

February 9, 2024

Electronically Filed in TPUC Docket Room on February 9, 2024 at 1:28 p.m.

### VIA ELECTRONIC FILING

Hon. Herbert H. Hilliard, Chairman c/o Ectory Lawless, Docket Room Manager Tennessee Public Utility Commission 502 Deaderick Street, 4<sup>th</sup> Floor Nashville, TN 37243 TPUC.DocketRoom@tn.gov

RE: Joint Application of Limestone Water Utility Operating Company, LLC, and Cumberland Basin Wastewater Systems, LLC, for Approval of the Acquisition of and to Operate the Wastewater System of Cumberland Basin Wastewater Systems, LLC, and to Issue a Certificate of Public Convenience and Necessity, TPUC Docket No. 23-00077

Dear Chairman Hilliard:

Attached for filing please find responses from Limestone Water Utility Operating Company, LLC to the Consumer Advocate's inquiry and requests regarding the minimum filing requirements in the above-referenced docket.

As required, the original plus four (4) hard copies will be mailed to your office. Should you have any questions concerning this filing, or require additional information, please do not hesitate to contact me.

Sincerely,

**BUTLER SNOW LLP**

RE: Joint Application of Limestone Water Utility Operating Company, LLC, and Cumberland Basin Wastewater Systems, LLC, for Approval of the Acquisition of and to Operate the Wastewater System of Cumberland Basin Wastewater Systems, LLC, and to Issue a Certificate of Public Convenience and Necessity, TPUC Docket No. 23-00077

Dear Ms. Brown:

We are in receipt of your inquiry and requests regarding the minimum filing requirements in the above-referenced docket. Please find the responses from Limestone Water Utility Operating Company, LLC ("Limestone"), below.

### ATTACHMENT A - CCN MFRs

### **Rule 1220-04-13-.17(2)(a) General Information**

1. <u>Rule 1220-04-13-.17(2)(a)4</u>. The rule requires the petition to include a corporate organization chart showing all affiliate relationships. However, there are errors on the corporate organizational chart filed as Exhibit 5 to the Joint Petition. Specifically, (1) US Water, LLC should read as US Water Systems, LLC and (2) Central States Water Resources, Inc. should be shown as linked directly to CSWR, LLC and not linked to US Water, LLC. Josiah Cox provided such corrections in his testimony in a hearing before the Kentucky Public Service Commission.

Response: Please find attached Revised Exhibit 5 to the Joint Application. Revised Exhibit 5 includes the corrected naming convention for US Water Systems, LLC. However, Central States Water Resources, Inc., should not be shown as linked directly to CSWR, LLC. Central States Water Resources, Inc., is owned by US Water Systems, LLC, but Central States Water Resources, Inc., does not have ownership interest in CSWR, LLC. Therefore, Central States Water Resources, Inc., is linked properly on Exhibit 5 and Revised Exhibit 5.

The Pinnacle at Symphony Place 150 3<sup>rd</sup> Avenue South, Suite 1600 Nashville, TN 37201 KATHERINE B. BARNES 615.651.6797 katherine.barnes@butlersnow.com

T 615.651.6700 F 615.651.6701 www.butlersnow.com Also, please find attached Revised Exhibit 12 that clarifies the description of Mr. Cox's role in CSWR, LLC, and Central States Water Resources, Inc.

2. <u>Rule 1220-04-13-.17(2)(a)5</u>. The rule requires a copy of the applicant's articles of incorporation, partnership agreement, and/or by-laws. The required documents were filed with the Joint Petition; however, the Consumer Advocate noticed that the principal address for Limestone on both the Operating Agreement and the articles of incorporation are not the same principal address stated on page 4 of the Joint Petition. Please explain why they differ and clarify.

**Response**: The address included in Limestone's Operating Agreement and Articles of Incorporation reflects the Company's previous office location. The principal address stated on page 4 of the Joint Petition is the Company's current office location.

- 3. <u>Rule 1220-04-13-.17(2)(a)7(i)</u>. This rule requires the location of the wastewater system, i.e., treatment plant, pre-application treatment facilities, collection infrastructure, building(s) for equipment, drip fields, disposal fields and/or wetland cells.
  - The Genesis Village map shows only the wastewater treatment facility ("WWTF") and lift station location without the required details. According to SOP-08040, the system is described as a system with septic tanks, an effluent collection system, two Aquapoint BioClere fixed film reactors, and fenced drip irrigation field. The Consumer Advocate reviewed the Tennessee Department of Environment and Conservation ("TDEC") Water Resources Dataviewer ("WR Dataviewer") and Enforcement Dataviewer. As a result of this review, the Consumer Advocate located a TDEC administrative order, which required Cumberland Basin Water Systems, Inc. ("CBWSI") to file updated engineering plans of the system.
  - The Bluffs map only shows the WWFT location. According to SOP-07008, the system is described as a system with septic tanks, an effluent collection system, a recirculating media filer, a UV disinfection, and a 6.0-acre drip irrigation field. The Consumer Advocate reviewed TDEC WR and Enforcement Dataviewers, but we did not locate engineering plans or administrative orders regarding this system in the dataviewers.

Please file updated maps in this docket that clearly provide the required detail as set out in this rule.

**Response**: Please find attached Revised Collective Exhibits 1A and 1B to the Joint Application. Revised Collective Exhibit 1A includes an updated map, as well as a schematic extracted from the Engineering Report for Genesis Village. Revised Collective Exhibit 1B includes an updated map, as well as engineering drawings for The Bluffs. Read together for each subdivision, these documents provide the necessary details and address the requirements outlined above.

4. <u>Rule 1220-04-13-.17(2)(a)7(iii)</u>. This rule requires a map to show access roads and names of access roads and the other utilities necessary to provide wastewater service. The updated engineering plans for SOP-08040 appear to delineate an access road to the WWTF. The maps provided in the Joint Petition do not show access roads or other utilities necessary to provide services. Please file updated maps in this docket that shows the access roads and other utilities pursuant to this rule requirement.

**Response**: Please see the Company's response to #3 above.

### Rule 1220-04-13-.17(2)(c) Managerial Ability

1. <u>Rule 1220-04-13-.17(2)(c)3</u>. This rule requires copies of all contracts related to any pending merger or acquisition of the applicant, corporate parent or affiliate. All TPUC docket numbers were provided in response to this rule with a statement of this rule being overly burdensome to Limestone. Recently, the Commission issued an order that granted Limestone's motion for waiver of this rule. The Consumer Advocate did not locate a motion for wavier of this rule for the current Docket. Please clarify if a waiver of this rule has been obtained.

