.060 OF PURA?

A. Yes. PURA §§ 36.059 and 36.060 address the treatment of certain tax benefits, including ITC and consolidated tax savings. Both sections (PURA §36.059(b) and §36.060(c)) specifically require a utility that retains ITC to deduct it from the rate base to which the credit applied, to the extent allowed by the Code. The unamortized balance of ITC is not included as a reduction of rate base because the Company is an "Option 2" company for ITC purposes. Under IRC §46(f), an "Option 2" election requires that the post-1970 ITC be returned to customers over the book life of the property as a reduction of cost of service, rather than as a reduction of rate base. The unamortized balance consists entirely of post-1970 ITC.

Additionally, §36.060(b) requires that income taxes related to intercompany profits on affiliated purchases be applied to reduce the cost of the property or service purchased. All transactions among affiliates are at cost and there are no intercompany profits included in the Company's costs. As a result, tax expense included in this filing has been calculated in accordance with PURA § 36.060(b).

[5] 26 U.S.C. § 168(i)(9)(B).

Further, PURA § 36.060(a) requires that income tax expense included in cost of service reflect only expenses and investments included in cost of service and rate base. The Company's income tax amounts included in cost of service are consistent with this provision.

VII. TAX CUTS AND JOBS ACT OF 2017

Q. PLEASE DISCUSS THE PRIMARY RATE MAKING IMPACT OF THE TCJA.

A. While there were numerous changes in tax law as a result of the TCJA, the primary impact on rate making is the reduction of the corporate income tax rate from 35 percent to 21 percent beginning with the 2018 tax year, which led to the creation of a new balance of Excess ADFIT for the Company.

Q. WHAT IS EXCESS ADFIT?

A. ADFIT arises due to temporary differences such as the accelerated depreciation and bonus deprecation provisions of the Code that can result in corporations, such as the Company, recovering through rates their federal corporate income tax expense at a different (initially faster) rate than they pay the associated taxes. Upon remeasurement of ADFIT following the passage of the TCJA, SWEPCO, as a regulated utility following Financial ASC 980, deferred this difference on the Company's books as a regulatory liability. If income tax rates had remained the same, the deferral would have been reversed in later years as the Company paid its current federal corporate income tax expense at a rate that was greater than the Company was recovering through rates. When the federal corporate income tax rate is reduced, as happened with the TCJA,

and all other things being equal, a portion of the deferral will never be paid and thus becomes "excess." There are two types of excess ADFIT, protected and unprotected.

Q. WHAT ARE PROTECTED AND UNPROTECTED EXCESS ADFIT?

A. There are two components of excess ADFIT – "normalized" or "protected" excess ADFIT and "non-normalized" or "unprotected" excess ADFIT. Protected excess ADFIT is related only to temporary differences that arise due to differences in the method and life used in calculating depreciation for tax purposes and for book purposes. Given the nature of the temporary differences that give rise to this excess ADFIT it is considered to be "protected" by the normalization requirements within the Code. Excess ADFIT associated with all other timing differences is unprotected. These two components are treated differently under the Code. Specifically, the Tax Cuts and Jobs Act (TCJA) requires that protected excess ADFIT be amortized over "the remaining lives of the property as used in its regulated books of account which gave rise to the reserve for deferred taxes." See TCJA Subtitle C, Part I, Sec. 13001(d)(3)(B). For SWEPCO this amortization period is based on the Average Rate Assumption Method or "ARAM."[6] Neither the Code nor the TCJA establish restrictions on the manner or time for sharing unprotected excess ADFIT. The Company is proposing in this filing to utilize the balance of unprotected excess ADFIT, and the protected excess ADFIT amount amortized between January 1, 2018 and the beginning of the test year, to offset the unrecovered cost of the Dolet Hills Power Station as described by Company witness Michael Baird. The Company has deferred

[6] Internal Revenue Service, Rev. Proc. 2020-39 (August 14, 2020).

the income statement benefit of the protected excess ADFIT amortization to a provision for refund liability account as described by Company witness Michael Baird.

Q. PLEASE DESCRIBE THE ARAM.

A. The ARAM reduces the excess tax reserve over the remaining regulatory lives of the property that gave rise to the reserve for deferred taxes during the years in which the deferred tax reserve related to such property is reversing. That is, when the tax depreciation for a given asset becomes less than the book depreciation, the excess tax reserve is reduced by the difference between the taxes required under the old 35 percent rate (and other rates prior to 1993) and the taxes required under the new 21 percent rate. The excess reserve is not reduced until, and then only to the degree, that tax benefits for a given asset expire. The ARAM provides that the utility will not have to refund excess taxes to ratepayers any faster than it would have had to pay those taxes to the federal government had the tax rates not been reduced. Under the ARAM, a utility will not have to change its cash management plan, because the excess tax reserve will be refunded to customers at the same pace it would have been paid to the federal government absent the tax rate reduction.

Q. ARE THERE CONSEQUENCES IF THE COMPANY AMORTIZES THE PROTECTED EXCESS ADFIT MORE QUICKLY THAN ARAM PROVIDES?

A. Yes. TCJA section 13001(d)(4) provides that if an excess reserve is reduced more rapidly or to a greater extent than the reserve would be reduced under the ARAM, 1) the Company's tax for the taxable year will be increased by the amount by which it reduces its excess tax reserves more rapidly than permitted under a normalization method of accounting; and 2) the Company would not be treated as using a

normalization method of accounting for purposes of section 168(f)(2) and (i)(9)(C) of the Code, i.e., the Company would have violated the normalization rules. The punishment for a normalization violation is discussed earlier in my testimony.

Q. HAS THE COMPANY PRESENTED IN THIS FILING THE BALANCE OF EDFIT THAT SHOULD BE PASSED BACK TO CUSTOMERS?

A. Yes. The total company unamortized balance of protected EDFIT is presented in Schedule G-7.9a in the amount of $486,745,961. This balance represents the unamortized balance that is expected to be returned to all customers of the Company regardless of jurisdiction. The unamortized balance of protected EDFIT to be returned to Texas customers is $121,725,475. The Company is proposing in this filing to utilize the Texas jurisdictional balance of unamortized unprotected EDFIT of $17,337,163 to partially offset the unrecovered cost of the Dolet Hills Power Station as discussed in the testimony of Company witness Michael Baird.

Q. HAS THE COMPANY RECORDED AMORTIZATION OF PROTECTED EDFIT SINCE THE ENACTMENT OF TCJA?

A. Yes. Under the ARAM, the protected amortization of EDFIT began January 1, 2018 – immediately after the effect of the federal rate change due to TCJA. This deferred tax benefit was deferred on the Company's income statement through a provision for revenue refund as described in the testimony of Company witness Michael Baird.

Q. HAS THE COMPANY INCLUDED AN EDFIT BALANCE RELATED TO NOL CARRYFORWARDS WITH ITS PROTECTED OR UNPROTECTED BALANCE?

A. The Company has included an EDFIT balance related to NOLC as a component of the protected EDFIT as presented in Schedule G-7.9a. As the "with-and-without" test

described earlier in my testimony determined that the NOLC was a result of accelerated depreciation and therefore subject to the normalization rules, it also follows that the EDFIT associated with the NOLC should also be subject to the normalization rules and categorized as protected. The NOL EDFIT is therefore simply an offset, or reduction, to the EDFIT associated with accelerated depreciation.

Q. PLEASE EXPLAIN THE TEST YEAR AMORTIZATION ADJUSTMENT AS SEEN ON SCHEDULE G-7.9.

A. The $4,664,032 adjustment to the test year amortization of protected EDFIT is a rate making adjustment to reflect the impact on the amortization from the EDFIT associated with the Company's NOLC as presented on Schedule G-7.13f. This represents the amortization of the initial deficient DFIT balance of $194,453,551 as presented on Schedule G-7.13f as a result in the tax rate change from TCJA. The EDFIT associated with the NOLC is being amortized using the ARAM based on the assets giving rise to the taxable losses.

Q. PLEASE EXPLAIN THE $10,042,883 ADJUSTMENT TO ADFIT IN RATE BASE AS SHOWN ON SCHEDULE G-7.4b – ADJUSTMENT SUPPORT.

A. This adjustment is a rate making adjustment to reflect the cumulative impact on ADFIT associated with the amortization of the Company's NOLC as discussed above. This adjustment is the sum of the $4,664,032 amortization during the test period as described above in my testimony, as well as $5,378,851 of amortization for the period of January 1, 2018 until the beginning of the test period. As the deficient DFIT is amortized there is a resulting decrease in the overall ADFIT credit balance.

VIII. PROFORMA ADJUSTMENTS

Q. WHAT PRO FORMA ADJUSTMENTS HAVE BEEN MADE TO SWEPCO'S HISTORICAL TEST YEAR CALCULATION OF FEDERAL INCOME TAXES?

A. Four kinds of pro forma adjustments have been included in the calculation of federal income tax expense: 1) adjustments to include the tax effects of other adjustments to cost of service; 2) adjustments to remove any income tax expense recorded in the historical test year that was related to periods outside the test year; 3) an adjustment to synchronize the deduction of interest for federal income tax purposes; and 4) adjustments to tax amortizations to reflect a pro forma level of amortization of ITC and EDFIT. The adjustments to protected EDFIT are set out on Highly Sensitive Exhibit DAH-8.

Q. CAN YOU SPECIFICALLY IDENTIFY THE ADJUSTMENTS MADE FOR THE CALCULATION OF FEDERAL INCOME TAX EXPENSE?

A. Yes. RFP Schedule G-7.6 provides details of the impacts of pro forma adjustments made for the calculation of the test year federal income tax expense.

Q. WHAT IS REPRESENTED BY ADFIT INCLUDED IN RATE BASE FOR THE HISTORICAL TEST YEAR?

A. The ADFIT amounts reflected on Schedule G-7.4 for the historical year represent balances associated with the rate base balances at March 31, 2020, adjusted for pro forma changes.

Q. WHAT PRO FORMA ADJUSTMENTS HAVE BEEN MADE TO ADFIT, AS RECORDED, TO ARRIVE AT BALANCES SHOWN ON THE HISTORICAL TEST YEAR SCHEDULES?

A. Pro forma adjustments made to the ADFIT balance as of March 31, 2020 include the following: 1) adjustments to ADFIT related to pro forma adjustments to other rate base items; 2) adjustments made for ratemaking purposes, such as removing ADFIT that does not relate to the Texas jurisdiction and reducing ADFIT by the NOLC balance; and 3) adjustments made to ADFIT related to balances that are not related to electric service.

Q. CAN YOU SPECIFICALLY IDENTIFY ADJUSTMENTS MADE TO ADFIT YOU JUST DESCRIBED?

A. Yes. RFP Schedule G-7.4b provides the adjustments and the explanation of the adjustments made to historical test year ADFIT.

Q. CAN YOU DISCUSS THE PRO FORMA ADJUSTMENT TO RATE BASE FOR THE NOL?

A. The pro forma adjustment of $455,122,490 is being made to reduce the ADFIT balance for an NOL calculated on a separate return basis. This adjustment represents the amount of ADFIT associated with accelerated tax depreciation which has not been able to produce cash benefits to the company on the basis of a separate tax return method as of the end of the historic test year. The calculation of the amount of the NOL can be seen on Schedule G-7.13f. This adjustment reflects the ADFIT associated with the taxable losses the Company has generated in excess of the taxable income it has generated and been able to offset based on the NOLC and carryback provisions of the Code.

Q. WAS A "WITH-AND-WITHOUT" OR "LAST DOLLAR DEDUCTED" ANALYSIS DONE TO DETERMINE THE AMOUNT OF NOL SUBJECT TO THE REQUIREMENTS OF NORMALIZATION?

A. Yes. A "with-and-without" calculation was performed to determine the amount of the NOL required to reduce the ADFIT balance. This calculation determined that all of the $455,122,490 NOLC is a result of accelerated tax depreciation and therefore subject to the normalization rules as described previously in my testimony.

Q. WHY IS IT APPROPRIATE TO INCLUDE THIS NOL CARRYFORWARD IN RATE BASE?

A. It is appropriate to include the NOLC as a decrease to the ADFIT balance because of the normalization rules discussed earlier in my testimony and also in accordance with the requirements of PURA § 36.060 and 16 TAC §25.231(b)(1)(D). The cash benefits from deductions taken for accelerated depreciation should not be passed to customers any sooner than cash benefits would be received by the Company if filing a separate return. The inclusion of the NOL offsets the rate base reduction associated with deferred tax liabilities (DTLs) for accelerated depreciation for which the Company would not yet receive a cash benefit for on a separate return basis.

IX. CONCLUSION

Q. PLEASE SUMMARIZE YOUR CONCLUSIONS.

A. The federal income tax schedules that are part of this filing are in compliance with the prescribed RFP and are in accordance with applicable law and the Substantive Rules of this Commission. Adjustments made to tax expense, cost of service, and to rate base

are both appropriate and fair. The tax expense in the cost of service and ADFIT in rate base both correctly reflect the costs and benefits of the regulated utility operations of the Company on a separate return basis. Accordingly, the Company's request to include the amount of federal income tax expense that is included in the cost of service reflected on Schedule G-7 should be granted.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes, it does.

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.

A. My name is David A. Hodgson and I am the Manager of Tax Accounting and Regulatory Support for American Electric Power Service Corporation (AEPSC), a subsidiary of American Electric Power Company, Inc. (AEP). My business address is American Electric Power, 1 Riverside Plaza, Columbus, Ohio 43215.

Q. DID YOU FILE DIRECT TESTIMONY IN THIS CASE ON BEHALF OF SOUTHWESTERN ELECTRIC POWER COMPANY (SWEPCO OR THE COMPANY)?

A. Yes.

II. PURPOSE OF REBUTTAL TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

A. The purpose of my rebuttal testimony is to address certain positions taken by Ms. Ruth Stark on behalf of the Rate Regulation Division of the Public Utility Commission of Texas (PUCT or Commission) also referred to as "Staff." I address Staff's recommendations regarding SWEPCO's separate return net operating loss (NOL) carryforward. I also address Staff's recommendations on the Company's balance and amortization of protected and unprotected excess accumulated deferred federal income taxes (ADFIT).

III. NET OPERATING LOSS CARRYFORWARD

Q. ON PAGE 30 OF HER DIRECT TESTIMONY, MS. STARK STATES THAT THE COMPANY "FICTITIOUSLY ASSUMES THE FILING OF A SEPARATE" RETURN. CAN YOU PLEASE DISCUSS THIS TOPIC?

A. Yes. The Company is a member of a consolidated group with its parent, AEP. Accordingly, the Company participates in the filing of a consolidated federal income tax return as Staff points out. However, the use of the separate return method is widely accepted and even required as the method to calculate federal income taxes for ratemaking purposes. The discussion of the separate return method will also often be referred to as the stand-alone method within ratemaking documents. It ensures that customer rates will include no more and no less than the taxes attributable to the revenues and expenses that are included in those rates. The separate return method matches the tax expense component of cost of service and the ADFIT component of rate base with the corresponding revenues, expenses, and assets also reflected in the utility's cost of service and rate base.

Q. HAS THE STATE OF TEXAS ADDRESSED THE SEPARATE RETURN APPROACH?

A. Yes. The Texas Legislature, in amending the Public Utility Regulatory Act (PURA), determined that the taxes included in rates should be determined on a separate return basis. On the topic of consolidated income tax returns, PURA §36.060(a) states:

> If an expense is allowed to be included in utility rates or an investment is included in the utility rate base, the related income tax benefit must be included in the computation of income tax expense to reduce the rates. If an expense is not allowed to be included in utility rates or an investment is not included in the

> utility rate base, the related income tax benefit may not be included in the computation of income tax expense to reduce the rates.

The language of this section precludes the inclusion of any tax attributes included in rates that are attributable to any company that is not the rate setting utility – in other words, the statute requires the Company to use the separate return method. During the 83rd legislative session (2013), the Texas Legislature enacted Senate Bill 1364, attached as Exhibit DAH-4R, which repealed the prior version of PURA §36.060(a) and replaced it with the above-quoted version now in effect.[1] The prior version required a consolidated tax adjustment, which would adjust SWEPCO's tax expense by the impact of its NOL carryforward on the consolidated tax group. However, the requirement of a consolidated tax adjustment was specifically repealed in 2013.[2] Staff's recommendation to disallow SWEPCO's NOL carryforward in this case is the exact type of consolidated tax adjustment the Texas Legislature repealed in 2013.

Moreover, since investments in rate base and expenses in cost of service are only included in rates if they are for the purpose of providing utility service, it follows that the ADFIT in rate base and tax expense in cost of service likewise should be limited to only those taxes that are associated with providing utility service to customers. A tax benefit or detriment resulting from the Company's participation in a consolidated tax return would not be directly associated with providing utility service, and therefore, that benefit or detriment should not be included in rates.

[1] Act of May 25, 2013, 83rd Leg., R.S., chapter 787 (SB 1364), §1.
[2] See Exhibit DAH-4R also includes additional legislative analysis relating to SB 1364 and affirms Texas Legislature's repeal of the consolidated tax adjustment.

The Commission has also weighed in on this topic in its decision in the Lone Star proceeding (Docket No. 40020).[3] Staff's recommendation is inconsistent with the Commission precedent established in Docket No. 40020. In that case, the Commission determined that it was appropriate to calculate Lone Star's federal income tax expense on a standalone basis.[4] The Commission further held that it was not appropriate to look to the tax attributes of Lone Star's corporate parent in setting utility rates. In discussing Lone Star's NOL deferred tax asset, the Administrative Law Judges made the following assertion:

> On a stand-alone basis, Lone Star's ADFIT liability related to bonus depreciation will be reflected in the Company's rate base when the NOL has been realized and the tax benefit of bonus depreciation realized.[5]

The Company's position in this proceeding is consistent with Lone Star in Docket No. 40020. The Company is requesting rates to be set using the separate return method.

Q. BOTH YOU AND STAFF ADDRESS NORMALIZATION REQUIREMENTS IN YOUR DIRECT TESTIMONY. CAN YOU PLEASE PROVIDE A SUMMARY OF THOSE REQUIREMENTS?

A. Yes. With respect to accelerated depreciation, the normalization rules require that the federal tax expense included in the cost of service for ratemaking use a method of depreciation and a depreciation period that is no shorter than the depreciation expense used in setting rates.[6] With respect to NOL carryforwards, the normalization rules require that the NOL carryforward ADFIT be included in rate base to the extent that

[3] Application of Lone Star Transmission, LLC for Authority to Establish Interim and Final Rates and Tariffs, Docket No. 40020, Order on Rehearing (February 12, 2013), Finding of Fact No. 125, page 19.

[6] 26 U.S. Code §168(i)(9)(A)(i)

the NOL carryforward is the result of accelerated depreciation.[7] Another important aspect of the normalization rules is the consistency requirement. The normalization rules require there to be consistency with the assumptions used in the revenue requirement for depreciation expense, tax expense, rate base, and the reserve for deferred taxes (or ADFIT).[8]

Q. DO STAFF'S RECOMMENDATIONS CAUSE CONCERN WITH RESPECT TO THE NORMALIZATION RULES?

A. Yes. Despite the Company's NOL carryforward being the result of accelerated depreciation, Staff suggests that the normalization rules do not apply and that the NOL carryforward ADFIT should be excluded from rate base. Staff's recommendation to break the connection between the tax expenses in the cost of service and the ADFIT in rate base do not adhere to the consistency requirement of the normalization rules. Company Witness Brad Seltzer addresses Staff's arguments on these normalization rules in greater detail in his rebuttal testimony.

Q. STAFF SUGGESTS THAT THE COMPANY DOES NOT SEEM TO HAVE A REAL CONCERN WITH NORMALIZATION AS IT HAS NOT REPORTED ITSELF TO THE IRS. CAN YOU DISCUSS?

A. Yes. The IRS has issued guidance on the topic of correcting normalization inconsistencies.[9] First, in order to be considered a violation, a company or regulatory commission must knowingly put into rates a practice or procedure that is inconsistent with the normalization rules. It is not suggested nor stated that either SWEPCO or the

[7] Treas. Reg. § 1.167(l)-1(h)(1)(iii) and Private Letter Rulings issued by the IRS.
[8] 26 U.S.C. § 168(i)(9)(B).
[9] Internal Revenue Service, Revenue Procedure 2017-47.

Commission were aware of the inconsistency with the normalization rules that came about from excluding the NOL carryforward when rates were put into place as a result of Docket No. 46449.

Second, the IRS allows for taxpayers to change to a practice or procedure that is consistent with the normalization rules with its next available opportunity before it will assert that a normalization violation has occurred. As stated later in my rebuttal, the Company identified the normalization inconsistency in the preparation for this case. As a result of the risk identification, the Company is now using its next available opportunity by seeking a correction of the inconsistency with the request for rates in this base case.

Q. STAFF STATES THAT PURA §36.060(a) ONLY DIRECTS HOW FEDERAL INCOME TAX EXPENSES ARE TO BE DETERMINED AND DOES NOT ADDRESS HOW ITEMS ARE TO BE REFLECTED IN RATE BASE. DO YOU AGREE WITH THIS OPINION?

A. No, I do not agree. Again, Staff's reasoning is inconsistent with the Lone Star case in Docket No. 40020. Furthermore, the ADFIT balance that is included as a reduction to rate base is inherently tied to tax expense. The ADFIT balance represents the sum of the deferred tax expense that the Company will owe in the future. The customers have already paid this deferred or future tax expense amount and it has been recorded on the Company's books. As the Company pays its taxes year over year, the difference between what it has collected from customers and what it pays to the Internal Revenue Service (IRS) shrinks. That is, as the Company's tax bill goes up, its ADFIT balance goes down. Staff ignores this connection. Staff recommends calculating the tax expense in one fashion and the

Company's ADFIT balance and rate base in another fashion. This recommendation is incompatible with the principles of deferred tax accounting in ratemaking. Additionally, PURA §36.060(a) explicitly states that if an investment is not included in the utility rate base, then the related income tax benefit may not be included in the computation of income tax expense to reduce rates. The assets of other AEP affiliates are not included in the Company's rate base. Therefore, the tax benefits of those AEP affiliates should not be included in SWEPCO's ADFIT component of rate base. Moreover, Staff's recommendations are inconsistent with the IRS's normalization requirements.

Q. CAN YOU FURTHER EXPLAIN THIS CONNECTION WITH DEFERRED TAX EXPENSE AND ADFIT?

A. Yes. Normalized accounting for income taxes calculates income tax on the income and expense included in the cost of service for ratemaking purposes. This income tax expense is adjusted for permanent differences between the income and expense for ratemaking purposes and for tax purposes. The resulting tax expense is then divided between current tax expense and deferred tax expense. Current tax expense is equal to the amount of taxes currently payable to the IRS. It is recorded to the balance sheet as a current liability. Deferred tax expense is calculated based on temporary timing differences between book and tax income, and is the difference between the total tax expense and the current taxes payable to the IRS. Deferred tax expense is recorded on the balance sheet as an ADFIT liability or asset. The ADFIT balance is used to offset rate base. To the extent the Company's future or deferred taxes are greater than its currently payable tax expense, the ADFIT balance reduces rate base.

Q. CAN YOU EXPLAIN THE RATIONALE OF PROVIDING A RATE BASE REDUCTION FOR ADFIT?

A. Yes. Included in the revenue requirement is the total tax expense of a utility – both currently payable and deferred or future owing taxes. As I described above, only the current tax expense must be paid to the IRS. The utility has the benefit of collecting deferred tax expense in its rates, but does not have an obligation to make a payment to the IRS until a future period. You will often hear this referred to as an interest free loan from the government or as government supplied cost free capital.. The tax code allows the utility to accelerate certain deductions creating the temporary difference between the currently payable tax expense and the future tax expense (i.e., the interest free loan). However, the actual funding of this loan comes from customers through the funds collected by the utility as a result of the inclusion of deferred tax expenses in the revenue requirement. Because customers have provided funds in excess of the amount the utility is required to remit to the IRS, it is only fair and equitable to reduce rate base by this temporary difference – the ADFIT balance.

Q. CAN YOU PLEASE PROVIDE AN EXAMPLE OF HOW THIS WORKS?

A. Yes. Let me first show the calculation of the total income tax expense. For this simple example we will assume no permanent differences between book and tax income. If the utility has $10,000 in pre-tax book income (revenue requirement) and the statutory tax rate is 21%, the result would be a total tax expense of $2,100 to be included in rates.

Total Income Tax Expense Calculation

Pre-Tax Net Income	10,000
Statutory Tax Rate	21%
Total Tax Expense	2,100

Now let's say that the utility was able to accelerate its depreciation deductions for tax purposes resulting in a taxable income that is lower than book income.

	Taxable Income
Pre-Tax Book Income	10,000
Accelerated Tax Deduction	(4,000)
Taxable Income (Loss)	6,000
	21%
Current Tax Expense	1,260

As a result of the accelerated tax deductions, the utility's current tax expense is $1,260 ($6,000 x 21%). The $840 difference between the total tax expense of $2,100 and the current tax expense of $1,260 is the tax liability that the utility was able to defer. The $840 that customers have provided in rates is then taken as a reduction to rate base in the form of a deferred tax liability.

	Taxable Income		Tax Rate	**(DTL) / DTA**
Pre-Tax Book Income	10,000			
Accelerated Tax Deduction	(4,000)	x	21%	(840)
				(840)
Taxable Income (Loss)	6,000			
	21%			
Current Tax Expense	1,260			

Q. CAN YOU PLEASE PROVIDE AN EXAMPLE OF THIS WITH A NET OPERATING LOSS?

A. Yes. For this example, we will use the same pre-tax book income of $10,000. This will again result in total tax expense of $2,100. Now let's say that instead of the accelerated tax depreciation deduction of $4,000 in the last example, the utility is able to deduct $11,000.

	Taxable Income
Pre-Tax Book Income	10,000
Accelerated Tax Deduction	(11,000)
Taxable Income (Loss)	(1,000)
Net Tax Loss Carry Forward	1,000
Taxable Income After Net Operating Loss	0
	21%
Current Tax Expense	0

Because the accelerated tax deductions exceeds the pre-tax book income, the utility has a NOL of $1,000 and therefore no current tax payable to the IRS. The $2,100 difference between the total tax expense of $2,100 and the current tax expense of $0 is the tax liability the utility was able to defer. As customers have provided $2,100 for tax expense in rates that the utility does not currently owe to the IRS, it is fair and equitable to reduce rate base by the $2,100 ADFIT.

	Taxable Income		Tax Rate	**(DTL) / DTA**
Pre-Tax Book Income	10,000			
Accelerated Tax Deduction	(11,000)	x	21%	(2,310)
				(2,310)
Taxable Income (Loss)	(1,000)			
Net Tax Loss Carry Forward	1,000	x	21%	210
Taxable Income After Net Operating Loss	0			(2,100)
	21%			
Current Tax Expense	0			

As you can see, the $2,100 ADFIT includes both a deferred tax liability of $2,310 (11,000 x 21%) related to the accelerated tax deduction as well as a deferred tax asset of $210 (1,000 x 21%) related to the NOL carryforward. In both examples, the ADFIT rate base reduction is directly tied to the deferred tax expense included in rates. In order to maintain consistency between deferred tax expense and rate base, it is

necessary to include both the deferred tax liability of $2,310 and the deferred tax asset of $210 in the total ADFIT used to calculate rate base.

Q. HOW DOES THE RECOMMENDATION OF STAFF DIFFER FROM THE EXAMPLE YOU PROVIDED?

A. The testimony provided by Staff recommends that the deferred tax asset associated with the separate return NOL should be excluded from the total ADFIT balance. In the context of the second example, Staff's recommendation would be to reduce rate base by the $2,310 deferred tax liability regardless of the fact that customers had only provided an interest free loan to the utility in the amount of the $2,100 deferred tax expense. Staff's recommendation results in the tax benefits of AEP affiliates that are received by the Company under the tax allocation agreement to produce the result of the full deferred tax liability resulting from accelerated depreciation to reduce rate base. The PLRs that are referenced in my direct testimony all provide that such a result would violate the normalization rules.

Q. WHY DOES STAFF SUGGEST THAT IT IS APPROPRIATE TO REDUCE RATE BASE BY AN AMOUNT THAT EXCEEDS THE TAX EXPENSE FOR WHICH CUSTOMERS HAVE PAID?

A. Staff indicates that because the Company has received cash payments for its NOL through a tax allocation agreement with its consolidated tax return group, it is not fair to include the NOL carryforward in ADFIT. Staff goes on to point out that the consolidated return "group as a whole still has the same amount of cash on a consolidated basis. It merely took the money out of one pocket and put it in another."

Q. DO YOU AGREE WITH STAFF'S ARGUMENT FOR REJECTING THE NOL?

A. No, I do not. First, Staff's recommendation ignores the longstanding ratemaking principle that deferred tax expense and ADFIT are inextricably linked. As discussed above, rate base is reduced by ADFIT because it represents the cumulative amount of deferred tax expense that customers have paid to the Company in excess of income tax the Company is currently obligated to pay to the federal government. As shown in the example, in order to achieve a balance between the rate base reduction and the amount of cash provided through rates for deferred tax expense, it is necessary to include the NOL deferred tax asset in the overall ADFIT balance. To exclude the NOL deferred tax asset would result in rate base being reduced by an amount greater than the deferred taxes the Company received through rates. Including the NOL carryforward in the ADFIT balance provides an accurate representation of the overall rate base reduction and is commensurate with regulated operations and assets of the utility.

Second, the argument for rejecting the NOL results in the cross-subsidization of costs/benefits from affiliate companies. Staff describes the cash payments that resulted from the tax allocation agreement by saying that AEP "took money out of one pocket and put in in another."[10] The suggestion is that taking the money out of an affiliate's pocket and putting it into the pocket of SWEPCO should result in a reduction in SWEPCO's utility rates. Instead of the rate base reduction being based on the deferred tax expense that customers have funded, Staff suggests that part of that rate base reduction should be funded by the customers of affiliate companies.

[10] Stark Direct 40:20

The idea that the tax allocation agreement simply takes "money out of one pocket and put it in another" also creates operational risk for both SWEPCO and its affiliates.[11] Again, Staff recommends that the NOL deferred tax asset should not be included in rate base because the Company received a payment under the tax allocation agreement. This would result in a reduction to the Company's requested rates. However, Staff's approach ignores the economic realities of the tax allocation agreement. Let's assume that an affiliate company (Utility B) had a current tax liability. Utility B would have made a cash payment for its current tax liability to AEP. With SWEPCO having a taxable loss, it would have received a cash payment from AEP (to the extent that taxable loss was used by the group) under the tax allocation agreement. The regulator of Utility B could make the same argument as Staff that because this transaction simply "took money out of one pocket and put it in another" that Utility B's current tax expense was actually deferred. Utility B's regulator could then argue that this tax was deferred and that the additional deferral should also be a reduction to Utility B's rate base. Staff's recommendation, when taken to its logical extension, builds problem on top of problem. Both SWEPCO and Utility B could face rate base reductions over the same cash transfer under the tax allocation agreement. Instead, the prudent and legally required approach is the separate return approach. This aligns the tax benefits and burdens of each regulated utility with the tax expense and rate base for that utility with no consideration for any affiliate or upstream, downstream, or side-stream activity.

[11] SWEPCO's Response to Staff's 9th RFI at Staff 9-21.

Q. PART OF STAFF'S ARGUMENT IN REJECTING THE NOL IS WHAT IS DESCRIBED AS THE ECONOMIC REALITY OF IT. IS THERE A FLAW IN THIS ARGUMENT?

A. Yes there is. The flaw in Staff's argument is that it fails to capture the overall rate impact of the NOL carryforward ADFIT and the funds received as a result of the Company's tax allocation agreement. Staff testimony focuses solely on the rate impact of the NOL carryforward ADFIT and ignores the rate impact of the funds received by the Company through the tax allocation agreement. These two items cannot be looked at in isolation or it skews the economic reality of the situation. When you look at the overall impact of the Company's request you see that the end result is neutral on rates with respect to the NOL carryforward ADFIT and the cash receipts as a result of the tax allocation agreement. The end result provides consistency with the requirements of PURA §36.060. That is, within rates, there should be no tax benefits and no tax detriments but those that are the direct result of providing utility service to customers.

What is missing in the analysis provided by Staff is that the Company's rates as approved in Docket No. 46449, and others prior to it, reflect a reduction as a result of the cash received through the tax allocation agreement. Staff has pointed out in its testimony, and the Company has acknowledged, that the Company has received cash as a result of its tax allocation agreement. Being a rate regulated utility, the Company must prudently invest its capital into plant that is to the benefit of providing service to its customers. The Commission reviews the prudency of those investments when approving the Company's rates. To the extent that the Company received cash through its tax allocation agreement, the Company would not use that additional capital to build

plant beyond what would be prudent in serving its customers. Instead, the cash received by the Company through the tax allocation agreement would reduce the otherwise needed capital to fund those prudent investments. As a result, the Company would need less capital through debt and equity than it would have absent the cash received through the tax allocation agreement.

Q. CAN YOU DEMONSTATE HOW THE COMPANY'S REQUEST RESULTS IN A NEUTRAL IMPACT ON RATES WITH RESPECT TO THE NOL CARRYFORWARD AND THE CASH RECEIPTS THROUGH THE TAX ALLOCATION AGREEMENT?

A. Yes. I will provide two examples. The first example will involve a company with no tax allocation agreement. The second example will involve a company with a tax allocation agreement. I will then apply both Staff's and the Company's recommended approach to the second example. The results will show that the Company's approach produces the same revenue requirement as the first example involving a company with no tax allocation agreement. Staff's approach does not match the first example.

Example 1

Let's start with the same example from earlier in my testimony where a utility has pre-tax book income of $10,000 and a deduction for accelerated tax depreciation of $11,000. As in the example before, this results in an NOL of $1,000, a deferred tax liability of $2,310, and a deferred tax asset of $210.

	Taxable Income		Tax Rate	(DTL) / DTA
Pre-Tax Book Income	10,000			
Accelerated Tax Deduction	(11,000)	x	21%	(2,310)
				(2,310)
Taxable Income (Loss)	(1,000)			
Net Tax Loss Carry Forward	1,000	x	21%	210
Taxable Income After Net Operating Loss	0			(2,100)
	21%			
Current Tax Expense	0			

Now, let's look at a basic capital structure where a utility has debt and equity both of $100,000. We will use a rate of 4% for the debt component and 10% for the equity component. This will result in a weighted cost of capital of 2% and 5% respectively for the debt and equity for a total weighted average cost of capital (WACC) of 7%

	Initial Capital	Defd Tax Customer	Adjusted Capital	Ratio	Cost	Weighted Cost
Debt	100,000	(1,050)	98,950	50.00%	4.00%	2.00%
Equity	100,000	(1,050)	98,950	50.00%	10.00%	5.00%
Total	200,000	(2,100)	197,900			7.00%

As you can see, the required debt and equity to fund the plant are reduced by the deferred taxes the utility collected from customers through rates. The net rate base is composed of plant of $200,000 and a net ADFIT liability of $2,100.

Plant	200,000
DTL	(2,310)
DTA	210
Net Rate Base	197,900
	7%
Rev Req	13,853

As you can see, the ADFIT liability reduces rate base from the $200,000 in the initial capital structure to $197,900. When the rate base net of ADFIT is multiplied by the WACC of 7%, the result is a revenue requirement of $13,853.

Example 2

Now, let's look at the same capital structure but assume that the utility has received $210 cash for its NOL as a result of its tax allocation agreement. We will assume that the utility uses that cash in such a manner that it maintains the same capital ratios.

	Initial Capital	Defd Tax Customer	Cash Tax Alloc	Adjusted Capital	Ratio	Cost	Weighted Cost
Debt	100,000	(1,050)	(105)	98,845	50.00%	4.00%	2.00%
Equity	100,000	(1,050)	(105)	98,845	50.00%	10.00%	5.00%
Total	200,000	(2,100)	(210)	197,690			7.00%

As you can see, the total need for capital raised from debt and equity is reduced by the $210 resulting in a new total of $197,690. We will assume that the rates for debt and equity remain the same which results again in a WACC of 7%.

For this second example, we will incorporate Staff's recommendation for the rate base treatment of the NOL carryforward. That is to say, the deferred tax asset related to the NOL will be reduced by the payment received as a result of the tax allocation agreement. So for this example, the net rate base of the utility will be $197,690.

Plant	200,000
DTL	(2,310)
DTA	0
Net Rate Base	197,690
	7%
Rev Req	13,838

When the rate base net of ADFIT is multiplied by the WACC of 7%, the result is a revenue requirement of $13,838. As you can see the revenue requirement has been reduced as a result of the consolidated tax adjustment. This is the exact type of result that the amendments to PURA §36.060 were intended to prevent.

Now, instead of incorporating Staff's recommendation for the rate base treatment of the NOL carryforward, let's incorporate the Company's proposed approach. In this Company example, we will include an adjustment to remove the impact to the debt and equity requirements that resulted from the funds received through the tax allocation agreement as those funds represent a consolidated tax adjustment.

	Initial Capital	Defd Tax Customer	Cash Tax Alloc	Proforma Tax Alloc	Adjusted Capital	Ratio	Cost	Weighted Cost
Debt	100,000	(1,050)	(105)	105	98,950	50.00%	4.00%	2.00%
Equity	100,000	(1,050)	(105)	105	98,950	50.00%	10.00%	5.00%
Total	200,000	(2,100)	(210)	210	197,900			7.00%

In rate base, we will include ADFIT in the amount of $2,100 which is equal to the deferred taxes the utility has collected from customers. When the rate base net of ADFIT is multiplied by the WACC of 7%, the result is a revenue requirement of $13,853 (the same as Example 1 involving no tax allocation agreement).

Plant	200,000
DTL	(2,310)
DTA	210
Net Rate Base	197,900
	7%
Rev Req	13,853

The example using the Company's approach results in the exact same revenue requirement as the first example in which the utility did not have a tax allocation agreement, both of which differ from Staff's proposal. This is important because it demonstrates that the Company's request simply seeks to remove any consolidated tax adjustments from the rates that are charged to customers. Therefore, the Company's proposed inclusion of the NOLC ADFIT in rate base simply offsets a portion of the

deferred tax liability from accelerated depreciation to capture only the amounts funded by customers. The Company's request is consistent with both PURA §36.060 and the consistency requirement of the normalization rules.

Q. STAFF POINTS OUT IN TESTIMONY THAT THE COMPANY DID NOT PROPOSE THE INCLUSION OF A SEPARATE RETURN NOL CARRYFORWARD IN ITS PREVIOUS BASE CASE. CAN YOU PLEASE DISCUSS?

A. Yes. While Staff correctly states that the Company did not request the inclusion of a separate return NOL carryforward in Docket No. 46449, it does not make it any less appropriate to request its inclusion in this case.

During the preparation for this filing, the Company identified risks both from a normalization standpoint and from an operational standpoint that lead to the request for the inclusion of the NOL carryforward deferred tax asset. Company Witness Brad Seltzer's rebuttal testimony speaks to the normalization risk the Company faces. The discussion in the last Q&A speaks to the Company's operational risk. The fact that these risks were not identified until the preparation of this filing does not diminish the merits of the position.

Staff proceeds to discuss the amount of separate return NOL carryforward that the Company would have had at the end of the test year in Docket No. 46449. Staff further proposes that "if the Commission accepts SWEPCO's proposal with respect to NOLC ADFIT, it should only consider doing so with respect to tax losses that occurred

after the end of the test-year in Docket No. 46449."[12] The argument is that the Company is attempting to change the ratemaking treatment of the separate return NOL carryforward. As Staff points out, the Company did not include the NOL carryforward in its prior base case. Therefore, the Commission never ruled on the proper treatment of SWEPCO's NOL carryforward for ratemaking purposes. By this logic, an error or omission of any type in one filing could not be corrected and properly presented in a subsequent filing regardless of whether the issue had been litigated or not. The Company's request for the inclusion of the NOL carryforward ADFIT in this case simply acknowledges the fact that its currently approved rates include a tax benefit that is inconsistent with PURA §36.060 and the normalization rules and seeks to make a correction for the inconsistency.

IV. EXCESS ADFIT

Q. CAN YOU SUMMARIZE THE CONCEPT OF EXCESS ADFIT WHICH IS DISCUSSED IN YOUR DIRECT TESTIMONY AND THE TESTIMONY OF STAFF?

A. Yes. As discussed earlier in my rebuttal, utility rates are set with the total tax expense of the Company included as a component of the cost of service. The total tax expense is based on the statutory tax rate. As discussed earlier, the deferred tax portion of the total tax expense that is collected through rates is recorded on the balance sheet as an ADFIT liability (or asset). If the statutory tax rate changes, the ADFIT is revalued to

[12] Stark Direct Testimony 35:5-7

reflect the liability at the new tax rate. The difference between the ADFIT balance that was built up through the collection of deferred tax expense in rates at the old statutory rate and the revalued ADFIT at the new statutory rate is excess ADFIT. Excess ADFIT therefore represents the cash that customers have paid to the utility through rates that the utility will no longer pay to the IRS in the future as a result of the change in tax rate. Said another way, it is the amount that customers have paid in "excess" of the utility's future tax liability. Where the utility has collected such taxes from customers in rates and is no longer required to pay the IRS because of the lower tax rate, it is reasonable for such "excess" to be refunded and returned to customers.

Q. STAFF REJECTS THE COMPANY'S INCLUSION OF EXCESS ADFIT RELATED TO THE SEPARATE RETURN NOL. DO YOU AGREE WITH THIS POSITION?

A. No, I do not. Staff states that excess ADFIT is the balance "that should be returned to SWEPCO's customers."[13] The key word there is "returned." The inclusion of the excess ADFIT associated with the NOL carryforward ensures that the Company returns only the amount of cash that it collected from customers through rates for its deferred taxes. Staff's recommendation would result in the Company not only returning the cash it received from customers, but providing an amount beyond what customers ever paid. The premise behind excess ADFIT is that there is a dollar-for-dollar return of cash that was over collected as a result of a rate change.

Q. CAN YOU PLEASE PROVIDE AN EXAMPLE TO DEMONSTRATE THIS POINT?

[13] Stark Direct at 42:3-5

A. Yes. Let me first show the calculation of the total income tax expense. Similar to the previous examples we will assume no permanent differences between book and tax income. If the utility has $10,000 in pre-tax book income (revenue requirement) and the statutory tax rate is 35%, the result would be a total tax expense of $3,500 included in rates.

Total Income Tax Expense Calculation	
Pre-Tax Net Income	10,000
Statutory Tax Rate	35%
Total Tax Expense	3,500

Now let's say that the utility was able to accelerate deductions for tax purposes and those deductions exceed the book income for the year thereby creating a NOL.

	Taxable Income		Tax Rate	**(DTL) / DTA**
Pre-Tax Book Income	10,000			
Accelerated Tax Deduction Reducing Income to Zero	(10,000)	x	35%	(3,500)
Remaining Accelerated Tax Depreciation	(1,000)	x	35%	(350)
Taxable Income (Loss)	(1,000)			(3,850)
Net Tax Loss Carry Forward	1,000	x	35%	350
Taxable Income After Net Operating Loss	0			
	35%			
Current Tax Expense	0			(3,500)

In this example, the current tax expense is zero because no tax is currently payable to the IRS as a result of the NOL. The $3,500 difference between the total tax expense and the current tax expense is the deferred tax expense. That is also the amount of taxes collected from customers in rates, deferred as the result of accelerated depreciation and the ADFIT that reduces rate base.

