Good morning -

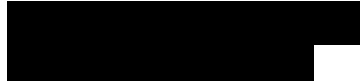

This is in reference to Docket# 22-00087

We as residents over the last seven years of Kings Chapel have had to pay for the burden of out of state residents moving into our community and driving up costs for repair of their septic systems, primarily due to the fact nobody reviews the do's and don'ts. I do not feel this is fair to make everyone pay for the negligence of others. We have also never had to have anything done for our septic, meaning service or damage due to putting the wrong things down our drains or toilets.

The developer is guilty of collusion on many accounts....too many to list in this email. He is a poor manager of monies and our HOA/every service he owns within the neighborhood is broke. What I propose is that every new resident that moves into KC neighborhood pays the increased proposal. We as residents of seven years will find another company to provide us with septic service and maintenance if this is going to be approved. We will pay as needed. Let's keep Tennessee, Tennessee.

Best regards,

Marcus Aaron