**Response**: Limestone did not request a waiver from Rule 1220-04-13-.17(2)(c)(3) in this docket. In previous dockets, specifically Docket Nos. 23-00016<sup>1</sup> and 23-00036<sup>2</sup>, no waivers were requested. The Commission accepted the Company's arguments and position with respect to Rule 1220-04-13-.17(2)(c)(3), as well as approved the Petitions. Therefore, the Company is seeking the same treatment in this docket. However, if the Commission prefers that the Company file a motion, it will do so.

### Rule 1220-04-13-.17(2)(d) Technical Ability

1. <u>Rule 1220-04-13-.17(2)(d)2</u>. This rule requires a copy of the State Operator Certificate for the wastewater system operator of record. If the operator is a contract employee of the utility, provide a copy of the employment contract. The certificate filed with the Joint Petition reflects the current operator is the current Cumberland Basin employee. Limestone stated that they will not retain any of the current Cumberland Basin employees.

<sup>&</sup>lt;sup>1</sup> Expedited Joint Application of Limestone Water Utility Operating Company, LLC, and DSH & Associates, LLC, for Approval of the Acquisition of and to Operate the Wastewater System of DSH & Associates, LLC, and to Transfer or Issue a Certificate of Public Convenience and Necessity, Appendix A, p. 3, TPUC Docket No. 23-00016 (Mar. 1, 2023); see also Order Approving Settlement Agreement and Transfer of System, and Granting Certificate of Convenience and Necessity, TPUC Docket No. 23-00016 (Dec. 26, 2023).

<sup>&</sup>lt;sup>2</sup> Limestone Water Utility Operating Company, LLC's Application to Expand its Certificate of Convenience and Necessity to Serve the Nash Ridge Subdivision, Appendix A, p. 14, TPUC Docket No. 23-00036 (May 22, 2023); see also Order Amending Certificate of Public Convenience and Necessity, TPUC Docket No. 23-00036 (Jan. 26, 2024) (approving Limestone's application).

Please update this docket by filing Limestone's operator certificate or the contract with the operator who will be Limestone's contract employee.

**Response**: If the Commission grants Limestone the authority to acquire the system currently owned by Cumberland Basin, after transfer of the system, Limestone will issue a Request for Proposal ("RFP") to identify the best and most cost-effective entity to operate this system. Responses to this RFP will only be accepted from licensed, professional operators. Only then can the actual operator be identified. Once the operator has been identified, Limestone will file the State Operator Certificate with the Commission.

- 2. <u>Rule 1220-04-13-.17(2)(d)4</u>. This rule asks for a list of complaint(s), notices of violation or administrative action filed with or issued by a regulatory agency and to identify the nature of the complaint notices of violation or administrative action, which agency is involved, and how the issue was or is being resolved. In reviewing the Joint Petition and the TDEC Water Resources Dataviewer, the Consumer Advocate notes the following regarding Limestone's existing wastewater and water utilities:
  - a. Grasslands Wastewater System, TN0027278.
    - i. <u>Consent Order</u>. The Joint Petition states that Limestone entered into a Consent Order with TDEC on February 3, 2023, resolving issues at Grasslands sewage treatment plant. Please update this docket with an explanation detailing the status of the corrective action set out in the consent decree.
    - ii. <u>Ongoing Issues</u>. The Grasslands System has had 4 incidents of washouts; a sanitary sewer overflow at a manhole; a failure of lift station resulting in the release of 250,000 gallons of untreated wastewater; and the overflow from a sludge holding tank. In response to inquiries by TPUC Staff and the Consumer Advocate in TPUC Docket No. 23-00026, TDEC provided an overview of the conditions and issues of concern of adding additional waste load to the Grasslands System.
  - b. <u>Aqua Drinking Water System, DWS ID#0000948</u>. TDEC recently issued a Notice of Deficiency regarding Limestone's failure to provide documentation of participant notice activities as required under TDEC's rules and regulations. A copy of the Notice of Deficiency is attached as CA MFR Exhibit A-9. Please provide an explanation and update to this Notice of Deficiency.
  - c. <u>Hideaway Wastewater System, SOP-07090</u>. By letter dated July 10, 2023, TDEC issued a Compliance Evaluation Inspection and Notice of Violation detailing numerous issues of concern and 7 "Action Items and Recommendations." A copy of the Notice of Violation is attached as CA MFR Exhibit A-10. Limestone responded, in writing, to the Notice of Violation on 3 different dates: August 9th, September 12th, and November 7th. In 2012, TDEC conducted a site visit at this

system and filed a Filed Activity Report dated May 8, 2012. Please provide an explanation and update regarding any outstanding issues of concern raised by TDEC.

### Response:

### a. Grasslands Wastewater System

i. Grasslands Consent Order. On February 13, 2023, Limestone entered into a Consent Order & Assessment with TDEC to address issues at the Grasslands facility. Limestone has been working with Mr. Michael Lancaster, in TDEC's Division of Water Resources Enforcement Unit, to implement the terms of the Consent Order. Consistent with this, Limestone submitted to TDEC the attached Schedule for Construction, which was approved by TDEC in the accompanying email (collectively, Attachment A). The Schedule for Construction outlines the timeline for Limestone to complete an upgrade to the Grasslands facility.

Prior to this upgrade, Limestone is also implementing repair measures to increase the facility's existing capacity, including working on the replacement of a failed influent screen, inflow and infiltration ("I & I") investigations, and a sewer main/manhole lining project to reduce flow coming to the plant. These projects are expected to be completed within the next year and will improve the facility's ability to treat the wastewater feeding into it. The amount of trash and nuisance solids are hindering the plant's ability to treat to its full potential and Limestone believes that these projects will free up previously underutilized or wasted treatment capacity to treat waste from new connections from the Nash Ridge Subdivision. Limestone believes that these measures will make existing capacity available to serve the new customers of the Nash Ridge Subdivision prior to the system upgrade.