Next, let's assume that the tax rate changes from 35% to 21% and as a result the utility must revalue its ADFIT balance.

	Taxable Income		Tax Rate	(DTL) / DTA		Reduction to Tax Rate	Reg. (Liability)
Pre-Tax Book Income	10,000						
Accelerated Tax Deduction Reducing Income to Zero	(10,000)	x	35%	(3,500)	x	14%	(1,400)
Remaining Accelerated Tax Depreciation	(1,000)	x	35%	(350)	x	14%	(140)
Taxable Income (Loss)	(1,000)			(3,850)			(1,540)
Net Tax Loss Carry Forward	1,000	x	35%	350	x	14%	140
Taxable Income After Net Operating Loss	0						
	35%						
Current Tax Expense	0			(3,500)			(1,400)

As you can see, a regulatory liability (asset) is set up for each timing difference by multiplying the timing difference by the change in the tax rate. This results in a net regulatory liability of $1,400 as well as a reduction to ADFIT in the same amount.[14] The revalued ADFIT balance of $2,100 ($3,500 original - $1,400 for change in tax rate) represents the future tax liability that the utility will pay to the IRS. The $1,400 regulatory liability is the amount of deferred taxes that the company has collected in rates ($3,500) that exceeds its future tax liability ($2,100).

As you can see in this example, by including the excess ADFIT associated with the NOL carryforward, it ensures that the cash that is returned to customers is exactly the amount that customers provided to the utility.

Q. SO HOW WOULD STAFF'S RECOMMENDATION DIFFER FROM THIS EXAMPLE?

A. Staff's recommendation is to exclude the NOL carryforward ADFIT and the associated excess ADFIT. So let's modify the example to show these recommendations. Total tax expense remains $3,500 as Staff does not dispute this aspect of the calculation. The split of current and deferred tax expense remains the same, with $0 current and $3,500 deferred tax expense. Since Staff's recommendation excludes the NOL carryforward

[14] For simplicity purposes, this example does not include any gross-up of the regulatory liability.

ADFIT, we would have a rate base reduction of $3,850 as opposed to the $3,500 in the example above. The revaluation of ADFIT as a result of the tax rate change in Staff's recommendation would result in a regulatory liability of $1,540. The utility has collected $3,500 for deferred tax expense from customers. The Company will still be required to pay $2,100 in tax expense in future years. Yet, Staff recommends that $1,540 be "returned" to customers. This results in the utility now having only $1,960 ($3,500 – $1,540) of cash remaining from its customers to pay its future tax liability of $2,100. Below is the last set of data modified for Staff's recommendation.

	Taxable Income		Tax Rate	**(DTL) / DTA**		Reduction to Tax Rate	**Reg. (Liability)**
Pre-Tax Book Income	10,000						
Accelerated Tax Deduction Reducing Income to Zero	(10,000)	x	35%	(3,500)	x	14%	(1,400)
Remaining Accelerated Tax Depreciation	(1,000)	x	35%	(350)	x	14%	(140)
Taxable Income (Loss)	(1,000)			(3,850)			(1,540)
Net Tax Loss Carry Forward	1,000	x	35%	0	x	14%	0
Taxable Income After Net Operating Loss	0						
	35%						
Current Tax Expense	0			(3,850)			(1,540)

The Company's position that the NOL carryforward related excess ADFIT should be included in the overall excess ADFIT balance provided to customers ensures that the amount that is returned to customers is the exact amount that customers have paid in excess taxes to the Company.

Q. STAFF PROPOSES A REFUND OF $14,494,385 TO TEXAS CUSTOMERS RELATED TO THE AMORTIZATION OF PROTECTED EXCESS ADFIT THROUGH THE RELATE-BACK DATE OF MARCH 18, 2021. DO YOU AGREE WITH THIS AMOUNT?

A. No, I do not. A calculation of the refund to Texas Retail customers related to the amortization of protected excess ADFIT has been provided in Exhibit DAH-1R. As

shown in the exhibit, the Company proposes a refund of $9,295,525 to Texas Retail customers. There are two errors or omissions that have been identified in Staff's calculation.

First, Staff's calculation of the protected excess ADFIT amortization excludes the impact of the excess ADFIT for the Company's NOL carryforward. The exclusion of the NOL carryforward excess ADFIT is not appropriate for the reasons provided earlier in my testimony.

Second, Staff's calculation uses a Texas Retail allocation factor of 36.94%. The calculation provided by the Company has a 35.01% Texas Retail allocation factor.[15] The factor used in the Company calculation is based on the allocation factors that were approved with the rates set in Docket No. 46449. This is the appropriate allocation factor to use as it represents the Texas Retail allocation that was in effect at the time of the tax rate change that resulted in the excess ADFIT balance. This allocation factor represents the proportion of the total company deferred taxes that were included in the rates of Texas customers, and therefore, it is the proportion of excess ADFIT that should be returned to Texas customers.

Q. STAFF REJECTS THE COMPANY'S PROPOSED PROFORMA ADJUSTMENT OF $4,664,032 TO THE PROTECTED EXCESS ADFIT AMORTIZATION IN THE COST OF SERVICE. DO YOU AGREE WITH STAFF'S POSITION ON THIS ADJUSTMENT?

[15] Exhibit DAH-2R

A. No, I do not. This proforma adjustment is to adjust the test year amortization of protected excess ADFIT to include the excess ADFIT on the Company's NOL carryforward. As explained earlier in my testimony, this adjustment is required to ensure that the Company returns the amount of cash that it collected from customers through rates for its deferred taxes.

Q. STAFF CALCULATED A BALANCE OF UNPROTECTED EXCESS ADFIT TO BE REFUNDED TO TEXAS CUSTOMERS OF $31,311,597. DO YOU AGREE WITH THIS AMOUNT?

A. No, I do not. A calculation of the refund due to Texas Retail customers for the balance of unprotected excess ADFIT has been provided in Exhibit DAH-3R. As shown in the exhibit, the Company proposes $29,678,864 of unprotected excess ADFIT that is to be refunded to Texas Retail customers. Again, Staff's calculation uses an allocation factor of 36.94% to determine the Texas jurisdictional amount. As explained in the Q&A immediately above, the allocation factor should be based on the rate used to allocate deferred taxes in Docket No. 46449 – 35.01%.

V. CONCLUSION

Q. PLEASE SUMMARIZE YOUR CONCLUSIONS.

A. The Company's request to include the Company's separate return NOL carryforward ADFIT is consistent with the requirements of Texas state law as set forth in PURA §36.060 as well as the normalization rules of the Internal Revenue Code. Inclusion of the NOL carryforward ADFIT ensures that the rate base reduction for ADFIT is consistent with the deferred tax expense that customers have paid through rates. The

inclusion of the excess ADFIT related to the separate return NOL carryforward ensures that the refund that the Company returns to customers is equal to the amount that the Company has over-collected in rates for its deferred tax expense.

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes, it does.

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.

A. My name is Bradley M. Seltzer. My business address is 700 Sixth Street, N.W., Washington, D.C. 20001

Q. PLEASE DESCRIBE YOUR EDUCATIONAL AND PROFESSIONAL BACKGROUND.

A. I graduated *magna cum laude* from the State University of N.Y. at Albany and then the National Law Center at George Washington University where I earned my J.D. with High Honors in 1978. For more than 40 years, I have been involved in the provision of tax services principally to companies in various segments of the utility industry. I joined the predecessor firm to Eversheds Sutherland, then known as Sutherland, Asbill & Brennan, in 1978 directly out of law school, was later promoted to partner, and continued in that capacity until 1997 when I joined Deloitte Tax as the U.S. and Global Leader of the Energy Tax Practice. In 2016, I rejoined Sutherland as a partner and as the co-Chair of the Energy Tax Practice shortly before its merger with what is now the firm of Eversheds Sutherland. Throughout my career, I have provided tax services primarily to electric, gas, telephone and water industry clients.

In fact, my first significant matter following graduation from law school was the normalization dispute involving AT&T's then-subsidiary Pacific Bell, the Internal Revenue Service (IRS), and the California Public Utilities Commission. The dispute was ultimately resolved by Congress through the enactment of the so-called

"consistency rules" that I will discuss below.[1] My practice has included tax planning for the acquisition and transfer of business assets, operational tax planning and the representation of clients in tax controversies with the Internal Revenue Service at the audit and appeals levels, and at times, in tax litigation. I have often been involved in procuring private letter rulings or technical advice from the IRS National Office. On several occasions, I have represented one or more segments of the utility industry before the IRS and/or the Department of Treasury regarding certain tax positions under consideration or adopted by the federal government.

I have submitted written comments and have testified at Department of Treasury hearings regarding legislative and administrative tax issues of significance to the utility industry, including normalization issues arising from consolidated tax adjustments (CTAs), interest synchronization, and deregulation of public utility property, as well as the treatment of qualified decommissioning funds, and provisions of the Tax Cuts and Jobs Act of 2017 (TCJA) relating to so-called bonus depreciation, excess deferred taxes, and the limitations on business interest deductions under section 163(j) as amended by the TCJA. I am a member of the District of Columbia and California Bars. I also am a member of the American Bar Association, Section of Taxation where I served as a past chair of the Committee on Regulated Public Utilities, and its Normalization Subcommittee, and regularly make presentations before the current Energy & Environmental Tax Committee.

[1] See I.R.C. Sec. 168(i)(9)(B)(ii).

Q. HAVE YOU PREVIOUSLY FILED TESTIMONY IN A REGULATORY PROCEEDING?

A. Yes. I have testified regarding tax, tax accounting and regulatory tax matters before the California Public Utility Commission, the Missouri Public Service Commission, and the Arizona Corporation Commission.

Q. DID YOU FILE DIRECT TESTIMONY IN THIS CASE?

A. No.

II. PURPOSE OF REBUTTAL TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

A. The purpose of my rebuttal testimony is to respond to a portion of the direct testimony of Staff witness Ruth Stark, Senior Regulatory Accountant in the Rate Regulation Division (Staff) of the Public Utility Commission of Texas (Commission). Specifically, my testimony addresses Staff's recommendations that the net operating loss carryforward (NOLC) accumulated deferred federal income tax (ADFIT) Asset (Item N) not be computed on a stand-alone basis as proposed by SWEPCO, and the likely potential adverse consequences (under the normalization requirements) for customers if those recommendations were adopted by the Commission. Company witness David Hodgson is also filing rebuttal testimony in response to Staff's recommendation on the NOLC ADFIT issue. Mr. Hodgson explains, among other things, that Staff's recommended treatment of the NOLC ADFIT asset is inconsistent with Texas law, which requires the Commission to determine the Company's tax treatment on a stand-alone basis.

III. THE APPLICATION OF THE NORMALIZATION RULES TO THE STAND-ALONE METHODOLOGY

Q. DO YOU AGREE WITH STAFF'S "BRIEF EXPLANATION OF ADFIT AND THE IRC NORMALIZATION RULES"?

A. In general, yes, but it is incomplete.

Q. PLEASE EXPLAIN HOW IT IS INCOMPLETE.

A. Staff's testimony addresses the basic rules of normalization in effect since 1969. However, it fails to address the significance of the consistency rules enacted as part of the Surface Transportation Act of 1982 and their particular relevance in the instant case, as interpreted by the IRS in numerous Private Letter Rulings (PLRs). For regulated public utilities subject to the depreciation normalization rules, Congress specifically established certain fundamental relationships amongst four elements of ratemaking – depreciation expense, tax expense, rate base, and the reserve for deferred taxes or ADFIT.

Q. WHY IS THAT RELEVANT IN THE INSTANT CASE?

A. The delineation of these fundamental relationships establish that regulatory depreciation expense must be computed based on the property included in rate base. Similarly, regulatory tax expense is computed by applying the statutory tax rate to the regulatory depreciation expense. The difference between regulatory depreciation and tax depreciation expense on the same rate base, times the statutory maximum federal tax rate, is the amount that can be credited to the reserve for deferred taxes used to reduce rate base. Effectively, these fundamental relationships view the utility in isolation, *i.e.,* as a stand-alone entity, to avoid cross-subsidies inherent in consolidated

returns for investments that customers did not finance through their payments for utility services.

Stated differently, if a consolidated approach is utilized, customers may pay rates that reflect costs or benefits of other members of the affiliated group without having financed those costs or benefits. The use of a stand-alone methodology ensures that the utility's rates reflect its costs of service, not those of the other members of the affiliated group. The IRS has concluded that "cherry picking" one of the four elements without making consistent adjustments to the others is impermissible under the normalization rules. See PLR 8904008 and PLR 201828010, attached as Exhibits BMS-1R and BMS-2R, respectively. Moreover, while not directly relevant to this proceeding, it should be noted that the Federal Energy Regulatory Commission also requires income tax expense to be recorded using a stand-alone method. See Kentucky Power, 69 FERC ¶62-172 (1994).

Q. DO YOU AGREE WITH STAFF'S ANALYSIS OF THE PLRs DISCUSSED IN THE TESTIMONY OF SWEPCO WITNESS DAVID A. HODGSON IN SUPPORT OF THE STAND-ALONE METHODOLOGY?

A. Not entirely.

Q. PLEASE EXPLAIN.

A. Staff is correct that the PLRs cited by Mr. Hodgson do not expressly address the impact, if any, of payments to the utility under the consolidated group's Tax Sharing Agreement. Staff is also correct that the normalization rules do not expressly require that the intercompany tax payments be ignored for ratemaking purposes. Nevertheless, in PLR 201718015 (Feb. 7, 2017), the IRS noted that the parent had made a tax sharing

payment to the utility with respect to its NOL and the IRS attached no significance to that in addressing and resolving whether the taxpayer's methodology complied with the normalization rules. Surely, if the payments under a tax sharing agreement must be taken into account in determining the allowable Deferred Tax Asset as Staff claims, the IRS could not, and would not, simply ignore the payment to the utility in its analysis. I also disagree with Staff's assertion that it would be "equally consistent" with the normalization rules to reduce the NOLC ADFIT by the payments received under the Tax Sharing Agreement.

Q. CAN YOU ELABORATE?

A. First, as explained above, the consistency rules implicitly and effectively require use of the stand-alone approach to focus exclusively on the utility when computing the four related cost of service ratemaking items implicated by the normalization rules, namely regulatory depreciation expense, regulatory tax expense, the reserve for deferred taxes, and rate base. In failing to analyze the impact of the consistency rules on the normalization analysis, Staff's assertion that its proposed methodology is "equally consistent" with the normalization rules is fundamentally flawed.

Second, for the most part, tax sharing agreements and payments thereunder are largely contractual issues governed by state law. The Internal Revenue Code does not require a tax sharing agreement and the Treasury Regulations allow for a variety of methods to allocate or share a tax liability among members of the affiliated group if they so choose. But they serve a very limited purpose – the intercompany payments may affect basis and/or earnings and profits, but the payments themselves are a nonevent for tax purposes. The common parent of the group is the "taxpayer" relevant

to the IRS. See Treas. Reg. Sec. 1.1502-77. All members of the group are, however, jointly and severally liable for the consolidated tax liability regardless of whether members have paid a share of the liability to the parent or have received intercompany payments pursuant to a tax sharing agreement.

Thus, since normalization is based on the extension of a loan from the Federal Government for the deferred taxes, the IRS is entirely indifferent to whether and how the group allocates tax liabilities amongst the members. Any payments made or received by SWEPCO pursuant to the tax sharing agreement are simply irrelevant to the normalization issue. See generally, Dubroff, Andrew, Federal Income Taxation of Corporations filing Consolidated Returns, Sec. 8.01, *et. seq.* (Exhibit BMS-3R). Whatever case Staff has urged for "equitable" consideration of the intercompany payments under the tax sharing agreement, it does not change the fact that the payments have no bearing on the normalization issue.

Q. ARE THERE OTHER ISSUES OF CONCERN IN STAFF'S TESTIMONY?

A. Yes. Staff's testimony claims that: 1) SWEPCO has changed its method of regulatory accounting; 2) to the extent SWEPCO's proposal is accepted, it should not include NOLCs subject to a prior rate proceeding (Docket No. 46449); 3) SWEPCO has not notified the IRS of its concerns regarding the failure to use a stand-alone approach in the prior proceeding; and 4) it has not requested a PLR to confirm its interpretation of the normalization rules.

While partially correct, those assertions are also misleading. It is true that SWEPCO did not assert that a stand-alone approach was required in Docket No. 46449. Nevertheless, it is not uncommon for utilities to utilize procedures and adjustments that

create potential normalization concerns that are only discovered and evaluated after one or more dockets have been concluded. In fact, a large contingent of utilities subject to FERC jurisdiction had been incorrectly computing deferred taxes, sometimes for decades and over the course of multiple rate cases, before the utilities realized that the FERC-supplied template failed to incorporate the so-called normalization pro-rata formula of Treas. Reg. Sec. 1.167(l)-1(h)(6) for purposes of computing the deferred tax reserve. Flooded with requests to fix the violations as inadvertent errors, the IRS eventually issued Rev. Proc. 2017-47 allowing a safe harbor for the taxpayers to correct their respective violations provided they did so at the first next available rate case. And in 2018, in recognition that such taxpayers might have difficulty reconstructing the adjustments necessary to correct the erroneous methodology, especially where it had been used for many years and through multiple rate cases, the IRS issued General Legal Advice Memorandum (GLAM) 132120-17, clarifying that the correction can be made prospectively without reversing the financial impact of the prior error.

Similarly, upon discovery of the potential risk of a normalization violation, SWEPCO is raising its concerns in the context of the first next available rate case as contemplated by Rev. Proc. 2017-47, as modified by GLAM 132120-17, and believes it has demonstrated the risk of adopting Staff's recommendation.

Q. WHAT IS YOUR RESPONSE TO STAFF'S ARGUMENT THAT SWEPCO SHOULD SEEK A PLR FROM THE IRS IF IT WANTS THE NOLC INCLUDED IN THE ADFIT CALCULATION?

A. The request for a PLR is not necessary. Normalization is just one issue impacting the broader question regarding treatment of SWEPCO's NOLC ADFIT. As mentioned

earlier in my rebuttal testimony, Company witness Hodgson addresses Texas law, cross-subsidies, and regulatory principles that also support SWEPCO's position in this case.

IV. SUMMARY OF RECOMMENDATIONS

Q. CAN YOU SUMMARIZE THE RECOMMENDATIONS YOU ARE MAKING?

A. The IRS has not directly addressed the exact fact pattern presented in the instant case. However, adoption of Staff's consolidated approach poses a substantial risk of a violation of the normalization consistency rules to the detriment of customers who would no longer be able to share in the tax benefits of accelerated depreciation. By cherry picking one element of the inextricably tied four prongs of normalization, Staff's proposal makes acceptance of that risk imprudent. Based on the normalization rules and prior PLRs, the IRS is likely to conclude that Staff's proposed adjustment violates the consistency rules.

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes, it does.

PLR 8904008 (IRS PLR), 1989 WL 593521

LEGEND:

Taxpayer = * * *

Parent = * * *

a = * * *

b = * * *

c = * * *

Commission = * * *

Board = * * *

State X = * * *

Dear Mr. * * *:
We received your request for a private letter ruling dated August 8, 1988, and all subsequently filed data. Your request pertains to the federal tax consequences of certain additions to deferred taxes, and, generally, whether a rate order that incorporates such a proposal will meet the normalization requirements of sections 167(1), 168(f)(2), and 168(i)(9) of the Internal Revenue Code. Specifically, you have asked that we rule as follows:
That Taxpayer will not be in compliance with the normalization requirements of sections 167(1), 168(f)(2), and 168(i)(9) of the Code, if it uses the so called consolidated tax savings adjustment as a reduction of rate base.

You have made the following representations:

Taxpayer, a State X corporation, was part of an overall consolidated group reorganization which included the formation of its Parent. Taxpayer is a regulated public utility principally engaged in the production, purchase, transmission, distribution, and sale of natural gas to customers in northern State X. Ratemaking and accounting related thereto for Taxpayer are under the jurisdiction of Commission. Taxpayer is a wholly owned subsidiary of Parent, and is included in the consolidated federal income tax returns filed by Parent. Taxpayer computes

 © 2021 Thomson Reuters. No claim to original U.S. Government Works.

income under the accrual method of accounting and its tax year is the calendar year. Approximately a companies are members of Parent consolidated group. Generally, these companies are involved in the business of finding, recovering, distributing, and selling energy resources. In part, the nonregulated losses generated by many of these companies were the result of the use of accelerated depreciation under sections 167 and 168 of the Code.

The vast majority of Taxpayer's property is public utility property within the meaning of section 167(1)(3)(A) of the Code. Taxpayer's qualifying property is subject to the provisions of sections 167(1), 168(f)(2), and 168(i)(9) with respect to normalization of depreciation deductions or normalization of cost recovery deductions, respectively, of such property. In its federal income tax returns, where applicable, Taxpayer has used accelerated methods of depreciation or the Accelerated Cost Recovery System (‘ACRS‘). For qualifying property acquired during calendar years b through c, Taxpayer elected the class life asset depreciation range system (‘ADR‘) of depreciation pursuant to section 1.167(a)-11 of the Income Tax Regulations. Beginning with property additions of calendar year 1981, Taxpayer has used ACRS pursuant to section 168. On its regulated books of account and for ratemaking purposes, Taxpayer has followed the straight-line method of depreciation. Consequently, and as provided in sections 167(1)(3)(G)(ii) and 168(i)(9)(A)(ii), Taxpayer makes ‘adjustments to a reserve to reflect the deferral of taxes resulting from he use of such different methods of depreciation.‘ Additionally, for property subject to ADR, Taxpayer also normalizes the difference in depreciation attributable to shorter lives permitted thereunder by computing its tax expense for purposes of establishing its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account in accordance with the requirements of section 1.167(a)-11(b)(6)(ii) of the regulations. For recovery property subject to ACRS, Taxpayer follows a normalization method of accounting as described in sections 168(f)(2) and 168(i)(9). The normalization methods of accounting, as described above, have been reflected on the regulated books of account of Taxpayer and are used for ratemaking purposes, having been authorized and approved by Commission.

Board proposed in Taxpayer's most recent rate case that d of the total income tax liability paid by Taxpayer to Parent, which was not paid to the federal government currently because of nonregulated subsidiary losses, be added to the deferred tax reserve, and thus be used to reduce the rate base of Taxpayer. This rate base reduction would have been in addition to the reduction brought about by the use of accelerated methods of depreciation. The rationale for this proposal was that Taxpayer's Parent had certain nonregulated subsidiaries which had experienced federal income tax losses, and Parent had been able to offset such tax losses in its consolidated return against the taxable income generated by Taxpayer. Board proposed that the tax effects of Parent's nonregulated tax losses be used to reduce the rate base (and therefore the revenue requirements) of Taxpayer, even though the losses themselves were not used and would not be used to increase the revenue requirements of Taxpayer. Neither the nonregulated losses nor any other aspect of the nonregulated operation were included as items in calculating Taxpayer's cost of service or rate base.

Taxpayer is of the opinion that if this amount is deducted from rate base, there would be a violation of the Code normalization rules in that there would be no consistency at the Taxpayer level between depreciation expense, tax expense, the reserve for deferred taxes, and rate base since certain items would be based on Taxpayer alone while others would be based on a combination of Taxpayer with other companies in the consolidated group. If this were determined to be violation of the normalization rules and the Taxpayer lost it right to use accelerated depreciation, the resulting decrease in cash flow would have adverse impacts on both the ratepayers and Taxpayer and would increase revenue both the ratepayers and Taxpayer and would increase revenue requirements. Commission rejected Board proposal for several reasons, one reason being that adoption of the proposal may violate the normalization requirements of the Code and related regulations. Commission did, however, direct Taxpayer to request a ruling as to the tax consequences of Board proposal.

Section 167(1) of the Code provides, in pertinent part, that in the case of public utility property, a taxpayer is entitled to use accelerated depreciation only if it uses a normalization method of accounting with respect to such

 © 2021 Thomson Reuters. No claim to original U.S. Government Works.

property. Section 167(1)(3)(G) defines 'normalization method of accounting' to mean a method of accounting whereby adjustments are made to a reserve to reflect the deferral of income taxes resulting from the use of different methods of depreciation for tax purposes than are used on the regulated books of account and for retemaking purposes; for example, the use of an accelerated method of depreciation on federal income tax returns and the use of the straight-line method of depreciation for ratemaking purposes and on the regulated books of account.

Section 1.67(1)-1(h) of the regulations cover a 'normalization method of accounting' and subparagraph (2)(i) thereof sets forth the adjustments required to be made to a reserve for purposes of a 'normalization method of accounting'.
The taxpayer must credit the amount of deferred Federal income tax determined under subparagraph (1)(i) of this paragraph [which refers to the difference between depreciation under accelerated methods, as reported on income tax returns, and a straight-line depreciation, using asset guideline class lives] for any taxable year to a reserve for deferred taxes, a depreciation reserve, or other reserve account. The taxpayer need not establish a separate reserve account for such amount but the amount of deferred tax determined under subparagraph (1)(i) of this paragraph must be accounted for in such a manner so as to be readily identifiable. With respect to any account, the aggregate amount allocable to deferred tax under Section 167(1) shall not be reduced except to reflect the amount for any taxable year by which Federal income taxes are greater by reason of the prior use of different methods of depreciation under subparagraph (1)(i) of this paragraph. An additional exception is that the aggregate amount allocable to deferred tax under Section 167(1) may be properly adjusted to reflect asset retirements or the expiration of the period for depreciation used in determining the allowance for depreciation under Section 167(a).

Similar provisions are contained in the regulations covering ADR; see subparagraphs (i), (ii) and (iii) of section 1.167(a)-11(b)(6) of the regulations. Section 1.167(a)-11(b)(6)(iii) provides that if a utility such as Taxpayer does not normalize properly, its ADR election will 'terminate as of the beginning of the taxable year for which the taxpayer fails to normalize such tax deferral'.

With respect to ACRS, section 168(f)(2) of the Code provides that the term 'recovery property' does not include public utility property [within the meaning of section 167(1)(3)(A)] if the taxpayer does not use a normalization method of accounting.

Section 163(i)(9) of the Code provides:
(A) IN GENERAL. — In order to use a normalization method of accounting with respect to any public utility property for purposes of subsection (f)(2) —
(i) the taxpayer must, in computing its tax expense for purposes of establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, use a method of depreciation with respect to such property that is the same as, and a depreciation period for such property that is not shorter than, the method and period used to compute its depreciation expense for such purposes; and
(ii) if the amount allowable as a deduction under this section with respect to such property differs from the amount that would be allowable as a deduction under Section 167 (determined without regard to Section 167(1)) using the method (including the period, first and last year convention, and salvage value) used to compute regulated tax expense under clause (i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

(B) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS, ETC. —
(i) IN GENERAL. — One way in which the requirements of Subparagraph A are not met is if the taxpayer for ratemaking purposes, uses a procedure or adjustment which is inconsistent with requirements of Subparagraph (A).

 © 2021 Thomson Reuters. No claim to original U.S. Government Works.

(ii) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS. — The procedure and adjustment which are to be treated as inconsistent for purposes of clause (i) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection is also used for ratemaking purposes, with respect to the other 2 such items and with respect to the rate base.
(iii) REGULATORY AUTHORITY. — The Secretary may be regulations prescribe procedures and adjustments (in addition to those specified in clause (ii)) which are to be treated as inconsistent for purposes of clause (i).

Section 167(1)(3)(O) of the Code provides, with minor exceptions, the same definition for the normalization method of accounting as found in section 168(i)(9)(A) above.

Section 167(1)-1(a)(l) of the regulations, in describing the scope of section 167(1), states, in part, the following:
The normalization requirements of Section 167(1) with respect to public utility property defined in Section 167(1)(3)(A) pertain only to the deferral of Federal income tax liability resulting from the use of an accelerated method of depreciation under Section 167 and the use of straight-line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. . . .

Section 1.167(1)-1(h)(1)(iii) of the regulations, in further defining the normalization method of accounting states, in part, as follows:
'the amount of Federal income tax liability deferred as a result of the use of different method of depreciation under subdivision (i) of this subparagraph is the excess (computed without regard to credits) of the amount the tax liability would have been had a subsection (1) method been used over the amount of the actual tax liability. Such amount shall be taken into account for the taxable year in which such different methods of depreciation are used. . . .

Under the provisions of section 1.167(1)-(1)(h)(1)(i) of the regulations, a taxpayer will be regarded as using a normalization method of accounting with respect to its public utility property only if it makes an annual adjustment to a reserve to record the deferral of income taxes resulting from the use of a different method of depreciation for income tax purposes than is used for ratemaking purposes.

The description of the normalization method in section 1.167(1)-1(h)(1)(iii) of the regulations provides that the amount of federal income tax liability deferred for normalization purposes involves only two variables, the depreciation deduction for ratemaking purposes on the one hand, and the depreciation deduction actually used for income tax purposes, on the other. The amount of income tax liability so deferred in a given year is, therefore, simply the product of the difference between these income tax deductions and the income tax rate in effect for that year. If Taxpayer were to introduce a variable, such as the tax benefits resulting from the tax losses of affiliates, an excess deferred tax reserve would be created which would reduce the rate base to an amount less than that needed to meet normalization requirements. Because of this, Taxpayer would no longer be regarded as using a normalization method of accounting. This kind of adjustment to the deferred tax reserve would have the same effect as the kind of adjustment to the reserve that is prohibited by section 1.167(1)-(1)(h)(2). Such an adjustment achieves a rate base deduction by an adjustment to deferred taxes that is not allowed by the above cited regulation. If tax benefits attributable to entities other than the regulated company are used in the determination of deferred taxes and such than the regulated company are used in the determination of deferred taxes and such deferred taxes are used to reduce rate base, the taxpayer will fail to comply with the normalization provisions of the Code and the regulations thereunder.

 © 2021 Thomson Reuters. No claim to original U.S. Government Works.

There is an additional reason why Board proposal would violate the normalization provisions. Section 167(1)(3)(G) and 168(i)(9)(A) require consistency with respect to the assumptions used for the computation of tax expense, depreciation expense, deferred taxes, and rate base of the regulated company. Under the proposed method, the benefit of tax losses of affiliates would be used for purposes of determining Taxpayer's rate base. However, loss affiliates are ignored for purposes of determining other components of Taxpayer's rate base and cost of service. In addition, the proposed method ignores the assets and transactions of the loss affiliates for purposes of computing Taxpayer's tax expense, depreciation expense, and deferred taxes. This lack of consistent assumptions violates sections 168(i)(9)(A) and 167(1)(3)(G) of the Code.

Therefore, based on your representations and our legal analysis, we rule:

That Taxpayer will not be in compliance with the normalization requirements of section 167(1), 168(f)(2) and 168(i)(9) of the Code if it uses the so called consolidated tax savings adjustments proposal, as discussed above, as a reduction of rate base.

This ruling is directed only to the taxpayer who requested it. Section 6110(j)(3) of the Internal Revenue Code provides that it may not be used or cited as precedent. Temporary or final regulations pertaining to one or more of the issues addressed in this ruling have not yet been adopted. Therefore, this ruling will be modified or revoked by adoption of temporary or final regulations, to the extent the regulations are inconsistent with any conclusions in the ruling. See section 17.04 of Rev. Proc. 88-1, 1988-1 I.R.B. 7, 19. However, when the criteria in section 17.05 of Rev. Proc. 88-2 are satisfied, a ruling is not revoked or modified retroactively, except in rare or unusual circumstances.

A copy of this private letter ruling is being sent to your authorized representative in accordance with the power of attorney on file with this office.

A copy of this ruling letter should be filed with the income tax return for the taxable year or years in which the transaction covered by this ruling is consummated.
Sincerely yours,

Charles B. Ramsey
Chief, Branch 6
Office of Assistant Chief Counsel

Dear ***:
This letter responds to Parent's request, made on behalf of Taxpayer, dated October 19, 2017, for a ruling on the application of the Normalization Rules of the Internal Revenue Code (Code) to certain accounting and regulatory procedures, as described below.

The representations set out in your letter follow.

Taxpayer is an investor-owned regulated utility incorporated in State B and State C. Taxpayer is a wholly-owned subsidiary of X, a State D limited liability company classified as a corporation for income tax purposes. X is wholly-owned by Parent. Taxpayer is a member of Parent's consolidated group that files a consolidated federal income tax return on a calendar year basis using an accrual method of accounting.

Taxpayer is engaged in the purchase, transmission, distribution, and sale of electric energy in State A and State B. Taxpayer is subject to regulation with respect to terms and conditions of services by Commission A, Commission B, and Commission C. Each of these regulators establishes Taxpayer's rates based on its costs, including a provision for a return on the capital employed by Taxpayer in its regulated business.

Taxpayer has claimed (and continues to claim) accelerated depreciation on all of its public utility property to the full extent those deductions are available under the Code. Taxpayer normalizes the federal income taxes deferred as a result of its claiming these deductions in accordance with the Normalization Rules. As a consequence, Taxpayer has a substantial balance of Accumulated Deferred Federal Income Taxes (ADFIT) that is attributable to the accelerated depreciation reflected on both its State A and State B regulated books of account. In its general rate cases, Taxpayer reduces its rate base upon which its return component was computed by its ADFIT balance.

Taxpayer has generated significant net operating losses (“NOLs”) in a number of prior tax years and continues to have an NOL carryforward (“NOLC”) balance. To accurately reflect the economics of this NOLC, Taxpayer has recorded a deferred tax asset (“DTA”) on both its State A and State B regulated books of account. Taxpayer properly takes this DTA into account when computing the ADFIT balance by which it reduces its rate base and both Commission A and Commission B have accepted this treatment.

Prior to Year 4, Taxpayer had been a member of an affiliated group of corporations of which X was the common parent (“X Group”). The members of the X Group had, for many years, joined in the filing of a consolidated federal income tax return. By Year 3, the X Group had been under IRS audit for a considerable period of time

 © 2021 Thomson Reuters. No claim to original U.S. Government Works.

with respect to its federal income taxes for Year 1 through Year 2. The audit resulted in proposed adjustments, both positive and negative, to the taxable income of a number of X Group members, including both regulated and non-regulated members.

On Date 1, the IRS and X Group entered into a settlement ("IRS Settlement"). The IRS Settlement resulted in a net positive adjustment to the X Group's consolidated taxable income during the audit period which absorbed a portion of the then-existing consolidated NOLC. Of the consolidated NOLC absorbed, approximately $a was attributable to Taxpayer. Under the tax sharing agreement for the X Group Taxpayer received approximately $b in net payments during Date 4 and Date 5 from the X Group for use of Taxpayer's NOLC.

In Date 2, the month subsequent to the IRS Settlement being finalized, the results were recorded in the appropriate DTA accounts on Taxpayer's books and records. The recordation resulted in a reduction in Taxpayer's NOLC-related DTA. By reducing Taxpayer's DTA, this recordation increased Taxpayer's net ADFIT balance.

State A Ratemaking

On Date 7, Taxpayer filed an application with Commission A to request an increase in its retail rates for electricity. Taxpayer's application used a 12-month test period ending Date 3, with an effective date of Date 8 for the rates established in this proceeding. Thus, the test period was an historic test period. In computing its rate base, Taxpayer employed a 13-month averaging convention for all of the constituent elements, including ADFIT. During the proceeding, the proper calculation of the ADFIT balance by which rate base should be reduced became an issue in dispute.

In computing the amount of ADFIT by which rate base should be reduced, Taxpayer applied its applicable rate base convention, a 13-month average, to its monthly ADFIT balances for the test period and multiplied this amount by the State A distribution jurisdictional factor (c%). In its general rate case, Taxpayer reflected the impact of the IRS Settlement on Taxpayer's ADFIT balance as being $d. Applying the jurisdictional factor to this ADFIT impact, Taxpayer calculated that approximately $e was attributable to its State A electric distribution business. Since the IRS Settlement was recorded on Date 2, the last month of the test period, using the regulatory convention employed for all other elements of rate base, only 1/13th of the effect of the IRS Settlement ($e/13 or approximately $f) was included in the Taxpayer's calculation of the ADFIT balance by which it reduced rate base.

A third party intervenor (Intervenor 1) proposed to adjust Taxpayer's computation of ADFIT on account of the impact of the IRS Settlement. Specifically, Intervenor 1 proposed to treat the full impact of the IRS Settlement as a reduction in Taxpayer's ADFIT balance. Thus, Intervenor 1 proposed to take into account not just the $f reduction Taxpayer reflected in its rate base calculation but an additional $g, such that the entire jurisdictional impact of the IRS Settlement ($e) was incorporated into rates.

On Date 10, Commission A issued Order 1 in which it adopted Intervenor 1's proposed ADFIT adjustment based on the proposition that the impact of the IRS Settlement is "known" and will continue through the rate effective period. On Date 11, Taxpayer filed a motion in which Taxpayer asserted its view that incorporating the treatment of the IRS Settlement proposed by Intervenor 1 would constitute a violation of the Normalization Rules. In response to Taxpayer's filing, on Date 12, Commission A issued Order 2 in which it directed Taxpayer to request a Private Letter Ruling ("PLR") from the Service to clarify the impact of the normalization rule within the context of Order 2.

State B Ratemaking

On Date 9, Taxpayer filed an application with Commission B to request an increase in its retail rates for electricity. This application was considered by Commission B in Case. Taxpayer's application used a 12-month test period

 © 2021 Thomson Reuters. No claim to original U.S. Government Works.

ending Date 6, with an effective date of Date 14 for the rates established in this proceeding. Thus, the test period was an historic test period. In computing its rate base, Taxpayer employed a 13-month averaging convention for all of the constituent elements. ADFIT was also computed by Taxpayer based on the 13-month averaging convention.

In computing the amount of ADFIT by which rate base should be reduced, Taxpayer applied its applicable rate base convention, a 13-month average, to its monthly ADFIT balances for the test period and multiplied this amount by the State B distribution jurisdictional factor (h%). In basing the test year ADFIT balance on the 13-month averaging convention, Taxpayer applied the jurisdictional factor to the impact of the IRS Settlement detailed above. In its filings in Case, Taxpayer proposed that the impact of the IRS Settlement on Taxpayer's ADFIT balance should be $i. Applying the jurisdictional factor to this ADFIT impact, Taxpayer calculated that approximately $j was attributable to its State B electric distribution business. Since the IRS Settlement was recorded on Date 2, using the regulatory convention employed for all other elements of rate base, only 4/13th of the effect of the IRS Settlement or approximately $k was included in the Taxpayer's calculation of the ADFIT balance by which it reduced rate base.

A third party intervenor (Intervenor 2) proposed to adjust Taxpayer's computation of ADFIT on account of the impact of the IRS Settlement. Specifically, Intervenor 2 proposed to treat the full impact of the IRS Settlement as a reduction in Taxpayer's ADFIT balance (without application of the 13-month averaging convention). Intervenor 2 characterized the proposed adjustment as “annualizing” the impact of the IRS Settlement to take into account not just the reduction Taxpayer reflected in its rate base calculation but an additional $l such that the entire jurisdictional impact of the IRS Settlement would be incorporated into rates. Intervenor 2 indicated that while the reduction in the NOL DTA was not booked by the Taxpayer until Date 2, the NOL DTA was on the Taxpayer's books before the beginning of the test year.

Taxpayer contested this proposed adjustment asserting that its implementation would constitute a violation of the Normalization Rules. In response to Taxpayer's filings, on Date 13, Commission B issued Order 3 in which it directed that the Taxpayer to request a PLR from the Service to clarify the impact of the Normalization Rules before Commission B finally decides whether to annualize the cash that Taxpayer received on Date 2 as part of the IRS Settlement.

Taxpayer requests that we rule as follows:

Whether, the application of a 13-month average regulatory convention to most elements of rate base, including most elements of Taxpayer's ADFIT balance, and the application of a different regulatory convention (end of test period) to the impact of the IRS Settlement is acceptable under the Normalization Rules.

Law and Analysis

Former section 167(l) of the Code generally provided that public utilities were entitled to use accelerated methods of depreciation if they used a ““normalization method of accounting.” A normalization method of accounting was defined in former § 167(l)(3)(G) in a manner consistent with that found in § 168(i)(9)(A).

In order to use a normalization method of accounting, § 168(i)(9)(A) requires that a taxpayer, in computing its tax expense for establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, use a method of depreciation with respect to public utility property that is the same as, and a depreciation period for such property that is not shorter than, the method and period used to compute its depreciation expense for such purposes. Under § 168(i)(9)(A)(ii), if the amount allowable as a deduction under § 168 differs from the amount that would be allowable as a deduction under § 167 using the method, period, first

 © 2021 Thomson Reuters. No claim to original U.S. Government Works.

and last year convention, and salvage value used to compute regulated tax expense under § 168(i)(9)(A)(i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

Section 168(i)(9)(B)(i) provides that one way the requirements of § 168(i)(9)(A) will not be satisfied is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with such requirements. Under § 168(i)(9)(B)(ii), such inconsistent procedures and adjustments include the use of an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under § 168(i)(9)(A)(ii), unless such estimate or projection is also used, for ratemaking purposes, with respect to all three of these items and with respect to the rate base. This is known as the Consistency Rule.

In order to satisfy the requirements of § 168(i)(9)(B), there must be consistency in the procedures and adjustments used in ratemaking to calculate elements in rate base, depreciation expense, tax expense, and the reserve for deferred taxes. In this case, the IRS settlement has an effect on Taxpayer's ADFIT balance and the Taxpayer, along with Commission A and Commission B, agree that the settlement must be taken into account in setting Taxpayer's rates. The only question is whether the same convention used to calculate other elements of rate base, including ADFIT, a 13-month averaging convention, must also apply to calculate the effect of the IRS Settlement, or whether a different convention may apply to this element. Using the same convention would result in the consistent calculation of Taxpayer's tax expense, depreciation expense, and ADFIT as required by § 168(i)(9)(B). Applying a different regulatory convention solely to calculate the effect of the IRS Settlement would not satisfy the requirements of § 168(i)(9)(B) and the Consistency Rule.

Conclusion

We conclude that the application of a 13-month average regulatory convention to most elements of rate base, including most elements of Taxpayer's ADFIT balance, and the application of a different regulatory convention (end of test period) to the impact of the IRS Settlement is not acceptable under the Normalization Rules.

Except as specifically determined above, no opinion is expressed or implied concerning the Federal income tax consequences of the matters described above.

This ruling is directed only to the taxpayer who requested it. Section 6110(k)(3) of the Code provides it may not be used or cited as precedent. In accordance with the power of attorney on file with this office, a copy of this letter is being sent to your authorized representative. We are also sending a copy of this letter ruling to the Director.
Sincerely,

Patrick S. Kirwan

1. *2 Taxation Of Corps Filing Consolidated Returns § 54.01*
   Client/Matter: -None-

2 Taxation Of Corps Filing Consolidated Returns § 54.01

Federal Income Taxation of Corporations Filing Consolidated Returns--Second Edition > CHAPTER 54 Allocation of Liability

§ 54.01 Introduction

The consolidated return regulations represent a combination of single and separate entity treatment of consolidated groups. Consolidated taxable income (CTI) is determined by aggregating the separate income, deductions, and other items of the members of the group. Because of this aggregation, tax liability is determined only for the group as a whole. Nevertheless, the separate tax liability of the members must be determined for a variety of reasons, and the group's consolidated tax liability must therefore be allocated among its members.[1]

The allocation of tax liability to a member and the amount of tax a member must ultimately pay may be affected by the Code and regulations, by agreements among the members and others, and by state law. Different tax allocations may be made for different purposes, and a member's actual liability for tax may not be the same as the amount allocated to it for such purposes as earnings and profits (E&P) or stock basis adjustments.

The issues may be divided for discussion purposes into seven general categories:

1. Allocation to determine E&P. Tax liability must be allocated to determine the earnings and profits (E&P) of a member, because each member deducts its tax liability in determining its E&P.[2] The Code and regulations provide extensive rules for allocating tax liability for E&P purposes. The basic methods are provided in *IRC Section 1552* and Treas. Reg. *§ 1.1552-1. Treas. Reg.* § 1.1502-33(d) provides additional methods under which a member whose tax liability is reduced by losses and credits of other members may treat as additional tax liability its payments to the other members for the use of the attributes. In general, tax allocations do not affect the E&P of the common parent, because the common parent's E&P account reflects the E&P tiered up from all of the members. But allocations of E&P can affect the amount of E&P allocable to nonmember shareholders of subsidiaries. This can affect the taxation of distributions to these shareholders, and the aggregate E&P tiered up to the common parent. If payments are made in accordance with the allocations, they affect the relative values of the subsidiaries. Allocations can therefore be an important factor if nonmembers own stock in one or more subsidiaries.

2. Allocation to determine stock basis. Tax liability must be allocated to determine the stock basis adjustments of the members under *Treas. Reg. § 1.1502-32*, because taxes are treated as noncapital, nondeductible expenses of a member[3] and therefore reduce the basis of its stock. *Treas. Reg. § 1.1502-32(b)(3)(iv)(D)* does not permit flexibility in allocating taxes for this purpose; it requires taxes to be taken into account by applying the principles of

[1] "Tax liability" as discussed in this chapter generally includes only federal income taxes, including the regular corporate income tax and, if they apply, the alternative minimum tax, the accumulated earnings tax, the personal holding company tax, and the former minimum tax for tax preferences. A broader definition of tax liability including state taxes, may be used in tax sharing agreements for purposes of determining liability for payments among the parties to the agreement.

[2] *Treas. Reg. § 1.1552-1(b)(2)*.

[3] *Treas. Reg. § 1.1502-32(b)(3)(iii)(A)*.

IRC Section 1552 and the percentage method under Treas. Reg. § 1.1502-33(d) using 100 percent as the percentage.[4]

3. Allocation for other tax purposes. Other income tax determinations may depend on the allocation of tax liability. In addition to the methods described above for stock basis adjustments and E&P, the Code and regulations provide methods for allocating the consolidated tax liability only to determine the "tax shown on the return" in computing additions to tax for underpayments of estimated tax.[5] For this purpose, taxes are allocated using the method the group has elected under IRC Section 1552 and Treas. Reg. § 1.1502-33(d). Proposed regulations have been published to provide for allocation of tax liability under the alternative minimum tax. This issue is discussed in §§ 62.06, 62.07[8] and [9], and 71.02[4].

Although allocation methods are not specifically prescribed for other tax purposes, taxpayers probably are limited to the method in effect for purposes of determining E&P (and perhaps only the method in effect under IRC Section 1552)[5.1] for other tax purposes. For example, as explained in § 54.03, the courts have required a payment of tax liability by a subsidiary to a parent under a tax sharing agreement to be treated as a dividend to the extent it exceeds the amount of the subsidiary's tax liability determined under IRC Section 1552.

Examples of other tax determinations that require an allocation of tax liability are:

(a) Each member's deductible portion of interest paid on an income tax deficiency for a prior consolidated return year, if the deficiency is paid in a subsequent separate return year.[6]

(b) The deduction for income taxes under IRC Section 545(b)(1) in computing the personal holding company tax on separate undistributed personal holding company income.[7]

(c) The amount of the taxes imposed by IRC Section 801 that affects the amount of the shareholders surplus account of a stock life insurance company, in the case of a consolidated group of life insurance companies.[8]

---

[4] Under the pre-1995 investment adjustment system, basis adjustments were linked to E&P, so tax allocations under the IRC Section 1552 and Treas. Reg. § 1.1502-33(d) methods elected by the group were automatically used in determining stock basis adjustments.

[5] Treas. Reg. § 1.1502-5(b)(3).

[5.1] It has been held that the Treas. Reg. § 1.1502-33(d) methods cannot be used to determine the credit of a reciprocal insurance exchange. The credit is based on the tax liability attributable to the relevant business, and should not be reduced because of losses of other businesses of related corporations. State Auto. & Cas. Underwriters v. U.S., 462 F. Supp. 514 (S.D. Iowa 1978).

[6] Koppers Co. v. Comm'r, 8 T.C. 886 (T.C. 1947), *supplemental opinion* 11 T.C. 894 (T.C. 1948), *acq*. 1949-1 CB 3 (subsidiary entitled to deduction only for interest accruing on the portion of the deficiency for consolidated tax attributable to the subsidiary's income).

[7] The personal holding company tax may be imposed on *consolidated* undistributed personal holding company income (UPHCI) or on one or more members' UPHCI, depending on how IRC Section 542(b) applies to the group. In the separate computation case, the personal holding company tax imposed on the separate UPHCI of each member that is a personal holding company is aggregated in determining the group's consolidated tax liability. If the personal holding company tax is computed on a separate corporation basis, each member must deduct its allocated portion of the consolidated tax (excluding any accumulated earnings and personal holding company taxes) in computing its separate UPHCI. This requires two allocations of consolidated tax: (1) the accumulated earnings and personal holding company taxes must be excluded for purposes of computing the separate UPHCI of each separate (not consolidated) personal holding company, and (2) these two taxes must be taken into account in computing the E&P of each member.

[8] IRC Section 815(c)(2)(B).

4. Allocation to determine liability for payment. As agent for the group, the common parent files the consolidated return and pays the tax liability of the group, and generally receives any refunds with respect to the group for consolidated return years. *Treas. Reg. § 1.1552-1* operates on the assumption that the common parent collects from each subsidiary its share of the consolidated tax liability, and pays to a subsidiary its share of any refund. The allocation of liability for payment of taxes is an issue between the members and does not affect the rights of the Service. Under *Treas. Reg. § 1.1502-6(a)*, each member of a consolidated group is severally liable for the entire tax liability of the group for any year for which it was a member, and under *Treas. Reg. § 1.1502-77(a)*, the payment of a refund to the common parent discharges any liability of the Government to the other members. The sharing of consolidated tax liability among the members generally is not governed by the tax law. It is usually determined by a *tax sharing agreement* between the members, or in the absence of a formal agreement, by their practices with respect to the payment of taxes and the receipt of refunds.[9] Tax sharing agreements are discussed in *§§ 41.04[9]* and *71.02[4]*.

5. Determinations under state law. The tax sharing practices of the group, and even its tax sharing agreement, may be challenged by adverse parties in a variety of circumstances. A challenger may argue, for example, that the practices of the group are not contractually binding, or are unreasonable or inconsistently applied. Generally, a subsidiary controlled by the group will not challenge the group's practices, even if they are binding, but creditors and others with a claim on the subsidiary's assets have challenged the group's tax allocation practices in the courts.[10] For example, a trustee in bankruptcy for a subsidiary may demand full payment for the use of the attributes of a bankrupt subsidiary, even though the group has not elected to allocate tax liability under *Treas. Reg. § 1.1502-33(d)* and has not provided for payment for the use of attributes in a tax sharing agreement. Minority shareholders of a subsidiary may also sue to require the group to pay the subsidiary for the use of its tax attributes. A subsidiary's right to receive payment for the use of its attributes by a consolidated group is discussed in *§§ 54.08* and *71.02[4]*. *Treas. Reg. § 301.6402-7* provides special rules under which refunds otherwise payable to the common parent of a consolidated group can be paid to the fiduciary of a member that is an insolvent financial institution. These rules, which govern the payment of refunds but do not affect ultimate rights under state law, are discussed in *§ 41.04[9][b]*.

6. Allocations between buyer and seller. If the stock of a subsidiary is sold and one or both of the parties is a consolidated group, the purchase agreement should contain detailed provisions for the allocation of tax liability in connection with the sale. For example, the agreement should specify to what extent a refund resulting from carrying back a loss into the selling consolidated group is to be shared between the loss corporation and the selling group. Typically, the purchase and sale agreement provides that it supersedes any tax sharing agreement already in place in the selling or buying group. Tax sharing agreements between buyer and seller are discussed in *§ 71.02[4]*.

7. Determinations by regulatory authorities. Allocation of tax liability of a consolidated group may be an issue in setting rates in regulated industries. For example, it may be a factor in determining a member's net earnings and rate of return on its investment for federal or state regulatory purposes. However, accelerated depreciation can be used for public utility property only if the tax benefits of accelerated cost recovery are normalized in setting rates charged by utilities to customers and in reflecting operating results in regulated books of account.[11] Normalization

---

[9] Tax liability is separately determined for purposes of determining the amount of deferred income taxes which members of the group are required to record on their books for financial accounting purposes. However, tax liability under a binding tax allocation agreement may be a liability or a contingent liability for book purposes.

[10] *See, e.g.*, *Jump v. Manchester Life & Cas. Mgmt. Corp., 579 F.2d 449 (8th Cir. 1978)*, *aff'g 438 F. Supp. 185 (E.D. Mo. 1977)* (unsuccessful action by state insurance commissioner to recover portion of refund attributable to group's use of loss incurred by bankrupt insurance company subsidiary); *In re Franklin Sav. Corp.*, 159 Bankr. 9 (Bankr. D. Kan. Sept. 15, 1993) (tax refunds attributable to the tax liability of a subsidiary corporation deemed to be property of the parent corporation under a tax agreement supported by valid business reasons). *See generally*, D. Ponikvar and R. Kestenbaum, *Aspects of the Consolidated Group in Bankruptcy: Tax Sharing and Tax Sharing Agreements*, 58 The Tax Lawyer 803 (Summer, 2005). Tax sharing considerations for financially troubled consolidated groups are discussed in *§ 54.08* and *§ 74.01[2]*.

effectively requires the benefits of accelerated depreciation to be retained by the public utility and not be passed on to its customers by being taken into account in fixing rates. The Service has ruled that a subsidiary would not be in compliance with the normalization requirements of a predecessor of *IRC Section 168(f)(2)* if it used for ratemaking purposes a consolidated effective rate of tax that was lower than the statutory rate of tax because of the use of losses incurred by non-utility members of the consolidated group.[12]

Although a tax allocation method and a tax sharing agreement may be of crucial importance if a conflict arises between unrelated persons, tax allocations among profitable, wholly owned subsidiaries may have little practical significance, and administrability may be the most important factor. In these situations, it may be desirable to chose a method that can be used for most or all relevant purposes. For example, it may be desirable to conform the method used for E&P purposes with the method required for financial reporting or investment adjustment purposes.[13]

[11] *IRC Section 168(f)(2)*.

[12] *PLR 8525156 (Mar. 29, 1985)*. The extent to which regulatory authorities take the use of losses and other attributes of nonregulated members into account in ratemaking is beyond the scope of this treatise. Proposed Treas. Reg. §§ 1.167(1)-1(h)(7) and 1.168(i)-1, PS 107-88, *1990-2 CB 869*, dealt with tax allocations among members of consolidated groups that included public utilities and that used normalization for accelerated depreciation. The regulations generally provided that tax savings from a utility's use of losses of other members of a consolidated group could not be treated as a reduction in the utility's tax expense for ratemaking purposes, but that consolidated tax savings could be treated as no-cost capital in determining rates. The proposed regulations were criticized by both sides of the controversy, and the Service withdrew them on April 25, 1991, saying that the project was closed pending congressional guidance. IR-91-57 (Apr. 25, 1991).

[13] *Treas. Reg. § 1.1502-32(b)(3)(iv)(D)* provides that in determining the taxes treated as noncapital, nondeductible expenses of a subsidiary for investment adjustment purposes, the group must use the percentage method under *Treas. Reg. § 1.1502-33(d)(2)* with 100 percent as the percentage.

2 Taxation Of Corps Filing Consolidated Returns § 54.03

Federal Income Taxation of Corporations Filing Consolidated Returns--Second Edition > CHAPTER 54 Allocation of Liability

§ 54.03 Effects of Method of Allocation Adopted by Group

[1] General Rules

IRC Section 1552 provides the rules for the effect of the allocation of consolidated tax liability. The tax liability allocated to a member under IRC Section 1552 decreases the member's E&P, and it is treated as a liability of the member. If a member does not pay the full amount of its liability, the amount not paid is generally treated as a distribution with respect to stock (e.g., a dividend), a contribution to capital, or both, unless the payment by another member is a loan to the owing member.[22] For example, if a parent corporation pays its subsidiary's share of the consolidated tax liability and the payment is not in fact a loan, the parent is treated as making a contribution to the capital of the subsidiary. If a subsidiary pays its parent's share of the tax, and the payment is not a loan, the payment is ordinarily treated as a dividend or other distribution with respect to the subsidiary's stock.[23] If one subsidiary pays another subsidiary's tax liability, the paying subsidiary is treated as making a

[22] Treas. Reg. § 1.1552-1(b)(2) and (f).

[23] *Cf*. Rev. Rul. 73-605, 1973-2 CB 109; Beneficial Corp. v. Comm'r, 18 T.C. 396 (T.C. 1952), *aff'd per curiam*, ***202 F.2d 150 (3d Cir. 1953)*** (amounts paid to parent in excess of tax allocation were dividends, even if paid under a tax allocation agreement); Dynamics Corp. of Am. v. U.S., 392 F.2d 241, 183 Ct. Cl. 101 (Ct. Cl. 1968) (same). In a second *Dynamics* case, a repayment by a parent of a portion of the constructive dividend was held to be a deductible expense for the year of repayment to the extent the amount of the repayment was previously includible in the parent's income for a separate return year, net of the dividends-received deduction. The dividend had originally been made in the year following the last consolidated return year, but part of it was required to be repaid as a condition of settlement of a stockholder's derivative suit. The Court of Claims held that the payment related back to the original transaction. Dynamics Corp. of Am. v. U.S., 449 F.2d 402, 196 Ct. Cl. 282 (Ct. Cl. 1971). The deduction for repayment was, in effect, limited to the amount includible in the parent's income (net of the 85-percent dividends-received deduction) based on the tax benefit approach applied in U.S. v. Skelly Oil Co., 394 U.S. 679 (1969). If the constructive dividend had been in a consolidated return year, the repayment would not have been deductible.

distribution to its parent, and the parent is treated as making a contribution to the capital of the subsidiary whose tax liability was paid.[24]

Even if there is an intercompany agreement that provides for the allocation of consolidated tax liability in a different manner, the method in effect under *IRC Section 1552* and, if applicable, *Treas. Reg. § 1.1502-33(d)* must be used in determining the E&P of the members.[25] The Tax Court has held that, although an accrual-basis subsidiary paid its parent an amount in excess of its allocated tax liability to compensate its parent for the use of its losses in the consolidated return, and the payment was characterized as a dividend in the return, the payment did not increase the parent's E&P for the year, for which a subsequent Service examination resulted in additional tax liability allocable to the subsidiary in the amount of the payment to the parent.[26] The Court held that the reduction in E&P caused by the additional tax related back to the year the subsidiary accrued the liability.[27] However, the Fifth Circuit Court of Appeals reversed the Tax Court's decision, holding that the form of the payment to the parent—a dividend—was controlling.[28] Under this disposition of the case, the Court did not find it necessary to determine the effect of the subsequently determined tax liability on the E&P of the parent corporation for the year of the distribution to the parent.

Treas. Reg. §§ 1.1552-1 and 1.1502-33(d) apply only to the group's federal income tax liability for a consolidated return year as determined under *Treas. Reg. § 1.1502-2*. This includes the regular corporate income tax and, if applicable, the accumulated earnings tax, personal holding company tax, and the former minimum tax for tax preferences.[29] In December 1992, the Service issued proposed regulations that would

---

[24] Treas. Reg. §§ 1.1552-1(f) and 1.1502-33(d)(6), Examples 1 and 2. *See* *Rev. Rul. 73-605, 1973-2 CB 109*. In PLRs 8345008 (Aug. 5, 1983) and 8344013 (July 17, 1983), the Service ruled, relying in part on *Rev. Rul. 73-605, 1973-2 CB 109*, that payments to a subsidiary organized in the U.S. and resident in the United Kingdom, by U.K. affiliates, for the use of the subsidiary's losses were treated as capital contributions under *IRC Section 118*. This caused the payments to be excluded from the subsidiary's U.S. taxable income.

In *PLR 8524043 (Mar. 18, 1985)*, considered in *GCM 39367 (Dec. 31, 1984)*, the Service ruled that for U.S. tax purposes payments between related foreign corporations made pursuant to foreign laws permitting consolidated tax computations and intended to compensate one member for use of its losses which reduced another member's foreign tax liability should be characterized as: (1) dividends, if paid by a subsidiary to its parent, (2) contributions to capital, if paid by a parent to a subsidiary, or (3) dividends followed by capital contributions, if paid from one subsidiary to another.

But the Service ruled in *PLR 200515004 (Dec. 9, 2004)* that the "group relief payments" to be made by one foreign subsidiary of a U.S. affiliated group to another foreign subsidiary for the use of a foreign net operating loss will be nontaxable stock distributions under *IRC Section 305(a)* and not includible in income by the shareholder(s) of the paying subsidiaries as dividends under *IRC Section 301(a)*, where the group relief payments were to be made pursuant to contracts (enforceable under local law) between the foreign subsidiaries and certain members of the U.S. affiliated group that obligated the shareholder of the paying foreign subsidiary to make an immediate capital contribution to the recipient foreign subsidiary equal to the group relief payment.

[25] *Rev. Rul. 76-302, 1976-2 CB 257*. Similarly, to determine stock basis, the method required by *Treas. Reg. § 1.1502-32(b)(3)(iv)(D)* must be used.

[26] *Singleton v. Comm'r, 64 T.C. 320 (T.C. 1975)*.

[27] *Id. at 329*.

Ed. 2d 335 (1978)* (with separate and dissenting opinions). *Cf.* *PLR 200225032 (Mar. 20, 2002)* (payments in excess of tax liability of foreign entity treated as dividends).

[29] *Treas. Reg. § 1.1552-1(b)(1)*; T.I.R. 1032 (Mar. 19, 1970).

provide a method for determining the amount of consolidated alternative minimum tax to be allocated to members of the group.[30] The alternative minimum tax is discussed in § 61.06.

In the absence of unusual circumstances, tax-sharing payments among members are treated as contributions or distributions and not as items of income or deduction.[30.1]

[2] Payment Treated as a Loan

Whether a loan is created by one member's payment of another member's tax liability is a question of fact. If repayment is customarily made or is contractually agreed upon, a loan is created. If a method is elected under *Treas. Reg. § 1.1502-33(d)* that results in a liability to a loss member by another member for all or part of the tax benefit derived from the use of losses, a receivable and a payable arise at the close of the year of the allocation.[31]

If there is an obligation to make the repayment, the obligation would continue even if one of the parties leaves the consolidated group, and the tax consequences of subsequent events affecting the obligation should be determined under general tax principles. The debt is treated as satisfied and reissued under *Treas. Reg. § 1.1502-13(g)* when one of the parties leaves the group. If the creditor is unable to collect the debt and it becomes worthless, a bad debt deduction should be available. If the debt is forgiven, it may be treated as satisfied under *Treas. Reg. § 1.1502-13(g)*. *Treas. Reg. § 1.1502-13(g)* is discussed in *Chapter 33*.

If there is no contractual obligation to make the repayment, payment of the tax liability in a manner different from the tax allocation method generally results in a dividend or contribution to capital at the time the payment is made. But if a tax payment would otherwise be regarded as a dividend or contribution to capital at a time

---

[30] ***Prop. Treas. Reg. § 1.1552-1(g)***, IA–57–89, *1993-1 CB 799*.

[30.1] This can also be true for payments between unrelated persons, as in the case of transfers of income and tax sharing payments under the Alaska Native Corporation regime of prior law, under which Alaska Native Corporations could in essence apply their losses against income of unrelated taxpayers and share in the tax savings. Correspondingly, repayments of these benefits were not deductible. *See* *TAM 200048013 (Aug. 17, 2000)*.

[31] In *Lincoln Sav. & Loan Ass'n v. Wall, 743 F. Supp. 901 (DC 1990)*, a parent corporation entered into a tax sharing agreement with its wholly owned subsidiary. Both were members of a consolidated group. The agreement required the profitable subsidiary to make quarterly payments to the parent, which had substantial NOLs, in an amount equal to the subsidiary's stand-alone tax liability. This tax liability was calculated under GAAP as used for financial accounting purposes. If the calculations were made using tax accounting principles, the subsidiary would have owed no taxes on a stand-alone basis. The court found that the effect of this tax sharing arrangement was to improperly strip cash from the subsidiary. In holding that the payments were unlawful loans to the parent, the court suggested that a tax sharing agreement requiring payments by a profitable member to a member with NOLs in excess of actual stand-alone tax liability is improper. However, the percentage method, discussed below, permits this result in some circumstances. *Cf. In re Franklin Sav. Corp.*, 159 Bankr. 9 (Bankr. D. Kan. 1993).

when the members are no longer affiliated, such a payment may be considered as additional gain or loss on the sale of stock of the subsidiary, or some other form of income or deduction.[32]

[3] Carrybacks and Carryovers

The carryback of a net operating loss, a net capital loss, or a credit causes an adjustment of the E&P for the taxable year *from* which the loss or credit is carried, but the effect of the carryback is determined by reallocating the tax liability for the taxable year *to* which the loss or credit is carried.[33] For example, if a consolidated net operating loss is carried back from Year 2 to Year 1, the original allocation of the Year 1 consolidated tax liability is recomputed (in accordance with the method of allocation used in Year 1) after giving effect to the carryback, but the changes in the Year 1 tax liability are reflected in the E&P of the appropriate members using the accrual basis in Year 2. For a cash-basis member, the adjustment to E&P presumably occurs in the year the carryback refund is actually received.

Treas. Reg. §§ 1.1502-21, 1.1502-78 and 1.1502-79 provide rules for carrybacks and carryovers from separate return years to consolidated return years and vice versa. Under these provisions if a subsidiary leaves a group and later has a net operating loss that may be carried back to a year of that group, the refund is made directly to the group's common parent and not to the subsidiary (or to the group it is in for the loss year). The regulations do not provide a method for the subsidiary or its current group to receive the refund directly from the government.[34] For this reason, if a group sells a member, the contract should provide specifically for the

---

[32] However, the Tax Court has held that payments exceeding a former member's allocable share of consolidated tax liability are nondeductible taxes because each member is "jointly and severally" liable for the entire consolidated tax. *Globe Prods. Corp. v. Comm'r, 72 T.C. 609 (T.C. 1979)*, *acq. on another issue,* 1980-1 CB 1 (deficiency paid under a tax sharing arrangement between former subsidiaries of an insolvent parent). The court apparently did not consider *Treas. Reg. § 1.1552-1(b)(2)*, which specifically mandates that the additional payment is treated as a liability of the member for whom the payment is made. Failure to pay back the liability should therefore have resulted in a bad debt deduction to the paying corporation. Although IRC Section 1552 and *Treas. Reg. § 1.1552-1* deal primarily with rules for E&P computations, the tax characterization of the excess payment as a liability probably should have been accepted by the court because payment of the former member's share of tax should reduce E&P without regard to how the payment is characterized. *See also Merit Tank & Body, Inc. v. Comm'r, 40 T.C.M. 368 (T.C. 1980)* (erroneous excess payment during consolidation).

Under the entitlement rule of *Treas. Reg. § 1.1502-13(f)(2)(iv)*, if a member disposes of a share of stock of another member after a distribution has been declared, but before the distribution has been made, the distribution is deemed to be made for all Federal income tax purposes when the member becomes entitled to the distribution. Arguably, an obligation under a tax sharing agreement could be equivalent to the declaration of a dividend. The entitlement rule is discussed in *§ 32.02[2]*.

[33] *Treas. Reg. § 1.1552-1(b)(1)*. *See Rev. Rul. 74-423, 1974-2 CB 289*, concerning the effect on E&P of a refund of prior years' taxes resulting from a net operating loss carryback attributable to a newly formed subsidiary. In *Rev. Rul. 75-153, 1975-1 CB 106*, the Service ruled that current E&P is adjusted for the total amount of refunds resulting from the carryback of a net operating loss arising in the current year which, when carried back, generated an unused investment credit that could also be carried back and absorbed in a prior year.

[34] However, one case, citing the last sentence of *Treas. Reg. § 1.1502-77(a)*, held that the Service may deal directly with a subsidiary. In an unreported case, *U.S. v. Bass Fin. Corp.*, Docket No. 83 C 706, (N.D. Ill., May 27, 1983), the Service was permitted to turn a refund owed to a group over to the district court so that the common parent and the Federal Savings and Loan Insurance Corporation as receiver for the former subsidiary could litigate between themselves their claims to the tax refund at issue. The district court noted that the Service had not decided by regulation which entity should ultimately receive the refund where both the common parent and the former subsidiary claim the right to the refund. However, it noted that *Treas. Reg. § 1.1502-77(a)* is procedural in purpose and exists for the convenience of the government, citing *Jump v. Manchester Life & Cas. Mgmt. Corp., 579 F.2d 449 (8th Cir. 1978)*, *aff'g 438 F. Supp. 185 (E.D. Mo. 1977)*. Rather than paying the refund directly to the parent, the court held that the Service could interplead the refund and let the parent and the receiver for the subsidiary litigate their right to the refund on the merits. *See also* IRC Section 6402(j) and *Treas. Reg. § 301.6402-7*, discussed in § 14.08, for the ability to pay a refund attributable to an insolvent member to a statutory or court–appointed fiduciary.

disposition of any refunds that arise from the carryback of losses or credits. For a discussion of tax sharing agreements in connection with the acquisition or disposition of a subsidiary, see *§ 71.02[4]*.

APPLICATION OF SOUTHWESTERN ELECTRIC POWER COMPANY FOR AUTHORITY TO CHANGE RATES	§ § §	**PUBLIC UTILITY COMMISSION OF TEXAS**

ORDER

This Order addresses the application of Southwestern Electric Power Company (SWEPCO) for authority to change its rates. Through its application and rebuttal testimony, SWEPCO sought a Texas retail revenue requirement of $451,529,538.

A hearing on the merits was held between May 19 and May 26, 2021 at the State Office of Administrative Hearings (SOAH). On August 27, 2021, the SOAH administrative law judges (ALJs) filed their proposal for decision in which they recommended a Texas retail revenue requirement decrease to SWEPCO's Texas retail revenue requirement of $26,495,690. In response to the parties' exceptions and replies to the proposal for decision, on November 9, 2021, the SOAH ALJs filed a letter making changes to the proposal for decision.

The Commission adopts the proposal for decision as modified by the ALJs, including findings of fact and conclusions of law, to the extent provided in this Order.

I. Discussion

The Commission's decisions result in a Texas retail base-rate revenue requirement of $400,742,913, which is a decrease of $50,786,625 from SWEPCO's requested Commission-authorized revenue requirement. New findings of fact 24A-I and 315A-C are added to address the procedural history of this docket after the close of the evidentiary record at SOAH. Additionally, the Commission modifies finding of fact 286 to reflect the rate schedules produced by Commission Staff's updated number run.

A. Self-Insurance Reserve and Hurricane Laura Costs

The Commission disagrees with the SOAH ALJs' finding that SWEPCO failed to sufficiently quantify the amount of savings of the self-insurance in comparison to commercial insurance to support establishment of a self-insurance reserve. In this proceeding SWEPCO presented adequate testimony on cost savings attributable to the self-insurance plan. While

SWEPCO did not quantify the precise savings associated with its self-insurance proposal, it did offer a detailed assessment of the expenses SWEPCO would avoid through the plan. Therefore, the Commission rejects the proposal for decision and approves the self-insurance reserve plan proposed by SWEPCO.

SWEPCO also requested authorization to charge its Texas jurisdictional Hurricane Laura restoration costs against the self-insurance reserve discussed above. Because the Commission approves SWEPCO's proposed self-insurance reserve plan it also approves the charging of Hurricane Laura restoration costs against the self-insurance reserve. To reflect these determinations, the Commission modifies findings of fact 96 and adds new finding of fact 96A. The Commission also modifies conclusion of law 30.

B. Return on Equity

The SOAH ALJs recommended a return on equity of 9.45%. After consideration of the evidence and expert witness testimony the Commission finds that a return on equity of 9.25% is appropriate. Market conditions indicate electric utilities continue to enjoy favorable access to capital financing in the form of short- and long-term interest rates, while electric utility returns on equity have continued to decrease since SWEPCO's last rate case in 2017. Furthermore, in establishing a reasonable return on invested capital, PURA[1] § 36.052 provides the Commission authority to consider the efforts of the utility in conserving resources; the quality of service; the efficiency of operations; and the quality of management. SWEPCO has continued to increase its vegetation management expenses but its system average interruption duration index (SAIDI) and system average interruption frequency index (SAIFI) scores have worsened since 2018 which is indicative of periodically unreliable service quality and substandard operational planning. Therefore, the Commission deletes finding of fact 101 and modifies findings of fact 97, 98, 100, and 105.

C. Vegetation Management

Due to SWEPCO's service quality record and vegetation management deficiencies, Commission Staff recommended that SWEPCO be required to hire a consultant to conduct a review of the transmission system and make recommendations to improve performance. While

[1] Public Utility Regulatory Act, Tex. Util. Code §§ 11.001–66.016 (PURA).

the SOAH ALJs did not recommend the hiring of an independent consultant, they did remark that SWEPCO's worsening SAIFI and SAIDI scores are troubling. The Commission finds that SWEPCO should be required to include additional information as part of its annual reports filed under 16 Texas Administrative Code (TAC) § 25.97(f). The additional information should include each occurrence of an outage related to vegetation contact with utility infrastructure and, for each line identified, the length of time since that line last received vegetation management treatment. Finally, the information should identify every distribution line that has not received vegetation management treatment in the previous four years. Therefore, the Commission deletes finding of fact 123 and adds finding of fact 123A.

D. Financial Integrity and Ring-Fencing

SWEPCO is just one of many American Electric Power Company, Inc. (AEP) subsidiaries. AEP and its various subsidiaries engage in a range of activities related to electricity production, delivery, and service across the country. Commission Staff recommended imposing 15 ring-fencing provisions for SWEPCO as part of this proceeding. Recognizing that the financial instability of an affiliate entity could impact SWEPCO, the SOAH ALJs ultimately recommended that 11 of the provisions be adopted in consideration of the demonstrated value of ring-fencing protections. After reviewing the record and parties' briefs, the Commission finds that two additional provisions should be implemented to insulate customers' rates from any financial instabilities of its parent company, AEP, and AEP's other subsidiaries. The Commission requires the additional ring-fencing provisions, of a no cross-default provision and a no financial covenants or rating agency triggers related to another entity provision. Accordingly, the Commission adds new finding of fact 109A.

E. Allocated Transmission Expenses Related to Behind-the-Meter Generation

The SOAH ALJs recommended removal of 146 megawatts (MW) of Eastman's behind-the-meter generation (BTMG) load that SWEPCO added to its Texas jurisdiction for allocation purposes. The Commission ultimately agrees with the SOAH ALJs' conclusion however it determined that specific discussion on federal jurisdiction and the filed-rate doctrine were unnecessary. Therefore, the Commission modifies the proposal for decision to remove findings of fact 209 through 212, as well as conclusions of law 34 through 37, because those findings and conclusions are unnecessary to support this Order.

F. Texas Cotton Gin Association Class Allocation

The SOAH ALJs recommended that the Texas Cotton Gin Association did not present an alternative class allocation or rate deign proposal, and therefore did not make any rate adjustment in response to the Texas Cotton Gin Association's assertions. As Commission Staff correctly notes, the allocation of costs based on system wide rates is consistent with prior Commission precedent. Therefore, the Commission deletes finding of fact 251 from the proposal for decision as unnecessary to support this Order.

G. Minor or Non-Substantive Changes

In addition to the changes described above, the Commission makes several minor modifications or corrections to the proposed findings of fact and conclusions of law.

Finally, the Commission makes non-substantive changes to findings of fact and conclusions of law for such matters as capitalization, spelling, punctuation, style, grammar, readability, and conformity with the Commission's order writing format.

II. Findings of Fact

The Commission adopts the following findings of fact.

Applicant

1. SWEPCO is a wholly owned subsidiary of American Electric Power Company, Inc. (AEP) and is a fully integrated electric utility serving retail and wholesale customers in Texas, Louisiana, and Arkansas.

2. SWEPCO serves approximately 187,400 Texas retail customers, all of whom are affected by SWEPCO's application to change rates.

3. The Federal Energy Regulatory Commission (FERC) regulates SWEPCO's wholesale electric operations.

4. On October 14, 2020, SWEPCO filed its petition and statement of intent requesting that the Commission authorize SWEPCO to increase its Texas retail base rate revenue by $90,199,736, which is an increase of 26.03% over its adjusted Texas retail test-year base-rate revenues exclusive of fuel and rider revenues. The overall impact of the proposed

revenue requirement increase, considering both fuel and non-fuel revenues, is a 15.57% increase.

5. SWEPCO employed the 12-month period ending March 31, 2020, as its historical test year.

6. SWEPCO's proposed rate increase reflects incremental investment in generation since its last test year and incremental investment in transmission and distribution since SWEPCO last modified its transmission cost recovery factor (TCRF) and distribution cost factor (DCRF).

7. SWEPCO proposes revisions to many of its rate schedules and riders, requests that the Commission set SWEPCO's TCRF and DCRF to zero and establish the baseline values consisting of the inputs to the calculations that will be used to calculate SWEPCO's TCRF and DCRF in future proceedings.

8. Additionally, SWEPCO has announced the early retirement of its Dolet Hills Power Plant as of December 31, 2021. As a result, SWEPCO proposes rate treatments to address this early retirement.

9. SWEPCO requests an increase of $5 million over test year costs to expand its distribution vegetation management program.

10. SWEPCO also requests that the Commission approve certain policy-oriented proposals, including the establishment of a self-insurance reserve, deferred recovery of Hurricane Laura restoration cost, and certain charges billed to SWEPCO by the Southwest Power Pool (SPP).

11. SWEPCO provided notice of its application by publication for four consecutive weeks in newspapers having general circulation in each county of SWEPCO's Texas service territory. Individual notice of its proposed rate change was provided to all its retail customers by bill inserts and direct mailing. SWEPCO timely served notice of its statement of intent to change rates on all municipalities retaining original jurisdiction over its rates and services. Additionally, SWEPCO electronically provided notice to Commission Staff, the Office of Public Utility Counsel, and legal representatives of all parties to SWEPCO's most recent base case, Docket No 46449.

12. The following intervening parties participated in this docket: the Office of Public Utility Counsel; Cities Advocating Reasonable Deregulation (CARD); Eastman Chemical Company; Texas Industrial Energy Consumers; Nucor Steel-Longview; Texas Cotton Ginners Association; Northeast Texas Electric Cooperative, Inc. and East Texas Electric Cooperative, Inc.; Sierra Club and Dr. Lawrence Brough (Sierra Club); East Texas Salt Water Disposal Company (ETSWD) and East Texas Oil and Gas Producers; and Walmart Inc. Commission Staff also participated in this docket.

13. On October 30, 2020, the Commission referred this case to SOAH.

14. On November 19, 2020, SWEPCO filed an agreed motion to adopt procedural schedule in which it agreed to extend the statutory deadline to October 27, 2021.

15. On December 17, 2020, the Commission filed its preliminary order identifying the issues to be addressed in this proceeding.

16. In SOAH Order No. 2 filed on November 23, 2020, the SOAH ALJs set the hearing on the merits for May 19-28, 2021.

17. Collectively, the Commission's preliminary order and SOAH Order No. 2 include a statement of the time, place, and nature of the hearing; a statement of the legal authority and jurisdiction under which the hearing is to be held; a reference to the particular sections of the statutes and rules involved; and either a short, plain statement of the factual matters asserted, or an attachment that incorporates the reference by factual matters asserted in the complaint or petition filed with the state agency.

18. SWEPCO timely filed with the Commission petitions for review of rate ordinances of the municipalities exercising original jurisdiction within its service territory. All such appeals were consolidated for determination in this proceeding.

19. The hearing on the merits commenced before four SOAH ALJs on May 19, 2021 and concluded on May 26, 2021.

20. The parties submitted initial post-hearing briefs on June 17, 2021, and reply briefs on July 1, 2021. Proposed findings of fact, conclusions of law, and ordering paragraphs were filed July 1, 2021, and the record closed on that date.

21. In accordance with Order No. 13, SWEPCO and CARD filed final rate-case-expense reports on July 6, 2021.

22. On July 20, 2021, Commission Staff filed its final supplemental direct testimony regarding rate-case expenses.

23. On July 27, 2021, SWEPCO filed its final supplemental rebuttal testimony on rate-case expenses, and CARD filed a statement of position on its final requested rate-case expenses.

24. The ALJs filed a proposal for decision in this docket on August 27, 2021.

24A. The ALJs filed a revised schedule D, originally attached to the proposal for decision, on August 31, 2021.

24B. Parties filed exceptions to the proposal for decision by October 7, 2021.

24E. On October 26, 2021, SWEPCO filed a letter agreeing to extend the statutory deadline in this case to December 9, 2021.

24F. Parties filed replies to exceptions by October 28, 2021.

24G. On November 9, 2021, the SOAH ALJs filed their response to the exceptions and replies and made certain modifications and clarifications to the proposal for decision.

24H. On December 7, 2021, Commission Staff filed its number run with updated rate schedules for SWEPCO based on the Commission's November 18, 2021 open meeting discussion.

24I. Commission Staff filed supplemental corrections to its number run on December 13 and December 21, 2021.

Rate Base and Invested Capital

Generation, Transmission, and Distribution Capital Investment

25. SWEPCO has invested approximately $636.7 million in its transmission system since the end of the test year (June 30, 2016) in its last base-rate case, Docket No. 46449.

26. SWEPCO has incurred a total amount of $143.5 million of distribution-capital investment placed in service during the period July 1, 2016, through March 31, 2020.

27. No party contested SWEPCO's transmission or distribution investment. The entirety of the transmission and distribution investment is used and useful in providing service to the public and is reasonable and necessary.

New Generation Capital Investment

28. SWEPCO regularly reviews capital projects that could provide economic, environmental, reliability, or safety-related benefits to SWEPCO's generating fleet. The first step in any capital addition evaluation is to research alternatives that may exist, and when warranted to perform cost-benefit analyses to estimate a project's value.

29. The Commission's electric utility rate filing package (RFP) for generating utilities schedule H-5.2b provides a list of every capital project with a value of greater than $100,000 placed in service since the close of the previous rate-case test year through the end of the test year in this case. This schedule provides a description of the reason for the capital investment, including: (1) immediate personnel safety requirement, (2) regulatory safety of operations requirement, (3) regulatory commitment (not classified in (2)), (4) plant efficiency improvement, (5) new building, (6) productivity improvement, (7) reliability, (8) economic, (9) habitability, and (10) other. The schedule also indicates whether a cost-benefit analysis was done for the project, which was done for a large majority of the projects.

30. SWEPCO uses multiple processes to ensure its generation operations and maintenance (O&M) expenses are reasonable. These include the use of budget controls, the review of cost trends, and tracking of staffing levels at its power plants.

31. RFP schedule H-1.2 provides a description of the O&M expenses incurred by FERC account, by plant, for each month of the test year. RFP schedule H-3 provides historical SWEPCO generation O&M expenses, by FERC account, by year since 2015. RFP schedule H-4 provides the major O&M projects undertaken during the test year by plant.

32. Except for Sierra Club's challenges to the test-year capital and O&M spending at the Flint Creek, Welsh, and Dolet Hills plants, no party contested the prudence of SWEPCO's generation-capital investments since the end of the Docket No. 46449 test year, nor the reasonableness of the test-year O&M expenses.

33. The legally competent, credible evidence presented in this case does not show that SWEPCO's capital investment at Flint Creek, Welsh, and Dolet Hills was imprudent, or that the O&M expenses were unreasonable or unnecessary.

34. SWEPCO's capital investment placed in service since the end of the Docket No. 46449 test year, including the test year capital spending at the Flint Creek, Welsh, and Dolet Hills plants, is prudent.

35. SWEPCO's O&M expenses incurred at its generating plants during the test year, including Flint Creek, Welsh, and Dolet Hills, are a reasonable and necessary component of SWEPCO's cost of service.

Retired Gas-Fired Generating Units

36. In January 2019, SWEPCO retired Knox Lee Unit 4. Additionally, in May 2020 SWEPCO retired Knox Lee Units 2 and 3, Lieberman Unit 2, and Lone Star Unit 1.

37. In deciding to retire these units, SWEPCO considered the age and condition of the units' equipment, the significant capital investment required for them to continue operating, and their relatively high cost to generate electricity. In light of those considerations, SWEPCO determined it was in the best interest of its customers to retire the generating units. The prudence of those retirement decisions was unchallenged.

38. SWEPCO accounted for these retirements in accordance with the FERC uniform system of accounts, which requires that the book cost of the unit retired be credited to electric plant and the same book cost be charged to the accumulated provision for depreciation applicable to that property.

39. SWEPCO used method described in finding of fact 38 to account for the retirement of Lieberman Unit 1 in Docket No. 46449, although this was uncontested and thus not specifically addressed by the Commission in that docket.

40. Although 16 TAC § 25.72(c) requires SWEPCO to maintain its books and records according to the FERC uniform system of accounts, this prescribed accounting treatment does not necessarily control the treatment of the assets for ratemaking purposes.

41. In Docket No. 46449, the Commission determined that: (1) because Welsh Unit 2 was retired and no longer generating electricity, it was not used by and useful to SWEPCO in providing electric service to the public; (2) because Welsh Unit 2 was no longer used and useful, SWEPCO could not include its investments associated with the plant in its rate base and earn a return on that remaining investment; (3) allowing SWEPCO a return of, but not on, its remaining investment in Welsh Unit 2 properly balances the interests of customers and shareholders with respect to a plant that no longer provides service; and (4) the appropriate accounting treatment that results in the appropriate ratemaking treatment was to record the undepreciated balance of Welsh Unit 2 in a regulatory-asset account rather than leaving it in accumulated depreciation.

42. Consistent with the Commission's rate treatment of the retired Welsh Unit 2 in Docket No. 46449, the net book values of the retired Lieberman Unit 2, Lone Star Unit 1, and Knox Lee Units 2, 3, and 4 should be removed from rate base, to cease earning a return and be placed in a regulatory asset.

43. The regulatory asset should be amortized over the four-year period in which the rates approved in this case are expected to be in effect.

Dolet Hills

44. Dolet Hills is a lignite-fueled generating unit located southeast of Mansfield, Louisiana, and jointly owned by SWEPCO; Cleco Power, LLC; Northeast Texas Electric Cooperative, Inc.; and Oklahoma Municipal Power Authority. CLECO is the majority owner and operator of Dolet Hills.