- ii. <u>Grasslands Ongoing Issues</u>. Limestone's NPDES permit for the Grasslands facility (TN0027278) requires that Limestone report washouts, sanitary sewer overflows, and upsets to TDEC; therefore, as noted by the Consumer Advocate, Limestone reported each incident to TDEC in compliance with these permit requirements. No Notices of Violation have been issued by TDEC in relation to these incidents. As noted above, Limestone is implementing repair measures to increase the facility's existing capacity, including working on the replacement of a failed influent screen, I & I investigations, and a sewer main/manhole lining project that Limestone believes will help minimize future incidents.
- b. Aqua Drinking Water System. On November 30, 2023, TDEC issued Limestone correspondence regarding the failure to provide documentation of participant notice activities for Lead & Copper Monitoring. On January 4, 2024, Limestone completed and submitted the notice documentation to TDEC and received confirmation from

TDEC that the notice requirements for Lead & Copper Monitoring had been satisfied. Please see Attachment B for this documentation.

c. <u>Hideaway Wastewater System.</u> On July 10, 2023, Limestone was issued a Notice of Violation detailing issues of concern and 7 "Action Items and Recommendations." All the Action Items and Recommendations from the July 10, 2023 evaluation have been addressed and satisfied, and documentation submitted to TDEC. The Field Activity Report dated May 8, 2012, appears to be related to Sunset Cove Condominiums and not Hideaway Wastewater System. Additionally, in 2012, the Hideaway Wastewater System was under previous ownership and was not acquired by Limestone until December 21, 2021.

### **Rule 1220-04-13-.17(e) Sworn Testimony**

1. <u>Rule 1220-04-13-.17(2)(f)(6)</u>. This rule requires a signed affidavit stating that all information submitted concerning the wastewater CCN application is true and correct to the best of the witness' knowledge and belief. The Direct Testimony of Josiah Cox filed with the Joint Petition contains an affidavit, but it fails to satisfy the rule here. Please file a correct affidavit in this docket to comply with this rule.

**Response**: Please see attached Supplemental Exhibit 9, a signed affidavit concerning the Joint Application.

### **ATTACHMENT B – Acquisition MFRs**

### **Rule 1220-04-14-.08(2) Acquisitions**

1. <u>Rule 1220-04-14-.08(2)(b)</u>. The Joint Petition stated in "Appendix A" that only CSWR/Limestone's financials were provided. The rule requires the financial statements "of the selling utility's three most recently completed fiscal years or reporting periods at the time the application for acquisition is filed." Please update the Docket and provide Cumberland Basin's financial statements.

Shilina B. Brown February 9, 2024 Page 7

**Response**: Please find attached as Supplemental Exhibit 20 Cumberland Basin's 2022 Annual Report, 2021 Annual Report, and 2020 Annual Report.

Sincerely,

BUTLER SNOW LLP

## **REVISED EXHIBIT 5**

### **Central States Water Resources Corporate Entity Organizational Chart**

### **Arkansas CSWR Organizational Chart Detail**

## **REVISED EXHIBIT 12**

### Josiah Cox - President

Mr. Cox is President of Limestone Water Utility Operating Company, LLC, Limestone Water Utility Holding Company, LLC, and also of, CSWR, LLC, ("CSWR") and Central States Water Resources, Inc. All those companies are part of an affiliated group that provides water and/or wastewater utility services to approximately 150,000 customers in 11 states.

Mr. Cox received a Bachelor of Science degree with a major in Environmental Science from the University of Kansas where he was also a student-athlete. Professionally he has worked at the Kansas state biological survey, where he performed a wildlife habitat study. He then worked at a civil engineering firm where he was involved in various facets of the land development process including permitting, entitlement, civil design, project management, and construction management. He focused mainly on the water and wastewater side of the civil engineering business and participated in every aspect of that business from waste-load allocation studies (now known as the anti-degradation processes), to design, permitting, project management, and construction management. He also ran the firm's environmental consulting division and was the second private consultant to submit a Water Quality Impact Assessment in the state of Missouri in 2003. He later joined the engineering firm's executive leadership team and helped run all the firm's operations.

Beginning in 2005, he formed a full-service civil engineering, environmental consulting, general contracting, and construction management firm. He gained extensive experience with rural communities in every facet of the water and wastewater compliance process, including environmental assessment, permitting, design, construction, operation and community administration of the actual water and wastewater (sewerage) systems. The firm performed stream sampling and built wasteload allocation models to determine receiving water-body protective permit-able effluent pollutant loads. They did full engineering design of multiple whole community water and wastewater infrastructure systems including wells, water distribution, water treatment, water storage, wastewater conveyance, and wastewater treatment plants and delivered these designs through federal and state administered permitting processes in Missouri. The engineering firm also administered the construction of these water and wastewater systems from green field site selection all the way through system startup and final engineering sign-off. During this time, Mr. Cox also began the Master of Business Administration (MBA) program at Washington University in St. Louis, from which he earned his advanced degree and graduated in 2007.

Additionally, beginning in 2008, Mr. Cox took over the operations of a rural sewer district where he managed the functioning, testing, and maintenance of this system. In that capacity, he also acted as the administrator for the system, performing all the billing, emergency response, accounts payable/accounts receivable, collections, budgeting, customer service, and public town meetings required to service the community. He no longer has any responsibilities for that system.

In late 2010, after working on several small, distressed water and wastewater systems, Mr. Cox created a business plan to acquire and recapitalize failing systems as investor-owned, regulated water and wastewater utility companies. In early 2011, he went to the capital markets to raise money to implement his plan, and over a period of approximately three years met with more than fifty- two infrastructure investment groups in an attempt to raise necessary financing. In February 2014, he was able to raise sufficient debt and equity capital to start CSWR. In 2018, he attracted an additional large institutional private equity investor, which allowed CSWR to expand the scope of its business plan. Since its formation, CSWR has acquired, and is currently operating more than 800 water and/or wastewater systems in Arizona, Arkansas, Florida, Kentucky, Louisiana, Missouri, Mississippi, North Carolina, South Carolina, Tennessee, and Texas.

### Marty Moore - Chief Financial Officer

Marty Moore is the Chief Financial Officer of CSWR, LLC, and has held this position since April 2020. As CFO, Mr. Moore provides leadership, direction, and oversight of the finance and accounting teams, managing the process for financial forecasting, budgeting, and reporting in addition to overseeing the human resources and risk management functions.

After receiving a Bachelor of Business Administration in Accounting from Abilene Christian University, Mr. Moore gained a wide range of financial management experience. Moore's extensive senior-level finance and operational expertise includes serving as CFO of international automation equipment manufacturer Baldwin Technology Co., a company he helped Barry-Wehmiller/Forsyth Capital take private in 2012. Prior to that, Mr. Moore held senior leadership positions with Summit Marketing, Consolidated Terminals, Barnhill's Buffet Inc., and Global Materials Services. He began his career at Arthur Andersen. Moore most recently led finance and corporate services as CFO of Gardner Capital, a national affordable housing and renewable energy developer, investor, and tax credit syndicator. He has an extensive background in mergers and acquisitions and works alongside Mr. Cox in accelerating the company's already rapid growth trajectory.