45. Dolet Hills went into commercial operation in 1986, and its previously established useful life extends until 2046.

46. Dolet Hills is fueled by lignite mined in the same area by Dolet Hills Lignite Company (DHLC), a SWEPCO subsidiary. An equity return on DHLC and associated taxes is currently included in SWEPCO's rate base.

47. An investment in the Oxbow Mine reserves is also included in SWEPCO's rate base.

48. In early 2020, SWEPCO and CLECO determined that all economically recoverable lignite at the Dolet Hills associated mines had been depleted, that mining operations should cease, and that Dolet Hills should be retired by the end of 2021.

49. In deciding whether to retire Dolet Hills, SWEPCO evaluated mining operations and the costs of operating the plant beyond 2021. SWEPCO studied the expected total SWEPCO system cost to serve customers, comparing the scenario where Dolet Hills continues to serve customers through 2046 versus through a December 31, 2021 retirement. The study determined that the expected least-cost path for SWEPCO and its customers lay in retiring the plant.

50. No party contested the prudence of SWEPCO's decision to retire Dolet Hills at the end of 2021. The decision was prudent.

51. Dolet Hills will be retired on December 31, 2021 and will continue providing service until that time. SWEPCO plans to continue operating the plant on a seasonal basis, principally during the peak summer months, as it has done in recent years. However, the plant remains available in case called upon by SWEPCO or CLECO's respective regional transmission organizations for reliability reasons.

52. Until its retirement, output from Dolet Hills will continue to be offered into the energy market year-round, incurring expenses required to ensure the unit is available to operate when called upon.

53. Although mining operations ceased in May 2020, SWEPCO's investment in the Oxbow reserves will continue to provide service until Dolet Hills' retirement, as the plant will continue to burn previously mined lignite to generate electricity.

54. Similarly, DHLC will continue to exist and deliver lignite to Dolet Hills, and SWEPCO will continue incurring this non-eligible fuel expense through the plant's retirement.

55. In this case, the rate year began on the relate-back date, March 18, 2021.

56. Dolet Hills, SWEPCO's Oxbow investment, and DHLC have provided service to customers during the rate year.

57. Good cause exists to make post-test-year reductions to SWEPCO's rate base to reflect, consistent with the Commission's rate treatment of Welsh Unit 2 in Docket No. 46449, that Dolet Hills, the Oxbow investment, and DHLC will cease to provide service to SWEPCO's customers when the plant retires on December 31, 2021.

58. It is appropriate to remove all cost recovery for Dolet Hills, the Oxbow investment, and DHLC from base rates and address these issues instead in a Dolet Hills rate rider.

59. Through the Dolet Hills rate rider, SWEPCO should be permitted, with respect to the period between March 18, 2021 (the date when the rates are effective) and December 31, 2021 (the date of Dolet Hills' retirement) (the operative-plant phase of the Dolet Hills rate rider), to recover the costs ordinarily permitted for an operating generating plant, including a return on the plant's net book value (including applicable accumulated deferred federal income taxes and unused materials and supplies), depreciation, and O&M. SWEPCO should similarly be permitted to continue earning a return on the Oxbow investment and the return on equity and associated taxes for DHLC. The charges in the Dolet Hills Rate Rider should be subject to true-up to reflect an updated-net-book value of Dolet Hills after its retirement and again after the plant is closed and final demolition costs are known.

60. With respect to the period after December 31, 2021 (the post-retirement phase of the Dolet Hills rate rider), the remaining net book values of Dolet Hills should be placed in a regulatory asset to be amortized without a return. All other cost recovery for Dolet Hills, the Oxbow investment, or DHLC under the Dolet Hills rate rider should cease, as the assets will no longer be providing service.

61. SWEPCO's recovery of Dolet Hills' remaining net book value (whether through depreciation during the operative-plant phase or recovery from the regulatory asset during the post-retirement phase) should be amortized in accordance with the asset's useful life ending in 2046.

62. DELETED.

63. Amortizing these assets in accordance with Dolet Hills' useful life ending in 2046 equitably balances the interests of SWEPCO and both its current and future customers.

64. It would be inequitable to SWEPCO's current customers to accelerate SWEPCO's recovery of these assets, as SWEPCO proposes to do, through offsetting the excess accumulated deferred federal income taxes (ADFIT) SWEPCO owes to its current customers and amortizing the balance over only four years.

65. SWEPCO's calculation and use of estimated demolition costs for Dolet Hills is reasonable.

Coal and Lignite Inventories

66. SWEPCO must maintain solid fuel inventories to assure a continuous supply of coal and lignite of appropriate quality, delivered at a reasonable cost over a period of years to promote the generation of the lowest cost per kilowatt-hour (kWh) of electricity, within the constraints of safety, reliability of supply, unit design, and environmental requirements.

67. Coal and lignite deliveries must be arranged so that sufficient fuel is available at all times to provide and maintain adequate and dependable electric service for SWEPCO's customers.

68. Setting inventory levels for SWEPCO's coal power plants (Welsh, Flint Creek, and Turk) and lignite power plants (Pirkey and Dolet Hills) based on the average level of burn from the test year would negatively impact SWEPCO's ability to reliably serve the needs of its customers and SPP and expose SWEPCO's customers to reliability risk.

69. Setting coal and lignite inventory targets for SWEPCO's coal and lignite power plants based on full-load burn ensures that adequate inventory is available to provide the necessary reliability for SWEPCO customers and SPP.

70. The target coal and lignite inventory levels SWEPCO requests to include in rate base are reasonable and necessary to ensure adequately reliable service to its customers.

71. However, because Dolet Hills will be retired on December 31, 2021, and consistent with the findings regarding the appropriate rate treatment of SWEPCO's investments in that plant, the Oxbow reserves, and DHLC, SWEPCO's lignite inventory for Dolet Hills should be removed from rate base and placed in the Dolet Hills Rate Rider; SWEPCO should recover a return on that inventory only during the operative-plant phase, and have no cost recovery for the inventory during the post-retirement phase.

72. Good cause exists to make these post-test year adjustments regarding SWEPCO's lignite inventory for Dolet Hills.

Prepaid Pension

73. SWEPCO records an additional cash investment in the pension trust fund as a prepaid pension asset in accordance with generally accepted accounting principles under Accounting Standards Codification 715-30. The prepaid pension asset is the cumulative additional pension cash contributions beyond the amount of pension cost.

74. No party has contested, and the evidence establishes, that an additional cash investment recorded as a prepaid pension asset should be included in rate base in accordance under PURA § 36.065.

NOLC ADFIT

75. SWEPCO records its stand-alone federal income tax net-operating-loss-carry-forward (NOLC) ADFIT on its books and records consistent with generally accepted accounting principles and the FERC uniform system of accounts.

76. For the period 2009 through the March 20, 2020 test year end, SWEPCO recorded a total net amount of stand-alone tax NOLC ADFIT of $455,122,490.

77. SWEPCO does not file a separate federal income tax return, as it is a subsidiary of AEP and included in AEP's consolidated federal income tax return.

78. SWEPCO participates in the AEP Tax Allocation Agreement for allocating the consolidated income taxes for AEP and its consolidated affiliates.

79. Under the AEP tax allocation agreement, through the March 20, 2020 test year end, SWEPCO received net-cash payments of $455,122,490 for the use of its tax net-operating losses to offset the taxable income of its affiliates on the AEP consolidated income tax return.

80. SWEPCO reflected its receipt of these tax allocation payments in its financial books and records by reducing the balance of its NOLC ADFIT to $0.

81. SWEPCO used the tax-allocation payments to finance plant assets now in its rate base. In essence, SWEPCO exchanged its previously recorded NOLC ADFIT asset (an asset that would reduce ADFIT and therefore increase rate base) for plant assets now included in rate base.

82. Under these circumstances, SWEPCO's proposed adjustment to recognize the $455,122,490 NOLC ADFIT again would effectively double the proper rate base impact of the NOLC ADFIT, contrary to normalization requirements.

83. Commission Staff's recommendation instead to reflect SWEPCO's book NOLC-ADFIT balance of $0 is consistent with PURA § 36.060, prevents SWEPCO from earning a return on the same $455,122,490 twice, and is consistent with normalization principles.

Excess ADFIT

84. The Tax Cuts and Jobs Act of 2017 reduced the corporate federal income tax rate from 35% to 21% effective January 1, 2018. This reduction, and the associated revaluation of the ADFIT balances previously recorded at 35% decreased due to the new 21% tax rate, results in excess ADFIT balances that should be returned to SWEPCO's customers.

85. The Commission determined in Docket No. 46449 that the regulatory treatment of excess deferred taxes resulting from the reduction in the federal tax rate would be addressed in SWEPCO's next base rate case. This proceeding is SWEPCO's next base rate base after Docket No. 46449.

86. In determining the amount of excess ADFIT available to its Texas customers, it is reasonable for SWEPCO to use the Texas retail allocation factor of 35.01% approved in Docket No. 46449.

87. Excess ADFIT related to differences in method and life for calculating depreciation expense for book versus tax purposes is considered to be *protected* excess ADFIT that cannot be returned to customers more rapidly than over the remaining lives of the assets that gave rise to the deferred taxes. All other excess ADFIT is considered to be unprotected, meaning there are no limitations on the timing or manner of returning it to customers.

88. SWEPCO began amortizing the protected excess ADFIT on January 1, 2018, by recording a provision for refund on its books as a regulatory liability related to the Texas jurisdictional portion of the excess ADFIT amortization.

89. SWEPCO should refund the balance of excess ADFIT available to return to customers (both unprotected ADFIT and accrued protected ADFIT) by first crediting the balance against any amount owed by customers because of the March 18, 2021 relate-back date in this proceeding, then refunding any excess ADFIT balance remaining over a six-month period, with carrying charges at the Commission-allowed weighted average cost of capital.

89A. The excess ADFIT refund should be allocated to rate classes in proportion to the amount of allocated ADFIT in the class cost of service study (CCOSS), and each rate class should receive

its full share of the refund. The application of any excess ADFIT credits against any amounts owed because of the relate-back of the rates approved in this proceeding should thus be conducted on a class-by-class basis.

90. The remaining balance of protected excess ADFIT should be returned to customers as an amortization included in rates, in a manner consistent with normalization requirements.

Accumulated Depreciation

91. SWEPCO's calculation of accumulated depreciation was not contested and is reasonable.

92. SWEPCO's adjustments to accumulated depreciation were not contested, are reasonable, and should be adopted.

Self-Insurance Reserve

93. SWEPCO requests approval of a self-insurance reserve pursuant to PURA § 36.064 and 16 TAC § 25.231(b)(1)(G).

94. SWEPCO's proposed self-insurance reserve would be funded by an annual accrual of $1,689,700, consisting of $799,700 to account for annual expected O&M losses from storm damage in excess of $500,000, plus $890,000 to build a target reserve of $3,560,000 in four years.

95. SWEPCO further proposes to charge its Texas jurisdictional Hurricane Laura restoration costs against the self-insurance reserve.

96. SWEPCO sufficiently demonstrated that self-insurance is a lower-cost alternative than commercial insurance and that customers will receive the benefits of the self-insurance plan.

96A. The Commission finds that SWEPCO's proposal to charge its Texas jurisdictional Hurricane Laura restoration costs against the self-insurance reserve is reasonable and is approved.

Rate of Return

97. A return on equity (ROE) of 9.25% will allow SWEPCO a reasonable opportunity to earn a reasonable return on its invested capital.

98. A 9.25% ROE is consistent with SWEPCO's business and regulatory risk.

99. SWEPCO did not demonstrate that either a size or credit risk adjustment was appropriate in setting its ROE.

100. A downward adjustment to the ROE is not warranted for the August 18, 2019 outage on SWEPCO's transmission system, which was caused by vegetation contact with a SWEPCO transmission line.

101. DELETED.

102. SWEPCO's proposed 4.18% cost of debt is reasonable.

103. A capital structure composed of 50.63% long-term debt and 49.37% equity is reasonable in light of SWEPCO's business and regulatory risks.

104. A capital structure composed of 50.63% long-term debt and 49.37% equity will be sufficient to attract capital from investors.

105. SWEPCO's overall rate of return should be as follows:

COMPONENT	CAPITAL STRUCTURE	COST OF CAPITAL	WEIGHTED AVERAGE COST OF CAPITAL
LONG-TERM DEBT	50.63%	4.18%	2.12%
COMMON EQUITY	49.37%	9.25%	4.57%
TOTAL	100.00%		6.69%

Financial Integrity (Ring-Fencing Protections)

106. AEP is a large corporation with several subsidiaries in multiple states, including both regulated and non-regulated entities. The effects of financial instability or weakness in one of these entities could affect not only AEP as the parent company, but also its subsidiaries, including SWEPCO.

107. Ring-fencing measures have been used to protect utilities from risky corporate parents or other affiliates to protect the utility's financial integrity and to ensure the utility can continue to operate and serve its customers.

108. Ordering the following financial protections is reasonable and necessary to protect SWEPCO's financial integrity and to ensure SWEPCO's ability to provide reliable service at just and reasonable rates:

a. SWEPCO will work to ensure that its credit ratings at Standard and Poor's and Moody's remain at or above SWEPCO's current credit ratings.

b. SWEPCO will notify the Commission if its credit issuer rating or corporate rating as rated by either Standard and Poor's or Moody's falls below investment-grade level.

c. SWEPCO will take the actions necessary to ensure the existence of a SWEPCO stand-alone credit rating.

d. SWEPCO will not share a credit facility with any unregulated affiliates.

e. SWEPCO's debt will not be secured by non-SWEPCO assets.

f. SWEPCO's assets will not secure the debt of AEP or its non-SWEPCO affiliates. SWEPCO's assets will not be pledged for any other entity.

g. SWEPCO will not hold out its credit as being available to pay the debt of any AEP affiliates.

h. Except for access to the utility-money pool and the use of shared assets governed by the Commission's affiliate rules, SWEPCO will not commingle its assets with those of other AEP affiliates.

i. SWEPCO will not transfer any material assets or facilities to any affiliates, other than a transfer that is on an arm's-length basis in accordance with the Commission's affiliate standards applicable to SWEPCO, regardless of whether such affiliate standards would apply to the particular transaction.

j. Without prior approval of the Commission, neither AEP nor any affiliate of AEP (excluding SWEPCO) will incur, guaranty, or pledge assets in respect of any incremental new debt that is dependent on: (1) the revenues of SWEPCO in more than a proportionate degree than the other revenues of AEP; or (2) the stock of SWEPCO. SWEPCO will not seek to recover from customers any costs incurred as a result of a bankruptcy of AEP or any of its affiliates.

109. These financial protections are similar to those agreed to by SWEPCO affiliate AEP Texas in Docket No. 49494, which were approved by the Commission. SWEPCO already abides

by most of the ring-fencing measures approved for AEP Texas and confirmed that SWEPCO is amenable to similar measures.

109A. After considering expert testimony and the evidentiary record, the Commission determined that two additional ring-fencing provisions proposed by Commission Staff are appropriate in order to insulate Texas ratepayers from business risks that do not provide ratepayer benefits:

a. A no cross-default provision, that SWEPCO's credit agreements and indentures will not contain cross-default provisions whereby a default by AEP or its other affiliates would cause a default by SWEPCO.

b. A no financial covenants or rating agency triggers related to another entity provision, that the financial covenants in SWEPCO's credit agreements will not be related to any entity other than SWEPCO. SWEPCO will not include in its debt or credit agreements any financial covenants or rating agency triggers related to any entity other than SWEPCO.

110. The evidence shows substantial benefit, and does not show a significant cost or harm, to ordering SWEPCO to employ the financial protections listed above.

Transmission O&M Expense

111. SWEPCO's test year transmission O&M expenses were $46,683,319, of which $8,636,052 were affiliate expenses.

112. SWEPCO's transmission O&M expenses were not contested by any party and are reasonable.

Transmission Expenses and Revenues under FERC-Approved Tariff

113. The SPP charges SWEPCO for the provision of transmission service to SWEPCO's customers. SWEPCO also receives payment from SPP for SPP members' use of SWEPCO's transmission facilities. These expenses and revenues are incurred and received pursuant to the FERC-approved SPP open access transmission tariff (OATT). The net amount that SWEPCO incurred under the SPP OATT during the test year is included in SWEPCO's requested cost of service in this proceeding.

Proposed Deferral of SPP Wholesale Transmission Costs

114. SWEPCO proposes to defer the portion of its approved transmission charges that is above or below the test-year level into a regulatory asset or liability for recovery in a future TCRF or rate case proceeding.

115. SWEPCO has not shown that the proposed recovery mechanism is needed here.

116. SWEPCO has not demonstrated that the approved transmission charges tracker is necessary for it to have a reasonable opportunity to earn a reasonable return above its necessary expenses.

Distribution O&M Expense

117. SWEPCO's adjusted test-year distribution O&M expenses including its own costs plus the charges from its service company affiliate, AEP Service Company, for distribution activities necessary to provide safe, reliable distribution services were $93,656,735.

118. The adjusted test-year distribution O&M costs reflect the amount necessary to perform distribution functions—for example, planning, construction, operation, and maintenance of the distribution system; and implementing SWEPCO's distribution-system-asset-management programs, reliability programs, and the vegetation-management program.

119. SWEPCO's distribution O&M expenses are reasonable and necessary.

Distribution Vegetation Management

120. SWEPCO's proposal to recover distribution O&M base-rate expenses of $14.57 million, consisting of the test-year amount of $9.57 million and an additional amount of $5 million, is reasonable.

121. The additional amount of distribution O&M expense in the amount of $5 million is reasonable and necessary to carry forward SWEPCO's vegetation-management program to improve overall reliability on targeted circuits and decrease outages caused by trees.

122. SWEPCO commits to spending the entirety of the increased amount of $5 million for distribution O&M expense solely on vegetation management.

123. DELETED.

123A. As part of its required annual filings under 16 TAC § 25.97(f), SWEPCO must include information on each occurrence of an outage related to vegetation contact with utility infrastructure and, for each of those instances, identify the length of time since vegetation management maintenance was most recently conducted. SWEPCO must also provide a list of every distribution line that has not received vegetation management treatment in the previous four years.

Generation O&M Expense

124. SWEPCO's proposed rate increase does not adjust the test year O&M expense for Dolet Hills to reflect the scheduled retirement of the plant by the end of 2021.

125. During the test year, SWEPCO incurred approximately $12.5 million in non-fuel O&M expense related to its 257 MW (40.28%) ownership share of Dolet Hills.

126. For Dolet Hills, SWEPCO's test-year-average-monthly O&M expense level is approximately $1.04 million per month.

127. After SWEPCO retires Dolet Hills at the end of 2021, SWEPCO will avoid significant non-fuel O&M expenses for operations at Dolet Hills.

128. The reduced utilization and ultimate retirement of Dolet Hills will result in known and measurable changes in the cost to maintain and operate the plant.

129. SWEPCO should recover O&M expense associated with the operation of Dolet Hills from March 18, 2021 (the relate-back date of rates in this proceeding) through December 31, 2021, at a monthly O&M expense level of $1.04 million per month.

130. SWEPCO should not recover O&M expense for Dolet Hills past its retirement in December 2021.

Payroll Expenses

131. SWEPCO's proposed base payroll is based on the salaries of its employees for the final pay period at the end of the test year (March 2020) plus post-test year pay increases of 3.0% for merit-eligible employees and 2.5% for hourly physical and craft employees, which were implemented in April 2020 and September 2020, respectively.

132. In June and July of 2020, retirement incentive packages were offered to certain SWEPCO and AEP Service Company employees. One SWEPCO employee and 189 AEP Service Company employees accepted the retirement incentive package.

133. Commission Staff proposes an adjustment of $544,331 in addition to SWEPCO's requested payroll adjustment based on a more recent time period, October 31, 2020, that was after the retirement incentives were offered.

134. It is appropriate to annualize SWEPCO's base payroll as of October 31, 2020, increasing SWEPCO's base payroll by $544,300 on a total company basis and $199,282 on a Texas retail jurisdiction basis, inclusive of the pay raise actually given by SWEPCO to its employees.

135. SWEPCO requests an increase of $3,804,876 to the test-year payroll expense allocated from AEP Service Company, based on an annualization of the end of test year headcount and inclusion of a merit increase.

136. Commission Staff proposes an adjustment of ($4,480,512) to the allocated AEP Service Company payroll, also based on annualization of the October 2020 AEP Service Company payroll that was after the retirement incentives were offered.

137. The impact of the retirements is reflected in Commission Staff's adjustment of $544,331 to SWEPCO's payroll and an adjustment of ($4,480,512) to SWEPCO's requested AEP Service Company allocated payroll.

138. SWEPCO failed to show it intended to replace the retired employees or that its employee headcount would recover or vary minimally from the test year. Rather, a material number of employees accepted the retirement package.

139. The retirement package and revised employee headcount is a material known and measurable change that merits an adjustment to payroll.

140. It is appropriate to annualize the base payroll for AEP Service Company payroll expense as of October 31, 2020, resulting in a decrease to SWEPCO's proposed base rates of $4,480,512 on a total company basis and $1,686,106 on a Texas retail jurisdiction basis.

Short-Term Incentive Compensation

141. SWEPCO's application excluded financial-based short-term incentive compensation expense and 50% of the financial-based funding mechanism related to its short-term incentive compensation plans.

142. SWEPCO's request to recover short-term incentive compensation expense should be adjusted to correct errors in accordance with the testimony of Commission Staff witness Ruth Stark, which SWEPCO does not oppose.

143. SWEPCO's requested short-term incentive-compensation expense, adjusted in accordance with the testimony of Commission Staff witness Ruth Stark, is approved.

Long-Term Incentive Compensation

144. SWEPCO adjusted its test year long-term incentive compensation expenses to remove the 75% of those expenses related to performance units but retained the 25% related to restricted stock units.

145. Restricted stock units are not based on financial measures and are appropriate to include in SWEPCO's rates.

146. SWEPCO's requested long-term incentive compensation expense is approved.

Severance Costs

147. In calendar years 2017 and 2018, SWEPCO incurred $0 in direct severance costs. During the test year, SWEPCO incurred $767,074 in direct severance costs.

148. SWEPCO's $767,074 in direct severance costs during the test year is atypical and does not represent normal levels of direct severance costs.

149. It is appropriate to average three years of direct severance costs to calculate SWEPCO's direct allowable severance costs, which equates to $252,033.

150. AEP Service Company allocates severance costs to SWEPCO. During the test year relative to calendar year 2017 and 2018, AEP Service Company charged severance costs to SWEPCO that increased from less than $550,000 for the two years prior to $1,460,876 during the test year.

151. SWEPCO's $1,460,876 in allocated severance costs during the test year is atypical and does not represent normal levels of allocated severance costs.

152. It is appropriate to average three years of allocated severance costs to calculate SWEPCO's allowable-allocated severance costs, which equates to $824,300.

Pension Expense

153. SWEPCO's requested cost of service pension expense reflects the costs being recorded by SWEPCO in 2020 as presented in the 2020 actuarial studies, which are the latest available actuarial studies performed by Willis Towers Watson, SWEPCO's independent actuary. SWEPCO applies the test-year actual payroll expense capital ratio to these 2020 costs to determine the pro forma level of expense to include in the cost of service. SWEPCO's requested cost of service pension expense is reasonable.

Other Post-Retirement Benefits Expense

154. SWEPCO's requested other post-employment benefits expense reflects the costs being recorded by SWEPCO in 2020 as presented in the 2020 actuarial studies, which are the latest available actuarial studies performed by Willis Towers Watson. SWEPCO's requested other post-employment benefits expense is reasonable.

Depreciation and Amortization Expense

Net Salvage/Demolition Study

155. The use of a 10% contingency factor in SWEPCO's demolition study to determine terminal-net-salvage amounts for SWEPCO's generating plants is reasonable.

156. It is reasonable for SWEPCO to escalate the terminal-net-salvage amounts in the demolition study (which are stated in year-end 2020 dollars) to the expected final retirement date of each plant using a 2.22% inflation rate from the *Livingston Survey* dated December 2019, published by the research department of the Federal Reserve Bank of Philadelphia.

Curve Life Combinations — Mass Property Accounts

157. It is reasonable to apply an S0.0-68 Iowa curve-life combination for FERC account 353, transmission station equipment.

158. It is reasonable to apply an S1.5-74 Iowa curve-life combination for FERC account 354, transmission towers and fixtures.

159. It is reasonable to apply an L1.5-49 Iowa curve -ife combination for FERC account 355, transmission poles and fixtures.

160. It is reasonable to apply an R2.0-70 Iowa curve-life combination for FERC account 356, overhead conductors and devices.

161. It is reasonable to apply an S-.5-55 Iowa curve-life combination for FERC account 364, poles, towers, and fixtures.

162. It is reasonable to apply an R4.0-80 Iowa curve-life combination for FERC account 366, underground conduit.

163. It is reasonable to apply an R3.0-46 Iowa curve-life combination for FERC account 367, underground conductor.

164. It is reasonable to apply an R3.0-59 Iowa curve-life combination for FERC account 369, services.

165. It is reasonable to apply an L0.0-15 Iowa curve-life combination for FERC account 370, meters.

Amortization Expense

166. SWEPCO's amortization expense related to an intangible asset that was fully amortized as of the end of the test year should be excluded from SWEPCO's revenue requirement.

Purchased Capacity Expense

167. During the test year, SWEPCO continued to purchase 50 MW of capacity under its long-term purchase power agreement with Louisiana Generating Company (formerly Cajun Electric Power Cooperative) (the Cajun contract). That agreement began in 1992. These capacity costs have been consistently recovered through base rates.

168. During the test year, SWEPCO purchased the product designated as operating reserve capacity under the Cajun contract and counted that capacity in SWEPCO's compliance with SPP's capacity reserve requirements. During the test year SWEPCO did not purchase any operating reserve energy under the Cajun contract.

169. The operating reserve capacity under the Cajun contract is distinguishable from regulation and operating reserve services procured in the SPP independent monitor day-ahead and real-time market.

170. The costs that SWEPCO incurred during the test year under the Cajun contract continue to be properly recovered in base rates.

171. The cost of energy incurred under SWEPCO's wind-energy contracts has been collected through SWEPCO's fuel factor and reconciled as energy purchases since their inception, starting with Docket No. 40443 for the Majestic renewable energy purchase agreements.

172. According to the SPP planning criteria, the amount of capacity that may be accredited to a renewable resource is determined by a set of formulas using the historical output of that particular facility and updated over time.

173. The Commission should continue to account for the costs incurred under these wind contracts as energy.

Affiliate Expense

174. SWEPCO incurred a total of $87,634,578 in adjusted total-company test-year affiliate charges: $85,227,881 in charges from AEP Service Company and $2,406,697 from other affiliates.

175. Commission Staff proposed an adjustment to SWEPCO's affiliate expense that SWEPCO did not oppose.

176. As adjusted by Commission Staff, SWEPCO's affiliate expenses are reasonable and necessary for each item or class of items, are allowable, are charged to SWEPCO at a price no higher than was charged by the supplying affiliate to other affiliates, and the rate charged was a reasonable approximation of the cost of providing the service.

Federal Income Tax Expense

177. SWEPCO's method of calculating its federal income tax expense is reasonable.

178. The amount of federal income tax SWEPCO included in its cost of service was calculated in accordance with the provisions of PURA §§ 36.059 and 36.060.

179. No party challenged the inclusion of federal income tax expense in SWEPCO's cost of service.

Ad Valorem Taxes

180. SWEPCO's requested effective ad valorem tax rate excludes Texas jurisdictional differences that would decrease the effective rate but includes Texas jurisdictional differences that increase the effective rate.

181. The effective ad valorem tax rate should be synchronized with the plant to which the rate is to be applied.

182. Including SWEPCO's proposed Texas jurisdictional plant differences related to depreciation and allowance for funds used during construction rates in the plant balance used to calculate ad valorem taxes requires that such jurisdictional differences be included in the determination of the effective ad valorem tax rate.

183. Including SWEPCO's proposed Texas jurisdictional plant differences related to depreciation and allowance for funds used during construction rates in the determination of the effective ad valorem tax rate does not result in other states subsidizing Texas customers.

184. The appropriate effective ad valorem tax rate that includes the Texas jurisdictional differences in the determination of the rate is 0.961262%.

Payroll Taxes

185. It is reasonable to synchronize payroll taxes with adjustments to SWEPCO's payroll expenses.

186. Incentive compensation is part of SWEPCO's payroll expenses.

187. A potential offset of incentive compensation with additional base pay by SWEPCO in the future is speculative.

188. Payroll tax on disallowed incentive compensation is properly borne by shareholders.

189. An adjustment of ($258,162) to SWEPCO's payroll tax expense is appropriate. This synchronizes payroll taxes with the adjustments to payroll and incentive compensation expenses as recommended by Commission Staff.

Gross Margin Tax

190. SWEPCO calculates the Texas gross receipts (margin) tax amount using an effective rate derived from test-year payments and test-year Texas retail base and fuel revenues.

191. Revenue related taxes should be updated and synchronized with the final revenue requirement set in this case.

Allocated Transmission Expenses Related to Retail Behind-the-Meter Generation

192. To serve its retail and wholesale customers, SWEPCO purchases network integration transmission service (NITS) from SPP for the use of SPP's transmission system.

193. SPP charges for NITS pursuant to its FERC-approved OATT.

194. SWEPCO is obligated to pay SPP the charges SPP bills to SWEPCO pursuant to the SPP OATT for the provision of transmission services to SWEPCO.

195. SPP allocates the cost of using its transmission system to NITS customers (referred to as network customers in the OATT) based on the load-ratio share of each customer's monthly network load to the total system load at the time of the monthly system peak.

196. To obtain the data necessary to make this allocation, SPP requires network customers, such as SWEPCO, to submit their monthly network load data to SPP.

197. In October 2018, SWEPCO changed how it reports its monthly network load to SPP by adding load served by retail (BTMG).

198. In this context, BTMG refers to a generation unit that is behind the transmission system meter—not directly connected to the bulk transmission system—and is intended to serve all or part of the capacity or energy needs for the load behind the meter without withdrawing energy from the SPP transmission system.

199. Retail BTMG (in contrast to wholesale BTMG) is on-site generation operated by a retail end-use customer to serve its own local load requirements. Retail BTMG may be large scale, such as an industrial customer with a cogeneration facility, or small scale, such as a residential rooftop solar facility.

200. When retail BTMG is excluded from a network customer's monthly load report, it is reported on a *net* basis, whereas when retail BTMG is included, it is reported on a *gross* basis.

201. SPP provided educational information to its stakeholders, including SWEPCO, clarifying that FERC policy and the SPP OATT do not exclude or net BTMG from the network load calculation.

202. At this time, SWEPCO is only reporting the retail BTMG load of one customer, Eastman, which is located in SWEPCO's Texas service area.

203. Eastman operates an on-site cogeneration facility that generates approximately 150 MW of power to supply the full =-load requirements of Eastman's operations. Eastman is a *qualifying facility* under the Public Utility Regulatory Policies Act of 1978.

204. During scheduled maintenance outages and forced or unscheduled outages when Eastman's generation is not operating, Eastman purchases standby electricity service from SWEPCO under SWEPCO's supplementary, backup, maintenance and as-available power service tariff. Eastman coordinates routine maintenance outages with SWEPCO to avoid system peaks.

205. Due to the configuration of Eastman's campus and BTMG, Eastman uses a SWEPCO-owned transmission line to serve all the load at its campus, but its use of the line is incidental and is not imposing new costs on SWEPCO's system.

206. During the test year, the network load that SWEPCO reported to SPP included 146 MW of load served by Eastman's BTMG. The higher reported network load resulted in SPP allocating a higher share of its transmission system costs to SWEPCO, which was reflected in SWEPCO's NITS charges in the test year.

207. There is a lack of consensus among SPP and its network customers regarding how to report retail BTMG load to SPP under the OATT.

208. Determining whether SWEPCO's NITS charges are pursuant to the OATT necessarily requires an interpretation of the OATT.

209. DELETED.

210. DELETED.

211. DELETED.

212. DELETED.

213. The NITS charges are part of SWEPCO's overall transmission costs, which SWEPCO allocates jurisdictionally among Texas, Arkansas, and Louisiana.

214. SWEPCO did not identify the increase in NITS charges attributable to reporting Eastman's BTMG load.

215. To recover the additional cost, SWEPCO proposed to change how it allocates its transmission costs by imputing Eastman's BTMG load to the Texas jurisdiction for jurisdictional allocation and to the large lighting and power-transmission (LLP-T) class for class allocation.

216. Adding Eastman's BTMG load to the Texas jurisdiction would increase Texas's share of SWEPCO's transmission costs by $5.7 million, with corresponding reductions to the Arkansas and Louisiana jurisdictions.

217. Adding Eastman's BTMG load to the LLP-T class would have a larger impact, increasing that class's share of SWEPCO's transmission costs by $7.5 million, with corresponding reductions to the remainder of SWEPCO's classes.

218. Adjusting the jurisdictional and class allocators for SWEPCO's overall transmission costs results in a shift of not just the SPP-related costs, but also the non-SPP-related costs.

219. SWEPCO did not explain why adjusting the allocations was the appropriate method to recover its increased NITS charges, or why reporting Eastman's BTMG load would impact non-SPP-related costs.

220. SWEPCO has 187 retail BTMG customers in Texas, including Eastman. Of these customers, at least three have cogeneration facilities (including Eastman) and the rest are commercial or residential solar facilities.

221. SWEPCO has retail BTMG customers in Arkansas and Louisiana, including at least one industrial retail BTMG customer (a paper mill) in Arkansas, and solar retail BTMG customers in both Arkansas and Louisiana.

222. Adding retail BTMG load solely to Texas likely results in the Texas jurisdiction receiving a higher allocation of SWEPCO's transmission costs than if SWEPCO had treated each jurisdiction consistently. This inconsistency is not attributable to SPP requiring network customers to report retail BTMG load, as SWEPCO presented evidence that all retail BTMG load should be reported.

223. SWEPCO's decision to increase the Texas jurisdictional allocator, but not the Arkansas and Louisiana jurisdictional allocators, is unreasonable and results in unreasonably discriminatory rates for Texas customers.

224. SWEPCO's corresponding change to the LLP-T class allocator is unreasonable and results in unreasonably discriminatory rates among SWEPCO's Texas customers.

225. SWEPCO's proposals to allocate transmission costs at both the jurisdictional and class levels by adding Eastman's BTMG load to the Texas jurisdiction and LLP-T class, respectively, are not reasonable, necessary, and non-discriminatory.

226. Eastman's BTMG load should be removed when performing the jurisdictional and class allocations of transmission costs.

Billing Determinants

227. The Commission's RFP accepts the use of estimated billing units.

228. SWEPCO used estimated billing determinants to address potential customer migration among rate classes between rate cases.

229. SWEPCO's initial filing included pro forma adjustments to the test-year billing determinants for all of the known and measurable items at the time this case was filed.

230. The ongoing effects, if any, of the COVID-19 pandemic on SWEPCO's billing determinants are not known and measurable and do not reflect conditions that are likely to prevail when the rates approved in this case are in effect.

231. ETSWD's proposal that SWEPCO should update its class-cost-of-service study (CCOSS) to incorporate new data and account for the enduring work-from-home shift and other effects of COVID-19 is not reasonable because the effects of COVID-19 are not known and measurable.

232. ETSWD's alternative proposal that the Commission instruct SWEPCO to recalculate and adjust its CCOSS using the data provided in SWEPCO's response to ETSWD request for information 3-1 also is not reasonable because the effects of COVID-19 are not known and measurable.

233. A pro forma adjustment to billing determinants should not be used to address a temporary event, because a pro forma adjustment is intended to ensure that test-year data better represents a utility's ongoing operations.

234. Customers who permanently left SWEPCO during the test year should be removed from SWEPCO's proposed billing determinants.

235. Except in an extraordinary event not present in this case, a pro forma adjustment to remove a customer that permanently left SWEPCO after the close of the test year should not be made because that event was not known or measurable during the test year.

236. SWEPCO's adjusted test-year billing determinants are reasonable and should be used in designing rates resulting from this case.

Functionalization and Cost Allocation

237. The allocation methodologies and processes used in SWEPCO's jurisdictional cost of service study and CCOSS reflect criteria generally used to determine the appropriateness of allocation methodologies.

238. The allocation methodologies and processes used in SWEPCO's jurisdictional cost of service study and CCOSS are consistent with the development of the jurisdictional cost of service study and CCOSS ordered by the Commission in Docket No. 46449 and with the base rates approved by the Commission in that docket and updated in SWEPCO's related compliance filing in Docket No. 48233.

Jurisdictional Allocation

239. Until this rate case, SWEPCO has not proposed to include the self-served load of any retail customer in allocating transmission costs in any of its jurisdictions.

240. SWEPCO's proposal to increase the allocation to Texas customers by $5.7 million through the inclusion of the self-served load of a single customer is unreasonable.

241. The jurisdictional allocation of transmission costs to Texas retail customers should be established by using the actual load served by SWEPCO in each of its jurisdictions.

242. SWEPCO's allocation of Eastman's load served by its retail BTMG should be removed from the jurisdictional cost of service study.

243. SWEPCO appropriately removed the allocation of certain distribution investments from the wholesale class.

Class Allocation

244. SWEPCO corrected its CCOSS in rebuttal testimony to use a system-load factor based on the single annual coincident peak in the average and excess demand four-coincident peak methodology.

245. The use of the single annual coincident peak in calculating the system load factor is consistent with Commission precedent and cost causation.

246. SWEPCO properly accounted for customer prepayments in its rebuttal CCOSS.

247. SWEPCO appropriately does not allocate major-account representative costs to the residential class.

248. In its rebuttal CCOSS, SWEPCO appropriately corrected an error regarding its allocation of line-transformer costs.

249. SWEPCO's correction to the line-transformer allocation is not contrary to the Commission's decision in Docket No. 46449.

250. Commission Staff's proposal for a four-year phase-in of rate increases to move all classes to their relative rate of return ignores that customers' consumption patterns change

year-to-year and would cause some classes to incur significant rate increases each year for four years.

251. DELETED.

252. Three customer classes historically have been well below their relative rates of return as shown though SWEPCO's CCOSS, including its rebuttal CCOSS: the cotton gin class, the oilfield secondary class, and the public street and highway lighting class.

253. It is appropriate to require SWEPCO to provide direct testimony in its next base-rate case addressing why these three classes continue to be well below unity and address whether there are measures that can be taken in the class allocation (or rate design) process to address this situation, other than simply applying gradualism.

254. Based on the evidence in this case, SWEPCO's proposed class allocation to address classes that are not at a unitary relative rate of return is reasonable.

255. None of the $5.7 million in transmission costs SWEPCO allocated to the Texas retail jurisdiction and in its CCOSS through its retail BTMG proposal should be allocated to any Texas retail customers.

Municipal Franchise Fees

256. SWEPCO develops the effective rate for municipal franchise fees based on test year actual municipal franchise taxes paid, less the amount in excess of the base amount and test year actual kWh sales.

257. SWEPCO applies the effective rate for municipal franchise fees to the test-year-adjusted kWh sales to determine the pro forma amount to include in SWEPCO's cost of service.

258. SWEPCO's allocation of municipal franchise fees was not contested by any party and is reasonable.

Revenue Distribution

259. The class revenue distribution is the rate design mechanism by which a utility's approved annual revenue requirement is assigned to the customer classes.

260. The revenue distribution also determines the revenue requirement targets for each class.

261. The percent increase in base rates for each class is based on its revenue deficiency as determined by the CCOSS.

262. The revenue deficiency determines the revenue requirement needed to bring each class to an equalized return.

263. The revenue requirement at an equalized return is the amount of revenue needed from each class to recover the full costs of serving that customer class.

264. The equalized revenue requirement and revenue change based on that requirement is the starting place for the revenue distribution. Other factors may also be taken into consideration such as customer migration, and a potential need to moderate a rate increase through rate gradualism.

265. SWEPCO's proposed rebuttal-revenue distribution moves all customer classes closer to cost of service.

266. All present base-rate-related revenues, inclusive of TCRF and DCRF revenues, are the appropriate starting point for evaluating any rate increase.

267. In Docket No. 46447, SWEPCO was required to present its rate change request in this case such that its then-present revenues show the total present revenues inclusive of the TCRF and DCRF revenues.

Rate Moderation/Gradualism

268. All parties to this case agree that some form and level of rate moderation should be applied to the revenue distribution.

269. The design of rates within each rate schedule should be cost-based and informed by the results of the CCOSS, subject to gradualism.

270. Gradualism and rate moderation are appropriate exceptions to this requirement when a class's proposed rate increase leads to *rate shock.*

271. A proposed rate increase of 43% or less in any one class is an appropriate upper percentage to apply in this case for the gradualism or rate moderation evaluation.

272. SWEPCO's approach of grouping major rate classes for purposes of implementing the revenue distribution was approved by the Commission in SWEPCO's two most recent base-rate proceedings, Docket Nos. 40443 and 46449.

273. SWEPCO's proposed rate moderation methodology, which reduces the subsidization among individual rate classes, is reasonable and should be adopted.

274. Commission Staff's proposed four-year phased-in method to move all customers to unity does not account for the fact that customers' consumption patterns change year-to-year and would result in significant rate increases every year over the four-year phased-in period to some customers.

275. Commission Staff's proposed four-year phased-in method should not be accepted.

Rate Design and Tariff Changes

276. In general, SWEPCO's proposed rate design retains the rate structures and relationships approved by the Commission in SWEPCO's two most recent base rate proceedings, Docket Nos. 40443 and 46449.

277. SWEPCO's proposed rate design provides a reasonable basis for establishing rates in this proceeding.

278. SWEPCO has not met its burden of proof to justify removing the 50 kilowatt (kW) maximum demand cap in the GS rate schedule.

279. SWEPCO should not be required to revise its rate schedules in its next rate case to preclude the potential for customer migration between rate schedules or between any other customer classification.

280. SWEPCO should be required to address the customer migration issue in more detail in its next base-rate-case filing, including which classes are structured to allow migration among classes even if customers' loads or operations do not change, why customers migrate among classes, and how SWEPCO adjusts, or estimates, its billing determinants to account for customer migration among rate classes between base-rate cases.

281. SWEPCO has not explained or justified why it is appropriate, in this case, to collect fixed demand-related costs through energy charges in the large power secondary class.

282. SWEPCO offers a rate option for cotton gin customers that allows the application of the minimum monthly bill only during the ginning season as defined as November through February.

283. In SWEPCO's prior fuel reconciliation proceeding, Docket No. 47553, SWEPCO agreed to impute the value of renewable energy credits and treat them as a base-rate expense.

284. SWEPCO should revise the renewable energy credit rider to allow a customer to link its renewable energy credits to specific renewable resources.

285. SWEPCO must implement a renewable energy credit opt-out tariff that would refund renewable energy credit costs to transmission-voltage customers who have opted out.

286. The renewable energy credit opt-out charge should be calculated based on an energy allocator for renewable energy credit costs, consistent with how renewable energy credits are generated and set at a credit of 0.0069 cents per kWh for the Commercial Class and a credit of 0.0066 cents per kWh for the Industrial Class.

287. SWEPCO did not perform or provide a study justifying its proposal to increase the reactive-demand charge by 29.4%.

288. SWEPCO has not met its burden of demonstrating that there is a cost basis for increasing the reactive-demand charge in the large lighting and power (LLP) rate schedule.

289. Under SWEPCO's residential plug-in electric vehicles rider, an installed sub-meter separately measures plug-in electric-vehicle kWh usage while a standard meter measures total residence kWh usage.

290. SWEPCO has met its burden of proof regarding the residential plug-in electric-vehicles rider.

291. ETSWD's request that the Commission direct SWEPCO to implement a retail-choice pilot project is moot based on the Commission's denial of ETSWD's request for a declaratory ruling on this matter in Docket No. 51257.

Transmission Rate for Retail Behind-the-Meter Generation

292. Because SWEPCO's proposal to allocate to any customer or class the SPP charges related to Eastman's load served by its retail BTMG should be rejected, it is not appropriate for SWEPCO to implement a synchronous self-generation load rate schedule or rate.

Baselines for Cost-Recovery Factors

293. A TCRF is a rate mechanism that allows an electric utility outside of the Electric Reliability Council of Texas region to periodically update its recovery of transmission costs.

294. SWEPCO is eligible under 16 TAC § 25.239 to have a TCRF.

295. TCRF baseline values should be set during the compliance phase of this docket, after the Commission makes final rulings on the various contested issues that may affect this calculation.

296. A DCRF is a rate mechanism that allows an electric utility to periodically adjust its rates for changes in certain distribution costs.

297. The Commission has adopted 16 TAC § 25.243 to implement PURA § 36.210. The DCRF rule allows an electric utility not offering customer choice (SWEPCO) to file an application for a DCRF at any time other than April and May.

298. DCRF baseline values should be set during the compliance phase of this docket, after the Commission makes final rulings on the various contested issues that may affect this calculation.

299. A generation cost recovery rider is a rate mechanism authorized under PURA § 32.213 that allows an electric utility to recover its investment in a power generation facility outside of a base-rate proceeding.

300. The baseline values for a subsequent implementation of the generation cost recovery rider should be established during the compliance phase of this docket, after the Commission makes final rulings on the various contested issues that may affect this calculation.

Rate-Case Expenses

301. SWEPCO and CARD sought to recover a total of $3,769,007 in rate-case expenses for this docket as well as Docket Nos. 49042, 46449, 40443, 47141, and 50997, consisting of

$2,740,315 for SWEPCO's own rate-case expenses and $1,028,692 in rate-case expenses paid or to be paid by SWEPCO to CARD for its participation in these dockets and reflected on SWEPCO's and CARD's rate-case expense reports.

302. The Commission's order in Docket No. 47141 authorized CARD to collect up to an additional $2,500 in rate-case expenses in that docket after April 13, 2020.

303. In this docket, CARD originally requested to recover $6,321 in rate-case expenses incurred in Docket No. 47141 after April 13, 2020.

304. CARD's request to recover $6,321 for Docket No. 47141 rate-case expenses should be reduced to $2,500.

305. SWEPCO seeks to recover $65,167 in rate-case expenses in Docket Nos. 51415 and 40443 that include rates in excess of $550 per hour for two outside attorneys in those dockets.

306. The Office of the Attorney General issued a memorandum in 2016 that limited the maximum outside counsel per-hour fee to $525 but allowed the Deputy Attorney General to authorize a higher fee. This memorandum was addressed to, among others, state agencies and addressed "Outside Counsel Contract Rules and Templates."

307. The Office of the Attorney General issued a follow-up memorandum, in 2019 that did not increase the $525 per-hour fee cap. This follow-up memorandum also was directed to state agencies and addressed Outside Counsel Contract Rules and Templates.

308. SWEPCO did not meet its burden of proof to show that the nature, extent, and difficulty of the work performed by the attorneys who charged in excess of $550 per hour justified hourly rates in excess of $550 in this base-rate case.

309. The rates SWEPCO paid to outside attorneys in excess of $550 per hour are excessive and not reasonable.

310. The fact that other entities may be willing to pay an attorney a rate in excess of $550 per hour does not mean that the rate is reasonable and not excessive in the context of a Commission electric utility rate proceeding.

311. SWEPCO's request to recover $65,167 in rate-case expenses related to outside attorney fees billed in excess of $550 per hour should be denied.

312. The total amount of rate-case expenses that SWEPCO and CARD should recover in this docket is $3,700,021.

313. SWEPCO should reimburse CARD for its requested rate-case expenses, except that CARD's recovery related for Docket No. 47141 is $2,500, not $6,321.

314. It is reasonable for SWEPCO to recover the $3,700,021 in rate-case expenses authorized in this docket through its proposed rate case surcharge rider.

315. Any trailing rate-case expenses related to Docket No. 51415 that are incurred after the dates of the rate-case expenses addressed in the final reports filed in this docket should be recorded as a regulatory asset and deferred for consideration in a future SWEPCO docket.

315A. The Office of Policy and Docket Management (OPDM) filed a memo on October 14, 2021, requesting SWEPCO to identify or file evidence in the record reflecting the affidavit or testimony of a licensed attorney supporting the reasonableness of $2,740,315 for SWEPCO's own rate-case expenses incurred through May 2021.

315B. On October 22, 2021, SWEPCO filed the affidavit of Melissa A. Gage, attesting to the reasonableness of SWEPCO's rate-case expenses, and a motion to admit the filing as evidence.

315C. On November 2, 2021, the Commission ALJ filed Order No. 2 admitting the affidavit of Melissa A. Gage into evidence.

Other Issues

316. It is uncontested and reasonable that the final approved return on equity should be included in the factoring-rate calculation to synchronize factoring expense properly to the approved revenue requirement.

317. Commission Staff's proposed adjustments of ($1,164,427) to remove carrying charges paid by SWEPCO associated with affiliate or shared assets and ($530,384) to remove carrying charges SWEPCO received from its affiliates is uncontested and reasonable.

318. Commission Staff's adjustment to update the customer deposit interest amount to incorporate the Commission-approved 2021 interest rate is uncontested and reasonable. In

this case that is 0.61%, which results in an adjustment of ($1,041,156) to SWEPCO's request.

319. In accordance with the Commission's decisions in Docket Nos. 40443 and 46449, SWEPCO removed supplement executive retirement plan expense from its requested cost of service, which is reasonable.

320. In accordance with the Commission's decisions in Docket Nos. 40443 and 46449, Commission Staff recommended an adjustment for executive perquisites. Based on Commission Staff's adjustment, SWEPCO agreed to remove $20,595 from its revenue requirement related to executive perquisites. This adjustment is reasonable.

321. SWEPCO has announced that the Welsh plant will cease coal-fired operations in 2028 in light of the Coal Ash Combustion Residual Rule and the Effluent Limitations Guidelines.

322. SWEPCO has not yet determined whether natural gas conversion of the Welsh plant is in the customers' best interest.

323. If such a conversion to natural gas were to occur in the future, SWEPCO will request Commission authorization to include the costs associated with that conversion in customer rates in a future proceeding.

324. SWEPCO has not included any construction work in progress in its requested rate base.

325. RFP schedule E-4 contains the calculation of SWEPCO's cash working-capital allowance included in rate base.

326. The lead-lag study used in this proceeding is the one approved in SWEPCO's last base-rate case, Docket No. 46449.

327. The lead-lag study conducted by SWEPCO considered the actual operations of SWEPCO, adjusted for known and measurable changes, and is consistent with 16 TAC § 25.231(c)(2)(B)(iii).

328. At the time the current proceeding was filed, less than five years had passed since SWEPCO's last lead-lag study. By using the last approved study, SWEPCO estimates that it saved around $75,000 in rate-case expenses.

329. It is uncontested and reasonable that cash working capital should be updated and synchronized with the final revenue requirement.

330. Commission Staff's adjustment of ($46,306) to administrative and general O&M expense, specifically for regulatory commission expense, is not contested and is reasonable.

331. SWEPCO's federal income taxes were calculated consistent with PURA § 36.059 including treatment of tax savings derived from liberalized depreciation and amortization, investment tax credit, or similar methods.

332. SWEPCO's expenditures for advertising, contributions, memberships, and donations included in its cost of service meet the standard and thresholds set forth in 16 TAC § 25.231(b)(1)-(2).

333. SWEPCO uses advertising to convey information regarding safety and reliability to its customers and to support local initiatives.

334. SWEPCO did not include any prohibited advertising expenses in its request.

335. SWEPCO makes charitable contributions toward education, community service, and economic development in and for the benefit of the communities in which it operates. These costs are reasonable and consistent with the Commission's requirements and thresholds for recovery

336. SWEPCO membership expenses are reasonable and comply with the Commission's standards.

337. No party raised an issue with respect to SWEPCO's competitive affiliates.

338. SWEPCO is not seeking to include in rates any costs previously deferred by a Commission order.

339. SWEPCO's request to defer the portion of its ongoing net SPP open access transmission tariff bill that is above or below the net-test-year level is not reasonable and should be denied.

340. SWEPCO proposed an optional residential time-of-use rate schedule as a pilot available to residential customers.

341. SWEPCO proposed a commercial time-of-use rate schedule for commercial loads of 100 kW or greater.

342. The pilot projects will gauge interest and utilization of the time-of-use format by customers that do not qualify for SWEPCO's off-peak rider for the lighting and power, LLP, and metal melting service classes. Participating customers can manage certain energy costs by shifting energy consumption to off-peak periods.

343. The proposed time-of-use rate schedule and design is reasonable and appropriate under 16 TAC § 25.234.

344. SWEPCO proposes to update its economic development rider.

345. SWEPCO's proposed tariff revisions to attract loads from a variety of businesses with different load requirements in order to spur economic growth in its service territory and provide long-term benefits to SWEPCO customers are reasonable and appropriate.

346. The proposed tariff revisions are consistent with the Commission's standards including 16 TAC § 25.234.

347. SWEPCO is not filing a fuel reconciliation proceeding in this docket; therefore, the schedules dealing with fuel reconciliation proceedings are not applicable. Accordingly, SWEPCO's requested waiver of the portions of the RFP that request information related to fuel reconciliation proceedings should be granted.

348. SWEPCO obtained authorization in Docket No. 50917 to waive the requirement that it file an RFP Schedule S in this base-rate case.

349. Ordering Paragraph 10 of the order on rehearing in Docket No. 46449 states, "[t]he regulatory treatment of any excess deferred taxes resulting from the reduction in the federal-income-tax rate will be addressed in SWEPCO's next base-rate case." The treatment of SWEPCO's excess deferred taxes has been addressed in this case.

III. Conclusions of Law

The Commission adopts the following conclusions of law.

1. SWEPCO is subject to PURA.

2. SWEPCO is a public utility as that term is defined in PURA § 11.004(1) and an electric utility as that term is defined in PURA § 31.002(6)

3. The Commission exercises regulatory authority over SWEPCO, and jurisdiction over the subject matter of this application under PURA §§ 14.001, 32.001, 32.101, 33.002, 33.051, and 36.001-112.

4. The Commission's jurisdiction to establish rates under PURA §§ 36.003-.004, 36.051-.065, 36.108(c), and 36.111 extends beyond the date a proposed rate is suspended.

5. SOAH has jurisdiction over matters related to the conduct of the hearing and the preparation of a proposal for decision in this docket, under PURA § 14.053 and Tex. Gov't. Code § 2003.049.

6. This docket was processed in accordance with the requirements of PURA and the Texas Administrative Procedure Act, Texas Government Code chapter 2001.

7. SWEPCO provided notice of its application in compliance with PURA § 36.103 and 16 TAC § 22.51(a).

8. Pursuant to PURA § 33.001, each municipality in SWEPCO's service area that has not ceded jurisdiction to the Commission has jurisdiction over SWEPCO's application, which seeks to change rates for the distribution services within each municipality.

9. Pursuant to PURA § 33.051, the Commission has jurisdiction over an appeal from a municipality's rate proceeding.

10. SWEPCO has the burden of proving that the rate change it is requesting is just and reasonable under PURA § 36.006.

11. In compliance with PURA § 36.051, SWEPCO's overall revenues approved in this proceeding permit SWEPCO a reasonable opportunity to earn a reasonable return on its invested capital used and useful in providing service to the public in excess of its reasonable and necessary operating expenses.

12. Consistent with PURA § 36.053, the rates approved in this proceeding are based on original cost, less depreciation, of property used and useful to SWEPCO in providing service.

13. The rates approved in this proceeding are consistent with 16 TAC § 25.231(b)(1)(B), which states that depreciation expense based on original cost and computed on a straight-line basis as approved by the Commission shall be used; it also provides that other methods may be used when the Commission determines such depreciation methodology is a more equitable means of recovering the costs of plant.

14. The rates approved in this proceeding are consistent with 16 TAC § 25.231(c)(2)(A)(ii), which states that the reserve for depreciation is the accumulation of recognized allocations of original cost, representing the recovery of initial investment over the estimated useful life of the asset.

15. SWEPCO's short-term incentive compensation payments to collectively bargained employees should not be reduced to remove financially based short-term incentive compensation consistent with PURA § 14.006.

16. Upon completion of this base rate case under 16 TAC § 25.239(f), SWEPCO's TCRF should be set to zero.

17. The ROE and overall rate of return authorized in this proceeding are consistent with the requirements of PURA §§ 36.051 and 36.052.

18. The Commission has authority under PURA §§ 11.002, 14.001, 14.003, 14.154(a), 14.201, 36.003(a) to order SWEPCO to adopt the financial protections listed in findings of fact Nos. 108 and 109A.

19. Prudence is the exercise of that judgment and the choosing of one of that select range of options which a reasonable utility manager would exercise or choose in the same or similar circumstances given the information or alternatives available at the point in time such judgments is exercised or option is chosen. *Gulf States Util. Co. v. Public Util. Comm'n,* 841 S.W.2d 459, 476 (Tex. App—Austin 1992, writ denied).

20. There may be more than one prudent option within the range available to a utility in a given context. Any choice within the select range of reasonable options is prudent, and the Commission should not substitute its judgment for that of the utility. The reasonableness of an action or decision must be judged in light of the circumstances,

information, and available options existing at the time, without benefit of hindsight. Docket No. 40443, order on rehearing at 5 (citing *Nucor Steel v. Public Utility Commission of Texas,* 26 S.W.3d 742, 752 (Tex. App.—Austin 2000, pet. denied)).

21. A utility may demonstrate the prudence of its decision making through contemporaneous evidence. Alternatively, the utility may obtain an independent, retrospective analysis that demonstrates that a reasonable utility manager, having investigated all relevant factors and alternatives, as they existed at the time the decision was made, would have found the utility's actual decision to be a reasonably prudent course. *Gulf States,* 841 S.W.2d at 476.

22. The utility does not enjoy a presumption that the expenditures reflected in its books have been prudently incurred merely by opening the books to inspection. But while the ultimate burden of persuasion on the issue of prudence remains with the utility, its initial burden of production (to come forward with evidence) is shifted to opponents if the utility establishes a prima facie case of prudence. This is a "Commission-made" rule, intended "to aid in the trial of utility prudence reviews" and facilitate "efficient hearings," allowing the utility to establish prudence "by introducing evidence that is comprehensive, but short of proof of the prudence of every bolt, washer, pipe hanger, cable tray, I-beam, or concrete pour." *Entergy Gulf States, Inc. v. Public Util. Comm 'n,* 112 S.W.3d 208, 214-15, and n.5 (Tex. App.—Austin 2003, pet. denied).

23. The rate year is defined in 16 TAC § 25.5(101) as the 12-month period beginning with the first date that rates become effective.

24. The rates approved by this order are effective for consumption on and after March 18, 2021 in accordance with PURA § 36.211(b) and 16 TAC § 25.246(d)(1).

25. The Commission's cost of service rule permits, in accordance with 16 TAC § 25.231(c)(2)(F)(iii), post-test year adjustments for known and measurable decreases to test-year data under conditions that include a plant being removed from service, mothballed, sold, or removed from the electric utility's books prior to the rate year.

26. The Commission has discretion in accordance with 16 TAC § 25.3 to make exceptions to its substantive rules applicable to electric-service providers, including its cost-of-service rule, for good cause.

27. While the Commission's cost of service rule, 16 TAC § 25.231(b)(1)(B), generally requires that depreciation expense shall be computed on a straight-line basis, other methods may be used when it is determined that such depreciation methodology is a more equitable means of recovering the cost of the plant.

28. PURA § 36.064 requires SWEPCO to prove that: (1) its proposed self-insurance reserve coverage is in the public interest; (2) the plan, considering all costs, would be a lower cost alternative to purchasing commercial insurance; and (3) customers would receive the benefits of the savings.

29. For SWEPCO to establish under 16 TAC § 25.231(b)(1)(G) that its self-insurance plan is in the public interest, SWEPCO must present a cost benefit analysis performed by a qualified independent insurance consultant who demonstrates that, with consideration of all costs, self-insurance is a lower-cost alternative than commercial insurance and the customers will receive the benefits of the self-insurance plan. Further, the cost benefit analysis shall present a detailed analysis of the appropriate limits of self-insurance, an analysis of the appropriate annual accruals to build a reserve account for self-insurance, and the level at which further accruals should be decreased or terminated.

30. SWEPCO met its burden of proof under PURA § 36.064(b) and 16 TAC § 25.231(b)(1)(G) to show that its proposed self-insurance reserve would be in the public interest.

31. Affiliate expenses to be included in SWEPCO's rates must meet the standards articulated in PURA §§ 36.051 and 36.058 and in *Railroad Commission of Texas v. Rio Grande Valley Gas Co.,* 683 S.W.2d 783 (Tex. App.—Austin 1984, no writ).

32. Investor-owned utilities may include in rate base a reasonable allowance for cash working capital as determined by a lead-lag study conducted in accordance with 16 TAC § 25.231(c)(2)(B)(iii)(IV).

33. A lead-lag study in compliance with 16 TAC § 25.231(c)(2)(B)(iii)(IV) and (V) is performed to determine the reasonableness of a cash working capital allowance.

34. DELETED.

35. DELETED.

36. DELETED.

37. DELETED.

38. A transmission-voltage customer that submits an opt-out notice to the Commission is not required under 16 TAC § 25.173(j) to pay costs incurred by the utility to acquire renewable energy credits.

39. Utilities seeking recovery or municipalities seeking reimbursement of renewable energy credits have the burden to prove the reasonableness of such expenses by a preponderance of the evidence to include those amounts in customers' rates.

40. Except for charges by attorneys and consultants in excess of $550 per hour and the $2,500 cap on CARD's expenses in Docket No. 47141, the rate-case expenses SWEPCO is seeking to recover in this case for itself and CARD are recoverable pursuant to PURA § 36.061(b).

41. SWEPCO's rates, as approved in this proceeding, are just and reasonable in accordance with PURA § 36.003.

IV. Ordering Paragraphs

In accordance with these findings of fact and conclusions of law, the Commission issues the following orders:

1. The proposal for decision, including findings of fact and conclusions of law is adopted to the extent provided in this Order.

2. SWEPCO's application is granted to the extent consistent with this Order.

3. The Commission grants SWEPCO a good cause exception under 16 TAC § 25.3 to make post-test year adjustments to its rate base to reflect that Dolet Hills, the Oxbow investment, and DHLC will cease to provide service to SWEPCO's customers when the plant retires on December 31, 2021.

4. SWEPCO shall implement and adhere to the financial protections listed in finding of fact nos. 108 and 109A. No later than 90 days from the date of this Order, SWEPCO shall have implemented, and be adhering to, all of those financial protections.

5. In its direct testimony in its next base-rate case, SWEPCO shall address why some of its customer classes, including the cotton gin class, the oilfield secondary class, and the public street and highway lighting class, historically are far below their relative rates of return produced by SWEPCO's CCOSS, and whether adjustments, other than gradualism, can and should be made to address this recurring situation.

6. In its direct testimony in its next base-rate case, SWEPCO shall address why customers can or should be allowed to migrate from class-to-class without experiencing a change in load or operations. In that testimony, SWEPCO should explain how it accounts for these future migrations through its adjusted billing determinants, and either justify its existing relatively open class structure or propose rate schedule revisions that more closely group similarly situated customers into rate schedules.

7. SWEPCO may recover its authorized rate-case expenses through its proposed rate case surcharge rider.

8. SWEPCO and CARD may seek to recover in a future proceeding any trailing rate-case expenses not already presented in their July 6, 2021 rate-case-expense reports for this case.

9. SWEPCO's TCRF and DCRF are set to zero at the conclusion of this base-rate case. The baseline values for SWEPCO's TCRF, DCRF, and generation cost recovery rider shall be developed and set during the compliance phase of this docket in *Compliance Tariff for Final Order in Docket No. 51415 (Application of Southwestern Electric Power Company for Authority to Change Rates),* Control No. 53046.

10. Notwithstanding findings of fact nos. 80-83, SWEPCO is authorized to establish a regulatory asset for the return that would be associated with inclusion of SWEPCO's stand-alone NOLC ADFIT in the calculation of rate base, as well as the net excess amortization of excess ADFIT in the calculation of the cost of service, with an effective date equal to that of the rates being implemented in this proceeding—March 18, 2021. SWEPCO will be eligible to request recovery of that regulatory asset once it receives an Internal Revenue Service determination that removal of the stand-alone NOLC ADFIT from the calculation of rate base constitutes a normalization violation. If the Internal

Revenue Service determines that such removal does not constitute a normalization violation, the regulatory asset will be written-off and not recovered from customers.

11. As part of its annual filing required under 16 TAC § 25.97(f), SWEPCO must include in its report information on each occurrence of an outage related to vegetation contact with utility infrastructure and identify the length of time since that line received vegetation management treatment. SWEPCO must also provide a list of every distribution line that has not received vegetation management treatment in the previous four years.

12. SWEPCO shall file tariffs consistent with this Order within 20 days of the date of this Order in Compliance Tariff for Final Order in Docket No. 51415 (Application of Southwestern Electric Power Company for Authority to Change Rates), Control No. 53046. No later than ten days after the date of the tariff filings, Commission Staff shall file its comments recommending approval, modification, or rejection of the individual sheets of the tariff proposal. Responses to Commission Staff's recommendation shall be filed no later than 15 days after the filing of the tariff. The Commission shall by letter approve, modify, or reject each tariff sheet, effective the date of the letter.

13. The tariff sheets shall be deemed approved and shall become effective on the expiration of 20 days from the date of filing, in the absence of written notification of modification or rejection by the Commission. If any sheets are modified or rejected, SWEPCO shall file proposed revisions of those sheets in accordance with the Commission's letter within ten days of the date of that letter, and the review procedure set out above shall apply to the revised sheets.

14. Copies of all tariff-related filings shall be served on all parties of record.

15. The Commission denies all other motions and any other requests for general or specific relief, if not expressly granted.

Signed at Austin, Texas the 14th **day of** January **2022.**

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.

A. My name is David A. Hodgson. I am a Tax Accounting & Regulatory Support Manager for American Electric Power Service Corporation (AEPSC), a wholly owned subsidiary of American Electric Power Company, Inc. (AEP). My business address is American Electric Power, 1 Riverside Plaza, Columbus, Ohio 43215.

Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND BUSINESS EXPERIENCE.

A. I graduated from The Ohio State University with a Bachelor of Science in Business Administration in Accounting. In 2000, I accepted a position with AEPSC as a Tax Analyst V. I was promoted to positions from Tax Analyst IV to Tax Analyst I over the course of 2002–2009. In 2011, I was promoted to Sr. Tax Analyst, then to Tax Project Manager, and in 2013, to Tax Manager. I was promoted to my current position in 2019. As Tax Accounting & Regulatory Support Manager, I participate in the recording of the tax accounting entries and records and the review of federal and state tax returns of AEP and its subsidiaries. I am also responsible for coordinating and developing state and federal tax data provided by the AEPSC Tax Department for use in regulatory proceedings. I have attended numerous tax, accounting, and regulatory seminars throughout my professional career.

Q. HAVE YOU PREVIOUSLY SUMBMITTED TESTIMONY IN A REGULATORY PROCEEDING?

A. Yes. I have filed testimony before the Public Utility Commission of Texas and the Louisiana Public Service commission on behalf of Southwestern Electric Power Company.

II. PURPOSE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

A. The purpose of my testimony is to present and sponsor the income tax expense included in the cost of service and the accumulated deferred income taxes (ADIT) included in rate base for the Company. I sponsor Schedules J-1 through J-3 and all supporting workpapers.

III. SUMMARY

Q. WHAT IS THE SOURCE OF INFORMATION USED FOR THE PREPARATION OF THE TAX SCHEDULES INCLUDED IN THIS RATE FILING?

A. All amounts included in the tax schedules for this rate filing are taken from the books and records of the Company.

Q. WHAT IS THE TEST YEAR FOR WHICH THE TAX SCHEDULES ARE PROVIDED?

A. All amounts in the schedules are shown for the historical test year with adjustments for the 12-month period ended December 31, 2020.

Q. WHAT IS THE AMOUNT OF FEDERAL AND STATE INCOME TAX EXPENSE THE COMPANY IS REQUESTING TO BE INCLUDED IN THE COST OF SERVICE?

A. The Company is requesting the amount of federal and state income tax expense that is included in the cost of service on Schedule H. This amount is supported by Schedule J-1 and J-2.

Q. WHAT IS THE AMOUNT OF ADIT THAT THE COMPANY IS REQUESTING TO BE INCLUDED AS A REDUCTION TO RATE BASE?

A. The Company is requesting the amount of ADIT to be included as a reduction to rate base as presented on Schedule B-02. This amount is supported by Schedule J-3.

IV. ACCOUNTING FOR INCOME TAXES

Q. WHAT TAX ACCOUNTING METHODOLOGY IS USED IN THE DETERMINATION OF THE INCOME TAX EXPENSE REQUESTED IN THIS CASE?

A. The federal and state income tax expense as presented in this case is calculated using the normalized method of tax accounting. This is consistent with the methodology used to determine the tax expense included in cost of service in prior filings the Company has made with the Oklahoma Corporation Commission (Commission).

Q. PLEASE DESCRIBE NORMALIZED INCOME TAX ACCOUNTING.

A. Accounting Standards Codification (ASC) 740 covers how companies should both account for and report taxes based on income. The two basic objectives of ASC 740 are to recognize both the amount of taxes that are either payable or refundable for the current tax year as well as to recognize the deferred tax assets and liabilities for the future tax consequences that have been recognized in a company's financial statements.

The accounting for income taxes called for by ASC 740 is known as normalized income tax accounting. Normalization accounting for income taxes calculates income tax expense on the pre-tax items of income and expense recorded for financial statement purposes or included in the cost of service for ratemaking purposes. The income tax expense is then adjusted for permanent differences between income recorded for financial reporting (book) purposes and income determined for income tax reporting (tax) purposes. Tax expense is then divided between the amount currently payable to the IRS and the amount that must be paid in the future. This division between current and deferred tax expense is calculated based on certain temporary differences between book and taxable income. The

tax expense incurred in the current year for which payment is deferred due to temporary book/tax differences is recorded on the balance sheet as an ADIT liability or asset, whichever the case may be.

Q. IN YOUR DESCRIPTION OF NORMALIZED TAX ACCOUNTING, YOU DISCUSS TEMPORARY DIFFERENCES. CAN YOU PLEASE EXPLAIN THIS CONCEPT?

A. Yes. A temporary difference is a difference in the timing of recognition of an item of book income and taxable income that occurs in one year and reverses in another. A temporary difference does not change the overall income tax expense payable over the life of the underlying timing difference; it simply affects the timing of the payment of a liability. Under the normalized tax accounting method, such temporary differences do not have an impact on the overall tax expense for the period.

An example of a temporary difference and one that is generally the largest in magnitude for a public utility company results from the use of accelerated depreciation for tax purposes. While depreciation of an asset can only equal the cost of the asset and can only be recognized over the life of the asset, a temporary difference can occur when there are differing depreciation methods. For tax purposes, accelerated tax depreciation may be taken, whereas for book purposes the depreciation expense recognized for that same asset is calculated using the straight-line method. Over the life of the asset, the same total amount of depreciation will be recognized. However, under the accelerated depreciation method used for tax purposes, those deductions will be recognized to a greater extent in the earlier years of the asset's life as compared to the straight-line method. This results in taxable income that is lower in the earlier years. As the straight-line depreciation begins to exceed the accelerated depreciation in the later years, it results in a taxable income that is higher

than book income. Over the life of the asset, the amount of depreciation deducted from income for both book and tax will be the same and the only impact will be the period in which the deductions are recognized.

Q. WHAT ARE PERMANENT DIFFERENCES AND HOW DO THEY DIFFER FROM TEMPORARY DIFFERENCES?

A. As described in my testimony, a temporary difference results only in a change in the period in which an item of income or expense is recognized for book and tax. A permanent difference is an item of income or expense that will never be recognized for either book income or for taxable income. These differences arise due to the different rules that pertain to book accounting and the tax law. Because it is an item that will never be recognized for one or the other, it results in a difference that will not reverse over time as in the case of a temporary difference.

An example of a permanent difference are entertainment expenses. For book purposes, these expenses are generally recognized and reduce the overall net income of the company. However, for tax purposes entertainment expenses are not allowed as a deduction from income. The difference between the book deduction and the tax deduction for these expenses is one that will never reverse even over the course of time. Therefore, tax expense must be increased by the tax on the non-deductible amount of these expenses.

Q. YOU MENTIONED THAT TEMPORARY BOOK/TAX DIFFERENCES ARE RECORDED ON THE BALANCE SHEET AS AN ADIT LIABILITY OR ASSET. WILL YOU PLEASE PROVIDE AN EXAMPLE OF HOW ADIT BALANCE ACCRUES?

A. Yes. Imagine a utility had a taxable income of $1,000 and a federal income tax rate of 21%. Absent any other factors, the utility would collect $210 from its customers as federal income tax expense, and it would pay the Internal Revenue Service $210 in federal income taxes.

Now suppose the same set of facts, except that the utility has used accelerated depreciation to offset all of its $1,000 income. Because of normalization rules, the utility still collects $210 from its customers, but because of the temporary timing difference, the utility will not have to pay that $210 to the IRS until some later date when the utility has taxable income. In effect, the utility is given a $210 interest-free loan from the federal government, but the utility must record that interest-free loan as an ADIT liability.

Q. HOW DOES THE ADIT BALANCE AFFECT A UTILITY'S RATES?

A. Until the ADIT balance is paid back to the Internal Revenue Service, it is used as a dollar-for-dollar reduction of rate base.

Q. PLEASE EXPLAIN WHAT NORMALIZATION TAX ACCOUNTING MEANS IN THE CONTEXT OF A PUBLIC UTILITY COMPANY.

A. For a public utility company, normalization is a method of accounting in which the tax benefits of accelerated depreciation on public utility assets are shared with customers ratably over the regulatory useful life of the assets in the form of reduced rates.

Q. CAN YOU EXPLAIN FLOW-THROUGH TAX ACCOUNTING AND HOW THAT DIFFERS FROM NORMALIZED TAX ACCOUNTING?

A. The flow-through method of tax accounting looks only at the amount of taxes that are payable or refundable for the current tax year and does not recognize the future benefit or detriment of temporary differences in income recorded for book purposes and income determined for tax purposes. This method treats any temporary difference as a permanent

increase or decrease in the income taxes for the period depending on the direction of the temporary difference. This method results in benefits and detriments being allocated among customers in different periods depending on when a temporary difference originates and reverses. For example, a timing difference that results in a deduction in Year 1 would be enjoyed by the set of customers of the company in Year 1 as a reduction to the current year taxes payable. However, if this timing difference were to reverse in Year 2, the detriment of the increase to the current year taxes payable would be borne by the set of customers of the company in Year 2, which, of course, is not necessarily the same set of customers as in Year 1. As the flow-through method only recognizes the current tax payable or receivable and ignores the impact of future tax impacts from timing differences, there is no deferred tax expense and as a result no ADIT that would be provided as a reduction to rate base.

V. NORMALIZATION OF NET OPERATING LOSSES AND ITC

Q. WHAT IS A NET OPERATING LOSS?

A. A net operating loss (NOL) occurs when, in a given year, a taxpayer has more deductions than taxable revenues. When an NOL occurs, the Internal Revenue Code (Code) allows the taxpayer to carry the NOL forward to subsequent years and offset otherwise taxable income produced in that future year.

Q. ARE THERE NORMALIZATION REQUIREMENTS INCLUDED WITHIN THE CODE?

A. Yes. The Code and accompanying treasury regulations provide normalization requirements and specifically in three areas: 1) Accelerated depreciation and the associated deferred tax

liability that results from its use; 2) NOL Carryforwards (NOLC) as a result of accelerated depreciation; and 3) Investment Tax Credits (ITC).

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS IN THE CODE AS IT RELATES TO ACCELERATED DEPRECIATION?

A. The Code dictates that a regulated public utility must use the normalization method of accounting to calculate tax expense on temporary differences associated with accelerated depreciation when determining rates using a cost of service/rate of return methodology. 26 U.S. Code §168(i)(9)(A) states that in order for a public utility to be considered to be using a normalized method of accounting:

> (i) the taxpayer must, in computing its tax expense for purposes of establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, use a method of depreciation with respect to such property that is the same as, and a depreciation period for such property that is no shorter than, the method and period used to compute its depreciation expense for such purposes, and
> (ii) if the amount allowable as a deduction under this section with respect to such property (respecting all elections made by the taxpayer under this section) differs from the amount that would be allowable as a deduction under section 167 using the method (including the period, first and last year convention, and salvage value) used to compute regulated tax expense under clause (i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference[1].

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS AS THEY RELATE TO NOLC?

A. This is specifically addressed in Treasury Regulation § 1.167(*l*)-1(h)(1)(iii), which states:

> If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (l) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover (as determined under section 172) to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (l) method, then the

[1] 26 U.S.C. § 168(i)(9)(A).

> amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Although neither the Code nor the regulations specifically address the manner in which the NOL should be treated in ratemaking under the normalization rules, the IRS has addressed this issue in several private letter rulings (PLRs). PLRs 201436037, 21438003, 201519021, 201534001, 201548017, 201709008, and 202010002 clarify that a tax calculation with and without accelerated depreciation is used to determine the amount of the NOLC accumulated deferred federal income tax (ADFIT) required to be normalized.[2] To the extent that accelerated depreciation creates an NOLC, the NOLC ADFIT must be a component of rate base. This can be reflected in rate base through ADFIT using either one of two methods to adhere to the normalization rules. In the first method, the deferred tax liability that is a result of accelerated depreciation would simply be reduced by the amount of the NOLC ADFIT. In the second method, the full, deferred tax liability is included as a rate base reduction and a separate deferred tax asset in the amount of the NOLC ADFIT is included as a rate base increase. The result of both is the same; the impact on rate base includes the net balance of the ADFIT for accelerated depreciation and the ADFIT for the NOLC. The PLRs uniformly conclude that excluding the NOLC ADFIT would constitute a normalization violation.

Q. WHAT IS THE RATIONALE FOR THIS TREATMENT OF THE NOLC ADFIT?

A. When a regulated utility experiences a NOLC, the taxpayer has not yet received the benefit of the depreciation-related ADFIT, i.e., there is no interest free loan from the federal

[2] The PLRs are included as Exhibits DAH-1 – DAH-7 to my direct testimony.

government. Accordingly, the rate base reduction is deferred until the NOLC is utilized and the loan is extended.

Q. PLEASE DESCRIBE THE CONCLUSIONS IN THE PLRS MENTIONED ABOVE.

A. The PLRs mentioned above confirm that NOLC ADFIT must be included in rate base to avoid a normalization violation. They describe the NOLC as a necessary reduction to the rate base impact of the deferred tax liability associated with accelerated depreciation. Further, the PLRs prescribe either one of two approaches for determining the amount of the NOLC ADFIT that must be included in rate base: a "with-and-without" or "last dollar deducted" approach. Both of these approaches look at the hypothetical taxable income of the utility without the deductions for accelerated depreciation. The extent to which an NOLC is then attributable to accelerated depreciation must be included in rate base to avoid a normalization violation. The PLRs all contain language very similar to the following:

> Because the [ADFIT] account [Account 282], the reserve account for deferred taxes, reduces rate base, it is clear that the portion of an NOLC that is attributable to accelerated depreciation must be taken into account in calculating the amount of the reserve for deferred taxes [(ADFIT)]…
>
> The "with or without" [or "last dollar deducted"] methodology employed by Taxpayer is specifically designed to ensure that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated depreciation to ratepayers[3]

Q. IS THE INCLUSION OF AN NOLC IN RATE BASE ALSO A SOUND ACCOUNTING AND REGULATORY PRACTICE?

A. Yes. The normalization treatment of an NOLC assures that the customers of a utility receive the benefit of the deferred tax payment associated with accelerated depreciation no sooner

[3] Bracketed entry added for clarity.

than they would be able to do so based on the operations of the utility as an entity that files a separate return. This lines up the timing of customer benefits with the ability of the utility operations to provide those benefits.

Q. ARE THERE REPERCUSSIONS TO NOT FOLLOWING THE NORMALIZATION REQUIREMENTS FOR ACCELERATED DEPRECIATION?

A. Yes. A depreciation-related normalization violation results in the utility no longer being allowed to use accelerated depreciation on all property used to provide regulated service to the jurisdiction in which the violation occurred.[4] In addition, the taxes that have been deferred as a result of the prior accelerated depreciation must be paid to the federal government more quickly than they would be in the absence of the violation.

Q. WHAT IMPACT WOULD A NORMALIZATION VIOLATION HAVE ON CUSTOMERS?

A. A normalization violation would be harmful to customers as it would result in higher utility rates. As noted above, a normalization violation would prevent the utility from claiming deductions for accelerated depreciation and would result in the company paying the IRS more rapidly for the previously deferred taxes. This would result in a lower ADIT balance which would cause the rate base for the company to increase. As customers pay a return on rate base, any increase in rate base would directly result in higher rates. This lower ADIT would represent the reduction to a cost-free source of capital for the company.

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS AS THEY RELATE TO ITC?

[4] 26 U.S.C. § 168(f)(2).

A. The normalization rules as they relate to ITC require that the benefit of ITC cannot be passed to customers any faster than ratably over the book depreciable life of the underlying assets that generated the ITC. As such, a utility is unable to provide the benefits of the ITC to customers either at the time in which the credit is generated or at the time in which the credit is utilized and reduces the tax liability of the utility. A utility may elect to pass the benefit of ITC to customers through one of two methods as directed by §46(f)(1) and §46(f)(2). Under §46(f)(1), a utility passes the benefit of the ITC through a reduction to rate base, provided that the reduction is restored not less rapidly than ratably. No adjustment may be made to cost of service on account of the ITC. Under §46(f)(2), a utility shares the benefit of the ITC with customers by amortizing the benefit in the cost of service no more rapidly than ratably over the book life of the property generating the credit. No reduction to rate base is permissible under this method.

Q. WHAT METHOD HAS THE COMPANY ELECTED TO PASS THE BENEFITS OF ITC TO CUSTOMERS?

A. The Company elected to pass the benefits of ITC to customers using the method allowed under §46(f)(2). The cost of service includes a deferred tax benefit resulting from the amortization of ITC. This deferred tax benefit is specifically identified on Schedule J-1.

Q. WHAT IS THE PENALTY FOR AN ITC NORMALIZATION VIOLATION?

A. In the case of an ITC normalization violation, a utility would have to refund to the IRS the balance of the unamortized ITC at the time the violation occurred. This would eliminate the future benefit to customers of any reduction to rates through either a cost of service or rate base reduction.

VI. SEPARATE RETURN ACCOUNTING

Q. WHAT IS MEANT BY A "SEPARATE RETURN" APPROACH TO CALCULATING INCOME TAXES?

A. The "separate return" methodology calculates income taxes on utility revenues and expenses that are included in the utility's revenue requirement. This approach appropriately allocates income taxes between customers and shareholders using a benefits/burdens criteria. Under this methodology, income tax expense relates to, and results from, the provision of utility service to customers. Additionally, the "separate return" income tax calculation includes an adjustment to synchronize interest. Synchronized interest represents the portion of return that is deductible for tax purposes, and it is calculated by multiplying the weighted cost of debt by rate base. Use of synchronized interest in the tax calculation effectively "synchronizes" the calculation of income tax expense with rate base and rate of return. It calculates income taxes consistent with the assumptions used to calculate rate base and the rate of return. Synchronized interest may be more or less than the actual interest deducted on the tax return.

Q. DO THE TAXES REQUESTED IN THIS CASE REPRESENT A SEPARATE RETURN APPROACH?

A. Yes, the tax expense and ADIT included in this case represents the tax associated only with the income and expense of the Company in providing utility service to customers. It does not include any benefits or detriments that may arise from being included in a consolidated tax return.

Q. WHY IS THE "SEPARATE RETURN" APPROACH THE PROPER METHODOLOGY TO USE IN CALCULATING INCOME TAXES FOR RATEMAKING PURPOSES?

A. The "separate return" approach includes in the cost of service only income taxes that result from the provision of utility service to customer. Income taxes requested by the Company are based on revenues and expenses included in the cost of service calculation. There are no additions to or reductions from tax expense resulting from revenues or expenses not included in the Company's request. It is neither appropriate nor equitable to increase or reduce cost of service by tax costs or benefits that are not related to the rendition of utility service to customers. The use of a separate return approach prevents the cross-subsidization of costs or benefits among affiliate companies. Normalization requires consistency among tax expense, book depreciation expense, rate base, and the deferred tax reserve. [5]

Q. IS THE REQUEST FOR TAXES ON A SEPARATE RETURN BASIS CONSISTENT WITH THE TAXES REQUESTED IN THE COMPANY'S MOST RECENT BASE CASE?

A. The request for taxes on separate return basis is consistent with the Company's most recent base case but for the treatment of NOL and tax credit carryforwards. In Cause No. PUD 201800097, the Company presented taxes on a separate return basis for all tax expense and ADFIT items but for NOL and tax credit carryforwards. The NOL and tax credit carryforwards presented in that case reflected adjustments to the ADIT balance for the utilization of those tax attributes as a result of the Company being a member of a consolidated group for its federal tax return.

Q. WHY HAS THE COMPANY PRESENTED NOL AND CREDIT CARRYFORWARDS ON A SEPARATE RETURN BASIS FOR THIS FILING?

[5] 26 U.S.C. § 168(i)(9)(B).

A. The Company has presented the NOL and tax credit carryforwards on a separate return basis because it is the proper method to calculate income taxes for ratemaking purposes for the reasons discussed above.

During the preparation for this filing, the Company identified a risk that it faced if the NOL was not presented on a separate return basis. In instances, such as this, in which a member of a consolidated group is in an NOL position as determined on a separate return basis and the NOL is the result of accelerated tax depreciation, there is a risk that the Company would not be adhering to the consistency requirement of the normalization rules. Tax expense included in rates is calculated only using the revenue and expenses associated with providing utility service to the Company's customers. Similarly, book depreciation is based only on the assets that are used to provide utility service to customers. If the NOL carryforward were not calculated on a separate return basis, then the ADIT included in rate base would reflect a reduction that is directly a result of the taxable situation of affiliate companies. This would result in a rate base that is inconsistent with tax expense and book depreciation and therefore not in compliance with the normalization rules.