### **Todd Thomas - Vice President**

Todd Thomas holds the office of Senior Vice President of CSWR. Mr. Thomas received his Bachelor of Science in Civil Engineering from The Missouri University of Science and Technology, and a Master of Business Administration from Washington University in St. Louis.

Before joining CSWR, Mr. Thomas was President of Brotcke Well and Pump, Vice President of Operations and Business Development of the Midwest for American Water Contract Operations, and General Manager of Midwest Operations for Environmental Management Corporation. Mr. Thomas currently serves on the Technical Advisory Team for the Public Water Supply District 2 of St. Charles County, MO.

Mr. Thomas's past positions in related industries has provided him with extensive experience in water and sewer utilities. He has in depth, firsthand knowledge about the amount of damage resulting from the lack of maintenance on a well system, and he understands how much money and effort are required to restore a well system after neglect.

In his position as Senior Vice President at CSWR, Mr. Thomas's primary responsibilities include utility operations along with the acquisition, development, and rate stabilization of CSWR- affiliated utilities. Those duties include operations, maintenance, capital planning, and regulatory compliance for all affiliate-owned facilities. He is responsible for the management of all operations and maintenance service providers, and engineering firms.

### Mike Duncan -Vice President

Mike Duncan is the Vice President of CSWR and was promoted to that position in October 2020. As Vice President, he has played an integral role in researching, preparing, filing, and processing acquisition applications in Missouri, Kentucky, Tennessee, Louisiana, Texas, North Carolina, and Mississippi. He also has taken a leading role in preparing and filing rate cases in Missouri, Kentucky, and Louisiana.

After receiving his Bachelor of Arts degree from Washington University in St. Louis, the first eleven years of his career were spent as an administrator and later director at a non-profit organization in St. Louis, Missouri. As Executive Director, Mr. Duncan oversaw accounting, finance, human resources, IT, and communications for the organization. During his employment he earned his Master of Business Administration from the Olin School of Business at Washington University. Prior to joining CSWR, he spent two years as Director of Operations with NAPA Auto Tire & Parts, a partner-owned chain of auto parts stores, overseeing projects related to distribution, logistics, IT, and general management.

### Jake Freeman - Director of Engineering

Jake Freeman is the Director of Engineering of CSWR and has held this position since January 2019. As Director of Engineering, he oversees the engineering, surveying, and facility construction upgrades for all newly acquired CSWR water and wastewater utilities including those in Arizona, Arkansas, Florida, Kentucky, Louisiana, Missouri, Mississippi, North Carolina, South Carolina, Tennessee, and Texas. He also oversees ongoing capital upgrade projects on all CSWR affiliated and operated facilities.

After receiving a Bachelor of Science degree in Mechanical Engineering from the University of Missouri – Columbia, Mr. Freeman spent the first two years of his career working for Corrigan Mechanical, a design-build mechanical contractor in St. Louis, where he designed, estimated, and managed plumbing, HVAC and process piping construction projects in Missouri and southern Illinois. He then spent eleven years performing similar tasks for Brotcke Well & Pump, a well and pump service contractor servicing water wells and water treatment equipment throughout Missouri, Illinois, Kentucky, and Kansas. Prior to his employment with CSWR, he held the position of Vice President of Brotcke Well & Pump and Principal for their engineering services and managed their newly opened office in Kansas City.

### Jo Anna McMahon - Vice President of Government Affairs

Jo Anna McMahon is the Vice President of Government Affairs for CSWR. Ms. McMahon holds several top water and wastewater certifications throughout the country. She received her Bachelor of Business Administration degree from the University of Arkansas at Little Rock, and will be graduating in May 2023 with a Master of Business Administration degree from Washington University in St. Louis, Missouri.

Before joining CSWR, Ms. McMahon worked for both public and private utilities, respectively serving a both municipality and military installations. Ms. McMahon has extensive experience as both an Operations Coordinator and as a Specification Specialist.

In her previous position as Director for Environmental Health and Safety at CSWR, her responsibilities included managing daily operations of wastewater and water treatment facilities of various sizes ranging from 3,600 gallons per day (gpd) to 64,000,000 gpd. Throughout that time, Ms. McMahon led teams of operators in creating and executing infrastructure improvement plans, managing and developing employees, and providing a standard of excellence in customer service while keeping facilities and operations within regulatory compliance.

Ms. McMahon's previous employment equipped her with invaluable experience in water and sewer utilities. She has a wide range of firsthand experience in managing water and wastewater treatment facilities safely and in a financially and operationally sound manner.

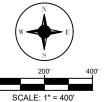

### **Chelsie Carter - Director of Customer Experience**

Chelsie Carter is the Director of Customer Experience at CSWR. Ms. Carter joined CSWR in 2021 as Customer Experience Manager and was promoted to Director level within seven months, leading an overhaul of the CSWR's customer service functions during a period of dramatic growth.

Ms. Carter first earned a Bachelor of Science degree followed by her Master of Business Administration from Lindenwood University. She has a strong background in training and management as well as extensive experience with utility providers. Prior to joining CSWR, she led the Accounts Receivable division at the St. Louis Metropolitan Sewer District, where she also served as the point of contact for dozens of major accounts. Areas of oversight included billing \$34M per month in customer invoices, customer service for 430k customers, processing an average of \$1M in payment remittance per day and collecting more than \$92M in delinquent accounts. Ms. Carter also spent 16 years with American Water, starting as the supervisor for the Customer Call Center and working her way up to Business Services Specialist. In this role she was the point of contact for the Public Service Commission on customer-related issues and resolutions. She has provided direction and supportfor several rate cases, acquisitions, and software implementations.