Q. PLEASE EXPLAIN WHY THE BOOKS OF THE COMPANY DO NOT REFLECT THE NOL CARRYFORWARD ON A SEPARATE RETURN BASIS?

A. The balance reflected on the books of the Company are a result of its participation in a consolidated return with its parent company and affiliates (consolidated return group). As part of the consolidated return group, the Company also participates in the group's tax allocation agreement (agreement). The agreement dictates the allocation of the consolidated tax liability and tax attributes among members of the group. As a result of the agreement, the books of the Company reflect an NOL carryforward only to the extent that the

consolidated return group has a carryforward and only for the Company's allocated share of that carryforward. At the end of the test year, the consolidated return group was not expecting to have an NOL carryforward. As a result, the Company did not have an NOL carryforward on its books despite the fact that it has an NOL carryforward when calculated on a separate return basis.

Q. DOES THE PARTICIPATION IN THE TAX SHARING AGREEMENT MEAN THAT THE COMPANY RECEIVED PAYMENTS FOR ITS NOL CARRYFORWARDS?

A. Yes, it has. The tax sharing agreement directs companies with taxable income to remit a payment to the parent company of the consolidated return group in the amount of its tax liability. To the extent that there are companies with taxable losses, the parent company will distribute payments to those companies for the difference between the amount the parent company is required to remit to the IRS and the amount it received from taxable income companies. Through this intercompany payment process, the Company has received payments for use of its NOL carryforwards.

Q. IF THE COMPANY RECEIVED PAYMENTS FOR ITS NOL CARRYFORWARDS THEN WHY SHOULD THE SEPARATE RETURN NOL CARRYFOWARD BE INCLUDED IN RATE BASE?

A. The separate return NOL carryforward is both appropriate and necessary to include in the net ADIT reduction to rate base. First, the IRS guidance and the Code both indicate that a NOL carryforward as a result of accelerated depreciation must be included in the rate base of the utility. As discussed, the IRS has issued numerous PLR's all indicating that in order to comply with the normalization rules of the Code, the NOL carryforward must be a

component of rate base. The normalization rules of the Code also specify that the assumptions for tax expense, book depreciation, and rate base must be consistent.

Below is a simple example of a company that has accelerated tax depreciation deductions greater than its pre-tax book income which results in an NOL. In the example, $2,100 is included in the cost of service for tax expense. The $14,000 deduction for accelerated depreciation results in a deferred tax liability of ($2,940). The company in this example has generated an NOL of $4,000 which results in a deferred tax asset of $840. As you can see in the example, when the deferred tax liability is netted with the NOL deferred tax asset the result is a rate base reduction of ($2,100). This rate base reduction is equal to the tax expense customers have paid for in the cost of service. If, however, the NOL deferred tax asset is not included as a component of rate base then rate base is reduced by ($2,940), an amount greater than the tax expense included in the cost of service. That difference between tax expense and rate base exemplifies the need for the NOL carryforward to be included as a component of rate base in order to comply with the consistency requirement of the normalization rules.

Income Tax Expense - Per Income Statement				
Pre-Tax Net Income	10,000			
Statutory Tax Rate	21%			
Total Tax Expense	2,100	*(Tax Expense collected in customer rates)*		
	Taxable Income		Tax Rate	**(DTL) / DTA**
Pre-Tax Net Income	10,000			
Accelerated Tax Depreciation Reducing Income to Zero	(14,000)	x	21%	(2,940)
				(2,940) *ADIT Rate Base Reduction w/o NOL*
Taxable Income (Loss)	(4,000)			
Net Tax Loss Carry Forward	4,000	x	21%	840
				(2,100) *ADIT Rate Base Reduction with NOL*

VII. TAXES INCLUDED IN REQUESTED RATES

Q. WHAT LEVEL OF INCOME TAX EXPENSE IS INCLUDED IN THE TOTAL COMPANY PRO FORMA COST OF SERVICE?

A. The Total Company pro forma cost of service includes an income tax benefit of $3,457,547. The operating income before income taxes is reduced by the interest synchronization adjustment to arrive at a pre-tax book income of ($9,238,235). After making adjustments to the pre-tax book income for permanent and flow-through Schedule M adjustments, the adjusted book income is multiplied by the overall income tax rate of 25.4717% to arrive at an income tax benefit of $461,598. This income tax benefit is then adjusted to include the amortization of federal and state ITC's to arrive at the final income tax expense (benefit).

Q. CAN YOU DESCRIBE THE INTEREST SYNCHRONIZATION ADJUSTMENT?

A. Yes. The interest synchronization adjustment represents the portion of the return on rate base that is deductible for tax purposes. It is calculated by multiplying the weighted cost of debt by rate base. The use of this synchronized interest in the tax calculation effectively "synchronizes" the calculation of income tax expense with rate base and the rate of return. It calculates income taxes consistent with the assumptions used to calculate rate base and the rate of return. Synchronized interest may be more or less than the actual interest deducted on the tax return.

Q. CAN YOU DESCRIBE HOW YOU CALCULATED THE OVERALL INCOME TAX RATE OF 25.4717% THAT YOU USED IN ARRIVING AT THE INCOME TAX EXPENSE REQUESTED?

A. Yes. The overall income tax rate of 25.4717% factors in both the federal and state income tax rate as well as the deductibility of state income tax expense in the calculation of

Oklahoma state income taxes. The federal income tax rate of 21% is added to the Oklahoma state income tax rate of 6% for a total of 27%. This is then dampened by the deductibility of state income taxes by dividing the 27% rate by 1.06 (1 + Oklahoma tax rate).

Q. DOES THE TAX EXPENSE REQUESTED BY THE COMPANY INCLUDE AN AMORTIZATION OF EXCESS ADFIT?

A. No. A proforma adjustment was made to the test year income tax expense to remove the impact of the amortization of excess ADFIT. The Company passes back the benefit of excess ADFIT amortization to customers through the Tax Cut and Jobs Act of 2017 Adjustment Rider. Because the amortization is included in that rider, it is not necessary or correct to include as a part of the tax expense requested in this filing.

Q. CAN YOU DISCUSS THE PRO FORMA ADJUSTMENT TO THE FEDERAL ITC AMORTIZATION?

A. Yes. As previously mentioned, under §46(f)(2), a utility shares the benefit of the ITC with customers by amortizing the benefit in the cost of service no more rapidly than ratably over the book life of the property generating the credit. The Company has proposed to increase book depreciation rates in its request for new base rates. The level of ITC amortization in the tax expense requested in the cost of service reflects the expected level of amortization with the requested book depreciation rates.

Q. CAN YOU DISCUSS THE TYPES OF PRO FORMA ADJUSTMENTS THAT WERE MADE TO THE ADIT INCLUDED AS A REDUCTION TO RATE BASE?

A. Yes. Three types of pro forma adjustments were made to arrive at the requested level of ADIT to be included as a reduction to rate base: 1) adjustments to exclude ADIT balances which relate to book accounts that are not included in the Company's requested rate base;

2) adjustments to include the tax effects of other pro forma adjustments to rate base; 3) adjustments to reflect ADIT on a separate return accounting basis.

Q. CAN YOU DISCUSS THE PRO FORMA ADJUSTMENTS MADE TO REFLECT ADIT ON A SEPARATE RETURN ACCOUNTING BASIS?

A. Yes. A pro forma adjustment of $154,832,586 is being made to reduce the ADIT balance for a federal NOL calculated on a separate return basis. This adjustment represents the amount of ADIT associated with accelerated tax depreciation which has not been able to produce cash benefits to the company on the basis of a separate tax return method as of the end of the historic test year. This adjustment reflects the ADIT associated with the taxable losses the Company has generated in excess of the taxable income it has generated and been able to offset based on the NOLC and carryback provisions of the Code.

Q. WAS A "WITH-AND-WITHOUT" ANALYSIS DONE TO DETERMINE THE AMOUNT OF NOL SUBJECT TO THE REQUIREMENTS OF NORMALIZATION?

A. Yes. A "with-and-without" calculation was performed to determine the amount of the NOL required to reduce the ADFIT balance. This calculation determined that all of the $154,832,586 NOLC is a result of accelerated tax depreciation and therefore subject to the normalization rules as described previously in my testimony.

Q. WHY IS IT APPROPRIATE TO INCLUDE THIS NOL CARRYFORWARD IN RATE BASE?

A. It is appropriate to include the NOLC as a decrease to the ADFIT balance because it represents the level of cost free capital to which the Company had access based on its utility operations on a separate return basis. It is also appropriate due to the normalization rules discussed earlier in my testimony. Deductions for accelerated depreciation result in cash

benefits through a deferral of taxes payable to the government. This adjustment aligns the timing of these cash benefits to customers with the timing of the cash benefits that would be received by the Company if it had filed a separate return. The inclusion of the NOL offsets the rate base reduction associated with deferred tax liabilities for accelerated depreciation for which the Company would not yet receive a cash benefit for on a separate return basis.

Q. ARE THERE ANY OTHER PRO FORMA ADJUSTMENTS ASSOCIATED WITH THE SEPARATE RETURN NOLC?

A. Yes. An adjustment of ($1,073,834) was made to reflect the pro forma balance of unamortized protected excess ADFIT. This adjustment increases the overall ADIT balance which results in a reduction to rate base. The adjustment recognizes that as a result of the separate return NOLC ADIT, the Average Rate Assumption Method (ARAM) would produce a life-to-date amortization of protected excess ADFIT that is less than the Company has amortized on its books.

VIII. CONCLUSION

Q. PLEASE SUMMARIZE YOUR CONCLUSIONS.

A. The income tax schedules and workpapers that are part of this filing were completed consistent with the accounting methods established as precedent in previous filings. The ADIT and income tax expense are fair and accurate based on the underlying rate base and recoverable expenses included in the cost of service and presented on a separate return basis. Tax expense and ADIT comply with IRS normalization requirements, including those related to accelerated tax depreciation, NOLCs, and ITC. Adjustments made to tax expense,

cost of service, and to rate base are both appropriate and fair. Accordingly, the Company's request to include the amount of income tax expense that is included in the cost of service should be granted.

VIII. CONCLUSION....15

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.

A. My name is David A. Hodgson. I am a Tax Accounting & Regulatory Support Manager for American Electric Power Service Corporation (AEPSC), a wholly owned subsidiary of American Electric Power Company, Inc. (AEP). My business address is American Electric Power, 1 Riverside Plaza, Columbus, Ohio 43215.

Q. ARE YOU THE SAME DAVID A. HODGSON WHO FILED DIRECT TESTIMONY IN THIS CASE?

A. Yes, I am.

II. PURPOSE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

A. The purpose of my rebuttal testimony is to address the following topics:

1. Certain positions taken and recommendations made related to the stand-alone net operating loss carryforward (NOLC) included in the rate base requested by the Public Service Company of Oklahoma (PSO). Specifically, I rebut Mr. Mark E. Garrett on behalf of Oklahoma Industrial Energy Consumers (OIEC), Mr. Brice D. Betchan on behalf of John O'Connor, Oklahoma Attorney General (OAG) and Mr. Helmuth Schultz III on behalf of John O'Connor, OAG;
2. The Company's proposed six-month post test year adjustments to accumulated deferred income tax (ADIT) and tax expense;
3. The adjustment to the gross revenue conversation factor (GRCF) for the change in the Oklahoma corporate income tax rate proposed by Public Utility Division (PUD) witness Linh Pham.

III. SUMMARY

Q. CAN YOU PLEASE SUMMARIZE YOUR TESTIMONY?

A. Yes. First, my testimony discusses the difference in the accounting for the NOLC for book purposes on a consolidated basis and the ratemaking treatment on a stand-alone basis and

the treatment of payments/receipts through a tax sharing agreement. Then I discuss violations of the normalization rules. I then discuss the support provided in the private letter rulings (PLR) identified in my direct testimony as well as provide another PLR that supports PSO's position on the NOLC. I also identify other supporting arguments beyond a normalization concern with respect to PSO's position on the stand-alone NOLC. Finally, I discuss PSO's recommendations for a six-month post test year level of ADIT as well as PSO's recommendation for the Oklahoma corporate income tax rate to use in the calculation of tax expense and in the GRCF.

IV. SEPARATE RETURN VS. CONSOLIDATED NOLC

Q. BOTH OAG AND OIEC NOTE IN THEIR RESPONSIVE TESTIMONY THAT PSO DOES NOT HAVE AN NOLC RECORDED ON ITS BOOKS AND RECORDS AT THE END OF THE TEST YEAR. CAN YOU DISCUSS?

A. Yes. In determining income taxes in the separate financial statements of the members of a consolidated tax return group, Generally Accepted Accounting Principles (GAAP) allows for different methods of doing so. Accounting Standards Codification (ASC) 740-10-30-27 does not require the use of any particular allocation method and only requires that the method adopted be systematic, rational, and consistent with the broad principles of ASC 740. The members of the AEP consolidated federal income tax return (consolidated return group) have elected to participate in a tax allocation agreement that follows a parent company down method. In the parent company down method, the allocation of taxes is calculated by applying a pro-rata allocation of a member's attribute (i.e. taxable income, pre-tax book earnings, etc.) to that of the return group's attribute.

PSO does not have an NOLC recorded on its books and records at the end of the test year because the consolidated return group has produced taxable income sufficient to offset the losses contributed by PSO. The GAAP financial statements of PSO reflect its proportionate share of the consolidated return group's NOLC and not the NOLC generated strictly based on PSO's taxable income.

Q. BOTH OAG AND OIEC NOTE IN THEIR RESPONSIVE TESTIMONY THAT PSO RECEIVED PAYMENT FOR ITS NOLC. CAN YOU DISCUSS?

A. Yes. Through the tax sharing agreement, those companies with taxable income make tax payments to AEP, Inc. (Parent) equal to their separate return liability. To the extent that the income from these companies can be offset by losses generated by other affiliates, Parent makes a distribution to the loss companies.

Q. DOES THE IRS ISSUE REFUNDS OR PAYMENTS TO COMPANIES THAT INCUR A TAXABLE LOSS?

A. No. A taxpayer is only able to seek a refund to the extent that is has overpaid its income tax liability. A taxable loss does not result in a negative tax liability in the current year; therefore, the IRS would not issue a refund. A taxpayer that incurs a loss may however carry that loss forward to offset future taxable income. This loss carryforward results in the NOLC deferred tax asset in question in this case.

Q. IF PSO WERE NOT PART OF THE CONSOLIDATED RETURN GROUP, WOULD IT HAVE RECEIVED PAYMENTS FOR ITS NOLC?

A. No, it would not have. The only reason that PSO was able to receive payments for its NOLC is due to its membership in the consolidated return group. Moreover, it also would not have received payments if affiliates within the consolidated return group had not produced

taxable income. The payments are entirely dependent upon the financial position of affiliate companies.

Q. THE TESTIMONY OF OIEC DISCUSSES HOW A HOLDING COMPANY COULD POTENTIALLY ABUSE THE USE OF THE STAND-ALONE CONCEPT. CAN YOU PLEASE DISCUSS?

A. Yes. The description of the scenario that OIEC describes in its testimony is inconsistent with the AEP tax sharing agreement and stand-alone ratemaking. In the scenario as described, the utility with taxable losses would correctly tell its regulator that it cannot use all of its deductions and must reduce its ADIT by the stand-alone NOLC. OIEC further goes on to pose that an affiliate utility with taxable income would then tell its regulator that it was not able to use the deductions of its affiliate. This is where the scenario is inconsistent with stand-alone ratemaking. Under a stand-alone method, the utility with taxable income would not introduce any aspect of the financial position of its affiliate in the process of setting its rates. Furthermore, under AEP's tax sharing agreement, the utility with taxable income would remit a payment for its stand-alone tax liability and would therefore have no NOLC on either a stand-alone or consolidated basis.

Q. IS THERE THE POTENTIAL OF RISK TO THE HOLDING COMPANY IF A STAND-ALONE CONCEPT IS NOT USED?

A. Yes. Following the same scenario as presented by OIEC where one utility has taxable losses (Utility A) and another utility has taxable income (Utility B), there is a risk to the holding company if both utilities are treated on a consolidated basis.

First, we will assume that Utility A sets its rates taking into consideration the payment received because of the tax sharing allocation. The cash received by Utility A

from Parent is used to increase ADFIT and therefore results in a reduction to rates. This is similar to the proposed treatment by OIEC in the instant case.

Next, we will assume that Utility B makes a tax payment to Parent for the current tax liability of Utility B. Parent allocates that payment to Utility A as described above. If looking at the consolidated group, the regulator of Utility B could make the argument that there was no overall tax liability on a consolidated basis and that the current tax expense of Utility B should actually be deferred. Utility B's regulator could then argue that this deferral should be used to increase ADFIT and therefore result in a reduction to rates.

As you can see, if one reaches beyond the attributes of a utility on its own stand-alone basis there is the potential risk that the same intercompany tax allocation could be used to benefit both the customers of Utility A and Utility B.

Q. OAG WITNESS SCHULTZ DISCUSSES THE ACCOUNTING RELATED TO A NOLC. CAN YOU DISCUSS[1]?

A. Yes. Mr. Schultz begins the discussion by correctly identifying the rationale of including ADIT as a reduction to rate base. The testimony then goes on and correctly states that when a deduction results in a taxable loss (i.e. NOLC), a deferred tax asset is created. He points out that the debit to the NOLC DTA is offset by a credit to tax expense (reduction to deferred tax expense).

What Mr. Schultz's testimony fails to identify is that while there is in fact a debit to set up the NOLC DTA and a credit to deferred tax expense, there is an equal and offsetting impact to current tax expense and the taxes payable accounts when a company incurs a loss. The net result is zero impact to tax expense and is simply a difference in current and deferred

[1] Supplemental Testimony of Helmuth Schultz p 11-12

taxes. The reason that the DTA is set up is that the company has incurred a taxable loss and otherwise would have a negative current tax expense (credit to expense). By recording the four-pronged entry as I described above, the accounting simply brings the current tax expense to zero and reflects the loss as a deferred tax benefit.

Mr. Schultz's testimony states, "…the Company's adjustment reflecting a deferred tax asset is obvious, but tax expense does not reflect a similar obvious offsetting entry reducing income tax expense." This statement illustrates a key misunderstanding of the accounting around a NOLC. The existence of a NOLC does not change the total tax expense of the company.

My direct testimony in this proceeding lays out an example in which it is necessary to include the NOLC DTA in order to align the deferred tax expense included in customer rates with the overall ADIT[2]. If the cash received through the consolidated tax agreement is included as an adjustment to ADIT then the alignment of ADIT and deferred tax expense no longer exists.

Q. IN THE OPINION OF OAG WITNESS SCHULTZ, PSO'S REQUEST FOR THE STAND-ALONE NOLC WOULD RESULT IN A NORMALIZATION VIOLATION. CAN YOU DISCUSS?

A. Yes. Mr. Shultz states that, in his opinion, PSO's request would result in a normalization violation "because tax expense requested in the rate filing are not impacted by the recognition of the deferred tax asset.[3]" Again, this illustrates the misunderstanding that an NOLC does not affect the total tax expense of a company. The recognition of the stand-

[2] Direct Testimony of David A. Hodgson p. 16-17

[3] Supplemental Testimony of Helmuth Schultz p. 12

alone NOLC ensures that the rate base reduction for ADIT is consistent with deferred tax expense in rates as necessary under the consistency requirement of the normalization rules.

V. NORMALIZATION VIOLATIONS

Q. CAN YOU PLEASE PROVIDE A SUMMARY OF THE NORMALIZATION REQUIREMENTS?

A. Yes. With respect to accelerated depreciation, the normalization rules require that the federal tax expense included in the cost of service for ratemaking use a method of depreciation and a depreciation period that is no shorter than the depreciation expense used in setting rates.[4] With respect to NOL carryforwards, the normalization rules require that the NOL carryforward accumulated deferred federal income taxes (ADFIT) be included in rate base to the extent that the NOL carryforward is the result of accelerated depreciation.[5] Another important aspect of the normalization rules is the consistency requirement. The normalization rules require there to be consistency with the assumptions used in the revenue requirement for depreciation expense, tax expense, rate base, and the reserve for deferred taxes (or ADFIT).[6]

Q. THE TESTIMONY OF OIEC SUGGESTS THAT THE USE OF PSO'S PORTION OF THE CONSOLIDATED RETURN GROUP'S NOLC MEETS THE NORMALIZATION CONSISTENCY REQUIREMENTS. DO YOU AGREE?

A. No, I do not. As stated above, the normalization rules require consistency between, depreciation expense, tax expense, rate base, and ADFIT. The rate base included in PSO's

[4] 26 U.S. Code §168(i)(9)(A)(i)
[5] Treas. Reg. § 1.167(l)-1(h)(1)(iii) and Private Letter Rulings issued by the IRS.
[6] 26 U.S.C. § 168(i)(9)(B).

revenue requirement consists of assets that are used in providing electric utility service to its customers. It does not include the assets of affiliate companies. Likewise, the depreciation expense consists of the depreciation of the assets in rate base providing electric utility service to customers. Tax expense in the cost of service is calculated based on the revenues and expense that are included in PSO's revenue requirement. Those three elements are all based on PSO without regard to its affiliates. It is therefore inconsistent to allow the ADFIT included in the revenue requirement to be influenced by the financial position of affiliates. By allowing the tax allocation payment to be a reduction to the NOLC at PSO, it introduces the revenues and expenses generated by the rate base of affiliated utility companies into the rates of PSO.

Q. THE TESTIMONY OF OIEC STATES THAT IF THE PREVIOUS NOLC FILING POSITION DID NOT ADHERE TO THE NORMALIZATION RULES, THEN A NORMALIZATION VIOLATION WOULD HAVE HAPPENED YEARS AGO. CAN YOU DISCUSS?

A. Yes. First, PSO is not claiming that it currently has a normalization violation. The Company's position is that to include a NOLC in rate base other than the stand-alone NOLC is inconsistent with the normalization rules.

Q. IF PSO'S PREVIOUS BASE CASE DID NOT INCLUDE A STAND-ALONE NOLC, HOW CAN PSO CLAIM THAT THERE IS NOT A NORMALIZATION VIOLATION?

A. The IRS has issued guidance on the topic of correcting normalization inconsistencies. First, in order to be considered a violation, a company or regulatory commission must knowingly put into rates a practice or procedure that is inconsistent with the normalization rules. It is not suggested nor stated that either PSO or the Commission were aware of the inconsistency

with the normalization rules that came about from excluding the NOL carryforward when rates were put into place as a result of Cause No. PUD 201800097.

Second, the IRS allows taxpayers to change to a practice or procedure that is consistent with the normalization rules with its next available opportunity before it will assert that a normalization violation has occurred. The Company identified the normalization inconsistency in the preparation for this case. Because of the risk identification, the Company is now using its next available opportunity by seeking a correction of the inconsistency with the request for rates in this base case.

Q. THE TESTIMONY OF OIEC DESCRIBES THE INTRODUCTION OF A STAND-ALONE NOL IN THE INSTANT CASE AS WELL AS IN THE BASE CASES OF OTHER AEP OPERATING COMPANIES AS A "NEWLY-DEVELOPED STRATEGY"[7]. CAN YOU PLEASE DISCUSS?

A. Yes. What OIEC describes as a "newly-developed strategy" is AEP's recognition of the inconsistency with the normalization rules if a stand-alone NOLC is not included in ratemaking. Like PSO is using the instant case as its first available opportunity to change to a practice or procedure that is consistent with the normalization rules, other AEP operating companies are using their current base case filings as their opportunity to do so. This follows the IRS guidance on correcting normalization concerns.

Q. THE TESTIMONY OF OIEC DISCUSSES THE THREAT OF NORMALIZATION VIOLATIONS BY UTILITIES AS AN ATTEMPT TO KEEP SAVINGS THAT SHOULD GO TO RATEPAYERS. CAN YOU DISCUSS?

[7] Responsive Testimony of Mark Garrett at p. 17

A. Yes. The testimony of OIEC paints utilities in a dark shadow by insinuating that raising the issue of a normalization violation is a strategy used in order to keep money for the utility that should rightfully go to customers. OIEC goes on further to make it appear that all instances in which normalization concerns were raised by utilities, the commissions and courts ignored those concerns and money was provided to customers with no normalization violations.

Utilities do sometimes raise the concern of normalization violations as a violation comes with very serious repercussions as discussed in my direct testimony[8]. The exhibits to my direct testimony provide multiple examples in which utilities did raise the concern of a normalization violation and the IRS ruled that the practice or procedure in question would be a normalization violation.

VI. PRIVATE LETTER RULING

Q. HAS PSO SOUGHT A PLR TO SUPPORT ITS CASE FOR A STAND-ALONE NOL?

A. No. At this time, PSO has not requested a private letter ruling from the IRS related to its position that a stand-alone NOL is required to meet the normalization requirements.

Q. WHY HAS PSO NOT SOUGHT A PLR ON THE TOPIC OF THE STAND-ALONE NOL?

A. The Company did a thorough examination and analysis of the guidance provided by the IRS on the topic. It consulted nationally recognized experts in the field to independently analyze the guidance as well. After this analysis, it was determined that there was a preponderance of evidence to support the Company's position.

[8] Direct Testimony of David A. Hodgson at p. 11

The PLRs included as attachments to my direct testimony all support that a NOLC that is the result of accelerated tax depreciation must be included in the calculation of the revenue requirement.

Q. DO THE PLR'S INCLUDED WITH YOUR DIRECT TESTIMONY SPECIFICALLY ADDRESS A TAX ALLOCATION PAYMENT AND THE IMPACT OF IT?

A. No, the PLRs included as exhibits to my direct testimony do not specifically address tax allocation payments nor would I necessarily expect them to. Because stand-alone treatment is the standard in a ratemaking setting, the discussion of intercompany tax allocations is not relevant to the discussion for normalization purposes. The fact that tax sharing agreements among a consolidated group are not uncommon and none of the rulings discusses an intercompany payment suggests that none of the utilities who sought the PLRs attached any relevance to them.

Q. CAN YOU PROVIDE AN EXAMPLE OF A PLR IN WHICH A TAXPAYER DISCUSSES A TAX SHARING PAYMENT IN THE CONTEXT OF A NOLC?

A. Yes. In PLR 201718015 the taxpayer identifies the occurrence of tax sharing payments in the facts that are laid out to the IRS in the ruling request. Within the facts of the case, it is laid out that the utility had a NOLC on a stand-alone basis and that it also received an intercompany tax sharing payment from its parent related to the utility's NOLC. In making its ruling and resolving the normalization question for the utility, the IRS attached no significance to the tax sharing payment. The fact that the IRS simply ignored the tax sharing payment in its analysis further supports PSO's position that the NOLC must be included in ratemaking on a stand-alone basis.

Q. DOES PSO'S POSITION ON THE STAND-ALONE NOL REST ENTIRELY ON THE NORMALIZATION REQUIREMENTS?

A. No, absent the normalization requirements there are still sound reasons that PSO should include a NOLC on a stand-alone basis. The income taxes included in ratemaking should be based only on the revenue and expenses included in the revenue requirement of the utility. There should not be revenues or expenses not included in the Company's request that influence the income taxes. This is simply a sound ratemaking concept.

The stand-alone NOLC also insures that no cross-subsidization of affiliates impacts the rates charged to customers. The benefits and burdens of affiliate companies should have no bearing on the rates that PSO charges its customers.

Furthermore, the use of a stand-alone NOLC aligns the reduction to rate base for ADFIT with the deferred tax expense that has been included in the rates charged to customers. As I laid out in my direct testimony[9], including an ADFIT that includes the impact of a tax sharing agreement breaks the inherent connection between the deferred tax expense included in rates and the ADFIT that reduces rate base.

Q. HAS FERC WEIGHED IN ON THE TOPIC OF STAND-ALONE RATEMAKING?

A. Yes. While not directly relevant to this proceeding, FERC has weighed in on the topic of stand-alone ratemaking. The stand-alone approach is customary, and was established as precedent by FERC in Opinion No. 173[10]. On the topic of tax allocation agreements the FERC opinion states the following:

> The important thing about these alternative methods of allocating the consolidated tax liability is that they are elective. A group can choose any one of them. Hence to

[9] Direct Testimony of David A. Hodgson p. 16-17

[10] Columbia Gulf Transmission Company; Docket No. RP75-105-002

treat the amounts allocated to members for tax purposes as the member's actual tax costs for ratemaking purposes would mean the tax allowance of a regulated member of an affiliated group would be determined by the election of the group. Thus, the rates charged to ratepayers of different companies could vary considerably because of the way the members of the groups have chosen to adjust their earnings and profits. As a policy matter, we think that is unacceptable.

VII. SIX-MONTH POST TEST YEAR UPDATES

Q. HAS THE COMPANY PROVIDED A SIX-MONTH POST TEST YEAR UPDATE TO ADIT?

A. Yes, in response to discovery requests from the OAG and OIEC, the Company provided a six-month post test year update to ADIT. The adjustments to ADIT were as follows:

	Balances as of Test Year Ended 12/31/20	Six-Month Updated Balances 6/30/21	Adjustment Total Company
Accumulated Deferred Income Taxes	(624,615,418)	(434,381,846)	190,233,572
Excess Accumulated Deferred Income Taxes	(349,836,517)	(381,736,119)	(31,899,602)
	(974,451,935)	(816,117,965)	158,333,970

Q. CAN YOU EXPLAIN WHY THERE IS A LARGE DECREASE TO THE ADIT BALANCE?

A. Yes. During the six-month post test year PSO experienced substantial costs related to an extreme winter weather event. Those costs were deferred to a regulatory asset on the books for future recovery. For tax purposes, those costs are deductible in the current year as normal business expenses. The deduction of these costs resulted in a net operating loss (NOL) for both PSO and the consolidated return group.

Q. DO YOU PROPOSE ANY REVISIONS TO THE SIX-MONTH POST TEST YEAR ADIT ADJUSTMENTS IN THIS CASE?

A. Yes. I propose a revision to the six-month post test year ADIT adjustments to remove the NOLC deferred tax asset (DTA) balance directly related to the deduction for the winter

storm fuel costs described above. The NOLC DTA as well as the separate deferred tax liability (DTL) associated with the book/tax timing difference of the deduction of the winter weather event costs are being separately addressed by this Commission in Cause No. 202100076. The six-month post test year adjustments as originally provided included a proforma adjustment to remove the DTL and this proposed adjustment to the DTA neutralizes the impact on ADIT, consistent with the testimony filed in Cause No. 202100076. This change results in a reduction to the DTA (increase in ADIT) of $144,597,033. I propose an additional $160,464 decrease to ADIT to align the ADIT with other PSO rebuttal positions.

Q. WHAT IS THE ADIT BALANCE THAT YOU PROPOSE TO BE INCLUDED AS A REDUCTION TO RATE BASE IN THIS PROCEEDING?

A. I propose an ADIT balance including excess ADIT of $960,875,462 as a reduction to rate base in this proceeding. The chart below walks forward from the amount included in the original filing, the six-month post test year update, and the final recommendation.

	Balances as of Test Year Ended 12/31/20	Adjustment Total Company	Six-Month Updated Balances 6/30/21	Rebuttal Adjustment Total Company	Final Balances Total Company
Accumulated Deferred Income Taxes	(624,615,418)	190,233,572	(434,381,846)	(144,757,497)	(579,139,343)
Excess Accumulated Deferred Income Taxes	(349,836,517)	(31,899,602)	(381,736,119)	0	(381,736,119)
	(974,451,935)	158,333,970	(816,117,965)	(144,757,497)	(960,875,462)

Q. DID THE PUD, OAG, AND OIEC MAKE ADJUSTMENTS TO PSO'S INCOME TAX EXPENSE?

A. Yes. The PUD, the AG, and OIEC adjusted PSO's income tax expense to reflect the changes to taxable income because of their respective adjustments.

Q. DO YOU AGREE WITH THESE ADJUSTMENTS TO PSO'S INCOME TAX EXPENSE?

A. While I do not agree with all of the adjustments to taxable income, I do agree that the final amount of income tax expense will need recalculated to reflect the final cost of service approved in this case. I agree with PUD's use of the 4% Oklahoma corporate income tax rate in the calculation of income tax expense.

Q. DO YOU AGREE WITH PUD WITNESS LINH PHAM'S RECOMMENDED COMBINED TAX RATE USED IN THE GROSS REVENUE CONVERSATION FACTOR (GRCF)?

A. Yes. As described in the rebuttal testimony of PSO Witness Matthew Horeled, the Company accepts PUD's recommended combined corporate income tax rate used in the GRCF. The PUD recommendation includes the use of a 4% Oklahoma corporate income tax rate. This rate will be effective on January 1, 2022 and is a reduction from the 6% tax rate currently in effect through the remainder of 2021. Witness Horeled discusses PSO's concerns on the use of the lower income tax rate.

VIII. CONCLUSION

Q. PLEASE SUMMARIZE YOUR CONCLUSIONS.

A. PSO's request to include the Company's stand-alone NOLC in rate base is consistent with the requirements of the normalization rules. The Company provided substantial references to support its position that a stand-alone NOLC is both appropriate and correct not only from the standpoint of the normalization requirement, but also from the standpoint of sound ratemaking.

PSO is recommending a rate base reduction of $960,875,462 for the adjusted six-month post test year level of ADIT. This amount includes a reduction to the ADIT related to the NOLC generated by the extreme winter storm costs that occurred in 2020. PSO is also agreeing with PUD's recommendation to use a 4% rate for the Oklahoma corporate income tax rate in the calculation of tax expense in the cost of service and in the GRCF.

Q. DOES THIS CONCLUDE YOUR TESTIMONY?

A. Yes.

FINAL ORDER

BY THE COMMISSION:

The Corporation Commission of the State of Oklahoma (the "Commission") being regularly in session and the undersigned Commissioners present and participating, there comes on for consideration and action the Amended Joint Stipulation and Settlement Agreement ("Amended Joint Stipulation") filed September 30, 2021, and executed by Public

Service Company of Oklahoma ("PSO" or "Company"), the Public Utility Division of the Oklahoma Corporation Commission ("PUD"), Oklahoma Industrial Energy Consumers ("OIEC"), and the Department of Defense and Federal Executive Agencies (collectively "Stipulating Parties"). The Oklahoma Office of the Attorney General and Walmart Inc. stated they did not oppose the Amended Joint Stipulation. The American Association of Retired Persons ("AARP") opposed the Amended Joint Stipulation.

After the close of the record in the evidentiary hearing on the merits held on September 28 and October 5, 2021, the Administrative Law Judge ("ALJ") filed the Report and Recommendation of the Administrative Law Judge on November 5, 2021.

On November 12, 2021, AARP timely filed Exceptions to the ALJ Report together with a Motion for Oral Argument ("Motion"). Both matters were noticed for hearing on November 30, 2021. On November 16, 2021, PSO and OIEC filed their Responses to AARP's Exceptions, opposing the exceptions, urging the Commission to adopt and accept the recommendations of the ALJ Report.

On November 30, 2021, AARP's Exceptions and Motion came on for consideration as specified in AARP's notice. The Commission granted the Motion without objection. The Commission heard and carefully considered the arguments of all counsel and took the matter under advisement.

Based upon the evidentiary record in this Cause and the applicable law, the Commission finds that the Report of the Administrative Law Judge filed November 5, 2021, should be adopted, and incorporated by reference herein as if fully set forth, as the findings, conclusions, and Order of the Commission.

Accordingly, the Commission further finds that the Amended Joint Stipulation filed with the Commission on September 30, 2021, is a fair, just, and reasonable resolution of this Cause and reflects a full, final, and complete settlement by the Stipulating Parties of all issues pending in this proceeding.

The Commission further finds that although AARP takes issue with the provision in the Amended Joint Stipulation providing for the System Reliability Rider over-recovery of $712,051 to be returned to customers over a 20-month period by incorporating amortization in base rates, this method to credit the cost of service offsets or reduces base rates to PSO's customers. Due to the amount of the refund, and the negligible impact it will have on customer bills, the credit to the cost of service was a reasonable means by which to provide the refund. While the Commission does find portions of AARP's presentation in opposition to the Amended Joint Stipulation compelling and thought provoking, after careful consideration the Commission declines to adopt AARP's position at this time. However, the issues AARP raises can be addressed in future proceedings if circumstances warrant.

In summary, the Amended Joint Stipulation provides for the following:

(a) A base rate revenue deficiency net of rider revenues transitioning to base rates[1] of $50.7 million based upon a return on equity of 9.40 percent, a cost of long-term debt of 3.73 percent and a weighted average cost of capital ("WACC") of 6.74 percent.

(b) The base rate increase will be distributed on an equal percentage basis to all customer classes.

(c) Pro forma adjustments will be made to reflect full revenue from Economic Development Rider ("EDR") participants during future rate case filings, which protects all other PSO customers from paying any portion of the EDR credit. This "hold harmless" provision is hereby set forth in this Order.

(d) Approval of the depreciation rates set forth in Attachment A to the Amended Joint Stipulation.

(e) A WACC return on the six-month post-test year stand-alone net operating loss carryforward ("NOLC") will be excluded from the base rate revenue requirement resulting from this proceeding. Instead the amount will be deferred to a regulatory asset ("NOLC Regulatory Asset")[2] until rates are effective in the next Chapter 70 base rate case. Upon receipt of a private letter ruling from the Internal Revenue Service ("IRS") verifying PSO's approach, PSO shall notify the Stipulating Parties and the NOLC Regulatory Asset shall be recovered over a 20-month period through an interim adjustment to the Excess Tax Reserve ("ETR") Rider as set forth in Attachment B of the Amended Joint Stipulation.

(f) The undepreciated balance of the Oklaunion plant (1) be transferred from accumulated depreciation to a regulatory asset account and amortized through 2046 as set forth in Attachment C to the Amended Joint Stipulation and (2) earn a return at the cost of long-term debt.

(g) Update the level of storm costs recovered through base rates to the most recent three-year historical average as set forth in Attachment D to the Amended Joint Stipulation.

(h) A 4% state income tax rate be reflected in base rates, since the Oklahoma state income tax rate is decreasing from 6% to 4% effective January 2022; and authorization of the Gross Revenue Conversion Factor ("GRCF") regulatory asset and related amortization as set forth in Attachment E to the Amended Joint Stipulation.

(i) The System Reliability Rider over-recovery of $712,051 be returned to customers over a 20-month period by incorporating amortization in base rates.

---

[1] $102.7 million per direct testimony of Company Witness Jennifer Jackson, Exhibit JLJ-1 Page 3 of 3
[2] PSO will not accrue a carrying charge on the NOLC Regulatory Asset.

(j) The Southwest Power Pool Transmission Cost Tariff ("SPPTC Tariff") attached to the Amended Joint Stipulation be approved and incorporated herein as if fully set forth. The approved SPPTC will continue until rates are effective in the next Chapter 70 base rate case.

(k) The Distribution Reliability and Safety ("DRS") Rider will expire except for the limited purpose to recover carrying charges associated with in-flight projects as of September 30, 2021. The projects included are those approved in the 2020 DRS plan of November 25, 2019, and the 2021 DRS Plan of December 4, 2020, but not yet included in plant in service as of June 30, 2021. The DRS Rider tariff is attached to the Amended Joint Stipulation.

(l) Approval of the Fuel Cost Adjustment Rider which is attached to the Amended Joint Stipulation.

(m) PSO will provide in its next base rate case filing a breakout of production plant, accumulated depreciation, and depreciation expense by applicable Federal Energy Regulatory Commission ("FERC") account within the cost of service.

(n) PSO will provide the office of Attorney General with a copy of the draft private letter ruling request that is provided to the Commission (through its staff) pursuant to IRS Revenue Procedure 2021-1.

(o) All uncontested tariff changes proposed by PSO shall be considered approved.

ORDER

IT IS THEREFORE THE ORDER OF THE CORPORATION COMMISSION OF THE STATE OF OKLAHOMA that the Report of the Administrative Law Judge filed November 5, 2021, is hereby adopted and incorporated in its entirety herein by reference as if fully set forth, including the Amended Joint Stipulation and attachments thereto, as the Order of the Commission supplemented by the findings above.

IT IS FURTHER ORDERED that the rates, charges and tariffs reflecting the terms of this Order be and the same are hereby approved and shall become effective with the first regular billing cycle after the Company submits filed tariffs to the Commission that conform to this Order and the tariffs have been reviewed and approved by the Director of the Public Utility Division.

CORPORATION COMMISSION OF OKLAHOMA

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.

My name is David A. Hodgson. I am a Tax Accounting & Regulatory Support Manager for American Electric Power Service Corporation (AEPSC), a wholly owned subsidiary of American Electric Power Company, Inc. (AEP). My business address is American Electric Power, 1 Riverside Plaza, Columbus, Ohio 43215.

Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATIONAL BACKGROUND AND BUSINESS EXPERIENCE.

A. I graduated from The Ohio State University with a Bachelor of Science in Business Administration in Accounting. In 2000, I accepted a position with AEPSC as a Tax Analyst V. I was promoted to positions from Tax Analyst IV to Tax Analyst I over the course of 2002–2009. In 2011, I was promoted to Sr. Tax Analyst, then to Tax Project Manager, and in 2013, to Tax Manager. I was promoted to my current position in 2019. As Tax Accounting & Regulatory Support Manager, I participate in the recording of the tax accounting entries and records and the review of federal and state tax returns of AEP and its subsidiaries. I am also responsible for coordinating and developing state and federal tax data provided by the AEPSC Tax Department for use in regulatory proceedings. I have attended numerous tax, accounting, and regulatory seminars throughout my professional career.

II. PURPOSE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of my testimony is to present and sponsor the underlying income tax information included in the cost of service and rate base for the Company for the historical test year. I will specifically discuss:

- Federal Income Taxes included in cost of service
- Accumulated Deferred Federal Income Taxes (ADFIT) included in rate base; and
- Proforma Adjustments.

Q. WHAT IS THE AMOUNT OF FEDERAL INCOME TAX EXPENSE THE COMPANY IS REQUESTING TO BE INCLUDED IN THE COST OF SERVICE?

A. The Company is requesting the amount of federal and state income tax expense that is included in the cost of service reflected on Schedule D. This amount is supported in Workpapers D-2-13 through D-2-13-5.

Q. WHAT IS THE TEST YEAR FOR WHICH THE TAX SCHEDULES ARE PROVIDED?

A. Amounts in the schedules are shown for the historical test year with adjustments, for the 12-month period ended December 31, 2019.

Q. WHAT IS THE SOURCE OF INFORMATION USED FOR THE PREPARATION OF THE TAX SCHEDULES INCLUDED IN THIS RATE FILING?

A. All amounts included in the tax schedules for this rate filing are taken from the books and records of the Company.

III. SCHEDULES SPONSORED

Q. PLEASE LIST THE SCHEDULES AND WORKPAPERS THAT YOU ARE SPONSORING AND PROVIDE A BRIEF SUMMARY OF EACH.

A. I sponsor the federal and state income taxes in the following schedules and workpapers provided by Company witness Tiffany A. Day:

- Schedule B: Line 12 of this schedule indicates the level of ADFIT that are to be included in rate base.
- Schedule D: Lines 24-27 of this schedule indicate the level of income tax expense (benefit) per the books during the test year and after proforma adjustments with the adjusted level of operating revenues.
- Workpapers B-9 and B-9-1: These workpapers identify the ADFIT balances at the end of the historical test year and any adjustments to those balances to arrive at an amount that will be included in rate base.
- Workpaper D-2-13: This workpaper provides a summary of the income tax expense per books and adjustments to that expense to arrive at the tax expense included in the cost of service.
- Workpaper D-2-13-1: This workpaper begins with utility operating income and identifies individual items of differences between book and tax income to arrive at a taxable income. This taxable income along with tax credits and other adjustments is used to calculate the current income tax expense payable to the Internal Revenue Service.
- Workpapers D-2-13-2 and D-2-13-3: These workpapers provide the deferred tax expense included in the cost of service detailed by timing difference.
- Workpaper D-2-13-4: This workpaper provides the amortization of investment tax credits (ITC) included in the cost of service.
- Workpaper D-2-13-5: This workpaper provides the calculations of current and deferred state income tax expense for each state in which the Company has nexus.

IV. ACCOUNTING FOR INCOME TAXES

Q. WHAT TAX ACCOUNTING METHODOLOGY IS USED IN THE DETERMINATION OF THE INCOME TAX EXPENSE REQUESTED IN THIS CASE?

A. The federal tax expense as presented in this case is calculated using the normalized method of tax accounting, and the state tax expense is calculated using the flow-through method of tax accounting. This is consistent with the methodologies used to determine the tax expense included in cost of service in prior filings the Company has made with the Louisiana Public Service Commission.

Q. PLEASE DESCRIBE NORMALIZED INCOME TAX ACCOUNTING.

A. Accounting Standards Codification (ASC) 740 covers how companies should both account for and report taxes based on income. The two basic objectives of ASC 740 are to recognize both the amount of taxes that are either payable or refundable for the current tax year as well as to recognize the deferred tax assets and liabilities for the future tax consequences that have been recognized in a company's financial statements.

The accounting for income taxes called for by ASC 740 is known as normalized income tax accounting. Normalization accounting for income taxes calculates income tax expense on the pre-tax items of income and expense recorded for financial statement purposes or included in the cost of service for ratemaking purposes. The income tax expense is then adjusted for permanent differences between income recorded for financial reporting (book) purposes and income determined for income tax reporting (tax) purposes. Tax expense is then divided between the amount currently payable to the IRS and the amount that must be paid in the future. This division

between current and deferred tax expense is calculated based on certain temporary differences between book and taxable income. The tax expense incurred in the current year for which payment is deferred due to temporary book/tax differences is recorded on the balance sheet as an ADFIT liability or asset, whichever the case may be.

Q. IN YOUR DESCRIPTION OF NORMALIZED TAX ACCOUNTING, YOU DISCUSS TEMPORARY DIFFERENCES. CAN YOU PLEASE EXPLAIN THIS CONCEPT?

A. Yes. A temporary difference is a difference in the timing of recognition of an item of book income and taxable income that occurs in one year and reverses in another. A temporary difference does not change the overall income tax expense payable over the life of the underlying timing difference; it simply affects the timing of the payment of a liability. Under the normalized tax accounting method, such temporary differences do not have an impact on the overall tax expense for the period.

An example of a temporary difference and one that is generally the largest in magnitude for a public utility company results from the use of accelerated depreciation for tax purposes. While depreciation of an asset can only equal the cost of such asset and can only be recognized over the life of the asset, a temporary difference can occur when there are differing depreciation methods. For tax purposes, accelerated tax depreciation may be taken, whereas for book purposes the depreciation expense recognized for that same asset is calculated using the straight-line method. Over the life of the asset, the same total amount of depreciation will be recognized. However, under the accelerated depreciation method used for tax purposes, those deductions will be recognized to a greater extent in the earlier years of the asset's life as compared to

the straight-line method. This results in taxable income that is lower in the earlier years. As the straight-line depreciation begins to exceed the accelerated depreciation in the later years, it results in a taxable income that is higher than book income. Over the life of the asset, the amount of depreciation deducted from income for both book and tax will be the same and the only impact will be the period in which the deductions are recognized.

Q. WHAT ARE PERMANENT DIFFERENCES AND HOW DO THEY DIFFER FROM TEMPORARY DIFFERENCES?

A. As described in my testimony, a temporary difference results only in a change in the period in which an item of income or expense is recognized for book and tax. A permanent difference is an item of income or expense that will never be recognized for either book income or for taxable income. These differences arise due to the different rules that pertain to book accounting and the tax law. Because it is an item that will never be recognized for one or the other, it results in a difference that will not reverse over time as in the case of a temporary difference.

An example of a permanent difference is meals and entertainment expenses. For book purposes, these expenses are generally recognized and reduce the overall net income of the company. However, for tax purposes entertainment expenses are not allowed as a deduction from income and generally only 50% of the cost of meals allowed as a deduction from income. The difference between the book deduction and the tax deduction for these expenses is one that will never reverse even over the course of time. Therefore, tax expense must be increased by the tax on the non-deductible amount of these expenses.

Q. EARLIER YOU MENTIONED THAT TEMPORARY BOOK/TAX DIFFERENCES ARE RECORDED ON THE BALANCE SHEET AS AN ADFIT LIABILITY OR ASSET. WILL YOU PLEASE PROVIDE AN EXAMPLE OF HOW ADFIT BALANCE ACCRUES?

A. Yes. Imagine a utility had a taxable income of $1,000 and a federal income tax rate of 21%. Absent any other factors, the utility would collect $210 from its customers as federal income tax expense, and it would pay the Internal Revenue Service $210 in federal income taxes.

Now suppose the same set of facts, except that the utility has used accelerated depreciation to offset all of its $1,000 income. Because of normalization rules, the utility still collects $210 from its customers, but because of the temporary timing difference, the utility will not have to pay that $210 to the IRS until some later date when the utility has taxable income. In effect, the utility is given a $210 interest-free loan from the federal government, but the utility must record that interest-free loan as ADFIT.

Q. HOW DOES THE ADFIT BALANCE AFFECT A UTILITY'S RATES?

A. Until the ADFIT balance is paid back to the Internal Revenue Service, it is used as a dollar-for-dollar reduction of rate base.

Q. PLEASE EXPLAIN WHAT NORMALIZATION TAX ACCOUNTING MEANS IN THE CONTEXT OF A PUBLIC UTILITY COMPANY.

A. For a public utility company, normalization is a method of accounting in which the tax benefits of accelerated depreciation on public utility assets are shared with customers ratably over the regulatory useful life of the assets in the form of reduced rates.

Q. CAN YOU EXPLAIN FLOW-THROUGH TAX ACCOUNTING AND HOW THAT DIFFERS FROM NORMALIZED TAX ACCOUNTING?

A. The flow-through method of tax accounting looks only at the amount of taxes that are payable or refundable for the current tax year and does not recognize the future benefit or detriment of temporary differences in income recorded for book purposes and income determined for tax purposes. This method treats any temporary difference as a permanent increase or decrease in the income taxes for the period depending on the direction of the temporary difference. This method results in benefits and detriments being allocated among customers in different periods depending on when a temporary difference originates and reverses. For example, a timing difference that results in a deduction in Year 1 would be enjoyed by the set of customers of the company in Year 1 as a reduction to the current year taxes payable. However, if this timing difference were to reverse in Year 2, the detriment of the increase to the current year taxes payable would be borne by the set of customers of the company in Year 2, which, of course, is not necessarily the same set of customers as in Year 1. As the flow-through method only recognizes the current tax payable or receivable and ignores the impact of future tax impacts from timing differences, there is no deferred tax expense and as a result no ADFIT that would be provided as a reduction to rate base.

V. NORMALIZATION OF NET OPERATING LOSSES AND ITC

Q. WHAT IS AN NOL?

A. A net operating loss or NOL occurs when, in a given year, a taxpayer has more deductions than taxable revenues. When an NOL occurs, the Internal Revenue Code (Code) allows the taxpayer to carry the NOL forward to subsequent years and offset otherwise taxable income produced in that future year.

Q. ARE THERE NORMALIZATION REQUIREMENTS INCLUDED WITHIN THE CODE?

A. Yes. The Code and accompanying treasury regulations provide normalization requirements and specifically in three areas: 1) Accelerated depreciation and the associated deferred tax liability that results from its use; 2) NOL Carryforwards (NOLC) as a result of accelerated depreciation; and 3) Investment Tax Credits (ITC).

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS IN THE CODE AS IT RELATES TO ACCELERATED DEPRECIATION?

A. The Code dictates that a regulated public utility must use the normalization method of accounting to calculate tax expense on temporary differences associated with accelerated depreciation when determining rates using a cost of service/rate of return methodology. 26 U.S. Code §168(i)(9)(A) states that in order for a public utility to be considered to be using a normalized method of accounting,

> (i) the taxpayer must, in computing its tax expense for purposes of establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, use a method of depreciation with respect to such property that is the same as, and a depreciation period for such property that is no shorter than, the method and period used to compute its depreciation expense for such purposes, and

> (ii) if the amount allowable as a deduction under this section with respect to such property (respecting all elections made by the taxpayer under this section) differs from the amount that would be allowable as a deduction under section 167 using the method (including the period, first and last year convention, and salvage value) used to compute regulated tax expense under clause (i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference[1].

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS AS THEY RELATE TO NOLC?

A. This is specifically addressed in Treasury Regulation § 1.167(*l*)-1(h)(1)(iii), which states:

> If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (l) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover (as determined under section 172) to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (l) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

Although neither the Code nor the regulations specifically address the manner in which the NOL should be treated in ratemaking under the normalization rules, the IRS has addressed this issue in several private letter rulings (PLRs). PLRs 201436037, 21438003, 201519021, 201534001, 201548017, 201709008, and 202010002 clarify that a tax calculation with and without accelerated depreciation is used to determine the amount of the NOLC ADFIT required to be normalized.[2] To the extent that accelerated

[1] 26 U.S.C. § 168(i)(9)(A).
[2] The PLRs are included as Exhibits DAH-1 – DAH-7 to my direct testimony.

depreciation creates an NOLC, the NOLC ADFIT must be a component of rate base. This can be reflected in rate base through ADFIT using either one of two methods to adhere to the normalization rules. In the first method, the deferred tax liability that is a result of accelerated depreciation would simply be reduced by the amount of the NOLC ADFIT. In the second method, the full, deferred tax liability is included as a rate base reduction and a separate deferred tax asset in the amount of the NOLC ADFIT is included as a rate base increase. The result of both is the same; the impact on rate base includes the net balance of the ADFIT for accelerated depreciation and the ADFIT for the NOLC. The PLRs uniformly conclude that excluding the NOLC ADFIT would constitute a normalization violation.

Q. WHAT IS THE RATIONALE FOR THIS TREATMENT OF THE NOLC ADFIT?

A. When a regulated utility experiences a NOLC, the taxpayer has not yet received the benefit of the depreciation-related ADFIT, i.e., there is no interest free loan from the federal government. Accordingly, the rate base reduction is deferred until the NOLC is utilized and the loan is extended.

Q. PLEASE DESCRIBE THE CONCLUSIONS IN THE PLRS MENTIONED ABOVE.

A. The PLRs mentioned above confirm that NOLC ADFIT must be included in rate base to avoid a normalization violation. They describe the NOLC as a necessary reduction to the rate base impact of the deferred tax liability associated with accelerated depreciation. Further, the PLRs prescribe either one of two approaches for determining the amount of the NOLC ADFIT that must be included in rate base: a “with-and-without” or “last dollar deducted” approach. Both of these approaches look at the hypothetical taxable income of the utility without the deductions for accelerated

depreciation. The extent to which an NOLC is then attributable to accelerated depreciation must be included in rate base to avoid a normalization violation. The PLRs all contain language very similar to the following:

> Because the [ADFIT] account [Account 282], the reserve account for deferred taxes, reduces rate base, it is clear that the portion of an NOLC that is attributable to accelerated depreciation must be taken into account in calculating the amount of the reserve for deferred taxes [(ADFIT)]…
>
> The "with or without" [or "last dollar deducted"] methodology employed by Taxpayer is specifically designed to ensure that the portion of the NOLC attributable to accelerated depreciation is correctly taken into account by maximizing the amount of the NOLC attributable to accelerated depreciation. This methodology provides certainty and prevents the possibility of "flow through" of the benefits of accelerated depreciation to ratepayers[3]

Q. IS THE INCLUSION OF AN NOLC IN RATE BASE ALSO A SOUND ACCOUNTING AND REGULATORY PRACTICE?

A. Yes. The normalization treatment of an NOLC assures that the customers of a utility receive the benefit of the deferred tax payment associated with accelerated depreciation no sooner than they would be able to do so based on the operations of the utility as an entity that files a separate return. This lines up the timing of customer benefits with the ability of the utility operations to provide those benefits.

Q. CAN YOU PLEASE DISCUSS THE NORMALIZATION REQUIREMENTS AS THEY RELATE TO ITC?

A. The normalization rules as they relate to ITC require that the benefit of ITC cannot be passed to customers any faster than ratably over the book depreciable life of the

[3] Bracketed entry added for clarity.

underlying assets that generated the ITC. As such, a utility is unable to provide the benefits of the ITC to customers either at the time in which the credit is generated or at the time in which the credit is utilized and reduces the tax liability of the utility. A utility may elect to pass the benefit of ITC to customers through one of two methods as directed by §46(f)(1) and §46(f)(2).

Under §46(f)(1), a utility passes the benefit of the ITC through a reduction to rate base, provided that the reduction is restored not less rapidly than ratably. No adjustment may be made to cost of service on account of the ITC. Under §46(f)(2), a utility shares the benefit of the ITC with customers by amortizing the benefit in the cost of service no more rapidly than ratably over the book life of the property generating the credit. No reduction to rate base is permissible under this method.

Q. ARE THERE REPERCUSSIONS TO NOT FOLLOWING THE NORMALIZATION REQUIREMENTS FOR ACCELERATED DEPRECIATION?

A. Yes. A depreciation-related normalization violation results in the utility no longer being allowed to use accelerated depreciation on all property used to provide regulated service to the jurisdiction in which the violation occurred.[4] In addition, the taxes that have been deferred as a result of the prior accelerated depreciation must be paid to the federal government more quickly than they would be in the absence of the violation.

Q. WHAT IMPACT WOULD A NORMALIZATION VIOLATION HAVE ON CUSTOMERS?

[4] 26 U.S.C. § 168(f)(2).

A. A normalization violation would result in higher utility rates for customers. As noted above, a normalization violation would prevent the utility from claiming deductions for accelerated depreciation and would result in the company paying the IRS more rapidly for the previously deferred taxes. This would result in a lower ADFIT balance which would cause the rate base for the company to increase. As customers pay a return on rate base, any increase in rate base would directly result in higher rates. This lower ADFIT would represent the reduction to a cost-free source of capital for the company.

Q. WHAT IS THE PENALTY FOR AN ITC NORMALIZATION VIOLATION?

A. In the case of an ITC normalization violation, a utility would have to refund to the IRS the balance of the unamortized ITC at the time the violation occurred. This would eliminate the future benefit to customers of any reduction to rates through either a cost of service or rate base reduction.

VI. SEPARATE RETURN ACCOUNTING

Q. WHAT IS MEANT BY A "SEPARATE RETURN" APPROACH TO CALCULATING FEDERAL INCOME TAXES?

A. The "separate return" methodology calculates income taxes on utility revenues and expenses that are included in the utility's revenue requirement. This approach appropriately allocates income taxes between customers and shareholders using a benefits/burdens criteria. Under this methodology, income tax expense relates to, and results from, the provision of utility service to customers. Additionally, the "separate return" income tax calculation includes an adjustment to synchronize interest. Synchronized interest represents the portion of return that is deductible for tax purposes, and it is calculated by multiplying the weighted cost of debt by rate base. Use of synchronized interest in the tax calculation effectively "synchronizes" the calculation of income tax expense with rate base and rate of return. It calculates income taxes consistent with the assumptions used to calculate rate base and the rate of return. Synchronized interest may be more or less than the actual interest deducted on the tax return.

Q. DO THE TAXES REQUESTED IN THIS CASE REPRESENT A SEPARATE RETURN APPROACH?

A. Yes, the tax expense and ADFIT included in this case represents the tax associated only with the income and expense of the Company in providing utility service to customers. It does not include any benefits or detriments that may arise from being included in a consolidated tax return.

Q. WHY IS THE "SEPARATE RETURN" APPROACH THE PROPER METHODOLOGY TO USE IN CALCULATING FEDERAL INCOME TAXES FOR RATEMAKING PURPOSES?

A. The "separate return" approach includes in the cost of service only income taxes that result from the provision of utility service to customers and is consistent with the precedent set by filings before the Louisiana Public Service Commission. Federal income taxes requested by the Company are based on revenues and expenses included in the cost of service calculation. There are no additions to or reductions from tax expense resulting from revenues or expenses not included in the Company's request. It is neither appropriate nor equitable to increase or reduce cost of service by tax costs or benefits that are not related to the rendition of utility service to customers. The use of a separate return approach prevents the cross-subsidization of costs or benefits among affiliate companies. Normalization requires consistency among tax expense, book depreciation expense, rate base, and the deferred tax reserve. [5]

[5] 26 U.S.C. § 168(i)(9)(B).

VII. TAX CUTS AND JOBS ACT OF 2017

Q. PLEASE DISCUSS THE PRIMARY RATEMAKING IMPACT OF THE TAX CUTS AND JOBS ACT OF 2017 (TCJA).

A. While there were numerous changes in tax law because of the TCJA, the primary impact on ratemaking is the reduction of the corporate income tax rate from 35 percent to 21 percent beginning with the 2018 tax year, which led to the creation of a new balance of excess ADFIT for the Company.

Q. WHAT IS EXCESS ADFIT?

A. Excess ADFIT arises as a result of a change in the federal income tax rate. ADFIT represents the future taxes that will be paid upon the reversal of timing differences. When the tax rate changes, the amount of that future tax liability also changes. A company must then revalue the amount of its ADFIT to correctly reflect the amount of future taxes that will be paid on those timing differences. The difference between the revalued amount and the amount as accrued at the previous rate is known as excess ADFIT. Upon remeasurement of ADFIT following the passage of the TCJA, the Company, as a regulated utility following Financial ASC 980, deferred this difference on its books as a regulatory liability. There are two types of excess ADFIT, protected and unprotected.

Q. WHAT ARE PROTECTED AND UNPROTECTED EXCESS ADFIT?

A. There are two components of excess ADFIT – “normalized” or “protected” excess ADFIT and “non-normalized” or “unprotected” excess ADFIT. Protected excess ADFIT is related only to temporary differences that arise due to differences in the

method and life used in calculating depreciation for tax purposes and for book purposes. Given the nature of the temporary differences that give rise to this excess ADFIT it is considered to be "protected" by the normalization requirements within the Code. Excess ADFIT associated with all other timing differences is unprotected. These two components are treated differently under the Code. Specifically, the Tax Cuts and Jobs Act (TCJA) requires that protected excess ADFIT be amortized over "the remaining lives of the property as used in its regulated books of account which gave rise to the reserve for deferred taxes." See TCJA Subtitle C, Part I, Sec. 13001(d)(3)(B). For SWEPCO, this amortization period is based on the Average Rate Assumption Method or "ARAM."[6] Neither the Code nor the TCJA establish restrictions on the manner or time for sharing unprotected excess ADFIT.

Q. PLEASE DESCRIBE THE ARAM.

A. The ARAM reduces the excess tax reserve over the remaining regulatory lives of the property that gave rise to the reserve for deferred taxes during the years in which the deferred tax reserve related to such property is reversing. That is, when the tax depreciation for a given asset becomes less than the book depreciation, the excess tax reserve is reduced by the difference between the taxes required under the old 35 percent rate (and other rates prior to 1993) and the taxes required under the new 21 percent rate. The excess reserve is not reduced until, and then only to the degree, that tax benefits for a given asset expire. The ARAM provides that the utility will not have to refund excess taxes to ratepayers any faster than it would have had to pay those taxes to the

[6] Internal Revenue Service, Rev. Proc. 2020-39 (August 14, 2020).

federal government had the tax rates not been reduced. Under the ARAM, a utility will not have to change its cash management plan, because the excess tax reserve will be refunded to customers at the same pace it would have been paid to the federal government absent the tax rate reduction.

Q. ARE THERE CONSEQUENCES IF THE COMPANY AMORTIZES THE PROTECTED EXCESS ADFIT MORE QUICKLY THAN ARAM PROVIDES?

A. Yes. TCJA section 13001(d)(4) provides that if an excess reserve is reduced more rapidly or to a greater extent than the reserve would be reduced under the ARAM: 1) the Company's tax for the taxable year will be increased by the amount by which it reduces its excess tax reserves more rapidly than permitted under a normalization method of accounting; and 2) the Company will not be treated as using a normalization method of accounting for purposes of section 168(f)(2) and (i)(9)(C) of the Code. In other words, the Company would have violated the normalization rules. The consequence for a normalization violation is discussed earlier in my testimony.

Q. HAS THE COMPANY PRESENTED IN THIS FILING AN UNPROTECTED EXCESS ADFIT AMORTIZATION IN THE COST OF SERVICE?

A. No. A proforma adjustment was made to the test year amortization of unprotected excess ADFIT to reflect that the balance of unprotected excess ADFIT as presented in the Company's 2017 Formula Rate Plan (FRP) will be fully amortized at the time the rates from this proceeding go into effect.

Q. DID THE 2017 FRP INCLUDE THE ENTIRETY OF UNPROTECTED EXCESS ADFIT CREATED BY THE TAX RATE CHANGE IN THE TCJA?

A. The 2017 FRP included the initial balance of unprotected excess ADFIT as a result of the TCJA. After the calculation of that balance, the Company filed its 2017 federal tax return and recorded true-ups to the balance related to that return. In addition, the Company filed amended returns for tax years prior to 2017 which resulted in further true-ups to the balance of unprotected ADFIT. The result of these items is an additional $16,483,926 of unprotected excess ADFIT on a total company, non-jurisdictional basis. This additional total company unprotected balance of excess ADFIT results in an allocation to Louisiana customers of $6,198,918. This is calculated by multiplying the total balance by the Louisiana allocation factor of 37.61% as provided on Schedule B, Line 12.

Q. HAS THE COMPANY PRESENTED IN THIS FILING A PROTECTED EXCESS ADFIT AMORTIZATION THAT SHOULD BE PASSED BACK TO CUSTOMERS?

A. Yes. The deferred tax expense included in the cost of service includes an amortization of protected excess ADFIT based on the ARAM for the test year.

Q. PLEASE EXPLAIN THE TEST YEAR AMORTIZATION ADJUSTMENT AS SEEN ON WORKPAPER D-2-13-3.

A. The $4,626,515 adjustment to the test year amortization of protected excess ADFIT is a ratemaking adjustment to reflect the impact on the amortization from the excess ADFIT associated with the Company's NOLC as presented on Schedule B-9. This represents the amortization of the initial excess ADFIT balance of $194,453,551 as a result of the tax rate change from TCJA. The excess ADFIT associated with the NOLC is being amortized using the ARAM based on the assets giving rise to the taxable losses.

Q. HAS THE COMPANY RECORDED AMORTIZATION OF PROTECTED EXCESS ADFIT SINCE THE ENACTMENT OF TCJA?

A. Yes. Under the ARAM, the protected amortization of excess ADFIT began January 1, 2018 – immediately after the effect of the federal rate change due to TCJA.

Q. DOES THE LEVEL OF PROTECTED EXCESS ADFIT AMORTIZATION INCLUDED IN THE 2017 FRP INCLUDE ANY IMPACT OF THE EXCESS ADFIT ON THE NOLC?

A. No. The level of protected excess ADFIT amortization in the 2017 FRP does not include the amortization of any excess ADFIT associated with the NOLC. As a result, the 2017 FRP is refunding an amount higher than it should when the excess ADFIT on the NOLC is taken into account.

Q. HAS THE COMPANY INCLUDED AN EXCESS ADFIT BALANCE RELATED TO A NOLC IN RATE BASE?

A. Yes. The NOLC in Workpaper B-9 reflects both the ADFIT at 21 percent and the excess ADFIT associated with the NOLC. The proforma adjustment consists of $486,133,877 for the NOLC value at 35 percent at 12/31/2017 as well as a reduction of the balance at 21 percent as a result of utilization of the NOLC in the amount of ($28,862,842).

The Company has included an amortization of the excess ADFIT balance related to NOLC as a component of the protected excess ADFIT as presented in regulatory liability account 2544001 on Schedule B-12. Because the "with-and-without" test described earlier in my testimony determined that the NOLC was a result of accelerated depreciation and therefore subject to the normalization rules, it follows

that the excess ADFIT associated with the NOLC is also subject to the normalization rules and categorized as protected. The NOL excess ADFIT is therefore simply an offset, or reduction, to the excess ADFIT associated with accelerated depreciation.

Q. PLEASE EXPLAIN THE ($2,231,271) ADJUSTMENT TO excess ADFIT IN RATE BASE AS SHOWN ON SCHEDULE B-12 – DEFERRED CREDITS.

A. There are two components to this adjustment. The first is related to the walk-forward of plant ADFIT to reflect a projected balance at December 31, 2020. An adjustment of ($6,857,786) is related to the decrease in the regulatory liability account as a result of the amortization that occurred on the books during the course of 2020.

The second component of the overall adjustment is a ratemaking adjustment to reflect the impact on the excess ADFIT associated with the amortization of the Company's NOLC as discussed above. This adjustment of $4,626,515 is the amortization during the test period as described above in my testimony. As the deficient DFIT is amortized there is a resulting decrease in the overall ADFIT credit balance.

VIII. PROFORMA ADJUSTMENTS

Q. WHAT PRO FORMA ADJUSTMENTS HAVE BEEN MADE TO THE COMPANY'S HISTORICAL TEST YEAR CALCULATION OF FEDERAL INCOME TAXES?

A. Four kinds of pro forma adjustments have been included in the calculation of federal income tax expense: 1) adjustments to include the tax effects of other adjustments to cost of service; 2) adjustments to remove any income tax expense recorded in the historical test year that was related to periods outside the test year; 3) an adjustment to synchronize the deduction of interest for federal income tax purposes; and 4) adjustments to deferred tax expense to reflect a pro forma level of amortization of excess ADFIT. The adjustments to protected excess ADFIT are set out on Highly Sensitive Exhibit DAH-8.

Q. WHAT PRO FORMA ADJUSTMENTS HAVE BEEN MADE TO ADFIT, AS RECORDED, TO ARRIVE AT THE BALANCES SHOWN ON THE HISTORICAL TEST YEAR SCHEDULES?

A. Pro forma adjustments made to the ADFIT balance as of December 31, 2019 include the following: 1) adjustments to ADFIT related to pro forma adjustments to other rate base items; 2) adjustments made for ratemaking purposes, such as removing ADFIT that does not relate to the Louisiana jurisdiction and reducing ADFIT by the NOLC balance; and 3) adjustments made to ADFIT related to balances that are not related to electric service.

Q. CAN YOU DISCUSS THE PRO FORMA ADJUSTMENT TO RATE BASE FOR THE NOL?

A. The pro forma adjustment of $457,271,035 is being made to reduce the ADFIT balance for an NOL calculated on a separate return basis. This adjustment represents the amount of ADFIT associated with accelerated tax depreciation that has not been able to produce cash benefits to the company on the basis of a separate tax return method as of the end of the historical test year. This adjustment reflects the ADFIT associated with the taxable losses the Company has generated in excess of the taxable income it has generated and been able to offset based on the NOLC and carryback provisions of the Code.

Q. WAS A "WITH-AND-WITHOUT" OR "LAST DOLLAR DEDUCTED" ANALYSIS DONE TO DETERMINE THE AMOUNT OF NOL SUBJECT TO THE REQUIREMENTS OF NORMALIZATION?

A. Yes. A "with-and-without" calculation was performed to determine the amount of the NOL required to reduce the ADFIT balance. This calculation determined that all of the $457,271,035 NOLC is a result of accelerated tax depreciation and therefore subject to the normalization rules as described previously in my testimony.

Q. WHY IS IT APPROPRIATE TO INCLUDE THIS NOLC IN RATE BASE?

A. It is appropriate to include the NOLC as a decrease to the ADFIT balance because it represents the level of cost free capital to which the Company had access based on its utility operations on a separate return basis. It is also appropriate due to the normalization rules discussed earlier in my testimony. The cash benefits from deductions taken for accelerated depreciation should not be passed to customers any

sooner than cash benefits would be received by the Company if filing a separate return. The inclusion of the NOL offsets the rate base reduction associated with deferred tax liabilities for accelerated depreciation for which the Company would not yet receive a cash benefit for on a separate return basis.

IX. CONCLUSION

Q. PLEASE SUMMARIZE YOUR CONCLUSIONS.

A. The income tax workpapers that are part of this filing were completed consistent with the accounting methods established as precedent in previous filings. The ADFIT and income tax expense are fair and accurate based on the underlying rate base and recoverable expenses included in the cost of service and presented on a separate return basis. Tax expense and ADFIT comply with IRS normalization requirements, including those related to accelerated tax depreciation, NOLCs, and ITC. Adjustments made to tax expense, cost of service, and to rate base are both appropriate and fair. Accordingly, the Company's request to include the amount of income tax expense that is included in the cost of service should be granted.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes, it does.

V. CONCLUSION 13

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.

My name is David A. Hodgson. I am the Director Tax Accounting & Regulatory for American Electric Power Service Corporation (AEPSC), a wholly owned subsidiary of American Electric Power Company, Inc. (AEP). My business address is American Electric Power, 1 Riverside Plaza, Columbus, Ohio 43215.

Q. ARE YOU THE SAME DAVID A HODGSON WHO FILED DIRECT TESTIMONY IN THIS CASE?

A. Yes, I am.

II. PURPOSE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

A. The purpose of my rebuttal testimony is to address certain positions taken by Mr. Lane Kollen on behalf of the Louisiana Public Service Commission Staff (Staff). I address Staff's recommendations regarding Southwestern Electric Power Company's (SWEPCO or Company) separate return net operating loss (NOL) carryforward.

III. NET OPERATING LOSS ACCUMULATED DEFERRED INCOME TAX

Q. STAFF'S DIRECT TESTIMONY NOTES THAT THE ACCOUNTING BOOKS OF THE COMPANY DO NOT CONTAIN A BALANCE FOR A NOL CARRYFORWARD. CAN YOU DISCUSS?

A. Yes. The books and records of the Company match the financial reports provided to the Federal Energy Regulatory Commission (FERC). FERC requires the "parent

company down" approach for financial reporting purposes.[1] In the parent company down method, the allocation of taxes is calculated by applying a pro-rata allocation of a member's attribute (i.e., taxable income, pre-tax book earnings, etc.) to that of the return group's attribute. While FERC requires this parent down approach for financial reporting purposes, it established as precedent a stand-alone method for the income tax allowance within the cost of service in Opinion No. 173.[2] On the topic of tax allocation agreements, the FERC opinion states the following:

> The important thing about these alternative methods of allocating the consolidated tax liability is that they are elective. A group can choose any one of them. Hence to treat the amounts allocated to members for tax purposes as the member's actual tax costs for ratemaking purposes would mean the tax allowance of a regulated member of an affiliated group would be determined by the election of the group. Thus, the rates charged to ratepayers of different companies could vary considerably because of the way the members of the groups have chosen to adjust their earnings and profits. As a policy matter, we think that is unacceptable.

As you can see, FERC requires one method for financial reporting that includes the impact of a consolidated income tax return but requires a different method for ratemaking, which ignores the consolidated return. This is no different from what SWEPCO is proposing in this case.

Generally Accepted Accounting Principles (GAAP) allow for different methods to determine income taxes in the separate financial statements of the members of a consolidated tax return group. Accounting Standards Codification (ASC) 740-10-30-

[1] FERC Guidance AI93-5-000

[2] Columbia Gulf Transmission Company; Docket No. RP75-105-002

27 does not require the use of any particular allocation method and only requires that the method adopted be systematic, rational, and consistent with the broad principles of ASC 740. The members of the AEP consolidated federal income tax return (consolidated return group) have elected to participate in a tax allocation agreement that follows a parent company down method. Again, in the parent company down method, the allocation of taxes is calculated by applying a pro-rata allocation of a member's attribute to that of the return group's attribute.

SWEPCO does not have an NOLC recorded on its books and records at the end of the test year because the consolidated return group (i.e. SWEPCO's sister companies) has produced taxable income sufficient to offset the tax losses contributed by SWEPCO. The GAAP financial statements of SWEPCO reflect its proportionate share of the consolidated return group's NOLC and not the NOLC generated strictly based on SWEPCO's taxable income.

Q. STAFF NOTES IN DIRECT TESTIMONY THAT SWEPCO RECEIVED PAYMENT FOR ITS NOL CARRYFOWARD. CAN YOU DISCUSS?

A. Yes. Through the tax sharing agreement, those companies with taxable income make tax payments to AEP, Inc. (Parent) equal to their separate return liability. To the extent that the income from these companies can be offset by losses generated by other affiliates, Parent makes a distribution to the loss companies (e.g. SWEPCO). These distributions to companies with losses is entirely dependent upon having affiliate companies with taxable income. The receipt of a distribution through the tax sharing agreement is entirely outside of the scope of the regulated operations of the Company

and is not based on the rendition of utility services to its customers. In fact, it relies upon taxable income generated through the rendition of services by affiliate companies.

Q. DOES THE INTERNAL REVENUE SERVICE (IRS) ISSUE REFUNDS OR PAYMENTS TO COMPANIES THAT INCUR A TAXABLE LOSS?

A. No. A taxpayer is only able to seek a refund to the extent that is has overpaid its income tax liability. A taxable loss does not result in a negative tax liability or negative current tax expense in the current year; therefore, the IRS would not issue a refund. A taxpayer that incurs a loss may however carry that loss forward to offset future taxable income. This loss carryforward results in the NOL carryforward deferred tax asset in question in this case.

Q. IF SWEPCO WERE NOT PART OF THE CONSOLIDATED RETURN GROUP, WOULD IT HAVE RECEIVED PAYMENTS FOR ITS NOLC?

A. No, it would not have. The only reason that SWEPCO was able to receive payments for its NOL carryforward is due to its membership in the consolidated return group. Moreover, it also would not have received payments if affiliates within the consolidated return group had not produced taxable income. The payments are entirely dependent upon affiliate companies having taxable income.

Q. STAFF'S DIRECT TESTIMONY STATES THAT THE COMPANY HAS CLAIMED, "ITS OWN ACCOUNTING AND RATEMAKING IN PRIOR YEARS HAS BEEN IN ERROR." IS THIS TRUE?

A. No, it is not. At no time has the Company made any statement that the financial records of SWEPCO are in any way incorrect or inappropriate. The financial statements of SWEPCO followed the correct accounting methods under ASC 740 as discussed above.

However, the Company believes that its past treatment of the NOL carryforward for ratemaking purposes was not consistent with the normalization rules and has made that statement.[3] An important aspect of the normalization rules is the consistency requirement. The normalization rules require there to be consistency with the assumptions used in the revenue requirement for depreciation expense, tax expense, rate base, and the reserve for deferred taxes (or accumulated deferred income taxes [ADFIT]).[4] The rate base included in SWEPCO's revenue requirement consists of assets that are used in providing electric utility service to its customers. It does not include the assets of affiliate companies that have taxable income. Likewise, the depreciation expense consists of the depreciation of the assets in rate base providing electric utility service to customers. Tax expense in the cost of service is calculated based on the revenues and expense that are included in SWEPCO's revenue requirement. Those three elements are all based on SWEPCO without regard to its affiliates. It is therefore inconsistent to allow the ADFIT included in the SWEPCO revenue requirement to be influenced by the taxable income of affiliates. By allowing the tax allocation payment to be a reduction to the NOLC at SWEPCO, it introduces the revenues and expenses generated by the rate base of affiliated utility companies into the rates of SWEPCO.

[3] Response to LPSC Staff's 2nd Set, Question 2-56 b.

[4] 26 U.S.C. § 168(i)(9)(B).

Q. STAFF'S DIRECT TESTIMONY STATES THAT THE NOL CARRYFORWARD SHOULD NOT BE INCLUDED IN RATE BASE BECAUSE IT CLAIMS THAT THE COMPANY DID NOT FINANCE THIS ADFIT. CAN YOU DISCUSS?

A. Yes. The NOL carryforward is part of the overall ADFIT balance of the company and can be directly linked to the book/tax timing differences related to SWEPCO's accelerated tax depreciation. ADFIT represents money that has been collected from customers for deferred tax expense that has not yet been remitted to the IRS because of book/tax timing differences. The inclusion of ADFIT in rate base represents funds supplied from customers that the utility would have available to invest in rate base. The NOL carryforward ADFIT is just a component of the overall deferred taxes.

A NOL carryforward reduces ADFIT because it reflects the amount of ADFIT that has not been used yet to reduce current taxes. Because a company cannot request a refund from the IRS for a loss in a given year (unless it has taxable income in other years that can be offset), its current tax expense can be no less than zero. Therefore, a loss creates a deferred tax benefit (negative deferred tax expense). This deferred tax benefit is netted with the deferred tax expense of other book/tax timing differences and is equal to the actual amount of money collected from customers related to a utility's deferred tax expense.

Including the NOL carryforward as a component of the net ADFIT reduction to rate base ensures that the actual amount of money collected from customers is equal to the reduction to rate base.

Q. CAN YOU PROVIDE A SIMPLE EXAMPLE OF THE CONNECTION BETWEEN THE DEFERRED TAX EXPENSE INCLUDED IN THE TOTAL TAX EXPENSE AND ADFIT?

A. Yes. Below is a simple example of a company that has accelerated tax depreciation deductions greater than its pre-tax book income, resulting in a NOL. In the example, $2,100 is included in the cost of service for tax expense. The $14,000 deduction for accelerated depreciation results in a deferred tax liability of ($2,940). The company in this example has generated a NOL of $4,000, which results in a deferred tax asset of $840. As you can see in the example, when the deferred tax liability is netted with the NOL deferred tax asset, the result is a rate base reduction of ($2,100). This rate base reduction is equal to the tax expense customers have paid for in the cost of service. If, however, the NOL deferred tax asset is not included as a component of rate base then rate base is reduced by ($2,940), an amount greater than the tax expense included in the cost of service. That difference between tax expense and rate base exemplifies the need for the NOL carryforward to be included as a component of rate base in order to comply with the consistency requirement of the normalization rules.

Income Tax Expense - Per Income Statement				
Pre-Tax Net Income	10,000			
Statutory Tax Rate	21%			
Total Tax Expense	2,100	*(Tax Expense collected in customer rates)*		

	Taxable Income		Tax Rate	**(DTL) / DTA**	
Pre-Tax Net Income	10,000				
Accelerated Tax Depreciation Reducing Income to Zero	(14,000)	x	21%	(2,940)	
				(2,940)	*ADIT Rate Base Reduction w/o NOL*
Taxable Income (Loss)	(4,000)				
Net Tax Loss Carry Forward	4,000	x	21%	840	
				(2,100)	*ADIT Rate Base Reduction with NOL*

Q. STAFF'S DIRECT TESTIMONY ASSERTS THAT THE COMPANY WOULD RECOVER THE RETURN ON THE NOL CARRYFORWARD ADFIT TWICE IF IT IS INCLUDED IN RATE BASE. IS THAT A CORRECT ASSERTION?

A. No, it is not. Including the NOL carryforward ADFIT in rate base simply matches the ADFIT reduction to rate base with the deferred tax expense included in rates. Over time, as SWEPCO generates positive taxable income, the Company will be able to offset its current tax expense with the NOL carryforward and reduce the NOL carryforward ADFIT. Including the NOL carryforward ADFIT in rate base simply reflects the fact that SWEPCO has not yet received a benefit from the IRS for its taxable losses.

Q. DO YOU AGREE WITH STAFF'S POSITION THAT THE NOL CARRYFORWARD ADFIT SHOULD NOT BE INCLUDED IN THE FORMULA RATE PLAN (FRP) REVENUE REQUIREMENT?

A. No, I do not. The NOL carryforward ADFIT should be included in the FRP revenue requirement for all of the same reasons I have discussed that support why it should be included in the base revenue requirement. That is, it would not adhere to the consistency requirements of normalization, it would provide a cross-subsidy of rates from SWEPCO's affiliates with taxable income, and it would not match the rate base reduction for ADFIT with the deferred tax expense in rates.

In addition, by including the NOL carryforward ADFIT in the FRP, it would allow for updates to the balance as SWEPCO generates taxable income. As the Company produces positive taxable income in future years, the NOL carryforward

ADFIT balance would be reduced. This reduced balance would then be reflected in the FRP revenue requirement as a benefit to customers.

Q. STAFF'S DIRECT TESTIMONY DISMISSES THE COMPANY'S CONCERNS OF A POTENTIAL NORMALIZATION VIOLATION. CAN YOU DISCUSS?

A. Yes. Staff's direct testimony states that the Company's concern of an inconsistency with the normalization rules "is belied by the Company's own accounting, financial statements, and federal tax return filings."[5] Again, Staff's argument does not recognize the difference in book accounting and ratemaking. The accounting and financial statements of the Company reflect a consolidated tax return view of the NOL carryforward as it is impacted by having affiliates with taxable income. This consolidated view on the financial statements meets the criteria of being systematic, rational, and consistent with ASC 740 but is one of multiple acceptable methods of accounting for the financial statements. Ratemaking includes only the assets and expenses associated with company's operations of providing public utility services to customers. The taxes included in rates are based on the revenues and expenses included in the ratemaking process and are not influenced positively or negatively by affiliate companies.

As Staff points out in its direct testimony, SWEPCO has not notified the IRS of a normalization violation. The IRS has issued guidance on the topic of correcting normalization inconsistencies. First, in order to be considered a violation, a company or regulatory commission must knowingly put into rates a practice or procedure that is

[5] Direct Testimony of Lane Kollen at p. 33

inconsistent with the normalization rules. It is not suggested nor stated that either SWEPCO or the Commission were aware of the inconsistency with the normalization rules that came about from excluding the NOL carryforward when rates were put into place in prior proceedings. Second, the IRS allows taxpayers to change to a practice or procedure that is consistent with the normalization rules with its next available opportunity before it will assert that a normalization violation has occurred. The Company identified the normalization inconsistency in the preparation for this case and SWEPCO's other rate cases pending before the other jurisdictions that regulate SWEPCO. Because of the risk identification, the Company is now using its next available opportunity by seeking a correction of the inconsistency with the request for rates in this base case.

Q. STAFF NOTES THAT THE PRIVATE LETTER RULINGS (PLRs) IDENTIFIED IN YOUR DIRECT TESTIMONY DO NOT DISCUSS A TAX ALLOCATION AGREEMENT WITH A PARENT COMPANY. CAN YOU DISCUSS?

A. Yes. The PLRs included as exhibits to my direct testimony do not specifically address tax allocation payments but I would not necessarily expect them to. Because stand-alone treatment is the standard in a ratemaking setting, the discussion of intercompany tax allocations is not relevant to the discussion for normalization purposes. The fact that tax sharing agreements among a consolidated group are not uncommon and none of the rulings identified in my direct testimony discusses an intercompany payment suggests that none of the utilities who sought the PLRs attached any relevance to those tax sharing agreements for ratemaking purposes.

Q. CAN YOU PROVIDE AN EXAMPLE OF A PLR IN WHICH A TAXPAYER DISCUSSES A TAX SHARING PAYMENT IN THE CONTEXT OF A NOL CARRYFORWARD?