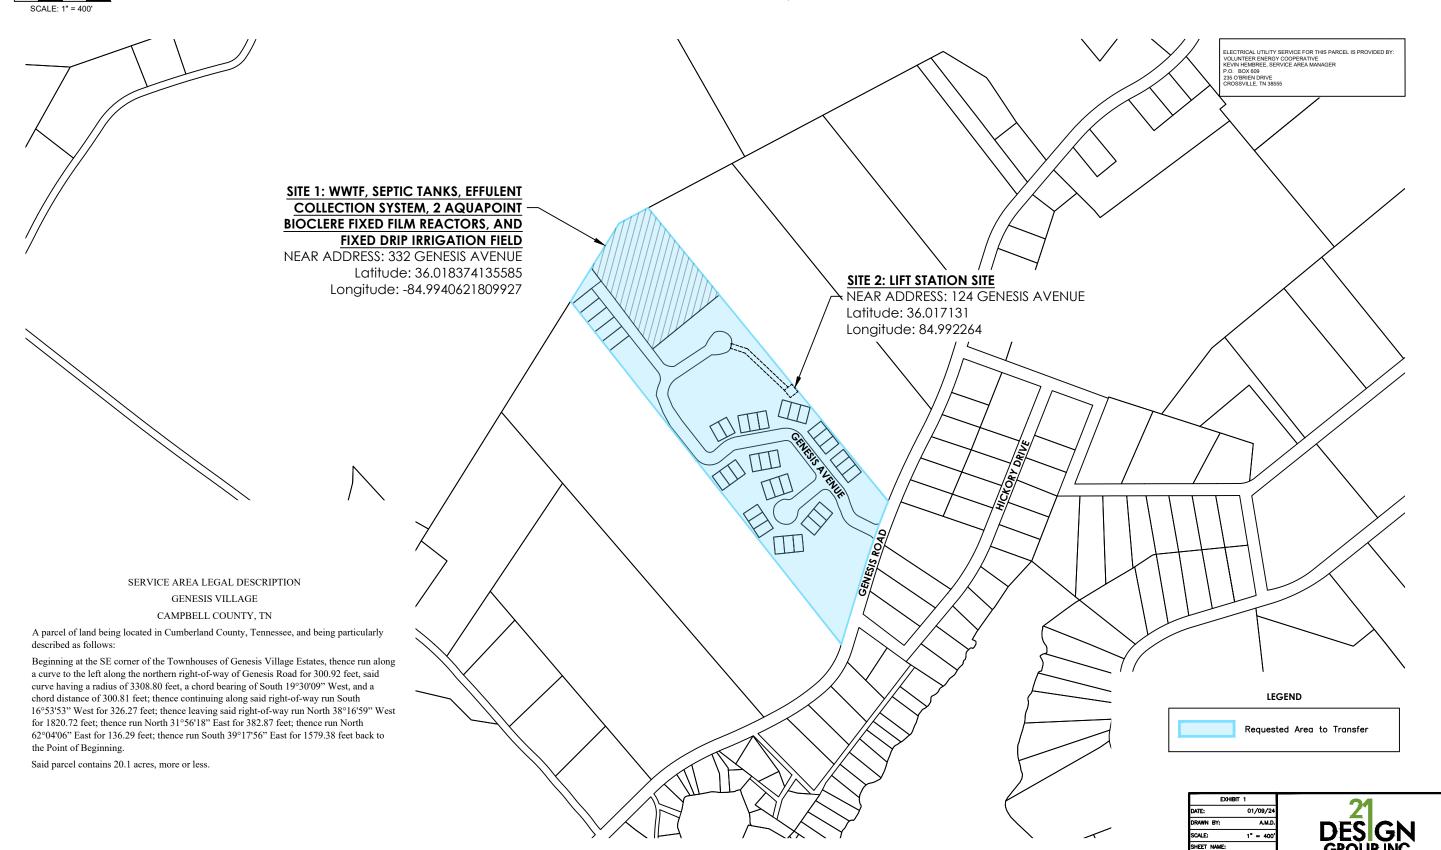

Since joining CSWR, Ms. Carter continues to oversee the entire customer life cycle, focusing on improving the customer experience in the areas of self-service, software systems and processes.

IN THE MATTER OF:	)	DIVISION OF WATER RES	OURCES
	)		
	)		
LIMESTONE WATER UTILITY	)		
OPERATING COMPANY, LLC,	)		
	)		
	)		
RESPONDENT.	)	<b>CASE NO. WPC22-0086</b>	

### **CONSENT ORDER AND ASSESSMENT**

This Consent Order and Assessment is entered into between the Department of Environment and Conservation ("Department") and Limestone Water Utility Operating Company, LLC ("Respondent"), for the purpose of resolving the issues set forth herein. The parties stipulate and agree as follows:

### **PARTIES**

I.

The Commissioner is responsible for administering and enforcing the Water Quality Control Act, Tenn. Code Ann. §§ 69-3-101 to -148 ("Act"). The Commissioner may delegate to the Director any of the powers, duties, and responsibilities of the Commissioner under the Act, Tenn. Code Ann. § 69-3-107(13), and has delegated such authorities to Jennifer Dodd.

II.

The Respondent owns and operates the Grasslands sewage treatment plant ("Plant") and the associated collection system in Williamson County, Tennessee. The Respondent is duly registered with the Secretary of State to conduct business in Tennessee. Process may be served on the Respondent through its Registered Agent, C T Corporation System, 300 Montvue Rd, Knoxville, Tennessee 37919.

### **JURISDICTION**

### III.

Whenever the Commissioner has reason to believe that a violation of the Act has occurred, is occurring, or is about to occur, the Commissioner may issue a complaint to the violator and the Commissioner may order corrective action be taken. Tenn. Code Ann. § 69-3-109(a). Further, the Commissioner has authority to assess civil penalties against any violator of the Act, Tenn. Code Ann. § 69-3-115, and has authority to assess damages incurred by the State resulting from the violation, Tenn. Code Ann. § 69-3-116. The Board of Water Quality, Oil and Gas ("Board") has promulgated rules governing general water quality criteria and use classifications for surface waters. Tenn. Comp. R. & Regs. Chapters 0400-40-03 and 0400-40-04.

### IV.

The Respondent is a "person" under the Act. Tenn. Code Ann. § 69-3-103.

### V.

Harpeth River and its tributaries constitute "waters" of the state and "streams." Tenn. Code Ann. §§ 69-3-103 (41) and (45). Harpeth River has been classified by the Board for the following uses: domestic water supply, industrial water supply, fish and aquatic life, recreation, irrigation, and livestock watering and wildlife. Harpeth River in Williamson County, Tennessee is included on the 2020 303(d) list of impaired streams due to elevated levels of total phosphorus and low concentrations of dissolved oxygen.

### VI.

Any person engaged in or planning to engage in the discharge of sewage, industrial wastes, or other wastes into waters, or to a location from which it is likely that the discharged substance will move into waters, must obtain and comply with a permit from the Department. Tenn. Code

Ann. § 69-3-108. Each permit requires a set of effluent limitations to indicate adequate operation or performance of treatment units used and to appropriately limit those harmful parameters present in the wastewater. Tenn. Comp. R. & Regs. 0400-40-05-.08. The permittee shall at all times properly operate and maintain all facilities and systems (and related appurtenances) for collection and treatment which are installed or used by the permittee to achieve compliance with the conditions of the permit. Tenn. Comp. R. & Regs. 0400-40-05-.07. It is unlawful for any person to violate the conditions of a discharge permit issued by the Department. Tenn. Code Ann. §§ 69-3-108(b) and -114(b).

### **FACTS**

### VII.

On August 30, 2021, the Division issued National Pollutant Discharge Elimination System (NPDES) permit TN0027278 ("Permit") to Cartwright Creek, LLC. The Permit became effective December 1, 2021, and expires November 30, 2026. A minor modification transferred the Permit to the Respondent on January 1, 2022. The Permit authorizes the discharge of treated domestic wastewater from Outfall 001 to Harpeth River at mile 68.8 in accordance with all effluent limitations and monitoring requirements set forth.

### VIII.

On May 17, 2022, Division staff conducted a Compliance Evaluation Inspection (CEI) of the Plant. Staff noted discrepancies in the operational monitoring data submitted for February, March, and April, 2022, and determined that information was not transferred accurately from laboratory bench sheets to Monthly Operation Reports (MORs) to Discharge Monitoring Reports (DMRs). Staff noted several other instances of reporting, transcription, and calculation errors, and that a Standard Operating Procedure (SOP) was not available on site for review.

During inspection of the treatment processes, staff noted significant corrosion of the above ground units, such that the structural integrity of the treatment unit walls and equipment was questionable. During an interview with Division staff, the operator stated that an inflow and infiltration ("I/I") project completed in 2019 and 2020 had improved I/I issues during the summer months, but not during winter months when rainfall was heaviest.

Staff observed that no influent screening mechanism existed. Inorganic material was removed by hand and disposed of in a dumpster, which was periodically hauled off site, and an "island" of inorganic solids remained in the aeration basin. Staff observed that the interior walls surrounding the digestor unit were rusted to the point where the unit was inoperable; digester function had been replaced by a polyethylene tank which held solids until they were trucked from the Plant. Staff noted that the clarifier was in poor condition: algae had accumulated on the weirs; no skimmer arm was present; grit, grease, pin floc, and debris floated on the clarifier surface.

Staff observed that chlorination and dechlorination processes were conducted in what was previously the above ground, "tertiary filtration" unit of the Plant. Staff observed grit and grease floating in the basin. In the interview, the operator stated that the internal components of this unit were removed years ago. Staff noted that the operator used chlorine gas for disinfection of effluent, manually adjusting chlorine dosing based on flow and the results of chlorine residual testing. The operator achieved dechlorination by similar manual dosing adjustments of sulfur dioxide gas.

During review of the laboratory and lab processes, staff observed that the temperature of the *E. coli* incubator was not within the correct range. Staff observed that the bottle containing distilled water was discolored and was contaminated with mold. Staff also observed dead insects in the pH storage solution cup. The cap on the meter used to measure dissolved oxygen (DO) was scratched, and no extra caps were available on site. A comparator, necessary for comparing *E. coli* 

test results to distinguish threshold positive results from negative results, was not available on site.

Staff found food and drink items next to lab samples in the same refrigerator.

#### IX.

On June 8, 2022, the Division issued a Notice of Violation (NOV) to the Respondent detailing the violations noted during the inspection of May 17, 2022. The NOV advised the Respondent that operation and maintenance of the facility must improve, and instructed the Respondent to:

- review MORs and DMRs for February, March, and April 2022, and make appropriate corrections;
- develop an SOP and keep it at the facility;
- change pH storage solution on a regular basis;
- change or thoroughly clean distilled water containers;
- keep a spare cap for the DO meter on site;
- purchase an IDEXX Quanti-Tray comparator;
- purchase a separate refrigerator for storage of lab samples;
- adjust the E. coli incubator to the proper temperature;
- on lab bench sheets, include the analysis method number, or reference the current edition of <u>Standard Methods for Water and Wastewater Analyses</u>.

The NOV further instructed the Respondent to submit a plan of action detailing the corrective actions necessary to address the violations and conditions noted to the Division by July 15, 2022.

X.

From January 2022 through July 15, 2022, the Plant incorrectly reported the following tests on its DMRs, resulting in non-receipt violations:

Parameter	Monitoring Period	Number of Test Values Incorrectly Reported
Carbonaceous BOD, 5-day	February 2022	2
	March 2022	4
	April 2022	3
E. coli	February 2022	2
Nitrogen, Ammonia Total	February 2022	2
	March 2022	4
	April 2022	3
Settleable Solids	February 2022	1
	March 2022	1
	April 2022	1
Chlorine, Total Residual	March 2022	1
	April 2022	1
Phosphorus, Total	March 2022	2
Suspended Solids, Total	April 2022	2
Total Violations		29

The Respondent submitted corrections for all these violations on June 21, 2022, following receipt of the NOV.

XI.

From January 2022 through July 15, 2022, the Plant reported the following effluent limitation exceedances on its Discharge Monitoring Reports:

Parameter	Effluent Exceedances
Carbonaceous BOD, 5-day	4
Chlorine, Total Residual	1
Nitrogen, Ammonia Total	5
Total	10

### **VIOLATIONS**

### XII.

By failing to properly operate and maintain the treatment facility (missing screening structures, digester, clarifier, tertiary filtration unit), failing to properly maintain laboratory

equipment, and manually adjusting chlorine dosing, the Respondent has violated the Permit, which states in relevant part:

Section 2.1.3 a

The permittee shall at all times properly operate and maintain all facilities and systems (and related appurtenances) for collection and treatment which are installed or used by the permittee to achieve compliance with the terms and conditions of this permit. Proper operation and maintenance also includes adequate laboratory and process controls and appropriate quality assurance procedures.

### XIII.

By discharging pollutants to waters of the state in excess of permitted effluent limitations, and by failing to properly report the results of required monitoring, the Respondent has violated the Act:

Tenn. Code Ann. § 69-3-108(b):

It is unlawful for any person, other than a person who discharges into a publicly owned treatment works or a person who is a domestic discharger into a privately owned treatment works, to carry out any of the following activities, except in accordance with the conditions of a valid permit:

(3) The increase in volume or strength of any wastes in excess of the permissive discharges specified under any existing permit;

Tenn. Code Ann. § 69-3-114(b):

In addition, it is unlawful for any person to act in a manner or degree that is violative of any provision of this part or of any rule, regulation, or standard of water quality promulgated by the Board of any permits or orders issued pursuant to this part; or fail or refuse to file an application for a permit as required in § 69-3-108; or to refuse to furnish, or to falsify any records, information, plans, specifications, or other data required by the Board or the Commissioner under this part.

### **ORDER AND ASSESSMENT**

### XIV.

Pursuant to sections 69-3-109, -115, and -116 of the Act, the Director orders, and the Respondent agrees, as follows:

For all payments submitted, please include reference to case number WPC22-0086.