A. Yes. In PLR 201718015, the taxpayer identifies the occurrence of tax sharing payments in the facts laid out to the IRS in the ruling request. Within the facts of the case, it is specifically stated that the utility had a NOL carryforward on a stand-alone basis and that it also received an intercompany tax sharing payment from its parent related to the utility's NOL carryforward. In making its ruling and resolving the normalization question for the utility, the IRS attached no significance to the tax sharing payment. The fact that the IRS simply ignored the tax sharing payment in its analysis further supports SWEPCO's position that the NOL carryforward must be included in ratemaking on a stand-alone basis.

Q. WHAT ARE THE IMPLICATIONS OF A NORMALIZATION VIOLATION?

A. A depreciation related normalization violation results in the utility losing the ability to claim accelerated tax deprecation on all property used to provide regulated service to the jurisdiction in which the violation occurred.[6] This would substantially increase rates, as customers would no longer receive the large rate base reduction from the accelerated depreciation related ADFIT liabilities.

IV. EXCESS DEFERRED INCOME TAXES

Q. CAN YOU BRIEFLY DESCRIBE WHAT EXCESS DEFERRED INCOME TAXES ARE?

[6] 26 U.S.C. § 168(f)(2).

A. Yes. Excess ADFIT arises as the result of a reduction in the federal income tax rate. When the federal tax rate changes, a company must revalue its ADFIT to correctly reflect the amount of future taxes that will be paid on the underlying timing differences. The difference between the revalued amount and the amount accrued at the previous higher income tax rate is the excess ADFIT.

As was discussed earlier in my rebuttal testimony, ADFIT represents amounts that a utility has collected in rates for its deferred income tax expense over time. In the instance where the federal income tax rate decreases as occurred with the Tax Cuts and Jobs Act of 2017 (TCJA), the amount of future taxes that will be paid decreases. This means that the utility has collected more in deferred income tax expense than will be necessary to pay those future taxes. The amount of excess ADFIT is therefore directly tied to the amount of deferred tax expense that customers have paid to the utility in excess of that future liability.

Q. STAFF DISMISSES THE COMPANY'S PROPOSAL TO INCLUDE EXCESS ADFIT RELATED TO THE STAND-ALONE NOL CARRYFORWARD. CAN YOU DISCUSS?

A. Yes. Staff dismisses the excess ADFIT related to the NOL carryforward on the same basis of the dismissal of the NOL carryforward ADFIT. Again, Staff misses the difference between the accounting for the financial statement records and the proper accounting for ratemaking. The argument ignores the consistency requirements of the normalization rules. Staff's position also ignores the inherent connection between the deferred tax expense paid by customers and the excess deferred taxes returned to customers.

Q. CAN YOU DISCUSS THE CONNECTION BETWEEN THE DEFERRED TAX EXPENSE PAID BY CUSTOMERS AND EXCESS ADFIT?

A. Yes. In the example provided earlier in my rebuttal testimony, the utility collected $2,100 from customers for its total tax expense. Because the utility had a taxable loss resulting from accelerated tax depreciation, all $2,100 of the tax expense was deferred tax expense – i.e., there was zero current tax liability. Correspondingly, the rate base reduction for ADFIT was $2,100. If we were to take an extreme example of a federal income tax rate decrease in which the new rate becomes zero, the ADFIT balance would need to be remeasured to zero to reflect no future tax liability. The excess ADFIT returned to customers would be $2,100, the difference between the ADFIT at the old rate ($2,100) and the new rate ($0).

In the example, the utility has a deferred tax liability of $2,940 related to accelerated tax depreciation and a deferred tax asset of $840 related to the NOL carryforward. If the utility ignores the NOL carryforward as Staff suggests, the utility would be required to provide a refund to customers of $2,940 for the deferred tax liability. This would result in customers receiving a refund beyond the $2,100 the utility collected in rates for its deferred tax expense. Under Staff's recommendation, what this means is that the $840 SWEPCO received from affiliates would be refunded to SWEPCO's customers even though they did not pay it.

V. CONCLUSION

Q. PLEASE SUMMARIZE YOUR CONCLUSIONS.

A. SWEPCO's request for ADFIT in rate base to include a stand-alone NOL carryforward is consistent with the normalization rules and more specifically, the consistency requirement within those rules. SWEPCO's books and records are correctly stated and its proposed treatment of a NOL carryforward is not conflicting with those financial statements. The fact that SWEPCO received distributions through the consolidated tax return group's tax allocation agreement does not have any bearing on the Company's revenue requirement, as it does not relate in any way to its rendition of utility services by SWEPCO and instead relies on the favorable economic performance of affiliates. As discussed in my testimony related to PLR 201718015, the utility in that PLR received tax sharing payments from its parent, similar to what has occurred with SWEPCO, and the IRS attached no significance to those tax sharing payments. The Company's proposal for excess ADFIT for the stand-alone NOL carryforward is consistent with the normalization requirements. It also ensures that customers receive a refund that matches the deferred income tax expense in rates that was in excess of the future tax liability of the Company.

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes, it does.

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.

My name is David A. Hodgson. I am the Director Tax Accounting & Regulatory for American Electric Power Service Corporation (AEPSC), a wholly owned subsidiary of American Electric Power Company, Inc. (AEP). My business address is American Electric Power, 1 Riverside Plaza, Columbus, Ohio 43215.

Q. ARE YOU THE SAME DAVID A HODGSON WHO FILED DIRECT AND REBUTTAL TESTIMONY IN THIS CASE?

A. Yes, I am.

II. PURPOSE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR REJOINDER TESTIMONY?

A. The purpose of my rejoinder testimony is to address certain positions taken in the surrebuttal testimony of Mr. Lane Kollen on behalf of the Louisiana Public Service Commission Staff (Staff). Specifically, I address Staff's recommendations regarding Southwestern Electric Power Company's (SWEPCO or Company) separate return net operating loss (NOL) carryforward (NOLC).

Q. DOES THE FACT THAT YOU MAY NOT ADDRESS AN ISSUE OR POSITION ADVOCATED BY OTHER PARTIES INDICATE THAT YOU AGREE WITH THEIR POSITIONS?

A. No. The fact that an issue is not addressed by me does not mean I agree with any filed position.

III. STAND-ALONE TAXES FOR RATEMAKING

Q. TO PROVIDE CONTEXT FOR YOUR REJOINDER TESTIMONY, PLEASE SUMMARIZE WHAT THE TERM "STAND-ALONE" ACCOUNTING MEANS IN YOUR DISCUSSION OF THE COMPANY'S NOLC.

A. *For ratemaking purposes*, the calculation of SWEPCO's federal income tax expense, accumulated deferred federal income tax expense (ADFIT), accumulated deferred investment tax credits, and NOLC were all determined based on the revenues and operating expenses included in SWEPCO's cost of service and the assets in SWEPCO's rate base (i.e., on a stand-alone basis) using a normalized method of tax accounting. *For tax reporting purposes*, SWEPCO does not file a separate income tax return. Instead, SWEPCO's operations are separately stated with the schedules of the consolidated federal income tax return of the AEP consolidated group.

The use of the stand-alone approach is consistent with ratemaking principles and prevents cross-subsidization among the Company's affiliates. The stand-alone approach ensures that income taxes within the rate case filing represent only those taxes associated with the revenues and expenses of the regulated operating and assets of the Company, without regard to the Company's unregulated activities, other regulated companies, or the operations of the AEP consolidated group.

Q. IS SWEPCO'S USE OF DIFFERENT METHODOLOGIES FOR RATEMAKING PURPOSES AND FOR FINANCIAL REPORTING PURPOSES CONSISTENT WITH THE REQUIREMENTS OF GENERALLY ACCEPTED ACCOUNTING PRINCIPLES (GAAP) AND THE FEDERAL ENERGY REGULATORY COMMISSION (FERC)?

A. Yes. As I explained in my rebuttal testimony, FERC established as precedent a stand-alone method of tax accounting for the income tax allowed in a utility's cost of service. As FERC explained, under the stand-alone method, which FERC has followed since 1972, "a utility should be regulated on the basis of its being an independent entity; that is a utility should be considered as nearly as possible on its own merits and not on those of its affiliates."[1] "[A] stand-alone income tax allowance is one that takes into account the revenues and costs entering into the regulated cost of service without increase or decrease for tax gains or losses related to other activities."[2]

In contrast, for financial accounting and reporting, FERC requires that the consolidated tax expense be "allocated to individual members through recognition of the benefits/burdens contributed by each member of the consolidated group to the consolidated return.[3]" As a result, the results of the financial statements for FERC financial reporting purposes are influenced by the consolidated group. Similarly, GAAP allows for different methods to determine income taxes in the separate financial statements of the members of a consolidated tax return group. Accounting Standards Codification (ASC) 740-10-30-27 does not require the use of any particular allocation method and only requires that the method adopted be systematic, rational, and consistent with the broad principles of ASC 740.

Thus, while FERC requires a method of tax accounting for members of a consolidated return group in which their financial statements are influenced by the

[1] Re Columbia Gulf Transmission Co., 23 FERC P 61,396, at 61,852 (1983).

[3] FERC Accounting for Income Taxes Guidance AI93-5-000.

consolidated group, it is clear that FERC's approved method of ratemaking does not allow for a utility's rates to be influence by the consolidated group.

Q. PLEASE SUMMARIZE STAFF'S SURREBUTTAL TESTIMONY IN REGARDS TO FERC RATEMAKING.

A. First, Staff's surrebuttal testimony asserts that my rebuttal testimony claims that FERC provides discretion to utilities to determine their tax accounting for ratemaking purposes on either an allocated of standalone basis.[4] Staff has misinterpreted my testimony. As I explained above and in my rebuttal, FERC requires the use of the stand-alone approach for ratemaking purposes. Second, Staff's testimony states that the discussion of FERC ratemaking is irrelevant to SWEPCO. The rationale is that because the Company participates in a tax sharing agreement with AEP and its affiliates, SWEPCO has chosen to use an allocated approach and not a stand-alone approach.

Q. DO YOU AGREE WITH STAFF'S ASSERTION THAT DUE TO SWEPCO'S PARTICIPATION IN A TAX SHARING AGREEMENT, THE COMPANY HAS CHOSEN TO USE AN ALLOCATED APPROACH FOR ITS RATEMAKING AND THEREFORE THE DISCUSSION OF STAND-ALONE RATEMAKING IS IRRELEVANT?

A. No, I do not. Staff's assertion is based on the misinterpretation of my rebuttal testimony that I noted above. Staff incorrectly asserts that my rebuttal testimony claims that FERC provides discretion to utilities to determine the tax accounting for ratemaking.

[4] Kollen Surrebuttal at 20.

FERC provides no such discretion. As I described above, FERC has prescribed different methods of tax accounting for financial reporting and ratemaking purposes. In the discussion of FERC's prescribed methods, it is not stated or suggested that these methods can be interchanged at a utility's discretion. FERC requires the stand-alone method for ratemaking. In addition, as I discuss below, the use of a consolidated approach in ratemaking results in a normalization violation and poses significant risks to the Company's customers if not addressed correctly.

IV. NOLC ACCOUNTING PRESENTATION

Q. IN BOTH DIRECT AND SURREBUTTAL TESTIMONY STAFF NOTES THAT SWEPCO DOES NOT HAVE AN NOLC RECORDED ON ITS FINANCIAL BOOKS AND RECORDS AT THE END OF THE TEST YEAR. PLEASE RESPOND.

A. Again, Staff seems to be confusing what is required for financial reporting purposes and what is required for ratemaking purposes. What Staff notes is simply a presentation issue in what is used for financial reporting as opposed to ratemaking and is not a basis for excluding the NOLC for ratemaking purposes. As I described earlier in my rejoinder testimony, GAAP allows a utility to use one of several methods in determining income taxes in the separate financial statements of the members of a consolidated tax return group. ASC 740-10-30-27 (ASC 740) does not require the use of any particular allocation method and only requires that the method adopted be systematic, rational, and consistent with the broad principles of ASC 740. The members of the AEP consolidated federal income tax return (consolidated return group)

have elected the method of tax allocation that follows a "parent company down" method.

SWEPCO does not have an NOLC recorded on its financial books and records at the end of the test year because the consolidated return group has produced taxable income sufficient to offset the losses contributed by SWEPCO. In other words, the GAAP financial statements of SWEPCO reflect its proportionate share of the consolidated return group's NOLC. For ratemaking purposes, however it is necessary to reflect the NOLC generated strictly based on the Company's stand-alone taxable income.

The consolidated return group's method of accounting for allocating the taxes of a consolidated group is an *accounting policy election* and the methodology cannot be changed absent a policy change. SWEPCO has not made an election to change this accounting policy and follows the guidance provided by GAAP and ASC-740. For ratemaking purposes, which is a separate concept from GAAP accounting, and consistent with prior SWEPCO rate cases, SWEPCO calculates income tax expense on a stand-alone basis. Per the concept of stand-alone ratemaking and normalization rules, this requires the inclusion of the NOLC deferred tax asset in the Company's ADFIT balance.

Q. YOU MENTION ABOVE THAT ASC 740 DOES NOT REQUIRE THE USE OF ANY PARTICULAR ALLOCATION METHOD. ARE THERE OTHER WAYS IN WHICH A COMPANY CAN RECORD THE TAXES RELATED TO THE CONSOLIDATED RETURN GROUP WHILE STILL BEING PAID BY THE PARENT FOR ITS LOSSES?

A. Yes. One common alternative to the "parent company down" method is known as the "separate-return" method. One member of the consolidated filing group, typically a parent, will pay a separate or carve-out entity for temporary difference deferred tax assets (DTA) each period as they arise. In this case, the separate entity would recognize DTAs associated with the tax attributes (in this situation, an NOLC). This is premised on the fact that, under the separate-return method, income taxes are allocated to the separate financial statements in accordance with ASC 740 as if the separate reporting entity had filed a separate tax return. Thus, instead of reducing the NOLC, the utility would record this cash receipts from its parent just like it records other cash receipts, as equity.

Q. HOW DOES THE EXISTENCE OF ALTERNATIVE CONSOLIDATED ACCOUNTING METHODS RELATE TO THE CONCERN RAISED BY STAFF THAT THE COMPANY DID NOT RECORD AN NOLC ON ITS FINANCIAL BOOKS AND RECORDS?

A. Staff incorrectly asserts that the Company's financial reporting should govern the ratemaking treatment of the NOLC. As shown below in greater detail, alternative consolidated accounting approaches would result in a difference in how the NOLC is reported on SWEPCO's books for financial purposes. However, it is a long-standing principle that ratemaking should be calculated on a stand-alone basis in order to mitigate the potential issue of ratemaking outcomes differing depending on differences in financial reporting.

On the topic of tax allocation agreements, FERC recognized that the various methods allowed by the Internal Revenue Code (IRC) and regulations can be quite

different and that one method could produce the opposite result of another[5]. As FERC explained, these differences in financial allocations should not lead to disparate ratemaking results:

> There are, however, two reasons we cannot treat the allocation used for tax purposes as the pipelines' actual tax costs for cost of service purposes. First, the Code [IRC] and regulations require an allocation of the consolidated tax liability to determine each member's "earnings and profits." This, in turn, is necessary to determine whether a distribution is a taxable dividend or a tax-free return of capital.
>
> So the allocation is required to administer the revenue laws. It has no other effect. It does not determine what each member pays to the parent to help discharge the liability. Nor does the allocation attempt to ascertain the tax costs of a member for ratemaking, or any other, purpose. Hence, we think the allocation a consolidated group reports for tax purposes is simply too far removed from the issues before us to warrant its adoption as the allocation to be used for cost of service purposes.
>
> The important thing about these alternative methods of allocating the consolidated tax liability is that they are elective. A group can choose any one of them. Hence to treat the amounts allocated to members for tax purposes as the member's actual tax costs for ratemaking purposes would mean the tax allowance of a regulated member of an affiliated group would be determined by the election of the group. Thus, the rates charged to ratepayers of different companies could vary considerably because of the way the members of the groups have chosen to adjust their earnings and profits. As a policy matter, we think that is unacceptable.

Staff's approach of focusing solely on the method of allocating the consolidated tax liability would result in the variation in rates that FERC deemed "unacceptable."

[5] Columbia Gulf Transmission Company; Docket No. RP75-105-002.

Q. PLEASE EXPLAIN HOW STAFF'S APPROACH (I.E., BASING *RATEMAKING* RESULTS SOLELY ON THE *FINANCIAL* BOOKS) WOULD RESULT IN DIFFERENT RATES CHARGED TO CUSTOMERS DEPENDING ON THE METHOD CHOSEN.

A. Let's compare the following three hypothetical examples:

Example 1: Utility A is a stand-alone entity operating on its own and files its own tax return. Utility A has taxable losses of ($1,000) and assuming that this loss is not due to tax specific deductions, this would result in a deferred tax benefit of ($210). The following illustrates the accounting for the taxes of Utility A:

Stand-Alone Tax Computation

Utility A	Debit	Credit	
Deferred Tax Expense		210	Record Deferred Tax Benefit
Deferred Tax Asset - NOLC	210		Record DTA

In this example, the tax entries of $210 deferred tax benefit would be included as a reduction to rates in Utility A's cost of service. The $210 DTA related to the NOLC would be included as a decrease to ADFIT as included in rate base. In this example, ratemaking would match the financial reporting.

Example 2: In the following example, assume that Utility A now participates in a consolidated return filing and all other affiliates have income and the consolidated group is in an income position. This affiliate group has elected to utilize the Parent Company Down method for recording their allocation of the tax liability. In addition, Utility A has agreed to participate in a tax sharing agreement which dictates that cash will be paid to loss affiliates in the amount that offsets the consolidated group's tax

liability. This cash will be paid by income affiliates for their stand-alone tax liability. The following illustrates the accounting for taxes of Utility A:

Consolidated Income Tax Utilizing Parent Company Down

Utility A	Debit	Credit	
Deferred Tax Expense		210	Record Deferred Tax Benefit
Deferred Tax Asset - NOLC	210		Record DTA
Deferred Tax Asset - NOLC		210	Reduce DTA for losses utilized in consolidation
Cash	210		Receipt of Cash for Losses from affiliates

This demonstrates that Utility A continues to have $210 deferred tax benefit included as a reduction to rates in its cost of service. However, the allocation methodology dictates that the NOLC included on their financial books and records reflect the attributes of the consolidated return and therefore the DTA NOLC is reduced to $0 and not included as a decrease to ADFIT as included in rate base. This is the methodology in which SWEPCO has elected to use to allocate taxes from the consolidated return group and participates in a tax sharing agreement whereby SWEPCO is paid for its losses and also, when in an income position, pays its own stand-alone liability which then AEP distributes to other affiliates for their losses.

Example 3: In this final example, assume that Utility A is still part of a consolidated return filing, but the affiliate group has elected to use the Separate Return method for recording their allocation of the tax liability. In addition, Utility A has agreed to participate in a tax sharing agreement which dictates that cash will be paid to loss affiliates in the amount that offsets the consolidated group's tax liability. This cash will be paid by income affiliates for their stand-alone tax liability. The following illustrates the accounting for taxes of Utility A:

Consolidated Income Tax Utilizing Separate Return Method

Utility A	Debit	Credit	
Deferred Tax Expense		210	Record Deferred Tax Benefit
Deferred Tax Asset - NOLC	210		Record DTA
Equity		210	Adjustment to Equity for losses utilized in consolidation
Cash	210		Receipt of Cash for Losses from affiliates

The illustration above demonstrates that Utility A continues to have $210 deferred tax benefit included as a reduction to rates in their cost of service. In addition, the DTA NOLC is still reflected as an increase to ADFIT as included in rate base.

All three examples above show that the impact on a utility's financial books and records depends on the tax allocation accounting policy selected. If ratemaking followed the financial records *only*, as Staff proposes, rates calculated and charged to customers would differ depending on the choice each utility makes, which is not appropriate. Staff's proposal also ignores the economic realities of the tax allocation, which is that the receipt of cash from SWEPCO's parent is an equity infusion, and creates operational risk for both SWEPCO and its affiliates. The Company's approach, which determines income tax expense, ADFIT, ADITC, and NOLC on a stand-alone basis, properly ensures that only the taxes associated with revenues and expenses of SWEPCO's rate regulated operations and assets are included in the rate filing. SWEPCO's approach also ensures that, regardless of the method elected for the consolidated tax filing and financial reporting (or even whether the utility participates in a consolidated tax filing), the resulting ratemaking impact is identical.

V. ADFIT IN RATE BASE

Q. PLEASE DISCUSS THE RATIONALE FOR INCLUDING ADFIT AS A COMPONENT OF RATE BASE.

A. The ADFIT included in rate base represents the accumulated total of the deferred tax expense that a utility has collected through rates over time and is considered cost free financing. Deferred taxes represent the tax expense that has been deferred from payment to the IRS due to timing differences in the recognition of income and expense for book and tax purposes. Because the utility is able to collect its deferred tax expense through rates but not pay the cash taxes to the IRS until those timing differences reverse, the utility has that cash temporarily available to fund its operations. Due to this cost-free financing, when the rates for a utility are set, the rate base is reduced by ADFIT.

Q. PLEASE SUMMARIZE STAFF'S POSITION ON THE FINANCING OF SWEPCO'S NOLC RELATED ADFIT.

A. Staff's testimony claims that the inclusion of a stand-alone NOLC ADFIT in rate base would result in the Company's recovery of financing costs twice. Staff states that SWEPCO would recover the financing costs first in the cash distributions received through the AEP tax sharing agreement. Staff then states that SWEPCO would recover the financing costs a second time by including the NOLC ADFIT in rate base.

Q. DO YOU AGREE WITH STAFF'S ANALYSIS OF THE DOUBLE RECOVERY OF FINANCING COSTS FOR THE NOLC?

A. No, I do not. Simply put, there is no double recovery of the NOLC for ratemaking purposes in SWEPCO's rate request. While it is true that SWEPCO received payments from AEP through its affiliates for the use of the NOLC under the AEP tax sharing agreement, it is also true that those cash payments have had no bearing on the deferred tax expense included in rates. As the ADFIT in rate base is by definition the

accumulation of deferred tax expense, it does not stand to reason that the cash received through the AEP tax sharing agreement should have an impact on ADFIT when it had no impact on deferred tax expense.

Staff's position also ignores the economic realities of the NOLC ADFIT and the tax sharing payments. SWEPCO's rate base represents only those assets that are used and useful in providing utility service. SWEPCO used the cash payments from its parent just like an equity infusion, to fund assets that are used and useful in providing utility service. In other words, there is no extra rate base resulting from the tax sharing payment and no double counting. In the end, the tax sharing agreement payments are no different than an equity infusion from SWEPCO's parent, for which the equity investor should be compensated with a return. The fact that this cash was provided by AEP and not by customers is not in dispute in this case. What is in dispute is whether this cash payment should get a reasonable return, as expected by investors, or no return at all. By including the NOLC ADFIT in rate base the Company is simply requesting a return on the cash infusion from AEP until such time that the operations of SWEPCO generate sufficient taxable income to absorb its own taxable losses and it no longer has a stand-alone NOLC.

Q. STAFF STATES THAT THE AEP TAX SHARING AGREEMENT REQUIRES THAT SWEPCO BE PAID FOR ANY NOLC USED BY THE PARENT AND THUS "SWEPCO ALREADY HAS BEEN REIMBURSED." PLEASE RESPOND.

A. I disagree that the tax payments have any bearing on the inclusion of SWEPCO's stand-alone NOLC for ratemaking purposes. SWEPCO and its affiliates have agreed to participate in a tax sharing agreement. Through this agreement, those companies with

taxable income make tax payments to AEP equal to their separate return liability. To the extent that the income from these companies can be offset by losses generated by other affiliates, AEP makes a distribution to the loss companies. The tax sharing agreement is simply a mechanism for each affiliate in the AEP consolidated group to pay the taxes they would otherwise have paid on a stand-alone basis. In other words, while the tax sharing agreement reflects how cash is to be settled among the participants, it does not necessarily impact the amount of tax expense or benefit that would be reported in a subsidiary's separate company financial statements.

In contrast, if the NOLC were excluded from ADFIT as Staff proposes, the result would be the cross-subsidization of costs/benefits from affiliate companies. If cash payments received for taxable losses are to be considered for ratemaking purposes, then the operations of affiliates would impact SWEPCO's utility rates. Instead of the rate base reduction being based on the stand-alone deferred tax expense that has been reflected in customer rates, excluding the stand-alone NOLC means that part of capital reduction is funded by a cash infusion from AEP through the customers of affiliate companies.

In addition, the payments made by income affiliates do not serve to reduce the affiliates' taxes and their customers' cost of service. The affiliates' cost of service calculations likewise are not reduced by the tax-allocation payments, but are calculated on a stand-alone basis – just like SWEPCO. The receipt or payment of a distribution through the tax sharing agreement is entirely outside the scope of the regulated operations of the company.

VI. NORMALIZATION

Q. STAFF'S SURREBUTTAL TESTIMONY DISMISSES THE COMPANY'S CONCERNS THAT STAFF'S RECOMMENDATION ON THE NOLC ADFIT IS NOT CONSISTENT WITH THE IRC'S NORMALIZATION REQUIREMENTS. PLEASE DISCUSS.

A. As I have stated in my direct and rebuttal testimony, SWEPCO's request for the NOLC ADFIT in rate base is not just sound ratemaking to avoid the cross-subsidization of affiliated companies. It is also required under the normalization requirements of the IRC. Staff's recommendation to reduce SWEPCO's NOLC ADFIT by the tax sharing payments violates the deferred tax reserve computational rules[6] as well as the consistency rules.[7]

The deferred tax reserve computational rules limit the reserve (i.e., ADFIT) to the product of the statutory tax rate and the difference between book and tax depreciation expense. It further states that ADFIT should only be reduced when and to the extent that book depreciation exceeds tax depreciation. The IRS issued private letter ruling (PLR) 8904008 in which it confirmed this deferred tax computational requirement. The issue at hand in PLR 8904008 was whether an adjustment to the utility's ADFIT for the taxable losses of affiliates was inconsistent with the normalization rules. In its ruling, the IRS ruled that a normalization violation would occur if the ADFIT of the utility were adjusted to reflect a balance other than the difference between book and tax deprecation at the statutory rate. SWEPCO has

[6] Treasury Regulation Section 1.167(l)-1(h).
[7] IRC Section 168(i)(9)(B).

likewise stated that it would be inconsistent with the normalization rules to allow the ADFIT of the Company to be adjusted by the AEP tax sharing payments.

Similarly, Staff's recommendation does not adhere to the consistency requirement of the normalization rules. The normalization rules require that the calculation of the revenue requirement include consistency amongst the depreciation expense, tax expense, rate base, and ADFIT. The IRC does not specifically state that a stand-alone method must be used, but it does establish a clear relationship among those four components. The revenue requirement for SWEPCO is calculated with a rate base for assets that are used and useful in providing utility service to its customers. The book depreciation expense also relates to the assets providing utility service to its customers. As stated earlier in my testimony, the tax expense in the revenue requirement is based on the revenues and operating expenses included in the cost of service. The rate base, book depreciation expense, and tax expense are all calculated based on the assets and costs associated with SWEPCO providing utility service to its customers. It would be inconsistent for the ADFIT in the revenue requirement to include an adjustment for a tax sharing payment that is driven by the taxable income of affiliate companies whose assets are not in SWEPCO's rate base and whose operating expenses are not in SWEPCO's cost of service.

Q. STAFF DESCRIBES THE COMPANY'S CONCERN OF AN INCONSISTENCY WITH THE NORMALIZATION RULES AS "IRRATIONAL." PLEASE DISCUSS.

A. In direct and surrebuttal testimony Staff describes as "irrational" the Company's assertion that while past treatment of the NOLC ADFIT is inconsistent with the normalization rules, the Company's tax accounting and tax returns have not been

incorrect in prior years. Again, Staff's conclusion is based on its failure to recognize the various methods for which GAAP allows companies to recognize their taxes for financial reporting purposes. Staff also ignores the IRS's safe harbor concerning inadvertent normalization violations.

As discussed earlier in my testimony, ASC 740 allows for various methods for determining income taxes in the separate financial statements of the members of a consolidated tax return group. SWEPCO's financial statements follow an appropriate method in which the NOLC on its books reflects a proportion of the AEP consolidated NOLC. The Company's books correctly reflect an NOLC balance of zero due to the application of the "parent company down" method of tax accounting at the end of the test period as the AEP consolidated return group does not have an NOLC.

The Company has asserted that its prior tax returns have also not been incorrect (i.e., by continuing to claim accelerated depreciation) because the IRS has outlined a safe harbor for taxpayers when it comes to normalization violations.[8] First, in order for a normalization violation to occur a taxpayer or regulatory authority must knowingly put into place a practice or procedure that is inconsistent with the normalization rules. It has not been claimed or suggested that either SWEPCO or the Commission knowingly adopted a practice or procedure that was inconsistent with the normalization rules. Second, that the IRS allows taxpayers to avoid a normalization violation by changing to a practice or procedure that is consistent with the normalization rules with the taxpayer's next available opportunity. In preparation for

[8] Revenue Procedure 2017-47.

this case, SWEPCO identified the prior treatment of the NOLC as being inconsistent with the normalization rules, and is using this base case as its next available opportunity to correct the inconsistency.

VII. EXCESS DEFERRED INCOME TAXES

Q. PLEASE SUMMARIZE STAFF'S POSITION ON THE COMPANY'S REQUEST FOR THE NOLC EXCESS ADFIT.

A. Staff's position on the NOLC excess ADFIT mirrors that of the NOL ADFIT. Staff argues that because the NOL ADFIT is not on the Company's books for financial reporting purposes, that it should not be included in the Company's ratemaking.

Q. DO YOU AGREE WITH STAFF'S POSITION ON THE NOLC EXCESS ADFIT?

A. No, I do not. The same normalization rules that I discuss earlier in my testimony apply to the NOLC excess ADFIT. Therefore, the Company's proposal is necessary to adhere to the normalization rules for the same reasons as the NOLC ADFIT. In addition, as I describe in detail in my rebuttal testimony, the NOLC excess ADFIT is necessary to be included in ratemaking as it aligns the refund to customers for excess ADFIT with the deferred tax expense that have been included in rates. Staff's recommendation would provide a refund to customers for not only the excess deferred tax expense that had been included in rates, but it would also refund to customers a portion of the cash infusion supplied by AEP via the tax sharing payments. SWEPCO's request is to simply return the excess ADFIT to customers in the amount in which customers funded the excess.

VIII. PENDING CASE IN TEXAS JURISDICTION

Q. STAFF'S TESTIMONY REFERS TO A PROPOSAL FOR DECISION IN SWEPCO'S BASE CASE BEFORE THE PUBLIC UTILITY COMMISSION OF TEXAS (PUCT). PLEASE DISCUSS.

A. SWEPCO has a pending base rate case before the PUCT in which the Company also requested the inclusion of a stand-alone NOLC in rate base to adhere to the normalization rules. In that case the administrative law judge (ALJ) issued a proposal for decision to the PUCT rejecting the Company's request for the NOLC. The PUCT has yet to issue its final order.

Q. SHOULD THE STATUS OF SWEPCO'S TEXAS BASE CASE BE PERSUASIVE TO THE COMMISSION?

A. No, it should not. First, Staff refers to a "proposal for decision," meaning no final decision has been made by the PUCT. The case remains pending as of the writing of this rejoinder testimony. Second, the Texas ALJ references language from IRS Revenue Procedure 2020-39. That revenue procedure discusses the determination of whether and to what extent a NOLC is the result of accelerated depreciation. In prior guidance, the IRS has used a with-and-without approach to determine the extent to which an NOLC is the result of accelerated tax depreciation. However Revenue Procedure 2020-39 adds that regulators may use reasonable methods to determine the portion of the NOLC that is attributable to accelerated tax depreciation as long as that method does not violate normalization requirements. The extent to which SWEPCO's NOLC is attributable to accelerated depreciation was not a disputed issue in the Texas case, nor is it in the instant case. Third, the proposal for decision sites a similar double-

counting concern that Staff has raised in this case which I specifically address in this testimony.

Q. HAVE THERE BEEN ANY PERTINENT DEVELOPMENTS IN SWEPCO'S TEXAS CASE SINCE THE PROPOSAL FOR DECISION?

A. Yes. In SWEPCO's exceptions to the ALJ's proposal for decision the Company stated its intentions to request a PLR from the IRS on the normalization concerns that were raised in the case. SWEPCO also requested that the PUCT include language in the final order that would protect SWEPCO's Texas customers and the Company from a normalization violation. SWEPCO requested that the final order from the PUCT include one of two ordering paragraphs: 1) Authorize rates which include the requested NOLC in the revenue requirement subject to refund if the IRS were to issue a PLR that states that it would not be a normalization violation to exclude the NOLC 2) Authorize rates which exclude the request NOLC in the revenue requirement but authorize the Company to accrue a regulatory asset for the return on the NOLC ADFIT and the return of the NOLC excess ADFIT amortization.

Q. HAS THE PUCT STAFF RESPONDED TO SWEPCO'S REQUEST TO THE PUCT FOR THE FINAL ORDER?

A. Yes, in a supplemental reply to SWEPCO's exceptions document, the PUCT Staff has supported the second alternative ordering paragraph in which SWEPCO would be authorized to accrue a regulatory asset related to the NOLC. This regulatory asset would be recoverable if the Company receives a PLR from the IRS indicating that it would be a normalization violation to exclude the NOLC ADFIT from rate base.

Q. HAVE THE ALJS IN THE TEXAS CASE RESPONDED TO SWEPCO'S EXCEPTIONS AND STAFF'S RESPONSE ON THIS ISSUE?

A. Yes, they have. The ALJs state they are "persuaded to adopt-in an abundance of caution-SWEPCO's second alternative proposal for addressing the asserted risk of a normalization violation if SWEPCO is not permitted to include the NOLC ADFIT in rate base, a proposal that Staff also recommends. Namely, the Commission would authorize SWEPCO to create a regulatory asset to track the return that would be associated with the inclusion of the NOLC ADFIT in rate base and the excess NOLC ADFIT amortization, pending a resolution with the IRS regarding potential normalization violations."

IX. RECOMMENDATION

Q. WHAT ARE YOUR RECOMMENDATIONS FOR THE RATEMAKING FOR THE NOLC ADFIT AND NOLC EXCESS ADFIT?

A. I recommend that the Commission approve a revenue requirement requested by the Company that includes the NOLC ADFIT in rate base as well as the amortization of NOLC excess ADFIT in the cost of service. An order including these elements will protect the Louisiana customers of SWEPCO as well as the Company from the harsh punishment that results from a normalization violation. It will also ensure that rates are set using sound ratemaking in which there is no cross-subsidization of affiliate companies. The taxes included in the rates set will reflect only those associated with providing utility service to SWEPCO's customers.

Q. DO YOU HAVE AN ALTERNATIVE RECOMMENDATION?

A. Yes, I do. If the Commission is not persuaded by the Company's discussion on cross-subsidization and not satisfied by the Company's analysis of the normalization rules and were inclined to issue an order supporting Staff's position, I would recommend that the Commission include language in its final order similar to what the Company requested of the PUCT in its Texas case.

I would recommend that the final order by the Commission in this case provide relief for SWEPCO and its customers from the financial implications of a normalization violation by including one of two options:

1) The rates set in this case include SWEPCO's request for the NOLC ADFIT in rate base as well as the NOLC excess ADFIT amortization in the cost of service. These rates would be subject to refund pending the outcome of a PLR from the IRS.

2) The rates set in this case exclude SWEPCO's request for the NOL ADFIT in rate base as well as the NOLC excess ADFIT amortization in the cost of service but authorize the Company to accrue a regulatory asset. The regulatory asset would include both the amount of the forgone revenue requirement for the return on the NOLC ADFIT and the NOLC excess ADFIT amortization in the cost of service. Accrual of the regulatory asset would be aligned with the timing of the implementation of rates resulting from the instant case. If the Company receives a PLR from the IRS stating that it would be a normalization violation to exclude the NOLC ADFIT then the Company would be authorized to recover the regulatory asset. If the PLR determines that it would not be a normalization

violation then the regulatory asset would be written off and the Company would not seek recovery.

Both of these options recognize the importance of complying with the normalization rules and protect customers and the Company from the negative impacts that would result in not doing so.

Q. DOES THIS CONCLUDE YOUR REJOINDER TESTIMONY?

A. Yes, it does.

The Company's reply indicates this information is contained in the response to Consumer Advocate DR No. 1-51. However, this information does not provide the detail originally requested by usage block. Therefore, as originally requested, provide the monthly reactive demand charge determinants (KVAR) from December 2015 through June 2021 in the same format as the Company's response to Consumer Advocate DR No. 2-11 in TRA Docket No. 16-00001.

Response CA 2-63:

Please see CA 2-53 Attachment 1 for the requested information. The same information can be obtained from CA 1-51 Attachment 1 - MFR_12_Supplemental tab "Metered kWh" rows 47 through 133.

Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-64:

(Supplemental). Refer to the Company's response to Consumer Advocate DR No. 1-58 regarding the specific billing determinants for the PS Rate Schedule. The Company's reply indicates this information is contained in the response to Consumer Advocate DR No. 1-51. However, this information does not provide the detail originally requested by usage block. Therefore, as originally requested, provide the monthly number of classrooms (for Tariff Code 641) as well as a breakdown of the monthly KWH billed split between the first 500 KWH and over 500 KWH for Tariff Code 641 from December 2015 through June 2021 in the same format as the Company's response to Consumer Advocate DR No. 2-13 in TRA Docket No. 16-00001.

Response CA 2-64:

Please see CA 2-53 Attachment 1 for the requested information. The same information can be obtained from CA 1-51 Attachment 1 - MFR_12_Supplemental tab "Metered kWh" rows 47 through 133.

Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-66:

(Supplemental) Regarding the NOLC claimed in this proceeding, refer to the response to Consumer Advocate DR No. 1-36, (attachment C) and respond to the following: a. Refer to tab "51052 May Per Books". Define each item below and explain how such items are recorded on Kingsport's books contrasted with how such items are reflected in Kingsport's tax return: i. Item 908A Book Operating Lease – Liability - $558,761; ii. Item 295A EFB-EFB Gain/Loss on ACRS/MACRS Property - $696,851; and iii. Item 532A – EFB-EFB – Percent Repair Allowance - $573,294.

Response CA 2-66:

Please see CA 1-90(a) Attachment 1 for definitions of 908A, 295A, and 532A. 908A represents a liability for the future book lease liabilities. 295A-EFB and 523A-EFB are part of the book/tax timing difference related to depreciation that is included on the tax return. The "-EFB" codes help differentiate the portion of the book/tax timing difference related to depreciation that is considered normalized vs. flowthrough. Flowthrough timing differences do not impact the deferred tax expense.

Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-69:

(Supplemental) Has the Company estimated its taxable income for 2021? If so, identify the estimate and provide any supporting documentation the Company has for the estimate.

Response CA 2-69:

The most recent 2021 forecast, completed in Q3 of 2021, estimates $5,020,091 of taxable income. Supplemental response to CA 2-76 will provide an updated estimate for 2021 taxable income once the public release of earnings information has occurred, scheduled for February 24th, 2022.

TENNESSEE PUBLIC UTILITY COMMISSION
PETITION OF
Kingsport Power Company
DOCKET NO. TPUC 21-00107 Rate Case Discovery
Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-70:

(Supplemental) Provide a comprehensive discussion supporting the inclusion in rate base of the $1.4 million of Unprotected Deficient adjustment as incorporated in the "KGSPT NOL Vintage" tab within the response to Consumer Advocate DR No. 1-36. This response should provide documentation that such deficiency was not included in the Company's TCJA proceeding in 2018.

Response CA 2-70:

See response to CA 2-35 and CA 2-35 Attachment 1. The recognition of deficient tax related to the stand-alone NOLC was not included in the TCJA proceeding in 2018 as the inconsistency with normalization and ADIT in rate base was not discovered until the preparation of this proceeding (Direct Testimony, Page 5).

TENNESSEE PUBLIC UTILITY COMMISSION
PETITION OF
Kingsport Power Company
DOCKET NO. TPUC 21-00107 Rate Case Discovery
Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-71:

(Supplemental) Refer to the response to Consumer Advocate DR No. 1-89 where the Company restated the NOLC balance assigned to the Transmission function by utilizing a depreciation and amortization ratio of 9.27%. However, Item 230A within tab "51052" indicates that Transmission accounts for approximately 26.5% of cumulative book/tax timing differences ($3,616,315/$13,640,839). Provide the rationale for the use of the 9.27% allocator in light of the more significant overall book/tax timing differences associated with the depreciation that is then incorporated into tax returns.

Response CA 2-71:

Depreciation and amortization has been utilized as a ratio for the allocation of the NOLC due to the majority of the NOLC having been generated from book/tax timing differences related to accelerated depreciation. However, utilizing the 230A or property related ADIT could also provide a reasonable allocation of the NOLC between Transmission and Distribution.

PETITION OF
Kingsport Power Company
DOCKET NO. TPUC 21-00107 Rate Case Discovery
Data Requests and Requests for the Production
of Documents by the THE CONSUMER PROTECTION AND ADVOCATE DIVISION OF THE ATTORNEY GENERAL'S OFFICE
CA Supp. Set 2
To Kingsport Power Company

Data Request CA 2-75:

(Supplemental) Please refer to Consumer Advocate DR Nos. 1-89(d) and 1-90(c). In the former response the Company supports the concept that the balance of the NOL should reflect the stand-alone operations of the Company and not take into account the operations of affiliates. However, in response 1-90 the Company indicates it has not reviewed its ADIT balances for consistency with the recognition of rate base, expenses and revenues as presented in its filing. Provide a comprehensive response reconciling the need to compute a stand-alone NOL/ADIT balance for ratemaking purposes on one hand, with the lack of review of its ADIT balance to ensure synchronization with its revenue requirement components.

Response CA 2-75:

The intent of the Company's response to CA 1-90 (c) was to convey that there had been no line item by line item analysis prepared of ADIT associated with each item of rate base, expense and revenue in its filing**.** To the best of the Company's knowledge and belief, the ADIT included in its filing is consistent with the rate base, expense and revenues reflected in its filing. In this regard, adjustments to rate base [Exhibits 1a-4c, EP-37, AD-38, AD-39, and AD-40 (Columns AU-AW)] were utilized to update ADIT to maintain consistency. In addition, by including the stand-alone NOLC as part of ADIT, the Company continues to maintain consistency and appropriately reflects ADIT on a stand-alone basis in its filing.

(Supplemental) Refer to (Exhibits 1a-4c_Kingsport JCOS CCOS (KMJ-MHW)) attachment as filed with the Company's petition. Specifically, refer to tab "1-b JRSSmry" within this file. Provide the source and support for the hardcode value of "0.002901" presented in cell F28 that represents the Company's uncollectible ratio.

Response CA 2-81:

The uncollectible ratio of 0.002901 was calculated by dividing the 2021 Factoring of Accounts Receivable ($439,467) by 2021 Sales of Electricity + Forfeited Discounts ($151,510,353). The source for the amounts used in this calculation was the Kingsport FERC income statement for 12 months-ended June 30, 2021. Support for the hardcoded value is attached as CA 2-081 Attachment 1.