- 1. The Respondent is assessed a total civil penalty of \$63,264.00. The Respondent shall pay \$10,544.00 to the Division as an upfront allocation of this penalty on or before the thirty-first day following the effective date of this Order. The remaining \$52,720.00 shall only become due if the Respondent fails to comply with Items 2-6, listed below:
- 2. On or before the ninetieth day following the effective date of this Order, the Respondent shall develop and submit to the Division for approval an SOP for the monitoring of operational parameters at the Plant. The SOP shall include processes for the collection of samples, recording of sample data, maintenance of monitoring records, maintenance of laboratory stores and equipment, and appropriate quality assurance/quality control practices, according to EPA-approved procedures. The approved SOP shall be kept on the Plant premises available for review. If the Respondent fails to comply with this Item, the Respondent shall pay \$ 231.00 to the Division for each day the SOP is late, not to exceed a total of \$6,930.00.
- 3. On or before the ninetieth day following the effective date of this Order, the Respondent shall submit to the Division a corrective action plan / engineering report (CAP/ER) describing all steps necessary to address the degraded conditions of treatment structures, laboratory conditions, observations noted in section VIII above, and the effluent limitation exceedances listed in section XI. The CAP/ER shall include a schedule with a specific date of completion for each action. Any changes or modifications to the CAP/ER requested by the Division shall be submitted by the Respondent within 30 days following the request. Final completion of all actions in the CAP/ER shall not exceed three years from Division approval. If the Respondent fails to comply with this Item, the Respondent shall pay \$232.00 to the Division for each day the CAP/ER is late, not to exceed a total of \$6,960.00.

- 4. Upon Division approval of the CAP/ER, each milestone date of the project schedule shall become an enforceable component of this Order. For each calendar quarter ending March 31, June 30, September 30, and December 31 the Respondent shall write a concise progress report detailing the actions taken to that point. The Respondent shall submit each report to the Division not later than the fifteenth business day of the month following the end of the previous quarter. If the Respondent fails to comply with this Item, the Respondent shall pay \$575.00 for each quarterly report that is late, not to exceed a total of \$6,900.00.
- 5. Within 180 days following completion of all measures in the CAP/ER, the Respondent shall submit a Final Report to the Division for approval. The Final Report shall describe the completion of each scheduled action and shall include a detailed study evaluating the success of the CAP/ER in achieving substantial compliance with the Permit. If the Respondent fails to comply with this Item, the Respondent shall pay \$231.00 for each day that the Final Report is late, not to exceed a total of \$6,930.00.
- 6. For one year following completion of the CAP/ER, the Respondent shall maintain substantial compliance with the Permit. If the Respondent fails to comply with this Item, as evidenced by effluent violations on the Discharge Monitoring Reports, the Respondent shall pay \$5,000.00 per effluent violation, not to exceed a total of \$25,000.00.

All payments shall be made payable to the "Treasurer, State of Tennessee" and sent to the Division of Fiscal Services - Consolidated Fees Section, Tennessee Department of Environment and Conservation, 10th Floor Snodgrass Bldg., 312 Rosa Parks Avenue, Nashville, Tennessee

37243. The case number, **WPC22-0086**, should be written on all correspondence regarding this matter.

This Order shall be considered closed one year after Division receipt of the Final Report, so long as the Respondent has complied with all Order requirements, all penalties owed have been paid, and the Respondent is in substantial compliance with the Act.

The Effective Date of this Order shall be the date it is signed by Jennifer Dodd, Director of the Division of Water Resources. The Department may, for good cause shown, extend the compliance dates contained within this Order. To be eligible for this time extension, the Respondent shall submit a written request to be received in advance of the compliance date. The written request must include sufficient detail to justify such an extension and include at a minimum the anticipated length of the delay, the precise cause or causes of the delay, and all preventative measures taken to minimize the delay. Any such extension by the Department will be in writing. Should the Respondent fail to meet the requirement by the extended date, any associated civil penalty shall become due 30 days thereafter.

Failure to comply with any of the requirements of this Order could lead to further enforcement actions, which may include additional civil penalties, assessment of damages, and/or recovery costs.

### **DEPARTMENT'S RESERVATION OF RIGHTS**

In entering into this Consent Order, the Department does not implicitly or expressly waive any provision of the Act or the regulations promulgated thereunder or the authority to assess costs, civil penalties, and/or damages incurred by the State against the Respondent. The Department expressly reserves all rights it has at law and in equity to order further corrective action, assess civil penalties and/or damages, and to pursue further enforcement action including, but not limited

to, monetary and injunctive relief. Compliance with this Order will be considered as a mitigating factor in determining the need for future enforcement action(s).

### WAIVER OF RIGHT TO APPEAL

The Respondent understands that it has the right to appeal this Order pursuant to sections 69-3-109, -115, and -116 of the Act. By signing below, the Respondent knowingly and voluntarily waives any right it may have to appeal this Order.

### **RESPONDENT'S RESERVATION OF RIGHTS**

The Respondent does not admit or deny the factual allegations or the alleged violations of law contained in this Order. The Respondent reserves its rights to contest the factual allegations and alleged violations contained in this Order in any proceeding other than a proceeding brought by the Department to enforce the terms of this Order.

### **AUTHORITY TO SIGN**

The undersigned representatives of the Department and the Respondent represent and warrant that they are fully authorized and competent to execute this Consent Order and Agreement on behalf of the entity for which they are signing.

Agreed to by Limestone Water Utility Operating Company, LLC, as evidenced by the signature below, and issued by the Director of the Division of Water Resources, on this 13th

day of February , 2023.

Jennifer Dodd, Director Division of Water Resources Department of Environment and Conservation

image003.png

#### Good morning Jake,

The schedule you provided will fulfill the order requirement for a Corrective Action Plan. If construction occurs according to the schedule and is complete by July, 2026, this is in line with the schedule we had originally outlined in the order. If you will continue to submit quarterly reports of progress for the project, that will keep everything on track.

If you happen to run into permitting issues or other delays, please provide a written request for extension of compliance dates, with expected dates of completion and an explanation of the causes of delay. I can then submit the request and extend the order as needed.

Thank you,

-Mike

Michael,

Our engineers have been working on the schedule and we are planning to review it this week so I hope to have you something this week still. Thanks for your patience.

Subject: Proposed timeline and extension request - WPC2-0086 Grassland STP

Good morning Jake,

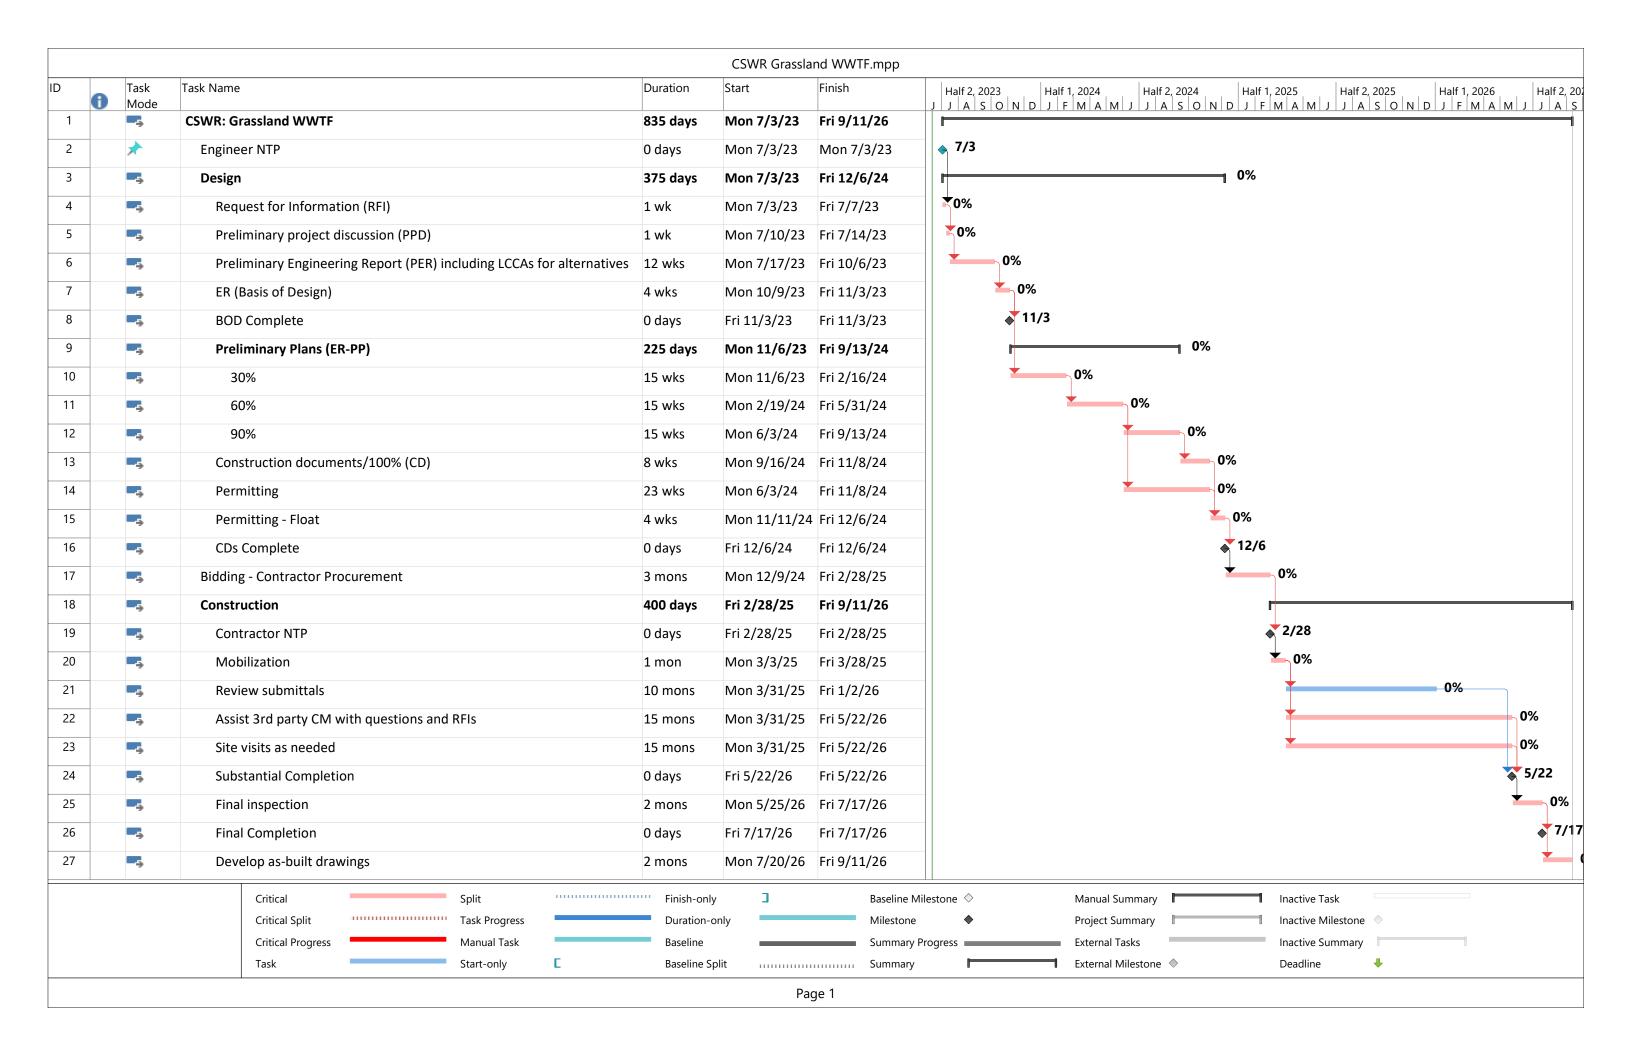

Any developments on the proposed timeline for the "4-step process" we discussed previously

regarding the Grassland facility upgrade? Once I receive the proposed timeline, I can begin work on the extension of compliance dates for this order.

Thanks, and have a great day, -Mike

**Subject:** RE: Agua Utilities TN0000948 PbCu Customer Notice Certification

**Date:** Thursday, January 4, 2024 3:30:39 PM

Attachments: image002.png

#### Good afternoon Isabel,

The documentation you provided satisfies the requirements requested in the letter sent Nov. 30, 2023, and your system is within compliance. No further action is needed for the 2023 Lead & Copper Monitoring period.

Please keep in mind that the Lead Service Line Inventory due date (Oct. 16, 2024) is quickly approaching, and initial inventories may change the type of sampling schedule your system is on for Lead & Copper Monitoring. After the review period for the Lead & Copper Rule Improvements is over we will have more clarity on what changes will be final. Until then the next Lead & Copper Monitoring period for Aqua Utilities (TN0000948) is summer 2026.

If you have any questions, please feel free to reach out.

## Thank you,
